HONOR TO WHOM HONOR IS DUE

City of Sun, Baltimore, Md. Feb. 1st, 1908.
Honor to whom honor is due. I must tell you of my success with
I·X·L Tomato last year. For twenty years, I have raised
tomatoes for this market, and I think I have tried every new
variety that has come out in that time, but I never saw one that
compare with the I·X·L. I sold mine for forty cents per dozen
before any one else had them even grown, much less selling. I
sell them ten days earlier than any I know of. My garden is
atn road leading into this town, and my tomatoes were a
the pasters by.

GARDEN FIELD, FLOWER AND LAWN SEEDS

"MY MARYLAND"

Bolgiano's Wonderful New Tomato

My Maryland Bolgiano's Wonderful New Tomato.

King of Them All. Has Surpassed The Best Yielding Tomato In The World More Than 100%—A Marvelous Double Yelder

Side by side it has produced three times the crop produced by the Stone or New Century—it has even doubled the yield of the Greater Baltimore Tomato.

The vast possibilities of this New Tomato are astounding. We believed in Greater Baltimore Tomato the limit of productiveness had been reached, but "My Maryland" so far outyields any other Tomato ever grown that its remarkable productiveness is amazing.

People have driven miles to see a field of "My Maryland" Tomatoes and they all marveled at the prodigious abundance of the crops it had produced. The fields were literally covered with the finest well-shaped, perfectly formed, solid, smooth, bright red, uniform fruit, all free from roughness and cracks, much larger than any they had ever seen before. It was called then and there "A Winner" and it well deserved the title. The Tomatoes are much larger and far heavier than either the Greater Baltimore or The New Century. By most careful re-selections for four years, we have thoroughly

established the purity and trueness of "My Maryland" Tomato, and are delighted to be the Introducer of a tomato which from start to finish is "King of Them All." A real "Double Yelder" that will be known as the Best second early and main crop tomato-the world over-in less than a year. Supply of Seed is limited. To be sure of securing some place your order as quickly as possible. Pkt. 25c. $\frac{1}{2}$ Oz. 60c. Oz. \$1.00. $\frac{1}{4}$ Lb. \$3.00. Lb. \$10.00.

Bolgiano's Tomato Seeds Are Used Largely By Successful Canners

The Loudon Packing Co., of Vigo Co., Ind., on August 23rd, 1909 writes as follows. Your favor of 20th. to hand. Please enter our order for 10 lbs. of "My Maryland" Tomato Seed and 50 lbs. of Greater Baltimore Tomato Seed.

FOUR GENERATIONS OF UNBROKEN SUCCESS IN THE SEED BUSINESS

THE TEST OF HONOR

We test every grain of Seed we sell—carefully trained men of many years experience, conscientious men who hold Honor, Integrity and Fair Dealings above everything else on earth—such men as these grow Bolgiano's Trustworthy Seeds.

Bolgiano's Trustworthy Seeds are grown from the purest, truest and most carefully bred seed stocks in the world—stocks that we would not part with at any price.

The men who grow Bolgiano's Trustworthy Seeds, know how pure and true our stocks are—92 years of experience has taught us to know which of our growers have stood the greatest of all tests—"The Test of Honor."

99 times out of 100 the Seeds you buy will be Trustworthy Seed, Pure and True, if the House and—the Growers behind the House are Trustworthy.

Our chief ambition for 1910 is to make happier and more prosperous every customer of our House.

We fully realize that every purchase of seed from us, no matter how small, clearly shows confidence in us and our Seed, this confidence we appreciate and respect and will do everything in our power to prove worthy of it.

In addition to the all important Test—"The Test of Honor" we make thousands of tests each year in our Hot Houses, on our Test Farm and in our Special Apparatus for Germinating Seeds.

We feel a deep responsibility to our thousands upon thousands of friends and customers, our business has had an enormous growth and with it has come wider fields of usefulness and we are now fully prepared to faithfully serve you another season.

Wishing you a very pleasant and profitable year, we remain

Yours respectfully,

J. BOLGIANO & SON.

HOW TO ORDER BOLGIANO'S SEEDS

We Fill Orders of all Values, from the Smallest to the Largest, and All Receive the Same Careful and Prompt Attention FREE DELIVERY BY MAIL. We deliver free to any postoffice in the United States all vegetable and flower seeds offered in this catalogue by the packet, ounce, quarter-pound and all varieties of Tomato Seed in any size package, including pounds. On all other seeds for half-pounds and upwards add 8 cents per pound.

When Best to Order. We are fully equipped for filling orders, and supplied with New Crop Seeds. Order at once, so that you can have your seed on hand ready to start planting your crops at the proper time without delay.

Send by mail if you cannot get to see us. We will send you Seeds that have been saved with great care. You will be pleased with the crops, and satisfied with our prices

Use Our Order Blank If You Have One. If you haven't one, use any plain paper.

Tell Us In Your Own Way What You Want, in any language, always giving the Catalogue Number of each article. Enclose in your letter the amount of money, either a post-office money order, which you can get at the post-office, an express money order, which you can get at the express office, or a draft, which you can get at any bank; or put the money in your letter, take it to the post-office and tell the postmaster you want it registered.

The Cost of Your post-office or express money order may, on all orders over \$1.00 be deducted from the amount sent.

Postage Stamps, we will accept postage stamps the same as cash.

If You Live on a Rural Mail Route, just give the letter and the money to the mail carrier and he will get the money order at the post-office and mail it in the letter for you.

Don't Be Afraid You Will Make A Mistake. We receive many orders from young and old who never before sent away for seeds. We are accustomed to handling all kinds of orders. No matter whether your order is in good or bad writing we will promptly fill it and send it to you.

Don't Be Afraid of the Express or Freight Charges. By our guaranteeing the expressage all the express lines in the United States and Canada, in the traffic agreement, are now carrying seeds at a reduced rate of 20% less than merchandise rates. Neither the freight or expressage will amount to much compared with what we save you in cost.

GUARANTEE. We Guarantee All Shipments of Seed, when remittance accompanies order, to reach the purchasers safely and in good condition.

Change of Address. If you have changed or intend to change your address, please let us know, and we will change it on our books, so that you will receive our Catalogue at your new Post-Office.

Be Sure to Sign Your Name and Address. If by boat or railroad say distinctly which boat or railroad to ship by, and if freight has to be prepaid add this amount to your order to prevent delay.

AS TO WARRANTY, We Believe Our Seeds, will produce for you the best crops you have ever grown, and to show you what confidence we have in our Seeds, if they prove otherwise than represented by us, we will refill your order free of charge; but it must be agreed that we do not warrant the crops grown therefrom, either express or implied, as to description, purity, productiveness or any other matter and we will not be, in any way responsible for them. If the purchaser does not accept our seeds, etc., on these terms they are at once to be returned and the money that has been paid for the same will be refunded.

We appreciate your orders and they will receive our prompt attention.

If You Are Satisfied With Us, with the goods you receive, the treatment we give you and your general business relations with us, will you do us the favor of mentioning the fact to some of your neighbors? If we can please you we can please others, and we assure you that we will be careful to make your friends more than satisfied with the experiment.

Market Gardeners, Farmers' Clubs and Institutions wanting to purchase Seeds in unusually large quantities should write for special prices. We have made prices very low in this Catalogue, yet when a number of bushels or pounds are wanted we can frequently supply at lower price than by the single pound or bushel. In writing give us a list of quantities and varieties required and we will return list promptly with our lowest price for the lot.

Always Remember that We Can Save You Money, No Matter Where You Live. Write us about any seed you would like to know of, and your letter will be answered the same day it is received. If you wish to know exactly what the freight or express would be on any article to your station, write us and we will tell you.

Prices in this Catalogue are Subject to Market Changes, Special Quotations Promptly Given.

How to Order, Seeds to Sow each month, see on this page.

Bolgiano's Extremely Early Wonderfully Prolific I. X. L. Tomato

A week earlier than the Earliana. More productive than the Chalk's Jewel. As large as the Great B. B. As solid as the New Century. In fact, the world's leading Extra Early Tomato.

277. In Market Gardener's Field Tests, I. X. L. Tomato proved to be a week to ten days earlier than the Spark's Earliana, with an abundance of Fruit larger and more prolific than Chalk's Jewel, in fact any number of specimens could be found as large as the Great B. B. Tomato. It has a little more vine and leaves than the Wealthy Tomato, thus protecting the blossoms from being easily knocked off, by heavy rains or winds; also protecting the fruit from being sunburned or scalded. The I. X. L. Tomato is without a single exception the Leading Extremely Early Tomato, and while many of the most Experienced Tomato growers tell us we cannot say too much in favor of this Excellent Early Tomato, there are many who have not yet grown it. To them, we say again, do not experiment with it but plant your entire early crop in I. X. L. Tomato, your crop will net you big returns. We stake our reputation on I. X. L. TOMATOES. Below we give in a concise form the most striking features of this Tomato.

1. EARLIEST, LARGEST, ABSOLUTELY SMOOTH TOMATO ON EARTH. A week earlier than the "Earliana," and as large as the "Great B. B."
 2. A beautiful, brilliant red color.
 3. Vines are a perfect mass of large, smooth fruit, a single plant yielding $\frac{1}{2}$ bushel.
 4. Fruit is extremely early, enormously abundant and ripens all at once.
 5. Vines very compact and can be placed two feet apart in three foot rows.
 6. As an extremely early prolific stem setter it is a wonder.
 7. The absence of unnecessary leaves permits all the fruit to ripen so remarkably early.
 8. It is almost like finding money to grow the I. X. L. TOMATO.
 9. The largest growers tell us we cannot say too much in favor of the I. X. L. Tomato.
 10. In Six Years it has never disappointed a grower.

Ten Pounds I. X. L. Tomatoes To The Plant.

J. B. Hancock, Gatevel Co., Texas, writes May 26th, 1909.—"I am now gathering the finest crop of Tomatoes I ever saw. They are from your I. X. L. Tomato Seeds. Single plants have as much as 10 pounds of fruit."

What A Wonderful Victory.

H. W. Slamps, Floyd Co., Ga., writes Feb. 25, 1909.—"After trying all the other leading early varieties of the most prominent Seed Growers in the country, I am forced to the conclusion that the I. X. L. is the earliest, smoothest, most prolific and best flavored Tomato grown. Its merits cannot be exaggerated."

Win With Odds Against Them.

C. D. Brown, Lawrence Co., Ohio, January 20th, 1909.—"Your I. X. L. Tomatoes are alright. Last year under adverse conditions of season they were winners over all others for earliness and quality."

600 I. X. L. Plants—Produce Over 300 Bu. I. X. L. Tomatoes.

U. S. Grant Reynolds, Ocean Co., N. J., writes March 12th, 1909.—"I set out about 600 of your Extremely Early I. X. L. Tomato Plants last Spring, sold 314 half bushel baskets and that was only half that was on the vines. They are the best Tomatoes I ever saw."

I. X. L. Tomatoes Better Than We Claimed.

"L. B. Belk, Manatee Co., Fla., writes July 21st, 1909.—I used your I. X. L. Tomato Seed this season and can truthfully say that you do not say half enough for them. My crop was a success in every particular."

I. X. L. The Earliest.

Wm. L. Dove, Rockingham Co., Va., writes August 6th, 1908.—"The I. X. L. Tomato I bought from you last year was the finest I ever saw. I had Tomatoes' way ahead of my neighbors."

**GOLDEN OPINIONS
BOLGIANO'S "I. X. L." TOMATO**

311 Crates From 21 Rows.

On Nov. 25th, 1909, Mr. L. B. Belk, of Manatee Co., Fla., writes as follows:—"I planted your I. X. L. Tomato Seed last season and made a fine crop. I found them the most prolific I ever planted. I raised 311 crates of Tomatoes on 21 rows 52 yards long. I have a great many truckers who want to plant the I. X. L. next season."

136 Marketable Fruit On 1 Stalk

Mr. H. L. Musser of Southern California, writes, Sept. 13th, 1909.—"Your I. X. L. Tomato certainly excels anything for productiveness we have ever seen. We had one cluster of 12 tomatoes, all a good marketable size, and smooth. We counted 136 marketable size tomatoes on one stalk. Grown side by side with the Earliana, it is earlier and will easily outyield it three to one."

Not The Cheapest But Outyield All Others

C. D. Elam, Alachua Co., Fla., writes Jan. 28th, 1909.—"I can buy tomato seed cheaper here, but I like your seed the best. Your I. X. L. tomato yielded so great, I like them. They outyield any tomato I ever tried."

The Earliest In Texas

A. L. Lemack, Anderson Co., Texas, writes Jan. 15, 1909.—"I tried your I. X. L. Tomato last season, and they are far ahead of any early Tomato I have ever used."

He Was In The Dark

F. L. Musser, Smyth Co., Va., writes Feb. 22, 1908.—"Please send Mr. John R. Honaker your catalogue. He was telling me about the tomatoes he raised last year. I told him he was in the dark about raising early Tomatoes and would continue to be until he tried Bolgiano's I. X. L. Tomatoes."

They've Had I. X. L. Before.

The Loudon Packing Co., of Vigo, Co., Ind., on Aug. 28th, 1909, writes as follows: "Please enter our order for 10 lbs. Bolgiano's I. X. L. Tomato Seed."

Done So Well—He Wants More

B. F. Vandervate, Jr., Davies Co., Ill., writes Jan. 27th, 1909.—"As your I. X. L. Tomato done so well for me, I herewith send you another order for more, and also for other seeds."

Best He Ever Saw

H. E. Benech, Edgefield Co., S. C., writes March 3rd, 1909.—"I have decided to plant more of your I. X. L. Tomato. It is the best early Tomato I ever saw."

Complimented Their Smoothness and Beauty

Lee Rauneberger, Frederick Co., Md., writes Feb. 17, 1908.—"I write a word of praise for your seed, especially your I. X. L. Tomato. They are the best I ever raised and the most prolific. Everyone who saw them complimented on their smoothness and beauty."

A Pleasure to Buy I. X. L. Tomato

Henry T. Wiser, Jefferson Co., Kentucky, writes Jan. 24th, 1908.—"I take pleasure in sending another order for your I. X. L. Tomato Seed. Those which I received last year were perfectly satisfactory and I have recommended your seed to my neighbors. This order is mostly for others who wish to try your I. X. L. Tomato."

The Earliest in New York

Edward Denison, Jefferson Co., N. Y., writes March 21st, 1908.—"Please send the enclosed order for your I. X. L. Tomato. We had some last season and they were very early. We had tomatoes before anyone else in the village."

Didn't Plant Enough I. X. L. Tomatoes

George Link, Anne Arundel Co., Md., writes.—"If your I. X. L. Tomato seed is the same stock you sold me last Spring I want some more of it. They are the heaviest yielding Tomatoes that were ever known. If I had planted my whole crop in I. X. L. Tomatoes I would have been worth \$2000 more money today than I am."

Ground Was Covered With Them

D. P. George, Pender Co., N. C., writes.—"I wish you could have seen the I. X. L. Tomatoes. The ground was covered with them. I never saw as many on bushes in my life."

All Through When Others Start

H. C. Kennedy, Garfield Co., Oklahoma, writes Feb. 18th, 1908.—"Oklahoma has never had any reputation as a Tomato country. Some people can hardly raise them at all. Some varieties do fairly well, while others blight, drop their bloom, and make nothing in time to escape frost, but the I. X. L. is certainly a success in Oklahoma."

My tomatoes came early, I got a good price for them, and by the time others got to market, I was ready to step down and out."

Made Most Money Out of I. X. L.

Fred Gillespie, Baltimore Co., Md., writes.—"I had a fine crop of I. X. L. Tomatoes this Spring. They were very early, large, smooth, nice shape. They held their size so well I was able to pick a long time. Made more money out of I. X. L. Tomatoes than any other crop on my farm. I find it the best of all the Early Tomatoes."

**TRIBUTES OF PRAISE
BOLGIANO'S "GREATER BALTIMORE"
TOMATO**

About 20 Tons To The Acre

Maffet Bros., York Co., Pa., April 3rd, 1909, writes.—"From the Greater Baltimore Tomato seed we bought from you last year, we raised 1256 bushels on two acres. Much the largest yield in our neighborhood. 1256 bushels were sold and we used quite a number of bushels at-home. Our success attracted our neighbors, so this order includes seed for ourselves and three of our neighbors."

King Of Them All

W. H. Bowe, Muscogee Co., Ga., writes Jan. 19, 1909.—"I think your 'Greater Baltimore' Tomato is the King of them all."

Outlasts Stone Tomato Two Weeks.

Oct 28th, 1909, Mr. Miles Rausch, of Union Co., N. J., writes as follows: I drop a line about your Greater Baltimore Tomato seed. Sowed them in my Green House and set out 400 plants on the 20th day of May and I picked Tomatoes up till October 8th, and they are the finest tomatoes that I ever grew. They are such fine large tomatoes. I set the Greater Baltimore next to a patch of Stone Tomatoes and they outlasted the Stone Tomato by two weeks. Both kinds were set out on the same day, May 20th.

Wet Weather or Dry Weather

J. N. Stansbury, Anne Arundel Co., Md., writes Aug. 11th, 1908.—"I have grown 'Greater Baltimore' Tomato for several seasons, and neither wet weather nor dry weather affected its yield. I would sooner have them than any other tomato I have ever used, for they are immense yielders and the finest quality."

The Greatest Yields

Z. Fountain, Caroline Co., Md., writes Feb. 12, 1908.—"Your Greater Baltimore Tomato is the greatest yielder I have ever seen. The ground was covered with splendid red tomatoes. Your seeds have all done well for me."

Large Tomatoes—Even the Last Picking

Jos. B. Raymo, Port Antonio, Jamaica, writes June 1st, 1909.—"I am greatly satisfied with the product of your Greater Baltimore Tomato. They produce the largest fruit from the first until the last tomatoes are picked from the plant. Then too, they are bug proof."

The Finest He Had Ever Grown

Thos. S. Johnson, Decatur Co., Fla., writes Jan. 6th, 1908.—"I have been using your seeds for several years and think your Greater Baltimore and famous I. X. L. are the finest Tomatoes I have ever grown. I used a great many of both last season."

Right From The Garden State

A. G. Donald, Burlington, Co., N. J., writes Aug. 5th, 1908.—"I am very much pleased with both the I. X. L., and Greater Baltimore Tomato I bought from you last spring."

800 Crates From 1 3-4 Acres Sold For \$2,400

Thomas S. Johnson, Polk Co., Fla., writes.—"Your 'Greater Baltimore' Tomato I planted last season, is the finest I have ever planted. I shipped about 800 crates from 1 3/4 acres, some sold in Boston by J. D. Mead & Co. for \$3.00 a crate. I recommend it unreservedly to the growers of this section. I planted five different varieties and the 'Greater Baltimore' led them all. You can put me down for 'Greater Baltimore' next season."

Had Them Ahead Of His Neighbors

Wm. L. Dove, Rockingham Co., Va., writes August 6th, 1908.—"Your seeds are the best I have ever bought. The 'Greater Baltimore' Tomato I ordered from you last year was the finest I ever saw. I had tomatoes, way ahead of my neighbors."

14 Tons To The Acre—Not a Mixed Seed

A. Wilkins, Sussex Co., Del., writes Feb. 27th, 1908.—"I used your Greater Baltimore Tomato last year, and raised 14 tons per acre, and if the seed you send this year, are as true to name as they were last year, I will be satisfied, for there was not a seed of another variety in the lot."

Ten Days Earlier Than Stone

Watson Bros., Cumberland Co., N. J., writes.—"We are partial to the 'Greater Baltimore' Tomato as they mature about a week earlier than the Stone Tomato."

Entirely Free From Blight

S. M. Johnson, Dorchester Co., Md., writes.—"The 'Greater Baltimore' Tomato that I used last season from your seed is entirely free from blight, and the largest yielder by half that I have ever used. There can't be anything better; as you have my order I can say no more."

279

BOLGIANO'S "GREATER BALTIMORE" TOMATO

1. Greater Baltimore Tomato is the highest mountain top of success in tomato growing.
2. Just doubles yield of the best cropping tomato you have ever grown.
3. Smooth, well-formed and deep from stem to blossom.
4. Its extremely heavy weight is due to its firmness and great meatiness.
5. It ripens evenly to the stem and is entirely free from ridges, cracks and blight.

After several seasons have passed, and the "Greater Baltimore" Tomato has been grown in almost every state in the Union, and in many Foreign Countries it is almost impossible to give a description of its merits without seeming to claim for it Supernatural Powers; so in describing it, we will, as far as practical, confine ourselves to extracts from the experience of those who have grown the "Greater Baltimore" during the past years.

A Florida man writes "It is the finest Shipping Tomato ever sold,—tested side by side, and shipped side by side with five leading varieties—it beat them all." Another writes "Out of 15 Red varieties it was the best of all." "Very prolific—it yielded from 300 to more than 650 bushels of 60 Lbs. per acre." One man raised 17,000 plants from ¼ Lb. of "Greater Baltimore" Tomato Seed. "Vigorous grower," strong healthy plants. Fruit uniform in shape and size, solid, large, very regular, smooth, shapely, fleshy, very meaty, ripens well and evenly. Beautiful bright red color, fruit very handsome, dozens weighing 30 ounces, and several exceeding 32 ounces. Seed planted a month later than "Duke of York" produced shipping fruit two weeks before that variety was ready. "Fine crop in bad season." Excellent keeper—has kept until New Year's Day. Rust and blight proof. Recommended unreservedly by a grower for "the section around Lakeland, Fla." Had proved better than any variety tried at Picton, Canada. "Stands the heat and drought of Mississippi." "Very valuable for South Carolina climate." In the canning districts of Delaware and Maryland "yielded a fine crop in a bad season." Texas says there is no better tomato in size and taste on the market; not an acid tomato—very fine flavored. As a home garden Tomato "the results have been far beyond expectations." On our own table we sliced the "Greater Baltimore" Tomato like we would slice a fine tender roast beef. We have had a good seed crop and have lowered our prices accordingly.

Arkansas Agricultural Experiment Station.

FAYETTEVILLE, ARKANSAS.

In reply beg to state that no tomato upon our experimental grounds has given the satisfaction that we have gotten from "Greater Baltimore." It is early, prolific, hardy, of excellent quality and is fruiting longer and more satisfactory than anything else we have.

We thank you for calling our attention to this fine fruit. It should be largely planted by vegetable gardeners as well as for other commercial and family purposes.

Yours truly,

W. C. Vincenheller, Director.

AGRICULTURAL EXPERIMENT STATION.

State College, Centre Co., Pa., Aug. 27, 1906.

Our conclusion then is that "Greater Baltimore" is a fine variety, large, solid, uniform in shape and size—and very productive—and worthy of dissemination.

Very truly,

J. P. PILLSBURY, Asst. Horticulturist.

6. Unrivalled shipper, due to its solidity and firmness.
7. Fruits in large clusters at every second joint, joints are short and sturdy.

Mr. Cross, Supt. Kenish Canning Co., Davish Co., Utah, writes. "In reply to your inquiry, will say I planted the "Greater Baltimore" in fifteen different fields separate from our Stone and that in every section and every field they ripened about ten days earlier than any other, they ripen even to the stem, are very solid, also prolific and of a beautiful deep red color. I consider them an IDEAL TOMATO for both grower and canner.

Bolgiano's "Enormous" Extra Early Bush Lima Beans

1035. This wonderful new Lima is the earliest, largest and best of all large Limas; the vigorous bushes are crowded with enormous pods. The delicious green beans are larger than any other Lima Beau. It yields continuously from June until frost. Both the pods and the luscious flavored beans are much larger, and considerably thicker than the Large Bush Lima. The plants grow upright about 30 inches high and 24 inches across, with luxuriant sheltering foliage and are very sturdy. Often five to eight pods measuring five to six inches long by 1½ inches wide are borne in clusters on one stalk. The shelled beans either green or dry are nearly twice as thick as the Large Bush Limas. "Enormous" Bush Limas will outyield Large Bush Limas by 33¾ per cent., on account of the greater size of both pods and beans. The Seed Beans are greenish and very handsome while the dried beans of the Large Bush Limas are pure white. Pt. 30c. Qt. 50c. 4-Qts. \$1.75. Pk. \$3.00. Bu. \$12.00.

Fordhook Bush Lima

The only stiffly erect bush form of the popular "Potato" Lima. Both pods and beans are twice the size of Dreer's Bush Lima and more than half again as large as the Dreer's Pole Lima

1119. Fordhook Bush Lima is altogether unique. Nothing like it has ever been seen before. Of strong, erect, true bushlike growth, never running, the bushes average 20 to 30 inches in height by 20 to 24 inches across the top. The foliage is of heavy texture and very dark green in color. The stalks that produce the blossoms are thrown out from the lateral and main stalks; the pods are borne in "clusters" of from four to eight. The pods resemble those of the Dreer's Bush Lima, but average more than double the size, measuring from 4 to 5½ inches long, about 1¼ inches wide, by as much as three-fourths of an inch thick. The pods contain three to five large beans with an average of four.

Fordhook Bush Lima is fully 33¾ per cent. heavier cropper, and therefore, is bound to entirely displace the Dreer's Bush Lima. In season it is from four to six days earlier. Pt. 25c. Qt. 40c. 4-Qts. \$1.35. Pk. \$2.50. Bu. \$10.00.

"Bonfire" Bolgiano's New Very Early Beet

295. Entirely new and distinct, the bulbs develop in a remarkably short time and can be used or sold when very young. Absolutely perfect in shape, almost round and of good size with a very slim tap root. The small green colored leaves are ribbed dark crimson. Color of both skin and flesh is an unusually deep rich blood crimson. "Bonfire" Beet holds this splendid color when cooked, making them very valuable for canning, pickling, and simply perfect for table use. "Bonfire" Beet in quality and color is without an equal. It is very fine grained, tender and sweet; it is never woody or stringy. There is a treat in store for you if you plant some of this new beet. Seed is in very limited supply. Pkt. 10c. The Best Beet That Grows

For Nine Years This Splendid Beet has Led All Others

Fordhook Bush Lima 18. Our long experience in the growing of Beets has shown this new strain of Beet to be the Extra Early Deep-Blood Turnip Beet. Its small upright growing tops, extra early maturing, splendid shape and deep crimson color make it popular with everyone. The rows may be grown close together. Stem and veins dark red, blade green. Roots are globular and peculiarly smooth; color is of blood red, very crisp, tender, fine-grained and sweet, remaining so for a long time. We believe this excellent new stock will produce a crop more uniform in shape, color and quality than any Beet ever placed in the hands of the Trucker. Pkt. 5c. BOLGIANO'S EARLY FORTUNE CUCUMBER

84. Bolgiano's Early Fortune Cucumber is unquestionably the finest Cucumber in the world. It grows large, uniform and regular from 10 to 12 inches long and nearly all one ideal shape. The color is an attractive rich dark glossy green. Its attractive form and rich color surpass all other cucumbers. Early Fortune Cucumber is absolutely the earliest cucumber grown. It holds up well in shipping long distances. Cucumbers thrown out at shipping time have remained perfectly green for 3 to 4 weeks. Early Fortune Cucumber bears abundantly and continuously throughout the entire season; large, crisp, fruit which never loses its tenderness. The vines make a vigorous and healthy growth producing beautiful and satisfactory harvests even under very unfavorable conditions. As a tremendous money-maker, Early Fortune Cucumber has never been equaled, having produced over 1200 crates from an acre and a quarter, which netted the grower about \$2000. As to quality, shape, color, productiveness, and as a wonderful profit producer, Early Fortune Cucumber stands alone. The Cucumber seed crop is again very short this year, so place your order early. BOLGIANO'S "LORD BALTIMORE" CUCUMBER

THE WONDERFUL DRY WEATHER CUCUMBER

82. Think of producing a brag crop of the handsomest and most profitable long dark green cucumbers you have ever seen during one of the driest summers on record—that's what was done last summer by those who tried our "Lord Baltimore" cucumber. It just don't pay any attention to dry weather but goes on growing and producing beautiful fruit. The "Lord Baltimore" Cucumber is of the true white spine type about 15 inches long, very dark green and of exceptionally fine flavor. The sturdy drought resisting vines produce enormous crops of beautiful, firm, crisp and deliciously flavored cucumbers. The pure white attractive flesh composes most of the fruit, leaving an extremely small space for the seed.

If you have failed to get a crop with other cucumbers, "Lord Baltimore" will not only produce a crop for you—but will produce a crop you will be proud of. As this is the first year we have offered "Lord Baltimore" Cucumber seed for sale our supply of seed is very limited so if you want any, please place your order early. Pkt. 10c. NEW DAVIS PERFECT CUCUMBER

544. Davis Perfect Cucumber resembles a hothouse Cucumber so closely that dealers cannot tell the difference, it being equally good for hothouse or outdoor culture. It is ideal in shape, rich, dark green color, uniform and regular in size. It is exceedingly tender, and as a slicing Cucumber for the table is unsurpassed. It is almost seedless one-third of its length from the stem end, and the seeds that are contained in it, when in slicing condition, are so small and tender that they are almost unnoticed. Exceedingly productive. Price, Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

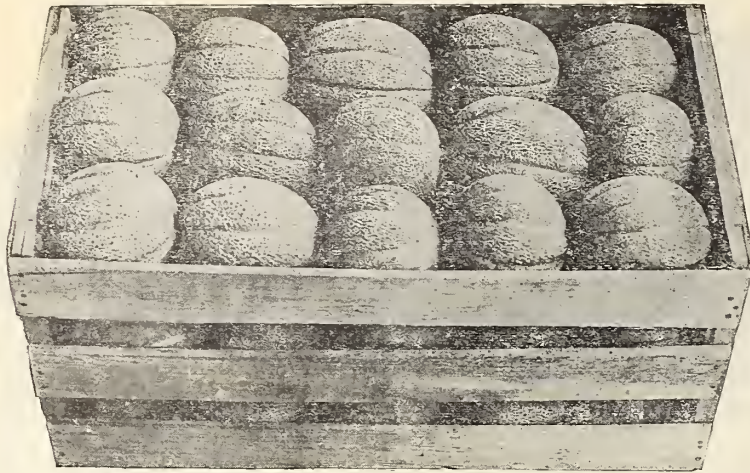

KLONDIKE CUCUMBER

135. This valuable variety is one of the best slicing, and will produce cucumbers equal in appearance to the hot-house grown specimen. The color is rich dark green, and the fruits grow to a uniform size, measuring about 7 in. in length and 2 in. thick when in good condition for use. It matures early and continues bearing for a long time, and the vines make such a healthy and vigorous growth that they produce a good crop even in a poor season, when many other varieties fail on account of unseasonable weather. Bolgiano's New Melting Gold Cantaloupe

51. Did you ever eat anything so exceptionally delicious, the very pleasant memory of it often comes back to you? That's what will happen if you once eat one of Bolgiano's New "Melting Gold" Cantaloupes. The delicious, tender golden flesh simply melts in your mouth. It is the sweetest and most delicious melon that has ever been grown. The flesh is thick, very tender and of a beautiful deep-golden color, it ripens close to the skin, the thin rind is of a rich dark green color contrasting attractively with the deep Golden flesh which is so deliciously sweet and tender. The melons are well ribbed and covered with a grayish netting, they are 6 to 7 inches long by four and a half to five inches in diameter. "Melting Gold" Cantaloupe is an excellent shipper and it is so good the market eagerly takes every melon grown and begs for more. As a melon for home gardening it is the greatest addition in years. 548. **Burrell's Gem Cantaloupe.**—This new Melon comes from the melon-growing district of Colorado, which was made famous by the Rocky Ford muskmelon, of which it is a counterpart, except in color of flesh, which is beautiful dark salmon or orange. Skin is rather dark green, and rind thin, leaving a thick lining of flesh which is of most delicious, juicy flavor, and fairly melts in the mouth. Oz. 10c. $\frac{1}{4}$ Lb. 30c. Lb. \$1.00.

Hoodoo Cantaloupe

549. As a cantaloupe for the private garden, this variety will surely please all who plant it. The vines make a strong and vigorous growth, which enables them to withstand disease and produce an abundant crop of the most delicious muskmelon one can imagine. The Melons are not large, but of convenient size for table use, and present a fine appearance. The rind and flesh at the blossom end is very firm, the skin is thickly netted, and the flesh a rich, deep orange color, fine grained and of remarkable sweetness. The Melons are about the same size as the Rocky Ford, nearly round in shape and very solid. This variety embodies many qualities which are desirable in a first-class medium size table Melon. Bolgiano's French Golden Self-Blanching Celery

It is used exclusively by the Largest and Most Experienced Celery Growers and annually produces Enormous Profits.

This is the finest stock in the world. Stands shipment better than any other.

71. While you can readily afford to plant your whole crop in our stock of this **most valuable** Celery, you cannot afford to let this year go by without growing some of it. We have positively refused to sell all Self-Blanching Celery Seed except this stock. The Celery it produces will not only ship well but will bring the highest market prices. It will create a new price for you; your commission man can get outside figures for it, and he will sell quickly all you can ship. Try our stock; YOUR PRAISES will be louder than ours. Perfect, solid, crisp, vigorous stalks; thrifty, compact growth, self-blanching to a very remarkable degree; even the outer ribs become a handsome, fresh, clean, yellowish color, with a heart that is large and solid, of a beautiful rich, golden-yellow color. It never becomes stringy or pethy. To fully appreciate its beauty and attractions, it must be seen. Many customers place their orders with us six months before planting time in order to be sure of this stock of seed. Pkt. 10c. $\frac{1}{2}$ Oz. 30c. Bolgiano's "New Victory" Celery

The Very Best Winter Celery.

81. An excellent winter Celery. We have grown this seed in America for several years and find by careful experiments it loses some of its solidity; while seed we have grown in France remains as solid as the finest stock of French Golden Self-Blanching Celery. As a result we have grown our entire supply for this season in France and can recommend it to you as the most solid and most profitable winter celery. Our French grower, carefully selects by hand each individual plant in transplanting and only the absolutely solid plants are retained, the rest are thrown away. Again when he puts the full grown plants in Kilns for winter, each individual plant is gone over and only the absolutely solid are put in the Kilns. Again in the Spring before putting the plants in the bed where the celery is to go to seed, only the absolutely solid plants are used. We are sure our stock of French Grown "New Victory" Celery is one of the Best Winter Celeries on Earth. It has a great amount of heart, is heavier, stouter, and thicker than many of its rivals. It is the most economical Celery yet introduced, every particle being solid, crisp, and of a delicious flavor. Its beautiful, large, golden heart and compact growth make an ornament hard to surpass. It is a remarkable keeper, maintaining its firmness as late as May. Critical market gardeners pronounce it to be of the finest quality, best keeper and most salable Celery they have ever raised. It is ready for market by December. Pkt. 10c. $\frac{1}{2}$ Oz. 20c. Oz. 35c. $\frac{1}{4}$ Lb. \$1.00. $\frac{1}{2}$ Lb. \$2.00. Lb. \$3.50.

Bolgiano's "Sweet-Nut" Celery.

76. For home gardens and nearby markets, Bolgiano's New Celery "SWEETNUT" is the most delicious, sweet, nutty, crisp celery that has ever been offered to the public. "Sweetnut" Celery has been developed by one of our most careful French growers for many years. The most rigid selection had to be made to get this strain thoroughly fixed but this season we are delighted to say after two years of exhaustive testing in our Test Gardens we can offer our friends and customers a Celery that is surpassingly delicious. It is absolutely solid, a most excellent winter keeper, of vigorous sturdy growth, making fine large, solid stalks, with a large, full creamy-yellow heart. It is necessary to blanch it by earthing up or storing it for the winter. It blanches to beautiful creamy-yellow. Brittleness is one of its most desirable features. Pkt. 10c. **BOLGIANO'S
"MILLIONAIRE" LETTUCE**

**The Earliest Fine Large Solid Head Lettuce on Earth.
Very Hardy; Produces Handsome Crops Either
Out of Doors or Under Glass.**

150. This valuable new Lettuce is an extremely profitable variety for both Market Gardeners and Shippers to grow; as well as a decidedly delicious variety for the Home Garden. If we could meet every one of our customers face to face we would persuade each one of them to give the "Millionaire" Lettuce a trial the very first thing this Spring. We recommend it unreservedly as one of the best lettuces, and one of the most profitable that has been grown anywhere. It is a very quick growing hardy Lettuce and will stand much, damp, cold weather. "Millionaire" Lettuce can be planted out of doors or under glass and in either case will produce fine round compact heads 6 to 7 inches in diameter, which weigh from 12 to 16 ounces, much sooner than any other variety. It is an excellent market variety, the heads are a clear light green, the outer leaves slightly tinged with brown and closely folded around the head making it all head, the inner leaves are a clear, bright, rich golden yellow. In quality "Millionaire" Lettuce is unequalled, it is crisp, tender and has a delicious rich, buttery flavor. Pkt. 10c. Oz. 35c. ¼ Lb. \$1.00. ½ Lb. \$3.50.

BOLGIANO'S "TENDER AND TRUE"
NEW 1910 LETTUCE**

140. By crossing the "Millionaire" and the "Best Of All" Lettuces we have established, we believe, the most wonderful Summer Lettuce ever originated, Bolgiano's "Tender and True" Lettuce. This Lettuce produces great magnificent hard heads 12 inches across, compact and round, especially rich and creamy in flavor. The inner leaves are a rich golden green, beautifully blanched white and very tender. So solid are the heads they will not shoot to seed until cut open. We unreservedly recommend this new lettuce to all our customers, both Market Gardeners and those who grow for the home table, for we are confident it will delight and handsomely repay those who grow a crop of it. Pkt. 10c. Oz. 35c. 2 Ozs. 60c. ¼ Lb. \$1.00. ½ Lb. \$1.75. 1 Lb. \$3.50.

**BOLGIANO'S
"BEST OF ALL" LETTUCE**

131. This grand new Lettuce truly deserves the name "Best Of All" for it has certainly proven to be "Best Of All" Lettuces in our trial grounds. It matures just after "Millionaire" when planted early, but can be planted at any time. It is especially desirable for a Late Spring or Early Summer crop as it will not shoot to seed as early varieties often do. We have tried it in Spring, Summer, Fall and have even Wintered it outdoors here at Baltimore. It is a sure header, good seller, excellent shipper, hardy and always reliable. Color is light attractive green. It makes large, compact, firm heads. The leaves overlap each other forming a beautiful, well-blanched head. We strongly recommend "Best Of All" Lettuce to our customers. Pkt. 10c. Oz. 20c. ¼ Lb. 65c. 1 Lb. \$2.50.

**BOLGIANO'S "FROZEN NORTH"
NEW 1910 LETTUCE**

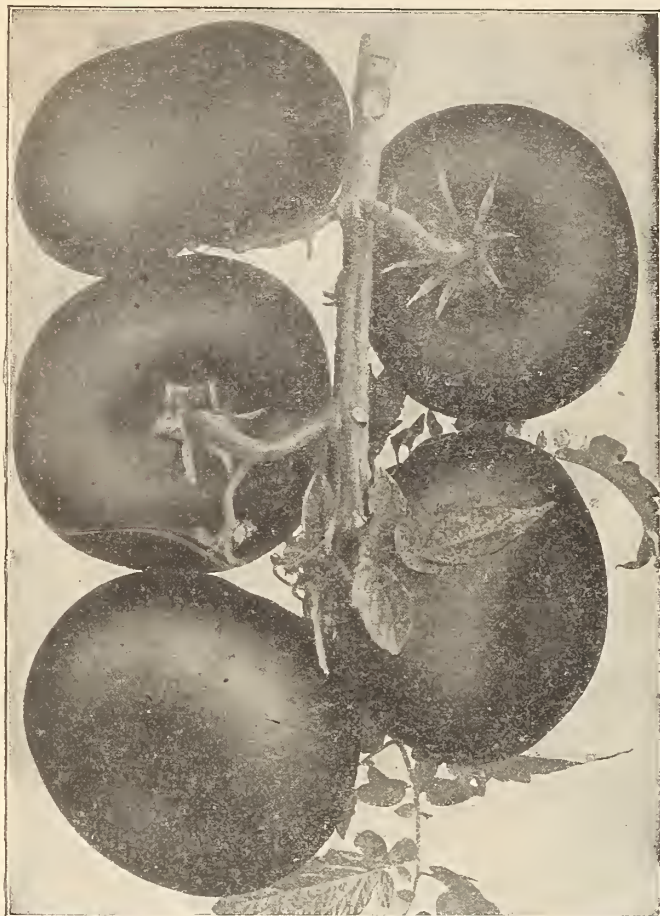

142. This new Lettuce is so good it will make your mouth water—its silver white leaves are as crisp and brittle as the finest celery, forms very large hard head 12 inches across and will not run to seed for an extra long time. "Frozen North" Lettuce will produce successful crops of tightly folded crisp heads, 6 to 8 inches in diameter during Spring, Summer or Autumn. In the hottest summer months it retains its crispness and mild flavor. It is very showy and inviting in appearance, the outer leaves are a soft bright green. As a home and market lettuce it is delicious and valuable, but it is too crisp and tender to ship long distances. Pkt. 10c. Oz. 35c. 2 Ozs. 60c. ¼ Lb. \$1.00. ½ Lb. \$1.75. 1 Lb. \$3.50.

**BOLGIANO'S
"BULLY GOOD" LETTUCE**

193. "Bully Good" Lettuce is a magnificent success from the very start, if you don't want to be completely won over to this grand new lettuce you better not try it; for once you try it, you won't be satisfied with any other lettuce for your 2d early or main Spring crop. No matter whether the market price is up or down there is always a market for "Bully Good" Lettuce. Those fine large solid heads—A full bushel market box is barely large enough to hold 18 of them—of a bright rich exquisite green; with a full solid rich golden yellow heart closely folded; crisp as ice; with a mild delicious flavor, do you wonder we have named this grand lettuce "Bully Good." The market Gardener with his pocket full of money, the Southern Grower with a big check from the Northern Cities and the Amateur Gardener with his neighbors beat to a standstill. Every one who grows for Market or eats "Bully Good" Lettuce will cheerfully admit it is worthy of its name. Pkt. 10c. Oz. 15c. ¼ Lb. 40c. 1 Lb. \$1.50.

Bolgiano's New Century Tomato

283. **Bolgiano's New Century Tomato.** Ten years ago, when we first introduced the NEW CENTURY Tomato, we felt as though the limit for improvement in Tomatoes had been reached, and judging from the letters we are receiving every season and from the great quantities of seed we annually sell, the New Century is still held in highest esteem by thousands of the market gardeners and shippers all over the country. If you hesitate to plant your entire crop in the newer varieties, you can always feel that **New Century is an Old Friend, Tried and True.** Read the recommendations on this page and you will see in what high esteem it is held. We have spared no pains or expense in keeping this stock as pure and true as it was at the beginning; in fact by most careful roguing, eliminating and selecting, we believe New Century Tomato is better to-day than it ever was. New Century will out-yield many other kinds; it will carry for two weeks without hurting its beauty; it will attract attention and pay you; it will not crack; it is of a beautiful red color, of large handsome size from first picking until last tomato is taken from the vine. 187. A fine large handsome early pink Tomato. One reason the beautiful pink Tomatoes we all grew with both pleasure and much profit a few years ago have not been so popular recently—they have not been subjected to the great hybridizing by which the Red Tomatoes have been so wonderfully developed. This has been overcome in this magnificent New Pink Giant Tomato, it has been carefully crossed and re-crossed for size of fruit, earliness, solid, smoothness, productiveness. We have a large uniform handsome fruit which sells readily at a much higher price than did ever the older varieties. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ Lb. \$1.00. Lb. \$3.50.

"Bolgiano's Florida Special Tomato"

The Greatest Blight Resisting Tomato on Earth

311. Not a single grower of Tomatoes in Florida or in any locality where blight has injured the Tomato crops, should go through this season without trying this most excellent New Tomato. We call it "Florida Special" for it has been most carefully bred up to resist the ravages of blight which has been so discouraging to our Florida customers. It is red in color, large in size, fine flavored, firm and meaty, very prolific, and about as early as the Earliana. It is a most excellent shipper, in fact during our entire time of selecting and breeding up the Florida Special, we took the utmost pains in selecting such tomatoes as would stand the long shipment to the northern Markets from Florida. We are confident Bolgiano's Florida Special Tomato is going to make a record this year, that will put it head and shoulders above any Tomato that has ever been introduced, excepting the I. X. L. "THE HUSTLERS"**

1029. By crossing our Extra Early Alaska Peas with our Long Podded Alaska Peas we have secured this wonderful new Pea—it has developed the good qualities of both parents and is sure to become very popular as soon as its great value becomes known. It is as early as the extra early Alaskas, pods as long as the Long Podded Alaskas. A magnificent thrifty, vigorous grower, it is literally loaded with handsome pods which retain their fresh rich showy color we believe longer in shipment than either of its parents. Being an entire-

ly new blooded stock it is very uniform in growth. For three years we have been growing "The Hustlers" just to accumulate seed stock and each year we have been forced to value higher the vast money making possibilities that are in this pea, for both market gardeners and Southern Shippers. It is also a very successful variety for the home garden. The beautiful rich green seed peas will justly lead you to expect great things of "The Hustlers." We have endeavored to grow enough seed to meet the requirements of our trade but to be

sure of some of them this season—we hope you will order as early as possible.—Pkt. 10c. Qt. 25c. 4 Qts. 85c. Pk. \$1.60. Bu. \$6.00.

"Wonder Worker" Bolgiano's Earliest Wrinkled Pea.

1083. The most delicious pea you have ever eaten. They fairly melt in your mouth. If you have never eaten a "Wonder Worker" Pea you don't know what a good Pea tastes like. Six weeks from planting, this wonderful large Wrinkled Pea can be marketed. In earliness, great size and excellent flavor, it is unequalled. The Peas fairly melt in your mouth. The vines grow 2½ feet high, and are very hardy, resisting pests and cold weather. It bears an abundance of large even deep green pods. It is claimed the Wonder Worker Peas are superior in earliness, hardness, and large size pods to the Gradus or Prosperity Pea. It is the finest early Pea yet introduced. Pkt. 10c. Pt. 20c. Qt. 35c. 4 Qts. \$1.25. Pk. \$2.50. Bus. \$9.00.

S. H. Langdon, Northampton Co., Va., writes—*"Please enter my order for 8 bus. of your Wonder Worker Peas; I had them last year and was so well pleased that I want to plant them again this year."*

"Cracker Jack" Bolgiano's Second Early Wrinkled Pea.

"CRACKER JACK" continues to bear an abundance of most delicious Peas, when all other varieties are dried up from the hot Sun of the early summer.

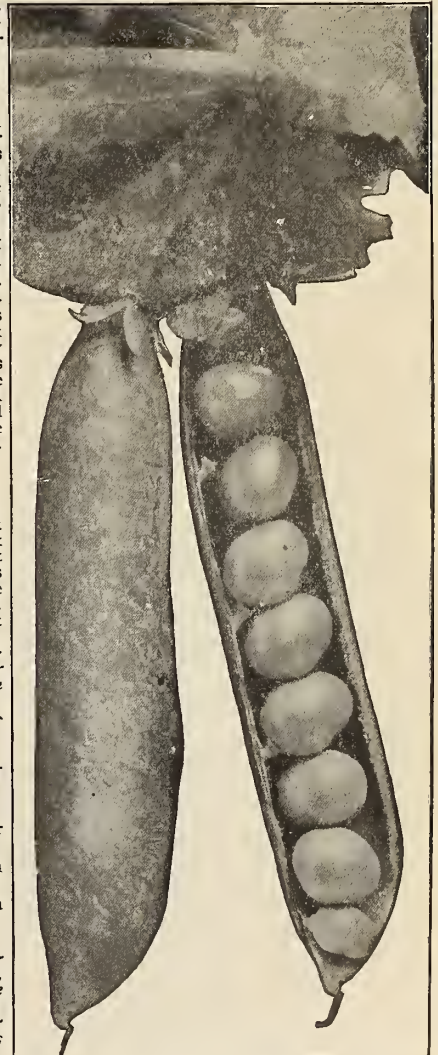

1089. BOLGIANO'S CRACKER JACK PEA.

1. A wonderful yielder.
2. Vines 2 feet, 2 inches high.
3. Growth, hardy, robust and vigorous.
4. Extremely large pods, have a handsome dark green color and are borne even more abundantly than on the Dwarf Prolific Green Marrow Peas.
5. Ready for market, just as the Wonder Worker Peas are over.
6. If planted a little late will stand the warm weather excellently.
7. It's the Pea market gardeners have been looking for, and it's a "Cracker Jack."

Pkt. 10c. Pint 20c. Qt. 35c. 2 Qts. 75c. 4 Qts. \$1.25. Peck \$2.25. Bus. \$8.00.

C. L. Campbell, Cuban, Cuba., writes Feb. 15, 1908.—*"I planted some of your Cracker Jack Peas, which have proven so vigorous and productive, above every other kind, and I would like to secure some more seed."*

E. F. Clyatt, Alachua Co., Fla., writes, Gentlemen:—*"I want two sacks of 'Cracker Jack' Peas for Spring planting. Set them aside; I will send for them with my order for Spring crop Beans. I am sending a basket of the Peas to the State Fair at Tampa, Fla. Look out for orders for 'Cracker Jacks.'"*

Bolgiano's "Mighty-Nice" Beans

Bolgiano's New "Home, Sweet Home" Bean.

1134. A most delicious bean for the home garden, very productive, large, long, handsome flat pods, full of big, rich, tender, sweet beans. The beans when dried, make the finest kind of winter dried beans and when baked will fairly melt in your mouth. If you once try the Home, Sweet Home Beans, you will always have it in your kitchen garden. Market gardeners will also find this a very lucrative bean to sell to fancy market or grocery store trade. Pkt. 10c. Pt. 20c. Qt. 35c. 2 Qts. 60c. 4 Qts. \$1.10. Pk. \$2.00. Bu. \$8.00.

Bolgiano's "Truckers' Reward" Wax Bean.

1133. We have been developing this wonderful New Flat Wax Bean for a number of years and believe we now have practically a perfect Market Gardeners and Shippers Flat Wax Bean. It is bound to take first premium over all competitors wherever exhibited, on account of the great beauty of its pods and enormous productiveness of its healthy vigorous bushes. The type is so well fixed and so pure and true it is almost impossible to locate a wrong plant in an acre of "Truckers' Reward" White Wax Beans.

The beautiful long straight attractive flat golden pods range from $5\frac{1}{2}$ to $6\frac{1}{2}$ inches in length—in quality they are particularly fine remaining tender and crisp a longer time than any other variety.

As a money making crop, to sell either on the retail market stall or on the wholesale markets of the great cities—they will invariably catch the eye of the most critical buyers and on account of their superior attractiveness will sell themselves.

Do not delay if you want to secure some of our new "Truckers Reward" Wax Beans; our supply is limited so please order early. Pkt. 10c. Pt. 15c. Qts. 25c. 4 Qts. 85c. Pk. \$1.55. Bu. \$6.00.

Bolgiano's New Pearl Wax Beans.

A Wonderful Long-Pod Wax Bean.

Enormous Plant. Enormous Pod. Enormous Yield.
Never Affected by Rust or Blight.

1031. If you had grown it in your field as we did, when for almost two solid months we had copious rains every day, and it showed no signs of blight or rust, you would agree with us when we say a bean that will yield a fine crop of beautiful long, flat clean waxy pods, under such adverse circumstances, certainly cannot be praised too highly. It is a PEARL of great value. Although a flat bean, the seed looks somewhat like a Valentine Bean; the plant grows $2\frac{1}{2}$ ft. high by 2 ft. across. It is a remarkably sturdy, rank, vigorous grower, well loaded with pods. The luxuriant foliage shelters the pod from the hot sun, and is free from blight or rust. The pods are long, slim, flat, plump, handsome and meaty; they somewhat resemble those of the Davis and Wardell's Wax Beans, but are plumper, longer and straighter. They average from 7 to 8 inches long, and are of a clean light waxy yellow color. As to quality, the pods are exceptionally tender, brittle, and of fine texture, free from fibre, and if picked when ripe, they are entirely stringless. Both for Shippers, Market Gardeners and the Home Garden, the exceptionally good qualities of Bolgiano's New Pearl Wax Bean renders it of the greatest value. Pkt. 10c. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bu. \$6.00.

Bolgiano's "Mighty-Nice" Bean.

1033. This wonderful, new, round, meaty, green podded bean had for its parents two separate and distinct stocks of Thoroughbred Hopkins Improved Earliest Red Valentine Beans and the inbreeding of their stocks has produced an Extremely Early and most prodigiously productive stock of beautiful deep green, round podded Valentine Beans. The flavor and quality cooked and tested side by side with 50 other leading varieties proved the Bolgiano "Mighty-Nice" Bean to be by far the most delicious and tender.

We have been experimenting with "Mighty-Nice" Bean for years and we can unreservedly recommend it as the greatest new production in the way of Green Podded Beans in the last ten years. Being an extremely new stock it is free from the faults that accumulate around stocks that have been on the market for a few years. We have succeeded in getting the type thoroughly fixed and we are willing to say that you will hardly find one off vine in an acre of "Mighty-Nice." If you want the most productive, the most beautiful, the most salable and the best market or shipping crop of round green podded beans you have ever raised, by all means plant a patch of Bolgiano's "Mighty-Nice" Beans.—The Coming Leader Among Beans. Bolgiano's Extremely Early Hardy "May Queen" Beans.

See Painting on Back Cover.

1001. Five years having passed since we introduced this prolific Early bean, it has become an indispensable variety with many of our customers. It is remarkably early, exceedingly prolific and its extra large finely shaped straight dark green pods are always solid, tender and of a delicious flavor and borne in great abundance. It is a most excellent shipping bean, carrying in fine shape for many days after it is picked. Some of our customers have also tried it as a late bean with astonishing results; they were so well pleased with it as an early bean they wanted more of them and therefore experimented successfully with them in the Fall. The stock is perfect; the plants are of a strong, robust habit and mature the crop very regularly. If you do not already grow "The May Queen" you should certainly give it a trial Pkt. 10c. Pt. 20c. Extremely Early "Cream and Honey" Sugar Corn.

"CREAM AND HONEY"

Bolgiano's New Extremely Early Sugar Corn.

1182. The name of this new luxury among table delicacies immediately carries the mind back to the "Promised Land" flowing with "Milk and Honey." Our efforts to bring to you a rare treat have never been so abundantly rewarded as they are in our successful production of this surpassingly delicious flavored Sugar Corn. Its good qualities are so apparent that we cannot do justice to them with pen and ink—if you appreciate and enjoy the best things the garden grows, then start the season with a patch of "Cream and Honey" Sugar Corn. Plant it the same time you do Extra Early Adams Corn, although it is a pure and true Sugar Corn it is so wonderfully hardy it will stand the hard knocks of early spring. Rich, delicious, sweet flavor, beyond comparison with any other Sugar Corn, earliest of all the Extra Early Table Corns and of wonderfully fine quality. Grows 4 feet high; has ears 5 to 7 inches long and 2 to 3 ears to the stalk, can be planted quite close in the row. Pkt. 10c. ½ Pt. 15c. Pt. 25c. Qt. 40c. 2 Qts. 75c. 4 Qts. \$1.25. Pk. \$2.50.

Bolgiano's White Cob 65-Day Corn

The Handsomest Early Corn That's Brought to Market.

1049. You will be thoroughly persuaded after one trial of this Extra Early Large Roasting Ear Corn that you cannot afford to let a single season pass without planting generously of this excellent Corn. White Cob 65-day Corn is the result of carefully selecting the earliest and largest ears of Gillespie's Early Neck Corn, and crossing these with the earliest and best varieties of Sugar Corn. The result is a corn of fine quality, of 12 to 14 rows and reliable no matter what weather it has to stand. Being large, extremely attractive, early, tender and sweet, it quickly sells at money making figures. Very profitable as a Fall crop when planted in mid-summer. Ear 5c. Doz. 40c. 100 Ears \$2.50. Bolgiano's New Century Cauliflower. The Best Cauliflower in the World.

Bolgiano's Giant Dry Weather Cauliflower.

105. This splendid new Cauliflower will succeed and make fine crops in the driest kind of weather when other varieties fail. It produces large, solid, pure white heads weighing from 3 to 8 pounds. The soil should be made quite rich and thoroughly cultivated. It will succeed in such dry weather states as Arizona. Be sure to give it a trial as you are never sure of the weather conditions through which your crop will have to go. Pkts. 10c and 25c. ¼ Oz. 60c. ½ Oz. \$1.00. Oz. \$2.00. ¼ Lb. \$5.00. Lb. \$20.00.

Chinese Giant Pepper 226. Double the size of Ruby King Pepper and equally as mild. By careful and numerous experiments we have found this enormous mild red Pepper to be a money maker of great value to the trucker. The monstrous fruits are of a thick, blocky form and of the most brilliant glossy scarlet. They grow four to five inches broad at the top, and about four to five inches in length and are divided into four or more large ridges and when ripe, they are indented at the bottom end. It is early, productive, and quickly sells on account of its enormous size. The plants are vigorous, stocky, and grow about two feet in height. They are well branched and thickly set with the largest Peppers, frequently half a dozen fruits will touch each other as if in a single bunch; the strong growth of the plants and abundant foliage enable them to mature the large number of fruits almost as early as the Famous Ruby King. Bolgiano's "Big Winner" Wakefield

25. Several years ago we introduced the **Big Winner Wakefield Cabbage** and it has become very popular with Cabbage growers, both large and small. It is as large as the Big Charleston Wakefield Cabbage and as Early as the Early Jersey Wakefield. Handsome in appearance, massive and graceful. The heads are solid and heavy, making a perfect shipping Cabbage. It is fine form and in flavor deliciously sweet. Among the pointed heading Cabbage it is *by far* "The Big Winner Wakefield." Don't let this season go by without a liberal planting of this Profit-producing Excellent Cabbage. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ Lb. \$1.00. Lb. \$3.50.

Bolgiano's Extra Early Express Suitable for Market Gardeners for Very Early Crops, 10 Days Earlier than The Wakefield

27. What pleasure there is in growing a uniform, attractive, solid crop of Extra Early Cabbage! Bolgiano's Extra Early Express is the **best** Extremely Early Cabbage on Earth. Praises of its merits come from the most experienced growers. They remember a good thing when it pays them. Earliest, uniform, solid, fine color; brings top prices. No soft heads, 10 days earlier than the Wakefield. Pkt. 10c. Oz. 20c. 2 Ozs. 35c. $\frac{1}{4}$ Lb. 50c. Lb. \$1.50.

Mrs. M. M. Bowen, Fauquier Co., Va., writes Feb. 19th, 1909: "I purchased some of your Bolgiano's Extra Early Express Cabbage seed last year and liked them ever so much. Send me the inclosed order for more, for the coming season."

Bolgiano's "Ring-Leader" Cabbage Entirely Distinct—The Most Magnificent and Most Profitable Main Crop Cabbage Ever Created.

26. By crossing Bolgiano's "Square Deal" Cabbage with Bolgiano's Extra Flat Dutch we produced this wonderful new cabbage. For five years we have most carefully selected and re-selected the very finest specimens of this Grand Cabbage, until now we have a stock that is going to make every wide awake grower of cabbage in the country marvel at its remarkable features. It grows strong and vigorous, being entirely worm proof. It has a dark bluish green color, showing a thrifty, robust constitution. It forms very large, hard, thick, solid, flattened heads, uniform in shape and color, and

of a handsome appearance. The stem is short and broad under the head but tapers off to a point where it enters the ground. "Ringleader" Cabbage heads are very large, solid, and of most excellent quality and delicious flavor, entirely free from any features of coarseness, the veins and ribs being strongly developed but of fine texture. The heads are firm and hard, extra good keepers, splendid shippers, and most popular sellers. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ Lb. \$1.00. $\frac{1}{2}$ Lb. \$1.75. Lb. \$3.50.

BOLGIANO'S NEW LEADER

26. As early as the Wakefield, yields 12,000 heads, one-third more per acre than any other extra early Cabbage. The outer leaves are so few and so small that they can be planted very close. The heads are compact and solid from the time a head is formed and keeps so until thoroughly matured, thus enabling extremely early cutting of small hard heads, or later, when the Wakefield's come in of large thoroughly matured solid, round, flat heads. In quality, it is "The Leader," the veins of the leaves are extremely fine; its rapidity of maturing, compact growth gives it a flavor unequalled. The demand for such a Cabbage in Northern Markets is becoming great and greater each year. The people want an extremely early new slow-head Cabbage and "The Leader" supplies their wants. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ Lb. \$1.00. Lb. \$3.50.

G. T. Winders, Beauford Co., S. C., writes Aug. 26, 1908: "Bolgiano's New Leader Cabbage seed is one of the finest I have ever used. It makes a solid head, and every plant made a head. I have always had luck with seed from your house, and I will never change."

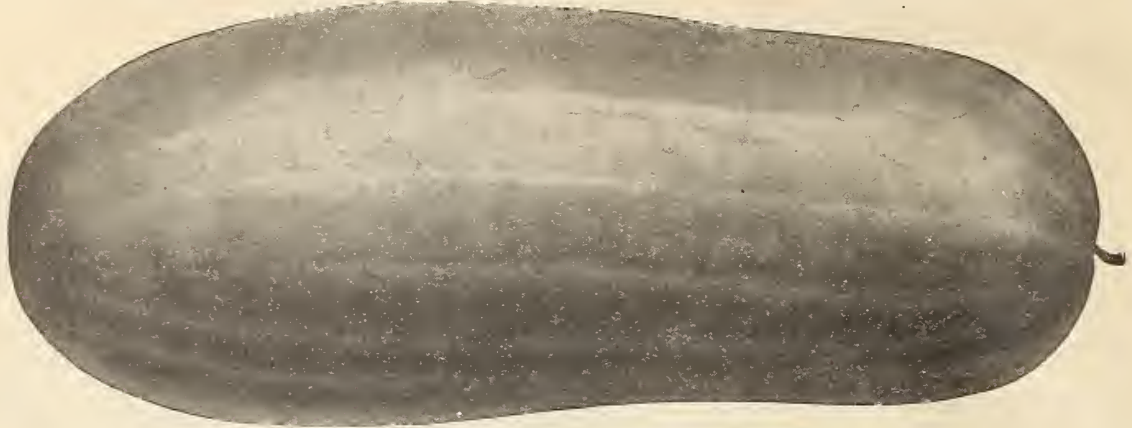

Wishing you the best of success, as you are honest in your dealings, I beg to remain "

BOLGIANO'S NEW "SQUARE DEAL" CABBAGE The Best On Earth

154. Without a single exception, Bolgiano's New "Square Deal" Cabbage is the Biggest Money Making Cabbage ever offered the American trucker. This is a strong assertion, at least 100,000 people will read it, so you can readily see we could not afford to make such a statement unless we were sure of our ground. The "Square Deal" Cabbage matures immediately after our New Leader Cabbage. It is absolutely a "Square Deal," as we have seen ten-acre fields without a single irregular head. The uniform heads are of excellent size for shipping, larger than the New Leader and yet not so large as to be unwieldy. The color is a fine fresh green and is retained during long shipments. The heads are solid and compact with very few outer leaves. For a fine, Solid, Tender, Uniform, Early Flat Cabbage, Bolgiano's "New Square Deal" Cabbage challenges the world. The demand for a fine Cabbage of this character, led us by the most rigid and careful selection, during the past five years, to mature this Cabbage, which we are confident will give all our friends and customers a "Square Deal" every time. Bolgiano's New "Indian Chief" Watermelon.

"INDIAN CHIEF"

Bolgiano's Remarkable New Watermelon.

172. Victory is sure for this grand new Watermelon. It has more successful qualities than any other melon ever grown. If you are a grower of Watermelons, this new Melon offers you an opportunity to coin money, such as you have never had before.

"Indian Chief" is entirely distinct from all other varieties. It is a large oblong, dark green Melon with a thick netting all over it. The rind is thin but tough. The flesh is a bright attractive red. The flavor is delicious, sweet and satisfying. It is very productive, a perfect shipper, the quickest and best seller that has ever been placed on any market. As a table melon it always brings repeat orders. In fact as a first class melon it is ideal. Seed is limited, demand will be heavy, so order quick. Pkt. 10c. Oz. 25c. $\frac{1}{4}$ Lb. 65c. Lb. \$2.50.

171. Bolgiano's Cold Mountain Spring Watermelon.

New Variety. Several years ago we were spending our vacation in the Mountains; during our absence one of the leading Watermelon growers, living about 100 miles from Baltimore, wrote us he had for a number of years been developing an extra, selected strain of Watermelon, and the result of his efforts had gone far beyond anything he had ever hoped to produce. Were we interested? He shipped us several samples, these came on boat to Baltimore 100 miles, then on railroad through the mountains for 250 miles. Reaching us in perfect condition after traveling 350 miles, through rough country and roughly handled. These melons attracted the attention of everyone by their beautiful deep green color, stately size and excellent shape. We had them on exhibition, then took them with us back into the mountains. We put the Melons in a **Cold Mountain Spring**, and in a few hours we cut them. The Melons were in a perfect condition, "Red to the Rind," and entirely free from stringiness. We immediately inspected the crop. The **Cold Mountain Spring Watermelon** is a winner as a shipper, as a table Melon and as a Money Maker. Our supply of seed is necessarily limited and only the seed produced by the originator, so order immediately. Pkt. 10c. Oz. 15c. $\frac{1}{4}$ Lb. 35c. $\frac{1}{2}$ Lb. 60c. Lb. \$1.00.

S.B. Brantley, Lake Co., Fla., writes: "Will you be so kind as to enter my order for 50 lbs. of Selected Cold Mountain Spring Watermelon Seed. No other variety will be planted here another year, and your firm will be called upon for about 250 lbs. of seed of this variety at Clermont, and the neighboring points will likely order the same amount. This is by far the best Melon we ever planted; so be sure and keep the seed pure and up to the standard."

Bolgiano's Early Black Beauty Egg Plant.

Bolgiano's Extra Early Black Beauty Egg Plant.

Two Weeks earlier than any other Egg Plant.
100. **Bolgiano's Black Beauty Egg Plant.**

1. An entirely new variety and a splendid shipper. 2. A novelty of remarkable merit. 3. As large as the New York Spineless Egg Plant. 4. Two weeks earlier than the New York Spineless Egg Plant. 5. Fine flavor. 6. Most attractive appearance. 7. Plants branch freely near the ground. 8. Skin a rich, lustrous purplish black. 9. Satin gloss and rich coloring add greatly to the beauty of the fruit. 10. The intense, brilliant coloring is uniform over the whole fruit and does not fade or change to a lighter color at the blossom end. 11. The heavy leaves which attach the fruit to the stem are bright green, making a beautiful contrast with the fine dark color of the fruit. 12. Thoroughly free from spines or thorns. 13. Fruit sets freely. 14. Coming two weeks earlier than the New York Purple Egg Plant they readily bring double the price. Pkts. 5c and 10c. Oz. 25c. $\frac{1}{4}$ Lb. 90c. Lb. \$3.50.

Bolgiano's Florida High Bush Egg Plant.

99. **The Florida High Bush Egg Plant** has proved of the greatest value to the Southern truckers and shippers. It has been grown in Florida for the past three or four years. It is remarkable for its vigorous growth and productivity, is very hardy, and will stand more cold weather than the New York Improved. The hot sun does not blight the blossoms. The plant has a characteristic leaf, unlike any other Egg Plant we know of. It grows from 3 to 4 feet high, erect and sturdy, free from thorns. Fruit is large, oblong in shape and purple, though not so deep a color as the New York Improved. It resists drought and wet weather to a wonderful degree, partly on account of its strong upright growth. It stands the cold weather better, and is the only Egg Plant that stands shipping from this section to the Northern markets under almost all circumstances. It is of a large size, first-class shape and superior flavor. Its shipping qualities are the very best. It brings the highest price in the Northern markets, keeping its freshness and condition much longer than any other variety. Pkts. 5c and 10c. Oz. 25c. $\frac{1}{4}$ Lb. 90c. Lb. \$3.50.

New Globe Tomato

264. In shape it is distinct from all others, being a beautiful globe, with quite a good percentage of elongated (stem to blossom) fruits. It is among the first to ripen. Fruit of large size, and good marketable size is maintained throughout the season; always smooth, firm-fleshed, and has very few seeds. Ripens evenly through and through; a fine glossy rose in color, tinged with purple. The plant is always loaded with fruit, as it has joints at frequent intervals and each joint produces large clusters of from 3 to 7 fruits. Especially adapted for slicing or eating from the hand as the flavor is very delicate and agreeable. Pkt. 10c. Oz. 20c. 2 Ozs. 35c. $\frac{1}{4}$ Lb. 65c. Lb. \$2.50.

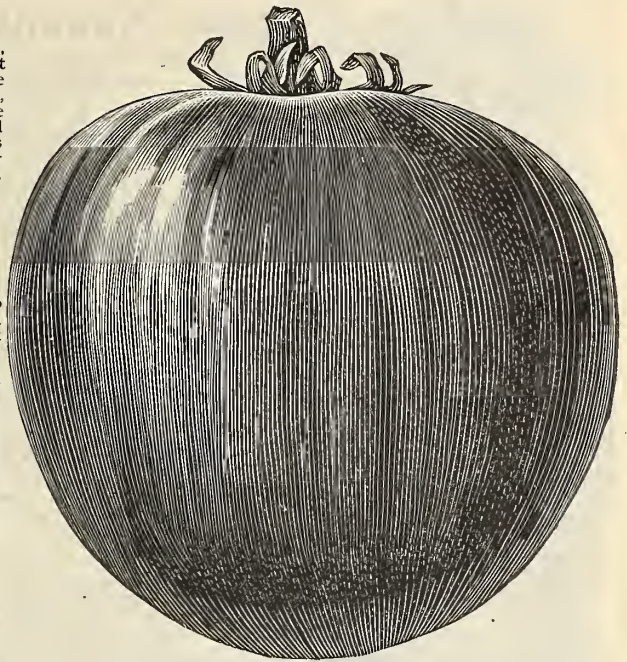

June Pink Tomato Another Great Money Maker

268. **THE JUNE PINK TOMATO.**—In habit of growth is similar to the Earliana. The plant is neat and compact, branching freely, with fruit hanging in clusters of from 6 to 10 fruits both in the crown and at the forks of the branches. Under exactly the same conditions as given Sparks' Earliana and Chalk's Jewel, the **June Pink** yielded as much fruit as either, and the vines after the crop had been harvested were greener and brighter, and showed no tendency to blight. It ripens fully as early as the Sparks' Earliana and quite 10 days to 2 weeks ahead of Chalk's Early Jewel. The fruit is of medium size, uniform, smooth, and attractively shaped, without cracks or any green core. The fruit will average $2\frac{1}{4}$ in. to 3 in. in diameter, from 2 to $2\frac{1}{2}$ in. in depth. The skin is reasonably tough so that it is excellent for shipping purposes. In color it is a blight pleasing pink, and in markets where a pink tomato is desired will bring 25 per cent. more in price than any red variety. It has the further quality, making it especially desirable for private use, continuing to bear and ripen fruit up until frost. Pkt. 10c. Oz. 20c. 2 Ozs. 35c. $\frac{1}{4}$ Lb. 65c. Lb. \$2.50.

"Duke of York" Tomato Genuine Old Type—Blue Stem Stock

297. **DUKE OF YORK TOMATOES.**—The genuine old type—blue stem Dukes have given the utmost satisfaction to the Florida Tomato Growers. It has brought many a dollar rolling their way but it has been difficult for these growers to get absolutely the straight type of Dukes when they ordered it; this situation however, is a thing of the past for we are now prepared to supply all our friends and customers with the purest, truest, cleanest type of genuine old type—blue stem Duke of York they have ever seen or grown. We honestly believe we will soon get the entire Florida trade on Duke of York Tomato Seed in the Genuine Old-Type Blue Stem Strain kept absolutely Pure and true. Send to us for your Duke of York Tomato Seed and run no chances. We will either send you the finest Stock of Dukes you have ever had or return to you your money. Duke of York Tomato is one of the grandest Tomatoes recently introduced, color, rich, glossy scarlet, splendid cropper, round in shape, flesh very firm, large size, fine flavor. It ripens its fruit uniformly together, whilst in profusion of clusters, averaging 8 and 10 large and evenly formed clusters each, makes it conspicuously handsome. Ripens evenly to the stem, is strong healthy grower, not subject to rust or blight, is an enormous cropper and produces until the vines are killed by frost, holding its size well until the last picking. Quality the very best, solid and meaty. Pkt. 10c. Oz. 25c. $\frac{1}{4}$ Lb. 75c. $\frac{1}{2}$ Lb. \$1.25. Lb. \$2.50.

Duke of York Are Blight Proof.

R. Henschen, Lee Co., Fla., writes: "I have several acres planted with your Duke of York Tomatoes, and every plant is in excellent condition, not showing any blight when other varieties in the same field are dying from that disease."

Truest He Ever Saw.

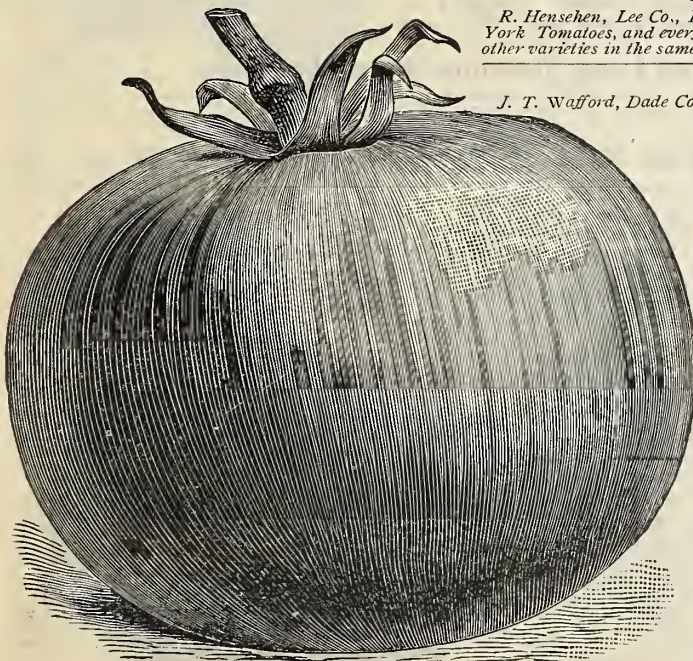

J. T. Wafford, Dade Co., Fla., writes: "The Duke of York Tomato bought of you, are the truest ones I have ever seen. I want them another year sure."

Bolgiano's Best, The Great B. B. Tomato

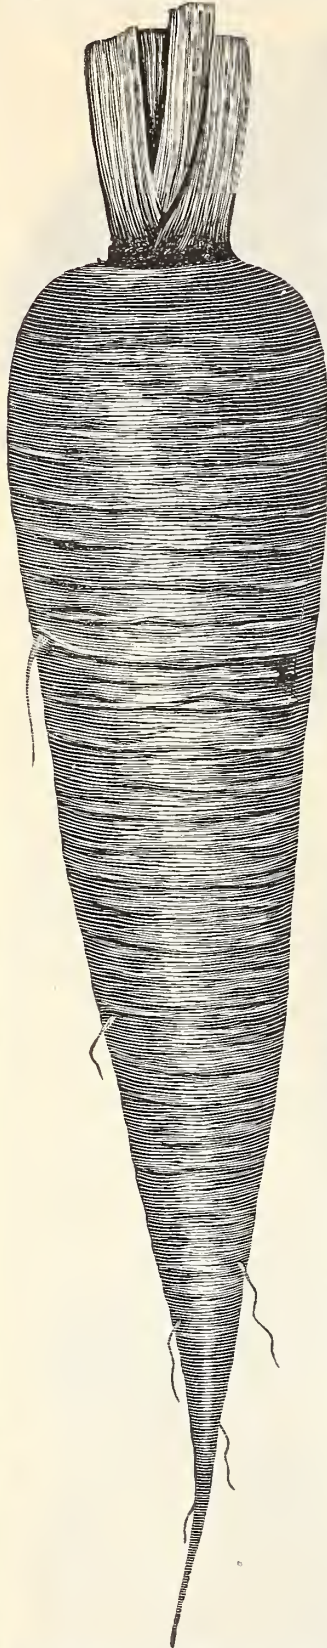

284. This tomato is unequalled. It has every good quality pertaining to the Tomato and avoids all faults of other sorts. One of the smoothest, most solid, heaviest and most handsome Tomatoes grown. It suits gardeners, canners and shippers, who are delighted with its faultless fruit, which fills their wants in every particular. The B. B. is as solid as an apple, has no core and the flavor is excellent. It weighs more pounds per bushel than many other sorts which proves its solidity; has a beautiful red color, outside and inside, and the fruit is quite large. There is no need of a field of poor Tomatoes when one dollar will buy enough to supply plants for one acre. Used successfully for early and late crops; always sells at the highest prices. Pkt. 10c. Oz. 15c. 2 Ozs. 25c. $\frac{1}{4}$ Lb. 40c. Lb. \$1.50.

Chalk's Early Jewel Tomato

287. This excellent new Tomato has attracted the attention of market gardeners and shippers on account of its fine quality, its wonderful productiveness, earliness and large size. Chalk's Jewel is not quite so early as the Earliana, or so large as the I. X. L., but size of the fruit continues very large almost to the last picking. The vines are fairly loaded with fruit during the entire season, 75 of which will fill a $\frac{3}{8}$ bushel basket. The fruit is very solid and deep through, measuring $3\frac{1}{2}$ inches across by almost 3 inches in depth. Color is bright scarlet and it ripens up to the stem, without cracks or green core. It is an excellent shipper. The climate in which we grow our tomato seeds, makes them earlier, freer from disease and blight, and more productive than seed you can procure from any other source. Try them for yourself. Price, Pkts. 10c. Oz. 20c. $\frac{1}{4}$ Lb. 60c. Lb. \$2.00.

New Klondike Carrot

Produces Money Crops For Truckers and Market Gardeners.

8. We take pleasure in introducing this New Carrot to our friends and customers. We have been developing "Klondike" Carrot for a number of years, and have succeeded in producing a remarkably handsome, uniform, tender, medium long Carrot of a most attractive and beautiful deep rich orange red color. It is remarkably smooth and shapely, bred as carefully as a race horse; very tender, without core and of a delicate flavor. It is a model in shape and size; grows 6 to 7 inches long by 1½ inches in diameter, the healthy tops are small and the Carrot tapers gracefully to a single small tap root. No stock has ever been selected with greater care or received more expert attention than has this magnificent New Carrot "The Klondike." We believe you expect us to develop and produce for you the finest stock of seeds in the world, and it was with this idea constantly before us that we attempted and so wonderfully succeeded in producing this—the truest, purest, most attractive, most salable market Carrot that has ever been offered the Critical Market Garden Trade. Our supply of seed this year is very limited so, please order early. Oz. 10c. 4 Ozs. 30c. 1 lb. \$1.00.

Bolgiano's "King" Carrot

91. We name this excellent new Long Orange Carrot "King" Carrot because it is best of all long Carrots. In Germany it has a wonderful reputation among truckers and market gardeners, and only by paying a very high price were we able to secure any for our customers. The flesh is deep in color, tender and delicate in flavor. It is so much better than the regular Long Orange Carrot that we are sure when "King" Carrot becomes thoroughly known it will drive Long Orange Carrot out entirely. Being entirely new stock, the seed has been saved with the greatest care and the Carrots are uniform in shape, of fine texture, and almost entirely free from core usually found in Carrots. It produces the most attractive specimens in deep soils. Oz. 10c. ¼ lb. 30c. ½ lb. 50c. 1 lb. \$1.00.

Jas. B. Raymo, Port Antonio, Jamaica, writes June 1st, 1909.—Your King Carrot was good and they turned out large size.

Bolgiano's "Pride of the Market" Carrot

This Beautiful, shapely half-long Carrot will come almost as early as the Ox-Heart. It is the most popular Carrot that grows.

64. It is the most perfect, finest colored, most tender and best flavored Carrot that was ever placed in your hands. "Pride of the Market" because it is the best. You must have the best of every thing. In Carrots, to get the best we select roots that resemble our ideal, and from them grow seed for you. Oz. 10c. 2 Ozs. 15c. ¼ lb. 25c. ½ lb. 40c. 1 lb. 75c.

Bolgiano's Hollow Hub Parsnip

219. As we predicted several years ago, when we first introduced the Hollow Hub Parsnip, it has taken the leading place among Parsnips. Its merits alone have brought it so prominently to the front. Oz. 10c. 2 Ozs. 15c. ¼ lb. 25c. ½ lb. 40c. 1 lb. 75c.

Bolgiano's "Great Giant" Salsify.

275. By far the largest, smoothest, most tender Salsify ever sold to the trucker. Its delicious flavor and attractive appearance bring the buyers and hold their trade. It easily outsells every other Salsify, for "It is the Best." Pkt. 10c. Oz. 15c. 2 Ozs. 25c. ¼ lb. 40c. ½ lb. 75c. 1 lb. \$1.50.

Improved Curled Long Standing Spring Spinach.

1106. Of a perfect, rich, attractive green color, distinct from all other varieties, and easily recognized. Its growth is abundant, and it will retain a fresh, luxuriant appearance for three or four weeks after the most stubborn seeding varieties have become yellow and gone to seed. Oz. 5c. ¼ lb. 10c. ½ lb. 15c. 1 lb. 25c. 5 lbs. 75c.

"Best of All" Kohl Rabi.

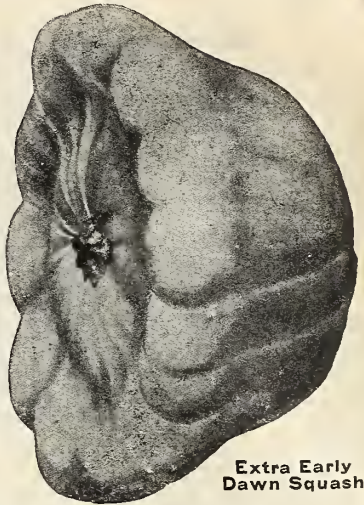

152. This exceptionally valuable New Kohl Rabi will please many friends. It combines the quality of the finest varieties known. It is round like an apple with fine smooth skin. The leaves which are very few, stand erect enabling the grower to plant closer and helps him in bunching. The flesh is unsurpassed in tenderness, purity and delicious flavor. "Best of All" Kohl Rabi will not run to seed in frosty weather and remains unchanged in delicacy of flavor. It is equally valuable for forcing for open ground culture. Pkt. 10. Oz. 35c. 2 Ozs. 60c. ¼ lb. \$1.00. 1 lb. \$3.50.

New "Alice Blue" Kohl Rabi.

14. This wonderful attractive new Kohl Rabi is of a very beautiful bright blue color, exceptionally graceful and shapely, tender, and of a delicious flavor. It is very early, profitable and prolific. Every one who enjoys a beautiful, tender and tasty vegetable should grow some of this Kohl Rabi this season. Pkt. 10c. Oz. 50c. ¼ lb. \$1.50.

Extra Early Purple Top Milan

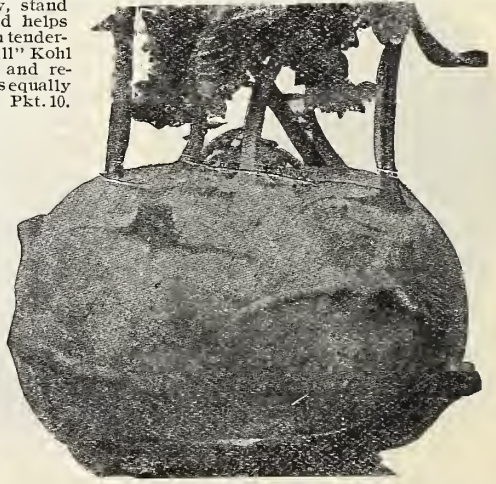

315. Earliest turnip in cultivation; a week sooner than any other. Flat, smooth, of medium size, with bright purple top and few leaves. Flesh white and choice. Adapted to spring or fall. A good keeper. Pkt. 5c. Oz. 10c. ¼ lb. 25c. 1 lb. 75c.

Extra Early Dawn Squash

331. Bolgiano's Extra Early Dawn Squash

1. 10 Days to 2 Week earlier than any other stock of White Bush Squash. 2. Always brings the first Fancy Prices of the earliest market. 3. Enormously Productive. 4. Beautiful white color, entirely free from any green cast. 5. Solid and heavy, with small seed cavity, making an excellent shipper. 6. Delicious flavor and an excellent cooker. 7. Growth is bushy, with absolutely no runners. 8. A great improvement over all other stock. Pkt. 10c. Oz. 15c. ¼ lb. 40c. 1 lb. \$1.25.

Extra Early White Milan. 305. Similar to the above, but pure white. A very good Spring, Summer or Early fall turnip, making wonderfully rapid growth. Fine grained and tender. Pkt. 5c. Oz. 10c. ¼ lb. 25c. 1 lb. 75c.

**"Tip Top" White Tip
Bolgiano's Beautiful New Radish**

9. We challenge the World on this wonderful and useful distinct new stock of Radish—its beauty and attractiveness are almost beyond description. Results are now produced by hybridizers who patiently watch, wait and work hand in hand with Nature that seem almost miraculous. Natures wonderful artists have painted the tops of each one of these delicious crisp, tender, round little Radishes a brilliant carmine red and the bottom a beautiful snowy white. The contrast is startling and yet delightfully pleasing. If you have ever hoped for an ideal stock of extremely Early Brilliant Scarlet Globe Radish with a beautiful White Tip you will find the "Tip Top" White Tip Radish in beauty goes far beyond your greatest expectations. It certainly is a thing of beauty. Pkt. 10c. Oz. 15c. 4 Ozs. 40c. ½ Lb. 65c. 1 Lb. \$1.25.

"Tip Top" White Tip Radish.

**Bolgiano's Delicious
New Strawberry Radish**

258. A delicious crisp, brilliant red radish. The very earliest, often ready for market in less than three weeks. It is a perfect globe shape and so uniform that all the radishes look like they have been made in the same mold. If you have a home garden nothing will please you more, or give you quicker returns for your efforts than this beautiful Radish. If you grow for market no matter how many of these attractive Strawberry Radishes you bring to market, you can always sell every bunch of them, at prices that will both please and pay you. As a frame Radish it is the best of all because it grows short tops, its brilliant red color attracts and draws the customers, who pay high prices for the earliest vegetables. Pkt. 5c. **The Earliest and Best Long White Radish
Bolgiano's Pearl White Forcing Radish**

249. In our trial grounds, this most attractive, appetizing, cool crisp Radish, matured in the remarkable short time of 13 days. In size and form it is a duplicate of our famous Glass Radish, but having a clear, pure white waxy appearance from top to bottom; is perfectly sound and will remain so longer than any other White Radish. The Early White Vienna, or Lady Finger Radish, does not compare with it. Any trucker once planting this Radish, will undoubtedly use it to the exclusion of all other early white varieties. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. 1 Lb. 50c.

**A Grand Fall and Winter Radish
Short White Chinese Celestial Radish**

256. **New Short White Chinese Celestial Radish.** In 1897 we placed this very attractive Winter Radish in the hands of our truckers, and since then we have never had seed enough to supply the demand. *It is solid and juicy as an apple; pure white flesh and delicious flavor*—a very choice variety. We never sent out a Winter Radish that gained so much popularity in so short a time. Sown any time after July 1st to the middle of August, it will keep all Winter in prime condition; mild in flavor, brittle, never gets woody as do most Winter varieties. Market gardeners have found it to be a splendid seller and have always made money on it. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. 1 Lb. 50c.

**Bolgiano's Famous
Brilliant Ruby King Radish**

230. **Bolgiano's Extremely Early Ruby King Radish.** "KING OF ALL" Extra Early Scarlet Radishes would be an appropriate name for this most excellent Radish. We claim without fear of challenge, Bolgiano's Extremely Early Ruby King Radish is (without a single exception) by far the MOST BEAUTIFUL, Extremely Early Scarlet Button Radish that has ever been brought to any market. The color is a bright, glossy, shining scarlet and when the dust or soil is washed from it, it fairly glows in its brilliant color. No Radish on earth will mature as quickly as the Ruby King, and have such small foliage. It will stand forcing without becoming in the least pethy. The flesh is delicious tender, juicy and mild. Equally good for open ground culture as for forcing. It is at its very best when permitted to grow quickly. We have offered this Money Making Radish for 6 years and each year our sales so marvelously increase we feel satisfied that the wideawake Market Gardeners are leading the very earliest markets all over the country with Ruby King Radish. We again place Bolgiano's Extremely Early Ruby King Radish at the head of all Radishes. Pkt. 5c. Oz. 10c. 2 Ozs. 15c. ¼ Lb. 20c. ½ Lb. 30c. 1 Lb. 60c.

**The Earliest and Best Long Red Radish
Bolgiano's Long Red Glass Radish**

250. This is the best of all long Red Radishes. It requires deep, well-worked loose ground, and will quickly grow to a beautiful, uniform, long, almost transparent, brilliant red Radish, with a pure white tip. No home garden is complete without it, and those market gardeners who have deep ground will be able to grow the most salable Radishes they have ever seen with this Seed. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. 1 Lb. 50c.

Bolgiano's "Plucky Baltimore" Potatoes

Bolgiano's Wonderful New Prolific Extremely Early Seed Potatoes.

1. Ten days earlier than the Red Bliss Triumph.
 2. **Snowy White Potato**, about the size and shape of the Houlton Early Rose.
 3. Yields from 250 to 350 bushels per acre of most attractive, marketable Potatoes.
 4. Always brings 50c more per barrel than the fanciest stock of any other variety on the market.
 5. The quality is delicious, the entire supply is quickly taken up by the most critical hotel trade in New York and Boston.
 6. Young, full, pure blooded stock, not susceptible to disease.
 7. Seed grown in the most careful manner.
 8. If you are a Potato grower and you once saw the **Plucky Baltimore Potato**, you could not help but buy it. Its attractive shape, pure white color and in fact its general appearance speaks for itself, far better than we can write about it.
 9. We have the entire supply of this **Grand New Potato**, and that's not many barrels, so order right now, or our supply will be exhausted.
 10. We can recommend the **Plucky Baltimore** as the best Potato that has ever been sold the truckers. Extremely attractive, extraordinarily early, enormously productive, excellent quality, pure white and a Big Money Maker.

Gray's "Mortgage Lifter" Potato

Mr. Gray has grown several bumper crops of Gray's "Mortgage Lifter" Potatoes; he says they were so large they reminded him of young pigs, and they were certainly splendid sellers at high prices. We wish every one of our customers who grows potatoes could talk with the growers who have grown a crop of this Grand New Potato. It certainly is something to marvel at, and yet if all our customers realized its great value our limited supply would not be a drop in the bucket. It is an early variety, maturing a little later than the Crown Jewel, it is pure white, large handsome size, distinctive in shape, being long, well filled and tapering at both ends. Eyes are strong and well set, not too deeply however. It certainly is a beauty and one grower says they grow so large it don't take many to fill a barrel, no culls, and by the car load they brought over \$20 a car more than the best Potato on the market. Mr. Preatt, of Seville, Fla., after giving this Grand Potato a thorough trial, orders eight barrels in the place of the one he planted last year. Mrs. Wm. G. Harvey, of Roslyn, Md., calls it the "Farmers Favorite." Among other names it was called are "Maryland Beauty," "Money-Maker," "Virginia Wonder," "The Excelsior," "Gold Standard," "Silver King" etc. We finally selected Gray's "Mortgage Lifter" as suggested by Mr. Jas. T. Gray, of Grange, Md., because Mr. Gray actually paid off a good size mortgage on his farm with the proceeds from the Wonderful Crop of this Grand New Potato which he grew this year and we hope that the mission of Gray's "Mortgage Lifter" Potato will not be ended until it has helped to clear many more farms of their mortgages. Bolgiano's Prosperity Potatoes

The Best Second Early and Main Crop Potato on Earth.

This Magnificent Potato has become the most popular middle crop potato of the newer varieties, and certainly one of the most worthy. Yields great crops of even, fine, smooth, large Potatoes, even under the most unfavorable circumstances, and can be relied upon to bring in good money. It is undoubtedly the handsomest large potato ever produced, and will outyield any other Potato, and practically every Potato is of Marketable size. It is ahead of all others in yield and smoothness, and is of excellent quality. Every farmer will, after giving this most wonderful Potato a trial, discard every other kind and plant nothing but Bolgiano's Prosperity Potato for his main crop. It grows a very strong, upright top, with dark colored stalks and purple blossoms, and is very little affected by drought, blight or bugs. The flesh is as white as snow, and cooks dry and mealy. The eyes are even with the surface, the skin white, with rich yellowish-creamy cast, and considerably ruffled or netted. This Potato will astonish old Potato-Growers in its abundant yields and fine qualities, and every person who is ambitious to make the most money out of his crop cannot afford to let this year pass without obtaining seed of our crop of New Prosperity Potato. Miss Mary E. Reynolds, Member Board of Lady Managers Eudwood Sanitarium, Towson, Baltimore County, Md., writes, November 23, 1908: "Permit me to express the satisfaction of those in charge of the Sanitarium at the results attained from the use of your seed potatoes. From two bushels secured from you and planted on the farm of this institution a crop of 85 bushels was realized. We think this to be excellent evidence of the fruitfulness of your carefully selected stock of seed potatoes."

Mammoth Prize Taker Onion

Its Mildness of Flavor and Tenderness are Unequaled Even By the Bermuda Varieties. In Size, it is Not Exceeded by the Enormous Varieties From Spain.

205. Eight hundred to one thousand bushels to the acre, and a single specimen weighing as much as 6 lbs. 2 ozs., are some of the things this handsome Globe Onion will produce. It has a bright, clear, straw color, and grows a perfect globe shape. Is by far the handsomest, most productive, most profitable, and best of all Yellow Globe Onions. Large Onions can always be raised in a single season directly from seed. It has always brought much better prices than any other Onion; in market it never fails to attract attention on account of its beauty; on the city fruit stalls it has completely taken the place of the large Spanish Onions. The Prizetaker Onion is gifted with strong drought-resisting ability, and we consider this one of its strong merits. People who wish to make money should plant the Prizetaker Onion. It is admitted by the most critical onion growers to be the largest, finest flavored, and most superior Yellow Globe Onion under cultivation. Pkt. 10c. Oz. 15c. ¼ Lb. 35c. ½ Lb. 65c. 1 lb. \$1.25.

Bolgiano's "Prosperity Potatoes"

Produces Big Crops Bad Seasons

Wm. Butler, Grant County, Ind., writes, March 10, 1908: "Bolgiano's Famous Prosperity Potato I think is the best potato I ever grew; its cooking qualities cannot be beat. It is the best yielder, and does better on poor ground than any other variety I ever grew; it does better year after year than any other variety, wet or dry season, and you are sure to make a crop if you plant Bolgiano's Famous Prosperity Potato. The big stalky vines are a good thing in wet weather to hold the weeds down, after they are laid by, and are a good thing in dry weather, to hold the moisture in the ground."

800 Bushels Prize Taker Onions to the Acre

Hancock Bros. Solley, Anne Arundel Co., Md., writes: "Gentlemen, The basket of Bolgiano's Mammoth Prizetaker Onions which I sent to you, is from the field which we grew from seed this season, produced 800 bushels of these fine Onions to the acre. We planted them in rows 12 in. apart and the onions three in. from each other in the row; worked it entirely by hand, using no horse cultivator during the season. We placed 40 loads of horse manure and one ton of fertilizer to the acre. Bolgiano's Seeds certainly are the best seeds that can be secured by the most Critical Market Gardeners and shippers."

Otto Locke, Comal Co., Texas, writes, May 21, 1909: "Your Teneriffe Crystal Wax and White Bermuda Onion Seed is the Best in the world. Every Seed Made A Big Onion. We also planted seed from a Philadelphia house and it was not worth planting."

Our Seed Better At Half The Price

H. B. Hancock, Galard Co., Texas, writes, Dec. 6, 1908: "The Bermuda Onion Seeds bought of you this past fall were far superior to seed bought of The Seed Company of New Orleans, at double the price I paid you. Will be ready to book my order with you again this season."

A Remarkable Fact

J. E. Ficklin, Nurces Co., Texas, writes, May 19, 1909: "As I was engaged in harvesting a crop of Bermuda Crystal Wax Onions, from seed purchased from you last Fall, I was struck with the remarkable fact that there was the least percentage of double or split onions I ever saw."

The New Race of Gigantic Orchid Flowered
Countess Spencer Sweet Peas,

GIANT FLOWERED BRANCHING ASTERS

These grow two to three feet high and branch very freely—the beautiful full flowers being of the largest size from $\frac{1}{2}$ to 4 inches across, and each furnished with a long, stiff stem, rivalling the Chrysanthemum both in size of flower and length of stem. This strain we believe is the finest that can be grown. They are best for the private garden and for the florist and farmer who grows to sell in the market. They can be had, by successive sowings, in bloom from August until late in the fall.

GIANT FLOWERED DWARF NASTURTIUM

Everybody delights in growing this most successful of all flowers. Those who have grown our special mixture which contains so many new and gorgeous varieties have met with surprises and delights that they little dreamed of when they planted the seed. The flowers are not only wonderfully brilliant, but are of gigantic size, and many of them present that rich velvet appearance so greatly admired. Our Nasturtium grow quickly, begin to bloom early in the summer and continue to bloom abundantly until killed by frost.

Druid Hill Park Velvet Green Lawn Grass Seed Will Produce a Beautiful And Permanent Lawn In Six Weeks

It is Better Than Any Other Lawn Grass Seed in the World. It is Used By the Leading Landscape Gardeners in the United States

Celebrated from Florida to Maine for its quick growth, deep velvet green color and wonderful endurance, through hot, dry spells. Having made the selection of fine lawn grasses our pride for many years, we are able to offer lawn seed superior in every respect and acknowledged by all who have used it to be the best.

This choice mixture is the best for making beautiful and permanent lawns. It is composed of grasses which are especially adapted for the purpose of producing lawns which retain their rich color and soft, velvet green appearance throughout the entire spring, summer and fall. It is valuable for the formation of lawns in places exposed to the sun, also to partially shaded places where it is difficult to produce good sod. See that the shaded places and bare spots are thoroughly worked and enriched with sheep manure before sowing seed. In making up this mixture we are extremely careful to use only the very best quality seed, which has been re-cleaned, the light seed and chaff having been blown out, thus securing the highest grade mixture it is possible to obtain, and seed that will quickly grow. One pound will sow 20 x 20 feet, 10 pounds will sow 50 x 150 feet, 60 pounds will sow an acre. 30 pounds measures 1 bushel. ¼ Lb. 5c. ½ Lb. 10c. Lb. 20c. 5 Lbs. 90c. 25 Lbs. and over at 15c per Lb. If to go by Mail, add 8c per pound.

Prettiest I Have Ever Seen.

Mrs. J. M. Adams, 105 Roland Avenue, Roland Park, Baltimore Co., Md., writes: Gentlemen: "My Lawn, Seeded this Spring with your Druid Hill Park Velvet Green Lawn Grass Seed is the prettiest I have ever seen, my neighbors say it looks like it has been seeded 5 years. I cheerfully recommend your seeds to all my friends."

Best on New Land.

Mrs. H. H. Samuels, 3818 Park Heights Avenue, Baltimore, Md., writes: "The grass on my lawn raised from your Druid Hill Park Lawn Grass Seed is the best I have seen grown on new land."

It Did Splendid.

W. H. Bell, Rockingham Co., Va., writes: "The Druid Hill Park Velvet Green Lawn Grass Seed which I bought from you last Spring did splendid."

Shady Nook Lawn Grass Mixture

A popular mixture of grasses best adapted for sowing in shady places where ordinary grasses will not thrive. In nearly all lawns where there are trees, there will be found bare spots which can be made green and bright by using this mixture, if the shaded places and bare spots are thoroughly worked and enriched before sowing seed. ¼ Lb. 10c. ½ Lb. 15c. Mrs. C. Green, of Old Orchard, Maine and Baltimore, Md., writes: Gentlemen, "There is no Lawn Grass like Bolgiano's Druid Hill Park Velvet Green Lawn Grass, and my neighbors' round about here agree with me. I run short of lawn seed last year, and sent to Boston, for some, but it was nothing like as fine as Bolgiano's; in fact, I am going to sow some of yours in place of that next year."

Henry Fauth, the famous gardener, wrote: "I have found your Lawn Grass Seed to be the purest, cleanest and best in the market. It withstands severe droughts and retains its verdure throughout the entire season. I have used it for thirty-five years, and our large and beautiful lawns here at 'Ingleside' have always been greatly admired."

White Dutch Clover

This is the best Clover for lawns, as it forms a close herbage and remains green throughout the season. Is also a valuable mixture with grass seed for pasture. Sown in the spring at the rate of six pounds per acre when sown alone; one-half the quantity when sown with other grass. 1 Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c. 5 Lb. \$1.00.

Permanent Pastures

We prepare ten special grass and clover mixtures for hay and permanent pasture, suitable to every variety of soil. For full particulars see page 46.

"Wizard Brand" Pure Pulverized Sheep Manure

This is without exception the very best dressing for lawns. The effect is immediate and lasting. It is the only manure that is absolutely free from weed seeds. It contains no dirt, straw, leaves or bedding of any kind, being secured from the cemented floors of the Chicago stock yards. It is three times stronger than cow manure. Contains nitrogen, phosphoric acid, ammonia and potash in liberal proportions. It is also unequalled as a fertilizer for the vegetable garden, flower garden, house plants, trees and hot houses, etc. It is also dissolved in water and used as a liquid to nourish all kinds of growing plants. Be sure to give it a trial. 2 Lbs. 15c. 5 Lbs. 25c. 10 Lbs. 40c. 25 Lbs. 75c. 50 Lbs. \$1.25. 100 Lbs. \$2.00. 200 Lbs. \$3.50. 2,000 Lbs., (in 100 Lb. bags,) ton, \$30.00. 1041. **Dreer's Improved Pole Lima.** Outyield any Lima Bean ever offered. Each pod contains from 2 to 6 delicious Beans, so compactly placed that they make indentations in each other. Pods are produced on the vines in great clusters. The yield is continuous and abundant. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.60. Bus. \$6.

1042. **Siebert's Early Lima.** Pods long, thin, and easily opened. The green Beans are very large, handsome and delicious quality. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

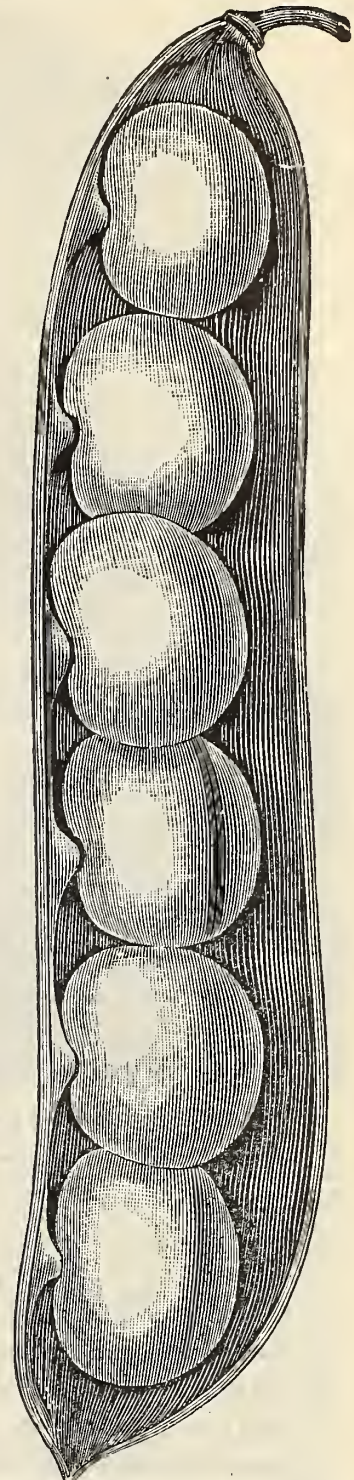

1043. **Jersey Extra Early Lima.** Is 10 days to 2 weeks earlier than any other Pole Lima. Except the Leviathan. The beans are exceptionally tender and delicious. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.

1044. **Carolina or Sieva Beans.** Very early and productive. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

1045. **Extra Large Lima.** Large white Bean; very tender; equally good in Winter if soaked 10 hours before cooking. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

1046. **Ford's Mammoth Extra Large Lima Bean.** Its pods are large in size, containing from 3 to 8 Beans. They are unsurpassed in quality and productiveness. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

1047. **King of Garden Lima Beans.** Outrivals all other Pole Limas. Its vine has a luxurious growth, which abounds with enormous pods, often from 5 to 8 inches long, and filled frequently with 5 or 6 perfect Beans to a pod. These Beans in their green state are large and luscious, but when dry shrink to the ordinary size. It is large, early and prolific and unequalled in quality. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.

Our Beet is carefully grown from the very best stock seeds in the world. In addition to this, we take out of the ground each Beet and examine it carefully; if the color is not a fine dark red, and if it is not perfect in shape, and if it is late in maturing, we will destroy it, as we only save our seed from as near perfect roots as it is possible to grow.

Culture. Fibrous loam, well-drained and well-enriched, will raise good Beet crops. For early table Beets, have drills 16 to 20 inches apart, and sow the seed about 1 inch deep, as early as the ground can be put in good shape. Or seed may be sown under glass four weeks sooner, and the young seedlings transplanted to open ground, to give an extra early crop. Give thorough and clean cultivation, and thin the plants to stand 3 to 4 inches apart in the rows. For succession sow at intervals until middle of July. For the earliest sowings a light dressing of nitrate of soda, say 100 pounds per acre, will sometimes work wonders.

295. **"Bon Fire" Bolgiano's New Early Beet.** These beets develop in a remarkably short time. (Specialty, see page 6.) Pkt. 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.25.

12. **American Beauty Beet.** The skin and flesh of "The American Beauty" Beet are both a deep rich blood crimson color. It matures just after the Eclipse, has a most beautiful form being a little deeper than round, medium in size, generally about three inches in diameter, has a remarkably smooth surface and a small tap-root. Pkt. 5c and 10c. Oz. 10c. ¼ Lb. 25c. Lb. 75c.

18. **Bolgiano's Deep Blood Beauty Beet.** The most popular market gardeners beet ever introduced. (Specialty, see page 6.) Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 50c.

19. **New Royal Red.** This grand Beet is really worth its weight in gold on account of the very satisfactory crops it grows and its great selling qualities. It is handsome in shape, a little deeper than round. Pkt. 5c. Oz. 10c. 2 Ozs. 15c. ¼ Lb. 20c. ½ Lb. 30c. Lb. 50c.

3. **Early Ox-Blood. 6 Reasons why we introduce this new Beet.** 1st. It is extra dark blood color, from end of its tap root to top of its short graceful leaves. 2nd. Early as the Crosby Egyptian. 3rd. Almost globe-shape. 4th. Small amount of even foliage of deep ox-blood color. 5th. Beets are very smooth and free from side rootlets. 6th. Flesh, fine grained, sweet and of an ox-blood color. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. ½ Lb. 30c. Lb. 50c.

4. **Extra Early Eclipse.** Remarkable for its very rapid growth the perfection of its form—which is globular—of its beautiful crimson flesh, and for its dwarf foliage. The roots are bright glossy red. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

5. **Crosby's Improved Extra Early Egyptian Beet.** Almost globular in shape, perfectly smooth with a single tap root and but a few short tops. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

6. **New "Crimson Globe" Beet. This is one of the best Bunching Beets yet introduced.** Of medium size, and of globe shape. Skin and flesh are deep rich red, fine grained, sweet and tender in all stages of growth. Very small tap root. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

7. **Detroit Dark Red Beet.** A very superior early Blood Turnip Beet of uniform type, deep color, medium size, fine grained and formed. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

539. **Early Market Beet.** It is very shapely in form, good size for market purposes, and retains all its tenderness. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

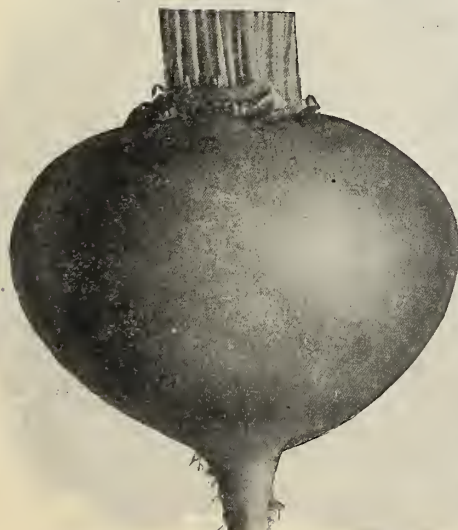

559. **Dirigo Beet.** An excellent variety. A few days later than Eclipse, but more tender and has a smaller top. Particularly recommended for frame growing. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

11. **Extra Early Flat Egyptian Beet. (Improved.)** Does not crack open at the top, is a deep blood-red; uniform in type, has a few tap roots and presents a handsome appearance when presented for sale. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 35c. 5 Lbs. @ 30c.

20. **New Improved Early Blood Turnip Beet.** It is early, smooth; does not grow overlarge, has few roots. It does not become stringy, matures a medium size Beet of decided uniform type. Pkt. 5c. Oz. 10c. ¼ Lb. 12c. Lb. 35c. 5 Lbs. @ 30c. 10 Lbs. @ 25c.

21. **Edman's Blood Turnip Beet.** The flesh is deep blood-red in color, sweet and tender; smooth, and of a good marketable size. It does not grow over large. It grows a small and but a single tap root. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. ½ Lb. 20c. Lb. 40c. 5 Lbs. @ 35c.

10. **Early Large Egyptian.** None better for an early or general crop than the Large Egyptian; handsome shape, and does not crack open. This crop commands a good market all the season through. Pkts. 5c and 10c. ¼ Lb. 15c. ½ Lb. 20c. Lb. 30c.

ing the plants 2 ft. apart one way and from 12 to 18 inches the other, according to the variety. For late or winter crops, the seed is sown in May, and the plants set out in July. In this case they are set in rows 2 by 3 feet, so as to work them with a horse and cultivator. To destroy the green worm, an experienced grower says: "Take one ounce of saltpeter and dissolve it in 12 quarts of water; then take a short-handled whisk-broom, dip it in the solution and sprinkle the plants well. One application is sufficient, unless the stuff is washed off by heavy rains. The liquid, being perfectly clear, never colors the cauliflower or Cabbage heads."

30. **Early Jersey Wakefield Cabbage.** *Bolgiano's Selected Stock.* While this is not so early as Bolgiano's Extra Early Express Cabbage, it will be found to be the very best conical headed sort to come in immediately after it. It heads up remarkably hard and solid, with but few outside leaves, which are unusually thick and heavy enabling it to stand cold weather without injury when carried through the winter, in the open ground in the South, or cold frames in the North. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ Lb. 40c. Lb. \$1.50.
32. **The Charleston, or Large Wakefield.** The Best Large Early Cabbage. This is the largest Early Cabbage, bred from the Early "Jersey" Wakefield, to meet a demand for a larger heading sort. It possesses all the valuable characteristics of the parent, with the advantage of the heads being 50 percent larger, though a few days later. Our strain of seed is very superior. Pkts. 5c and 10c. No vegetable is of greater importance to the market-gardener than the Cabbage, and to many growers the success or failure of this crop means gain or loss for the year. Cabbage seed, therefore, is the last seed in the list to buy because it is cheap. Much of the seed sold at a low price is imported from European Countries where, owing to their climate, it produces large quantities of seed; but it is practically worthless in America. We exercise exceptional care in growing and selecting our Cabbage seed. It is all high-bred American-grown, except such varieties as should be grown abroad to get the best results, such as the Danish Ball Head.

Culture. Soil for Cabbage should be rich and heavy loam, with good drainage. On such a soil, with an abundance of stable Manure, excellent crops are sure to be grown. For early spring, sow in fall not too early, or the plants are liable to bolt in the spring, instead of heading. In a month the plants will be fit to transplant to coldframes where they are wintered, taking care, in planting, to set the young plants down to the first leaves. Transplant in spring as soon as the ground can be worked, sett-

Bolgiano's "Ringleader" Flat Dutch Cabbage.

Late or Winter Cabbage

96. **Bolgiano's "Ringleader" Late Flat Dutch Cabbage.** Will always produce heads of enormous size and of the very finest quality (Specialty, see page 15.) Pkt. 10c. Oz. 35c. ¼ Lb. \$1.00. ½ Lb. \$1.75. 1 lb. \$3.50.

43. **Bolgiano's Market Gardener's Choicest Stock Extra Flat Dutch.** Can be planted later than the old time varieties and matures more quickly into a handsome, EXTRA LARGE, solid, uniform Cabbage of perfect keeping qualities. It has of its own superior merits become a great favorite everywhere. If you want the best Flat Dutch that grows, try Bolgiano's Extra Flat Dutch. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 40c. 1 lb. \$1.50.

50. **Louisville Drumhead. (Best of all Drumhead Cabbage.)** There is no Cabbage of the Drumhead type which can be compared with this beautiful representative, in shape, color, firmness and excellent table qualities. While not as large as some of the coarse, inferior kinds, it is of fine size, very solid and uniform. Heat and moderate drought have little effect upon it on account of the peculiarly short stem and low habit of growth, so we recommend it for sections where late Cabbage is apt to be exposed to such conditions. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

45. **The Lupton Cabbage.** Is a splendid late sort, heading after the second early sorts and sooner than the Late Flat Dutch. It is particularly uniform in shape and size, holds its dark green color better than the late sorts. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

46. **Premium Flat Dutch.** It has long been the favorite sort for cold slaw and sauerkraut. It matures just before severe frosts, and keeps perfectly over winter. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. 1 lb. \$1.25.

47. **Large Late Drumhead Cabbage.** This splendid Cabbage produces enormous heads. Its good keeping quality makes it a first-class sort to carry over winter or for long distance shipping. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. 1 lb. \$1.25.

44. **Boss Flat Dutch Cabbage.** The heads are large, hard, thick and flat, the leaves lapping across the center. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.25.

52. **Henderson's Autumn King Cabbage. (True American Grown.)** It is often from 3 to 3½ feet in circumference, and weighs from 25 to 30 lbs. each. Interior crisp, close fine grained, tender and white. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

48. **Danish Bald Head Cabbage.** This is the most excellent Cabbage, is very solid and out-weighs any other Cabbage of equal size. The head is round with flattened top, a good keeper, first-class shipper, and sells everywhere. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 60c. 1 lb. \$2.00.

Brussels Sprouts

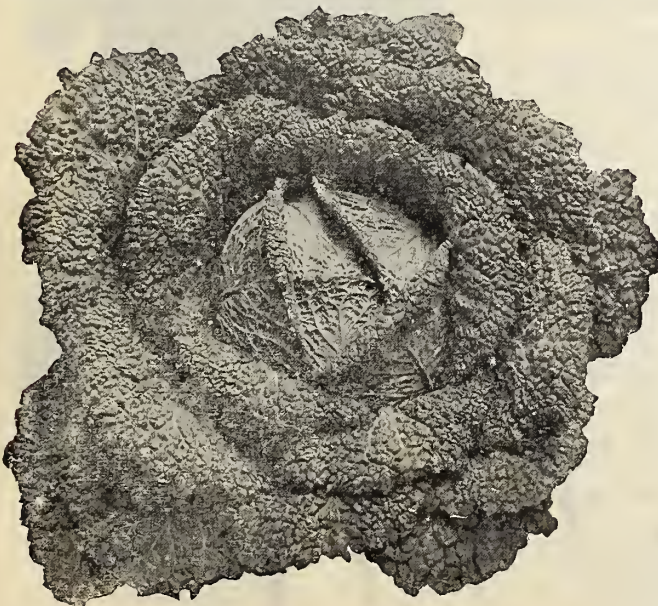

Culture. Sow in May, in the same manner as Cauliflower, and transplant in July 1 foot apart in rows 1½ feet apart. Brussels Sprouts is the very best winter vegetable that can be grown. It is as hardy as the common Curled Greens. When cooked through, such sprouts melt in the mouth like the tenderest Cauliflower, and are equally as good. If more widely known, Brussels Sprouts would be as popular as it is valuable.

22. **Bolgiano's Matchless Brussels Sprouts.**—Pkt. 5c and 10c. Oz. 20c. ¼ Lb. 75c. 1 lb. \$2.50.

Collards

23. **Georgia Southern, or Creole.** Forms a large, loose, open head, or a mass of leaves on a tall stem. Freezing does not injure, but rather improves their quality. Sow thick in drills, in rich ground, transplanting when 4 inches high, or sow in drills where the plants are to remain, and thin to 2 or 3 feet apart in the row, when of proper size. In the South sow from January to May, and August to October. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. 1 lb. 50c.

- 154. **Square-Deal.** (Specialty, see page 15.) Pkt. 10c. Oz. 35c. ¼ Lb. \$1.00. ½ Lb. \$1.75. 1 lb. \$3.50.
- 35. **Bolgiano's "New Early" Cabbage.** It forms solid, compact, round, flat heads, the leaves growing close to the head, thus allowing more cabbage to be grown to the acre than any other sort. Its earliness (a week before other early flat varieties) is one of its best marketable features. It heads so hard and so quick it becomes waterproof. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 50c. 1 lb. \$1.50.
- 36. **Florida Header Cabbage.** In color, shape and size the heads are most uniform. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 37. **All Head Early Cabbage.** For uniformity, reliability of heading, size, earliness and quality it is very superior. Its heads grow compact and free from spreading leaves. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 38. **Henderson's Early Summer Cabbage Seed.** In size, form, solidity and earliness, this is truly a model Cabbage. It heads just after our Jersey Wakefield. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 39. **Long Island Early Flat Dutch Cabbage.** The heads are large and solid, and matures very early—just after the Select Jersey Wakefield, and may be marketed at the same time with the Wakefield. In every respect it is a Cabbage worthy of cultivation. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 40. **Early Short-Stem Drumhead Cabbage Seed.** It is ready for marketing 2 or 3 weeks earlier than the late Drumheads, forms large, solid rounded heads, weighing from 15 to 25 pounds. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 41. **Henderson's Early Succession Cabbage.** A wonderful Cabbage for solidity, productiveness, and fine large heads. Matures early, has handsome color and fine quality. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 42. **Sure Head Cabbage. (Pedigree Stock.) True American Grown.**—Produces large, round, flattened heads that are all head, with fewer outer leaves, very uniform, firm, and weighs from 10 to 15 pounds each. Splendid shipper and of an excellent quality. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 542. **Solid South.** This is one of the purest and truest Cabbages ever bred. Produces very large, shapely solid heads. It is crisp fine grained and of delicious flavor. An excellent shipper. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 53. **Bolgiano's Perfection Drumhead Savoy Cabbage.** There are many varieties of Savoy Cabbage, but "Bolgiano's Perfection" surpasses them all for uniformity of heads, beauty of curl and superior keeping qualities. When truckers have failed with other stocks from severe drought and worms, Bolgiano's Perfection has pulled through all right and come out supreme, making the grower happy by bringing him good returns when Cabbages were scarce. If you try it you will say more than we have. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.
- 49. **Mammoth Rock Red Dutch.** Is the largest red Cabbage, and heads very solid, and is deep red color to the very center. No Cabbage is better for boiling or slaw, and its beautiful red color specially fits it for pickling. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 60c. 1 lb. \$2.00.

Bolgiano's Earliest Snow Ball Cauliflower.

Delighted With His Crop.

S. C. Middleton, St. John Co., Fla., writes, February 1st, 1908.—"Let me compliment you on your New Century Cauliflower. I am now crating half an acre, heads large, white and firm as a potato; taking them as they run from 24 to 28 fills a crate. I need some seed next fall, and hope they won't be higher than \$60.00 per pound; however, they would be by far the cheapest at several times that price."

CAULIFLOWER

CHOU-FLEUR
Cauliflor
Blumenkohl

One ounce of seed will produce about 3000 plants. One-half ounce furnished at ounce rates, and one-half pound furnished at pound rates.

CULTURE. For earliest Cauliflower, raise plants by sowing in hotbed or greenhouse during January or February, and transplant to flats or cold frames, 2 or 3 inches apart each way. Set in open ground as soon in spring as the land can be put in good order. Soil to be a warm, very rich, fibrous loam, well supplied with humus and moisture. Copious water applications during dry weather, especially when the plants are heading, and light dressings of nitrate of soda and potash are of much help. Set plants 2 to 2½ feet apart each way. For late Cauliflower to mature during the pickling season (August 15th to October 10th), start plants in open ground like late cabbages, and handle them like that crop. After the heads begin to form, draw leaves over and pin or tie them together to protect the head from the sun.

54. **New Century Cauliflower.** There is no Cauliflower that can equal it. (Specialty, see page 14.) Pkts. 10c, 25c and 50c. ¼ Oz. 90c. ½ Oz. \$1.75. 1 Oz. \$3.50. ¼ Lb. \$12.50.

105. **New Dry-Weather Cauliflower.** Will produce splendid crops in very dry locations. (Specialty, see page 14.) Pkts. 10c and 25c. ¼ Oz. 60c. Oz. \$2.00. ¼ Lb. \$6.00. Lb. \$20.00.

55. **Earliest Snow Ball Cauliflower.** Our Snow Ball Cauliflower is the earliest, most hardy, and, in fact, the Cauliflower that you can plant, and expect a crop, of true, firm, snow white heads. You cannot get better Snow Ball Cauliflower Seed no matter what price you pay. There is but one stock of Cauliflower that is better and that is Bolgiano's New Century Cauliflower. Many of the beautiful, shapely heads measure from 10 to 12 inches in diameter. Our Cauliflower seed is saved only from absolutely perfect plants and is grown by the most experienced and critical growers in localities best suited for its perfect development. Best for forcing; best for wintering over early crop. Every plant will produce a fine head. Pkts. 5c, 10c and 25c. ½ Oz. 75c. Oz. \$1.50. ¼ Lb. \$5.00. Lb. \$18.00.

CARROTS

MOHRE
Carotte
Zonaborita

One ounce will sow 100 feet of drill; 3 to 4 pounds for an acre.

CULTURE. Carrots do best in warm, deep, rather light and fairly fertile soil that is well supplied with humus, or on strong loam, having been in clover and broken the year before. For earliest crop, sow seed of the early, short-rooted sorts in April or May, in drills a foot apart and thin to 2 inches. For main crop, sow in May or June, or for succession even in July, using the long-rooted varieties. The rows for these may be 16 to 20 inches apart, and the plants thinned to 2, 3 or even 4 inches. To raise Carrots for stock, the rows may be made wide enough apart, say 2 to 2½ feet, to allow of cultivation by horse power. In sowing Carrot or other small seeds, especially during dry weather, pains should be taken to firm the soil well over the seed, either by means of the feet, or with the roller of the garden drill.

8. **Klondike Carrot.** An entirely new variety of Carrot, grows 6 to 7 inches long, and 1½ inches through; color rich orange red (Specialty, see page 18.) Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

91. **New King Carrot.** The greatest Carrot introduced in the last 10 years. (Specialty, see page 18.) Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

60. **Scarlet Beauty Carrot.** A handsome and prolific Carrot. 2. Rich, deep scarlet in color. 3. In length, between long and half long orange. 4. Very straight roots. 5. Very little foliage for size of roots. 6. Delicious flavor. 7. Heavy yielder. 8. Uniform in shape. 9. Often 2¼ to 3 inches at the top and 10 to 12 inches long. Price: Pkt. 5c. Oz. 10c. 2 Ozs. 15c. ¼ Lb. 25c. ½ Lb. 40c. Lb. 75c.

64. **Pride of the Market Carrot.** (Specialty, see page 18.) Pkt. 5c. Oz. 10c. 2 Ozs. 15c. ¼ Lb. 25c. ½ Lb. 40c. Lb. 75c.

63. **Early Ox-Heart Carrot.** So very early, so shapely, so tender, and of such a fine, bright scarlet color. Not only is extreme earliness a characteristic of our Ox-Heart Carrot, but its exceptionally fine quality, being almost entirely without core. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 60c.

61. **Half Long Orange Carrot.** The skin is clear, bright in color and the flesh is close in texture, of very fine grain, with very small core. For hunching, the handsome appearance is a market advantage. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 60c.

62. **Improved Long Orange Carrot.** Uniformly a deep orange color, growing a long, smooth, symmetrical Carrot. Remarkable for the absence of the detractive side roots and divisions at the point. Tremendous yielder and of a rich, sweet flavor; will retain its delicious flavor all winter. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

CELERY

Pks., ozs. and ¼ lbs. delivered free, but add 8c to lbs.

Culture. One ounce will produce about twenty-five hundred plants and sow about two hundred feet of row. Sow the last of March or early in April, in an open border, in rich mellow ground in shallow drills, watering freely in dry weather. By rolling or pressing in the seed, the result will be more satisfactory than when only covered. Cut the tops off once or twice before planting out, to make them stocky. When the plants are 5 or 6 inches high, transplant the dwarf varieties 3 feet and the taller sort 4 feet between the rows; plant 6 inches apart in the rows. Cultivate well and when large enough, blanch by earthing up. The first operation is that of "handling," generally done by the beginning of September. After the soil has been drawn up with the hoe, it is drawn around each plant by the hand to keep the leaves firm in an upright position and prevent spreading. When the plants have become "set" in an upright position and the Celery is wanted for early use, they should be "banked." This is done by throwing the soil up as close to the plants as possible with a plow and finishing it with a spade, bringing the earth up nearly to the tops of the plants. The method, employed now for protecting it is by covering the tops of the banks with water-proof felt paper.

71. **Bolgiano's French Golden Self-Blanching Celery.** Perfect, solid, crisp, vigorous stalks; thrifty, compact growth, handsome, fresh, clean yellowish color, with a heart that is large and solid, of a beautiful rich golden-yellow color. You cannot buy better stock of Self Blanching Celery than this even if you pay \$5 or \$6 per lb. for it and you may not get as good. Our stock has proven over and over again to be without an equal. (Specialty see page 8.) Pkt. 5c and 10c. ½ Oz. 30c. Oz. 60c. ¼ lb. \$2.00. 1 lb. \$7.00.

76. **Sweet Nut Celery.** Most delicious Celery grown. We recommend it for nearby markets and home use. (Specialty, see page 8.) Pkt. 10c. Oz. 35c. ¼ lb. \$1.00. 1 lb. \$3.50.

81. **New Victory Solid French Crown.** (Specialty, see page 8.) Pkt. 5c. and 10c. ½ Oz. 20c. Oz. 35c. ¼ lb. \$1.00. 1 lb. \$3.50.

72. **Perfected White Plume Celery.** Is the most extensively used on account of its extreme earliness. Its stalks and portions of its inner leaves and heart are white naturally. By simply tying the plant together, or by drawing the soil firm against the plant with the hand and repeating the operation to hold the soil already against the plant in position, the work of blanching is completed. Pkt. 5c. and 10c. Oz. 20c. ¼ lb. 60c. 1 lb. \$2.00.

75. **New Winter Queen Celery. (Pedigree Stock.)** Is beautiful in appearance. Ribs perfectly solid, crisp and of a delicious nutty flavor. Pkt. 5c. and 10c. Oz. 15c. ¼ lb. 40c. 1 lb. \$1.50.

73. **Giant Pascal Celery.** This is a large, solid, excellent sort. It blanches very quickly to a beautiful yellowish-white color, is very solid and crisp, and of a fine nutty flavor. Stalks grow broad and thick, a single branch making a large bunch. Pkts. 5c and 10c. Oz. 10c. ¼ lb. 35c. 1 lb. \$1.25.

79. **The Pearl Le Grand Celery.** Keeps in perfect condition over winter and after other sorts are gone. Its large golden heart has a rich nutty flavor. Pkt. 5c. and 10c. Oz. 15c. ¼ lb. 40c. 1 lb. \$1.50.

588. **Evan's New Triumph.** This variety has a very strong vigorous plant; is crisp, brittle, tender and fine flavor. Pkt. 5c. and 10c. Oz. 10c. ¼ lb. 40c. 1 lb. \$1.40.

342. **Sweet Heart Celery.** A perfect Winter Celery, each stalk has three or more deliciously sweet hearts. Pkts. 5c. and 10c. Oz. 25c. ¼ lb. 75c. 1 lb. \$2.50.

78. **Giant Golden Heart Celery.** A gardener found in his Dwarf Golden Heart a few plants of larger growth. A careful selection made for several years, resulting in the Giant Golden Heart, which excels for larger size, solidity and keeping quality. Pkts. 5c and 10c. Oz. 15c. ¼ lb. 40c. 1 lb. \$1.50.

Bolgiano's New Victory Celery

74. **Golden Heart Celery.** Is crisp, solid, handsome and most excellent flavor, with a beautiful Golden Heart. Pkts. 5c. and 10c. Oz. 10c. ¼ lb. 35c. 1 lb. \$1.25.

CELERICAC or Turnip Rooted Celery

Culture for Root Celery. Sow the Seed at the same season and give the same treatment as Celery. Transplant the young plants to moist, rich soil in rows 2 feet apart and 6 inches apart in the rows.

Bolgiano's New Giant French Celeriac

139. There is not a single item of interest in the growing and developing of seeds that we pass by without most thoroughly investigating and testing to see if there is something of value to our customers. To prove our watchfulness, we are here introducing the Giant French Celeriac. Many thought the Celeriac which the Market Gardeners have had for years was good enough, but we are always on the alert for something better and are rewarded for our pains by being able to offer this splendid Celeriac. Pkts. 5c. and 10c. Oz. 25c. 2 Oz. 40c. ¼ lb. 75c. ½ lb. \$1.25. 1 lb. \$2.50.

83. **Large, Smooth Prague Celeriac.** A large Celery flavored root used extensively for flavoring soups, pickles, etc. also relished sliced as a salad with pepper and vinegar. It is also used to flavor chicken and potato salad. Pkts. 5c and 10c. Oz. 10c. ¼ lb. 35c. 1 lb. \$1.25.

Produced Good Crops In Bad Season

R. M. Taylor, Harford Co., Md., writes March 13th, 1909. "All the seeds I bought of you last year were true to name. In spite of the bad weather in the spring, my seed came up good, and every seed I bought of you produced well."

We Stood The Test

Fred. E. Folson, Allegheny Co., Pa., writes December 21st, 1908. "Please send me your catalogue for seeds. Out of seeds from four different firms, yours were the only ones to give good results."

We Are Proud Of This

S. T. Page, Lee Co., Fla., writes Dec. 2, 1908. "I have been using your seed more or less for over fifteen years, and never yet been disappointed."

CRESS

CRESSON
Berro o Mastuerzo
Kreffe

Culture. Sow curled or pepper grass thickly, in shallow drills, every two or three weeks. It should be cut often, and will continue to grow. It is useful not only for salad, but for the breakfast table and for garnishing.

520. **True Water Cress.** Should be sown in damp soil; or if a stream of water can be utilized, they would be much finer. They will thrive well in damp hot-beds. Rightly managed, their culture is very profitable. To obtain early salad it is a good plan to sow with Water Cress a strip 4 inches wide on the upper margin of the hot-bed, inside the frame, where it is always cool. Pkts. 5c. and 10c. Oz. 25c. ¼ lb. 75c. 1 lb. \$2.50.

521. **Fine Curled or Pepper Grass.** Pkt. 5c. Oz. 10c. ¼ lb. 15c. 1 lb. 30c.

CORN SALAD

MACHE *Macha o Valerianilla* Stechsalat

1 Ounce will sow 20 square feet, 6 Pounds will sow an acre

Culture. Sow during August or early in September, in drills ¼ inch deep and 6 inches apart. If the weather is dry when the seed is sown tread it lightly to insure germination. Keep down weeds with hoe. Just before the winter, cover thinly with straw or leaves.

24. **Large German Corn Salad.** Used as a salad and for garnishing. Pkt. 5c. Oz. 10c. ¼ lb. 15c. ½ lb. 20c. 1 lb. 40c.

We Supply Packages of Sweet Corn at 5c. and 10c. each, Postpaid. On Pints and Quarts Add 12c. Quart, Postage. One Quart Will Plant 200 Hills; 8 to 10 Quarts for an Acre in Hills.

CULTURE. Seed of the sweetest varieties is liable to rot if planted in wet or cold ground. Yet if we have an early warm spell in Spring, it may pay us to take some risks. Often the plants, when once up, will escape injury by a belated light frost. Plant in warm soil 5 or 6 kernels to a hill making the rows 3 feet apart for the dwarfier early sorts and 4 feet apart for the taller late sorts. Hills to be 2 to 3 feet apart in the rows, thin out to three plants in a hill. Hoe often and draw soil up to the stem, break off side shoots.

To have the finest Sweet Corn, it must be picked in just the right condition; that is when the skin of the grain breaks at the slightest pressure, and plantings should be made frequently enough to have a supply at this stage. The quality will be inferior if it is either a few days too old or too young.

EXTRA EARLY

1051. **Double XX Extra Early Adams' Sweet Corn.** Two weeks earlier than Extra Early Adams', large ears completely filled with 10 to 14 straight rows of snowy white deep grains. Per ear 5c. Doz. 40c. 100 \$2.50. Pt. 10c. Qt. 15c. 4 Qts. 45c. Pk. 75c. Bus. \$2.50.

1052. **Adams' Extra Early.** A splendid early variety, largely grown for early market. Per ear 5c. Doz. 40c. 100 \$2.50. Pt. 10c. Qt. 15c. 4 Qts. 45c. Pk. 75c. Bus. \$2.50.

1053. **Second Early Adams'.** Ears are larger and later than Adams' Extra Early. Per Ear 5c. Doz. 40c. 100 \$2.50. Pt. 10c. Qt. 15c. 4 Qts. 45c. Pk. 75c. Bus. \$2.50.

1054. **Gillespies First Early Neck Corn.** THE VERY FIRST GOOD SIZE CORN that can be brought to market. It is so hardy that it can readily be planted as soon as the ground is in good working order, and will, from the day of its germination, hurry forward to meet the early demand for fresh Corn, which is always very keen and causes this delicious, attractive and superior Corn to bring profitable prices. Per Ear 5c. Doz. 40c. 100 \$2.50. Pt. 10c. Qt. 15c. 4 Qts. 45c. Pk. 75c. Bus. \$2.50.

1182. **Bolgiano's "New Cream and Honey" Early Sweet Corn.** (Specialty, see Page 13.) Extremely early, most delicious flavor, exceptionally fine quality. Should be tried by every wide-awake market gardener and in every home garden, where the "best" of everything is enjoyed. Pkt. 10c. Pt. 25c. Qt. 40c. 4 Qts. \$1.25. Pk. \$2.50.

1049. **White-Cob 65-Day Corn.** (Specialty, see Page 13.) Per Ear 5c. Doz. 40c. 100 Ears \$2.50. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 40c. Pk. 75c. Bus. \$2.50.

1115. **Premo 60-Day Corn.** (Specialty, see Page 13.) Experts pronounce this Corn to be from 5 to 7 days earlier than any other Sugar Corn in existence. It is superior to many leading early varieties in quality, size and yield. Can be planted as early as the Adams' for the young plant withstands slight frosts. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1054. **Red-Cob 90-Day Corn.** This Corn meets a long-felt want, because it suits the retail market sales; makes a first-class Crop Corn for feeding stock. The ear is large, handsome, suits for early or late crop, because it matures in 90 days. This makes it always a safe and profitable crop. Per Ear 5c. Doz. 40c. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 50c. Bus. \$1.50.

1055. **Early Minnesota.** Ears larger than the CORY and matures between that variety and the CROSBY. Eight rows of quite large sweet grains. Per Ear 6c. Doz. 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1057. **Mammoth White Cory Sweet Corn.** Produces ears 7 to 8 inches long; 12-rowed; whitened-cobbed and covered with very large white grains of extra quality. Per Ear 6c. Doz. 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

SECOND EARLY OR INTERMEDIATE

1068. **Peep-o-Day.** The two points to this remarkable Corn are its extraordinary earliness and unparalleled sweetness so marked is its sweetness and delicacy of flavor, that many of our customers now plant PEEP-O-DAY *exclusively*, arranging the plantings a few days apart so as to have this delicious Corn throughout the season. It is wonderfully productive. Our crops for three years almost double the yield per acre of any other variety we have grown, early or late. Incredible as this may seem, it is readily accounted for by the fact that the stalks bears from 2 to 5 ears each and the growth being dwarf—about 4 feet—admits of a very close planting. Prices: Pkt. 10c. Pt. 15c. Qt. 25c. 2 Qts. 45c. 4 Qts. 75c. Pk. \$1.35. Bus. \$5.00.

1058. **Champion.** Very large ears considering its earliness. Per Ear 6c. Doz. 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1056. **Crosby.** Matures after Minnesota; fair-sized ears of good quality. Per Ear 6c. Doz. 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1059. **Earliest Sheffield Sugar Corn.** Planted early as Adams', it will stand slight frosts, makes a strong vigorous growth with abundant foliage, growing about 5 feet, bearing usually 2 ears of handsome appearance, entirely free from smoot; exceptionally fine flavored and juicy. Per Ear 6c. Doz. 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1060. **Extra Early Evergreen.** Ears like evergreen,—very large, with about 18 irregular rows and a very long grain of the very best quality; remains in condition for use longer than other sorts, exceeding the Stowell's in this respect. Per Ear 6c. Doz. 50c. 100 \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1061. **Early Mammoth Sugar.** Market Gardener's favorite. Two weeks earlier than the late Mammoth. Per Ear 6c. Doz. 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

GENERAL CROP

1066. **Snow White Evergreen.** (Specialty, see Page 13.) Per Ear 5c. Doz. 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1067. **Stowell's Evergreen.** The truest strain of this leader of all Corns is in our possession. It remains longer in a first-class marketable condition than any other variety. Per Ear 6c. Doz. 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

522. **Hickox Improved.** Handsome ears, very white and of very rich flavor. Per Ear 6c. Doz. 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

LATE CROP

1065. **Country Gentleman Sugar Corn.** (Specialty, See Page 13) Per Ear 6c. Doz. 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1062. **Large Late Mammoth Sugar.** Largest of all sugar varieties. Producing perfect ears of immense size, having from 12 to 16 rows. A fine market variety. Sweet and delicious. Per Ear 5c. Doz. 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. Gal. 60c. Pk. \$1.00. Bus. \$3.50.

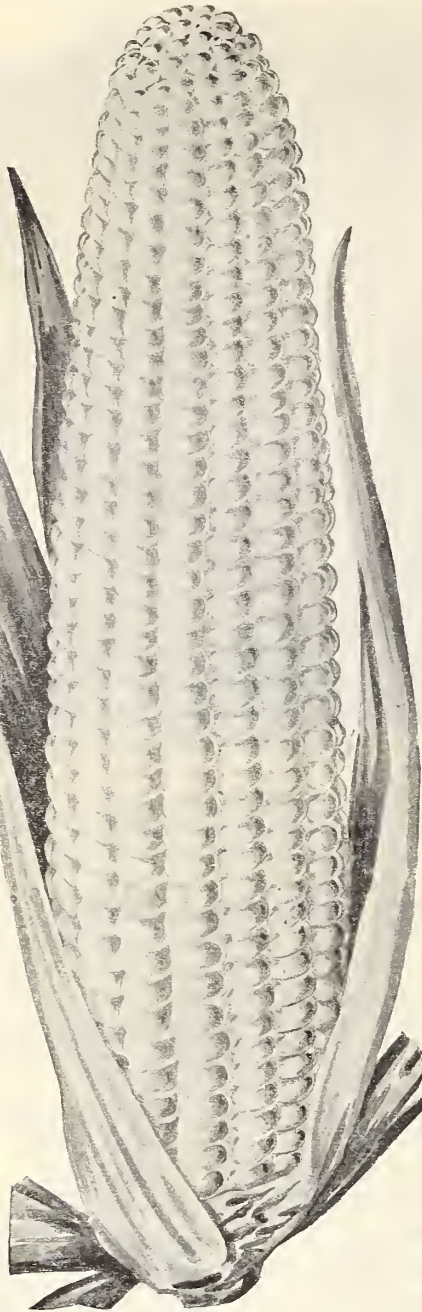

1063. **Black Mexican.** Very sweet and of superior flavor; seeds black. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00.

523. **Shoe Peg, or Ne Plus Ultra.** Small, but one of the sweetest sort. Per Ear 6c. Doz. 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1064. **Rice Pop Corn, for Popping or Seed.** No variety of Pop Corn is superior to this for popping. 10c per lb, shelled. By mail, 15c. per lb. 3 lbs. shelled Pop Corn and Popper, 25c.

A Grand Display of Vegetables

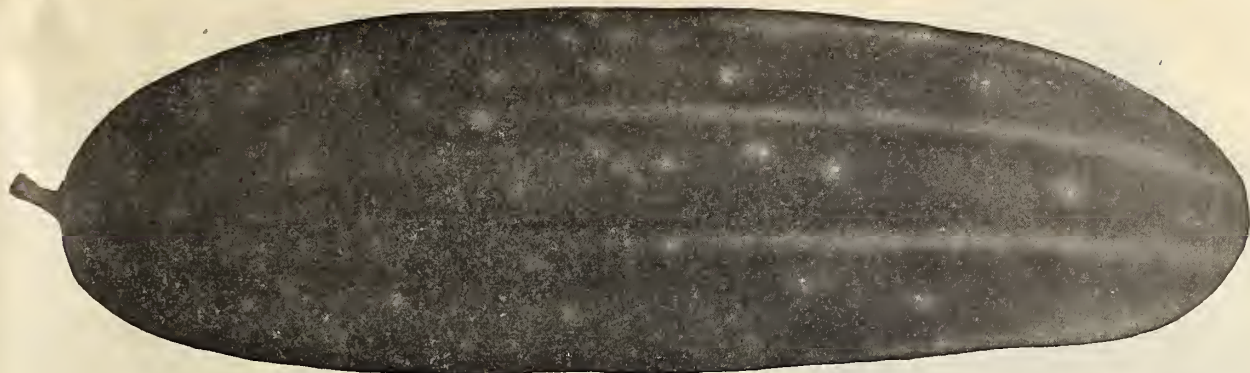

W. S. Adkinson, Kent Co., Md., writes Aug. 9, 1909. "At the Queen Anne County Grange Meeting at Church Hill, Md., July 28, 1909, a grand display of vegetables and fruits were exhibited. I exhibited products grown from your seeds and was awarded a blue ribbon on each and every exhibit as follows:—

- White Cob 65-Day Corn.—1st. for quality, size, etc.
- Plucky Baltimore White Potato.—1st. for quality, size, etc.
- Early Leviathan Pole Lima Beans.—1st. for quality.

A Splendid Word of Encouragement.

Gentlemen:—I want to tell you that I have been buying your seed 12 years, and they are the best I got anywhere. Last Spring I bought numerous seed from you, and tho' the weather was distressingly dry, I don't believe a seed failed to germinate. I tell you this because I know a word of praise encourages one.

One ounce will plant fifty hills; two pounds will plant one acre.

CULTURE For very early, sow in hotbeds upon pieces of sod, or in small pots, and they can be readily transplanted with a gain of about six weeks before they can be sown in the open ground. Plant out in rich soil when danger of frost is over, or protect by hand glasses, or by paper held down at the corners with a handful of earth. For general crops, sow in the open ground as soon as the weather is settled and warm, and every two weeks for a succession. For pickles sow from middle of June to first week in July. Sod land, turned over in the fall, is the best for them. Plant in hills 4 feet apart, putting a shovelful of well-rotted manure in each hill.

84. **Bolgiano's Early Fortune Cucumber Actually Proven by Many Expert Growers to be The Earliest and The Best Dark Green White Spine Cucumber On Earth.** Full-blooded, as pretty as a picture, and extremely early, wonderfully productive, a model in shape, of the most inviting and attractive deep green color. Without a doubt the finest in the world. If you wish to secure any of it this year for hot-house, frames, or open field culture, you had better order immediately, or our short supply will be exhausted. Pkts. 10c. Oz. 15c. ¼ Lb. 35c. ½ Lb. 60c. 1 Lb. \$1.00.

135. **New Klondike.** Very dark green 6 to 7 inches long and two inches thick, remains crisp a long time. It is a Grand Market Sort (Specialty, see page 7.) Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

82. **Lord Baltimore.** The Wonderful New Dry Weather Cucumber, dark green, about 15 inches long. Produces fine crops when other varieties fail. (Specialty, see page 7.) Pkt. 5c & 10c. Oz. 15c. ¼ Lb. 35c. ½ Lb. 65c. 1 Lb. \$1.25.

544. **Davis Perfection Cucumber.** A very good, dark green, white spine cucumber, originated by the same Michigan Market Gardener who originated The Davis Wax Bean. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. 1 Lb. \$1.00.

85. **Arlington White Spine.** Beautiful in shape, color, and of the finest quality. The fruit is long, cylindrical, dark green with very white, crisp, and tender flesh of excellent flavor. In the United States the Arlington is used more, perhaps, than any other variety; and in excellence is surpassed only by the New Early Fortune Cucumber. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

86. **Improved Extra Early White Spine.** Produces Cucumbers of finest form and most salable size for shipping purposes; dark green color; a favorite with truckers and gardeners. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

90. **New Extra Early Evergreen White Spine Cucumber.** Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

87. **Thomas Perfection Early White Spine.** A selection from the famous Arlington White Spine. It is regarded as far superior to that variety. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 30c. 1 Lb. \$1.00.

93. **Bolgiano's New Prolific Pickling.** An exceptionally fine stock of pickling cucumber; bears fruit from the time it first starts until frost. Vines are strong and vigorous, yielding immense quantities of fruit, and remains in a fresh, healthy growing state longer than any other sort. Skin is very thin, tender and quite free from toughness when pickled. Pkt., 5c. Oz. 10c. ¼ Lb. 30c. 1 Lb. \$1.00.

97. **Thorhurn's Everhearing.** The famous pickling Cucumber. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

92. **New Excelsior Long Green Cucumber.** It is a model for size, form, and beauty. Deep green color, and an abundant cropper. For table use and pickles. This sort runs so uniform that the Cucumbers look as if they had all been selected. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. 1 Lb. \$1.00.

83. **New Extra Long White Spine Cucumber, or Fordhook Famous.** Skin very deep green; flesh greenish white, firm and unusually crisp. The plant is a strong grower; leaf large and of a deep green color. The fruit is long, (12 to 17 inches), smooth, slim and uniform. Owing to its large, thick, heavy leaf, it withstands attack of insects. Its northern origin insures hardiness and vigor. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. 1 Lb. \$1.00.

340. **Fordhook Pickling.** One of the best Cucumbers for pickling. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

95. **Improved Jersey Pickle.** It is medium in length, very shapely, prolific and holds its color. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

98. **Improved Long Green.** Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

94. **Early Frame, or Early Short Green.** Desirable for producing pickles of medium size and fine quality. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

518. **West India Gerkin.** Pkt. 5c. Oz. 15c. ¼ Lb. 40c. 1 Lb. \$1.50.

Kraustobl

Pkts. Ozs. and 1/4 Lbs. delivered free, but add 8c to Lbs.

One ounce of seed will produce about 5000 plants

CULTURE. The Kales are more hardy than Cabbage, and make excellent greens for winter and spring use, and are improved by frost. Sow from May to June, and cultivate the same as Cabbage. For early spring use sow in September, and protect during winter. Some of the varieties are so hardy that the green leaves may be dug out from under the snow in winter and be used for greens.

113. **Bore Cole, or Kale. Spargel Kohl.** The most salable, delicious and tender of all Winter Kales. About Baltimore, it is sown in May, and transplanted like cabbage to stand over Winter. It is taller than the extra dwarf varieties and when the leaves are stripped, or fall off, new tender leaves quickly grow out. Then they are again stripped off and used for marketing. It will stand the coldest Winter. Besides being a delicious vegetable, it has always been an exceptionally profitable crop, bringing in money during the Winter months when mostly all vegetables are scarce. Pkts. 5c and 10c. Oz. 10c. 1/4 Lb. 25c. 1/2 Lb. 40c. Lb. 75c.

112. **Extra Dwarf Green Curled Scotch, or Norfolk Kale.** One of the best Kales for Spring sowing in the North; the principal sort grown South for Northern markets; hardy, and will remain over Winter where temperature does not go below zero. Very dwarf and spreading, rarely exceeding 18 inches in height. Leaves are a bright green color beautifully curled and produced in great abundance. Pkt. 5c. Oz. 10c. 1/4 Lb. 15c. Lb. 50c.

108. **New Imperial, Very Curly, Long Standing Kale.** Beautifully curled and crimped sort; strong, vigorous habit, perfectly hardy, bright green color; very attractive in appearance; superior to all late sorts; will stand longer without shooting to seed than any other variety. Pkt. 5c. Oz. 10c. 1/4 Lb. 15c. Lb. 40c.

109. **Curled German Kale.** Hardy; stands the frost of our severest Winters; grows rapidly; dwarf habit, beautifully curled. Pkt. 5c. Oz. 10c. 1/4 Lb. 15c. Lb. 40c.

110. **Siberian Curled.** Pkt. 5c. Oz. 10c. 1/4 Lb. 15c. Lb. 40c.

CULTURE. For early summer use, sow in hotbeds in March, sowing every two weeks for succession. Transplant the young plants to rows 2 feet apart and 8 to 12 inches apart in the row. For winter use, sow in August, transplant to frames; and for this purpose the early heading varieties, such as the Millionaire lettuce, are best adapted. The Cos varieties require to be tied up for a few days in order to properly blanch them.

204. **Ostrich Plume Mustard or Chinese Broadleaf.** Desirable and ornamental. It is distinct from any other variety. The plants are of vigorous growth, and the beautiful dark green leaves curve outwardly like a fine ostrich plume. The edges are as thoroughly curled and lacinated as the best double curled parsley making the leaves equally desirable for garnishing. So attractive is the habit of growth and the feathery effect of the finely fringed leaves that this plant is quite worthy of a place in the garden as an ornamental border plant. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

MUSHROOM SPAWN BLANC DE CHAMPIGNON *Seta* Champignonbrut

Culture. Mushrooms may be grown in cellars, under benches of greenhouses, or in sheds where the temperature of 50 degrees can be kept up through the winter. The beds should be made from November to February, according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse-dung, free from straw and litter, and mix an equal bulk of loam from an old pasture with it. Keep this under cover, taking care to turn it every day to prevent it from heating, until the pile is large enough to make a bed of the required size. Three or four feet wide, eight inches deep and any length desired are the proper proportions for a bed; but these may be varied. Prepare the mixture of loam and manure, making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of spawn 2 or 3 inches in diameter; fill up the whole with compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Spread layer of soil over the heap to the depth of 2 inches, and cover with 3 or 4 inches hay, straw or litter. Examine bed often to see that it does not get dry. Take special care, however, when water is given that it be at a temperature of 100.

MUSKMELONS

Cantaloupe

ZUCKER ELONE
Melon *Amizcleno*
Melon *Muscade*

Pkts., Ozs. and ¼ Lbs. Delivered Free, but add 8c to Lbs.
One ounce will plant about 50 hills; 2 to 3 lbs. in hills per acre.

CULTURE.—Melons thrive best in a light, rich soil. Plant early in May, when the ground has become warm and dry, in hills 5 to 6 feet apart each way for Muskmelons, 8 to 10 feet for Watermelons. Previous to sowing the seed, mix a few shovelfuls of well-rotted manure in each hill and plan in each 12 to 15 seeds; after all danger of the bugs is over, thin out to three to four plants per hill. A few hills for early use may be had by sowing on pieces of sod in a hotbed, and when warm enough transplant to open ground. Melon vines are subject to the same destructive insect and fungous foes as are cucumber and squash vines. Early and repeated spraying with Bordeaux Arsenate of Lead Mixture is always advisable for these crops.

16. **"Junior" Rocky Ford.**—A little larger, two weeks earlier, twice as prolific as Rocky Ford. (Specialty, see page 8.) Pkt. 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

51. **Melting Gold Cantaloupe.**—Simply the most delicious Cantaloupe that was ever eaten, the sweet luscious flesh is as yellow as melting gold. It is the best eating cantaloupe in the world and a splendid profitable shipper. (Specialty, see page 8.) Pkt. 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

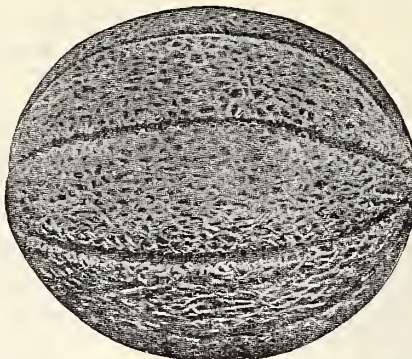

548. **Burrels Gem.**—The fruit is of good size, handsome appearance and fine flavor. The skin is a rich, dark green, contrasting finely with the deep orange-salmon colored flesh; sweet, tender. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

167. **Eden Gem Cantaloupe.**—This magnificent new Muskmelon is a selection of the old Rocky Ford, which it completely surpasses in lusciousness, yield, carrying, and good selling qualities. In shape it is somewhat longer and a trifle larger and closer and deeper netted. Pkt. 10c. Oz. 15c. ¼ Lb. 30c. ½ Lb. 50c. Lb. \$1.00.

334. **Pollock Cantaloupe.**—A rust resisting melon, with netting over the blossom end; not a long melon, but rather inclined to be short, with the finest shipping and eating qualities. The selections from time to time have reduced the size, now they crate nicely. Pkt. 10c. Oz. 15c. ¼ Lb. 30c. ½ Lb. 50c. Lb. \$1.00.

337. **Knight Cantaloupe.**—A very popular melon with large growers and shippers; somewhat larger than the Rocky Ford or Netted Gem. We offer the original stock which is very fine. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. ½ Lb. 60c. Lb. \$1.00.

157. **Rocky Ford Cantaloupe.**—Bolgiano's Trustworthy stock. The finest in the world. Size 4 inches high, by 5 inches long. Weight 1½ lbs. Netting well developed, closely laced and interlaced and of an attractive gray color. Crevices between the nettings very small. Ten distinct ribs. The union between the ribs very narrow but well defined from stem to blossom button. Blossom button well developed but small. Color of rind in crevices and unions light green turning toward grayish slate when ready to pick and ship long distances. Rind very tough. When cut, meat light green changing very slightly toward gold near the centre. Fine grained, firm and of high quality, very spicy and sweet. Flesh very deep leaving a triangular seed cavity, seed held in three lobes. Abundant yielder, having produced 300 standard crates from one acre. Somewhat later than our "Junior" Rocky Ford but continues a long time in bearing. Our seed is saved from the finest melons of the first picking. Each individual melon is cut open by hand and carefully inspected both inside and out. Last, but not least, it is an excellent shipper. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. ½ Lb. 25c. Lb. 50c.

CULTURE. For early green or bunching Onions sow seed of Silver Skin or other hardy white varieties in early August in well prepared and well drained rich, loamy soil, giving one foot space between the rows, and using 20 pounds of seed per acre. In many localities they winter well without mulch or other protection. For dry (fall) bulbs, select a clean, rich, well drained and well manured piece of land, prepare a perfect seed bed, and sow seed in early spring in drills 15 inches or so apart, using 4 to 5 pounds of seed per acre. Use wheel-hoe and weeders freely and thin plants to stand at least 2 inches apart in the rows. Pull when tops begin to die down, cure and sell, or store in a cool, dry place. For sets, select clean sandy soil of medium fertility, prepare it well in early spring, and at once sow seed in drills a foot apart, using 40 to 60 pounds of seed per acre. Gather the sets when ripe, cure and store in a dry, airy place. They may be wintered in a slightly frozen condition, but must be protected from repeated freezing and thawing. In early spring following plant them in shallow drills, 12 inches apart, and about 2 inches apart in the drill.

By sowing seed of the Spanish type, such as the Frizetaker and Southport Globes, under glass in January, February, or even March, and transplanting in April to open ground 3 to 4 inches apart in the rows, bulbs of immense size may be produced.

214. **White Silver Skin Onion.** This superior stock is almost exclusively used for growing sets, which is the strongest proof that it is the best from which to grow the large white Onions. Its delicate, mild flavor, its stately form and large handsome size, its pure white color, make it a most desirable variety for the table, the most profitable for market and shipping. Plants are of an extremely thin neck and type, and sure to ripen early. Bulbs are perfect in form and quite thick through. They are fine-grained, crisp and mild. Bulbs should be harvested as soon as ripened and dried in the shade to preserve their silvery white skin, the attractiveness of which makes them command the highest market prices, and removes the necessity for peeling them. Pkt 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.

205. **Mammoth Prize-Taker Onion.** (Specialty, see page 21.) Pkts. 5c & 10c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.25.

206. **Bolgiano's Superior Yellow Globe Danvers Onion.** Has handsome form, with very thick bulb and small neck; very early, enormous cropper; keeps perfectly, and is a market favorite of large size; remarkably solid and heavy; is one of the safest, surest keepers. Pkt. 5c and 10c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.10.

216. **Round Yellow Danvers.** Is the same shape as the White Silver Skin. Brownish-yellow color; bulbs quite flat and of good size; largely grown for sets. They are hardier than the white, and keep better through the Winter. In the Southern States they can be planted in Autumn and will continue growing during the entire Winter. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.10.

536. **Bolgiano's Yellow Dutch or Strasburg.** Grows round, plump sets. Skin a bright attractive straw color. Full-sized Onions are somewhat flattened; mild flavor, excellent keepers and shippers. It is very productive. Pkts. 5c & 10c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.25.

212. **Red Wethersfield Onion.** This is the most beautiful, large, handsome, globe-shaped red Onion. Earliness, productiveness and keeping qualities. It has perfect form, skin deep purplish-red; flesh purplish-white; fine grained; produces enormous Onions. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.25.

211. **Extra Early Long-Keeping Australian Brown Onion.** Solid and most attractive. Produces good-sized Onions weeks earlier than the Red Wethersfield. Skin is a clear amber brown. Pkt. 5c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.10.

511. **Large White Portugal.** The standard large flat variety. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.

Pois Chicharos o Guisantes

Orbsen

We supply Packets of Peas at 5c and 10c postpaid. Add 8c to Pints and 15c to Quarts by Mail.

One quart will plant about 100 feet of drill. One and one-half to two bushels for an acre.

Culture.—Peas of extra early, smooth class are the very first thing to be planted in the garden in spring. The wrinkled sorts follow a little later, as they are not quite so hardy. Tall late varieties need brush or other support. By selecting sorts that do not grow much over two feet high, the necessity of providing brush may be avoided. Judicious selection of varieties and planting frequently for succession will give a full supply of the choicest green Peas almost during the entire season, with the possible exception of the hottest part of the summer. Open furrows three or four inches deep and three feet apart; scatter the seed Peas into them and cover with hoe or plow. Cultivate like corn or beans. The late tall sorts may be planted in double rows and brush stuck in between for support. All Garden Peas, however, require good, strong and fertile land. Heavy yields cannot be obtained on poor soil. The very dwarfest sorts of the American Wonder type will succeed only on the very richest garden land, and may be planted in rows a foot apart.

Those marked with a star (*) are wrinkled marrows, and unless otherwise stated should be sown thicker than the round Peas, and not until the ground has become warm as they are more liable to rot. They are the finest flavored of all Peas.

EXTRA EARLY VARIETIES

1087. **New Long Podded Alaska Pea.** We recommend this new Peas the greatest money making Pea that has been introduced since we first put out the Wonder Worker Pea. Be sure to give it a trial. (Specialty See Page 11.) Height 2½ ft. Pt. 15c. Qt. 25c. 4-Qts. 85c. Pk. \$1.60. Bu. \$6.00.

NORTHERN-GROWN SEED POTATOES
GROWN EXPRESSLY FOR SEED

POMME DE TERRE *Patatas* Kartosseln

Culture. Any good well drained, fibrous loam will produce Potatoes under right climatic conditions. For early Potatoes, which mature in 8 to 10 weeks from planting, the soil must be particularly rich. A rich clover sod, manured and broken the year before and planted to corn, beans, peas, oats, etc., is in best shape for giving a good yield of nice clean Potatoes. Stable manure had better be applied to the land the year before, while some good complete fertilizer, at the rate of up to 1000 pounds per acre if applied broadcast, or 400 to 600 pounds if applied mostly in the rows, may be used directly for the Potato crop. Open furrows 3 feet apart and 3 to 4 inches deep. Apply the fertilizer, and run the furrower or small plow again in the furrow to mix the fertilizer with the soil and leave a mellow seedbed. Then plant good-sized pieces, each containing not less than 2 or 3 eyes, 15 inches apart in the furrows for early Potatoes, and 18 inches apart for late ones. In some of the large Potato sections the Potatoes are always planted in check rows 3 feet apart each way. Cover with cover, small plow or other suitable tool. Cultivate often. Spray with Bordeaux Arsenate of Lead Mixture as a protection from flea beetle, potato beetle and blight. *8 to 10 bushels will plant an acre.*

We are Large Growers of Aroostook County Maine, Grown Seed Potatoes. Prices subject to Market changes. Special prices cheerfully given to large buyers on application for both Maine and Virginia Second crops. Because of the scarcity of barrels in Maine we always ship in barrel sacks of 165 lbs. net. PEPPER
PIMENT *Pimiento* Pfeffer
J. M. Kirkpatrick, Cecil Co., Md., writes Oct. 9, 1908. "The Chinese Giant Pepper Seed, bought of you were the largest I have ever seen. Measured from 14 to 15 inches around."

Mammoth Ruby King Pepper

227. **Extra Selected Stock.** This magnificent variety is now recognized as one of the best Red Peppers for market or family use. Every one who has seen our crops has been enthusiastic in praise of the beautiful plants crowded with the large handsome fruits of a bright ruby red color. The Peppers grow from 4 1/2 to 6 inches long by 3 1/2 to 4 1/2 inches through. Added to their beautiful color when ripe is the fact that they are remarkably mild and pleasant to the taste—in this respect unequalled by any other Red Pepper. We cannot too strongly recommend the Ruby King. So mild and pleasant in flavor they can be sliced and eaten with pepper and vinegar, like Tomatoes, and makes a very pleasant and appetizing salad, while for stuffing and pepper hash no other variety can equal them. Pkts. 5c & 10c. Oz. 20c. 1/4 Lb. 60c. 1/2 Lb. \$1. Lb. \$2.

RADISH

RADIS ET RAVE
Rabanos y Rabanitos
Rabics und Rettiig

Pkts., Ozs. and ¼ Lbs. Delivered Free, but Add 8c to Lbs. 6 Ozs. of Seed will plant 100-yard Row.

Culture. Sow as soon as the ground is dry in the Spring, in rows 8 to 12 inches apart, every week or ten days for a succession, up to the middle of June, after which they are but little used, unless a cool northern spot can be had, where the ground is shaded during part of the day. They should be sown in light, rich soil, as a crisp Radish cannot be produced in heavy soils. Sow also in early Fall for late crops and Winter use. Sow 8 to 12 pounds to the acre. Radishes should be eaten when quite small; it is a mistake to let them grow too long and too large. This applies particularly to Ruby King and small turnip-shaped sorts.

Round Scarlet Globe Radish.

EXTRA EARLY ROUND VARIETIES

Wafcrwurzel

Culture.—Sow as early as the ground can be worked in the Spring, in drills 12 inches apart, 1 inch deep, and thin out to 6 inches in the row. Keep them free from weeds. Cultivate the same as carrots and parsnips. A part of the crop may be left in the ground till spring, when it will be found fresh and plump. The roots are cut into pieces ½ inch long, boiled until tender, and then served with drawn butter, in which way it is a delicious vegetable. They are also mashed and baked like parsnips, and have a sweet agreeable flavor. Mashed and fried, the flavor is much like that of the oyster. Sow 8 to 10 pounds to the acre. One ounce to 50 feet of drill.

275. **Bolignano's New "Great Giant" Salsify.** The largest, purest and best Salsify to grow. (Specialty, see Page 18.) Pkts. 5c. and 10c. Oz. 15c. ¼ Lb. 40c. ½ Lb. 75c. 1 lb. \$1.50.

276. **Sandwich Mammoth White Salsify.** Superior in quality, pure white color, very meaty and fine flavor. Our stock unusually good, grows so large and shapely. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. 1 lb. \$1.00.

504. **Large White.** Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 lb. 75c.

One ounce to 100 feet of Drill.
10 to 12 Lbs. in Drills for an acre.
25 to 35 Lbs. Broadcast for an acre.

Culture. Spinach is an important market gardener's crop, of easy culture. For spring and summer use sow in drills 1 foot apart and 1 inch deep, as early as the ground can be worked, and every two weeks for a succession. For winter and early spring use, sow in September in well manured ground; cover with straw on the approach of severe cold weather. The ground cannot be too rich; the stronger the ground the more delicate and succulent will be the leaves.

Light applications of nitrate of soda have often a magic effect on Spinach. Spinach is sometimes forced by sowing in early September in frames, over which sash is placed during February and March, and further protected by mats during severe freezing weather.

1106. **New Improved Curled Long Standing.** The very best for spring. (Specialty, see Page 18.) Pkt. 5c. Oz. 5c. ¼ Lb. 10c. 1 lb. 25c. 5 lbs. 75c.

1107. **New Victoria Spinach.** The foliage is heavy, the broad, dark green leaves are of the finest quality. Pkt. 5c. Oz. 5c. ¼ Lb. 10c. 1 lb. 25c. 5 lbs. 75c.

1105. **Curled Leaf Savoy, or Bloomsdale, American grown.** Large Curled and wrinkled leaves, tender and of the finest flavor. Pkt. 5c. Oz. 5c. ¼ Lb. 10c. 1 lb. 20c. 5 lbs. 75c. 25 lbs. \$2.50. 100 lbs. \$10.

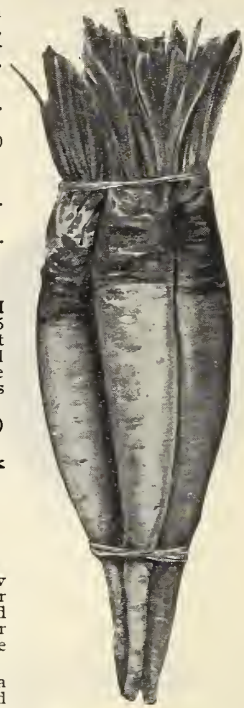

1104. **Curled Leaf Savoy, or Bloomsdale, Imported.** We grow many thousands of pounds of both the American and Imported seed each year. We believe our private stock is the choicest it is possible to produce. We solicit your orders. Pkt. 5c. Oz. 5c. ¼ Lb. 10c. 1 lb. 20c. 5 lbs. 60c. 10 lbs. \$1.00. 25 lbs. \$2.50.

1108. **Long-Standing Thick-Leaved Spinach.** Leaves are large, thick, fleshy and crumpled, fully equal to the Savoy-leaf. Pkt. 5c. Oz. 5c. ¼ Lb. 10c. ½ Lb. 12c. 1 lb. 20c. 5 lbs. 60c.

1109. **Monstrous or Viroflay.** A valuable variety; has large, round, thick, leaves. Pkt. 5c. Oz. 5c. ¼ Lb. 10c. 1 lb. 20c. 5 lbs. 60c. 10 lbs. \$1.00.

The Largest and most Successful Tomato Growers in Maryland, Florida, Texas, Throughout the South, in Canada, Mexico, Australia and Every State in the U. S. where Tomatoes are Grown—They All Say Year after Year, Bolgiano's Tomato Seeds Produce the Best Tomatoes that Grow. We Prepay Postage on all Tomato Seed Including Pounds. One ounce of seed will produce from 3000 to 4000 plants.

CULTURE.—For first early Tomatoes select varieties of the earliest types, and start the plants under glass during February. When plants are 2 inches high, transplant into flats, thumb pots or plant boxes, and later on transplant again, giving more room. Never crowd the plants, but keep them short and stocky. Plants already in bloom or with fruit set, if in wooden plant boxes or in pots, may be transplanted to the open ground without disturbing their roots, and will continue to bloom and fruit without check. Set these sorts 4 feet apart each way in warm, mellow soil of fair fertility as soon as danger from belated frosts is past. For main crop, the plants can be started somewhat later, in hotbed or cold frame, once transplanted to keep them stocky, and then set in open ground, in fairly good warm soil, 5 feet apart each way. A very ornamental show can be made in the home garden by training tomato plants to stakes, poles or trellis. Applications of superphosphate, or of some good complete (vegetable) fertilizer often have a very happy effect on Tomatoes in hastening maturity and increasing the yield.

RED TOMATOES

77. **Maryland! My Maryland!**—A wonderful "Double Yielding" Tomato, offered this year for the first time, entirely distinct, never before has there been a vegetable so remarkable. GARDEN TURNIPS

Stechrube
Navet
Nabo

Our Turnip and Ruta Baga Seeds are grown exclusively from perfect turnips, every one of which is selected and then transplanted for the growth of our seed. Hence, Turnip crops from our seeds must of necessity be very choice and most satisfactory in size, in trueness, in solidity and in beauty. Crops from our seed will prove infinitely better than much of the trashy seed sold for Turnip Seed, which for the careless manner in which it is grown and in inferiority of stock so frequently produces little more than Turnip Tops. Secure your supply from our superior stock.

Culture. For early Turnips, sow as soon as the ground opens in Spring. The EXTRA EARLY PURPLE TOP MILAN and EXTRA EARLY WHITE MILAN Turnips are the earliest of all, being of very quick growth and fine table quality; they are both flat strap-leaved varieties.

No. 327 should be sown from any time in July to first of August; but the other kinds, for Winter use, may be sown from the middle of July until the end of August. Turnips are generally sown broadcast, but much larger crops are obtained (particularly of the Ruta Bagas) by cultivating in drills 18 inches apart and thinning to 6 inches in the drill. Sow in drills, one pound to the acre; broadcast, two to three pounds to the acre.

313. **Red Top White Globe.** The handsomest and most salable Turnip. As a profitable sort for home or market it is unsurpassed. It is a large rapid growing sort, with globular shaped roots. Flesh pure white. The skin is white and purple, the under portion being white and the top bright purple. (See Illustration) On account of its shape, it will out-yield any other sort. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

314. **Red or Purple Top White Flat Turnip.** This is one of the best table Turnips on the market, being fine grained and of mild flavor. It is white below, with a bright purple top; flesh white, leaves short, narrow and erect. Will mature in 8 or 9 weeks. A good cropper and an excellent keeper. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

327. **Ruta Baga Market Gardeners' Improved Purple Top.** Our Ruta Baga is select yields enormous crops of handsome, large, solid, yellow fleshed turnips; is grown largely for cattle food; keeps over Winter till Spring in good condition. Get our splendid stock, and the crops will satisfy and remunerate you. It is also used as a table vegetable because of its sweetness. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

321. **Southern Seven Top.** Hardest of all sorts; may be left standing in the open ground during winter. In the Southern States it yields in the Spring abundant foliage for boiling with cured meats, and is only desirable for this purpose. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

320. **White Egg.** Oval or egg shape, handsome and sweet; flesh firm and sound-grained; thin and perfectly smooth skin of snowy whiteness. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

323. **White Flat Dutch.** Pure white, flat strap-leaf Turnip. Early, medium size, excellent quality for early Spring sowing. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

324. **Purple Top Yellow Aberdeen.** Medium size, round, flesh pale yellow, tender and sugary, the plant is hardy and productive and keeps well. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

316. **Yellow Globe.** Yellow Globe is a wonderful cropper, and keeps far into the following year. It begins to bulb at the very start and forms large-sized roots and small tops. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

530. **Southern Prize or Dixie.** Makes large round white Turnips in addition to salad; hardy and needs no protection, the most popular Winter and Spring salad Turnip grown. Pkt. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

322. **Large Amber Globe.** Flesh yellow, fine grained and sweet; hardy; keeps well, a good cropper. Very popular in the South. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

319. **Sweet German.** Should be sown a month earlier than flat Turnips. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

326. **Cow Horn.** A white Turnip of peculiar long shape and quick maturity. It grows to a large size, standing half out of the ground. Oz. 5c. ¼ Lb. 15c. Lb. 35c.

317. **Golden Ball, Orange Jelly or Robertson's.** Flesh sweet and firm. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

318. **Yellow Stone.** Flesh crisp, tender, of fine quality. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

529. **Long White French.** Flesh hard, crisp. Oz. 5c. ¼ Lb. 10c. Lb. 25c.

Fruit large, glossy red, of excellent flavor. **Bederwood**—Early and of medium size. **Glen Mary** (New)—A very large variety; larger than Sharpless or any other berry and fine flavor. **Clyde**—Fruit large, firm and of light scarlet color. **Excelsior**—A new acquisition, large, late, very prolific; splendid for canning and shipping. **Brandywine**—Very large; productive; strong grower. **Tennessee Prolific**—Large, sweet, firm. **Kentucky**—Medium to late. **Gandy**—Late, fine for canning. **Michael's Early**—Very early. **Bubach (P)**—Medium to late. **Tubbs**—Very early. **Sharpless**—Old reliable. **Wilson**—Old standard sort. Medium early. **Cumberland**—Medium, very large, juicy, of good flavor. Productive. **Crimson Cluster**—Late. One of the finest yet introduced. **Hoffman**—Medium size, firm and good quality and productive. **Johnson's Early**—One of the finest early berries grown. Do not let it get too thick. **Zeiter's Early**—For an extra early berry this is the best of all. Good shipper. Very productive for so early a berry. **Lady Finger**—Best for preserving. **William Belt**—Early and delicious.

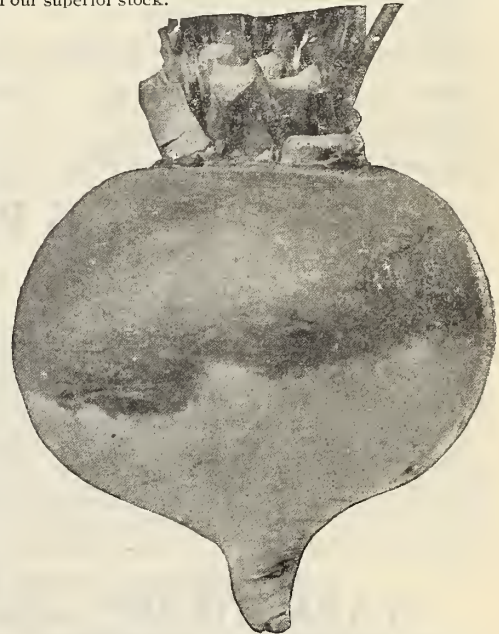

Horse Radish Roots

The best variety is produced from small pieces of roots 4 to 6 inches in length. These small roots will produce good radish fit for use in one season's growth. By mail postpaid, each 5c. Doz. 25c. 50 for 60c. 100 for 90c. Express, not paid, 100 for 75c. 300 for \$1.75. 500 for \$2.50. 1,000 for \$4.50.

Rhubarb Roots

Very familiarly Known as the Pie Plant. **Victoria.** A good market sort. Stalks red. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00. Roots 15c each. 4 for 50c, postpaid. By express, not prepaid, Dozen \$1.00.

Linnaeus. Extra early green. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

Red or Purple Top White Globe Turnip.

J. Bolgiano & Son, Baltimore, Md., August 21st, 1908. The turnip seed I ordered from you this Summer is the best I ever planted. All came up and are doing fine. They are far better than those I have been paying twice as much for. E. A. BANTON, Norfolk County, Va.

305. **Extra Early White Milan** Extra-early, tender and delicately flavored; the bulb is of medium size, very handsome, smooth and of clear ivory-white both inside and out. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 60c.

315. **Extra Early Purple Top Milan.** Earliest Turnip in cultivation; a week sooner than any other. Flat, smooth, of medium size, with bright purple top and few leaves. Flesh white and choice. Adapted to Spring or Fall. A good keeper. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

325. **Pomeranian White Globe.** Good either for table or stock. Very productive. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c.

Grass And Clover Seed Mixtures For Hay And Pastures

These Mixtures give the very best and most satisfactory results to our customers, and our trade in them is increasing rapidly. The advantage of sowing grasses and clover seed in mixtures has long been recognized and the practice is increasing to a very remarkable extent all through the South. We are the pioneer seedsmen in Baltimore in putting up special mixtures for different soils, and the results to our customers have been exceedingly satisfactory, resulting in largely increased crops both of hay and pasturage. We will take pleasure in advising our customers as to suitable grasses for their soils and purposes.

We have in the Following Mixtures combined grasses suitable for the various soils and uses for which they are recommended. Those for permanent pastures are composed of grasses which succeed each other in growth, and give a succession from the first of spring until late in winter, while for those desired more for cutting for hay, we have combined grasses which ripen together. The different mixtures are prepared both as to quantity and varieties as best adapted to the soils and situations for which they are recommended. In all of our grass mixtures we use the very best seeds the quality and purity of the seeds being our first consideration. The quantity handled enables us to give our customers the benefit of a very low price, even lower than if they purchased the seed separately.

Mixtures For Permanent Pastures But Can Be Mown.

GRASS SEEDS

We desire to call particular attention to the fact that Grass Seeds are sold in the trade by sample, and each sort is divided into three or four grades of quality according to purity, germination and weight. The price of the best grade is often double that of the ordinary. Bolgiano's "Gold Brand" Grass and Clover Seeds are in every case the VERY HIGHEST GRADE.

1123. **Tall Meadow Oat Grass, Evergreen Grass.** Yielding twice as much hay as Timothy or Orchard Grass, early as Orchard Grass with more leaf and affording better grazing, it is not strange that this grass is becoming so popular. It will keep green all winter and all summer; the drought of midsummers or the cold of winter does not injure it. It starts growing very early in the Spring, can be cut twice for hay, will yield good grazing until late in the Fall. It contains more flesh and muscle-forming material than Timothy, but it is not so fattening. For hay, it should be cut while in bloom. Tall Meadow Oat Grass is best adapted for rather light and dry loamy uplands, but gives excellent results on nearly all soils and better results than any other grass on light, medium soils. Sown alone use 1 to 3 bus. to the acre, either Spring or Fall. Sown in mixture, use 1 bus. Tall Meadow Oat Grass, 1 bus. Orchard Grass and 6 lbs. Red Clover. It gives the very best results when sown with Clover. By adding 4 lbs. of Red Top or Herd's Grass to the mixture the grazing will be materially increased "Gold" Brand Fancy \$1.50 bus. "Silver" Choice \$1.40. bu.

1114. **Orchard Grass.** One of the best and most reliable grasses for the Middle and Southern States, either for hay or pasture. It succeeds well on nearly all soils, but does best on uplands, loamy or moderately stiff soils. It starts early in the spring and continues well into winter. It is of quick growth, and is relished by stock, especially when young, and bears close grazing. It makes excellent hay, and gives the very best results mixed and grown with Tall Meadow Oat Grass and Red Clover. It should be cut when in blossom, as the hay is injured if the seed is allowed to ripen. It can be sown in the spring or fall, either with grain or alone. Sow two bus. per acre if sown alone, or with Red Clover, one and one-half bus. of Orchard Grass and seven pounds of Clover are the quantities usually sown. "Gold" Fancy Bus. of 14 lbs. \$1.85. "Silver" Choice \$1.75 per bus.

Supply Nitrogen to the Soil by the use of "FARMOGERM" High-Bred Nitrogen-Gathering Bacteria.

It is well known that Nitrogen is the most expensive of fertilizing elements. It is also known that it is the plant food in which most soils are deficient. We are pleased, therefore, to be able to offer our patrons an improved and most reliable method of inoculating soil with nitrogen-bacteria. By moistening the seed of any leguminous crop to be planted with Farmogerm, not only is the immediate crop benefited by this pure culture of high bred nitrogen gathering bacteria, but the soil is enriched in nitrogen which will be available for future crops of any kind for two or three seasons. One of the important advantages which Farmogerm has over other and earlier preparations of this kind is the fact that it needs no treatment or development before using. It comes in bottles, ready for use with a little water, according to directions.

Soil inoculation is a big subject and the possibilities of it are only partly appreciated by many. We have no space for details here, but we hope our customers will write us for a free pamphlet on the subject which we will be pleased to send. It will pay handsomely to investigate before planting any of the following crops:

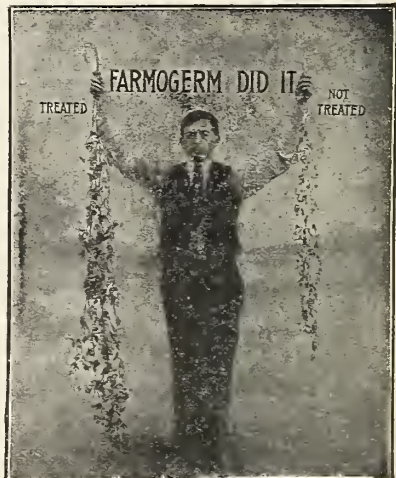

Alfalfa, Alsike, Berseem, Crimson Clover, Red Clover, White Clover, Canadian Field Peas, Cow Peas, Soy Beans, Velvet Beans, Vetch, Lupins, Peanmts, Gardeu Beans, Garden Peas, Sweet Peas and other legumens.

When ordering be sure and state for what crop Farmogerm is wanted.

We are prepared to supply Farmogerm for any one or all of these crops at the laboratory price of \$2.00 per acre, 10% discount on 25 acres, 15% discount on 50 acres, 20% discount on 100 acre orders.

Garden size, mixed culture good for Peas, Beans and Sweet Peas, at 50c a bottle. Also White Clover for lawns.

The U. S. Dept. of Agriculture says: "The pure culture method has come to stay."

Pea Vine on left had been treated with Farmogerm. Other planted without treatment.

GRASS SEEDS

Bolgiano's "Gold Brand" Seeds are the Standard of Purity.

1117 TIMOTHY Of Hay Grasses Timothy is one of the most popular, nutritious and salable. On clay or heavy loams, lowlands or in mountainous districts provided there is an abundance of moisture, it produces the very best results. On sandy or light loamy ground, it does not do as well as Orchard, Tall Meadow Oat or Red Top Grass. If grazed or cut too close, the stand of Timothy will be seriously injured, besides it does not form as good grazing as many other grasses. From 1½ to 3 tons of fine hay to the acre. A splendid mixture is 6 lbs. Timothy, 4 lbs. Clover (either Mammoth Clover or Alsike Clover preferred as they mature at the same time as Timothy) 4 lbs. Fancy Red Top, ½ bu. Meadow Fesque. Together, these will produce most excellent hay, also nutritious and abundant pasture in good loamy, clay or low ground soils. 8 lb. Timothy and 6 lb. Clover when sown together, "Gold" Brand, 10c Lb. Bus. of 45 Lbs. \$2.25. "Silver" Choice \$2.00. Market fluctuates.

1118. Kentucky Blue Grass. An excellent pasturage and lawn grass, succeeding best on lime-stone land, but does well on stiff or clay medium soils. It is rather sensitive to heat, but not so to cold weather, and on this account does its best in the fall, winter and spring. It grows slowly at first, forms a compact turf, making a fine pasturage when once established. It is best, however, to combine other grasses with it for either lawn or pasturage. Sow in the fall or spring at the rate of two to three bushels per acre. "Gold" Brand Seed, Lb. 18c. Bu. of 14 Lbs. \$2.25. "Silver" Choice \$2.10. Bu. Special prices in quantity.

1120. Native or Canada Blue Grass. At the Maryland Experiment Station this grass remained a luxuriant green during the hottest summer when other grasses were materially affected by the heat. Being a grass of Canadian growth it will stand the cold weather admirably. Canada Blue Grass should be tried by everyone not familiar with its excellent qualities. It is particularly well suited for mixtures. "Gold" Brand Seed, Lb. 15c. Bu. of 14 Lbs. \$1.75.

1111. Red Top, or Herd's Grass. This grass makes excellent pasturage and good crop of fine quality hay, and succeeds on a greater variety of soils than any other grass in general use, giving very good results on light soils, and the very best results on heavier, moist or low-ground soils. It is rather late in starting in the spring, and matures its crop at the same time as Timothy. Is excellently adapted for seeding with Timothy for hay, and furnishes excellent pasturage afterward. When it gets well established it spreads, and will gradually supplant other grasses. Our Gold Brand of the Fancy Clean Red Top is of extra fine quality, and carefully cleaned from impurities. We can also furnish the Choice and Prime Fancy Clean Red Top as usually sold. It requires about 8 to 10 pounds to seed an acre of the Fancy Clean seed. When sowing with Timothy, sow 5 pounds of the Fancy Clean seed and 8 pounds of Timothy per acre. It can be sown either in the spring or fall. "Gold" Brand Fancy Seed, Lb. 20c. 10 Lbs. or over @ 14c Lb. Silver Choice, 10 Lbs. or over @ 13½c Lb. Prices fluctuate; quoted upon application.

1122. Meadow Fesque, Randall or English Blue Grass. It makes a most excellent hay and pasturage grass, and is particularly valuable for fall and winter pasturage, and it remains green throughout the winter. It is also a splendid spring and summer grass and usually makes more and thicker leafage than any other grass. It succeeds well in nearly all sections of the South, and should be very largely used for pasturage and hay mixtures, being specially suitable for sowing with Red Top and Timothy for hay, or with these and Orchard and Tall Meadow Oat for permanent pasturage. Sow either in the spring or fall at the rate of two bushels to the acre, if sown by itself. When sown with Red Top and Timothy, sow one bushel (14 lbs.) Meadow Fesque, 5 lbs. Fancy Clean Red Top and 6 lbs. Timothy per acre. Sown for a grazing mixture with Orchard and Tall Meadow Oat Grass, add half a bushel each of these two grasses. Price, "Gold" Brand, Lb. 20c. Bus. of 14 Lbs. about \$2.50.

"Gold Brand" Timothy.

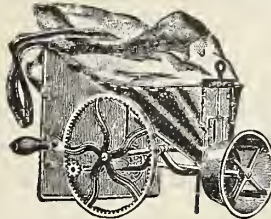

Bolgiano's "Gold" Brand Southern Grown German Millet.

RYE GRASSES FOR SPRING PLANTING

The Italian and Perennial Rye Grasses are really the quickest growing of any of the grasses, and will furnish a quick growing, most nutritious and leafy pasturage, at the same time making very good hay grasses. On account of their quick, early growth, they should be a constituent part of nearly all hay and pasturage mixtures.

Cahoon's Broadcast Seeder.

Sows all kind of clover, grass and grain seed; it will throw 40 ft. Price, \$2.75.

1121. English or Perennial Rye Grass. A nutritious, permanent grass for meadows, pastures and mixing with others for lawns. When sown by itself, sow 30 pounds per acre, either in the spring or fall. "Gold" Brand, Lb. 15c. Per Bu. 17 lbs. \$1.00.

1172. Italian Rye Grass. It succeeds well on all soils and will stand more overflow than any other grass. "Gold" Brand 15c Lb. Bu. of 14 Lbs. \$1.10.

1187. Hard Fesque. Thrives well in dry situations, where many other grasses fail; 30 lbs. to the acre. Lb. 20c. Bu. of 14 Lbs. \$2.50.

1186. Sheep Fesque. A densely tufted perennial grass, roots deeply, and forms dense short turf, furnishes excellent grazing. Sow 2 to 3 bushels per acre. Lb. 20c. Bu. of 14 Lbs. \$2.50.

acre, if sown by itself. Sow about 25 pounds per acre. **1124. Red or Creeping Fesque.** Forms a close, rich sod and is valuable in lawns and pastures. "Gold" Brand Lb. 20c. Bu. of 14 Lbs. \$2.50.

1116. Bromus Inermis or Awnless Broom Grass. Both for grazing and for hay it is of especial value in mixtures with other grasses. Cattle graze on it with relish. Sow Seed in the Spring or Fall, 25 to 30 lbs. per acre. Price, "Gold" Brand 15c Lb. Bu. 14 Lbs. \$1.60.

MILLETS

GERMAN or GOLDEN MILLET, Southern Grown

1125. Makes a large yielding and most nutritious hay crop, quick growing and easily cured. It should be seeded thickly, one bushel per acre, and should be harvested while in bloom. If the seeds are allowed to form, the stalks get hard and it does not make near so good a hay. Should be sown any time between the middle of May until the end of June. It matures a crop in six to eight weeks after seeding. Our Southern grown Millet makes much better growth than western or northern grown seed. "Gold" Brand Southern Grown Millet, \$1.75 per Bu. of 50 Lbs.

1126. Hungarian Millet. For good low ground or rich soils, this makes even a more valuable crop than German Millet. It is considered equal in nutritive value to Timothy hay. On uplands or light soils, German Millet makes larger yields than Hungarian. Hungarian Millet should be sown from the first of May until the end of July, at the rate of one bushel per acre. "Gold" Brand \$1.75 per Bus.

1170. Pearl or Cattail Millet, Pencilaria. We have been experimenting with all the known forage plants, and have found nothing superior to Pearl Millet either in enormous growth or quality. It has produced the most abundantly and can be cut several times during the season. The United States Agricultural Department has also made experiments, and with about the same results. If you grow green forage, try Pearl Millet, and you will find there is nothing better. Drill in 2-foot rows, 10 Lbs. to the acre. Pkt. 5c. Lb. 10c. 10 Lbs. and over @ 7½c per Lb. 100 Lb. lots and over @ 6½c per Lb.

CLOVER SEEDS

Bolgiano's "Gold Brand" Seeds Are The Standard of Purity.

ALFALFA SEED

Alfalfa Yields Splendidly Throughout the South, Yielding 3 or 4 Cuttings Per Year, Increasing in Yield Each Successive Year.

1128. Alfalfa ranks higher than timothy hay in feeding value. In fact, it might be termed both corn and hay, as it is almost a complete food. Experiment stations place the feeding value of Alfalfa hay at \$20 per ton, as against timothy hay at \$12 per ton. This, with the fact that Alfalfa will, under favorable circumstances, after a good stand is secured, give 3 or 4 cuttings per year, and will easily yield, on good land, 6 to 16 tons of splendid hay per year, shows what a valuable crop it is. Lands in the western states that are well set in Alfalfa sell readily at from \$100 to \$200 per acre; so that a crop of this kind pays for the little extra care and preparation given to secure good stands and good crops. It is better to have five acres well set in Alfalfa, by thorough preparation, than to attempt to put in ten acres without first class preparation. The acreage of Alfalfa is increasing very largely all over the Middle and Southern States, our farmers are fast beginning to realize what a valuable crop it is for this section. Alfalfa will succeed and do well on any good loamy, well-drained soil, but the land must be well and thoroughly prepared for the best results. The plant is rather slender when it first starts, and it must be grown under favorable conditions, in order to get ahead of the weeds and other grasses which would, under ordinary circumstances, spring up naturally and check it or smother it out. Alfalfa should always be cut when just commencing to bloom, whether the plants be large or small. If the seed is allowed to form, the growth of the plant ceases. It should never be used for pasture, it is too valuable as a hay producer to risk injury from stock. Alfalfa can be sown either in the Spring or Fall. The requirements to obtain good stands and good crops is to sow in good, rich soil and give thorough preparation. Alfalfa is usually sown broadcast, at the rate of 15 to 20 lbs. to the acre, although some of our customers claim that thicker seedings give better crop results. March and April are the best months for seeding in the Spring, and the latter part of August and during September the best in the Fall. Our Alfalfa seed is the highest grade, strong-germinating seed, of the best and cleanest quality it is possible to procure. The quality and germination of the seed is a prime requisite for success with this crop. Land well set in Alfalfa is better than a bank account, producing continuously increasing crops for years and is worth a little trouble and expense to secure a first-class stand. Price of our "Gold" Brand Fancy Seed, Lb. 20c. Bus. of 60 lbs. @ 17c lb. Silver Choice Alfalfa seed, Lb. 18c. Bus. of 60 lbs. @ 16c. Lb. Price fluctuates.

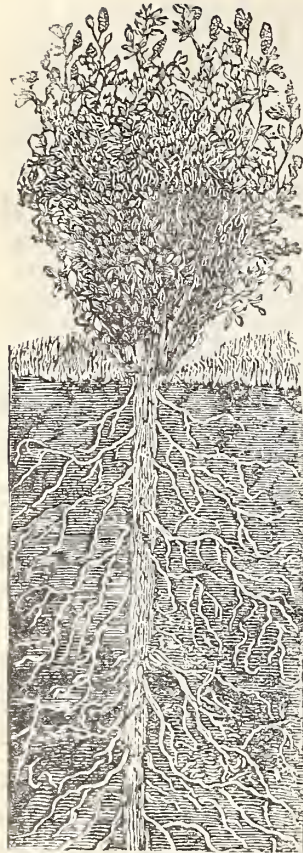

1129. **Crimson Clover Seed** **New Crop. The Great Nitrogen Gatherer.** The best crop for hay, soilage and green manuring, Fall, Winter and Spring pasturing. Crimson Clover furnishes an abundance of nutritive forage at seasons when pastures are dead. It is of an unending supply of manure. It solves the problem of cheap manuring. It is the great nitrogen gatherer and economizer in the use of fertilizers. Valuable for planting in orchards, berry patches, and for sowing among cultivated crops, such as Cabbage, Corn, Tomatoes, Cotton, Tobacco. Improves poor land, restores to fertility those that have been worn down by excessive cropping. May be planted in the Spring, Summer or Fall. Splendid for re-seeding Red Clover that has been Winter killed. Sow 12 or 15 lbs. to the acre. \$7.20 Bu. Write for latest market prices.

1130. **Red Clover** One of the most valuable farm crops, and is largely used for pasturage and hay, and is an improver of the soil. Red Clover is perennial, and will yield crops several years from one seeding, and on good land will yield two or three cuttings per year. The first crop makes rich feed, and is most valuable for hay. The second crop does not make so good a quality feed. Red Clover should be cut for hay when in full bloom. For hay, it is particularly well adapted for sowing with Orchard and Tall Meadow Oat Grass, as it ripens at the same time, and sowing these three grasses together will give larger yields and of better quality hay than sowing either alone. It is also largely sown with other grasses, both for hay and pasturage. Information as to quantities required per acre, when sown in combination with other grasses will be found under the heading of Orchard Grass, Tall Meadow Oat Grass and Timothy. When sown by itself, sow 10 to 12 lbs. to the acre, either in the Fall or Spring, or at the last working of corn. Price of our "Gold" Brand Fancy Red Clover Seed, choicest and cleanest quality, Bu. of 60 lbs. @ 15c lb. Silver Brand Choice seed, Bu. of 60 lbs. @ 14½c lb. Price fluctuates very much. We will quote prices at any time, or will fill any orders entrusted to us at as low prices as possible for first-class seed.

1131. **Mammoth or Sapling Clover** Is similar to Red Clover in appearance and habits of growth, the difference being larger growth and later maturing. It is often used for hog pastures as a soil improver to plow under. It is considered superior on account of its extra growth. It is a good variety for thin soils, or to seed with Timothy, Meadow Fesque or Herd's Grass or Red Top, as it matures about the same time as these grasses. Sow 10 to 12 lbs. to the acre when sown alone. When sown with Timothy, use 6 lbs. clover and 8 lbs. Timothy to the acre. "Gold" Brand Fancy Bu. of 60 lbs. @ 15c lb. Silver Brand Choice Seed, Bu. of 60 lbs. @ 14½c lb.

1133. **White Clover** This is largely used in lawn and permanent pasture mixtures, and is indigenous to the soils throughout the Middle and Southern States. It makes a small, close, compact growth, covering the ground like a carpet. It affords excellent food for bees. Sow in either Spring or Fall. When sown by itself, sow at the rate of 5 to 6 lbs. per acre. It is better, however, sown in mixture with other grasses. "Gold" Brand, Fancy ¼ Lb. 10c. ½ Lb. 15c. 1 Lb. 25c. 5 Lbs. \$1.00.

H. M. WILLIAMS, Washington Co., N. C., writes: "The Dwarf Essex Rape I bought of you has made fine pasture for my cattle and hogs through winter."

Alfalfa.

C. L. Steele, Perry Co., Pa., writes: March 19th, 1909; The Red Clover Seed I bought from you last Spring was the best I ever saw. I believe every grain grew and made a stalk. It was marked "Gold" true to name in all that would importes.

1132. **Alsike Clover** This is somewhat similar in growth and appearance to Red Clover, but it is hardier and stands cold weather better than Red Clover; and where conditions of soil and lateness of seeding make any possibility of Winter-killing, it is advisable to sow Alsike Clover, or at least sow it in mixture with other Clovers. It is more suited for mountainous sections than to the coast regions, and it succeeds better on stiff or clay soils than on lighter lands. It is well adapted for sowing with Timothy or Herd's Grass, as it matures with these crops, flowering a little later than the Red Clover. The blooms are not quite so large as the Red Clover, and are of light pink or flesh color. Price of our "Gold" Brand seed, Lb. 20c. Bu. of 60 lbs. @ 15c lb. Silver Choice 14c. lb.

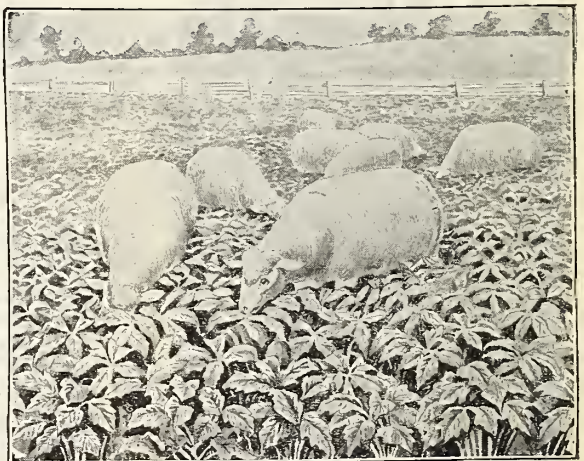

1133. **Japan Clover** We do not recommend this Clover for land that can be successfully grown in any other grasses or Clover, but on waste land or poor, worn out soils it will furnish excellent, nutritious pasturage. Sow at the rate of 10 lbs. per acre, in March or April. Lb. 25c. 10 lbs. @ 20c. 25 lbs. @ 19c.

1149. **Hairy Vetch. (Vicia Villosa.)** VICIA VILLOSA Succeeds and produces as good crops on poor sandy soils as on good land; grows to a height of 4 or 5 feet. It is perfectly hardy throughout the United States, remaining green all winter, and should be sown in the spring, mixed with oats, spring rye or barley; or during August or September, with winter rye, which serves as a support for the plants. It is the earliest crop for cutting, being hardier and nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in time for planting spring crops. Every Dairyman and stock-breeder in the United States should have a field of it, and if you try it once, you will never be a season without it. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. Sow 50 to 60 lbs. per acre with ½ bu. of rye, oats or barley. "Gold" Brand, Lb. 10c. 10 lbs. @ 6½c. 100 lbs. @ 6¼c.

1150. **Spring Vetches or Tares.** Closely associated with Peas in character. Highly valuable for soiling or for green manuring. Sometimes grown with oats, for mowing and feeding to stock. Use 2 to 3 bus. to the acre broadcast, or one to 2 bus. in drills. Sow in Spring, while the ground is cool and moist, or in early Autumn. "Gold" Brand Lb. 10c. 10 lbs. @ 4¼c. 50 lbs. @ 4¼c. 100 lbs. @ 4c.

1127. **Dwarf Essex Rape.** Valuable for Cattle, Sheep and Hogs. Under favorable conditions Rape is ready for pasturing sheep or cattle within six weeks from the time of sowing, and on an average one acre will carry from 12 to 15 sheep six weeks to two months. When on the Rape they should at all times have access to salt; but water is not necessary. As it thrives best in cool weather, it should not be sown in the Southern States until September or October for winter pasture. Its fattening properties are probably twice as good as those of Clover, and for sheep the feeding value of Rape excels all other plants we know of. Sow 4 lbs. per acre broadcast, 2 to 3 lbs per acre in drills. If by mail add 8c per Lb. 10c Lb. 5 lbs. 35c. 10 lbs. 65c. 100 lbs. \$5.00.

Mammoth Russian Sunflower (The Giant of all Sunflowers.) The best variety for the farmer. Grows to double the size of the common, and the yield of seed is twice as great. One hundred and twenty-five bushels to the acre have been grown at a less expense than corn. It is highly recommended for poultry. Lb. 7c. 4 Lbs. 25c. 10 Lbs. and over @ 5c. per lb.

Bolgiano's Wonderful New PROSPERITY Yellow Dent Corn

Has Yielded, of Shelled Corn 160 Bushels Per Acre. Average Yield 10 Years on About 100 Acres. 125 Bushels Per Acre.

1141. **Bolgiano's Prosperity Corn.** If you really want to grow a bumper crop of beautiful yellow dent corn this year, just take our advice and plant Bolgiano's New "Prosperity" Corn. The fine, large, stately ears are 12 to 14 in. long, 8 to 11 in. in circumference and have from 20 to 24 uniform rows of long, large kernels, well developed over tip and but. It is a luxuriant grower from 12 to 15 ft. high and if planted during the first half of May will mature before the 20th of September. For more than a score of years "Prosperity" Corn has been under the most watchful breeding and selection; the magnificent results more than pay for every effort put forth. The yield has been miraculous, 160 bus. or more of shelled corn per acre and it has even averaged on a number of acres planted the same year 133 bushels shelled corn per acre. During a continuous test of ten years on about 100 acres it has averaged 125 bushels shelled corn per acre. Is it any wonder we have called such a wonderful corn "Prosperity?"—it don't seem possible to call it by any other name. "Prosperity" is undoubtedly the most attractive, the largest, the finest, the greatest yielding Yellow Dent Corn ever produced. Pkt. 10c. Pt. 10c. Qt. 15c. 4 Qts. 40c. Pk. 75c. Bus. \$2.50.

1139. **Mammoth Golden Beauty Corn.** Has the largest ears of any 100-day corn. It outyields many other corns. The increased yield repays the seeds many times over. Growers should make sure of getting the largest yield and most handsome grain to meet competition and secure the highest prices. Ears usually average from 9 to 12 inches long and from 20 to 30 rows on the cob, some of the stalks bearing from 3 to 5 ears. Then why use your poor stock any longer? It has produced 150 bushels shelled corn to the acre. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.35.

1145. **"Hickory King" White Corn.** So large are the grains and so small the cob that on an ear broken in half, a single grain will almost cover the cob section. Of strong growth, the stalks take a firm hold in the ground and stand upright, resisting severe storms. It yields splendid crops on light soils, and is undoubtedly the best and most productive White Field Corn for the South. Pkt. 5c. Pt. 10c. Qt. 15c. Gal. 30c. Pk. 50c. Bus. \$1.50.

1054. **Red Cob 90 Day-Corn.** This Corn meets a long-felt want, because it can be used as a roasting ear corn and when fully matured makes a first-class Crop Corn for feeding stock. The ear is large, handsome, suits for an early crop or for a late crop, because it matures in 90 days. This makes it always a safe and profitable crop. Doz. 25c. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.35.

1142. **Maryland White Corn.** This very handsome Corn is the favorite of old farmers who like a big grain or a small cob. The grain is pure white, with good-sized ear, having ten rows to the cob. Used for general crop. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.

BOLGIANO'S CUBAN GIANT ENSILAGE CORN

Bolgiano's Wonderful "Prosperity Corn."

1140. **Reid's Yellow Dent.** This comparatively new variety of half dent yellow corn is rapidly gaining great favor as a general crop corn between latitudes 38 and 43, as an early general crop sort and in the far northeast as an early ensilage corn. It is a heavy yielder in the cotton states. It has a red cob, and matures in 90 to 100 days. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.35.

1143. **Improved Leaming Corn.** Its extreme earliness and fine quality has made it very popular with the farmers, and especially with those in the localities where the seasons are short. It produces from 65 to 90 bushels to the acre, in accordance with the quality of the soil. The ears and grains are of medium size. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.35.

1138. **Long's Prolific.** Is the climax of 25 years of Corn breeding and selection by Mr. I. S. Long. Pkts. 10c. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.50.

WHITE VARIETIES OF SEED CORN.

1148. **Bolgiano's Cuban Giant Ensilage Corn.** We have thoroughly tested the Cuban Giant beside all large white grain ensilage varieties. Grains are pure white, very large, broad and long. Of stronger vitality than any other variety. It is the best milk producer of all ensilage Corn, being as sweet as sugar Corn. Outyields the Red Cob Ensilage and is 10 to 12 days earlier. It is the most perfect corn we have found in our years of experience. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 50c. Bus. \$1.50.

1179. **Blount's Prolific.** One of the largest yielding varieties for the South, produces 3 to 6 ears white, flinty corn to the stalk. Makes excellent meal. Pkt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.35.

1176. **Best Twin Ear.** The large fodder produced by this variety makes it a fine ensilage Corn. Produces 2 fully-developed ears to stalk. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.35.

1177. **Iowa Silver Mine.** This very popular variety of white dent corn, originated in Northern Illinois. It matures in about 100 days, and is a good grain yielder throughout the corn belt and eastward, and is becoming quite popular in the southern states. Pt. 10c. Qt. 15c. Pk. 45c. Bus. \$1.35.

1180. **Improved Southern Snowflake.** Matures in 100 days, grows 8 ft. in height. Produces 2 ears to the stalk. Makes Meal of the finest quality. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.35.

KAFFIR CORN. The Great Forage Plant.

1147. **White Kaffir Corn.** Makes most nutritious feed for stock and poultry. Kaffir Corn in the last few years has been generally sown with Cow Peas, broadcast at the rate of a peck of Kaffir Corn to a bus. of Cow Peas per acre. The Kaffir Corn helps to hold the Cow Peas up off the ground, and thus causes a larger growth of cow peas, and both can be cut together, making an enormous yielding crop of most nutritious feed. For a forage crop, when sown by itself, Kaffir Corn should be sown broadcast at the rate of from 3/4 to 1 bushel per acre. When sown for a forage crop, either by itself or with cow peas, the crop should be cut before it is headed out. Pkt. 5c. postpaid. 1 lb. 10c. Peck 30c. Bushel of 50 pounds, \$1.00. Special Price In Quantity.

1169. **Red Kaffir Corn, or Sorghum.** Non-saccharine. The plant is low, stalky, perfectly erect. The whole stalk as well as the blades, cures into excellent fodder, and in all stages it is available for green feed. Pkt. 5c. postpaid. 1 lb. 10c. Peck 30c. Bushel of 50 pounds \$1.00. Special Price in Quantity.

1173. **Red and 1174. White Milo Maize.** These are popular varieties of sorghum, somewhat similar to the Kaffir Corn, valuable for both forage and grain. Four pounds will plant an acre. Cultivation is same as for Kaffir corn. Pkt. 5c. 1 lb. 10c. Qt. 15 cts., Pk. 50 cts., Bu. of 50 lbs., \$1.50.

1146. **Early Amber Sorghum.** Furnishes a large yield of most nutritious forage, which can be fed either green or cured, and will yield 2 or 3 cuttings a year, stooling out thicker each time it is cut. It grows 10 to 12 ft. high. Sow broadcast for forage at the rate of 1 to 1 1/2 bus. per acre. When sown in drills sow at the rate of 1 peck per acre in drills 3 1/2 to 4 feet apart. Pkt. 5c. 1 lb. 10c. Qt. 15c. Pk. 50c. Bushel of 50 lbs., about \$1.50.

1158. **Early Orange Sorghum.** This variety is rapidly growing in favor wherever it is grown. Similar in growth to the Early Amber, but it is claimed that it produces a heavier crop. Pkt. 5c. 1 lb. 10c. Qt. 15c. Pk. 50c. Bushel of 50 pounds, \$1.50. Price Fluctuates.

1069. **Connecticut Field, or Large Yellow Pumpkin.** Excellent for growing in corn. 1 lb. 20c. 10 lbs. \$1.50.

1058 1/2. **Kentucky Field Pumpkin.** Very large and flat, grown extensively and profitably in Corn Field. 1 lb. 10c. 10 lbs. @ 15c.

W. A. Cohee, Beulah, Md., writes July 13th, 1909. "I received the Crimson Clover you shipped me, they were all O. K. so send me some more of the same."

J. Bolgiano & Son, Baltimore, Md. Feb. 3d, 1908. You need not send me a sample of your seeds, for I know they are all right, because I have planted them for the last five years, and have never had any trouble. H. C. WIBLE, Baltimore Co., Md.

Cow Peas

The great soil improvers. Make poor land rich. Make good land more productive. Also make a splendid and nutritious green forage or hay crop, enriching the soil even when the crop is cut off.

1175. **Mixed Cow Peas.** We strongly recommend sowing the Mixed Cow Peas as a soil improving crop. The upright growing varieties holding up the vining varieties, they will make much better and give more satisfactory results, yielding better crops of vines and more forage. They are composed of the Blacks, Black Eye, Clays, Whip-poor-wills, Wonderfals, New Era and Soja Beans. If once tried you will sow no others where large crops are desired. Please Write Us for Prices.

1162. **Black Cow Peas.** Seed medium-sized and Black. Vines trailing. Seed matures early. Please Write Us for Prices.

1163. **Clay Peas.** Seed medium sized and cream colored. Vines grow tall and erect. Seed matures medium late. Write Us for Prices.

1164. **Whip-Poor-Will.** Vines erect, seed large and mott'ed red and white and matures early. Good to grow between corn. Please Write Us for Prices.

1166. **Wonderful or Unknown Pea.** Seed medium-sized and buff. Vines erect if planted late, trailing if planted early. Seed matures late. Write Us for Prices.

1167. **Soja Beans.** The great drought-resisting forage crop; unsurpassed in nutritive value for feeding, also makes a splendid soil improver. Write Us for Prices.

1168. **Black Eye.** Vines erect. Seeds medium-sized and white, matures medium late. Please Write Us for Prices.

1190. **Red Rippers.** Red seeded, resembles Black Cow Peas in growth of vines, but 10 days earlier and more prolific. Write for Prices.

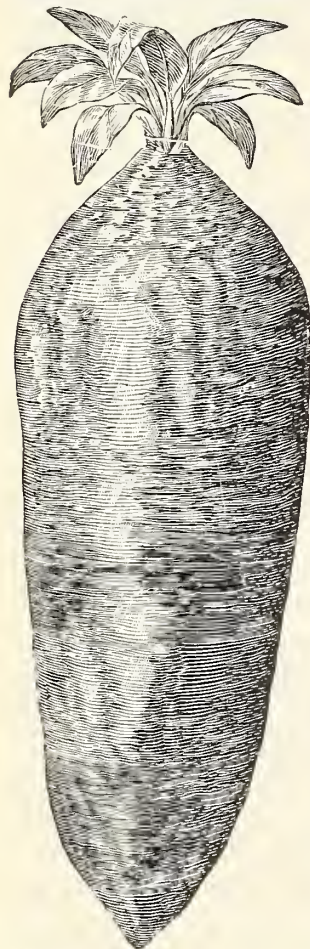

New Era Cow Peas. 44 Days After Planting.

1159. **New Era.** This new extra early Cow Pea is unquestionably one of the most valuable varieties in cultivation. It is quicker in growth than any other Cow Pea in cultivation; makes a very large growth of vine and very prolific yield of Peas. The vines stand upright, enabling the Peas to be easily gathered. The Peas are fully one-third smaller in size than the ordinary Cow Pea, so that it does not require nearly as many to seed an acre. Please Write Us for Prices.

1165. **Canada Field Peas.** Under favorable circumstances it will yield more good hay to the acre than any similar crop that can be seeded early in the spring, and it makes a complete food, feeding grain being unnecessary when horse and cattle are fed oat-pea hay. Sown in January, February or early March. 1 to 1½ bushels per acre, and same quantity of Burt or Spring Oats. Pk. 50c. Bu. \$1.75. Write for prices.

Seed Oats, Rye, Buckwheat, Flax, Etc.

1156. **Burt, or 90-Day Oats.** The earliest, most prolific and surest cropping of Spring Oats; far superior to ordinary spring or rust-proof oats for spring seeding. Wherever this Oat is grown, it comes into great favor. For a Spring Oat for seeding in March and April it is the best and surest of Spring Oats. It is earlier to mature, free from rust, healthy, clean and vigorous growth of straw, and makes a very good yield of clean, bright and heavy grain. On account of its earliness to mature, it escapes the dry hot weather we frequently experience in June, and is on this account, one of the surest cropping varieties of the South. Color and appearance of grain somewhat resemble the rust-proof Oat, but it is a little lighter in color. Pk. 30c. 85c Bu. Write for prices on large lots.

1161. **Virginia Gray Winter or Turf Oats.** When sown before the middle of March, these Oats will far outyield the ordinary spring Oats, making a larger crop and heavier grain. Further north than Virginia, remarkable results have been obtained from these Oats when sown even as late as the first of May, and from the reports we strongly recommend them to our northern farmers, as we believe they will give very much larger and better yielding crops than the spring Oats usually sown in the northern and western states. Sow at the rate of 1½ to 2 bushels per acre. Pk. 30c. 85c Bu. Please write us for prices on large lots.

1157. **White Spring Oats.** Sow at the rate of 2 bu. per acre in February, March or April, the earlier the better. Price of our Gold Brand, (heaviest and cleanest quality), about 80c per bu., Choice quality. White Spring Oats, about 65c per Bu. Please write us for prices on large lots.

1160. **Japanese Buckwheat.** This variety of Buckwheat ripens a week earlier than the Silver Hull, and yields more largely than that variety. The kernels are longer than those of other sorts, but, owing to its branching qualities, it need not be sown quite so thickly. Pk. 35c. Bus. about \$1.00. Please write us for prices on larger lots.

1178. **Silver Hull Buckwheat.** A prolific sort, making a fine quality flour. Superior in every way to ordinary buckwheat, which it has almost entirely superseded. Pk. 35c. About \$1.00 per Bu. Write for prices.

1135. **Spring Rye.** The straw is equally as valuable as that of the fall or winter rye, standing stiff, 7 to 8 feet high. Produces 30 or 40 bushels of grain per acre. As it does not stool like winter rye no less than 2 bu. to acre should be sown. Pkt. 10c. Pk. 35. Bu. \$1.10. Write for prices.

1194. **Flax.** When grown for seed, sow one bushel to acre; if fibre is wanted, 2 to 3 bushels. Lb. 10c. (postpaid 18c.); Peck 65c. Bu. of 56lbs \$2.25.

Mangel-Wurzels. 4 Lbs. to the Acre

1151. **New Jumbo Mangel.** For milch cows and cattle generally, the New Jumbo Mangel has no equal. It is a milk producer of the highest quality and at the same time keeps cattle over winter in prime condition. It will outyield any other Mangel 2 to 1. It is easy to grow, producing immense roots in great quantities thus yielding a most profitable crop. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. 1 Lb. 25c. 5 Lbs. \$1.10.

1152. **Gate Post Mangel.** The name indicates the immense size of this fine flavored Mangel. The milk it produces when fed to cows is of the richest character. As one experienced farmer puts it—"The Gate Post Mangel is a butter and milk producer of the first merit." If you want the best Yellow Mangel you ever grew, send for Bolgiano's Gate Post Mangel. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. 1 Lb. 25c. 5 Lbs. \$1.10.

1153. **Giant Red Mangel-Wurzel.** This mammoth variety grows to immense size, 20 to 30 pounds each, of fine texture and good quality. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. 1 Lb. 22c. 5 Lbs. \$1.00.

1154. **Golden Tankard Yellow Fleshed Mangel.** Rich, deep yellow color of flesh, nutritious and milk-producing qualities. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. 1 Lb. 22c. 5 Lbs. \$1.00.

1155. **Improved Sugar Beets For Making Sugar.** A very large growing sort; used also for feeding stock. Recommended as hardy and very productive, yielding from 35 to 40 tons to the acre and containing a greater per cent of sugar. Oz. 5c. ¼ Lb. 10c. 1 Lb. 20c. 5 Lbs. 90c.

Culture of Flower Seeds.

Provided the soil is in a proper state, flower seed may be sown in the open border in the months of April and May, or as soon as the soil becomes dry and easily crumbled, after the spring frost has disappeared. They may also be sown in prepared beds of light, rich soil, and transplanted into the garden. The former is the more simple method but not always as satisfactory. The better plan is to sow all fine seed under glass in the house, hot-bed or in a green-house. As to the depth to which seed should be covered, the best general rule is to cover fine seed very lightly, just enough to protect them from the sun; and in extremely dry weather a sprinkling of damp moss is very useful with very fine seed it is best to sow on the surface, and press them lightly into the soil. We are convinced that one of the most frequent causes of failure is in sowing the seed too deep, and seedmen are unjustly censured, when fault lies with the cultivator.

Explicit cultural directions are printed on all our packets of flower and vegetable seeds. With that help you are sure of success.

Bolgiano's "Giant Comet" Asters. These are earliest to produce fine large Chrysanthemum-like flowers; the plants grow two feet high, and they have fine long stems. 137 White (extra fine strain.) 138 Crimson. 139 Dark Violet. 140 Rose. 141 Azure Blue. 175 Light Yellow. 182 Peach Blossom. Peonies The King of Flowers. Hardy Everywhere.

Peonies succeed best in deep, rich, sandy soil. They are hardy everywhere, and after once becoming established, take care of themselves year after year, producing gorgeous, beautiful flowers every spring. Peonies are exceedingly effective planted singly or in groups. The profusion and duration of bloom, combined with handsome, massive foliage, graceful appearance and easy culture place them among the most popular hardy plants. Our roots have from 2 to 5 eyes each and are the best that can be bought.

Beautiful New-Named Varieties

There is nothing to compare with these new varieties of Peonies when in bloom. They bear immense flowers of the richest hues and of the most delicious fragrance. Peonies are of the easiest culture, and every year after planting they increase in value. They are hardy everywhere; bloom freely. Insects do not trouble them, and for the minimum of cost they pay many fold in their beautiful loveliness. To aid those unacquainted with the different named varieties, we have made up two collections of the very best sorts.

Rare and Beautiful New Roses

All our Roses and Plants are Free by Mail unless otherwise noted.

All our Roses are grown on their own roots, thus insuring you the same variety you plant as long as any of the plant or root remains. Don't buy budded or grafted Roses. If you do you will be disappointed, unless you know how to keep the wild suckers down from smothering the plant. Many fail with their Roses on this account.

Our Roses Will Never Disappoint You.

Rea Reid. The Most Wonderful Rose of The New Century. As large as American Beauty, as double as Bridesmaid, as fragrant as La France, as free flowering as Helen Good, as Red as Etoile de France. A grand New Rose. 20c each. 2 year old plants 50c each.

Crotons

We represent the largest growers of Crotons in America.

The Crotons are among the finest foliage decorative plants known. As easy to grow as Coleus, and much brighter in their coloring. Our customers everywhere, especially in the South, should bed out Crotons. They can be lifted and potted in the fall, and make handsome house plants. The leaves of all are more or less veined and margined, sometimes entirely variegated, with shades of yellow, orange and crimson. Some have long narrow leaves, arching gracefully, fountain fashion; others are broad and short, oak-leaved; some recurve very much, others are twisted cork-screw like. Crotons love heat, sunshine and moisture. 10c each. 3 for 25c. 7 for 50c. 18 different varieties for \$1.25. Very large plants 20c each. 3 for 50c.

Bolgiano's "Square-Deal" Chick Starter

A Primary Food for Baby Chicks up to Three Weeks Old.

This is a primary food for Baby Chicks, and contains only the best selected re-cleaned, sound, sweet cracked grains and seeds, in proper proportions essential for quick and healthy growth. 10 lbs. 35c. 25 lbs. 75c. 50 lbs. \$1.25. 100 lbs. @ \$2.35.

How to Feed Baby Chicks.

They should be fed nothing until they are 24 hours old. Keep them good and warm is all that is necessary. Baby chicks are hungry all the time, and have to be fed every few hours. Scatter about a pint of the Chick Starter on the floor among an inch or two of Bolgiano's Square-Deal Alfalfa Meal, for 50 Chicks. Only feed as much at a time as they will eat up clean and do not over-feed. Keep clean fresh water before them all the time. After they are three weeks old then feed with Bolgiano's Square Deal Chick Food.

Bolgiano's "Square-Deal" Chick Food

Saves the Lives of Growing Chicks.

This is a carefully selected and complete food for small chicks. It is a high grade mixture of re-cleaned, sound sweet cracked grains and seeds and there is nothing like it for Chick feeding, for growth, health, and development of bone, flesh and feathers. 10 lbs. 30c. 25 lbs. 65c. 50 lbs. \$1.15. 100 lbs. @ \$2.25.

How to Feed Growing Chicks.

Feed by scattering about a pint of it on the floor in Bolgiano's "Square-Deal" Alfalfa Meal for 25 chicks, where they will scratch for it. After they are 8 weeks old then feed

Bolgiano's "Square-Deal" Poultry Food

This is a combination of carefully selected, re-cleaned, sound, sweet grains and seeds, the food that keeps the fowls vigorous and healthy, and produces eggs. 10 lbs. 30c. 25 lbs. 60c. 50 lbs. \$1.10. 100 lbs. @ \$2.00.

Directions for Feeding.

Feed in the pen with about one inch of Bolgiano's "Square-Deal Alfalfa Meal, scattering a quart of Poultry Food for every dozen hens, in thin, so that the hens will have to work for it. This will keep their blood in circulation, and egg producing will follow.

"Square-Deal" Chick Starter Prevents Diarrhoea.

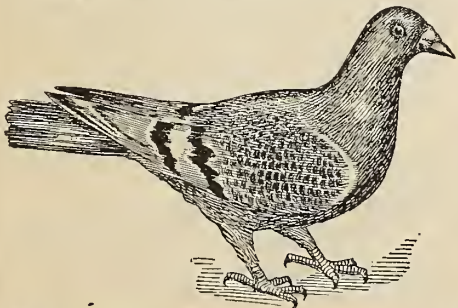

Chas. S. Grason, Baltimore Co., Md., writes Feb. 26, 1909. "I have found by actual use in comparison, that Bolgiano's Square Deal Chick Starter Food has the great advantage over all prominent foods on the market, in that it does not give the baby chicks diarrhoea.

Credit to its Name

C. E. Jensen, Atlantic Co., N. J. writes March 4, 1909. "I am in receipt of your 'Square Deal' Chick Starter, and 'Square Deal' Chick Food, and it is so good, it certainly gives credit to its name of 'Square Deal.'"

Hello Doc! Bolgiano's All Right.

W. Paul Moore, Northampton Co., N. C., writes March 29, 1909. "Many thanks for the Poultry Food. It is the best I have had. The last I had from Richmond was very inferior and I hated to give it to my fowls. I was at Gumberry on Saturday when the bags came on their way here, and two gentlemen remarked: 'Hello Doc, when did you commence with Bolgiano? He's all right, we get all our stuff there.'"

BUCKEYE INCUBATORS

Anybody Can Hatch Eggs With A Buckeye.

The Best Incubator In The World.

Sold With A Money Back Guarantee.

We Guarantee Every Buckeye Incubator
Regardless Of Price.

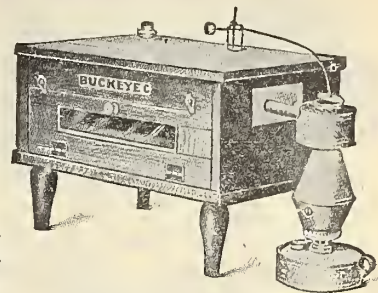

Buckeye Incubators are the most successful incubators on the market and the only incubator sold with an absolute guarantee of satisfaction. They are absolutely self-regulating and the method of operation is so simple that a child can hatch chickens just as successfully as an experienced poultryman.

They are made in sizes to suit the person with just a few chickens or the largest poultry farm. The small sizes hatch equally as well as the largest, in fact regardless of sizes, Buckeye Incubators will hatch every hatchable egg.

Every Buckeye Incubator is sold with a "Money Back" guarantee. When you buy one of these machines you can try it for forty days and if it does not do all we claim you can return it and get your money back.

Buckeye Incubators are made in three sizes to hold 50 eggs, 100 eggs and 200 eggs. Each size is made in three styles—A cheaply finished machine called style C. A finely finished machine called style B and a finely finished machine with a nursery attachment called style A. Our illustration shows a 50 egg Style C, a 100 egg Style B and a 200 egg Style A which gives a clear, concise idea of the differences in the three styles. All 50 egg machines are made with short legs and all 100 and 200 sizes are equipped with long legs.

The nursery attachment in Style A is not in any way a necessity but merely furnishes a place below the egg trays to receive the chicks after hatching. We do not consider the nursery of any particular advantage as Styles B and C hatch equally well without it. The difference between Styles A, B and C is entirely a matter of finish and the cheapest will hatch equally as well as the most expensive.

Ready to Use.

Unparalleled Success

The unparalleled success of Buckeye Incubators is largely due to the use of a modern hot water system such as we have been using for twenty consecutive years without a single change—a fact in itself that should convince the most skeptical of the efficiency of our circulating hot water system.

The relative merits of hot water and hot air systems have been the subjects of frequent discussions and today the MAN WHO KNOWS will frankly admit that circulating hot water has many advantages over hot air.

BUCKEYE IN-DOOR BROODERS

Hot Water System

- No. 0 50-Chick Size, 22x22 inches. Complete with lamp, heater and yard...\$4.00.
- No. 1 100-Chick Size, 30x30 inches. Complete with lamp, heater and yard...\$6.00.

Buckeye Brooders take absolute care of the chicks without any outside help, each brooder being so constructed that the proper temperature and general conditions must be maintained if our very simple directions are followed.

The material and workmanship employed in the manufacture of Buckeye Brooders are the best the market affords. It is not necessary for one to be a mechanic to see by comparison that they are unquestionably the best made Brooders on the market, for instead of being made of undesirable lumber and put together by boys, they are made of the best lumber that money can buy and put together by master mechanics.

In the construction of Buckeye Brooders we employ three different systems of brooding—all of which are equally desirable.

Our LAMPLESS SYSTEM of brooding will probably appeal to most persons because Buckeye Lampless Brooders require no lamp or heat. These brooders are so constructed that the heat from the chicks themselves is absorbed and distributed in such manner that the same conditions exist that is supplied by the mother hen thereby eliminating the necessity of caring for a lamp.

Our HOT WATER SYSTEM consists of a round hot water reservoir placed in the center of the hover in such manner that the heat is evenly distributed to all parts of the brooder, thereby preventing crowding or overheating. The heat is supplied by a lamp placed so far from the brooder that any danger from fumes is entirely eliminated.

Our HOT AIR SYSTEM consists of a round hot air reservoir placed in the center of the hover through which the heat is supplied by a lamp from below. These brooders are so constructed that the fumes from the lamp do not enter the brooder at any point and the construction is such that it insures an even distribution of heat thereby preventing crowding or overheating.

BUCKEYE BROODERS

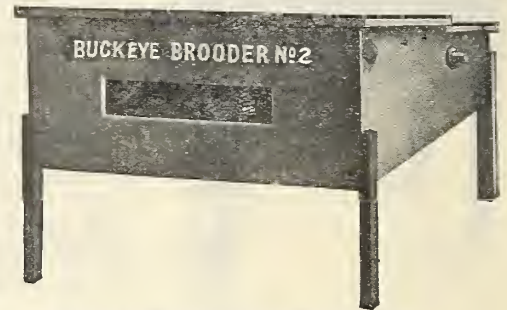

Raise Chicks Better Than A Hen

Buckeye Brooders are the best artificial mothers in the world. They will take better care of the chicks and raise a larger percentage than any hen. Chicks raised in a brooder are always stronger than those raised under a hen because they are never allowed to get wet or chilled, they never get trampled upon and they always have plenty of food before them. In addition to these advantages they are never stolen by cats, rats, or hawks and you always know where to find them.

Buckeye Brooders are made for indoor use and outdoor use. The indoor Brooders must be used either indoors or in some protected place as they are not constructed to withstand a storm.

The outdoor Brooders are covered with heavy galvanized steel and are guaranteed to be absolutely weather proof. Whether it rains, snows or blows, the chicks are perfectly comfortable. Buckeye Brooders are made with lamps and without lamps. Brooders Nos. 0, 1, 2 and 3 are heated with lamps and Brooders Nos. 4 and 5 need no lamp. By the use of the "Buckeye Lampless" system the chicks furnish their own heat and make the brooder self regulating. The lamp heated brooders require no attention except the filling of the lamps once a day.

The most important features of Buckeye Brooders are their simplicity of operation combined with excellence in construction.

The New "Kant-Klog" Sprayer.

Kant-Klog Sprayer style "G" is operated by compressed air, with a patented Kant-Klog nozzle that throws nine different sizes of round or flat sprays and solid streams.

The sprayer body is made of heavy galvanized steel. Top and bottom are dome shaped; joined to body under heavy pressure, making a complete double seam.

The air pump is made of heavy brass two inches in diameter, hose couplings are solid brass, standard cut ends, heavily ribbed to prevent hose from slipping off.

A few seconds working of the air pump thoroughly agitates the solution and charges the sprayer with compressed air. This being a very powerful and elastic force, will, as soon as the thumb presses the "shut-off," force out the liquid in a form of a spray or a solid continuous stream, as desired. After sprayer is charged you need not stop for anything; just walk along from one row to another, the machine will supply sufficient spray to enable you to do the work as fast as you can walk. When properly charged, the tank contains 3 gallons of solution and 1 gallon of compressed air, and two workings of the air pump will discharge the entire contents. Used in greenhouses, poultry houses, the garden and for all plant life including trees. The "Kant-Klog" nozzle furnished with each machine without extra cost, and special attention is called to this nozzle, as it is the only one that can be cleaned without stopping the spray or removing the nozzle. The first and only nozzle ever made that gives both flat and round sprays, or solid sprays. By express or freight, not prepaid. Galvanized steel reservoir, with "Kant-Klog" nozzle, complete, \$4.50.

With brass reservoir and "Kant Clog" nozzle, complete, \$6.00.

No. 4 Barrel Sprayer, Is intended for orchard or field spraying and can be mounted either on the end or side of an ordinary barrel or on a tank.

The New "Kant-Klog" Sprayer.

When desired, two lengths of hose and two or four nozzles can be used by attaching a large "Y" to the screw spout of pump, so enabling you to spray from both sides of the wagon at the same time.

This pump has a large air chamber and possesses great power and force. The churn dash agitator attached to the piston thoroughly mixes the solution at every stroke of the pump handle. We do not furnish barrels as suitable ones, on which pump is easily mounted can be secured in all localities.

At price quoted below, each pump is fitted with five feet of hose, five feet of iron extension pipe and one Kant-Klog nozzle, making a splendid outfit at a very low cost.

No. 4 price with brass cylinder 2 1/2 inches in diameter, seven inches long, brass piston and brass screw spout, \$9.50.

No. 8, the same as No. 4, with all brass plunger, brass valve and valve seat, \$11.50.

Either style fitted with small "Y" two nozzels for \$1.40 extra. Fitted with large "Y," two lengths of hose and nozzels and two pipes for \$3.50 extra.

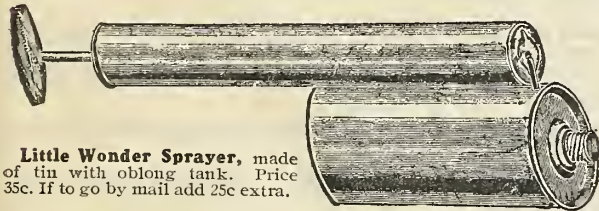

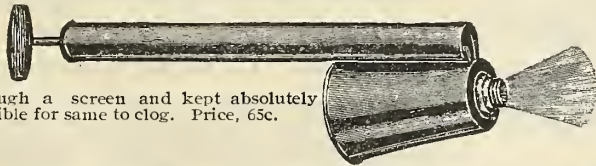

When desired we furnish a 3/4 inch shut-off cock for \$1.00.

The Fountain Sprayer. One of the best compressed air sprayers on the market. The tank has a capacity of 3 gallons and is tested to an air pressure of 50 lbs. to the square in, which obviates any danger of bursting. The machine is carried in one hand like a satchel, and the spray can be started or stopped by a thumb lever operated by the same hand that carries the sprayer. Price, Galvanized Tank, \$5.00.

The Kelso Hand Compressed Sprayer does the work exactly as a large sprayer would do only that it is not quite as large, holds one quart and makes a very fine mist.

Very convenient to spray plants and small trees; Price, 75c.

Dust Blow. The dry powder sprayer. It is impossible to draw the powder back into the cylinder pump, and if the powder is sifted through a screen and kept absolutely dry it will be impossible for same to clog. Price, 65c.

Little Wonder Sprayer, made of tin with oblong tank. Price 35c. If to go by mail add 25c extra.

Junior No. 5 Spray and Force Pump.

This pump does away entirely with the objectionable foot rest. The clamps, leather suction, packing, etc., require no fastenings, as they hold themselves down. Will pump from a pail, barrel, tank, spring or creek. Has automatic mixer to keep solution stirred. It is practically impossible for any part to get out of order as everything except handle and hose is of solid brass. Throws three sizes of solid continuous streams and two sizes of fine round sprays. By express not prepaid, complete, \$3.50.

The extension pipe and brass elbow can be used on either of these sprayers.

Extension Pipe. Made of solid brass. Three feet in length. Several lengths of pipe may be screwed together and the "Kant-Klog" nozzle elevated for spraying trees. By express, not prepaid, 35c each.

Brass Elbow. Used in connection with one length of extension pipe for spraying cucumbers or other low growing vines. Made of heavy brass. By express not prepaid, 30c each.

Little Giant Dry Powder Duster greens two rows of potatoes without water. For the garden, vineyard, tobacco fields, etc., adjustable to any width of row. Many thousands in use; distributes Paris green, heliobore, sulphur, lime, dry Bordeaux mixture and Paris green compound, Spanish Pink Slug, Shot, Bug Death, in fact, any insecticide in powder form.

This machine keeps the poison at a safe distance from the operator. Dust the potatoes as fast as you walk, two rows at a time. Each machine is furnished with 2 nozzles, 5 tubes and strap. Any one can use it. weight cased for shipping, 14 lbs. Price \$6.00.

The "Auto Spray."

The name "Auto Spray" stands for a perfect compressed air sprayer. "The Auto Spray" works automatically for from six to fifteen minutes and may be charged in fifteen seconds by a stroke of the plunger. The "Auto-Spray" is the result of valuable original ideas, ingenuity and mechanical ability. One boy with an "Auto-Spray" will easily do as much as three men with a hand atomizer or any other hand device.

The "Auto-Spray."

Diameter 7 in., height 2 ft., 4 gal. tank, with our patent inward lock seam, brass connections, stopcock and nozzle, are turned out of solid brass and not stamped out of thin sheet metal.

Target Brand Scale Destroyer. This preparation is the most effective and practical means of controlling the San Jose scale, which has yet been found. It destroys insect life by contact—that means it kills scales, larva, insect eggs, and all kinds of insects, either by absorption of the oil, or the formation of the fatal film, which destroys life by suffocation. This preparation contains a combination of mineral and vegetable oils, and is easily mixed with water. When diluted with 19 parts of water, it represents a 5 per cent. solution of mineral oil sufficiently strong to be fatal to insect life, and yet remain perfectly harmless to buds, bark and the growth of the tree. It can be diluted with either warm or cold water, and represents the cheapest, easiest to prepare, and the most reliable spray for fruit-growing either on a large or small scale.

DIRECTIONS.—Dilute 1 to 20 for Fall, Winter and Spring treatment, and 1 to 40 or 45 for Summer treatment.

Fertilizers For The Farm, Garden and Lawn

 We Give Green Trading Stamps on all Fertilizer Orders. 10 Stamps on \$1.00, 100 Stamps on \$10. 500 Stamps, \$50, Etc.

To the Users of Fertilizers, Farmers, Truck Farmers and Gardeners.

We present a list of our brands of Fertilizers. You cannot judge the merits of a Fertilizer only by the analysis, but you must have a knowledge of the basis from which it has been made.

It is a well known fact that the animal waste products produced in the abattoirs gives the purest and most available basis for Ammonia and Phosphoric Acid. This is the basis of our goods. The company that manufactures our Fertilizers own and control a sufficient number of abattoirs, independent of the meat trust, to secure for our goods this unexcelled source for our plant food. The expense is almost as much working and reaping one-half crop as it would be harvesting a full crop.

Claremont Vegetable Grower.

Nitrogen.....	2.46 to 3.29 per cent.	Available Phosphoric Acid 7	to 9.	per cent.
Equal to		Total Phosphoric Acid.....	13.	to 15.
Ammonia.....	3. to 4. per cent.	Potash (actual).....	5.	to 6.

This is our pioneer brand, which is made from the best material known to the trade. The plant food is in the most soluble form and the elements of composition so well balanced, makes it a desirable fertilizer for most crops. When in doubt as to what you should use to produce results call on the Claremont. Use 300 to 400 lbs. to the acre, 25 lbs. 50c. 50 lbs. \$1.00. 100 lbs. \$1.75. 200 lbs. \$3.00. 2,000 lbs., ton, \$25.50.

Gilt Edge Potato Manure.

Nitrogen.....	2.46 to 3.29 per cent.	Available Phosphoric Acid 7	to 9.	per cent.
Equal to		Total Phosphoric Acid.....	13.	to 15.
Ammonia.....	3. to 4. per cent.	Potash (actual).....	10.	to 12.

This brand is especially adapted to the potato crop and contains the proportionate elements necessary to start and carry a crop through to maturity. As laid down by the most experienced, being composed of dissolved bone high grade potash in the most soluble form, it stands unrivaled in its line, and will fulfill its mission if the grower but gives it a loose soil for the tubers to work and develop in.
