H. H. BERGER & CO'S PRICE LIST

1893
1894

1893

ESTABLISHED 1878

1894

WE call attention to our new TRADE PRICE LIST of 1893-1894. Noting the increased demand for goods in our line, we have made extensive preparations to meet the orders we expect to receive. We will, as we have for the past fifteen years, do our uttermost to merit continued confidence and esteem.

TERMS

All bills are payable sixty days from date of invoice, unless otherwise agreed upon. *No notice* will be taken of orders coming from parties unknown to us, unless accompanied by cash or satisfactory reference to bank or some well-known FIRMS *in the trade*. Orders less than \$10.00 must be accompanied by cash. On bills paid within thirty days from date of invoice a discount of 2 per cent. is allowed. Prices given herein are NET, f. o. b. cars or steamers. No charge for packing or shipping.

EARLY ORDERS

especially for goods in larger quantities, are indispensable to insure satisfactory delivery in specified time. We do not grow stock here—we *import*, and the distance to Japan and Australia is GREAT. Time of transit of goods up to delivery to us, from twenty to thirty days.

We invite correspondence relative to any point connected with our business, and will cheerfully give information relative to weight, freight rates, etc.

Address all communications to

H. H. BERGER & Co.

SAN FRANCISCO, CAL.

DEPOT:

19th and Folsom Streets.

NOTE.—All complaints must be made within six days of arrival of goods at destination, otherwise no notice can be taken of them.

JAPANESE BULBS.

Prices are f. o. b. Weight of 1000 medium bulbs, repacked from clay in sawdust, about 350 pounds. Freight rate to any point East, \$2.50 per 100 pounds.

LILIUM LONGIFLORUM.

Shipped from San Francisco in August	6 50	45 00	
Japanese Narcissus	4 00	35 00	

Flowers are the same as those of Chinese Narcissus, but bulbs are smaller.

CALIFORNIA BULBS.

Quality.—The bulbs offered are above medium grade, even in size, and with no small or imperfect ones. Extras to cover all deficiencies are always sent. In the selection and packing of bulbs the greatest of care is taken.

Date of Ripening and Shipment.—Nearly all bulbs ripen by July 1st, and can be shipped by July 15th. Exceptions are noted.

Early Orders.—We would especially urge customers to order by June 15th when possible, thus securing the finest bulbs and guarding against disappointment.

Few of the bulbs native to California are good for spring planting, and nearly all thrive better if planted in the early fall.

Stock on hand up to November 1st.

BRODIAEA.

Brodiaeas have a small bulb and grassy leaves. The stalks are erect and slender, leafless, and terminated by a head or umbel of lily-like flowers. All are pretty, and some strikingly beautiful. *B. coccinea* and *B. volubilis* are among the finest novelties of recent years, and will, with some others, take a permanent place as standard bulbs.

Few bulbous plants are more reliable bloomers than Brodiaeas, or more readily adapt themselves to any soil or situation. The bulbs themselves are a recommendation, as they are light, not easily bruised, or at all subject to decay, and can be exposed for months in a hot dry air without the least injury. (See cultural directions.) Ripe July 1st.

SECTION I. (MILLA, TRITELEIA AND ½ EUBRODIAEA.)

In this section, which includes *Milla*, *Triteleia*, and *Eubrodiaea*, the flowers are borne in umbels on a stiff, erect stem.

Brodiaea grandiflora. This species has few dark purple waxy flowers, an inch long;		100	1000
showy	\$1 00	\$6 65	
B. minor. A miniature of the preceding, being but one or two inches high, with royal purple flowers. A novelty in size	2 25	15 00	

	100	1000
<i>B. ixioides.</i> Twelve to twenty inches high, with a close umbel of twenty or more spreading yellow flowers banded on back with brown	\$1 00	\$6 65
<i>B. lactea.</i> Flowers white, banded with green, otherwise much like <i>B. ixioides</i> . . .	1 00	6 65
<i>B. laxa.</i> (Blue Milla; Ithuriel's Spear.) A well-grown plant of this splendid bulb has an umbel eight inches across on a sixteen-inch stalk, and from forty to sixty fine tubular flowers, each one and one-half inches long, of a beautiful color, blue to a Tyrian purple—darkest when grown in the shade. Takes splendidly to cultivation and forces well. The smallest bulbs will blossom	1 00	6 65

B. peduncularis. Another very fine thing, almost identical in habit with *B. laxa*, but fewer flowered, and the long pedicels make the umbel frequently twenty to twenty-four inches across. Flowers very waxy in appearance, porcelain white 25 15 00

Stellaris. A handsome species which cannot be too highly commended. Good bulbs throw up several flower stalks, forming a low star-like clump. The flowers are very bright rich purple, with white centers 50 10 00

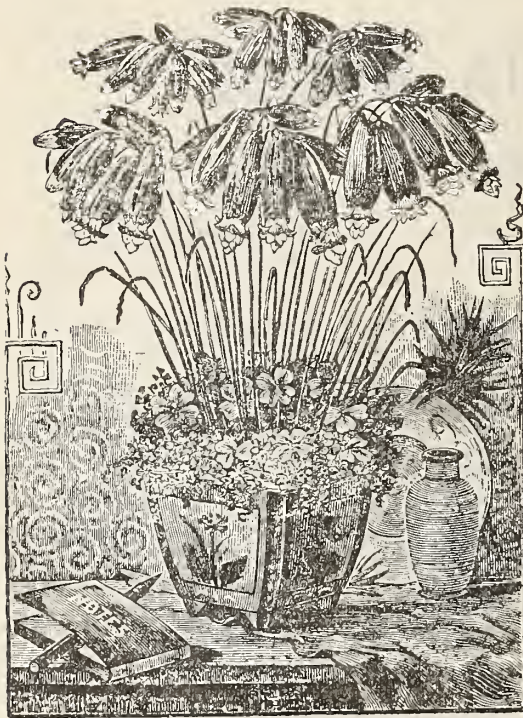

SECTION II. (CALIFORNIA HYACINTHS.)

In the following (true Brodiaeas) the flowers are in globular heads, with slender stalks.

<i>B. multiflora.</i> Produces several stalks of violet flowers; the earliest	1 50	10 00
<i>B. capitata.</i> Early; heads large, lavender color	1 00	6 65
<i>B. congesta.</i> Violet-purple, large heads; two to three feet high; late	1 50	10 00

SECTION III. (BREVOORTIA.)

<i>B. coccinea.</i> Floral Fire Cracker. The cut well describes it. One to three feet high. The pendulous flowers one and one-half to two inches long, rich crimson with pea-green tip. Of this lovely plant it may be said that in beauty, novelty and susceptibility to cultivation it is not excelled. Very large bulbs	3 00	
Fine bulbs	2 25	15 00

BRODIAEA COCCINEA. (FLORAL FIRE CRACKER.)

SECTION IV. (STROPHOLIRION.)

B. volubilis. Twining Hyacinth. This great novelty is a true *Brodiaea*. Soon after the slender, leafless stems start, and while yet the flower bud is a mere dot, it begins to twine, until when the delicate rose-pink flowers unfold, it is five feet high, with a total stem length often of double that. As a novelty it is unique.

Very large bulbs	\$6 00	
Fine bulbs	4 50	30 00

MIXED BRODIAEA.

A fine mixture	90	6 00
--------------------------	----	------

BLOOMERIA.

Bloomeria aurea. Very much like <i>Brodiaea lara</i> in habit. Flowers spreading lemon-yellow; very delicate, with exserted stamens. Frequently the umbel will contain sixty flowers. Extra fine	\$1 50	\$10 00
B. Clevelandi. Smaller plant, with delicate yellow umbels	3 00	20 00

CALOCHORTUS.

SECTION I. (MARIPOSA OR BUTTERFLY TULIPS.)

These beautiful bulbous plants have small bulbs, grassy leaves, stiff, leafy, equally-branched stems, six inches to several feet high, bearing from a few to fifteen and twenty flowers. Flowers are erect, cup-shaped and extremely brilliant. The colors are in richest combination, with spots, dots, lines, eyes and hairs to vie with the most brilliant butterflies, well deserving the name "Mariposa," equivalent to "Butterfly" in Spanish. Bulbs are very easily handled when dry, ripening here early in July to August.

Calochortus splendens. The type of the species. Very large flowers, fully three inches across, light lavender, shading to lilac, full of cobwebby hairs	\$3 00	\$20 00
C. venustus oculus. White ground inside, with eye-like spots richly colored, reddish brown outside; exceedingly showy, and one of the very best.	1 50	10 00
C. v. citrinus. Same, but citron yellow	1 50	10 00
C. v. roseus. Creamy inside, with rose-colored blotch at top of petal; a beautiful tinted eye in center, and silky gland at base; rich carmine on back; a perfect gem	2 40	18 00
C. v. purpurascens. A rich, purplish lilac, with eye-like spots on petal	2 25	15 00
C. luteus. Yellow; low-growing	1 50	10 00

CALOCHORTUS VENUSTUS.

	100	1000
C. Gunnisonii or C. Nuttallii. Tall; large, creamy-white flowers, banded on back with green; strong growing; one of the very best for popular culture. (This species is really <i>C. nuttallii</i> , but has been widely sold as <i>C. Gunnisonii</i> , and is better known by that name.) ORDER EARLY; SUPPLY LIMITED	\$3 00	\$20 00
C. Weedii. One of the very finest, producing large, brilliant orange-yellow flowers, delicately dotted with brown, covered with silky hairs. Stems two to three feet high	4 50	30 00

SECTION II. (STAR TULIPS.)

A single long shiny leaf, often a foot long; slender drooping stems, bearing many flowers; some species often bell-shaped, others closed and globular.

C. albus. Fairy Bell. Strong grower; very floriferous. Flowers an inch in diameter, perfect globes of pearly-white, edged with silky hairs, hanging like bells	1 80	12 00
C. pulchellus. The same as <i>C. albus</i> , but rich yellow; is one of the hardiest and most beautiful	1 50	10 00
C. Maweanus or cæruleus. Delicate open bells; white, lined with silky blue hairs	1 60	10 00
C. lilacinus. Erect cups; light lilac; fine; one of the easiest cultivated and most satisfactory	1 50	10 00
C. Benthami. Is exactly like <i>C. pulchellus</i> , with open cup-shaped, rich yellow flowers with black spots at base of each petal. It charms every one	2 25	15 00

MIXED CALOCHORTUS.

These are first-class bulbs, of the best varieties 1 20 8 00

FRITILLARIA.

These are bulbous plants, much like lilies. The stalks are leafy, six inches to four feet high. Flowers open, pendant bells from few to many. All are graceful and interesting, and *F. recurva* is a beauty. Ripe in June.

FRITILLARIA RECURVA.

	100	1000
Fritillaria biflora. A low species, with one to many pretty flowers having a greenish-brown ground prettily lined. Is very easily grown and a free bloomer.	\$3 00	\$20 00
F. liliacea. Exactly like <i>F. biflora</i> , except that flowers are white and not lined.	3 00	20 00
F. lanceolata. Tall, with many large flowers curiously mottled in green, brown and yellow	3 00	20 00
F. recurva. (<i>F. recurvata</i> , <i>F. recurva</i> var. <i>pluriflora</i> .) This very fine species is of robust growth, from five to nine blossoms being common and as high as thirty-five being known. The		

scarlet flowers are between tubular and bell-shaped, and as beautiful as most lilies. Growth strong and habit graceful. Becoming immensely popular. Ready July 1st.

Very large bulbs	\$4 50	
Bulbs $\frac{3}{4}$ inch in diameter and upward	3 00	20 00

MISCELLANEOUS.

	100	1000
<i>Camassia esculenta</i> . A highly esteemed and well-known plant, dark blue flowers. Ready July 1st	\$ 90	\$6 00
<i>Chlorogalum pomeridianum</i> . Soaproot. Quite a novelty. Large bulb; stalk three to eight feet high, bearing innumerable small white lily-like flowers. Ready July 1st	4 50	30 00
<i>Angustifolium</i> . The same, but dwarf in bulb and stalk. Ready July 1st	4 50	30 00
<i>Erythronium grandiflorum</i> . (<i>Giganteum</i> .) A beautiful species. Two large, beautifully mottled base leaves; three to thirteen flowers, two to two and one-half inches across, straw color, with orange center. Ready July 1st. Very large bulbs Fine blooming bulbs	3 00 1 50	10 00
<i>Hartwegii</i> . A very fine new species; large light yellow flowers, each borne on a long, slender, separate stalk, two to six to the bulb, singular among <i>Erythroniums</i> in this habit. Entirely new and very fine. Ready July 1st	2 25	15 00
<i>Smithii</i> . A pretty one-flowered species, with white flowers turning purple. Ready August 1st	3 00	20 00
<i>Trillium sessile</i> , var. <i>Californicum</i> . A splendid plant. Petals three inches long, pure white. It has a tendency to grow several plants in a clump.	3 00	20 00

LILIUM.

250 at 1000 rate.

	100	1000
<i>Lilium Humboldtii</i> . This is the largest of California lilies, and very showy. Flowers orange, with black spots. Large sized bulbs weigh, packed, sixty pounds to the hundred; medium sized, thirty or forty pounds to the hundred. Bulbs 9 to 11 inches circumference " 7 to 9 " " "	\$12 50 10 00	\$100 00 70 00
<i>L. pardalinum</i> . Red and orange, brown spotted. This species thrives everywhere in good garden soil, and is probably the most vigorous lily grown. It should be widely planted	4 50	35 00
<i>L. parvum</i> . The form of <i>L. parvum</i> is like a small <i>L. pardalinum</i> ; canary yellow, early blooming. Good bulbs	7 50	50 00
<i>L. Washingtonianum</i> . A large lily, with pure white fragrant flowers; three to five feet high. Supply is of medium sized, very solid bulbs, which carry finely. Bulbs 9 to 11 inches circumference " medium sized	12 50 10 00	70 00
<i>L. Columbianum</i> . A very pretty lily, much like <i>L. Humboldtii</i> , but dwarfed	7 50	60 00

L. Washingtonianum and *L. parvum* are ready in October, the others in September. *L. parvum*, *L. pardalinum* and *L. Columbianum* are light enough to go cheaply by mail or express; the others should be forwarded by freight.

CULTURE OF CALIFORNIA BULBS.

Bulbs should be planted early in the fall. As with tulips, a deep soil is to be avoided. If put in the open ground, it is better to have a firm packed soil at six inches depth; but large boxes, eight or ten inches deep and well drained, are preferable. In the East or in any cold climate *Brodiaëas*, *Erythroniums* and star tulips are fairly hardy when given good drainage and plenty of leaves for protection; but by far the best place is in the cold frame. The very best reports are received from bulbs so treated.

Plant in shallow earthen pans, water sparingly, see that drainage is good, and you can depend on a satisfactory bloom wherever they are planted.

Don't water continually. Soak up occasionally and leave alone as long as soil is barely moist.

Don't use coarse, rank manure, either barnyard or other.

Don't force too much. The longer the growing season the better.

Don't water after blooming. Dry off, and if they cannot be kept dry, take up and lay away in a dry place.

Soils.—For *Brodiaëa*, *Camassia* and *Fritillaria*, any well drained light soil, sandy loam with a little leaf mold preferable.

Star tulips do best in loam mixed with coarse river sand, well drained.

Butterfly tulips do well in a sandy loam or light clay loam, firm around the bulbs. Of all things avoid a rich, stimulating soil with these.

Erythroniums need shade and a light, well drained soil of which leaf mold is a principal constituent.

ROOTS.

IRIS.

	10	100	1000

Bulblets, per 1000, \$1.50; per 10,000, \$100.00.

Freesia Seed, best quality, per pound, \$5.00.

Apply for above at once. Samples sent out.

FREESIA REFRACTA ALBA.

PAEONIAS.

	10	100
Herbaceous Paeonia. Single; in pure white, rose, carmine	\$4 00	\$30 00
Herbaceous Paeonia. Double and half-double, in most beautiful variations and fancy shapes. <i>Novelties only</i>	4 50	35 00

See note about pictures.

TREE PAEONIAS.

	10	100
Extra strong plants	\$6 00	\$50 00

Of these splendid flowering shrubs we can furnish the most beautiful novelties. To enable our customers to select Herbaceous or Tree Paeonias,

we will, on application, forward our sets of forty Herbaceous Paeonias and fifty Tree Paeonias, which are painted from nature, *true* in every particular. If desired, we furnish these sets: Herbaceous Paeonias, per forty pictures, \$2.00; Tree Paeonias, per fifty, \$5.00; *Iris Kaempferi*, per picture, 10 cents; per set of one hundred, \$7.50.

CHRYSANTHEMUMS.

Collection of one hundred, in the best and choicest sorts, strong clumps, extra fine for propagation \$25 00

NOVELTIES.

The prize collection of 1892, pictures of which we can send on application. Each, \$2.00; per ten, \$17.50. This price is for rooted cuttings, delivery by July. Applications for *strong clumps*, late fall, must be made at an early date. Prices on application.

We invite correspondence to secure the Prize Plants and Novelties for 1893.

Send for pictures of "Novelties in Chrysanthemums," as descriptions only are sometimes misleading.

JAPAN MAPLES.

These beautiful trees are gaining yearly in favor. For effective grouping in landscape gardening they are invaluable. We import only the best shaped, healthy stock.

RED-LEAVED SORTS.

Acer P. sanguineum. Bright blood-red.

DARK-RED OR MAROON SORTS.

Acer P. atropurpureum.
A. P. a. parvifoliis.
A. P. a. dissectum.
A. P. a. scolopendifolium rubrum.

YELLOW AND GREEN, AND YELLOW SORTS.

Acer P. aureum. Golden yellow.
A. P. pictum aureum. Green, variegated with yellow.
A. P. reticulatum. Green, with network of golden yellow.

GREEN VARIETIES.

Acer P. palmatum or *Japonicum.*
A. P. filicifolium.
A. P. dissectum. Green.
A. P. scolopendifolium. Green.

VARIEGATED SORTS.

Acer P. atropurpureum variegatum.

A. P. pictum albiis. Green and white variegations.
A. P. versicolor. Pink, green and white.
A. P. roseo marginatis. Green, with clear rose margin.

JAPANESE CHRYSANTHEMUM.

We furnish all these varieties in *equal proportions* at following prices :

	10	100
15 to 24 inches	\$3 00	\$25 00
24 to 30 "	4 00	30 00
30 to 36 "	5 00	35 00
36 to 42 "	5 00	45 00
42 to 50 "	5 50	50 00

Price for extra specimens, five to six feet, on application.

Set of hand-painted pictures of thirty varieties of foliage will be sent on application. We furnish also the very attractive combination of six or seven varieties grafted on one stem, which forms a perfect poem in coloring. Each, \$1.00; per ten, \$7.50.

Orders for Maples in quantities should be given *early* to secure best stock.

We import Maples from November 1st to March 1st.

MAPLE SEEDLINGS.

	100	1000	5000 Per 1000
Pencil thickness, for grafting	\$4 00	\$30 00	\$25 00

See note on pictures.

DECIDUOUS MAGNOLIAS.

MAGNOLIA.

- Magnolia conspicua. Large, fragrant, white flowers, with deep carmine corolla. Flowers appear prior to foliage.
- M. Stellata. Exquisite double starry flowers, rosy white and very fragrant. Invaluable for Easter forcing.
- M. kobus. Blooms profusely, white flowers. Reverse of petals pink-shaded.
- M. hypoleuca. Stately ornamental tree. Foliage extremely beautiful.
- M. obovata. Red. Interior pearly-grey; outside reddish-purple. Very beautiful.
- M. obovata. Purple. Darker tints.
- M. Watsoni or parviflora oyama. The beautiful fragrant white flower stands upright.
- M. parviflora Gio Kuse. The flower droops bell-like from its stem.

We furnish above fine flowering plants,

	10	100
15 to 24 inches circumference . . .	\$3 50	\$30 00
18 to 30 " " " . . .	4 00	35 00

EVERGREEN MAGNOLIAS.

Magnolia grandiflora exoniensis. Native of China. The foliage and flower are same as our Florida Magnolia, with the exception that the Chinese Magnolia, which is grafted, blooms when only one foot high.

	10	100
24 to 30 inches	\$7 50	\$65 00

FLOWERING PRUNUS OF JAPAN.

These exquisite double flowering Prunus are most desirable for forcing, and would adapt themselves especially for *Easter decorations*.

Prunus Mume.	Japan Plum.	White, single.
"	"	" " White, double.
"	"	" " Light rose, single.
"	"	" " Light rose, double.

EVERGREEN ORNAMENTAL PLANTS.

CAMELLIA JAPONICA.

We make a *specialty* of these favorite shrubs. Equal to any of the *best Belgian* sorts, and *perfectly double*, without any stamens. We offer the following:

SECTION A.

- Delicate shell-pink.
- Pure white, regular ball.
- Pure white, extra large flower, 3½ to 4 inches across.
- Pure white, with incurved globular center.
- Bright red.
- Carmine, with white variegation.
- Pink, with carmine stripes.
- White, with carmine stripes.

SECTION B.

- Double large, with twined and curled petals, stamens scattered between.
- Pure white.
- Rose and white.
- Brilliant carmine, 4 inches across.

SINGLE CAMELLIAS.

- In brilliant carmine.
- In pure white.

CAMELLIAS.

CAMELLIA SASSANKWA.

Species of Camellias, with small foliage, like the tea-plant. Small flowers, very delicate. Profuse bloomer. Mostly *sweet-scented*. Earliest of all. Begin to bloom in October.

Pure white, double, covered with blossoms. Exquisite.

Carmine, single; 3½ inches across.

Rose and white shaded, single.

Pure white, single.

We furnish extra fine bushy plants of the double flowering *selected varieties*, Section A, in *equal proportions*.

15 to 24 inches	10	100
20 to 30 "	\$5 00	\$40 00
	6 00	50 00

General assortment, Sections A and B, and single and *Sassankwa* in equal proportions.

15 to 24 inches	10	100
24 to 30 "	\$4 00	\$30 00
Single and <i>Sassankwa</i> —15 to 24 inches	4 50	40 00
	4 00	30 00

Early orders are solicited. Larger specimens, up to six feet, we import on *special order only*. If pure white or variegated alone are ordered, prices range somewhat higher. Our given prices are for plants in *equal proportion*.

JAPAN AZALEAS.

These compare very favorably with the Belgian sorts, and we offer them this season at a particularly *low figure* to introduce them more largely. They force well, are literally *covered* with blossoms, and have a wide range of color.

Azalea mollis. In three shades, lemon-yellow, scarlet or salmon color.

A. Sinensis alba. Very large white flower, single.

A. Sinensis rubra. Very large red flower, single.

A. indica, variety Otsu. Salmon-red, single, white at base.

A. Striata. White and red striped and spotted. One bush often bears pure red and pure white at the same time.

A. Yodogawa. Pale lilac, double.

A. Rollisonia or Balsaminaeflora. Bright salmon-pink; flower very double, like a Balsam. Prolific bloomer.

UNNAMED VARIETIES.

Brilliant red, small flower, profuse bloomer.

Rosy lilac, " " " "

Salmon-red, " " " "

White, double, with greenish center.

Carmine and white striped.

Prices given are for bushy, good-sized plants.	10	100
	\$4 00	\$30 00
	Each.	10
Rhododendron Metternichi. Exquisite large rosy flower, in immense clusters . . .	\$2 00	\$15 00

| Blades reach length of four feet. | <i>Woodwardia orientalis.</i> |
| | <i>Psilotum triquestris.</i> |

Well-grown pot plants 10 100
\$3 50 \$30 00

Davallia bullata. The roots worked into curious shapes—balls, globes, rings, ships, birds. Very curious and attractive when covered with young fronds in spring. Very saleable for retail. From 30 cents to \$1.00 each. Can be shipped, when dormant, like bulbs.

PALMS, ETC.

CYCAS REVOLUTA.

These Palms are imported in a dormant state, with roots and fronds cut off, and we can deliver from February to May. As our collector leaves for the Southern Islands of the Japan Sea end of November, all orders should be in by that time, as we do not import any large quantity over orders, as these stems cannot be kept on hand. This applies especially to larger orders.

We *guarantee* our stock to be the best in the market, true *Longifolii*, with well-developed hearts. Stems are sold by weight, customers giving sizes wanted. Best terms for quantities on application. Will develop magnificent leaf-crowns, if placed on bottom heat, in two to three months. Samples of small stems can be sent per mail, or four-pound packages per express. If you want your full money’s worth of this grand Palm, write us and we will send full particulars.

RAPHIS FLABELLIFORMIS, R. HUMILIS.

	Each.	100
Per shoot, 6 inches to 24 feet high	\$ 40	\$35 00
“ “ 24 “ to 48 inches high	45	40 00
“ “ over 4 feet high	60	50 00

CHAMAEROPS.

Well known as splendid decorative Palms.

- C. excelsa.* Fine young plants, one foot high. Each, 35 cents; per 100, \$30.00.
- C. humilis.* Same price.

LATANIA.

The well-known ordinary Fan-Palm, and one of the best of the order for all decorative purposes.

- L. borbonica.* *Livistonia sinensis.* 12 to 18 inches, with five to eight character leaves. Extra fine plants. Each, \$1.00; per ten, \$8.50.
- Larger specimens, each, \$3.00.

SPECIAL NOTICE.

We have found it of the *greatest value* in our trade, especially with retail customers, to whom the mere name of a bulb, plant or tree carries no special meaning, to use pictures or representations of the article in question. To further our end, and to introduce the floral beauties of Japan more and more into our favored land, we are now prepared to supply

PICTURES TRUE TO NATURE

in no instance exaggerated or beautified, of the following :

36	Japanese Lilies, per set	\$1 50
