Planning Outline of Mining and Industrial Dept. based on the Revised Five Years Plan of Industrial Development of Manchoukuo.

(May. Fifth Year of KOTOKU. /1938/
Manchoukuo Govt.)

Summary.

Since the establishment of "the" Five Years' Plan of Manchoukuo Industrial Development" in the 4th year /1937/ of KŌTOKU, the systematic development has been pursuing in every Industrial branch, but on inspecting the actual results gained in the first fiscal

year, and in order to meet with the international
conditions so far developed, it is found necessary to
make a more particular investigation on the original
scheme, especially on the mining and industrial line,
~~Moderate revision should be given, so as to~~ enlarge
~~the productive~~ figure, to hasten the progress of
factoring, and further to item of industrial program
and find the close cooperation
In general, for the common interest of Japan and
~~Manchoukuo~~, the ~~technics~~, resources, etc. ~~each~~
required for the development of ~~both countries respect-~~
~~ively should be~~ carefully investigated and secured
and look forward to
for the actual realization of this plan.

I. Iron and Steel.

A. Summary.

   — See ~~the First List~~ Table No. 1

	Mining and Industrial Dept. (~~Remarks No. 1~~ Note 1)	Whole Scheme (~~Remarks No. 2~~ Note 2)
Original Plan	¥1,500,000,000	¥2,582,500,000
Revised Plan	¥3,880,300,000	¥4,962,800,000
Increased Sum	¥2,380,300,000	¥2,380,300,000

N.B.

(1) From ¥1,638,500,000, the total fund required for 5 years for the original plan of Mining and Industrial Dept ~~deducting~~ (¥138,500,000 is deducted) actually spent the amount in the first fiscal year, making ~~¥1,500,000,000 needed~~ the sum needed from and after the 2nd fiscal year ¥1500,000,000

(2) From ¥2,905,500,000, the total fund required for 5 years for the whole original plan, ~~deducting ¥923,000,000~~

¥323,000,000 is deducted.

The sum actually spent ~~xxxx~~ in the first fiscal year makes, ~~¥2,582,500,000~~. The ~~needed~~ sum needed for ~~xx xxx~~ after the 2nd fiscal year on ¥2,582,500,000.

2. Presumption of Required funds emanated to: will be discharged countries to be

	Mining and Industrial Dept	Ratio against Total Sum	The whole plan	Ratio against Total Sum
Total sum of Required funds	¥3,880,300,000	100%	¥4,962,800,000	100%
Paid in the country	1,364,900,000	35%	2,141,400,000	43%
Paid to Japan	1,284,900,000	33%	1,468,900,000	30%

Looking over the payees for the Mining and In-

dustrial Dept. only, Manchukuo, Japan and the third

powers, each ~~takes~~ get one third of the total ~~paying~~

~~amount~~.

3. Scheme to raise the required fund.

(A) ~~The amount required~~ Those. to raise the Japanese Yen fund.
(See ~~the list~~ Table No. 2)

(from the fund to be paid to Japan directly or in-

directly). Deducting the Japanese Yen ~~values~~ equivalent

to what Manchukuo should gain by exporting ~~for~~

the materials of

~~goods~~ to Japan which be made during the Five Years'

Plan ~~would be~~ the balance would be the amount ~~which actually required~~

to be raised in Japan

Mining and Industrial Dept.	Appro.	¥1,690,000,000
Miscellaneous	"	620,000,000
Total		¥2,310,000,000

As a means to raise foreign currency, according to the current exchange agreement between Japan and Manchukuo (the allotted amount to Manchukuo of 60% will be increased to 90% and in case such ratio be increased to 90% thereby to gain foreign currency amounting to ¥400,000,000, which makes it necessary to [illegible] an equivalent amount of gold yen fund apart from this needed separately.

(B) The amount required foreign currency

as stated above, and the fund required the amount

to be paid to the third countries would be about ¥1350,000,000,

whereas the exchange fund which can be estimated under

the current exchange agreement between Japan and

Manchukuo, plus extra exchange fund which

might be gained by improvement of commerce in

future would make approximately ¥610,000,000 including gold

newly produced, which means a deficit of ¥740,000,000

that after all. How to raise a amount supply this difference

is mentioned in

should be carried in accordance with the Exchange

(4) of No. 4 following

Scheme, Note to be mentioned later.
