PREFACE

~~ACC.~~
1962

This Gazetteer has been compiled under the direction of the Geographical Section, General Staff, Army H.Q., India, from topographical maps on the scale of one inch to four miles, and covers the area of both the Dominions of India and Pakistan. The compilation was nearly complete before the 15th August 1947, and any attempt to separate the names in respect of each Dominion would have meant doing the entire work *de novo*. The index map on the last page shows the layout of the maps used in preparing the Gazetteer.

2. All names of topographical features have been shown. The particulars recorded for each name are self-explanatory; where the description of a name is not clear no entry has been made in the description column. Grid co-ordinates are given to the SW corner of the grid square containing the name, and spherical co-ordinates are also given in every case to the SW corner of the five-minute square of latitude and longitude containing the name.

3. The important and familiar rivers, mountain ranges, provinces and major States, which appear in a large number of sheets have been mentioned only once in the Gazetteer, without listing all the maps in which they appear.

4. Any mistakes found in this Gazetteer may please be reported to the Director of Military Survey, GSGS, Army HQ, India, NEW DELHI, or to the nearest Survey representative for forwarding.
