THE DELINEATOR!!

After three years of incessant toil this work has at length been completed. Perhaps no book, in this or any other language, has been got up at such expense, and we can safely say that none can surpass it in value for Commercial purposes.

The Paper currency of the United States is so varied in design, that the Counterfeiters could sport on the ignorance of the possessor for no Detector that ever was published described the genuine note, the force of all publications that are devoted to money being directed towards the spurious, altered and counterfeit. This mode of detection would be sufficient if the business men were acquainted with the genuine bills, but this not being the case, all that could be taught them by the Detector would be the description of the rogue as he appeared last. But when the Counterfeiter again takes the plate to his haunt and alters it to some other Bank, then your drawer may be found full of the new fraud before the publishers of the Detectors could see or hear of it; and here is the importance of the DELINEATOR, as it describes every genuine bill of all denominations on every Bank doing business in the United States and British North America, and likewise describes all the parts the most minute, each note being made up with different designs, the Ten differing from the One, and the One from the Five, the Five from the Twenty, the Twenty from the Fifty, and the One Hundred from all of the rest, which shows that no one of the notes could be altered to a higher denomination without being detected, if a person has the DELINEATOR, the means of detection thereby being so simple that a child could not be imposed on.

The most numerous class are spurious, notes that bear no resemblance to the genuine, these are killed at sight, as you have in your own hand the likeness or daguerreotype of the genuine, and the dress and design of the two notes may be as different as that of a lady and gentleman.

COUNTERFEITS is a class of note that is made to imitate the genuine, and to circulate where the genuine is well known, and are very seldom made, and can be more easily detected than any other class of bad money, as everything about the note is labored to imitate, and by close inspection can be readily detected. Very few of these are in circulation as can be seen by reference to your Reporter or Detector. They are wholly filled up with descriptions of altered or notes "not like the genuine."

The DELINEATOR detects all past, present, and future spurious or altered notes, and has accomplished more to protect the Commercial interests of this country than all the Reporters and Detectors that have ever been published, for all they can do at most is to cry thief after the goods have been stolen.

In connection with the DELINEATOR, we furnish to our Subscribers DYE'S BANK MIRROR and DYE'S COIN CHART MANUAL, which contains 65 pages, and a correct facimile of all the coin of the world, and their true value in this country. The MIRROR is semi-monthly and contains a description of all the new Counterfeits, Banks, &c., and is embellished with engraved descriptions of very dangerous Counterfeits, forming altogether the cheapest means of ascertaining all news connected with Banks, &c., in the country. The whole being only \$3 per annum; Single Copies of the DELINEATOR, \$2.

JOHN S. DYE.

EXPLANATIONS:

To find a Bank refer to the Index, and upon turning to the Page thereon set down, a description of the issues of the Institution will be found. In some cases it will be observed (it being impossible to avoid it) that a Bank is indexed as being upon two or three different pages, it is essential that this should be remembered, as the description of the note wanted may be found on another page, it not following in order with the others, as in the case of the Bank of Fishkill, N. Y., it being on pages 74 and 133.

We have inserted in the Index the names of all the Banks in the Union, &c. It will be noticed that no page is designated for some of them. A number are new Banks and have not as yet (to our knowledge) issued notes, and we have accordingly left them blank, to be filled up when occasion requires.

Some of the Banks of Connecticut have availed themselves of the New Free Banking Law, and have had their plates slightly altered, (i. e.) where the State Dye now is, they have had it removed and another design substituted. It would be well for a holder of the notes to recollect this.

Some Banks are closing, and it would be useless to give a description of their notes, as they are rapidly being retired from circulation.

The manner of detecting an altered or spurious note is very simple. Refer to the description, and if the vignettes and end-pieces of the note in question does not correspond with that as laid down for the true, you may with safety refuse it. By following this direction no person can impose upon you, as you are at once your own judge.

can furnish all the Iron Work required for Building purposes; also, Railings for Churches and Public and Private Parks, on terms as reasonable as they can
be procured elsewhere. Persons out of the city, desiring to purchase Iron Work, by sending plans of their building, or a description of what they want, will be promptly
attended to, and furnished with drawings and estimates (if desired,) of the cost of the articles they desire to purchase.

Special Notice to Banking Houses, Government Agents, and all Other Parties Requiring Fire
Proof Buildings and Thief Proof Safes.

The Proprietors have given much attention to the construction of Fire Proof Buildings, and by practical experience, (of which they have had much,) they
are fully prepared to give such information as will be of great importance to parties desiring to put up such buildings.

THIEF PROOF AND FIRE PROOF SAFES

They have manufactured for many years, and after all their experience, they feel confident in saying that those they are now making under I. L. Cady's Patent, are
superior to any ever made in this country. The great advantage that these possess over all others is that the chilled iron, which is indispensable, is placed between two
plates of cast iron, and secured to them so to make separation entirely impossible, thereby giving a substance which cannot be cut, neither can it be broken by
pressure, or the expansion of heat in case of fire, which is sure to be the case with cast iron safes.

Rich's Salamander Safes, Wilder's Patent, Rich's Improvement.

Depot: 144 & 146 Water Street, N. Y. Factory: Corner of Avenue A and
St. Mark's Place.

HAVE YOU A SAFE? Not one of the worthless articles once estimated to be safe, but a genuine
SALAMANDER SAFE made by C. Rich & Co., or their successors, STEARNS & MARVIN. If you have got the
following interrogatories are deeply interesting to you—1st. Would not the destruction of your valuable
books, papers, money &c., greatly derange your business, and on just you to sorrow? 2nd. Would you not
2d. Since such a calamity can be avoided during your life-time by the outlay of \$50, or a \$100 or \$200
in the purchase of a safe, does not true economy demand that you "stay" 3d. If you pay annual fire in-
surance on your stock of merchandise, is it not equally important to effect insurance on your books and
papers for a series of years, paying a small premium once for all? Having the last fifteen years
Safes have been tested in accidental fires one hundred and sixty-one times, and have fully sustained their
reputation as a fire proof article. The subscribers are the sole Proprietors of

JONES' ROTATING PERMUTATION PLATE LOCK,
commonly known as the WORLD'S FAIR LOCK, which has neither key nor key hole, and its dial can be
