Unauthorized Disclosure of Classified Information

Criminal Prohibitions on the Publication of Classified Defense Information, R41404 (December 6, 2010).

JENNIFER K. ELSEA, CONGRESSIONAL RESEARCH SERV., CRIMINAL PROHIBITIONS ON THE PUBLICATION OF CLASSIFIED DEFENSE INFORMATION (2010), *available at* http://www.intelligencelaw.com/library/secondary/crs/pdf/R41404_12-6-2010.pdf.

Jennifer K. Elsea
Legislative Attorney

December 6, 2010
Order Code R41404

Summary

The recent online publication of classified defense documents and diplomatic cables by the organization WikiLeaks and subsequent reporting by the New York Times and other news media have focused attention on whether such publication violates U.S. criminal law. The Attorney General has reportedly stated that the Justice Department and Department of Defense are investigating the circumstances to determine whether any prosecutions will be undertaken in connection with the disclosure.

This report identifies some criminal statutes that may apply, but notes that these have been used almost exclusively to prosecute individuals with access to classified information (and a corresponding obligation to protect it) who make it available to foreign agents, or to foreign agents who obtain classified information unlawfully while present in the United States. Leaks of classified information to the press have only rarely been punished as crimes, and we are aware of no case in which a publisher of information obtained through unauthorized disclosure by a government employee has been prosecuted for publishing it. There may be First Amendment implications that would make such a prosecution difficult, not to mention political ramifications based on concerns about government censorship.

To the extent that the investigation implicates any foreign nationals whose conduct occurred entirely overseas, any resulting prosecution may carry foreign policy implications related to the exercise of extraterritorial jurisdiction and whether suspected persons may be extradited to the United States under applicable treaty provisions.

This report will discuss the statutory prohibitions that may be implicated, including the Espionage Act; the extraterritorial application of such statutes; and the First Amendment implications related to such prosecutions against domestic or foreign media organizations and associated individuals. The report will also provide a summary of pending legislation relevant to the issue, including S. 4004.

Introduction

The recent online publication of classified defense documents and diplomatic cables by the organization WikiLeaks and subsequent reporting by the New York Times, the Guardian (UK), and Der Spiegel (Germany) have focused attention on whether such publication violates U.S. criminal law. The Attorney General has reportedly stated that the Justice Department and Department of Defense are investigating the circumstances to determine whether any prosecutions will be undertaken in connection with the disclosure,[1417] but has not released sufficient factual findings to permit a full legal analysis. Accordingly, the following discussion will provide a general overview of the relevant law as it may apply to pertinent allegations reported in the media, assuming them to be true. The discussion should not be interpreted to confirm the truth of any allegations or establish that a particular statute has been violated.

Background

WikiLeaks.org describes itself as a "public service designed to protect whistle-blowers, journalists and activists who have sensitive materials to communicate to the public."[1418] Arguing that "[p]rincipled leaking has changed the course of history for the better," it states that its purpose is to promote transparency in government and fight corporate fraud by publishing information governments or corporations would prefer to keep secret, obtained from sources in person, by means of postal drops, and by using "cutting-edge cryptographic technologies" to receive material electronically.[1419] The organization promises contributors that their anonymity will be protected.

According to press reports, WikiLeaks obtained more than 91,000 secret U.S. military reports related to the war in Afghanistan and posted the majority of them, unredacted, on its website in late July, 2010, after first alerting the New York Times and two foreign newspapers, the Guardian (London) and Der Spiegel (Germany), about the pending disclosure.[1420] Military officials have reportedly said they suspect an Army private, Bradley Manning, of having leaked the documents to WikiLeaks.[1421] Private Manning, a U.S. citizen, was already in military custody under suspicion of having provided WikiLeaks with video footage of an airstrike that resulted in the deaths of civilians.[1422] U.S. officials have condemned the leaks, predicting that the information disclosed could lead to the loss of lives of U.S. soldiers in Afghanistan and Afghan citizens who have provided them assistance.[1423] Defense Secretary Robert M. Gates informed Members of Congress that a preliminary review of the disclosed information by the Defense Department found that no sensitive information related to intelligence sources or methods was made public, but reiterated that the release of Afghan informants' names could have "potentially dramatic and grievously harmful consequences."[1424] WikiLeaks subsequently released some 400,000 documents related to the war in Iraq,[1425] this time with names of informants apparently redacted.[1426]

[1420] The New York Times published a series of articles under the headline "The War Logs," which is available online at http://www.nytimes.com/interactive/world/war-logs.html. The Times describes the leaked material as an archive covering six years of incident reports and intelligence documents—"usually spare summaries but sometimes detailed narratives"—that "illustrate[s] in mosaic detail why" the military effort in Afghanistan has not weakened the Taliban. C. J. Chivers et al., The Afghan Struggle: A Secret Archive, N.Y. TIMES, July 26, 2010, at 1. The German periodical Der Spiegel published a series of articles under the topic "Afghanistan Protocol," which is available (in English) online at http://www.spiegel.de/international/world/0,1518,708314,00.html. The Guardian (UK) published a series entitled "Afghanistan: The War Logs," which is available online at http://www.guardian.co.uk/world/the-war-logs.

[1426] See Anna Mulrine, Wikileaks Iraq Documents not as Damaging as Pentagon Feared—Yet, CHRISTIAN SCIENCE MONITOR, Oct. 25, 2010. The New York Times has stated it redacted names prior to publishing the leaked materials. See The Iraq Archive, supra footnote 9.

In late November, 2010, WikiLeaks began publishing what the New York Times calls a "mammoth cache of a quarter-million confidential American diplomatic cables," dated for the most part within the last three years.[1427] Wikileaks.org posted 220 cables on November 28, 2010, as a first installment, some of which documents were redacted to protect diplomatic sources. The most recent documents in the collection are reportedly dated February 2010.[1428]

The United States government was aware of the impending disclosure, although not apparently directly informed by the web-based anti-secrecy organization (or given access to the documents to be released), although WikiLeaks Editor in Chief Julian Assange offered in a letter sent to the U.S. ambassador to the U.K., Louis Susman, to consider any U.S. requests to protect specific information that the government believes could, if published, put any individuals at significant risk of harm.[1429] The State Department Legal Adviser responded in a letter to Mr. Assange's attorney that the publication of classified materials violates U.S. law, that the United States will not negotiate with WikiLeaks with respect to the publication of illegally obtained classified documents, and that WikiLeaks should cease these activities and return all documents, as well as delete any classified U.S. government material in its possession from its databases.[1430] Mr. Assange responded by accusing the United States of adopting a confrontational stance and indicating an intent to continue publishing the materials, subject to the checks WikiLeaks and its media partners planned to implement to reduce any risk to individuals.[1431]

After learning the classified cables were to be published, the Defense Department notified the U.S. Senate and House Armed Services Committees in general terms about what to expect.[1432] Assistant Secretary for Legislative Affairs Elizabeth King explained that "State Department cables by their nature contain everyday

analysis and candid assessments that any government engages in as part of effective foreign relations," and predicted that the publication of the classified cables, which she described as intended to "wreak havoc and destabilize global security," could potentially jeopardize lives.[1433] State Department spokesman Philip J. Crowley told Bloomberg that the State Department is "assessing the possible impact on our on-going diplomatic activity and notifying both Congress and other governments what may occur."[1434] The White House issued a statement condemning the activities of WikiLeaks[1435] and ordered all agencies to conduct reviews of their information security policies and programs.[1436]

The publication of the leaked documents by WikiLeaks and the subsequent reporting of information contained therein raise questions with respect to the possibility of bringing criminal charges for the dissemination of materials by media organizations following an unauthorized disclosure, in particular when done by non-U.S. nationals overseas. This report will discuss the statutory prohibitions that may be implicated; the extraterritorial application of such statutes; and the First Amendment implications related to such prosecutions against domestic or foreign media organizations and associated individuals.

[1435] White House, Statement of the Press Secretary, Nov. 28, 2010, at http://www.whitehouse.gov/the-press-office/2010/ 11/28/statement-press-secretary. The statement reads in full: We anticipate the release of what are claimed to be several hundred thousand classified State department cables on Sunday night that detail private diplomatic discussions with foreign governments. By its very nature, field reporting to Washington is candid and often incomplete information. It is not an expression of policy, nor does it always shape final policy decisions. Nevertheless, these cables could compromise private discussions with foreign governments and opposition leaders, and when the substance of private conversations is printed on the front pages of newspapers across the world, it can deeply impact not only US foreign policy interests, but those of our allies and friends around the world. To be clear—such disclosures put at risk our diplomats, intelligence professionals, and people around the world who come to the United States for assistance in promoting democracy and open government. These documents also may include named individuals who in many cases live and work under oppressive regimes and who are trying to create more open and free societies. President Obama supports responsible, accountable, and open government at home and around the world, but this reckless and dangerous action runs counter to that goal. By releasing stolen and classified documents, Wikileaks has put at risk not only the cause of human rights but also the lives and work of these individuals. We condemn in the strongest terms the unauthorized disclosure of classified documents and sensitive national security information.

[1436] Memorandum from Jacob J. Lew, Director, Office of Management and Budget to Heads of Executive Departments and Agencies (Nov. 28, 2010) , at http://www.whitehouse.gov/sites/default/files/omb/memoranda/2011/m11-06.pdf. For other White House responses to the WikiLeaks disclosures, see FACT SHEET: U.S. Government Mitigation Efforts in Light of the Recent Unlawful Disclosure of Classified Information (Dec. 1, 2010), at http://www.whitehouse.gov/search/site/classified%20information.

Statutory Protection of Classified Information

While there is no one statute that criminalizes the unauthorized disclosure of any classified information, a patchwork of statutes exists to protect information depending upon its nature, the identity of the discloser and of those to whom it was disclosed, and the means by which it was obtained. It seems likely that most of the information disclosed by WikiLeaks that was obtained from Department of Defense databases falls under the general rubric of information related to the national defense. The diplomatic cables obtained from State Department channels may also contain information relating to the national defense and thus be covered under the Espionage Act, but otherwise its disclosure by persons who are not government employees does not appear to be directly proscribed. It is possible that some of the government information disclosed in any of the three releases does not fall under the express protection of any statute, despite its classified status.

The Espionage Act

National defense information in general is protected by the Espionage Act,[1437] 18 U.S.C. §§ 793– 798, while other types of relevant information are covered elsewhere. Some provisions apply only to government employees or others who have authorized access to sensitive government information,[1438] but the following provisions apply to all persons. 18 U.S.C. § 793 prohibits the gathering, transmitting, or receipt of defense information with the intent or reason to believe the information will be used against the United States or to the benefit of a foreign nation. Violators are subject to a fine or up to 10 years imprisonment, or both,[1439] as are those who conspire to violate the statute.[1440] Persons who possess

---

[1437] Act of October 6, 1917, ch. 106, § 10(i), 40 Stat. 422.

[1438] E.g., 18 U.S.C. §§ 952 (prohibiting disclosure of diplomatic codes and correspondence), 1924 (unauthorized removal and retention of classified documents or material); 50 U.S.C. § 783 (unauthorized disclosure of classified information to an agent of a foreign government, unauthorized receipt by foreign government official) This report does not address such prohibitions, nor prohibitions that apply to military personnel under the Uniform Code of Military Justice.

[1439] 18 U.S.C. § 793(a)-(c) provides: (a) Whoever, for the purpose of obtaining information respecting the national defense with intent or reason to believe that the information is to be used to the injury of the United States, or to the advantage of any foreign nation, goes upon, enters, flies over, or otherwise obtains information concerning any vessel, aircraft, work of defense, [etc.], or any prohibited place so designated by the President by proclamation in time of war or in case of national emergency in which anything for the use of the Army, Navy, or Air Force is being prepared or constructed or stored, information as to which prohibited place the President has determined would be prejudicial to the national defense; or (b) Whoever, for the purpose aforesaid, and with like intent or reason to believe, copies, takes, makes, or obtains, or attempts to copy, take, make, or obtain any sketch, photograph, photographic negative, blueprint, plan, map, model, instrument, appliance, document, writing, or note of anything connected with the national defense; or (c) Whoever, for the purpose aforesaid, receives or obtains or agrees or attempts to

defense information that they have reason to know could be used to harm the national security, whether the access is authorized or unauthorized, and who disclose that information to any person not entitled to receive it, or who fail to surrender the information to an officer of the United States, are subject to the same penalty.[1441] Although it is not necessary that the information be classified by a government agency, the courts seem to give deference to the executive determination of what constitutes "defense information."[1442] Information that is made available by the government to the public is not covered under the prohibition, however, because public availability of such information negates the bad-faith intent requirement.[1443] On the other hand, classified documents remain within the ambit of the statute even if information contained therein is made public by an unauthorized leak.[1444]

18 U.S.C. § 794 (aiding foreign governments or communicating information to an enemy in time of war) covers "classic spying" cases,[1445] providing for

---

receive or obtain from any person, or from any source whatever, any [protected thing] connected with the national defense, knowing or having reason to believe ... that it has been or will be obtained, taken, made, or disposed of by any person contrary to the provisions of this chapter [18 U.S.C. §§ 792 et seq.]....

[1440] 18 U.S.C. § 793(g) provides: If two or more persons conspire to violate any of the foregoing provisions of this section, and one or more of such persons do any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be subject to the punishment provided for the offense which is the object of such conspiracy.

[1441] 18 U.S.C. § 793(e) provides: Whoever having unauthorized possession of, access to, or control over any document [or other protected thing], or information relating to the national defense which information the possessor has reason to believe could be used to the injury of the United States or to the advantage of any foreign nation, willfully communicates, delivers, transmits ... to any person not entitled to receive it, or willfully retains the same and fails to deliver it to the officer or employee of the United States entitled to receive it; ... Shall be fined under this title or imprisoned not more than ten years, or both.

[1442] The government must demonstrate that disclosure of the information is at least "potentially damaging" to the United States or advantageous to a foreign government. See United States v. Morison, 844 F.2d 1057, 1072 (4th Cir.), cert. denied, 488 U.S. (1988)(upholding conviction under 18 U.S.C. § 793 for delivery of classified photographs to publisher). Whether the information is "related to the national defense" under this meaning is a question of fact for the jury to decide. Id. at 1073.

[1443] Gorin v. United States, 312, U.S. 9, 27-28 (1941) ("Where there is no occasion for secrecy, as with reports relating to national defense, published by authority of Congress or the military departments, there can, of course, in all likelihood be no reasonable intent to give an advantage to a foreign government.").

[1444] United States v. Squillacote, 221 F.3d 542, 578 (4th Cir. 2000).

[1445] Morison, 844 F.2d at 1064-65 (explaining that critical element distinguishing § 794 from § 793 is the requirement that disclosure be made to an agent of a foreign government rather than anyone not entitled to receive it).

imprisonment for any term of years or life, or under certain circumstances, the death penalty.[1446] The provision penalizes anyone who transmits defense information to a foreign government (or foreign political or military party) with the intent or reason to believe it will be used against the United States. It also prohibits attempts to elicit information related to the public defense "which might be useful to the enemy."[1447] The death penalty is available only upon a finding that the offense resulted in the death of a covert agent or directly concerns nuclear weapons or other particularly sensitive types of information. The death penalty is also available under § 794 for violators who gather, transmit or publish information related to military plans or operations and the like during time of war, with the intent that the information reach the enemy.[1448] These penalties are available to punish any person who participates in a conspiracy to violate the statute. Offenders are also subject to forfeiture of any ill-gotten gains and property used to facilitate the offense.[1449]

The unauthorized creation, publication, sale or transfer of photographs or sketches of vital defense installations or equipment as designated by the

---

[1446] § 794. Gathering or delivering defense information to aid foreign government (a) Whoever, with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation, communicates, delivers, or transmits ... to any foreign government, or to any faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States, or to any representative, officer, agent, employee, subject, or citizen thereof, either directly or indirectly, any document [or other protected thing], or information relating to the national defense, shall be punished by death or by imprisonment for any term of years or for life, except that the sentence of death shall not be imposed unless the jury or ... the court, further finds that the offense resulted in the identification by a foreign power (as defined in section 101(a) of the Foreign Intelligence Surveillance Act of 1978 [50 U.C.S. § 1801(a)]) of an individual acting as an agent of the United States and consequently in the death of that individual, or directly concerned nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large-scale attack; war plans; communications intelligence or cryptographic information; or any other major weapons system or major element of defense strategy.

[1447] § 794(b) provides: (b) Whoever, in time of war, with intent that the same shall be communicated to the enemy, collects, records, publishes, or communicates, or attempts to elicit any information with respect to the movement, numbers, description, condition, or disposition of any of the Armed Forces, ships, aircraft, or war materials of the United States, or with respect to the plans or conduct, or supposed plans or conduct of any naval or military operations, or with respect to any works or measures undertaken for or connected with, or intended for the fortification or defense of any place, or any other information relating to the public defense, which might be useful to the enemy, shall be punished by death or by imprisonment for any term of years or for life....

[1448] During time of war, any individual who communicates intelligence or any other information to the enemy may be prosecuted by the military for aiding the enemy under Article 104 of the Uniform Code of Military Justice (UCMJ), and if convicted, punished by "death or such other punishment as a court-martial or military commission may direct." 10 U.S.C. § 904.

[1449] 18 U.S.C. § 794(d). Proceeds go to the Crime Victims Fund.

President is prohibited by 18 U.S.C. §§ 795 and 797.[1450] Violators are subject to fine or imprisonment for not more than one year, or both.

The knowing and willful disclosure of certain classified information is punishable under 18 U.S.C. § 798 by fine and/or imprisonment for not more than 10 years.[1451] To incur a penalty, the disclosure must be prejudicial to the safety or interests of the United States or work to the benefit of any foreign government and to the detriment of the United States. The provision applies only to information related to cryptographic systems or communications intelligence that is specially designated by a U.S. government agency for "limited or restricted dissemination or distribution."[1452]

Other Statutes

[1450] § 795. Photographing and sketching defense installations (a) Whenever, in the interests of national defense, the President defines certain vital military and naval installations or equipment as requiring protection against the general dissemination of information relative thereto, it shall be unlawful to make any photograph, sketch, picture, drawing, map, or graphical representation of such vital military and naval installations or equipment without first obtaining permission of the commanding officer of the military or naval post, camp, or station, or naval vessels, military and naval aircraft, and any separate military or naval command concerned, or higher authority, and promptly submitting the product obtained to such commanding officer or higher authority for censorship or such other action as he may deem necessary.... § 797. Publication and sale of photographs of defense installations On and after thirty days from the date upon which the President defines any vital military or naval installation or equipment as being within the category contemplated under section 795 of this title [18], whoever reproduces, publishes, sells, or gives away any photograph, sketch, picture, drawing, map, or graphical representation of the vital military or naval installations or equipment so defined, without first obtaining permission of the commanding officer ... or higher authority, unless such photograph, sketch, picture, drawing, map, or graphical representation has clearly indicated thereon that it has been censored by the proper military or naval authority, shall be fined under this title or imprisoned not more than one year, or both.

[1451] § 798. Disclosure of classified information (a) Whoever knowingly and willfully communicates, furnishes, transmits, or otherwise makes available to an unauthorized person, or publishes, or uses in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States any classified information—-(1) concerning the nature, preparation, or use of any code, cipher, or cryptographic system of the United States or any foreign government; or (2) concerning the design, construction, use, maintenance, or repair of any device, apparatus, or appliance used or prepared or planned for use by the United States or any foreign government for cryptographic or communication intelligence purposes; or (3) concerning the communication intelligence activities of the United States or any foreign government; or (4) obtained by the processes of communication intelligence from the communications of any foreign government, knowing the same to have been obtained by such processes—-Shall be fined ... or imprisoned not more than ten years, or both.

[1452] 18 U.S.C. § 798(b).

18 U.S.C. § 1030(a)(1) punishes the willful retention, communication, or transmission, etc., of classified information retrieved by means of knowingly accessing a computer without (or in excess of) authorization, with reason to believe that such information "could be used to the injury of the United States, or to the advantage of any foreign nation." Receipt of information procured in violation of the statute is not addressed, but depending on the specific facts surrounding the unauthorized access, criminal culpability might be asserted against persons who did not themselves access a government computer as conspirators, aiders and abettors, or accessories after the fact.[1453] The provision imposes a fine or imprisonment for not more than 10 years, or both, in the case of a first offense or attempted violation. Repeat offenses or attempts can incur a prison sentence of up to 20 years.

18 U.S.C. § 641 punishes the theft or conversion of government property or records for one's own use or the use of another. While this section does not explicitly prohibit disclosure of classified information, it has been used to prosecute "leakers."[1454] Violators may be fined, imprisoned for not more than 10 years, or both, unless the value of the property does not exceed the sum of $100, in which case the maximum prison term is one year. The statute also covers knowing receipt or retention of stolen or converted property with the intent to convert it to the recipient's own use. It does not appear to have been used to prosecute any recipients of classified information even where the original discloser was charged under the statute.

50 U.S.C. § 421 provides for the protection of information concerning the identity of covert intelligence agents.[1455] It generally covers persons authorized to know

---

[1453] For more information about conspiracy law, see CRS Report R41223, Federal Conspiracy Law: A Brief Overview, by Charles Doyle.

[1454] See United States v. Morison, 844 F.2d 1057 (4th Cir. 1988)(photographs and reports were tangible property of the government); United States v. Fowler, 932 F.2d 306 (4th Cir. 1991)("information is a species of property and a thing of value" such that "conversion and conveyance of governmental information can violate § 641," citing United States v. Jeter, 775 F.2d 670, 680-82 (6th Cir. 1985)); United States v. Girard, 601 F.2d 69, 70-71 (2d Cir. 1979). The statute was used to prosecute a DEA official for leaking unclassified but restricted documents pertinent to an agency investigation. See Dan Eggen, If the Secret's Spilled, Calling Leaker to Account Isn't Easy, WASH. POST, Oct. 3, 2003, at A5 (reporting prosecution of Jonathan Randel under conversion statute for leaking government documents to journalist).

[1455] The Intelligence Identities and Protection Act of 1982, codified at 50 U.S.C. §§ 421-26. For more information, see CRS Report RS21636, Intelligence Identities Protection Act, by Elizabeth B. Bazan. The term "covert agent" is defined to include a non-U.S. citizen "whose past or present intelligence relationship to the United States is classified information and who is a present or former agent of, or a present or former informant or source of operational assistance to, an intelligence agency." 50 U.S.C. § 426(4)(c). "Intelligence agency" is defined to include a "foreign intelligence component of the Department of Defense"; informant means "any individual who furnishes information to an intelligence agency in the course of a confidential relationship." 50

the identity of such agents, but can also apply to a person who learns of the identity of a covert agent through a "pattern of activities intended to identify and expose covert agents" and discloses the identity to any individual not authorized access to classified information, with reason to believe that such activities would impair U.S. foreign intelligence efforts. This crime is subject to a fine or imprisonment for a term of not more than three years. To be convicted, a violator must have knowledge that the information identifies a covert agent whose identity the United States is taking affirmative measures to conceal. To date, there have been no reported cases interpreting the statute, but it did result in one conviction pursuant to a guilty plea.[1456]

There appears to be no statute that generally proscribes the acquisition or publication of diplomatic cables, although government employees who disclose such information without proper authority may be subject to prosecution. 18 U.S.C. § 952 punishes employees of the United States who, without authorization, willfully publish or furnish to another any official diplomatic code or material prepared in such a code, by imposing a fine, a prison sentence (up to 10 years), or both. The same punishment applies for materials "obtained while in the process of transmission between any foreign government and its diplomatic mission in the United States,"[1457] but not, apparently, materials obtained during transmission from U.S. diplomatic missions abroad to the State Department or vice versa (unless the material was or purports to have been prepared using an official diplomatic code – it is unclear whether messages that are encrypted for transmission are covered).

Analysis

In light of the foregoing, it seems that there is ample statutory authority for prosecuting individuals who elicit or disseminate most of the documents at issue, as long as the intent element can be satisfied and potential damage to national security can be demonstrated.[1458] There is some authority, however, for

---

U.S.C. § 426(5-6). The definitions suggest that the act is intended to protect the identities of persons who provide intelligence information directly to a military counterintelligence unit, but perhaps they can be read to cover those who provide information to military personnel carrying out other functions who provide situation reports intended to reach an intelligence component. In any event, the extraterritorial application of the statute is limited to U.S. citizens and permanent resident aliens. 50 U.S.C. § 424.

[1456] See Richard B. Schmitt, Rare Statute Figures in Rove Case, LA TIMES, July 15, 2005, at A15 (reporting 1985 conviction of Sharon Scranage, a clerk for the CIA in Ghana, for disclosing identities of covert agents).

[1457] 18 U.S.C. § 952.

[1458] It appears the intent element is satisfied by proof that the material was obtained or disclosed "with intent or reason to believe that the information is to be used [or could be used] to the injury of the United States, or to the advantage of any foreign nation." 18 U.S.C. §§ 793 and 794. This has

interpreting 18 U.S.C. § 793, which prohibits the communication, transmission, or delivery of protected information to anyone not entitled to possess it, to exclude the "publication" of material by the media.[1459] Publication is not expressly proscribed in 18 U.S.C. § 794(a), either, although it is possible that publishing covered information in the media could be construed as an "indirect" transmission of such information to a foreign party, as long as the intent that the information reach said party can be demonstrated.[1460] The death penalty is available under that subsection if the offense results in the identification and subsequent death of "an individual acting as an agent of the United States,"[1461] or the disclosure of information relating to certain other broadly defined defense matters. The word "publishes" does appear in 18 U.S.C. § 794(b), which applies to wartime disclosures of information related to the "public defense" that "might be useful to the enemy" and is in fact intended to be communicated to the enemy. The types of information covered seem to be limited to military plans and information about fortifications and the like, which may exclude data related to purely historical matters.

Moreover, the statutes described in the previous section have been used almost exclusively to prosecute individuals with access to classified information (and a corresponding obligation to protect it) who make it available to foreign agents, or to foreign agents who obtain classified information unlawfully while present in the United States. Leaks of classified information to the press have only rarely been punished as crimes, and we are aware of no case in which a publisher of information obtained through unauthorized disclosure by a government employee has been prosecuted for publishing it. There may be First Amendment

---

been interpreted to require the prosecution to demonstrate a "bad purpose." See United States v. Morison, 844 F.2d 1057, 1071 ("An act is done willfully if it is done voluntarily and intentionally and with the specific intent to do something that the law forbids. That is to say, with a bad purpose either to disobey or to disregard the law."). If any of the disclosed material involves communications intelligence as described in 18 U.S.C. § 798, the conduct must be undertaken knowingly and willfully to meet the intent threshold.

[1459] See New York Times Co. v. United States, 403 U.S. 713, 721-22 (1971) (Douglas, J., concurring) (rejecting government argument that term "communicate" should be read to include "publish," based on conspicuous absence of the term "publish" in that section of the Espionage Act and legislative history demonstrating Congress had rejected an effort to reach publication).

[1460] See Harold Edgar and Benno C. Schmidt, Jr., Curtiss-Wright Comes Home: Executive Power and National Security Secrecy, 21 HARV. C.R.-C.L. L. REV. 349, 395 (1986) (questioning whether Espionage Act can be construed to except publication).

[1461] The data released by WikiLeaks contains some names of Afghans who assisted Coalition Forces, leading to some concern that the Taliban might use the information to seek out those individuals for retaliation. See Eric Schmitt and David E. Sanger, Gates Cites Peril in Leak of Afghan War Logs, N.Y. TIMES, Aug. 2, 2010, at 4. The New York Times, The Guardian, and Der Spiegel published excerpts of the database, but did not publish the names of individual Afghans. Id. No deaths have yet been tied to the leaks. See Robert Burns, Pentagon Sees Deadly Risk in Wikileaks Disclosures, AP NEWSWIRE, Aug. 17, 2010. There appears to be no court precedent interpreting "agent of the United States" in the context of18 U.S.C. § 794(a).

implications that would make such a prosecution difficult, not to mention political ramifications based on concerns about government censorship. To the extent that the investigation implicates any foreign nationals whose conduct occurred entirely overseas, any resulting prosecution may carry foreign policy implications related to the exercise of extraterritorial jurisdiction and whether suspected persons may be extradited to the United States under applicable treaty provisions.

Jurisdictional Reach of Relevant Statutes

The Espionage Act gives no express indication that it is intended to apply extraterritorially, but courts have not been reluctant to apply it to overseas conduct of Americans, in particular because Congress in 1961 eliminated a provision restricting the act to apply only "within the admiralty and maritime jurisdiction of the United States and on the high seas, as well as within the United States."[1462] This does not answer the question whether the act is intended to apply to foreigners outside the United States. Because espionage is recognized as a form of treason,[1463] which generally applies only to persons who owe allegiance to the United States, it might be supposed that Congress did not regard it as a crime that could be committed by aliens with no connection to the United States. However, the only court that appears to have addressed the question concluded otherwise.[1464] A district court judge held in 1985 thata citizen of East Germany could be prosecuted under §§ 793(b), 794(a) and 794(c) for having (1) unlawfully sought and obtained information regarding the U.S. national defense, (2) delivered that information to his own government, and (3) conspired to do so with the intent that the information be used to the injury of the United States or to the advantage of the German Democratic Republic, all of which offenses were committed within East Germany or in Mexico. The court rejected the defendant's contention that construing the act to cover him would permit the prosecution of noncitizens "who might merely have reviewed defense documents supplied to them by their respective governments."[1465] The court considered the scenario unlikely, stating:

[1462] See United States v. Zehe, 601 F. Supp. 196, 198 (D.C. Mass. 1985)(citing former 18 U.S.C. § 791 repealed by P.L. 87-369, 75 Stat. 795(1961)).

[1463] See 70 AM. JUR. 2D Sedition, Subversive Activities and Treason § 15 (2005). Courts have not been persuaded that the Treason Clause of the Constitution requires the safeguards associated with treason apply also to similar crimes such as espionage or levying war against the United States. See id., United States v. Rosenberg, 195 F.2d 583 (2d. Cir.), cert. denied, 344 U.S. 838 (1952)(espionage); United States v. Rodriguez, 803 F.2d 318 (7th Cir.), cert. denied, 480 U.S. 908 (1986) (levying war).

[1464] Zehe at 198 ("Espionage against the United States, because it is a crime that by definition threatens this country's security, can therefore be punished by Congress even if committed by a noncitizen outside the United States.").

[1465] Id. at 199.

Under the statutorily defined crimes of espionage in §§ 793 and 794, noncitizens would be subject to prosecution only if they actively sought out and obtained or delivered defense information to a foreign government or conspired to do so.[1466]

Under this construction, it is possible that noncitizens involved in publishing materials disclosed to them by another would be subject to prosecution only if it can be demonstrated that they took an active role in obtaining the information. The case was not appealed. The defendant, Dr. Alfred Zehe, pleaded guilty in February, 1985 and was sentenced to eight years in prison, but was traded as part of a "spy swap" with East Germany in June of that year.[1467]

Application of the Espionage Act to persons who do not hold a position of trust with the government, outside of the classic espionage scenario (in which an agent of a foreign government delivers damaging information to such hostile government), has been controversial. The only known case of that type involved two pro-Israel lobbyists in Washington, Steven J. Rosen and Keith Weissman, associated with the American Israel Public Affairs Committee (AIPAC), who were indicted in 2005 for conspiracy to disclose national security secrets to unauthorized individuals, including Israeli officials, other AIPAC personnel, and a reporter for the Washington Post.[1468] Their part in the conspiracy amounted to receiving information from government employees with knowledge that the employees were not authorized to disclose it.[1469] The prosecution was criticized for effectively "criminalizing the exchange of information,"[1470] based in part on the government's theory that the defendants were guilty of solicitation of classified information because they inquired into matters they knew their government informant was not permitted to discuss, something that many journalists consider to be an ordinary part of their job.[1471] Charges were

[1469] See William E. Lee, Deep Background: Journalists, Sources, and the Perils of Leaking, 57 AM. U. L. REV. 1453, 1519 (2007) (opining that "the conspiracy charge especially threatens reporter-source transactions where the reporter promises not to disclose the identity of the source").

[1470] Time to Call It Quits, WASH. POST, March 11, 2009 (editorial urging Attorney General to drop charges).

[1471] See William E. Lee, Probing Secrets: The Press and Inchoate Liability for Newsgathering Crimes, 36 AM. J. CRIM. L. 129, 132-34 (2009). The solicitation theory relied on a 2008 Supreme Court case finding that solicitation of an illegal transaction is not speech deserving of First

eventually dropped, reportedly due to a judge's ruling regarding the government's burden of proving the requisite intent and concerns that classified information would have to be disclosed at trial.[1472]

Extradition Issues[1473]

Assuming that the Espionage Act does apply to foreign nationals for their conduct overseas, there may be several legal obstacles to the extradition of such a suspect to the United States to face charges under the statute, including the possibility that the crime constitutes a political offense for which extradition is unavailable. Extradition to or from the United States is almost exclusively a creature of treaty. The United States has extradition treaties with more than 100 countries, although there are many countries with which it does not.[1474] In addition to providing an explicit list of crimes for which extradition may be granted, most modern extradition treaties also identify various classes of offenses and situations for which extradition may or must be denied.

The "political offense" exception has been a common feature of extradition treaties for almost a century and a half, and the exception appears to be contained in every modern U.S. extradition treaty.[1475] A political offense may be

---

Amendment protection. United States v. Williams, 553 U.S. 285 (2008). See id. at 133 (citing Brief of the United States at 43-44, United States v. Rosen, 557 F.3d 192 (4th Cir. 2008) (No. 08-4358)). Williams had to do with solicitation of child pornography, but Justice Scalia posed as a rhetorical question whether Congress could criminalize solicitation of information thought to be covered by the Espionage Act: Is Congress prohibited from punishing those who attempt to acquire what they believe to be national-security documents, but which are actually fakes? To ask is to answer. Williams at 304.

[1472] See Markon, supra footnote 52 (quoting Dana J. Boente, the acting U.S. attorney in Alexandria, VA, where the trial was scheduled to take place). The judge found the scienter requirement of 18 U.S.C. § 793 to require that the defendants must have reason to believe the communication of the information at issue "could be used to the injury of the United States or to the advantage of any foreign nation." 445 F. Supp. 2d at 639. Moreover, the judge limited the definition of "information related to the national defense" to information that is "potentially damaging to the United States or ... useful to an enemy of the United States." Id. (citing United States v. Morison, 844 F.2d 1057, 1084 (4th Cir. 1988) (Wilkinson, J., concurring)).

[1473] This section is contributed by Michael John Garcia, Legislative Attorney.

[1474] A current list of countries with which the United States has an extradition treaty is found in CRS Report 98-958, Extradition To and From the United States: Overview of the Law and Recent Treaties, by Michael John Garcia and Charles Doyle, at Appendix A.

[1475] See, e.g., Australian Extradition Treaty, art. VII(1), entered into force May 8, 1976, 27 U.S.T. 957 ("Extradition shall not be granted ... when the offense in respect of which extradition is requested is of a political character, or the person whose extradition is requested proves that the extradition request has been made for the purpose of trying or punishing him for an offense of a political character."); Norwegian Extradition Treaty, entered into force Mar. 7, 1980, 31 U.S.T. 5619 (similar); United Kingdom Extradition Treaty, art. 4, entered into force Apr. 26, 2007, S. TREATY DOC. 108-23 ("Extradition shall not be granted if the offense for which extradition is

characterized as a pure political offense, or one that is directed singularly at a sovereign entity and does not have the features an ordinary crime (e.g., there is no violation of the private rights of individuals),[1476] or as a relative political offense, meaning an "otherwise common crime[] committed in connection with a political act ... or common crimes ... committed for political motives or in a political context."[1477]

The political offense exception may pose a significant obstacle to the extradition of a foreign national to the United States to face charges under the Espionage Act. Espionage, along with treason and sedition, has been recognized as a quintessential example of a purely political offense,[1478] although this recognition may arguably apply only to the "classic case" of espionage on behalf of a foreign government by one who owes allegiance to the aggrieved government.[1479] Even if the political offense exception applies to the unauthorized disclosure of national defense information, however, the United States could still seek the extradition of a suspect to face other criminal charges (though it would likely be unable to try the fugitive for an offense other than the one for which he was extradited),[1480]

---

requested is a political offense."); ."); Swedish Extradition Treaty, art. 5, entered into force Dec. 3, 1963, 14 U.S.T. 1845 ("Extradition shall not be granted....[i]f the offense is regarded by the requested State as a political offense or as an offense connected with a political offense.").

[1476] Quinn v. Robinson, 783 F.2d 776, 791 (9th Cir. 1986). See also M. CHERIF BASSIOUNI, INTERNATIONAL EXTRADITION: UNITED STATES LAW AND PRACTICE (BASSIOUNI) 604 (5th ed. 2007).604; Charles Cantrell, The Political Offense Exception to Extradition: A Comparison of the United States, Great Britain and the Republic of Ireland, 60 MARQ. L. REV. 777, 780 (1977).

[1477] Quinn, 783 F.2d at 791 (internal citations omitted).

[1478] See, e.g., Quinn, 783 F.2d at 791 (citing treason, sedition, and espionage as examples of purely political offenses); BASSIOUNI, supra footnote 60, at 604.

[1479] It might be argued that certain offenses punishable under the Espionage Act do not fall under the traditional conception of "espionage," and should therefore not be deemed to be pure political offenses per se. See generally PIETRO VERRI, DICTIONARY OF THE INTERNATIONAL LAW OF ARMED CONFLICT 47 (1992) (espionage is "commonly applied to the efforts made in territory under enemy control by a party to the conflict to collect all information on the enemy that may be useful to the conduct of the war in general and to that of hostilities in particular....The word espionage is also applied to the collection by States, in peacetime as well as in time of war, of political and military information regarding each other."); Lt. Col. Geoffrey B. Demarest, Espionage in International Law, 24 DENV. J. INT'L L. & POL'Y 321, 324 (1996) ("Throughout history, the terms 'espionage' and 'spying' have carried varying amounts of pejorative baggage. Therefore, any attempt at a precise definition is difficult."). Nonetheless, such an offense might still be deemed to be sufficiently related to political action or informed by political motivations so as to fall under the political offense exception.

[1480] Under the doctrine of specialty, sometimes called speciality, "a person who has been brought within the jurisdiction of the court by virtue of proceedings under an extradition treaty, can only be tried for one of the offences described in that treaty, and for the offence with which he is charged in the proceedings for his extradition, until a reasonable time and opportunity have been

although extradition might be refused if the charged conduct is deemed to have been committed in furtherance of an act of espionage (or other political offense).[1481]

Extradition is also generally limited to crimes identified in the relevant treaty. Early extradition treaties concluded by the United States typically listed specific crimes constituting extraditable offenses. More recent agreements often adopt a dual criminality approach, in which extradition is available when each party recognizes a particular form of misconduct as a punishable offense (subject to other limitations found elsewhere in the applicable extradition treaty).[1482] No U.S. extradition treaty currently in force lists espionage as an extraditable offense.[1483] Assuming for the sake of argument that certain espionage offenses are not per se political offenses for which extradition may not be granted, it would appear that the United States could only seek the extradition of a foreign national for an espionage offense if the applicable treaty authorized extradition in cases of dual criminality, and the requested state recognized espionage (or perhaps unauthorized receipt or disclosure of protected government information) as a criminal offense under its domestic laws.

Whether extradition is available for an offense occurring outside the United States may depend in part upon whether the applicable treaty covers extraterritorial offenses. As a general rule, crimes are defined by the laws of the place where they are committed.[1484] Nations have always been understood to have authority to outlaw and punish conduct occurring outside the confines of

---

given him after his release or trial upon such charge, to return to the country from whose asylum he had been forcibly taken under those proceedings." United States v. Alvarez-Machain, 504 U.S. 655, 661 (1992) (quoting United States v. Rauscher, 119 U.S. 407, 430 (1886)). This limitation is expressly included in many treaties.

[1481] 18 U.S.C. § 641

[1482] E.g., Extradition Agreement with the European Union, art. 4(1), entered into force Feb. 1, 2010, S. TREATY DOC. 109-14 (applying in place of any provision in an earlier extradition agreement between the United States and an EU Member State which only authorized extradition only an exclusive list of offenses, and instead providing that "An offense shall be an extraditable offense if it is punishable under the laws of the requesting and requested States by deprivation of liberty for a maximum period of more than one year or by a more severe penalty"); Protocol to Australian Extradition Treaty, entered into force Dec. 21, 1992, art. 1, S. TREATY DOC. 102-23 (replacing provision of earlier extradition agreement listing specific offenses where extradition was available with a provision requiring dual criminality).

[1483] It should be noted, however, that extradition treaties may cover certain offenses that can constitute elements of the crime of espionage (e.g., knowingly receiving or fraudulently obtaining property). See, e.g., Extradition Treaty with Belize, appendix listing extraditable offenses, entered into force March 27, 2001, S. TREATY DOC. 106-38,

[1484] See CRS Report 94-166, Extraterritorial Application of American Criminal Law, by Charles Doyle.

their own territory under some circumstances, but the United States now claims more sweeping extraterritorial application for some of its criminal laws than is recognized either in its more historic treaties or by many of today's governments.[1485] This may complicate any extradition efforts because many U.S. extradition treaties apply only to crimes "committed within the [territorial] jurisdiction" of the country seeking extradition.[1486] Some contemporary treaties call for extradition regardless of where the offense was committed, while perhaps an equal number permit or require denial of an extradition request that falls within an area where the countries hold conflicting views on extraterritorial jurisdiction.[1487]

The extradition of a foreign national to the United States to face criminal charges may be impeded by nationality provisions contained in extradition treaties with many countries, which recognize the right of a requested party to refuse to extradite its own nationals. U.S. extradition agreements generally are either silent with respect to nationality, in which case all persons are subject to extradition without regard to their nationality, or they contain a nationality clause that specifies that parties are not bound to deliver up their own nationals, in some cases leaving room for executive discretion.[1488] Some newer treaties declare that "extradition shall not be refused based on the nationality of the person sought," while others limit the nationality exemption to nonviolent crimes or bar nationality from serving as the basis to deny extradition when the fugitive is sought in connection with a listed offense.

The ability of the United States to obtain the extradition of a foreign national for a criminal offense may also be impacted by the existence of competing extradition requests made by other States. The criteria used by a requested State to determine the precedence given to competing extradition requests may be established either by its domestic laws or via its extradition treaties with the requesting countries.[1489] If the requested State opts to give priority to the

[1489] Extradition Agreement with the European Union, art. 10, entered into force Feb. 1, 2010, S. TREATY DOC. 109-14 (describing factors to be considered by requested State when considering

extradition request of another country, it might still be possible for the United States to obtain the extradition of the fugitive at a later date. Whether a fugitive extradited to one State can thereafter be extradited to a third country may depend upon the applicable treaties between the relevant States. Some extradition agreements authorize the requesting State to re-extradite a person to a third country in certain circumstances. Generally, re-extradition is only permitted when the State from whom extradition was initially obtained consents to the re-extradition of the fugitive, or the fugitive voluntarily remains in the State where he was initially extradited for a specified period after having been released from custody.[1490]

Constitutional Issues

The publication of information pertaining to the national defense or foreign policy may serve the public interest by providing citizens with information necessary to shed light on the workings of government, but it seems widely accepted that the public release of at least some of such information poses a significant enough threat to the security of the nation that the public interest is better served by keeping it secret. The Constitution protects the public right to access government information and to express opinions regarding the functioning of the government, among other things, but it also charges the government with "providing for the common defense." Policymakers are faced with the task of balancing these interests.

The First Amendment to the U.S. Constitution provides: "Congress shall make no law ... abridging the freedom of speech, or of the press...."[1491] Despite this absolute language, the Supreme Court has held that "[t]he Government may ... regulate the content of constitutionally protected speech in order to promote a

competing extradition requests from the United States or other EU Member States); Bolivian Extradition Treaty, art. X, entered into force Nov. 21, 1996, S. TREATY DOC. 104-22.

[1490] See, e.g., Swedish Extradition Treaty, art. IX, entered into force Dec. 3, 1963, 14 U.S.T. 1845 ("A person extradited by virtue of this Convention may not be tried or punished by the requesting State for any offense committed prior to his extradition, other than that which gave rise to the request, nor may he be re-extradited by the requesting State to a third country which claims him, unless the surrendering State so agrees or unless the person extradited, having been set at liberty within the requesting State, remains voluntarily in the requesting State for more than 45 days from the date on which he was released. Upon such release, he shall be informed of the consequences to which his stay in the territory of the requesting State might subject him."); Turkish Extradition Treaty, art. 17, entered into force Jan. 1, 1987, 32 UST 2111 (similar). See also Council of Europe, Convention on Extradition, art. 15, done Dec. 13, 1957 (providing similar requirements for re-extradition among member States of the Council of Europe), available at http://conventions.coe.int/ Treaty/EN/Treaties/Html/024.htm.

[1491] For an analysis of exceptions to the First Amendment, see CRS Report 95-815, Freedom of Speech and Press: Exceptions to the First Amendment, by Kathleen Ann Ruane.

compelling interest if it chooses the least restrictive means to further the articulated interest."[1492]

Where speech is restricted based on its content, the Supreme Court generally applies "strict scrutiny," which means that it will uphold a content-based restriction only if it is necessary "to promote a compelling interest," and is "the least restrictive means to further the articulated interest."[1493] Protection of the national security from external threat is without doubt a compelling government interest.[1494] It has long been accepted that the government has a compelling need to suppress certain types of speech, particularly during time of war or heightened risk of hostilities.[1495] Speech likely to incite immediate violence, for example, may be suppressed.[1496] Speech that would give military advantage to a foreign enemy is also susceptible to government regulation.[1497]

Where First Amendment rights are implicated, it is the government's burden to show that its interest is sufficiently compelling to justify enforcement. Whether the government has a compelling need to punish disclosures of classified information turns on whether the disclosure has the potential of causing damage to the national defense or foreign relations of the United States.[1498] Actual damage need not be proved, but potential damage must be more than merely speculative and incidental.[1499] On the other hand, the Court has stated that "state

[1497] Near v. Minnesota, 283 U.S. 697, 716 (1931) ("No one would question but that a government might prevent actual obstruction to its recruiting service or the publication of the sailing dates of transports or the number and location of troops.").

[1498] "National Security" is defined as national defense and foreign relations. See Exec. Order No. 13526, 75 Fed. Reg. 707 § 6.1(cc) (Jan. 5, 2010).

[1499] See, e.g., New York Times Co. v. United States, 403 U.S. 713, 725 (1971) (Brennan, J., concurring) (rejecting as insufficient government's assertions that publication of Pentagon Papers "could," "might," or "may" prejudice the national interest); Elrod v. Burns, 427 U.S. 347, 362 (1976) ("The interest advanced must be paramount, one of vital importance, and the burden is on the government to show the existence of such an interest.") (citing Buckley v. Valeo, 424 U.S. 1, 94(1976); Williams v. Rhodes, 393 U.S. 23, 31-33 (1968); NAACP v. Button, 371 U.S. 38, 45

action to punish the publication of truthful information seldom can satisfy constitutional standards."[1500] And it has described the constitutional purpose behind the guarantee of press freedom as the protection of "the free discussion of governmental affairs."[1501]

Although information properly classified in accordance with statute or executive order carries by definition, if disclosed to a person not authorized to receive it, the potential of causing at least identifiable harm to the national security of the United States,[1502] it does not necessarily follow that government classification by itself will be dispositive of the issue in the context of a criminal trial. However, courts have adopted as an element of the espionage statutes a requirement that the information at issue must be "closely held."[1503] Government classification will

---

(1963); Bates v. Little Rock, 361 U.S. 516, 524 (1960); NAACP v. Alabama, 357 U.S. 449, 464-466 (1958); Thomas v. Collins, 323 U.S. 516, 530 (1945)).

[1500] Bartnicki v. Vopper, 532 U.S. 514, 527 (2001) (citing Smith v. Daily Mail Publishing Co., 443 U.S. 97 (1979)).

[1501] Mills v. Alabama, 384 U.S. 214, 218 (1966). Because of the First Amendment purpose to protect the public's ability to discuss governmental affairs along with court decisions denying that it provides any special rights to journalists, e.g., Branzburg v. Hayes, 408 U.S. 665 (1972), it is not likely a plausible argument to posit that it does not apply to the foreign press. See United States v. 18 Packages of Magazines 238 F. Supp. 846, 847-848 (D.C. Cal. 1964) ("Even if it be conceded, arguendo, that the 'foreign press' is not a direct beneficiary of the Amendment, the concession gains nought for the Government in this case. The First Amendment does protect the public of this country. ... The First Amendment surely was designed to protect the rights of readers and distributors of publications no less than those of writers or printers. Indeed, the essence of the First Amendment right to freedom of the press is not so much the right to print as it is the right to read. The rights of readers are not to be curtailed because of the geographical origin of printed materials."). Likewise, the fact that WikiLeaks is not a typical newsgathering and publishing organization would likely make little difference under First Amendment analysis. The Supreme Court has not established clear boundaries between the protection of speech and that of the press, nor has it sought to develop criteria for identifying what constitutes "the press" that might qualify its members for privileges not available to anyone else. See generally CONGRESSIONAL RESEARCH SERVICE, THE CONSTITUTION OF THE UNITED STATES: ANALYSIS AND INTERPRETATION, SEN. DOC. NO. 108-17, at 1083-86 (2002), available at http://crs.gov/conan/default.aspx?mode=topic&doc= Amendment01.xml&t=2|3.

[1502] Exec. Order No. 13526, 75 Fed. Reg. 707 § 1.2 (Jan. 5, 2010) ("Classified National Security Information"). Sec. 1.3 defines three levels of classification: (1) "Top Secret" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause exceptionally grave damage to the national security that the original classification authority is able to identify or describe. (2) "Secret" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause serious damage to the national security that the original classification authority is able to identify or describe. (3) "Confidential" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause damage to the national security that the original classification authority is able to identify or describe.

[1503] United States v. Heine, 151 F.2d 813 (2d Cir.1945) (information must be "closely held" to be considered "related to the national defense" within the meaning of the espionage statutes).

likely serve as strong evidence to support that contention, even if the information seems relatively innocuous or does not contain much that is not already publicly known.[1504] Typically, courts have been unwilling to review decisions of the executive related to national security, or have made a strong presumption that the material at issue is potentially damaging.[1505] Still, judges have recognized that the government must make some showing that the release of specific national defense information has the potential of harming U.S. interests, lest the Espionage Act become a means to punish whistle-blowers who reveal information that poses more of a danger of embarrassing public officials than of endangering national security.[1506]

The Supreme Court seems satisfied that national security is a vital interest sufficient to justify some intrusion into activities that would otherwise be protected by the First Amendment—at least with respect to federal employees. Although the Court has not held that government classification of material is sufficient to show that its release is damaging to the national security,[1507] it has seemed to accept without much discussion the government's assertion that the material in question is damaging. It is unlikely that a defendant's bare assertion that information poses no danger to U.S. national security will be persuasive without some convincing evidence to that effect, or proof that the information is not closely guarded by the government.[1508]

A challenge to the Espionage Act has reached the Supreme Court for decision in only one instance. In Gorin v. United States,[1509] the Court upheld portions of the

---

[1504] See, e.g., United States v. Abu-Jihaad 600 F.Supp.2d 362, 385 -386 (D. Conn. 2009) (although completely inaccurate information might not be covered, information related to the scheduled movements of naval vessels was sufficient to bring materials within the ambit of national defense information).

[1505] See, e.g., Haig v. Agee, 453 U.S. 280, 291 (1981) ("Matters intimately related to foreign policy and national security are rarely proper subjects for judicial intervention.").

[1506] See, e.g., United States v. Morison, , 844 F.2d 1057, 1086 (4th Cir. 1988) (Phillips, J., concurring) ("... I assume we reaffirm today, that notwithstanding information may have been classified, the government must still be required to prove that it was in fact 'potentially damaging ... or useful,' i.e., that the fact of classification is merely probative, not conclusive, on that issue, though it must be conclusive on the question of authority to possess or receive the information. This must be so to avoid converting the Espionage Act into the simple Government Secrets Act which Congress has refused to enact.") (emphasis in original).

[1507] See, e.g., Scarbeck v. United States, 317 F.2d 546 (D.C. Cir. 1962) (holding government did not have to show documents were properly classified "as affecting the national defense" to convict employee under 50 U.S.C. § 783, which prohibits government employees from transmitting classified documents to foreign agents or entities).

[1508] See United States v. Dedeyan, 594 F.2d 36, 39 (4th Cir. 1978).

[1509] 312 U.S. 19 (1941).

act now codified as 18 U.S.C. §§ 793 and 794 against assertions of vagueness, but only because jury instructions properly established the elements of the crimes, including the scienter requirement (proof of "guilty knowledge") and a definition of "national defense" that includes potential damage in case of unauthorized release of protected information and materials. Gorin was a "classic case" of espionage, and did not involve a challenge based on the First Amendment right to free speech. The Court agreed with the government that the term "national defense" was not vague; it was satisfied that the term describes "a generic concept of broad connotations, referring to the military and naval establishments and the related activities of national preparedness."[1510] Whether information was "related to the national defense" was a question for the jury to decide,[1511] based on its determination that the information "may relate or pertain to the usefulness, efficiency or availability of any of the above places, instrumentalities or things for the defense of the United States of America. The connection must not be a strained one nor an arbitrary one. The relationship must be reasonable and direct."[1512] As long as the jury was properly instructed that only information likely to cause damage meets the definition of information "related to the national defense" for the purpose of the statute, the term was not unconstitutionally vague.

United States v. Morison[1513] is significant in that it represents the first case in which a person was convicted for selling classified documents to the media.[1514] Samuel Loring Morison, charged with providing classified satellite photographs to the British defense periodical Jane's Defence Weekly, argued that the espionage statutes did not apply to his conduct because he could not have had the requisite intent to commit espionage. The Fourth Circuit rejected his appeal, finding the intent to sell photographs that he clearly knew to be classified sufficient to satisfy the scienter requirement under 18 U.S.C. § 793(d) (disclosure by lawful possessor of defense information to one not entitled to receive it). The definition of "relating to the national defense" was not overbroad because the jury had been instructed that the government had the burden of showing that the

[1514] Efforts to prosecute Daniel Ellsberg and Anthony Russo in connection with the disclosure of the Pentagon Papers were unsuccessful after the judge dismissed them for prosecutorial misconduct. More recently, a Defense Department employee pleaded guilty to charges under the Espionage Act for disclosing classified material to lobbyists and to journalists. United States v. Franklin, Cr. No. 05-225 (E.D. Va., 2005). For a description of these and other relevant cases, see Lee, supra footnote 53.

information was so related.[1515] His assertedly laudable motive in permitting publication of the photographs did not negate the element of intent.[1516]

The fact that the Morison prosecution involved a leak to the media with no obvious intent to transmit sensitive information to hostile intelligence services did not persuade the jury or the judges involved that he lacked culpability, but the Justice Department did come under some criticism on the basis that such prosecutions are so rare as to amount to a selective prosecution in his case, and that it raised concerns about the chilling effect such prosecutions could have on would-be whistle-blowers who could provide information embarrassing to the government but vital to public discourse.[1517] On leaving office, President Clinton pardoned Morison.[1518]

As far as the possible prosecution of the publisher of information leaked by a government employee is concerned, the most relevant case is likely to be the Pentagon Papers case.[1519] To be sure, the case involved an injunction against publication rather than a prosecution for having published information, but the rationale for protecting such disclosure may nevertheless inform any decision involving a conviction. In a per curiam opinion accompanied by nine concurring or dissenting opinions, the U.S. Supreme Court refused to grant the government's request for an injunction to prevent the New York Times and the Washington Post from printing a classified study of the U.S. involvement in Vietnam. The Court explained:

> *prior restraints are the most serious and least tolerable infringement on First Amendment rights.... A prior restraint, ... by*

> *definition, has an immediate and irreversible sanction. If it can be said that a threat of criminal or civil sanctions after publication "chills" speech, prior restraint "freezes" it at least for the time. The damage can be particularly great when the prior restraint falls upon the communication of news and commentary on current events.*[1520]

A majority of the justices suggested in separate dicta that the newspapers—along with the former government employee who leaked the documents to the press—could be prosecuted under the Espionage Act.[1521] Still, in later cases the Court stressed that any prosecution of a publisher for what has already been printed would have to overcome only slightly less insurmountable hurdles.[1522] Moreover, if national security interests were not sufficient to outweigh the First Amendment principles implicated in the prior restraint of pure speech related to the public interest, as in the Pentagon Papers case,[1523] it is difficult to discern an obvious rationale for finding that punishing that same speech after it has already been disseminated nevertheless tilts the balance in favor of the government's interest in protecting sensitive information.

The publication of truthful information that is lawfully acquired enjoys considerable First Amendment protection.[1524] The Court has not resolved the question "whether, in cases where information has been acquired unlawfully by a newspaper or by a source, government may ever punish not only the unlawful

---

[1520] Nebraska Press Association v. Stuart, 427 U.S. 539, 559 (1976) (striking down a court order restraining the publication or broadcast of accounts of confessions or admissions made by the defendant at a criminal trial).

[1521] 403 U.S. at 734-40 (White, J. with Stewart, J. concurring); id. at 745-47 (Marshall, J., concurring); id. at 752 (Burger, C.J., dissenting); id. at 752-59 (Harlan, J., joined by Burger, C.J. and Blackmun, J., dissenting). See David Topol, Note, United States v. Morison: A Threat to the First Amendment Right to Publish Security Information, 43 S.C. L. REV. 581, 586 (noting that three concurring justices suggested that the government could convict the newspapers under the Espionage Act even though it could not enjoin them from printing the documents, while the three dissenting justices thought the injunction should issue).

[1522] Smith v. Daily Mail Publishing Co., 443 U.S. 97, 102-03 (1979) ("Whether we view the statute as a prior restraint or as a penal sanction for publishing lawfully obtained, truthful in-formation is not dispositive because even the latter action requires the highest form of state interest to sustain its validity.") The case involved the prosecution of a newspaper for publishing the name of a juvenile defendant without court permission, in violation of state law.

[1523] For a list of the types of damage the government argued would ensue if its efforts to enjoin publication failed, see William H. Freivogel, Publishing National Security Secrets: The Case for "Benign Indeterminacy," 3 J. NAT'L SECURITY L. & POL'Y 95, 112-13 (2009).

[1524] See, e.g., Landmark Commc'ns. v. Virginia, 435 U.S. 829, 837 (1978).

acquisition, but the ensuing publication as well."[1525] (The Pentagon Papers Court did not consider whether the newspapers' receipt of the classified document was in itself unlawful, although it appeared to accept that the documents had been unlawfully taken from the government by their source).

The Court has established that "routine newsgathering" is presumptively lawful acquisition, the fruits of which may be published without fear of government retribution.[1526] However, what constitutes "routine newsgathering" has not been further elucidated. In the 2001 case Bartnicki v. Vopper, the Court cited the Pentagon Papers case to hold that media organizations cannot be punished (albeit in the context of civil damages) for divulging information on the basis that it had been obtained unlawfully by a third party.[1527] The holding suggests that recipients of unlawfully disclosed information cannot be considered to have obtained such material unlawfully based solely on their knowledge (or "reason to know") that the discloser acted unlawfully. Under such circumstances, disclosure of the information by the innocent recipient would be covered by the First Amendment, although a wrongful disclosure by a person in violation of an obligation of trust would receive no First Amendment protection, regardless of whether the information was obtained lawfully.[1528]

Bartnicki had to do with the disclosure of illegally intercepted communications in violation of federal and state wiretap laws, which prohibited disclosure of such information by anyone who knew or had reason to know that it was the product of an unlawful interception, but did not prohibit the receipt of such information. The Espionage Act, by contrast, does expressly prohibit the receipt of any national defense material with knowledge or reason to believe that it "is to be used to the injury of the United States, or to the advantage of any foreign nation" and that it was disclosed contrary to the provisions of the Espionage Act.[1529] This distinction could possibly affect whether a court would view the information as having been lawfully acquired; although the Bartnicki opinion seems to establish that knowledge that the information was unlawfully disclosed by the initial leaker cannot by itself make receipt or subsequent publication unlawful, it does not

directly address whether knowledge of the nature of the information received would bring about a different result.

Proposed Legislation

To date, one bill has been introduced to address disclosures of classified information of the type at issue in the WikiLeaks publications. The Securing Human Intelligence and Enforcing Lawful Dissemination Act' ("SHIELD Act"), S. 4004, introduced by Senator Ensign on December 2, 2010, would amend 18 U.S.C. § 798 to add coverage for disclosures of classified information related to human intelligence activities (the provision currently covers only certain information related to communications intelligence). The bill would add "transnational threat" to the entities whose benefit from unlawful disclosures would make such disclosure illegal. The statute as written prohibits disclosure of classified information for the benefit of any foreign government (or to the detriment of the United States, which would remain unchanged if the bill is enacted). A "transnational threat" for purposes of the bill means any "any transnational activity (including international terrorism, narcotics trafficking, the proliferation of weapons of mass destruction and the delivery systems for such weapons, and organized crime) that threatens the national security of the United States" or any person or group who engages in any of these activities. This change is likely intended to ensure that disclosures of any covered information that a violator "publishes, or uses in any manner … for the benefit" of Al Qaeda or any other terrorist group, international drug cartels, arms dealers who traffic in weapons of mass destruction, and other international criminals will be subject to prosecution, regardless of whether the group purports to govern any territory. As is currently the case, it is unclear whether this conduct must be undertaken "knowingly and willfully" to incur a punishment, or whether those qualifiers apply only to furnishing covered information to an unauthorized individual.

The bill would add two types of information to be covered by the prohibition: "information concerning the human intelligence activities of the United States or any foreign government"; and "information concerning the identity of a classified source or informant of an element of the intelligence community of the United States." "Human intelligence" is defined under the bill as "all procedures, sources, and methods employed in the collection of intelligence through human sources." "Classified information" would continue to be defined as "information which, at the time of a violation of this section, is, for reasons of national security, specifically designated by a United States Government Agency for limited or restricted dissemination or distribution." In other words, the information need not be classified information within the meaning of the executive order, so long as it has been specifically designated as subject to some form of restricted dissemination due to national security concerns. Because the concept of national security includes foreign affairs as well as national defense, the information covered may be broader than that already protected under the preceding sections of the Espionage Act. However, the limitation on the identity of informants and sources to those giving information to an element of the intelligence community

may be interpreted to exclude informants and sources who provide information to entities not listed in 50 U.S.C. § 401a(4), such as infantry units or consular offices.

Conclusion

The Espionage Act on its face applies to the receipt and unauthorized dissemination of national defense information, which has been interpreted broadly to cover closely held government materials related to U.S. military operations, facilities, and personnel. It has been interpreted to cover the activities of foreign nationals overseas, at least when they take an active part in seeking out information. Although cases involving disclosures of classified information to the press have been rare, it seems clear that courts have regarded such disclosures by government employees to be conduct that enjoys no First Amendment protection, regardless of the motives of the divulger or the value the release of such information might impart to public discourse.[1530] The Supreme Court has stated, however, that the question remains open whether the publication of unlawfully obtained information by the media can be punished consistent with the First Amendment. Thus, although unlawful acquisition of information might be subject to criminal prosecution with few First Amendment implications, the publication of that information remains protected. Whether the publication of national security information can be punished likely turns on the value of the information to the public weighed against the likelihood of identifiable harm to the national security, arguably a more difficult case for prosecutors to make.

[1530] The courts have permitted government agencies to enjoin their employees and former employees from publishing information they learned on the job, United States v. Marchetti, 466 F.2d 1309 (4th Cir.), cert. denied, 409 U.S. 1063 (1972), and permitted harsh sanctions against employees who publish even unclassified information in violation of an obligation to obtain pre-publication clearance, Snepp v. United States, 444 U.S. 507 (1980).

Protection of National Security Information Generally

Summary

Recent incidents involving "leaks" of classified information have heightened interest in the legal framework that governs security classification, access to classified information, and penalties for improper disclosure. Classification authority has generally rested with the executive branch, although Congress has enacted legislation regarding the protection of certain sensitive information. While the Supreme Court has stated that the President has inherent constitutional authority to control access to sensitive information relating to the national defense or to foreign affairs, no court has found that Congress is without authority to legislate in this area. This report provides an overview of the relationship between executive and legislative authority over national security information, and summarizes the current laws and regulations that form the legal framework protecting classified information.

Background

Prior to the New Deal, classification decisions were left to military regulation.[1531] In 1940, President Franklin Roosevelt issued an executive order authorizing government officials to protect information pertaining to military and naval installations.[1532] Presidents since that time have continued to set the federal

---

[1532] Exec. Order No. 8,381 (1940).

government's classification standards by executive order, but with one critical difference: while President Roosevelt cited specific statutory authority for his action, later presidents have cited general statutory and constitutional authority.[1533]

The Supreme Court has never directly addressed the extent to which Congress may constrain the executive branch's power in this area. Citing the President's constitutional role as Commander-in-Chief,[1534] the Supreme Court has repeatedly stated in dicta that "[the President's] authority to classify and control access to information bearing on national security ... flows primarily from this Constitutional investment of power in the President and exists quite apart from any explicit congressional grant."[1535] This language has been interpreted by some to indicate that the President has virtually plenary authority to control classified information. On the other hand, the Supreme Court has suggested that "Congress could certainly [provide] that the Executive Branch adopt new [classification procedures] or [establish] its own procedures — subject only to whatever limitations the Executive Privilege may be held to impose on such congressional ordering."[1536] In fact, Congress established a separate regime in the Atomic Energy Act for the protection of nuclear-related "Restricted Data."[1537]

Congress has directed the President to establish procedures governing the access to classified material so that no person can gain such access without having

[1535] Department of the Navy v. Egan, 484 U.S. 518, 527 (1988) (quoting Cafeteria Workers v. McElroy, 367 U.S. 886, 890 (1961). In addition, courts have also been wary to second-guess the executive branch in areas of national security. See, e.g., Haig v. Agee, 453 U.S. 280, 291 (1981) ("Matters intimately related to foreign policy and national security are rarely proper subjects for judicial intervention."). The Court has suggested, however, that it might intervene where Congress has provided contravening legislation. Egan at 530 ("Thus, unless Congress specifically has provided otherwise, courts traditionally have been reluctant to intrude upon the authority of the Executive in military and national security affairs.")(emphasis added).

[1536] EPA v. Mink, 410 U.S. 73, 83 (1973).

[1537] 42 U.S.C. § 2011 et seq. In addition, the Invention Secrecy Act (codified at 35 U.S.C. § 181 et seq.) authorizes the Commissioner of Patents to keep secret those patents on inventions in which the government has an ownership interest and the widespread knowledge of which would, in the opinion of the interested agency, harm national security. For a more detailed discussion of these and other regulatory regimes for the protection of sensitive government information, see CRS Report RL33502, Protection of National Security Information, by Jennifer K. Elsea; CRS Report RL33303: 'Sensitive But Unclassified' Information and Other Controls: Policy and Options for Scientific and Technical Information, by Genevieve J. Knezo.

undergone a background check.[1538] Congress also directed the President, in formulating the classification procedures, to adhere to certain minimum standards of due process with regard to access to classified information.[1539] These include the establishment of uniform procedures for, inter alia, background checks, denial of access to classified information, and notice of such denial.[1540] The statute also explicitly states that the agency heads are not required to comply with the due process requirement in denying or revoking an employee's security clearance where doing so could damage national security, although the statute directs agency heads to submit a report to the congressional intelligence committees in such a case.[1541]

With the authority to determine classification standards vested in the President, these standards tend to change whenever a new administration takes control of the White House.[1542] The differences between the standards of one administration and the next have often been dramatic. As one congressionally authorized commission put it in 1997:

> *The rules governing how best to protect the nation's secrets, while still insuring that the American public has access to information on the operations of its government, past and present, have shifted along with the political changes in Washington. Over the last fifty years, with the exception of the Kennedy Administration, a new executive order on classification was issued each time one of the political parties regained control of the Executive Branch. These*

[1538] Counterintelligence and Security Enhancement Act of 1994, Title VIII of P.L. 103-359 (codified at 50 U.S.C. § 435 et seq.). Congress has also required specific regulations regarding personnel \security procedures for employees of the National Security Agency, P.L. 88-290, 78 Stat. 168, codified at 50 U.S.C. §§ 831 -835. Congress has also prohibited the Department of Defense from granting or renewing security clearances for officers, employees, or contract personnel who had been convicted of a crime (and served at least one year prison time) and for certain other reasons, with a waiver possible only in "meritorious cases," P.L. 106-398 § 1, Div. A, Title X, § 1071(a), 114 Stat. 1654, 10 U.S.C. § 986.

[1539] 50 U.S.C. § 435(a).

[1540] Id.

[1541] Id. at § 435(b). The House Conference Report that accompanied this legislation in 1994 suggests that Congress understood that the line defining the boundaries of executive and legislative authority in this area is blurry at best. The conferees made explicit reference to the Egan case, expressing their desire that the legislation not be understood to affect the President's authority with regard to security clearances. See H.R. REP. 103-753, at 54.

[1542] See Report of the Commission on Protecting and Reducing Government Secrecy, S. DOC. NO. 105-2, at 11 (1997).

have often been at variance with one another ... at times even reversing outright the policies of the previous order.[1543]

Various congressional committees have investigated ways to bring some continuity to the classification system and to limit the President's broad powers to shield information from public examination.[1544] In 1966, Congress passed the Freedom of Information Act (FOIA), creating a presumption that government information will be open to the public unless it falls into one of FOIA's exceptions. One exception covers information that, under executive order, must be kept secret for national security or foreign policy reasons.[1545] In 2000, Congress enacted the Public Interest Declassification Act of 2000,[1546] which established the Public Interest Declassification Board to advise the President on matters regarding the declassification of certain information, but the Act expressly disclaims any intent to restrict agency heads from classifying or continuing the classification of information under their purview, nor does it create any rights or remedies that may be enforced in court.[1547]

Executive Order 12,958 (as amended)

The present standards for classifying and declassifying information were last amended in March, 2003.[1548] Under these current standards, the President, Vice President, agency heads, and any other officials designated by the President may classify information upon a determination that the unauthorized disclosure of such information could reasonably be expected to damage national security.[1549] Such information must be owned by, produced by, or under the control of the federal government, and must concern one of the following:

[1543] Id.

[1544] See, e.g., Availability of Information from Federal Departments and Agencies: Hearings Before the House Committee on Government Operations, 85th Cong. (1955).

[1545] 5 U.S.C. § 552(b)(1). The Supreme Court has honored Congress's deference to executive branch determinations in this area. EPA v. Mink, 410 U.S. 73 (1973). Congress, concerned that the executive branch may have declared some documents to be "national security information" that were not vital to national security, added a requirement that such information be "properly classified pursuant to an executive order." 5 U.S.C. § 552(b)(1)(B).

[1546] P.L. 106 — 567, title VII, Dec. 27, 2000, 114 Stat. 2856, 50 U.S.C. § 435 note.

[1547] Id. §§ 705 and 707.

[1548] Exec. Order No. 12,958, as amended by Exec. Order No. 13,292 (2003), 68 F.R. 15,315 (March 28, 2003).

[1549] Exec. Order No. 12,958 (as amended by Exec. Order No. 13,292 (2003)), § 1.1. The unauthorized disclosure of foreign government information is presumed to damage national security. Id. at § 1.1(b).

- military plans, weapons systems, or operations;
- foreign government information;
- intelligence activities, intelligence sources/methods, cryptology;
- scientific, technological, or economic matters relating to national security;
- federal programs for safeguarding nuclear materials or facilities;
- vulnerabilities or capabilities of national security systems; or
- weapons of mass destruction.[1550]

Information is classified at one of three levels based on the amount of danger that its unauthorized disclosure could reasonably be expected to cause to national security.[1551] Information is classified as "Top Secret" if its unauthorized disclosure could reasonably be expected to cause "exceptionally grave damage" to national security. The standard for "Secret" information is "serious damage" to national security, while for "confidential" information the standard is "damage" to national security. Significantly, for each level, the original classifying officer must identify or describe the specific danger potentially presented by the information's disclosure.[1552] The officer who originally classifies the information establishes a date for declassification based upon the expected duration of the information's sensitivity. If the office cannot set an earlier declassification date, then the information must be marked for declassification in 10 years' time or 25 years, depending on the sensitivity of the information.[1553] The deadline for declassification can be extended if the threat to national security still exists.[1554]

Classified information is required to be declassified "as soon as it no longer meets the standards for classification,"[1555] although there is a presumption that classified information continues to meet these standards. The original classifying agency has the authority to declassify information when the public interest in disclosure outweighs the need to protect that information.[1556] On December 31, 2006, and every year thereafter, all information that has been classified for 25

[1550] Id. at § 1.4. In addition, when classified information which is incorporated, paraphrased, restated, or generated in a new form, that new form must be classified at the same level as the original. Id. at §§ 2.1 - 2.2.

[1551] Id. at § 1.2.

[1552] Id. Classifying authorities are specifically prohibited from classifying information for reasons other than protecting national security, such as to conceal violations of law or avoid embarrassment. Id. at § 1.7(a).

years or longer and has been determined to have "permanent historical value" under Title 44 of the U.S. Code will be automatically declassified, although agency heads can exempt from this requirement classified information that continues to be sensitive in a variety of specific areas.[1557]

Agencies are required to review classification determinations upon a request for such a review that specifically identifies the materials so that the agency can locate them.[1558] This requirement does not apply to information that has undergone declassification review in the previous two years; information that is exempted from review under the National Security Act;[1559] or information classified by the incumbent President and staff, the Vice President and staff (in the performance of executive duties), commissions appointed by the President, or other entities within the executive office of the President that advise the President.[1560] Each agency that has classified information is required to establish a system for periodic declassification reviews.[1561] The National Archivist is required to establish a similar systemic review of classified information that has been transferred to the National Archives.[1562]

Access to classified information is generally limited to those who demonstrate their eligibility to the relevant agency head, sign a nondisclosure agreement, and have a need to know the information.[1563] The need-to-know requirement can be waived, however, for former Presidents and Vice Presidents, historical researchers, and former policy-making officials who were appointed by the President or Vice President.[1564] The information being accessed may not be removed from the controlling agency's premises without permission. Each agency is required to establish systems for controlling the distribution of classified information.[1565]

[1557] Id. at § 3.3.

[1558] Id. at § 3.5.

The Information Security Oversight Office (ISOO) — an office within the National Archives — is charged with overseeing compliance with the classification standards and promulgating directives to that end.[1566] ISOO is headed by a Director, who is appointed by the Archivist of the United States, and who has the authority to order declassification of information that, in the Director's view, is classified in violation of the aforementioned classification standards.[1567] In addition, there is an Interagency Security Classifications Appeals Panel ("the Panel"), headed by the ISOO Director and made up of representatives of the heads of various agencies, including the Departments of Defense, Justice, and State, as well as the Central Intelligence Agency, and the National Archives.[1568] The Panel is empowered to decide appeals of classifications challenges[1569] and to review automatic and mandatory declassifications. If the ISOO Director finds a violation of Executive Order 12,958 (as amended) or its implementing directives, then the Director must notify the appropriate classifying agency so that corrective steps can be taken. Officers and employees of the United States (including contractors, licensees, etc.) who commit a violation are subject to sanctions that can range from reprimand to termination.[1570]

Criminal Penalties

Generally, federal law prescribes a prison sentence of no more than a year and/or a $1,000 fine for officers and employees of the federal government who knowingly remove classified material without the authority to do so and with the intention of keeping that material at an unauthorized location.[1571] Stiffer penalties — fines of up to $10,000 and imprisonment for up to 10 years — attach when a federal employee transmits classified information to anyone that the employee has reason to believe is an agent of a foreign government.[1572] A fine and a 10-year prison term also await anyone, government employee or not, who publishes, makes available to an unauthorized person, or otherwise uses to the United States' detriment classified information regarding the codes, cryptography, and

Order Code RL33502

Updated December 26, 2006

Jennifer K. Elsea
Legislative Attorney
American Law Division

Summary

Recent cases involving alleged disclosures of classified information to the news media or others who are not entitled to receive it have renewed Congress's interest with regard to the possible need for legislation to provide for criminal punishment for the "leaks" of classified information. The Espionage Act of 1917 and other statutes and regulations provide a web of authorities for the protection of various types of sensitive information, but some have expressed concern that gaps in these laws may make prosecution of some disclosures impossible. The 106th Congress passed a measure to criminalize leaks, but President Clinton vetoed it. The 108th Congress reconsidered the same provision, but instead passed a requirement for the relevant agencies to review the need for such a proscription. The Department of Justice in turn reported that existing statutes and regulations are sufficient to prosecute disclosures of information that might harm the national security.

This report provides background with respect to previous legislative efforts to criminalize the unauthorized disclosure of classified information; describes the current state of the laws that potentially apply, including criminal and civil penalties that can be imposed on violators; and some of the disciplinary actions and administrative procedures available to the agencies of federal government that have been addressed by federal courts. Finally, the report considers the possible First Amendment implications of applying the Espionage Act to prosecute newspapers for publishing classified national defense information.

Introduction

Continued revelations involving alleged disclosures of classified information to the news media or to others who are not entitled to receive it have renewed

Congress's interest with regard to the possible need for legislation to provide for criminal punishment for the "leaks" of classified information. Opponents of any such legislation express concern regarding the possible consequences to freedom of the press and other First Amendment values. The current laws for protecting classified information have been criticized as a patchwork of sometimes abstruse and antiquated provisions that are not consistent and do not cover all the information the government legitimately needs to protect.[1574] Certain information is protected regardless of whether it belongs to the government or is subject to normal classification. Information related to "the national defense" is protected even though no harm to the national security is intended or is likely to be caused through its disclosure. However, nonmilitary information with the potential to cause serious damage to the national security is only protected from willful disclosure with the requisite intent or knowledge regarding the potential harm. For example, under 50 U.S.C. § 783, the communication of classified information by a government employee is expressly punishable only if the discloser knows or has reason to believe the recipient is an agent or representative of a foreign government, but not, for example, if the recipient is an agent of an international terrorist organization.

To close some perceived gaps, the 106th Congress passed a measure to criminalize all leaks of classified information; however, President Clinton vetoed the measure.[1575] The 108th Congress considered passing an identical provision as

---

[1574] See E.E.B. and K.E.M., Note, *Plugging the Leak: The Case for a Legislative Resolution of the Conflict between the Demands of Secrecy and the Need for Open Government*, 71 VA. L. REV. 801, 811 (1985). With respect to a major component of the legal framework, one district court judge had the following to say:

The conclusion that the statute is constitutionally permissible does not reflect a judgment about whether Congress could strike a more appropriate balance between these competing interests, or whether a more carefully drawn statute could better serve both the national security and the value of public debate. Indeed, the basic terms and structure of this statute have remained largely unchanged since the administration of William Howard Taft. The intervening years have witnessed dramatic changes in the position of the United States in world affairs and the nature of threats to our national security. The increasing importance of the United States in world affairs has caused a significant increase in the size and complexity of the United States' military and foreign policy establishments, and in the importance of our nation's foreign policy decision making. Finally, in the nearly one hundred years since the passage of the Defense Secrets Act mankind has made great technological advances affecting not only the nature and potential devastation of modern warfare, but also the very nature of information and communication. These changes should suggest to even the most casual observer that the time is ripe for Congress to engage in a thorough review and revision of these provisions to ensure that they reflect both these changes, and contemporary views about the appropriate balance between our nation's security and our citizens' ability to engage in public debate about the United States' conduct in the society of nations.

United States v. Rosen, 445 F.Supp.2d 602, 646 (E.D. Va. 2006)(Ellis, J.).

[1575] H.R. 4392 § 304, 106th Congress; See Statement by the President to the House of Representatives, 36 WEEKLY COMP. PRES. DOC. 278 (Nov. 4, 2000).

part of the Intelligence Authorization Act for Fiscal Year 2001,[1576] but instead directed the Attorney General and heads of other departments to undertake a review of the current protections against the unauthorized disclosure of classified information, and to issue a report recommending legislative or administrative actions by May 1, 2002.[1577] In its response to Congress, the Department of Justice concluded that existing statutes and regulations are sufficient to prosecute disclosures of information that might harm the national security.[1578]

This report describes the current state of the law with regard to the unauthorized disclosure of classified information, including criminal and civil penalties that can be imposed on violators, as well as some of the disciplinary actions and administrative procedures available to federal agencies with respect to their employees, as such measures have been addressed by federal courts. The report also describes the background of legislative efforts to amend the laws, including the measure passed in 2000 and President Clinton's stated reasons for vetoing it. Finally, the report considers possible constitutional issues — in particular, issues related to the First Amendment — that may arise if Congress considers new legislation to punish leaks or if the Attorney General seeks to apply current law to punish newspapers that publish leaked classified information.

Background

The classification by government agencies of documents deemed sensitive has evolved from a series of executive orders.[1579] Congress has, for the most part, let the executive branch make decisions regarding the type of information to be subject to protective measures. The current criminal statutory framework providing penalties for the unauthorized disclosure of classified government materials traces its roots to the Espionage Act of 1917,[1580] which made it a crime

[1580] Act of June 15, 1917, ch. 30, title I, §§ 1, 6, 40 Stat. 217, 219, codified as amended at 18 U.S.C. §§ 793 et seq.

to disclose defense information during wartime.[1581] The National Security Act of 1947[1582] directed the Director of the CIA to protect "intelligence sources and methods."[1583] The Atomic Energy Act of 1954[1584] provided for secrecy of information related to nuclear energy and weapons.[1585] The Invention Secrecy Act of 1951[1586] gave the government the authority to declare a patent application secret if disclosure of an invention might expose the country to harm.

Criminal Statutes for the Protection of Classified Information

National defense information is protected by the Espionage Act, 18 U.S.C. § 793 et seq. The penalty for violation of 18 U.S.C. § 793 (gathering, transmitting, or losing defense information) is a fine or imprisonment for not more than 10 years, or both. Thus, under § 793, persons convicted of gathering defense information with the intent or reason to believe the information will be used against the United States or to the benefit of a foreign nation may be fined or sentenced to no more than 10 years imprisonment.[1587] Persons who have access to defense

[1582] Codified at 50 U.S.C. § 401 et seq.

[1583] 50 U.S.C. § 403(g).

[1584] Codified at 42 U.S.C. § 2271 et seq. The dissemination of certain unclassified information related to nuclear facilities may be restricted by the Secretary of Energy pursuant to 42 U.S.C. § 2168 upon a finding that dissemination "could reasonably be expected to result in a significant adverse effect on the health and safety of the public or the common defense and security...." 42 U.S.C. § 2168(a)(4)(B).

[1585] See Benjamin S. DuVal, Jr., The Occasions of Secrecy, 47 U. PITT. L. REV. 579, 596 (1986) (detailing restrictions directed at protecting nuclear secrets, or "Restricted Data").

[1586] Codified at 35 U.S.C. § 181 et seq.

[1587] 18 U.S.C. § 793(a)-(c) provides:
(a) Whoever, for the purpose of obtaining information respecting the national defense with intent or reason to believe that the information is to be used to the injury of the United States, or to the advantage of any foreign nation, goes upon, enters, flies over, or otherwise obtains information concerning any vessel, aircraft, work of defense, [etc.], or any prohibited place so designated by the President by proclamation in time of war or in case of national emergency in which anything for the use of the Army, Navy, or Air Force is being prepared or constructed or stored, information as to which prohibited place the President has determined would be prejudicial to the national defense; or
(b) Whoever, for the purpose aforesaid, and with like intent or reason to believe, copies, takes, makes, or obtains, or attempts to copy, take, make, or obtain any sketch, photograph, photographic negative, blueprint, plan, map, model, instrument, appliance, document, writing, or note of anything connected with the national defense; or

information that they have reason to know could be used to harm the national security, whether the access is authorized or unauthorized, and who disclose that information to any person not entitled to receive it, or willfully retain the information despite an order to surrender it to an officer of the United States, are subject to the same penalty.[1588] Although it is not necessary that the information be classified by a government agency, the courts give deference to the executive determination of what constitutes "defense information."[1589] Information that is made available by the government to the public is not covered under the prohibition, however, because public availability of such information negates the bad-faith intent requirement.[1590] On the other hand, classified documents may remain within the ambit of the statute even if information contained therein is

---

(c) Whoever, for the purpose aforesaid, receives or obtains or agrees or attempts to receive or obtain from any person, or from any source whatever, any [protected thing] connected with the national defense, knowing or having reason to believe. . . that it has been or will be obtained, taken, made, or disposed of by any person contrary to the provisions of this chapter [18 U.S.C. §§ 792 et seq.];....

[1588] 18 U.S.C. § 793(d)-(f) provides:

(d) Whoever, lawfully having possession of, access to, control over, or being entrusted with any document [or other protected thing] relating to the national defense, or information relating to the national defense . . . the possessor has reason to believe could be used to the injury of the United States or to the advantage of any foreign nation, willfully communicates, delivers, transmits . . . to any person not entitled to receive it, or willfully retains the same and fails to deliver it on demand to the officer or employee of the United States entitled to receive it; or

(e) Whoever having unauthorized possession of, access to, or control over any document [or other protected thing], or information relating to the national defense which information the possessor has reason to believe could be used to the injury of the United States or to the advantage of any foreign nation, willfully communicates, delivers, transmits . . . to any person not entitled to receive it, or willfully retains the same and fails to deliver it to the officer or employee of the United States entitled to receive it; or

(f) Whoever, being entrusted with or having lawful possession or control of any document [or other protected thing], or information, relating to the national defense,

(1) through gross negligence permits the same to be removed from its proper place of custody or delivered to anyone in violation of his trust, or to be lost, stolen, abstracted, or destroyed, or

(2) having knowledge that the same has been illegally removed from its proper place of custody or delivered to anyone in violation of his trust, or lost, or stolen, abstracted, or destroyed, and fails to make prompt report of such loss, theft, abstraction, or destruction to his superior officer — Shall be fined under this title or imprisoned not more than ten years, or both.

[1589] See United States v. Morison, 844 F.2d 1057 (4th Cir.), cert. denied, 488 U.S. 908 (1988)(upholding conviction under 18 U.S.C. § 793 for delivery of classified photographs to publisher).

[1590] Gorin v. United States, 312, U.S. 9, 27-28 (1941) ("Where there is no occasion for secrecy, as with reports relating to national defense, published by authority of Congress or the military departments, there can, of course, in all likelihood be no reasonable intent to give an advantage to a foreign government.").

made public by an unauthorized leak.[1591] Any person who is lawfully entrusted with defense information and who permits it to be disclosed or lost, or who does not report such a loss or disclosure, is also subject to a penalty of up to 10 years in prison. The act covers information transmitted orally as well as information in tangible form.[1592]

18 U.S.C. § 794 (aiding foreign governments) provides for imprisonment for any term of years or life, or under certain circumstances, the death penalty.[1593] The provision penalizes anyone who transmits defense information to a foreign government (or certain other foreign entities) with the intent or reason to believe it will be used against the United States. The death penalty is available only upon a finding that the offense resulted in the death of a covert agent or directly concerns nuclear weapons or other particularly sensitive types of information. The death penalty is also available under §794 for violators who gather or transmit information related to military plans and the like during time of war, with the intent that the information reach the enemy.[1594] Offenders are also

[1592] United States v. Rosen, 445 F.Supp.2d 602, 616 (E.D. Va. 2006).

[1593] § 794. Gathering or delivering defense information to aid foreign government
(a) Whoever, with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation, communicates, delivers, or transmits. . . to any foreign government, or to any faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States, or to any representative, officer, agent, employee, subject, or citizen thereof, either directly or indirectly, any document [or other protected thing], or information relating to the national defense, shall be punished by death or by imprisonment for any term of years or for life, except that the sentence of death shall not be imposed unless the jury or . . . the court, further finds that the offense resulted in the identification by a foreign power (as defined in section 101(a) of the Foreign Intelligence Surveillance Act of 1978 [50 U.C.S. § 1801(a)]) of an individual acting as an agent of the United States and consequently in the death of that individual, or directly concerned nuclear weaponry, military spacecraft or satellites, earlywarning systems, or other means of defense or retaliation against large-scale attack; war plans; communications intelligence or cryptographic information; or any other major weapons system or major element of defense strategy.

(b) Whoever, in time of war, with intent that the same shall be communicated to the enemy, collects, records, publishes, or communicates, or attempts to elicit any information with respect to the movement, numbers, description, condition, or disposition of any of the Armed Forces, ships, aircraft, or war materials of the United States, or with respect to the plans or conduct, or supposed plans or conduct of any naval or military operations, or with respect to any works or measures undertaken for or connected with, or intended for the fortification or defense of any place, or any other information relating to the public defense, which might be useful to the enemy, shall be punished by death or by imprisonment for any term of years or for life....

[1594] During time of war, any individual who communicates intelligence or any other information to the enemy may be prosecuted by the military for aiding the enemy under Article 104 of the

subject to forfeiture of any ill-gotten gains and property used to facilitate the offense.[1595]

Members of the military[1596] who commit espionage, defined similarly to the conduct prohibited in 18 U.S.C. § 794, may be tried by court-martial for violating Article 106a of the Uniform Code of Military Justice (UCMJ),[1597] and sentenced to death if certain aggravating factors are found by unanimous determination of the panel.[1598] Unlike offenses under § 794, Article 106a offenses need not have resulted in the death of a covert agent or involve military operations during war

---

Uniform Code of Military Justice (UCMJ), and if convicted, punished by "death or such other punishment as a court-martial or military commission may direct." 10 U.S.C. § 904. Persons convicted by a general court-martial or by a military commission for "lurking as a spy or acting as a spy in or about any place, vessel, or aircraft, [etc.]" during time of war are to be punished by death. 10 U.S.C. § 906. Alien unlawful combatants within the meaning of chapter 47A of title 10, who, "with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign power, collects or attempts to collect information by clandestine means or while acting under false pretenses, for the purpose of conveying such information to an enemy of the United States, or one of the co-belligerents of the enemy, shall be punished by death or such other punishment as a military commission ... may direct." 10 U.S.C.A. § 950v(27).

[1595] 18 U.S.C. § 794(d). Proceeds go to the Crime Victims Fund.

[1596] Persons subject to the UCMJ include members of regular components of the armed forces, cadets and midshipmen, members of reserve components while on training, members of the national guard when in Federal service, members of certain organizations when assigned to and serving the armed forces, prisoners of war, persons accompanying the armed forces in the field in time of war or a "contingency operation," and certain others with military status. 10 U.S.C. § 802.

[1597] 10 U.S.C. § 906a(a) provides:

Art. 106a. Espionage

(a)(1) Any person subject to [the UCMJ, chapter 47 of title 10, U.S.C.] who, with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation, communicates, delivers, or transmits, or attempts to communicate, deliver, or transmit, to any entity described in paragraph (2), either directly or indirectly, anything described in paragraph (3) shall be punished as a court-martial may direct, except that if the accused is found guilty of an offense that directly concerns (A) nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large scale attack, (B) war plans, (C) communications intelligence or cryptographic information, or (D) any other major weapons system or major element of defense strategy, the accused shall be punished by death or such other punishment as a court- martial may direct.

(2) An entity referred to in paragraph (1) is —

(A) a foreign government;

(B) a faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States; or

(C) a representative, officer, agent, employee, subject, or citizen of such a government, faction, party, or force.

(3) A thing referred to in paragraph (1) is a document, writing, code book, signal book, sketch, photograph, photographic negative, blueprint, plan, map, model, note, instrument, appliance, or information relating to the national defense.

[1598] 10 U.S.C. § 906a(b)-(c).

to incur the death penalty. One of the aggravating factors enabling the imposition of the death penalty under Article 106a is that "[t]he accused has been convicted of another offense involving espionage or treason for which either a sentence of death or imprisonment for life was authorized by statute."

The unauthorized creation, publication, sale or transfer of photographs or sketches of vital defense installations or equipment as designated by the President is prohibited by 18 U.S.C. §§ 795 and 797.[1599] Violators are subject to fine or imprisonment for not more than one year, or both.

The knowing and willful disclosure of certain classified information is punishable under 18 U.S.C. § 798 by fine and/or imprisonment for not more than 10 years.[1600] To incur a penalty, the disclosure must be prejudicial to the safety or interests of the United States or work to the benefit of any foreign government and to the detriment of the United States. The provision applies only to

---

[1599] § 795. Photographing and sketching defense installations
(a) Whenever, in the interests of national defense, the President defines certain vital military and naval installations or equipment as requiring protection against the general dissemination of information relative thereto, it shall be unlawful to make any photograph, sketch, picture, drawing, map, or graphical representation of such vital military and naval installations or equipment without first obtaining permission of the commanding officer of the military or naval post, camp, or station, or naval vessels, military and naval aircraft, and any separate military or naval command concerned, or higher authority, and promptly submitting the product obtained to such commanding officer or higher authority for censorship or such other action as he may deem necessary....

§ 797. Publication and sale of photographs of defense installations
On and after thirty days from the date upon which the President defines any vital military or naval installation or equipment as being within the category contemplated under section 795 of this title [18], whoever reproduces, publishes, sells, or gives away any photograph, sketch, picture, drawing, map, or graphical representation of the vital military or naval installations or equipment so defined, without first obtaining permission of the commanding officer ... or higher authority, unless such photograph, sketch, picture, drawing, map, or graphical representation has clearly indicated thereon that it has been censored by the proper military or naval authority, shall be fined under this title or imprisoned not more than one year, or both.

[1600] § 798. Disclosure of classified information
(a) Whoever knowingly and willfully communicates, furnishes, transmits, or otherwise makes available to an unauthorized person, or publishes, or uses in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States any classified information —
(1) concerning the nature, preparation, or use of any code, cipher, or cryptographic system of the United States or any foreign government; or
(2) concerning the design, construction, use, maintenance, or repair of any device, apparatus, or appliance used or prepared or planned for use by the United States or any foreign government for cryptographic or communication intelligence purposes; or
(3) concerning the communication intelligence activities of the United States or any foreign government; or
(4) obtained by the processes of communication intelligence from the communications of any foreign government, knowing the same to have been obtained by such processes —

Shall be fined under this title or imprisoned not more than ten years, or both.

information related to cryptographic systems and information related to communications intelligence specially designated by a U.S. government agency for "limited or restricted dissemination or distribution."[1601] The provision protects information obtained by method of communications intelligence only if the communications were intercepted from a "foreign government," which, while broadly defined, may not include a transnational terrorist organization.[1602]

18 U.S.C. § 641 punishes the theft or conversion of government property or records for one's own use or the use of another. While this section does not explicitly prohibit disclosure of classified information, it has been used for that purpose.[1603] Violators may be fined, imprisoned for not more than 10 years, or both, unless the value of the property does not exceed the sum of $100, in which case the maximum prison term is one year.

18 U.S.C. § 952 punishes employees of the United States who, without authorization, willfully publish or furnish to another any official diplomatic code or material prepared in such a code, by imposing a fine, a prison sentence (up to 10 years), or both. The same punishment applies for materials "obtained while in the process of transmission between any foreign government and its diplomatic mission in the United States."[1604]

18 U.S.C. § 1030(a)(1) punishes the willful retention, communication, or transmission, etc., of classified information retrieved by means of knowingly accessing a computer without (or in excess of) authorization, with reason to believe that such information "could be used to the injury of the United States, or to the advantage of any foreign nation." The provision imposes a fine or imprisonment for not more than ten years, or both, in the case of a first offense or attempted violation. Repeat offenses or attempts can incur a prison sentence of up to twenty years.

[1601] 18 U.S.C. § 798(b).

[1602] Id. ("The term 'foreign government' includes in its meaning any person or persons acting or purporting to act for or on behalf of any faction, party, department, agency, bureau, or military force of or within a foreign country, or for or on behalf of any government or any person or persons purporting to act as a government within a foreign country, whether or not such government is recognized by the United States.").

[1603] See United States v. Morison, 844 F.2d 1057 (4th Cir. 1988)(photographs and reports were tangible property of the government); United States v. Fowler, 932 F.2d 306 (4th Cir. 1991)("information is a species of property and a thing of value" such that "conversion and conveyance of governmental information can violate § 641,"citing United States v. Jeter, 775 F.2d 670, 680-82 (6th Cir. 1985)); United States v. Girard, 601 F.2d 69, 70-71 (2d Cir. 1979).

[1604] 18 U.S.C. § 952.

18 U.S.C. § 1924 prohibits the unauthorized removal of classified material.[1605] The provision imposes a fine of up to $1,000 and a prison term up to one year for government officers or employees who knowingly take material classified pursuant to government regulations with the intent of retaining the materials at an unauthorized location.[1606]

42 U.S.C. § 2274 punishes the unauthorized communication by anyone of "Restricted Data,"[1607] or an attempt or conspiracy to communicate such data, by imposing a fine of not more than $500,000, a maximum life sentence in prison, or both, if done with the intent of injuring the United States or to secure an advantage to any foreign nation.[1608] An attempt to disclose or participate in a conspiracy to disclose restricted data with the belief that such data will be used to injure the United States or to secure an advantage to a foreign nation, is punishable by imprisonment for no more than 10 years, a fine of no more than $100,000, or both.[1609] The disclosure of "Restricted Data" by an employee or contractor, past or present, of the federal government to someone not authorized to receive it is punishable by a fine of not more than $12,500.[1610]

[1605] 18 U.C.S. § 1924 provides:
(a) Whoever, being an officer, employee, contractor, or consultant of the United States, and, by virtue of his office, employment, position, or contract, becomes possessed of documents or materials containing classified information of the United States, knowingly removes such documents or materials without authority and with the intent to retain such documents or materials at an unauthorized location shall be fined not more than $ 1,000, or imprisoned for not more than one year, or both.
(b) For purposes of this section, the provision of documents and materials to the Congress shall not constitute an offense under subsection (a).

(c) In this section, the term "classified information of the United States" means information originated, owned, or possessed by the United States Government concerning the national defense or foreign relations of the United States that has been determined pursuant to law or Executive order to require protection against unauthorized disclosure in the interests of national security.

[1606] Id.

[1607] The term "Restricted Data" is defined by the Atomic Energy Act of 1954 to include "all data concerning (1) design, manufacture, or utilization of atomic weapons; (2) the production of special nuclear material; or (3) the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to [42 U.C.S. § 2162]." 42 U.C.S. § 2014(y).

[1608] 42 U.S.C. § 2274(a). Receipt or tampering with Restricted Data with like intent is punishable in the same way under 42 U.S.C. §§ 2275 and 2276.

[1609] 42 U.S.C. § 2274(b).

[1610] 42 U.S.C. § 2277.

50 U.S.C. § 421 provides for the protection of information concerning the identity of covert intelligence agents.[1611] Any person authorized to know the identity of such agents who intentionally discloses the identity of a covert agent is subject to imprisonment for not more than 10 years or a fine or both.[1612] A person who learns the identity of an agent through authorized access to classified information[1613] and discloses the agent's identity to someone not authorized to receive classified information is subject to a fine, a term of imprisonment not more than five years, or both. A person who learns of the identity of a covert agent through a "pattern of activities intended to identify and expose covert agents" and discloses the identity to any individual not authorized access to classified information, with reason to believe that such activities would impair U.S. foreign intelligence efforts, is subject to a fine or imprisonment for a term of not more than three years. To be convicted, a violator must have knowledge that the information identifies a covert agent whose identity the United States is taking affirmative measures to conceal. An agent is not punishable under this provision for revealing his or her own identity, and it is a defense to prosecution if the United States has already publicly disclosed the identity of the agent.[1614]

50 U.S.C. § 783 penalizes government officers or employees who, without proper authority, communicate classified information to a person whom the employee has reason to suspect is an agent or representative of a foreign government.[1615] It

---

[1611] The Intelligence Identities and Protection Act of 1982, codified at 50 U.S.C. §§ 421-26. For more information, see CRS Report RS21636, Intelligence Identities Protection Act, by Elizabeth B. Bazan.

[1612] 50 U.S.C. § 421(a) provides:

(a) Whoever, having or having had authorized access to classified information that identifies a covert agent, intentionally discloses any information identifying such covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such covert agent and that the United States is taking affirmative measures to conceal such covert agent's intelligence relationship to the United States, shall be fined under title 18, United States Code, or imprisoned not more than ten years, or both.

[1613] "Classified Information" is defined in 50 U.S.C. § 426(1) as "information or material designated and clearly marked or clearly represented, pursuant to the provisions of a statute or Executive order (or a regulation or order issued pursuant to a statute or Executive order), as requiring a specific degree of protection against unauthorized disclosure for reasons of national security."

[1614] See Lawrence P. Gottesman, Note, The Intelligence Identities Protection Act of 1982: An Assessment of the Constitutionality of Section 601(c), 49 BROOKLYN L. REV. 479, 483 - 485 (1983)(outlining the elements of an offense under 50 U.S.C. § 421).

[1615] 50 U.S.C. § 783(a) provides:

Communication of classified information by Government officer or employee. It shall be unlawful for any officer or employee of the United States or of any department or agency thereof, or of any corporation the stock of which is owned in whole or in major part by the United States or any department or agency thereof, to communicate in any manner or by any means, to any other

is also unlawful for the representative or agent of the foreign government to receive classified information.[1616] Violation of either of these provisions is punishable by a fine of up to $10,000 or imprisonment for not more than 10 years.[1617] Violators are thereafter prohibited from holding public office.[1618] Violators must forfeit all property derived directly or indirectly from the offense and any property that was used or intended to be used to facilitate the violation.[1619]

Disclosure of a patent that has been placed under a secrecy order pursuant to the Invention Secrecy Act of 1951[1620] can result in a fine of $10,000, imprisonment for up to two years, or both. Publication or disclosure of the invention must be willful and with knowledge of the secrecy order to be punishable.[1621]

Civil Penalties and Other Measures

In addition to the criminal penalties outlined above, the executive branch employs numerous means of deterring unauthorized disclosures by government personnel using administrative measures based on terms of employment

---

person whom such officer or employee knows or has reason to believe to be an agent or representative of any foreign government , any information of a kind which shall have been classified by the President (or by the head of any such department, agency, or corporation with the approval of the President) as affecting the security of the United States, knowing or having reason to know that such information has been so classified, unless such officer or employee shall have been specifically authorized by the President, or by the head of the department, agency, or corporation by which this officer or employee is employed, to make such disclosure of such information.

[1616] 50 U.S.C. 783(b) provides:

Receipt of, or attempt to receive, by foreign agent or member of Communist organization, classified information. It shall be unlawful for any agent or representative of any foreign government knowingly to obtain or receive, or attempt to obtain or receive, directly or indirectly, from any officer or employee of the United States or of any department or agency thereof or of any corporation the stock of which is owned in whole or in major part by the United States or any department or agency thereof, any information of a kind which shall have been classified by the President (or by the head of any such department, agency, or corporation with the approval of the President) as affecting the security of the United States, unless special authorization for such communication shall first have been obtained from the head of the department, agency, or corporation having custody of or control over such information.

[1617] 50 U.S.C. § 783(c).

[1618] Id.

[1619] 50 U.S.C. § 783(e).

[1620] Codified at 35 U.S.C. § 181 et seq.

[1621] 35 U.S.C. § 186.

contracts.[1622] The agency may impose disciplinary action or revoke a person's security clearance.[1623] The revocation of a security clearance is usually not reviewable by the Merit System Protection Board[1624] and may mean the loss of government employment. Government employees may be subject to monetary penalties for disclosing classified information.[1625] Violators of the Espionage Act and the Atomic Energy Act provisions may be subject to loss of their retirement pay. [1626]

Agencies also rely on contractual agreements with employees, who typically must sign non-disclosure agreements prior to obtaining access to classified information,[1627] sometimes agreeing to submit all materials that the employee desires to publish to a review by the agency. The Supreme Court enforced such a contract against a former employee of the Central Intelligence Agency (CIA), upholding the government's imposition of a constructive trust on the profits of a book the employee sought to publish without first submitting it to CIA for review.[1628]

In 1986, the Espionage Act was amended to provide for the forfeiture of any property derived from or used in the commission of an offense.[1629] Violators of the Atomic Energy Act may be subjected to a civil penalty of up to $100,000 for

[1623] See, e.g., Exec. Order 12,958. Sanctions may include "reprimand, suspension without pay, removal, ... loss or denial of access to classified information, or other sanctions in accordance with applicable law and agency regulation." Id. at §5.7(c).

[1624] See Department of Navy v. Egan, 484 U.S. 518, 526-29 (1988). Federal courts may review constitutional challenges based on the revocation of security clearance. Webster v. Doe, 486 U.S. 592 (1988).

[1625] See 42 U.S.C. § 2282(b) (providing for fine of up to $100,000 for violation of Department of Energy security regulations).

[1626] 5 U.C.S. § 8312 (2001)(listing violations of 18 U.S.C. §§ 793 & 798, 42 U.S.C. § 227276, and 50 U.S.C. § 421, among those for which forfeiture of retirement pay or annuities may be imposed).

[1627] See United States v. Marchetti, 466 F.2d 1309 (4th Cir.), cert. denied, 409 U.S. 1063 (1972) (enforcing contractual non-disclosure agreement by former employee regarding "secret information touching upon the national defense and the conduct of foreign affairs" obtained through employment with CIA).

[1628] See Snepp v. United States, 444 U.S. 507 (1980); see also Alan E. Garfield, Promises of Silence: Contract Law and Freedom of Speech, 83 CORNELL L.REV. 261, 274 (1998)(noting the remedy in Snepp was enforced despite the agency's stipulation that the book did not contain any classified information).

[1629] See 18 U.S.C. §§ 793(h), 794(d), 798(d); Klein, supra note 8, at 438-439.

each violation of Energy Department regulations regarding dissemination of unclassified information about nuclear facilities.[1630]

The government can also use injunctions to prevent disclosures of information. The courts have generally upheld injunctions against former employees' publishing information they learned through access to classified information.[1631] The Supreme Court also upheld the State Department's revocation of passports for overseas travel by persons planning to expose U.S. covert intelligence agents, despite the fact that the purpose was to disrupt U.S. intelligence activities rather than to assist a foreign government.[1632]

Similarly, the government can enjoin publication of inventions when it is determined that the release of such information is detrimental to the national security. If an inventor files a patent application for an invention that the Commissioner of Patents believes should not be made public, the Commissioner may place a secrecy order on the patent and establish conditions for granting a patent, or may withhold grant of a patent as long as the "national interest requires [it]."[1633] In addition to criminal penalties cited previously, in the case of an unauthorized disclosure or foreign filing of the patent information, the Patent Office will deem the invention to be "abandoned," which means a forfeiture by the applicant, his successors, or assigns of all claims against the United States based on the invention.[1634]

The government has had less success trying to enjoin the media from disclosing classified information. Most famously, the government failed to enjoin publication of the Pentagon Papers by a newspaper, even though the information was clearly classified and had been stolen by someone with access to it.[1635] In that case, the Supreme Court set very high standards for imposing prior restraint on the press. Yet in another case, the government was able to enjoin a newspaper from printing information about the design of an atomic bomb, even though the

information did not originate from classified material and the author's purpose was not subversive.[1636]

Prior Legislative Efforts

The current laws for protecting classified information have been criticized as a patchwork of provisions that are not consistent and do not cover all the information the government legitimately needs to protect.[1637] Certain information is protected regardless of whether it belongs to the government or is subject to normal classification. Technical and scientific information, for example, can be restricted regardless of source.[1638] Information related to "the national defense" is protected even though no harm to the national security is intended or is likely to be caused through its disclosure. However, nonmilitary information with the potential to cause serious damage to the national security is only protected from willful disclosure with the specific intent to harm the national interest,[1639] or with the knowledge that such harm could occur.[1640]

In 2000, and again in 2002, Congress sought to create 18 U.S.C. § 798A, subsection (a) of which would have read:

> *Whoever, being an officer or employee of the United States, a former or retired officer or employee of the United States, any other person with authorized access to classified information, or any other person formerly with authorized access to classified information, knowingly and willfully discloses, or attempts to disclose, any classified information acquired as a result of such person's authorized access to classified information to a person*

[1636] See DuVal, supra note 12, at 604 (describing Progressive magazine article at issue in United States v. Progressive, Inc., 467 F.Supp. 990 (W.D. Wis. 1979)); Klein, supra note 8, at 435 (noting disparity between rulings in New York Times and Progressive). The information the Progressive sought to publish was related to the building of a nuclear bomb and was thus classified as "Restricted Data" under the Atomic Energy Act, even though the information had been compiled from unclassified, publicly available documents. One reason for the different outcomes in the two cases is that the Atomic Energy Act contains statutory authorization for the Attorney General to seek injunction. See 42 U.S.C. § 2280. In New York Times, a majority of Justices took into account the fact that Congress had not authorized an injunction. 403 U.S. at 718 (Black, J., concurring); id. at 721-22 (Douglas, J., concurring); id. at 730 (Stewart, J., concurring); id. at 731-40 (White, J., concurring); id. at 742 (Marshall, J., concurring).

[1637] See E.E.B. and K.E.M., Note, Plugging the Leak: The Case for a Legislative Resolution of the Conflict between the Demands of Secrecy and the Need for Open Government, 71 VA. L. REV. 801, 811 (1985).

[1638] See id. at 814.

[1639] See id. at 815.

[1640] See United States v. Morison, 844 F.2d 1057 (1988).

(other than an officer or employee of the United States) who is not authorized access to such classified information, knowing that the person is not authorized access to such classified information, shall be fined under this title, imprisoned not more than 3 years, or both.

The new provision would have penalized the disclosure of any material designated as classified for any reason related to national security, regardless of whether the violator intended that the information be delivered to and used by foreign agents (in contrast to 50 U.S.C. § 783). It would have been the first law to penalize disclosure of information to entities other than foreign governments or their equivalent solely because it is classified, without a more specific definition of the type of information covered.[1641] In short, the provision would have made it a crime to disclose or attempt to disclose classified information[1642] to any person who does not have authorized access to such information, with exceptions covering disclosures to Article III courts, or to the Senate or House committees or Members, and for authorized disclosures to persons acting on behalf of a foreign power (including an international organization). The provision would have amended the espionage laws in title 18 by expanding the scope of information they cover. The proposed language was intended to make it easier for the government to prosecute unauthorized disclosures of classified information, or "leaks" of information that might not amount to a violation of current statutes. The language was intended to ease the government's burden of proof in such cases by eliminating the need "to prove that damage to the national securityhas or will result from the unauthorized disclosure,"[1643] substituting a requirement to show that the unauthorized disclosure was of information that "is or has been properly classified" under a statute or executive order.

[1641] 18 USCS § 1924 prohibits removal of government-owned or controlled classified information by a government employee without authorization. 50 U.S.C. § 783 covers only information classified by the President or an executive agency transmitted by a government employee to a foreign government. 18 U.S.C. §§ 793 and 794 are potentially broader than these in that they cover information "related to the national defense," by government employees and others without regard to the identity of the recipient of the information, but these require intent or knowledge regarding harm to the national defense.

[1642] "Classified information" was defined in the proposed measure to mean "information or material designated and clearly marked or represented, or that the person knows or has reason to believe has been determined by appropriate authorities, pursuant to the provisions of a statute or Executive Order, as requiring protection against unauthorized disclosure for reasons of national security."

[1643] See H.Rept. 106-969 at 44 (2000).

The 106th Congress passed the measure,[1644] but President Clinton vetoed it, calling it "well-intentioned" as an effort to deal with a legitimate concerns about the damage caused by unauthorized disclosures, but "badly flawed" in that it was "overbroad" and posed a risk of "unnecessarily chill[ing] legitimate activities that are at the heart of a democracy."[1645] The President explained his view that

> *[a] desire to avoid the risk that their good faith choice of words — their exercise of judgment — could become the subject of a criminal referral for prosecution might discourage Government officials from engaging even in appropriate public discussion, press briefings, or other legitimate official activities. Similarly, the legislation may unduly restrain the ability of former Government officials to teach, write, or engage in any activity aimed at building public understanding of complex issues. Incurring such risks is unnecessary and inappropriate in a society built on freedom of expression and the consent of the governed and is particularly inadvisable in a context in which the range of classified materials is so extensive. In such circumstances, this criminal provision would, in my view, create an undue chilling effect.*[1646]

The 108th Congress considered passing an identical provision as part of the Intelligence Authorization Act for Fiscal Year 2001,[1647] but instead directed the Attorney General and heads of other departments to undertake a review of the current protections against the unauthorized disclosure of classified information, and to issue a report recommending legislative or administrative actions.[1648] An identical measure was introduced late in the 109th Congress, but was not reported out of committee.[1649]

The Attorney General, in his report to the 108th Congress, concluded that

> *[a]lthough there is no single statute that provides criminal penalties for all types of unauthorized disclosures of classified information, unauthorized disclosures of classified information*

[1644] H.R. 4392 § 304, 106th Congress.

[1645] Message on Returning Without Approval to the House of Representatives the "Intelligence Authorization Act for Fiscal Year 2001", 36 WEEKLY COMP. PRES. DOC. 278 (Nov. 4, 2000).

[1646] Id.

[1647] The Classified Information Protection Act of 2001, H.R. 2943, 107th Cong.

[1648] Intelligence Authorization Act for Fiscal Year 2002, P.L. 107-108, § 310 (2001).

[1649] S. 3774, 109th Cong.

fall within the scope of various current statutory criminal prohibitions. It must be acknowledged that there is no comprehensive statute that provides criminal penalties for the unauthorized disclosure of classified information irrespective of the type of information or recipient involved. Given the nature of unauthorized disclosures of classified information that have occurred, however, I conclude that current statutes provide a legal basis to prosecute those who engage in unauthorized disclosures, if they can be identified. It may be that carefully drafted legislation specifically tailored to unauthorized disclosures of classified information generally, rather than to espionage, could enhance our investigative efforts. The extent to which such a provision would yield any practical additional benefits to the government in terms of improving our ability to identify those who engage in unauthorized disclosures of classified information or deterring such activity is unclear, however.[1650]

Constitutional Issues

The publication of information pertaining to the national defense may serve the public interest by providing citizens with information necessary to shed light on the workings of government, but some observe a consensus that the public release of at least some defense information poses a significant enough threat to the security of the nation that the public interest is better served by keeping it secret. The Constitution protects the public right to access government information and to express opinions regarding the functioning of the government, among other things, but it also charges the government with "providing for the common defense." Policymakers are faced with the task of balancing these interests.

The First Amendment to the U.S. Constitution provides: "Congress shall make no law ... abridging the freedom of speech, or of the press...."[1651] Despite this absolute language, the Supreme Court has held that "[t]he Government may ... regulate the content of constitutionally protected speech in order to promote a compelling interest if it chooses the least restrictive means to further the articulated interest."[1652]

[1650] Report to Congress on Unauthorized Disclosure of Classified Information, Oct. 15, 2002 (citations omitted).

[1651] For an analysis of exceptions to the First Amendment, see CRS Report 95-815, Freedom of Speech and Press: Exceptions to the First Amendment, by Henry Cohen.

[1652] Sable Communications of California v. Federal Communications Commission, 492 U.S. 115, 126 (1989).

First Amendment Principles

Where speech is restricted based on its content, the Supreme Court generally applies "strict scrutiny," which means that it will uphold a content-based restriction only if it is necessary "to promote a compelling interest," and is "the least restrictive means to further the articulated interest."[1653]

Compelling Interest

Protection of the national security from external threat is without doubt a compelling government interest.[1654] It has long been accepted that the government has a compelling need to suppress certain types of speech, particularly during time of war or heightened risk of hostilities.[1655] Speech likely to incite immediate violence, for example, may be suppressed.[1656] Speech that would give military advantage to a foreign enemy is also susceptible to government regulation.[1657]

Where First Amendment rights are implicated, it is the government's burden to show that its interest is sufficiently compelling to justify enforcement. Whether the government has a compelling need to punish disclosures of classified information turns on whether the disclosure has the potential of causing damage to the national defense or foreign relations of the United States.[1658] Actual damage need not be proved, but potential damage must be more than merely speculative and incidental.[1659]

[1653] Id.

[1654] See Haig v. Agee, 453 U.S. 280 (1981) ("It is 'obvious and unarguable' that no governmental interest is more compelling than the security of the Nation.")(citing Aptheker v. Secretary of State, 378 U.S., at 509; accord Cole v. Young, 351 U.S. 536, 546 (1956)).

[1655] See Schenck v. United States, 249 U.S. 47 (1919) (formulating "clear and present danger" test).

[1656] Brandenburg v. Ohio, 395 U.S. 444 (1969).

[1657] Near v. Minnesota, 283 U.S. 697, 716 (1931) ("No one would question but that a government might prevent actual obstruction to its recruiting service or the publication of the sailing dates of transports or the number and location of troops.").

[1658] "National Security" is defined as national defense and foreign relations. See Exec.Order No. 12,958, 60 Fed. Reg.19,825 (Apr. 17, 1995).

[1659] See, e.g., New York Times Co. v. United States, 403 U.S. 713, 725 (1971) (Brennan, J., concurring) (rejecting as insufficient government's assertions that publication of Pentagon Papers "could," "might," or "may" prejudice the national interest); Elrod v. Burns, 427 U.S. 347, 362 (1976) ("The interest advanced must be paramount, one of vital importance, and the burden is on the government to show the existence of such an interest.")(citing Buckley v. Valeo, 424 U.S. 1, 94(1976); Williams v. Rhodes, 393 U.S. 23, 31-33(1968); NAACP v. Button, 371 U.S. 38, 45

Promotion of that Interest

In addition to showing that the stated interest to be served by the statute is compelling, the government must also show that the law actually serves that end. If the accused can show that the statute serves an unrelated purpose — for example, to silence criticism of certain government policies or to manipulate public opinion — a judge might be prepared to invalidate the statute.[1660] If, for example, the government releases some positive results of a secret weapons program while suppressing negative results, a person prosecuted for releasing negative information could challenge the statute by arguing that his prosecution is related to the negative content of his speech rather than to valid concerns about the damage it might cause. If he can show that those who disclose sensitive information that tends to support the administration's position are not prosecuted, while those who disclose truthful information that is useful to its opponents are prosecuted, he might be able to persuade a court that the statute as enforced is an unconstitutional restriction of speech based on impermissible content-related interests.[1661]

Least Restrictive Means

To survive a constitutional challenge, a law must be narrowly drawn to affect only the type of speech that the government has a compelling need to suppress.[1662] A statute that reaches speech that the government has no sufficiently compelling need to regulate may be subject to attack due to overbreadth. A law is overly broad if it prohibits more speech than is necessary to achieve its purpose. If a defendant can show that a statute regulating speech is "substantially overbroad," he may challenge its validity on its face.[1663] If the law is found to be substantially overbroad, a court will invalidate the law even if the defendant's conduct falls within the ambit of conduct that the government may legitimately prohibit. For this reason, a statute that relies solely on the Executive's classification of information to determine the need for its protection might be contested as

---

(1963); Bates v. Little Rock, 361 U.S. 516, 524 (1960); NAACP v. Alabama, 357 U.S. 449, 464-466 (1958); Thomas v. Collins, 323 U.S. 516, 530 (1945)).

[1660] In all likelihood, such a defendant would have to prove not only that such an impermissible use is possible, but also that it is pertinent to the particular case.

[1661] Cf. R.A.V. v. City of St. Paul, 505 U.S. 377 (1992); but see Snepp v. United States, 444 U.S. 507 (1980)(Stevens, J., dissenting). Snepp's assertion of selective enforcement against his book based on its critical treatment of the CIA failed to persuade the Supreme Court that any violation of the First Amendment had occurred. See Judith Schenk Koffler and Bennett L. Gershman, National Security and Civil Liberties: The New Seditious Libel, 69 CORNELL L. REV. 816, 847 (1984).

[1662] See E.E.B. and K.E.M., supra note 1, at 849.

[1663] Broadrick v. Oklahoma, 413 U.S. 601 (1973).

overbroad.[1664] If a challenger were able to show that agencies classify information that it is unnecessary to keep secret, he could argue that the statute is invalid as overly broad because it punishes protected speech that poses no danger to the national security.

Although information properly classified in accordance with statute or executive order carries by definition, if disclosed to a person not authorized to receive it, the potential of causing at least identifiable harm to the national security of the United States,[1665] it does not necessarily follow that government classification by itself will be dispositive of the issue in the context of a criminal trial. Government classification will likely serve as strong evidence to support the contention. Typically, courts have been unwilling to review decisions of the executive related to national security, or have made a strong presumption that the material at issue is potentially damaging.[1666] In the context of a criminal trial, especially in a case with apparent First Amendment implications, courts may be more willing to engage in an evaluation of the propriety of a classification decision than they would in a case of citizens seeking access to information under the Freedom of Information Act (FOIA).[1667]

The Supreme Court seems satisfied that national security is a vital interest sufficient to justify some intrusion into activities that would otherwise be protected by the First Amendment — at least with respect to federal employees.

[1664] Courts have rejected challenges of the Espionage Act based on overbreadth stemming from the imprecision of the term "information related to the national defense" by reading other requirements into the statute. See, e.g., United States v. Rosen, 445 F.Supp.2d 602, 643 (E.D. Va. 2006)(rejecting overbreadth challenge on the basis of judicial interpretation of 18 U.S.C. § 793 that requires the government to prove "(1) that the information relates to the nation's military activities, intelligence gathering or foreign policy, (2) that the information is closely held by the government, in that it does not exist in the public domain; and (3) that the information is such that its disclosure could cause injury to the nation's security").

[1665] Exec. Order No. 12,958, 60 Fed. Reg.19,825 (Apr. 17, 1995)("Classified National Security Information").

Sec. 1.3 defines three levels of classification:

(1) "Top Secret" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause exceptionally grave damage to the national security that the original classification authority is able to identify or describe.

(2) "Secret" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause serious damage to the national security that the original classification authority is able to identify or describe.

(3) "Confidential" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause damage to the national security that the original classification authority is able to identify or describe. (Emphasis added).

[1666] See, e.g., Haig v. Agee, 453 U.S. 280, 291 (1981) ("Matters intimately related to foreign policy and national security are rarely proper subjects for judicial intervention.").

[1667] 5 U.S.C. § 552(b)(1) exempts classified information from release to requesters.

Although the Court has not held that government classification of material is sufficient to show that its release is damaging to the national security,[1668] it has seemed to accept without much discussion the government's assertion that the material in question is damaging. Lower courts have interpreted 18 U.S.C. § 798, which criminalizes the unauthorized release of specific kinds of classified information,[1669] to have no requirement that the government prove that the classification was proper or personally approved by the President.[1670] It is unlikely that a defendant's bare assertion that information is unlikely to damage U.S. national security will be persuasive without some convincing evidence to that effect, or proof that the information is not closely guarded by the government.[1671]

Snepp v. United States[1672] affirmed the government's ability to enforce contractual non-disclosure agreements against employees and former employees who had had access to classified information. The Supreme Court allowed the government to impose a constructive trust on the earnings from Frank Snepp's book about the CIA because he had failed to submit it to the CIA for prepublication review, as he had agreed to do by signing an employment agreement. Although the CIA stipulated to the fact that the book contained no classified information,[1673] the Court accepted the finding that the book caused "irreparable harm and loss" to the American intelligence services.[1674] The Court suggested that the CIA did not need a signed agreement in order to protect its

---

[1668] See, e.g. Scarbeck v. United States, 317 F.2d 546 (D.C. Cir. 1962) (holding government did not have to show documents were properly classified "as affecting the national defense" to convict employee under 50 U.S.C.§ 783, which prohibits government employees from transmitting classified documents to foreign agents or entities).

[1669] 18 U.S.C. § 798 provides in pertinent part:

"(a) Whoever knowingly and willfully communicates, furnishes, transmits, or otherwise makes available to an unauthorized person, ... any classified information ... (2) concerning the design, construction, use, maintenance, or repair of any device, apparatus, or appliance used or prepared or planned for use by the United States ... for cryptographic or communication intelligence purposes; ... (s)hall be fined ... or imprisoned ...."

[1670] See, e.g. United States v. Boyce, 594 F.2d 1246, 1251 (9th Cir. 1979) ("Under section 798, the propriety of the classification is irrelevant. The fact of classification of a document or documents is enough to satisfy the classification element of the offense.").

[1671] See United States v. Dedeyan, 594 F.2d 36, 39 (4th Cir. 1978).

[1672] 444 U.S. 507 (1980).

[1673] Id. at 511.

[1674] Id. at 512.

interests by subjecting its former employees to prepublication review and possible censorship.[1675]

Haig v. Agee[1676] was a First Amendment challenge to the government's ability to revoke a citizen's passport because of his intent to disclose classified information. Philip Agee was a former CIA agent who engaged in a "campaign to fight the United States CIA," which included publishing names of CIA operatives around the world. In order to put a stop to this activity, the Department of State revoked his passport. Agee challenged that action as an impermissible burden on his freedom to travel and an effort to penalize his exercise of free speech to criticize the government.[1677] The Supreme Court disagreed, finding the passport regulations constitutional because they may be applied "only in cases involving likelihood of 'serious damage' to national security or foreign policy."[1678]

United States v. Morison[1679] is significant in that it represents the first case in which a person was convicted for selling classified documents to the media. Morison argued that the espionage statutes did not apply to his conduct because he could not have had the requisite intent to commit espionage. The Fourth Circuit rejected his appeal, finding the intent to sell photographs that he clearly knew to be classified sufficient to satisfy the scienter requirement under 18 U.S.C. § 793. The definition of "relating to the national defense" was not overbroad because the jury had been instructed that the government had the burden of showing that the information was so related.[1680]

Prior Restraint

In addition to restricting the disclosure of information by prosecuting the person responsible after the fact, the government may seek to prevent publication by prior restraint (i.e., seeking a temporary restraining order or an injunction from a

---

[1675] Id. at 509, n3 ("Moreover, this Court's cases make clear that - even in the absence of an express agreement - the CIA could have acted to protect substantial government interests by imposing reasonable restrictions on employee activities that in other contexts might be protected by the First Amendment")(citations omitted).

[1678] Id. at 305-06.

[1679] 844 F.2d 1057 (4th Cir.), cert. denied, 488 U.S. 908 (1988).

[1680] But see Scarbeck v. United States, 317 F.2d 546 (D.C. Cir. 1962) (holding that government did not need to prove proper classification of documents to prove a violation).

court to enjoin publication).[1681] The Supreme Court, however, is unlikely to uphold such an order. It has written:

> *[P]rior restraints are the most serious and least tolerable infringement on First Amendment rights.... A prior restraint, ... by definition, has an immediate and irreversible sanction. If it can be said that a threat of criminal or civil sanctions after publication "chills" speech, prior restraint "freezes" it at least for the time. The damage can be particularly great when the prior restraint falls upon the communication of news and commentary on current events.*[1682]

The government's ability to protect sensitive information was explored in the context of prior restraints of the media in the Pentagon Papers case.[1683] In a per curiam opinion accompanied by nine concurring or dissenting opinions, the Court refused to grant the government's request for an injunction to prevent the New York Times and the Washington Post from printing a classified study of the U.S. involvement in Vietnam. A majority of the justices indicated in dicta, however, that the newspapers — as well as the former government employee who leaked the documents to the press — could be prosecuted under the Espionage Act.[1684]

Due Process

A statute is unconstitutionally vague if it does not permit the ordinary person to determine with reasonable certainty whether his conduct is criminally punishable. Therefore, a statute prohibiting the unauthorized disclosure of classified information must be sufficiently clear to allow a reasonable person to know what conduct is prohibited. Where First Amendment rights are implicated, the concern that a vague statute will have a chilling effect on speech not intended

---

[1681] The Supreme Court struck down an injunction against publishing the Pentagon Papers, writing: "Any system of prior restraints of expression comes to the Court bearing a heavy presumption against its constitutional validity." New York Times Co. v. United States, 403 U.S. 713, 714 (1971).

[1682] Nebraska Press Association v. Stuart, 427 U.S. 539, 559 (1976) (striking down a court order restraining the publication or broadcast of accounts of confessions or admissions made by the defendant at a criminal trial).

[1683] New York Times Co. v. United States, 403 U.S. 713 (1971).

[1684] See David Topol, Note, United States v. Morison: A Threat to the First Amendment Right to Publish Security Information, 43 S.C. L. REV. 581, 586 (noting that six of the nine Pentagon Papers justices suggested that the government could convict the newspapers under the Espionage Act even though it could not enjoin them from printing the documents).

to be covered may make that law particularly vulnerable to judicial invalidation.[1685]

The Espionage Act of 1917[1686] has been challenged for vagueness without success. There have been very few prosecutions under that act for disclosing information related to the national defense. The following elements are necessary to prove an unauthorized disclosure offense under 18 U.S.C. § 793:

1. The information or material disclosed must be related to the national defense, that is, pertaining to any matters "directly and reasonably connected with the defense of our nation against its enemies" that "would be potentially damaging to the United States, or might be useful to an enemy of the United States" and are "closely held" in that the relevant government agency has sought to keep them from the public generally and that these items have not been made public and are not available to the general public.[1687]
2. The disclosure must be made with knowledge that such disclosure is not authorized.
3. There must be an "intent or reason to believe that the information … is to be used to the injury of the United States, or to the advantage of any foreign nation.

There does not appear to be a requirement that the disclosure cause actual harm.[1688] An evil motive is not necessary to satisfy the scienter requirement; the willfulness prong is satisfied by the knowledge that the information may be used to the injury of the United States.[1689] It is irrelevant whether the information was passed to a friendly foreign nation.[1690] A patriotic motive will not likely change the outcome.[1691]

[1685] See Aptheker v. Secretary of State, 378 U.S. 500 (1964); United States v. Robel, 389 U.S. 258 (1967); Smith v. Goguen, 415 U.S. 566, 573 (1974); Village of Shaumberg v. Citizens for a Better Environment, 444 U.S. 620 (1980).

[1686] 18 U.S.C. § 793 et seq.

[1687] See United States v. Morison, 622 F. Supp. 1009, 1010 (D. Md.1985).

[1688] See United States v. Morison, 844 F.2d 1057, 1074 (4th Cir. 1988).

[1689] Id. at 1073.

[1690] Gorin v. United States, 312 U.S. 19, 29 (1941).

[1691] United States v. Morison, 622 F.Supp. 1009 (D. Md. 1985).

The Supreme Court, in *Gorin v. United States*,[1692] upheld portions of the Espionage Act now codified as sections 793 and 794 of title 18, U.S. Code (communication of certain information to a foreign entity) against assertions of vagueness, but only because jury instructions properly established the elements of the crimes, including the scienter requirement and a definition of "national defense" that includes potential damage in case of unauthorized release of protected information and materials. *Gorin* was a "classic case" of espionage, and there was no challenge based on First Amendment rights. The Court agreed with the government that the term "national defense" was not vague; it was satisfied that it "is a generic concept of broad connotations, referring to the military and naval establishments and the related activities of national preparedness."[1693] Whether information was "related to the national defense" was a question for the jury to decide,[1694] based on its determination that the information "may relate or pertain to the usefulness, efficiency or availability of any of the above places, instrumentalities or things for the defense of the United States of America. The connection must not be a strained one nor an arbitrary one. The relationship must be reasonable and direct."[1695] As long as the jury was properly instructed that information not likely to cause damage was not "related to the national defense" for the purpose of the statute, the term was not unconstitutionally vague.

No other challenge to a conviction under the Espionage Act has advanced to the Supreme Court.

Conclusion

Under the present legal framework, the publication of national security information by non-government personnel may be prosecuted under various provisions, but only if the information meets the definition set forth by statute and the disclosure is made with the requisite knowledge or intent with regard to the nature of the damage it could cause. The First Amendment limits Congress's ability to prohibit the publication of information of value to the public, especially with regard to pre-publication injunctions against non-government employees. That the publication of some information has the potential to damage U.S. national security interests is rarely denied, but an agreement on how to protect such information without harming the public's right to know what its government is doing may remain elusive.

Summary

Largely prescribed in a series of successive presidential executive orders issued over the past 50 years, security classification policy and procedure provide the rationale and arrangements for designating information officially secret for reasons of national security, and for its declassification as well. President Franklin D. Roosevelt issued the first executive order (E.O. 8381) in 1940.

Current security classification policy may be found in Executive Order 12958, which was signed by President William Clinton on April 17, 1995. It "prescribes a uniform system for classifying, safeguarding, and declassifying national security information." As issued, E.O. 12958 declared, "If there is significant doubt about the need to classify information, it shall not be classified." Additionally, the order stated "If there is significant doubt about the appropriate level of classification, it shall be classified at the lower level."

President George W. Bush amended Executive Order 12958 via Executive Order 13292 on March 25, 2003. E.O. 13292 made many changes to E.O. 12958, and eliminated both of the aforementioned "significant doubt" provisions.

On May 27, 2009, President Barack Obama ordered a review of E.O. 12958. The assistant to the President for National Security Affairs (commonly known as the National Security Advisor) is required to submit to the President "recommendations and proposed revisions" to E.O. 12958 within 90 days.

President Obama signed an executive order on December 29, 2009, that revoked E.O. 12958 and "prescribes a uniform system for classifying, safeguarding, and declassifying national security information." The order made a number of significant changes to current information policies, such as (1) requiring the establishment of a National Declassification Center at the National Archives; (2) ending the E.O. 13292 policy of empowering the Director of Central Intelligence to block declassification actions; and (3) declaring that "no information may remain classified indefinitely." The President's accompanying memorandum to agency heads orders that a "backlog" of 400 million pages of records be made available to the public by December 31, 2013.

This report will not be updated.

Background

Although formal armed forces information security orders had been in existence since 1869, security classification arrangements assumed a presidential character in 1940. The reasons for this late development are not entirely clear, but it probably was prompted by desires to clarify the authority of civilian personnel in the national defense community to create official secrets, to establish a broader basis for protecting military information in view of growing global hostilities, and to better manage a discretionary power of increasing importance to the entire executive branch.

Relying upon a 1938 statute concerning the security of armed forces installations and equipment and "information relative thereto,"[1696] Franklin D. Roosevelt issued the first presidential security classification directive, E.O. 8381, in March 1940.[1697] However, the legislative history of the statute which the President relied upon to issue his order provided no indication that Congress anticipated that such a security classification arrangement would be created.

Other executive orders followed. E.O. 10104, adding a fourth level of classified information, aligned U.S. information security categories with those of our allies

[1696] 52 Stat. 3.

[1697] President Franklin D. Roosevelt, "Defining Certain Vital Military and Naval Installations and Equipment," 5 Federal Register 1147, March 26, 1940.

in 1950.[1698] A 1951 directive, E.O. 10290, completely overhauled the security classification program.[1699] Information was now classified in the interest of "national security" and classification authority was extended to nonmilitary agencies which presumably had a role in "national security" policy.

Criticism of the 1951 order prompted President Dwight D. Eisenhower to issue a replacement, E.O. 10501, in November 1953.[1700] This directive and later amendments to it, as well as E.O. 11652 of March 8, 1972, and E.O. 12065 of June 28, 1978, successively narrowed the bases and limited discretion for assigning official secrecy to agency records.[1701]

President Ronald W. Reagan issued E.O. 12356 on April 2, 1982.[1702] Quickly, it came under criticism for reversing the limiting trend set by classification orders of the previous 30 years by expanding the categories of classifiable information, mandating that information falling within these categories be classified, making reclassification authority available, admonishing classifiers to err on the side of classification, and eliminating automatic declassification arrangements.

With the democratization of many Eastern European countries, the demise of the Soviet Union, and the end of the Cold War, President William J. Clinton, shortly after his inauguration, initiated a sweeping review of Cold War rules on security classification in general and of E.O. 12356 in particular with a view to reform.[1703]

Many began to suspect that the security classification program could be improved when the Department of Defense Security Review Commission, chaired by retired General Richard G. Stilwell, declared in 1985 that there were "no verifiable

figures as to the amount of classified material produced in DoD and in defense industry each year." Nonetheless, it was concluded that "too much information appears to be classified and much at higher levels than is warranted."[1704]

The cost of the security classification program became clearer when the General Accounting Office (now Government Accountability Office) reported in October 1993 that it was "able to identify government wide costs directly applicable to national security information totaling over $350 million for 1992." After breaking this figure down—it included only $6 million for declassification work—the report added that "the U.S. government also spends additional billions of dollars annually to safeguard information, personnel, and property."[1705]

Established in April 1993, the President's security classification task force transmitted its initial draft order to the White House seven months later. Circulated among the departments and agencies for comment, the proposal encountered strong opposition from officials within the intelligence and defense communities.[1706] More revision of the draft directive followed.

As delay in issuing the new order continued, some in Congress considered legislating a statutory basis for classifying information in the spring of 1994.[1707] In the fall, the President issued E.O. 12937 declassifying selected retired records at the National Archives.[1708] After months of unresolved conflict over designating an oversight and policy direction agency, a compromise version of the order was given presidential approval in April 1995.

Clinton's Executive Order 12958 As Issued

The Clinton order, as initially issued, authorizes the classification of information for reasons of "national security," which "means the national defense or foreign

relations of the United States."[1709] Regarding the threshold consideration as to whether a classification action should occur, the order states: "If there is significant doubt about the need to classify information, it shall not be classified." No explanation of the term "significant" is provided. Nonetheless, it reversed the policy of E.O. 12356, which directed classifiers to err on the side of classification in questionable cases.

E.O. 12958 retains three classification levels, identified by the traditional Top Secret, Secret, and Confidential markings. Again reversing E.O. 12356 policy, the Clinton order states: "If there is significant doubt about the appropriate level of classification, it shall be classified at the lower level." This too was a reversal of E.O. 12356, which required classification at the higher level. The classification categories specified in E.O. 12958—identifying inclusively the information subjects that may be considered for classification—are the same as those of E.O. 12356, with one exception. E.O. 12356 explicitly provided for the President to create additional classification categories. No such allowance is stated in E.O. 12958; any additional category had to be appended by a subsequent executive order.

Prescribing Declassification

Unlike E.O. 12356, E.O. 12958 limits the duration of classification. When information is originally classified, an attempt is to be made "to establish a specific date or event for declassification." Alternatively, if a short-term time or event for declassification cannot be determined, the new order sets a 10-year terminus. However, allowance is made for extending the duration of classification beyond the 10-year limit in selected cases and in accordance with prescribed procedures and conditions. In brief, the intent appears to be that only a small quantity of the most highly sensitive information would be maintained under security classification for periods longer than 10 years.

Other arrangements are specified for the automatic declassification of historic government records—those that are more than 25 years old and have been determined by the Archivist of the United States to have permanent historical value. E.O. 12958 mandates the beginning of government wide declassification of historic records five years hence, shortly after the turn of the century. Allowance is made for continuing the classification of these materials in selected cases and in accordance with prescribed procedures and conditions. Once again, the intent appears to be that only a small quantity of the most highly sensitive historic records would be maintained under security classification. The Archivist,

[1709] President William J. Clinton, "Executive Order 12958—Classified National Security Information," 60 Federal Register 19825, April 20, 1995, at http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=1995_register&docid= fr20ap95-135.pdf.

according to the Clinton order, "shall establish a Government wide database of information that has been declassified."

Furthermore, E.O. 12958 continues the mandatory declassification review requirement of E.O. 12356. This provision authorizes a person to request that almost any classified record be reviewed with a view to being declassified and publicly disclosed. Similarly, if an agency record requested pursuant to the Freedom of Information Act is found to be security classified, mandatory declassification review also occurs.

Controversial Areas

A few provisions of E.O. 12958 may be considered controversial. The Clinton order states that information "may not be reclassified after it has been declassified and released to the public under proper authority." The reference to "proper authority" means that the information has not been disclosed through a leak. However, some question remains as to how "public" the proper disclosure must be to preclude retrieval and reclassification when some higher authority, having second thoughts, wants to stop disclosure.

Similarly, the Clinton order states: "Compilations of items of information which are individually unclassified may be classified if the compiled information reveals an additional association or relationship that (1) meets the standards for classification under this order; and (2) is not otherwise revealed in the individual items of information." At issue here is the so-called "mosaic theory" that individual items of unclassified information, in aggregation, result in classifiable information. At dispute is the question of perception: government officials classify aggregated unclassified information items because they fear that harm to the national security could result if the aggregation were publicly disclosed.

E.O. 12958 continues to allow agency officials to "refuse to confirm or deny the existence or nonexistence of requested information whenever the fact of its existence or nonexistence is itself classified under this order."

Classification Challenges

E.O. 12958 authorized classification challenges. "Authorized holders of information who, in good faith, believe that its classification status is improper," says the order, "are encouraged and expected to challenge the classification status of the information in accordance with agency procedures."

A Balancing Test

Another innovation, first introduced by E.O. 12065, President Jimmy Carter's security classification directive, but eliminated in E.O. 12356, is the so-called balancing test. According to E.O. 12958, where "the need to protect ... information may be outweighed by the public interest in disclosure of the

information, and in these cases the information should be declassified," the question "shall be referred to the agency head or the senior agency official" responsible for classification matters for resolution. Because there was insufficient opportunity for the balancing test of E.O. 12065 to be implemented, the effect of the provision could not be assessed. E.O. 12958 provides an opportunity to conduct such an analysis sometime in the future.

Program Direction

E.O. 12958 originally vested responsibility for implementing and supervising the security classification program in the director of the Office of Management and Budget (OMB), assisted by the director of the Information Security Oversight Office (ISOO).[1710] The Clinton order also indicates that the Security Policy Board, a secretive body established in May 1994 by Presidential Decision Directive 29, a classified instrument, "shall make a recommendation to the President ... with respect to the issuance of a Presidential directive on safeguarding classified information." This subsequent directive, according to E.O. 12958, "shall pertain to the handling, storage, distribution, transmittal and destruction of and accounting for classified information."

New Organizations

Finally, E.O. 12958 creates two new entities. The first of these, the Interagency Security Classification Appeals Panel (ISCAP), is composed of senior level representatives of the Secretary of State, Secretary of Defense, Attorney General, Director of Central Intelligence, Archivist of the United States, and Assistant to the President for National Security Affairs. The President selects the panel's chair from among its members. The ISOO director serves as the ISCAP executive secretary and provides support staff. The functions of the panel, as specified in the Clinton order, are (1) to make final determinations on classification challenges appealed to it; (2) to approve, deny, or amend exemptions from automatic declassification sought by agencies; (3) to make final determinations on mandatory declassification review requests appealed to it; and, (4) generally, to advise and assist the President "in the discharge of his constitutional and discretionary authority to protect the national security of the United States."

The second body established by the Clinton executive order, the Information Security Policy Advisory Council (ISPAC), is "composed of seven members appointed by the President for staggered terms not to exceed four years, from among persons who have demonstrated interest and expertise in an area related

---

[1710] Conferees on the FY1995 Treasury, Postal Service, and Executive Office of the President appropriation transferred ISOO from the General Services Administration to OMB (H.Rept. 103-741, p. 42). At the recommendation of the OMB director, conferees on the FY1996 Treasury, Postal Service, and Executive Office of the President appropriation transferred ISOO to the National Archives and Records Administration (H.Rept. 104-291, pp. 41-42).

to the subject matters of [E.O. 12958] and are not otherwise employees of the Federal Government." The functions of the ISPAC, as specified in the order, are to "(1) advise the President, the Assistant to the President for National Security Affairs, the Director of the Office of Management and Budget, or such other executive branch officials as it deems appropriate, on policies established under [E.O. 12958] or its implementing directives, including recommended changes to those policies; (2) provide recommendations to agency heads for specific subject areas for systematic declassification review; and (3) serve as a forum to discuss policy issues in dispute."

E.O. 12958 became effective on October 15, 1995, 180 days from the date of its issuance by the President.[1711] An amending directive, E.O. 13142 of November 19, 1999, largely effected technical changes reflecting the transfer of ISOO to the National Archives and the administrative direction of the Archivist.[1712]

Bush's Amendments to E.O. 12958

Further amendment of E.O. 12958 occurred in late March 2003 when President George W. Bush issued E.O. 13292.[1713] The product of a review and reassessment initiated in the summer of 2001, the directive, among other changes,

- eliminated the Clinton order's standard that information should not be classified if there is "significant doubt" about the need to do so;
- treats information obtained in confidence from foreign governments as classified;
- authorizes the Vice President, "in the performance of executive duties," to classify information originally;
- adds "infrastructures" and "protection services" to the categories of classifiable information;
- eases the reclassification of declassified records;
- postpones the starting date for automatic declassification of protected records 25 or more years old from April 17, 2003, to December 31, 2006;
- eliminates the requirement that agencies prepare plans for declassifying records;
- cancels the order requiring the Archivist to create a "government wide database of information that has been declassified," and instead requires

the "Director of the Information Security Oversight Office … [to] coordinate the linkage and effective utilization of existing agency databases of records that have been declassified and publicly released"; and

- permits the Director of Central Intelligence to block declassification actions of the ISCAP, unless overruled by the President.

Since E.O. 13292 was issued, there have been no further changes to E.O. 12958.

Obama's Review of E.O. 12958

On May 27, 2009, President Barack H. Obama issued a memorandum ordering a review of E.O. 12958.[1714] The President wrote,

> *[M]y Administration is committed to operating with an unprecedented level of openness. While the Government must be able to prevent the public disclosure of information where such disclosure would compromise the privacy of American citizens, national security, or other legitimate interests, a democratic government accountable to the people must be as transparent as possible and must not withhold information for self-serving reasons or simply to avoid embarrassment.*[1715]

To achieve these goals, the assistant to the President for National Security Affairs (commonly known as the National Security Advisor) is to submit to the President "recommendations and proposed revisions" to E.O. 12958 regarding[1716]

(i) Establishment of a National Declassification Center to bring appropriate agency officials together to perform collaborative declassification review under the administration of the Archivist of the United States;

(ii) Effective measures to address the problem of over classification, including the possible restoration of the presumption against classification, which would preclude classification of information where there is significant doubt about the need for such classification, and the implementation of increased accountability for classification decisions;

[1714] President Barack H. Obama, "Memorandum of May 27, 2009—Classified Information and Controlled Unclassified Information," 74 Federal Register 26277-26280, June 1, 2009.

[1715] Ibid., p. 26277.

[1716] The memorandum also orders a review of the procedures for controlled unclassified information. For an introduction to this topic, see the National Archives, "What is Controlled Unclassified Information?" at http://www.archives.gov/ cui/.

(iii) Changes needed to facilitate greater sharing of classified information among appropriate parties;
(iv) Appropriate prohibition of reclassification of material that has been declassified and released to the public under proper authority;
(v) Appropriate classification, safeguarding, accessibility, and declassification of information in the electronic environment, as recommended by the Commission on the Intelligence Capabilities of the United States Regarding Weapons of Mass Destruction and others; and
(vi) Any other measures appropriate to provide for greater openness and transparency in the Government's security classification and declassification program while also affording necessary protection to the Government's legitimate interests.[1717]

The National Security Advisor's response was due in 90 days.

Obama Revokes E.O. 12958 and Issues a New Executive Order

President Obama signed an executive order on December 29, 2009, that revokes E.O. 12958 and "prescribes a uniform system for classifying, safeguarding, and declassifying national security information."[1718] The order made a number of significant changes to current information policies, such as (1) requiring the establishment of a National Declassification Center at the National Archives; (2) ending the E.O. 13292 policy of empowering the Director of Central Intelligence to block declassification actions; and (3) declaring that "no information may remain classified indefinitely." The President's accompanying memorandum to agency heads directs that

> *Under the direction of the National Declassification Center (NDC), and utilizing recommendations of an ongoing Business Process Review in support of the NDC, referrals and quality assurance problems within a backlog of more than 400 million pages of accessioned Federal records previously subject to automatic declassification shall be addressed in a manner that will permit public access to all declassified records from this backlog no later than December 31, 2013.*[1719]

Summary

The protection of classified national security and other controlled information is of concern not only to the executive branch—which determines what information is to be safeguarded, for the most part—but also to Congress, which uses the information to fulfill its constitutional responsibilities, particularly overseeing the executive as well as legislating public policy. It has established mechanisms to safeguard controlled information in its custody, although these arrangements have varied over time, between the two chambers, and among panels in each. Both chambers, for instance, have created offices of security to consolidate relevant responsibilities, although these were established two decades apart. Other differences exist at the committee level. Proposals for change, some of which are controversial, usually seek to set uniform standards or heighten requirements for access. Classification of national security information is governed for the most part by executive order as well as public law. For coverage of this issue, see CRS Report RL33494, Security Classified and Controlled Information: History, Status, and Emerging Management Issues, by Kevin R. Kosar, and CRS Report RS21900, The Protection of Classified Information: The Legal Framework, by Jennifer K. Elsea, for more information.

This report will be updated as conditions require.

Current Practices and Procedures

Congress relies on a variety of mechanisms and instruments to protect classified information in its custody. These include House and Senate offices responsible for setting and implementing standards for handling classified information; detailed committee rules for controlling access to such information; a secrecy oath for all Members and employees of the House and of some of its committees; security clearances and nondisclosure agreements for staff; and formal procedures for investigations of suspected security violations. Public law, House and Senate rules, and committee rules, as well as custom and practice (including informal arrangements), constitute the bases for these requirements.[1721]

Chamber Offices of Security and Security Manuals

The chambers have approached their security program differently, although each now has an office of security.

Senate

The Senate established an Office of Senate Security in 1987, as the result of a bipartisan effort over two Congresses. It is charged with consolidating

Rept. 100-5 (1987), pp. 3-4; Joint Committee on the Organization of Congress, Committee Structure, Hearings, 103rd Cong., 1st sess. (1993), pp. 64-79, 312-316, 406-417, and 832-841; and Senate Select Committee on Intelligence, Meeting the Espionage Challenge, S. Rept. 99-522, 99th Cong., 2nd sess. (1986), pp. 90-95. A number of CRS reports deal with aspects of this area: CRS Report R40136, Congress as a Consumer of Intelligence Information, by Alfred Cumming; CRS Report R40691, Sensitive Covert Action Notifications: Oversight Options for Congress, by Alfred Cumming; CRS Report R40698, "Gang of Four" Congressional Intelligence Notifications, by Alfred Cumming; CRS Report RL32525, Congressional Oversight of Intelligence: Current Structure and Alternatives, by Frederick M. Kaiser; CRS Report R40602, The Department of Homeland Security Intelligence Enterprise: Operational Overview and Oversight Challenges for Congress, by Mark A. Randol; and CRS Report RL33616, Homeland Security Intelligence: Perceptions, Statutory Definitions, and Approaches, by Mark A. Randol.

information and personnel security.[1722] Located in the Office of the Secretary of the Senate, the Security Office sets and implements uniform standards for handling and safeguarding classified and other sensitive information in the Senate's possession. The Security Office's standards, procedures, and requirements—detailed in its Senate Security Manual, initially issued in 1988—"are binding upon all employees of the Senate."[1723] These cover committee and Member office staff and officers of the Senate as well as consultants and contract personnel—but not Members themselves. The regulations extend to a wide range of matters on safeguarding classified information: physical security requirements; procedures for storing materials; mechanisms for protecting communications equipment; security clearances and nondisclosure agreements for all Senate staff needing access; and follow-up investigations of suspected security violations by employees.

House

The House put its own security office in place, under the jurisdiction of the Sergeant at Arms, in 2005, following approval of the chamber's Committee on House Administration.[1724] The office, similar to the Senate predecessor, is charged with developing an Operations Security Program for the House. Its responsibilities and jurisdiction encompass processing security clearances for staff, handling and storing classified information, managing a counterintelligence program for the House, and coordinating security breach investigations. Unlike its Senate counterpart, however, the House Office of Security has not issued a security manual. Prior to the House Office of Security, the chamber had relied on individual committee and Member offices to set requirements following chamber and committee rules, guidelines in internal office procedural manuals, and custom.

Security Clearances and Nondisclosure Agreements for Staff

Security clearances and written nondisclosure agreements can be required for congressional staff but have been handled differently by each chamber.[1725] The

---

[1722] Congressional Record, vol. 133, July 1, 1987, pp. 18506-18507. The resolution creating the new office (S.Res. 243, 100th Cong.) was introduced and approved on the same day.

[1723] U.S. Senate, Office of Senate Security, Security Manual (revised, 2007), preface.

[1724] The two relevant letters—one requesting an Operations Security Program under the direction of the House Sergeant at Arms and the other granting approval—are, respectively, to the Chairman of the House Committee on House Administration, from the House Sergeant at Arms, February 25, 2003; and to the House Sergeant at Arms, from the Chairman of the House Committee on House Administration, March 28, 2003.

[1725] The congressional support agencies—i.e., Congressional Budget Office, Congressional Research Service (as well as the Library of Congress), and Government Accountability Office—

Senate Office of Security mandates such requirements for all Senate employees needing access to classified information.[1726] No comparable across-the-board rules and regulations for security clearances or secrecy agreements yet exist for all House employees, although individual offices require these.[1727] These could be applied by the office of security in the future, if the House agrees.

Secrecy Oath for Members and Staff

The House and Senate differ with regard to secrecy oaths for Members and staff. Beginning with the 104th Congress, the House adopted a secrecy oath for all Members, officers, and employees of the chamber. Before any such person may have access to classified information, he or she must

> *solemnly swear (or affirm) that I will not disclose any classified information received in the course of my service with the House of Representatives, except as authorized by the House of Representatives or in accordance with its Rules.*[1728]

Previously, a similar oath was required for only Members and staff of the House Permanent Select Committee on Intelligence; its requirement had been added in the 102nd Congress as part of the Select Committee's internal rules, following abortive attempts to establish it in public law.[1729] It is still in effect for select committee Members and staff:

> *I do solemnly swear (or affirm) that I will not disclose or cause to be disclosed any classified information in the course of my service on the House Permanent Select Committee on Intelligence, except when authorized to do so by the Committee or the House of Representatives.*[1730]

Other adoptions have occurred under committee rules. The House Committee on Homeland Security, for instance, requires an oath from each Committee Member or staff seeking access, modeled after the one developed by the House

---

have separate personnel security systems and policies. Nonetheless, each requires security clearances for its staff to gain access to classified information.

[1726] Senate Office of Senate Security, Security Manual, pp. 8 and 10.

[1730] House Intelligence Committee, Rules, Rule 14(d).

Intelligence Committee.[1731] Neither the full Senate nor any Senate panel apparently imposes a similar obligation on its Members or employees.

Investigation of Security Breaches

The Senate Office of Security and the House counterpart are charged with investigating or coordinating investigations of suspected security violations by employees.[1732] In addition, investigations by the House and Senate Ethics Committees of suspected breaches of security are authorized by each chamber's rules, directly and indirectly. The Senate Ethics Committee, for instance, has the broad duty to "receive complaints and investigate allegations of improper conduct which may reflect upon the Senate, violations of law, violations of the Senate Code of Official Conduct, and violations of rules and regulations of the Senate."[1733] The panel is also directed "to investigate any unauthorized disclosure of intelligence information [from the Senate Intelligence Committee] by a Member, officer or employee of the Senate."[1734] The House, in creating its Permanent Select Committee on Intelligence, issued similar instructions. H.Res. 658 ordered the Committee on Standards of Official Conduct to "investigate any unauthorized disclosure of intelligence or intelligence-related information [from the House Intelligence Committee] by a Member, officer, or employee of the House .... "[1735]

Sharing Information with Non-Committee Members

Procedures controlling access to classified information held by committees exist throughout Congress. These committee and chamber rules set conditions for sharing such information with other panels and Members, determining who is eligible for access to a committee's classified holdings directly or its executive session hearings, who can be given relevant information, and, if so, to what extent and in what form.[1736]

[1733] S.Res. 388, 88th Congress.

[1734] S.Res. 400, 94th Congress.

[1735] H.Res. 658, 95th Congress.

[1736] For examples of this in the intelligence area, see the following CRS reports: CRS Report R40136, Congress as a Consumer of Intelligence Information, by Alfred Cumming; CRS Report R40691, Sensitive Covert Action Notifications: Oversight Options for Congress, by Alfred Cumming; CRS Report R40698, "Gang of Four" Congressional Intelligence Notifications, by

The most exacting requirements along all of these lines have been developed by the House Permanent Select Committee on Intelligence; the rules are based on its 1977 establishing authority and reinforced by intelligence oversight provisions in public law, such as the 1991 Intelligence Authorization.[1737] The panel's controls apply to select committee Members sharing classified information outside the committee itself as well as to non-committee Representatives seeking access to the panel's holdings.[1738] In the latter case, the requester must go through a multistage process to obtain access.[1739] Consequently, it is possible for a non-committee Member to be: denied attendance at its executive sessions or access to its classified holdings; given only a briefing on it; granted partial access; or allowed full access. When the House Intelligence Committee releases classified information to another panel or non-member, moreover, the recipient must comply with the same rules and procedures that govern the intelligence committee's control and disclosure requirements.[1740] By comparison, rules of the House Armed Services Committee are to "ensure access to information [classified at Secret or higher] by any member of the Committee or any other Member, Delegate, or Resident Commissioner of the House of Representatives .... who has requested the opportunity to review such material."[1741]

Proposals for Change

A variety of proposals—coming from congressional bodies, government commissions, and other groups—have called for changes in the procedures for handling and safeguarding classified information in the custody of Congress. These plans, some of which might be controversial or costly, focus on setting uniform standards for congressional offices and employees and heightening the access eligibility requirements.

Mandate That Members of Congress Hold Security Clearances to Be Eligible for Access to Classified Information

---

Alfred Cumming; CRS Report RL32525, Congressional Oversight of Intelligence: Current Structure and Alternatives, by Frederick M. Kaiser; CRS Report R40602, The Department of Homeland Security Intelligence Enterprise: Operational Overview and Oversight Challenges for Congress, by Mark A. Randol; and CRS Report RL33616, Homeland Security Intelligence: Perceptions, Statutory Definitions, and Approaches, by Mark A. Randol.

[1737] H.Res. 658, 95th Congress; and P.L. 102-88, 105 Stat. 441. For background, see Kaiser, "Congressional Rules and Conflict Resolution."

[1738] Intelligence Committee, Rules, Rules 13(b) and 14(f).

[1739] Ibid., Rule 14(f).

[1740] Ibid., Rule 14(f)(4)(B).

[1741] U.S. House Committee on Armed Services, Rules of the Committee, 111th Congress, Rule 20(b).

This would mark a significant departure from the past. Members of Congress (as with the President and Vice President, Justices of the Supreme Court, or other federal court judges) have never been required to hold security clearances. Most of the proposals along this line appeared in the late 1980s, following charges and countercharges between the executive and legislative branches over unauthorized disclosure of classified information. A more recent bill, introduced in 2006, would have required a security clearance for Members serving on the House Permanent Select Committee on Intelligence and on the Subcommittee on Defense of the House Appropriations Committee.[1742] The resolution, however, did not specify which entity (in the legislative or executive branch) would conduct the background investigation or which officer (in Congress or in the executive) would adjudicate the clearances.

The broad mandate for such clearances could be applied to four different groups: (1) all Senators and Representatives, thus, in effect, becoming a condition for serving in Congress; (2) only Members seeking access to classified information, including those on panels receiving it; (3) only Members on committees which receive classified information; or (4) only those seeking access to classified information held by panels where they are not members.

Under a security clearance requirement, background investigations might be conducted by an executive branch agency, such as the Office of Personnel Management or Federal Bureau of Investigation; by a legislative branch entity, such as the House or Senate Office of Security, or the Government Accountability Office; or possibly by a private investigative firm under contract. Possible adjudicators—that is, the officials who would judge, based on the background investigation, whether applicants would be "trustworthy" and, therefore, eligible for access to classified information—could extend to the majority or minority leaders, a special panel in each chamber, a chamber officer, or even an executive branch officer, if Congress so directed.

The main goals behind this proposed change are to tighten and make uniform standards governing eligibility for access for Members. Proponents maintain that it would help safeguard classified information by ensuring access only by Members deemed "trustworthy" and, thereby, limit the possibility of leaks and inadvertent disclosures. In addition, the clearance process itself might make recipients more conscious of and conscientious about the need to safeguard this information as well as the significance attached to it. As a corollary, supporters might argue that mandating a clearance to serve on a panel possessing classified information could increase its members' appreciation of the information's importance and its protection's priority. This, in turn, might help the committee members gain the access to information that the executive is otherwise reluctant to share and improve comity between the branches.

[1742] H.Res. 747, 109th Congress.

Opponents, by contrast, contend that security clearance requirements would compromise the independence of the legislature if an executive branch agency conducted the background investigation; had access to the information it generated; or adjudicated the clearance. Even if the process was fully under legislative control, concerns might arise over: its fairness, impartiality, objectivity, and correctness (if determined by an inexperienced person); the effects of a negative judgment on a Member, both inside and outside Congress; and the availability of information gathered in the investigation, which may not be accurate or substantiated, to other Members or to another body (such as the chamber's ethics committee or Justice Department), if it is seen as incriminating in matters of ethics or criminality. Opponents might contend, moreover, that adding this new criterion could have an adverse impact on individual Members and the full legislature in other ways. Opponents also maintain that it might impose an unnecessary, unprecedented, and unique (among elected federal officials and court judges) demand on legislators; create two classes of legislators, those with or without a clearance; affect current requirements for non-Member access to holdings of committees whose own members might need clearances; possibly jeopardize participation by Members without clearances in floor or committee proceedings (even secret sessions); and retard the legislative process, while investigations, adjudications, and appeals are conducted.

Direct Senators or Senate Employees to Take or Sign a Secrecy Oath to Be Eligible for Access

This proposal would require a secrecy oath for Senators and staffers, similar to the current requirement for their House counterparts. An earlier attempt to mandate such an oath for all Members and employees of both chambers of Congress seeking access to classified information occurred in 1993; but it was unsuccessful.[1743] If approved, it would have prohibited intelligence entities from providing classified information to Members of Congress and their staff, as well as officers and employees of the executive branch, unless the recipients had signed a nondisclosure agreement—pledging that he or she "will not willfully directly or indirectly disclose to any unauthorized person any classified information"—and the oath had been published in the Congressional Record.[1744]

Direct All Cleared Staff—or Just Those Cleared for the Highest Levels—to File Financial Disclosure Statements Annually

This demand might make it easier to detect and investigate possible misconduct instigated for financial reasons. And many staff with clearances may already file

[1743] Congressional Record, daily ed., vol. 139, Aug. 4, 1993, pp. H5770-H5773; and Nov. 18, 1993, p. H10157.

[1744] Ibid.

financial disclosure statements because of their employment rank or salary level; consequently, few new costs would be added. Nonetheless, objections might arise because the proposal would impose yet another burden on staff and result in additional record-keeping and costs. This requirement's effectiveness in preventing leaks or espionage might also be questioned by opponents.

Require Polygraph Examinations and/or Drug Tests for Staff to Be Eligible for Access to Classified Information

Under such proposals, drug or polygraph tests could be imposed as a condition of employment for personnel in offices holding classified information, only on staff seeking access to such information, or for both employment and access. Objections have been expressed to such tests, especially as a pre-condition of employment, however, because of their cost and questioned reliability and validity.[1745]

[1745] For background on polygraph testing, see CRS Memorandum, Polygraph Examinations of Federal Employees and Applicants, by Frederick M. Kaiser.

National Security Whistleblowers

National Security Whistleblowers, RL33215 (December 30, 2005).

Summary

To discharge its constitutional duties, Congress depends on information obtained from the executive branch. Domestic and national security information is provided through agency reports and direct communications from department heads, but lawmakers also receive information directly from employees within the agencies. They take the initiative in notifying Congress, its committees, and Members of Congress about alleged agency illegalities, corruption, and waste within the agency. This type of information comes from a group known as whistleblowers.

Through such techniques as "gag orders" and nondisclosure agreements, Presidents have attempted to block agency employees from coming directly to Congress. In response, Congress has enacted legislation in an effort to assure the uninterrupted flow of domestic and national security information to lawmakers and their staffs. Members of Congress have made it clear they do not want to depend solely on information provided by agency heads. Overall, the issue has been how to protect employees who are willing to alert Congress about agency wrongdoing.

The first procedures enacted to protect agency whistleblowers appeared in the Civil Service Reform of 1978. It also contained language that excluded protections to whistleblowers who work in federal agencies involved in intelligence and counterintelligence. In 1989, Congress passed the Whistleblower Protection Act in an effort to strengthen statutory protections for federal employees who assist in the elimination of fraud, waste, abuse, illegality, and corruption. That statute continued the exemption for national security information. It did not authorize the disclosure of any information by an agency or any person that is (1) specifically prohibited from disclosure by any other provision of law, or (2) "specifically required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs."

Several statutes apply expressly to national security information. Congress has passed a series of laws known collectively as the Military Whistleblowers Protection Act, under which members of the military may give information to Members of Congress. It also passed the Intelligence Community Whistleblower Protection Act of 1998 to encourage the reporting to Congress of wrongdoing within the intelligence agencies. In crafting this legislation, Congress has sought to balance its need for information with national security requirements, giving intelligence community whistleblowers access to Congress only through the intelligence committees. For legal analysis see CRS Report 97-787 A, Whistleblower Protections for Federal Employees, by L. Paige Whitaker and Michael Schmerling.

This report will be updated as events warrant.

National Security Whistleblowers

Congress and the President have often collided over access to information within the executive branch. Although executive officials recognize that they have a duty to keep Congress informed and to share agency documents, domestic as well as national security, on some occasions the executive branch will invoke different types of privileges to block congressional access. Congressional committees can issue subpoenas and either house may hold executive officials in contempt for refusing to release documents or to testify. However, those measures are extreme and are taken only after customary efforts to find a compromise have collapsed. In the midst of some of these confrontations, Presidents have issued orders to executive agencies to limit information to Congress, particularly to prevent agency employees from going directly to Congress. Congress has responded with statutes to keep the lanes of information open.

In cases involving the reporting of sensitive information related to national security, Congress has balanced the competing interests of keeping lawmakers informed while safeguarding secrets. For example, the Intelligence Community Whistleblower Protection Act of 1998 encourages employees of the Intelligence Community to contact Congress but only through the Intelligence Committees.

Introduction

Agency whistleblowers operate within a system of mixed messages. On the one hand, the Code of Ethics adopted by Congress in 1958 directs all government employees to "expose corruption wherever discovered."[1746] Over the years, agency employees have received credit for revealing problems of defense cost overruns, unsafe nuclear power plant conditions, questionable drugs approved for

[1746] 72 Stat. B12 (1958) (H. Con. Res. 175).

marketing, contractillegalities and improprieties, and regulatory corruption.[1747] On the other hand, exposing corruption can result in their being fired, transferred, reprimanded, denied promotion, or harassed. In 1978, a Senate panel found that the fear of reprisal "renders intra-agency communications a sham, and compromises not only the employee, management, and the Code of Ethics, but also the Constitutional function of congressional oversight itself."[1748]

Enacting statutory rights for whistleblowers and establishing new executive agencies to protect those rights has not produced the protections that some expected. As explained in this report, the Office of Special Counsel, the Merit Systems Protection Board, and the Federal Circuit——the agencies created by Congress to safeguard the rights of whistleblowers——have not in many cases provided the anticipated protections to federal employees. National security whistleblowers were exempted from the Civil Service Reform Act of 1978 and the Whistleblower Protection Act of 1989. Some protections are available in statutes passed in recent years, including the Intelligence Community Whistleblower Protection Act of 1998. Individual Members and congressional committees have attempted to provide long-term protections to whistleblowers, enabling them to provide the kinds of agency information that Congress wants without costs and injuries to their government careers.

The purpose of this report is to explore the statutory and political protections available to national security whistleblowers. First, an examination of the Civil Service Reform Act and the Whistleblower Protection Act will explain why national security whistleblowers were excluded from the protections provided in those statutes. Second, to the extent that those statutes are considered models to protect national security whistleblowers, the experience of the Office of Special Counsel, the Merit Systems Protection Board, and the Federal Circuit is relevant in evaluating protections for national security whistleblowers.

Whistleblower activity is often viewed as a struggle between the executive and legislative branches. Presidents may decide to centralize control of agency information by requiring the agency head to approve the release of any information. Members of Congress regularly express a need to obtain information from employees within the agency, without seeking the approval of the agency head. This conflict between the branches is seen in the issuance of executive orders by Presidents Theodore Roosevelt and William Howard Taft in 1902 and 1909 and the resulting legislation——the Lloyd-LaFollette Act of 1912——adopted by Congress to maintain access to agency information. The

[1747] The Whistleblowers: A Report on Federal Employees Who Disclose Acts of Governmental Waste, Abuse, and Corruption, prepared for the Senate Committee on Governmental Affairs, 95th Cong., 2nd sess. 1 (Comm. Print, Feb. 1978).

[1748] Id. at 49.

constitutionality of the Lloyd-LaFollette Act continues to be challenged today by the Justice Department.

"Gag Orders" and Lloyd-LaFollette

Both Presidents Theodore Roosevelt and William Howard Taft threatened to fire agency employees who attempted to contact Congress. Employees were ordered to communicate only through the head of their agency. Congress responded by passing legislation intended to nullify that policy and allow employees to contact lawmakers, committees, and legislative staff.

The "Gag Orders"

President Theodore Roosevelt issued an order in 1902 to prohibit employees of executive departments from seeking to influence legislation "individually or through associations" except through the heads of the departments. Failure to abide by this presidential order could result in dismissal from federal service. The order read:

> *All officers and employees of the United States of every description, serving in or under any of the executive departments or independent Government establishments, and whether so serving in or out of Washington, are hereby forbidden, either directly or indirectly, individually or through associations, to solicit an increase of pay or to influence or attempt to influence in their own interest any other legislation whatever, either before Congress or its committees, or in any way save through the heads of the departments or independent Government establishments in or under which they serve, on penalty of dismissal from the Government service.*[1749]

In 1909, President William Howard Taft prepared a similar order, this one forbidding any bureau chief or any subordinate in an agency from going directly to Congress concerning legislation, appropriations, or congressional action of any kind without the consent and knowledge of the department head. Here is the language:

> *It is hereby ordered that no bureau, office, or division chief, or subordinate in any department of the Government, and no officer of the Army or Navy or Marine Corps stationed in Washington, shall apply to either House of Congress, or to any committee of either House of Congress, or to any Member of Congress, for legislation, or for appropriations, or for congressional action of any kind, except with the consent and knowledge of the head of the*

[1749] 48 Cong. Rec. 4513 (1912).

department; nor shall any such person respond to any request for information from either House of Congress, or any committee of either House of Congress, or any Member of Congress, except through, or as authorized by, the head of his department.[1750]

Lloyd-LaFollette Act

Through language added to an appropriations bill in 1912, Congress rejected these presidential orders. Congressional debate emphasized the concerns of lawmakers that the orders, left unchecked, would put congressional committees in the position of hearing "only one side of a case": the views of Cabinet officials. Lawmakers wanted to hear from the rank-and-file members of a department, who could disclose what departments did not want communicated. Some Members of Congress argued that they would not place the welfare of citizens "in the hands and at the mercy of the whims of any single individual, whether he is a Cabinet officer or anyone else."[1751] They insisted on access to agency employees and their complaints and observations about the conduct of their supervisors.[1752] Legislative language was drafted to ensure that agency employees could exercise their constitutional rights to free speech, to peaceable assembly, and to petition the government for redress of grievances.[1753]

During House debate, some legislators objected to the presidential orders as an effort by Presidents to prevent Congress "from learning the actual conditions that surrounded the employees of the service."[1754] If agency employees were required to speak only through the heads of the departments, "there is no possible way of obtaining information excepting through the Cabinet officers, and if these officials desire to withhold information and suppress the truth or to conceal their official acts it is within their power to do so."[1755] If no agency employee was allowed to speak directly to Congress and could communicate only through the department and eventually the Cabinet officer, "then this is an aristocratic Government, dominated completely by the official family of the President."[1756] Another legislator remarked: "The vast army of Government employees have

[1756] Id.

signed no agreement upon entering the service of the Government to give up the boasted liberty of the American citizens."[1757]

Those themes also emerged during Senate debate. One Senator said "it will not do for Congress to permit the executive branch of this Government to deny to it the sources of information which ought to be free and open to it, and such an order as this, it seems to me, belongs in some other country than the United States."[1758] The language used to counter the presidential orders was added as Section 6 to the Postal Service Appropriations Act of 1912.[1759] Section 6, known as the Lloyd-LaFollette Act, provides for procedural safeguards to protect agency officials from arbitrary dismissals when they attempt to communicate with Congress. The final sentence of Section 6 reads: "The right of persons employed in the civil service of the United States, either individually or collectively, to petition Congress, or any Member thereof, or to furnish information to either House of Congress, or to any committee or member thereof, shall not be denied or interfered with."

Section 6 was later carried forward and supplemented by the Civil Service Reform Act of 1978 and is codified as permanent law.[1760] The conference report on the 1978 statute explained why Congress depends on agency employees to disclose information directly to the legislative branch. The Civil Service Reform Act placed limitations on the kinds of information an employee may publicly disclose without suffering reprisal, but the conference report stated that there was "no intent to limit the information an employee may provide to Congress or to authorize reprisal against an employee for providing information to Congress." Nothing in the statute was to be construed "as limiting in any way the rights of employees to communicate with or testify before Congress."[1761]

As codified in 1978, the "right of employees, individually or collectively," to petition Congress becomes an enforceable right, and other prohibited personnel practices are identified.[1762] The U.S. Code now provides that various qualifications to the provision on prohibited personnel practices "shall not be

[1762] 92 Stat. 1216-17, § 703(a)(2) (1978). The section on prohibited personnel practices provides: "This subsection shall not be construed to authorize the withholding of information from the Congress or the taking of any personnel action against an employee who discloses information to the Congress." Id. at 1117.

construed to authorize the withholding of information from the Congress or the taking of any personnel action against an employee who discloses information to the Congress."[1763]

Civil Service Reform Act of 1978

Congress passed legislation in 1978 to abolish the Civil Service Commission and create such new institutions as the Office of Personnel Management (OPM), the Merits Systems Protection Board (MSPB), and the Office of Special Counsel (OSC). The statute was the first to establish procedural protections for whistleblowers, but also recognized an exception for the national security area. Because of conflicting values in the legislation, however, whistleblowers never received the anticipated protections, and Congress took note of that a decade later when it passed the Whistleblower Protection Act of 1989.[1764] This record is examined in subsequent sections on "Whistleblower Protections in Practice" and "Congressional Action, 1986-88." As explained in this report, the statutory safeguards in the Whistleblower Protection Act did not meet the expectations of some lawmakers, agency employees, and private organizations.

Whistleblowers

The Civil Service Reform Act included the following as one of nine merit systems principles: "Employees should be protected against reprisal for the lawful disclosure of information which the employees reasonably believe evidences (A) a violation of any law, rule, or regulation, or (B) mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety."[1765]

The Senate Committee on Governmental Affairs, in reporting the bill, remarked that "Often, the whistle blower's reward for dedication to the highest moral principles is harassment and abuse. Whistle blowers frequently encounter severe damage to their careers and substantial economic loss." Protecting these employees who disclose government illegality, waste, and corruption "is a major step toward a more effective civil service. . . . What is needed is a means to assure them that they will not suffer if they help uncover and correct administrative abuses."[1766] The House Committee on Post Office and Civil Service, in its report, said that the bill "prohibits reprisals against employees who divulge information to the press or the public (generally known as "whistleblowers") regarding violations of law, agency mismanagement, or dangers to the public's health and

[1763] 5 U.S.C. § 2302(b) (sentence following para. 12) (2000).

[1764] 103 Stat. 16, § 2 (1989).

[1765] 92 Stat. 1114, § 2301(b)(9) (1978).

[1766] S.Rept. No. 95-969, 95th Cong., 2nd sess. 8 (1978).

safety."[1767] The House committee therefore anticipated that the whistleblower could report on wrongdoing not only through agency channels but also to the press and the public. In supplemental views in this committee report, Representative Pat Schroeder linked whistleblower protection to the needs of legislative oversight: "If we in Congress are going to act as effective checks on excesses in the executive branch, we have to hear about such matters."[1768]

During floor debate, Senator Jim Sasser stated that "patriotic employees who bring examples of official wrongdoing to the public's attention have, in the past, enjoyed no meaningful protection against reprisals by their supervisors." He referred to "too many" examples of federal employees finding themselves "fired, transferred, or deprived of meaningful work simply because they were brave enough to place the public interest ahead of their own personal career interest." He saw no reason why an employee "should have to risk his career and his family's financial stability for performing a public service."[1769]

Special Counsel

In recommending the Civil Service Reform Act, President Jimmy Carter proposed an Office of Special Counsel "to investigate merit violations and to protect the so-called whistleblowers who expose gross management errors and abuses."[1770] At a news conference, he looked to the Special Counsel to protect "those who are legitimate whistleblowers and who do point out violations of ethics, or those who through serious error hurt our country."[1771] The House Committee on Post Office and Civil Service, in reporting the bill, said that the Special Counsel "will have broad authority to investigate, particularly 'whistleblower' cases."[1772]

The statute looked to the Special Counsel to protect the interests of whistleblowers. The Special Counsel, appointed to a term of five years with the advice and consent of the Senate, was directed to "investigate allegations involving prohibited personnel practices and reprisals against Federal employees

for the lawful disclosure of certain information and may file complaints against agency officials and employees who engage in such conduct."[1773]

National Security Exception

As the Senate Committee on Governmental Affairs explained in reporting the Civil Service Reform Act, it was not intended to protect whistleblowers "who disclose information which is classified or prohibited by statute from disclosure."[1774] It was the committee's understanding that "section 102(d)(3) of the National Security Act of 1947, which authorizes protection of national intelligence sources and methods, has been held to be such a statute."[1775]

The section on prohibited personnel practices in the Civil Service Reform Act covered all executive agencies but did not include "the Federal Bureau of Investigation [FBI], the Central Intelligence Agency [CIA], the Defense Intelligence Agency [DIA], the National Security Agency [NSA], and, as determined by the President, any Executive agency or unit thereof the principal function of which is the conduct of foreign intelligence or counterintelligence activities."[1776]

Prohibited personnel practices in the FBI were treated in another section of the statute.[1777] During House debate, Representative Pat Schroeder argued that the FBI whistleblower protections were "necessitated, in part, by the woeful history of this agency in terms of eliminating internal wrongdoing." She stated that an FBI employee "is guaranteed protection if he or she follows the procedures set out." If the employee decided to make public disclosures of the wrongdoing, "this statute does not serve as authorization for the Bureau to take reprisals. The

[1773] 92 Stat. 1112, § 3(4).

[1774] S.Rept. No. 95-969, 95th Cong., 2nd sess. 8 (1978).

[1775] Id. at 21-22. Section 102(d)(3) of the National Security Act of 1947 provides: "For the purpose of coordinating the intelligence activities of the several Government departments and agencies in the interest of national security, it shall be the duty of the [Central Intelligence] Agency, under the direction of the National Security Council . . . to correlate and evaluate intelligence relating to the national security, and provide for the appropriate dissemination of such intelligence within the Government using where appropriate existing agencies and facilities: Provided, That the Agency shall have no police, subpena [sic], law-enforcement powers, or internal-security functions: Provided further, That the departments and other agencies of the Government shall continue to collect, evaluate, correlate, and disseminate departmental intelligence: And provided further, That the Director of Central Intelligence shall be responsible for protecting intelligence sources and methods from unauthorized disclosure." 61 Stat. 498.

[1776] 92 Stat. 1115, § 2302(a)(2)(C)(ii) (1978).

[1777] Id. at 1117, § 2302.

general policy of protecting whistleblowers runs to all Government instrumentalities."[1778]

Such intelligence agencies as the CIA and the DIA were not specifically covered by the Civil Service Reform Act. Moreover, a subsection on actions to be taken by authorized supervisory employees referred to the special category of confidential or secret information. Supervisors were prohibited from taking or failing to take a personnel action with respect to any employee or applicant for employment as a reprisal for a disclosure of information by an employee or applicant which they reasonably believed evidences (1) a violation of any law, rule, or regulation, or (2) mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety "if such disclosure is not specifically prohibited by law and if such information is not specifically required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs."[1779] The language recognized the President's authority to designate certain information as confidential or secret, excluding national security whistleblowers from automatic protection. However, Representative Schroeder argued that the Civil Service Reform Act "applies the merit system principles to all units of the Federal Government," and that "while specific enforcement provisions are not mandated for agencies like CIA and GAO, the legislation makes it clear that whistleblowers should be protected in these agencies."[1780]

In the event the Special Counsel received from an agency employee foreign intelligence or counterintelligence information, "the disclosure of which is specifically prohibited by law or by Executive order," the statute directed the Special Counsel to transmit that information to the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence.[1781] The Special Counsel was directed to make available to the public a list of noncriminal matters referred to agency heads, but "shall take steps to ensure that any such public list does not contain any information the disclosure of which is prohibited by law or by Executive order requiring that information be kept secret in the interest of national defense or the conduct of foreign affairs."[1782]

Communications with Congress

[1778] 124 Cong. Rec. 34100 (1978).

[1779] 92 Stat. 1116, § 2302(b)(8).

[1780] 124 Cong. Rec. 34100 (1978).

[1781] 92 Stat. 1127, § 1206(b)(9).

[1782] 92 Stat. 1128, § 1206(d).

The Senate Committee on Governmental Affairs added to the bill a provision to ensure that nothing in the section on prohibited personnel practices "will authorize the withholding of any information from Congress, or will sanction any personnel action against an employee who discloses any information to a Member of Congress or its staff, either in public session or through private communications." Moreover, nothing in the bill was to be construed "as limiting in any way the rights of employees to communicate with or testify before Congress, such as is provided in 5 U.S.C. 7102 (right to furnish information protected), or in 18 U.S.C. 1505 (right to testify protected)."[1783]

The conference report, in adopting the Senate provision, explained that it "is intended to make clear that by placing limitations on the kinds of information any employee may publicly disclose without suffering reprisal, there is no intent to limit the information an employee may provide to Congress or to authorize reprisal against an employee for providing information to Congress." As further explanation:

> *For example, 18 U.S.C. 1905 prohibits public disclosure of information involving trade secrets. That statute does not apply to transmittal of such information by an agency to Congress. Section 2302(b)(8) of this act would not protect an employee against reprisal for public disclosure of such statutorily protected information, but it is not to be inferred that an employee is similarly unprotected if such disclosure is made to the appropriate unit of the Congress. Neither title I nor any other provision of the act should be construed as limiting in any way the rights of employees to communicate with or testify before Congress.*[1784]

As enacted, the subsection of prohibited personnel practices states that it "shall not be construed to authorize the withholding of information from the Congress or the taking of any personnel action against an employee who discloses information to the Congress."[1785]

Inspectors General

In the same year that Congress passed the Civil Service Reform Act, it completed action on legislation to establish offices of inspectors general in twelve executive agencies. More inspectors general would be created in subsequent statutes. The purpose was to create independent offices "to conduct and supervise audits and

[1785] 92 Stat. 1117 (1978).

investigations relating to programs and operations" in these agencies.[1786] These offices were expected "to prevent and detect fraud and abuse in, such programs and operations."[1787]

Inspectors general were authorized to receive and investigate complaints or information received from agency employees concerning the "possible existence of an activity constituting a violation of law, rules, or regulations, or mismanagement, gross waste of funds, abuse of authority or a substantial and specific danger to the public health and safety."[1788] Supervisors were prohibited from taking or threatening to take "any action against any employee as a reprisal for making a complaint or disclosing information to an inspector general, unless the complaint was made or the information disclosed with the knowledge that it was false or with willful disregard for its truth or falsity."[1789]

In reporting the section on employee complaints, the Senate Committee on Governmental Affairs remarked: "Because of the employee's position within the agency, employee complaints carry with them a high likelihood of reliability." Given the difficulty of "blowing the whistle" on one's supervisors or colleagues, "the situation may often be serious." The committee believed that "most employees would much prefer an effective channel inside the agency to pursue complaints rather than seeking recourse or publicity outside the agency. This preference should be encouraged."[1790]

The legislative history of the Civil Service Reform Act anticipated that federal agency whistleblowers would report wrongdoing not only to their supervisors but to Congress, the public, and the press. In contrast, the inspectors general statute of 1978 authorized a set of procedures that were entirely in-house. The IGs were directed to keep Congress "fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action."[1791] Inspectors general would furnish semiannual reports to agency heads, who would transmit the reports without change to appropriate committees and subcommittees of Congress.[1792]

Defense Department IG

In 1982, Congress created an inspector general in the Defense Department, authorized to direct audits and investigations that require access to information concerning (1) sensitive operational plans, (2) intelligence matters, (3) counterintelligence matters, (4) ongoing criminal investigations by other administrative units of the Defense Department related to national security, and (5) "other matters the disclosure of which would constitute a serious threat to national security."[1793] The IG would serve as the principal adviser to the Secretary of Defense "for matters relating to the prevention and detection of fraud, waste, and abuse in the programs and operations of the Department."[1794]

The IG statute provided that nothing in the section "shall be construed to authorize the public disclosure of information which is (A) specifically prohibited from disclosure by any other provision of law; (B) specifically required by Executive order to be protected from disclosure in the interest of national defense or national security or in the conduct of foreign affairs; or (C) a part of an ongoing criminal investigation." However, nothing in that section or in any other provision of the statute "shall be construed to authorize or permit the withholding of information from the Congress, or from any committee or subcommittee thereof."[1795]

A Statutory IG for the CIA

The Central Intelligence Agency had an Office of Inspector General, but it was not statutory. Beginning in 1952, the CIA administratively established the position of IG.[1796] The limitations of that office were underscored by the Iran-Contra affair, which became public in November 1986 and highlighted the extent to which the CIA and other executive agencies had failed to comply with statutory restrictions and had not testified fully and accurately to congressional committees about covert operations.[1797] One of the recommendations by the House and Senate Iran-Contra Committees in November 1987 was the creation of an independent statutory IG confirmed by the Senate. The committees concluded that the existing

[1796] CRS Report 89-129 GOV, Office of Inspector General in the Central Intelligence Agency: Development and Proposals, by Frederick M. Kaiser, February 27, 1989.

[1797] Report of the Congressional Committee Investigating the Iran-Contra Affair, H.Rept. No. 100-433 and S.Rept. No. 100-216, 100th Cong., 2nd sess. (1987).

Office of Inspector General in the CIA "appears not to have had the manpower, resources or tenacity to acquire key facts uncovered by other investigations."[1798]

During hearings on March 1, 1988, by the Senate Intelligence Committee, Senator Arlen Specter reviewed some of the misleading testimony that Congress had received about the Iran-Contra affair, including testimony from the CIA.[1799] The next year, Congress established an inspector general for the CIA, "appropriately accountable to Congress" and designed to "promote economy, efficiency, and effectiveness in the administration of such programs and operations, and detect fraud and abuse in such programs and operations."[1800] The IG would provide a means of keeping the Director of the CIA "fully and currently informed about problems and deficiencies relating to the administration of such programs and operations, and the necessity for and the progress of corrective action," and would ensure that the House and Senate Intelligence Committees "are kept similarly informed of significant problems and deficiencies as well as the necessity for and the progress of corrective actions."[1801]

The IG reports directly to and is under the general supervision of the director, who may prohibit the IG "from initiating, carrying out, or completing any audit, inspection, or investigation if the Director determines that such prohibition is necessary to protect vital national security interests of the United States." In exercising that power, the director shall submit "an appropriately classified statement of the reasons for the exercise of such power within seven days to the intelligence committees."[1802]

The creation of the IG also included a whistleblower provision. The IG would receive and investigate "complaints or information from an employee of the Agency concerning the existence of an activity constituting a violation of laws, rules, or regulations, or mismanagement, gross waste of funds, abuse of authority, or a substantial and specific danger to the public health and safety." No action constituting a reprisal, or threat of reprisal, for making such complaint may be taken by any Agency employee in a position to take such actions, "unless the complaint was made or the information was disclosed with the knowledge that it was false or with willful disregard for its truth or falsity."[1803] Additional

procedures for CIA whistleblowing would be enacted in 1998, discussed later in the report.

Creating the Federal Circuit

Under the Civil Service Reform Act, any employee or applicant for employment adversely affected or aggrieved by a final order or decision of the MSPB could obtain judicial review in any of the federal appellate courts.[1804] In 1982, Congress created a new appellate court by consolidating the existing U.S. Court of Customs and Patent Appeals with the appellate division of the existing U.S. Court of Claims. Congress gave the new U.S. Court of Appeals for the Federal Circuit exclusive jurisdiction over any final order or final decision of the MSPB.[1805]

Whistleblower Protections in Practice

For a number of reasons, the whistleblower protections promised in the Civil Service Reform Act failed to materialize. In signing the bill, President Carter said that "it prevents discouraging or punishing [federal employees] for the wrong reasons, for whistleblowing or for personal whim in violation of basic employee rights."[1806] At the signing ceremony, Representative Morris Udall, who managed the bill on the House side, cautioned that "reform has consequences that you don't like sometimes, but the best reforms aren't going to work unless people make them work."[1807]

Competing Priorities

Part of the gap between promise and practice with regard to whistleblower protections resulted from the complex and in some ways conflicting values placed in the statute. Although it expressly stated its intention to protect whistleblowers, a dominant purpose behind the statute was to make it easier to hold federal employees accountable for their performance. In announcing the Administration's civil service reform proposals, President Carter noted "a widespread criticism of Federal Government performance. The public suspects that there are too many Government workers, that they are underworked, overpaid, and insulated from the consequences of incompetence."[1808] Although he immediately dismissed such "sweeping criticisms" as "unfair," much of the impetus behind civil service reform was driven by the belief that managers needed greater discretion in demoting and removing under-performing

employees. In this same address, President Carter referred to the "sad fact" that it is "easier to promote and to transfer incompetent employees than it is to get rid of them."[1809]

Making it Easier to Punish

In reporting the bill, the Senate Committee on Governmental Affairs referred to conditions in federal agencies that made them "too often . . . the refuge of the incompetent employee."[1810] An employee "has no right to be incompetent."[1811] One of the "central tasks" of the bill was "simple to express but difficult to achieve: Allow civil servants to be able to be hired and fired more easily, but for the right reasons."[1812]

Senator Abraham Ribicoff, chairman of the committee that reported the bill, listed two purposes of the legislation without indicating any tension between them. The bill provided "new protection for whistleblowers who disclose illegal or improper Government conduct" while at the same time it "streamline[d] the processes for dismissing and disciplining Federal employees."[1813] He explained that the bill "lowered the standard of evidence needed to uphold the dismissal of an employee who has been fired for poor performance." Instead of a supervisor proving by a "preponderance of evidence" that an employee's performance had not been "up to par," the conferees adopted the "substantial evidence" test to give supervisors greater deference in assessing the work of an employee.[1814] Ironically, if a supervisor found a whistleblower's charges to reflect on poor management within the agency, or if a whistleblower threatened to release information embarrassing to the supervisor, it might now be easier to sanction or remove the whistleblower.

1985 House Hearings

One of the early statements by President Ronald Reagan urged whistleblowers to come forward: "Federal employees or private citizens who wish to report incidents of illegal or wasteful activities are not only encouraged to do so but will be guaranteed confidentiality and protected against reprisals." The "vital

---

element" in fighting fraud and waste "is the willingness of employees to come forward when they see this sort of activity." Employees "must be assured that when they 'blow the whistle' they will be protected and their information properly investigated." He wanted to make it clear that "this administration is providing that assurance to every potential whistleblower in the Federal Government."[1815]

As presiding officer of House hearings on June 26, 1985, Representative Pat Schroeder heard contrary testimony from a variety of government officials, federal employees, and private organizations on the implementation of the whistleblower provisions in the Civil Service Reform Act. She concluded: "There is no dispute ——whistleblowers have no protection. We urge them to come forward, we hail them as the salvation of our budget trauma, and we promise them their place in heaven. But we let them be eaten alive."[1816] Much of the focus of the hearings fell on the performance of the Special Counsel.

Office of the Special Counsel

K. William O'Connor, Special Counsel of the MSPB, testified that his office "has only one client; it is the enforcement of the merit systems and the laws that carry it into effect."[1817] The commitment to protect "bona fide whistleblowers" would be done by "protection of the merit systems, the means designed by Congress to that end and the end that the OSC is charged with effecting."[1818] Federal employees who bring charges of agency wrongdoing "are not the clients of this office; the system is."[1819] Although some witnesses from the Schroeder subcommittee argued that the OSC was principally established to "protect whistleblowers," O'Connor testified that "protection of whistleblowers——even the word whistleblower——does not appear in the code at all. What is required by the statute is the protection of the Merit System . . . ."[1820]

Elsewhere O'Connor recognized the duties of his office with whistleblowers. In identifying the three primary statutory functions of the OSC, he listed this one first: "To provide a secure channel through which disclosures of waste, fraud, inefficiency or hazards to public health or safety may be received and referred

while providing anonymity to the discloser."[1821] He also described a number of recent improvements in the operations of OSC, including "[a]n effective outreach program . . . developed and maintained to apprise whistleblowers of the responsibilities of and protection afforded by this office."[1822] He pledged to "continue to use the statutory powers of this office to protect bona fide whistleblowers from prohibited retaliation for their protected disclosures by enforcing the law. That is, by prosecuting anyone who takes reprisal against them because of their protected disclosures, and by invoking appropriate agency corrective actions."[1823]

O'Connor described how he would handle an employee who had been sanctioned by an agency, even though the employee had been involved in protected whistleblower activities:

> *If an agency sanction was proper because of an employee's incompetence or misconduct, even though the motivation of the deciding or proposing official was contaminated by a de minimus vindictiveness or desire for retaliation and reprisal for protected conduct, the sanction against the employee will probably stand. The reprisal oriented official, however, may be prosecuted by my office and may be disciplined by the Board if the improper motivation of the conduct is not de minimus. This, it seems to me, is a proper and worthy result.*
>
> *It is not in the public interest to employ, retain or cosset drones, incompetents, disruptors of the workplace, malefactors, or those whose conduct is in other unlawful ways inappropriate to the execution of the mission of the organization, even though the person is also an individual who has engaged in specifically protected conduct like whistleblowing. The public interest is, after all, the execution of the public business; it is not a maintenance program for the incompetent, nor is it in the public interest to foster internal dissidence, vituperation, backbiting and disaffection.*[1824]

Representative Schroeder referred to some 11,000 federal employees who had contacted the Office of Special Counsel for relief. O'Connor acknowledged that these individuals had a complaint and thought they had a case, but added: "there

---

[1824] Id. at 250.

are many people who feel that they have complaints, and some of them are carrying bags and walking up and down Constitution Avenue right now, I have no doubt."[1825] When Representative Schroeder pointed out that the women carrying bags up and down the avenue are not on the federal payroll, O'Connor agreed. The point he wanted to make, he said, was that few of the 11,000 complaints were within the scope of responsibilities handled by his office.[1826]

Earlier O'Connor had offered his "firm belief" that most federal managers follow the law and have integrity, whereas "most whistleblowers are malcontents."[1827] In a newspaper article published on July 17, 1984, O'Connor was asked what advice he would give, as a private attorney, to a potential whistleblower. His reply: "I'd say that unless you're in a position to retire or are independently wealthy, don't do it. Don't put your head up, because it will get blown off."[1828]

Congressional Action, 1986-88

On February 20 and 21, 1986, a subcommittee of the House Post Office and Civil Service Committee held additional hearings on whistleblower protections. The testimony showed a wide gap between the perceptions of lawmakers and executive officials. As chair of the subcommittee, Representative Schroeder spoke of a "general consensus" that the whistleblower protections in the Civil Service Reform Act "must be changed if we are to treat Federal employees fairly and provide relief for victims of prohibited personnel practices."[1829] Special Counsel O'Connor testified against the need to pass a bill, introduced in the House, designed to strengthen whistleblower protections: "The bill is flawed conceptually, as well, from inception, for it proceeds upon the false premise that proper law enforcement systems now in effect do not work to protect bona fide whistleblowers. The fact is that, now, the statutory protection works. I oppose the bill."[1830] Stuart E. Schiffer, Deputy Assistant Attorney General, also testified against the bill. When asked whether he believed the existing statutory system was adequate, he replied: "Yes; I do." Asked again whether there was adequate protection for whistleblowers, he again answered: "Yes; I do."[1831]

Proposed Legislation in 1986

The House Post Office and Civil Service Committee reported a whistleblower protection act on September 22, 1986. The purpose was to "strengthen and improve protections for the rights of Federal employees by clarifying the role of the Office of Special Counsel (OSC) and emphasizing that its primary responsibility is to represent individuals who are victims of prohibited personnel practices; by providing Federal employees with a private right of action as an alternative to pursuing cases through the OSC; by permitting the Special Counsel to seek judicial review of MSPB decisions to which the Special Counsel was a party; by protecting the identity of Federal employees who make disclosures; by lessening the standard of proof needed to prove reprisal in the case of whistleblower disclosures;" and other objectives.[1832] The House Subcommittee on Civil Service had been "unable to find a single individual who has gone to the Office of Special Counsel since 1981 who has been satisfied with the investigation of his or her case."[1833]

Action in 1988

Congress did not act on the 1986 legislation, but the House Committee on Post Office and Civil Service reported the bill again in the 100th Congress. The report referred to the results of a study by Dr. Donald R. Soeken who concluded that "most whistleblowers were not protected, and in fact, they suffered cruel and disastrous retaliation for their efforts. . . . It seems to me that the protection has also been a cruel hoax. We ask people to act out of conscience and then we ignore their cries for protection. We allow their careers to be destroyed and watch as the lives of the whistleblowers and their families suffer under the strain."[1834] Mary Lawton, Special Counsel in 1987, testified that "to the extent that there may have been a lack of emphasis on the corrective action authority of the [OSC] office, I have called for an emphasis."[1835]

The Senate Committee on Governmental Affairs reported whistleblower protection legislation on July 6, 1988.[1836] The committee described the results of a 1984 report prepared by the MSPB, "Blowing the Whistle in the Federal Government." It estimated that a large percentage of federal employees (69-70 percent) knew of fraud, waste and abuse but chose not to report it. Moreover, the percentage of employees who did not report government wrongdoing because of

fear of reprisal rose from an estimated 20 percent in 1980 to 37 percent in 1983.[1837]

In reviewing the board's report, the committee agreed that "statutory protections, alone, cannot guarantee the elimination of reprisal among civil servants. Agency heads and supervisors must foster an environment where employees are encouraged to come forward with suggestions and report problems and are appropriately rewarded, rather than punished, for doing so." The statistics included in the board's report "show that Congress' specific statutory efforts to protect whistleblowers thus far have had no observable impact on encouraging federal employees to blow the whistle."[1838]

The Mt. Healthy Test

The committee explained why whistleblowers were vulnerable to reprisal. Even if an employee was successful in proving a connection between a whistleblowing activity and a reprisal, the agency had an opportunity to show that it would have taken the personnel action even if the employee had not engaged in protected conduct. This type of agency defense had been developed by the Supreme Court in Mt. Healthy City School District Board of Education v. Doyle, 429 U.S. 274 (1977) and later had been applied by the MSPB and the courts in reprisal cases. The committee found that the Mt. Healthy test allowed an agency "to search an employee's work record for conduct that can be cited as the reason for taking an adverse action. It has proved to be difficult for employees to refute the agency's contention that it would have taken the personnel action anyway."[1839]

To overcome this problem, the committee proposed that the Mt. Healthy test be modified only for whistleblower reprisal cases. Once an employee had made a prima facie case of reprisal by showing that whistleblowing was a factor in a personnel action, the agency would be required to show by "clear and convincing evidence" that the whistleblowing was not a "material factor" in the personnel action. "Clear and convincing evidence" is less than the criminal standard of "beyond a reasonable doubt" but higher than "preponderance of the evidence," which was the current standard for this type of employee case.[1840]

The Whistleblowing Protection Act of 1988 passed the Senate and the House. Section 2(b) of the Senate bill stated the "primary role" of the OSC was to "protect employees, especially whistleblowers, from prohibited personnel practices," and

---

[1840] Id. at 15.

that the OSC "shall act in the interests of employees who seek assistance from the [OSC] and not contrary to such interests."[1841] The bill passed the Senate by voice vote on August 2, 1988.[1842] The House took up the Senate bill on October 3. Because the 100th Congress was about to end, the House skipped conference and worked out a compromise version of the bill with the Senate.[1843] A letter of October 3 to Representative Schroeder from Joseph R. Wright, Jr., Deputy Director of the Office of Management and Budget, indicated that the two branches were in agreement on the bill. There was no threat of a veto.[1844] The bill passed the House, 418 to zero.[1845] The Senate agreed to the House changes on October 7.[1846] Congress adjourned sine die on October 22.

Pocket Veto

President Reagan pocket vetoed the bill on October 26. He stated that reporting of "mismanagement and violations of the law, often called whistleblowing, contributes to efficient use of taxpayers' dollars and effective government. Such reporting is to be encouraged, and those who make the reports must be protected."[1847] However, he also said it was necessary to "ensure that heads of departments and agencies can manage their personnel effectively." It was his concern that the bill would have changed the law "so that employees who are not genuine whistleblowers could manipulate the process to their advantage simply to delay or avoid appropriate adverse personnel actions."[1848] He objected particularly to the "clear and convincing evidence" test, holding that it "essentially rigs the Board's process against agency personnel managers in favor of employees. The interests of both employees and managers should be fully protected."[1849]

[1848] Id. at 1392.

[1849] Id.

The pocket veto memorandum also objected to restrictions placed on the power of the President to remove the Special Counsel.[1850] The Civil Service Reform Act provided that the Special Counsel "may be removed by the President only for inefficiency, neglect of duty, or malfeasance in office."[1851] Section 1211(b) of the bill passed by Congress in 1988 contained the same language.[1852]

President Reagan also objected to a provision that authorized the Special Counsel to obtain judicial review of most MSPB decisions in proceedings to which the Special Counsel was a party. Implementation of that provision "would place two Executive branch agencies before a Federal court to resolve a dispute between them. The litigation of intra-Executive branch disputes conflicts with the constitutional grant of the Executive power to the President, which includes the authority to supervise and resolve disputes between his subordinates."[1853]

Whistleblower Protection Act of 1989

The vetoed whistleblower bill was modified in 1989 and passed the Senate on March 16 by a vote of 97 to zero.[1854] The modified bill retained the language establishing that the "primary role" of the Special Counsel "is to protect employees, especially whistleblowers, from prohibited personnel practices," and provided that the OSC "shall act in the interests of employees who seek assistance" from the office.

The limitations on the President's power to remove the Special Counsel were retained, but no authority was granted to the Special Counsel to seek judicial review of an MSPB decision.

The "clear and convincing evidence" test remained. The bill modified the *Mt. Healthy* test to state that, "in cases involving allegations of reprisal for whistleblowing, an individual must prove that whistleblowing was a contributing factor in the agency's decision to take the action."[1855] The burden is then placed on the agency to prove by clear and convincing evidence that the same personnel action would have been taken in the absence of the protected disclosure. Also, for the first time, the bill gave whistleblowers the right to appeal their own cases to

the MSPB if the Special Counsel failed or refused to do so.[1856] The House passed the bill under suspension of the rules.[1857]

In the Whistleblower Protection Act (WPA) of 1989, Congress found that federal employees who make protected disclosures "serve the public interest by assisting in the elimination of fraud, waste, abuse, and unnecessary Government expenditures."[1858] Congress also found that protecting employees "who disclose Government illegality, waste, and corruption is a major step toward a more effective civil service." Moreover, the WPA stated that Congress, in passing the Civil Service Reform Act of 1978, "established the Office of Special Counsel to protect whistleblowers" who make protected disclosures.[1859] The WPA incorporates the exemptions for national security information included in the 1978 statute.[1860] In signing the WPA, President George H. W. Bush said that "a true whistleblower is a public servant of the highest order. . . . [T]hese dedicated men and women should not be fired or rebuked or suffer financially for their honesty and good judgment."[1861]

WPA Amendments in 1994

Congress passed legislation in 1994 to amend the Whistleblower Protection Act. Legislation was needed to reauthorize the Office of Special Counsel and to ensure that it functioned "as intended, to protect federal employee whistleblowers from on-the-job harassment, negative job ratings, unfavorable transfers, denial of promotions and other retaliation for their efforts to uncover waste and mismanagement in their agencies."[1862]

In reporting the legislation, the Senate Committee on Governmental Affairs expressed concern "about the extent to which OSC is aggressively acting to protect whistleblowers from prohibited personnel practices."[1863] On the House side, the Committee on Post Office and Civil Service stated that "while the Whistleblower Protection Act is the strongest free speech law that exists on paper, it has been a counterproductive disaster in practice. The WPA has created

new reprisal victims at a far greater pace than it is protecting them."[1864] The House committee concluded that statutory mandates could easily be thwarted by a hostile agency climate: "There is little question that agency leadership is a far stronger factor than statutory provisions to establish a workplace environment of respect for the merit system."[1865]

MSPB and Federal Circuit

The House committee also found that the statistical record indicated that the MSPB and the Federal Circuit of Appeals "have not been favorable to Federal whistleblowers." In the first two years after enactment of the WPA, whistleblowers won approximately 20% of MSPB decisions on the merits. From FY1991 to FY1994, that rate dropped to 5%; instead of providing a balance, the Federal Circuit "has been more hostile than the Board. Since its 1982 creation, in reported decisions employees have prevailed only twice on the merits with the whistleblower defense." The committee said it had received "extensive testimony at hearings that the MSPB and the Federal Circuit have lost credibility with the practicing bar for civil service cases."[1866] In November 1993, GAO released a report indicating that 81 percent of federal employees who sought whistleblower reprisal protection from OSC gave the office a generally low to very low rating for overall effectiveness.[1867]

A more recent study indicates that whistleblowers continue to fare poorly in the MSPB and Federal Circuit. According to the Government Accountability Project, a nonprofit, whistleblower advocacy group, only two out of 30 whistleblowers prevailed on the merits before the MSPB from 1999 to 2005, and only one whistleblower claim out of 96 prevailed on the merits before the Federal Circuit from 1995 to 2005.[1868] Some, however, may view this as an indication that many whistleblowers present weak cases.

The Amendments

The 1994 legislation provided for reasonable attorney fees in certain cases if the federal employee or applicant for a federal job is the prevailing party and the MSPB or administrative law judge determines that payment by the agency "is in

the interest of justice."[1869] The statute required the Special Counsel, ten days before terminating an investigation of a prohibited personnel practice, to provide a written status report to the whistleblower of the proposed findings of fact and legal conclusions.[1870] The employee then has an opportunity to respond and provide additional supporting information. Through other provisions in the amendments, Congress attempted to even the field for legitimate whistleblowers.[1871]

Military Whistleblowers

During debate on the WPA, Representative Barbara Boxer said that Members of Congress "learned when we passed the Military Whistleblower Protection Act that without whistleblowers, frankly, we really could not do our job, because . . . we need information and we need a free flow of information from Federal employees, be they military or civilian."[1872] The Military Whistleblower Protection Act (10 U.S.C. § 1034) is not a single statute but rather an accumulation of several.

1956 Legislation

The first mention of Section 1034 was in 1956, with the codification of Title 10. Section 1034 provided: "No person may restrict any member of an armed force in communicating with a member of Congress, unless the communication is unlawful or violates a regulation necessary to the security of the United States."[1873] Congress adopted this language during a tense confrontation with the Eisenhower Administration over access to agency information. In 1954, President Eisenhower wrote a letter to Secretary of Defense Charles E. Wilson in which he prohibited testimony concerning certain conversations and communications between employees in the executive branch.[1874] Attorney General Herbert Brownnell, Jr. released a legal memorandum stating that the courts had "uniformly held that the President and the heads of departments have an uncontrolled discretion to withhold the information and papers in the public interest."[1875] The Justice Department prepared a 102-page brief concluding that Congress "cannot, under the Constitution, compel heads of departments to make

public what the President desires to keep secret in the public interest."[1876] Representative John Moss said the Justice Department analysis was a demand that Congress "rely upon spoon-fed information from the President."[1877]

Whistleblower Protection

Congress had created an inspector general for the Defense Department in 1982. Legislation in 1988 added a section on "Safeguarding of Military Whisteblowers," including prohibitions on retaliatory personnel actions against a member of the armed services for making or preparing a protected communication with a Member of Congress or an inspector general. The IG was authorized to investigate allegations by a member of the armed services who claims that a prohibited personnel action has been taken or threatened to be taken.[1878] The conference report explained:

> *The conferees note that in the course of their duties, members of the Armed Forces may become aware of information evidencing wrongdoing or waste of funds. It is generally the duty of members of the Armed Forces to report such information through the chain of command. Members of the armed forces, however, have the right to communicate directly with Members of Congress and Inspectors General (except to the extent that a communication is unlawful under applicable law or regulation), and there may be circumstances in which service members believe it is necessary to disclose information directly to a Member of Congress or an Inspector General. When they make lawful disclosures, they should be protected from adverse personnel consequences (or threats of such consequences), and there should be prompt investigations and administrative review of claims of reprisals. When such a claim is found to be meritorious, the Secretary concerned should initiate appropriate corrective action, including disciplinary action when warranted.*[1879]

Other modifications of the Military Whistleblower Protection Act are found in legislation passed in 1989, 1994, 1998, and 2000.[1880]

A current case of a military whistleblower concerns Bunnatine Greenhouse, who served as the chief of civilian contracting for the U.S. Army Corps of Engineers until she was demoted on August 27, 2005. She and the law firm representing her claim that she was demoted in retaliation for publicizing the concerns she had about no-bid contracts for work done in Iraq.[1881] This case received wide notice, including a PBS documentary and a *Washington Post* article.[1882]

Nondisclosure Agreements

In 1983, President Ronald Reagan directed that all federal employees with access to classified information sign "nondisclosure agreements" or risk the loss of their security clearance.[1883] Congress, concerned about the vagueness of some of the terms in the Reagan order and the loss of access to information, passed legislation in 1987 to prohibit the use of appropriated funds to implement the Administration's nondisclosure policy.[1884] The dispute was taken to court and in 1988 District Court Judge Oliver Gasch held that Congress lacked constitutional authority to interfere, by statute, with nondisclosure agreements drafted by the executive branch to protect the secrecy of classified information.[1885] Judge Gasch quoted from the Supreme Court's decision in Egan, issued in early 1988: "The authority to protect such [national security] information falls on the President as head of the Executive Branch and as Commander in Chief."[1886]

Department of the Navy v. Egan

Egan had been decided on statutory, not constitutional, grounds. The dispute involved the Navy's denial of a security clearance to Thomas Egan, who worked on the Trident submarine. He was subsequently removed. Egan sought review by the Merits Systems Protection Board (MSPB), but the Supreme Court upheld the Navy's action by ruling that the grant of security clearance to a particular employee, "a sensitive and inherently discretionary judgment call, is committed

by law to the appropriate agency of the Executive Branch."[1887] The conflict in Egan was solely within the executive branch (Navy versus MSPB), not between Congress and the executive branch.

The focus on statutory, not constitutional, issues was reflected in briefs submitted by the parties. The Justice Department noted: "The issue in this case is one of statutory construction and 'at bottom . . . turns on congressional intent.'"[1888] The Court directed the parties to address this question: "Whether, in the course of reviewing the removal of an employee for failure to maintain a required security clearance, the Merit Systems Protection Board is authorized by statute to review the substance of the underlying decision to deny or revoke the security clearance."[1889]

The questions centered on 5 U.S.C. §§ 7512, 7513, 7532, and 7701. The Justice Department, after analyzing the relevant statutes and their legislative history, found no basis for concluding that Congress intended the MSPB to review the merits of security clearance determinations.[1890] Oral argument before the Court on December 2, 1987, explored the statutory intent of Congress. At no time did the Justice Department suggest that classified information could be withheld from Congress. The Court's ruling in favor of the Navy did not limit in any way the right of Congress to classified information. The Court decided the "narrow question" of whether the MSPB had statutory authority to review the substance of a decision to deny a security clearance.[1891]

Although the Court referred to independent constitutional powers of the President, including those as Commander in Chief and as head of the executive branch,[1892] and noted the President's responsibility with regard to foreign policy,[1893] its decision was based on statutory construction. In stating that courts "traditionally have been reluctant to intrude upon the authority of the Executive in military and national security affairs," the Court added this important

qualification: "unless Congress specifically has provided otherwise."[1894] The Justice Department's brief had also stated: "Absent an unambiguous grant of jurisdiction by Congress, courts have traditionally been reluctant to intrude upon the authority of the executive branch in military and national security affairs."[1895] Nothing in the legislative history of the Civil Service Reform Act of 1978 convinced the Court that MSPB could review, on the merits, an agency's security-clearance determination.[1896]

The President's national security powers surfaced at times during oral argument before the Supreme Court, when the Justice Department and Egan's attorney, William J. Nold, debated the underlying statutory issues. After the department made its presentation, Nold told the Justices: "I think that we start out with the same premise. We start out with the premise that this is a case that involves statutory interpretation." Nold stated his view of the department's occasional references to constitutional matters: "What they seem to do in my view is to start building a cloud around the statute. They start building this cloud and they call it national security, and as their argument progresses . . . the cloud gets darker and darker and darker, so that by the time we get to the end, we can't see the statute anymore. What we see is this cloud called national security."[1897]

In disposing of the issue on statutory grounds, the Court also cited the President's role as Commander in Chief and said that the President's authority to protect classified information "flows primarily from this constitutional investment of power in the President and exists quite apart from any explicit congressional grant."[1898] The constitutional issue would have been joined had the Court faced statutory language that the administration objected to as an interference with executive power. That issue was not present in Egan.

The District Court's Decision

Having relied on *Egan*, Judge Gasch also looked to language in the Supreme Court's *Curtiss-Wright* decision.[1899] From the latter case Judge Gasch concluded that the "sensitive and complicated role cast for the President as this nation's emissary in foreign relations requires that congressional intrusion upon the

President's oversight of national security information be more severely limited than might be required in matters of purely domestic concern."[1900]

The central issue in Curtiss-Wright was the scope of congressional power. The Court was asked how broadly Congress could delegate its powers to the President in the field of foreign affairs. The previous year the Court had struck down the National Industrial Recovery Act because it had delegated an excessive amount of legislative power to the President in the field of domestic policy.[1901] The question before the Court in Curtiss-Wright was whether Congress could use more general standards in foreign affairs than it could in domestic affairs, and the Court said it could.

Several courts have remarked on Justice Sutherland's views in Curtiss-Wright regarding the scope of presidential power in foreign relations. In the Steel Seizure Case of 1952, Justice Robert Jackson noted that "much of the [Sutherland] opinion is dictum"——comments extraneous to the issue before the Court.[1902] In 1981, a federal appellate court cautioned against placing undue reliance on "certain dicta" in Sutherland's opinion: "To the extent that denominating the President as the 'sole organ' of the United States in international affairs constitutes a blanket endorsement of plenary Presidential power over any matter extending beyond the borders of this country, we reject that characterization."[1903]

On October 31, 1988, the Supreme Court noted probable jurisdiction in the case decided by Judge Gasch, now styled American Foreign Service Assn. v. Garfinkel.[1904] Both the House and the Senate submitted briefs protesting Judge Gasch's analysis of the President's powers over foreign affairs. During oral argument, the Justice Department spoke repeatedly about the President's constitutional role to control classified information. The attorney for AFSA challenging the Reagan nondisclosure policy objected that the decision by Judge Gasch, "by declaring that the Executive Branch has such sweeping power, has impeded the kind of accommodation that should take place in this kind of controversy," and hoped that the Court "wipes that decision off the books."[1905]

[1905] Transcript of Oral Argument, March 20, 1989, at 60.

On April 18, 1989, the Court issued a per curiam order that vacated Judge Gasch's order and remanded the case for further consideration.[1906] In doing so, the Court cautioned Judge Gasch to avoid expounding on constitutional matters: "Having thus skirted the statutory question whether the Executive Branch's implementation of [Nondisclosure] Forms 189 and 4193 violated § 630, the court proceeded to address appellees' [the government's] argument that the lawsuit should be dismissed because § 630 was an unconstitutional interference with the President's authority to protect the national security."[1907] The Court counseled Judge Gasch that the district court "should not pronounce upon the relative constitutional authority of Congress and the Executive Branch unless it finds it imperative to do so. Particularly where, as here, a case implicates the fundamental relationship between the Branches, courts should be extremely careful not to issue unnecessary constitutional rulings."[1908]

On remand, Judge Gasch held that the plaintiffs (American Foreign Service Association and Members of Congress) failed to state a cause of action for courts to decide.[1909] Having dismissed the plaintiffs' complaint on that ground, Judge Gasch found it unnecessary to address any of the constitutional issues.[1910]

Funding Restrictions (Nondisclosure Forms)

Congress continues to enact provisions in appropriations bills to deny funds to implement nondisclosure forms. Legislation enacted on January 23, 2004 provided that no funds appropriated in the Consolidated Appropriation Act for fiscal 2004, or in any other statute, "may be used to implement or enforce the agreements in Standard Forms 312 and 4414 of the Government or any other nondisclosure policy, form, or agreement if such policy, form, or agreement does not contain the following provisions: 'These restrictions are consistent with and do not supersede, conflict with, or otherwise alter the employee obligations, rights or liabilities created'" by the Lloyd-LaFollette Act (5 U.S.C. § 7211), the Military Whistleblower Protection Act, the Whistleblower Protection Act, the Intelligence Identities Protection Act, and other statutes that enable Congress to receive information from agency employees. Notwithstanding that provision, a nondisclosure policy form or agreement that is executed by a person connected with the conduct of an intelligence or intelligence-related activity, other than an employee or officer of the federal government, "may contain provisions

appropriate to the particular activity for which such document is to be used." Such form or agreement shall, at a minimum, require that the person "will not disclose any classified information received in the course of such activity unless specifically authorized to do so by the United States Government." Furthermore, such nondisclosure forms "shall also make it clear that they do not bar disclosures to Congress or to an authorized official or an executive agency or the Department of Justice that are essential to reporting a substantial violation of law."[1911] That language also appears in the Transportation, Treasury appropriations law enacted on November 30, 2005.[1912]

Funding Restrictions (Access to Congress)

Also in annual appropriations acts, Congress adopts language to deny funds to pay the salary of any executive official who prevents agency employees from communicating with a Member of Congress, committee or subcommittee. Language in the Consolidated Appropriations Act for fiscal 2004 provided that no part of any appropriation contained in that statute or any other would be available for the payment of the salary of any federal government officer or employee who "(1) prohibits or prevents, or attempts or threatens to prohibit or prevent, any other officer or employee of the Federal Government from having any direct oral or written communication or contact with any Member, committee, or subcommittee of the Congress in connection with any matter pertaining to the employment of such other officer or employee or pertaining to the department or agency of such officer or employee in any way, irrespective of whether such communication or contact is at the initiative of such other officer or employee or in response to the request or inquiry of such Member, committee, or subcommittee." Funds are also denied for the payment of the salary of any federal officer or employee who "(2) removes, suspends from duty without pay, demotes, reduces in rank, seniority, status, pay, or performance of efficiency rating, denies promotion to, relocates, reassigns, transfers, disciplines, or discriminates in regard to any employment right, entitlement, or benefit, or any term or condition of employment of, any other officer or employee of the Federal Government, or attempts or threatens to commit any of the foregoing actions with respect to such other officer or employee, by reason of any communication or contact of such other officer or employee with any Member, committee, or subcommittee as described in paragraph (1)."[1913] That language appears also in the Transportation, Treasury appropriations statute for fiscal 2006.[1914]

OLC Opinion in 1996

On November 26, 1996, the Office of Legal Counsel (OLC) in the Justice Department issued an eight-page opinion on "(1) the application of executive branch rules and practices on disclosure of classified information to Members of Congress, in light of relevant congressional enactments; (2) the applicability of the Whistleblower Protection Act; and (3) the applicability of Executive Order 12674."[1915]

Executive Order 12674, signed by President Bush on April 12, 1989, established "Principles of Ethical Conduct for Government Officers and Employees." The principles included: "Employees shall disclose waste, fraud, abuse and corruption to appropriate authorities."[1916] The executive order defines "employee" to mean "any officer or employee of an agency, including a special Government employee,"[1917] and defines "agency" to mean "any executive agency as defined in 5 U.S.C. 105, including any executive department as defined in 5 U.S.C. 101, Government corporation as defined in 5 U.S.C. 103, or an independent establishment in the executive branch as defined in 5 U.S.C. 104 (other than the General Accounting Office), and the United States Postal Service and Postal Rate Commission."[1918] "Appropriate authorities" is not defined in the executive order.

Oversight of Intelligence Community

The question before the OLC was whether this executive order authorized an agency employee to disclose "waste, fraud, abuse and corruption" to a Member of Congress, particularly "members of oversight committees with direct interest in such abuse and corruption."[1919] The context of the memorandum focused on oversight committees that have jurisdiction over the Intelligence Community. OLC did "not question that in certain circumstances the term ["appropriate authorities"] could include a member of a congressional oversight committee." However, OLC concluded that the question of who is an "appropriate authority" to receive classified information "is governed by Executive Order 12356 and the related directives and practices." The latter executive order "should control

---

because it more directly and specifically addresses the subject at issue, the disclosure of classified information."[1920]

Executive Order 12356, signed by President Reagan on April 2, 1982, governed the handling of classified information in the executive branch.[1921] OLC was asked to address the relationship between that executive order and two congressional enactments concerning the rights of federal employees to provide information to Congress: the Lloyd-LaFollette Act and the annual provision that prohibited the use of appropriated funds to implement or enforce the nondisclosure agreement policy.

Reach of Lloyd-LaFollette

OLC cited the Justice Department's brief in the Garfinkel case to the Supreme Court, where the department held that a congressional enactment would be unconstitutional if it were interpreted "to divest the President of his control over national security information in the Executive Branch by vesting lower-ranking personnel in that Branch with a 'right' to furnish such information to a Member of Congress without receiving official authorization to do so."[1922] In effect, this position would support restraints such as those in the executive orders issued by Presidents Roosevelt and Taft, at least with respect to classified information. OLC concluded that Lloyd-LaFollette does not confer a right to furnish national security information to Congress, the nondisclosure agreements may be validly applied to a disclosure to a Member of Congress, and the appropriations language "does not authorize any disclosure to a Member of Congress that is not permitted under Executive Order 12356."[1923]

"Need to Know" by Lawmakers

OLC was also asked whether Executive Order 12356 could be read to permit a cleared employee of the executive branch "to disclose classified information to a cleared member of Congress based on the employee's determination of the member's need to know."[1924] OLC noted that Members of Congress, as constitutionally elected officers, do not receive security clearances but are instead presumed to be trustworthy. However, lawmakers are not exempt "from fulfilling the 'need-to-know' requirement." On the issue whether individual employees "are

[1924] Id. at 5.

free to make a disclosure to Members of Congress based on their own determination on the need-to-know question," OLC said that the answer "is most assuredly 'no.'"[1925] The determination of "need to know" regarding disclosures of classified information to Congress "is made through established decisionmaking channels at each agency." OLC stated the opinion that it would be "antithetical to the existing system for an agency to permit individual employees to decide unilaterally to disclose classified information to a Member of Congress——and we are unaware of any agency that does so."[1926]

Regarding the WPA, OLC was asked whether denial or revocation of a Sensitive Compartmented Information (SCI) security clearance is a "personnel action" within the meaning of the WPA. Citing such cases as the Supreme Court's decision in Egan and McCabe v. Department of the Air Force, decided by the Court of Appeals for the Federal Circuit, OLC concluded that the revocation of a security clearance is not a personnel action within the meaning of the WPA.[1927]

OLC also examined language in Title 5, under prohibited personnel practices, that nothing in that subsection shall be construed "to authorize the withholding of information from the Congress or the taking of any personnel action against an employee who discloses information to the Congress."[1928] OLC said the Justice Department in Garfinkel had rejected the argument that the quoted language conferred an affirmative right to make disclosures of classified information to Members of Congress. Subsection 2302(b)(8)(B) discussed disclosures of classified information only to inspectors general or the Office of Special Counsel of the MSPB.

CIA Whistleblower Act of 1998

OLC's memo prompted Congress to hold hearings and analyze the Administration's position that the President exercises exclusive control over the disclosure of classified information, including disclosure to Members of Congress and its committees. The Senate Intelligence Committee asked CRS to evaluate OLC's statutory and constitutional conclusions, and that analysis was published.[1929] The Committee also held two days of hearings.[1930] The Justice

[1928] 5 U.S.C. § 2302(b) (2000).

[1929] Prepared statement by Louis Fisher, Congressional Research Service, "Executive Employee Access to Congress," reprinted in "Disclosure of Classified Information to Congress," hearings before the Senate Select Committee on Intelligence, 105th Cong., 2nd sess. 5-13 (1998).

Department continued to hold that bills drafted to assure congressional access to classified information, submitted to Congress by intelligence community employees without the permission of their supervisors, were unconstitutional.

The Senate Bill

The Senate Intelligence Committee unanimously reported legislation after commenting that the Administration's "intransigence on this issue compelled the Committee to act."[1931] The Senate bill would have directed the President to inform employees within the intelligence community that it is not prohibited by law, executive order, or regulation, nor contrary to public law, to disclose certain information, including classified information, to an appropriate committee of Congress.[1932] The purpose of the bill was to make employees within the intelligence community aware that they may, without seeking or obtaining prior authorization from an agency supervisor, disclose certain information to Congress, including classified information, when they have reason to believe that the information is specific and direct evidence of "a violation of law, rule or regulation; a false statement to Congress on an issue of material fact; or gross mismanagement, a gross waste of funds, a flagrant abuse of authority, or a substantial and specific danger to public health or safety."[1933]

The House Bill

> *The House Intelligence Committee held two days of hearings on a bill that provided an alternative procedure for gaining information from national security whistleblowers.[1934] Chairman Porter J. Goss made these opening comments:*
>
> *The present arrangement, or lack of arrangement, for whistleblowers in our [intelligence] community is not the answer. CIA, as I understand, has no written regulation in place and NSA had one that was disavowed by the current administration. I know of no regulation or system within the Intelligence Community that*

[1933] Id.

[1934] House Permanent Select Committee on Intelligence, "Record of Proceedings on H.R. 3829, The Intelligence Community Whistleblower Protection Act," 106th Cong., 1st sess. (1999) [Hearings on May 20 and June 10, 1998].

ensures the confidentiality of the whistleblower. There is no legal protective mechanism for an IC whistleblower against official and unofficial retaliation of which I am aware. Nothing currently gives him a right to be heard directly by the intelligence committees.

I think the only exception I can think of might be one under clauses of the Agent Identities Protection Act, which is a very narrow area.

The result of this system is unacceptable. Employees of the IC may, at present, have to take huge chances with classified documents, compartmented information and their careers in order to come down to report to us. . . . Worst of all, from an institutional point of view, is that very few employees dare to run this gauntlet to bring us the information we need to do appropriate oversight.[1935]

"Sole Process" and "Holdback"

Chairman Goss identified two central issues in the legislation. One was the question whether CIA employees should report their concerns only to the inspector general. Was the IG to be the "sole process" by which an employee may report a serious or flagrant problem to Congress? Second, should the head of an intelligence agency have a "holdback" power? That is, should the agency head be authorized to block a whistleblower's complaint "in the exceptional case and in order to protect vital law enforcement, foreign affairs on national security interest."[1936]

When the House bill was reported it was decided that the IG mechanism for whistleblowers should not be the "sole process" for them to report wrongdoing to Congress. The House bill would provide an additional procedure to the existing IG route.[1937] The House Intelligence Committee recognized that some agency employees might "choose not to report a problem either through the process outlined [in the bill] or through another process authorized by their management, but instead approach the committee directly."[1938] The committee also decided to eliminate the "holdback" provision. Agency heads would not have the authority to block disclosures byagency employees to Congress. A statutory

acknowledgment of holdback authority was dropped because it was considered "unwarranted and could undermine important congressional prerogatives."[1939]

Authority Over Classified Information

Like the Senate, the House Intelligence Committee rejected the Administration's "assertion that, as Commander in Chief, the President has ultimate and unimpeded constitutional authority over national security, or classified, information. Rather, national security is a constitutional responsibility shared by the executive and legislative branches that proceeds according to the principles and practices of comity."[1940] Consistent with that position, the committee rejected the theory that the President, as Chief Executive, "has a constitutional right to authorize all contact between executive branch employees and Congress." The issue of whether an agency employee "must 'ask the boss' before approaching the intelligence committees with unclassified information about wrongdoing seems well below any constitutional threshold."[1941] The handling of classified information was addressed in the bill that became law.

The Statute

The two houses worked out their differences in conference committee and reported the Intelligence Community Whistleblower Protection Act as Title VII to the Intelligence Authorization Act for Fiscal Year 1999. The compromise bill established "an additional process to accommodate the disclosure of classified information of interest to Congress." The new procedure was not "the exclusive process by which an Intelligence Community employee may make a report to Congress." The conference report stated that "the managers agree that an Intelligence Community employee should not be subject to reprisals or threats of reprisals for making a report to appropriate Members or staff of the intelligence committees about wrongdoing within the Intelligence Community."[1942] The statute covered communications from the agency to Capitol Hill through the intelligence committees.

The statutory language lists six findings: "(1) national security is a shared responsibility requiring joint efforts and mutual respect by Congress and the President; (2) the principles of comity between the branches of Government apply to the handling of national security information; (3) Congress, as a co-equal branch of Government, is empowered by the Constitution to serve as a check on

the executive branch; in that capacity, it has a "need to know" of allegations of wrongdoing within the executive branch, including allegations of wrongdoing in the Intelligence Community; (4) no basis in law exists for requiring prior authorization of disclosures to the intelligence committees of Congress by employees of the executive branch of classified information about wrongdoing within the Intelligence Community; (5) the risk of reprisal perceived by employees and contractors of the Intelligence Community for reporting serious or flagrant problems to Congress may have impaired the flow of information needed by the intelligence committees to carry out oversight responsibilities; and (6) to encourage such reporting, an additional procedure should be established that provides a means for such employees and contractors to report to Congress while safeguarding the classified information involved in such reporting."[1943]

Under the procedures set forth in the statute, an employee or contractor of the CIA "who intends to report to Congress a complaint or information with respect to an urgent concern may report such complaint or information to the Inspector General."[1944] The language "may report" is consistent with the congressional rejection of the IG office as being the "sole process" for reporting complaints.

The statute defines "urgent concern" to mean any of the following: (1) "A serious or flagrant problem, abuse, violation of law or Executive order, or deficiency relating to the funding, administration, or operations of an intelligence activity involving classified information, but does not include differences of opinion concerning public policy matters"; (2) "A false statement to Congress, or a willful withholding from Congress, or an issue of material fact relating to the funding, administration, or operation of an intelligence activity"; and (3) "An action, including a personnel action described in section 2302(a)(2)(A) of title 5, United States Code, constituting reprisal or threat of reprisal prohibited under subsection (e)(3)(B) in response to an employee's reporting an urgent concern in accordance with this paragraph."

Upon receiving the complaint or information, the IG has 14 calendar days to determine whether it appears credible. If the IG decides it is, the complaint must be transmitted to the CIA Director who has seven calendar days to forward the matter to the intelligence committees. If the IG does not transmit the complaint or information, or does not transmit it in an accurate form, the employee may submit the matter to Congress by contacting either or both of the intelligence committees. The statute provides for no "holdback" procedure.

[1943] 112 Stat. 2413-14, § 701 (1998).

[1944] Id. at 2414, § 702 (a)(1).

In 2001, Congress enacted modifications to this statute.[1945] The changes relate to communications between the IG and the director as to whether a complaint from an agency employee appears credible, and the authority of employees to contact the intelligence committees when the IG does not find the complaint credible.

The Richard Barlow Case

In 2002, the U.S. Court of Federal Claims decided the case of Richard Barlow, who in the late 1980s faced termination from the Defense Department and suspension of security clearances following disputes within the executive branch, and between the executive branch and Congress, about Pakistan's nuclear capabilities. Some central questions reportedly were whether executive officials had misled lawmakers, in secret briefings, regarding Pakistan's activities, and whether the Reagan Administration had improperly certified to Congress that Pakistan did not have nuclear weapons.[1946]

After a number of investigations by the Defense Department and several by inspectors general and the General Accounting Office regarding retaliations against Barlow's whistleblower activities, a bill was introduced (S. 2274) to provide for the relief of Barlow.[1947] The private bill included the sum of $1,100,000 to compensate him for losses incurred as a consequence of "(1) personnel actions taken by the Department of Defense affecting Mr. Barlow's employment at the Department (including Mr. Barlow's top secret security clearance) during the period of August 4, 1989, through February 27, 1992; and (2) Mr. Barlow's separation from service with the Department of Defense on February 27, 1992."[1948] On October 5, 1998, the Senate referred the matter to the Court of Federal Claims requesting that it report back findings of fact and conclusions "that are sufficient to inform the Congress of the nature, extent, and character of the claim for compensation referred to in such bill [S. 2274] as a legal or equitable claim against the United States or a gratuity."[1949]

State Secrets Privilege

Barlow and his attorneys, through the discovery process, sought documents which they alleged would show that Congress had been misled about Pakistan's capabilities. They claimed that the evidence would show a motivation on the part

of Barlow's supervisor in the Defense Department to take adverse personnel actions against him for his whistleblowing. On February 10, 2000, CIA Director George Tenet signed a declaration and formal claim of state secrets privilege and statutory privilege. The declaration denied Barlow and his attorney access to any of the classified intelligence information under Tenet's control. Tenet said that it would not be possible "to sanitize or redact in any meaningful way" the information that Barlow sought.[1950] A separate declaration by Lt. Gen. Michael V. Hayden, Director of the National Security Agency, also invoked the state secrets privilege to assert the agency's privilege over NSA intelligence reports and information from intelligence reports contained in minutes of the Nuclear Export Violations Working Group (NEVWG) meetings.[1951]

The Tenet declaration did not automatically block Barlow's access to the requested materials. Tenet acknowledged that the branch that decides what evidence to admit is the judiciary, not the executive branch: "I recognize it is the Court's decision rather than mine to determine whether requested material is relevant to matters beings addressed in litigation."[1952] The Hayden declaration did not contain that language, but courts have discretion to determine whether an executive claim of state secrets privilege should be treated as absolute or as qualified. The Court of Federal Claims had several options. It could have ordered the government to provide a full public account of why disclosure of the information would harm national security.[1953] It could have conducted "an in camera examination of the requested materials"[1954] and also asked that sensitive material be redacted to permit access by Barlow.

Options for the Court

In a decision filed July 18, 2000, and reissued August 3, 2000, the Court of Federal Claims initially acknowledged that the state secrets privilege was qualified, not absolute. Although it noted that some courts have held that state

secrets are "absolutely privileged from disclosure in the courts,"[1955] it stated that "the mere formal declaration of the privilege does not end the court's inquiry."[1956] Toward the end of this analysis, however, the court ruled that state secrets were absolute: "The privilege is absolute, the law having evolved to reflect a choice of secrecy over any balancing of risks and harms."[1957] The court concluded that the documents sought by Barlow, "to the extent not already produced or located, are privileged *in toto*."[1958]

The court continued the trial and allowed the government to introduce the documents and testimony to support its case, while at the same time denying Barlow access to documents and testimony he requested to support his position. On May 4, 2000, Barlow's attorneys, Paul C. Warnke and Diane S. Pickersgill, objected that the state secrets privilege should not apply to congressional reference cases to prevent Barlow and the court access to "key evidence."[1959] Warnke and Pickersgill argued that the court should review the documents in camera.[1960] They noted that the Senate had ordered the court to "make a determination of the merits" of Barlow's claim for compensation and that the information he sought in discovery was "necessary for this Court to make a fully-informed decision and thus a fully-informed recommendation to Congress."[1961]

Applying Egan

In the January 14, 2002, ruling, the court recognized that there had been a "temporary suspension" of Barlow's security clearance.[1962] In Egan, the plaintiff's security clearance had been revoked. The court stated that in Egan the Supreme Court held that "the authority to protect classified information remains within the Executive Branch," determinations about security clearances are an attempt to predict an individual's future behavior, and that such "'[p]redictive judgment of this kind must be made by those with the necessary expertise in protecting

classified information' and, in turn, not by the courts."[1963] The court then concluded: "Basing a claim to relief in any way on the suspension of the clearance would inevitably draw the court into improperly second guessing executive branch offices in a highly discretionary function. We decline to do so."[1964]

The Supreme Court in Egan supported the discretionary judgment of the executive branch to determine security clearances and to revoke them. The Court's decision did address the question of whether a court may examine, in camera, classified documents to determine whether they were properly withheld from a plaintiff under the state secrets privilege.

"Official Secrets"

In 2000, Congress passed a bill that would have established criminal penalties for leaking classified information. Fines and imprisonment for up to three years were included to punish any current or former government employee who "knowingly and willfully discloses, or attempts to disclose," any classified information to a person not authorized to receive the information, "knowing that the person is not authorized access to such classified information."[1965] Criminal liability did not apply to the disclosure of classified information to federal judges established under Article III or to any Member or committee of Congress.

During House debate on the bill reported from conference committee, several Members referred to it as an "official secrets" law.[1966] One Member said it would intimidate whistleblowers.[1967] Another thought it "would silence whistleblowers in a way that has never before come before this body and which has never before been enacted."[1968] Another disagreed: "I do not think that is true at all. First of all, whistle-blowers are protected under the current law. Secondly, whistle-blowers who have a concern about whether information is properly classified or there is a concern about the agency that they are working for, can come to Congress."[1969] Similarly, another Member regarded whistleblowers as protected

by the bill "[s]o long as they come forward with matters that are security matters about which they are concerned and they disclose them to people who are cleared to received such information."[1970]

This debate raised the possibility that leaking information to the press would put reporters at risk. One Member stated that "this [bill] does not pertain to the news media."[1971] Another saw "nothing [in the bill] to prevent reporters from being hauled in before grand juries and being forced to reveal their sources."[1972] Chief executives of four of the largest news organizations (CNN, the New York Times, Newspaper Association of America, and the Washington Post) wrote to President Clinton, urging him to veto the bill. The Radio-Television News Directors Association also joined in this appeal to President Clinton.[1973]

President Clinton vetoed the bill on November 4, 2000. Among other points, he said that the bill "was passed without benefit of public hearings——a particular concern given that it is the public that this law seeks ultimately to protect. The Administration shares the process burden since its deliberations lacked the thoroughness this provision warranted, which in turn led to a failure to apprise the Congress of the concerns I am expressing today."[1974]

Pending Legislation

Legislation has been introduced in the House and the Senate to make changes in the Whistleblower Protection Act. S. 494, called the Federal Employee Protection of Disclosures Act, was introduced on March 2, 2005, and reported from the Committee on Homeland Security and Governmental Affairs on May 25. The purpose is "to clarify the disclosures of information protection from prohibited personnel practices, require a statement in nondisclosure policies, forms, and agreements that such policies, forms, and agreements conform with certain disclosure protections, provide certain authority for the Special Counsel, and for other purposes."[1975]

[1974] Public Papers of the Presidents, 2000-2001, III, at 2467. See also John M. Broder, "President Vetoes Measure to Punish Disclosing Secrets," New York Times, Nov 5, 2000, at 1; Walter Pincus, "Clinton Vetoes Bill Targeting Leaks of Classified Information," Washington Post, Nov. 5, 2000, at A5.

[1975] S. 494, 109th Cong., 1st sess. 1-2 (2005), as reported by the Committee on Homeland Security and Governmental Affairs.

In reporting the bill, the Senate Committee on Homeland Security and Governmental Affairs noted that the terrorist attacks of 9/11 "have brought renewed attention to those who disclose information regarding security lapses at our nation's airports, borders, law enforcement agencies, and nuclear facilities." It further states that the right of federal employees to be free from agency retaliation "has been diminished as a result of a series of decisions of the Federal Circuit Court of Appeals that have narrowly defined who qualifies as a whistleblower under the WPA and what statements are considered protected disclosures."[1976] The bill is designed to clarify that disclosures of classified information to appropriate committees of Congress are protected, to codify the "anti-gag" provision that Congress has placed in annual appropriations bills to protect agency employees who come forward with disclosures of illegality, to authorize the OSC to file amicus briefs in whistleblower cases, and to allow whistleblower cases to be heard by all federal appellate courts for a period of five years.[1977]

The committee report also discusses a provision in the bill that relates to whistleblower actions after 9/11, when agency employees "in several high profile cases have come forward to disclose government waste, fraud, and abuse that posed a risk to national security," but then faced retaliatory action by having their security clearance removed. The Federal Circuit had held that the MSPB lacks jurisdiction over an employee's claim that his security clearance was revoked in retaliation for whistleblowing. Former Special Counsel Elaine Kaplan testified in 2001 that revoking a security clearance "can be a basis for camouflaging retaliation."[1978] The Senate bill makes it a prohibited personnel practice for a manager to suspend, revoke, or take other actions regarding an employee's security clearance or access to classified information in retaliation for whistleblowing. Further, the bill provides for expedited review of whistleblower cases by the OSC, the MSPB, and the reviewing cases where a security clearance has been revoked or suspended.[1979]

The Justice Department regards this provision as an intrusion into the President's prerogative to control national security information and those who have access to it. The committee regards executive branch authority over classified material as "not exclusive, and that Congress properly plays a role."[1980]

[1976] Id. at 2.

[1977] Id.

[1978] Id. at 15.

[1979] Id. at 16.

[1980] Id.

The committee cites Egan for support ("unless Congress has specifically provided otherwise, courts traditionally have been reluctant to intrude upon the authority of the Executive in military and national security affairs").[1981]

Title 5 has included a provision (Section 2302(b)) that nothing in the subsection shall be construed to authorize the withholding of information from Congress or the taking of any personnel action against an agency employee who discloses information to Congress. The Senate bill provides that a whistleblower must limit the disclosure to a Member of Congress who is authorized to receive the information or to a legislative staffer who holds the appropriate security clearance and is authorized to receive the information.[1982]

H.R. 1317, introduced on March 15, 2005, contains a number of provisions similar to S. 494, including clarification of disclosures that are protected from prohibited personnel practices and a statement to be placed in nondisclosure forms. The House bill directs the Comptroller General to conduct a study of security clearance revocations in whistleblower cases after 1996. H.R. 1317 was marked up on September 29, 2005, and ordered to be reported.

Conclusions

To perform its legislative and constitutional functions, Congress depends on information (domestic and national security) available from the executive branch. The Supreme Court remarked in 1927 that a legislative body "cannot legislate wisely or effectively in the absence of information respecting the conditions which the legislation is intended to affect or change; and where the legislative body does not itself possess the requisite information——which not infrequently is true—— recourse must be had to those who do possess it."[1983] Congress needs information to pass legislation, oversee the administration of programs, inform the public, and carry out its constitutional duties.

Balancing this legislative need for information with the protection of sensitive national security information remains a continuing policy issue. Congress has never accepted the theory that the President has exclusive, ultimate, and unimpeded authority over the collection, retention, and dissemination of national security information. Agency heads provide Congress with information, but some Members of Congress have also expressed a need to receive information directly from rank-and-file employees within an agency. Whistleblowers have helped uncover agency wrongdoing, illegalities, waste, and corruption. The interest of Congress in maintaining an open channel with agency employees is

---

[1983] McGrain v. Daugherty, 273 U.S. 135, 175 (1927).

demonstrated through such statutes as Lloyd-LaFollette, the appropriations riders on the nondisclosure policy, the Military Whistleblower Protection Act, and the Intelligence Community Whistleblower Act.

Congress also recognizes the need to protect national security information, especially that related to sources and methods, from disclosure. This awareness is reflected in legislation that allows and encourages intelligence community employees to report issues of waste, fraud, or mismanagement to the intelligence committees of Congress.

Appendix: Whistleblower Organizations

Several organizations have been active with whistleblowing issues. They testify before congressional committees, provide assistance with litigation, and offer other services. Some of these organizations cover whistleblowing in general. Others focus on national security whistleblowing. From October 9 to October 12, 2005, in Chincoteague, Va., the first annual National Security Whistleblowers Conference was held. It was sponsored by the National Security Whistleblower Coalition, the Cavallo Foundation, Harriet Crosby, the Fertel Foundation, the Fund for Constitutional Government, and Project on Government Oversight. The purpose was to bring together national security whistleblowers to learn from each other, to find collective support for their efforts, and to develop strategies.

Government Accountability Project (GAP)

Founded in 1977, GAP is a non-profit, public interest organization and law firm that receives funding from foundations, individuals, and legal fees. It describes its mission as protecting the public interest by promoting government and corporate accountability through advancing occupational free speech and ethical conduct, defending whistleblowers, and empowering citizen activists. It litigates whistleblower cases, publicizes whistleblower concerns, and develops policy and legal reforms for whistleblower laws. Much of its work has been in the area of nuclear oversight, food and drug safety, worker health and safety, international reform and national security.[1984]

National Security Whistleblowers Coalition

The coaliton is a nonpartisan organization dedicated to aiding national security whistleblowers. Its stated mission is to advocate governmental and legal reform, educate the public concerning whistleblowing activity, provide comfort and fellowship to national security whistleblowers subject to retaliation, and work with other public interest organizations to effect goals defined in the organization's mission statement. Its membership consists exclusively of current or former federal employees or civilians working under contract to the United

[1984] For information on GAP, see [http://www.whistleblower.org/about/index.cfm].

States who, to their detriment and personal risk, bring to light fraud, waste, and abuse in government operations and agencies related to national security.[1985]

National Whistleblower Center

The National Whistleblower Center is a non-profit, tax-exempt, educational, and advocacy organization dedicated to helping whistleblowers. Since 1988, it states it has used whistleblowers' disclosures to improve environmental protection, nuclear safety, and government and corporate accountability. The primary goal of the center is to ensure that disclosures about government or industry actions that violated the law or harm the environment are fully heard, and that the whistleblowers who risk their careers to expose wrongdoing are defended. In addition to assisting whistleblowers, the center lobbies Congress on the need to protect whistleblowers and insists that officials be held fully accountable for their conduct. The center maintains a national referral service and sponsors litigation.[1986]

Project On Government Oversight (POGO)

POGO began in 1981 as an independent, non-profit organization that investigates and exposes corruption in order to achieve a more accountable federal government. It operates on the principle that representation and accountability are fundamental to maintaining a strong and functioning democracy. Initially it was known as the Project on Military Procurement. It is committed to exposing waste, fraud and corruption in the following areas: defense, homeland security, energy and environment, contract oversight, and open government. POGO's "Contract Oversight Investigations" examine the federal government's policies and relationships with grant recipients as well as major companies that receive billions of dollars in contracts and subsidies annually.[1987]

18 U.S.C. Chapter 51: Homicide (18 U.S.C. §§ 1111-1122)

Assassination and Targeted Killing

Assassination Ban and E.O. 12333: A Brief Summary, RS21037 (January 4, 2002).

ELIZABETH B. BAZAN, CONGRESSIONAL RESEARCH SERV., ASSASSINATION BAN AND E.O. 12333: A BRIEF SUMMARY (2002), , *available at* http://www.intelligencelaw.com/library/secondary/crs/pdf/RS21037_1-4-2002.pdf.

Order Code RS21037
Updated January 4, 2002

CRS Report for Congress

Elizabeth B. Bazan
Legislative Attorney
American Law Division

Summary

In the wake of the September 11, 2001, terrorist attacks on the New York World Trade Center and the Pentagon, some attention has been focused upon the assassination ban contained in Executive Order (E.O.) 12333, Section 2.11, and whether it would prohibit the United States from responding to the attacks by targeting those who orchestrated these acts of terrorism. In considering the challenges involved in effectively combating terrorism and protecting the United States from future terrorist attacks, there has been wide-ranging debate as to what approaches might be beneficial. Part of that discussion has centered around whether assassination of terrorist leaders is, or should be, one of the options available. This report offers a summary discussion of the assassination ban in E.O. 12333, its context, and possible interpretations of its scope.

Introduction

On December 4, 1981, President Ronald Reagan issued Executive Order 12333 on "United States Intelligence Activities." Section 2.11 of the order provides: "Prohibition on Assassination. No person employed by or acting on behalf of the United States Government shall engage in, or conspire to engage in, assassination." Section 2.12 of the order prohibits indirect participation in

activities prohibited by the order, stating: "Indirect participation. No agency of the Intelligence Community shall participate in or request any person to undertake activities forbidden by this Order." E.O. 12333 is still in force.

E.O. 12333 is the latest in a series of three executive orders which included assassination bans. The first, Executive Order 11905, Sec. 5(g),[1988] 41 Fed. Reg. 7703, 7733 (President Gerald Ford, 2/19/76), was part of an executive order issued by President Ford in response to concerns raised in the 1970's with respect to alleged abuses by the U.S. intelligence community. A select committee chaired by Senator Frank Church (the Church Committee), in its interim report, addressed allegations of possible U.S. involvement in assassination plots against certain foreign leaders. In its recommendations section, the Church Committee condemned assassination and rejected it as an instrument of American policy.[1989] The assassination ban in E.O. 11905 was superseded by Executive Order 12036, Sec. 2-305 (assassination prohibition) and Sec. 2-309 (indirect participation prohibition),[1990] 43 Fed. Reg. 3674, 3688, 3689 (President Jimmy Carter, 1/26/78). The pertinent provisions in President Reagan's E.O. 12333, in turn, superseded those in President Carter's order.

What does the assassination ban in E.O. 12333 cover?

The term "assassination" is not defined in E.O. 12333, nor was it defined in the predecessor orders.[1991] In general, it appears that an assassination may be viewed as an intentional killing of a targeted individual committed for political purposes. However, the scope of the term seems to be the subject of differing interpretations, both generally, and depending upon whether the killing at issue took place in time of war or in time of peace. For example, it might be contended that the Ford executive order and its successors were responding to concerns raised with respect to killing of foreign officials or heads of state, and may not

---

[1988] This section of E.O. 11905 stated, "Prohibition of Assassination. No employee of the United States Government shall engage in, or conspire to engage in, political assassination."

[1989] See Alleged Assassination Plots Involving Foreign Leaders, An Interim Report of the Select Committee to Study Governmental Operations with respect to Intelligence Activities, United States Senate, S. Rept. 94-465, 94th Cong., 1st Sess. 281-84 (Nov. 20, 1975) (Church Committee).

[1990] The pertinent provisions of the Carter order read, "2-305. Prohibition on Assassination. No person employed by or acting on behalf of the United States Government shall engage in, or conspire to engage in, assassination. . . . 2-307. Restrictions on Indirect Participation in Prohibited Activities. No agency of the Intelligence Community shall request or otherwise encourage, directly or indirectly, any person, organization, or government agency to undertake activities forbidden by this order or by applicable law."

[1991] It is interesting to note that the Ford order referred to "political assassination," a term which was not defined in E.O. 11905, while the Carter and Reagan orders use the term "assassination," again without defining it. It is thus unclear from these orders and the statements accompanying their issuance whether or not this change in language was intended to portend any change in the scope of the ban.

have been intended to extend to killing of others. Such an interpretation would be consistent with the focus of the Church Committee's investigation, to which the Ford executive order responded. In his "Special Message to the Congress Proposing Legislation To Reform the United States Foreign Intelligence Community," (Special Message to Congress) delivered Feb. 18, 1976, accompanying the issuance of E.O. 11905, President Ford did not refer to the assassination ban in the order explicitly, but did indicate that he would "support legislation making it a crime to assassinate or attempt or conspire to assassinate a foreign official in peacetime."[1992] President Carter made only a passing reference to the assassination ban in his statement accompanying issuance of E.O. 12036,[1993] and did not refer to it in his remarks on signing the executive order. Nor did President Reagan reference the assassination ban in his "Statement on United States Intelligence Activities" of Dec. 4, 1981, accompanying the issuance of E.O. 12333.[1994]

Others might argue for a broader interpretation of the assassination ban, contending that any killing of a targeted individual for political purposes would be within the assassination ban in the sweep of the Ford, Carter, and Reagan executive orders. Alternatively, it might be suggested that the assassination ban's inclusion within an executive order on U.S. intelligence activities may serve to

[1992] Public Papers of the Presidents of the United States, Gerald R. Ford, 1976-77, Book I, 362, 364 (1979).

[1993] Public Papers of the Presidents of the United States, Jimmy Carter, 1978, Book I, 189-216 (1979). The context of President Carter's reference was as follows:

3. Our intelligence agencies have a critical role to play in collecting and analyzing information important to our national security interests and, on occasion, acting in direct support of major foreign policy objectives. It is equally important, however, that the methods employed by these agencies meet constitutional standards protecting the privacy and civil liberties of U.S. persons and are in full compliance with the law. To accomplish this objective a major section of the Executive order is devoted entirely to setting forth detailed restrictions on intelligence collection, covert activities in support of foreign policy objectives, experimentation, contracting, assistance to law enforcement authorities, personnel assigned to other agencies, indirect participation in prohibited activities,, dissemination and storage of information, and a prohibition on assassinations. The FBI's intelligence activities no longer have a blanket exception to these restrictions. At the heart of the restriction process is a greatly enhanced role for the Attorney General, as the Nation's top legal officer, to establish and approve procedures to regulate the conduct of the most sensitive intelligence activities. These detailed procedures, which will be made available to the congressional oversight committees, will ensure compliance with the law, protect constitutional rights and privacy, and ensure that any intelligence activity within the United States or directed against Americans will employ the least intrusive means possible and that the use, dissemination, and storage of such information is limited to that necessary to achieve lawful governmental purposes.

[1994] Public Papers of the Presidents of the United States, Ronald Reagan, 1981, 1126-27 (1982).

distinguish it from, and limit its applicability to, a use of military force in response to a foreign terrorist attack on U.S. soil or against U.S. nationals. Such an argument might place reliance on Article 51 of the United Nations Charter, which recognizes that nations have an inherent right of self-defense:

> *Nothing in the present Charter shall impair the inherent right of individual or collective self-defense if an armed attack occurs against a Member of the United Nations, until the Security Council has taken measures necessary to maintain international peace and security. Measures taken by Members in exercise of this right of self-defense shall be immediately reported to the Security Council and shall not in any way affect the authority and responsibility of the Security Council under the present Charter to take at any time such action as it deems necessary in order to maintain or restore international peace and security.*

The right of the United States to defend itself against armed attack has been the focus of some of the recent debate as the United States considers its options in responding to the terrorist attacks of September 11, 2001.[1995]

In the process of rewriting the U.S. Army Field Manual 27-10, The Law of War, a "Memorandum of Law: EO 12333 and Assassination" (hereinafter Memorandum of Law 27-1a) was prepared to explain the term "assassination" in the context of military operations. In Memorandum of Law 27-1a, it is suggested that, in time of peace, an element of covert action or surprise attack may be required for a killing for political purposes to be deemed an assassination, particularly where the target is a private individual rather than a public figure or national leader. The murder for political purposes of a national leader in time of peace may be regarded by some as an assassination solely because of the target, while others might also consider whether a surprise attack was involved.

> *For example, the 1978 "poisoned-tip umbrella" killing of Bulgarian defector Georgi Markov by Bulgarian State Security agents on the streets of London falls into the category of an act of murder carried out for political purposes, and constitutes an assassination. In contrast, the murder of Leon Klinghoffer, a private citizen, by the terrorist Abu el Abbas during the 1985 hijacking of the Italian cruise ship Achille Lauro, though an act of murder for political purposes, would not constitute an assassination. The distinction lies not merely in the purpose of the*

Cf., Stuart G. Baker, "Comparing the 1993 U.S. Airstrike on Iraq to the 1986 Bombing of Libya: The New Interpretation of Article 51," 24 Ga. J. Int'l & Comp. L. 99 (1994).

> *act and/or its intended victim, but also under certain circumstances in its covert nature. Finally, the killing of Martin Luther King and Presidents Abraham Lincoln, James A. Garfield, William McKinley and John F. Kennedy generally are regarded as assassination because each involved the murder of a public figure or national leader for political purposes accomplished through a surprise attack.*[1996]

In time of war, assassination appears to be distinguished in some discussions from cases of lawful killing, because the former is carried out in a "treacherous" manner.[1997] "Treacherous" is not defined in the Hague Convention IV, but does not appear to be interpreted to foreclose operations in time of war involving the element of surprise.[1998] However, putting a price on the head of an enemy appears to be regarded by some as an act which would render a resulting killing an assassination, as distinguished from a lawful attack on legitimate military targets, including the enemy chain of command.[1999] A review of historical discussions of assassination suggests that this may be, in part, because by putting a price on the head of an enemy, one could be encouraging treachery by those close to the target.[2000]

Can the President revoke the assassination ban in E.O. 12333?

As it is part of an executive order, the President may modify or rescind the assassination ban in E.O. 12333, Section 2.11, by executive order. Except in specific circumstances, an executive order revoking a previous order would have to be published in the Federal Register under 44 U.S.C. § 1505(a) if it is deemed to be an order of general applicability. However, under 44 U.S.C. § 1505(c):

In the event of an attack or threatened attack upon the continental United States and a determination by the President that as a result of an attack or threatened attack–

(1) publication of the Federal Register or filing of documents with the Office of the Federal Register is impracticable, or
(2) under existing conditions publication in the Federal Register would not serve to give appropriate notice to the public of the contents of documents, the President may, without regard to any other provision of law, suspend all or part of the requirements of law or regulation for filing with the Office or publication in the Federal Register of documents or classes of documents. Such a suspension would remain in effect until revoked by the President or by concurrent resolution of Congress.

Can Congress revoke the assassination ban in E.O. 12333?

To the extent that an executive order relies upon statutory authority, Congress may also legislate to modify or repeal it. In issuing E.O. 12333, President Reagan relied upon the authority vested in him "by the Constitution and statutes of the United States of America, including the National Security Act of 1947, as amended, and as President of the United States of America, in order to provide for the effective conduct of United States intelligence activities and the protection of constitutional rights." While there is no express parallel to E.O. 12333's assassination ban in federal statutes, there is a provision in 18 U.S.C. § 1116 which provides criminal penalties for murder, manslaughter, or attempted murder or manslaughter of foreign officials, official guests, or internationally protected persons.[2001] This section applies to murder, manslaughter, or attempted murder or manslaughter committed within the United States. In addition, the U.S. may exercise jurisdiction over such acts committed against internationally protected persons outside the United States if "(1) the victim is a representative, officer, employee, or agent of the United States, (2) an offender is a national of the

[2001] Cf., "Prevention and Punishment of Crimes against Internationally Protected Persons, Including Diplomatic Agents," 28 U.S.T. 1975, TIAS 8532;, signed on behalf of the United States on Dec. 28, 1973; ratified by the U.S. Senate on Oct. 28, 1975; entered into force on Feb. 20, 1977.

United States, or (3) an offender is afterwards found in the United States."[2002] "Internationally protected person" is defined to mean "a Chief of State or the political equivalent, head of government, or Foreign Minister whenever such person is in a country other than his own and any member of his family accompanying him;" or "any other representative, officer, employee, or agent of the United States Government, a foreign government, or international organization who at the time and place concerned is entitled pursuant to international law to special protection against attack upon his person, freedom, or dignity, and any member of his family then forming part of his household."[2003] "International organization" is defined to mean "a public international organization designated as such pursuant to section 1 of the International Organizations Immunities Act (22 U.S.C. 288) or a public organization created pursuant to treaty or other agreement under international law as an instrument through or by which two or more foreign governments engage in some aspect of their conduct of international affairs."[2004] "International organization" does not appear to encompass terrorist organizations or networks, nor does "internationally protected person" appear to reach the leaders of such organizations or networks. The earliest version of this provision was first added in 1972, P.L. 92-539, Title I, Section 101 (Oct. 24, 1972), 86 Stat. 1071, which predates the Ford executive order. However, it was not referenced by President Ford in his Special Message to Congress accompanying issuance of E.O. 11905. Repeal or modification of 18 U.S.C. § 1116 would not necessarily have any clear bearing on the scope of the assassination ban in E.O. 12333. On the other hand, recent joint resolutions of Congress, discussed presently, may pertain.

Role of Congress/Legislation

On Friday, September 14, 2001, both the House and the Senate passed joint resolutions, S.J.Res. 23 and H.J.Res. 64, authorizing the President to "use all necessary and appropriate force against those nations, organizations, or persons he determines planned, authorized, committed, or aided the terrorist attacks that occurred on September 11, 2001, or harbored such organizations or persons, in order to prevent any future acts of international terrorism against the United

---

[2002] 18 U.S.C. § 1116(c).

[2003] 18 U.S.C. § 1116(b)(4).

[2004] 18 U.S.C. § 1116(b)(5). 22 U.S.C. § 288 defines "international organization" to mean:

. . . a public international organization in which the United States participates pursuant to any treaty or under the authority of any Act of Congress authorizing such participation or making an appropriation for such participation, and which shall have been designated by the President through appropriate Executive order as being entitled to enjoy the privileges, exemptions, and immunities provided in this subchapter. . . .

For a list of those organizations so designated, see 22 U.S.C. § 288 note.

States by such nations, organizations or persons."[2005] In addition, the "Congress declares that this section is intended to constitute specific statutory authorization within the meaning of section 5(b) of the War Powers Resolution."[2006] S. J. Res 23 was signed by the President, and became P.L. 107-40, 115 Stat. 224 (Sept. 18, 2001). This law makes no explicit reference to the assassination ban in E.O. 12333, section 2.11. However, if the assassination ban were to be interpreted to cover U.S. responses to terrorist attacks on U.S. soil, the breadth of the authority provided by these joint resolutions might be viewed as sufficient, insofar as U.S. responses to the events of September 11, 2001 are concerned, to encompass actions that might otherwise be prohibited under the assassination ban. Other legislation has been introduced to expressly revoke the express prohibition against assassination in the Ford, Carter, and Reagan executive orders. See, e.g., H.R. 19 (introduced 1/3/01 and referred to House Committee on International Relations).

[2005] Sec. 2(a).

[2006] Sec. 2(b)(1).

American Law Division

Summary

The Posse Comitatus Act states that: Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined under this title or imprisoned not more than two years, or both. 18 U.S.C. § 1385. It reflects an American tradition that bridles at military involvement in civilian affairs. Congress, however, has approved a number of instances where extraordinary circumstances warrant a departure from the general rule, particularly in cases where the armed forces provide civilian assistance without becoming directly involved in civilian law enforcement. This is an abridged version of The Posse Comitatus Act and Related Matters: The Use of the Military to Execute Civilian Law, CRS Report 95-964 in which the authorities for the statements made here may be found. This report summarizes proposed bills that could result in increased interaction between military and civil authorities. (H.R. 1986, H.R. 1815, S. 1042, S. 1043).

Introduction

The Posse Comitatus Act, 18 U.S.C. § 1385, is perhaps the most tangible expression of an American tradition , born in England and developed in the early years of our nation, that rebels against military involvement in civilian affairs. The Declaration of Independence listed among our grievances against Great Britain that the King had "kept among us, in times of peace, Standing Armies without the consent of our legislatures," had "affected to render the Military independent of and superior to the civil power." The Articles of Confederation addressed the threat of military intrusion into civilian affairs by demanding that the armed forces assembled during peacetime be no more numerous than absolutely necessary for the common defense, and by entrusting control to civil authorities within the states. The Constitution continued the theme. It provided that a civilian, the President, should be the Commander in Chief of the Army and Navy of the United States and that civilian authorities, the Congress, should be solely empowered to raise and support Armies, provide and maintain a Navy, and make rules for their government and regulation. The Bill of Rights limited the quartering of troops in private homes, U.S. Const. Amend. III, and noted that "a well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed," U.S. Const. Amend. II. The Constitution, on the other hand, explicitly permitted the Congress to provide for calling out the militia to execute the laws, suppress insurrection, and repel invasion, U.S. Const. Art. I, § 8, cl.16. Soon after Congress was first assembled under the Constitution, it authorized the President to call out the militia, initially to protect the frontier against " hostile incursions of the Indians," and subsequently in cases of invasion, insurrection, or obstruction of the laws. The President's authority to call upon the state militia to aid in putting down insurrections is reminiscent of the authority enjoyed by the sheriff at common law to call upon the posse comitatus. In the beginning the two were comparable but unrelated. Even though Congress empowered the President to call out the militia to overcome obstructions to law enforcement, it continued to vest the federal equivalent of the sheriff, the federal marshal, with the power to call forth the posse comitatus in performance of his duties.

Congress in some cases specifically authorized recourse to the posse comitatus for the enforcement of particular statutes. Under the Fugitive Slave Act, for instance, owners whose slaves had escaped to another state were entitled to an arrest warrant for the slaves and to have the warrant executed by federal marshals. The marshals in turn might " summon and call to their aid the bystanders, or posse comitatus of the proper county . . . [and] all good citizens [were] commanded to aid and assist in the prompt and efficient execution of this law, whenever their services may be required, as aforesaid, for that purpose," 9 Stat. 462, 463 (1850). Attorney General Caleb Cushing declared that the " bystanders" contemplated by the Fugitive Slave Act might include members of a state militia even when not in federal service, and in fact encompassed members of the armed forces by virtue of their duties as citizens as part of the posse comitatus.

Following the Civil War, the use of federal troops to execute the laws, particularly in the states that had been part of the Confederacy, continued even after all other political restrictions had been lifted. The Posse Comitatus Act was passed as part of an Army appropriations bill in response. With exception of a reference to the Air Force, it has remained essentially unchanged ever since, although Congress has authorized a substantial number of exceptions and has buttressed the Act with an additional proscription against use of the armed forces to make arrests or conduct searches and seizures. While the war against terrorism has led some to call for a reexamination of the role of the military in domestic law enforcement, Congress, in establishing the Department of Homeland Security, expressed its sense reaffirming the continued importance and applicability of the Posse Comitatus Act. 6 U.S.C. § 466.

When the Act Does Not Apply

Constitutional Exceptions: The Posse Comitatus Act does not apply " in cases and under circumstances expressly authorized by the Constitution," 18 U.S.C. § 1385. It has been observed that the Constitution contains no provision expressly authorizing the use of the military to execute the law, that the exception was included as part of a face-saving compromise, and that consequently it should be ignored.

The older commentaries suggest that the word " expressly" must be ignored, for otherwise in their view the Posse Comitatus Act is a constitutionally impermissible effort to limit the powers of the President. The regulations covering the use of the armed forces during civil disturbances do not go quite that far, but they do assert two constitutionally based exceptions – sudden emergencies and protection of federal property. The question of whether the constitutional exception includes instances where the President is acting under implied or inherent constitutional powers is one the courts have yet to answer.

Statutory Exceptions—Generally

The Posse Comitatus Act does not apply where Congress has expressly authorized use of the military to execute the law. Congress has done so in three ways, by giving a branch of the armed forces civilian law enforcement authority, by establishing general rules for certain types of assistance, and by addressing individual cases and circumstances with more narrowly crafted legislation. Thus it has vested the Coast Guard, a branch of the armed forces, with broad law enforcement responsibilities. Second, over the years it has passed a fairly extensive array of particularized statutes, like those permitting the President to call out the armed forces in times of insurrection and domestic violence, 10 U.S.C. §§ 331-335. Finally, it has enacted general legislation authorizing the armed forces to share information and equipment with civilian law enforcement agencies, 10 U.S.C. §§ 371-382.

These last general statutes were crafted to resolve questions raised by the so-called Wounded Knee cases (see below). The legislation contains both explicit grants of authority and restrictions on the use of that authority for military assistance to the police – federal, state and local – particularly in the form of information and equipment, 10 U.S.C. §§ 371-382. Section 371 specifically authorizes the armed forces to share information acquired during military operations and in fact encourages the armed forces to plan their activities with an eye to the production of incidental civilian benefits. The section allows the use of military undercover agents and the collection of intelligence concerning civilian activities only where there is a nexus to an underlying military purpose. Under sections 372 through 374, military equipment and facilities may be made available to civilian authorities; members of the armed forces may train civilian police on the operation and maintenance of equipment and mayprovide them with expert advice; and military personnel may be employed to maintain and operate the equipment supplied. The authority granted in sections 371-382 is subject to three general caveats. It may not be used in any way that could undermine the military capability of the United States; the civilian beneficiaries of military aid must pay for the assistance; and the Secretary of Defense must issue regulations to ensure that the authority of sections 371 to 382 does not result in use of the armed forces to make arrests or conduct searches and seizures solely for the benefit of civilian law enforcement.

Military Purpose

The armed forces, when in performance of their military responsibilities, are beyond the reach of the Posse Comitatus Act and its statutory and regulatory supplements. Neither the Act nor its legislative history resolves the question of whether the Act prohibits the Army from performing its military duties in a manner which affords incidental benefits to civilian law enforcement officers. The courts and commentators believe that it does not. As long as the primary purpose of an activity is to address a military purpose, the activity need not be abandoned simply because it also assists civilian law enforcement efforts.

Willfully Execute the Laws

The Act is limited to " willful" misuse of the Army or Air Force. The Senate version of the original Act would have limited proscription to " willful and knowing" violations, 7 Cong. Rec. 4302 (1878); the House version had no limitation, 7 Cong. Rec. 4181 (1878). The compromise which emerged from conference opted to forbid only willful violations, but nothing in the legislative history explains what the limitation means. It seems unlikely that a court would convict for anything less than a deliberate disregard of the law's requirements.

When has the Army or Air Force been used " to execute the laws" ? Existing case law and commentary indicate that " execution of the law" in violation of the Posse Comitatus Act occurs (a) when the armed forces perform tasks ordinarily assigned not to them but to an organ of civil government, or (b) when the armed

forces perform tasks assigned to them solely for purposes of civilian government. While inquiries may surface in other contexts, such as the use of the armed forces to fight forest fires or to provide assistance in the case of other natural disasters, Posse Comitatus Act questions arise most often when the armed forces assist civilian police.

The tests used by most contemporary courts to determine whether military forces have been used improperly as police forces in violation of the Posse Comitatus Act were developed out of disturbances in 1973 at Wounded Knee on the Pine Ridge Indian Reservation in South Dakota and inquire: (1) whether civilian law enforcement officials made a direct active use of military investigators to execute the law; (2) whether the use of the military pervaded the activities of the civilian officials; or (3) whether the military was used so as to subject citizens to the exercise of military power which was regulatory, prescriptive, or compulsory in nature.

Military Coverage

Navy and Marines

The Posse Comitatus Act proscribes use of the Army or the Air Force to execute the law. It says nothing about the Navy, the Marine Corps, the Coast Guard, or the National Guard. The courts have generally held that the Posse Comitatus Act by itself does not apply to the Navy or the Marine Corps. They maintain, however, that those forces are covered by similarly confining administrative and legislative supplements, which appear in the Department of Defense (DoD) Directive.

Coast Guard

The Posse Comitatus Act likewise says nothing about the Coast Guard. The Coast Guard is a branch of the armed forces, located within the Department of Homeland Security, 14 U.S.C. § 1 (as amended), but relocated within the Navy in time of war or upon the order of the President, 14 U.S.C. § 3. The Act will apply to the Coast Guard while it remains part of the Department of Homeland Security. While part of the Navy, it is subject to the orders of the Secretary of the Navy, 14 U.S.C. § 3, and consequently to any generally applicable directives or instructions issued under the Department of Defense or the Navy. As a practical matter, however, the Coast Guard is statutorily authorized to perform law enforcement functions, 14 U.S.C. § 2. Even while part of the Navy its law enforcement activities would come within the statutory exception to the posse comitatus restrictions, and the restrictions applicable to components of the Department of Defense would only apply to activities beyond those authorized.

National Guard

The Act is silent as to what constitutes " part" of the Army or Air Force for purposes of proscription. There is little commentary or case law to resolve questions concerning the coverage of the National Guard, the Civil Air Patrol,

civilian employees of the armed forces, or regular members of the armed forces while off duty.

Strictly speaking, the Posse Comitatus Act predates the National Guard onlyin name for the Guard " is the modern Militia reserved to the States by Art. I, § 8, cls.15, 16, of the Constitution" which has become " an organized force, capable of being assimilated with ease into the regular military establishment of the United States," Maryland v. United States, 381 U.S. 41, 46 (1965). There seems every reason to consider the National Guard part of the Army or Air Force, for purposes of the Posse Comitatus Act, when in federal service. When not in federal service, historical reflection might suggest that it is likewise covered. Recall that it was the state militia, called to the aid of the marshal enforcing the Fugitive Slave Act, which triggered Attorney General Cushing's famous opinion. The Posse Comitatus Act's reference to " posse comitatus or otherwise" is meant to abrogate the assertion derived from Cushing's opinion that troops could be used to execute the law as long as they were acting as citizens and not soldiers when they did so.

On the other hand, the National Guard is creature of both state and federal law, a condition which as the militia it has enjoyed since the days of the Articles of Confederation. Courts have held that members of the National Guard when not in federal service are not covered by the Posse Comitatus Act. Similarly, the DoD directive is only applicable to members of the National Guard when they are in federal service.

Off Duty, Acting as Citizens and Civilian Employees

The historical perspective fares little better on the question of whether the Posse Comitatus Act extends to soldiers who assist civilian law enforcement officials in a manner which any other citizen would be permitted to provide assistance, particularly if they do so while off duty. Congress passed the Act in response to cases where members of the military had been used based on their civic obligations to respond to the call as the posse comitatus. The debate in the Senate, however, suggests that the Act was not intended to strip service members of all civilian rights and obligations. The more recent decisions have focused on the nature of the assistance provided and whether it is incidental to action taken primarily for a military purpose.

Some have questioned whether civilian employees of the armed forces should come within the proscription of the Act, but most, frequently without comment, seem to consider them " part" of the armed forces for purposes of the Posse Comitatus Act. The current DoD directive expressly includes civilian employees " under the direct command and control of a military officer" within its Posse Comitatus Act policy restrictions.

Geographical Application

The Posse Comitatus Act contains no expression of extraterritorial application, but it seems unlikely that it was meant to apply beyond the confines of the United

States, its territories and possessions. Congress enacted it in response to problems occurring within the United States and its territories, problems associated with the American political process and policies and actions that promoted military usurpation of civilian law enforcement responsibilities over Americans. Congress does appear to have intended the authority and restrictions contained in 10 U.S.C. §§ 371-382 to apply both in the United States and beyond its borders.

Consequences of Violation

Prosecution

The Posse Comitatus Act is a criminal statute under which there has apparently never been a prosecution. It has been invoked with varying degrees of success, however, to challenge the jurisdiction of the courts, as a defense in criminal prosecutions for other offenses, as a ground for the suppression of evidence, as the grounds for, or a defense against, civil liability, and as a means to enjoin proposed actions by the military.

Exclusion of Evidence

Allegations that the Posse Comitatus Act has been violated are made most often by defendants seeking to exclude related testimony or physical evidence, but most cases note the absence of an exclusionary rule, often avoiding unnecessary analysis of the scope of the Act and whether a violation has occurred.

Jurisdiction and Criminal Defenses

Defendants have found the Act helpful in prosecutions where the government must establish the lawfulness of its conduct as one of the elements of the offense. Several defendants at Wounded Knee persuaded the court that evidence of possible violations precluded their convictions for obstructing law enforcement officials " lawfully engaged" in the performance of their duties.

Civil Liability

The Eighth Circuit has declared that a violation of the Act might constitute an unreasonable search and seizure for purposes of the Fourth Amendment, giving rise to a Bivens cause of action against offending federal officers or employees.

Compliance

The most significant impact of the Posse Comitatus Act is attributable to compliance by the armed forces. As administrative adoption of the Act for the Navy and Marines demonstrates, the military has a long standing practice of avoiding involvement in civilian affairs which it believes are contrary to the Act, and which date back to military acceptance of civilian authority since the founding of the Republic.

Proposed New Exceptions

H.R. 1986 would amend title 10 to allow the Secretary of Defense to provide military personnel to assist the Department of Homeland Security when necessary to respond to " a threat to national security posed by the entry into the United States of terrorists, drug traffickers, or illegal aliens." Specially trained service members could be assigned to assist the Bureau of Border Security and the U.S. Customs Service, but would not be authorized to carry out searches, seizures, or other similar law enforcement activities. The Secretary would be empowered to establish ongoing joint task forces to carry out these activities. Military members would first have to undergo training in issues related to law enforcement in border areas and would have to be accompanied by civilian law enforcement officers. H.R. 1986 passed the House as section 1035 of the National Defense Authorization Act for FY2006 (H.R. 1815), but without a limitation that would have ended the authority after September 30, 2007.

S. 1042 and S. 1043, the Senate Defense authorization bills, would add a new section 383 to title 10, which would authorize the Secretary of Defense to use unmanned aerial vehicles and DoD personnel to conduct aerial reconnaissance within U.S. Northern Command' s area of responsibility, in order to monitor air and sea traffic along the border and coastline, and to communicate resulting information to the appropriate federal, state, and local law enforcement officials. The activity would be funded from counterdrug appropriations. The prohibitions against military personnel participating in searches, seizures, or arrests would apply.

American Public Law

Summary

The Posse Comitatus Act outlaws willful use of any part of the Army or Air Force to execute the law unless expressly authorized by the Constitution or an Act of Congress. History supplies the grist for an argument that the Constitution prohibits military involvement in civilian affairs subject to only limited alterations by Congress or the President, but the courts do not appear to have ever accepted the argument unless violation of more explicit constitutional command could also be shown. The provision for express constitutional authorization when in fact the Constitution contains no such express authorizations has been explained alternatively as a meaningless political face saving device or as an unartful reference to the President's constitutional powers. The express statutory exceptions include the legislation which allows the President to use military force to suppression insurrection, 10 U.S.C. 331-335, and sections which permit the Department of Defense to provide federal, state and local police with information and equipment, 10 U.S.C. 371-381.

Existing case law indicates that "execution of the law" in violation of the Posse Comitatus Act occurs (a) when the armed forces perform tasks which are assigned not to them but to an organ of civil government, or (b) when the armed forces perform tasks assigned to them solely for purposes of civilian government. Questions arise most often in the context of assistance to civilian police. At least in this context, the courts have held that, absent a recognized exception, the Posse Comitatus Act is violated, (1) when civilian law enforcement officials make "direct active use" of military investigators; or (2) when the use of the military "pervades the activities" of the civilian officials; or (3) when the military is used so as to subject "citizens to the exercise of military power which was regulatory, prescriptive, or compulsory in nature." The Act is not violated when the armed forces conduct activities for a military purpose which have incidental benefits for civilian law enforcement officials.

The language of the Act mentions only the Army and the Air Force, but it is applicable to the Navy and Marines by virtue of administrative action and commands of other laws. The law enforcement functions of the Coast Guard have been expressly authorized by act of Congress and consequently cannot be said to be contrary to the Act. The Act has been applied to the National Guard when it is in federal service, to civilian employees of the armed forces, and to off-duty military personnel.

The Act is probably only applicable within the geographical confines of the United States, but the supplemental provisions of 10 U.S.C. 371-381 appear to apply world-wide. Finally, the Act is a criminal statute under which there has never been a prosecution. Although violations will on rare occasions result in the exclusion of evidence, the dismissal of criminal charges, or a civil cause of action, as a practical matter compliance is ordinarily the result of military self-restraint. This report appears in abridged form as CRS Report RS20590, *The Posse Comitatus Act: A Sketch*.

Introduction

> *Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined under this title or imprisoned not more than two years, or both. 18 U.S.C. 1385.*

Americans have a tradition, born in England and developed in the early years of our nation, that rebels against military involvement in civilian affairs. It finds its most tangible expression in the nineteenth century Posse Comitatus Act, 18 U.S.C. 1385. The Act forbids use of the Army and Air Force to execute civil law except where expressly authorized.

The exception documents a contrary component of the tradition. It accepts the use of the armed forces in extraordinary circumstances if expressly approved by Congress. Striking the balance between rule and exception has never been easy, but failure to do so has often proven unfortunate. When the rule is too unforgiving, a Shays's Rebellion may go unchecked. When exceptions are too generously granted, a Boston Massacre or Kent State tragedy may follow.

Several times in the recent past, concerns that civil authorities may be overwhelmed by threats of natural disasters, civil disturbances, drug trafficking, and terrorism have produced calls for more generous exceptions to the rule. Some of those calls have been answered, others have not. This is an effort to sketch the current state of the law.

Background

The Magna Carta gives us the first recorded acknowledgment of the origins of the Anglo-American tradition against military involvement in civilian affairs with its declaration that "no free man shall be . . . imprisoned . . . or in any other way destroyed . . . except by the legal judgment of his peers or by the law of the land."[2007] Subsequent legislation in the reign of Edward III explained that this precluded punishment by the King except "in due Manner . . . or by Process made by Writ. . . [or] by Course of the Law,"[2008] or as later more simply stated, except "by due Process of the Law."[2009] Three hundred years after the passage of the Edwardian statutes, Lord Coke and other members of Parliament read these due process and law of the land requirements to include a broad prohibition against the use of martial law in peacetime, an interpretation they compelled King Charles I to acknowledge.[2010]

[2007] Magna Carta, ch. 39 (1225)[ch.29 in the Charter of King John (1215)], reprinted in SWINDLER, MAGNA CARTA: LEGEND AND LEGACY 315-16 (1965)("No freeman shall be taken, or imprisoned, or be disseised of any freehold, or liberties, or free customs, or outlawed, or banished, or in any other way destroyed, nor will we go or send against him, except by the lawful judgment of his peers or by the law of the land" (language added to ch.29 of the Charter of King John in the reissuance by King Henry III appears in italics). Although the Magna Carta in the modified version of King Henry remains in effect, the language quoted above is generally cited as "chapter 29," see e.g., THOMPSON, MAGNA CARTA: ITS ROLE IN THE MAKING OF THE ENGLISH CONSTITUTION 1300-1629 68 (1948); HALE, THE HISTORY OF THE COMMON LAW OF ENGLAND 49 (1716 ed.); I COKE, THE SECOND PART OF THE INSTITUTES OF THE LAWS OF ENGLAND 45 (1797 ed.); I BLACKSTONE, COMMENTARIES ON THE LAWS OF ENGLAND 400 (1765 ed.).

[2008] 25 Ed.III. Stat.5, ch.4 (1352), reprinted in, 1 STATUTES OF THE REALM, 1231-1377 321 (1993)("Whereas it is contained in the Great Charter of the Franchises of England, that none shall be imprisoned nor put out of his Freehold, nor of his Franchises nor free Custom, unless it be by the Law of the Land; It is accorded assented, and established, That from henceforth none shall be taken by Petition or Suggestion made to our Lord the King, or to his Council, unless it be by Indictment or Presentment of good and lawful People of the same neighbourhood where such Deeds be done, in due Manner, or by Process made by Writ original at the Common Law; nor that none be out of his Franchises, nor of his freeholds, unless he be duly brought into answer, and forejudged of the same by the Course of the Law; and if any thing be done against the same, it shall be redressed and holden for none").

[2009] 28 Ed.III. chs. 1, 3 (1354), reprinted in 1 STATUTES OF THE REALM, 1231-1377 345 (1993)("the Great Charter . . . [shall] be kept and maintained in all Points. . . . No Man of what[ever] Estate or Condition that he be, shall be put out of land or Tenement, nor taken, nor imprisoned, nor disinherited, nor put to Death, without being brought in Answer by due Process of the Law").

[2010] See, THOMPSON, MAGNA CARTA: ITS ROLE IN THE MAKING OF THE ENGLISH CONSTITUTION, 1300-1629, 347-50 (1948); Engdahl, Soldiers, Riots, and Revolution: The Law and History of Military Troops in Civil Disorders 51 IOWA LAW REVIEW 1 (1971). Coke's Institutes make the same point; proceedings under martial law are not proceedings under the "law of the land" (lex terrae), I COKE, THE SECOND PART OF THE INSTITUTES OF THE LAWS OF ENGLAND 50 ("And so if two English men doe goe into a foreine kingdome, and fight there, and the one murder the other, lex terrae extendeth not hereunto, but this offense shall be heard,

King Charles I, preparing for a military expedition in France, had quartered his troops in homes along the southern English coastline.[2011] Rioting resulted, and the participants, both military and civilian, were tried and punished by commissioners operating under the authority of martial law. Offended by this peacetime exercise of military judicial authority over civilians, Parliament sought and was granted the Petition of Right of 1628 which outlawed both quartering and martial law commissions.[2012]

---

and determined before the constable, and marshall [i.e. at martial law], and such proceedings shall be there, by attaching of the body, and otherwise, as the law, and custom of that court have been allowed by the lawes of the realme, [13 H.IV. ch.5 (1412)]").

[2011] For a more expansive examination, see Engdahl, Soldiers, Riots, and Revolution: The Law and History of Military Troops in Civil Disorders 51 IOWA LAW REVIEW 1 (1971).

[2012] "And whereas also by the statute called `The Greater Charter of the liberties of England,'[the Magna Carta] it is declared and enacted, that no freeman may be taken or imprisoned or be disseised of his freehold or liberties, or his free customs, or be outlawed or exiled, or in any manner destroyed, but by the lawful judgment of his peers, or by the law of the land. And in the eight-and-twentieth year of the reign of King Edward III, it was declared and enacted by authority of parliament, that no man, of what estate or condition that he be, should be put out of his land or tenements, nor taken, nor imprisoned, nor disinherited, nor put to death without being brought to answer by due process of law. . . . [N]everthess of late time divers commissions under your Majesty's great seal have issued forth, by which certain persons have been assigned and appointed commissioners with power and authority to proceed within the land, according to the justice of martial law, against such soldiers or mariners, or other dissolute persons joining with them, as should commit any murder, robbery, felony, mutiny, or other outrage or misdemeanour whatsoever, and by such summary course and order as is agreeable to martial law, and as is used in armies in time of war, to proceed to the trial and condemnation of such offenders, and them to cause to be executed and put to death according to the law martial . . . . They do therefore humbly pray your most excellent Majesty . . . that your Majesty would be pleased to remove the said soldiers and mariners, and that your people may not be so burdened in time to come; and that the aforesaid commissions, for proceeding by martial law, may be revoked and annulled; and that hereafter no commissions of like nature may issue forth to any person or persons whatsoever to be executed as aforesaid, lest by colour of them any of your Majesty's subjects be destroyed or put to death contrary to the laws and franchise of the land. Petition of Right, 3 Car.I, c.1, §§3, 4, 7, 10, reprinted in STUBBS, SELECT CHARTERS AND OTHER ILLUSTRATIONS OF ENGLISH CONSTITUTIONAL HISTORY FROM THE EARLIEST TIMES TO THE REIGN OF EDWARD THE FIRST 515-17 (8th ed. 1895); and in 5 STATUTES OF THE REALM 23, 24 (1993). See also, HALE, HISTORY OF THE COMMON LAW OF ENGLAND 39-40 (2d ed. 1716)("But touching the business of martial law, these things are to be observed, First, That in truth and reality it is not a law, but something indulged rather than allowed as a law; the necessity of government, order and discipline in an army, is that only which can give those laws a countenance. Secondly, This indulged law was only to extend to members of the army, or to those of the opposite army, and never was so much indulged as intended to be (executed or) exercised upon others; for others were not listed under the army, had no colour of reason to be bound by military constitutions, applicable only to the army; whereof they were not parts, but they were to be ordered and governed according to the laws to which they were subject, though it were a time of war. Thirdly, That the exercise of martial law, whereby any person should lose his life or member, or liberty, may not be permitted in time of peace, when the King's courts are open for all persons to receive justice, according to the laws of the land. This is the substance declared by Petition of Right, 3 Car. I. whereby such commissions and martial law were repealed and declared to be contrary to

When, in the following century, the British responded to colonial unrest by quartering troops in Boston, the colonists saw it as a breach of this fundamental promise of English law. Their circumstances, however, were not exactly identical to those surrounding the Petition of Right. First, the question arose in the colonies. England had stationed troops in the colonies to protect them against the French and Indians and had opted for military governorships in other territories. Second, there was no military usurpation of judicial functions. The colonists remained subject to civil rather than military justice, and soldiers who employed more force than civilian law permitted were themselves subject to civilian justice as the trials of the soldiers involved in the Boston Massacre demonstrates.

On the other hand, the troops involved in the Boston Massacre were stationed in Massachusetts not for protection against a marauding invader as they had been in the French and Indian Wars, not to accomplish the transition between civil governments within a conquered territory as they had been after the French lost Canada to the British as a consequence of those conflicts, but as an independent military force quartered among a disgruntled civilian population to police it.[2013]

---

law"); I BLACKSTONE, COMMENTARIES ON THE LAWS OF ENGLAND 400 (1765)("For martial law, which is build upon no settled principles, but is entirely arbitrary in its decisions, is, as Sir Matthew Hale observes, in truth and reality no law, but something indulged, rather than allowed as a law; the necessity of order and discipline in an army is the only thing which can give it countenance; and therefore it ought not to be permitted in time of peace, when the king's courts are open for all persons to receive justice according to the laws of the land. . . . And it is laid down, that if a lieutenant, or other, that hath commission of martial authority, doth in time of peace hang or otherwise execute any one by colour of martial law, this is murder; for it is against the magna carta. And the petition of right enacts, that no soldier shall be quartered on the subject without his own consent; and that no commission shall issue to proceed within this land according to martial law. And whereas, after the restoration, king Charles the second kept up about five thousand regular troops, by his own authority, for guards and garrisons; which king James the second by degrees increased to no less than thirty thousand, all paid from his own civil list; it was made one of the articles of the bill of rights, that the raising or keeping of a standing army within the kingdom in time of peace, unless it be with the consent of the parliament, is against the law").

[2013] ZOBEL, THE BOSTON MASSACRE 135 (1987) ("The soldiers, one ought always to remember, went into Boston not as an occupying army but rather as a force of uniformed peace-keepers, or policemen. Their role as even the radicals conceived it was to assist the executive and if necessary the courts to maintain order"); Engdahl, Soldiers, Riots, and Revolution: The Law and History of Military Troops in Civil Disorders, 57 IOWA LAW REVIEW 1,24-5 (1971) ("The last die was cast when two regiments of troops were quartered in Boston at the end of the decade. Boston was a hotbed of colonial discontent. The assemblage of military troops for control of possible disorders aggravated the discontent, not only because it affronted the English tradition against domestic use of military troops, but also because it was without warrant in the charter of Massachusetts Bay. The unwelcome troops were frequently taunted and vilified, and the ultimate and inevitable outrage soon occurred. A crowd of angry Bostonians . . . blocked the path of a detachment of soldiers marching to their post. The soldiers made ready to force their passage, but were ordered back to the main guard. . . . The crowd approached the main guard with angry and opprobrious taunts. A sentinel struck one particularly bothersome boy with the butt of his musket, and quickly a crowd converged on that spot throwing snowballs and rocks at the sentinel along with verbal

In any event, the experience was sufficiently vexing that the Declaration of Independence listed among our grievances against Great Britain that the King had "kept among us, in times of peace, Standing Armies without the consent of our legislatures," had "affected to render the Military independent of and superior to the civil power," and had "quarter[ed] large bodies of armed troops among us . . . protecting them, by a mock trial, from punishment for any murders which they should commit on the inhabitants of these States."[2014]

The Articles of Confederation addressed the threat of military intrusion into civilian affairs by demanding that the armed forces assembled during peacetime be no more numerous than absolutely necessary for the common defense, by entrusting control to civil authorities within the states, and by a preference for the farmer in arms as a member of the militia over the standing professional army.[2015]

The Constitution continued these themes albeit with greater authority vested in the federal government. It provided that a civilian, the President, should be the Commander in Chief of the Army and Navy of the United States and that civilian authorities, the Congress, should be solely empowered to raise and support

---

threats on his life. The sentinel loaded his musket and waved it at the mob, a squad of soldiers were sent to his aid. The soldiers, soon joined by a colonel, loaded their muskets as the crowd hooted and jeered and berated them and dared them to shoot. They kept the crowd back a time with bayonets, but then suddenly fired. It was never made clear -- it never is --whether they had fired on their officer's order, or upon their own compulsion. In any event, five Americans lay dead and several others seriously wounded. . . . Members of a distrusted standing army, whose quartering was in violation of the Petition of Right, and whose preparation to militarily suppress possible civil disorder was inconsistent with the oldest of England's own traditions, had slain English civilians in a time of peace").

[2014] This last charge presumably refers to the results of the murder trials of the officer and soldiers involved in the Boston Massacre. Two of the soldiers were convicted of manslaughter, branded on the hand and released; the officer and the other soldiers were acquitted. ZOBEL, THE BOSTON MASSACRE 241-94 (1987).

[2015] E.g., "No vessels of war shall be kept up in time of peace by any State, except such number only, as shall be deemed necessary by the United States in Congress assembled, for the defence of such State, or its trade; nor shall any body of forces be kept up by any State, in time of peace, except such number only, as in the judgment of the United States, in Congress assembled, shall be deemed requisite to garrison the forts necessary for the defence of such State; but every State shall always keep a well regulated and disciplined militia, sufficiently armed and accoutered, and shall provide and constantly have ready for public use, in public stores, a due number of field pieces and tents, and a proper quantity of arms, ammunition and camp equipage . . . . When land-forces are raised by any State for the common defence, all officers of or under the rank of colonel, shall be appointed by the Legislature of each State respectively by whom such forces shall be raised, or in such manner as such State shall direct, and all vacancies shall be filled up by the State which first made the appointment. . . . The United States in Congress assembled shall never . . . appoint a commander in chief of the army or navy, unless nine States assent to the same. . . ." Arts. of Conf. VI, VII, & IX.

Armies, provide and maintain a Navy, and make rules for their government and regulation.[2016] The Bill of Rights limited the quartering of troops in private homes, U.S. Const. Amend. III, and noted that "a well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed," U.S. Const. Amend. II. The Constitution, on the other hand, explicitly permitted the Congress to provide for calling out the militia to execute the laws, suppress insurrection, and repel invasion, U.S.Const. Art.I, §8, cl.16.

Soon after Congress was first assembled under the Constitution, it authorized the President to call out the militia, initially to protect the frontier against "hostile incursions of the Indians," and subsequently in cases of invasion, insurrection, or obstruction of the laws.[2017]

Washington used this authority to put down the Whiskey Rebellion in Western Pennsylvania[2018] and subsequent Presidents have relied upon it with some

---

[2016] U.S.Const. Art.II, §2; Art.I, §8, cls.12, 13, 14. The Constitution treats the militia similarly. The President is the Commander in Chief of the militia while it is in federal service, and Congress is empowered to approve its organization, arms and discipline, U.S.Const. Art.II, §2; Art.I, §8, cl.15.

[2017] 1 Stat. 96 (1789); 1 Stat. 264 (1792). The Constitutional and statutory authority to use military force in case on insurrection seems to have been in direct response to a perceived weakness in government under the Articles of Confederation. In 1787, a group farmers in western Massachusetts, lead by a Revolutionary War veteran named Daniel Shays and feeling oppressed by tax and creditor protection policies within the Commonwealth, had harassed the state courts and constabulary, and had attempted to storm the federal arsenal at Springfield before being repulsed by the militia. Some saw in the insurrection evidence of the need for a stronger central government and implicitly that domestic tranquility might be more readily ensured if backed by centralized military capable. I MORISON, COMMAGER, & LEUCHTENBURG, THE GROWTH OF THE AMERICAN REPUBLIC 242 (7th ed. 1980)("Nevertheless, Shays's Rebellion had a great influence on public opinion. . . . When Massachusetts appealed to the Confederation for help, Congress was unable to do a thing. That was the final argument to sway many Americans in favor of a stronger federal government"); COLLIER & COLLIER, DECISION IN PHILADELPHIA: THE CONSTITUTIONAL CONVENTION OF 1787 13 (1986)("To men like Madison and Washington, Shays's Rebellion was an imperative. It hung like a shadow over the old Congress, and gave both impetus and urgency to the Constitutional Convention. It was the final, irrefutable piece of evidence that something had good badly wrong. For some time these men had known that the deficiencies of the American government must be remedied. Shays' Rebellion made it clear to them that it must be done now"). BOWEN, MIRACLE AT PHILADELPHIA: THE STORY OF THE CONSTITUTIONAL CONVENTION MAY TO SEPTEMBER 1787 10 (1966) ("Shays's Rebellion had been in the public mind when Congress, after debating the Annapolis report, had voted in favor of a convention in Philadelphia").

[2018] See Presidential Proclamations of Aug. 7, 1794 and Sept. 25, 1794, I RICHARDSON, A COMPILATION OF THE MESSAGES AND PAPERS OF THE PRESIDENTS 158-62 (1896); SLAUGHTER, THE WHISKEY REBELLION: FRONTIER EPILOGUE TO THE AMERICAN REVOLUTION (1986); BOYD, THE WHISKEY REBELLION: PAST AND PRESENT PERSPECTIVES (1985).

frequency for riot control or when in extreme cases they felt it necessary to ensure the execution of federal law.[2019]

The President's authority to call upon the state militia to aid in putting down insurrections is reminiscent of the authority enjoyed by the sheriff at common law to call upon the posse comitatus.[2020] In the beginning the two were comparable but unrelated. Even though Congress empowered the President to call out the militia to overcome obstructions to law enforcement, it continued to vest the federal equivalent of the sheriff, the federal marshal, with the power to call forth the posse comitatus in performance of his duties.[2021]

In some cases when it passed a particular statute Congress specifically authorized recourse to the posse comitatus for its enforcement. Under the Fugitive Slave Act, for instance, owners whose slaves had escaped to another state were entitled to an arrest warrant for the slaves and to have the warrant executed by the federal marshals. The marshals in turn might "summon and call to their aid the bystanders, or posse comitatus of the proper county . . . [and] all good citizens [were] commanded to aid and assist in the prompt and efficient execution of this law, whenever their services may be required, as aforesaid, for that purpose," 9 Stat. 462, 463 (1850).

[2019] Eighteenth and nineteenth century instances are collected, along with related proclamations and other documentation, in Federal Aid in Domestic Disturbances: 17871903, S.DOC.NO. 209, 57th Cong., 2d Sess. (1903); for a more selective treatment but one which extends well into this century, see, RICH, PRESIDENTS AND CIVIL DISORDER (1941).

[2020] At common law, the sheriff of every county was obligated "to defend his county against any of the king's enemies when they come into the land; and for this purpose, as well as for keeping the peace and pursuing felons, he may command all the people of his county to attend him; which is call the posse comitatus, or power of the county; which summons every person above fifteen years old, and under the degree of a peer, is bound to attend upon warning, under pain of fine and imprisonment." I BLACKSTONE, COMMENTARIES ON THE LAWS OF ENGLAND, 332 (1765).

The Latin phrase literally means attendants with the capacity to act from the words comes and posse meaning companions or attendants (comes) and to be able or capable (posse). Among the Romans comitatus referred to one who accompanied the proconsul to his province. Later, comes (sometimes referred to as comites or counts) meant the king's companions or his most trusted attendants and comitatus came to refer to the districts or counties entrusted to their care. BOUVIER'S LAW DICTIONARY AND CONCISE ENCYCLOPEDIA 529, 2635 (1914).

[2021] E.g., 1 Stat. 87 (1789)("a marshal shall be appointed in and for each district . . . whose duty it shall be . . . to execute throughout the district, all lawful precepts directed to him, and issued under the authority of the United States, and he shall have the power to command all necessary assistance in the execution of his duty. . . ."); 1 Stat. 265 (1792)("the marshals of the several districts and their deputies shall have the same powers in executing the laws of the United States, as sheriffs and their deputies in the several states have by law, in executing the laws of their respective states").

In June of 1851, a federal marshal in Chicago arrested a fugitive slave on a warrant issued under the Act. He called for the assistance of members of the police force and of the state militia to prevent abolitionists from rescuing the prisoner before he could be returned to his owner. The marshal subsequently filed a claim with the Treasury of the United States for reimbursement of the funds he had paid the members of the police force and the militia who responded to his call. Attorney General Caleb Cushing was asked whether the United States was obligated to honor the claim.

Cushing's response went well beyond the question of whether the "bystanders" contemplated by the Fugitive Slave Act might included members of a state militia when not in federal service, and announced a broader principle -- members of the military by virtue of their duties as citizens were part of the posse comitatus. He declared:

> *"The posse comitatus comprises every person in the district or county above the age of fifteen years, whatever may be their occupation, whether civilians or not; and including the military of all denominations, militia, soldiers, marines, all of whom are alike bound to obey the commands of the sheriff or marshal. The fact that they are organized as military bodies, under the immediate command of their own officers, does not in any wise affect their legal character. They are still the posse comitatus. (xxi Parl. Hist., p.672, 688, per Lord Mansfield)." 6 Op.Att'y Gen. 466, 473 (1854).*[2022]

[2022] Cushing's citation to Lord Mansfield is apparently a reference to the remarks of the English Chief Justice during debate in the House of Lords concerning the validity of use troops to quell rioters in London: "The Duke of Richmond began with observing, that he was much pleased with the speech he heard that day from the throne. . . . He hoped, before he should agree to the Address, that ministers would give him satisfaction in another point: he meant in the continuing on foot of a military government. . . . Lord Mansfield for some time argued [several points]. . . after which his lordship went on: `. . . .[I]t appears most clearly to me, that every man may legally interfere to suppress a riot, much more to prevent acts of felony, treason, and rebellion, in his private capacity, but he is bound to do it as an act of duty; and if called upon by a magistrate, is punishable in case of refusal. . . . A private man, if he sees a person committing an unlawful act, more particularly an act amounting to a violent breach of the peace, felony, or treason, may apprehend the offender, and in his attempt to apprehend him may use force to compel him, not to submit to him, but to the law. What a private man may do, a magistrate or peace officer may clearly undertake; and according to the necessity of the case, arising from the danger to be apprehended, any number of men assembled or called together for the purpose are justified to perform. This doctrine I take to be clear and indisputable, with all the possible consequences which can flow from it, and to be the true foundation for calling in of the military power to assist in quelling the late riots.

"The persons who assisted in the suppression of those riots and tumults, in contemplation of law, are to be considered as mere private individuals, acting according to law, and upon any abuse of the legal power with which they are invested, are amendable to the laws of their country. For instance, supposing a soldier, or any other military person, who acted in the course of the late

Two years later, Cushing's opinion supplied the justification for the use of federal troops at the call of civil law enforcement authorities in what some saw as partisan involvement in the conflict between pro and anti-slavery forces in Kansas. Congress reacted with a rider to an Army appropriations bill forbidding the use of any "part of the military forces of the United States to enforce territorial law in Kansas."[2023] After some discussion of whether the amendment was germane, it was defeated.

Following the Civil War, the use of federal troops to execute the laws, particularly in the states that had been part of the Confederacy, continued even after all other political restrictions had been lifted. By 1877, there was evidence that Republican

---

riots, had exceeded the powers with which he was invested, I have not a single doubt but he is liable to be tried and punished, not by martial law, but by the common and statute law of the realm; consequently, the false idea that we are living under a military government or that the military have any more power or other power, since the commencement of the riots, is the point which I rose to refute, and on that ground to remove those idle and ill-founded apprehensions, that any part of the laws or the constitution are either suspended or have been dispensed with. . . . On the whole, my lords, while I deprecate and sincerely lament the cause which rendered it indispensably necessary to call out the military to assist in the suppression of the late disturbances, I am clearly of the opinion, that no steps have been taken which were not strictly legal, as well as fully justifiable in point of policy. . . . The military have been called in, and very wisely called in, not as soldiers, but as citizens: no matter whether their coats be red or brown, they have been called in aid of the laws, not to subvert them, or overturn the constitution, but to preserve both." XXI HANSARD, THE PARLIAMENTARY HISTORY OF ENGLAND FROM THE EARLIEST PERIOD TO THE YEAR 1803, 690-98 (June 19, 1780).

Cushing seemed to turn Lord Mansfield's point on its head when he wrote that, "the fact that they are organized as military bodies, under the immediate command of their own officers, does not in any wise affect their legal character." English law prohibited martial law, the use of military force domestically, in peacetime England. Lord Mansfield justified an apparent breach of the martial law proscription by asserting that the soldiers had acted as individuals called, commanded, and governed exclusively by the dictates of law applicable to civilians. Civilians are not organized as military units and are not subject to the command of military officers. Military law governs such matters. Lord Mansfield's justification could only hold as long as the soldiers were not organized as military bodies and were not acting under the command of their officers. The fact that they were organized as military bodies, under the immediate command of their own officers, would determine their legal character; it was in fact the critical determinant of their legal character.

[2023] "But Congress hereby disapproving the code of alleged laws officially communicated to them by the President, and which are represented to have been enacted by a body claiming to be the Territorial Legislature of Kansas; and also disapproving of the manner in which said alleged laws have been enforced by the authorities of said Territory, expressly declare that, until those alleged laws shall have been affirmed by the Senate and House of Representatives as having been enacted by a legal Legislature, chosen in conformity with the organic law, by the people of Kansas, no part of the military force of the United States shall be employed in aid of their enforcement, nor shall any citizen of Kansas be required, under those provisions to act as a part of the posse comitatus of any officer acting as a marshal or sheriff in said Territory." Cong.Globe 34th Cong., 1st & 2d Sess. 1813 (1856).

---

state governments in more than one southern state owed their continued political existence to the presence of the military and that the activities of federal troops may have influenced the outcome of the Hayes-Tilden presidential election.[2024]

The House of Representatives, controlled by a Democratic majority, passed an Army appropriation bill which expressly prohibited use of the Army to shore up Republican state governments in the South, or more precisely, to shore up either side of the political dispute in Louisiana or anywhere else.[2025] The Senate, controlled by a Republican majority, refused to accept the provision. No compromise could be reached, and the session ended without passage of an Army appropriation bill. Money to pay the Army was subsequently appropriated in a special session,[2026] without reference to restrictions on use of the Army.[2027] But when the issue of Army appropriations next arose, the House included a posse

---

[2024] Members of the two political parties understandably disagreed as to whether the presence of federal troops in the South tainted or insured the integrity of the political process; compare, "[O]ur Army, degraded from its high position of the defenders of the country from foreign and domestic foes, has been used as a police; has taken possession of polls and controlled elections; has been sent with fixed bayonets into the halls of State Legislatures in time of peace and under the pretense of threatened outbreak; has been placed under the control of subordinate State officials, and, under the instructions of the Attorney General, has been notified to obey the orders of deputy United States marshals, `general and special,' appointed in swarms to do dirty work in a presidential campaign," 5 Cong.Rec. 2117 (remarks of Rep. Banning), with, "Nor do I think, sir, that the use of troops in the States recently in rebellion was uncalled for or inconsistent with the spirit of republican liberty. If they were recalled before every man, white and black, was safe -- safe and truly free, with all his civil rights in their fullest extent -- they were recalled too soon." 7 Cong.Rec. 3616.

[2025] Section 5 of H.R. 4691, as passed by the House, provided, "That no part of the money appropriated by this act, nor any money heretofore appropriated, shall be applied to the pay, subsistence, or transportation of troops used, employed, or to be used or employed, in support of the claim of Francis T. Nicholls or S.B. Packard to be governor the State of Louisiana. Nor shall any of said money be applied in support of the claim of the two bodies claiming to be the Legislature of said State, presided over respectively by L.A. Wiltz and Louis Bush; nor of the two bodies claiming to be the Legislature of said State, presided over respectively by C.C. Antonie and Michael Hahn; nor in support of the claim of Thomas C. Manning and associates to be the supreme court of said State; nor in support of the claim of John T. Ludeling and associates to the supreme court of said State; nor in the aid of the execution of any process in the hands of the United States marshal in said State issued in aid of and for the support of any such claims. Nor shall the Army, or any portion of it, be used in support of the claims, or pretended claim or claims, of any State government, or officer thereof, in any State, until the same shall have been duly recognized by Congress. Any person offending against any of the provisions of this act shall be guilty of a misdemeanor, and, upon conviction thereof, shall be imprisoned at hard labor for not less than five years or more than ten years," 5 Cong.Rec. 2119 (1877).

[2026] See Presidential Proclamation of May 5, 1877, 20 Stat. 803 (1877), calling Congress into session.

[2027] The bill contained no posse comitatus provisions because the President had withdrawn federal troops from Louisiana and South Carolina and because of concern over disturbances on the Mexican border and over Indian uprisings, 6 Cong.Rec. 287 (remarks of Rep. Atkins) (1877).

comitatus section.[2028] The Senate accepted the House version with minor amendments.[2029] (remarks of Rep. Philips).

The Posse Comitatus Act has remained essentially unchanged ever since,[2030] although Congress has authorized a substantial number of exceptions and has buttressed the Act with an additional proscription against use of the armed forces to make arrests or conduct searches and seizures.[2031]

[2028] "From and after the passage of this act it shall not be lawful to employ any part of the Army of the United States as a posse comitatus or otherwise under the pretext or for the purpose of executing the laws, except in such cases and under such circumstances as such employment of said forces may be expressly authorized by act of Congress; and no money appropriated by this act shall be used to pay any of the expenses incurred in the employment of any troops in violation of this section; and any person violating the provisions of the this section shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $10,000 or imprisonment not exceeding two years, or both such fine and imprisonment," 7 Cong.Rec. 3845 (1878).

[2029] The "pretext" language was stricken because it was thought to be "in the nature of a reflection upon the past administration of the Government," 7 Cong.Rec. 4648 (remarks of Sen. Sargent); instances of express Constitutional authority were added to the statutory exception, although then as now the precise effect of this change was a matter of dispute; the penalty was applicable only to willful violations although a Senate requirement that the penalty be restricted to willful and knowing violations was not accepted. Id.

[2030] For some time the Act was contained in title 10 of the United States Code and Alaska, while a territory was exempted, 10 U.S.C. 15 (1940 ed.). When title 10 was recodified and the section transferred tot title 18, the Air Force which had been covered while it was part of the Army was expressly added to the Act, 70A Stat. 626 (1956). Over the years, Congress has adjusted the impact of the Posse Comitatus Act by enlarging the number of statutes which expressly authorize the use of the Army or Air Force to execute the law. These are sometimes referred to as "amendments" to the Posse Comitatus Act. Since they do not change language of the Act itself, it seems to more accurate to characterize them as expansions of authority under the statutory exception to the Posse Comitatus Act rather than as amendments or changes in the Act itself.

[2031] "The Secretary of Defense shall prescribe such regulations as may be necessary to ensure that any activity (including the provision of any equipment or facility or the assignment or detail of any personnel) under this chapter [10 U.S.C. 371-381] does not include or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in a search, seizure, arrest, or other similar activity unless participation in such activity by such member is otherwise authorized by law." 10 U.S.C. 375. Soon after the enactment of section 375, the Secretary of Defense promulgated such regulations which, subject to designated exceptions, prohibited: "(i) Interdiction of a vehicle, vessel, aircraft or other similar activity. (ii) A search or seizure, (iii) An arrest, stop and frisk, or similar activity. (iv) Use of military personnel for surveillance or pursuit of individuals, or as informants, undercover agents, investigators, or interrogators." 32 CFR 213(10)(a)(3), 47 Fed.Reg. 14899, 14902 (April 7, 1982). Some years later the regulations were removed, 53 Fed.Reg. 23776 (April 28, 1993) ("The Department of Defense hereby removes 32 CFR part 213 concerning DoD Cooperation with Civil and Law Enforcement Officials, part 372a . . . and part 390a . . . . These parts have served the purpose for which they were intended and are no longer valid"). Department of Defense Directive 5525.5, however, which with its enclosures replicates much of former 32 CFR part 213, remains in effect.

The Posse Comitatus Act raises at least three constitutional questions. (1) To what extent does the Posse Comitatus Act track constitutional requirements, beyond the power of the President or Congress to adjust or ignore? (2) To what extent do the powers which the Constitution vests in the President limit the power of Congress to enact the Posse Comitatus Act or any other provision restricting the President's discretion to involve the armed forces in civilian affairs? (3) What specifically are the military law enforcement activities "expressly authorized in the Constitution" for purposes of the Act?

Constitutional Origins

Lord Coke and his colleagues, in crafting the Petition of Right of 1628, found within that chapter of the Magna Carta and subsequent explanatory statutes which are the antecedents of our constitutional due process clauses a prohibition against martial law -- a proscription which in times of peace would not abide either the quartering of troops among civilians or any form of martial law, be it imposed by tribunal or more summarily dispatched by soldiers controlling or punishing civilians.

The Declaration of Independence lists the imposition of martial law upon us among those affronts to fundamental liberties which irrevocably ruptured our political ties to Great Britain.

Finally, it possible to see in the Second, Third, and Fifth Amendments, with their promises of a civilian militia, of freedom from the quartering of troops among us, and of the benefits of due process, the visible protrusions of a larger, submerged constitutional principle which bars the use of the armed forces to solve civilian inconveniences.

This view is not without judicial support. The courts have demonstrated a rather long standing reluctance to recognize the authority of military tribunals over civilians.[2032] And members of the Supreme Court seem to acknowledge possible components of a larger principle in both Youngstown Sheet and Tube Co. v. Sawyer, 343 U.S. 579 (1952)[2033] and Laird v. Tatum, 408 U.S. 1 (1972).[2034]

[2032] Ex parte Milligan, 71 U.S. (4 Wall.) 3, 123-25 (1866); Toth v. Quarles, 350 U.S. 11 (1955); Reid v. Covert, 354 U.S. 1 (1957); Kinsella v. Singleton, 361 U.S. 234 (1960); Grisham v. Hagan, 361 U.S. 278 (1960); McElroy V. Guagliardo, 361 U.S. 281 (1960); O'Callahan v. Parker, 395 U.S. 258 (1969); but see, Solorio v. United States, 483 U.S. 435 (1987), holding that the jurisdiction of military tribunals depends upon whether the accused was a member of the armed forces at the time of alleged misconduct and contrary to O'Callahan not whether the crime was "service connected."

[2033] "Article II, Section 2 make the Chief Executive the Commander in Chief of the Army and Navy. But our history and tradition rebel at the thought that the grant of military power carries with it authority over civilian affairs," 343 U.S. at 632 (Douglas, J., concurring). "Time out of

But if a larger anti-martial law principle lies beneath constitutional sands, visible only in these amendments and the spirit of the Posse Comitatus Act, it has remained remarkably dormant. Those regions from which it might have been expected to emerge have been characterized most by inactivity. The boundaries of the Third Amendment are virtually uncharted.[2035] The outreaches of the Second

---

mind, and even now in many parts of the world, a military commander can seize private housing to shelter his troops. Not so, however, in the United States, for the Third Amendment says, `No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.' Thus, even in war time, his seizure of needed military housing must be authorized by Congress. It also was expressly left to Congress to `provide for calling forth the Militia to execute the laws of the Union, suppress Insurrections and repel Invasions . . . ." Such a limitation on the command power, written at a time when the militia rather than a standing army was contemplated as the military weapon of the Republic, underscores the Constitution's policy that Congress, not the Executive, should control utilization of the war power as an instrument of domestic policy. Congress, fulfilling that function, has authorized the President to use the army to enforce certain civil rights. On the other hand, Congress has forbidden him to use the army for the purpose executing general laws except when expressly authorized by the Constitution or Act of Congress," 343 U.S. at 644-45 (Jackson, J., concurring)(emphasis in the original). In Youngstown, the Court held that, when Congress had specifically refused to grant such authority by statute, the President's constitutional and statutory powers as President and Commander in Chief were not sufficient to support an executive order authorizing the Secretary of Commerce use the resources of the federal government, including its armed forces, to seize and operate the country's steel mills which were then threaten by a nationwide strike.

[2034] "The concerns of the Executive and Legislative Branches in response to disclosure of the Army surveillance activities -- and indeed the claims alleged in the complaint -- reflect a traditional and strong resistance of Americans to any military intrusion into civilian affairs. That tradition has deep roots in our history and found early expression, for example, in the Third Amendment's explicit prohibition against quartering soldiers in private homes without consent and in the constitutional provisions for civilian control of the military. Those prohibitions are not directly presented by this case, but their philosophical underpinnings explain our traditional insistence on limitations on military operations in peacetime," 408 U.S. at 15-6. In Laird v. Tatum, the Court refused to order the military to stop collecting information about civilians unless the civilians could show how they had been hurt by the what the military was doing. (More precisely the Court held that, in the absence of any showing of specific harm or the realistic threat of specific harm, a claim, that the data gathering activities of the military services had been conduct so as to chill the First Amendment rights of the targets of those intelligence collection efforts, was nonjusticiable).

[2035] See, Bell, The Third Amendment, Forgotten But Not Gone, 2 WILLIAM & MARY BILL OF RIGHTS JOURNAL 117 (1993); Fields & Hardy, The Third Amendment and the Issue of the Maintenance of Standing Armies: A Legal History, 35 AMERICAN JOURNAL OF LEGAL HISTORY 393 (1991); Fields, The Third Amendment: Constitutional Protection From the Involuntary Quartering of Soldiers, 124 MILITARY LAW REVIEW 195 (1989). In one of the few reported Third Amendment cases, striking state correctional officers brought a civil rights action against state authorities who had used the officers' prison facility resident quarters to house replacement national guard troops. The district court dismissed, Engblom v. Carey, 522 F.Supp. 57 (S.D.N.Y. 1981), the Court of Appeals reversed on the ground that it could not hold as a matter of law that the officers had no Third Amendment possession interest in the resident quarters, 677 F.2d 957 (2d Cir. 1982). On remand the district court dismissed based on the qualified immunity of the defendant state officials in light of the uncertainty of the light with respect to Third

---

Amendment are only slightly more visible.[2036] Even in the inviting context of the Posse Comitatus Act, the courts have generally avoided excursions into areas of its possible constitutional underpinnings.[2037]

Without more judicial guidance, it would appear that traditional reservations about military involvement in the execution of civilian law can only clearly be said to rise to the level of constitutional imperative when they take a form which offends some more explicit constitutional prohibition or guarantee such as the right to jury trial, to grand jury indictment, or to freedom from unreasonable searches and seizures.[2038] Consequently, beyond those specific constitutional provisions, Congress' constitutional authority to enact and adjust the provisions of the Posse Comitatus Act is largely a matter of the coordination of Congressional and Presidential powers.

Presidential v. Congressional Powers

The case of conflicting Congressional and Presidential powers is easily stated if not easily resolved. On one hand, the Constitution requires the President to take care to see that the laws are faithfully executed, and designates him as Chief Executive and Commander in Chief of the armed forces.[2039] In this dual capacity, the Presidency is the repository of both extensive responsibilities and broad prerogatives, not the least of which flow from Article IV, section 4 of the

---

Amendment questions, 572 F.Supp. 44 (S.D.N.Y. 1983), aff'd, 724 F.2d 28 (2d Cir. 1983). The implications of the case prior to remand are discussed in The Third Amendment's Protection Against Unwanted Military Intrusion, 49 BROOKLYN LAW REVIEW 857 (1983).

[2036] United States v. Miller, 307 U.S. 174 (1939). The academic commentary is considerably more extensive and reflects a considerably greater divergence of views than is the case of the Third Amendment, see Van Alstyne, The Second Amendment and the Personal Right to Bear Arms, 43 DUKE LAW JOURNAL 1236 (1994); Herz, Gun Crazy: Constitutional False Consciousness and Dereliction of Dialogic Responsibility, 75 BOSTON UNIVERSITY LAW REVIEW 57 (1995) and the sources cited therein.

[2037] E.g., United States v. Walden, 490 F.2d 372, 376 (4th Cir. 1974)("we do not find it necessary to interpret relatively unexplored sections of the Constitution in order to determine whether there might be constitutional objection to the use of the military to enforce civilian laws").

[2038] See, The Posse Comitatus Act: Reconstruction Politics Reconsidered, 13 AMERICAN CRIMINAL LAW REVIEW 703, 712-13 (1976).

[2039] U.S. Const. Art.II, §1 ("[t]he executive Power shall be vested in a President of the United States of America. . .), §2 ("[t]he President shall be Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into actual Service of the United States. . .), §3 (". . . he [(the President)] shall take Care that the Laws be faithfully executed . . . ").

Constitution which guarantees the states a republican form of government and protection against invasion and domestic violence.[2040]

The Supreme Court has made it clear that the President is not dependent upon express Constitutional or statutory authorization for the exercise of his powers. Thus, he may meet an emergency by appointing a marshal to protect a threatened Supreme Court justice, although no statute expressly authorized appointment for such purposes, In re Neagle, 135 U.S. 1, 62-4 (1890). He must resist invasion by an enemy with force though Congress has yet to declare war, The Prize Cases, 67 U.S.(2 Black) 635, 668 (1863). And when an emergency arises threatening the freedom of interstate commerce, transportation of the mails, or some other responsibility entrusted to the federal government, he may call upon "the army of the Nation, and all its militia . . . to brush away the obstructions," In re Debs, 158 U.S. 364, 381 (1895).

Some commentators feel that this implied or incidental constitutional authority to use the armed forces not only exists in the absence of Congressional direction, but is immune from Congressional direction or limitation.[2041]

On the other hand, Congress shares constitutional power over the laws and armed forces with the President. The Constitution gives Congress the power to make the laws whose faithful execution the President must take care to observe and which carry into execution Congress' own powers and those of the President, U.S.Const. Art.I, §8, cl.18; it likewise vests Congress with the power to establish, maintain and regulate the armed forces, U.S.Const. Art.I, §8, cls.12, 13, & 14; and with the power to describe the circumstances under which the militia may be called into federal service, U.S. Const. Art.I, §8, cls.15 & 16.

The Supreme Court has shed some light on the coordination of Presidential and Congressional powers concerning use of the military to enforce civilian law. The Court has pointed out that the President's power under the guarantee clause of Article IV, section 4, which guarantees the states protection against domestic violence, is only provisionally effective until such time as Congress acts, Texas v. White, 74 U.S.(7 Wall.) 700 (1869). And the President may not always use the armed forces to met a domestic emergency when Congress has previously

---

[2040] "The United States shall guarantee to every State in this Union, a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence," U.S. Const. Art.IV, §4.

[2041] E.g., Lorence, The Constitutionality of the Posse Comitatus Act, 8 UNIVERSITY OF KANSAS CITY LAW REVIEW 164, 185-91 (1940); Furman, Restrictions Upon Use of the Army Imposed by the Posse Comitatus Act, 7 MILITARY LAW REVIEW 85, 91-2 (1960); CORWIN, THE PRESIDENT: OFFICE AND POWERS, 1787-1984, 152-61 (5th ed. 1984).

resisted an invitation to sanction their employment.[2042] Finally, even when Congress has disclaimed any intent to limit the exercise of the President's constitutional powers, the President's inherent and incidental powers will not always trump conflicting, constitutionally grounded claims.[2043]

When the Act Does Not Apply

There is no violation of the Posse Comitatus Act when (1) the Constitution expressly authorizes use of part of the Army or Air Force as a posse comitatus or otherwise to execute the law; (2) when an act of Congress expressly authorizes use of part of the Army or Air Force as a posse comitatus or otherwise to execute the law; (3) when the activity in question does not involve use of part of the armed forces covered by the proscription; and (4) when the activity in question is does not constitute "execution of the law."

Constitutional Exceptions

The Posse Comitatus Act does not apply "in cases and under circumstances expressly authorized by the Constitution," 18 U.S.C. 1385.[2044] It has been said that the Constitution contains no provision expressly authorizing the use of the

---

[2042] Youngstown Sheet & Tube Co. v. Sawyer, 343 U.S. 579 (1952). In Youngstown President Truman attempted to invoke his powers as Commander in Chief and Chief Executive to seize and operate most of the Nation's steel mills during the Korean conflict when it appeared they might be shut down by a labor dispute. Congress had earlier specifically refused to grant the President such power legislatively.

[2043] United States v. United States District Court, 407 U.S. 297 (1972). Congress had established a warrant procedure to be used by law enforcement officials to permit wiretapping in criminal cases. In doing so, it expressly disclaimed any intent to "limit the constitutional power of the President to take such measures as he deems necessary to protect the Nation against actual or potential attack or other hostile acts of a foreign power, to obtain foreign intelligence information deemed essential to the security of the United States, or to protect national security information against foreign intelligence activities [or] to take such measures as he deems necessary to protect the United States against the overthrow of the Government by force or other unlawful means, or against any clear and present danger to the structure or existence of the Government," 18 U.S.C. 2511(3)(1970 ed.). Even in the absence of Congressionally asserted counter authority, a unanimous Court declined to accept the argument that President's inherent and incidental constitutional powers permitted a failure to comply with the Fourth Amendment's warrant requirements when gathering intelligence concerning purely domestic threats to national security.

[2044] Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined under this title or imprisoned not more than two years, or both. 18 U.S.C. 1385 (emphasis added).

military to execute the law,[2045] that it was included as part of a face-saving compromise, and that consequently it should be ignored.[2046]

When the phrase was added originally those who opposed the Posse Comitatus Act believed that the Constitution vested implied and/or inherent powers upon the President to use the armed forces to execute the laws; those who urged its passage believed the President possessed no such powers. As initially passed by the House, the bill contained no constitutional exception.[2047] The Senate version contained an exception for instances authorized by the Constitution whether expressed or otherwise.[2048] The managers of each House described the

---

[2045] H.R.Rep.No.97-71, at 6 n.3, reprinted 1981 UNITED STATES CODE, CONGRESSIONAL AND ADMINISTRATIVE NEWS at 1789 n.3 ("The statute permits Constitutional exceptions. However, there are none"); LIEBER, THE USE OF THE ARMY IN AID OF THE CIVIL POWER 17 (1898); The Navy's Role in Interdicting Narcotics Traffic: War on Drugs or Ambush of the Constitution? 75 GEORGETOWN LAW JOURNAL 1947, 1951 (1987); Don't Call Out the Marines: An Assessment of the Posse Comitatus Act, 13 TEXAS TECH LAW REVIEW 1467, 1486 (1982); The Posse Comitatus Act: Reconstruction Politics Reconsidered, 13 AMERICAN CRIMINAL LAW REVIEW 703, 712 (1976). The Constitution does empower Congress "to provide for calling forth the Militia to execute the laws of the Union, suppress insurrections and repel invasions," U.S.Const. Art.I, §8, cl.16; but since this express grant of authority can only be activated by an Act of Congress it adds nothing to the "act of Congress" exception also included within the Posse Comitatus Act.

[2046] "The Act also provides that the Army and Air Force can be used on the basis of an express constitutional authorization. This language reflects a compromise reached in the debate over the Act. It is a meaningless proviso since the Constitution does not expressly authorize such a use of troops. "In any event, if the Constitution provided the President with authority over a purely executive function, Congress could not disable the President from acting on the basis of it, whether the authorization was express or implied. But since the Constitution provides Congress with the power to control military intervention in domestic affairs, the President's actions can be limited to the express terms of a statutory authorization," Honored in the Breech: Presidential Authority to Execute the Laws with Military Force, 83 YALE LAW JOURNAL 130, 143-44 (1973); see also, The Posse Comitatus Act: Reconstruction Politics Reconsidered, 13 AMERICAN CRIMINAL LAW REVIEW 703, 712-13 (1976).

[2047] "From and after the passage of this act it shall not be lawful to employ any part of the army of the United Sates as a posse comitatus or otherwise under the pretext or for the purpose of executing the laws, except in such cases and under such circumstances as such employment of said force may be expressly authorized by act of Congress; and no money appropriated by this act shall be used to pay any of the expenses incurred in the employment of any troops in violation of this section; and any person violating the provisions of this section shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not exceeding $10,000 or imprisoned not exceeding two years, or by both such fine and imprisonment," 7 Cong.Rec. 3877 (1878)(emphasis added).

[2048] "From and after the passage of this act it shall not be lawful to employ any part of the army of the United Sates as a posse comitatus or otherwise for the purpose of executing the laws, except in such cases and under such circumstances as such employment of said force may be authorized by the Constitution or by act of Congress; and no money appropriated by this act shall be used to pay

compromise reached at conference and subsequently enacted as upholding the position of their respective bodies on the issue.[2049]

The older commentaries suggest that the word "expressly" must be ignored, for otherwise in their view the Posse Comitatus Act is a constitutionally

---

any of the expenses incurred in the employment of any troops in violation of this section," 7 Cong.Rec. 4303-304 (1878)(emphasis added).

[2049] "But these [compromises on other differences in the Army appropriation bill] are all minor points and insignificant questions compared with the great principle which was incorporated by the House in the bill in reference to the use of the Army in time of peace. The Senate had already conceded what they called and what we might accept as principle; but they had stricken out the penalty and had stricken out the word `expressly,' so that the Army might be used in all cases where implied authority might be inferred. The House committee planted themselves firmly upon the doctrine that rather than yield this fundamental principle, for which for three years this House had struggled, they would all the bill to fail -- notwithstanding the reforms which we had secured; regarding these reforms as of but little consequence alongside the great principle in all its length and breadth, including the penalty which the Senate had stricken out. We bring you back, therefore, a report with the alteration of a single word, which the lawyers assure me is proper to be made, restoring to this bill the principle for which we have contended so long, and which is so vital to secure the rights and liberties of the people," 7 Cong.Rec. 4686 (1878 (remarks of Rep. Hewitt).

"With reference to the provisions of the bill inserted by the House prohibiting the use of the Army, which is section 29, Senators will remember that it was amended in the senate so as to strike out in lines 3 and 4 the words `under the pretext or,' in the sixth line the word `expressly' was stricken out, and in the seventh line the words `the Constitution or by' were inserted, so as to read `by the Constitution or by act of congress,' and the penalty was stricken form the bill. We found considerable difficult in agreeing upon this section, but the modification which the Senate had made in it made it possible to come to an understanding. I should like to say here that it is my firm judgment, after the experience of the last forty-eight hours, that unless the senate had made the duty easy for the committee by the modification which it made in that section, it would have been impossible to have come to any agreement on the Army bill with the original House section in controversy. I am satisfied it never would have been stricken from the bill. As it now stands, the House yielded that the words `under the pretext of' should go out, which we contended were in the autre of a reflection upon the past administration of the government, and we could not consent that anything in the nature of a reflection, and which was entirely useless for any practical purpose, should remain in the bill. We satisfied them, by our argument that ought to be done, and it was stricken out.

"With reference to the word `expressly.' we restored it and allowed it to go in, so that now the employment of such force must be expressly authorized by the Constitution or by act of Congress, they assenting that the words `the Constitution or by' before the words `act of Congress' might remain in, so that if the power arises under either the constitution or the laws it may be exercised and the Executive would not be embarrassed by the prohibition of Congress so to act where the Constitution requires him to act; and the embarrassments would not have the effect of retraining the action of an upright and energetic Executive, but still might raise a question which he would desire to avoid if possible. The penalty remains in the section as agreed upon, except that we procured that the word `willfully' should be put in before the word `violating;' so that it reads: `And any person willfully violating the provisions of this section shall be deemed guilty of a misdemeanor," 7 Cong.Rec. 4648 (1878) (remarks of Sen.Sargent).

---

impermissible effort to limit the powers of the President.[2050] The regulations covering the use of the armed forces during civil disturbances do not go quite that far, but they do assert two constitutionally based exceptions -- sudden emergencies and protection of federal property.[2051]

[2050] LIEBER, THE USE OF THE ARMY IN AID OF THE CIVIL POWER, 14-5 (1898)("The debate [on the Posse Comitatus section] was an interesting one, but too long to follow in detail. An attempt was made to strike out the word "expressly," but that failed. But, manifestly, the clause, as enacted, recognizes the Constitution as a direct source of authority for the employment of the Army. This is a very important consideration in the construction of the legislation. And another matter of great importance is also to be observed with reference to it. The enactment prescribes that it shall be unlawful to employ any part of the Army as a posse comitatus, or otherwise, for the purpose of executing the laws, except when it is expressly authorized by the Constitution or by act of Congress. Now, it is evident that the word `expressly' can not be construed as placing a restriction on any constitutional power. If authority so to use the Army is included in a constitutional power, although it be not expressly named, it can not, of course, be taken away by legislation"); Lorence, The Constitutionality of the Posse Comitatus Act, 8 UNIVERSITY OF KANSAS CITY LAW REVIEW 154, 185-86 (1940)("But it is evident that the word expressly in the Posse Comitatus Act cannot be construed as placing a restriction on the constitutional Power of the President, because even though not expressly named, such constitutional power cannot be taken away by legislation. . . . Thus, the Posse Comitatus Act appears to be a rather singular statute to pass, saying that the Army of the United States shall not be used for the purpose of executing the laws, in view of the fact that the Constitution expressly makes the President the Commander-in-Chief of the Army and Navy, and expressly makes it his duty to take care that the laws are faithfully executed").

[2051] "(b) Aside from the constitutional limitations of the power of the Federal Government at the local level, there are additional legal limits upon the use of military forces within the United States. The most important of these from a civil disturbance standpoint is the Posse Comitatus Act (18 U.S.C. 1385), which prohibits the use of any part of the Army or the Air Force to execute or enforce the laws, except as authorized by the Constitution or Act of Congress.

"(c) The Constitution and Acts of Congress establish six exceptions generally applicable within the entire territory of the United States, to which the Posse Comitatus Act prohibition does not apply.

"(1) The constitutional exceptions are two in number and are based upon the inherent legal right of the U.S. Government -- a sovereign national entity under the Federal Constitution -- to insure the preservation of public order and the carrying out of governmental operations within its territorial limits, by force if necessary.

"(i) The emergency authority. Authori[z]ies prompt and vigorous Federal action, including use of military force to prevent loss of life or wanton destruction of property and to restore governmental functioning and public order when sudden and unexpected civil disturbances, disasters, or calamities seriously endanger life and property and disrupt normal governmental functions to such an extent that duly constituted local authorities are unable to control the situation.

"(ii) Protection of Federal property and functions. Authorizes Federal action, including the use of military forces, to protect Federal property and Federal governmental functions when the need for protection exists and duly constituted local authorities are unable or decline to provide adequate protection." 32 CFR 215.4(b),(c)(1).

The question of whether the constitutional exception includes instances where the President is acting under implied or inherent constitutional powers or whether it was merely a face saving device is a question that may turn on whether Congress may constitutionally restrict the President's powers, if any, in the area -- a question the courts have yet to answer.

Statutory Exceptions

Generally

The Posse Comitatus Act does not apply where Congress has expressly authorized use of the military to execute the law.[2052] Congress has done so in three ways, by giving a branch of the armed forces civilian law enforcement authority, by establishing general rules for certain types of assistance, and by addressing individual cases and circumstances with more narrowly crafted legislation. Thus it has vested the Coast Guard, a branch of the armed forces, with broad law enforcement responsibilities.[2053] Second, over time it has enacted a fairly

---

For a discussion of instances when the emergency, "immediate response authority" has been used see, Winthorp, The Oklahoma City Bombing: Immediate Response Authority and Other Military Assistance to Civil Authority (MAC), ARMY LAWYER 3 (July, 1997).

[2052] Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined under this title or imprisoned not more than two years, or both. 18 U.S.C. 1385 (emphasis added).

[2053] "The Coast Guard shall enforce or assist in the enforcement of all applicable Federal laws on, under, and over the high seas and waters subject to the jurisdiction of the United states; shall engage in maritime air surveillance or interdiction to enforce or assist in the enforcement of the laws of the United States; shall administer laws and promulgate and enforce regulations for the promotion of safety of life and property on and under the high seas and waters subject to the jurisdiction of the United States covering all matters not specifically delegated by law to some other executive department; shall develop, establish, maintain and operate with due regard to the requirements of national defense, aids to maritime navigation, icebreaking facilities, and rescue facilities for the promotion of safety on, under, and over the high seas and waters subject to the jurisdiction of the United States; shall, pursuant to international agreements, develop, establish, maintain, and operate icebreaking facilities on, under, and over the waters other than the high seas and waters subject to the jurisdiction of the Untied States; shall engage in oceanographic research on the high seas and in waters subject to the jurisdiction of the United Stats; and shall maintain a state of readiness to function as a specialized service in the Navy in time of war, including the fulfillment of Maritime Defense Zone command responsibilities, 14 U.S.C. 2. Coast Guard personnel are also considered customs officers for purpose of custom law enforcement, 19 U.S.C. 1401(i)("When used in this subtitle [relating to administrative provisions concerning customs duties] or in part I of subtitle II of this chapter [relating to the miscellaneous provisions of the Tariff Act of 1930] . . . (i) The terms `officer of the customs' and `customs officer' mean . . . any commissioned, warrant, or petty officer of the Coast Guard. . ."). 18 U.S.C. 831 (Attorney General may request assistance from the Secretary of Defense for enforcement of the proscriptions against criminal transactions in nuclear materials)(18 U.S.C. 175a, 229E, and 2332e cross reference to the Attorney General's authority under 10 U.S.C. 381 to request assistance from the Secretary in an emergency involving biological weapons, chemical weapons, and weapons of mass destruction respective);

forces to share information and equipment with civilian law enforcement agencies, 10 U.S.C. 371-381.

How explicit must a statutory exception be? If one believes the word "expressly" should be ignored with respect to the constitutionally based exception, consistency might suggest no more is required than that Congress authorize a thing to be done. To those so inclined, the position is further fortified when the statute authorizes executive branch action and the President's faithful execution

48 U.S.C. 1418 (President may use the land and naval forces of the United States to protect the rights of owners in guano islands);

48 U.S.C. 1422 (Governor of Guam may request assistance of senior military or naval commander of the armed forces of the United States in cases of disaster, invasion, insurrection, rebellion or imminent danger thereof, or of lawless violence);

48 U.S.C. 1591 (Governor of the Virgin Islands may request assistance of senior military or naval commander of the armed forces of the United States in the Virgin Islands or Puerto Rico in cases of disaster, invasion, insurrection, rebellion or imminent danger thereof, or of lawless violence); 50 U.S.C. 220 (President may use the Army, Navy or militia to prevent the unlawful removal of vessels or cargoes from customs areas during times of insurrection).

responsibility[2055] and the administrative housekeeping statute[2056] can be called into play. In this rarely espoused view if an agency has statutory authority to perform a task, the military may be asked to help.

Others maintain that statutes which authorize assistance from federal agencies and departments generally in order to accomplish a particular task qualify as exceptions even if they do not mention the Department of Defense or any part of the military establishment by name.[2057] On the one hand, such legislation has ordinarily come into being after the Posse Comitatus Act and thus would ordinarily be thought to amend any conflicting earlier law. On the other hand, the use of military force in civilian affairs is such an extraordinary thing that perhaps it ought not be presumed and only found were Congress has so stated in hoc verba.

The final and more commonly accepted proposition is that the phrase "in cases and under circumstances expressly authorized by . . . Act of Congress" demands statutory exception specifically refer to some form of military assistance.[2058]

Information and Equipment

In 1981, Congress enacted general law enforcement exceptions to the Posse Comitatus Act prohibitions in order to resolve questions raised by the so-called Wounded Knee cases.[2059] The cases grew out of events beginning late in February of 1973, when an armed crowd broke into and looted a trading post in the village of Wounded Knee on the Pine Ridge Reservation in South Dakota. FBI agents, U.S. marshals, and Bureau of Indian Affairs police surrounded the village and

---

[2055] U.S.Const. Art.II, §3, cl.3 ("he [the President] shall take care that the laws be faithfully executed."

[2056] 5 U.S.C. 301 ("The head of an Executive department or military department may prescribe regulations for the government of his department, the conduct of its employees, the distribution and performance of its business, and the custody, use, and preservation of its records, papers, and property. . . .").

[2057] E.g., 21 U.S.C. 873(b)("[w]hen requested by the Attorney General, it shall be the duty of any agency or instrumentality of the Federal Government to furnish assistance, including technical advice, to him for carrying out his functions under this subchapter; except that no such agency or instrumentality shall be required to furnish the name of, or other identifying information about, a patient or research subject whose identity it has undertaken to keep confidential").

[2058] The Department of Defense Directive, for example, lists only the military-aid-specific statutes in its inventory of statutory exceptions, DoD Dir.No. 5525.5 (Encl.4) A.2.e.

[2059] H.R.Rep.No. 97-71, pt.2, 5-6, reprinted in 1981 UNITED STATES CODE, CONGRESSIONAL AND ADMINISTRATIVE NEWS 1785, 1788 ("Although the military activities challenged in each case were identical, the courts in Banks and Jaramillo found those activities to be in violation of the [Posse Comitatus] Act, while the lower court in Red Feather found those activities to be permissible").

besieged the group almost immediately. The take-over and events which occurred during the siege led to four cases[2060] involving a series of federal criminal charges including obstructing a law enforcement officer in the lawful performance of his duties during the course of a civil disturbance.[2061] Military assistance provided federal authorities at Wounded Knee undermined the prospects of a conviction under 18 U.S.C. 231(a)(3).[2062]

The 1981 legislation contains both explicit grants of authority and restrictions on the use of that authority for military assistance to the police -- federal, state and local -- particularly in the form of information and equipment, 10 U.S.C. 371-381.

Information: Spies, Advisers, and Undercover Agents

The Wounded Knee cases spawned uncertainty as to the extent to which military authorities might share technical advice, the results of reconnaissance flights or any other forms of information with civilian law enforcement authorities. Section 371 specifically permits the armed forces to share information acquired during military operations and in fact encourages the armed forces to plan their activities with an eye to the production of incidental civilian benefits.[2063] The

[2060] United States v. Jaramillo, 380 F.Supp. 1375 (D.Neb. 1974), app.dism'd, 510 F.2d 808 (8th Cir. 1975); United States v. Banks, 383 F.Supp. 368 (D.S.D. 1974); United States v. Red Feather, 381 F.Supp. 916 (D.S.D. 1975); United States v. McArthur, 419 F.Supp. 186 (D.N.D. 1976), aff'd sub nom., United States v. Casper, 541 F.2d 1275 (8th Cir. 1976).

[2061] 18 U.S.C. 231(a)(3)(1970 ed.)("Whoever commits or attempts to commit any act to obstruct, impede, or interfere with any fireman or law enforcement officer lawfully engaged in the lawful performance of his official duties incident to and during the commission of a civil disorder which in any way or degree obstructs, delays, or adversely affects commerce or the movement of any article or commodity in commerce or the conduct or performance of any federally protected function --shall be fined not more than $10,000 or imprisoned not more than five years, or both").

[2062] "The evidence of military involvement contained in the transcripts [of the Wounded Knee trial cases], in essence, falls into the following categories: use by federal civil law enforcement officers of material and equipment furnished by the United States Army and the South Dakota National Guard; the presence of United States Army personnel who were ordered to Wounded Knee to observe and report to the President through the Department of Defense the necessity of calling in federal troops; the drafting by military personnel of contingency plans to be used by the United States Army in the event that federal military intervention was ordered by the President; aerial photographic reconnaissance service provided by the United States Air Force and the Nebraska National Guard; the advice, urging and counsel given by the United States Army personnel to Department of Justice personnel on the subjects of negotiations, logistics and rules of engagement; and the maintenance of military vehicles performed by members of the Nebraska National Guard," United States v. McArthur, 419 F.Supp. at 193 n.3.

[2063] "(a) The Secretary of Defense may in accordance with other applicable law, provide to Federal, State or local civilian law enforcement officials any information collected during the normal course of military training or operations that may be relevant to a violation of any Federal or State law within the jurisdiction of such officials.

section allows the use of military undercover agents and the collection of intelligence concerning civilian activities only where there is a nexus to an underlying military purpose.[2064]

"(b) The needs of civilian law enforcement officials for information shall, to the maximum extent practicable, be taken into account in the planning and execution of military training or operations.

"(c) The Secretary of Defense shall ensure, to the extent consistent with national security, that intelligence information held by the Department of Defense and relevant to drug interdiction or other civilian law enforcement matters is provided promptly to appropriate civilian law enforcement officials," 10 U.S.C. 371.

"The phrase `in accordance with other applicable law' as used in section 371 is meant to continue the application of the Privacy Act to this type of intelligence sharing. . . . [Congress did] not intend the military to engage in the routine collection of intelligence information about United States residents. . . [and] noting in this section [was] intended to modify in any way existing law with respect to the military's authority (or lack thereof) to collect and disseminate intelligence information about American citizens and residents here and abroad. See e.g., Executive Order 12036," H.R.Rep.No.97-71 pt.2, 8, reprinted in 1981 UNITED STATES CODE, CONGRESSIONAL AND ADMINISTRATIVE NEWS 1785, 1791.

[2064] "The Committee adopted the view of the Department of Justice that the weight of authority on the Posse Comitatus Act `prohibits the use of miliary personnel as informants, undercover agents, or non-custodial interrogators in a civilian criminal investigation that does not involve potential military defendants or is not intended to lead to any official action by the armed forces.' . . . [W]hen military personnel become aware of violations of civilian laws as an incidental result of other militaryoperations, such information may be voluntarily disclosed.

"Examples of this type of information sharing include situations such as investigations of military and non-military coconspirators and the observation by military personnel of illegal conduct during a routine military mission or training operation.

"The Committee anticipates, however, that an increased sensitivity to the needs of civilian law enforcement officials, particularly in drug enforcement, will permit more compatible mission planning and execution. For example, the scheduling of routine training missions can easily accommodate the need for improved intelligence information concerning drug trafficking in the Caribbean. The committee does not intend the military to engage in the routine collection of intelligence information about United States residents. Thus, the legislation creates no risk that the military will return to the abuses exposed in previous Congressional hearings. See Hearings on Federal Data Banks, Computers and the Bill of Rights before the Committee on Constitutional Rights, Committee on the Judiciary, United States Senate, 92nd Cong., 1st sess." H.R.Rep.No. 91-71, 8 & 8 n.1.

The staff report following the Federal Data Banks hearings noted that, "the U.S. Army had for several years maintained a close and pervasive watch over most civilian protest activity throughout the United States. At its height during the lat 1960's, the monitoring drew upon the part-time services of at least 1,500 plainclothes agents of the Army Intelligence Command, and an unspecified number of agents from the Continental Army Command. Their reports, which described the nonviolent political activities of thousands of individuals and organizations unaffiliated with the armed forces were amassed in scores of data centers. . . . The picture is that of a runaway intelligence bureaucracy unwatched by its civilian superiors, eagerly grasping for information about political dissenters of all kinds and totally oblivious to the impact its spying

---

Section 373 permits military personnel to train civilian police on "the operation and maintenance of equipment" and to provide them with "expert advice."[2065] The section was originally limited to equipment provided by the armed forces,[2066] but was expanded in 1988 to include training on any equipment regardless of its origin.[2067]

---

could have on the constitutional liberties it had sworn to defend." Military Surveillance of Civilian Politics: A Report of the Subcommittee on Constitutional Rights of the Senate Committee on the Judiciary, 93d Cong., 1st Sess. 10 (1973)(Comm.Print).

For a more contemporary examination of the issues associated with military surveillance of off-base political protests see, Peterson, Civilian Demonstrations Near the Military Installation: Restraints on Military Surveillance and Other Activities, 140 MILITARY LAW REVIEW 113 (Spring, 1993).

[2065] "The Secretary of Defense may, in accordance with other applicable law, make Department of Defense personnel available -- (1) to train Federal, State, and local civilian law enforcement officials in the operation and maintenance of equipment, including equipment made available under section 372 of this title; and (2) to provide such law enforcement officials with expert advice relevant to the purposes of this chapter," 10 U.S.C. 373.

[2066] "Nothing in this section contemplates the creation of large scale or elaborate training programs . . . . [This section would not authorize the routine use of a Green Beret training course for urban SWAT teams.] . . . Rather this section anticipates the continuing need for the military to train civilians in the operation and maintenance of the equipment lent under proposed section 372," H.R.Rep.No. 97-71, at 10, reprinted in 1981 UNITED STATES CODE, CONGRESSIONAL AND ADMINISTRATIVE NEWS 1785, 1792-793 (footnote 2 of the report in brackets).

[2067] "Paragraph (1) clarifies current law to provide that the Secretary of Defense, in accordance with applicable law, may make Department of Defense personnel available to train Federal, State, and local civilian law enforcement officials in the operation of maintenance of equipment, including equipment made available under section 372," H.R.Rep.No. 100-989, 451, reprinted in 1988 United States Code Congressional and Administrative News 2503, 2579. See also, DoD Dir.No. 5525.5 (Encl.4) A.4., "a. The Military Departments and Defense Agencies may provide training to Federal, State, and local civilian law enforcement officials, Such assistance may including training in the operation and maintenance of equipment made available under section A. of enclosure 3. This does not permit large scale or elaborate training, and does not permit regular or direct involvement of military personnel in activities that are fundamentally civilian law enforcement operations, except as other wise authorized in this enclosure.

"b. Training of Federal, State, and local civilian law enforcement officials shall be provided under the following guidance:

"(1) This assistance shall be limited to situations when the use of non-DoD personnel would be unfeasible or impractical form a cost or time perspective and would not otherwise compromise national security or military preparedness concerns.

"(2) Such assistance may not involve DoD personnel in a direct role in a law enforcement operation, except as otherwise authorized by law.

The explanation of what might constitute "expert advice" is limited, but Congress clearly did not use the phrase as a euphemism for active military participation in civilian police activity.[2068]

Equipment and Facilities

Abstractly it might seem that even civilian use -against Americans within the United States -- of tanks, missiles, fighter planes, aircraft carriers and other implements of war offends the Posse Comitatus Act even if use can be accomplished without the direct involvement of military personnel. The arsenal of American military weapons and equipment are "part of the Army and Air Force" even when turned over to civilian authorities before use for civilian purposes. Even if the Posse Comitatus Act were read to apply only to the use of personnel, would the use of military personnel to maintain equipment loaned to civilian authorities violate the Act's proscription? The Wounded Knee cases provided conflicting answers.

The 1981 provisions make it clear that the Defense Department may provide civilian police with military equipment[2069] and under some circumstances,

---

"(3) Except as otherwise authorized by law, the performance of such assistance by DoD personnel shall be at a location where there is not a reasonable likelihood of a law enforcement confrontation."

[2068] "Neither does the authority to provide expert advice create a loophole to allow regular or direct involvement of military personnel in what are fundamentally civilian law enforcement operations," H.R.Rep.No. 97-71, at 10, reprinted in 1981 UNITED STATES CODE, CONGRESSIONAL AND ADMINISTRATIVE NEWS 1785, 1792.

"Paragraph (2) restates current law permitting advice. Such training and expert advice may extend to instruction in the operation of equipment, scientific analysis, translations, and assistance in strategic planning, but may not extend to direct, active involvement in specific law enforcement operations," H.R.Rep.No. 100-989, 451, reprinted in 1988 United States Code Congressional and Administrative News 2503, 2579. See also, DoD Dir.No. 5525.5 (Encl.4) A.5., "Military Departments and Defense Agencies may provide expert advice to Federal, State, or local law enforcement in accordance with 10 U.S.C. §§371-378 (reference (d)). This does not permit regular or direct involvement of military personnel in activities that are fundamentally civilian law enforcement operations, except as otherwise authorized in this enclosure."

[2069] "The Secretary of Defense may, in accordance with other applicable law, make available any equipment (including associated supplies or spare parts), base facility, or research facility of the Department of Defense to any Federal, State, or local civilian law enforcement official for law enforcement purposes," 10 U.S.C. 372.

See also 10 U.S.C. 381:

"(a) The Secretary of Defense, in cooperation with the Attorney General, shall conduct an annual briefing of law enforcement personnel of each State (including law enforcement personnel of the political subdivisions of each State) regarding information, training, technical support, and

---

particularly in drug cases, may also supply military personnel to operate and maintain such equipment.[2070] The provisions also include extraordinary authority to use Navy ships to support Coast Guard drug interdiction on the high seas.[2071]

---

equipment and facilities available to civilian law enforcement personnel from the Department of Defense.

"(b) Each briefing conducted under subsection (a) shall include the following: (1) An explanation of the procedures for civilian law enforcement officials --(A) to obtain information, equipment, training, expert advice, and other personnel support under this chapter; and (B) to obtain surplus military equipment. (2) A description of the types of information, equipment and facilities, and training and advice available to civilian law enforcement officials from the Department of Defense. (3) A current, comprehensive list of military equipment which is suitable for law enforcement officials form the Department of Defense and available as surplus property from the Administrator of General Services.

"(c) The Attorney General and the Administrator of General Services shall --(1) establish or designate an appropriate office or offices to maintain the list described in subsection (b)(3) and to furnish information to civilian law enforcement officials on the availability of surplus military equipment; and (2) make available to civilian law enforcement personnel nationwide, tollfree telephone communication with such office or offices."

[2070] "(a) The Secretary of Defense may, in accordance with other applicable law, make Department of Defense personnel available for the maintenance of equipment for Federal, State, and local civilian law enforcement officials, including equipment made available under section 372 of this title.

"(b)(1) Subject to paragraph (2) and in accordance with other applicable law, the Secretary of Defense may, upon request from the head of a Federal law enforcement agency, make Department of Defense personnel available to operate equipment (including equipment made available under section 372 of this title) with respect to -- (A) a criminal violation of a provision of law specified in paragraph (4)(A); or (B) assistance that such agency is authorized to furnish to a State, local, or foreign government which is involved in the enforcement of similar laws. (2) Department of Defense personnel made available to a civilian law enforcement agency under this subsection may operate equipment for the following purposes:

"(A) Detection, monitoring, and communication of the movement of air and sea traffic.

"(B) Detection, monitoring, an communication of the movement of surface traffic outside the geographic boundary of the United States and within the United States not to exceed 25 miles of the boundary if the initial detection occurred outside the boundary.

"(C) Aerial reconnaissance.

"(D) Interception of vessels or aircraft detected outside the land area of the United States for the purposes of communicating with such vessel and aircraft to direct such vessels and aircraft to go to a location designated by appropriate civilian officials.

"(E) Operation of equipment to facilitate communications in connection with law enforcement programs specified in paragraph (4)(A).

"(F) Subject to joint approval by the Secretary of Defense and the Attorney General (and the Secretary of State in the case of a law enforcement operation outside the land area of the United

States) -- (i) the transportation of civilian law enforcement personnel; and (ii) the operation of a base of operations for civilian law enforcement personnel.

"(3) Department of Defense personnel made available to operate equipment for the purpose stated in paragraph (2)(D) may continue to operate such equipment into the land area of the United States in cases involving the pursuit of vessels or aircraft where the detection began outside such land area.

"(4) In this subsection: (A) The term `Federal law enforcement agency' means an agency with jurisdiction to enforce any of the following: (i) The Controlled Substances Act (21 U.S.C. 801 et seq.) or the Controlled Substances Import and Export Act (21 U.S.C. 951 et seq.). (ii) Any of sections 274 through 278 of the Immigration and Nationality Act (8 U.S.C. 1324-1328). (iii) A law relating to the arrival or departure of merchandise (as defined in section 401 of the Tariff Act of 1930 (19 U.S.C. 1401) into or out of the customs territory of the United states (as defined in general note 2 of the Harmonized Tariff Schedules of the United States) or any other territory or possession of the United States. (iv) The Maritime Drug Law Enforcement Act (46 U.S.C. 1001 et seq.).

"(B) The term `land area of the United States' includes the land area of any territory, commonwealth, or possession of the United States.

"(c) The Secretary of Defense may, in accordance with other applicable law, make Department of Defense personnel available to any Federal, State, or local civilian law enforcement agency to operate equipment for purposes other than described in subsection (b)(2) only to the extent that such support does not involve direct participation by such personnel in a civilian law enforcement operation unless such direct participation is otherwise authorized by law," 10 U.S.C. 374.

"(a) Procedures. (1) The Secretary of Defense shall establish procedures in accordance with this subsection under which States and units of local government may purchase law enforcement equipment suitable for counter-drug activities through the Department of Defense. The procedures shall require the following: (A) Each State desiring to participate in a procurement of equipment suitable for counter-drug activities through the Department of Defense shall submit to the Department, in such form and manner and at such times as the Secretary prescribes, the following: (i) a request for law enforcement equipment. (ii) Advance payment for such equipment, in an amount determined by the Secretary based on estimated or actual costs of the equipment and administrative costs incurred by the Department. (B) A State may include in a request submitted under subparagraph (A) only the type of equipment listed in the catalog produced under subsection (c). (C) A request for law enforcement equipment shall consist of an enumeration of the law enforcement equipment that is desired by the State and units of local government within the State. The Governor of a State may establish such procedures as the Governor considers appropriate for administering and coordinating requests for law enforcement equipment from units of local government within the State. (D) A State requesting law enforcement equipment shall be responsible for arranging and paying for shipment of the equipment to the State and localities within the State. (2) In establishing the procedures, the Secretary of Defense shall coordinate with the General Services Administration and other Federal agencies for purposes of avoiding duplication of effort.

"(b) Reimbursement of Administrative Costs. -- In the case of any purchase made by a State or unit of local government under the procedures established under subsection (a), the Secretary of Defense shall require the State or unit of local government to reimburse the Department of Defense for the administrative costs to the Department of such purchase.

Limitations: Military Preparedness, Reimbursement, and Direct Use

The authority granted in sections 371-381 is subject to three general caveats. It may not be used to undermine the military capability of the United States.[2072]

"(c) GSA Catalog. -- The Administrator of General Services, in coordination with the Secretary of Defense shall produce and maintain a catalog of law enforcement equipment suitable e for counter-drug activities for purchase by States and units of local government under the procedures established by the Secretary under this section.

"(d) Definitions. -- In this section: (1) The term `State' includes the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and any territory or possession of the United States. (2) The term `unit of local government' means any city, county, township, town, borough, parish, village, or other general purpose political subdivision of a State; an Indian tribe which performs law enforcement functions as determined by the Secretary of the Interior; or any agency of the District of Columbia government or the United States Government performing law enforcement functions in and for the District of Columbia or the Trust Territory of the Pacific Islands. (3) The term `law enforcement equipment suitable for counter-drug activities' has the meaning given such term in regulations prescribed by the Secretary of Defense. In prescribing the meaning of the term, the Secretary may not include any equipment that the Department of Defense does not procure for its own purposes" 10 U.S.C. 381.

[2071] "(a) The Secretary of Defense and the Secretary of Transportation shall provide that there be assigned on board every appropriate surface naval vessel at sea in a drug-interdiction area members of the Coast Guard who are trained in law enforcement and have powers of the Coast Guard under title 14, including the power to make arrests and to carry out searches and seizures.

"(b) Members of the Coast Guard assigned to duty on board naval vessels under this section shall perform such law enforcement functions (including drug-interdiction functions) -- (1) as may be agreed upon by the Secretary of Defense and the Secretary of Transportation; and (2) as are otherwise within the jurisdiction of the Coast Guard.

"(c) No fewer than 500 active duty personnel of the Coast Guard shall be assigned each fiscal year to duty under this section. However, if at any time the Secretary of Transportation, after consultation with the Secretary of Defense, determines that there are insufficient naval vessels available for purposes of this section, such personnel may be assigned other duty involving enforcement of laws listed in section 374(b)(4)(A) of this title.

"(d) In this section, the term `drug-interdiction area' means an area outside the land area of the United States (as defined in section 374(b)(4)(B) of this title) in which the Secretary of Defense (in consultation with the Attorney General) determines that activities involving smuggling of drugs into the United States are ongoing," 10 U.S.C. 379.

[2072] "Support (including the provision of any equipment or facility or the assignment or detail of any personnel) may not be provided to any civilian law enforcement official under this chapter if the provision of such support will adversely affect the military preparedness of the United States. The Secretary of Defense shall prescribe such regulations as may be necessary to ensure that the provision of any such support does not adversely affect the military preparedness of the United States," 10 U.S.C. 376.

The civilian beneficiaries of military aid must pay for the assistance.[2073] And the Secretary of Defense must issue regulations to ensure that the authority of sections 371 to 381 does not result in use of the armed forces to make arrests or conduct searches and seizures solely for the benefit of civilian law enforcement.[2074]

For several years, the regulations called for by section 375 appeared in parallel form in the Code of Federal Regulations[2075] and in a Defense Department Directive.[2076] The heart of the regulations appeared in subsection 213.10(a)(3), "Except as otherwise provided in this enclosure, the prohibition on use of military personnel `as a posse comitatus or otherwise to execute the laws' prohibits the following forms of direct assistance: (i) Interdiction of a vehicle, vessel, aircraft or other similar activity. (ii) A search or seizure. (iii) An arrest, stop and frisk, or similar activity. (iv) Use of military personnel for surveillance or pursuit of individuals, or as informants, undercover agents, investigators, or interrogators," 32 CFR §213.10(a)(3)(July 1, 1992). Although the provisions have been removed from the CFR, the Directive remains in effect.[2077]

[2073] "(a) To the extent otherwise required by section 1535 of title 31 (popularly known as the `Economy Act') or other applicable law the Secretary of Defense shall require a civilian law enforcement agency to which support is provided under this chapter to reimburse the Department of Defense for that support.

"(b) An agency to which support is provided under this chapter is not required to reimburse the Department of Defense for such support if such support -- (1) is provided in the normal course of military training or operations; or (2) results in a benefit to the element of the Department of Defense providing the support that is substantially equivalent to that which would otherwise be obtained from military operations or training," 10 U.S.C. 377.

[2074] "Secretary of Defense shall prescribe such regulations as may be necessary to ensure that any activity (including the provision of any equipment or facility or the assignment or detail of any personnel) under this chapter does not include or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in a search, seizure, arrest, or other similar activity unless participation in such activity by such member is otherwise authorized by law," 10 U.S.C. 375.

[2075] 47 Fed.Reg. 14899 (April 7, 1982), codified at, 32 CFR pt.213, removed, 58 Fed.Reg. 25776 (April 28, 1993).

[2076] Department of Defense Directive No. 5525.5 (January 15, 1986), as amended December 12, 1989, hereafter referred to as DoD Dir.No. 5525.5. Prior to enactment of 10 U.S.C. 371381, the Navy had operated under a Navy Department Instruction of similar import, SECNAVINST 5400.12 (January 17, 1969), see United States v. Walden, 490 F.2d 372, 37374 (4th Cir. 1974).

[2077] The provision in DoD Dir. No. 5525.5 (Encl.4) reads, "Except as otherwise provided in this enclosure, the prohibition on the use of military personnel `as a posse comitatus or otherwise to execute the laws' prohibits the following forms of direct assistance: a. Interdiction of a vehicle, vessel, aircraft, or other similar activity. b. A search or seizure. c. An arrest, apprehension, stop and frisk, or similar activity. d. Use of military personnel for surveillance or pursuit of individuals, or as undercover agents, informants, investigators, or interrogators," DoD Dir. No. 5525.5 (Encl.4) §A.3.

Military Purpose

The armed forces, when in performance of their military responsibilities, are beyond the reach of the Posse Comitatus Act and its statutory and regulatory supplements. Analysis of constitutional or statutory exceptions is unnecessary in such cases. The original debates make it clear that the Act was designed to prevent use of the armed forces to execute civilian law. Congress did not intend to limit the authority of the Army to perform its military duties. The legislative history, however, does not resolve the question of whether the Act prohibits the Army from performing its military duties in a manner which affords incidental benefits to civilian law enforcement officers.

The courts and commentators believe that it does not.[2078] As long as the primary purpose of an activity is to address a military purpose, the activity need not be abandoned simply because it also assists civilian law enforcement efforts. Courts appear to view the location of the activity as particular indicative of primary purpose; as one court noted, "the power to maintain order, security, and discipline on a military facility is necessary for military operations."[2079]

The courts have concluded that, consistent with this legitimate military purpose to maintain order on military installations, military personnel may, without violating the Posse Comitatus Act, may turn over to civilian law enforcement authorities armed felons arrested when they flee onto a military base, Harker v. State, 663 P.2d 932, 936 (Alaska 1983), or drunk drivers arrested on a military base,[2080] or firearms stolen from a military installation, United States v. Griley, 814 F.2d 967, 976 (4th Cir. 1987). The courts have likewise found no violation of the Act when military personnel arrest civilians on military facilities for crimes committed there, United States v. Banks, 539 F.2d 14, 16 (9th Cir. 1976), or when military authorities assist a civilian police investigation conducted on a military

---

[2078] Logic might suggest that the military purpose doctrine is simply the largest of the statutory exceptions, that is, that the doctrine merely encompasses the military authority vested in the armed forces under the Code of Military Justice and the other statutes which grant them military authority. Neither the commentators nor the courts have ordinarily clearly limit their analyses in such terms, see e.g., Meeks, Illegal Law Enforcement: Aiding Civil Authorities in Violation of the Posse Comitatus Act, 70 MILITARY LAW REVIEW 83, 124-26 (Fall, 1975); Rice, New Laws and Insights Encircle the Posse Comitatus Act, 104 MILITARY LAW REVIEW 109, 128-35 (Spring, 1984); Hayes v. Hawes, 921 F.2d 100, 103 (7th Cir. 1990); Taylor v. State, 640 So.2d 1127, 1136 (Fla.App. 1994); State v. Pattioay, 78 Haw. 455, 459-62, 896 P.2d 911, 915-18 (1995).

[2079] Eggleston v. Dept. of Revenue, 895 P.2d 1169, 1170 (Colo.App. 1995), citing Cafeteria & Restaurant Workers Union Local v. McElroy, 367 U.S. 886 (1961).

[2080] Eggleston v. Dept. of Revenue, 895 P.2d 1169 (Colo.App. 1995)(military police also administered breath test and provided local law enforcement officers with the results); McNeil v. State, 787 P.2d 1036, 1037 (Alaska App. 1990); Anchorage v. King, 754 P.2d 283, 286 (Alaska App. 1988).

facility.[2081] The military purpose doctrine likewise permits military law enforcement personnel to investigate the off-base conduct of military personnel.[2082] The DoD Directive evidences a comparable understanding.[2083]

[2081] People v. Caviano, 148 Misc.2d 426, 560 N.Y.S.2d 932, 936-37 (N.Y.S.Ct. 1990)(Navy personnel made a sailor available for questioning at naval station facilities; the interrogation was conducted by civilian police who subsequently arrested the sailor for an out of state robbery); United States v. Hartley, 678 F.2d 961, 978 (11th Cir. 1982)(military inspectors who discovered evidence of fraudulent conduct by defense contractors "aided the civilian employee in charge of the investigation only to the extent of activities normally performed in the ordinary course of their [military] duties"); State v. Trueblood, 265 S.E.2d 662, 664 (N.C.App. 1980)(military search (with consent) of on-base quarters in connection with a civilian investigation of off-base drug dealing by military personnel); State v. Nelson, 298 N.C. 573, 260 S.E.2d 629 (1979)(military inventory of personal effects of AWOL soldier were conducted primarily for a military purpose pursuant to a regulation designed to safeguard private property and protect service against claims); Commonwealth v. Shadron, 370 A.2d 697, 699 (Pa. 1977)(military police acting within the scope their authority did not violate the Act by making a soldier available, at the Air Force base where he was stationed, to civilian investigators for interrogation by the civilian officers and by permitted the civilians to search the defendant's possessions with his consent).

[2082] United States v. Griley, 814 F.2d 967, 976 (4th Cir. 1987)(off-base military investigation of concerning property stolen on-base by military personnel); Applewhite v. United States, 995 F.2d 997, 1001 (10th Cir. 1993)(military police off-base drug sting targeting military personnel); State v. Hayes, 102 N.C.App. 777, 404 S.E.2d 12 (1991)(off-base purchase of drugs by a military undercover agent from an AWOL soldier); State v. Poe, 755 S.W.2d 41 (Tenn. 1988)(military investigation of the off-base murder of a soldier by other soldiers).

[2083] 2. Permissible direct assistance. The following activities are not restricted by reference

(v) [the Posse Comitatus Act, 18 U.S.C. 1385].

a. Actions that are taken for the primary purpose of furthering a military or foreign affairs function of the United States, regardless of incidental benefits to civilian authorities. This provisions must be used with caution, and does not include actions taken for the primary purpose of aiding civilian law enforcement officials or otherwise serving as a subterfuge to avoid the restrictions of reference (v). Actions under this provision may include the following, depending on the nature of the DoD interest and the authority governing the specific action in question:

(1) Investigations and other actions related to enforcement of the Uniform Code of Military Justice (UCMJ)(reference (d)).

(2) Investigations and other actions that are likely to result in administrative proceedings by the Department of Defense, regardless of whether there is a related civil or criminal proceeding. See DoD Directive 5525.7 (reference (w)) with respect to matters in which the Departments of Defense and Justice both have an interest.

(3) Investigations and other actions related to the commander's inherent authority to maintain law and order on a military installation or facility.

(4) Protection of classified military information or equipment.

(5) Protection of DoD personnel, DoD equipment, and official guests of the Department of Defense.

Cases called to apply the military purpose doctrine in cooperative police activities occurring off-base are the most difficult to reconcile. Some seem to require no more than a logical military nexus,[2084] others demand a very clear, specific

---

(6) Such other actions that are undertaken primarily for a military or foreign affairs purpose, DoD Dir.No. 5525.5 (Encl. 4) A.2.a. (32 CFR §213.10(2)(i)(July 1, 1992) was identical except for styles used to designate subsections, paragraphs and subparagraphs and that the CFR contained no cross reference citations except to the Code of Military Justice).

[2084] State v. Sanders, 303 N.C. 608, 613, 281 S.E.2d 7, 10 (1981)("military policeman Lambert's duty [during joint patrol with civilian police off-base] was not to execute civilian law but to assist the police department in returning apprehended military personnel to Fort Bragg"); State v. Short, 113 Wash.2d 35, 36-7 & 39, 775 P.2d 458, 458-59 & 460 (1989)("the Naval Investigative Services (NIS) instigated a joint drug operation with local law enforcement agencies . . . . NIS brought in Agent Jerry Kramer, a civilian Navy employee, to work undercover. . . . Kramer became employed as a bouncer at Noodles, a local restaurant where drug contacts were made. In this position, Kramer checked the ID of persons entering the bar and determine that about 80 percent of those entering Noodles were military personnel. While employed at Noodles Kramer met James Corso and, later, the defendant Larry K. Short. . . . Corso indicated that Kramer could buy more cocaine through Short. Kramer and Corso waited at Noodles until Short arrived. After a brief discussion, Kramer gave Short $250 to get some cocaine. Corso and Short left Noodles together and returned an hour later. Corso entered the bar and delivered a foil package to Kramer. Kramer delivered the alleged cocaine along with information about Corso and Short, to his immediate supervisor, Agent Kocina. A Washington State Patrol Crime Laboratory analysis revealed that the substance was not cocaine. . . . Kramer still undercover complained to Short about the counterfeit and demanded reimbursement. Short promised to replace the fake cocaine with real cocaine [but did not]. Short was arrest later by local authorities and convicted . . . for selling a substitute substance in lieu of a controlled substance [to Kramer]. . . . Case law discloses that the use of equipment, personnel, and information is generally not considered direct participation under 10 U.S.C. §371 or under the posse comitatus act. . . . Here, Kramer did not arrest Short, and any personnel, equipment, and information provided to local law enforcement did not constitute direct participation"); People v. Wells,175 Cal. 876, 878, 221 Cal.Rptr. 273, 273-74 (1985)("with the goal of taking illegal drug dealers off the streets of the City of Oceanside and thus minimizing the flow of drugs into nearby Camp Pendleton, the Naval Investigative Service (N.I.S.) initiated what N.I.S. calls an Initiative Criminal Investigative Operation by soliciting the assistance of the Oceanside Police Department (O.P.D.). . . . The operational plan called for the N.I.S. agents, all military policemen, to be used as confidential informants immediately under the supervision and surveillance of a particular O.P.D. officer. Solicitation for drugs was to be done by N.I.S. agents. Any detention or arrest of a suspect was to be handled by an O.P.D. officer. The N.I.S. agent always was accompanied within a matter of feet or yards by an O.P.D. officer. On most occasions, the N.I.S. agent was equipped with a concealed transmitter. O.P.D. furnished prerecorded money to N.I.S. agents to make drug purchases and, once a purchase was completed by an N.I.S. agent, the suspected drugs were turned over to an O.P.D. officer to be impounded and analyzed. O.P.D. paid nothing to N.I.S. for its assistance. Several operations were carried out according to the plan. . . . In light of the language, background and apparent purposes of the Posse Comitatus Act to stop state use of the federal militia, particularly in policing state elections and to prevent the subjugation of citizens to the exercise of military power of a regulatory, prescriptive or compulsory nature, we find no violation of the act in the facts of this case").

---

military connection before they will concede the presence of a military purpose,[2085] and still others seem to seek a middle ground.[2086]

[2085] In Walden, for example, where a Treasury agent was found to have used Marines as undercover agents to secure evidence against civilian firearms offenders, the court found a breach of the Posse Comitatus requirements without even acknowledging the government's military purpose argument, United States v. Walden, 490 F.2d 372 (4th Cir. 1974); Meeks, Illegal Law Enforcement: Aiding Civil Authorities in Violation of the Posse Comitatus Act, 70 MILITARY LAW REVIEW 83, 115 (Fall, 1975)("the Government argued [in Walden] that the Act had not been violated because the investigation was `related directly to the maintenance of order and security` on the base and that such undercover assistance to civilian authorities does not constitute `execution of the law'"); Rice, New Laws and Insights Encircle the Posse Comitatus Act, 104 MILITARY LAW REVIEW 109, 129 (Spring, 1984)("[i]f the court considered the government's argument that the activities of the Marines were related to the maintenance, order and security of the base, it had rejected it. However, the sale of the weapons occurred immediately off the base in the town of Quantico. If the base authorities were aware of this fact and that the illegally sold weapons were being purchased by Marines and being brought on the base, then what may they do to insure order and discipline? Clearly, they can notify local authorities. But would the purchase in question by an undercover Marine be for the primary purpose of furthering a military function? Order, discipline, and security of a base is a military function"); State v. Pattioay, 78 Haw. 455, 464-65, 896 P.2d 911, 920-21 (1995)("[w]here the target of a military investigation is a civilian and there is no verified connection to military personnel, the PCA prohibits military participation in activities designed to execute civilian laws. People v. Tyler (Tyler I), 854 P.2d 1366 (Colo.App. 1993), rev'd on other grounds, 874 P.2d 1037 (Colo. 1994) (Tyler II). . . . In fact, the apparent justification for the military involvement in the instant case was to facilitate the enforcement of civilian laws. In Tyler I, the Colorado Court of Appeals stated: `before the military may directly participate in an undercover investigation of these civilians and their off-base activities, the state carries the burden of demonstrating that there exists a nexus between drug sales off base by civilians to military personnel and the military base at which the purchasers are stationed. . . . Hence, the prosecution has the duty to present evidence to show that, when a military investigation was undertaken, the targeted drug transactions involved military personnel or were connected to sales conducted on a military installation.' 854 P.2d at 1369 [emphasis of the Pattioay court]; see also Moon [v. State, 785 P.2d 45,] 46-47 [(Alaska App. 1991),]. Furthermore, we agree with the observation in Chief Justice Rabinowitz's dissent in Kim v. State, supra [817 P.2d 467 (Alaska 1991)]; he observed that an independent military interest in the health and safety of its personnel does not establish a `military function' or `primary [military] purpose' under 32 CFR §213.10(a)(2)(1). 817 P.2d at 471 & 471 n.10. That the military has a valid interest in ferreting out those who supply drugs to military personnel, does not automatically qualify its aid to civilian drug law enforcement as having the `primary purpose of furthering a military . . . function'").

[2086] Moon v. State, 785 P.2d 45, 48 (Alaska App. 1990)("[I]t seems to us that the army had a valid military purpose in preventing illicit drug transactions involving active duty personnel even if the transaction took place off base. The investigation was not begun until the military was satisfied that drug dealers at the Palace Hotel had targeted military personnel as a market. It was also reasonable to infer that a substantial quantity of illicit drugs was finding its way onto the base"); State v. Maxwell, 328 S.E.2d 507, 509 (W.Va. 1985)(same); State v. Presgraves, 328 S.E.2d (W.Va. 1985)(same); Hayes v. Hawes, 921 F.2d 100, 103-104 (7th Cir. 1990)(no violation where Navy undercover agent, who had "received information" a that a sailor had purchased drugs at an off-base arcade, with several other military agents joined local police for surveillance of the arcade, made a drug buy in cooperation with local police who made the arrest and conducted the search of civilian).

Willfully Execute the Laws

Willful

The Act is limited to "willful" misuse of the Army or Air Force.[2087] The Senate version of the original Act would have limited proscription to "willful and knowing" violations, 7 Cong.Rec. 4302 (1878); the House version had no limitation, 7 Cong.Rec. 4181 (1878). The compromise which emerged from conference opted to forbid only willful violations but neither the statements of the managers nor statements elsewhere in the debate explain what the limitation means. And the scattered statements found in the case law under the Act are somewhat conflicting and not particularly helpful,[2088] although it seems unlikely that a court would convict for anything less than a deliberate disregard of the law's requirements.

Execute the Law

[2087] Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined under this title or imprisoned not more than two years, or both. 18 U.S.C. 1385 (emphasis added).

[2088] United States v. Walden, 490 F.2d 372, 276 (4th Cir. 1974)("there is totally lacking any evidence that there was a conscious, deliberate or willful intent on the part of the Marines or the . . . Special Investigator to violate the Instruction or the spirit of the Posse Comitatus Act. From all that appears, the Special Investigator acted innocently albeit ill-advisedly"); State v. Danko, 219 Kan. 490, 548 P.2d 819, 822 (1976)("the statute is limited to deliberate use of armed force for the primary purpose of executing civilian laws")(quoting Furman, Restrictions Upon Use of the Army Imposed by the Posse Comitatus Act, 7 MILITARY LAW REVIEW 85, 128 (1960)); Kim v. State, 817 P.2d 467, 469 n.2 (Alaska, 1991)(Rabinowitz, J. dissenting)("A will to violate the Act is not required, but only the wilful use of military personnel").

In other instances, Congress has used the term "willful" in a number of different ways and the term "has been construed by the courts in a variety of ways, often inconsistent and contradictory. The courts have defined a `willful' act as an act done voluntarily as distinguished from accidentally, an act doe with specific intent to violate the law, an act done with bad purpose, an act done without justifiable excuse, an act done stubbornly, an act done without grounds for believing it is lawful, and an act done with careless disregard whether or not one has the right so to act," S.Rep.No. 307, 97th Cong., 1st Sess. 64 (1981).

Recent Supreme Court cases seem to caution against a broad interpretation of the term "willful" or any of the other state-of-mind elements in federal criminal statute, Bryan v. United States, 524 U.S. 184, 191-92 (1998)(“The word willfully is sometimes said to be a word of many meanings whose construction is often dependent on the context in which it appears. . . . As a general matter, when used in the criminal context, a willful act is one undertaken with a bad purpose. In other words, in order to establish a willful violation of a statute, the Government must prove that the defendant acted with knowledge that his conduct was unlawful”)(citing Ratzlaf v. United States, 510 U.S. 135, 137 (1994)).

When has the Army or Air Force been used "to execute the laws"? The language of the Act by itself seems very sweeping.[2089] It is comparable to the instruction of the Constitution that the President "take care that the laws are faithfully executed," U.S. Const. Art.II, §3. Without more, it would seem to prohibit the use of the Army or the Air Force to implement the command or authorization of all state or federal law. It might apply with equal force to delivering the mail or making an arrest.

Existing case law and commentary indicate that "execution of the law" in violation of the Posse Comitatus Act occurs (a) when the armed forces perform tasks ordinarily assigned not to them but to an organ of civil government, or (b) when the armed forces perform tasks assigned to them solely for purposes of civilian government.

While inquiries may surface in other contexts such as the use of the armed forces to fight forest fires or to provide assistance in the case of other natural disasters,[2090] Posse Comitatus Act questions arise most often when the armed forces assist civilian police. This is perhaps not surprising since it is the use that

---

[2089] Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined under this title or imprisoned not more than two years, or both. 18 U.S.C. 1385 (emphasis added).

[2090] See e.g., Copeland & Lamb, Disaster Law and Hurricane Andrew: Government Lawyers Leading the Way to Recovery, 27 URBAN LAWYER 1 (1995); Delzompo, Warriors on the Fire Line: The Deployment of Service Members to Fight Fire in the United States, 1995 ARMY LAWYER 51 (April, 1995); Federal Disaster Assistance: Report of the Senate Task Force on Funding Disaster Relief, SEN. DOC.104-4 (1995).

Congress has recently established provisions which at first glance might appear to be a blanket statutory exception of military assistance to civil authorities for any purpose other than police activities ("[t]he Secretary of Defense shall establish a program to be known as the `Civil-Military Cooperative Action Program.' Under the program, the Secretary may, in accordance with other applicable law, use the skills, capabilities, and resources of the armed forces to assist civilian efforts to meet the domestic needs of the United States," 10 U.S.C. 410(a)). Upon closer examination, however, it becomes clear that legislation seeks to encourage activity that would not previously have violated the Posse Comitatus Act or its supplementary statutory and regulatory provisions ("The programs shall have the following objectives: (1) To enhance individual and unit training and morale in the armed forces through meaningful community involvement of the armed forces. (2) To encourage cooperation between civilian and military sectors of society in addressing domestic needs. (3) To advance equal opportunity. (4) To enrich the civilian economy of the United states through education, training, and transfer of technological advances. (5) To improve the environment and economic and social conditions. (6) To provide opportunities for disadvantaged citizens of the United States. . . . Nothing in this section shall be construed as authorizing -- (1) the use of the armed forces for civilian law enforcement purposes; or (2) the use of Department of Defense personnel or resources for any program, project, or activity that is prohibited by law," 10 U.S.C. 410(b),(e)); S.Rep.No. 102-352, 278-82 (1992); H.R.Rep.No. 102-966, 762, reprinted in 1992 UNITED STATES CODE, CONGRESSIONAL AND ADMINISTRATIVE NEWS 1769, 1853.

stimulated passage of the Act. During the debate, Members complained of various ways in which the Army had been used, essentially as a police force, to break up labor disputes, to collect taxes, to execute search and arrest warrants, and to maintain order at the polls and during state legislative sessions.[2091]

At least when suggested that the armed forces have been improperly used as a police force, the tests used by most contemporary courts to determine whether such military activity violates the Posse Comitatus Act were developed out of disturbances at Wounded Knee on the Pine Ridge Indian Reservation in South Dakota and inquiry:

(1) whether civilian law enforcement officials made a "direct active use" of military investigators to "execute the law";
(2) whether the use of the military "pervaded the activities" of the civilian officials; or
(3) whether the military was used so as to subject "citizens to the exercise of military power which was regulatory, prescriptive, or compulsory in nature." *Taylor v. State*, 640 So.2d 1127, 1136 (Fla.App. 1994).[2092]

The vast majority of cases called upon to apply these tests have found that the assistance provided civilian law enforcement did not constitute "execution of the law" in violation of Posse Comitatus Act requirements.[2093] Those most likely to

Hawes, 921 F.2d 100, 104 (7th Cir. 1990); United States v. Gerena, 649 F.Supp. 1179, 1182 (D.Conn. 1986); United States v. Hartley, 678 F.2d 961, 978 n.24 (8th Cir. 1982); note the similarity to the tests used in the Wounded Knee Cases, United States v. Jaramillo, 380 F.Supp. 1375, 1379-380 (D.Neb. 1974), appeal dismissed, 510 F.2d 808 (8th Cir. 1975)(whether the use of military personnel affected or materially contributed to the activities of civilian law enforcement officials); United States v. Banks, 383 F.Supp. 368, 375 (D.S.D. 1974)(whether there was active participation of military personnel in civilian law enforcement activities); United States v. Red Feather, 392 F.Supp. 916, 921 (D.S.D. 1975)(whether there was direct active use of military personnel by civilian law enforcement officers); United States v. McArthur, 419 F.Supp. 186 (D.N.D. 1976), aff'd sub nom., United States v. Casper, 541 F.2d 1275, 1278 (8th Cir. 1976)(whether "Army or Air Force personnel [were] used by the civilian law enforcement officers in such manner that the military personnel subjected the citizens to the exercise of military power which was regulatory, prescriptive, or compulsory in nature, either presently or prospectively").

[2093] United States v. Yunis, 924 F.2d 1086, 1094 (D.C.Cir. 1991)(Navy transportation of prisoner in the custody the FBI); Hall v. State, 557 N.E.2d 3, 4-5 (Ind.App. 1990)(the [Air Force] Office of Special Investigations (OSI) asked Arthur Biles and Darryl Ivery, Air Force personnel, if they would be undercover agents to assist the Kokomo Police Department in drug investigations. . . . Biles and Ivery met with an OSI agent and Kokomo police officers to prepare for a controlled buy of cocaine. The police placed a body transmitter on Biles . . .. Hall met Biles and told him he could get him anything he wanted. . . . Biles gave [Hall sixty dollars ($60.00) to purchase one-half gram

fail the tests seem to be those where the activities appear to have a colorable military purpose but the government fails to make a convincing showing.[2094]

Military Coverage

---

of cocaine. Hall walked to his sister's car . . . and returned with the cocaine. Biles negotiated to buy two more bags of cocaine for one-hundred ten dollars. [Biles and Ivery testified at Hall's subsequent trial for dealing cocaine.] . . . Adopting the standard in [United States v.] McArthur, [419 F.Supp. 186 (D.N.D. 1975), aff'd, 541 F.2d 1275 (8th Cir. 1976)], we do not find that the acts of Biles and Ivery display the unauthorized exercise of military power that is `regulatory, prescriptive, or compulsory in nature); United States v. Bacon, 851 F.2d 1312 (11th Cir. 1988)("an active-duty army investigator assumed an undercover role in working jointlywith the . . . Sheriff's Department to ferret out a source of some of the cocaine being supplied to [the area for] both civilians and army personnel. . . . Army funds were used for some of the undercover drug `buys.' State and local funds were used for others. All drugs and other evidence gathered by Army Investigator Perkins were turned over to the state and local investigators for evidence in the prosecution of drug distributor Joe Bacon. . . . There was no `military permeation of civilian law enforcement.' In this case the limited military participation was nothing more than a case of assistance to civilian law enforcement efforts by military personnel and resources. This does not violate the statutory prohibition of the Posse Comitatus Act")[note that the courts do not seem to have accepted the proposition that military undercover participation without a primary military purpose is a per se violation of the Posse Comitatus Act or at least of DoD Dir. No. 5525.5 (Encl.4) A.3. ("except as otherwise provided in this enclosure, [e.g., when done primarily for a military purpose], the prohibition on the use of military personnel `as a posse comitatus or otherwise to execute the laws prohibits . . . d. Use of military personnel for surveillance. . . or as undercover agents. . . ."]);United States v. Hartley, 796 F.2d 112, 115 (5th Cir. 1986)(Air Force assistance to a customs agent tracking an aircraft suspected of smuggling marijuana into the United States);United States v. Gerena, 649 F.Supp. 1179, 1182 (D.Conn. 1986)(military transport of prisoner in the custody of the Marshals Service);Airway Heights v. Dilley, 45 Wash.App. 87, 92, 724 P.2d 407, 410 (1986)(use of Air Force technician and equipment to administer breathalyzer test).

[2094] E.g., Accord, Taylor v. State, 645 P.2d 522, 525 (Okla.Crim.[App.] 1982). See also, United States v. Walden, 490 F.2d 372 (4th Cir. 1974); Taylor v. State, 640 So.2d 1127, 1136 (Fla.App. 1994)("[m]ilitary participation in civilian law enforcement activities is restricted by the Federal Posse Comitatus Act, 18 U.S.C. 1385, and by 10 U.S.C. §375. Cases addressing this issue have ruled that where military involvement is limited and there is an independent military purpose, `the coordination of military police efforts with those of civilian law enforcement officials does not violate either [section 1385 or section 375].' Hayes v. Hawes, 921 F.2d 100, 103 (7th Cir. 1990). . . . In this case, the activities of the NIS [Naval Investigative Service] agents permeated the initial stages of the homicide investigation. Upon ascertaining that appellant [a sailor subsequently convicted in state court on two counts of first degree murder] purchased a one-way ticket to Virginia, the NIS agents obtained authorization form his commanding officer enabling them to arrest appellant on grounds of desertion for unauthorized absence. They agents traveled to Virginia, where they interviewed appellant's family members and kept them under surveillance. When appellant was found and taken into custody, the NIS agents questioned him about the homicides, obtained oral and written statements from him, and seized his clothing and other personal effects. The NIS agents then transported appellant to Jacksonville, where they turned him over to the civilian authorities. . . . [T]he NIS agent stated candidly that his primary purpose in traveling to Virginia was to question appellant about the homicides. We conclude the nature of the military involvement in the investigation may have constituted a violation of the federal Act. . .").

The Posse Comitatus Act proscribes use of the Army or the Air Force to execute the law.[2095] It says nothing about the Navy, the Marine Corps, the Coast Guard, or the National Guard. The amendment first offered to the Army appropriation bill in 1878 to enact the Posse Comitatus provisions would have prohibited use of "any part of the land or naval forces of the United States" to execute the law, 7 Cong.Rec. 3586 (1878). Some commentators believe that sponsors subsequently limited the posse comitatus amendment to the Army appropriation bill in order to avoid challenges on grounds of germaneness.[2096] The courts have generally held that the Posse Comitatus Act by itself does not apply to the Navy or the Marine Corps.[2097] They maintain, however, that those forces are covered by similarly confining administrative and legislative supplements,[2098] the most currently applicable of which appear in the DoD Directive.[2099]

[2095] Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined under this title or imprisoned not more than two years, or both. 18 U.S.C. 1385 (emphasis added).

[2096] The Navy's Role in Interdicting Narcotics Traffic: War on Drugs or Ambush of the Constitution? 75 GEORGETOWN LAW JOURNAL 1947, 1955 (1987); Meeks, Illegal Law Enforcement: Aiding Civil Authorities in Violation of the Posse Comitatus Act, 70 MILITARY LAW REVIEW 83, 101 (Fall, 1975). Under long standing rules of the House, an amendment that deals with a subject different from those contained in the bill which it seeks to amend is nongermane and subject to challenge. If the posse comitatus amendment sponsors adjusted their amendment solely for reasons of germaneness, one would expect to find a comparable amendment in the Navy appropriation bill before the Congress at the same time. So such amendment was offered to the Navy bill, 46 Stat. 48 (1878).

[2097] United States v. Mendoza-Cecelia, 963 F.2d 1467, 1477 (11th Cir. 1992); United States v. Yunis, 924 F.2d 1086, 1093 (D.C.Cir. 1991); State v. Short, 113 Wash.2d 35, 38, 775 P.2d 458, 459 (1989); United States v. Ahumedo-Avendano, 872 F.2d 367, 372 n.6 (11th Cir. 1989); Schowengerdt v. General Dynamics Corp., 823 F.2d 1328, 1339-340 (9th Cir. 1987); United States v. Roberts, 779 F.2d 565, 567 (9th Cir. 1986); United States v. Walden, 490 F.2d 372, 374 (4th Cir. 1974).

[2098] United States v. Kahn, 35 F.3d 426, 431 (9th Cir. 1994)("[t]hus the Posse Comitatus Act applies to the Navy through section 375 [of title 10 of the United States Code] and 32 C.F.R. §213.10"); Taylor v. State, 640 So.2d 1127, 1136 (Fla.App. 1994)("[m]ilitary participation in civilian law enforcement activities is restricted by the federal Posse Comitatus Act, 18 U.S.C. §1385, and by 10 U.S.C. §375"); United States v. Yunis, 924 F.2d 1086, 1094 (D.C.Cir. 1991)) ("[r]egulations issued under 10 U.S.C. §375 require Navy compliance with the restrictions of the Posse Comitatus Act. . ."); Hayes v. Hawes, 921 F.2d 100, 102-103 (7th Cir. 1990)(". . .10 U.S.C. §375 and the regulations promulgated thereunder at 32 C.F.R. §§213.1-213.11 make the proscriptions of [18 U.S.C.] §1385 applicable to the Navy and serve to limit its involvement with civilian law enforcement officials"); State v. Short, 113 Wash.2d 35, 39, 775 P.2d 458, 460 (1989)("[b]ecause the limitations on the use of the armed services contained in 10 U.S.C. §375 correspond closely with those in the posse comitatus act, the same analysis should apply"); United States v. Ahumedo-Avendano, 872 F.2d 367, 372 n.6 (11th Cir. 1989)("[t]he Posse Comitatus Act does not expressly regulate the use of naval forces as a posse comitatus; the courts of appeal that have considered this question, however, have concluded that the prohibition embodied in the Act applies to naval forces, either by implication or by virtue of executive act"); United States v.

Coast Guard

The Posse Comitatus Act likewise says nothing about the Coast Guard. The Coast Guard was formed by merging two civilian agencies, the revenue cutter service and the lifesaving service. Although created and used for law enforcement purposes, the cutter service had already been used as part of the military forces of the United States by the time the Posse Comitatus Act was enacted.[2100]

Roberts, 779 F.2d 565, 568 (9th Cir. 1986)(" . . .the Posse Comitatus Act and sections 371-378 of Title 10 embody similar proscriptions against military involvement in civil law enforcement. . . "); United States v. Del Prado-Montero, 740 F.2d 113, 116 (1st Cir. 1984)("18 U.S.C. 1385 prohibits the use of the Army and the Air Force to enforce the laws of the United States, a proscription that has been extended by executive act to the Navy"); United States v. Chaparro-Almeida, 679 F.2d 423, 425 (5th Cir. 1982)(dicta in case involving the Coast Guard); United States v. Walden, 490 F.2d 372, 373-74 (4th Cir. 1974)("[t]he use of Marines as undercover investigators by the Treasury Department is counter to a Navy military regulation proscribing the use of military personnel to enforce civilian laws. . . . Thus, though by its terms the Posse Comitatus Act does not make criminal the use of Marines to enforce federal laws, the Navy has adopted the restriction by self-imposed administrative regulation").

As an examination of the cases listed above and in the previous footnote demonstrate, although in basic agreement subsequent courts have sometime described their views as in conflict. In fact, one camp will cite Walden for the proposition that the Posse Comitatus Act does not apply to the Navy or Marines although its requirements have been adopted by administrative and/or legislative supplements, while the other camp will cite Walden for the assertedly contrary proposition that the Posse Comitatus Act requirements apply to the Navy and Marines by way of regulation and/or legislative supplement. A third group takes an abbreviate route to the same destination by simply citing Walden for the principle that the Posse Comitatus Act applies to Navy and the Marines, see e.g., People v. Caviano, 148 Misc.2d 426, 560 N.Y.S.2d 932, 936 n.1 (1990); State v. Presgraves, 328 S.E.2d 699, 701 n.3 (W.,Va. 1985); State v. Maxwell, 328 S.E.2d 506, 509 n.4 (W.Va. 1985); People v. Wells, 175 Cal.App.3d 876, 879, 221 Cal.Rprt. 273, 275 (1985); People v. Blend, 121 Cal.App.3d 215, 222, 175 Cal.Rprt. 263, 267 (1981).

[2099] "A. REISSUANCE AND PURPOSE

This Directive reissues reference (a) [DoD Directive No. 5525.5 (March 22, 1982)] to update uniform DoD policies and procedures to be followed with respect to support provided to Federal, State, and local civilian law enforcement efforts. . . .

"APPLICABILITY AND SCOPE

1. This Directive applies to the Office of the Secretary of Defense (OSD), the Military Departments, the Organization of the Joint Chiefs of Staff (OJS), the Unified and Specified Commands, and the Defense Agencies (hereafter referred to collectively as DoD Components). The term `Military Service,' as used herein, refers to the Army, Navy, Air Force, and Marine Corps."

[2100] See 46 Stat. 316 (1878), directing the Secretary of the Treasury to issue three months extra pay to those who had engaged in the military service of the United States during the war with Mexico and listing the cutter service as one source of possibly qualifying service.

The Coast Guard is now a branch of the armed forces, located within the Department of Transportation, 14 U.S.C. 1, but relocated within the Navy in time of war or upon the order of the President, 14 U.S.C. 3. The Act does apply to the Coast Guard while it remains part of the Department of Transportation.[2101] While part of the Navy, it is subject to the orders of the Secretary of the Navy, 14 U.S.C. 3, and consequently to any generally applicable directives or instructions issued under the Department of Defense or the Navy.

As a practical matter, however, the Coast Guard is statutorily authorized to perform law enforcement functions, 14 U.S.C. 2. Even while part of the Navy its law enforcement activities would come within the statutory exception to the posse comitatus restrictions, and the restrictions applicable to components of the Department of Defense would only apply to activities beyond those authorized.

National Guard

The Act is silent as to what constitutes "part" of the Army or Air Force for purposes of proscription. There is little commentary or case law to resolve questions concerning the coverage of the National Guard, the Civil Air Patrol, civilian employees of the armed forces, or regular members of the armed forces while off duty.

Strictly speaking, the Posse Comitatus Act predates the National Guard only in name for the Guard "is the modern Militia reserved to the States by Art.I, §8, cls.15, 16, of the Constitution" which has become "an organized force, capable of being assimilated with ease into the regular military establishment of the United States," Maryland v. United States, 381 U.S. 41, 46 (1965). There seems every reason to consider the National Guard part of the Army or Air Force, for purposes of the Posse Comitatus Act, when in federal service.[2102] When not in federal service, historical reflection might suggest that it is likewise covered. Recall that it was the state militia, called to the aid of the marshal enforcing the Fugitive Slave Act, which triggered Attorney General Cushing's famous opinion. And that the Posse Comitatus Act's reference to "posse comitatus or otherwise" is a "they-are-covered-no-matterwhat-you-call-them" response to the assertion derived from Cushing's opinion that troops could be used to execute the law as long as they were acting as citizens and not soldiers when they did so.

On the other hand, the National Guard is creature of both state and federal law, a condition which as the militia it has enjoyed since the days of the Articles of

---

[2101] United States v. Chaparro-Almedia, 679 F.2d 423, 425 (5th Cir. 1982); Jackson v. State, 572 P.2d 87, 93 (Alaska, 1977).

[2102] Meeks, Illegal Law Enforcement: Aiding Civil Authorities in Violation of the Posse Comitatus Act, 70 MILITARY LAW REVIEW 83, 96-9 (Fall, 1975); Furman, Restrictions Upon Use of the Army Imposed by the Posse Comitatus Act, 7 MILITARY LAW REVIEW 85, 101 (January, 1960).

Confederation.[2103] And the courts have said that members of the National Guard when not in federal service are not covered by the Posse Comitatus Act.[2104] Similarly, the DoD directive is only applicable to members of the National Guard when they are in federal service.[2105]

[2103] The status of the District of Columbia National Guard is somewhat different since it is a creature entirely of federal creation. This being the case it might be thought that the D.C. National Guard should be considered perpetually "in federal service" or that the Posse Comitatus Act would apply to it at all times even though the treatment of the National Guard in the various states might be different. This, however, is not the view of the Department of Justice which has concluded the Posse Comitatus Act applies to the D.C. National Guard only when it is called into federal service as a state National Guard might be. The Department has also determined that even if this were not the case the Posse Comitatus Act permits the D.C. National Guard to "to support the drug law enforcement efforts" of the D.C. police because of the authority granted by Congress in D.C. Code 39-104 (declaring that the D.C. National Guard shall not be subject to any duty except when called into federal service or to "aid civil authorities in the execution of the laws or suppression of riots"[D.C.Code §39-603 authorizes D.C. officials, in times of tumult, riot, or mob violence, to request the President to call out the D.C. National Guard to aid "in suppressing such violence and enforcing the laws"]) and D.C.Code §39-602 (authorizing the Commanding General of the D.C.National Guard to order "such drills, inspections, parades, escort, or other duties, as he may deem proper")(emphasis added), Use of the National Guard to Support Drug Interdiction Efforts in the District of Columbia, 13 OP.OFF. LEGAL COUNSEL 110 (1989).

[2104] Gilbert v. United States, 165 F.3d 470, 473 (6th Cir. 1999); United States v. Hutchings, 127 F.3d 1255, 1258 (10th Cir. 1997); United States v. Benish, 5 F.3d 20, 25-6 (3d Cir. 1993); United States v. Kyllo, 809 F.Supp. 787, 792-93 (D.Ore. 1992); Wallace v. State, 933 P.2d 1157, 1160 (Alaska App. 1997); accord, Rich, The National Guard, Drug Interdiction and Counterdrug Activities, and the Posse Comitatus Act: The Meaning and Implications of `In Federal Service', 1994 ARMY LAWYER 35, 42-3 (June, 1994); but in two Wounded Knee cases, in which National Guard involvement in the civilian law enforcement efforts helped doom federal prosecution, the courts made no effort to determine whether the Guard had been called into federal service, suggesting to some that the Guard was covered in any event. United States v. Banks, 383 F.Supp. 368, 376 (D.S.D. 1974); United States v. Jaramillo, 380 F.Supp. 1375, 1380-381 (D.Neb. 1974); see also, United States v. McArthur, 419 F.Supp. 186, 193 n.3 (D.N.D. 1976)(a third Wounded Knee case listing "use by federal civil law enforcement officers of material and equipment furnished by . . . the South Dakota National Guard. . . aerial photographic reconnaissance provided by . . . the Nebraska National Guard . . . and the maintenance of military vehicles performed by members of the Nebraska National Guard" as "evidence of military involvement"); Meeks, Illegal Law Enforcement: Aiding Civil Authorities in Violation of the Posse Comitatus Act, 70 MILITARY LAW REVIEW 83, 96-8 (Fall, 1975).

Kyllo suggests that 32 U.S.C. §112 (which permits the Secretary of Defense to provide funds for the drug interdiction activities conducted by various state National Guards when not in federal service) authorizes such Guards to assist in civilian law enforcement efforts, 809 F.Supp. at 793.

The legislative history of earlier efforts to involve the National Guard (while in state service) in drug interdiction indicates that the Congress believed that "[w]hen not in federal service, the National Guard is not subject to the Posse Comitatus Act," H.R.Rep.No.100989, 455, reprinted in 1988 UNITED STATES CODE CONGRESSIONAL AND ADMINISTRATIVE NEWS 2503, 2583.

[2105] "The restrictions of section A. above [the Directive's posse comitatus proscriptions], do not apply to the following persons . . . . 2. A member of the National Guard when not in Federal Service," DoD Directive No. 5525.5.b.2.

Off Duty, Acting as Citizens & Civilian Employees

The historical perspective fares little better on the question of whether the Posse Comitatus Act extends to soldiers who assist civilian law enforcement officials in a manner which any other citizen would be permitted to provide assistance, particularly if they do so while off duty.

Congress passed the Act in response to cases where members of the military had been used based on their civic obligations to respond to the call as the posse comitatus. The debate in the Senate, however, suggests that the Act was not intended to strip members of the military of all civilian rights and obligations.[2106]

Some of the cases, particularly the earlier ones, occasionally citing debate in the Senate, held that a soldier who does no more than any other citizen might do to assist civilian law enforcement has not been used in violation of the Posse Comitatus Act.[2107] The more recent decisions under similar facts, with the

---

[2106] "If a soldier sees a man assaulting me with a view to take my life, he is not going to stand by and see him do it, he comes to my relief not as a soldier, but as a human being, a man with a soul in his body, and as a citizen. . . . The soldier standing by would have interposed if he had been a man, but not as a soldier. He could not have gone down in pursuance of an order form a colonel or a captain, but he would have done it as a man." 7 Cong.Rec. 4245 (1878)(remarks of Sen. Merriman).

The weight afforded remarks in the Senate should perhaps reflect the fact that the Act was the work of a Democratic House, forced upon a reluctant Republican Senate.

[2107] People v. Taliferro, 116 Ill.App.3d 861, 520 N.E.2d 1047, 1051 (1988)(an airman acted as an undercover agent for local drug enforcement officers; "Ferguson participated in a controlled drug purchase in exactly the same manner as any other citizen would participate in such transaction"); Burkhart v. State, 727 P.2d 971, 972 (Okla.Crim.App. 1986)(military undercover agent investigating drugs sold to military personnel purchased some from the defendant and testified against him; "the agent `did not assume any greater authority than that of a private citizen in purchasing the marijuana'"); People v. Burden, 411 Mich. 56, 303 N.W.2d 444, 446-47 (1981)(airman agreed to serve undercover after being charged with drug sales by civilian authorities; "[i]n cooperating with and assisting the civilian police agency, Hall was not acting as a member of the military. He was acting only as a civilian. His military status was merely incidental to and not essential to his involvement with the civilian authorities. He was not in military uniform. He was not acting under military orders. He did not exercise either explicitly or implicitly any military authority. Moreover, Hall was not a regular law enforcement agent of the military, * * * nor does the record suggest that Hall's usefulness to civilian authorities was in any way enhanced by virtue of his being a military man. . . . [T]he assistance rendered by Hall was in no way different from the cooperation which would have been given by a private citizen offered the same opportunity to avoid criminal prosecution"); People v. Blend, 121 Cal.App.3d 215, 227, 175 Cal.Rptr. 263, 270 (1981)(a Navy wave caught by civilian authorities in violating the drug laws, agreed to serve undercover for the civilian police; "the [posse comitatus] act does not apply to military personnel who are acting clearly on their own initiative as private citizens"); Lee v. State, 513 P.2d 125, 126 (Okla.Crim.App. 1973)(military undercover agent in cooperation with local police purchases drugs off-base from a civilian; "agent Smith did not assume any greater

endorsement of the commentators,[2108] have focused on the nature of the assistance provided and whether the assistance is incidental to action taken primarily for a military purpose.[2109]

---

authority than that of a private citizen in purchasing the marijuana in the instant case"); Hildebrandt v. State, 507 P.2d 1323, 1325 (Okla.Crim.App. 1973)(military undercover investigators traced the source of drugs sold to military personnel to the defendant; the "soldier led the agents to a location outside the scope of their military jurisdiction, at which time the gents assumed no greater authority than that of a private citizen"); Hubert v. State, 504 P.2d 1245, 1246-247 (Okla.Crim.App. 1972)(same).

[2108] Meeks, Illegal Law Enforcement: Aiding Civil Authorities in Violation of the Posse Comitatus Act, 70 MILITARY LAW REVIEW 83, 126-27 (Fall, 1975) ("Military personnel are all private citizens as well as members of the federal military. The prohibitions of the Posse Comitatus Act do not apply to military personnel who are performing the normal duties of a citizen such as reporting crimes and suspicious activities, making citizens' arrests where allowed by local law and otherwise cooperating with civil police. It is not sufficient for military personnel to be `volunteers,' they must clearly be acting on their own initiative and in a purely unofficial and individual capacity. Commanders must be careful to insure that activities which are in violation of the act are not being carried on under the labels of `individual' or `unofficial' assistance. Some factors which may signal a violation of the Act include aid given during duty hours, aid prompted or suggested by a military superior or aid given with the knowledge or acquiescence of a military superior. Other considerations include the manner in which the civil authorities contacted the military person, whether that person regularly performs military law enforcement functions, and whether or not the individual's usefulness to civil authorities is related to his military status"); Rice, New Laws and Insights Encircle the Posse Comitatus Act, 194 MILITARY LAW REVIEW 109, 128-33 (Spring, 1984)(also noting that the catalyst for some the difficult stemmed from the holding in O'Callahan v. Parker, 395 U.S. 258 (1969)(since overturned) limiting military jurisdiction over crimes committed by military personnel to those which were service connected).

[2109] Fox v. State, 908 P.2d 1053, 1057 (Alaska App. 1995)("In civilian prosecutions stemming from joint military-civilian investigations into off-base drug sales, courts have interpreted these regulations to require the government to demonstrate a military purpose – that is a nexus between the targeted off-base sales and military personnel; this purpose must be shown to have been the primary purpose of the m ilitary's participation. In the absence of a nexus between the targeted off-base drug sales and military personnel, courts have condemned joint investigations as violations of the Posse Comitatus Act "); State v. Gunter, 902 S.W.2d 172, 175 (Tex.App. 1995)(after quoting the private citizen language in Burkhardt, supra, the court declared, "[a] majority of courts have also noted that where military involvement is limited and where there is an independent military purpose of preventing illicit drug transactions to support the military involvement, the coordination of military police efforts with those of civilian law enforcement does not violate the Act. Where the military participation in an investigation odes not pervade the activities of civilian officials, and does not subject the citizenry to the regulatory exercise of military power, it doe snot violate the Act"); State v. Pattioay, 78 Haw. 455, 466, 896 P.2d 911, 922 (1995)("Absent evidence to support the prosecution's claim of a primary military purpose, we must uphold the circuit court's conclusion that the joint civilian-military [undercover drug] investigation violated the PCA, 10 U.S.C. §375, and relevant federal regulations"); Taylor v. State, 640 So.2d 1127, 1136 (Fla.App. 1994) ("[m]ilitary participation in civilian law enforcement activities is restricted by the federal Posse Comitatus Act and by 10 U.S.C. §375. Cases addressing this issue have ruled that where military involvement is limited and there is an independent military purpose, `the coordination of military police efforts with those of civilian law enforcement officials does not violate either section 1385 or section 375.' Hayes v. Hawes, 921 F.2d 100, 103 (7th Cir. 1990). The test for violation of the federal law is (1) whether civilian law enforcement officials made a direct active use of military investigators to execute the laws; (2)

Some have questioned whether civilian employees of the armed forces should come within the proscription of the Act,[2110] but most, frequently without comment, seem to consider them "part" of the armed forces for purposes of the Posse Comitatus Act.[2111] The current Defense Department Directive expressly includes civilian employees "under the direct command and control of a military officer" within its Posse Comitatus Act policy restrictions.[2112]

Geographical Application

It seems unlikely that the Posse Comitatus Act, by itself, applies beyond the confines of the United States, its territories and possessions.[2113] As a general rule, Acts of Congress are presumed to apply only within the United States, its territories and possessions unless Congress has provided otherwise or unless the purpose of Congress in enacting the legislation evidences an intent that the legislation enjoy extraterritorial application.[2114]

The Posse Comitatus Act contains no expression of extraterritorial application. Congress enacted it in response to problems occurring within the United States and its territories, problems associated with the American political process and military usurpation of civilian law enforcement responsibilities over Americans.

---

whether the use of the military pervaded the activities of the civilian officials; or (3) whether the military was used so as to subject citizens to the exercise of military power which was regulatory, proscriptive, or compulsory in nature").

Presgraves, 328 S.E.2d 699 (W.Va. 1985); United States v. Hartley, 486 F.Supp. 1348 (M.D.Fla. 1980), aff'd, 678 F.2d 961 (11th Cir. 1982); Meeks, Illegal Law Enforcement: Aiding Civil Authorities in Violation of the Posse Comitatus Act, 70 MILITARY LAW REVIEW 83 (Fall, 1975)("civilian investigators operate under the immediate supervision of military officers who are prohibited by the Act from aiding local authorities. Holding that the civilian subordinates are not also prohibited allows a principal to accomplish things through his agent that he could not otherwise lawfully do himself. It is foolhardy to assume that it is only the sight of the man in military uniform aiding the sheriff that tends to offend the civilian community").

[2112] DoD Dir. No. 5525.5 (Encl.4) §B.3, a comparable provision appeared in 32 CFR §213.10(b)(3)(July 1, 1992 ed.).

[2113] Extraterritorial Effect of the Posse Comitatus Act, 13 OP. OFF. LEGAL COUNSEL 387 (1989); Siemer & Effron, Military Participation in United States Law Enforcement Activities Overseas: The Extraterritorial Effect of the Posse Comitatus Act, 54 ST.JOHN'S LAW REVIEW 1 (1979).

[2114] United States v. Bowman, 260 U.S. 94, 98 (1922); Blackmer v. United States, 284 U.S. 421 (1932); United States v. Yunis, 924 F.2d 1086, 1090-91 (D.C.Cir. 1991).

It seems unlikely that its extraterritorial application was either anticipated or intended.

The first court to consider the question agreed, but it arose in occupied territory overseas in which an American military government had temporarily displaced civil authorities, *Chandler v. United States*, 171 F.2d 921, 936 (1st Cir. 1948). For some time subsequent decisions either declined to resolve the issue or ignored it.[2115]

Congress does appear to have intended the authority and restrictions contained in 10 U.S.C. 371-381 to apply both in the United States and beyond its borders. Certainly, the provisions directing the placement of members of the Coast Guard on Navy ships for drug interdiction purposes, 10 U.S.C. 379, evidence an understanding that the Posse Comitatus Act's statutory shadow, 10 U.S.C. 375, applies at least on the high seas.[2116] In fact, in some instances it initially contemplated that various provisions would only apply overseas.[2117]

The regulations implementing 10 U.S.C. 375 address only assistance to law enforcement officials of the several states, the United States, or its territories or possessions, DoD Dir. No. 5525.5, §3, without any explicit declaration that the ban applies only within this country. In the case of assistance provided overseas to foreign law enforcement officials, the so-called Mansfield Amendment, 22 U.S.C. 2291(c), creates something of an overseas version of the Posse Comitatus Act, at least for drug enforcement purposes.[2118]

[2115] Gillars v. United States, 182 F.2d 962, 973 (D.C.Cir. 1950); D'Aquino v. United States, 192 F.2d 338, 351 (9th Cir. 1951); United States v. Cotton, 471 F.2d 744, 748-49 (9th Cir. 1973).

[2116] Cf., United States v. Klimavicius-Viloria, 144 F.3d 1249, 1259 (9th Cir. 1998); United Sstates v. Khan, 35 F.3d 426, 431-32 (9th Cir. 1994)(both determining that the particular activities of Navy personnel on the high seas in aid of law enforcement officials did not violate 10 U.S.C. 375).

[2117] "The Committee considered and narrowly rejected a suggestion that the assistance permitted by this section be made available only outside the United States," H.R.Rep.No. 97-71, pt.2, 12 n.3, reprinted in 1981 UNITED STATES CODE, CONGRESSIONAL AND ADMINISTRATIVE NEWS 1785, 1795.

[2118] "(c) Participation in foreign police actions

"(1) Prohibition on effecting an arrest

"No officer or employee of the United States may directly effect an arrest in any foreign country as part of any foreign police action with respect to narcotics control efforts, notwithstanding any other provisions of law.

"(2) Participation in arrest actions

Consequences of Violation

Prosecution

The Posse Comitatus Act is a criminal statute under which there has apparently never been a prosecution.[2119] It has been invoked with varying degrees of success,

---

"Paragraph (1) does not prohibit an officer or employee of the United States, with the approval of the United States chief of mission, from being present when foreign officers are effecting an arrest or from assisting foreign officers who are effecting an arrest.

"(3) Exception for exigent, threatening circumstances

"Paragraph (1) does not prohibit an officer or employee from taking direct action to protect life or safety if exigent circumstances arise which are unanticipated and which pose an immediate threat to United States officers or employees, officers or employees of a foreign government, or members of the public.

"(4) Exception for maritime law enforcement

"With the agreement of a foreign country, paragraph (1) does not apply with respect to maritime law enforcement operations in the territorial sea or archipelagic waters of that country.

"(5) Interrogations

"No officer or employee of the United States may interrogate or be present during the interrogation of any United States person arrested in any foreign country with respect to narcotics control efforts without the written consent of such person.

"(6) Exception for status of forces arrangements

"This subsection does not apply to the activities of the United States Armed Forces in carrying out their responsibilities under applicable Status of Forces arrangements." 22 U.S.C. 2291(c).

In the course of its opinion concerning the extraterritorial application of the Posse Comitatus Act, the Office of Legal Counsel characterized an earlier version of the Mansfield Amendment as applicable only in the case of American involvement "in the internal enforcement activities of foreign countries" and not applicable to the overseas enforcement of American law, Extraterritorial Effect of the Posse Comitatus Act, 13 OP. OFF. LEGAL COUNSEL 387, 410-11 n.16 (1989)(citing dicta in United States v. Green, 671 F.2d 46, 53 n.9 (1st Cir. 1982), for the proposition that the Mansfield Amendment "was only intended to `insure that U.S. personnel do not become involved in sensitive, internal law enforcement operations which could adversely affect U.S. relations with that country'" and inferring that U.S. enforcement of its laws within the territory of another nation for misconduct within that nation would not similarly adversely affect relations and was intended to be covered). However tenable that position may once have been, it seems to have been undermined by the inclusion of subparagraph (4) making the Amendment inapplicable in cases where the foreign country has agreed to the application of American drug laws within its territorial waters.

[2119] Gilligan, Opening the Gate? An Analysis of Military Law Enforcement Authority Over Civilian Lawbreakers On and Off the Federal Installation, 161 MILITARY LAW REVIEW 1, 11 (1999); State

however, to challenge the jurisdiction of the courts, as a defense in criminal prosecutions for other offenses, as a ground for the suppression of evidence, as the grounds for, or a defense against, civil liability, and as an impediment to proposed actions by the armed forces.

Exclusion of Evidence

Allegations that the Posse Comitatus Act has been violated are made most often by defendants seeking to exclude related testimony or physical evidence. The case law begins with *United States v. Walden*, 490 F.2d 372 (4th Cir. 1974), where the court found that the Treasury Department's use of three Marines as undercover agents in an investigation of firearms offenses violated Navy regulations which made the Act applicable to use of the Marines, but declined to order the exclusion of evidence obtained by the Marines.

The court found no "conscious, deliberate or willful intent on the part of the Marines or the Treasury Department's Special Investigator to violate" the regulation or the Act, 490 F.2d at 376. It also noted that the regulation contained no enforcement mechanism and the Posse Comitatus Act provided only for criminal prosecution, and that case before lacked the elements which had lead to the adoption of the Fourth Amendment exclusionary rule. Finally, the court felt the use of the Marines had been aberrational, that subsequent similar transgressions were unlikely, and that the regulation would be amended to provide an enforcement component. But the court warned, "should there be evidence of widespread or repeated violations in any future case, or ineffectiveness of enforcement by the military, we will consider ourselves free to consider whether adoption of an exclusionary rile is required as a future deterrent," 490 F.2d at 377.

Later defendants have focused upon the warning; later courts upon the refusal to adopt an exclusionary rule. Most cases note the absence of an exclusionary rule either to avoid unnecessary posse comitatus act analysis or as the final step in the analysis.[2120] Three states cases, two of them recent, have required the suppression

---

v. Pattioay, 78 Haw. 455, 467, 896 P.2d 911, 923 (1995); Moon v. State, 785 P.2d 45, 48 (Alaska App. 1990).

[2120] E.g., United States v. Wolffs, 594 F.2d 77, 85 (5th Cir. 1979)("We pretermit discussion of whether there was a violation of the statute or regulation. We need not decide that complex and difficult issue because assuming without deciding that there was a violation application of an exclusionary rule is not warranted"); People v. Hayes, 144 Ill.App.3d 696, 494 N.E.2d 1238, 1240 (1986)("numerous decisions with facts similar to those presented here have found that no violation of the Act occurs if the aid is not characterized as military and the investigation merely coordinates with civilian police. More importantly, with few exceptions, the courts have uniformly held that the exclusionary rule does not apply to evidence seized in violation the Posse Comitatus Act"); other cases include, United States v. Mullin, 178 F.3d 334, 342-43 (5th Cir. 1999); United States v. Al-Talib, 55 F.3d 923 (4th Cir. 1995); State v. Gunter, 902 S.W.2d 172 (Tex.App. 1995); Taylor v. State, 640 So.2d 1127 (Fla.App. 1994)(finding a violation but declining to exclude

of evidence resulting from the use of military undercover agents to target civilian drug dealing without establishing any connection to activities on a military installation or sales to military personnel other than the undercover agents.[2121]

Jurisdiction & Criminal Defenses

The first criminal defendants to seek refuge in the Posse Comitatus Act claimed unsuccessfully that use of the military to transport them back to the United States for trial violated the Posse Comitatus Act and vitiated the jurisdiction of American courts to try them. Ordinarily, criminal trials are not barred simply because the defendant was unlawfully seized and carried into the jurisdiction of the trial court.[2122] There are indications that the same rule applies when the defendant challenges the court's jurisdiction on the grounds of Posse Comitatus Act violations. In the early posse comitatus cases, the defendants' arguments were further undermined by the fact that the countries from which they were returned, Germany and Japan, were under American military rule at the time.[2123] In later cases some of which began beyond the territorial confines of the United States although none in occupied territory, the courts noted that dismissal would not be an appropriate remedy for a posse comitatus violation.[2124]

---

evidence); State v. Valdobinos, 122 Wash.2d 270, 858 P.2d 199 (1993); United States v. Mendoza-Cecelia, 963 F.2d 1467 (11th Cir. 1992); McPherson v. State 800 P.2d 928 (Alaska App. 1990); People v. Morris, 522 A.2d 220, 221 (R.I. 1987); United States v. Roberts, 779 F.2d 565, 568 (9th Cir. 1986); United States v. Cotton, 471 F.2d 744, 749 (9th Cir. 1973).

Defendants have found the Act more helpful in prosecutions where the government must establish the lawfulness of its conduct as one of the elements of the offense charged. Thus, several defendants at Wounded Knee were able to persuade the court that evidence of possible Posse Comitatus Act violations precluded their convictions for obstructing law enforcement officials "lawfully engaged" in the performance of their duties.[2125]

Civil Liability

Almost a decade ago, the Eighth Circuit found that a violation of the Act might constitute an unreasonable search and seizure for purposes of the Fourth Amendment thereby giving rise to a Bivens cause of action against offending federal officers or employees.[2126] A Posse Comitatus Act violation, however, also provides the government with a defense to a claim under the Federal Tort Claims Act since the government is not liable under that Act for injuries inflicted by federal officers or employees acting outside the scope of their authority.[2127] On balance, however, the Posse Comitatus Act is only rarely placed in issue in civil cases.

Compliance

The most significant impact of the Posse Comitatus Act is attributable to compliance by the armed forces. As administrative adoption of the Act for the Navy and Marines demonstrates, the military has a long standing practice of avoiding involvement in civilian affairs which it believes are contrary to the Act.[2128]

[2125] United States v. Banks, 383 F.Supp. 368, 374-77 (D.S.D. 1974); United States v. Jaramillo, 380 F.Supp. 1375, 1378-381 (D.Neb. 1974).

[2126] Bissonette v. Haig, 800 F.2d 812 (8th Cir. 1986), aff'd as if by an equally divided court for want of a quorum , 485 U.S. 264 (1988); see also, Applewhite v. United States, 995 F.2d 997 (10th Cir. 1993). Bivens v. Six Unknown Named Agents of the Federal Bureau of Narcotics, 403 U.S. 388 (1971), recognized a private cause of action in tort for injuries suffered as a result of a constitutional violation.

American Law Division

Summary

Obstruction of justice is the frustration of governmental purposes by violence, corruption, destruction of evidence, or deceit. It is a federal crime. In fact, it is several crimes. Obstruction prosecutions regularly involve charges under several statutory provisions. Federal obstruction of justice laws are legion; too many for even passing reference to all of them in a single report.

The general obstruction of justice provisions are six: 18 U.S.C. 1512 (tampering with federal witnesses), 1513 (retaliating against federal witnesses), 1503 (obstruction of pending federal court proceedings), 1505 (obstruction of pending Congressional or federal administrative proceedings), 371 (conspiracy), and contempt. In addition to these, there are a host of other statutes that penalize obstruction by violence, corruption, destruction of evidence, or deceit.

This is an abridged version of CRS Report RL34303, Obstruction of Justice: An Overview of Some of the Federal Laws that Prohibit Interference with Judicial, Executive or Legislative Activities, without the footnotes, quotations, or citations to authority found in the longer report.

Witness Tampering (18 U.S.C. 1512)

Section 1512 applies to the obstruction of federal proceedings – judicial, congressional, or executive. It consists of four somewhat overlapping crimes: use of force or the threat of the use of force to prevent the production of evidence (18 U.S.C. 1512(a)); use of deception or corruption or intimidation to prevent the production of evidence (18 U.S.C. 1512(b)); destruction or concealment of evidence or attempts to do so (18 U.S.C. 1512(c)); and witness harassment to prevent the production of evidence (18 U.S.C. 1512(d)).

Obstruction by Violence (18 U.S.C. 1512(a))

Subsection 1512(a) has slightly different elements depending upon whether the offense involves a killing or attempted killing – 18 U.S.C. 1512(a)(1) or some other use of physical force or a threat – 18 U.S.C. 1512(a)(2). In essence, it condemns the use of violence to prevent a witness from testifying or producing evidence for an investigation and sets its penalties according to whether the obstructive violence was a homicide, an assault or a threat.

Auxiliary Offenses and Liability

Subsection 1512(k) makes conspiracy to violate Section 1512 a separate offense subject to the same penalties as the underlying offense. The section serves as an alternative to a prosecution under 18 U.S.C. 371 that outlaws conspiracy to violate any federal criminal statute. Section 371 is punishable by imprisonment for not more than 5 years and conviction requires the government to prove the commission of an overt act in furtherance of the scheme by one of the conspirators. Subsection 1512(k) has no specific overt act element, and the courts have generally declined to imply one under such circumstances. Regardless of which section is invoked, conspirators are criminally liable under the Pinkerton doctrine for any crime committed in the foreseeable furtherance of the conspiracy.

Accomplices to a violation of subsection 1512(a) may incur criminal liability by operation of 18 U.S.C. 2, 3, 4, or 373 as well. Section 2 treats accomplices before the fact as principals, that is, it declares that those who command, procure or aid and abet in the commission of a federal crime by another, are to be sentenced as if they committed the offense themselves.[2129] As a general rule, in order to aid and abet another to commit a crime it is necessary that a defendant in some way associate himself with the venture, that he participate in it as in something he wishes to bring about, that he seek by his action to make it succeed. It is also necessary to prove that someone else committed the underlying offense. Section 3 outlaws acting as an accessory after the fact, which occurs when one knowing

---

[2129] 18 U.S.C. 2 ("(a) Whoever commits an offense against the United States or aids, abets, counsels, commands, induces or procures its commission, is punishable as a principal. (b) Whoever willfully causes an act to be done which if directly performed by him or another would be an offense against the United States, is punishable as a principal").

that an offense has been committed, receives, relieves, comforts or assists the offender in order to hinder his or her apprehension, trial, or punishment. Prosecution requires the commission of an underlying federal crime by someone else. Offenders face sentences set at one half of the sentence attached to the underlying offense, or if the underlying offense is punishable by life imprisonment or death, by imprisonment for not more than 15 years (and a fine of not more than $250,000). The elements of misprision of felony under 18 U.S.C. 4 are (1) the principal committed and completed the felony alleged; (2) the defendant had full knowledge of that fact; (3) the defendant failed to notify the authorities; and (4) defendant took steps to conceal the crime. The offense is punishable by imprisonment for not more than 3 years and/or a fine of not more than $250,000. Solicitation to commit an offense under subsection 1512(a), or any other crime of violence, is proscribed in 18 U.S.C. 373. To establish solicitation under §373, the Government must demonstrate that the defendant (1) had the intent for another to commit a crime of violence and (2) solicited, commanded, induced or otherwise endeavored to persuade such other person to commit the crime of violence under circumstances that strongly corroborate evidence of that intent. Section 373 provides an affirmative statutory defense for one who prevents the commission of the solicited offense.[2130] Offenders face penalties set at one half of the sanctions for the underlying offense, but imprisonment for not more than 20 years, if the solicited crime of violence is punishable by death or imprisonment for life. A subsection 1512(a) violation opens up the prospect of prosecution for other crimes for which a violation of subsection 1512(a) may serve as an element. The federal money laundering and racketeering statutes are perhaps the most prominent examples of these. The racketeering statutes (RICO) outlaw acquiring or conducting the affairs of an interstate enterprise through a pattern of predicate offenses. Section 1512 offenses are RICO predicate offenses. RICO violations are punishable by imprisonment for not more that 20 years (or imprisonment for life if the predicate offense carries such a penalty), a fine of not more than $250,000 and the confiscation of related property. The money laundering provisions, among other things, prohibit financial transactions involving the proceeds of a predicate offense. RICO predicate offenses are by definition money laundering predicate offenses. Money laundering is punishable by imprisonment for not more than 20 years, a fine, and the confiscation of related property.

[2130] 18 U.S.C. 373(b), (c)("(b) It is an affirmative defense to a prosecution under this section that, under circumstances manifesting a voluntary and complete renunciation of his criminal intent, the defendant prevented the commission of the crime solicited. A renunciation is not "voluntary and complete" if it is motivated in whole or in part by a decision to postpone the commission of the crime until another time or to substitute another victim or another but similar objective. If the defendant raises the affirmative defense at trial, the defendant has the burden of proving the defense by a preponderance of the evidence. (c) It is not a defense to a prosecution under this section that the person solicited could not be convicted of the crime because he lacked the state of mind required for its commission, because he was incompetent or irresponsible, or because he is immune from prosecution or is not subject to prosecution.").

Obstruction by Intimidation, Threats, Persuasion, or Deception (18 U.S.C. 1512(b)

The second group of offenses within Section 1512 outlaws obstruction of federal Congressional, judicial, or administrative activities by intimidation, threat, corrupt persuasion or deception. In more general terms, subsection 1512(b) bans (1) knowingly, (2) using one of the prohibited forms of persuasion (intimidation, threat, misleading or corrupt persuasion), (3) with the intent to prevent a witness's testimony or physical evidence from being truthfully presented at official federal proceedings or with the intent to prevent a witness from cooperating with authorities in a matter relating to a federal offense. It also bans any attempt to so intimidate, threaten, or corruptly persuade. The conspiracy, accomplice, RICO and money laundering attributes are equally applicable to subsection 1512(b) offenses.

Obstruction by Destruction of Evidence or Harassment (18 U.S.C. 1512(c), 1512(d))

Subsection 1512(c) proscribes obstruction of official proceedings by destruction of evidence and is punishable by imprisonment for not more than 20 years. Subsection 1512(d) outlaws harassing federal witnesses and is a misdemeanor punishable by imprisonment for not more than one year. Both enjoy the conspiracy, accomplice, RICO and money laundering attributes that to apply to all Section 1512 offenses.

Obstructing Federal Courts (18 U.S.C. 1503): The Omnibus Provision

Unlike Section 1512, Section 1503 does not to apply to the obstruction of Congressional or administrative proceedings. It condemns obstructing pending judicial proceedings. For conviction, the government must prove beyond a reasonable doubt: (1) that there was a pending judicial proceeding, (2) that the defendant knew this proceeding was pending, and (3) that the defendant then corruptly endeavored to influence, obstruct, or impede the due administration of justice. Offenders are punished according to the nature of obstruction: murder and manslaughter are punished as those crimes are punished when committed in violation of sections 1111 and 1112; attempted murder, attempted manslaughter, or any violation involving a juror called to hear a case relating to a class A or B felony is punishable by imprisonment for not more than 20 years; and all other offenses by imprisonment for not more than 10 years. Conspiracy to violate Section 1503 can only be prosecuted under the general conspiracy statute. Section 1503 offenses are RICO predicate offenses and consequently money laundering predicate offenses. Those who aid and abet a Section 1503 offense are liable as principals and are punishable as if they committed the offense themselves. An individual who knows that another has committed a Section 1503 offense and nevertheless assists the offender in order to hinder his capture, trial or punishment is in turn punishable as an accessory after the fact. And an

individual who affirmatively conceals the commission of a Section 1503 by another is guilty of misprision.

Retaliating Against Federal Witnesses (18 U.S.C. 1513)

Section 1513 prohibits witness or informant retaliation in the form of killing, attempting to kill, inflicting or threatening to inflict bodily injury, damaging or threatening to damage property, and conspiracies to do so. It also prohibits economic retaliation against federal witnesses, but only witnesses in court proceedings and only on criminal cases. Its penalty structure is comparable to that of Section 1503. Section 1513 offenses are RICO predicate offenses and money laundering predicate offenses, and the provisions for conspirators and accomplices apply as well.

Obstructing Congressional or Administrative Proceedings (18 U.S.C. 1505)

Section 1505 outlaws obstructing Congressional or federal administrative proceedings, a crime punishable by imprisonment not more than 5 years (not more than 8 years if the offense involves domestic or international terrorism). The crime has three essential elements. First, there must be a proceeding pending before a department or agency of the United States. Second, the defendant must be aware of the pending proceeding. Third, the defendant must have intentionally endeavored corruptly to influence, obstruct or impede the pending proceeding. Section 1505 offenses are not RICO or money laundering predicate offenses. Conspiracy to obstruct administrative or Congressional proceedings may be prosecuted under 18 U.S.C. 371, and the general aiding and abetting, accessory after the fact, and misprision statutes are likely to apply with equal force in the case of obstruction of an administrative or Congressional proceeding.

Conspiracy to Obstruct to Defraud (18 U.S.C. 371)

Section 371 contains both a general conspiracy prohibition and a specific obstruction conspiracy prohibition in the form of a conspiracy to defraud proscription. The elements of conspiracy to defraud the United States are: (1) an agreement of two more individuals; (2) to defraud the United States; and (3) an overt act by one of the conspirators in furtherance of the scheme. The fraud covered by the statute reaches any conspiracy for the purpose of impairing, obstructing or defeating the lawful functions of any department of Government by deceit, craft or trickery, or at least by means that are dishonest. The scheme may be designed to deprive the United States of money or property, but it need not be so; a plot calculated to frustrate the functions of a governmental entity will suffice.

Criminal Contempt of Court

The final and oldest of the general obstruction provisions is contempt. Contemporary federal contempt derives from statute, rule and inherent or auxiliary authority. Criminal contempt comes in two forms, direct and indirect. Direct contempt involves misconduct in the presence of the court and is punished

to ensure the decorum of the court and the dignity of the bench. Indirect contempt consists of those obstructions committed outside the presence of the court. Direct contempt may be summarily punished; indirect contempt may not. A court may punish as criminal contempt disobedience or resistance to its lawful writ, process, order, rule, decree, or command. Criminal contempt may be punished by imprisonment or by a fine or both. The Sixth Amendment right to a jury trial limits the term of imprisonment which a court may summarily impose to a maximum of six months.

Contempt of Congress

Contempt of Congress is punishable by statute and under the inherent powers of Congress. Congress has not exercised its inherent contempt power for some time. The statutory contempt of Congress provision, 2 U.S.C. 192, outlaws the failure to obey a Congressional subpoena or the refusal to answer questioning at a Congressional hearing. The offense is punishable by imprisonment for not more than one year and a fine of up to $100,000.

Obstruction of Justice by Violence or Threat

Several other federal statutes outlaw use of threats or violence to obstruct federal government activities. One, 18 U.S.C. 115, prohibits acts of violence against judges, jurors, officials, former officials, and their families in order to impede or retaliate for the performance of their duties. It makes assault, kidnaping, murder, and attempts and conspiracies to commit such offenses in violation of the section subject to the penalties imposed for those crimes elsewhere in the Code. It makes threats to commit an assault punishable by imprisonment for not more than 6 years and threats to commit any of the other offenses under the section punishable by imprisonment for not more than 10 years. Another, 18 U.S.C. 1114, protects federal officers and employees as well as those assisting them, from murder, manslaughter, and attempted murder and manslaughter committed during or account of the performance of their duties. The section's coverage extends to government witnesses. Other provisions protect federal officers and employees from kidnaping and assault committed during or on account of the performance of their duties, but their coverage of those assisting them is less clear. Beyond these general prohibitions, federal law proscribes the murder, kidnaping, or assault of Members of Congress, Supreme Court Justices, or Cabinet Secretaries; and a number of statutes outlaw assaults on federal officers and employees responsible for the enforcement of particular federal statutes and programs.

Obstruction of Justice by Bribery: 18 U.S.C. 201

Section 201 outlaws offering or soliciting bribes or illegal gratuities in connection with judicial, congressional and administrative proceedings. Bribery is a quid pro quo offense. It condemns invitations and solicitations to corruption. The penalty structure for bribery is fairly distinctive: imprisonment for not more than 15 years; a fine of the greater of three times the amount of the bribe or $250,000;

and disqualification from holding any federal position of honor or trust thereafter.

Mail and Wire Fraud

The mail fraud and wire fraud statutes have been written and constructed with such sweep that they cover among other things, obstruction of government activities by corruption. They reach any scheme to obstruct the lawful functioning in the judicial, legislative or executive branch of government that involves (1) the deprivation of money, property or honest services, and (2) the use of the mail or wire communications as an integral part of scheme. Congress expanded the scope of the mail and wire fraud statutes with the passage of 18 U.S.C. 1346 which defines the "scheme to defraud" element in the fraud statutes to include a scheme "to deprive another of the intangible right of honest services." Some courts have said that honest services fraud in the public sector typically occurs in either of two situations: (1) bribery, where a public official was paid for a particular decision or action; or (2) failure to disclose a conflict of interest resulting in personal gain. Prosecutors may favor a mail or wire fraud charge over or in addition to bribery charge if for no the reason than that under both fraud sections offenders face imprisonment for not more than 20 years rather than the 15-year maximum found in Section 201.

Obstruction by Extortion Under Color of Official Right (18 U.S.C. 1951)

Extortion under color of official right occurs when a public official receives a payment to which he is not entitled, knowing it is being provided in exchange for the performance of an official act. Liability may be incurred by public officers and employees, those in the process of becoming public officers or employees, those who hold themselves out to be public officers or employees, their coconspirators, or those who aid and abet public officers or employees in extortion under color or official right. The payment need not have been solicited, nor need the official act for which it is exchanged have been committed. The prosecution must establish that the extortion obstructed, delayed, or affected interstate or foreign commerce, but the impact need not have actually occurred nor been even potentially severe. Violations are punishable by imprisonment for not more than 20 years.

Obstruction of Justice by Destruction of Evidence

Other than subsection 1512(c), there are three federal statutes which expressly outlaw the destruction of evidence in order to obstruct justice: 18 U.S.C. 1519 prohibits destruction of evidence in connection with federal investigation or bankruptcy proceedings, 18 U.S.C. 1520 prohibits destruction of corporate audit records, and 18 U.S.C. 2232(a) prohibits the destruction of property to prevent the government from searching or seizing it.

OBSTRUCTION OF JUSTICE BY DECEPTION

In addition to the obstruction of justice provisions of 18 U.S.C. 1503 and 1512, there are four other general statutes that outlaw obstructing the government's business by deception. Three involve perjury: 18 U.S.C. 1623 that outlaws false swearing before federal courts and grand juries; 18 U.S.C. 1621 the older and more general prohibition that proscribes false swearing in federal official matters (judicial, legislative, or administrative); and 18 U.S.C. 1622 that condemns subornation, that is, inducing another to commit perjury. The fourth, 18 U.S.C. 1001, proscribes material false statements concerning any matter within the jurisdiction of a federal executive branch agency, and to a somewhat more limited extent with the jurisdiction of the federal courts or a Congressional entity.

The State Secrets Privilege

Summary

The state secrets privilege is a judicially created evidentiary privilege that allows the government to resist court-ordered disclosure of information during litigation, if there is a reasonable danger that such disclosure would harm the national security of the United States. The Supreme Court first described the modern analytical framework of the state secrets privilege in the 1953 case of *United States v. Reynolds*. In its opinion, the Court laid out a two-step procedure to be used when evaluating a claim of privilege to protect state secrets. First, there must be a formal claim of privilege, lodged by the head of the department which has control over the matter, after actual personal consideration by that officer. Second, a court must independently determine whether the circumstances are appropriate for the claim of privilege, and yet do so without forcing a disclosure of the very thing the privilege is designed to protect. If the privilege is appropriately invoked, it is absolute and the disclosure of the underlying information cannot be compelled by the court.

The Classified Information Procedures Act (CIPA) provides pretrial procedures that permit a trial judge to rule on questions of admissibility involving classified information before introduction of the evidence in open court. The use of classified evidence may also implicate criminal defendants' rights to exculpatory information and witnesses' statements held by the prosecution, or their right to confront witnesses under the Sixth Amendment.

Congressional action may affect the operation or coverage of the state secrets privilege. In 2008, a federal district court held that the Foreign Intelligence Surveillance Act supplanted the state secrets privilege with respect to civil claims of unlawful electronic surveillance. In the 111th Congress, House and Senate versions of bills entitled "the State Secrets Protection Act," H.R. 984 and S. 417,

have been introduced to codify the privilege. The bills would additionally limit the privilege to cases where significant harm to national security was presented, require judicial review of the actual information claimed to be privileged, and require the Attorney General to report to Congress within 30 days of any invocation of the state secrets privilege.

Introduction

The state secrets privilege, derived from common law, is an evidentiary privilege that allows the government to resist court-ordered disclosure of information during litigation if there is a reasonable danger that such disclosure would harm the national security of the United States.[2131] In recent years, some have suggested that this privilege has been overused by the executive branch to prevent disclosure of its questionable conduct, particularly with respect to the "war on terror."[2132] Both the Bush and Obama administrations have asserted the state secrets privilege in suits brought by private litigants alleging unlawful electronic surveillance[2133] and extraordinary rendition.[2134]

This report is intended to provide an overview of the protections afforded by the state secrets privilege. Although it is primarily a construct of the judiciary,[2135] Congress has previously enacted and continues to consider legislation that may affect its operation. In 1980, Congress enacted the Classified Information Procedures Act to provide uniform procedures to be used in federal criminal

litigation involving classified information.[2136] In 2008, a federal district court held that portions of the Foreign Intelligence Surveillance Act (FISA) superseded the state secrets privilege, at least with respect to civil claims alleging unlawful electronic surveillance under FISA.[2137] In the 111th Congress, different versions of the State Secrets Protection Act have been introduced in both the House of Representatives[2138] and the Senate.[2139]

After reviewing the case law that defines the current state secrets privilege, this report will discuss both enacted and proposed legislation that may affect the scope or function of the state secrets privilege.

United States v. Reynolds: The Seminal Case

The Supreme Court first articulated the modern analytical framework of the state secrets privilege in 1953, when it decided *United States v. Reynolds*.[2140] That case involved multiple wrongful death claims brought by the widows of three civilians who died aboard a military aircraft that crashed while testing secret electronic equipment. The plaintiffs had sought discovery of the official post-incident report and survivors' statements that were in the possession of the Air Force. The Air Force opposed disclosure of those documents as the aircraft and its occupants were engaged in a "highly secret mission of the Air Force" at the time of the crash.[2141] The federal district court ordered the Air Force to produce the documents so that it could independently determine whether they contained privileged information. When the Air Force refused to provide the documents to the court, the district court ruled in favor of the plaintiffs on the issue of negligence; the court of appeals subsequently affirmed the district court's ruling.[2142]

The Supreme Court reversed. In its opinion, the Court laid out a two-step procedure to be used when evaluating a claim of privilege to protect state secrets. First, "there must be a formal claim of privilege, lodged by the head of the department which has control over the matter, after actual personal

consideration by that officer."[2143] Second, "the court itself must determine whether the circumstances are appropriate for the claim of privilege, and yet do so without forcing a disclosure of the very thing the privilege is designed to protect."[2144]

Asserting the Privilege

The first requirement identified by the Court, the assertion of the privilege, is a largely procedural hurdle to assure that the privilege is "not to be lightly invoked."[2145] Nevertheless this requirement is readily met through the written assertion of the privilege by the head of the department in control of the information in question. The lack of a formal assertion has been excused because strict adherence to the requirement would have had little or no benefit.[2146]

Evaluating the Validity of the Privilege

In contrast, "the latter requirement is the only one which presents real difficulty."[2147] For example, although the Supreme Court's holding in Reynolds recognized that it is the role of the judiciary to evaluate the validity of claims of privilege, the Court declined to require courts to automatically require inspection of the underlying information. As the Court noted in Reynolds, "too much judicial inquiry into the claim of privilege would force disclosure of the thing the privilege was meant to protect, while a complete abandonment of judicial control would lead to intolerable abuses."[2148] In light of this dilemma, the Court chose to chart a middle course, employing a "formula of compromise" to balance the competing

---

[2143] Id. at 8.

[2144] Id. With respect to the facts at hand, the Court noted that the Secretary of the Air Force had filed a formal assertion of the privilege, and that there was a reasonable danger "that the accident investigation report would contain references to the secret electronic equipment which was the primary concern of the mission." Id. at 10. Furthermore, it was "apparent that these electronic devices must be kept secret if their full military advantage is to be exploited in the national interests." Id. Thus, the Court upheld the government's assertion of the state secrets privilege and barred discovery of the requested documents by the plaintiffs.

[2145] Id. at 7.

[2146] But see Clift v. U.S., 597 F.2d 826, 828-9 (2d Cir. 1979) (preventing discovery of documents in a patent infringement suit brought by the inventor of a cryptographic device against the government where the Director of the NSA had submitted an affidavit stating that disclosing the contents of the documents would be a criminal violation, but had not formally asserted the state secrets privilege; the court reasoned that imposition of the formal requirement would have had little or no benefit in this circumstance).

[2147] Reynolds, 345 U.S. at 8.

[2148] Id.

interests of oversight by the judiciary and national security interests.[2149] Under this scheme, the privilege should be found valid when the court is satisfied that there is a reasonable danger that disclosure "will expose military matters which, in the interest of national security, should not be divulged."[2150] Once the court is satisfied that the privilege is valid, it should not further "jeopardize the security which the privilege is meant to protect by insisting upon an examination of the evidence, even by the judge alone, in chambers."[2151]

Whether a court can be satisfied without examining the underlying information may be affected by the amount of deference afforded to the government's representations regarding the information. In Reynolds, the Court noted that the necessity of the underlying information to the litigation will determine "how far the court should probe in satisfying itself that the occasion for invoking the privilege is appropriate."[2152] In the case of Reynolds, the Court noted that the Air Force had offered to make the surviving crew members available for examination by the plaintiffs.[2153] Because of this alternative avenue of information, the Court was satisfied that the privilege was valid based primarily upon representations made by the government regarding the contents of the documents.[2154] Conversely, less deference to the government's representations may be warranted where a private litigant has a strong need for the information.[2155]

The Effect of a Valid Privilege

If the privilege is appropriately invoked, it is absolute and the disclosure of the underlying information cannot be compelled by the court. Although a private litigant's need for the information may be relevant to the amount of deference afforded to the government, "even the most compelling necessity cannot overcome the claim of privilege if the court is ultimately satisfied" that the privilege is appropriate.[2156]

[2155] See, e.g., Molerio v. FBI, 749 F.2d 815, 822 (D.C. Cir. 1984) (in camera examination of classified information was appropriate where it was central to litigation); Al-Haramain Islamic Found., Inc. v. Bush, 507 F.3d at 1203-1204 ("We reviewed the Sealed Document in camera because of [plaintiff's] admittedly substantial need for the document to establish its case").

[2156] Id.

In some circumstances, the exclusion of the protected information can be fatal to the litigation. In *Halkin v. Helms*, the D.C. Circuit was confronted with a claim of privilege regarding the National Security Agency's alleged interception of international communications to and from persons who had been targeted by the Central Intelligence Agency.[2157] After deciding that the claim of privilege was valid, the D.C. Circuit affirmed the protection of that information from discovery.[2158] Although some non-privileged evidence that the plaintiffs were targeted by the Central Intelligence Agency (CIA) existed, the court dismissed the suit after deciding that without the privileged information, the plaintiffs would not be able to establish a prima facie case of unlawful electronic surveillance.

A similar result may occur if the state secrets privilege requires the exclusion of evidence central to a litigant's defense. In *Molerio v. Federal Bureau of Investigation*, a job seeker alleged that the Federal Bureau of Investigation (FBI) had disqualified him based upon his father's political ties to socialist organizations in violation of the applicant and his father's First Amendment rights.[2159] In response, the FBI asserted that it had a lawful reason to disqualify the plaintiff, but claimed that its reason was protected by the state secrets privilege. After reviewing the FBI's claim *in camera*, the D.C. Circuit agreed that the evidence of a nondiscriminatory reason was protected and that its exclusion would deprive the FBI of a valid defense. Therefore, the dismissal of that action was required once the privilege was determined to be valid.[2160]

Whether the assertion of the state secrets privilege is fatal to a particular suit, or merely excludes privileged evidence from further litigation, is a question that is highly dependent upon the specific facts of a case. Two recent cases from the Fourth and Ninth Circuits, dealing with the federal government's rendition practices,[2161] can be viewed as exemplifying the varied conclusions courts have reached in ostensibly similar cases. In *El-Masri v. United States*, the plaintiff brought a civil suit against various government officials and private transportation companies alleging that he had been unlawfully rendered to a

[2161] These suits involve controversies in which the United States allegedly rendered suspected terrorists to states known to practice torture. See CRS Report RL32890, Renditions: Constraints Imposed by Laws on Torture, by Michael John Garcia.

secret CIA detention site.[2162] Similarly, in *Mohamed v. Jeppesen Dataplan*, a subsidiary of the Boeing Company was sued for allegedly transporting the plaintiffs to countries that engaged in torture.[2163] In both cases, the government asserted the state secrets privilege and argued that the suits should be dismissed because the issues involved in the lawsuits could not be litigated without risking disclosure of privileged information.[2164] Both trial courts held that the privilege was properly invoked and dismissed both complaints at the pleadings stage. However, upon appeal the respective circuits reached markedly different conclusions.

In El-*Masri*, the Fourth Circuit agreed with the trial court and affirmed the dismissal of the case. According to the Fourth Circuit's opinion, any attempt to prove or disprove the allegations in the complaint would necessarily involve disclosing the internal organization and procedures of the CIA, as well as secret contracts with the transportation companies. Therefore, because "the very subject matter of [the] action is a state secret,"[2165] the court was required to dismiss the suit upon the successful invocation of the privilege by the government.[2166]

In contrast, the Ninth Circuit held that the state secrets privilege only excluded privileged evidence from discovery or admission at trial, and did not require the dismissal of the complaint at the pleadings stage.[2167] While the exclusion of privileged evidence from discovery might ultimately be fatal to the litigation, because it prevents the plaintiffs from establishing a prima facie case or denies the defendant a valid defense, the Jeppesen court held that dismissal of a suit on the pleadings because of the "very subject matter" of the privileged information is

[2167] Mohamed, 2009 U.S. App. LEXIS 8978, at 27-28. The court also held that the Totten rule, which requires the immediate dismissal of suits involving espionage contracts and is discussed in the next section, was not applicable here. See infra notes 39-44 and accompanying text.

not warranted,[2168] except in the special case of contracts for espionage discussed below.

Totten v. United States: The Special Case of Nonjusticiable Contracts for Espionage

Although courts may reach different results when considering the effect of an assertion of the state secrets privilege, there is one category of cases involving state secrets that courts have generally held to be nonjusticiable: specifically, cases brought against the federal government to enforce contracts for espionage.

This rule was first enunciated in Totten v. United States, in which the Supreme Court dismissed a breach of contract claim brought against the government by the estate of a former Civil War spy for the Union.[2169] The Court dismissed the claim noting that "public policy forbids the maintenance of any suit in a court of justice, the trial of which would inevitably lead to the disclosure of matters which the law itself regards as confidential."[2170]

In *Tenet v. Doe*, the Supreme Court reaffirmed the central holding of Totten, which stated that controversies over espionage contracts are not justiciable.[2171] Prior to that decision, the relevance of the *Totten* rule in light of the Court's intervening decision in *Reynolds* was unclear. For example, in the lower court proceedings leading up to the Supreme Court's opinion in *Tenet*, the Ninth Circuit had held that the immediate dismissal doctrine required in *Totten* was, in modern times, only appropriate once the state secrets privilege had been properly asserted and evaluated pursuant to *Reynolds* and its progeny.[2172]

Ultimately in *Tenet*, the Supreme Court held that the *Totten* rule had not been "reduced to an example of the state secrets privilege," and that "the state secrets privilege and the more frequent use of in camera judicial proceedings simply cannot provide the absolute protection we found necessary in enunciating the *Totten* rule."[2173] Therefore disputes over contracts for espionage appear to remain

a special category of cases which the courts have no jurisdiction over, even without any invocation of the state secrets privilege by the government.[2174]

The Classified Information Procedures Act and Secret Evidence in Criminal Litigation

Although the cases discussed thus far have dealt only with civil litigation, the government enjoys a similar privilege with respect to the use of classified information in criminal litigation. In practice, this privilege operates differently in the criminal context as the government is simultaneously responsible for prosecution and the protection of national security. Therefore, when classified information is part of the prosecution's case-in-chief, the government may resolve these competing interests before any judicial proceedings are necessary.

However, once criminal proceedings have been instigated, the Sixth Amendment provides a criminal defendant with the right to have a public trial, to be confronted with the witnesses against him, and to present relevant evidence in his defense.[2175] In some prosecutions, particularly those conducted as part of the "global war on terror," the defendant's presentation of evidence in a public trial could also present risks to the national security of the United States. Additionally, in situations known colloquially as "graymail," the defendant may be seeking to introduce tangentially related classified information solely to force the prosecution to dismiss the charges against him.[2176]

This dilemma was one factor leading to Congress's enactment of the Classified Information Procedures Act (CIPA),[2177] which "provides pretrial procedures that will permit the trial judge to rule on questions of admissibility involving classified information before introduction of the evidence in open court."[2178] These procedures, which are summarized in **Appendix A**, are intended to provide a means for the court to distinguish instances of graymail from cases in which classified information is actually material to the defense.

Importantly, the text of CIPA contains no standards for a court to apply to evaluate whether a claim of privilege is valid. As the Second Circuit has noted, CIPA "presupposes a governmental privilege against disclosing classified

---

[2174] Id. at 11 ("requiring the Government to invoke the privilege on a case-by-case basis risks the perception that it is either confirming or denying relationships with individual plaintiffs").

[2175] U.S. CONST. amend. VI.

[2176] See S.REPT. 96-823 at 1-4 (part of the legislative history of CIPA).

[2177] P.L. 96-456, codified at 18 U.S.C. app. 3 § 1-16.

[2178] S.REPT. 96-823, at 1.

information" in criminal matters.[2179] Other courts have agreed that CIPA does not create any new privilege against the disclosure of classified information,[2180] but merely establishes uniform procedures to determine the materiality of classified information to the defense in a criminal proceeding.[2181] Under CIPA, if the government objects to disclosure of classified information that is material to the defense, the court is required to accept that assertion without scrutiny, and impose nondisclosure orders upon the defendant.[2182] However, in such cases the court is also empowered to dismiss the indictment against the defendant, or impose other sanctions that are appropriate.[2183] Therefore, once classified information has been determined through the procedures under CIPA to be material, it falls to the government to elect between permitting the disclosure of that information or the sanctions the court may impose.

Prosecutions implicating classified information can be factually varied, but an important distinction that may be made among them is from whom information is being kept. In cases where the defendant is already privy to some classified information, the government may be seeking to prevent disclosure to the general public. However, in the case of terrorism prosecutions, the more typical situation is likely to be the introduction of classified information as part of the prosecution's case against the defendant. In these cases, protective orders preventing disclosure to the defendant, as well as to the public, may be sought by the government. Constitutional issues related to withholding classified information from a criminal defendant arise during two distinct phases of criminal litigation. First, issues may arise during the discovery phase when the defendant requests and is entitled to classified information in the possession of the prosecution. Secondly, issues may arise during the trial phase, when classified information is sought to be presented to the trier-of-fact as evidence of the defendant's guilt. The issues implicated during both of these phases are discussed below.

[2179] U.S. v. Aref, 533 F.3d 72, 78-79 (2nd Cir. 2008) (holding that the state secrets privilege may be asserted in criminal prosecutions, subject to the procedures in CIPA, if the information is not relevant and helpful to the defense).

[2180] U.S. v. Meija, 448 F.3d 436, 455 (D.C. Cir. 2006). See also U.S. v. Yunis, 867 F.2d 617, 621 (D.C. Cir. 1989).

[2181] The legislative history of CIPA states that "it is well-settled that the common law state secrets privilege is not applicable in the criminal arena." H.REPT. 96-831 pt. 1, at n.12. But, see U.S. v. Aref, 533 F.3d 72 at 79 (observing that this statement in the legislative history "sweeps too broadly").

[2182] 18 U.S.C. app. 3, § 6(e)(1).

[2183] 18 U.S.C. app. 3, § 6(e)(2).

Withholding Classified Information During Discovery

The mechanics of discovery in federal criminal litigation are governed primarily by the Federal Rules of Criminal Procedure (FED. R. CRIM. P.). These rules provide the means by which defendants may request information and evidence in the possession of the prosecution, in many cases prior to trial. There are two important classes of information that the prosecution must provide, if requested by the defendant: specifically *Brady* material and Jencks material.

Brady material, named after the seminal Supreme Court case *Brady v. Maryland*,[2184] refers to information in the prosecution's possession which is exculpatory, or tends to prove the innocence of the defendant. For example, statements by witnesses that contradict or are inconsistent with the prosecution's theory of the case must be provided to the defense, even if the prosecution does not intend to call those witnesses. Prosecutors are considered to have possession of information that is in the control of agencies that are "closely aligned with the prosecution,"[2185] but, whether information held exclusively by elements of the intelligence community could fall within this category does not appear to have been addressed.[2186]

Jencks material refers to written statements made by a prosecution witness who has testified or may testify. For example, this would include a report made by a witness called to testify against the defendant. In the Supreme Court's opinion in *Jencks v. United States*,[2187] the Court noted the high impeachment value a witness's prior statements can have, both to show inconsistency or incompleteness of the in-court testimony. Subsequently, this requirement was codified by the Jencks Act.[2188]

The operation of *Jencks* and *Brady* may differ significantly in the context of classified information. Under § 4 of CIPA, which deals with disclosure of

---

[2184] Brady v. Maryland, 373 U.S. 83 (1963) (holding that due process requires prosecution to turn over exculpatory evidence in its possession).

[2185] United States v. Brooks, 966 F.2d 1500, 1503 (1992).

[2186] But, see United States v. Libby, 429 F. Supp. 2d 1 (D.D.C. 2006) (in a prosecution involving the unauthorized disclosure of classified information, the CIA was closely aligned with special prosecutor for purposes of Brady based on the free flow of other documents between the CIA and the prosecutor).

[2187] Jencks v. U.S., 353 U.S. 657 (1957) (holding that, in a criminal prosecution, the government may not withhold documents relied upon by government witnesses, even where disclosure of those documents might damage national security interests).

[2188] Codified at 18 U.S.C. § 3500. The Jencks Act provides definitions for so-called "Jencks material" and requires disclosure of such material to the defense, but only after the witness has testified.

discoverable classified information, the prosecution may request to submit either a redacted version or a substitute of the classified information in order to prevent harm to national security.[2189] While the court may reject the redacted version or substitute as an insufficient proxy for the original, this decision is made ex parte without the defendant's input. Classified information that is also *Jencks* or *Brady* material is still subject to CIPA and may be provided in a redacted or substituted form.[2190]

In some cases, the issue may not be the disclosure of a document or statement, but whether to grant the defendant pre-trial access to government witnesses. In *United States v. Moussaoui*, one issue was the ability of the defendant to depose "enemy combatant" witnesses who were, at the time the deposition was ordered, considered intelligence assets by the United States.[2191] Under the FED. R. CRIM. P., a defendant may request a deposition in order to preserve testimony at trial.[2192] In *Moussaoui*, the court had determined that a deposition of the witnesses by the defendant was warranted because the witnesses had information that could have been exculpatory or could have disqualified the defendant for the death penalty.[2193] However, the government refused to produce the deponents citing national security concerns.[2194]

In light of this refusal, the Fourth Circuit, noting the conflict between the government's duty to comply with the court's discovery orders and the need to protect national security, considered whether the defendant could be provided with an adequate substitute for the depositions. The court also noted that substitutes would necessarily be different from depositions, and that these

[2189] 18 U.S.C. app. 3, § 4.

[2190] See United States v. O'Hara, 301 F.3d 563, 569 (7th Cir. 2002) (holding that in camera examination and redaction of purported Brady material by trial court was proper).

[2191] United States v. Moussaoui, 382 F.3d 453 (4th Cir. 2004). Moussaoui was prosecuted for his involvement in the conspiracy to commit the terrorist attacks of September 11, 2001. While the U.S. Court of Appeals for the Fourth Circuit held that CIPA did not apply to question of whether Moussaoui and his standby counsel would be allowed to depose to enemy combatant witnesses, United States v. Moussaoui, 333 F.3d 509, 514-15 (4th Cir. 2003), both the district court and the Fourth Circuit looked to CIPA for guidance when considering the question, see Moussaoui, supra, 382 F.3d at 471 n. 20 and accompanying text. Further litigation of these issues was rendered moot when Zacarias Moussaoui subsequently entered a guilty plea.

[2192] FED. R. CRIM. P. 15(a). The court should permit the deposition if there are exceptional circumstances and it is in the interest of justice.

[2193] Moussaoui, 382 F.3d at 458, 473-475.

[2194] Id. at 459.

differences should not automatically render the substitutes inadequate.[2195] Instead, the appropriate standard was whether the substitutes put the defendant in substantially the same position he would have been absent the government's national security concerns.[2196] Here, the Fourth Circuit seemed to indicate that government-produced summaries of the witnesses' statements, with some procedural modifications, could be adequate substitutes for depositions.[2197]

The Confrontation Clause and the Use of Secret Evidence At Trial

The use of secret evidence at trial also implicates constitutional concerns. As described above, there may be instances where disclosure of classified information to the defendant would be damaging to the national security. In these instances, the prosecution may seek to present evidence at trial in a manner that does not result in disclosure to the defendant. One proposed scenario might be the physical exclusion of the defendant from those portions of the trial, while allowing the defendant's counsel to remain present.[2198] However, such proceedings could be viewed as unconstitutionally infringing upon the defendant's Sixth Amendment right to confrontation.[2199]

Historically, defendants have had the right to be present during the presentation of evidence against them, and to participate in their defense.[2200] But other courts have approved of procedures which do not go so far as to require the defendant's physical presence. In *United States v. Abu Ali*, the Fourth Circuit permitted video conferences to allow the defendant to observe, and be observed by, witnesses who were being deposed in Riyadh, Saudi Arabia.[2201] The Fourth Circuit stated that

---

[2195] Id. at 477.

[2196] Id.

[2197] Id. at 479-483. The precise form of the deposition substitutes is unclear as significant portions of the Fourth Circuit's opinion dealing with the substitute were redacted.

[2198] See Hamdan v. Rumsfeld, 344 F. Supp. 2d 152, 168 (D.D.C. 2004) (describing potential procedures under military commissions established by Presidential order).

[2199] See Hamdan v. Rumsfeld, 548 U.S. 557, 634 (2006) (Stevens, J., plurality opinion) (stating that "an accused must, absent disruptive conduct or consent, be present for his trial and must be privy to the evidence against him").

[2200] See, e.g., id.; Crawford, 541 U.S. at 49, 124 S.Ct. 1354, 158 L.Ed.2d 177 (2004) ("It is a rule of the common law, founded on natural justice, that no man shall be prejudiced by evidence which he had not the liberty to cross examine") (internal citations omitted).

[2201] United States v. Abu Ali, 528 F.3d 210, 239-240 (4th Cir. 2008)(quoting Maryland v. Craig, 497 U.S. 836, 850 (1990)). In this case the defendant, while located in the Federal courthouse in Alexandria, Va., was able to communicate with his counsel in Riyadh via telephone during breaks in the deposition or upon the request of defense counsel.

these procedures satisfied the Confrontation Clause if "the denial of 'face-to-face confrontation' [was] 'necessary to further an important public policy,'" and sufficient procedural protections were in place to assure the reliability of the testimony.[2202] Here, the Fourth Circuit cited the protection of national security as satisfying the "important public policy" requirement. The cited procedural safeguards were the ability of the defendant and witness to mutually observe the other, the fact that testimony was given under oath in the Saudi criminal justice system, and the ability of defense counsel to cross examine the witnesses.[2203]

Arguments alleging that protective orders violate the Confrontation Clause because they do not allow the participation of the defendant may also be undercut in the classified information context because, in some cases, the excluded defendant is not believed to have knowledge of the information being presented.[2204] Therefore, his ability to provide his counsel with rebuttal information for cross examination purposes may be reduced. CIPA does not have any provisions which authorize the exclusion of defendants from any portion of trial based upon national security considerations. But, CIPA § 3 may authorize courts to issue protective orders preventing disclosure of classified information to the defendant by defense counsel.[2205]

Legislative Modification of the State Secrets Privilege

While CIPA may not appear to impose any limitations on the scope of the government's privilege against disclosing classified information, other pieces of legislation may affect the operation or coverage of the privilege. In 2008, a federal district court held that FISA supplanted the state secrets privilege with respect to civil claims of unlawful electronic surveillance. Two versions of the State Secrets Protection Act have also been introduced in the 111th Congress to codify and change aspects of the privilege in civil litigation. Each of these is discussed below.[2206]

[2202] Id. at 241-242 (citing Maryland v. Craig, 497 U.S. 836 (1990), in which one-way video testimony procedures were used in a prosecution for alleged child abuse).

[2203] Id. See, also, United States v. Bell, 464 F.2d 667 (2nd Cir. 1972) (holding that exclusion of the public and the defendant from proceedings in which testimony regarding a "hijacker profile" was presented was consistent with the Confrontation Clause).

[2204] Arguably, if the defendant is already aware of the information, the need to prevent disclosure to him is lessened.

[2205] See Brian Z. Tamanaha, A Critical Review of The Classified Information Procedures Act, 13 AM. J. CRIM. L. 277, 290, n.64, n.65 (1986).

[2206] Proposals like those in the Whistleblower Protection Enhancement Act, H.R. 1507 in the 111th Congress, that address the state secrets privilege in a more limited context are beyond the scope of this report.

The Foreign Intelligence Surveillance Act

FISA provides a statutory framework for government agencies to seek an order from the specialized Foreign Intelligence Surveillance Court (FISC) that authorizes the collection of foreign intelligence information via electronic surveillance[2207] or physical searches.[2208] FISA also provides procedures governing the use of pen registers and trap and trace devices,[2209] and access to certain business records for foreign intelligence collection.[2210]

FISA also provides a civil remedy for an "aggrieved person … who has been subjected to an electronic surveillance or about whom information obtained by electronic surveillance of such person has been disclosed or used" in violation of federal law.[2211] When evaluating the legality of a FISA order, the statute states that the court

> *shall, notwithstanding any other law, if the Attorney General files an affidavit under oath that disclosure or an adversary hearing would harm the national security of the United States, review in camera and ex parte the application, order, and such other materials relating to the surveillance as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the court may disclose to the aggrieved person, under appropriate security procedures and protective orders, portions of the application, order, or other materials relating to the surveillance only where such disclosure is necessary to make an accurate determination of the legality of the surveillance.*[2212]

The interaction between FISA and the state secrets privilege has been a central issue in some litigation regarding the Terrorist Surveillance Program instituted by the Bush Administration shortly after the terrorist attacks of September 11, 2001. In *In re National Security Agency Telecommunications Records Litigation*, plaintiffs sued federal officials for allegedly conducting unlawful

[2212] 50 U.S.C. § 1806(f).

electronic surveillance of the plaintiffs.[2213] The plaintiffs sought discovery of records of the alleged electronic surveillance, portions of which had already been inadvertently disclosed to the plaintiffs by the government.[2214] The government attempted to prevent disclosure of these records by asserting the state secrets privilege and the Ninth Circuit, reviewing an interlocutory appeal, held that the records were initially protected by the state secrets privilege.[2215] However the Ninth Circuit remanded the case to the district court to address whether FISA superseded the state secrets privilege.[2216]

On remand, the Federal District Court for the Northern District of California held that the FISA procedures, which the court read as requiring judicial examination of the actual underlying information, superseded the judicially created state secrets privilege as it is described in *Reynolds*,[2217] but only if the plaintiffs could demonstrate that they had standing as "aggrieved persons" under FISA.[2218] In January of 2009, the court found that the plaintiffs had successfully met this burden using information that was not protected by the state secrets privilege.[2219]

The State Secrets Protection Act

H.R. 984 and S. 417, both entitled the State Secrets Protection Act, were introduced in the 111th Congress to codify the procedures and standards to be used in civil cases to evaluate a claim of the state secrets privilege by the government. Neither bill would address the operation of the state secrets privilege or CIPA in the context of criminal litigation. This section provides a general overview of the major changes proposed in each bill; a description of the individual provisions of each bill may be found in **Appendix B** and **Appendix C**, respectively.

Both bills would authorize the use of security measures provided under CIPA and provide all parties with a right of interlocutory appeal on any issue relating to the state secrets privilege. H.R. 984 would also impose a duty upon the Attorney General to report on cases in which the government had asserted the state secrets privilege to the congressional Intelligence Committees and the chairs and ranking

members of the House and Senate Judiciary Committees. S. 417 would impose a similar duty, but would require reporting to the full membership of both committees and would also permit members of the respective committees to request access to the privileged information.

It would not be overstatement to say that both bills would impose more stringent judicial oversight of assertions of the state secrets privilege. Both bills would codify the common law requirement that the head of an agency formally assert the privilege after actual consideration by that officer, but would additionally require that official to provide an affidavit explaining the factual basis of the claim. The government would also be required to provide a public and unclassified version of this affidavit.

Both bills would also require a showing of "significant harm" before the privilege may apply.[2220] In contrast, courts applying Reynolds have generally not required that the harm to national security be "significant" in magnitude.[2221] Therefore, it is possible that both bills would require a higher threshold of harm to be demonstrated before the protection of the privilege could apply. It is also possible that some classified information would not be protected under either bill.[2222]

In a significant departure from the common law doctrine, both bills would require courts to examine the actual information for which the privilege is asserted to evaluate whether the claim of privilege is valid. This is in contrast to the procedures described under Reynolds, which do not automatically require courts to examine the underlying information in every case.

[2220] H.R. 984 limits the privilege to situations in which "public disclosure of the information ... would be reasonably likely to cause significant harm to the national defense or the diplomatic relations of the United States." Similarly, S. 417 defines a state secret as "any information that, if disclosed publicly, would be reasonably likely to cause significant harm to the national defense or foreign relations of the United States."

[2221] See Reynolds, 345 U.S. at 8 (requiring a risk of "injurious disclosure"); Ellsberg v. Mitchell, 709 F.2d 51, 59 (D.C. Cir. 1983) (upholding the privilege where "disclosure of the material would damage national security"); Molerio v. FBI, 749 F.2d 815, 822 (D.C. Cir. 1984) (upholding state secrets where disclosure of the secret "would impair national security"); Al-Haramain Islamic Foundation, Inc. v. Bush, 507 F..3d 1190, 1204 (9th Cir. 2007) (upholding privilege where disclosure "would undermine the government's intelligence capabilities and compromise national security"); Kasza v. Browner, 133 F.3d 1159, 1170 (9th Cir. 1998) (upholding privilege because "release of such information would reasonably endanger national security interests").

[2222] Pursuant to executive order, classified information falls into three levels: top secret, secret, and confidential. Confidential information, the lowest level, includes information that "could be expected to cause damage to the national security" if disclosed. Information may be classified as secret if there is a danger of "serious damage to the national security" of the United States. Information is top secret if exceptionally grave danger could occur. Exec. Order No. 12958, § 1.2(a) (as amended by Exec. Order No. 13292 (2003)).

Both bills would also authorize the court to order the government to provide alternative non-privileged substitutes for information that is found to be protected by the privilege in order to provide a private litigant with substantially the same opportunity to litigate the underlying issue of law or fact. A refusal by the government to provide a substitute could result in court imposed sanctions against the government.

Both bills appear intended to provide an alternative to the common law privileges described in both Reynolds and Totten. Although it has been argued that "any effort by Congress to regulate an exercise of the Executive's authority to protect national security through the state secrets privilege would plainly raise serious constitutional concerns,"[2223] at least one federal district court has recognized Congress's authority to enact legislation superseding the state secrets privilege.[2224]

S. 417, if enacted, would apply to all pending and future cases. H.R. 984 would similarly apply prospectively and would also have limited retroactive effect. Specifically, it would authorize federal courts to entertain timely motions to vacate final judgments that were based on the common law state secrets privilege and were entered after January 1, 2002, and involved claims against the federal government, or a government official in his official capacity.

This retroactivity provision may raise constitutional concerns. In *Plaut v. Spendthrift Farm*, the Supreme Court invalidated a legislative enactment that required federal courts to reopen final decisions as a violation of the separation of powers principle.[2225] It might be argued that the retroactivity provision in H.R. 984 also reopens final judgments in violation of the separation of powers principle. While a full analysis of this issue is beyond the scope of this report, it should be noted that the retroactivity provision of H.R. 984 may be distinguishable from the facts in *Plaut* for at least two reasons. First, unlike the statute in *Plaut*, H.R. 984 would not appear to compel courts to reopen such cases.[2226] Secondly, the Court found it important that *Plaut* reopened claims

---

[2223] Memorandum of Points and Authorities in Support of Defendants' Second Motion to Dismiss, Al-Haramain Islamic Foundation v. Bush, No. M:06-CV-1791 at 14 (Mar. 14, 2008) (arguing that the in camera procedures of FISA should not be read to supersede the state secrets privilege). See also Reynolds, 345 U.S. at n.9 (suggesting that the state secrets privilege is "an inherent executive power which is protected in the constitutional system of separation of power").

[2224] In re NSA Telecomms Records Litig., 564 F. Supp. 2d at 1119-20 (holding that FISA contains a clear expression of Congress's intent to abrogate the state secrets privilege).

[2225] Plaut v. Spendthrift Farm, 514 U.S. 211, 240 (1995) (invalidating statute that reopened final judgments in private civil actions under § 10(b) of the Securities Exchange Act of 1934).

[2226] H.R. 984, § 11 ("A court also may relieve a party ... from a final judgment, order, or proceeding") (emphasis added).

against private parties, while the retroactivity provisions in H.R. 984 would only be applicable to claims brought against the federal government.[2227]

Appendix A. Section-by-Section Summary of the Classified Information Procedures Act, 18 U.S.C. App. 3

Sec. 1. Provides definitions for both "classified information" and "national security" to be used in this act. Classified information means any information determined by the government pursuant to executive order, statute, or regulation to require protection for reasons of national security, and all data concerning (1) the design, manufacture, or utilization of atomic weapons; (2) the production of special nuclear material; or (3) the use of special nuclear material in the production of energy. National security means the national defense and foreign relations of the United States.

Sec. 2. Permits any party to request a pretrial conference to establish a schedule for discovery requests; the provision of notice if the defendant intends to disclose classified information; a hearing to determine the relevance, admissibility, and materiality of classified information; or any other matter which relates to classified information. No admission made by the defendant or his counsel at this pretrial conference may be used against the defendant unless it is made in writing and signed by the defendant and his counsel.

Sec. 3. Authorizes the court to issue protective orders prohibiting the further disclosure of any classified information disclosed to the defendant during the course of any federal criminal litigation.

Sec. 4. Authorizes the court to permit the government to redact classified information from discovery provided to the defendant. Alternatively the court may permit the government to summarize the classified information, or to admit relevant facts in lieu of providing discovery. The court may permit such procedures if the government submits a written statement explaining why the defendant is not entitled to the redacted information. The statement may be viewed by the court ex parte and in camera. If the government's request is granted, the written statement shall be preserved in the record, under seal, for appellate review.

Sec. 5. Imposes a continuing obligation on criminal defendants to notify, in writing and in a timely fashion, both the U.S. attorney and the court of their intent to disclose or cause the disclosure of classified information, along with a brief description of that information. The defendant may not disclose classified

---

[2227] See Id. at 230-1 (quoting U.S. v. Sioux Nation, 448 U.S. 371, 407) ("Congress' mere waiver of the res judicata effect of a prior judicial decision rejecting the validity of a legal claim against the United States does not violate the doctrine of separation of powers") (emphasis added).

information during litigation until notice has been provided, a hearing under this act has been held, and any interlocutory appeal has been heard.

Sec. 6. The government may request a hearing to determine the use, relevance, or admissibility of any classified information to be used at trial. This hearing may be conducted in camera if the Attorney General certifies that a public proceeding might result in disclosure of classified information. Before the hearing, the government may be required to give the defendant notice of what classified information is at issue and its relevancy to the charges against the defendant. If the court authorizes the disclosure of classified information, the government may request that a substitute for the information be used instead. After a hearing on the substitute, the court shall permit the substitute if it would give the defendant substantially the same ability to make his defense. This hearing may be held in camera at the request of the Attorney General, who may also submit an ex parte affidavit explaining the government's position. Disclosure of classified information may be prohibited if the Attorney General files an affidavit with the court objecting to disclosure. If the Attorney General files such an objection, the court may dismiss the indictment, find against the government on any pertinent issue, strike testimony, or take any other action as may be appropriate in the interests of justice.

Sec. 7. The government may take an interlocutory appeal from any order authorizing the disclosure of classified information, imposing sanctions for nondisclosure by the government, or refusing a protective order sought by the government. Appeals shall be expedited.

Sec. 8. Any material containing classified information may be admitted without changing the classification status of the information. The court may limit which parts of any material are admitted in order to prevent unnecessary disclosure of classified information, unless such limitations would be unfair. The government may object during any examination of a witness if classified information that has not yet been found admissible is likely to be elicited. The court will take whatever action is necessary to determine whether the response is admissible.

Sec. 9. Directs the Chief Justice of the United States, in consultation with the Attorney General, the Director of National Intelligence, and the Secretary of Defense, to establish procedures to protect classified information in the custody of federal courts.

Sec. 9A. Directs Department of Justice officials to provide briefings to senior officials of any other agency with respect to cases involving classified information that originated in that agency.

Sec. 10. In prosecutions where the government must prove that some material relates to the national security of the United States, such as prosecutions for espionage, the prosecution is required to notify the defendant of the portions of the material it will rely upon.

Sec. 11. Permits §§ 1-10 of this act to be amended pursuant to 28 U.S.C. § 2076. That provision described procedures to amend the Federal Rules of Evidence, but has since been repealed. Similar procedures for amending the Federal Rules of Evidence may now be found at 28 U.S.C. § 2072. It is not clear what effect the repeal of 28 U.S.C. § 2076 has had on this provision of CIPA.

Sec. 12. Directs the Attorney General to issue guidelines specifying the factors that should be used by the Department of Justice in determining whether to prosecute cases in which there is a risk of disclosing classified information. When a decision not to prosecute is made pursuant to these guidelines, an official of the Department of Justice shall prepare written findings regarding the intelligence information that would be endangered, the purpose for which it might be disclosed, the likelihood that it would be disclosed, and the potential consequences of such disclosure on the national security of the United States.

Sec. 13. Requires the Attorney General to report to Congress, on a semiannual basis, about all cases which were not prosecuted pursuant to the guidelines issued by the Attorney General under this act. The report shall be given to both the House and Senate Intelligence Committees and to the chair and ranking member of the respective Judiciary Committees. The Attorney General is also directed to report on the operation and effectiveness of the act and on any suggested amendments as necessary.

Sec. 14. Authorizes the Attorney General to delegate authority under this act to the Deputy Attorney General, the Associate Attorney General, or an Assistant Attorney General.

Sec. 15. Provides that this act became effective immediately upon enactment.

Sec. 16. Provides the short title for this act, the "Classified Information Procedures Act."

Appendix B. Section-by-Section Summary of H.R.984

Sec. 1. This act would be referred to as the State Secret Protection Act of 2009.

Sec. 2. The government would have a statutorily recognized privilege against providing information in civil litigation if public disclosure of that information would be reasonably likely to cause significant harm to the national defense or foreign relations of the United States.

Sec. 3. Courts would be directed to take steps to protect sensitive information. Courts would be authorized to use security mechanisms to protect against inadvertent disclosure, including those procedures developed under CIPA. All hearings and proceedings could be conducted in camera, as necessary, and participation of counsel would not be restricted unless the court determined it

was necessary. Such restrictions can not be more restrictive than necessary and the court would provide a written explanation of its decision to all parties. During the court's evaluation of the privilege, the court could order the government to provide a substitute of the underlying information, if feasible, in order to provide counsel with a substantially equivalent opportunity to challenge the claim.

Sec. 4. The head of the agency with control over the evidence would be required to formally assert the state secrets privilege. Additionally, the government would be required to provide classified and unclassified affidavits explaining the factual basis of the claim.

Sec. 5. Additional preliminary procedures could be used in cases involving the state secrets privilege. These procedures would permit the court to issue protective orders upon government request, to appoint a special master or expert witness, to order the government to provide a manageable index of the underlying information, to hold prehearing conferences to address administrative matters, and to order counsel to obtain security clearances.

Sec. 6. Courts would be required to actually examine the underlying information about which the privilege was asserted in addition to any other information necessary to evaluate whether the claim of privilege was valid. Where the amount of information is so great that it cannot be reviewed in a timely fashion, the court may base its determination on a sampling of the information. The court would be directed to weigh testimony from government experts in the same manner as it does other expert testimony.

Sec. 7. Where the information is found to be protected by the privilege, the court would be authorized to order the government to provide a non-privileged substitute, if feasible. Refusals to provide a substitute could result in sanctions against the government in civil actions brought against the government. A valid privilege would not result in dismissal or summary judgment until all parties have had an opportunity to complete non-privileged discovery. Where privileged information, that cannot be replaced with a non-privileged substitute, is central to a question of fact or law, the court would be authorized to take appropriate action including striking testimony, finding in favor of a party, or dismissing the claim.

Sec. 8. Interlocutory appeals could be taken by any party, and would be heard in an expedited fashion. Trials shall be adjourned during the pendency of an interlocutory appeal and the appellate court may dispense with written briefs or a written opinion.

Sec. 9. The Attorney General would be required to report, within 30 days, on any case in which the government invokes the state secrets privilege. This report would be given to the congressional Intelligence Committees and the chair and ranking member of the Judiciary Committees. The Attorney General would also be required to report on the operation and effectiveness of this act, and suggest

amendments. This report would be issued annually for three years, and then only as necessary.

Sec. 10. The privilege in this act would be identified as the only privilege that may be asserted in civil cases based on state secrets. The procedures of the act would apply to any invocation of the state secrets privilege.

Sec. 11. This act would apply to claims pending on or after the date of enactment. It would also purport to authorize courts to vacate final judgments that were based on the state secrets privilege, if a motion for relief from a final judgment is filed within one year of the date of enactment, the final judgment was entered after January 1, 2002, and the claim was made against the government or arose out of conduct by persons acting in the capacity of a government officer, employee, or agent.

Appendix C. Section-by-Section Summary of S. 417

Sec. 1. This act would be referred to as the State Secrets Protection Act of 2009.

Sec. 2. Title 28 of the U.S. Code would be amended to provide a new Chapter 181 with the following new sections:

- Sec. 4051. Evidence, as used in this chapter, would include anything admissible under the Federal Rules of Evidence or discoverable under the Federal Rules of Civil Procedure. A state secret would be defined as any information, the public disclosure of which, would be reasonably likely to cause significant harm to the national defense or foreign relations of the United States.
- Sec. 4052. Federal courts would be authorized to determine which documents should be submitted ex parte and whether substitutions or redactions should be provided, after weighing the interests of justice and national security. Hearings would be conducted in camera unless they relate solely to a question of law. Hearings could be held ex parte if protective orders and security clearances are insufficient to protect the interests of justice and national security. Courts could limit attendance in hearings to individuals with security clearances and could appropriate a guardian ad litum with a security clearance to represent any party. The court could stay proceedings while security clearances are being obtained. The court could review in camera and ex parte the government's reasons for denying or delaying the issuance of a security clearance. Orders and opinions could be issued under seal. The court could also appoint a special master with the necessary security clearance to assist the court.
- Sec. 4053. The government would be permitted to intervene in any civil action to protect against disclosure of information that may be subject to the state secrets privilege. A civil action could not be dismissed based solely upon a claim of state secrets until after all hearings required by this act have taken place. The government may assert the privilege in response to any allegation in a complaint or counterclaim, regardless of whether the

action is against the government or a private party. The government would be required to formally assert the privilege through the submission of an affidavit by the head of the agency with responsibility for, and control over, the information. The affidavit would explain the factual basis for the claim of privilege. This duty would not be delegable by the head of an agency

- Sec. 4054. The government could assert the privilege at any time during a civil action to prevent the disclosure of information contained in court filings or evidence. A formal assertion of the privilege would be required, made by an affidavit issued by the appropriate agency head. The government would be required to make an unclassified version of the affidavit public. A court would be required to conduct a hearing to examine the underlying information and any affidavits submitted in support of the privilege in order to determine the validity of the claim of privilege. The government would be required to provide the court with all information to which the privilege is claimed to apply before the hearing. The court could base its conclusion on a sampling of the information where the volume of information is too large to be reviewed in a timely fashion. The government would be required to provide the court with an index of all the information it claims is subject to the privilege. A piece of information would be privileged if it contains a state secret or cannot be effectively segregated from other evidence that contains a state secret. Privileged evidence would not be admitted or disclosed. Non-privileged evidence would be subject to the Federal Rules of Evidence and the Federal Rules of Civil Procedure. The court would be required to give substantial weight to assertions by the government as to why a public disclosure would be harmful to national security. Testimony by government experts would be treated the same as testimony by other experts. The court could order the government to provide a non-privileged substitute in lieu of evidence found to be privileged, if it would give a party a substantially equivalent opportunity to litigate the issue. In suits against the government or an officer or agent of the government, the court would be required to find against the government on any issue where the government was ordered, but refused, to provide a non-privileged substitute.
- Sec. 4055. A federal court could dismiss an action as a result of the state secrets privilege, only if a non-privileged substitute is not possible, dismissal of the claim or counterclaim would not harm national security, and continuing the litigation without the privileged information would substantially impair a valid defense to the action.
- Sec. 4056. Interlocutory appeals could be taken by any party, and would be heard in an expedited fashion. Trials shall be adjourned during the pendency of an interlocutory appeal and the appellate court may dispense with written briefs or a written opinion.
- Sec. 4057. The security procedures created under CIPA would be used to protect against unauthorized disclosure of evidence determined to be privileged. The Chief Justice of the United States, in consultation with the

Attorney General, the Director of National Intelligence, and the Secretary of Defense, may amend the rules to implement this chapter. Any amendments would be submitted to the Intelligence and Judiciary Committees of the House of Representatives and the Senate. Such amendments would become effective 90 days after submission to Congress, unless Congress provides otherwise.

- Sec. 4058. The Attorney General would be required to report, within 30 days, on any case in which the government invokes the state secrets privilege. This report would be given to the Intelligence and Judiciary Committees. The Attorney General would be required to produce evidence for which the privilege was asserted upon request by a member of the Intelligence or Judiciary Committees. The Attorney General would also be required to report on the operation and effectiveness of this act, and suggest amendments. These report would be issued annually for three years, and then only as necessary.
- Sec. 4059. No other limit on the state secrets privilege under any other provision of law would be superseded by this act. No court would be prohibited from dismissing a claim or counterclaim on grounds unrelated to the state secrets privilege.

Sec. 3. Any provision of this act that is found to be invalid would be severable from the other provisions of this act.

Sec. 4. This act would apply to cases pending on or after the date of enactment.

18 U.S.C. CHAPTER 113C: TORTURE (18 U.S.C. §§ 2340-2340B)

Extraordinary Rendition

Renditions: Constraints Imposed by Laws on Torture, RL32890 (September 8, 2009).

Summary

Persons suspected of criminal or terrorist activity may be transferred from one State (i.e., country) to another for arrest, detention, and/or interrogation. Commonly, this is done through extradition, by which one State surrenders a person within its jurisdiction to a requesting State via a formal legal process, typically established by treaty. Far less often, such transfers are effectuated through a process known as "extraordinary rendition" or "irregular rendition." These terms have often been used to refer to the extrajudicial transfer of a person from one State to another. In this report, "rendition" refers to extraordinary or irregular renditions unless otherwise specified.

Although the particularities regarding the usage of extraordinary renditions and the legal authority behind such renditions are not publicly available, various U.S.

officials have acknowledged the practice's existence. During the Bush Administration, there was controversy over the use of renditions by the United States, particularly with regard to the alleged transfer of suspected terrorists to countries known to employ harsh interrogation techniques that may rise to the level of torture, purportedly with the knowledge or acquiescence of the United States. In January 2009, President Obama issued an Executive Order creating a special task force to review U.S. transfer policies, including the practice of rendition, to ensure compliance with applicable legal requirements. In August, the task force issued recommendations to ensure that U.S. transfer practices comply with applicable standards and do not result in the transfer of persons to face torture. These recommendations include strengthening procedures used to obtain assurances from a country that a person will not face torture if transferred there, and the establishment of mechanisms to monitor the treatment of transferred persons.

This report discusses relevant international and domestic law restricting the transfer of persons to foreign states for the purpose of torture. The U.N. Convention against Torture and Other Cruel, Inhuman, or Degrading Treatment or Punishment (CAT), and its domestic implementing legislation (the Foreign Affairs Reform and Restructuring Act of 1998) impose the primary legal restrictions on the transfer of persons to countries where they would face torture. Both CAT and U.S. implementing legislation generally prohibit the rendition of persons to countries in most cases where they would more likely than not be tortured, though there are arguably limited exceptions to this prohibition. Historically, the State Department has taken the position that CAT's provisions concerning the transfer of persons do not apply extraterritorially, though as a matter of policy the United States does not transfer persons in its custody to countries where they would face torture (U.S. regulations and statutes implementing CAT, however, arguably limit the extraterritorial transfer of individuals nonetheless). Under U.S. regulations implementing CAT, a person may be transferred to a country that provides credible assurances that the rendered person will not be tortured. Neither CAT nor its implementing legislation prohibit the rendition of persons to countries where they would be subject to harsh treatment not rising to the level of torture. Besides CAT, additional obligations may be imposed upon U.S. rendition practice via the Geneva Conventions, the War Crimes Act (as amended by the Military Commissions Act (P.L. 109-366), the International Covenant on Civil and Political Rights (ICCPR), and the Universal Declaration on Human Rights.

Legislation was introduced in the 110th Congress to limit or bar U.S. participation in renditions. It is possible that similar legislation will be proposed in the 111th Congress.

Introduction

Persons suspected of terrorist or criminal activity may be transferred from one State (i.e., country) to another to answer charges against them.[2228] The surrender of a fugitive from one State to another is generally referred to as *rendition*.[2229] A distinct form of rendition is *extradition*, by which one State surrenders a person within its territorial jurisdiction to a requesting State via a formal legal process, typically established by treaty between the countries.[2230] However, renditions may be effectuated in the absence of extradition treaties, as well.[2231] The terms "irregular rendition" and "extraordinary rendition" have been used to refer to the *extrajudicial* transfer of a person from one State to another, generally for the purpose of arrest, detention, and/or interrogation by the receiving State (for purposes of this report, the term "rendition" will be used to describe irregular renditions, and not extraditions, unless otherwise specified). Unlike in extradition cases, persons subject to this type of rendition typically have no access to the judicial system of the sending State by which they may challenge their transfer.[2232] Sometimes persons are rendered from the territory of the

---

[2228] The surrender of persons to a requesting State to answer criminal charges was originally guided by principles of comity and reciprocity. Beginning in the late eighteenth century, the surrender of persons to a requesting State to answer charges increasingly became governed by formal extradition treaties between States (though the practice of extradition can be traced back to antiquity). For background, see CRS Report 98-958, Extradition To and From the United States: Overview of the Law and Recent Treaties, by Charles Doyle. In contrast to earlier practices, extradition treaties established formal procedures governing the surrender of persons from one treaty party to another, facilitating treaty parties' shared interest in punishing certain crimes while providing persons with a legal means to challenge their proposed transfer to a requesting State. By the 20th century, extradition treaties became the predominant means of permitting the transfer of persons from one State to another to answer charges against them. For background, see id. at 1-3; M. BASSIOUNI, INTERNATIONAL EXTRADITION: UNITED STATES LAW AND PRACTICE (4th ed. 2002).

[2229] BLACK'S LAW DICTIONARY 1298-99 (7th ed. 1999).

[2230] U.S. extradition procedures for transferring a person to another State are governed by the relevant treaty with that State, as supplemented by 18 U.S.C. §§ 3181-3196. U.S. law generally prohibits the extradition of individuals from the United States in the absence of a treaty. 18 U.S.C. § 3181.

[2231] For example, via statutory authorization, the U.S. may in the exercise of comity surrender a person to a foreign country to face criminal charges for committing a crime of violence against a U.S. national, if the offense is nonpolitical in nature and the person is not a U.S. citizen, national, or permanent resident. 18 U.S.C. § 3181(b). Courts have also recognized that an extradition may be effectuated pursuant to a statute rather than a treaty. See Ntakirutimana v. Reno, 184 F.3d 419 (5th Cir. 1999) (upholding surrender of Rwandan citizen to international tribunal, when surrender was authorized via executive agreement and implementing statute rather than treaty).

[2232] Before the United States may extradite a person to another State, an extradition hearing must be held before an authorized judge or magistrate, during which the judge or magistrate must determine whether the person's extradition would comply with the terms of the extradition treaty between the United States and the requesting State. Even if the magistrate or authorized judge

rendering State itself, while other times they are seized by the rendering State in another country and immediately rendered, without ever setting foot in the territory of the rendering State.[2233] Sometimes renditions occur with the consent of the State where the fugitive is located;[2234] other times, they do not.[2235]

---

finds extradition to be appropriate, a fugitive can still institute habeas corpus proceedings to obtain release from custody and thereby prevent his extradition, or the Secretary of State may decide not to authorize the extradition. See CRS Report 98-958, supra footnote 1. These protections do not apply in situations where an alien is being removed from the United States for immigration purposes. Nevertheless, separate procedural and humanitarian relief protections do pertain.

[2233] In 2005, Khaled El-Masri, a German citizen of Lebanese descent, filed suit against a former CIA director and other persons for their involvement in his alleged rendition from Macedonia to a detention center in Afghanistan, where he was subjected to harsh interrogation for several months on account of suspected terrorist activities. El-Masri claimed that after the CIA discovered that its suspicions of El-Masri were mistaken, it released him in Albania. Don Van Natta Jr.& Souad Mekhennet, "German's Claim of Kidnapping Brings Investigation of U.S. Link," New York Times, January 9, 2005, at 11. The federal district court dismissed El-Masri's claim without evaluating its merits, finding that the claim could not be fairly litigated without disclosure of sensitive information protected by the state secrets privilege. El-Masri v. Tenet, 437 F.Supp.2d 530 (E.D.Va. 2006). The district court's ruling was affirmed by the Fourth Circuit Court of Appeals in 2007, and the Supreme Court subsequently denied plaintiff's petition for writ of certiorari. El-Masri v. United States, 479 F.3d 296 (4th Cir. 2007), cert. denied, 128 S.Ct. 373 (2008). In 2007, German public prosecutors issued arrest warrants for 13 CIA agents who were allegedly involved in El-Masri's rendition, but the Justice Ministry declined to request the agents' extradition from the United States. "Renditions Victim to Sue German Government," Spiegel Online, June 9, 2008, at http://www.spiegel.de/international/germany/0,1518,558496,00.html.

[2234] In some instances, questions as to whether a State has consented to the rendition of a person located in its territory have been subject to controversy and investigation. In Italy, the trial of several Italian intelligence officers and 26 American intelligence operatives (being tried in absentia) for the rendition of an Islamic cleric from Italy to Egypt was suspended after the Italian government said testimony could reveal state secrets threatening Italy's national security. "CIA-Linked Kidnapping Trial on Hold," Chicago Tribune, December 4, 2008, at 22. The trial was subsequently permitted to proceed, but without reference to top secret information. In late 2006, a committee established by the European Parliament (the parliamentary body of the European Union) to investigate European governments' participation in renditions by the CIA found evidence indicating the involvement of European State agents or officials in a number of investigated renditions. Temporary Committee on the Alleged Use of European Countries by the CIA for the Transport and Illegal Detention of Prisoners, Eur. Parl., Working Doc. 7, November 16, 2006, available at http://www.europarl.europa.eu/comparl/tempcom/tdip/working_docs/pe380593_en.pdf at 2. The final report by the committee was issued in January 2007. Temporary Committee on the Alleged Use of European Countries by the CIA for the Transport and Illegal Detention of Prisoners, Eur. Parl., Final Report, January 30, 2007, available at http://www.europarl.europa.eu/comparl/tempcom/tdip/final_report_en.pdf. For additional background, see CRS Report RL33643, Undisclosed U.S. Detention Sites Overseas: Background and Legal Issues, by Jennifer K. Elsea and Julie Kim.

[2235] In 1980, the Department of Justice's Office of Legal Counsel issued an opinion that irregular renditions absent the consent of the State where the fugitives are seized would violate customary international law because they would be an invasion of sovereignty for one country to carry out law enforcement activities in another without that country's consent. Extraterritorial

Besides irregular rendition and extradition, aliens present or attempting to enter the United States may be removed to another State under U.S. immigration laws, if such aliens are either deportable or inadmissible and their removal complies with relevant statutory provisions.[2236] Unlike in the case of rendition and extradition, the legal justification for removing an alien from the United States via deportation or denial of entry is not so that he can answer charges against him in the receiving State; rather, it is because the United States possesses the sovereign authority to determine which non-nationals may enter or remain within its borders, and the alien fails to fulfill the legal criteria allowing non-citizens to enter, remain in, or pass in transit through the United States. Although the deportation or exclusion of an alien under immigration laws may have the same practical effect as an irregular rendition (especially if the alien is subject to "expedited removal" under § 235 of the Immigration and Nationality Act, in which case judicial review of a removal order may be very limited), this practice is arguably distinct from the historical understanding of what constitutes a rendition.[2237] Nonetheless, the term "extraordinary rendition" has occasionally been used by some commentators to describe the transfer of aliens suspected of terrorist activity to third countries for the purposes of detention and interrogation, even though the transfer was conducted pursuant to immigration procedures.[2238]

Apprehension by the Federal Bureau of Investigation, 4B. OP. OFF. LEGAL COUNSEL 543 (1980). Additionally, Article 2(4) of the U.N. Charter prohibits Member States from violating the sovereignty of another State. In 1989, the Office of Legal Counsel constrained the 1980 opinion, though not on the grounds that such renditions are consistent with customary international law. Authority of the Federal Bureau of Investigation to Override International Law in Extraterritorial Law Activities, 13 OP. OFF. LEGAL COUNSEL 163 (1989) (finding that extraterritorial law enforcement activities authorized by domestic law are not barred even if they contravene unexecuted treaties or treaty provisions, such as Article 2(4) of the United Nations Charter, as well as customary international law). Further, while upholding court jurisdiction over a Mexican national brought to the United States via rendition, despite opposition from the Mexican government, the Supreme Court nevertheless noted that such renditions were potentially "a violation of general international law principles." United States v. Alvarez-Machain, 505 U.S. 655, 669 (1992). In a related case twelve years later, however, the Court held that any such principle—at least as it related to the rights of the rendered individual—did not "rest on a norm of international character accepted by the civilized world and defined with a specificity comparable to the features of the 18th century paradigms." Sosa v. Alvarez-Machain, 124 S.Ct. 2739, 2761-62 (2004).

[2236] See, e.g., 8 U.S.C. §§ 1182 (providing grounds for alien inadmissibility into the United States), 1227 (describing classes of deportable aliens), 1251 (providing guidelines for removal of deportable and inadmissible aliens).

[2237] See BASSIOUNI, supra footnote 1, at 183-248 (discussing deportation and exclusion as an alternative to extradition).

[2238] Perhaps the most notable case of alleged rendition involved Maher Arar, a dual citizen of Canada and Syria. Mr. Arar filed suit in January 2004 against certain U.S. officials that he claims were responsible for rendering him to Syria, where he was allegedly tortured and interrogated for

Over the years, several persons have been rendered into the United States by U.S. authorities, often with the cooperation of the States where such persons were seized, to answer criminal charges, including charges related to terrorist activity.[2239] The Obama Administration has continued this practice.[2240] Besides receiving persons through rendition, the United States has also rendered persons to other countries over the years, via the Central Intelligence Agency (CIA) and various law enforcement agencies.[2241]

---

suspected terrorist activities with the acquiescence of the United States. Arar was allegedly first detained by U.S. officials while waiting in New York's John F. Kennedy International Airport for a connecting flight to Canada after previously flying from Tunisia. According to U.S. officials, Mr. Arar's removal to Syria was done pursuant to § 235(c) of the Immigration and Nationality Act, which authorizes the "expedited removal" of arriving aliens suspected of terrorist activity. U.S. Department of State, U.S. Views Concerning Syrian Release of Mr. Maher Arar, October 6, 2003, available at http://2001-2009.state.gov/r/pa/prs/ps/2003/24965.htm; see also 8 U.S.C. § 1225(c). On February 16, 2006, the U.S. District Court for the Eastern District of New York dismissed Arar's civil case on a number of grounds, including that certain claims raised against U.S. officials implicated national security and foreign policy considerations, and assessing the propriety of those considerations was most appropriately reserved to Congress and the executive branch. Arar v. Ashcroft, 414 F.Supp.2d 250 (E.D.N.Y. 2006). The district court's dismissal was upheld by a three-judge panel of the Court of Appeals for the Second Circuit on June 30, 2008. Arar v. Ashcroft, 532 F.3d 157 (2nd Cir. 2008). A rehearing en banc was granted on August 12, 2008, but a ruling has yet to be issued. The Canadian government established a commission to investigate Canada's involvement in Arar's arrest and transfer to Syria. The final report of the Arar Commission, released in September 2006, concluded that Arar had not been a security threat to Canada, but Canadian officials provided U.S. authorities with inaccurate information regarding Arar that may have led to his transfer to Syria. Arar Commission, Factual Inquiry, at http://www.ararcommission.ca/eng/26.htm. See also, Department of Homeland Security, OIG-0818, Office of Inspector General, The Removal of a Canadian Citizen to Syria (Unclassified Summary), March 2008.

[2239] See generally State Department, Office of the Coordinator of Counterterrorism, Patterns of Global Terrorism, Appendix D: Extraditions and Renditions of Terrorists to the United States, 1993-2001 (May 21, 2002), available at http://www.state.gov/documents/organization/10306.pdf. See also State Department, Bureau for International Narcotics and Law Enforcement Affairs International Narcotics Control Strategy Report, 2005: Southeast Asia (March 2005), available at http://www.state.gov/p/inl/rls/nrcrpt/2005/vol1/html/42367.htm (mentioning Vietnam and Cambodia as countries that have permitted the rendition of persons to the United States to answer drug charges).

[2240] In August 2009, a Lebanese citizen was seized by FBI agents in Afghanistan and rendered to the United States to face charges for bribery. The rendition was committed with the consent of the Afghan government. Bob Drogin, "Lebanese Man Is Target of First Rendition under Obama," L.A. Times, August 22, 2009.

[2241] For a historical discussion of U.S. policy and practice regarding rendition, see William G. Weaver & Robert M. Pallitto, "The Law: 'Extraordinary Rendition' and Presidential Fiat, 36 PRESIDENTIAL STUD. Q. 102 (2006).

There have been no widely-reported cases of persons being rendered from the interior of the United States, perhaps due to the constitutional and statutory limitations upon the summary transfer of persons from U.S. territory.[2242] There have been cases where non-U.S. citizens were allegedly "rendered" at U.S. ports of entry but had yet to legally enter/be admitted into the United States. However, these "renditions" appear to have been conducted pursuant to immigration removal procedures.[2243] Noncitizens arriving at ports of entry have no recognized constitutional rights with regard to their admission into the United States,[2244] and federal immigration law provides arriving aliens with fewer procedural protections against their removal than aliens residing in the United States.[2245]

Instead, it appears that renditions by the U.S. to third countries have involved non-citizens seized outside U.S. territory. The Supreme Court has found that the Constitution protects U.S. citizens abroad from actions taken against them by the federal government,[2246] and this would generally appear to limit the summary transfer of such persons to the custody of foreign governments.[2247] In contrast,

---

[2242] See,e.g., 18 U.S.C. § 3181 (generally prohibiting extradition of U.S. citizens and legal permanent residents in the absence of a treaty); Valentine v. United States ex rel. Neidecker, 299 U.S. 5 (1936) (holding that Executive may not extradite U.S. citizens unless granted legal authority to do so); Yamata v. Fischer, 189 U.S. 86, 100-101 (deportation proceedings must reflect procedural due process requirements).

[2243] See supra footnote 11.

[2244] See, e.g., United States ex rel. Knauff v. Shaughnessy, 338 U.S. 537, 542, (1950) ("At the outset we wish to point out that an alien who seeks admission to this country may not do so under any claim of right."); Nishimura Ekiu v. United States, 142 U.S. 651, 659-660 (1892) ("It is an accepted maxim of international law that every sovereign nation has the power, as inherent in sovereignty, and essential to self-preservation, to forbid the entrance of foreigners within its dominions, or to admit them only in such cases and upon such conditions as it may see fit to prescribe.").

[2245] Arriving aliens who are deemed inadmissible may be subject to "expedited removal," a more streamlined removal process than that applicable to aliens who have been admitted into the United States. 8 U.S.C. § 1225.

[2246] See, e.g., Reid v. Covert, 354 U.S. 1, 6 (1957) ("When the Government reaches out to punish a citizen who is abroad, the shield which the Bill of Rights and other parts of the Constitution provide to protect his life and liberty should not be stripped away just because he happens to be in another land.").

[2247] See Valentine, 299 U.S. at 9 (1936) (stating that there is "no executive prerogative to dispose of the liberty of the individual ... There is no executive discretion to surrender him to a foreign government, unless that discretion is granted by law."). In limited circumstances, the involuntary transfer of a U.S. citizen to a foreign government may occur in the absence of an authorizing statute or treaty, in cases "involving the transfer to a sovereign's authority of an individual captured and already detained [by the U.S.] in that sovereign's territory." Munaf v. Geren, 553 U.S. __, 128 S.Ct. 2207, 2227 (2008), In Munaf, the Supreme Court found that while the federal habeas corpus statute gives U.S. courts jurisdiction over petitions filed on behalf of U.S. citizens

noncitizens who have not entered the United States have historically been recognized as receiving few, if any, constitutional protections[2248] (though noncitizens in foreign territory under the de facto control of the United States, such as Guantanamo Bay, Cuba, may be owed greater protections than other noncitizens abroad).[2249]

Reportedly, the rendition of terrorist suspects to other countries was authorized by President Ronald Reagan in 1986 and has been part of U.S. counterterrorism efforts at least since the late 1990s.[2250] In testimony before the House Foreign Affairs Committee in April 2007, former CIA official Michael F. Scheuer claimed authorship of the CIA's rendition program and stated that it originally began in mid-1995. The initial goals of the rendition program, according to Scheuer, were to ensure the detention of Al Qaeda members posing a threat to U.S. security and to seize any documents in their possession.[2251] However,

> *[a]fter 9/11, and under President Bush, rendered al-Qaeda operatives have most often been kept in U.S. custody. The goals of the program remained the same, although … Mr. Bush's national*

---

held by U.S. authorities in foreign territory, courts may not exercise habeas jurisdiction to enjoin the surrender of such persons to the foreign territory's sovereign for criminal prosecution.

[2248] See, e.g., Verdugo-Urquidez v. United States, 494 U.S. 259, 270-71 (1990) ("aliens receive constitutional protections when they have come within the territory of the United States and developed substantial connections with the country").

[2249] In the 2008 case of Boumediene v. Bush, 553 U.S. ___, 128 S.Ct. 2229, the Supreme Court held that the constitutional writ of habeas corpus extended to non-citizen detainees held at Guantanamo, in significant part because Guantanamo, while not technically part of the United States, was nonetheless subject to its complete control. The Court's opinion did not address the extent to which other constitutional protections extended to Guantanamo detainees, and it suggested that noncitizens held by the United States in foreign territories where U.S. control was less absolute than Guantanamo would be afforded lesser protections. See id. at 2262 (noting that the Court had never before found that the noncitizens detained in another country's territory have any rights under the U.S. Constitution, but concluding that the case before it "lack[ed] any precise historical parallel"). Notably, the Court did not overrule its decision in Johnson v. Eisentrager, 339 U.S. 763 (1950), where it held that the constitutional writ of habeas did not extend to enemy aliens held in postwar Germany. Instead, the Court distinguished the two cases, and noted that unlike the petitioners in Eisentrager, the Guantanamo detainees denied they were enemy combatants and the government's control over post-WWII German territory was not nearly as complete as its control over Guantanamo. Boumediene, 128 S. Ct. at 2259-2260.

[2250] See Dana Priest, "CIA's Assurances On Transferred Suspects Doubted," Washington Post, March 17, 2005, p. A1.

[2251] Statement of Michael F. Scheuer, Former Chief, Bin Laden Unit, Central Intelligence Agency, House For. Affairs Comm. (April 17, 2007), Hearing, Extraordinary Rendition in U.S. Counterterrorism Policy: The Impact on Transatlantic Relations, available at http://foreignaffairs.house.gov/110/sch041707.htm.

security team wanted to use U.S. officers to interrogate captured al-Qaeda fighters.[2252]

In a 2002 written statement to the Joint Committee Inquiry into Terrorist Attacks Against the United States, then-CIA Director George Tenet reported that even prior to the 9/11 terrorist attacks, the "CIA (in many cases with the FBI) had rendered 70 terrorists to justice around the world."[2253] The *New York Times* has reported that following the 9/11 attacks, President Bush issued a still-classified directive that broadened the CIA's authority to render terrorist suspects to other States.[2254] Although there are some reported estimates that the United States has rendered more than 100 individuals following 9/11,[2255] the actual number is not a matter of the public record.

Controversy has arisen over the United States allegedly rendering suspected terrorists to States known to practice torture for the purpose of arrest, detention, and/or harsh interrogation.[2256] Critics charge that the United States has rendered persons to such States so that they will be subjected to harsh interrogation techniques prohibited in the United States, including torture. The Bush Administration did not dispute charges that U.S. authorities rendered persons to foreign States believed to practice torture, but denied rendering persons for the purpose of torture.[2257] Answering a question regarding renditions in a March 16, 2005 press conference, President Bush stated that prior to transferring persons to other States, the United States received "promise[s] that they won't be tortured ... This country does not believe in torture."[2258] In testimony before the Senate

Armed Services Committee in 2005, acting CIA Director Porter Goss stated that in his belief, "we have more safeguards and more oversight in place [over renditions] than we did before" 9/11.[2259] Secretary of State Condoleezza Rice stated that "the United States has not transported anyone, and will not transport anyone, to a country when we believe he will be tortured. Where appropriate, the United States seeks assurances that transferred persons will not be tortured."[2260]

In January 2009, President Obama issued an Executive Order creating a special task force to review U.S. transfer policies, including the practice of rendition, to ensure compliance with applicable legal requirements. In August, the task force issued recommendations to ensure that

U.S. transfer practices comply with applicable standards and do not result in the transfer of persons to face torture. These recommendations include strengthening procedures used to obtain assurances from a country that a person will not face torture if transferred there, including through the establishment of mechanisms to monitor the treatment of transferred persons. Little publicly available information from government sources exists regarding the nature and frequency of U.S. renditions to countries believed to practice torture, or the nature of any assurances obtained from them before rendering persons to them. To what extent U.S. agencies have legal authority to engage in renditions remains unclear. The only provision within the United States Code appearing to expressly permit an agency's participation in a rendition is 10 U.S.C. § 374(b)(1)(D), as amended in 1998, which permits the Department of Defense (DOD), upon request from the head of a federal law enforcement agency, to make DOD personnel available to operate equipment with respect to "a rendition of a suspected terrorist from a foreign country to the United States to stand trial."[2261] On the other hand, given that the United States has participated in renditions, there would appear to be legal limits on the practice, especially with regard to torture. This report describes the most relevant legal guidelines limiting the

[2260] Remarks of Secretary of State Condoleezza Rice Upon Her Departure for Europe, December 5, 2005, online at http://2001-2009.state.gov/secretary/rm/2005/57602.htm [hereinafter "Rice Statement"].

[2261] 10 U.S.C. § 374(b)(1)(D), added by Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999, P.L. 105-277, Div. B, Title II, § 201(2) (1998). Though U.S. law expressly permits the surrender of certain fugitives to face criminal charges in the requesting State in the absence of an extradition treaty , such persons (at least if found in the United States) are provided with certain procedural protections under statute and the Constitution. See 18 U.S.C. §§ 3181-3196; In re Kaine, 55 U.S. 103, 113 (1852) ("an extradition without an unbiased hearing before an independent judiciary [is] highly dangerous to liberty, and ought never to be allowed in this country").

transfer of persons to foreign States where they may face torture, as well as recent legislation seeking to limit the rendition of persons to countries believed to practice torture.

Limitations Imposed on Renditions by the Convention Against Torture and Implementing Legislation

The U.N. Convention against Torture and Other Cruel, Inhuman, or Degrading Treatment or Punishment (CAT)[2262] and U.S. domestic implementing legislation impose the primary legal restrictions on the transfer of persons to countries where they would face torture. CAT requires signatory parties to take measures to end torture within territories under their jurisdiction, and it prohibits the transfer of persons to countries where there is a substantial likelihood that they will be tortured.[2263] Torture is a distinct form of persecution, and is defined for purposes of CAT as "severe pain or suffering ... intentionally inflicted on a person" under the color of law.[2264] Accordingly, many forms of persecution—including certain harsh interrogation techniques that would be considered cruel and unusual under the U.S. Constitution—do not necessarily constitute torture, which is an extreme and particular form of mistreatment.[2265]

CAT also obligates parties to take measures to prevent "other acts of cruel, inhuman or degrading treatment or punishment which do not amount to torture," but this obligation only extends to acts occurring in territory under a State Party's jurisdiction.[2266] CAT also established the Committee against Torture, a monitoring body which has declaratory but non-binding authority concerning interpretation of the Convention.[2267] State parties are required to submit periodic reports to the Committee concerning their compliance with CAT.[2268]

[2262] Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (CAT), G.A. Res. 39/46, Annex, 39 U.N. GAOR Supp. No. 51, U.N. Doc. A/39/51 (1984).

[2263] Id., art. 2(1).

[2264] Id., art. 1 (emphasis added).

[2266] CAT art. 16(1).

[2267] See id., arts. 17-24.

[2268] Id., art. 19(1).

The United States ratified CAT in 1994, subject to certain declarations, reservations, and understandings, including that the Convention was not self-executing and therefore required domestic implementing legislation to take effect.[2269]

The express language of CAT Article 2 allows for no circumstances or emergencies where torture could be permitted by Convention parties.[2270] On the other hand, a number of CAT provisions limiting the acts of Convention parties does not use language coextensive as that contained in CAT Article 2. The following paragraphs describe the relevant provisions of CAT and implementing statutes and regulations that restrict the rendition of persons to countries when there is a substantial likelihood that such persons will be tortured. As will be discussed below, while CAT imposes an absolute prohibition on the use of torture by Convention parties, the plain language of certain CAT provisions may nevertheless permit parties in limited circumstances to transfer persons to countries where they would likely face torture, though such an interpretation arguably conflicts with the intent of the treaty.

[2269] It could be argued that despite its declaration that CAT was not self-executing and required implementing legislation to take effect, such legislation was actually unnecessary in the case of certain CAT provisions, including those related to the removal of persons to countries where they would likely face torture. However, U.S. courts hearing cases concerning the removal of aliens have regularly interpreted CAT provisions prohibiting alien removal to countries where an alien would likely face torture to be non-self executing and judicially unenforceable, except to the extent permitted under domestic implementing legislation. See, e.g., Pierre v. Gonzales, 502 F.3d 109 (2nd Cir. 2007) (finding that alien had no directly enforceable right to relief from removal under CAT, and such a claim must instead arise under U.S. law implementing the treaty); Castellano-Chacon v. INS, 341 F.3d 533 (6th Cir. 2003) (applicant for withholding of removal could not invoke CAT directly, but could rely upon implementing regulations); Akhtar v. Reno, 123 F.Supp.2d 191 (S.D.N.Y. 2000) (rejecting challenge made by criminal alien to removal pursuant to CAT, and stating that "[g]iven the apparent intent of the United States that the Convention not be self-executing, this Court joins the numerous other courts that have concluded that the Convention is not self-executing").

[2270] CAT Article 2(2) declares that "[n]o exceptional circumstances whatsoever, whether a state of war or a threat of war, internal political instability or any other public emergency, may be invoked as a justification of torture." According to the State Department's analysis of CAT, which was included in President Reagan's transmittal of the Convention to the Senate for its advice and consent, this explicit prohibition of all torture, regardless of the circumstances, was viewed by the drafters of CAT as "necessary if the Convention is to have significant effect, as public emergencies are commonly invoked as a source of extraordinary powers or as a justification for limiting fundamental rights and freedoms." President's Message to Congress Transmitting the Convention Against Torture and Other Cruel, Inhuman, or Degrading Treatment or Punishment, Summary and Analysis of the Convention Against Torture and Other Cruel, Inhuman, or Degrading Treatment or Punishment, May 23, 1988, S. Treaty Doc. No. 100-20 at 5, reprinted in 13857 U.S. Cong. Serial Set. [hereinafter "State Dept. Summary"].

CAT Limitation on the Transfer of Persons to Foreign States for the Purpose of Torture[2271]

CAT Article 3 provides that no State Party "shall expel, return ('refouler') or extradite a person to another State where there are substantial grounds for believing that he would be in danger of being subjected to torture." The U.S. ratification of CAT was contingent on its understanding that this requirement refers to situations where it would be "more likely than not" that a person would be tortured if removed to a particular country, a standard commonly used by U.S. courts when determining whether to withhold an alien's removal for fear of persecution.[2272]

It is important to note that CAT does not prohibit a State from transferring a person to another State where he or she would likely be subjected to harsh treatment that, while it would be considered cruel and unusual under the standards of the U.S. Constitution, would nevertheless not be severe enough to constitute "torture."[2273]

Domestic Implementation of CAT Article 3

The Foreign Affairs Reform and Restructuring Act of 1998 (FARRA) implemented U.S. obligations under CAT Article 3.[2274] Section 2242 of the act

---

[2271] For additional information, see CRS Report RL32276, The U.N. Convention Against Torture: Overview of U.S. Implementation Policy Concerning the Removal of Aliens, by Michael John Garcia.

[2272] Sen. Exec. Rpt. 101-30, Resolution of Advice and Consent to Ratification, (1990) at II.(2). See generally INS v. Stevic, 467 U.S. 407, 429-30 (1984). This standard is in contrast to the lower standard for determining whether an alien is eligible for consideration for asylum based on a "well-founded fear of persecution" if transferred to a particular country. To demonstrate a "well-founded" fear, an alien only needs to prove that the fear is reasonable, not that it is based on a clear probability of persecution. See INS v. Cardoza-Fonseca, 480 U.S. 421 (1987).

[2273] According to the State Department's analysis of CAT, the Convention's definition of torture was intended to be interpreted in a "relatively limited fashion, corresponding to the common understanding of torture as an extreme practice which is universally condemned." State Dept. Summary, supra footnote 43, p. 3. For example, the State Department suggested that rough treatment falling into the category of police brutality, "while deplorable, does not amount to 'torture'" for purposes of the Convention, which is "usually reserved for extreme, deliberate, and unusually cruel practices ... [such as] sustained systematic beating, application of electric currents to sensitive parts of the body, and tying up or hanging in positions that cause extreme pain." Id., p. 4 (presumably, police brutality of extreme severity could rise to the level of "torture"). This understanding of torture as a particularly severe form of cruel treatment is made explicit by CAT Article 16, which obligates Convention parties to "prevent in any territory under [their] jurisdiction other acts of cruel, inhuman, or degrading treatment or punishment which do not amount to acts of torture," thereby indicating that not all forms of inhumane treatment constitute torture.

[2274] P.L. 105-277 at § 2242(a)-(b).

announced the U.S. policy "not to expel, extradite, or otherwise effect the involuntary return of any person to a country in which there are substantial grounds for believing the person would be in danger of being subjected to torture, regardless of whether the person is physically present in the United States."[2275] The act further required all relevant federal agencies to adopt appropriate regulations to implement this policy.[2276]

In doing so, however, Congress opened the door for administrative action limiting CAT protection by requiring that, "to the maximum extent consistent" with Convention obligations, regulations adopted to implement CAT Article 3 exclude from their protection those aliens described in § 241(b)(3)(B) of the Immigration and Nationality Act (INA).[2277] INA § 241(b)(3)(B) acts as an exception to the general U.S. prohibition on the removal of aliens to countries where they would face persecution (which may or may not include actions constituting torture). An alien may be removed despite the prospect of likely persecution if the alien:

- assisted in Nazi persecution or engaged in genocide;
- ordered, incited, assisted, or otherwise participated in the persecution of an individual because of the individual's race, religion, nationality, membership in a particular social group, or political opinion;
- having been convicted of a particularly serious crime, is a danger to the community of the United States;
- is strongly suspected to have committed a serious nonpolitical crime outside the United States prior to arrival;[2278] or
- is believed, on the basis of reasonable grounds, to be a danger to the security of the United States.

Thus far, however, U.S. regulations concerning the removal of aliens and extradition of fugitives have prohibited the removal of all persons to States where they would more likely than not be tortured,[2279] regardless of whether they are described in INA § 241(b)(3)(B). CIA regulations concerning renditions (i.e., renditions where a person is seized outside the United States and transferred to a

[2278] The distinction between political and nonpolitical crimes is occasionally unclear. For more background, see CRS Report 98-958, Extradition To and From the United States: Overview of the Law and Recent Treaties, by Charles Doyle, supra footnote 1.

[2279] See 8 C.F.R. §§ 208.16-18, 1208.16-18 (relating to the removal of aliens); 22 C.F.R. §95.2 (relating to extradition of persons).

third country) are not publicly available. Nevertheless, such regulations would presumably need to comply with the requirements of FARRA.

The Role of Diplomatic Assurances in Transfer Decisions

U.S. regulations implementing CAT Article 3 permit the consideration of diplomatic assurances in removal/extradition decisions.[2280] Pursuant to removal and extradition regulations, a person subject to removal or extradition may be transferred to a specified country that provides diplomatic assurances to the Secretary of State that the person will not be tortured if removed there. Such assurances must be deemed "sufficiently reliable" before a person can be transferred to a country where he or she would otherwise more likely than not be tortured.[2281] Although the DoD has not promulgated regulations implementing CAT Article 3, diplomatic assurances are also used by military authorities when determining whether to transfer a person from U.S. military detention at Guantanamo Bay, Cuba.[2282]

Assurances have also reportedly been used in rendition decisions made by the CIA. The *Washington Post* reported in 2005 that the CIA Office of General Counsel required the CIA station chief in a given country to obtain verbal assurances from that country's security service that a person will not be tortured if rendered there.[2283] Such assurances would then reportedly be cabled to CIA headquarters before the rendition may occur.[2284] In August 2009, a special task force created by the Obama Administration to review U.S. interrogation and transfer policies recommended that the State Department be involved in the evaluation of assurances in all cases.

CAT Article 3 itself (as opposed to U.S. regulations implementing CAT) provides little guidance as to the application of diplomatic assurances to decisions to transfer a person to another country. Although CAT Article 3 obligates signatory parties to take into account the proposed receiving State's human rights record, it also provides that the proposed sending State should take into account "all relevant considerations" when assessing whether to remove an individual to a

particular State.[2285] A State's assurances that it will not torture an individual would appear to be a "relevant consideration" in determining whether or not it would be appropriate to render him there, at least so long as the assurances are accompanied by a mechanism for enforcement.[2286] Article 3 does not provide guidelines for how these considerations should be weighed in determining whether substantial grounds exist to believe a person would be tortured in the proposed receiving State.[2287] In its second periodic report to the Committee against Torture, the United States claimed that it:

> *obtains assurances, as appropriate, from the foreign government to which a detainee is transferred that it will not torture the individual being transferred. If assurances [are] not considered sufficient when balanced against treatment concerns, the United States would not transfer the person to the control of that government unless the concerns are satisfactorily resolved.*[2288]

On the other hand, the Committee against Torture has expressed concern over the use of diplomatic assurances by the United States. In 2006, it made a non-binding recommendation that the United States:

> *should only rely on "diplomatic assurances" in regard to States which do not systematically violate the Convention's provisions, and after a thorough examination of the merits of each individual case. The State party should establish and implement clear procedures for obtaining such assurances, with adequate judicial*

[2285] CAT art. 3(2).

[2286] See Committee against Torture, Communication No 233/2003: Sweden. 24/05/2005 (Agiza v. Sweden), CAT/C/34/D/233/2003 (2005) at para. 13.4., reprinted in 44 ILM 1103 (2005)(finding that diplomatic assurances which provided no mechanism for their enforcement did not suffice to protect against the risk of torture and thus did not absolve sending State of its responsibility under CAT art. 3).

[2287] The U.N. Special Rapporteur, an expert assigned by the U.N. Commission on Human Rights to examine issues related to torture, has stated that while diplomatic assurances "should not be ruled out a priori," they should be coupled with a system to monitor the treatment of transferred persons to ensure that they are not inhumanely treated. Interim Report of the Special Rapporteur of the Commission on Human Rights on the Question of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, U.N. General Assembly, 59th Sess., A/59/324. While the Rapporteur's opinion may provide persuasive guidance in the interpretation of CAT obligations, the Rapporteur is not part of the CAT Committee and his opinions are not legally binding under the terms of CAT.

[2288] Second Periodic Report of the United States of America to the Committee Against Torture, submitted May 6, 2005, available at http://www.state.gov/g/drl/rls/45738.htm.

mechanisms for review, and effective post-return monitoring arrangements.[2289]

In addition, the United States has an obligation under customary international law to execute its Convention obligations in good faith,[2290] and is therefore required under international law to exercise appropriate discretion in its use of diplomatic assurances. For instance, if a State consistently violated the terms of its diplomatic assurances, the United States would presumably need to look beyond the face of such promises before permitting the transfer of an individual to that country.[2291]

Criminal Penalties for Persons Involved in Torture

One of the central objectives of CAT is to criminalize all instances of torture, regardless of whether they occur inside or outside a State's territorial jurisdiction. CAT Article 4 requires signatory States to criminalize all instances of torture, as well as attempts to commit and complicity or participation in torture.[2292] While CAT does not necessarily obligate a State to prevent acts of torture beyond its territorial jurisdiction, State Parties are nevertheless required to criminalize such acts and impose appropriate penalties.

CAT Article 5 establishes minimum jurisdictional measures that each State Party must adopt with respect to offenses described in CAT Article 4. A State Party to CAT must establish jurisdiction over CAT Article 4 offenses when:

- the offenses are committed in any territory under its jurisdiction or on board a ship or aircraft registered in that State;
- the alleged offender is a national of that State;
- the victim was a national of that State if that State considers it appropriate; or

[2292] CAT art. 4(1).

- the alleged offender is present in any territory under its jurisdiction and the state does not extradite him in accordance with CAT Article 8, which makes torture an extraditable offense.[2293]

In order to fulfill its obligations under CAT Articles 4 and 5, the United States enacted §§ 23402340B of the United States Criminal Code, which criminalize torture occurring *outside* the United States.[2294] Jurisdiction occurs when the alleged offender is either a national of the United States or is present in the United States, irrespective of the nationality of the victim or alleged offender.[2295] Congress did not enact legislation expressly prohibiting torture occurring *within* the United States, as it was presumed that such acts would "be covered by existing applicable federal and [U.S.] state statutes,"[2296] such as those statutes criminalizing assault, manslaughter, and murder. The Federal Torture Statute criminalizes torture, as well as attempts and conspiracies to commit torture.[2297]

The Federal Torture Statute provides that the specific intent of the actor to commit torture is a requisite component of the criminal offense.[2298] Specific intent is "the intent to accomplish the precise criminal act that one is later charged with."[2299] This degree of intent differs from general intent, which usually "takes the form of recklessness (involving actual awareness of a risk and the culpable taking of that risk) or negligence (involving blameworthy inadvertence)."[2300]

Application of CAT and Implementing Legislation to the Practice of Extraordinary Renditions

Although the express intent of CAT was to help ensure that no one would be subjected to torture,[2301] it is arguably unclear as to whether CAT would in *all* circumstances bar renditions to countries that practice torture, including possibly in certain cases where the rendering State was aware that a rendered person would likely be tortured. Clearly, it would violate U.S. criminal law and CAT obligations for a U.S. official to conspire to commit torture via rendition, regardless of where such renditions would occur. However, it is not altogether clear that CAT prohibits the rendering of persons seized *outside* the United States, or whether criminal sanctions would apply to a U.S. official who authorized a rendition without intending to facilitate the torture of the rendered person (as opposed to, for instance, the harsh mistreatment of the rendered person to a degree not rising to the level of torture).

Renditions from the United States

CAT Article 3 clearly prohibits the rendition of persons from the territory of a signatory State to another State when there are substantial grounds for believing the person would be tortured. Even if it could be technically argued that renditions do not constitute "extraditions" within the meaning of CAT Article 3, and the rendition was to a country other than one where the person previously resided (meaning that the person was not being "returned" to a country where he would risk torture), such transfers would still violate the Convention's requirement that no State Party "expel" a person from its territory to another State where he is more likely than not to be tortured.

If the United States were to receive diplomatic assurances from a State that it would not torture a person rendered there, and such assurances were deemed sufficiently credible, the rendition would not facially appear to violate either CAT Article 3 or domestic implementing legislation.

U.S. regulations permit the use of assurances in removal and extradition decisions, and CAT does not discuss their usage. As mentioned previously, however, the United States is obligated to execute its CAT obligations in good faith,[2302] and therefore must exercise appropriate discretion in its use of diplomatic assurances. If a State consistently violated the terms of its diplomatic assurances, or the United States learned that a particular assurance would not be met, the United States would presumably need to look beyond the face of such

promises before permitting the transfer of an individual to that country. Again, neither CAT nor U.S. implementing regulations prohibit the United States from transferring persons to States where they would face harsh treatment—including treatment that would be prohibited if carried out by U.S. authorities—that does not rise to the level of torture. Indeed, the United States could conceivably render a person to a State after receiving sufficient diplomatic representations that the rendered person could be accorded cruel and inhumane treatment not rising to the level of torture without violating CAT or CAT-implementing regulations.

Renditions from Outside the United States

As mentioned earlier, while CAT Article 2(2) provides that there are "no … circumstances whatsoever" allowing torture, certain other CAT provisions do not use language coextensive in scope when discussing related obligations owed by Convention parties. While CAT Article 3 clearly limits renditions from the United States, it is not altogether certain as to what extent CAT applies to situations where a country seizes suspects outside of its territorial jurisdiction and directly renders them to another country.[2303]

Extraterritorial Application of CAT Article 3

The territorial scope of CAT Article 3 is a matter of debate. As a general matter, the United States has taken the position that human rights treaties "apply to persons living in the territory of the United States, and not to any person with whom agents of our government deal in the international community."[2304] In 2006, representatives of the U.S. State Department informed the CAT Committee Against Torture that the United States does not believe CAT Article 3 applies to persons outside U.S. territory.[2305] However, these representatives also claimed that as a matter of policy, the United States accords CAT Article 3 protections to all persons in U.S. custody, regardless of whether such persons were found in U.S. territory.[2306] In congressional testimony in June 2008, State Department

[2303] The Washington Post has alleged that U.S. intelligence and law-enforcement officials have, on occasion, seized a terrorist suspect abroad and rendered him to a foreign intelligence service known to employ torture with a list of questions that these U.S. officials want answered. Dana Priest & Barton Gellman, "U.S. Decries Abuse but Defends Interrogations," Washington Post, December 26, 2002, p. A1.

Legal Advisor John Bellinger testified that the view that CAT Article 3 did not apply to extraterritorially has "been the long-standing legal position[] of the United States since the Convention against Torture was ratified in 1994."[2307]

Although the scope of human rights treaties may generally be limited to conduct occurring within the territorial jurisdiction of parties, it seems clear that at least some CAT provisions are extraterritorial in scope. Most notably, CAT Articles 4-5 require parties to criminalize all acts of torture, regardless of where they occur.[2308] Indeed, the Federal Torture Statute implementing this obligation expressly covers torture occurring "outside the United States."[2309] Although several CAT provisions limit their scope to acts occurring "in any territory under [the State Party's] jurisdiction,"[2310] CAT Article 3 does not contain a similar limiting provision. Accordingly it could be argued that, like CAT Articles 4-5, CAT Article 3 is intended to be extraterritorial in scope.

Nevertheless, it could still be argued that the express provisions of CAT Article 3 do not apply to extraordinary renditions occurring outside the United States, at least so long as the person is not rendered to a country where he has formerly resided. Article 3 states that no party shall "expel, return ('refouler') or extradite a person" to a country where there are substantial grounds to believe that he or she will be tortured. It could be argued, however, that certain extraterritorial renditions are not covered by this provision. Seizing a person in one country and transferring him to another would arguably not constitute "expelling" the person, if a State is understood only to be able to "expel" persons from territory over which it exercises sovereign authority. So long as these persons were rendered to countries where they had not previously resided, it also could not be said that the

Bellinger, III, Legal Advisor, State Department).

[2308] CAT Article 5 requires each State to establish jurisdiction over some (but not all) extraterritorial torture offenses, including when the offender is either a national of the State or is found in the State's territory and the State does not extradite him.

[2309] 18 U.S.C. §2340A. See also Report to CAT Committee, supra footnote 79, at paras 44-46 (discussing U.S. implementation of obligations under CAT Articles 4-5, including through the Federal Torture Statute and the Military Extraterritorial Jurisdiction Act, 18 U.S.C. §§ 3261 et seq., which extends U.S. criminal jurisdiction over certain categories of individuals for conduct occurring outside the United States).

[2310] See CAT arts. 2, 6-7, 11-13, 16.

United States "returned" these persons to countries where they faced torture (though persons rendered to countries where they had previously resided would presumably be protected under CAT Article 3). In addition, if such renditions were not executed via a formal process, it could be argued they did not constitute extraditions for the purposes of Article 3.[2311] Accordingly, it could be argued that the United States would not violate the express language of Article 3 if it rendered persons to countries where they faced torture, so long as no part of these renditions occurred within the territorial jurisdiction of the United States.[2312]

Critics of this view might argue that such a narrow interpretation of CAT Article 3 would contradict the Convention's over-arching goal to prevent torture. The fact that CAT requires parties to take legal steps to eliminate torture within their respective territories and to impose criminal penalties on torture offenders, coupled with the Convention's statement that "no exceptional circumstances whatsoever" can be used to justify torture, arguably imply that a State Party may never exercise or be complicit in the use of torture, even when it occurs extraterritorially. It could be further argued that the drafters of CAT did not explicitly discuss extraterritorial renditions because they were either not contemplated or, in cases where such renditions might occur absent the consent of the hosting country, because these actions were arguably already understood to be impermissible under international law.[2313] Indeed, some of the drafters of

---

[2311] See BASSIOUNI, supra footnote 1, at 29 ("Extradition in contemporary practice means a formal process by which a person is surrendered by one state to another based on a treaty, reciprocity, or comity.").

[2312] In Sale v. Haitian Centers Council, Inc., 509 U.S. 155 (1993), the Supreme Court held that the interdiction of Haitian refugees by the United States did not violate U.S. obligations under the U.N. Convention Relating to the Status of Refugees. The Court concluded that the Convention's provisions providing that no Contracting Party "shall expel or return ('refouler') a refugee" facing persecution applies only to refugees within a Party's territory, and not to those interdicted on the high seas. Id. at 179-183. Some have suggested that CAT Article 3's limitation on the transfer of persons should also be interpreted in a non-extraterritorial fashion. John Yoo, Transferring Terrorists, 79 NOTRE DAME L. REV. 1183, 1229 (2004) ("Given the Supreme Court's interpretation [in Sale] of identical language in the Refugee Convention, it makes no sense to view the Torture Convention as affecting the transfer of prisoners held outside the United States to another country."). On the other hand, the Sale Court's interpretation of the Refugee Convention's prohibition on the expulsion or return of refugees was largely based on this prohibition's interplay with other Convention provisions. Reading this prohibition to apply extraterritorially would create "an absurd anomaly" with a related Convention provision that only applied to refugees within a Convention Party's territory. Sale, 509 U.S. at 179180. In contrast, reading CAT Article 3 as being extraterritorial in scope would not have an incongruous effect on the interpretation of other CAT provisions.

[2313] See supra footnote 8.

CAT have taken the position that Article 3 was "intended to cover all measures by which a person is physically transferred to another State."[2314]

Opponents of a narrow interpretation of CAT would likely argue that it is contrary to the purpose of CAT to interpret the Convention as prohibiting formal transfers of persons to States where they face torture while still allowing such transfers through irregular forms of transfer. In 1994, the CAT Committee against Torture declared in a non-binding opinion that Article 3 prevents not only the return of a person to a country where he or she is in danger of being tortured, but also prohibits the person's transfer to "any other country where he runs a real risk of being expelled or returned to [his or her country of origin] or of being subjected to torture."[2315] More recently in 2006, the Committee urged the United States to "apply the non-refoulement guarantee [of CAT Article 3] to all detainees in its custody, cease the rendition of suspects, in particular by its intelligence agencies, to States where they face a real risk of torture, in order to comply with its obligations under article 3 of the Convention."[2316]

Extraterritorial Application of Legislation Implementing CAT Article 3

Beyond CAT, it is important to note that, given the express language of CAT-implementing legislation, the United States cannot "expel, extradite, or otherwise effect the involuntary return of any person to a country in which there are substantial grounds for believing the person would be in danger of being subjected to torture, *regardless of whether the person is physically present in the United States*."[2317] It may be argued that this express statutory language prohibits renditions from outside the United States, even if such renditions would not otherwise be in violation of CAT obligations.[2318]

[2314] J. HERMAN BURGERS & HANS DANELIUS, THE UNITED NATIONS CONVENTION AGAINST TORTURE: A HANDBOOK ON THE CONVENTION AGAINST TORTURE AND OTHER CRUEL, INHUMAN, OR DEGRADING TREATMENT OR PUNISHMENT 126 (1988). On the other hand, the State Department has claimed that "Neither the text of the Convention, its negotiating history, nor the U.S. record of ratification supports a view that Article 3 of the CAT applies to persons outside the territory of [a Party]." Written Responses, supra footnote 78.

[2315] Committee against Torture, Communication No 13/1993: Switzerland. 27/04/94 (Mutombo v. Switzerland), CAT/C/12/D/13/1993 (1994) at para. 10.

[2316] Committee Recommendations, supra footnote 62, at para. 20.

[2317] P.L. 105-277 at § 2242(a) (emphasis added).

[2318] Though it generally could be argued that a State can only "expel" someone from a territory over which the State exercises sovereign authority, the language of the U.S. legislation implementing CAT may suggest an intent by Congress to broadly define the prohibition on "expel[ling]" persons to countries where they would likely face torture, so that this prohibition covers not only expulsions from areas over which the United States exercises sovereign authority,

Two possible counter-arguments could be made to this position, at least in certain circumstances. The first and perhaps most compelling counter-argument is that although FARRA generally prohibits persons from being expelled, extradited, or involuntarily returned regardless of whether the person is physically present in the United States, section 2243(c) of the act makes an exception requiring federal agencies to exclude from the protection of CAT-implementing regulations any aliens who, inter alia, are reasonably believed to pose a danger to the United States, "to the maximum extent [such exclusions are] consistent" with CAT obligations.[2319] Accordingly, presuming for the sake of argument that CAT does not protect persons believed to be security dangers from being rendered from outside the United States, FARRA would require such persons to be excluded from the protection of any CAT-implementing regulations as well.

A second counter-argument is that the clause "regardless of whether the person is physically present in the United States" should be read only in reference to the prohibition contained in the CAT-implementing legislation upon the "involuntary return" of persons to countries where they would more likely than not be tortured, and not be read in reference to the prohibition on the extradition or expulsion of persons. CAT Article 3 obligates States not to "expel, return ('refouler') or extradite a person" to a State where he would be at substantial risk of torture. The principle of *non-refoulement* is commonly understood to prohibit not simply the exclusion of persons from the territory of the receiving State, but also a State from "turning back" persons at its borders and compelling their involuntary return to their country of origin.[2320] Unlike CAT Article 3, CAT-implementing legislation enacted by the United States does not use the term "refouler." However, its use of the phrase "involuntary return ... regardless of whether the person is physically present in the United States" appears to reflect the principle of non-refoulement expressed in CAT. It could be argued that the use of the phrase "regardless of whether the person is physically present in the

---

but also "expulsions" from all other areas (e.g., rendering persons captured in non-U.S. territory to other States).

[2319] Id. at § 2242(c).

[2320] For additional background on the concept of non-refoulement and its development in international human rights law, see Elihu Lauterpacht & Daniel Bethlehem, The Scope and Content of the Principle of Non-refoulement, in REFUGEE PROTECTION IN INTERNATIONAL LAW:UNHCR'S GLOBAL CONSULTATIONS ON INTERNATIONAL PROTECTION 78-177 (Erika Feller, Volker Türk and Frances Nicholson eds., 2003). It should be noted that the CAT-implementing legislation prohibiting the return of any person to a country where he would face torture, regardless of whether he was physically present in the United States, was enacted five years after the Supreme Court's decision in Sale v. Haitian Centers Council, Inc., 509 U.S. 155 (1993). In Sale, the Court found that the Refugee Convention's prohibition on the refoulement of refugees was not intended to apply extraterritorially. Sale, 509 U.S. at 179-187. See also supra footnote 85.

United States" in CAT-implementing legislation was only intended to be read in reference to the "involuntary return" phrase that precedes it (a reading that reflects the non-refoulement obligation imposed by CAT), and not meant also to be read in reference to the prohibition imposed upon the expulsion and extradition of persons to countries where they would likely face torture, as this alternative reading would arguably go beyond the non-refoulement obligations imposed upon the United States by the express language of CAT.

Regardless of whether renditions that occur outside of the United States are covered under CAT Article 3 and CAT-implementing legislation and regulations, CAT Article 4 and corresponding domestic law criminalizing all acts of torture and complicity therein would be controlling. Accordingly, U.S. officials could not conspire with officials in other States to render a person so that he would be tortured. As discussed below, however, criminal penalties may not necessarily attach to a person who renders another with the knowledge that he will likely be tortured.

Criminal Sanctions for Participation in Torture

CAT Article 4 and the Federal Torture Statute do not expressly prohibit the transfer of a person to a State where he is more likely than not to face torture. Indeed, the Federal Torture Statute only imposes criminal penalties for acts or attempts to commit torture and, most relevantly to the subject of renditions, conspiracies to commit torture. Clearly, if a U.S. official rendered a person to another country with instructions for the country to torture the rendered individual, that official could be criminally liable under the Federal Torture Statute.[2321]

However, it appears unlikely that a U.S. official would be found criminally liable for conspiracy to commit torture if he authorized a rendition after receiving assurances that the rendered person would not be tortured. It is generally understood that a conspiracy to commit a crime requires an agreement between parties for a common purpose.[2322] Presuming that the United States received

[2321] Such an official might also be charged under the federal statute governing accomplice liability, which makes it a criminal offense to willfully cause an act to be done which, if directly performed by him or another, would be a criminal offense. 18 U.S.C. § 2.

[2322] See, e.g., Iannelli v. United States, 420 U.S. 770, 777 (1975) ("[c]onspiracy is an inchoate offense, the essence of which is an agreement to commit an unlawful act"); United States v. Evans, 970 F.2d 663, 668 (10th Cir. 1992) ("[to] prove conspiracy, the government must show '[1] that two or more persons agreed to violate the law, [2] that the defendant knew at least the essential objectives of the conspiracy, … [3] that the defendant knowingly and voluntarily became a part of it,' and [4] that the alleged coconspirators were interdependent") (quoting United States v. Fox, 902 F.2d 1508, 1514 (10th Cir. 1990)); United States v. Pearce, 912 F.2d 159, 161 (6th Cir. 1990) ("the essential element of conspiracy is that 'the members of the conspiracy in some way or

assurances before rendering a person to another country, it would be difficult to argue that the official "agreed" to facilitate the rendered person's subsequent torture.

Other Statutes and Treaties Relevant to the Issue of Renditions

Although CAT and its implementing legislation provide the primary legal constraints upon the rendition of persons to countries believed to engage in torture, other treaties and statutes are also potentially relevant. The following paragraphs briefly discuss a few of them.

1949 Geneva Conventions

In certain situations, the 1949 Geneva Conventions may impose limitations on the use of renditions separate from those imposed by CAT. Each of the four Conventions accords protections to specified categories of persons in armed conflict or in post-conflict, occupied territory.[2323] The torture, or inhumane or degrading treatment of persons belonging to specified categories—including civilians and protected prisoners of war (POWs)—is expressly prohibited by the Conventions.[2324] In addition, "[n]o physical or moral coercion shall be exercised against protected [civilians], in particular to obtain information from them or from third parties."[2325]

The Geneva Conventions impose limitations on the transfer of protected persons. Civilians may not be *forcibly* (as opposed to voluntarily) transferred to another State.[2326] A violation of this obligation represents a "grave breach" of the relevant Geneva Convention and therefore constitutes a war crime.[2327] However, it is not a violation of the Geneva Conventions to extradite such persons, in compliance

---

manner, or through some contrivance, came to a mutual understanding to try to accomplish a common and unlawful plan'") (internal citation omitted).

[2323] Geneva Convention for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field, 6 U.S.T. 3114; Geneva Convention for the Amelioration of the Condition of Wounded, Sick and Shipwrecked Members of Armed Forces at Sea, 6 U.S.T. 3217; Geneva Convention Relative to the Treatment of Prisoners of War, 6 U.S.T. 3316 [hereinafter "Third Geneva Convention"]; Geneva Convention Relative to the Protection of Civilian Persons in Time of War, 6 U.S.T. 3516 [hereinafter "Fourth Geneva Convention"] (entered into force October 21, 1950). The United States, Iraq, and Afghanistan are all parties to the Conventions.

[2324] See, e.g., Third Geneva Convention, arts. 3, 17, 87, 130; Fourth Geneva Convention, arts. 3, 32, 147.

[2325] Fourth Geneva Convention, art. 31.

[2326] Id., art. 49.

[2327] Id., art. 147.

with extradition treaties concluded before the outbreak of hostilities, who are charged with ordinary criminal law offenses.[2328]

Neither civilians nor protected POWs may be transferred to penitentiaries for disciplinary punishment.[2329] In addition, persons protected by the Conventions may only be transferred to other Convention parties, and then only after the transferring Power "has satisfied itself of the willingness and ability of such transferee Power to apply the Convention."[2330] If the transferee Power fails to abide by the Convention in any important respect (e.g., torturing a transferred person), upon notification the transferring Power is required to either request their return or "take effective measures to correct the situation."[2331] Accordingly, in order to comply with its Convention obligations, the United States may only render a protected person if (1) the State to which the person was being rendered was a member of the Convention; (2) the United States had received assurances that the person would not be tortured if rendered there; and (3) the United States requested the return of the rendered person or took other effective measures if the rendered individual was subsequently tortured.

In the case of armed conflicts that are not of an international character and occur in the territory of a High Contracting Party, each party is obligated under Article 3 of each of the 1949 Geneva Conventions (Common Article 3) to accord *de minimis* protections to "[p]ersons taking no active part in the hostilities, including members of armed forces who have laid down their arms and those placed hors de combat by sickness, wounds, detention, or any other cause." Parties are required to treat such persons "humanely," and are prohibited from subjecting such persons to "violence to life and person … mutilation, cruel treatment and torture … [and] [o]utrages upon personal dignity, in particular humiliating and degrading treatment."

As mentioned previously, the Geneva Conventions apply in limited circumstances. Besides only applying in armed conflict or in post-conflict occupied territory, the Conventions also only protect designated categories of persons (though other persons may nevertheless be owed certain protections under customary laws of war). At least since early 2002, the Bush Administration took the position that the Geneva Conventions did not apply to members of Al

---

[2328] Id., art. 45.

[2329] Third Geneva Convention, art. 97; Fourth Geneva Convention art. 124. The Conventions do not expressly prohibit the transfer of such persons for non-disciplinary reasons.

[2331] Third Geneva Convention, art. 12; Fourth Geneva Convention, art. 45.

Qaeda.[2332] Reportedly, the Administration also concluded that the Geneva Convention prohibition on the "forcible transfer" of civilians did not apply to "illegal aliens" who entered Iraq following the U.S.-led invasion, or bar the temporary removal of persons from Iraq for the purposes of interrogation.[2333]

In the 2006 case of *Hamdan v. Rumsfeld*, the Supreme Court held that Common Article 3 of the Geneva Conventions applied to the armed conflict with Al Qaeda and accorded Al Qaeda members certain minimal protections, even if such persons were not otherwise covered by other Convention provisions (i.e., those covering "lawful combatants" and civilians in conflicts between States). Common Article 3 does not expressly prohibit the transfer of persons to other countries, even if such persons might face cruel treatment or torture there. Some have argued that Common Article 3 nevertheless prohibits renditions committed to facilitate the rendered person's torture or cruel treatment.[2334] However, it is unclear whether this interpretation is proper[2335] or that it would cover all renditions to countries where the detainee would face torture or cruel treatment (e.g., when the rendering country does not request the torture or cruel treatment of the detainee by the party to which he is rendered).

For purposes of U.S. law, however, it does not appear that Common Article 3 has been understood to cover renditions of persons to countries where they might face torture.[2336] The Military Commissions Act of 2006 (MCA, P.L. 109-366),

---

[2333] See Dana Priest, "Memo Lets CIA Take Detainees Out of Iraq," Washington Post, October 24, 2004, p. A1 (discussing draft DOJ Office of Legal Counsel opinion dated March 19, 2004); Jack L. Goldsmith III, Asst. Attorney General, Permissibility of Relocating Certain "Protected Persons" from Occupied Iraq,. Dept. of Justice, Office of Legal Counsel, March 19, 2004 (draft), available at http://www.washingtonpost.com/wp-srv/nation/documents/ doj_memo031904.pdf. See also Jack L. Goldsmith III, Asst. Attorney General , "Protected Person" Status in Occupied Iraq under the Fourth Geneva Convention, Dept. of Justice, Office of Legal Counsel, March 18, 2004, http://www.usdoj.gov/olc/2004/gc4mar18.pdf.

[2334] See David Weissbrodt & Amy Bergquist, Extraordinary Rendition: a Human Rights Analysis, 19 HARV. HUM. RTS. J. 123, 151-153 (2006).

[2335] As discussed, several Convention provisions specifically discuss and limit the transfer of protected persons to third parties when such persons would face treatment prohibited by the Conventions. See infra at 19-20. It could be argued that these provisions would be made redundant if Convention provisions covering mistreatment were also read to cover the rendition of detainees to third-parties who might subject them to mistreatment.

[2336] U.S. authorities have apparently not considered Common Article 3 to be relevant in military transfer decisions, and have instead only considered whether the transfer would be consistent with CAT Article 3. Declaration of Joseph Benkert, Principal Deputy Assistant Secretary of

which was signed into law on October 17, 2006, provides that for purposes of U.S. law it is generally a violation of Common Article 3 to engage in conduct (1) inconsistent with the Detainee Treatment Act of 2005, which prohibits "cruel, inhuman, or degrading treatment" of persons in U.S. custody or control;[2337] or (2) subject to criminal penalty under provisions of the War Crimes Act, as amended, concerning "grave breaches" of Common Article 3.[2338] Under this standard, torture and cruel treatment would only be considered a violation of Common Article 3 in cases where the victim was in the custody or control of the United States, not in circumstances where the victim was transferred to the custody and control of a third-party and was subsequently treated harshly. As discussed in the following paragraph, however, this standard might still prohibit U.S. personnel from rendering a person covered by Common Article 3 if they have conspired with the receiving party to intentionally cause the transferee serious bodily injury.

War Crimes Act

The War Crimes Act imposes criminal penalties upon U.S. nationals or Armed Forces members who commit listed offenses of the laws of war.[2339] Persons who commit applicable war crimes are potentially subject to life imprisonment or, if death results from such acts, the death penalty. War crimes include "grave breaches" of the Geneva Conventions,[2340] such as torture of protected POWs or civilians and the "unlawful deportation or transfer or unlawful confinement" of protected civilians,[2341] as well as certain violations of Common Article 3.[2342]

As discussed previously, following the Supreme Court's ruling in Hamdan, it is understood as a matter of U.S. law that Common Article 3 covers the conflict with Al Qaeda and accords Al Qaeda members captured in that armed conflict with

Defense for Global Security Affairs, DoD, executed on June 8, 2007, at para. 3, In re Guantanamo Bay Detainee Litigation, Case No. 1:05-cv-01220 (D.D.C. 2007).

[2337] For background on the Detainee Treatment Act's prohibition on "cruel, inhuman, or degrading treatment," see CRS Report RL33655, Interrogation of Detainees: Requirements of the Detainee Treatment Act, by Michael John Garcia.

[2338] For background, see CRS Report RL33662, The War Crimes Act: Current Issues, by Michael John Garcia.

[2339] 18 U.S.C. § 2441.

[2340] 18 U.S.C. §§ 2441(c)(1).

[2341] E.g., Fourth Geneva Convention, art. 147.

[2342] 18 U.S.C. § 2441(c)(3). Until October 17, 2006, the War Crimes Act prohibited any violation of Common Article 3. The Military Commissions Act (P.L. 109-366) amended this provision so that only certain, "grave" violations of Common Article 3 are subject to criminal penalty. This amendment was retroactive in effect.

certain protections.[2343] Accordingly, certain forms of treatment with respect to Al Qaeda members is subject to criminal penalty, including torture, certain lesser forms of cruel treatment, and the intentional infliction of serious bodily injury.

Although the War Crimes Act imposes criminal penalties for conspiring to subject protected persons to torture or cruel treatment, such persons must be in the offender's custody or control. Accordingly, the provisions of the War Crimes Act covering torture and cruel treatment do not appear to cover the rendition of persons to countries for the purpose of cruel treatment or torture (though any U.S. personnel who conspired with officials in other States to render a person so that he would be tortured could still be prosecuted under the Federal Torture Statute).

However, the War Crimes Act may be interpreted as prohibiting some renditions. As amended by the MCA, the War Crimes Act expressly prohibits persons from conspiring to commit such acts as rape, mutilation or maiming, or causing "serious bodily injury" against persons protected by Common Article 3.[2344] A person may be subject to criminal penalty for these offenses regardless of whether the victim was in his custody or control. Accordingly, any U.S. personnel who conspire with officials in other States to render a person so that he would be subjected to serious bodily injury, rape, or sexual assault would appear to be subject to criminal liability under the War Crimes Act. As a practical matter, it is unclear whether the War Crimes Act would prohibit renditions in any circumstance not already prohibited under the Federal Torture Statute.[2345]

[2343] It is not clear that Common Article 3 is applicable to captured Al Qaeda agents in all circumstances. The Geneva Conventions concern treatment owed to protected persons in an armed conflict, and would arguably be inapplicable to law enforcement activities relating to Al Qaeda agents. International terrorism is recognized as a criminal offense under both domestic law and various international agreements. E.g., 18 U.S.C. § 2332b (concerning certain terrorist activities transcending international boundaries); International Convention for the Suppression of the Financing of Terrorism, S. Treaty Doc. No. 106.49, entered into force for the United States on July 26, 2002; International Convention for the Suppression of Terrorist Bombings, S. Treaty Doc. No. 106-6, entered into force for the United States on July 26, 2002. Whether the Geneva Conventions are applicable to the arrest and detention of Al Qaeda agents may depend upon whether such agents were (1) captured on or away from the battlefield; (2) captured by military or law enforcement agents; and (3) charged with a criminal offense, and if so, whether the offense relates to a violation of the laws of war or some other activity.

[2344] For an act of mutilation or maiming to be covered by the War Crimes Act, it must be committed in the course of committing another offense under the War Crimes Act that is listed as a "grave breach" of Common Article 3.

[2345] Mutilation and maiming, the intentional causing of serious bodily injury (defined by reference to 18 U.S.C. § 113b as bodily injury involving a substantial risk of death, extreme physical pain, disfigurement, or loss or impairment of the function of a bodily member, organ, or mental faculty), and rape have all been found by U.S. courts to constitute torture, at least in some circumstances. See Zubeda v. Ashcroft, 333 F.3d 463 (3rd Cir. 2003) ("[r]ape can constitute torture"); CRS Report RL33662, The War Crimes Act: Current Issues, by Michael John Garcia,

International Covenant on Civil and Political Rights

Article 7 of the International Covenant on Civil and Political Rights (ICCPR),[2346] ratified by the United States in 1992, prohibits the State Parties from subjecting persons "to torture or to cruel, inhuman, or degrading treatment or punishment."[2347] The Human Rights Committee, the monitoring body of the ICCPR, has interpreted this prohibition to prevent State Parties from exposing "individuals to the danger of torture or cruel, inhuman or degrading treatment or punishment upon return to another country by way of their extradition, expulsion or refoulement."[2348] Although the Committee is charged with monitoring the compliance of parties with the ICCPR and providing recommendations for improving treaty abidance, its opinions are not binding law.

U.S. ratification of the ICCPR was contingent upon the inclusion of a reservation that the treaty's substantive obligations were not self-executing (i.e., to take effect domestically, they require implementing legislation in order for courts to enforce them, though U.S. obligations under the treaty remain binding under international law).[2349] The United States also declared that it considered Article 7 binding "to the extent that 'cruel, inhuman or degrading treatment or punishment' [prohibited by ICCPR Article 7] means the cruel and unusual treatment or punishment prohibited by the Fifth, Eighth, and/or Fourteenth Amendments to the Constitution of the United States."[2350]

The United States has not enacted laws or regulations to comply with the Human Rights Committee's position that ICCPR Article 7 prohibits the transfer of persons to countries where they would likely face torture or cruel, inhuman, or degrading treatment. CAT-implementing regulations prohibit the transfer of

persons to countries where they would more likely than not face torture, but not cruel, inhuman, or degrading treatment that does not rise to the level of torture.

Universal Declaration of Human Rights

The U.N. Charter provides that it is the duty of the United Nations to promote "universal respect for, and observance of, human rights and fundamental freedoms,"[2351] and Member States have an obligation to work jointly and separately to promote such rights and freedoms.[2352] In 1948, the

U.N. General Assembly adopted the Universal Declaration of Human Rights,[2353] to explicate the "human rights and fundamental freedoms" that Member States were obliged to protect. The Universal Declaration prohibits, inter alia, the arbitrary arrest, detention, or exile of persons,[2354] as well as torture and cruel, inhuman, or degrading treatment.[2355]

The Universal Declaration is not a treaty and accordingly is not technically binding on the United States,[2356] though a number of its provisions are understood to reflect customary international law.[2357] The Universal Declaration does not include an enforcement provision.

Recent Developments

On January 22, 2009, President Barack Obama issued a series of Executive Orders concerning the treatment of persons apprehended by the United States in connection with armed conflicts or counterterrorism operations. The Orders do not expressly modify U.S. rendition policy, though one Order does mandate the closure of all CIA detention facilities, some of which were used to hold persons

[2356] See Sosa v. Alvarez-Machain, 542 U.S. 692, 734 (2004) (declining to apply protections espoused by the Universal Declaration of Human Rights because it "does not of its own force impose obligations as a matter of international law").

[2357] See Filartiga v. Pena-Irala, 630 F.2d 876, 882 (2d Cir. 1980). But see Sosa, 124 S.Ct. at 2761-62 (finding that certain provisions of the Universal Declaration did not in themselves constitute an international norm that would fulfill the criteria that existed in the 18th century for a norm to be customary international law).

seized by the United States in other locations.[2358] However, two of the Orders create separate task forces charged with reviewing aspects of U.S. detention policy, including the transfer of detainees to foreign States. The Executive Order entitled "Ensuring Lawful Interrogations" establishes a Special Interagency Task Force on Interrogation and Transfer Policies, which is charged with reviewing

> *the practices of transferring individuals to other nations in order to ensure that such practices comply with the domestic laws, international obligations, and policies of the United States and do not result in the transfer of individuals to other nations to face torture or otherwise for the purpose, or with the effect, of undermining or circumventing the commitments or obligations of the United States to ensure the humane treatment of individuals in its custody or control.[2359]*

Another Executive Order, entitled "Review of Detention Policy Options," creates a Special Task Force on Detainee Disposition, which is required

> *to conduct a comprehensive review of the lawful options available to the Federal Government with respect to the apprehension, detention, trial, transfer, release, or other disposition of individuals captured or apprehended in connection with armed conflicts and counterterrorism operations, and to identify such options as are consistent with the national security and foreign policy interests of the United States and the interests of justice.[2360]*

Each Task Force was required to issue a report to the President of its recommendations within 180 days, unless the Task Force chair determined that an extension was appropriate. In July, the Chairman of the Special Task Force on

[2359] Id., § 5. The Task Force is chaired by the Attorney General, and includes the Director of National Intelligence and the Secretary of Defense (who serve as co-vice-chairs); the Secretary of State; the Secretary of Homeland Security; the Director of the CIA; the Chairman of the Joint Chiefs of Staff; and other officers or full-time or permanent part-time employees of the United States, as determined by the Attorney General, with the concurrence of the head of the department or agency concerned.

[2360] Executive Order 13493, "Review of Detention Policy Options," 74 FED. REG. 4901, January 22, 2009, at § 1. The Task Force includes the Attorney General and Secretary of Defense, who serve as co-chairs; the Secretary of State; the Secretary of Homeland Security; the Director of National Intelligence; the Director of the Central Intelligence Agency; the Chairman of the Joint Chiefs of Staff; and other officers or full-time or permanent part-time employees of the United States, as determined by either of the co-chairs, with the concurrence of the head of the department or agency concerned.

Interrogation and Transfer Polices extended the deadline for the Task Force's final report by two months, while the deadline for the Special Task Force on Detainee Disposition was extended by six months.[2361]

On August 24, 2009, the Special Task Force on Interrogation and Transfer Polices issued its recommendations to the President, including with respect to the practice of rendition.[2362] These included recommendations to ensure that U.S. transfer practices comply with applicable legal requirements and do not result in the transfer of persons to face torture. The Task Force supported the continued use of assurances from a receiving country that an individual would not face torture if transferred there. However, the Task Force made recommendations intended to strengthen the procedures used in obtaining and evaluating such assurances. These include involving the State Department in evaluating assurances in all cases. The Task Force advised that relevant agencies obtaining assurances should "insist on a monitoring mechanism, or otherwise establish a monitoring mechanism, to ensure consistent, private access to the individual who has been transferred, with minimal advance notice to the detaining government."[2363] The Task Force also recommended that the Inspectors General of the Departments of State, Defense, and Homeland Security prepare an annual, coordinated report on transfers which were effectuated in reliance on assurances and were conducted by each of their agencies.

The Task Force made specific recommendations with respect to immigration removal proceedings and military transfer decisions. Classified recommendations were also made to ensure that, in the event that the Intelligence Community participates in a transfer, any affected individual is subjected to lawful treatment.

In the 110th Congress, legislative proposals were introduced to limit the ability of U.S. agencies to render persons to foreign States, and it is possible that similar proposals will be introduced in the 111th Congress. S. 1876, the National Security with Justice Act of 2007, introduced by Senator Biden on July 25, 2007, would have barred the United States from rendering or participating in the rendition of any individual to a foreign State absent authorization from the Foreign Intelligence Surveillance Court, except under limited circumstances in the case of

[2362] Department of Justice, "Special Task Force on Interrogations and Transfer Policies Issues Its Recommendations to the President," press release, August 24, 2009, http://www.usdoj.gov/opa/pr/2009/August/09-ag-835.html. The Task Force considered seven types of transfers: extradition, immigration removal proceedings, transfers pursuant to the Geneva Conventions, transfers from Guantanamo Bay, military transfers within or from Afghanistan, military transfers within or from Iraq, and transfers pursuant to intelligence authorities.

[2363] Id.

enemy combatants held by the United States (though renditions in such circumstances would still have to comply with other legal requirements). For an order to be issued by the Foreign Intelligence Surveillance Court authorizing a rendition, the requesting U.S. official would have needed to provide evidence that the rendered person was (1) an international terrorist; and (2) would not be subjected to torture or lesser forms of cruel, inhuman, or degrading treatment—a more stringent limitation on the transfer of persons than that expressly imposed by CAT Article 3, which only bars the transfer of persons to countries where they would face torture.

H.R. 1352, the Torture Outsourcing Prevention Act, introduced by Representative Markey on March 6, 2007, would have required the State Department to provide annual reports to appropriate congressional committees regarding countries where there are substantial grounds for believing that torture or cruel, inhuman, or degrading treatment is commonly used in the detention or interrogation of individuals. Generally, persons could not be transferred to such countries, whether through rendition or some other process. This prohibition could be waived by the Secretary of State in limited circumstances, including, at a minimum, when continuing access to each such person was granted to an independent humanitarian organization. Written or oral assurances made to the U.S. government would have been deemed insufficient to demonstrate that a person would not face torture or cruel, inhuman, or degrading treatment if rendered to a particular State.

18 U.S.C. CHAPTER 119: WIRE AND ELECTRONIC COMMUNICATIONS INTERCEPTION AND INTERCEPTION OF ORAL COMMUNICATIONS (18 U.S.C. §§ 2510-2522)

Title III and the Electronic Communications Privacy Act

Privacy: An Abbreviated Outline of Federal Statutes Governing Wiretapping and Electronic Eavesdropping, 98-327 (September 2, 2008)

GINA MARIE STEVENS & CHARLES DOYLE, CONGRESSIONAL RESEARCH SERV., PRIVACY: AN ABBREVIATED OUTLINE OF FEDERAL STATUTES GOVERNING WIRETAPPING AND ELECTRONIC EAVESDROPPING (2008), *available at* http://www.intelligencelaw.com/library/secondary/crs/pdf/98-327_9-2-2008.pdf.

Order Code 98-327
Updated September 2, 2008

Gina Marie Stevens and Charles Doyle
American Law Division

Summary

It is a federal crime to intentionally wiretap or electronically eavesdrop on the conversation of another without a court order or the consent of one of the parties to the conversation. Moreover, in eleven states, it is a state crime for anyone other than the police to intentionally wiretap and/or electronically eavesdrop on the conversation of another without the consent of all of the parties to the conversation. The federal crimes are punishable by imprisonment for up to five years and expose offenders to civil liability for damages, attorneys' fees, and possibly punitive damages. State crimes carry similar consequences. Even in states where one party consent interceptions are legal, they may well be contrary

to the professional obligations of members of the bar. The proscriptions often include a ban on using or disclosing the fruits of an illegal interception.

Statutory exceptions to these general prohibitions permit judicially supervised wiretapping or electronic eavesdropping conducted for law enforcement or foreign intelligence gathering purposes. Similar regimes — proscriptions with exceptions for government access under limited circumstances — exist for telephone records, e-mail and other forms of electronic communications.

Introduction

The first federal wiretap statute was a World War I provision enacted for the duration of the conflict and designed to protect confidential government information (citation for the authority for this and other statements made throughout this report may be found in the long version of this report, CRS Report 98-326, *Privacy: An Overview of Federal Statutes Governing Wiretapping and Electronic Eavesdropping*). The 1927 Radio Act outlawed intercepting and divulging private radio messages. The 1934 Communications Act extended the interception and divulgence ban to telephone and telegraph communications.

No federal law condemned secretly capturing face to face conversations by using hidden microphones or their ilk, and police and federal authorities employed them with increasing regularity. Then in the late 1960's, the Supreme Court held that the privacy protection afforded by the Fourth Amendment's warrant requirements enveloped all that over which an individual might have a "justifiable expectation of privacy" — including, under the appropriate circumstances, the individual's conversations.

In anticipation of the Court's announcement, several states had enlarged the powers of their courts to issue wiretapping and/or electronic eavesdropping warrants. The Court, however, found one of the more detailed of these constitutionally deficient. Congress responded with Title III of the Omnibus Crime Control and Safe Streets Act to provide a constitutionally viable procedure under which state and federal courts might approve wiretapping and electronic eavesdropping orders. Title III at the same time outlawed wiretapping and electronic eavesdropping except under court order or with the consent of one of the parties to the conversation.

Title III regulated capture of the spoken word, it did nothing to protect the more modern forms of communication — fax messages, e-mail, electronically transmitted data. Congress recast Title III in the Electronic Communications Privacy Act (ECPA) to correct this oversight. It responded to a Supreme Court opinion again — this one describing the President's inherent authority to approve warrantless wiretapping of purely domestic threats to national security — with the Foreign Intelligence Surveillance Act (FISA). FISA creates a judicial warrant procedure for foreign intelligence information gathering.

Crimes

Title III/ECPA bars the use of any mechanism (device), tape recorder included, to intentionally capture the spoken word or any communication being transmitted electronically (intercept wire, oral, or electronic communications) without the consent of one of the participants or a court order, 18 U.S.C. 2511(1)(a),(b). This applies to all telephone conversations whether a cell telephone is involved or not. It likewise applies to all face to face conversations unless they occur in a public place or under other circumstances where the speakers should reasonably have expected that their conversation would be overheard.

Most states have similar statutes, and even when it is not a federal crime, wiretapping and/or electronic eavesdropping by anyone other than the police is a state crime (under mens rea requirements that vary from state to state) when done without the consent of all parties to the conversation in California, Delaware, Florida, Illinois, Kansas, Maryland, Massachusetts, Montana, Oregon, Pennsylvania, and Washington.

Beyond interception (wiretapping or electronic eavesdropping), it is a federal crime:

- to endeavor to illegally intercept;
- to procure another to illegally intercept;
- to disclose information gained from an illegal interception, knowing or
- having reason to know that the information is the product of an illicit interception;
- to endeavor to knowingly disclose illegally intercepted information;
- to procure another to disclose illegally intercepted information;
- to endeavor to disclose or to disclose information:
    - knowing it was gained from a court ordered interception,
    - having acquired the information during a criminal investigation, and
    - intending to improperly obstruct a criminal investigation by the disclosure;
- to access stored e-mail communications or telephone records unlawfully;
- to use a trap and trace device or a pen register (machines that record the origin of income or the destination of outgoing calls respectively) without court approval or individual consent; or
- to abuse eavesdropping authority under the Foreign Intelligence Surveillance Act.

Violators face imprisonment for up to five years, fines of up to $250,000 ($500,000 for organizations); and civil liability to actual or liquidated damages, attorneys' fees, possibly punitive damages, and administrative or professional discipline. The products of illegal interceptions are inadmissible as evidence in either federal or state proceedings.

Procedure

Senior Justice Department officials or chief state or local prosecutors may authorize an application for court ordered wiretapping or electronic eavesdropping as part of the investigation of a list of predicate crimes. Applications and court orders authorizing interception include specifics as to the individuals and the details of the crime, the communication facilities or place where the interception is to occur, the communications to be intercepted, the identities (if known) of the person committing the offense and of the persons whose communications are to be intercepted, why alternative investigative methods would be futile or dangerous, the duration of the proposed interception, steps taken to avoid interception of innocent communications, the history of any prior interceptions, the nature of third party assistance required and the identity of those to provide it, and any additional information the judge may require.

A court may issue an order upon a finding of probable cause with respect to the offense, the suspect, the conversation, and futility or dangers associated with alternative methods. The orders are good for a maximum of 30 days, with the possibility of 30 day extensions. Intercepted communications are to be recorded and the evidence secured and placed under seal (with the possibility of copies for authorized law enforcement disclosure and use) along with the application and the court's order.

Within 90 days of the expiration of the termination of the order those whose communications have been intercepted are entitled to notice, and evidence secured through the intercept may be introduced into evidence with 10 days advance notice to the parties. Information secured through a court ordered interception may be disclosed to law enforcement or intelligence officers for the performance of their official duties and as evidence during legal proceedings.

In emergency cases involving organized crime, threats to national security, or immediate danger of death or serious injury, interceptions may be authorized by senior officials before the issuance of an order. In such cases, court approval must be sought within 48 hours and the interception abandoned and an inventory of the results turned over to the communicants, if approval is denied.

Any federal prosecutor may approve an application for a court order authorizing the interception of e-mail or other electronic communications upon probable cause of a felony and the other requirements for issuance and execution of a search warrant. With regard to stored e-mail or voice mail, communications in remote storage, and telephone and service provider records, government officials may gain access to electronic communications in electronic storage for less than six months under a search warrant issued upon probable cause to belief a crime has been committed and the search will produce evidence of the offense.

The government must use the same procedure to acquire older communications or those stored in remote computer storage if access is to be afforded without notice to the subscriber or customer. If the government officials are willing to afford the subscriber or customer prior notice, access may be granted under a court order showing that the information sought is relevant and material to a criminal investigation or under an administrative subpoena, a grand jury subpoena, a trial subpoena, or court order. General identifying and billing information is available to the government pursuant to an administrative subpoena, a grand jury or trial subpoena, a warrant, with the consent of the subscriber or customer, or under a court order issued with a showing that information is relevant and material to a criminal investigation.

Federal government attorneys and state and local police officers may apply for a court order authorizing the installation and use of a pen register and/or a trap and trace device upon certification that the information to be produced is relevant to a pending criminal investigation.

The approval procedure under the Foreign Intelligence Surveillance Act (FISA) is the most distinctive of the wiretap-related procedures. First, its focus is different. It is designed to secure foreign intelligence information not evidence of a crime (although the prospect of securing evidence is not disqualifying as long as there is a measurable foreign intelligence purpose); it operates in a highly secretive manner; and it is conducted entirely before the judges of an independent court convened for no other purpose.

The contents of FISA surveillance application and subsequent order include the identity of the applicant and an authorizing official; particularized information concerning the facilities or locations involved in the interception and of the foreign agent or power whose communications are the target of the interception; a detailed description of the communications to be intercepted and a summary of the minimization procedures to be followed; certification that the information cannot reasonable be obtained using alternative means; whether the information relates to a foreign attack, sabotage, terrorism or foreign clandestine intelligence activities; the means of accomplishing the interception; a history of past related applications; the term of the interception; any other information the judge requests.

FISA court judges issue orders approving electronic surveillance upon a finding that the application requirements have been met and that there is probable cause to believe that the target of the interceptions is a foreign power or the agent of a foreign power and the targeted places or facilities are used by foreign powers of their agents. As in the case of law enforcement wiretapping and electronic eavesdropping, there is authority to intercept prior to approval in emergency situations, but there is also statutory authority for a foreign intelligence surveillance interception without a court order when the communications sought are limited to those among or between foreign powers or involve nonverbal communications from places under the open and exclusive control of a foreign

power. The second of these is replete with reporting requirements to Congress and the FISA court.

In addition to surveillance provisions, FISA authorizes court orders in foreign intelligence cases for physical searches, the use of pen registers and trap and trace devices, and for the release of business records and other tangible items. The physical search sections mirror those governing electronic surveillance. FISA pen register and trap and trace procedures are similar to those of their law enforcement counterparts in ECPA, but with many of the attributes of other FISA provisions. The orders may be issued either by a member of the FISA court or by a FISA magistrate upon the certification of a federal officer that the information sought is likely to be relevant to an investigation of international terrorism or clandestine intelligence activities. They allow the Attorney General to authorize emergency installation and use as long as the application for an authorizing court order is filed within 48 hours and restrict the use of any resulting evidence if an order is not subsequently granted. The provisions for use of the information acquired run parallel to those that apply to FISA surveillance and physicalsearch orders.

The USA PATRIOT Act and later the USA PATRIOT Improvement and Reauthorization Act temporarily rewrote the FISA business records procedure that expires on December 31, 2009. In its temporary form FISA orders may apply to any tangible property relevant to foreign intelligence investigation. Recipients may challenge the legality of the order and ask that its secrecy requirements be lifted or modified. As additional safeguards, Congress insisted upon the promulgation of miminization standards; established use restrictions; required the approval of senior officials for orders covering library and certain other types of records; confirmed and reenforced reporting requirements; and directed the Justice Department's Inspector General to conduct an audit of the use of the FISA tangible item authority.

Protect America Act.

The Protect America Act (P.L. 110-55), which has since expired, granted the Attorney General and the Director of National Intelligence the power, under limited conditions, to authorize gathering foreign intelligence information, including by electronic surveillance, (for up to a year) relating to persons believed to be overseas. In order to exercise that power, the Attorney General and the Director of National Intelligence were required to certify under oath that the collection effort involved: (1) procedures reasonably calculated to assure that the information sought concerned a person outside the United States; (2) communications to which service providers or others had access; (3) a desire, at least in significant part, to gather foreign intelligence information; (4) accompanying minimization procedures; and (5) no electronic surveillance other than that directed at a person reasonably believed to be abroad, 50 U.S.C. 1805b(a)(expired).

That having been done or in emergency situations with their oral approval, the Attorney General and Director of National Intelligence might direct the communications providers, or others with access, to immediately assist in the gathering of the foreign intelligence information in a manner least disruptive of service to the target and under confidentiality restrictions imposed by the Attorney General and the Director of National Intelligence. The directive came with the promise of compensation at prevailing rates as well as immunity from civil liability and was enforceable through the contempt power of the FISA court. Recipients were entitled to seek judicial modification of a directive, issued contrary to the statute or otherwise unlawfully, in the FISA court under expedited procedures.

The FISA court was also tasked with the responsibility of reviewing the procedures crafted to ensure that the authority was only invoked with respect to persons reasonably believed to be found overseas. Should the court have determined that the procedures were clearly erroneous, the government was free to amend them or to appeal the determination initially to the Foreign Intelligence Surveillance Court of Review and then to the Supreme Court.

Foreign Intelligence Surveillance Act of 1978 Amendments Act of 2008 (P.L. 110-261).

P.L. 110-261 (H.R. 6304), signed July 10, 2008, addresses four FISA-related matters. First, in a manner reminiscent of the Protect America Act, it provides temporary authority to gather foreign intelligence information from or relating to overseastargets. Second, it reasserts the exclusivity of FISA and Title III/ECPA as a basis for governmental electronic surveillance. Third, it instructs the Inspectors General in various agencies to conduct a review and report to Congress on the Terrorist Surveillance Program. Fourth, it seeks to protect those who assist government surveillance activities from civil liability.

Federal Criminal Statutes Outlawing Wiretapping and Electronic Eavesdropping

Summary

This report provides an overview of federal law governing wiretapping and electronic eavesdropping. It also appends citations to state law in the area and contains a bibliography of legal commentary as well as the text of the Electronic Communications Privacy Act (ECPA) and the Foreign Intelligence Surveillance Act (FISA).

It is a federal crime to wiretap or to use a machine to capture the communications of others without court approval, unless one of the parties has given their prior consent. It is likewise a federal crime to use or disclose any information acquired by illegal wiretapping or electronic eavesdropping. Violations can result in imprisonment for not more than five years; fines up to $250,000 (up to $500,000 for organizations); in civil liability for damages, attorneys' fees and possibly punitive damages; in disciplinary action against any attorneys involved; and in suppression of any derivative evidence. Congress has created separate but comparable protective schemes for electronic communications (e.g., e-mail) and against the surreptitious use of telephone call monitoring practices such as pen registers and trap and trace devices.

Each of these protective schemes comes with a procedural mechanism to afford limited law enforcement access to private communications and communications records under conditions consistent with the dictates of the Fourth Amendment. The government has been given narrowly confined authority to engage in electronic surveillance, conduct physical searches, install and use pen registers and trap and trace devices for law enforcement purposes under the Electronic Communications Privacy Act and for purposes of foreign intelligence gathering under the Foreign Intelligence Surveillance Act. Two FISA provisions, born in the USA PATRIOT Act and dealing with roving wiretaps (section 206) and business records (section 215), are scheduled to expire on December 31, 2009.

This report includes a brief summary of the expired Protect America Act, P.L. 110-55 and of the Foreign Intelligence Surveillance Act of 1978 Amendments Act of 2008, P.L. 110-261 (H.R. 6304). It is available in an abridged form without footnotes, quotations, or appendices as CRS Report 98-327, *Privacy: An Abbreviated Outline of Federal Statutes Governing Wiretapping and Electronic Eavesdropping*, by Gina Stevens and Charles Doyle.

Introduction

Depending on one's perspective, wiretapping and electronic eavesdropping are either "dirty business," essential law enforcement tools, or both. This is a very general overview of the federal statutes that proscribe wiretapping and electronic eavesdropping and of the procedures they establish for law enforcement and foreign intelligence gathering purposes. Although the specifics of state law are beyond the scope of this report, citations to related state statutory provisions have been appended. The text of pertinent federal statutes and a selected bibliography of legal materials appear as appendices as well.[2364]

[2364] Portions of this report draw upon a series of earlier reports, no longer available, entitled: Wiretapping and Electronic Surveillance: A Brief Discussion of Pertinent Supreme Court Cases, A Summary and Compilation of Federal State Statutes, and a Selected Legal Bibliography (1970); Wiretapping and Electronic Surveillance: A Brief Discussion of Pertinent Supreme Court Cases, A Summary and Compilation of Federal State Statutes, and a Selected Legal Bibliography (1971); Wiretapping and Electronic Surveillance: Federal and State Statutes (1974); Taps and Bugs: A Compilation of Federal and State Statutes Governing the Interception of Wire and Oral Communications (1981); The Interception of Communications: A Legal Overview of Bugs and Taps (1988); Wiretapping & Electronic Surveillance: The Electronic Communications Privacy Act and Related Matters (1992); Taps, Bugs & Telephony: An Overview of Federal Statutes Governing Wiretapping and Electronic Eavesdropping (1998); Privacy: An Overview of Federal Statutes Governing Wiretapping and Electronic Eavesdropping (2001); id. (2003); id. (2006).

As used in this report "electronic eavesdropping" refers to the use of hidden microphones, recorders and any other mechanical or electronic means of capturing ongoing communications, other than wiretapping (tapping into telephone conversations). In previous versions of this report and other earlier writings, it was common to use a more neutral, and consequently preferred, term – electronic surveillance – at least when referring to law enforcement use. Unfortunately, continued use of the term "electronic surveillance" rather than "electronic eavesdropping" risks

Background

At common law, "eavesdroppers, or such as listen under walls or windows, or the eaves of a house, to hearken after discourse, and thereupon to frame slanderous and mischievous tales, are a common nuisance and presentable at the court-leet; or are indictable at the sessions, and punishable by fine and finding of sureties for [their] good behavior."[2365] Although early American law proscribed common law eavesdropping, the crime was little prosecuted and by the late nineteenth century had "nearly faded from the legal horizon."[2366] With the invention of the telegraph and telephone, however, state laws outlawing wiretapping or indiscretion by telephone and telegraph operators preserved the spirit of the common law prohibition in this country.

Congress enacted the first federal wiretap statute as a temporary measure to prevent disclosure of government secrets during World War I.[2367] Later, it proscribed intercepting and divulging private radio messages in the Radio Act of

---

confusion with forms of surveillance that either have individualistic definitions (e.g., "electronic surveillance" under the Foreign Intelligence Surveillance Act, 50 U.S.C. 1801(f)), that involve surveillance that does not capture conversation (e.g., thermal imaging or electronic tracking devices), or that may or may not capture conversation (e.g., the coverage of video surveillance depends upon the circumstances and the statutory provision question).

Related developments are discussed in CRS Report RL30465, The Foreign Intelligence Surveillance Act: An Overview of the Statutory Framework and U.S. Foreign Intelligence Surveillance Court and U.S. Foreign Intelligence Surveillance Court of Review Decisions, by Elizabeth B. Bazan; CRS Report 97-1025, Cybercrime: An Overview of the Federal Computer Fraud and Abuse Statute and Related Federal Criminal Laws, by Charles Doyle; CRS Report RL30677, Digital Surveillance: The Communications Assistance for Law Enforcement Act, by Patricia Moloney Figliola; and CRS Report RL34409, Selected Laws Governing the Disclosure of Customer Phone Records by Telecommunications Carriers, by Kathleen Ann Ruane.

[2365] 4 BLACKSTONE, COMMENTARIES ON THE LAWS OF ENGLAND, 169 (1769).

[2366] "Eavesdropping is indictable at the common law, not only in England but in our states. It is seldom brought to the attention of the courts, and our books contain too few decisions upon it to enable an author to define it with confidence. . . . It never occupied much space in the law, and it has nearly faded from the legal horizon." 1 BISHOP, COMMENTARIES ON THE CRIMINAL LAW, 670 (1882).

[2367] 40 Stat.1017-18 (1918)("whoever during the period of governmental operation of the telephone and telegraph systems of the United States . . . shall, without authority and without the knowledge and consent of the other users thereof, except as may be necessary for operation of the service, tap any telegraph or telephone line . . . or whoever being employed in any such telephone or telegraph service shall divulge the contents of any such telephone or telegraph message to any person not duly authorized or entitled the receive the same, shall be fined not exceeding $1,000 or imprisoned for not more than one year or both"); 56 Cong.Rec. 10761-765 (1918).

1927,[2368] but did not immediately reestablish a federal wiretap prohibition. By the time of the landmark Supreme Court decision in Olmstead, however, at least forty-one of the forty-eight states had banned wiretapping or forbidden telephone and telegraph employees and officers from disclosing the content of telephone or telegraph messages or both.[2369]

Olmstead was a Seattle bootlegger whose Prohibition Act conviction was the product of a federal wiretap. He challenged his conviction on three grounds, arguing unsuccessfully that the wiretap evidence should have been suppressed as a violation of either his Fourth Amendment rights, his Fifth Amendment privilege against self-incrimination, or the rights implicit in the Washington state statute that outlawed wiretapping.

For a majority of the Court, writing through Chief Justice Taft, Olmstead's Fourth Amendment challenge was doomed by the absence of "an official search and seizure of his person, or such a seizure of his papers or his tangible material effects, or an actual physical invasion of his house or curtilage[2370] for the purposes of making a seizure."[2371]

[2368] 44 Stat. 1172 (1927)(". . . no person not being authorized by the sender shall intercept any message and divulge or publish the contents, substance, purpose, effect, or meaning of such intercepted message to any person . . .").

[2369] Olmstead v. United States, 277 U.S. 438, 479-80 n.13 (1928)(Brandeis, J., dissenting). Olmstead is remembered most today for the dissents of Holmes and Brandeis, but for four decades it stood for the view that the Fourth Amendment's search and seizure commands did not apply to government wiretapping accomplished without a trespass onto private property.

[2370] Curtilage originally meant the land and buildings enclosed by the walls of a castle; in later usage it referred to the barns, stables, garden plots and the like immediately proximate to a dwelling; it is understood in Fourth Amendment parlance to describe that area which "harbors those intimate activities associated with domestic life and the privacies of the home," United States v. Dunn, 480 U.S. 294, 301 n.4 (1987).

[2371] 277 U.S. at 466. Olmstead had not been compelled to use his phone and so the Court rejected his Fifth Amendment challenge. 277 U.S.C. at 462. Any violation of the Washington state wiretap statute was thought insufficient to warrant the exclusion of evidence, 277 U.S. at 466-68. Justice Holmes in his dissent tersely characterized the conduct of federal wiretappers as "dirty business," 277 U.S. at 470. The dissent of Justice Brandeis observed that the drafters of the Constitution "conferred as against the Government, the right to be let alone – the most comprehensive of rights and the right most valued by civilized men. To protect that right, every unjustifiable intrusion by the Government against privacy of the individual whatever the means employed, must be deemed in violation of the Fourth Amendment," 277 U.S. at 478-79.

Chief Justice Taft pointed out that Congress was free to provide protection which the Constitution did not.[2372] Congress did so in the 1934 Communications Act by expanding the Radio Act's proscription against intercepting and divulging radio communications so as to include intercepting and divulging radio or wire communications.[2373]

The Federal Communications Act outlawed wiretapping, but it said nothing about the use of machines to surreptitiously record and transmit face to face conversations.[2374] In the absence of a statutory ban the number of surreptitious recording cases decided on Fourth Amendment grounds surged and the results began to erode Olmstead's underpinnings.[2375]

Erosion, however, came slowly. Initially the Court applied Olmstead's principles to the electronic eavesdropping cases. Thus, the use of a dictaphone to secretly overhear a private conversation in an adjacent office offended no Fourth Amendment precipes because no physical trespass into the office in which the conversation took place had occurred.[2376] Similarly, the absence of a physical trespass precluded Fourth Amendment coverage of the situation where a federal agent secretly recorded his conversation with a defendant held in a commercial laundry in an area open to the public.[2377] On the other hand, the Fourth Amendment did reach the government's physical intrusion upon private property during an investigation, as for example when they drove a "spike mike" into the

---

[2372] "Congress may of course protect the secrecy of telephone messages by making them, when intercepted inadmissible in evidence in federal criminal trials, by direct legislation," 277 U.S. at 465.

[2373] 48 Stat. 1103-104 (1934), 47 U.S.C. 605 (1940 ed.). The Act neither expressly condemned law enforcement interceptions nor called for the exclusion of wiretap evidence, but it was read to encompass both, Nardone v. United States, 302 U.S. 379 (1937); Nardone v. United States, 308 U.S. 321 (1939).

[2374] Section 605 did ban the interception and divulgence of radio broadcasts but it did not reach the radio transmission of conversations that were broadcast unbeknownst to all of the parties to the conversation. Late in the game, the FCC supplied a partial solution when it banned the use of licensed radio equipment to overhear or record private conversation without the consent of all the parties involved in the conversation, 31 Fed.Reg. 3400 (March 4, 1966), amending then 47 C.F.R. §§2.701, 15.11. The FCC excluded "operations of any law enforcement offices conducted under lawful authority," id.

[2375] The volume of all Fourth Amendment cases calling for Supreme Court review increased dramatically after Mapp v. Ohio, 367 U.S. 643 (1961), acknowledged the application of the Fourth Amendment exclusionary rule to the states.

[2376] Goldman v. United States, 316 U.S. 129 (1942).

[2377] On Lee v. United States, 343 U.S. 747 (1952).

common wall of a row house until it made contact with a heating duct for the home in which the conversation occurred.[2378]

The spike mike case presented something of a technical problem, because there was some question whether the spike mike had actually crossed the property line of the defendant's town house when it made contact with the heating duct. The Court declined to rest its decision on the technicalities of local property law, and instead found that the government's conduct had intruded upon privacy of home and hearth in a manner condemned by the Fourth Amendment.[2379]

Each of these cases focused upon whether a warrantless trespass onto private property had occurred, that is, whether the means of conducting a search and seizure had been so unreasonable as to offend the Fourth Amendment. Yet in each case, the object of the search and seizure had been not those tangible papers

---

[2378] Silverman v. United States, 365 U.S. 505 (1961).

[2379] "The absence of a physical invasion of the petitioner's premises was also a vital factor in the Court's decision in Olmstead v. United States . . . . In holding that the wiretapping there did not violate the Fourth Amendment, the Court noted that the insertions were made without trespass upon any property of the defendants. They were made in the basement of the large office building. The taps from house lines were made in the streets near the houses. 277 U.S. at 457. There was no entry of the houses or offices of the defendants. 277 U.S. at 464. Relying upon these circumstances, the Court reasoned that the intervening wires are not part of (the defendant's) house or office any more than are the highways along which they are stretched. 277 U.S. at 465. "Here, by contrast, the officers overheard the petitioners' conversations only by usurping part of the petitioners' house or office – a heating system which was an integral part of the premises occupied by the petitioners, a usurpation that was effected without their knowledge and without their consent. In these circumstances we need not pause to consider whether or not there was a technical trespass under the local property law relating to party walls. Inherent Fourth Amendment rights are not inevitably measurable in terms of ancient niceties of tort or real property law . . . .

"The Fourth Amendment, and the personal rights which it secures, have a long history. At the very core stands the right of a man to retreat into his own home and there be free from unreasonable governmental intrusion . . . This Court has never held that a federal officer may without warrant and without consent physically entrench into a man's office or home, there secretly observe or listen, and relate at the man's subsequent criminal trial what was seen or heard.

"A distinction between the dictaphone employed in Goldman and the spike mike utilized here seemed to the Court of Appeals too fine a one to draw. The court was unwilling to believe that the respective rights are to be measured in fractions of inches. But decision here does not turn upon the technicality of a trespass upon a party wall as a matter of local law. It is based upon the reality of an actual intrusion into a constitutionally protected area. What the Court said long ago bears repeating now: It may be that it is the obnoxious thing in its mildest and least repulsive form; but illegitimate and unconstitutional practices get their first footing in that way, namely, by silent approaches and slight deviations from legal modes of procedure. Boyd v. United States, 116 U.S. 616, 635. We find no occasion to reexamine Goldman here, but we decline to go beyond it, by even a fraction of an inch," 365 U.S. at 510-12 (internal quotation marks omitted).

or effects for which the Fourth Amendment's protection had been traditionally claimed, but an intangible, a conversation. This enlarged view of the Fourth Amendment could hardly be ignored, for "[i]t follows from . . . Silverman . . . that the Fourth Amendment may protect against the overhearing of verbal statements as well as against the more traditional seizure of papers and effects."[2380]

Soon thereafter the Court repudiated the notion that the Fourth Amendment's protection was contingent upon some trespass to real property in Katz v. United States.[2381] Katz was a bookie convicted on the basis of evidence gathered by an electronic listening and recording device set up outside the public telephone booth that Katz used to take and place bets. The Court held that the gateway for Fourth Amendment purposes stood at that point where an individual should to able to expect that his or her privacy would not be subjected to unwarranted governmental intrusion.[2382]

One obvious consequence of Fourth Amendment coverage of wiretapping and other forms of electronic eavesdropping is the usual attachment of the Amendment's warrant requirement. To avoid constitutional problems and at the same time preserve wiretapping and other forms of electronic eavesdropping as a law enforcement tool, some of the states established a statutory system under which law enforcement officials could obtain a warrant, or equivalent court order, authorizing wiretapping or electronic eavesdropping.

The Court rejected the constitutional adequacy of one of the more detailed of these state statutory schemes in *Berger v. New York*.[2383] The statute was found deficient because of its failure to require:

- a particularized description of the place to be searched;

[2380] Wong Sun v. United States, 371 U.S. 471, 485 (1963).

[2381] 389 U.S. 347 (1967).

[2382] "We conclude that the underpinnings of Olmstead and Goldman have been so eroded by our subsequent decisions that the trespass doctrine there enunciated can no longer be regarded as controlling. The Government's activities in electronically listening to and recording the petitioner's words violated the privacy upon which he justifiably relied while using the telephone booth and thus constituted a search and seizure within the meaning of the Fourth Amendment. The fact that the electronic device employed to achieve that end did not happen to penetrate the wall of the booth can have no constitutional significance." Later courts seem to prefer the "expectation of privacy" language found in Justice Harlan's concurrence: "My understanding of the rule that has emerged from prior decisions is that there is a twofold requirement, first that a person have exhibited an actual (subjective) expectation of privacy and, second, that the expectation be one that society is prepared to recognize as reasonable," 389 U.S. at 361.

[2383] 388 U.S. 41 (1967).

- a particularized description of the crime to which the search and seizure related;
- a particularized description of the conversation to be seized;
- limitations to prevent general searches;
- termination of the interception when the conversation sought had been seized;
- prompt execution of the order;
- return to the issuing court detailing the items seized; and
- any showing of exigent circumstances to overcome the want of prior notice.[2384]

Berger helped persuade Congress to enact Title III of the Omnibus Crime Control and Safe Streets Act of 1968, a comprehensive wiretapping and electronic eavesdropping statute that not only outlawed both activities in general terms but that also permitted federal and state law enforcement officers to use them under strict limitations designed to meet the objections in *Berger*.[2385]

A decade later another Supreme Court case persuaded Congress to supplement Title III with a judicially supervised procedure for the use of wiretapping and electronic eavesdropping in foreign intelligence gathering situations. When Congress passed Title III there was some question over the extent of the President's inherent powers to authorize wiretaps – without judicial approval – in national security cases. As a consequence, the issue was simply removed from the Title III scheme.[2386] After the Court held that the President's inherent powers were insufficient to excuse warrantless electronic eavesdropping on purely domestic threats to national security,[2387] Congress considered it prudent to augment the foreign intelligence gathering authority of the United States with the Foreign Intelligence Security Act of 1978 (FISA).[2388] The FISA provides a procedure for judicial review and authorization or denial of wiretapping and other forms of electronic eavesdropping for purposes of foreign intelligence gathering.

[2384] 388 U.S. at 58-60.

[2385] 87 Stat. 197, 18 U.S.C. 2510 - 2520 (1970 ed.).

[2386] 18 U.S.C. 2511(3)(1970 ed.)("Nothing contained in this chapter or in section 605 of the Communications Act . . . shall limit the constitutional power of the President to take such measures as he deems necessary to protect the Nation against actual or potential attack or other hostile acts of a foreign power, to obtain foreign intelligence information deemed essential to the security of the United States, or to protect national security information against foreign intelligence activities. . .").

[2387] United States v. United States District Court, 407 U.S. 297 (1972).

[2388] 92 Stat. 1783, 50 U.S.C. 1801-1862.

In 1986, Congress recast Title III in the Electronic Communications Privacy Act (ECPA).[2389] The Act followed the general outline of Title III with adjustments and additions. Like Title III, it sought to strike a balance between the interests of privacy and law enforcement, but it also reflected a Congressional desire to avoid unnecessarily crippling infant industries in the fields of advanced communications technology.[2390] ECPA also included new protection and law enforcement access provisions for stored wire and electronic communications and transactional records access (e-mail and phone records),[2391] and for pen registers as well as trap and trace devices (devices for recording the calls placed to or from a particular telephone).[2392]

Over the years, Congress has adjusted the components of Title III/ECPA or FISA. Sometimes in the interests of greater privacy; sometimes in the interest of more effective law enforcement or foreign intelligence gathering. In the last decade, for instance, Congress amended the basic statutes in:

- the USA PATRIOT Act;[2393]
- the Intelligence Authorization Act for Fiscal Year 2002;[2394]
- the 21st Century Department of Justice Appropriations Authorization Act;[2395]
- the Department of Homeland Security Act;[2396]
- the USA PATRIOT Improvement and Reauthorization Act;[2397] and

[2391] 18 U.S.C. 2701-2710.

[2392] 18 U.S.C. 3121-3126. These provisions were also grounded in Supreme Court jurisprudence. In United States v. Miller, 425 U.S. 435, 441-43 (1976), the Court held that a customer had no Fourth Amendment protected expectation of privacy in the records his bank maintained concerning his transactions with them. These third party records were therefore available to the government under a subpoena duces tecum rather than a more narrowly circumscribed warrant, 425 U.S. 44-45. In Smith v. Maryland, 442 U.S. 735, 741-46 (1979), it held that no warrant was required for the state's use of a pen register or trap and trace device which merely identified the telephone numbers for calls made and received from a particular telephone. No Fourth Amendment search or seizure occurred, the Court held, since the customer had no justifiable expectation of privacy in such information which he knew or should know that the telephone company might ordinarily capture for bill or service purposes, id.

Prohibitions

Unless otherwise provided, Title III/ECPA outlaws wiretapping and electronic eavesdropping; possession of wiretapping or electronic eavesdropping equipment; use or disclosure of information obtained through illegal wiretapping or electronic eavesdropping; and disclosure of information secured through court-ordered wiretapping or electronic eavesdropping, in order to obstruct justice, 18 U.S.C. 2511. Elsewhere, federal law proscribes:

- unlawful access to stored communications, 18 U.S.C. 2701;
- unlawful use of a pen register or a trap and trace device, 18 U.S.C. 3121; and
- abuse of eavesdropping and search authority or unlawful disclosures under the Foreign Intelligence Surveillance Act, 50 U.S.C. 1809, 1827.

Illegal Wiretapping and Electronic Eavesdropping

At the heart of Title III/ECPA lies the prohibition against illegal wiretapping and electronic eavesdropping, 18 U.S.C. 2511(1), that bans:

- any person from
- intentionally
- intercepting, or endeavoring to intercept,
- wire, oral or electronic communications
- by using an electronic, mechanical or other device
- unless the conduct is specifically authorized or expressly not covered, e.g.
    - one of the parties to the conversation has consent to the interception
    - the interception occurs in compliance with a statutorily authorized, (and ordinarily judicially supervised) law enforcement or foreign intelligence gathering interception,
    - the interception occurs as part of providing or regulating communication services,
    - certain radio broadcasts, and
    - in some places, spousal wiretappers.

Person

[2397] P.L. 109-177, 120 Stat. 192 (2006).

[2398] P.L. 110-261, 122 Stat. 2436 (2008).

The prohibition applies to "any employee, or agent of the United States or any State or political subdivision thereof, and any individual, partnership, association, joint stock company, trust, or corporation."[2399]

Intentional

Conduct can only violate Title III/ECPA if it is done "intentionally," inadvertent conduct is no crime; the offender must have done on purpose those things which are outlawed.[2400] He need not be shown to have known, however, that his conduct was unlawful.[2401]

Jurisdiction

Section 2511(1) contains two interception bars – one, 2511(1)(a), simply outlaws intentional interception; the other, 2511(1)(b), outlaws intentional interception when committed under any of five jurisdictional circumstances with either an implicit or explicit nexus to interstate or foreign commerce.[2402] Congress adopted the approach because of concern that its constitutional authority might not be sufficient to ban instances of electronic surveillance that bore no discernable connection to interstate commerce or any other of the enumerated powers. So it

---

[2399] 18 U.S.C. 2510(6). Although the governmental entities are not subject to criminal liability, as noted infra, some courts believe them subject to civil liability under 18 U.S.C. 2520.

[2400] "In order to underscore that the inadvertent reception of a protected communication is not a crime, the subcommittee changed the state of mind requirement under Title III of the Omnibus Crime Control and Safe Streets Act of 1968 from 'willful' to 'intentional,'" S.Rept. 541, at. 23 (1986); "This provision makes clear that the inadvertent interception of a protected communication is not unlawful under this Act," H.Rept. 99-647, at 48-9 (1986). See, e.g., In re Pharmatrak, Inc., 329 F.3d 9, 23 (1st Cir. 2003); Sanders v. Robert Bosch Corp., 38 F.3d 736, 742-43 (4th Cir. 1994); Lonegan v. Hasty, 436 F.Supp.2d 419, 429 (E.D.N.Y. 2006).

[2401] Narducci v. Village of Bellwood, 444 F.Supp. 924, 835 (N.D. Ill. 2006).

[2402] "(1) Except as otherwise specifically provided in this chapter any person who – (a) intentionally intercepts, endeavors to intercept, or procures any other person to intercept or endeavor to intercept, any wire, oral, or electronic communication;

"(b) intentionally uses, endeavors to use, or procures any other person to use or endeavor to use any electronic, mechanical, or other device to intercept any oral communication when – (I) such device is affixed to, or otherwise transmits a signal through, a wire, cable, or other like connection used in wire communication; or (ii) such device transmits communications by radio, or interferes with the transmission of such communication; or (iii) such person knows, or has reason to know, that such device or any component thereof has been sent through the mail or transported in interstate or foreign commerce; or (iv) such use or endeavor to use (A) takes place on the premises of any business or other commercial establishment the operations of which affect interstate or foreign commerce; or (B) obtains or is for the purpose of obtaining information relating to the operations of any business or other commercial establishment the operations of which affect interstate or foreign commerce; or (v) such person acts in the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States," 18 U.S.C. 2511(1)(a),(b).

enacted a general prohibition, and as a safety precaution, a second provision more tightly tethered to specific jurisdictional factors.[2403] The Justice Department has honored that caution by employing subparagraph (b) to prosecute the interception of oral communications, while using subparagraph (a) to prosecute other forms of electronic eavesdropping.[2404]

Interception

Interception "means the aural or other acquisition of the contents" of various kinds of communications by means of "electronic, mechanical or other devices."[2405] The definition raises questions of where, when, what, and how. Although logic might suggest that interception occurs only in the place where the communication is captured, the cases indicate that interception occurs as well where the communication begins, is transmitted, or is received.[2406]

Once limited to aural acquisitions, ECPA enlarged the definition by adding the words "or other acquisition" so that it is no longer limited to interceptions of

---

[2403] "Subparagraph (a) establishes a blanket prohibition against the interception of wire communication. Since the facilities used to transmit wire communications form part of the interstate or foreign communications network, Congress has plenary power under the commerce clause to prohibit all interception of such communications whether by wiretapping or otherwise.

"The broad prohibition of subparagraph (a) is also applicable to the interception of oral communications. The interception of such communications, however, does not necessarily interfere with the interstate or foreign commerce network, and the extent of the constitutional power of Congress to prohibit such interception is less clear than in the case of interception of wire communications. . . .

"Therefore, in addition to the broad prohibitions of subparagraph (a), the committee has included subparagraph (b), which relies on accepted jurisdictional bases under the commerce clause, and other provisions of the Constitution to prohibit the interception of oral communications," S.Rept. 90-1097, at 91-2 (1968).

[2404] DEPARTMENT OF JUSTICE CRIMINAL RESOURCE MANUAL at 1050. As will be noted in moment, the statutory definitions of wire and electronic communications contain specific commerce clause elements, but the definition of oral communications does not. Subsequent Supreme Court jurisprudence relating to the breadth of Congress' commerce clause powers indicates that the precautions may have been well advised, United States v. Lopez, 514 U.S. 549 (1995) and United States v. Morrison, 529 U.S. 598 (2000).

[2405] 18 U.S.C. 2510(4). The dictionary definition of "aural" is "of or relating to the ear or to the sense of hearing," MERRIAM-WEBSTER'S COLLEGIATE DICTIONARY 76 (10th ed. 1996).

[2406] United States v. Luong, 471 F.3d 1107, 1109 (9th Cir. 2006)("an interception occurs where the tapped phone is located and where the law enforcement officers first overheard the call . . . United States v. Rodriguez, 968 F.2d 130, 136 (2d Cir. 1992); accord United States v. Ramirez, 112 F.3d 849, 852 (7the Cir. 1997)(concluding that an interception occurs in the jurisdiction where the tapped phone is located, where the second phone in the conversation is located, and where the scanner used to overhear the call is located); United States v. Denman, 100 F.3d 399, 403 (5th Cir. 1996)").

communications that can be heard.[2407] The change complicates the question of whether the wiretap, stored communications, or trap and trace portions of the ECPA govern the legality of various means of capturing information relating to a communication. The analysis might seem to favor wiretap coverage when it begins with an examination of whether an "interception" has occurred. Yet, there is little consensus over when an interception occurs; that is, whether "interception" as used in section 2511 contemplates only surreptitious acquisition, contemporaneous with transmission, or whether such acquisition may occur anytime before the initial cognitive receipt of the contents by the intended recipient.[2408]

The USA PATRIOT Act resolved some of the uncertainty when it removed voice mail from the wiretap coverage of Title III (striking the phrase "and such term includes any electronic storage of such communication" from the definition of "wire communications" in Title III (18 U.S.C. 2510(1)) and added stored wire communications to the stored communications coverage of 18 U.S.C. 2703.[2409]

As for the "what," the interceptions proscribed in Title III are confined to those that capture a communication's content. Trap and trace devices and pen registers once captured only information relating to the source and addressee of a

---

[2407] S.Rept. 99-541, at 13 (1986)(the "amendment clarifies that it is illegal to intercept the non-voice portion of a wire communication. For example, it is illegal to intercept the data or digitized portion of a voice communication"); see also H.Rept. 99-647, at 34 (1986).

[2408] United States v. Smith, 155 F.3d 1051, 1058 (9th Cir. 1998)(unauthorized retrieval and recording of another's voice mail messages constitutes an "interception"); Konop v. Hawaiian Airlines, Inc., 302 F.3d 868, 878 (9th Cir. 2002)(fraudulent access to stored communication does not constitute an "interception"; interception requires access contemporaneous with transmission); United States v. Councilman, 418 F.3d 67, 79-80(1st Cir. 2005)(en banc)(service provider's access to e-mail "during transient storage" constitutes "interception"; without deciding whether "interception is limited to acquisition contemporaneous with transmission"); United States v. Jones, 451 F.Supp.2d 71, 75 (D.D.C. 2006)(government's acquisition from the phone company of text messages was no interception because there was no contemporaneous access); Fraser v. National Mutual Insurance Co., 135 F.Supp.2d 623, 634-37 (E.D.Pa. 2001) ("interception" of e-mail occurs with its unauthorized acquisition prior to initial receipt by its addressee); Steve Jackson Games, Inc. v. United States Secret Service, 36 F.3d 457, 461-62n.7 (5th Cir. 1994) (Congress did not intend for "interception" to apply to e-mail stored on an electronic bulletin board; stored wire communications (voice mail), however, is protected from "interception"); United States v. Meriwether, 917 F.2d 955, 959-60 (6th Cir. 1990)(access to stored information through the use of another's pager does not constitute an "interception"); United States v. Reyes, 922 F.Supp. 818, 836-37 (S.D.N.Y. 1996)(same); Wesley College v. Pitts, 947 F.Supp. 375, 385 (D.Del. 1997)(no "interception" occurs when the contents of electronic communications are acquired unless contemporaneous with their transmission); Cardinal Health 414, Inc.v. Adams, 582 F.Supp.2d 967, 979-81 (M.D. Tenn. 2008)(same); see also, Adams v. Battle Creek, 250 F.3d 980, 982 (6th Cir. 2001)(use of a "clone" or duplicate pager to simultaneously receive the same message as a target pager is an "interception"); Brown v. Waddell, 50 F.3d 285, 294 (4th Cir. 1995)(same).

[2409] 115 Stat. 283 (2001).

communication, not its content. That is no longer the case. The "post-cut-through dialed digit features" of contemporary telephone communications now transmit communications in such a manner that the use of ordinary pen register or trap and trace devices will capture both non-content and content.[2410] As a consequence, a few courts have held, either as a matter of statutory construction or constitutional necessity, that the authorities must rely on a Title III wiretap order rather than a pen register/trap and trace order if such information will be captured.[2411]

By Electronic, Mechanical, or Other Device

The statute does not cover common law "eavesdropping," but only interceptions "by electronic, mechanical or other device."[2412] That phrase is in turn defined so as not to include hearing aids or extension telephones in normal use.[2413] Whether an extension phone has been installed and is being used in the ordinary course of business or in the ordinary course of law enforcement duties, so that it no longer constitutes an interception device for purposes of Title III/ECPA and comparable state laws has proven a somewhat vexing question.[2414]

[2410] "'Post-cut-through dialed digits' are any numbers dialed from a telephone after the call is initially setup or 'cutthrough.' Sometimes these digits are other telephone numbers, as when a party places a credit card call by first dialing the long distance carrier access number and then the phone number of the intended party. Sometimes these digits transmit real information, such as bank account numbers, Social Security numbers, prescription numbers, and the like. In the latter case, the digits represent communications content; in the former, they are non-content call processing numbers," In re United States, 441 F.Supp.2d 816, 818 (S.D. Tex. 2006).

[2411] In re United States for Orders (1) Authorizing Use of Pen Registers and Trap and Trace Devices, 515 F.Supp.2d 325, 328-38 (E.D.N.Y. 2007); In re United States, 441 F.Supp.2d 816, 818-27 (S.D. Tex. 2006).

[2412] 18 U.S.C. 2510(4). United States v. Jones, 451 F.Supp.2d 71, 75 (D.D.C. 2006)(government's acquisition from the phone company of text messages was not an interception because it did not involve contemporaneous access and because no electronic, mechanical, or other devices were used).

[2413] "'[E]lectronic, mechanical, or other device' means any device or apparatus which can be used to intercept a wire, oral, or electronic communication other than – (a) any telephone or telegraph instrument, equipment or facility, or any component thereof, (i) furnished to the subscriber or user by a provider of wire or electronic communication service in the ordinary course of its business and being used by the subscriber or user in the ordinary course of its business or furnished by such subscriber or user for connection to the facilities of such service and used in the ordinary course of its business; or (ii) being used by a provider of wire or electronic communication service in the ordinary course of its business, or by an investigative or law enforcement officer in the ordinary course of his duties; (b) a hearing aid or similar device being used to correct subnormal hearing to not better than normal," 18 U.S.C. 2510(5).

[2414] See the cases cited and commentary in Barnett & Makar, "In the Ordinary Course of Business": The Legal Limits of Workplace Wiretapping, 10 HASTINGS JOURNAL OF COMMUNICATIONS AND ENTERTAINMENT LAW 715 (1988); Application to Extension Telephones of Title III of the Omnibus Crime Control and Safe Streets Act of 1968 (18 U.S.C.

Although often intertwined with the consent exception discussed below, the question generally turns on the facts in a given case.[2415] When the exemption is claimed as a practice in the ordinary course of business, the interception must be for a legitimate business reason, it must be routinely conducted, and at least in some Circuits employees must be notified that their conversations are being monitored.[2416] Similarly, "Congress most likely carved out an exception for law enforcement officials to make clear that the routine and almost universal recording of phone lines by police departments and prisons, as well as other law enforcement institutions, is exempt from the statute."[2417] The exception contemplates administrative rather than investigative monitoring,[2418] which must nevertheless be justified by a lawful, valid law enforcement concern.[2419]

§§2510 et seq.), Pertaining to Interceptions of Wire Communications, 58 ALR Fed. 594; Eavesdropping on Extension Telephone as Invasion of Privacy, 49 ALR 4th 430.

[2415] E.g., Deal v. Spears, 780 F.Supp. 618, 623 (W.D.Ark. 1991), aff'd, 980 F.2d 1153 (8th Cir. 1992)(employer regularly taped employee calls by means of a device attached to an extension phone; most of the calls were personal and recording and disclosing them served no business purpose).

[2416] Adams v. Battle Creek, 250 F.3d 980, 983 (6th Cir. 2001); Arias v. Mutual Central Alarm Service, 202 F.3d 553, 558 (2d Cir. 2000); Berry v. Funk, 146 F.3d 1003, 1008 (D.C.Cir. 1998); Sanders v. Robert Bosch Corp., 38 F.3d 736, 741 (4th Cir. 1994). See also, Hall v. Earthlink Network Inc., 396 F.3d 500, 503-04 (2d Cir. 2005) (Internet service provider's receipt and storage of former customer's e-mail after termination of the customer's account was done in ordinary course of business and consequently did not constitute an interception). Some courts include surreptitious, extension phone interceptions conducted within the family home as part of the "business extension" exception, Anonymous v. Anonymous, 558 F.2d 677, 678-79 (2d Cir. 1977); Scheib v. Grant, 22 F.3d 149, 154 (7th Cir. 1994); Newcomb v. Ingle, 944 F.2d 1534, 1536 (10th Cir. 1991); contra, United States v. Murdock, 63 F.3d 1391, 1400 (6th Cir. 1995).

[2417] Adams v. Battle Creek, 250 F.3d at 984; see also, United States v. Lewis, 406 F.3d 11, 18 (1st Cir. 2005); United States v. Hammond, 286 F.3d 189, 192 (4th Cir. 2002); Smith v. U.S.Dept. of Justice, 251 F.3d 1047, 1049-50 (D.C.Cir. 2001); United States v. Poyck, 77 F.3d 285, 292 (9th Cir. 1996); United States v. Daniels, 902 F.2d 1238, 1245 (7th Cir. 1990); United States v. Paul, 614 F.2d 115, 117 (6th Cir. 1980).

[2418] Amati v. Woodstock, 176 F.3d 952, 955 (7th Cir. 1999)("Investigation is within the ordinary course of law enforcement, so if 'ordinary' were read literally warrants would rarely if ever be required for electronic eavesdropping, which was surely not Congress's intent. Since the purpose of the statute was primarily to regulate the use of wiretapping and other electronic surveillance for investigatory purposes, .ordinary' should not be read so broadly; it is more reasonably interpreted to refer to routine noninvestigative recording of telephone conversations"); accord United States v. Lewis, 416 F.3d at 11 (1st Cir. 2005); Colandrea v. Orangetown, 411 F.Supp.2d 342, 347-48 (S.D.N.Y. 2007).

[2419] The exception, however, does not permit a county to record all calls in and out of the offices of county judges merely because a detention center and the judges share a common facility, Abraham v. Greenville, 237 F.3d 386, 390 (4th Cir. 2001), nor does it permit jailhouse telephone monitoring of an inmate's confession to a clergyman, Mockaitis v. Harcleroad, 104 F.3d 1522, 1530 (9th Cir. 1997). The courts are divided over whether private corrections officials are covered

Wire, Oral, or Electronic Communications

An interception can only be a violation of ECPA if the conversation or other form of communication intercepted is among those kinds which the statute protects, in oversimplified terms – telephone (wire), face to face (oral), and computer (electronic). Congress used the definitions of the three forms of communications to describe the communications beyond the Act's reach as well as those within its grasp. For example, "oral communication" by definition includes only those face to face conversations with respect to which the speakers have a justifiable expectation of privacy.[2420] Similarly, "wire communications" are limited to those that are at some point involve voice communications (i.e., only aural transfers).[2421] Radio and data transmissions are generally "electronic communications." The definition includes other forms of information transfer but excludes certain radio transmissions which can be innocently captured without great difficulty.[2422] Although it is not a federal crime to intercept radio communications under any number of conditions, the exclusion is not a matter of definition but of special general exemptions, 18 U.S.C. 2511(2)(g), discussed below.

Endeavoring to Intercept

---

by the law enforcement exception. Compare United States v. Faulkner, 323 F. Supp. 2d 1111, 1113-17 (D. Kan. 2004), aff'd on other grounds, 439 F.3d 1221 (10th Cir. 2006) (not covered) with United States v. Rivera, 292 F. Supp. 2d 838, 842-43 (E.D. Va. 2003) (covered).

[2420] "'[O]ral communication' means any oral communication uttered by a person exhibiting an expectation that such communication is not subject to interception under circumstances justifying such expectation, but such term does not include any electronic communication," 2510(2). Pattee v. Georgia Ports Authority, 512 F.Supp.2d 1372, 1376-377 (S.D.Ga. 2007)("the section contains two slightly different requirements: (1) that the circumstances justify an expectation that the communication is not being intercepted; and (2) that the speaker exhibits that expectation"). Note that unlike the definitions of wire and electronic communications, infra, there is no reference to interstate or foreign commerce here.

[2421] "'[W]ire communication' means any aural transfer made in whole or in part through the use of facilities for the transmission of communications by the aid of wire, cable, or other like connection between the point of origin and the point of reception (including the use of such connection in a switching station) furnished or operated by any person engaged in providing or operating such facilities for the transmission of interstate or foreign communications or communications affecting interstate or foreign commerce," 18 U.S.C. 2510(1).

[2422] "'[E]lectronic communication' means any transfer of signs, signals, writing, images, sounds, data, or intelligence of any nature transmitted in whole or in part by a wire, radio, electromagnetic, photoelectronic or photooptical system that affects interstate or foreign commerce, but does not include – (A) the radio portion of a cordless telephone communication that is transmitted between the cordless handset and the base unit; (B) any wire or oral communication; (C) any communication made through a tone-only paging device; or (D) any communication from a tracking device (as defined in section 3117 of this title)," 18 U.S.C. 2510(12).

Although the statute condemns attempted wiretapping and electronic eavesdropping ("endeavoring to intercept"), 18 U.S.C. 2511(1), the provisions appear to have escaped use, interest, or comment heretofore, perhaps because the conduct most likely to constitute preparation for an interception – possession of wiretapping equipment – is already a separate crime, 18 U.S.C. 2512, discussed, infra.

Exemptions: Consent Interceptions

Consent interceptions are common, controversial and have a history all their own. The early bans on divulging telegraph or telephone messages had a consent exception.[2423] The Supreme Court upheld consent interceptions against Fourth Amendment challenge both before and after the enactment of Title III.[2424] The argument in favor of consent interceptions has always been essentially that a speaker risks the indiscretion of his listeners and holds no superior legal position simply because a listener elects to record or transmit his statements rather than subsequently memorializing or repeating them.[2425] Wiretapping or electronic eavesdropping by either the police or anyone else with the consent of at least one party to the conversation is not unlawful under the federal statute.[2426] These

---

[2423] E.g., 47 U.S.C. 605(1940 ed.).

[2424] On Lee v. United States, 343 U.S. 747 (1952); Lopez v. United States, 373 U.S. 427 (1963); United States v. White, 401 U.S. 745 (1971).

[2425] United States v. White, 401 U.S. at 751 (1971)("Concededly a police agent who conceals his police connections may write down for official use his conversations with a defendant and testify concerning them, without a warrant authorizing his encounters with the defendant and without otherwise violating the latter's Fourth Amendment rights . . . . For constitutional purposes, no different result is required if the agent instead of immediately reporting and transcribing his conversations with defendant, either (1) simultaneously records them with electronic equipment which he is carrying on his person, Lopez v. United States, supra; (2) or carries radio equipment which simultaneously transmits the conversations either to recording equipment located elsewhere or to other agents monitoring the transmitting frequency. On Lee v. United States, supra. If the conduct and revelations of an agent operating without electronic equipment do not invade the defendant's constitutionally justifiable expectations of privacy, neither does a simultaneous recording of the same conversations made by the agent or by others from transmissions received from the agent to whom the defendant is talking and whose trustworthiness the defendant necessarily risks"); Lopez v. United States 373 U.S. 427, 439 (1963)("Stripped to its essentials, petitioner's argument amounts to saying that he has a constitutional right to rely on possible flaws in the agent's memory, or to challenge the agent's credibility without being beset by corroborating evidence that is not susceptible of impeachment. For no other argument can justify excluding an accurate version of a conversation that the agent could testify to from memory. We think the risk that petitioner took in offering a bribe to Davis fairly included the risk that the offer would be accurately reproduced in court, whether by faultless memory or mechanical recording").

[2426] "(c) It shall not be unlawful under this chapter for a person acting under color of law to intercept a wire, oral, or electronic communication, where such person is a party to the communication or one of the parties to the communication has given prior consent to such interception.

provisions do no more than shield consent interceptions from the sanctions of federal law; they afford no protection from the sanctions of state law. Many of the states recognize comparable exceptions, but some only permit interception with the consent of all parties to a communication.[2427]

Under federal law, consent may be either explicitly or implicitly given. For instance, someone who uses a telephone other than his or her own and has been told by the subscriber that conversations over the instrument are recorded has been held to have implicitly consented to interception when using the instrument.[2428] This is not to say that subscriber consent alone is sufficient, for it is the parties to the conversation whose privacy is designed to be protected.[2429] Although consent may be given in the hopes of leniency from law enforcement officials or as an election between unpalatable alternatives, it must be freely given and not secured coercively.[2430]

Private consent interceptions may not be conducted for a criminal or tortious purpose.[2431] At one time, the limitation encompassed interceptions for criminal, tortious, or otherwise injurious purposes, but ECPA dropped the reference to injurious purposes for fear that First Amendment values might be threatened

---

"(d) It shall not be unlawful under this chapter for a person not acting under color of law to intercept a wire, oral, or electronic communication where such person is a party to the communication or where one of the parties to the communication has given prior consent to such interception unless such communication is intercepted for the purpose of committing any criminal or tortious act in violation of the Constitution or laws of the United States or of any State," 18 U.S.C. 2511(2)(c), (d).

United States, 968 F.Supp. 1519, 1541 (M.D. Ala. 1997) (an individual who spoke to his wife on the telephone after being told by FBI agents who were then executing a search warrant at his place of business that he could only speak to her with the agents listening in consented to the interception, even if FBI's initial search was unconstitutional).

[2431] 18 U.S.C. 2511(2)(d); United States v. Lam, 271 F.Supp.2d 1182, 1183-184 (N.D.Cal. 2003).

should the clause be read to outlaw consent interceptions conducted to embarrass.[2432]

Exemptions: Publicly Accessible Radio Communications

Radio communications which can be inadvertently heard or are intended to be heard by the public are likewise exempt. These include not only commercial broadcasts, but ship and aircraft distress signals, tone-only pagers, marine radio and citizen band radio transmissions, and interceptions necessary to identify the source of any transmission, radio or otherwise, disrupting communications satellite broadcasts.[2433]

Exemptions: Government Officials

Government officials enjoy an exemption when acting under judicial authority, whether that authority is provided for in Title III/ECPA for federal and state law enforcement officers acting under a court order,[2434] acting in an emergency situation pending issuance of a court order,[2435] or in the case of communications

Attorney General, or by the principal prosecuting attorney of any State or subdivision thereof acting pursuant to a statute of that State, who reasonably determines that – (a) an emergency situation exists that involves – (i) immediate danger of death or serious physical injury to any person, (ii) conspiratorial activities threatening the national security interest, or (iii) conspiratorial activities characteristic of organized crime, [–] that requires a wire, oral, or electronic communication to be intercepted before an order authorizing such interception can, with due diligence, be obtained, and (b) there are grounds upon which an order could be entered under this chapter to authorize such interception, may intercept such wire, oral, or electronic communication if an application for an order approving the interception is made in accordance with this section within forty-eight hours after the interception has occurred, or begins to occur. In the absence of an order, such interception shall immediately terminate when the communication sought is obtained or when the application for the order is denied, whichever is earlier. In the event such application for approval is denied, or in any other case where the interception is terminated without an order having been issued, thecontents of any wire, oral, or electronic communication intercepted shall be treated as having been obtained in violation of this chapter, and an inventory shall be served as provided for in subsection (d) of this section on the person named in the application," 18 U.S.C. 2518(7).

[2436] "(i) It shall not be unlawful under this chapter for a person acting under color of law to intercept the wire or electronic communications of a computer trespasser transmitted to, through, or from the protected computer, if — (I) the owner or operator of the protected computer authorizes the interception of the computer trespasser's communications on the protected computer; (II) the person acting under color of law is lawfully engaged in an investigation; (III) the person acting under color of law has reasonable grounds to believe that the contents of the computer trespasser's communications will be relevant to the investigation; and (IV) such interception does not acquire communications other than those transmitted to or from the computer trespasser," 18 U.S.C. 2511(2)(i).

[2437] "(e) Notwithstanding any other provision of this title or section 705 or 706 of the Communications Act of 1934, it shall not be unlawful for an officer, employee, or agent of the United States in the normal course of his official duty to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, as authorized by that Act," 18 U.S.C. 2511(2)(e).

[2438] "(h) It shall not be unlawful under this chapter – (I) to use a pen register or a trap and trace device (as those terms are defined for the purpose of chapter 206). . . ." 18 U.S.C. 2511(2)(h). Neither the stored communications sections in chapter 121 nor the pen register and trap and trace device in chapter 206 authorize the contemporaneous interception of the contents of a communication. For the citations to state statutes permitting judicial authorization of law enforcement interception of wire, oral or electronic communications, for access to stored electronic communications, and for the use of pen registers and trap and trace devices, see Appendix D.

company protect itself against fraud,[2439] but it allows for assistance to federal and state officials operating under a judicially supervised interception order,[2440] and for the regulatory activities of the Federal Communications Commission.[2441]

[2439] "(a)(i) It shall not be unlawful under this chapter for an operator of a switchboard, or an officer, employee, or agent of a provider of wire or electronic communication service, whose facilities are used in the transmission of a wire or electronic communication, to intercept, disclose, or use that communication in the normal course of his employment while engaged in any activity which is a necessary incident to the rendition of his service or to the protection of the rights or property of the provider of that service, except that a provider of wire communication service to the public shall not utilize service observing or random monitoring except for mechanical or service quality control checks . . .

* * *

"(h) It shall not be unlawful under this chapter . . .

"(ii) for a provider of electronic communication service to record the fact that a wire or electronic communication was initiated or completed in order to protect such provider, another provider furnishing service toward the completion of the wire or electronic communication, or a user of that service, from fraudulent, unlawful or abusive use of such service," 18 U.S.C. 2511(2)(a)(I), (h).

[2440] "(ii) Notwithstanding any other law, providers of wire or electronic communication service, their officers, employees, and agents, landlords, custodians, or other persons, are authorized to provide information, facilities, or technical assistance to persons authorized by law to intercept wire, oral, or electronic communications or to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, if such provider, its officers, employees, or agents, landlord, custodian, or other specified person, has been provided with –

(A) a court order directing such assistance signed by the authorizing judge, or

(B) a certification in writing by a person specified in section 2518(7) of this title or the Attorney General of the United States that no warrant or court order is required by law, that all statutory requirements have been met, and that the specified assistance is required, setting forth the period of time during which the provision of the information, facilities, or technical assistance is authorized and specifying the information, facilities, or technical assistance required. No provider of wire or electronic communication service, officer, employee, or agent thereof, or landlord, custodian, or other specified person shall disclose the existence of any interception or surveillance or the device used to accomplish the interception or surveillance with respect to which the person has been furnished a court order or certification under this chapter, except as may otherwise be required by legal process and then only after prior notification to the Attorney General or to the principal prosecuting attorney of a State or any political subdivision of a State, as may be appropriate. Any such disclosure, shall render such person liable for the civil damages provided for in section 2520. No cause of action shall lie in any court against any provider of wire or electronic communication service, its officers, employees, or agents, landlord, custodian, or other specified person for providing information, facilities, or assistance in accordance with the terms of a court order, statutory authorization, or certification under this chapter," 18 U.S.C. 2511(2)(a)(ii).

[2441] "(b) It shall not be unlawful under this chapter for an officer, employee, or agent of the Federal Communications Commission, in the normal course of his employment and in discharge of the monitoring responsibilities exercised by the Commission in the enforcement of chapter 5 of title 47 of the United States Code, to intercept a wire or electronic communication, or oral

Domestic Exemptions

A few courts recognize a "vicarious consent" exception under which a custodial parent may secretly record the conversations of his or her minor child in the interest of protecting the child.[2442] Although rejected by most,[2443] a handful of federal courts have held that Title III/ECPA does not preclude one spouse from wiretapping or electronically eavesdropping upon the other,[2444] a result other courts have sometimes reached through the telephone extension exception discussed above.[2445]

Consequences: Criminal Penalties

Interceptions in violation of Title III/ECPA are generally punishable by imprisonment for not more than five years and/or a fine of not more than $250,000 for individuals and not more than $500,000 for organizations.[2446] The

[2446] "Except as provided in (b) of this subsection or in subsection (5), whoever violates subsection (1) of this section shall be fined under this title* or imprisoned not more than five years, or both." 18 U.S.C. 2511(4)(a).

* Section 3559 of title 18 classifies as a felony any offense with a maximum penalty of imprisonment of more than one year; and as a Class A misdemeanor any offense with a maximum penalty of imprisonment set at between six months and one year. Unless Congress clearly rejects the general fine ceilings it provides, section 3571 of title 18 sets the fines for felonies at not more than $250,000 for individuals and not more than $500,000 for organizations, and for class A misdemeanors at not more than $100,000 for individuals and not more than $200,000 for

same penalties apply to the unlawful capture of cell phone and cordless phone conversations, since the Homeland Security Act[2447] repealed the reduced penalty provisions that at one time applied to the unlawful interceptions using radio scanners and the like.[2448] There is a reduced penalty, however, for filching satellite communications as long as the interception is not conducted for criminal, tortious, nor mercenary purposes: unauthorized interceptions are broadly proscribed subject to an exception for unscrambled transmissions[2449] and are subject to the general five-year penalty, but interceptions for neither criminal, tortious, nor mercenary purposes subject offenders to only civil punishment.[2450] Equipment used to wiretap or eavesdrop in violation of Title III is subject to confiscation by the United States, either in a separate civil proceeding or a part of the prosecution of the offender.[2451]

organizations. If there is monetary loss or gain associated with the offense, the offender may alternatively be fined not more than twice the amount of the loss or gain, 18 U.S.C. 3571.

[2447] 116 Stat. 2158 (2002).

[2448] 18 U.S.C. 2511(4)(b)(2000 ed.).

[2449] "(b) Conduct otherwise an offense under this subsection that consists of or relates to the interception of a satellite transmission that is not encrypted or scrambled and that is transmitted – (i) to a broadcasting station for purposes of retransmission to the general public; or (ii) as an audio subcarrier intended for redistribution to facilities open to the public, but not including data transmissions or telephone calls, is not an offense under this subsection unless the conduct is for the purpose of direct or indirect commercial advantage or private financial gain," 18 U.S.C. 2511(4)(b).

[2450] "(5)(a)(I) If the communication is – (A) a private satellite video communication that is not scrambled or encrypted and the conduct in violation of this chapter is the private viewing of that communication and is not for a tortious or illegal purpose or for purposes of direct or indirect commercial advantage or private commercial gain; or (B) a radio communication that is transmitted on frequencies allocated under subpart D of part 74 of the rules of the Federal Communications Commission that is not scrambled or encrypted and the conduct in violation of this chapter is not for tortious or illegal purpose or for purposes of direct or indirect commercial advantage or private commercial gain, then the person who engages in such conduct shall be subject to suit by the Federal Government in a court of competent jurisdiction. (ii) In an action under this subsection – (A) if the violation of this chapter is a first offense for the person under paragraph (a) of subsection (4) and such person has not been found liable in a civil action under section 2520 of this title, the Federal Government shall be entitled to appropriate injunctive relief; and (B) if the violation of this chapter is a second or subsequent offense under paragraph (a) of subsection (4) or such person has been found liable in any prior civil action under section 2520, the person shall be subject to a mandatory $500 civil fine. "(b) The court may use any means within its authority to enforce an injunction issued under paragraph (ii)(A), and shall impose a civil fine of not less than $500 for each violation of such an injunction." 18 U.S.C. 2511(5). Under 18 U.S.C. 2520, victims may recover the greater of actual damages or statutory damages of not less than $50 and not more than $500 for the first offense; those amounts are increased to $100 and $1000 for subsequent offenses.

[2451] 18 U.S.C. 2513 ("Any electronic, mechanical, or other device used, sent, carried, manufactured, assembled, possessed, sold, or advertised in violation of section 2511 or section 2512 of this chapter may be seized and forfeited to the United States. . ."); 18 U.S.C.

In addition to exemptions previously mentioned, Title III provides a defense to criminal liability based on good faith.[2452] As noted below, the defense seems to lack sufficient breadth to shelter any offender other than a government official or someone working at their direction.

Consequences: Civil Liability

Victims of illegal wiretapping or electronic eavesdropping may be entitled to equitable relief, damages (equal to the greater of actual damages, $100 per day of violation, or $10,000),[2453] punitive damages, reasonable attorney's fees and reasonable litigation costs.[2454] A majority of federal courts hold that a court may decline to award damages, attorneys' fees and costs once a violation has been shown, but a few still consider such awards mandatory.[2455] In addition, a majority holds that governmental entities other than the United States may be liable for

---

983(a)(3)(C)("In lieu of, or in addition to, filing a civil forfeiture complaint, the Government may include a forfeiture allegation in a criminal indictment. . .").

[2452] "A good faith reliance on – (1) a court warrant or order, a grand jury subpoena, a legislative authorization, or a statutory authorization; (2) a request of an investigative or law enforcement officer under section 2518(7) of this title; or (3) a good faith determination that section 2511(3) [electronic communications provider authority to disclose content of an electronic communication "(i) as otherwise authorized in section 2511(2)(a) or 2517 of this title; (ii) with the lawful consent of the originator or any addressee or intended recipient of such communication; (iii) to a person employed or authorized, or whose facilities are used, to forward such communication to its destination; or (iv) which were inadvertently obtained by the service provider and which appear to pertain to the commission of a crime, if such divulgence is made to a law enforcement agency] or 2511(2)(I) [interception of communications of a trespasser in a computer system] of this title permitted the conduct complained of; is a complete defense against any civil or criminal action brought under this chapter or any other law," 18 U.S.C. 2520(d).

[2453] The $10,000 lump sum for liquidated damages is limited to a single award per victim rather than permitting $10,000 multiples based on the number of violations or the number of types of violations, as long as the violations are "interrelated and time compacted," Smoot v. United Transportation Union, 246 F.3d 633, 642-645 (6th Cir. 2001); Desilets v. Wal-Mart Stores, Inc., 171 F.3d 711, 713 (1st Cir. 1999).

[2454] 18 U.S.C. 2520. The text of 18 U.S.C. 2520 is appended.

[2455] Compare, e.g., DIRECTV, Inc. v. Brown, 371 F.3d 814, 818 (11th Cir. 2004); Dorris v. Absher, 179 F.3d, 420, 42930 (6th Cir. 1999); Nalley v. Nalley, 53 F.3d 649, 651-53 (4th Cir. 1995), Reynolds v. Spears, 93 F.3d 428, 433 (8th Cir. 1996); DIRECTV, Inc. v. Neznak, 371 F.Supp.2d 130, 133-34 (D.Conn. 2005) (each concluding that courts have discretion), with, Rodgers v. Wood, 910 F.2d 444, 447-49 (7th Cir. 1990) and Menda Biton v. Menda, 812 F.Supp. 283, 284 (D. Puerto Rico 1993) (courts have no such discretion) (note that after Menda, the First Circuit in Desilets v. Wal-Mart Stores, Inc., 171 F.3d at 716-17 treated as a matter for the trial court's discretion the question of whether the award of plaintiff's attorneys' fees should be reduced when punitive damages have been denied).

violations of section 2520[2456] and that law enforcement officers enjoy a qualified immunity from suit under section 2520.[2457]

The cause of action created in section 2520 is subject to a good faith defense.[2458] The only apparent efforts to claim the defense by anyone other than a government official or someone working at their direction have been unsuccessful.[2459]

Consequences: Civil Liability of the United States

The USA PATRIOT Act authorizes a cause of action against the United States for willful violations of Title III, the Foreign Intelligence Surveillance Act or the provisions governing stored communications in 18 U.S.C. 2701-2712.[2460] Successful plaintiffs are entitled to the greater of $10,000 or actual damages, and reasonable litigation costs.[2461]

Consequences: Administrative Action

Upon a judicial or administrative finding of a Title III violation suggesting possible intentional or willful misconduct on the part of a federal officer or employee, the federal agency or department involved may institute disciplinary action. It is required to explain to its Inspector General's office if it declines to do so.[2462]

[2460] 18 U.S.C. 2712. The text of 18 U.S.C. 2712 is appended.

[2461] 18 U.S.C. 2712(a).

[2462] "If a court or appropriate department or agency determines that the United States or any of its departments or agencies has violated any provision of this chapter, and the court or appropriate department or agency finds that the circumstances surrounding the violation raise serious questions about whether or not an officer or employee of the United States acted willfully or

Consequences: Attorney Discipline

At one time, the American Bar Association (ABA) considered it ethical misconduct for an attorney to intercept or record a conversation without the consent of all of the parties to the conversation, ABA Formal Op. 337 (1974). The reaction of state regulatory authorities with the power to discipline professional misconduct was mixed. Some agreed with the ABA.[2463] Some agreed with the ABA, but expanded the circumstances under which recording could be conducted within ethical bounds.[2464] Some disagreed with the ABA view.[2465] The ABA has

---

intentionally with respect to the violation, the department or agency shall, upon receipt of a true and correct copy of the decision and findings of the court or appropriate department or agency promptly initiate a proceeding to determine whether disciplinary action against the officer or employee is warranted. If the head of the department or agency involved determines that disciplinary action is not warranted, he or she shall notify the Inspector General with jurisdiction over the department or agency concerned and shall provide the Inspector General with the reasons for such determination," 18 U.S.C. 2520(f).

[2463] Ala. Opinion 84-22 (1984); People v. Smith, 778 P.2d 685, 686, 687 (Colo. 1989); Haw. Formal Opinion No. 30 (1988); Ind.State Bar Ass'n Op.No.1 (2000); Iowa State Bar Ass'n v. [2465] D.C. Opinion No. 229 (1992) (recording was not unethical because it occurred under circumstances in which the uninformed party should have anticipated that the conversation would be recorded or otherwise memorialized); Mississippi Bar v. Attorney ST., 621 So.2d 229 (Miss. 1993)(context of the circumstances test); Conn.Bar Ass"n Op. 98-9 (1998)(same); Mich.State Bar Op. RI-309 (1998)(same); Me.State Bar Op.No. 168 (1999)(same); N.M.Opinion 1996-2 (1996)(members of the bar are advised that there are no clear guidelines and that the prudent attorney avoids surreptitious recording); N.C. RPC 171 (1994)(lawyers are encouraged to disclose to the other lawyer that a conversation is being tape recorded); Okla.Bar Ass'n Opinion 307 (1994)(a lawyer may secretly recording his or her conversations without the knowledge or consent of other parties to the conversation unless the recording is unlawful or in violation of some ethical standard involving more than simply recording); Ore.State Bar Ass'n Formal Opinion No. 1991-74 (1991) (an attorney with one party consent he or she may record a telephone conversation "in absence of conduct which would reasonably lead an individual to believe that no recording would be made"); Utah State Bar Ethics Advisory Opinion No. 96-04 (1996) ("recording conversations to which an attorney is a party without prior disclosure to the other parties is not unethical when the act, considered within the context of the circumstances, does not involve dishonesty, fraud, deceit or misrepresentation"); Wis.Opinion E-94-5 ("whether the secret recording of a telephone conversation by a lawyer involves .dishonesty, fraud, deceit or misrepresentation' under SCR 20:8.4(c) depends upon all the circumstances operating at the

now repudiated its earlier position, ABA Formal Op. 01-422 (2001). Attorneys who engage in unlawful wiretapping or electronic eavesdropping will remain subject to professional discipline in every jurisdiction;[2466] in light of the ABA's change of position, courts and bar associations have had varied reactions to lawful wiretapping or electronic eavesdropping by members of the bar.[2467]

Consequences: Exclusion of Evidence

When the federal wiretap statute prohibits disclosure, the information is inadmissible as evidence before any federal, state, or local tribunal or authority, 18 U.S.C. 2515.[2468] Individuals whose conversations have been intercepted or

---

time"). In New York, the question of whether an attorney's surreptitiously recording conversations is ethically suspect is determined by locality, compare, Ass'n of the Bar of City of N.Y. Formal Opinion No. 1995-10 (1995)(secret recording is per se unethical), with, N.Y.County Lawyer's Ass'n Opinion No. 696 (1993)(secret recording is not per se unethical).

[2466] Cf., Nissan Motor Co., Ltd. v. Nissan Computer Corp., 180 F.Supp.2d 1089, 1095-97 (C.D.Cal. 2002).

[2467] E.g., State v. Murtagh, 169 P.3d 602, 617-18 (Alaska 2007)("undisclosed recording is not unethical"); In re Crossen, 450 Mass. 533, 558, 880 N.E.2d 352, 372 (2008) (undisclosed recording was unethical where it was part of scheme to coerce or manufacture testimony against the judge presiding over pending litigation); Midwest Motor Sports v. Arctic Cat Sales, Inc., 347 F.3d 693, 699 (8th Cir. 2003) (citing ABA Comm. on Ethics and Prof'l Responsibility, Formal Op. 01-422, which states that recording without consent should be prohibited when circumstances make it unethical); United States v. Smallwood, 365 F. Supp. 2d 689, 697-98 (E.D. Va. 2005) (holding that a lawyer cannot ethically record a conversation without the consent of all parties, even though doing so is not illegal under Virginia law). Declaring the new ABA opinion to be an "overcorrection," one bar association explained that secret taping should not be routine practice, but that it should be permitted if it advances a "societal good." Ass'n of the Bar of the City of New York Formal Opinion No. 2003-02 (2003). For a New York state bar opinion employing a similar line of reasoning, see Mena v. Key Food Stores Co-operative, Inc., 758 N.Y.S.2d 246, 247-50 (N.Y. Sup. Ct. 2003) (conduct of attorney who obtained a private investigator's services for a client and instructed the client on the use of recording equipment held not to warrant severe sanctions, because there was a compelling public interest in exposing the racial discrimination that was the subject of the secret recordings).

[2468] "Whenever any wire or oral communication has been intercepted, no part of the contents of such communication and no evidence derived therefrom may be received in evidence in any trial, hearing, or other proceeding in or before any court, grand jury, department, officer, agency, regulatory body, legislative committee, or other authority of the United States, a State, or a political subdivision thereof if the disclosure of that information would be in violation of this chapter," 18 U.S.C. 2515 (emphasis added); United States v. Chavez, 416 U.S. 562, 570 (1974); United States v. Lnu, 575 F.3d 298, 301 (3d Cir. 2009); United States v. Lam, 271 F.Supp.2d 1182, 1183-184 (N.D.Cal. 2003). Note that suppression does not extend to unlawfully intercepted electronic communications, United States v. Steiger, 318 F.3d 1039, 1050-52 (11th Cir. 2003); United States v. Jones, 364 F. Supp. 2d 1303, 1308-09 (D. Utah 2005); nor does it extend to evidence secured in violation the pen register/trap and trace provisions, United States v. German, 486 F.3d 849, 852-53 (5th Cir. 2007).

against whom the interception was directed[2469] have standing to claim the benefits of the section 2515 exclusionary rule through a motion to suppress under 18 U.S.C. 2518(10)(a).[2470] Paragraph 2518(10)(a) bars admission as long as the evidence is the product of (1) an unlawful interception, (2) an interception authorized by a facially insufficient court order, or (3) an interception executed in manner substantially contrary to the order authorizing the interception. Mere technical noncompliance is not enough; the defect must be of a nature that substantially undermines the regime of court-supervised interception for law enforcement purposes.[2471]

Although the Supreme Court has held that section 2515 may require suppression in instances where the Fourth Amendment exclusionary rule would not,[2472] some of the lower courts have recognized the applicability of the good faith exception to the Fourth Amendment exclusionary rule in section 2515 cases.[2473] Other courts

---

[2469] 18 U.S.C. 2510(11)("'aggrieved person' means a person who was a party to any an intercepted wire, oral, or electronic communication or a person against whom the interception was directed"); United States v. Gonzales, 412 F.3d 1102, 1115-117 (9th Cir. 2005).

[2470] The text of 18 U.S.C. 2518(10)(a) is appended.

[2471] United States v. Williams, 124 F.3d 411, 426 (3d Cir. 1997)("The Supreme Court has explained the relationship between these two provisions. In United States v. Giordano, 416 U.S. 505 (1974), the Court wrote that 'what disclosures are forbidden under 2515 and we subject to motions to suppress is . . . governed by 2518(10)(a).' Thus, evidence may be suppressed only if one of the grounds set out in 2518(10)(a) is met. Moreover not every failure to comply fully with any requirement provided in Title III would render the interception of wire or oral communications unlawful under 2518(10)(a)(I). United States v. Donovan, 429 U.S. 413, 433 (1977), quoting United States v. Chavez, 416 U.S. 562 (1974). Rather suppression is mandated only for a failure to satisfy any of those statutory requirements that directly and substantially implement the congressional intention to limit the use of intercept procedures to those situations clearly calling for the employment of this extraordinary investigative device, Donovan, 429 U.S. at 433-34, quoting Girodano, 416 U.S. at 527"); United States v. Lopez, 300 F.3d 46, 55-6 (1st Cir. 2002); United States v. Staffeldt, 451 F.3d 578, 582-85 (9th Cir. 2006); United States v. Gray, 521 F.3d 514, 522 (6th Cir. 2008). This is the case even where the court is clearly troubled by the government's failure to comply with the requirements of Title III, United States v. Callum, 410 F.3d 571, 579 (9th Cir. 2005)("Under the force of precedent, we uphold the challenged wiretap applications and orders. Still, we note that the Department of Justice and its officers did not cover themselves with glory in obtaining the wiretap orders at issue in this case. Title III is an exacting statute obviously meant to be followed punctiliously, yet the officers repeatedly ignored its clear requirements").

[2472] Gelbard v. United States, 408 U.S. 41, 52 (1972).

[2473] United States v. Moore, 41 F.3d 370, 376 (8th Cir. 1994); United States v. Ambrosio, 898 F.Supp. 177, 187 (S.D.N.Y. 1995); United States v. Malelzadeh, 855 F.2d 1492, 1497 (11th Cir. 1988); United States v. Mullen, 451 F.Supp.2d 509, 530-31 (W.D.N.Y. 2006); contra, United States v. Rice, 478 F.3d 704, 711-14 (6th Cir. 2007). Gelbard held that a grand jury witness might claim the protection of section 2515 through a refusal to answer questions based upon an unlawful wiretap notwithstanding the fact that the Fourth Amendment exclusionary rule does not apply in grand jury proceedings. Gelbard, 408 U.S. at 51-52. The good faith exception to the

have held, moreover, that the fruits of an unlawful wiretapping or electronic eavesdropping may be used for impeachment purposes.[2474]

The admissibility of tapes or transcripts of tapes of intercepted conversations raise a number of questions quite apart from the legality of the interception. As a consequence of the prerequisites required for admission, privately recorded conversations are more likely to be found inadmissible than those recorded by government officials. Admissibility will require the party moving for admission to show that the tapes or transcripts are accurate, authentic and trustworthy.[2475] For some courts this demands a showing that, "(1) the recording device was capable of recording the events offered in evidence; (2) the operator was competent to operate the device; (3) the recording is authentic and correct; (4) changes, additions, or deletions have not been made in the recording; (5) the recording has been preserved in a manner that is shown to the court; (6) the speakers on the tape are identified; and (7) the conversation elicited was made voluntarily and in good faith, without any kind of inducement."[2476]

Fourth Amendment exclusionary rule permits the admission of evidence secured in violation of the Fourth Amendment, if the officers responsible for the breach were acting in good faith reliance upon the apparent authority of a search warrant or some like condition negating the remedial force of the rule, United States v. Leon, 468 U.S. 897, 909 (1984).

[2474] Culbertson v. Culbertson, 143 F.3d 825, 827-28 (4th Cir. 1998); United States v. Echavarria-Olarte, 904 F.2d 1391 (9th Cir. 1990); United States v. Vest, 813 F.2d 477, 484 (1st Cir. 1987); cf., United States v. Crabtree, 565 F.3d 887, 891-92 (4th Cir. 2009)(noting that the Circuit's recognition of admissibility for impeachment purposes does not require recognition of a clean hands exception under which the government may admit introduce illegal wiretap evidence as long as it was not involved in the illegal interception).

[2475] United States v. Thompson, 130 F.3d 676, 683 (5th Cir. 1997); United States v. Panaro, 241 F.3d 1104, 1111 (9th Cir. 2001); United States v. Smith, 242 F.3d 737, 741 (7th Cir. 2001).

[2476] United States v. Webster, 84 F.3d 1056, 1064 (8th Cir. 1996); United States v. Green, 175 F.3d 822, 830 n.3 (10th Cir. 1999); United States v. Green, 324 F.3d 375, 379 (5th Cir. 2003)(citing 4 of the 7 factors); cf., United States v. Calderin-Rodriguez, 244 F.3d 977, 986-87 (8th Cir. 2001). These seven factors have been fairly widely cited since they were first announced in United States v. McKeever, 169 F.Supp. 426, 430 (S.D.N.Y. 1958), rev'd on other grounds, 271 F.2d 669 (2d Cir. 1959). They are a bit formalistic for some courts who endorse a more ad hoc approach to the assessment of whether the admission of what purports to be a taped conversation will introduce fraud or confusion into the court, e.g., Stringel v. Methodist Hosp. of Indiana, Inc., 89 F.3d 415, 420 (7th Cir. 1996)(McKeever "sets out a rather formal, seven step checklist for the authentication of tape recordings, and we have looked to some of the features [in the past]"); United States v. White, 116 F.3d 903, 921 (D.C.Cir. 1997)("tapes may be authenticated by testimony describing the process or system that created the tape or by testimony from parties to the conversation affirming that the tapes contained an accurate record of what was said"); United States v. Tropeano, 252 F.3d 653, 661 (2d Cir. 2001)("[T]his Circuit has never expressly adopted a rigid standard for determining the admissibility of tape recordings"); United States v. Westmoreland, 312 F.3d 302, 310-11 (7th Cir. 2002); United States v. Dawson, 425 F.3d 389, 393 (7th Cir. 2005)("But there are no rigid rules, such as chain of custody, for authentication; all that is required is adequate evidence of genuineness. (There are such rules for electronic surveillance governed by Title III,

Illegal Disclosure of Information Obtained by Wiretapping or Electronic Eavesdropping

Although often overlooked, it also a federal crime to disclose information obtained from illicit wiretapping or electronic eavesdropping, 18 U.S.C. 2511(1)(c):

- any person [who]
- intentionally
- discloses or endeavors to disclose to another person
- the contents of any wire, oral, or electronic communication
- having reason to know
- that the information was obtained through the interception of a wire, oral, or electronic communication
- in violation of 18 U.S.C. 2511(1)
- is subject to the same sanctions and remedies as the wiretapper or electronic eavesdropper.

This is true of the wiretapper or electronic eavesdropper and of all those who disclose information, that in fact can be traced to a disclosure by the original wiretapper or eavesdropper, with reason to know of the information's illicit origins, except to the extent the First Amendment bans application.[2477] The legislative history speaks of a common knowledge limitation on the statute's coverage, but it is not clear whether it refers to common knowledge at the time of

---

but Title III is inapplicable to conversations that, as here, are recorded with the consent of one of the participants)").

[2477] Bartnicki v. Vopper, 532 U.S. 514, 533-34 (2001), pointed out that the First Amendment right to free speech bars the application of section 2511(1)(c) to the disclosure of illegally intercepted, but lawfully acquired, communications dealing with a matter of unusual public concern. Bartnicki was a union negotiator whose telephone conversations with the union's president were surreptitiously intercepted and recorded a discussion negotiation of a teachers' contract. During the conversation, the possibility of using violence against school board members was mentioned. After the teachers' contract was signed, the unknown wiretapper secretly supplied Yocum, a critic of the union's position, with a copy of the tape. Yocum in turn played it for members of the school board and turned it over to Vopper, a radio talk show host, who played it on his show. Other stations and media outlets published the contents as well. Bartnicki sued Vopper and Yocum for use and disclosure in violation of sections 2511(1)(c) and 2511(1)(d). Vopper and Yocum offered a free speech defense, which the Supreme Court accepted. But see, Quigley v. Rosenthal, 327 F.3d 1044, 106768 (10th Cir. 2003) (denying First Amendment protection for those knowingly involved with interceptors of private matters (not public concerns)); Boehner v. McDermott, 484 F.3d 573, 577-81 (D.C. Cir. 2007)(Members of Congress do not have a First Amendment right to disclose unlawful wiretap information in violation of House rules). For a more extensive examination of Bartnicki, see, CRS Report RS20974, The Right to Publish Lawfully Obtained But Illegally Intercepted Material of Public Concern: Bartnicki v. Vopper.

interception or at the time disclosure.[2478] By definition, a violation of paragraph 2511(1)(c) requires an earlier unlawful interception under subsection 2511(1). If there is no predicate unlawful interception there can be no violation of paragraph 2511(1)(c).

The results of electronic eavesdropping authorized under Title III/ECPA may be disclosed and used for law enforcement purposes[2479] and for testimonial purposes.[2480]

It is also a federal crime to disclose, with an intent to obstruct criminal justice, any information derived from lawful police wiretapping or electronic eavesdropping, i.e.:

- any person [who]
- intentionally discloses, or endeavors to disclose, to any other person
- the contents of any wire, oral, or electronic communication
- intercepted by means authorized by sections:
    - 2511(2)(a)(ii) (communication service providers, landlords, etc. who assist police setting up wiretaps or electronic eavesdropping devices)
    - 2511(2)(b) (FCC regulatory activity)
    - 2511(2)(c) (police one party consent)

[2478] "Subparagraphs (c) and (d) prohibit, in turn, the disclosure or use of the contents of any intercepted communication by any person knowing or having reason to know the information was obtained through an interception in violation of this subsection. The disclosure of the contents of an intercepted communication that had already become 'public information' or 'common knowledge' would not be prohibited. The scope of this knowledge required to violate either subparagraph reflects existing law (Pereira v. United States, 347 U.S. 1 (1954))," S.Rept. 90=-1097, at 93 (1967). The remark may also have been influenced by the high level of intent (willfully rather than intentionally) included in the disclosure provision as reported out.

[2479] "Any investigative or law enforcement officer who, by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication, or evidence derived therefrom, may disclose such contents to another investigative or law enforcement officer to the extent that such disclosure is appropriate to the proper performance of the official duties of the officer making or receiving the disclosure," 18 U.S.C. 2517(1).

[2480] "Any person who has received, by any means authorized by this chapter, any information concerning a wire, oral, or electronic communication, or evidence derived therefrom intercepted in accordance with the provisions of this chapter may disclose the contents of that communication or such derivative evidence while giving testimony under oath or affirmation in any proceeding held under the authority of the United States or of any State or political subdivision thereof," 18 U.S.C. 2517(3). This does not entitle private litigants to disclosure in the view of at least one court, In re Motion to Unseal Electronic Surveillance Evidence, 990 F.2d 1015 (8th Cir. 1993). When court-ordered interception results in evidence of a crime other than the crime with respect to which the order was issued, the evidence is admissible only upon a judicial finding that it was otherwise secured in compliance with Title III/ECPA requirements, 18 U.S.C. 2517(5).

    - 2511(2)(e) (Foreign Intelligence Surveillance Act)
    - 2516 (court-ordered, police wiretapping or electronic surveillance)
    - 2518 (emergency wiretaps or electronic surveillance)
- knowing or having reason to know that
- the information was obtained through the interception of such a communication
- in connection with a criminal investigation
- having obtained or received the information in connection with a criminal investigation
- with intent to improperly obstruct, impede, or interfere with a duly authorized criminal investigation,
- is subject to the same sanctions and remedies as one who illegally wiretaps, 18 U.S.C. 2511(1)(e).[2481]

The proscriptions in 2511(1)(e) would appear to apply to efforts to obstruct justice by information gleaned from either federal or state police wiretaps. Use of the word "authorized" in conjunction with a list of federal statutes might suggest that the paragraph was only intended to protect wiretap information gathered by federal rather than by federal or state authorities. But most of the cited sections do not "authorize" anything; they simply confine the reach of the statutory prohibitions. And several are as likely to involve state interceptions as federal, e.g., the one-partyconsent-under-color-of-law interceptions.

Essentially, the same consequences flow from an unlawful disclosure under paragraphs 2511(1)(c) or 2511(1)(e) as follow unlawful interception under paragraphs 2511(1)(a) or 2511(1)(b):

- maximum five year prison terms and fines of not more than $250,000 or $500,000, depending upon whether the offender is an individual or organization;[2482]

[2481] When acting with a similar intent, disclosure of the fact of authorized federal wiretap or foreign intelligence gathering is proscribed elsewhere in title 18. "Whoever, having knowledge that a Federal investigative or law enforcement officer has been authorized or has applied for authorization under chapter 119 to intercept a wire, oral, or electronic communication, in order to obstruct, impede, or prevent such interception, gives notice or attempts to give notice of the possible interception to any person shall be fined under this title or imprisoned not more than five years, or both."

"Whoever, having knowledge that a Federal officer has been authorized or has applied for authorization to conduct electronic surveillance under the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801, et seq.), in order to obstruct, impede, or prevent such activity, gives notice or attempts to give notice of the possible activity to any person shall be fined under this title or imprisoned not more than five years, or both," 18 U.S.C. 2232(d),(e).

[2482] "[W]hoever violates subsection (1) of this section shall be fined under this title or imprisoned not more than five years, or both," 18 U.S.C. 2511(4)(a).

- exposure to civil liability including equitable relief and actual or statutory damages.[2483]

Illegal Use of Information Obtained by Unlawful Wiretapping or Electronic Eavesdropping

The prohibition on the use of information secured from illegal wiretapping or electronic eavesdropping mirrors the disclosure provision, 18 U.S.C. 2511(1)(d):

- any person [who]
- intentionally
- uses or endeavors to use to another person
- the contents of any wire, oral, or electronic communication
- having reason to know
- that the information was obtained through the interception of a wire, oral, or electronic communication
- in violation of 18 U.S.C. 2511(1)
- is subject to the same sanctions and remedies as the wiretapper or electronic eavesdropper.

The available case law under the use prohibition of section 2511(1)(d) is scant, and the section has rarely been invoked except in conjunction with the disclosure prohibition of section 2511(1)(c). The wording of the two is clearly parallel, the legislative history describes them in the same breath,[2484] and they are treated alike for law enforcement purposes.[2485] *Bartnicki* seems destined to change all of that, because it appears to parse the constitutionally suspect ban on disclosure

---

[2483] "(a) . . . any person whose wire, oral, or electronic communication is . . . disclosed . . . used in violation of this chapter may in a civil action recover from the person or entity, other than the United States, which engaged in that violation such relief as may be appropriate. . . .(g) Any willful disclosure . . . by an investigative or law enforcement officer or governmental entity of information beyond the extent permitted by section 2517 is a violation of this chapter for purposes of section 2520(a)," 18 U.S.C. 2520(a),(g).

[2484] "Subparagraphs (c) and (d) prohibit, in turn, the disclosure or use of the contents of any intercepted communication by any person knowing or having reason to know the information was obtained through an interception in violation of this subsection," S.Rept. 90-1097, at 93 (1967).

[2485] Compare, 18 U.S.C. 2517(1)("Any investigative or law enforcement officer who, by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication, or evidence derived therefrom, may disclose such contents to another investigative or law enforcement officer to the extent that such disclosure is appropriate to the proper performance of the official duties of the officer making or receiving the disclosure"), with 18 U.S.C. 2517(2)("Any investigative or law enforcement officer who, by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication or evidence derived therefrom may use such contents to the extent such use is appropriate to the proper performance of his official duties").

from the constitutionally permissible ban on use.[2486] In doing so, it may also resolve a conflict among the lower federal appellate courts over the so-called "clean hands" exception. A few courts had recognized an exception to the disclosure-use bans of section 2511(1) where law enforcement officials might disclose or use the results of an illegal interception in which they had played no role.[2487] *Bartnicki* appears to dim the prospects of a clean hands exception because, to illustrate situations to which the section 2511(1)(d) use might be constitutionally outlawed, it points to one of the cases which rejected the exception.[2488]

The consequences of unlawful use of intercepted communications in violation of paragraph 2511(d) are similar to those for unlawful disclosure in violation of paragraphs 2511(1)(c) or 2511(1)(e), or for unlawful interception under paragraphs 2511(1)(a) or 2511(1)(b):

- maximum five year prison terms and fines of not more than $250,000 or $500,000, depending upon whether the offender is an individual or organization, 18 U.S.C. 2511(4)(a);
- exposure to civil liability including equitable relief and actual or statutory damages, 18 U.S.C. 2520(a), (g).

Shipping, Manufacturing, Distributing, Possessing or Advertising Wire, Oral, or Electronic Communication Interception Devices

The proscriptions for possession and trafficking in wiretapping and eavesdropping devices are even more demanding than those that apply to the

---

[2486] "[T]he naked prohibition against disclosures is fairly characterized as a regulation of pure speech. Unlike the prohibition against the .use' of the contents of an illegal interception in §2511(1)(d), subsection (c) is not a regulation of conduct," 532 U.S. at 526-27.

[2487] Forsyth v. Barr, 19 F.3d 1527, 1541-545 (5th Cir. 1994); United States v. Murdock, 63 F.3d 1391, 1400-403 (6th Cir. 1995); contra,United States v. Crabtree, 565 F.3d 887, 889 (4th Cir. 2009); Berry v. Funk, 146 F.3d 1003, 1011-13 (D.C.Cir. 1998); Chandler v. United States Army, 125 F.3d 1296, 1300-302 (9th Cir. 1997); In re Grand Jury, 111 F.3d 1066, 1077 (3d Cir. 1997); United States v. Vest, 813 F.2d 477, 481 (1st Cir. 1987); United States v. Lam, 271 F.Supp.2d 1182, 1184-187 (N.D.Cal. 2003); see also, United States v. Gray, 521 F.3d 514, 530 (6th Cir. 2008)(noting that doctrine is only available in cases of government use).

[2488] "Unlike the prohibition against the .use' of the contents of an illegal interception in §2511(1)(d),* subsection (c) is not a regulation of conduct.

*"The Solicitor General has catalogued some of the cases that fall under subsection (d): . . . . The statute has also been held to bar the use of illegally intercepted communications for important and socially valuable purposes, see, In re Grand Jury, 111 F.3d 1066, 1077-79 (3d Cir. 1997)," 532 U.S. at 527 (footnote 10 of the Court's opinion quoted after the *).

predicate offense itself. There are exemptions for service providers,[2489] government officials and those under contract with the government,[2490] but there is no exemption for equipment designed to be used by private individuals, lawfully but surreptitiously.[2491]

The three prohibitions in section 2512 present generally common features, declaring that:

- any person who
- intentionally
- either
  - (a)
    - sends through the mail or sends or carries in interstate or foreign commerce
    - any electronic, mechanical, or other device
    - knowing or having reason to know
    - that the design of such device renders it primarily useful
    - for the purpose of the surreptitious interception of wire, oral, or electronic communications; or
  - (b)
    - manufactures, assembles, possesses, or sells
    - any electronic, mechanical, or other device
    - knowing or having reason to know
    - that the design of such device renders it primarily useful

---

[2489] "It shall not be unlawful under this section for – (a) a provider of wire or electronic communication service or an officer, agent, or employee of, or a person under contract with, such a provider, in the normal course of the business of providing that wire or electronic communication service . . . to send through the mail, send or carry in interstate or foreign commerce, or manufacture, assemble, possess, or sell any electronic, mechanical, or other device knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire, oral, or electronic communications," 18 U.S.C. 2512(2)(a).

[2490] "(2) It shall not be unlawful under this section for . . . (b) an officer, agent, or employee of, or a person under contract with, the United States, a State, or a political subdivision thereof, in the normal course of the activities of the United States, a State, or a political subdivision thereof, to send through the mail, send or carry in interstate or foreign commerce, or manufacture, assemble, possess, or sell any electronic, mechanical, or other device knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire, oral, or electronic communications. "(3) It shall not be unlawful under this section to advertise for sale a device described in subsection (1) of this section if the advertisement is mailed, sent, or carried in interstate or foreign commerce solely to a domestic provider of wire or electronic communication service or to an agency of the United States, a State, or a political subdivision thereof which is duly authorized to use such device," 18 U.S.C. 2512(2)(b),(3).

[2491] United States v. Spy Factory, Inc., 951 F.Supp. 450, 473-75 (S.D.N.Y. 1997); United States v. Bast, 495 F.2d 138, 141 (D.C.Cir. 1974).

    - for the purpose of the surreptitious interception of wire, oral, or electronic communications, and
    - that such device or any component thereof has been or will be sent through the mail or transported in interstate or foreign commerce; or
- (c)
    - places in any newspaper, magazine, handbill, or other publication or disseminates electronically
    - any advertisement of —
        - any electronic, mechanical, or other device
        - knowing or having reason to know
        - that the design of such device renders it primarily useful
        - for the purpose of the surreptitious interception of wire, oral, or electronic communications; or
        - any other electronic, mechanical, or other device
        - where such advertisement promotes the use of such device
        - for the purpose of the surreptitious interception of wire, oral, or electronic communications
    - knowing the content of the advertisement and knowing or having reason to know
    - that such advertisement will be sent through the mail or transported in interstate or foreign commerce
- shall be imprisoned for not more than five years and/or fined not more than $250,000 (not more than $500,000 for organizations), 18 U.S.C. 2512.

The legislative history lists among the items Congress considered "primarily useful for the purpose of the surreptitious interception of communications: the martini olive transmitter, the spike mike, the infinity transmitter, and the microphone disguised as a wristwatch, picture frame, cuff link, tie clip, fountain pen, stapler, or cigarette pack."[2492]

Questions once raised over whether section 2512 covers equipment designed to permit unauthorized reception of scrambled satellite television signals have been resolved.[2493] Each of the circuits to consider the question has now concluded that

---

[2492] S.Rept. 90-1097, at 95 (1968).

[2493] The two appellate panel decisions that found the devices beyond the bounds of section 2512, United States v. Herring, 933 F.2d 932 (11th Cir. 1991) and United States v. Hux, 940 F.2d 314 (8th Cir. 1991) were overturned en banc, United States v. Herring, 993 F.2d 784, 786 (11th Cir. 1993); United States v. Davis, 978 F.2d 415, 416 (8th Cir. 1992).

2512 outlaws such devices,[2494] but simple possession does not give rise to a private cause of action.[2495]

Stored Electronic Communications

In its original form Title III was ill-suited to ensure the privacy of those varieties of modern communications which are equally vulnerable to intrusion when they are at rest as when they are in transmission. Surreptitious "access" is as least as great a threat as surreptitious "interception" to the patrons of electronic mail (e-mail), electronic bulletin boards, voice mail, pagers, and remote computer storage.

Accordingly, Title III/ECPA also bans surreptitious access to communications at rest, although it does so beyond the confines of that apply to interception, 18 U.S.C. 2701 - 2711. These separate provisions afford protection for e-mail, voice mail, and other electronic communications somewhat akin to that available for telephone and face to face conversations under 18 U.S.C. 2510-2522. Thus, subject to certain exceptions, it is a federal crime to:

- intentionally
- either
    - access without authorization or
    - exceed an authorization to access
- a facility through which an electronic communication service is provided
- and thereby obtain, alter, or prevent authorized access to a wire or electronic communication while it is in electronic storage in such system, 18 U.S.C. 2701(a).[2496]

[2494] United States v. Harrell, 983 F.2d 36, 37-39 (5th Cir. 1993); United States v. One Macom Video Cipher II, 985 F.2d 258, 259-61 (6th Cir. 1993); United States v. Shriver, 989 F.2d. 898, 901-06 (7th Cir. 1992); United States v. Davis, 978 F.2d 415, 417-20 (8th Cir. 1992); United States v. Lande, 968 F.2d 907, 910-11 (9th Cir. 1992); United States v. McNutt, 908 F.2d 561, 564-65 (10th Cir. 1990); United States v. Herring, 993 F.2d 784, 786-89 (11th Cir. 1991).

[2495] DIRECTV, Inc. v. Treworgy, 373 F.3d 1124, 1129 (11th Cir. 2004); DIRECTV, Inc. v. Robson, 420 F.3d 532, 538-39 (5th Cir. 2005)(citing several district court cases that have reached the same conclusion). Proof that the possessor used the device to intercept satellite transmission evidences a violation of section 2511 and exposure to civil liability under section 2520, DIRECTV, Inc. v. Nicholas, 403 F.3d 223, 227-28 (4th Cir. 2005); DIRECTV, Inc. v. Pepe, 431 F.3d 162, 169 (3d Cir. 2005).

[2496] E.g., State Analysis, Inc. v. American Finacial Services Ass'n, 621 F.Supp.2d 309, 317-18 (E.D. Va. 2009); Pure Power Boot Camp v. Warrior Fitness Boot Camp, 587 F.Supp.2d 548, 555 (S.D.N.Y. 2008).

The exceptions cover electronic storage facility operators, their customers, and – under procedural counterparts to court ordered wiretapping – governmental entities.[2497]

Violations committed for malicious, mercenary, tortious or criminal purposes are punishable by imprisonment for not more than five years and/or a fine of not more than $250,000 (not more than 10 years for a subsequent conviction); lesser transgressions, by imprisonment for not more than one year (not more than five years for a subsequent conviction) and/or a fine of not more than $100,000.[2498] Those who provide the storage service and other victims of unlawful access have a cause of action for equitable relief, reasonable attorneys' fees and costs, damages equal the loss and gain associated with the offense but not less than $1000.[2499] Both criminal and civil liability are subject to good faith defenses.[2500]

[2497] "Subsection (a) of this section does not apply with respect to conduct authorized – (1) by the person or entity providing a wire or electronic communications service; (2) by a user of that service with respect to a communication of or intended for that user; or (3) in section 2703 [requirements for government access], 2704 [backup preservation] or 2518 [court ordered wiretapping or electronic eavesdropping] of this title," 18 U.S.C. 2701(c). Section 2709 creates an exception for counterintelligence access to telephone records.

[2498] "The punishment for an offense under subsection (a) of this section is – (1) if the offense is committed for purposes of commercial advantage, malicious destruction or damage, or private commercial gain, or in furtherance of any criminal or tortious act in violation of the constitution and laws of the United States or any state – (A) a fine under this title or imprisonment for not more than 5 years, or both, in the case of a first offense under this subparagraph; and (B) a fine under this title or imprisonment for not more than 10 years, or both, for any subsequent offense under this subparagraph; and (2)(A) a fine under this title or imprisonment for not more than 1 year or both, in the case of a first offense under this paragraph; and (B) a fine under this title or imprisonment for not more than 5 years, or both, in the case of an offense under this subparagraph that occurs after a conviction of another offense under this section,"18 U.S.C. 2701(b).

[2499] "(a) Cause of action – Except as provided in section 2703(e)[relating to immunity for compliance with judicial process], any provider of electronic communication service, subscriber, or customer aggrieved by any violation of this chapter in which the conduct constituting the violation is engaged in with a knowing or intentional state of mind may, in a civil action, recover from the person or entity other than the United States which engaged in that violation such relief as may be appropriate.

"(b) Relief – In a civil action under this section, appropriate relief includes – (1) such preliminary and other equitable or declaratory relief as may be appropriate; (2) damages under subsection(c); and (3) a reasonable attorney's fee and other litigation costs reasonably incurred;

"(c) Damages – The court may assess as damages in a civil action under this section the sum of the actual damages suffered by the plaintiff and any profits made by the violator as a result of the violation, but in no case shall a person entitled to recover receive less than the sum of $1,000. . . ." 18 U.S.C. 2707.

Service providers, nevertheless, may incur civil liability for unlawful disclosures,[2501] unless they can take advantage of one of a fairly extensive list of exceptions and defenses.[2502]

To be eligible for statutory damages, a plaintiff must show actual damage, but attorneys' fees and punitive damages may be award without proof of actual damages, VanAlystyne v. Electronic Scriptorium, Ltd., 560 F.3d 199, 202 (4th Cir. 2009).

[2500] "A good faith reliance on – (1) a court warrant or order, a grand jury subpoena, a legislative authorization, or a statutory authorization (including a request of a governmental entity under section 2703(f) of this title) [relating to an official request to for a service provider preserve evidence]; (2) a request of an investigative or law enforcement officer under section 2518(7) of this title [relating to emergency wiretapping and electronic eavesdropping]; or (3) a good faith determination that section 2511(3) of this title [relating to the circumstances under which an electronic communications provider may divulge the contents of communication] permitted the conduct complained of – is a complete defense to any civil or criminal action brought under this chapter or any other law," 18 U.S.C. 2707(e).

[2501] "Except as in subsection (b) or (c) – (1) a person or entity providing an electronic communication service to the public shall not knowingly divulge to any person or entity the contents of a communication while in electronic storage by that service; (2) a person or entity providing remote computing service to the public shall not knowingly divulge to any person or entity the contents of any communication which is carried or maintained on that service – (A) on behalf of, and received by means of electronic transmission from (or created by means of computer processing of communications received by means of electronic transmission from), a subscriber or customer of such service; and (B) solely for the purpose of providing storage or computer processing services to such subscriber or customer, if the provider is not authorized to access the contents of any such communications for purposes of providing any services other than storage or computer processing; and (3) a provider of remote computing service or electronic communication service to the public shall not knowingly divulge a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications covered by paragraph (1) or (2)) to any government entity," 18 U.S.C. 2702(a). Section 2702 makes no mention of any consequences that follow a breach of its commands, but 2707 establishes a civil cause of action for the victims of any violation of chapter 121 (18 U.S.C. 2701 -2711).

[2502] "A provider described in subsection (a) may divulge the contents of a communication – (1) to an addressee or intended recipient of such communication or an agent of such addressee or intended recipient; (2) as otherwise authorized in section 2517, 2511(2)(a), or 2703 of this title; (3) with the lawful consent of the originator or an addressee or intended recipient of such communication, or the subscriber in the case of remote computing service; (4) to a person employed or authorized or whose facilities are used to forward such communication to its destination; (5) as may be necessarily incident to the rendition of the service or to the protection of the rights or property of the provider of that service; (6) to the National Center for Missing and Exploited Children, in connection with a report submitted thereto under section 227 of the Victims of Child Abuse Act of 1990; (7) to a law enforcement agency – (A) if the contents – (I) were inadvertently obtained by the service provider; and (ii) appear to pertain to the commission of a crime; (8) to a Federal, State, or local government entity, if the provider, in good faith, believes that an emergency involving danger of death or serious physical injury to any person requires disclosure without delay of communications relating to the emergency," 18 U.S.C. 2702(b). The Ninth Circuit recently explained that while a remote computer service provider may disclose to a subscriber (as noted in italics above), an electronic service provider, such as one who

Violations by the United States may give rise to a cause of action and may result in disciplinary action against offending officials or employees under the same provisions that apply to U.S. violations of Title III,[2503] but unlike Title III there is no statutory prohibition on disclosure or use of the information through a violation of section 2701[2504] nor is there a statutory rule for the exclusion of evidence as a consequence of a violation.[2505] A Sixth Circuit panel has held, in a decision since vacated en banc, that the Fourth Amendment precludes government access to the content of stored communications (e-mail) held by service providers in the absence of a warrant, subscriber consent, or other indication that the subscriber has waived his or her expectation of privacy.[2506] Where the government instead secures access through a subpoena or court order as section 2703 permits, the evidence may be subject to both the Fourth Amendment exclusionary rule and the exceptions to the rule.[2507]

Unlawful access to electronic communications may involve violations of several other federal and state laws, including for instance the federal computer fraud and abuse statute, 18 U.S.C. 1030, and state computer abuse statutes.[2508]

Pen Registers and Trap and Trace Devices

A trap and trace device identifies the source of incoming calls, and a pen register indicates the numbers called from a particular phone.[2509] Since neither allows the

[2506] Warshak v. United States, 490 F.3d 455, 468-82 (6th Cir. 2007), vac'd en banc, 532 F.3d 521 (6th Cir. 2008) (vacated on grounds that the issue was not ripe for decision).

[2507] United States v. Ferguson, 508 F.Supp.2d 7, 8-10 (D.D.C. 2007)(even if a Fourth Amendment violation occurred, officers could rely in good faith on the magistrate's order issued before any court had raised the specter of constitutional suspicion which surfaced later in Warshak).

[2508] See generally, CRS Report 97-1025, Cybercrime: An Overview of the Federal Computer Fraud and Abuse Statute and Related Federal Criminal Laws, by Charles Doyle. Citations to the various state computer abuse statutes appear in Appendix F.

eavesdropper to overhear the "contents" of the phone conversation, they were not considered interceptions within the reach of Title III prior to the enactment of ECPA.[2510] Although Congress elected to expand the definition of interception, it chose to continue to regulate these devices beyond the boundaries of Title III for most purposes, 18 U.S.C. 3121 - 3127.

As noted earlier, however, the Title III wiretap provisions apply when due to the nature of advances in telecommunications technology pen registers and trap and trace devices are able to capture wire communication "content."[2511]

The USA PATRIOT Act enlarged the coverage of sections 3121-3127 to include sender/addressee information relating to e-mail and other forms of electronic communications.[2512]

The use or installation of pen registers or trap and trace devices by anyone other than the telephone company, service provider, or those acting under judicial authority is a federal crime, punishable by imprisonment for not more than a year and/or a fine of not more than $100,000 ($200,000 for an organization).[2513]

[2509] "(3) the term 'pen register' means a device which records or decodes electronic or other impulses which identify the numbers dialed or otherwise transmitted on the telephone line to which such device is attached, but such term does not include any device used by a provider or customer of a wire or electronic communication service for billing, or recording as an incident to billing, for communications services provided by such provider or any device used by a provider or customer of a wire communication service for cost accounting or other like purposes in the ordinary course of its business; (4) the term 'trap and trace device' means a device which captures the incoming electronic or other impulses which identify the originating number of an instrument or device from which a wire or electronic communication was transmitted," 18 U.S.C. 3127(3),(4). Although clone pagers are not considered pen registers, Brown v. Waddell, 50 F.3d 285, 290-91 (4th Cir. 1995), "caller id" services have been found to constitute trap and trace devices, United States v. Fregoso, 60 F.3d 1314, 1320 (8th Cir. 1995).

[2510] United States v. New York Telephone Co., 434 U.S. 159 (1977).

[2511] "'Post-cut-through dialed digits' are any numbers dialed from a telephone after the call is initially setup or 'cutthrough.' Sometimes these digits are other telephone numbers, as when a party places a credit card call by first dialing the long distance carrier access number and then the phone number of the intended party. Sometimes these digits transmit real information, such as bank account numbers, Social Security numbers, prescription numbers, and the like. In the latter case, the digits represent communications content; in the former, they are non-content call processing numbers," In re United States, 441 F.Supp.2d 816, 818 (S.D. Tex. 2006); see also, In re United States for Orders (1) Authorizing Use of Pen Registers and Trap and Trace Devices, 515 F.Supp.2d 325, 328-38 (E.D.N.Y. 2007); In re United States, 622 F.Supp.2d 411, 419-22 (S.D. Tex. 2007).

[2512] 115 Stat. 288-91 (2001).

[2513] "(a) In general – Except as provided in this section, no person may install or use a pen register or a trap and trace device without first obtaining a court order under section 3123 of this title or under the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801 et seq.). (b) Exception –

There is no accompanying exclusionary rule, however, and consequently a violation of section 3121 will not serve as a basis to suppress any resulting evidence.[2514]

Unlike other violations of Title III/ECPA, there is no separate federal private cause of action for victims of a pen register or trap and trace device violation. Some of the states have established a separate criminal offense for unlawful use of a pen register or trap and trace device,[2515] yet most of these seem to follow the federal lead and decline to establish a separate private cause of action for unlawful installation or use of the devices.[2516]

Foreign Intelligence Surveillance Act

The Foreign Intelligence Surveillance Act (FISA) authorizes special court orders for four purposes: electronic surveillance, physical searches, installation and use pen registers/trap and trace devices, and orders to disclose tangible items, 50 U.S.C. 1801-1861. The electronic surveillance portion of FISA, 50 U.S.C. 1801-1811, creates a procedure for judicially supervised "electronic surveillance" (wiretapping) conducted for foreign intelligence gathering purposes. The Act classifies four kinds of wiretapping as "electronic surveillance." The four classes

---

The prohibition of subsection (a) does not apply with respect to the use of a pen register or a trap and trace device by a provider of electronic or wire communication service – (1) relating to the operation, maintenance, and testing of a wire or electronic communication service or to the protection of the rights or property of such provider, or to the protection of users of that service from abuse of service or unlawful use of service; or (2) to record the fact that a wire or electronic communication was initiated or completed in order to protect such provider, another provider furnishing service toward the completion of the wire communication, or a user of that service, from fraudulent, unlawful or abusive use of service; or (3) where the consent of the user of that service has been obtained. (c) Limitation – A government agency authorized to install and use a pen register or trap and trace device under this chapter or under State law shall use technology reasonably available to it that restricts the recording or decoding of electronic or other impulses to the dialing, routing, addressing, and signaling information utilized in identifying the origination or destination of wire or electronic communications. (d) Penalty. – Whoever knowingly violates subsection (a) shall be fined under this title or imprisoned not more than one year, or both," 18 U.S.C. 3121.

[2514] United States v. German, 486 F.3d 849, 852-53 (5th Cir. 2007); United States v. Fregoso, 60 F.3d 1314, 1320 (8th Cir. 1995); United States v. Thompson, 936 F.2d 1249, 1249-250 (11th Cir. 1991). To the extent that the unlawful use captures content, the Fourth Amendment exclusionary rule may apply, cf., In re United States for Orders (1) Authorizing Use of Pen Registers and Trap and Trace Devices, 515 F.Supp.2d 325, 328-38 (E.D.N.Y. 2007).

[2515] E.g., ARIZ. REV. STAT. ANN. §13-3005; FLA. STAT. ANN. §934.31; IOWA CODE ANN. §808B.10; N.H. RV. STAT. ANN. §570-B:2; UTAH CODE ANN. §77-23-13.

[2516] But see, MINN. STAT. ANN. §626A.391. Appendix E contains the citations of state statutes that authorized court ordered installation and use of pen registers and trap & trace devices. Appendix C lists the citations of state statutes that create a separate cause of action for unlawful interception.

of electronic surveillance involve wiretapping that could otherwise only be conducted under court order:

- "(1) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire or radio communication sent by or intended to be received by a particular, known United States person who is in the United States, if the contents are acquired by intentionally targeting that United States person, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes;
- "(2) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire communication to or from a person in the United States, without the consent of any party thereto, if such acquisition occurs in the United States, does not include the acquisition of those communications of computer trespassers that would be permissible under section 2511(2)(I) of title 18, United States Code;
- "(3) the intentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States; or
- "(4) the installation or use of an electronic, mechanical, or other surveillance device in the United States for monitoring to acquire information, other than from a wire or radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes," 50 U.S.C. 1801(f).

Section 1809 proscribes:

- intentionally, either
    - engaging in *electronic surveillance*
    - under color of law
    - except as authorized by statute, or
    - disclosing or using
    - information obtained under color of law
    - by electronic surveillance,
    - knowing or having reason to know
    - that the information was obtained by electronic surveillance not authorized by statute, 50 U.S.C. 1809.

The prohibitions of section 1809 apply only to federal officers and employees,[2517] but do not apply to a law enforcement officer operating under a warrant or court order.[2518] Violations are punishable by imprisonment for not more than five years and/or a fine of not more than $250,000, id. and expose the offender to civil liability.[2519] By virtue of USA PATRIOT Act amendments, victims of any improper use of information secured under a FISA surveillance order may also be entitled to actual or statutory damages.[2520]

FISA also has its own exclusionary rule for electronic surveillance, physical searches, and the installation and use of pen registers and trap & trace devices.[2521] However, Congress anticipated,[2522] and the courts have

---

[2517] "There is Federal jurisdiction over an offense under this section if the person committing the offense was an officer or employee of the United States at the time the offense was committed," 50 U.S.C. 1809(d). The criminal proscriptions and exemptions of Title III/ECPA (18 U.S.C. 2510-2518) may apply as well.

[2518] "It is a defense to a prosecution under subsection (a) of this section that the defendant was a law enforcement or investigative officer engaged in the course of his official duties and the electronic surveillance was authorized by and conducted pursuant to a search warrant or court order of a court of competent jurisdiction," 50 U.S.C. 1809(b).

[2519] "An aggrieved person, other than a foreign power or an agent of a foreign power, as defined in section 1801(a) or (b)(1)(A) of this title, respectively, who has been subjected to an electronic surveillance or about whom information obtained by electronic surveillance of such person has been disclosed or used in violation of section 1809 of this title shall have a cause of action against any person who committed such violation and shall be entitled to recover – (a) actual damages, but not less than liquidated damages of $1,000 or $100 per day for each day of violation, whichever is greater; (b) punitive damages; and (c) reasonable attorney's fees and other investigation and litigation costs reasonably incurred," 50 U.S.C. 1810. Victims are not entitled to injunctive relief, ACLU Foundation of Southern California v. Barr, 952 F.2d 457, 469-70 (D.C.Cir. 1992). The court did not address the question of whether conduct in violation of both FISA and Title III/EPCA might be enjoined under 18 U.S.C. 2520(b)(1). The Sixth Circuit, however, has held that the proscriptions of Title III/ECPA do not apply to interception in this country for foreign intelligence gathering purposes of communications between parties in the United States and those in other nations, ACLU v. National Security Agency, 493 F.3d 644, 680 (6th Cir. 2007), citing, 18 U.S.C. 2511(2)(f).

[2520] "Any person who is aggrieved by any willful violation of . . . section[] 106(a) . . . of the Foreign Intelligence Surveillance Act [relating to the use of information acquired from electronic surveillance under the Act] may commence an action in United States District Court against the United States to recover money damages. In any such action, if a person who is aggrieved successfully establishes a violation of . . . the above special provisions of title 50, the Court may assess as damages – (1) actual damages, but not less than $10,000, whichever amount is greater; and (2) litigation costs, reasonably incurred," 18 U.S.C. 2712(a).

[2521] "If the United States district court pursuant to subsection (f) of this section determines that the surveillance was not lawfully authorized or conducted, it shall, in accordance with the requirements of law, suppress the evidence which was unlawfully obtained or derived from electronic surveillance of the aggrieved person or otherwise grant the motion of the aggrieved person. If the court determines that the surveillance was lawfully authorized and conducted, it

acknowledged, that surveillance conducted under FISA for foreign intelligence purposes may result in admissible evidence of a crime.[2523]

The physical search portion of FISA authorizes the issuance of physical search orders for foreign intelligence gathering purposes, 50 U.S.C. 1821-1829. Its accompanying criminal proscriptions and civil liability provisions, and are identical to those used in the electronic surveillance portion of FISA.[2524]

The pen register/trap & trace portion of FISA declares that information acquired by virtue of a FISA pen register or trap & trade order may only be used and disclosed for lawful purposes and only consistent with use restrictions of 50 U.S.C.1845, 50 U.S.C. 1845(a). There are no criminal penalties for violations of section 1845, but the provisions of 18 U.S.C. 2712, which grant victims a cause of

---

shall deny the motion of the aggrieved person except to the extent that due process requires discovery or disclosure," 50 U.S.C. 1806(g); the language for FISA physical search and pen registers/trap & trace orders is similar, 1825(f), 1845(g); United States v. Campa, 529 F.3d 980, 993 (11th Cir. 2008). The text of 50 U.S.C. 1825(f) and 1845(g) is appended.

[2522] S.Rept. 95-701, at 61 (1978); 50 U.S.C. 1806(b)(". . . such information . . . may only be used in a criminal proceeding with the advance authorization of the Attorney General").

[2523] When FISA required certification that the acquisition of foreign intelligence was "the" purpose for seeking a FISA surveillance order, there was some debate among the courts over how prominent the foreign intelligence purpose had to be in order to permit the evidence it unearthed under a FISA order to be used in a criminal prosecution, United States v. Johnson, 952 F.2d 565, 572 (1st Cir. 1992); United States v. Duggan, 743 F.2d 59, 77 (2d Cir. 1984); United States v. Sarkissian, 841 F.2d 959, 964 (9th Cir. 1988); United States v. Badia, 827 F.2d 1458, 1463 (11th Cir. 1987). The USA PATRIOT Act changed "the purpose" to "a significant purpose," a change which the FISA review court concluded demands only that the government have a "measurable" foreign intelligence purpose when it seeks a FISA surveillance order, In re Sealed Case, 310 F.3d 717, 734-35 (F.I.S.Ct.Rev. 2002); see also, Seamon & Gardner, The Patriot Act and the Wall Between Foreign Intelligence and Law Enforcement, 28 HARVARD JOURNAL OF LAW AND PUBLIC POLICY 319 (2005).

[2524] 50 U.S.C. 1827 ("A person is guilty of an offense if he intentionally – (1) under color of law for the purpose of obtaining foreign intelligence information, executes a physical search within the United States except as authorized by statute . . . ."); 50 U.S.C. 1828 ("An aggrieved person, other than a foreign power or an agent of a foreign power, as defined in section 1801(a) or (b)(1)(A), respectively, of this title, whose premises, property, information, or material has been subjected to a physical search within the United States or about whom information obtained by such a physical search has been disclosed or used in violation of section 1827 of this title shall have a cause of action against any person who committed such violation . . . ."); 18 U.S.C. 2712(a)("Any person who is aggrieved by any willful violation of . . . section[] 305(a) . . . of the Foreign Intelligence Surveillance Act [relating to the use of information acquired from a physical search under the Act] may commence an action in United States District Court against the United States to recover money damages. . . . ").

action against the United States for FISA surveillance and search violations, are equally available to the victims of FISA pen register/trap & trace violations.[2525]

Procedure

Each of the prohibitions mentioned above recognizes a procedure for government use notwithstanding the general ban, usually under judicial supervision. Although Fourth Amendment concerns supply a common theme, the procedures are individually distinctive.

Law Enforcement Wiretapping and Electronic Eavesdropping

Title III/ECPA authorizes both federal and state law enforcement wiretapping and electronic eavesdropping, under court order, without the prior consent or knowledge of any of the participants, 18 U.S.C. 2516 - 2518. At the federal level, a senior Justice Department official must approve the application for the court order.[2526] The procedure is only available where there is probable cause to believe that the wiretap or electronic eavesdropping will produce evidence of one of a long, but not exhaustive, list of federal crimes,[2527] or of the whereabouts of a "fugitive from justice" fleeing from prosecution of one of the offenses on the predicate offense list, 18 U.S.C. 2516(1)(l). Any federal prosecutor may approve an application for a court order under section 2518 authorizing the interception of e-mail or other electronic communications during transmission.[2528]

[2525] "Any person who is aggrieved by any willful violation of . . . section[] 405(a) . . . of the Foreign Intelligence Surveillance Act [relating to the use of information acquired from electronic surveillance under the Act] may commence an action in United States District Court against the United States to recover money damages. In any such action, if a person who is aggrieved successfully establishes a violation of . . . the above special provisions of title 50, the Court may assess as damages – (1) actual damages, but not less than $10,000, whichever amount is greater; and (2) litigation costs, reasonably incurred," 18 U.S.C. 2712(a).

[2526] "The Attorney General, Deputy Attorney General, Associate Attorney General, or any Assistant Attorney General, any acting Assistant Attorney General, or any Deputy Assistant Attorney General or acting Deputy Assistant Attorney General in the Criminal Division specially designated by the Attorney General, may authorize an application to a Federal judge of competent jurisdiction for, and such judge may grant in conformity with section 2518 of this chapter an order authorizing or approving the interception of wire or oral communications by the Federal Bureau of Investigation, or a Federal agency having responsibility for the investigation of the offense as to which the application is made, when such interception may provide or has provided evidence of [the predicate offenses]. . ." 18 U.S.C. 2516(1).

[2527] The list appears in 18 U.S.C. 2516(1) the text of which is appended.

[2528] "Any attorney for the Government (as such term is defined for the purposes of the Federal Rules of Criminal Procedure) may authorize an application to a Federal judge of competent jurisdiction for, and such judge may grant, in conformity with section 2518 of this title, an order authorizing or approving the interception of electronic communications by an investigative or law enforcement officer having responsibility for the investigation of the offense as to which the application is made, when such interception may provide or has provided evidence of any Federal

At the state level, the principal prosecuting attorney of a state or any of its political subdivisions may approve an application for an order authorizing wiretapping or electronic eavesdropping based upon probable cause to believe that it will produce evidence of a felony under the state laws covering murder, kidnaping, gambling, robbery, bribery, extortion, drug trafficking, or any other crime dangerous to life, limb or property. State applications, court orders and other procedures must at a minimum be as demanding as federal requirements.[2529]

Applications for a court order authorizing wiretapping and electronic surveillance include:

- the identity of the applicant and the official who authorized the application;
- a full and complete statement of the facts including
    - details of the crime,
    - a particular description of nature, location and place where the interception is to occur,[2530]
    - a particular description of the communications to be intercepted, and
    - the identities (if known) of the person committing the offense and of the persons whose communications are to be intercepted;
- a full and complete statement of the alternative investigative techniques used or an explanation of why they would be futile or dangerous;
- a statement of the period of time for which the interception is to be maintained and if it will not terminate upon seizure of the communications sought, a probable cause demonstration that further similar communications are likely to occur;
- a full and complete history of previous interception applications or efforts involving the same parties or places;
- in the case of an extension, the results to date or explanation for the want of results; and
- any additional information the judge may require.[2531]

---

felony," 18 U.S.C. 2516(3). The less demanding procedures of 18 U.S.C. 2701-2711 may be used with respect to e-mail or other electronic communications that are in storage; recourse to subsection 2516(3) is only necessary when wire, oral or electronic communications are to be "intercepted."

[2529] 18 U.S.C. 2516(2). The text of subsection 2516(2) is appended.

[2530] Identification of the place where, or facilities over, which the targeted communications are to occur may be excused where the court finds that the suspect has or will take steps to thwart interception, 18 U.S.C. 2518(11), (12). The text of 18 U.S.C. 2518 is appended.

[2531] 18 U.S.C. 2518(1), (2).

Before issuing an order authorizing interception, the court must find:

- probable cause to believe that an individual is, has or is about to commit one or more of the predicate offenses;
- probable cause to believe that the particular communications concerning the crime will be seized as a result of the interception requested;
- that normal investigative procedures have been or are likely to be futile or too dangerous; and
- probable cause to believe that "the facilities from which, or the place where, the wire, oral, or electronic communications are to be intercepted are being used, or are about to be used, in connection with the commission of such offense, or are leased to, listed in the name of, or commonly used by such person."[2532]

Subsections 2518(4) and (5) demand that any interception order include:

- the identity (if known) of the persons whose conversations are to be intercepted;
- the nature and location of facilities and place covered by the order;
- a particular description of the type of communication to be intercepted and an indication of the crime to which it relates;
- the individual approving the application and the agency executing the order;
- the period of time during which the interception may be conducted and an indication of whether it may continue after the communication sought has been seized;
- an instruction that the order shall be executed
    - as soon as practicable, and
    - so as to minimize the extent of innocent communication seized; and
- upon request, a direction for the cooperation of communications providers and others necessary or useful for the execution of the order.[2533]

Compliance with these procedures may be postponed briefly until after the interception effort has begun, upon the approval of senior Justice Department officials in emergency cases involving organized crime or national security threatening conspiracies or involving the risk of death or serious injury (7).[2534]

The court orders remain in effect only as long as required but not more than 30 days. After 30 days, the court may grant 30 day extensions subject to the

---

[2532] 18 U.S.C. 2518(3).

[2533] 18 U.S.C. 2518(4).

[2534] 18 U.S.C. 2518(7).

procedures required for issuance of the original order.[2535] During that time the court may require progress reports at such intervals as it considers appropriate.[2536] Intercepted communications are to be recorded and the evidence secured and placed under seal (with the possibility of copies for authorized law enforcement disclosure and use) along with the application and the court's order.[2537]

Within 90 days of the expiration of the order those whose communications have been intercepted are entitled to notice, and evidence secured through the intercept may be introduced into evidence with 10 days' advance notice to the parties.[2538]

Title III also circumscribes the conditions under which information derived from a court ordered interception may be disclosed or otherwise used. Nevertheless, it may be disclosed to and used for official purposes by:

- other law enforcement officials including foreign officials;[2539]
- federal intelligence officers to the extent that it involves foreign intelligence information;[2540]
- other American or foreign government officials to the extent that it involves the threat of hostile acts by foreign powers, their agents, or international terrorists.[2541]

It may also be disclosed by witnesses testifying in federal or state proceedings,[2542] provided the intercepted conversation or other communication is not privileged.[2543]

[2539] 18 U.S.C. 2517(1), (2), (5), (7).

[2540] 18 U.S.C. 2517(6). "'[F]oreign intelligence information', for purposes of section 2517(6) of this title, means – (A) information, whether or not concerning a United States person, that relates to the ability of the United States to protect against – (i) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power; (ii) sabotage or intentional terrorism by a foreign power or an agent of a foreign power; or (iii) clandestine intelligence activities by and intelligence service or network of a foreign power or by an agent of a foreign power; or (B) information, whether or not concerning a United States person, with respect to a foreign power or foreign territory that relates to – (i) the national defense or the security of the United States; or (ii) the conduct of the foreign affairs of the United States," 18 U.S.C. 2510(19).

[2541] 18 U.S.C. 2578(8).

Stored Electronic or Wire Communications

The procedural requirements for law enforcement access to stored wire or electronic communications and transactional records are less demanding but equally complicated, 18 U.S.C. 2701-2712. They deal with two kinds of information – often in the custody of the telephone company or some other service provider rather than of any of the parties to the communication – communications records and the content of electronic or wire communications. Law enforcement officials are entitled to access:

- with the consent of the one of the parties;[2544]
- on the basis of a court order or similar process under the procedures established in Title III/ECPA;[2545]
- in certain emergency situations;[2546] or
- under one of the other statutory exceptions to the ban on service provider disclosure.[2547]

[2542] 18 U.S.C. 2517(3), (5).

[2543] 18 U.S.C. 2517(4).

[2544] "(b) A provider described in subsection (a) may divulge the contents of a communication . . . (3) with the lawful consent of the originator or an addressee or intended recipient of such communication, or the subscriber in the case of remote computing service. . . . (c) . . . A provider described in subsection (a) may divulge a record or other information pertaining to a subscriber to or customer of such service, (not including the contents of communications covered by subsection (a)(1) or (a)(2)) . . . (2) with the lawful consent of the customer or subscriber. " 18 U.S.C. 2702(b)(3),(c)(2).

[2545] "A provider described in subsection (a) may divulge the contents of a communication . . . (2) as otherwise authorized in section 2517, 2511(2)(a), or 2703 . . . .(c) . . . A provider described in subsection (a) may divulge a record or other information pertaining to a subscriber to or customer of such service, (not including the contents of communications covered by subsection (a)(1) or (a)(2)) (1) as otherwise authorized in section 2703," 18 U.S.C. 2702(b)(2), (c)(1).

[2546] "(b) A provider described in subsection (a) may divulge the contents of a communication . . . (8) to a governmental entity, if the provider, in good faith, believes that an emergency involving danger of death or serious physical injury to any person requires disclosure without delay of communications relating to the emergency. (c) . . . A provider described in subsection (a) may divulge a record or other information pertaining to a subscriber to or customer of such service, (not including the contents of communications covered by subsection (a)(1) or (a)(2)) . . .(4) to a government entity, if the provider, in good faith, believes that an emergency involving danger of death or serious physical injury to any person requires disclosure without delay of the information relating to the emergency," 18 U.S.C. 2702(b)(8),(c)(4).

[2547] "(b) A provider described in subsection (a) may divulge the contents of a communication — (1) to an addressee or intended recipient of such communication or an agent of such addressee or intended recipient; . . . (4) to a person employed or authorized or whose facilities are used to forward such communication to its destination; (5) as may be necessarily incident to the rendition

Section 2703, which affords law enforcement access to the content of stored wire and electronic communications, distinguishes between recent communications and those that have been in electronic storage for more than six months. Government officials may gain access to wire or electronic communications in electronic storage for less than six months under a search warrant issued upon probable cause to believe a crime has been committed and the search will produce evidence of the offense.[2548]

The government must use the same warrant procedure to acquire older communications or those stored in remote computer storage if access is to be afforded without notice to the subscriber or customer.[2549] If government officials are willing to afford the subscriber or customer notice or at least delayed notice, access may be granted under a court order showing that the information sought is relevant and material to a criminal investigation or under an administrative subpoena, a grand jury subpoena, a trial subpoena, or court order.[2550]

Under the court order procedure, the court may authorize delayed notification in 90 day increments when contemporaneous notice might have an adverse impact.[2551] Government supervisor officials may certify the need for delayed

---

of the service or to the protection of the rights or property of the provider of that service; (6) to the National Center for Missing and Exploited Children, in connection with a report submitted thereto under section 227 of the Victims of Child Abuse Act of 1990; (7) to a law enforcement agency – (A) if the contents – (I) were inadvertently obtained by the service provider; and (ii) appear to pertain to the commission of a crime . . . (c) . . . A provider described in subsection (a) may divulge a record or other information pertaining to a subscriber to or customer of such service, (not including the contents of communications covered by subsection (a)(1) or (a)(2)) . . . (3) as may be necessarily incident to the rendition of the service or to the protection of the rights or property of the provider of that service," 18 U.S.C. 2702(b)(1),(4),(5),(6),(7); (c)(3).

[2548] 18 U.S.C. 2703(a)(text is appended). The 21st Century Department of Justice Appropriations Authorization Act, 116 Stat. 1822 (2002), amended section 2703 to permit execution of the warrant by service providers and others without requiring the presence of a federal officer, 18 U.S.C. 2703(g)("Notwithstanding section 3105 of this title, the presence of an officer shall not be required for service or execution of a search warrant issued in accordance with this chapter requiring disclosure by a provider of electronic communications service or remote computing service of the contents of communications or records or other information pertaining to a subscriber to or customer of such service"), see United States v. Bach, 310 F.3d 1063 (8th Cir. 2002)(the Fourth Amendment does not require the presence of a federal officer when technicians execute a search warrant on a service provider's server).

[2549] 18 U.S.C. 2703(a), (b)(1)(A), (b)(2) (text is appended).

[2550] 18 U.S.C. 2703(b)(1)(B), (d) (text is appended); United States v. Weaver, 636 F.supp.2d 769, 773 (C.D. Ill. 2009).

[2551] 18 U.S.C. 2705(a)(1)(A), (4) (text is appended).

notification in the case of a subpoena.[2552] Traditional exigent circumstances and a final general inconvenience justification form the grounds for delayed notification in either case:

- endangering the life or physical safety of an individual;
- flight from prosecution;
- destruction of or tampering with evidence;
- intimidation of potential witnesses; or
- otherwise seriously jeopardizing an investigation or unduly delaying a trial.[2553]

Comparable, if less demanding, procedures apply when the government seeks other customer information from a service provider (other than the content of a customer's communications). The information can be secured:

- with a warrant;
- with a court order;
- with customer consent;
- with a written request in telemarketing fraud cases; or
- with a subpoena in some instances.[2554]

Most customer identification, use, and billing information can be secured simply with a subpoena and without customer notification.[2555]

[2552] 18 U.S.C. 2705(a)(1)(B), (4) (text is appended).

[2553] 18 U.S.C. 2705(a)(2), (b). A Sixth Circuit panel, in a decision later vacated en banc on grounds of ripeness, held that the Fourth Amendment precluded the seizure of stored e-mail from a service provider under a section 2703 court order which featured a delayed notice authorization under section 2705, Warshak v. United States, 490 F.3d 455, 468-82 (6th Cir. 2007), vac'd en banc, 532 F.3d 521 (6th Cir. 2008). The panel did not address whether exigent circumstances would permit seizure with delayed notice, perhaps because the government apparently did not raise the question, 490 F.3d at 464-65.

[2554] "(1) A government entity may require a provider of electronic communication service or remote computing service to disclose a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications) – (A) obtains a warrant issued using the procedures described in the Federal Rules of Criminal Procedure by a court with jurisdiction over the offense under investigation or equivalent State warrant; (B) obtains a court order for such disclosure under subsection (d) of this section; (C) has the consent of the subscriber or customer to such disclosure; or (D) submits a formal written request relevant to a law enforcement investigation concerning telemarketing fraud for the name, address, and place of business of a subscriber or customer of such provider, which subscriber or customer is engaged in telemarketing (as such term is defined in section 2325 of this title); or (E) seeks information under paragraph (2) . . . (3) A governmental entity receiving records or information under this subsection is not required to provide notice to a subscriber or customer," 18 U.S.C. 2703(c)(1),(3).

Pen Registers and Trap and Trace Devices

Pen registers and trap and trace devices identify the source of calls placed to or from a particular telephone. Federal government attorneys and state and local police officers may apply for a court order authorizing the installation and use of a pen register and/or a trap and trace device upon certification that the information that it will provide is relevant to a pending criminal investigation.[2556]

An order authorizing installation and use of a pen register or trap and trace device must:

- specify
  - the person (if known) upon whose telephone line the device is to be installed,
  - the person (if known) who is the subject of the criminal investigation,
  - the telephone number, (if known) the location of the line to which the device is to be attached, and geographical range of the device,
  - a description of the crime to which the investigation relates;
- upon request, direct carrier assistance pursuant to section 3124;
- terminate within 60 days, unless extended;
- involve a report of particulars of the order's execution in Internet cases; and
- impose necessary nondisclosure requirements.[2557]

Senior Justice Department or state prosecutors may approve the installation and use of a pen register or trap and trace device prior to the issuance of court authorization in emergency cases that involve either an organized crime

---

[2555] "(2) A provider of electronic communication service or remote computing service shall disclose to a governmental entity the (A) name; (B) address; (C) local and long distance telephone connection records, or records of session times and durations; (D) length of service (including start date) and types of service utilized; (E) telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address; and (F) means and source of payment (including any credit car or bank account number), of a subscriber to or customer of such service, when the governmental entity uses an administrative subpoena authorized by a Federal or State statute or a Federal or State grand jury or trial subpoena or any means available under paragraph (1). (3) A governmental entity receiving records or information under this subsection is not required to provide notice to a subscriber or customer," 18 U.S.C. 2703(c)(2),(3).

[2556] 18 U.S.C. 3122 (text is appended).

[2557] 18 U.S.C. 3123 (text is appended).

conspiracy, an immediate danger of death or serious injury, a threat to national security, or a serious attack on a "protected computer."[2558]

Federal authorities have applied for court orders, under the Stored Communications Act (18 U.S.C. 2701-2712) and the trap and trace authority of 18 U.S.C. 3121-3127, seeking to direct communications providers to supply them with the information necessary to track cell phone users in conjunction with an ongoing criminal investigation. Thus far, their efforts have met with mixed success.[2559]

Foreign Intelligence Surveillance Act

The procedure for securing wiretapping court orders under the Foreign Intelligence Surveillance Act (FISA), 50 U.S.C. 1801-1811, is the most distinctive of the wiretap-related procedures.[2560] First, its focus is different. It was designed to secure foreign intelligence information – not evidence of a crime.[2561] Second, it operates in a highly secretive manner. But its most individualistic feature is that the procedure is conducted entirely before members of an independent court convened for no other purpose. The Act operates in the field of foreign intelligence gathering, primarily through a Foreign Intelligence Surveillance Court whose judges grant or reject petitions for wiretap and electronic surveillance orders, orders authorizing physical searches and seizures, pen register and trap and trace orders, and orders relating to the surrender of tangible items.

[2558] 18 U.S.C. 3125 (text is appended).

Tex. 2006); In re Application of the United States, 411 F.Supp.2d 678 (W.D.La. 2006).

[2560] See generally, CRS Report RL30465, The Foreign Intelligence Surveillance Act: An Overview of the Statutory Framework and U.S. Foreign Intelligence Surveillance Court and U.S. Foreign Intelligence Surveillance Court of Review Decisions, by Elizabeth B. Bazan.

[2561] In its original form, gathering foreign intelligence was "the" purpose for which FISA surveillance orders were sought, 50 U.S.C. 1804(a)(7)(B) (1982 ed.). Although amended by the USA PATRIOT Act, gathering foreign intelligence must still provide a "significant" reason for seeking a FISA surveillance order, 50 U.S.C. 1804(a)(7)(B); In re Sealed Case, 310 F.3d 717, (F.I.S.Ct.Rev. 2002); United States v. Ning Wen, 477 F.3d 896, 897 (7th Cir. 2007).

The Foreign Intelligence Surveillance Court (FISC) is comprised of eleven federal court judges designated by the Chief Justice to sit on the FISC for a single seven year term.[2562] In the area of wiretaps and physical searches,[2563] the judges of the FISC individually receive and approve or reject requests,[2564] authorized by the Attorney General, to conduct the four specific types of electronic surveillance noted earlier[2565] of the communications and activities of foreign powers.[2566]

The contents of FISA application include:

- the identity of the individual submitting the application;
- the identity or a description of the person whose communications are to be intercepted;
- an indication of
    - why the person is believed to be a foreign power or the agent of a foreign power, and

---

[2562] 50 U.S.C. 1803(a),(b),(d) (text is appended).

[2563] The FISA procedures relating to wiretapping and electronic surveillance orders, 50 U.S.C. 1801-1811, and those relating to physical searches, 50 U.S.C. 1821-1829, are virtually identical and consequently are treated together here.

[2564] P.L. 110-261 explicitly granted the FISA court judges the authority to sit as a group on their own initiative or on the petition of the government when a majority of court concludes that a particular matter is exceptional significance or in order uniformity of interpretation among the members of the court, 50 U.S.C. 1803(a)(2).

[2565] 50 U.S.C. 1801(f)(text is appended). The courts have noted that, unlike surveillance under Title III/EPCA, silent video surveillance falls within the purview of FISA by virtue of subsection 1801(f)(4), United States v. Koyomejian, 970 F.2d 536, 540 (9th Cir. 1992); United States v. Mesa-Rincon, 911 F.2d 1433, 1438 (10th Cir. 1990); United States v. Biasucci, 786 F.2d 504, 508 (2d Cir. 1986).

[2566] "'Foreign power' means – (1) a foreign government or any component thereof, whether or not recognized by the United States; (2) a faction of a foreign nation or nations, not substantially composed of United States persons; (3) an entity that is openly acknowledged by a foreign government or governments to be directed and controlled by such foreign government or governments; (4) a group engaged in international terrorism or activities in preparation therefor; (5) a foreign-based political organization, not substantially composed of United States persons; (6) an entity that is directed and controlled by a foreign government or governments; or an entity not substantially composed of United States persons that is engaged in the international proliferation of weapons of mass destruction," 50 U.S.C. 1801(a)(language in italics added in P.L. 110-261). Note that the definition of foreign power includes international terrorists groups regardless of whether any nexus to a foreign power can be shown, 50 U.S.C. 1801(a)(4) and includes agents of foreign powers that no longer exist, United States v. Squillacote, 221 F.3d 542, 554 (4th Cir. 2000) (agents of East Germany intercepted under an order granted after unification). Moreover, at least until it expires on December 31, 2009, the definition of "agent of foreign power" (50 U.S.C.1801(b)(1)(c)) includes international terrorists with no necessary to connection to a foreign power or group. The FISA physical search provisions adopt by cross reference the definitions of "foreign power" and "agent of a foreign power," 50 U.S.C. 1821(1).

    - why foreign powers or their agents are believed to use the targeted facilities or places;
- a summary of the minimization procedures[2567] to be followed;
- a description of the communications to be intercepted and the information sought;[2568]
- certification by a senior national security or senior defense official designed by the President that
    - the information sought is foreign intelligence information,
    - a significant purpose of interception is to secure foreign intelligence information,
    - the information cannot reasonably be obtained using alternative means,[2569]
- a summary statement of the means of accomplishing the interception (including whether a physical entry will be required);[2570]
- a history of past interception applications involving the same persons, places or facilities;
- the period of time during which the interception is to occur, whether it will terminate immediately upon obtaining the information sought, and if not, the reasons why interception thereafter is likely to be productively intercepted.[2571]

[2567] "Minimization procedures" are defined in 50 U.S.C. 1801(h). They are essentially those procedures designed to minimize the unnecessary acquisition, retention, and dissemination of information relating to U.S. persons (American citizens, permanent resident aliens, U.S. corporations, and organizations a substantial number of whose members are Americans). Like the procedures in Title III, they are crafted to minimize the amount of "innocent" communications captured with the communications which are the target of the order and require a good faith effort on the part of the government to avoid the capture and retention of irrelevant material, United States v. Hammoud, 381 F.3d 316, 334 (4th Cir. 2004), vac'd on other grounds, 543 U.S. 1097 (2004), reinstated in pertinent part after remand, 405 F.3d 1034 (4th Cir. 2005); United States v. Rosen, 447 F.Supp.2d 538, 550-51 (E.D.Va. 2006).

[2568] Section 104(a)(1)(c) of P.L. 110-261 eliminated the requirement of a "detailed" description.

[2569] Section 104(a)(1)(D) of P.L. 110-261 authorized the President to designate the Deputy Director of the Federal Bureau of Investigation as a certifying official as well.

[2570] Section 104(a)(1)(E) of P.L. 11-261 added that the statement need only be "summary."

[2571] 50 U.S.C. 1804 (text is appended). 50 U.S.C. 1823 relating to applications for a FISA physical search order is essentially the same. Section 104(a)(1)(A) of P.L. 110-261 eliminated the requirement that the application indicate that the Attorney General approved the application and that the President had authorized him to do so. It also eliminated the requirement that the application indicate whether more than one interception device was to be used and if so their range and the minimization procedures associated with each. Section 104(a)(2) of P.L. 110-261, however, repealed the language once found in 50 U.S.C. 1804(b) which, when the target of the surveillance was a foreign power, excused the inclusion of multiple device information, of a statement of the means of execution, of a statement relating to the basis for the "last resort" and

FISA court judges issue orders approving electronic surveillance or physical searches upon a finding that the application requirements have been met and that there is probable cause to believe that the target is a foreign power or the agent of a foreign power and that the targeted places or facilities are used by foreign powers of their agents.[2572]

Orders approving electronic surveillance must:

- specify
  - the identity or a description of the person whose communications are to be intercepted,
  - the nature and location of the targeted facilities or places, if known,
  - type of communications or activities targeted and the kind of information sought,
  - the means by which interception is to be accomplished and whether physical entry is authorized,
  - the tenure of the authorization, and
  - whether more than one device are to be used and if so their respective ranges and associated minimization procedures;
- require
  - that minimization procedures be adhered to,
  - upon request, that carriers and others provide assistance,[2573]
  - that those providing assistance observe certain security precautions, and be compensated;[2574]

---

foreign intelligence information certifications, and of a description of the information sought and the type of communications targeted.

[2572] 50 U.S.C. 1805(a) (text is appended); 50 U.S.C. 1824(a) is to the same effect with respect to physical search orders.

[2573] "An order approving an electronic surveillance under this section shall . . . (2) direct – (B) that, upon the request of the applicant, a specified communication or other common carrier, landlord, custodian, or other specified person, or in circumstances where the Court finds that the actions of the target of the application may have the effect of thwarting the identification of a specified person, such other persons, furnish the applicant forthwith all information, facilities, or technical assistance necessary to accomplish the electronic surveillance in such a manner as will protect its secrecy and produce a minimum of interference with the services that such carrier, landlord, custodian, or other person is providing that target of electronic surveillance," 50 U.S.C. 1805(c)(2)(B). By virtue of section 102(b) of the USA PATRIOT Improvement and Reauthorization Act, the language in italics expires on December 31, 2009, unless statutorily extended or made permanent, P.L. 109-177, §102(b), 120 Stat. 195 (2006).

[2574] 50 U.S.C. 1805(c)(2)(C),(D); 50 U.S.C. 1824(c)(2)(C),(D)(text is appended). FISA physical search orders must also direct "the federal officer conducting the physical search promptly report to the court the circumstances and results of the physical search," 50 U.S.C. 1824(c)(2)(E).

- direct the applicant to advise the court of the particulars relating to surveillance directed at additional facilities and places when the order permits surveillance although the nature and location of targeted facilities and places were unknown at the time of issuance;
- expire when its purpose is accomplished but not later than after 90 days generally (after 120 days in the case of certain foreign agents and after a year in the case of foreign governments or their entities or factions of foreign nations) unless extended (extensions may not exceed one year).[2575]

As in the case of law enforcement wiretapping and electronic eavesdropping, there is authority for interception and physical searches prior to approval in emergency situations,[2576] but there is also statutory authority for foreign intelligence surveillance interceptions and physical searches without the requirement of a court order when the targets are limited to communications among or between foreign powers or involve nonverbal communications from places under the open and exclusive control of a foreign power.[2577] The second of these is replete with reporting requirements to Congress and the FISA court.[2578] These and the twin war time exceptions[2579] may be subject to constitutional limitations, particularly when Americans are the surveillance targets.[2580]

The USA PATRIOT Act's amendments make it clear that those who provide such assistance are immune from civil suit, 18 U.S.C. 1805(i) ("No cause of action shall lie in any court against any provider of a wire or electronic communication service, landlord, custodian, or other persons (including any officer, employee, agent, or other specified person thereof) that furnishes any information, facilities, or technical assistance in accordance with a court order or request for emergency assistance under this Act for electronic surveillance or physical search"). As discussed at greater length later, P.L. 110-261 affords service providers retroactive protection for foreign intelligence assistance provided outside the confines of FISA.

[2575] 50 U.S.C. 1805(c); 1824(c) (text is appended).

[2576] 50 U.S.C. 1805(f); 1824(e) (text is appended). P.L. 110-261 extends the permissible length of emergency authorizations absent court approval from 72 hours to 7 days. It also removes earlier language which called for review of a FISA court denial of an application to approve an emergency authorization. Finally, it states that the Attorney General is to assess compliance with the statutory provisions which permit use of the information secured under an authorization which fails to secure judicial approval.

[2577] 50 U.S.C. 1802(a)(1),(4); 1822(a)(1), (4) (text is appended).

[2578] 50 U.S.C. 1802(a)(2),(3); 1822(a)(2), (3) (text is appended).

[2579] "Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this subchapter to acquire foreign intelligence information for a period not to exceed fifteen calendar days following a declaration of war by the Congress," 50 U.S.C. 1811.

"Notwithstanding any other provision of law, the President, through the Attorney General, may authorize physical searches without a court order under this subchapter to acquire foreign

FISA has detailed provisions governing the use of the information acquired through the use of its surveillance or physical search authority that include:

- confidentiality requirements, 50 U.S.C. 1806(a), 1825(a);
- notice of required Attorney General approval for disclosure, 50 U.S.C. 1806(b), 1825(b);
- notice to the "aggrieved" of the government's intention to use the results as evidence, 50 U.S.C. 1806(c),(d), 1825(c),(d);
- suppression procedures, 50 U.S.C. 1806(e), (f), (g), (h), 1825(e), (f), (g), (h);[2581]
- inadvertently captured information, 50 U.S.C. 1806(I), 1825(b);
- notification of emergency surveillance or search for which no FISA order was subsequently secured, 50 U.S.C. 1806(j), 1825(j); and
- clarification that those who execute FISA surveillance or physical search orders may consult with federal and state law enforcement officers, 50 U.S.C. 1806(k), 1825(k).

Both the surveillance and the physical search authorities are subject to Congressional oversight in the form of semiannual reports on the extent and circumstances of their use.[2582]

Pen Registers and Trap and Trace Devices

FISA pen register and trap and trace procedures, 50 U.S.C. 1841-1846, are similar to those of their law enforcement counterparts, but with many of the attributes of other FISA provisions. The orders may be issued either by a member of the FISA court or by a FISA magistrate upon the certification of a federal officer that the information sought is likely to be relevant to an investigation of international

---

intelligence information for a period not to exceed 15 calendar days following a declaration of war by the Congress," 50 U.S.C. 1829.

[2580] Over the years, however, the vast majority of courts have rejected the suggestion that FISA is vulnerable to constitutional attack on Fourth Amendment grounds or any other, In re Sealed Case, 310 F.3d 717, 737-46 (F.I.S.Ct.Rev. 2002); United States v. Damrah, 412 F.3d 618, 624-25 (6th Cir. 2005); United States v. Mubayyid, 521 F.Supp.2d 125, 135-36 (D. Mass. 2007); United States v. Benkahla, 437 F.Supp.2d 541, 554-55 (E.D.Va. 2006); contra, Mayfield v. United States, 504 F.Supp.2d 1023, 1036-43 (D. Ore. 2007).

[2581] Consideration of a motion to suppress occurs ex parte and in camera when the government files a notice that national security would otherwise be compromised, 50 U.S.C. 1806(f); In re Grand Jury Proceedings, 347 F.3d 197, 203 (7th Cir. 2003); United States v. Damrah, 412 F.3d 618, 623-24 (6th Cir. 2005); review is the same as that afforded by the FISA court, statutory compliance; there is no authority to "second guess the executive branches certification," In re Grand Jury Proceedings, 347 F.3d 197, 204-205 (7th Cir. 2003); United States v. Campa, 529 F.3d 980, 993 (11th Cir. 2008); United States v. Amawi, 531 F.Supp.2d 832, 837 (N.D. Ohio 2008); United States v. Abu-Jihaad, 531 F.Supp.2d 299, 312 (D.Conn. 2008).

[2582] 50 U.S.C. 1808, 1826.

terrorism or clandestine intelligence activities.[2583] The order may direct service providers to supply customer information related to the order.[2584] The statute allows the Attorney General to authorize emergency installation and use as long as an application is filed within 48 hours,[2585] and restricts the use of any resulting evidence if an order is not subsequently granted.[2586] The provisions for use of the information acquired run parallel to those that apply to FISA surveillance and physical search orders.[2587] The USA PATRIOT Improvement and Reauthorization Act increased the level of Congressional oversight by requiring that the semiannual report on the government's recourse to FISA pen register/trap and trace authority including statistical information on the extent of its use.[2588]

Tangible Items

FISA's tangible item orders, 50 U.S.C. 1861, are perhaps its most interesting feature. Prior to the USA PATRIOT Act, senior FBI officials could approve an application to a FISA judge or magistrate for an order authorizing common carriers, or public accommodation, storage facility, or vehicle rental establishments to release their business records based upon certification of a reason to believe that the records pertained to a foreign power or the agent of a foreign power.[2589] The USA PATRIOT Act and later the USA PATRIOT Improvement and Reauthorization Act temporarily rewrote the procedure. In its temporary form, it requires rather than authorizes access; it is predicated upon relevancy rather than probable cause; it applies to all tangible property (not merely records); and it applies to the tangible property of both individuals or organizations, commercial and otherwise.[2590] It is limited, however, to investigations conducted to secure foreign intelligence information or to protect against international terrorism or clandestine intelligence activities.[2591]

[2583] 50 U.S.C. 1842.

[2584] 50 U.S.C. 1842.(d)(2)(C).

[2586] 50 U.S.C. 1843(c)(2).

[2587] 50 U.S.C. 1845.

[2588] 50 U.S.C. 1846.

[2589] 50 U.S.C. 1862 (2000 ed.).

[2590] Unless legislative extended, the authority reverts to its pre-USA PATRIOT Act form on December 31, 2009, 50 U.S.C. 1861 note; P.L. 109-177, §102(b), 120 Stat. 195 (2006).

[2591] 50 U.S.C. 1861(a).

Recipients are prohibited from disclosing the existence of the order, but are expressly authorized to consult an attorney with respect to their rights and obligations under the order.[2592] They enjoy immunity from civil liability for good faith compliance.[2593] They may challenge the legality of the order and/or ask that its disclosure restrictions be lifted or modified.[2594] The grounds for lifting the secrecy requirements are closely defined, but petitions for reconsideration may be filed annually.[2595] The decision to set aside, modify or let stand either the disclosure restrictions of an order or the underlying order itself are subject to appellate review.[2596]

As addition safeguards, Congress has:

- insisted upon the promulgation of minimization standards, 50 U.S.C. 1861(g);
- established use restrictions, 50 U.S.C. 1861(h),
- required the approval of senior officials in order to seek orders covering the records of libraries and certain other types of records, 50 U.S.C. 1861(a)(3);
- confirmed and reinforced reporting requirements, 50 U.S.C. 1862; and
- directed the Justice Department's Inspector General to conduct an audit of the use of the FISA tangible item authority, P.L. 109-177, §106A, 120 Stat. 200-202 (2006).

Protect America Act (Expired)

The Protect America Act (Protect Act) granted the Attorney General and the Director of National Intelligence the power, under limited conditions, to authorize gathering foreign intelligence information,[2597] other than by electronic

---

[2592] 50 U.S.C. 1861(d).

[2593] 50 U.S.C. 1861(e).

[2594] 50 U.S.C. 1861(f).

[2595] 50 U.S.C. 1861(f)(2)(C)(iii).

[2596] 50 U.S.C. 1861(f)(3),(4),(5).

[2597] "'Foreign intelligence information' means – (1) information that relates to, and if concerning a United States person is necessary to, the ability of the United States to protect against – (A) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power; (B) sabotage, international terrorism, or the international proliferation of weapons of mass destruction by a foreign power or an agent of a foreign power; or (C) clandestine intelligence activities by an intelligence service or network of a foreign power or by an agent of a foreign power; or (2) information with respect to a foreign power or foreign territory that relates to, and if concerning a United States person is necessary to – (A) the national defense or the security of the United States; or (B) the conduct of the foreign affairs of the United States," 50 U.S.C.

surveillance, (for up to a year) relating to persons believed to be overseas.[2598] In order to exercise that power, the Attorney General and the Director of National Intelligence were required to certify under oath that the collection effort involved:

- procedures reasonably calculated to assure that the information sought concerned a person outside the United States;
- communications to which service providers or others had access;
- a desire, at least in significant part, to gather foreign intelligence information;
- accompanying minimization procedures; and
- no electronic surveillance other than that directed at a person reasonably believed to be abroad, 50 U.S.C. 1805b(a)(expired).[2599]

That having been done or in emergency situations with their oral approval,[2600] the Attorney General and Director of National Intelligence might direct the communications providers, or others with access, to immediately assist in the gathering of the foreign intelligence information in a manner least disruptive of service to the target and under confidentiality restrictions imposed by the Attorney General and the Director of National Intelligence, 50 U.S.C. 1805b(e)(expired). The directive came with the promise of compensation at prevailing rates as well as immunity from civil liability and was enforceable through the contempt power of the FISA court, 50 U.S.C. 1805b(f), (g), (l)(expired). Recipients were entitled to seek judicial modification of a directive, issued contrary to the statute or otherwise unlawfully, in the FISA court under expedited procedures, 50 U.S.C. 1805b(h), (I), (j), (k) (expired).

1801(e)(language in italics added by P.L. 110-261 did not apply when the Protect Act was in effect).

[2598] P.L. 110-55, §§2, 3, 121 Stat. 552 (2007), 50 U.S.C. 1805a - 1805c. By operation of section 6(c) of the Public Law, sections 2, 3, 4, and 5 expired 180 days after enactment; the deadline was extended to 195 days on January 31, 2008, by P.L. 110-182, 122 Stat. 605 (2008); and the sections expired when the deadline ran out in mid-February. Section 6(b) of the Act provides that orders issued and extended under the authority of the Act remain in effect until they expire under the terms of the order, the Act, and the FISA provisions in effect when they were issued. See generally, CRS Report RL34143, P.L. 110-55, the Protect America Act of 2007: Modifications to the Foreign Intelligence Surveillance Act, by Elizabeth B. Bazan.

[2599] Section 1805b(a)(2) simply called for a determination that "the acquisition does not constitute electronic surveillance," but section 1805a had declared that "nothing in the definition of electronic surveillance under section 101(f)[which provides the definition of terms used in the subchapter in which section 1805b is found] shall be construed to encompass surveillance directed at a person reasonably believed to be located outside the United States."

[2600] In emergency situations, information gathering could begin prior certification under oral instructions as long as minimization procedures were followed and certification was provided within 72 hours, 50 U.S.C. 1805b(a), (d)(expired).

The FISA court was also tasked with the responsibility of reviewing the procedures crafted to ensure that the authority was only invoked with respect to persons reasonably believed to be found overseas, 50 U.S.C. 1805c(expired). Should the court have determined that the procedures were clearly erroneous, the government was free to amend them or to appeal the determination initially to the Foreign Intelligence Surveillance Court of Review and then to the Supreme Court, id.[2601]

Foreign Intelligence Surveillance Act of 1978 Amendments Act of 2008 (P.L. 110-261)

P.L. 110-261 (H.R. 6304), signed July 10, 2008, repeals the Protect America Act and addresses four FISA-related matters.[2602] First, in a manner reminiscent of the Protect Act, it provides temporary authority to gather foreign intelligence information from overseas targets.[2603] Second, it reasserts the exclusivity of FISA and Title III/ECPA as a basis for governmental electronic surveillance.[2604] Third, it instructs the Inspectors General in various agencies to conduct a review and report to Congress on the Terrorist Surveillance Program.[2605] Fourth, it seeks to protect those who assist government surveillance activities from civil liability.[2606]

Overseas Targets

P.L. 110-261 repeals the Protect Act.[2607] Yet like the Protect Act, it establishes a temporary set of three procedures to authorize the acquisition of foreign

---

[2601] The Foreign Intelligence Surveillance Court of Review found that the Protect America Act as applied satisfied Fourth Amendment reasonableness requirements, In re Directives [Redacted] Pursuant to Section 105B, 551 F.3d 1004, 1009-16 (F.I.S.C. Rev. 2008).

[2602] For a general discussion of the debate leading up to enactment see CRS Report RL34279, The Foreign Intelligence Surveillance Act: An Overview of Selected Issues, by Elizabeth B. Bazan.

[2603] 50 U.S.C. 1881-1881g.

[2604] 50 U.S.C. 1812 ("(a) Except as provided in subsection (b), the procedures of chapters 119, 121, and 206 of title 18, United States Code, and this Act shall be the exclusive means by which electronic surveillance and the interception of domestic wire, oral, or electronic communications may be conducted. (b) Only an express statutory authorization for electronic surveillance or the interception of domestic wire, oral, or electronic communications, other than as an amendment to this Act or chapters 119, 121, or 206 of title 18, United States Code, shall constitute an additional exclusive means for the purpose of subsection (a)").

[2605] P.L. 110-261, tit. III, 122 Stat. 2471 (2008).

[2606] P.L. 110-261, tit. II, 122 Stat. 2467 (2008); 50 U.S.C. 1885-1885c (text is appended). For a general discussion of the immunity provisions see CRS Report RL34600, Retroactive Immunity Provided by the FISA Amendments Act of 2008, by Edward C. Liu.

[2607] P.L. 110-261, §403(a)(1)(A), 122 Stat. 2473 (2008)(repealing 50 U.S.C. 1805a, 1985b, and 1805c).

intelligence information by targeting an individual or entity thought to be overseas.[2608] One, 50 U.S.C. 1881a, applies to the targeting of an overseas person or entity that is not a U.S. person.[2609] Another, 50 U.S.C. 1881b, covers situations when the American target is overseas but the gathering involves electronic communications or stored electronic communications or data acquired in this country.[2610] The third, 50 U.S.C. 1881c, applies to situations when the American target is overseas, but section 1881b is not available, either because acquisition occurs outside of the United States or because it involves something other than electronic surveillance or the acquisition of stored communications or data, e.g., a physical search.[2611]

In the case of targets who are not U.S. persons, section 1881a(a) declares "upon the issuance of an order in accordance with subsection (i)(3) or a determination under subsection (c)(2), the Attorney General and the Director of National Intelligence may authorize jointly, for a period of up to 1 year from the effective date of the authorization, the targeting of persons reasonably believed to be located outside the United States to acquire foreign intelligence information." It makes no mention of authorizing acquisition. It merely speaks of targeting with an eye to acquisition. Moreover, it gives no indication of whether the anticipated methods of acquisition include the capture of a target's communications, of communications relating to a target, of communications of a person or entity related to the target, or information concerning one of the three. The remainder of the section, however, seems to dispel some of the questions. Section 1881a is intended to empower the Attorney General and the Director of National Intelligence to authorize the acquisition of foreign intelligence information and the methods that may be used to the capture of communications and related information.

The procedure begins either with a certification presented to the FISA court for approval or with a determination by the two officials that exigent circumstances warrant timely authorization prior to court approval.[2612] In the certification process, they must assert in writing and under oath that:

[2608] Sections 1881a-1881g are repealed effective December 31, 2012, P.L. 110-261, §403(b)(1), 122 Stat. 2474 (2008).

[2609] "United States person" includes United States citizens, permanent resident aliens of the United States, corporations incorporated in the United States, and unincorporated associates made up of a substantial number of U.S. citizens, 50 U.S.C. 1881(a), 1801(j).

[2610] 50 U.S.C. 1881b.

[2611] 50 U.S.C. 1881c.

[2612] 50 U.S.C. 1881a(a), (i)(3), (c)(2).

- a significant purpose for the effort is the acquisition of foreign intelligence information
- the effort will involve the assistance of an electronic communication service provider
- the court has approved, or is being asked to approve, procedures designed to ensure that acquisition is limited to targeted persons found outside the U.S. and to prevent the capture of communications in which all the parties are within the U.S.
- minimization procedures, which the court has approved or is being asked to approve and which satisfy the requirements for such procedures in the case of FISA electronic surveillance and physical searches, will be honored
- guidelines to ensure compliance with limitations imposed in the section have been adopted and the limitations will be observed
- these procedures and guidelines are consistent with Fourth Amendment standards.[2613]

The certification is be accompanied by a copy of the targeting and minimization procedures, any supporting affidavits from senior national security officials, an indication of the effective date of the authorization, and a notification of whether pre-approval emergency authorization has been given.[2614] The certification, however, need not describe the facilities or places at which acquisition efforts will be directed.[2615]

The limitations preclude intentionally targeting a person in the U.S., "reverse targeting" (intentionally targeting a person overseas purpose of targeting a person within the U.S.), intentionally targeting a U.S. person outside the U.S., intentionally acquiring a communication in which all of the parties are in the U.S., or conducting the acquisition in a manner contrary to the demands of the Fourth Amendment.[2616]

The Attorney General, in consultation with the Director of National Intelligence, is obligated to promulgate targeting and minimization procedures and guidelines to ensure that the section's limitations are observed.[2617] The minimization procedures must satisfy the standards required for similar procedures required

---

[2613] 50 U.S.C. 1881a(g)(2).

[2614] Id.

[2615] 50 U.S.C. 1881a(g)(4).

[2616] 50 U.S.C. 1881a(b).

[2617] 50 U.S.C. 1881a(d), (e), (f).

for FISA electronic surveillance and physical searches.[2618] The targeting procedures must be calculated to avoid acquiring communications in which all of the parties are in the U.S. and to confine targeting to persons located outside the U.S.[2619] Both are subject to review by the FISA court for sufficiency when it receives the request to approve the certification.[2620] Copies of the guidelines, which also provide directions concerning the application for FISA court approval under the section, must be supplied to court and to the congressional intelligence and judiciary committees.[2621]

The Attorney General and Director of National Intelligence may instruct an electronic communications service provider to assist in the acquisition. Cooperative providers are entitled to compensation and are immune from suit for their assistance.[2622] They may also petition the FISA court to set aside or modify the direction for assistance, if it is unlawful.[2623] The Attorney General may petition the court to enforce a directive against an uncooperative provider.[2624] The court's decisions concerning certification approval, modification of directions for assistance, and enforcement of the directives are each appealable to the Foreign Intelligence Court of Review and on certiorari to the Supreme Court.[2625]

Except with respect to disclosure following a failure to secure court approval of an emergency authorization, section 1806, discussed earlier, governs the use of information obtained under the authority of section 1881a.[2626]

When the overseas target is an American individual or entity and acquisition is to occur in this country, the FISA court may authorize acquisition by electronic surveillance or by capturing stored electronic communications or data under section 1881b. The Attorney General must approve the application which must be made under oath and indicate:

[2618] 50 U.S.C. 1881a(e).

[2619] 50 U.S.C. 1881a(d).

[2620] 50 U.S.C. 1881a(d), (e), (i).

[2621] 50 U.S.C. 1881a(f).

[2622] 50 U.S.C. 1881(h)(1)-(3).

[2623] 50 U.S.C. 1881(h)(4).

[2624] 50 U.S.C. 1881(h)(5).

[2625] 50 U.S.C. 1881a(h)(6), (i).

[2626] 50 U.S.C. 1881e(a).

- the identity of the applicant
- the identity, if known, or description of the American target
- the facts establishing that reason to believe that the person is overseas and a foreign power or its agent, officer, or employee
- the applicable minimization procedures
- a description of the information sought and the type of communications or activities targeted
- certification by the Attorney General or a senior national security or defense official that
    - foreign intelligence information is to be sought
    - a significant purpose of the effort is to obtain such information
    - the information cannot otherwise reasonably be obtained (and the facts upon which this conclusion is based)
    - the nature of the information (e.g., relating to terrorism, sabotage, the conduct of U.S. foreign affairs, etc.)(and the facts upon which this conclusion is based)
- the means of acquisition and whether physical entry will be necessary
- the identity of the service providing assisting (targeted facilities and premises need not be identified)
- a statement of previous applications relating to the same American and actions taken
- the proposed tenure of the order (not to exceed 90 days), and
- any additional information the FISA court may require.[2627]

The court must issue an acquisition order upon a finding that the application satisfies statutory requirements, the minimization procedures are adequate, and there is probable cause to believe that the American target is located overseas and is a foreign power or its agent, officer or employee.[2628] The court must explain in writing any finding that the application's assertion of probable cause, minimization procedures, or certified facts is insufficient.[2629] Such findings are appealable to the Foreign Intelligence Surveillance Court of Review and under certiorari to the Supreme Court.[2630]

The court's order approving acquisition is to include the identity or description of the American target, the type of activities targeted, the nature of the information

---

[2627] 50 U.S.C. 1881b(b).

[2628] 50 U.S.C. 1881b(c)(1). An American may not be considered a foreign power or its agent, officer or employee based solely on activities protected by the First Amendment, 50 U.S.C. 1881b(c)(2).

[2629] 50 U.S.C. 1881b(c)(3).

[2630] 50 U.S.C. 1881b(f).

sought, the means of acquisition, and duration of the order.[2631] The order will also call for compliance with the minimization procedures, and when appropriate, for confidential, minimally disruptive provider assistance, compensated at a prevailing rate.[2632] Providers are immune from civil liability for any assistance they are directed to provide.[2633]

As in other instances, in emergency cases the Attorney General may authorize acquisition pending approval of the FISA court.[2634] The court must be notified of the Attorney General's decision and the related application must be filed within 7 days.[2635] If emergency acquisition is not judicially approved subsequently, no resulting evidence may be introduced in any judicial, legislative or regulatory proceedings unless the target is determined not to be an American, nor may resulting information be shared with other federal officials without the consent of the target, unless the Attorney General determines that the information concerns a threat of serious bodily injury.[2636] Except with respect to disclosure following a failure to court approval of an emergency authorization, section 1806, discussed earlier, governs the use of information obtained under the authority of section 1881a.[2637]

The second provision for targeting an American overseas in order to acquire foreign intelligence information, section 1881c, is somewhat unique. Both FISA and Title III/ECPA have been understood to apply only to interceptions within the United States. Neither has been thought to apply overseas. Section 1881c, however, may be used for acquisitions outside the United States. Moreover, it may be used for acquisitions inside the United States as long as the requirements that would ordinarily attend such acquisition are honored.[2638] Otherwise, section

[2638] 50 U.S.C. 1881c(a)(3)(B)("If an acquisition for foreign intelligence purposes is to be conducted inside the United States and could be authorized under section 703 [1881b], the acquisition may only be conducted if authorized under section 703 or in accordance with another provision of this Act other than this section"). 50 U.S.C. 1881d("(a) Joint applications and orders.– If an acquisition targeting a United States person under section 703 or 704 is proposed to be conducted both inside and outside the United States, a judge having jurisdiction under section 703(a)(1) or 704(a)(1) may issue simultaneously, upon the request of the Government in a

1881c features many of the same application, approval, and appeal provisions as section 1881b.

Otherwise, section 1881c features many of the same application, approval, and appeal provisions as section 1881b. Authorization is available under a FISA court order or in emergency circumstances under the order of the Attorney General.[2639] Acquisition activities must be discontinued during any period when the target is thought to be in the United States.[2640] Unlike 1881b, however, it is not limited to electronic surveillance or the acquisition of stored electronic information. Moreover, it declares that in the case of acquisition abroad recourse to a FISA court order need only be had when the target American, found overseas, has a reasonable expectation of privacy and a warrant would be required if the acquisition efforts had taken place in the United States and for law enforcement purposes.[2641]

Exclusivity

Title III/ECPA has long declared that it should not be construed to confine governmental activities authorized under FISA, but that the two – Title III/ECPA and FISA – are the exclusive authority under which governmental electronic surveillance may be conducted in this country.[2642] The Justice Department suggested, however, that in addition to the President's constitutional authority the Authorization for the Use of Military Force Resolution,[2643] enacted in response to the events of September 11, established an implicit exception to the

---

joint application complying with the requirements of sections 703(b) and 704(b), orders under sections 703(c) and 704(c), as appropriate. (b) Concurrent authorization– If an order authorizing electronic surveillance or physical search has been obtained under section 105 or 304, the Attorney General may authorize, for the effective period of that order, without an order under section 703 or 704, the targeting of that United States person for the purpose of acquiring foreign intelligence information while such person is reasonably believed to be located outside the United States").

[2639] 50 U.S.C. 1881c(a).

[2640] 50 U.S.C. 1881c(a)(3).

[2641] 50 U.S.C. 1881c(a)(2).

[2642] 18 U.S.C. 2511(2)(f).

[2643] Section 2(a), P.L. 107-40, 115 Stat. 224 (2001), 50 U.S.C. 1541 note ("That the President is authorized to use all necessary and appropriate force against those nations, organizations, or persons he determines planned, authorized, committed, or aided the terrorist attacks that occurred on September 11, 2001, or harbored such organizations or persons, in order to prevent any future acts of international terrorism against the United States by such nations, organizations or persons").

exclusivity requirement.[2644] Section 102 of P.L. 110-261 seeks to overcome the suggestion by establishing a second exclusivity section which declares that exceptions may only be created by explicit statutory language.[2645]

Inspector General Reviews

Section 301 of P.L. 110-261 instructs the Inspectors General of the Justice and Defense Departments, of the Office of the Director of National Intelligence, of the National Security Agency, and of any pertinent intelligence agency to conduct a comprehensive review of their agency's activities relating to presidentially authorized intelligence activities involving communications, including the Terrorist Surveillance Program.[2646] It further directs them to provide the Judiciary and Intelligence Committees with interim reports within 60 days of enactment and final reports within 1 year.[2647]

Immunity for Assistance

P.L. 110-261 bars the initiation or continuation of civil suits in either state or federal court based on charges that the defendant assisted any of the U.S. intelligence agencies.[2648] Dismissal is required upon the certification of the Attorney General that the person either:

- did not provide the assistance charged;
- provided the assistance under order of the FISA court;
- provided the assistance pursuant to a national security letter issued under 18 U.S.C. 2709;
- provided the assistance pursuant to 18 U.S.C. 2511(2)(a)(ii)(B) and 2518(7) under assurances from the Attorney General or a senior Justice

[2644] H.Rept. 110-373, at 9-10 (2007), citing a letter from Assistant Attorney General William E. Moschella.

[2645] 50 U.S.C. 1812 ("(a) Except as provided in subsection (b), the procedures of chapters 119, 121, and 206 of title 18, United States Code, and this Act shall be the exclusive means by which electronic surveillance and the interception of domestic wire, oral, or electronic communications may be conducted. (b) Only an express statutory authorization for electronic surveillance or the interception of domestic wire, oral, or electronic communications, other than as an amendment to this Act or chapters 119, 121, or 206 of title 18, United States Code, shall constitute an additional exclusive means for the purpose of subsection (a)").

[2646] P.L. 110-261, §301(b), (a)(3), 122 Stat. 2471(2008).

[2647] P.L. 110-261, §301(c), 122 Stat. 2471(2008).

[2648] 50 U.S.C. 1885a(a)("Notwithstanding any other provision of law, a civil action may not lie or be maintained in a Federal or State court against any person for providing assistance to an element of the intelligence community, and shall be promptly dismissed. . .").

Department official, empowered to approve emergency law enforcement wiretaps, that no court approval was required;
- provided the assistance in response to a directive from the President through the Attorney General relating to communications between or among foreign powers pursuant to 50 U.S.C. 1802(a)(4);
- provided the assistance in response to a directive from the Attorney General and the Director of National Intelligence relating to the acquisition of foreign intelligence information concerning persons believed to be overseas pursuant to 50 U.S.C. 1805b;
- provided the assistance in response to a directive from the Attorney General and the Director of National Intelligence relating to the acquisition of foreign intelligence information targeting non-U.S. persons thought to be overseas pursuant to 50 U.S.C. 1881a(h); or
- provided the assistance in connection with intelligence activities authorized by the President between September 11, 2001 and January 17, 2007 relating to terrorist attacks against the United States.[2649]

Only telecommunications carriers, electronic service providers, and other communication service providers may claim the protection afforded those who assisted activities authorized between 9/11 and January 17, 2007.[2650] The group which may claim protection for assistance supplied under other grounds is larger. It includes not only communication service providers but also any "landlord, custodian or other person" ordered or directed to provide assistance.[2651]

The Attorney General's certification is binding if supported by substantial evidence, and the court is to consider challenges and supporting evidence ex parte and in camera where the Attorney General asserts that disclosure would

---

[2649] 50 U.S.C. 1885a(a). On January 17, 2007, the Attorney General notified Congress that any subsequent electronic surveillance conducted as part of the Terrorist Surveillance Program would be conducted pursuant to FISA court approval, S.Rept. 110-209, at 4 (2007).

[2650] 50 U.S.C. 1885a(a)(4); 1885(6)("(A) a telecommunications carrier, as that term is defined in section 3 of the Communications Act of 1934 (47 U.S.C. 153); (B) a provider of electronic communication service, as that term is defined in section 2510 of title 18, United States Code; (C) a provider of a remote computing service, as that term is defined in section 2711 of title 18, United States Code; (D) any other communication service provider who has access to wire or electronic communications either as such communications are transmitted or as such communications are stored; (E) a parent, subsidiary, affiliate, successor, or assignee of an entity described in subparagraph (A), (B), (C), or (D); or (F) an officer, employee, or agent of an entity described in subparagraph (A), (B), (C), (D), or (E)").

[2651] 50 U.S.C. 1885a(a)(1)-(3), (5); 1885(7).

harm national security.[2652] Cases filed in state court may be removed to federal court.[2653]

The District Court, to which multi-district civil litigation over cases arising out of the National Security Agency program has been assigned, upheld the constitutionality of P.L. 110-261's immunity provision against attacks under the due process clause, the First Amendment, and separation of powers.[2654]

P.L. 11-261 also preempts state regulatory authority over communication service providers with respect to assistance provided to intelligence agencies.[2655] Moreover, it directs the Attorney General to report to the Judiciary and Intelligence Committees on implementation of the protective provisions.[2656]

Electronic Communications Privacy Act (ECPA)

18 U.S.C. 2510. Definitions

As used in this chapter–

(1) "wire communication" means any aural transfer made in whole or in part through the use of facilities for the transmission of communications by the aid of wire, cable, or other like connection between the point of origin and the point of reception (including the use of such connection in a switching station) furnished or operated by any person engaged in providing or operating such facilities for the transmission of interstate or foreign communications or communications affecting interstate or foreign commerce;

(2) "oral communication" means any oral communication uttered by a person exhibiting an expectation that such communication is not subject to interception under circumstances justifying such expectation, but such term does not include any electronic communication;

(3) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States;

(4) "intercept" means the aural or other acquisition of the contents of any wire, electronic, or oral communication through the use of any electronic, mechanical, or other device;

(5) "electronic, mechanical, or other device" means any device or apparatus which can be used to intercept a wire, oral, or electronic communication other than–

(a) any telephone or telegraph instrument, equipment or facility, or any component thereof, (i) furnished to the subscriber or user by a provider of wire or electronic communication service in the ordinary course of its business and being used by the subscriber or user in the ordinary course of its business or furnished by such subscriber or user for connection to the facilities of such service and used in the ordinary course of its business; or

(ii) being used by a provider of wire or electronic communication service in the ordinary course of its business, or by an investigative or law enforcement officer in the ordinary course of his duties;

(b)a hearing aid or similar device being used to correct subnormal hearing to not better than normal;

(6) "person" means any employee, or agent of the United States or any State or political subdivision thereof, and any individual, partnership, association, joint stock company, trust, or corporation;

(7) “Investigative or law enforcement officer” means any officer of the United States or of a State or political subdivision thereof, who is empowered by law to conduct investigations of or to make arrests for offenses enumerated in this chapter, and any attorney authorized by law to prosecute or participate in the prosecution of such offenses;

(8) “contents”, when used with respect to any wire, oral, or electronic communication, includes any information concerning the substance, purport, or meaning of that communication;

(9) “Judge of competent jurisdiction” means–
(a) a judge of a United States district court or a United States court of appeals; and
(b) a judge of any court of general criminal jurisdiction of a State who is authorized by a statute of that State to enter orders authorizing interceptions of wire, oral, or electronic communications;

(10) “communication common carrier” has the meaning given the term in section 3 of the Communications Act of 1934;

(11) “aggrieved person” means a person who was a party to any intercepted wire, oral, or electronic communication or a person against whom the interception was directed;

(12) “electronic communication” means any transfer of signs, signals, writing, images, sounds, data, or intelligence of any nature transmitted in whole or in part by a wire, radio, electromagnetic, photoelectronic or photooptical system that affects interstate or foreign commerce, but does not include–
(A) any wire or oral communication;
(B) any communication made through a tone-only paging device;
(C) any communication from a tracking device (as defined in section 3117 of this title); or
(D) electronic funds transfer information stored by a financial institution in a communications system used for the electronic storage and transfer of funds;

(13) “user” means any person or entity who–
(A) uses an electronic communication service; and
(B) is duly authorized by the provider of such service to engage in such use;

(14) “electronic communications system” means any wire, radio, electromagnetic, photooptical or photoelectronic facilities for the transmission of wire or electronic communications, and any computer facilities or related electronic equipment for the electronic storage of such communications;

(15) “electronic communication service” means any service which provides to users thereof the ability to send or receive wire or electronic communications;

(16) “readily accessible to the general public” means, with respect to a radio communication, that such communication is not–
(A) scrambled or encrypted;
(B) transmitted using modulation techniques whose essential parameters have been withheld from the public with the intention of preserving the privacy of such communication;
(C) carried on a subcarrier or other signal subsidiary to a radio transmission;
(D) transmitted over a communication system provided by a common carrier, unless the communication is a tone only paging system communication; or
(E) transmitted on frequencies allocated under part 25, subpart D, E, or F of part 74, or part 94 of the Rules of the Federal Communications Commission, unless, in the case of a communication transmitted on a frequency allocated under part 74 that is not exclusively allocated to broadcast auxiliary services, the communication is a two-way voice communication by radio;

(17) “electronic storage” means–
(A) any temporary, intermediate storage of a wire or electronic communication incidental to the electronic transmission thereof; and
(B) any storage of such communication by an electronic communication service for purposes of backup protection of such communication;

(18) “aural transfer” means a transfer containing the human voice at any point between and including the point of origin and the point of reception.

(19) “foreign intelligence information”, for purposes of section 2517(6) of this title, means –
(A) information, whether or not concerning a United States person, that relates to the ability of the United States to protect against –
(i) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;
(ii) sabotage or intentional terrorism by a foreign power or an agent of a foreign power; or
(iii) clandestine intelligence activities by and intelligence service or network of a foreign power or by an agent of a foreign power; or

• information, whether or not concerning a United States person, with respect to a foreign power or foreign territory that relates to –
• the national defense or the security of the United States; or
• the conduct of the foreign affairs of the United States.
• “protected computer” has the meaning set forth in section 1030; and
• “computer trespasser” –
• means a person who accesses a protected computer without authorization and thus has no reasonable expectation of privacy in any communication transmitted to, through, or from the protected computer; and
• does not include a person known by the owner or operator of the protected computer to have an existing contractual relationship with the owner or operator of the protected computer for access to all or part of the protected computer.

18 U.S.C. 2511. Interception and disclosure of wire, oral, or electronic communications prohibited

(1) Except as otherwise specifically provided in this chapter any person who–

(a) intentionally intercepts, endeavors to intercept, or procures any other person to intercept or endeavor to intercept, any wire, oral, or electronic communication;

(b) intentionally uses, endeavors to use, or procures any other person to use or endeavor to use any electronic, mechanical, or other device to intercept any oral communication when-

(i) such device is affixed to, or otherwise transmits a signal through, a wire, cable, or other like connection used in wire communication; or

(ii) such device transmits communications by radio, or interferes with the transmission of such communication; or

(iii) such person knows, or has reason to know, that such device or any component thereof has been sent through the mail or transported in interstate or foreign commerce; or

(iv) such use or endeavor to use

(A) takes place on the premises of any business or other commercial establishment the operations of which affect interstate or foreign commerce; or

(B) obtains or is for the purpose of obtaining information relating to the operations of any business or other commercial establishment the operations of which affect interstate or foreign commerce; or

(v) such person acts in the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States;

(c) intentionally discloses, or endeavors to disclose, to any other person the contents of any wire, oral, or electronic communication, knowing or having reason to know that the information was obtained through the interception of a wire, oral, or electronic communication in violation of this subsection;

(d) intentionally uses, or endeavors to use, the contents of any wire, oral, or electronic communication, knowing or having reason to know that the information was obtained through the interception of a wire, oral, or electronic communication in violation of this subsection; or

(e) (i) intentionally discloses, or endeavors to disclose, to any other person the contents of any wire, oral, or electronic communication, intercepted by means authorized by sections 2511(2)(a)(ii), 2511(2)(b)-(c), 2511(2)(e), 2516, and 2518 of this chapter, (ii) knowing or having reason to know that the information was obtained through the interception of such a communication in connection with a criminal investigation, (iii) having obtained or received the information in connection with a criminal investigation, and (iv) with intent to improperly obstruct, impede, or interfere with a duly authorized criminal investigation, shall be punished as provided in subsection (4) or shall be subject to suit as provided in subsection (5).

(2)

(a)
(i) It shall not be unlawful under this chapter for an operator of a switchboard, or an officer, employee, or agent of a provider of wire or electronic communication service, whose facilities are used in the transmission of a wire or electronic communication, to intercept, disclose, or use that communication in the normal course of his employment while engaged in any activity which is a necessary incident to the rendition of his service or to the protection of the rights or property of the provider of that service, except that a provider of wire communication service to the public shall not utilize service observing or random monitoring except for mechanical or service quality control checks.
(ii) Notwithstanding any other law, providers of wire or electronic communication service, their officers, employees, and agents, landlords, custodians, or other persons, are authorized to provide information, facilities, or technical assistance to persons authorized by law to intercept wire, oral, or electronic communications or to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, if such provider, its officers, employees, or agents, landlord, custodian, or other specified person, has been provided with–

[Sec. 101(c)(1)]295 (A) a court order directing such assistance or a court order pursuant to section 704 of the Foreign Intelligence Surveillance Act of 1978 signed by the authorizing judge, [Sec.403(b)(2)(C)] Effective December 31, 2012 . . . (C) except as provided in section 404, section 2511(2)(A)(ii)(A) of title 28, United States Code, is amended by striking "or a court order pursuant to section 704 of the Foreign Intelligence Surveillance Act of 1978". [Sec. 404(b)(3)] Challenge of directives; protection from liability; use of information – Notwithstanding any other provision of this Act or of the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801 et seq.) . . . (E) section 2511(2)(a)(ii)(A) of title 18, United States Code, as amended by section 101(c)(1), shall continue to apply to an order issued pursuant to section 704 of the Foreign Intelligence Surveillance Act of 1978, as added by section 101(a)[50 U.S.C. 1881c]; or
(B) a certification in writing by a person specified in section 2518(7) of this title or the Attorney General of the United States that no warrant or court order is required by law, that all statutory requirements have been met, and that the specified assistance is required, setting forth the period of time during which the provision of the information, facilities, or technical assistance is authorized and specifying the information, facilities, or technical assistance required. No provider of wire or electronic communication service, officer, employee, or agent thereof, or landlord, custodian, or other specified person shall disclose the existence of any interception or surveillance or the device used to accomplish the interception or surveillance with respect to which the person has been furnished a court order or certification under this chapter, except as may otherwise be required by legal process and then only after prior notification to the Attorney General or to the principal prosecuting attorney of a State or any political subdivision of a State, as may be appropriate. Any such disclosure, shall render such person liable for the civil damages provided for in section 2520. No cause of action shall lie in any court against any provider of wire or electronic

communication service, its officers, employees, or agents, landlord, custodian, or other specified person for providing information, facilities, or assistance in accordance with the terms of a court order, statutory authorization, or certification under this chapter.

[Sec. 102(c)(1)] (iii) If a certification under subparagraph (ii)(B) for assistance to obtain foreign intelligence information is based on statutory authority, the certification shall identify the specific statutory provision and shall certify that the statutory requirements have been met.

(b) It shall not be unlawful under this chapter for an officer, employee, or agent of the Federal Communications Commission, in the normal course of his employment and in discharge of the monitoring responsibilities exercised by the Commission in the enforcement of chapter 5 of title 47 of the United States Code, to intercept a wire or electronic communication, or oral communication transmitted by radio, or to disclose or use the information thereby obtained.

(c) It shall not be unlawful under this chapter for a person acting under color of law to intercept a wire, oral, or electronic communication, where such person is a party to the communication or one of the parties to the communication has given prior consent to such interception.

(d) It shall not be unlawful under this chapter for a person not acting under color of law to intercept a wire, oral, or electronic communication where such person is a party to the communication or where one of the parties to the communication has given prior consent to such interception unless such communication is intercepted for the purpose of committing any criminal or tortious act in violation of the Constitution or laws of the United States or of any State.

(e) Notwithstanding any other provision of this title or section 705 or 706 of the Communications Act of 1934, it shall not be unlawful for an officer, employee, or agent of the United States in the normal course of his official duty to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, as authorized by that Act.

(f) Nothing contained in this chapter or chapter 121 or 206 of this title, or section 705 of the Communications Act of 1934, shall be deemed to affect the acquisition by the United States Government of foreign intelligence information from international or foreign communications, or foreign intelligence activities conducted in accordance with otherwise applicable Federal law involving a foreign electronic communications system, utilizing a means other than electronic surveillance as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, and procedures in this chapter or chapter 121 and the Foreign Intelligence Surveillance Act of 1978 shall be the exclusive means by which electronic surveillance, as defined in section 101 of such Act, and the interception of domestic wire, oral, and electronic communications may be conducted.

(g) It shall not be unlawful under this chapter or chapter 121 of this title for any person-

(i) to intercept or access an electronic communication made through an electronic communication system that is configured so that such electronic communication is readily accessible to the general public;

(ii) to intercept any radio communication which is transmitted–

(I) by any station for the use of the general public, or that relates to ships, aircraft, vehicles, or persons in distress;

(II) by any governmental, law enforcement, civil defense, private land mobile, or public safety communications system, including police and fire, readily accessible to the general public;

(III) by a station operating on an authorized frequency within the bands allocated to the amateur, citizens band, or general mobile radio services; or

(IV) by any marine or aeronautical communications system;

(iii) to engage in any conduct which-

(I) is prohibited by section 633 of the Communications Act of 1934; or

(II) is excepted from the application of section 705(a) of the Communications Act of 1934 by section 705(b) of that Act;

(iv) to intercept any wire or electronic communication the transmission of which is causing harmful interference to any lawfully operating station or consumer electronic equipment, to the extent necessary to identify the source of such interference; or

(v) for other users of the same frequency to intercept any radio communication made through a system that utilizes frequencies monitored by individuals engaged in the provision or the use of such system, if such communication is not scrambled or encrypted.

(h) It shall not be unlawful under this chapter–

(i) to use a pen register or a trap and trace device (as those terms are defined for the purposes of chapter 206 (relating to pen registers and trap and trace devices) of this title); or

(ii) for a provider of electronic communication service to record the fact that a wire or electronic communication was initiated or completed in order to protect such provider, another provider furnishing service toward the completion of the wire or electronic communication, or a user of that service, from fraudulent, unlawful or abusive use of such service.

(i) It shall not be unlawful under this chapter for a person acting under color of law to intercept the wire or electronic communications of a computer trespasser transmitted to, through, or from the protected computer, if–

(I) the owner or operator of the protected computer authorizes the interception of the computer trespasser's communications on the protected computer;

(II) the person acting under color of law is lawfully engaged in an investigation;

(III) the person acting under color of law has reasonable grounds to believe that the contents of the computer trespasser's communications will be relevant to the investigation; and

(IV) such interception does not acquire communications other than those transmitted to or from the computer trespasser.

(3)
(a) Except as provided in paragraph (b) of this subsection, a person or entity providing an electronic communication service to the public shall not intentionally divulge the contents of any communication (other than one to such person or entity, or an agent thereof) while in transmission on that service to any person or entity other than an addressee or intended recipient of such communication or an agent of such addressee or intended recipient.

- A person or entity providing electronic communication service to the public may divulge the contents of any such communication–
- as otherwise authorized in section 2511(2)(a) or 2517 of this title;
- with the lawful consent of the originator or any addressee or intended recipient of such communication;

(iii) to a person employed or authorized, or whose facilities are used, to forward such communication to its destination; or
(iv) which were inadvertently obtained by the service provider and which appear to pertain to the commission of a crime, if such divulgence is made to a law enforcement agency.

(4)(a) Except as provided in paragraph (b) of this subsection or in subsection (5), whoever violates subsection (1) of this section shall be fined under this title or imprisoned not more than five years, or both.

- Conduct otherwise an offense under this subsection that consists of or relates to the interception of a satellite transmission that is not encrypted or scrambled and that is transmitted–
- to a broadcasting station for purposes of retransmission to the general public; or
- as an audio subcarrier intended for redistribution to facilities open to the public, but not including data transmissions or telephone calls, is not an offense under this subsection unless the conduct is for the purposes of direct or indirect commercial advantage or private financial gain.

(c)[Redesignated (b)] (5)(a)(i) If the communication is–

(A) a private satellite video communication that is not scrambled or encrypted and the conduct in violation of this chapter is the private viewing of that communication and is not for a tortious or illegal purpose or for purposes of direct or indirect commercial advantage or private commercial gain; or
(B) a radio communication that is transmitted on frequencies allocated under subpart D of part 74 of the rules of the Federal Communications Commission that is not scrambled or encrypted and the conduct in violation of this chapter is not

for a tortious or illegal purpose or for purposes of direct or indirect commercial advantage or private commercial gain, then the person who engages in such conduct shall be subject to suit by the Federal Government in a court of competent jurisdiction.
(ii) In an action under this subsection–
(A) if the violation of this chapter is a first offense for the person under paragraph (a) of subsection (4) and such person has not been found liable in a civil action under section 2520 of this title, the Federal Government shall be entitled to appropriate injunctive relief; and
(B) if the violation of this chapter is a second or subsequent offense under paragraph (a) of subsection (4) or such person has been found liable in any prior civil action under section 2520, the person shall be subject to a mandatory $500 civil fine.
(b) The court may use any means within its authority to enforce an injunction issued under paragraph (ii)(A), and shall impose a civil fine of not less than $500 for each violation of such an injunction.

18 U.S.C. 2512. Manufacture, distribution, possession, and advertising of wire, oral, or electronic communication intercepting devices prohibited

(1) Except as otherwise specifically provided in this chapter, any person who intentionally–

(a) sends through the mail, or sends or carries in interstate or foreign commerce, any electronic, mechanical, or other device, knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire, oral, or electronic communications;
(b) manufactures, assembles, possesses, or sells any electronic, mechanical, or other device, knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire, oral, or electronic communications, and that such device or any component thereof has been or will be sent through the mail or transported in interstate or foreign commerce; or
(c) places in any newspaper, magazine, handbill, or other publication or disseminates by electronic means any advertisement of–
(i) any electronic, mechanical, or other device knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire, oral, or electronic communications; or
(ii) any other electronic, mechanical, or other device, where such advertisement promotes the use of such device for the purpose of the surreptitious interception of wire, oral, or electronic communications, knowing the content of the advertisement and knowing or having reason to know that such advertisement will be sent through the mail or transported in interstate or foreign commerce, shall be fined under this title or imprisoned not more than five years, or both.

(2) It shall not be unlawful under this section for–

(a) a provider of wire or electronic communication service or an officer, agent, or employee of, or a person under contract with, such a provider, in the normal course of the business of providing that wire or electronic communication service, or

(b) an officer, agent, or employee of, or a person under contract with, the United States, a State, or a political subdivision thereof, in the normal course of the activities of the United States, a State, or a political subdivision thereof, to send through the mail, send or carry in interstate or foreign commerce, or manufacture, assemble, possess, or sell any electronic, mechanical, or other device knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire, oral, or electronic communications.

(3) It shall not be unlawful under this section to advertise for sale a device described in subsection (1) of this section if the advertisement is mailed, sent, or carried in interstate or foreign commerce solely to a domestic provider of wire or electronic communication service or to an agency of the United States, a State, or a political subdivision thereof which is duly authorized to use such device.

18 U.S.C. 2513. Confiscation of wire, oral, or electronic communication interception devices

Any electronic, mechanical, or other device used, sent, carried, manufactured, assembled, possessed, sold, or advertised in violation of section 2511 or section 2512 of this chapter may be seized and forfeited to the United States. All provisions of law relating to (1) the seizure, summary and judicial forfeiture, and condemnation of vessels, vehicles, merchandise, and baggage for violations of the customs laws contained in title 19 of the United States Code, (2) the disposition of such vessels, vehicles, merchandise, and baggage or the proceeds from the sale thereof, (3) the remission or mitigation of such forfeiture, (4) the compromise of claims, and (5) the award of compensation to informers in respect of such forfeitures, shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this section, insofar as applicable and not inconsistent with the provisions of this section; except that such duties as are imposed upon the collector of customs or any other person with respect to the seizure and forfeiture of vessels, vehicles, merchandise, and baggage under the provisions of the customs laws contained in title 19 of the United States Code shall be performed with respect to seizure and forfeiture of electronic, mechanical, or other intercepting devices under this section by such officers, agents, or other persons as may be authorized or designated for that purpose by the Attorney General.

18 U.S.C. 2515. Prohibition of use as evidence of intercepted wire or oral communications

Whenever any wire or oral communication has been intercepted, no part of the contents of such communication and no evidence derived therefrom may be received in evidence in any trial, hearing, or other proceeding in or before any

court, grand jury, department, officer, agency, regulatory body, legislative committee, or other authority of the United States, a State, or a political subdivision thereof if the disclosure of that information would be in violation of this chapter.

18 U.S.C. 2516. Authorization for interception of wire, oral, or electronic communications

(1) The Attorney General, Deputy Attorney General, Associate Attorney General, or any Assistant Attorney General, any acting Assistant Attorney General, or any Deputy Assistant Attorney General or acting Deputy Assistant Attorney General in the Criminal Division or National Security Division specially designated by the Attorney General, may authorize an application to a Federal judge of competent jurisdiction for, and such judge may grant in conformity with section 2518 of this chapter an order authorizing or approving the interception of wire or oral communications by the Federal Bureau of Investigation, or a Federal agency having responsibility for the investigation of the offense as to which the application is made, when such interception may provide or has provided evidence of–

(a) any offense punishable by death or by imprisonment for more than one year under sections 2122 and 2274 through 2277 of title 42 of the United States Code (relating to the enforcement of the Atomic Energy Act of 1954), section 2284 of title 42 of the United States Code (relating to sabotage of nuclear facilities or fuel), or under the following chapters of this title: chapter 10 (relating to biological weapons) chapter 37 (relating to espionage), chapter 55 (relating to kidnapping), chapter 90 (relating to protection of trade secrets), chapter 105 (relating to sabotage), chapter 115 (relating to treason), chapter 102 (relating to riots), chapter 65 (relating to malicious mischief), chapter 111 (relating to destruction of vessels), or chapter 81 (relating to piracy);

(b) a violation of section 186 or section 501(c) of title 29, United States Code (dealing with restrictions on payments and loans to labor organizations), or any offense which involves murder, kidnapping, robbery, or extortion, and which is punishable under this title;

(c) any offense which is punishable under the following sections of this title: section 37 (relating to violence at international airports), section 43 (relating to animal enterprise terrorism), section 81 (arson within special maritime and territorial jurisdiction), section 201 (bribery of public officials and witnesses), section 215 (relating to bribery of bank officials), section 224 (bribery in sporting contests), subsection (d), (e), (f), (g), (h), or (i) of section 844 (unlawful use of explosives), section 1032 (relating to concealment of assets), section 1084 (transmission of wagering information), section 751 (relating to escape), section 832 (relating to nuclear and weapons of mass destruction threats), section 842 (relating to explosive materials), section 930 (relating to possession of weapons in Federal facilities), section 1014 (relating to loans and credit applications generally; renewals and discounts), section 1114 (relating to officers and employees of the United States), section 1116 (relating to protection of foreign officials), sections 1503, 1512, and 1513 (influencing or injuring an officer, juror, or witness generally), section 1510 (obstruction of criminal investigations),

section 1511 (obstruction of State or local law enforcement), section 1591 (sex trafficking of children by force, fraud, or coercion), section 1751 (Presidential and Presidential staff assassination, kidnapping, and assault), section 1951 (interference with commerce by threats or violence), section 1952 (interstate and foreign travel or transportation in aid of racketeering enterprises), section 1958 (relating to use of interstate commerce facilities in the commission of murder for hire), section 1959 (relating to violent crimes in aid of racketeering activity), section 1954 (offer, acceptance, or solicitation to influence operations of employee benefit plan), section 1955 (prohibition of business enterprises of gambling), section 1956 (laundering of monetary instruments), section 1957 (relating to engaging in monetary transactions in property derived from specified unlawful activity), section 659 (theft from interstate shipment), section 664 (embezzlement from pension and welfare funds), section 1343 (fraud by wire, radio, or television), section 1344 (relating to bank fraud), section 1992 (relating to terrorist attacks against mass transportation), sections 2251 and 2252 (sexual exploitation of children), section 2251A (selling or buying of children), section 2252A (relating to material constituting or containing child pornography), section 1466A (relating to child obscenity), section 2260 (production of sexually explicit depictions of a minor for importation into the United States), sections 2421, 2422, 2423, and 2425 (relating to transportation for illegal sexual activity and related crimes), sections 2312, 2313, 2314, and 2315 (interstate transportation of stolen property), section 2321 (relating to trafficking in certain motor vehicles or motor vehicle parts), section 2340A (relating to torture), section 1203 (relating to hostage taking), section 1029 (relating to fraud and related activity in connection with access devices), section 3146 (relating to penalty for failure to appear), section 3521(b)(3) (relating to witness relocation and assistance), section 32 (relating to destruction of aircraft or aircraft facilities), section 38 (relating to aircraft parts fraud), section 1963 (violations with respect to racketeer influenced and corrupt organizations), section 115 (relating to threatening or retaliating against a Federal official), section 1341 (relating to mail fraud), a felony violation of section 1030 (relating to computer fraud and abuse), section 351 (violations with respect to congressional, Cabinet, or Supreme Court assassinations, kidnapping, and assault), section 831 (relating to prohibited transactions involving nuclear materials), section 33 (relating to destruction of motor vehicles or motor vehicle facilities), section 175 (relating to biological weapons), section 175c (relating to variola virus), section 956 (conspiracy to harm persons or property overseas), section a felony violation of section 1028 (relating to production of false identification documentation), section 1425 (relating to the procurement of citizenship or nationalization unlawfully), section 1426 (relating to the reproduction of naturalization or citizenship papers), section 1427 (relating to the sale of naturalization or citizenship papers), section 1541 (relating to passport issuance without authority), section 1542 (relating to false statements in passport applications), section 1543 (relating to forgery or false use of passports), section 1544 (relating to misuse of passports), or section 1546 (relating to fraud and misuse of visas, permits, and other documents);

(d) any offense involving counterfeiting punishable under section 471, 472, or 473 of this title;
(e) any offense involving fraud connected with a case under title 11 or the manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic drugs, marihuana, or other dangerous drugs, punishable under any law of the United States;
(f) any offense including extortionate credit transactions under sections 892, 893, or 894 of this title;
(g) a violation of section 5322 of title 31, United States Code (dealing with the reporting of currency transactions), or section 5324 of title 31, United States Code (relating to structuring transactions to evade reporting requirement prohibited);
(h) any felony violation of sections 2511 and 2512 (relating to interception and disclosure of certain communications and to certain intercepting devices) of this title;
(i) any felony violation of chapter 71 (relating to obscenity) of this title;
(j) any violation of section 60123(b) (relating to destruction of a natural gas pipeline), section 46502 (relating to aircraft piracy), the second sentence of section 46504 (relating to assault on a flight crew with dangerous weapon), or section 46505(b)(3) or (c) (relating to explosive or incendiary devices, or endangerment of human life, by means of weapons on aircraft) of title 49;
(k) any criminal violation of section 2778 of title 22 (relating to the Arms Export Control Act);
(l) the location of any fugitive from justice from an offense described in this section;
(m) a violation of section 274, 277, or 278 of the Immigration and Nationality Act (8 U.S.C. 1324, 1327, or 1328) (relating to the smuggling of aliens);
(n) any felony violation of sections 922 and 924 of title 18, United States Code (relating to firearms);
(o) any violation of section 5861 of the Internal Revenue Code of 1986 (relating to firearms);
(p) a felony violation of section 1028 (relating to production of false identification documents), section 1542 (relating to false statements in passport applications), section 1546 (relating to fraud and misuse of visas, permits, and other documents, section 1028A (relating to aggravated identity theft)) of this title or a violation of section 274, 277, or 278 of the Immigration and Nationality Act (relating to the smuggling of aliens); or
(q) any criminal violation of section 229 (relating to chemical weapons): or sections 2332, 2332a, 2332b, 2332d, 2332f, 2332g, 2332h 2339, 2339A, 2339B, 2339C, or 2339D of this title (relating to terrorism);
(r) any criminal violation of section 1 (relating to illegal restraints of trade or commerce), 2 (relating to illegal monopolizing of trade or commerce), or 3 (relating to illegal restraints of trade or commerce in territories or the District of Columbia) of the Sherman Act (15 U.S.C. 1, , 3); or
(s) any conspiracy to commit any offense described in any subparagraph of this paragraph.

(2) The principal prosecuting attorney of any State, or the principal prosecuting attorney of any political subdivision thereof, if such attorney is authorized by a statute of that State to make application to a State court judge of competent jurisdiction for an order authorizing or approving the interception of wire, oral, or electronic communications, may apply to such judge for, and such judge may grant in conformity with section 2518 of this chapter and with the applicable State statute an order authorizing, or approving the interception of wire, oral, or electronic communications by investigative or law enforcement officers having responsibility for the investigation of the offense as to which the application is made, when such interception may provide or has provided evidence of the commission of the offense of murder, kidnapping, gambling, robbery, bribery, extortion, or dealing in narcotic drugs, marihuana or other dangerous drugs, or other crime dangerous to life, limb, or property, and punishable by imprisonment for more than one year, designated in any applicable State statute authorizing such interception, or any conspiracy to commit any of the foregoing offenses.

(3) Any attorney for the Government (as such term is defined for the purposes of the Federal Rules of Criminal Procedure) may authorize an application to a Federal judge of competent jurisdiction for, and such judge may grant, in conformity with section 2518 of this title, an order authorizing or approving the interception of electronic communications by an investigative or law enforcement officer having responsibility for the investigation of the offense as to which the application is made, when such interception may provide or has provided evidence of any Federal felony.

18 U.S.C. 2517. Authorization for disclosure and use of intercepted wire, oral, or electronic communications

- Any investigative or law enforcement officer who, by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication, or evidence derived therefrom, may disclose such contents to another investigative or law enforcement officer to the extent that such disclosure is appropriate to the proper performance of the official duties of the officer making or receiving the disclosure.
- Any investigative or law enforcement officer who, by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication or evidence derived therefrom may use such contents to the extent such use is appropriate to the proper performance of his official duties.
- Any person who has received, by any means authorized by this chapter, any information concerning a wire, oral, or electronic communication, or evidence derived therefrom intercepted in accordance with the provisions of this chapter may disclose the contents of that communication or such derivative evidence while giving testimony under oath or affirmation in any proceeding held under the authority of the United States or of any State or political subdivision thereof.

- No otherwise privileged wire, oral, or electronic communication intercepted in accordance with, or in violation of, the provisions of this chapter shall lose its privileged character.
- When an investigative or law enforcement officer, while engaged in intercepting wire, oral, or electronic communications in the manner authorized herein, intercepts wire, oral, or electronic communications relating to offenses other than those specified in the order of authorization or approval, the contents thereof, and evidence derived therefrom, may be disclosed or used as provided in subsections (1) and (2) of this section. Such contents and any evidence derived therefrom may be used under subsection (3) of this section when authorized or approved by a judge of competent jurisdiction where such judge finds on subsequent application that the contents were otherwise intercepted in accordance with the provisions of this chapter. Such application shall be made as soon as practicable.
- Any investigative or law enforcement officer, or attorney for the Government, who by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication, or evidence derived therefrom, may disclose such contents to any Federal law enforcement, intelligence, protective, immigration, national defense, or national security official to the extent that such contents include foreign intelligence or counterintelligence (as defined in section 3 of the National Security act of 1947 (50 U.S.C. 401a), or foreign intelligence information (as defined in subsection (19) of section 2510 of this title), to assist the official who is to receive that information in the performance of his official duties. Any Federal official who receives information pursuant to this provision may use that information only as necessary in the conduct of that person's official duties subject to any limitations on the unauthorized disclosure of such information.
- Any investigative or law enforcement officer, or other Federal official in carrying out official duties as such Federal official, who by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication, or evidence derived therefrom, may disclose such contents or derivative evidence to a foreign investigative or law enforcement officer to the extent that such disclosure is appropriate to the proper performance of the official duties of the officer making or receiving the disclosure, and foreign investigative or law enforcement officers may use or disclose such contents or derivative evidence to the extent such use or disclosure is appropriate to the proper performance of their official duties.
- Any investigative or law enforcement officer, or other Federal official in carrying out official duties as such Federal official, who by any means authorized by this chapter, has obtained knowledge of the contents of any wire, oral, or electronic communication, or evidence derived therefrom, may disclose such contents or derivative evidence to any appropriate Federal, State, local, or foreign government official to the extent that such contents or derivative evidence reveals a threat of actual or potential

attack or other grave hostile acts of a foreign power of an agent of as foreign power, domestic or international sabotage, domestic or international terrorism, or clandestine intelligence gathering activities by an intelligence service or network of a foreign power or by an agent of a foreign power, within the United States or elsewhere, for the purpose of preventing or responding to such a threat. Any official who receives information pursuant to this provision may use that information only as necessary in the conduct of that person's official duties subject to any limitations on the unauthorized disclosure of such information, and any State, local, or foreign official who receives information pursuant to this provision may use that information only consistent with such guidelines as the Attorney General and Director of Central Intelligence shall jointly issue.

18 U.S.C. 2518. Procedure for interception of wire, oral, or electronic communications

(1) Each application for an order authorizing or approving the interception of a wire, oral, or electronic communication under this chapter shall be made in writing upon oath or affirmation to a judge of competent jurisdiction and shall state the applicant's authority to make such application. Each application shall include the following information:

(a) the identity of the investigative or law enforcement officer making the application, and the officer authorizing the application;

(b) a full and complete statement of the facts and circumstances relied upon by the applicant, to justify his belief that an order should be issued, including (i) details as to the particular offense that has been, is being, or is about to be committed, (ii) except as provided in subsection (11), a particular description of the nature and location of the facilities from which or the place where the communication is to be intercepted, (iii) a particular description of the type of communications sought to be intercepted, (iv) the identity of the person, if known, committing the offense and whose communications are to be intercepted;

(c) a full and complete statement as to whether or not other investigative procedures have been tried and failed or why they reasonably appear to be unlikely to succeed if tried or to be too dangerous;

(d) a statement of the period of time for which the interception is required to be maintained. If the nature of the investigation is such that the authorization for interception should not automatically terminate when the described type of communication has been first obtained, a particular description of facts establishing probable cause to believe that additional communications of the same type will occur thereafter;

(e) a full and complete statement of the facts concerning all previous applications known to the individual authorizing and making the application, made to any judge for authorization to intercept, or for approval of interceptions of, wire, oral, or electronic communications involving any of the same persons, facilities or places specified in the application, and the action taken by the judge on each such application; and

(f) where the application is for the extension of an order, a statement setting forth the results thus far obtained from the interception, or a reasonable explanation of the failure to obtain such results.

(2) The judge may require the applicant to furnish additional testimony or documentary evidence in support of the application.

(3) Upon such application the judge may enter an ex parte order, as requested or as modified, authorizing or approving interception of wire, oral, or electronic communications within the territorial jurisdiction of the court in which the judge is sitting (and outside that jurisdiction but within the United States in the case of a mobile interception device authorized by a Federal court within such jurisdiction), if the judge determines on the basis of the facts submitted by the applicant that–
(a) there is probable cause for belief that an individual is committing, has committed, or is about to commit a particular offense enumerated in section 2516 of this chapter;
(b) there is probable cause for belief that particular communications concerning that offense will be obtained through such interception;
(c) normal investigative procedures have been tried and have failed or reasonably appear to be unlikely to succeed if tried or to be too dangerous;
(d) except as provided in subsection (11), there is probable cause for belief that the facilities from which, or the place where, the wire, oral, or electronic communications are to be intercepted are being used, or are about to be used, in connection with the commission of such offense, or are leased to, listed in the name of, or commonly used by such person.

(4) Each order authorizing or approving the interception of any wire, oral, or electronic communication under this chapter shall specify-
(a) the identity of the person, if known, whose communications are to be intercepted;
(b) the nature and location of the communications facilities as to which, or the place where, authority to intercept is granted;
(c) a particular description of the type of communication sought to be intercepted, and a statement of the particular offense to which it relates;
(d) the identity of the agency authorized to intercept the communications, and of the person authorizing the application; and
(e) the period of time during which such interception is authorized, including a statement as to whether or not the interception shall automatically terminate when the described communication has been first obtained. An order authorizing the interception of a wire, oral, or electronic communication under this chapter shall, upon request of the applicant, direct that a provider of wire or electronic communication service, landlord, custodian or other person shall furnish the applicant forthwith all information, facilities, and technical assistance necessary to accomplish the interception unobtrusively and with a minimum of interference with the services that such service provider, landlord, custodian, or person is according the person whose communications are to be intercepted. Any provider

of wire or electronic communication service, landlord, custodian or other person furnishing such facilities or technical assistance shall be compensated therefor by the applicant for reasonable expenses incurred in providing such facilities or assistance. Pursuant to section 2522 of this chapter, an order may also be issued to enforce the assistance capability and capacity requirements under the Communications Assistance for Law Enforcement Act.

(5) No order entered under this section may authorize or approve the interception of any wire, oral, or electronic communication for any period longer than is necessary to achieve the objective of the authorization, nor in any event longer than thirty days. Such thirty-day period begins on the earlier of the day on which the investigative or law enforcement officer first begins to conduct an interception under the order or ten days after the order is entered. Extensions of an order may be granted, but only upon application for an extension made in accordance with subsection (1) of this section and the court making the findings required by subsection (3) of this section. The period of extension shall be no longer than the authorizing judge deems necessary to achieve the purposes for which it was granted and in no event for longer than thirty days. Every order and extension thereof shall contain a provision that the authorization to intercept shall be executed as soon as practicable, shall be conducted in such a way as to minimize the interception of communications not otherwise subject to interception under this chapter, and must terminate upon attainment of the authorized objective, or in any event in thirty days. In the event the intercepted communication is in a code or foreign language, and an expert in that foreign language or code is not reasonably available during the interception period, minimization may be accomplished as soon as practicable after such interception. An interception under this chapter may be conducted in whole or in part by Government personnel, or by an individual operating under a contract with the Government, acting under the supervision of an investigative or law enforcement officer authorized to conduct the interception.

(6) Whenever an order authorizing interception is entered pursuant to this chapter, the order may require reports to be made to the judge who issued the order showing what progress has been made toward achievement of the authorized objective and the need for continued interception. Such reports shall be made at such intervals as the judge may require.

(7) Notwithstanding any other provision of this chapter, any investigative or law enforcement officer, specially designated by the Attorney General, the Deputy Attorney General, the Associate Attorney General, or by the principal prosecuting attorney of any State or subdivision thereof acting pursuant to a statute of that State, who reasonably determines that–

(a) an emergency situation exists that involves–

(i) immediate danger of death or serious physical injury to any person,

(ii) conspiratorial activities threatening the national security interest, or

(iii) conspiratorial activities characteristic of organized crime, that requires a wire, oral, or electronic communication to be intercepted before an order authorizing such interception can, with due diligence, be obtained, and

(b) there are grounds upon which an order could be entered under this chapter to authorize such interception, may intercept such wire, oral, or electronic communication if an application for an order approving the interception is made in accordance with this section within forty-eight hours after the interception has occurred, or begins to occur. In the absence of an order, such interception shall immediately terminate when the communication sought is obtained or when the application for the order is denied, whichever is earlier. In the event such application for approval is denied, or in any other case where the interception is terminated without an order having been issued, the contents of any wire, oral, or electronic communication intercepted shall be treated as having been obtained in violation of this chapter, and an inventory shall be served as provided for in subsection (d) of this section on the person named in the application.

(8)

(a) The contents of any wire, oral, or electronic communication intercepted by any means authorized by this chapter shall, if possible, be recorded on tape or wire or other comparable device. The recording of the contents of any wire, oral, or electronic communication under this subsection shall be done in such way as will protect the recording from editing or other alterations. Immediately upon the expiration of the period of the order, or extensions thereof, such recordings shall be made available to the judge issuing such order and sealed under his directions. Custody of the recordings shall be wherever the judge orders. They shall not be destroyed except upon an order of the issuing or denying judge and in any event shall be kept for ten years. Duplicate recordings may be made for use or disclosure pursuant to the provisions of subsections

(1) and (2) of section 2517 of this chapter for investigations. The presence of the seal provided for by this subsection, or a satisfactory explanation for the absence thereof, shall be a prerequisite for the use or disclosure of the contents of any wire, oral, or electronic communication or evidence derived therefrom under subsection (3) of section 2517.

(b) Applications made and orders granted under this chapter shall be sealed by the judge. Custody of the applications and orders shall be wherever the judge directs. Such applications and orders shall be disclosed only upon a showing of good cause before a judge of competent jurisdiction and shall not be destroyed except on order of the issuing or denying judge, and in any event shall be kept for ten years.

(c) Any violation of the provisions of this subsection may be punished as contempt of the issuing or denying judge.

(d) Within a reasonable time but not later than ninety days after the filing of an application for an order of approval under section 2518(7)(b) which is denied or the termination of the period of an order or extensions thereof, the issuing or denying judge shall cause to be served, on the persons named in the order or the application, and such other parties to intercepted communications as the judge

may determine in his discretion that is in the interest of justice, an inventory which shall include notice of–

- the fact of the entry of the order or the application;
- the date of the entry and the period of authorized, approved or disapproved interception, or the denial of the application; and
- the fact that during the period wire, oral, or electronic communications were or were not intercepted. The judge, upon the filing of a motion, may in his discretion make available to such person or his counsel for inspection such portions of the intercepted communications, applications and orders as the judge determines to be in the interest of justice. On an ex parte showing of good cause to a judge of competent jurisdiction the serving of the inventory required by this subsection may be postponed.

(9) The contents of any wire, oral, or electronic communication intercepted pursuant to this chapter or evidence derived therefrom shall not be received in evidence or otherwise disclosed in any trial, hearing, or other proceeding in a Federal or State court unless each party, not less than ten days before the trial, hearing, or proceeding, has been furnished with a copy of the court order, and accompanying application, under which the interception was authorized or approved. This ten-day period may be waived by the judge if he finds that it was not possible to furnish the party with the above information ten days before the trial, hearing, or proceeding and that the party will not be prejudiced by the delay in receiving such information.

(10)(a) Any aggrieved person in any trial, hearing, or proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, a State, or a political subdivision thereof, may move to suppress the contents of any wire or oral communication intercepted pursuant to this chapter, or evidence derived therefrom, on the grounds that

- the communication was unlawfully intercepted;
- the order of authorization or approval under which it was intercepted is insufficient on its face; or

(iii) the interception was not made in conformity with the order of authorization or

approval. Such motion shall be made before the trial, hearing, or proceeding unless there was no opportunity to make such motion or the person was not aware of the grounds of the motion. If the motion is granted, the contents of the intercepted wire or oral communication, or evidence derived therefrom, shall be treated as having been obtained in violation of this chapter. The judge, upon the filing of such motion by the aggrieved person, may in his discretion make available to the aggrieved person or his counsel for inspection such portions of the intercepted communication or evidence derived therefrom as the judge determines to be in the interests of justice.

- In addition to any other right to appeal, the United States shall have the right to appeal from an order granting a motion to suppress made under paragraph (a) of this subsection, or the denial of an application for an order of approval, if the United States attorney shall certify to the judge or other official granting such motion or denying such application that the appeal is not taken for purposes of delay. Such appeal shall be taken within thirty days after the date the order was entered and shall be diligently prosecuted.
- The remedies and sanctions described in this chapter with respect to the interception of electronic communications are the only judicial remedies and sanctions for nonconstitutional violations of this chapter involving such communications.
- The requirements of subsections (1)(b)(ii) and (3)(d) of this section relating to the specification of the facilities from which, or the place where, the communication is to be intercepted do not apply if–
- in the case of an application with respect to the interception of an oral communication-
- the application is by a Federal investigative or law enforcement officer and is approved by the Attorney General, the Deputy Attorney General, the Associate Attorney General, an Assistant Attorney General, or an acting Assistant Attorney General;
- the application contains a full and complete statement as to why such specification is not practical and identifies the person committing the offense and whose communications are to be intercepted; and

(iii) the judge finds that such specification is not practical; and

- in the case of an application with respect to a wire or electronic communication–
- the application is by a Federal investigative or law enforcement officer and is approved by the Attorney General, the Deputy Attorney General, the Associate Attorney General, an Assistant Attorney General, or an acting Assistant Attorney General;
- the application identifies the person believed to be committing the offense and whose communications are to be intercepted and the applicant makes a showing that there is probable cause to believe that the person's actions could have the effect of thwarting interception from a specified facility;

(iii) the judge finds that such showing has been adequately made; and

- the order authorizing or approving the interception is limited to interception only for such time as it is reasonable to presume that the person identified in the application is or was reasonably proximate to the instrument through which such communication will be or was transmitted.
- An interception of a communication under an order with respect to which the requirements of subsections (1)(b)(ii) and (3)(d) of this section do not apply by reason of subsection (11)(a) shall not begin until the place where the communication is to be intercepted is ascertained by the person

implementing the interception order. A provider of wire or electronic communications service that has received an order as provided for in subsection (11)(b) may move the court to modify or quash the order on the ground that its assistance with respect to the interception cannot be performed in a timely or reasonable fashion. The court, upon notice to the government, shall decide such a motion expeditiously.

18 U.S.C. 2519. Reports concerning intercepted wire, oral, or electronic communications

(1) Within thirty days after the expiration of an order (or each extension thereof) entered under section 2518, or the denial of an order approving an interception, the issuing or denying judge shall report to the Administrative Office of the United States Courts–

(a) the fact that an order or extension was applied for;

(b) the kind of order or extension applied for (including whether or not the order was an order with respect to which the requirements of sections 2518(1)(b)(ii) and 2518(3)(d) of this title did not apply by reason of section 2518(11) of this title);

(c) the fact that the order or extension was granted as applied for, was modified, or was denied;

(d) the period of interceptions authorized by the order, and the number and duration of any extensions of the order;

(e) the offense specified in the order or application, or extension of an order;

(f) the identity of the applying investigative or law enforcement officer and agency making the application and the person authorizing the application; and

(g) the nature of the facilities from which or the place where communications were to be intercepted.

(2) In January of each year the Attorney General, an Assistant Attorney General specially designated by the Attorney General, or the principal prosecuting attorney of a State, or the principal prosecuting attorney for any political subdivision of a State, shall report to the Administrative Office of the United States Courts–

(a) the information required by paragraphs (a) through (g) of subsection (1) of this section with respect to each application for an order or extension made during the preceding calendar year;

(b) a general description of the interceptions made under such order or extension, including (i) the approximate nature and frequency of incriminating communications intercepted, (ii) the approximate nature and frequency of other communications intercepted, (iii) the approximate number of persons whose communications were intercepted, (iv) the number of orders in which encryption was encountered and whether such encryption prevented law enforcement from obtaining the plain text of communications intercepted pursuant to such order, and (v) the approximate nature, amount, and cost of the manpower and other resources used in the interceptions;

(c) the number of arrests resulting from interceptions made under such order or extension, and the offenses for which arrests were made;
(d) the number of trials resulting from such interceptions;
(e) the number of motions to suppress made with respect to such interceptions, and the number granted or denied;
(f) the number of convictions resulting from such interceptions and the offenses for which the convictions were obtained and a general assessment of the importance of the interceptions; and
(g) the information required by paragraphs (b) through (f) of this subsection with respect to orders or extensions obtained in a preceding calendar year.

(3) In April of each year the Director of the Administrative Office of the United States Courts shall transmit to the Congress a full and complete report concerning the number of applications for orders authorizing or approving the interception of wire, oral, or electronic communications pursuant to this chapter and the number of orders and extensions granted or denied pursuant to this chapter during the preceding calendar year. Such report shall include a summary and analysis of the data required to be filed with the Administrative Office by subsections (1) and (2) of this section. The Director of the Administrative Office of the United States Courts is authorized to issue binding regulations dealing with the content and form of the reports required to be filed by subsections (1) and (2) of this section.

18 U.S.C. 2520. Recovery of civil damages authorized

(a) In general. –Except as provided in section 2511(2)(a)(ii), any person whose wire, oral, or electronic communication is intercepted, disclosed, or intentionally used in violation of this chapter may in a civil action recover from the person or entity other than the United States which engaged in that violation such relief as may be appropriate.

(b) Relief. –In an action under this section, appropriate relief includes–
(1) such preliminary and other equitable or declaratory relief as may be appropriate;
(2) damages under subsection (c) and punitive damages in appropriate cases; and
(3) a reasonable attorney's fee and other litigation costs reasonably incurred.

(c) Computation of damages. –
(1) In an action under this section, if the conduct in violation of this chapter is the private viewing of a private satellite video communication that is not scrambled or encrypted or if the communication is a radio communication that is transmitted on frequencies allocated under subpart D of part 74 of the rules of the Federal Communications Commission that is not scrambled or encrypted and the conduct is not for a tortious or illegal purpose or for purposes of direct or

indirect commercial advantage or private commercial gain, then the court shall assess damages as follows:

(A) If the person who engaged in that conduct has not previously been enjoined under section 2511(5) and has not been found liable in a prior civil action under this section, the court shall assess the greater of the sum of actual damages suffered by the plaintiff, or statutory damages of not less than $50 and not more than $500.

(B) If, on one prior occasion, the person who engaged in that conduct has been enjoined under section 2511(5) or has been found liable in a civil action under this section, the court shall assess the greater of the sum of actual damages suffered by the plaintiff, or statutory damages of not less than $100 and not more than $1000.

(2) In any other action under this section, the court may assess as damages whichever is the greater of–

(A) the sum of the actual damages suffered by the plaintiff and any profits made by the violator as a result of the violation; or

(B) statutory damages of whichever is the greater of $100 a day for each day of violation or $10,000.

(d) Defense. –A good faith reliance on-

(1) a court warrant or order, a grand jury subpoena, a legislative authorization, or a statutory authorization;

(2) a request of an investigative or law enforcement officer under section 2518(7) of this title; or

(3) a good faith determination that section 2511(3) or 2511(2)(i) of this title permitted the conduct complained of; is a complete defense against any civil or criminal action brought under this chapter or any other law.

(e) Limitation. –A civil action under this section may not be commenced later than two years after the date upon which the claimant first has a reasonable opportunity to discover the violation.

(f) Administrative Discipline. – If a court or appropriate department or agency determines that the United States or any of its departments or agencies has violated any provision of this chapter, and the court finds that the circumstances surrounding the violation raise serious questions about whether or not an officer or employee of the United States acted willfully or intentionally with respect to the possible violation, the department or agency shall, upon receipt of a true and correct copy of the decision and findings of the court or appropriate department or agency promptly initiate a proceeding to determine whether disciplinary action against the officer or employee is warranted. If the head of the department or agency involved determines that disciplinary action is not warranted, he or she shall notify the Inspector General with jurisdiction over the department or agency concerned and shall provide the Inspector General with the reasons for such determination.

(g) Improper Disclosure Is Violation. – Any willful disclosure or use by an investigative or law enforcement officer or governmental entity of information beyond the extent permitted by section 2517 is a violation of this chapter for purposes of section 2510(a).

18 U.S.C. 2521. Injunction against illegal interception

Whenever it shall appear that any person is engaged or is about to engage in any act which constitutes or will constitute a felony violation of this chapter, the Attorney General may initiate a civil action in a district court of the United States to enjoin such violation. The court shall proceed as soon as practicable to the hearing and determination of such an action, and may, at any time before final determination, enter such a restraining order or prohibition, or take such other action, as is warranted to prevent a continuing and substantial injury to the United States or to any person or class of persons for whose protection the action is brought. A proceeding under this section is governed by the Federal Rules of Civil Procedure, except that, if an indictment has been returned against the respondent, discovery is governed by the Federal Rules of Criminal Procedure.

18 U.S.C. 2522. Enforcement of the Communications Assistance for Law Enforcement Act

(a) Enforcement by court issuing surveillance order. –If a court authorizing an interception under this chapter, a State statute, or the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801 et seq.) or authorizing use of a pen register or a trap and trace device under chapter 206 or a State statute finds that a telecommunications carrier has failed to comply with the requirements of the Communications Assistance for Law Enforcement Act, the court may, in accordance with section 108 of such Act, direct that the carrier comply forthwith and may direct that a provider of support services to the carrier or the manufacturer of the carrier's transmission or switching equipment furnish forthwith modifications necessary for the carrier to comply.

(b) Enforcement upon application by Attorney General. –The Attorney General may, in a civil action in the appropriate United States district court, obtain an order, in accordance with section 108 of the Communications Assistance for Law Enforcement Act, directing that a telecommunications carrier, a manufacturer of telecommunications transmission or switching equipment, or a provider of telecommunications support services comply with such Act.

(c) Civil penalty. –

(1) In general. – A court issuing an order under this section against a telecommunications carrier, a manufacturer of telecommunications transmission or switching equipment, or a provider of telecommunications support services may impose a civil penalty of up to $10,000 per day for each day in violation after the issuance of the order or after such future date as the court may specify.

(2) Considerations.– In determining whether to impose a civil penalty and in determining its amount, the court shall take into account–

(A) the nature, circumstances, and extent of the violation;

(B) the violator's ability to pay, the violator's good faith efforts to comply in a timely manner, any effect on the violator's ability to continue to do business, the degree of culpability, and the length of any delay in undertaking efforts to comply; and (c) such other matters as justice may require.

(d) Definitions.– As used in this section, the terms defined in section 102 of the Communications Assistance for Law Enforcement Act have the meanings provided, respectively, in such section.

18 U.S.C. 2701. Unlawful access to stored communications

(a) Offense.–Except as provided in subsection (c) of this section whoever–

(1) intentionally accesses without authorization a facility through which an electronic communication service is provided; or

(2) intentionally exceeds an authorization to access that facility; and thereby obtains, alters, or prevents authorized access to a wire or electronic communication while it is in electronic storage in such system shall be punished as provided in subsection (b) of this section.

(b) Punishment. –The punishment for an offense under subsection (a) of this section is–

(1) if the offense is committed for purposes of commercial advantage, malicious destruction or damage, or private commercial gain, or in furtherance of any criminal or tortious act in violation of the constitution and laws of the United States or any state –

(A) a fine under this title or imprisonment for not more than 5 years, or both, in the case of a first offense under this subparagraph; and

(B) a fine under this title or imprisonment for not more than 10 years, or both, for any subsequent offense under this subparagraph; and

(2)

(A) a fine under this title or imprisonment for not more than 1 year or both, in the case of a first offense under this paragraph; and

(B) a fine under this title or imprisonment for not more than 5 years, or both, in the case of an offense under this subparagraph that occurs after a conviction of another offense under this section.

(c) Exceptions. –Subsection (a) of this section does not apply with respect to conduct authorized–

(1) by the person or entity providing a wire or electronic communications service;

(2) by a user of that service with respect to a communication of or intended for that user; or

(3) in section 2703, 2704 or 2518 of this title.

18 U.S.C. 2702. Voluntary disclosure of customer communications or records

(a) Prohibitions. –Except as provided in subsection (b) or (c) –

(1) a person or entity providing an electronic communication service to the public shall not knowingly divulge to any person or entity the contents of a communication while in electronic storage by that service; and

(2) a person or entity providing remote computing service to the public shall not knowingly divulge to any person or entity the contents of any communication which is carried or maintained on that service–

(A) on behalf of, and received by means of electronic transmission from (or created by means of computer processing of communications received by means of electronic transmission from), a subscriber or customer of such service;

(B) solely for the purpose of providing storage or computer processing services to such subscriber or customer, if the provider is not authorized to access the contents of any such communications for purposes of providing any services other than storage or computer processing; and

(3) a provider of remote computing service or electronic communication service to the public shall not knowingly divulge a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications covered by paragraph (1) or (2)) to any governmental entity.

(b) Exceptions for disclosure of communications. – A provider described in subsection (a) may divulge the contents of a communication-

(1) to an addressee or intended recipient of such communication or an agent of such addressee or intended recipient;

(2) as otherwise authorized in section 2517, 2511(2)(a), or 2703 of this title;

(3) with the lawful consent of the originator or an addressee or intended recipient of such communication, or the subscriber in the case of remote computing service;

(4) to a person employed or authorized or whose facilities are used to forward such communication to its destination;

(5) as may be necessarily incident to the rendition of the service or to the protection of the rights or property of the provider of that service;

(6) to the National Center for Missing and Exploited Children, in connection with a report submitted thereto under section 227 of the Victims of Child Abuse Act of 1990 (42 U.S.C. 13032);

(7) to a law enforcement agency–

(A) if the contents–

(i) were inadvertently obtained by the service provider; and

(ii) appear to pertain to the commission of a crime; or [(B) Repealed. P.L. 108-21, Title V, § 508(b)(1)(A), Apr. 30, 2003, 117 Stat. 684] [(C) Repealed. P.L. 107-296, Title II, § 225(d)(1)(C), Nov. 25, 2002, 116 Stat. 2157]

(8) to a governmental entity, if the provider, in good faith, believes that an emergency involving danger of death or serious physical injury to any person requires disclosure without delay of communications relating to the emergency.

(c) Exceptions for disclosure of customer records. –A provider described in subsection (a) may divulge a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications covered by subsection (a)(1) or (a)(2)) –
(1)as otherwise authorized in section 2703;
(2) with the lawful consent of the customer or subscriber;
(3) as may be necessarily incident to the rendition of the service or to the protection of the rights or property of the provider of that service;
(4) to a governmental entity, if the provider, in good faith, believes that an emergency involving danger of death or serious physical injury to any person requires disclosure without delay of information relating to the emergency;
(5) to the National Center for Missing and Exploited Children, in connection with a report submitted thereto under section 227 of the Victims of Child Abuse Act of 1990 (42 U.S.C. 13032); or
(6) to any person other than a governmental entity.

(d) Reporting of emergency disclosures. –On an annual basis, the Attorney General shall submit to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report containing–
(1) the number of accounts from which the Department of Justice has received voluntary disclosures under subsection (b)(8); and
(2) a summary of the basis for disclosure in those instances where-–
(A) voluntary disclosures under subsection (b)(8) were made to the Department of Justice; and
(B) the investigation pertaining to those disclosures was closed without the filing of criminal charges.

18 U.S.C. 2703. Required disclosure of customer communications or records

(a) Contents of wire or electronic communications in electronic storage. –A governmental entity may require the disclosure by a provider of electronic communication service of the contents of a wire or electronic communication, that is in electronic storage in a wire or electronic communications system for one hundred and eighty days or less, only pursuant to a warrant issued using the procedures described in the Federal Rules of Criminal Procedure by a court with jurisdiction over the offense under investigation or equivalent State warrant. A governmental entity may require the disclosure by a provider of electronic communications services of the contents of a wire or electronic communication that has been in electronic storage in an electronic communications system for more than one hundred and eighty days by the means available under subsection (b) of this section. (b)(1) Contents of electronic communications in a remote computing service. –
(1) A governmental entity may require a provider of remote computing service to disclose the contents of any wire or electronic communication to which this paragraph is made applicable by paragraph (2) of this subsection–

(A) without required notice to the subscriber or customer, if the governmental entity obtains a warrant issued using the procedures described in the Federal Rules of Criminal Procedure by a court with jurisdiction over the offense under investigation or equivalent State warrant; or

(B) with prior notice from the governmental entity to the subscriber or customer if the governmental entity–

(i) uses an administrative subpoena authorized by a Federal or State statute or a Federal or State grand jury or trial subpoena; or

(ii) obtains a court order for such disclosure under subsection (d) of this section; except that delayed notice may be given pursuant to section 2705 of this title.

(2) Paragraph (1) is applicable with respect to any wire or electronic communication that is held or maintained on that service–

(A) on behalf of, and received by means of electronic transmission from (or created by means of computer processing of communications received by means of electronic transmission from), a subscriber or customer of such remote computing service; and

(B) solely for the purpose of providing storage or computer processing services to such subscriber or customer, if the provider is not authorized to access the contents of any such communications for purposes of providing any services other than storage or computer processing.

(c) Records concerning electronic communication service or remote computing service. –

(1)

(A) A government entity may require a provider of electronic communication service or remote computing service to disclose a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications).

(B) A provider of electronic communication service or remote computing service shall disclose a record or other information pertaining to a subscriber to or customer of such service (not including the contents of communications covered by subsection (a) or (b) of this section) to a governmental entity only when the governmental entity-

(A) obtains a warrant issued using the procedures described in the Federal Rules of Criminal Procedure by a court with jurisdiction over the offense under investigation or equivalent State warrant;

(B) obtains a court order for such disclosure under subsection (d) of this section;

(C) has the consent of the subscriber or customer to such disclosure; or

(D) submits a formal written request relevant to a law enforcement investigation concerning telemarketing fraud for the name, address, and place of business of a subscriber or customer of such provider, which subscriber or customer is engaged in telemarketing (as such term is defined in section 2325 of this title); or

(E) seeks information under paragraph (2).

(2) A provider of electronic communication service or remote computing service shall disclose to a governmental entity the (A) name; (B) address; (C) local and long distance telephone connection records, or records of session times and durations; (D) length of service (including start date) and types of service utilized; (E) telephone or instrument number or other subscriber number or identity, including any temporarily assigned network address; and (F) means and source of payment (including any credit car or bank account number), of a subscriber to or customer of such service, when the governmental entity uses an administrative subpoena authorized by a Federal or State statute or a Federal or State grand jury or trial subpoena or any means available under paragraph (1).
(3) A governmental entity receiving records or information under this subsection is not required to provide notice to a subscriber or customer.

(d) Requirements for court order. –A court order for disclosure under subsection (b) or (c) may be issued by any court that is a court of competent jurisdiction and shall issue only if the governmental entity offers specific and articulable facts showing that there are reasonable grounds to believe that the contents of a wire or electronic communication, or the records or other information sought, are relevant and material to an ongoing criminal investigation. In the case of a State governmental authority, such a court order shall not issue if prohibited by the law of such State. A court issuing an order pursuant to this section, on a motion made promptly by the service provider, may quash or modify such order, if the information or records requested are unusually voluminous in nature or compliance with such order otherwise would cause an undue burden on such provider.

(e) No cause of action against a provider disclosing information under this chapter. –No cause of action shall lie in any court against any provider of wire or electronic communication service, its officers, employees, agents, or other specified persons for providing information, facilities, or assistance in accordance with the terms of a court order, warrant, subpoena , statutory authorization, or certification under this chapter.

(f) Requirement to preserve evidence. –
(1) In general. – A provider of wire or electronic communication services or a remote computing service, upon the request of a governmental entity, shall take all necessary steps to preserve records and other evidence in its possession pending the issuance of a court order or other process.
(2) Period of retention. – Records referred to in paragraph (1) shall be retained for a period of 90 days, which shall be extended for an additional 90-day period upon a renewed request by the governmental entity.

(g) Presence of Officer not Required. – Notwithstanding section 3105 of this title, the presence of an officer shall not be required for service or execution of a search warrant issued in accordance with this chapter requiring disclosure by a provider of electronic communications service or remote computing service of the contents

of communications or records or other information pertaining to a subscriber to or customer of such service.

18 U.S.C. 2704. Backup preservation

(a) Backup preservation. –

(1) A governmental entity acting under section 2703(b)(2) may include in its subpoena or court order a requirement that the service provider to whom the request is directed create a backup copy of the contents of the electronic communications sought in order to preserve those communications. Without notifying the subscriber or customer of such subpoena or court order, such service provider shall create such backup copy as soon as practicable consistent with its regular business practices and shall confirm to the governmental entity that such backup copy has been made. Such backup copy shall be created within two business days after receipt by the service provider of the subpoena or court order.

(2) Notice to the subscriber or customer shall be made by the governmental entity within three days after receipt of such confirmation, unless such notice is delayed pursuant to section 2705(a).

(3) The service provider shall not destroy such backup copy until the later of–

(A) the delivery of the information; or

(B) the resolution of any proceedings (including appeals of any proceeding) concerning the government's subpoena or court order.

(4) The service provider shall release such backup copy to the requesting governmental entity no sooner than fourteen days after the governmental entity's notice to the subscriber or customer if such service provider–

(A) has not received notice from the subscriber or customer that the subscriber or customer has challenged the governmental entity's request; and

(B) has not initiated proceedings to challenge the request of the governmental entity.

(5) A governmental entity may seek to require the creation of a backup copy under subsection (a)(1) of this section if in its sole discretion such entity determines that there is reason to believe that notification under section 2703 of this title of the existence of the subpoena or court order may result in destruction of or tampering with evidence. This determination is not subject to challenge by the subscriber or customer or service provider.

(b) Customer challenges. –

(1) Within fourteen days after notice by the governmental entity to the subscriber or customer under subsection (a)(2) of this section, such subscriber or customer may file a motion to quash such subpoena or vacate such court order, with copies served upon the governmental entity and with written notice of such challenge to the service provider. A motion to vacate a court order shall be filed in the court which issued such order. A motion to quash a subpoena shall be filed in the appropriate United States district court or State court. Such motion or application shall contain an affidavit or sworn statement-

(A) stating that the applicant is a customer or subscriber to the service from which the contents of electronic communications maintained for him have been sought; and

(B) stating the applicant's reasons for believing that the records sought are not relevant to a legitimate law enforcement inquiry or that there has not been substantial compliance with the provisions of this chapter in some other respect.

(2) Service shall be made under this section upon a governmental entity by delivering or mailing by registered or certified mail a copy of the papers to the person, office, or department specified in the notice which the customer has received pursuant to this chapter. For the purposes of this section, the term "delivery" has the meaning given that term in the Federal Rules of Civil Procedure.

(3) If the court finds that the customer has complied with paragraphs (1) and (2) of this subsection, the court shall order the governmental entity to file a sworn response, which may be filed in camera if the governmental entity includes in its response the reasons which make in camera review appropriate. If the court is unable to determine the motion or application on the basis of the parties' initial allegations and response, the court may conduct such additional proceedings as it deems appropriate. All such proceedings shall be completed and the motion or application decided as soon as practicable after the filing of the governmental entity's response.

(4) If the court finds that the applicant is not the subscriber or customer for whom the communications sought by the governmental entity are maintained, or that there is a reason to believe that the law enforcement inquiry is legitimate and that the communications sought are relevant to that inquiry, it shall deny the motion or application and order such process enforced. If the court finds that the applicant is the subscriber or customer for whom the communications sought by the governmental entity are maintained, and that there is not a reason to believe that the communications sought are relevant to a legitimate law enforcement inquiry, or that there has not been substantial compliance with the provisions of this chapter, it shall order the process quashed.

(5) A court order denying a motion or application under this section shall not be deemed a final order and no interlocutory appeal may be taken therefrom by the customer.

18 U.S.C. 2705. Delayed notice

(a) Delay of notification. –

(1) A governmental entity acting under section 2703(b) of this title may–

(A) where a court order is sought, include in the application a request, which the court shall grant, for an order delaying the notification required under section 2703(b) of this title for a period not to exceed ninety days, if the court determines that there is reason to believe that notification of the existence of the court order may have an adverse result described in paragraph (2) of this subsection; or

(B) where an administrative subpoena authorized by a Federal or State statute or a Federal or State grand jury subpoena is obtained, delay the notification required under section 2703(b) of this title for a period not to exceed ninety days

upon the execution of a written certification of a supervisory official that there is reason to believe that notification of the existence of the subpoena may have an adverse result described in paragraph (2) of this subsection.

(2) An adverse result for the purposes of paragraph (1) of this subsection is-

(A) endangering the life or physical safety of an individual;

(B) flight from prosecution;

(C) destruction of or tampering with evidence;

(D) intimidation of potential witnesses; or

(E) otherwise seriously jeopardizing an investigation or unduly delaying a trial.

(3) The governmental entity shall maintain a true copy of certification under paragraph (1)(B).

(4) Extensions of the delay of notification provided in section 2703 of up to ninety days each may be granted by the court upon application, or by certification by a governmental entity, but only in accordance with subsection (b) of this section.

(5) Upon expiration of the period of delay of notification under paragraph (1) or (4) of this subsection, the governmental entity shall serve upon, or deliver by registered or first-class mail to, the customer or subscriber a copy of the process or request together with notice that-

(A) states with reasonable specificity the nature of the law enforcement inquiry; and

(B) informs such customer or subscriber--

(i) that information maintained for such customer or subscriber by the service provider named in such process or request was supplied to or requested by that governmental authority and the date on which the supplying or request took place;

(ii) that notification of such customer or subscriber was delayed;

(iii) what governmental entity or court made the certification or determination pursuant to which that delay was made; and

(iv) which provision of this chapter allowed such delay.

(6) As used in this subsection, the term "supervisory official" means the investigative agent in charge or assistant investigative agent in charge or an equivalent of an investigating agency's headquarters or regional office, or the chief prosecuting attorney or the first assistant prosecuting attorney or an equivalent of a prosecuting attorney's headquarters or regional office.

(b) Preclusion of notice to subject of governmental access. –

A governmental entity acting under section 2703, when it is not required to notify the subscriber or customer under section 2703(b)(1), or to the extent that it may delay such notice pursuant to subsection (a) of this section, may apply to a court for an order commanding a provider of electronic communications service or remote computing service to whom a warrant, subpoena, or court order is directed, for such period as the court deems appropriate, not to notify any other person of the existence of the warrant, subpoena, or court order. The court shall enter such an order if it determines that there is reason to believe that notification of the existence of the warrant, subpoena, or court order will result in–

(1) endangering the life or physical safety of an individual;
(2) flight from prosecution;
(3) destruction of or tampering with evidence;
(4) intimidation of potential witnesses; or
(5) otherwise seriously jeopardizing an investigation or unduly delaying a trial.

18 U.S.C. 2706. Cost reimbursement

(a) Payment. –Except as otherwise provided in subsection (c), a governmental entity obtaining the contents of communications, records, or other information under section 2702, 2703, or 2704 of this title shall pay to the person or entity assembling or providing such information a fee for reimbursement for such costs as are reasonably necessary and which have been directly incurred in searching for, assembling, reproducing, or otherwise providing such information. Such reimbursable costs shall include any costs due to necessary disruption of normal operations of any electronic communication service or remote computing service in which such information may be stored.

(b) Amount. –The amount of the fee provided by subsection (a) shall be as mutually agreed by the governmental entity and the person or entity providing the information, or, in the absence of agreement, shall be as determined by the court which issued the order for production of such information (or the court before which a criminal prosecution relating to such information would be brought, if no court order was issued for production of the information).

(c) Exception. –The requirement of subsection (a) of this section does not apply with respect to records or other information maintained by a communications common carrier that relate to telephone toll records and telephone listings obtained under section 2703 of this title. The court may, however, order a payment as described in subsection (a) if the court determines the information required is unusually voluminous in nature or otherwise caused an undue burden on the provider.

18 U.S.C. 2707. Civil action

(a) Cause of action. –Except as provided in section 2703(e), any provider of electronic communication service, subscriber, or other person aggrieved by any violation of this chapter in which the conduct constituting the violation is engaged in with a knowing or intentional state of mind may, in a civil action, recover from the person or entity other than the United States which engaged in that violation such relief as may be appropriate.

(b) Relief. –In a civil action under this section, appropriate relief includes-
(1) such preliminary and other equitable or declaratory relief as may be appropriate;
(2) damages under subsection (c); and

(3) a reasonable attorney's fee and other litigation costs reasonably incurred.

(c) Damages. – The court may assess as damages in a civil action under this section the sum of the actual damages suffered by the plaintiff and any profits made by the violator as a result of the violation, but in no case shall a person entitled to recover receive less than the sum of $1,000. If the violation is willful or intentional, the court may assess punitive damages. In the case of a successful action to enforce liability under this section, the court may assess the costs of the action, together with reasonable attorney fees determined by the court.

(d) Administrative Discipline. – If a court or appropriate department or agency determines that the United States or any of its departments or agencies has violated any provision of this chapter, and the court or appropriate department or agency finds that the circumstances surrounding the violation raise serious questions about whether or not an officer or employee of the United States acted willfully or intentionally with respect to the possible violation, the department or agency shall, upon receipt of a true and correct copy of the decision and findings of the court or appropriate department or agency promptly initiate a proceeding to determine whether disciplinary action against the officer or employee is warranted. If the head of the department or agency involved determines that disciplinary action is not warranted, he or she shall notify the Inspector General with jurisdiction over the department or agency concerned and shall provide the Inspector General with the reasons for such determination.

(e) Defense. –A good faith reliance on–
(1) a court warrant or order, a grand jury subpoena, a legislative authorization, or a statutory authorization (including a request of a governmental entity under section 2703(f) of this title);
(2) a request of an investigative or law enforcement officer under section 2518(7) of this title; or
(3) a good faith determination that section 2511(3) of this title permitted the conduct complained of; is a complete defense to any civil or criminal action brought under this chapter or any other law.

(f) Limitation. – A civil action under this section may not be commenced later than two years after the date upon which the claimant first discovered or had a reasonable opportunity to discover the violation.

(g) Improper Disclosure Is Violation. – Any willful disclosure of a "record", as that term is defined in section 552a(a) of title 5, United States Code, obtained by an investigative or law enforcement officer, or governmental entity, pursuant to section 2703 of this title, or from a device installed pursuant to section 3123 or 3125 of this title, that is not a disclosure made in the proper performance of the official duties of the officer or governmental entity making the disclosure, is a violation of this chapter. This provision shall not apply to information previously lawfully disclosed (prior to the commencement of any civil or administrative

proceeding under this chapter) to the public by a Federal, State, or local governmental entity or by the plaintiff in a civil action under this chapter.

18 U.S.C. 2708. Exclusivity of remedies

The remedies and sanctions described in this chapter are the only judicial remedies and sanctions for nonconstitutional violations of this chapter.

18 U.S.C. 2709. Counterintelligence access to telephone toll and transactional records

(a) Duty to provide–A wire or electronic communication service provider shall comply with a request for subscriber information and toll billing records information, or electronic communication transactional records in its custody or possession made by the Director of the Federal Bureau of Investigation under subsection (b) of this section.

(b) Required certification–The Director of the Federal Bureau of Investigation, or his designee in a position not lower than Deputy Assistant Director at Bureau headquarters or a Special Agent in Charge in a Bureau field office designated by the Director, may–

(1) request the name, address, length of service, and local and long distance toll billing records of a person or entity if the Director (or his designee) certifies in writing to the wire or electronic communication service provider to which the request is made that the name, address, length of service, and toll billing records sought are relevant to an authorized investigation to protect against international terrorism or clandestine intelligence activities, provided that such an investigation of a United States person is not conducted solely on the basis of activities protected by the first amendment to the Constitution of the United States; and

(2) request the name, address, and length of service of a person or entity if the Director (or his designee) certifies in writing to the wire or electronic communication service provider to which the request is made that the information sought is relevant to an authorized investigation to protect against international terrorism or clandestine intelligence activities, provided that such an investigation of a United States person is not conducted solely upon the basis of activities protected by the first amendment to the Constitution of the United States.

(c) Prohibition of certain disclosure–

(1) If the Director of the Federal Bureau of Investigation, or his designee in a position not lower than Deputy Assistant Director at Bureau headquarters or a Special Agent in Charge in a Bureau field office designated by the Director, certifies that otherwise there may result a danger to the national security of the United States, interference with a criminal, counter terrorism, or counterintelligence investigation, interference with diplomatic relations, or danger to the life or physical safety of any person, no wire or electronic communications service provider, or officer, employee, or agent thereof, shall

disclose to any person (other than those to whom such disclosure is necessary to comply with the request or an attorney to obtain legal advice or legal assistance with respect to the request) that the Federal Bureau of Investigation has sought or obtained access to information or records under this section.
(2) The request shall notify the person or entity to whom the request is directed of the nondisclosure requirement under paragraph (1).
(3) Any recipient disclosing to those persons necessary to comply with the request or to an attorney to obtain legal advice or legal assistance with respect to the request shall inform such person of any applicable nondisclosure requirement. Any person who receives a disclosure under this subsection shall be subject to the same prohibitions on disclosure under paragraph (1).
(4) At the request of the Director of the Federal Bureau of Investigation or the designee of the Director, any person making or intending to make a disclosure under this section shall identify to the Director or such designee the person to whom such disclosure will be made or to whom such disclosure was made prior to the request, except that nothing in this section shall require a person to inform the Director or such designee of the identity of an attorney to whom disclosure was made or will be made to obtain legal advice or legal assistance with respect to the request under subsection (a).

(d) Dissemination by bureau–The Federal Bureau of Investigation may disseminate information and records obtained under this section only as provided in guidelines approved by the Attorney General for foreign intelligence collection and foreign counterintelligence investigations conducted by the Federal Bureau of Investigation, and, with respect to dissemination to an agency of the United States, only if such information is clearly relevant to the authorized responsibilities of such agency.

(e) Requirement that certain congressional bodies be informed–On a semiannual basis the Director of the Federal Bureau of Investigation shall fully inform the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate, and the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate, concerning all requests made under subsection (b) of this section.

(f) Libraries–A library (as that term is defined in section 213(1) of the Library Services and Technology Act (20 U.S.C. 9122(1)), the services of which include access to the Internet, books, journals, magazines, newspapers, or other similar forms of communication in print or digitally by patrons for their use, review, examination, or circulation, is not a wire or electronic communication service provider for purposes of this section, unless the library is providing the services defined in section 2510(15) (“electronic communication service”) of this title.

18 U.S.C. 2711. Definitions for chapter

As used in this chapter–

- the terms defined in section 2510 of this title have, respectively, the definitions given such terms in that section;
- • the term "remote computing service" means the provision to the public of computer storage or processing services by means of an electronic communications system;
- the term "court of competent jurisdiction" has the meaning assigned by section 3127, and includes any Federal court within that definition, without geographic limitation.
- the term "governmental entity" means a department or agency of the United States or State or political subdivision thereof.

18 U.S.C. 2712. Civil Action against the United States

(a) In General.– Any person who is aggrieved by any willful violation of this chapter or of chapter 119 of this title or of sections 106(a), 305(a), or 405(a) of the Foreign Intelligence Surveillance Act (50 U.S.C. 1801 et seq.) may commence an action in United States District Court against the United States to recover money damages. In any such action, if a person who is aggrieved successfully establishes a violation of this chapter or of chapter 119 of this title or of the above special provisions of title 50, the Court may assess as damages–

(1) actual damages, but not less than $10,000, whichever amount is greater; and
(2) litigation costs, reasonably incurred.

(b) Procedures. –
(1) Any action against the United States under this section may be commenced only after a claim is presented to the appropriate department or agency under the procedures of the Federal Tort Claims Act, as set forth in title 28, United States Code.
(2) Any action against the United States under this section shall be forever barred unless it is presented in writing to the appropriate Federal agency within 2 years after such claim accrues or unless action is begun within 6 months after the date of mailing, by certified or registered mail, of notice of final denial of the claim by the agency to which it was presented. The claim shall accrue on the date upon which the claimant first has a reasonable opportunity to discover the violation.
(3) Any action under this section shall be tried in the court without a jury.
(4) Notwithstanding any other provision of law, the procedures set forth in section 106(f), 305(g), or 405(f) of the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801 et seq.) shall be the exclusive means by which materials governed by those sections may be reviewed.
(5) An amount equal to any award against the United States under this section shall be reimbursed by the department or agency concerned to the fund described in section 1304 of title 31, United States Code, out of any appropriation, fund, or other account (excluding any part of such appropriation, fund, or account that is

available for the enforcement of any Federal law) that is available for the operating expenses of the department or agency concerned.

(c) Administrative Discipline. –
If a court or appropriate department or agency determines that the United States or any of the departments or agencies has violated any provision of this chapter, and the court or appropriate department or agency finds that the circumstances surrounding the violation raise serious questions about whether or not an officer or employee of the United States acted willfully or intentionally with respect to the possible violation, the department or agency shall, upon receipt of a true and correct copy of the decision and findings of the court or appropriate department or agency promptly initiate a proceeding to determine whether disciplinary action against the officer or employee is warranted. If the head of the department or agency involved determines that disciplinary action is not warranted, he or she shall notify the Inspector General with jurisdiction over the department or agency concerned and shall provide the Inspector General with the reasons for such determination.

(d) Exclusive Remedy. –
Any action against the United States under this subsection shall be the exclusive remedy against the United States for any claims within the purview of this section.

(e) Stay of Proceedings. –
(1) Upon the motion of the united States, the curt shall stay any action commenced under this section f the court determines that civil discovery will adversely affect the ability of the Government to conduct a related investigation or the prosecution of a related criminal case. Such a stay shall toll the limitations periods of paragraph (2) of subsection (b).
(2) In this subsection, the terms "related criminal case" and "related investigation" means an actual prosecution or investigation in progress at the time at which the request for the stay or any subsequent motion to lift the stay is made. In determining whether any investigation or a criminal case is related to an action commenced under this section, the court shall consider the degree of similarity between the parties, witnesses, facts, and circumstances involved in the 2 proceedings, without requiring that nay one or more factors be identical.
(3) In requesting a stay under paragraph (1), the Government may, in appropriate cases submit evidence ex parte in order to avoid disclosing any matter that may adversely affect a related investigation or a related criminal case. If the Government makes such an ex parte submission, the plaintiff shall be given an opportunity to make a submission to the court, not ex parte, and the court may, in its discretion, request further information from either party.

18 U.S.C. 3121. General prohibition on pen register and tape and trace device use; exception

(a) In general–Except as provided in this section, no person may install or use a pen register or a trap and trace device without first obtaining a court order under section 3123 of this title or under the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801 et seq.).

(b) Exception–The prohibition of subsection (a) does not apply with respect to the use of a pen register or a trap and trace device by a provider of electronic or wire communication service–
(1) relating to the operation, maintenance, and testing of a wire or electronic communication service or to the protection of the rights or property of such provider, or to the protection of users of that service from abuse of service or unlawful use of service; or
(2) to record the fact that a wire or electronic communication was initiated or completed in order to protect such provider, another provider furnishing service toward the completion of the wire communication, or a user of that service, from fraudulent, unlawful or abusive use of service; or
(3) where the consent of the user of that service has been obtained.

(c) Limitation–A government agency authorized to install and use a pen register or trap and trace device under this chapter or under State law shall use technology reasonably available to it that restricts the recording or decoding of electronic or other impulses to the dialing, routing, addressing, and signaling information utilized in identifying the origination or destination of wire or electronic communications.

(d) Penalty–Whoever knowingly violates subsection (a) shall be fined under this title or imprisoned not more than one year, or both.

18 U.S.C. 3122. Application for an order for a pen register or a trap and trace device

(a) Application.
(1) An attorney for the Government may make application for an order or an extension of an order under section 3123 of this title authorizing or approving the installation and use of a pen register or a trap and trace device under this chapter, in writing under oath or equivalent affirmation, to a court of competent jurisdiction.
(2) Unless prohibited by State law, a State investigative or law enforcement officer may make application for an order or an extension of an order under section 3123 of this title authorizing or approving the installation and use of a pen register or a trap and trace device under this chapter, in writing under oath or equivalent affirmation, to a court of competent jurisdiction of such State.

(b) Contents of application–An application under subsection (a) of this section shall include-

(1) the identity of the attorney for the Government or the State law enforcement or investigative officer making the application and the identity of the law enforcement agency conducting the investigation; and
(2) a certification by the applicant that the information likely to be obtained is relevant to an ongoing criminal investigation being conducted by that agency.

18 U.S.C. 3123. Issuance of an order for a pen register or a trap and trace device

(a) In general.
(1) Upon an application made under section 3122(a)(1) of this title, the court shall enter an ex parte order authorizing the installation and use of a pen register or a trap and trace device if the court finds, based on facts contained in the application, that the information likely to be obtained by such installation and use is relevant to an ongoing criminal investigation. Such order shall, upon service of such order, apply to any entity providing wire or electronic communication service in the United States whose assistance may facilitate the execution of the order.
(2) Upon an application made under section 3122(a)(2) of this title, the court shall enter an ex parte order authorizing the installation and use of a pen register or a trap and trace device within the jurisdiction of the court if the court finds, based on facts contained in the application, that the information likely to be obtained by such installation and use is relevant to an ongoing criminal investigation.
(3)
(A) Where the law enforcement agency implementing an ex part order under this subsection seeks to do so by installing and using its own pen register or trap and trace device on a packet-switched data network of a provider of electronic communication service to the public the agency shall ensure that a record will be maintained which will identify –

- any officer or officers who installed the device and any officer or officers who accessed the device to obtain information from the network;
- the date and time the device was installed, the date and time the device was uninstalled, and the date, time, and duration of each time the device is accessed to obtain information;

(iii) the configuration of the device at the time of its installation and any subsequent modification thereof; and
(iv) any information which has been collected by the device. To the extent that the pen register or trap and trace device can be set automatically to record this information electronically, the record shall be maintained electronically throughout the installation and use of the such device.
(B) The record maintained under subparagraph (A) shall be provided ex parte and under seal to the court which entered the ex parte order authorizing the installation and use of the device within 30 days after termination of the order (including any extensions thereof).

(b) Contents of order–An order issued under this section–
(1) shall specify–
(A) the identity, if known, of the person to whom is leased or in whose name is listed the telephone line or other facility to which the pen register or trap and trace device is to be attached or applied;
(B) the identity, if known, of the person who is the subject of the criminal investigation;
(C) the attributes of the communications to which the order applies, including the number or other identifier and, if known, the location of the telephone line or other facility to which the pen register or trap and trace device is to be attached or applied, and, in the case of an order authorizing installation and use of a trap and trace device under subsection (a)(2), the geographic limits of the order; and
(D) a statement of the offense to which the information likely to be obtained by the pen register or trap and trace device relates; and
(2) shall direct, upon the request of the applicant, the furnishing of information, facilities, and technical assistance necessary to accomplish the installation of the pen register or trap and trace device under section 3124 of this title.

(c) Time period and extensions–
(1) An order issued under this section shall authorize the installation and use of a pen register or a trap and trace device for a period not to exceed sixty days.
(2) Extensions of such an order may be granted, but only upon an application for an order under section 3122 of this title and upon the judicial finding required by subsection (a) of this section. The period of extension shall be for a period not to exceed sixty days.

(d) Nondisclosure of existence of pen register or a trap and trace device
An order authorizing or approving the installation and use of a pen register or a trap and trace device shall direct that-
(1) the order be sealed until otherwise ordered by the court; and
(2) the person owning or leasing the line or other facility to which the pen register or a trap and trace device is attached, or applied, or who is obligated by the order to provide assistance to the applicant, not disclose the existence of the pen register or trap and trace device or the existence of the investigation to the listed subscriber, or to any other person, unless or until otherwise ordered by the court.

18 U.S.C. 3124. Assistance in installation and use of a pen register or a trap and trace device

(a) Pen registers–Upon the request of an attorney for the Government or an officer of a law enforcement agency authorized to install and use a pen register under this chapter, a provider of wire or electronic communication service, landlord, custodian, or other person shall furnish such investigative or law enforcement officer forthwith all information, facilities, and technical assistance necessary to accomplish the installation of the pen register unobtrusively and with a minimum of interference with the services that the person so ordered by

the court accords the party with respect to whom the installation and use is to take place, if such assistance is directed by a court order as provided in section 3123(b)(2) of this title.

(b) Trap and trace device–Upon the request of an attorney for the Government or an officer of a law enforcement agency authorized to receive the results of a trap and trace device under this chapter, a provider of a wire or electronic communication service, landlord, custodian, or other person shall install such device forthwith on the appropriate line or other facility and shall furnish such investigative or law enforcement officer all additional information, facilities and technical assistance including installation and operation of the device unobtrusively and with a minimum of interference with the services that the person so ordered by the court accords the party with respect to whom the installation and use is to take place, if such installation and assistance is directed by a court order as provided in section 3123(b)(2) of this title. Unless otherwise ordered by the court, the results of the trap and trace device shall be furnished, pursuant to section 3123(b) or section 3125 of this title, to the officer of a law enforcement agency, designated in the court order, at reasonable intervals during regular business hours for the duration of the order.

(c) Compensation–A provider of a wire or electronic communication service, landlord, custodian, or other person who furnishes facilities or technical assistance pursuant to this section shall be reasonably compensated for such reasonable expenses incurred in providing such facilities and assistance.

(d) No cause of action against a provider disclosing information under this chapter–No cause of action shall lie in any court against any provider of a wire or electronic communication service, its officers, employees, agents, or other specified persons for providing information, facilities, or assistance in accordance with a court order under this chapter or request pursuant to section 3125 of this title.

(e) Defense–A good faith reliance on a court order under this chapter, a request pursuant to section 3125 of this title, a legislative authorization, or a statutory authorization is a complete defense against any civil or criminal action brought under this chapter or any other law.

(f) Communications assistance enforcement orders–Pursuant to section 2522, an order may be issued to enforce the assistance capability and capacity requirements under the Communications Assistance for Law Enforcement Act.

18 U.S.C. 3125. Emergency pen register and trap and trace device installation

(a) Notwithstanding any other provision of this chapter, any investigative or law enforcement officer, specially designated by the Attorney General, the Deputy Attorney General, the Associate Attorney General, any Assistant Attorney

General, any acting Assistant Attorney General, or any Deputy Assistant Attorney General, or by the principal prosecuting attorney of any State or subdivision thereof acting pursuant to a statute of that State, who reasonably determines that-

(1) an emergency situation exists that involves–

(A) immediate danger of death or serious bodily injury to any person; or

(B) conspiratorial activities characteristic of organized crime;

(C) an immediate threat to a national security interest; or

(D) an ongoing attack on a protected computer (as defined in section 1030) that constitutes a crime punishable by a term of imprisonment greater than one year; that requires the installation and use of a pen register or a trap and trace device before an order authorizing such installation and use can, with due diligence, be obtained, and

(2) there are grounds upon which an order could be entered under this chapter to authorize such installation and use; may have installed and use a pen register or trap and trace device if, within forty-eight hours after the installation has occurred, or begins to occur, an order approving the installation or use is issued in accordance with section 3123 of this title.

(b) In the absence of an authorizing order, such use shall immediately terminate when the information sought is obtained, when the application for the order is denied or when forty-eight hours have lapsed since the installation of the pen register or trap and trace device, whichever is earlier.

(c) The knowing installation or use by any investigative or law enforcement officer of a pen register or trap and trace device pursuant to subsection (a) without application for the authorizing order within forty-eight hours of the installation shall constitute a violation of this chapter.

(d) A provider of a wire or electronic service, landlord, custodian, or other person who furnished facilities or technical assistance pursuant to this section shall be reasonably compensated for such reasonable expenses incurred in providing such facilities and assistance.

18 U.S.C. 3126. Reports concerning pen registers and trap and trace devices

The Attorney General shall annually report to Congress on the number of pen register orders and orders for trap and trace devices applied for by law enforcement agencies of the Department of Justice, which report shall include information concerning–

- the period of interceptions authorized by the order, and the number and duration of any extensions of the order;
- the offense specified in the order or application, or extension of an order;
- the number of investigations involved;
- the number and nature of the facilities affected; and

- the identity, including district, of the applying investigative or law enforcement agency making the application and the person authorizing the order.

18 U.S.C. 3127. Definitions for chapter

As used in this chapter–

- the terms “wire communication”, “electronic communication”, “electronic communication service” and “contents” have the meanings set forth for such terms in section 2510 of this title;
- the term “court of competent jurisdiction” means–
- any district court of the United States (including a magistrate of such a court) or a United States Court of Appeals having jurisdiction over the offense being investigated; or
- a court of general criminal jurisdiction of a State authorized by the law of that State to enter orders authorizing the use of a pen register or a trap and trace device;
- the term “pen register” means a device or process which records or decodes or other dialing, routing, addressing, and signaling information reasonably likely to identify the source of a wire or electronic communication, provided, however, that such information shall not include the contents of any communication, but such term does not include any device or process used by a provider or customer of a wire or electronic communication service for billing, or recording as an incident to billing, for communications services provided by such provider or any device or process used by a provider or customer of a wire communication service for cost accounting or other like purposes in the ordinary course of its business;
- the term “trap and trace device” means a device or process which captures the incoming electronic or other impulses which identify the originating number or other dialing, routing, addressing, and signaling information reasonably likely to identify the source of a wire or electronic communication, provided, however, that such information shall not include the contents of any communication;
- the term “attorney for the Government” has the meaning given such term for the purposes of the Federal Rules of Criminal Procedure; and
- the term “State” means a State, the District of Columbia, Puerto Rico, and any other possession or territory of the United States.

Foreign Intelligence Surveillance Act (FISA) (OMITTED)

[**INTELLIGENCELAW.COM EDITOR'S NOTE:** FISA is discussed thoroughly in the materials for Title 50 of the U.S. Code so it has been excluded from Title 18 materials]

18 U.S.C. CHAPTER 121: STORED WIRE AND ELECTRONIC COMMUNICATIONS AND TRANSACTIONAL RECORDS ACCESS (18 U.S.C. §§ 2701-2712)

National Security Letters

National Security Letters in Foreign Intelligence Investigations: A Glimpse of the Legal Background and Recent Amendments, RS22406 (September 8, 2009)

Summary

Five statutory provisions vest government agencies responsible for certain foreign intelligence investigations (principally the Federal Bureau of Investigation [FBI]) with authority to issue written commands comparable to administrative subpoenas. These National Security Letters (NSLs) seek customer and consumer transaction information in national security investigations from communications providers, financial institutions, and credit agencies.

The USA PATRIOT Act expanded the circumstances under which an NSL could be used. Subsequent press accounts suggested that their use had become widespread. Two lower federal courts found the uncertainties, practices, and policies associated with the use of NSL authority contrary to the First Amendment right of freedom of speech. The USA PATRIOT Improvement and Reauthorization Act, P.L. 109-177, and P.L. 109-178, amend the NSL statutes and related law to address some of the concerns raised by critics and the courts. Following amendment, an appellate court dismissed one of the earlier cases as moot and remanded the second for reconsideration in light of the amendments. On remand, the lower federal court again held the NSLs constitutionally suspect. The Court of Appeals, however, ruled that the amended statutes could withstand constitutional scrutiny, if the government confines itself to a procedure which requires (1) notice to the recipient of its option to object to a secrecy requirement; (2) upon recipient objection, prompt judicial review at the government's petition and burden; and (3) meaningful judicial review without conclusive weight afforded a government certification of risk. Using this procedure, the district upheld continuation of the Doe nondisclosure requirement following an ex parte, in camera hearing and granted the plaintiff's motion for an unclassified, redacted summary of the government declaration on which the court's decision was based.

A report of the Department of Justice's Inspector General found that in its early use of its expanded USA PATRIOT Act authority the FBI had "used NSLs in violation of applicable NSL statutes, Attorney General Guidelines, and internal FBI policies," but that no criminal laws had been broken. A year later, a second IG report confirmed the findings of the first, and noted the corrective measures taken in response.

This is an abridged version of CRS Report RL33320, National Security Letters in Foreign Intelligence Investigations: Legal Background and Recent Amendments, without the footnotes, appendices, and most of the citations to authority found in the longer report.

Background

The ancestor of the first NSL letter provision is an exception to privacy protections afforded by the Right to Financial Privacy Act (RFPA). Its history is not particularly instructive and consists primarily of a determination that the exception in its original form should not be too broadly construed. But the exception was just that, an exception. It was neither an affirmative grant of authority to request information nor a command to financial institutions to provide information when asked. It removed the restrictions on the release of customer information imposed on financial institutions by the RFPA, but it left them free to decline to comply when asked to do so.

> *[I]n certain significant instances, financial institutions [had] declined to grant the FBI access to financial records in response to*

> *requests under Section 1114(a). The FBI informed the Committee that the problem occurs particularly in States which have State constitutional privacy protection provisions or State banking privacy laws. In those States, financial institutions decline to grant the FBI access because State law prohibits them from granting such access and the RFPA, since it permits but does not mandate such access, does not override State law. In such a situation, the concerned financial institutions which might otherwise desire to grant the FBI access to a customer's record will not do so, because State law does not allow such cooperation, and cooperation might expose them to liability to the customer whose records the FBI sought access. (H.Rept. 99-690, at 15-6 [1986].)*

Congress responded with passage of the first NSL statute as an amendment to the RFPA, affirmatively giving the FBI access to financial institution records in certain foreign intelligence cases. At the same time, in the Electronic Communications Privacy Act, it afforded the FBI comparable access to telephone company and other communications service provider customer information. Together, the two NSL provisions afforded the FBI access to communications and financial business records under limited circumstances—customer and customer transaction information held by telephone carriers and banks pertaining to a foreign power or its agents relevant to a foreign counterintelligence investigation. Both the communications provider section and the RFPA section contained nondisclosure provisions and limitations on further dissemination, except pursuant to guidelines promulgated by the Attorney General. Neither had an express enforcement mechanism nor identified penalties for failure to comply with either the NSL or the nondisclosure instruction.

In the mid-1990s, Congress added two more NSL provisions—one permits NSL use in connection with the investigation of government employee leaks of classified information under the National Security Act; the other grants the FBI access to credit agency records pursuant to the Fair Credit Reporting Act, under much the same conditions as apply to the records of financial institutions. The FBI asked for the Fair Credit Reporting Act amendment as a threshold mechanism to enable it to make more effective use of its bank record access authority:

> *FBI's right of access under the Right of Financial Privacy Act cannot be effectively used, however, until theFBI discovers which financial institutions arebeing utilized by the subject of a counterintelligence investigation. Consumer reports maintained by credit bureaus are a ready source of such information, but, although such report[s] are readily available to the private sector, they are not available to FBI counterintelligence investigators....*
>
> *FBI has made a specific showing ... that the effort to identify financial institutions in order to make use of FBI authority under*

> *the Right to Financial Privacy Act can not only be time-consuming and resource-intensive, but can also require the use of investigative techniques— such as physical and electronic surveillance, review of mail covers, and canvassing of all banks in an area—that would appear to be more intrusive than the review of credit reports. (H.Rept. 104-427, at 36 [1996].)*

The National Security Act NSL provision authorizes access to credit and financial institution records of federal employees with security clearances who were required to give their consent as a condition for clearance. Passed in the wake of the Ames espionage case, it is limited to investigations of classified information leaks.

Both the Fair Credit Reporting Act section and the National Security Act section contain dissemination restrictions, as well as safe harbor (immunity) and nondisclosure provisions. Neither has an explicit penalty for improper disclosure of the request, but the Fair Credit Reporting Act section expressly authorizes judicial enforcement.

The USA PATRIOT Act amended three of the four existing NSL statutes and added a fifth. In each of the three NSL statutes available exclusively to the FBI—the Electronic Communications Privacy Act section, the Right to Financial Privacy Act section, and the Fair Credit Reporting Act section—section 505 of the USA PATRIOT Act:

- expanded FBI issuing authority beyond FBI headquarter officials to include the heads of the FBI field offices (i.e., Special Agents in Charge [SACs]);
- eliminated the requirement that the record information sought pertain to a foreign power or the agent of a foreign power;
- required instead that the NSL request be relevant to an investigation to protect against international terrorism or foreign spying; and
- added the caveat that no such investigation of an American can be predicated exclusively on First Amendment-protected activities.

The amendments allowed NSL authority to be employed more quickly (without the delays associated with prior approval from FBI headquarters) and more widely (without requiring that the information pertain to a foreign power or its agents).

Subsection 358(g) of the USA PATRIOT Act amended the Fair Credit Reporting Act to add a fifth and final NSL section, and the provision had one particularly noteworthy feature: it was available not merely to the FBI but to any government agency investigating or analyzing international terrorism:

> *Notwithstanding section 1681b of this title or any other provision of this subchapter, a consumer reporting agency shall furnish a*

> *consumer report of a consumer and all other information in a consumer's file to a government agency authorized to conduct investigations of, or intelligence or counterintelligence activities or analysis related to, international terrorism when presented with a written certification by such government agency that such information is necessary for the agency's conduct or such investigation, activity or analysis.*

Although the subsection's legislative history treats it as a matter of first impression, Congress's obvious intent was to provide other agencies with the national security letter authority comparable to that enjoyed by the FBI under the Fair Credit Reporting Act. The new section had a nondisclosure and a safe harbor subsection, but no express means of judicial enforcement or penalties for improper disclosure of a request under the section.

NSL Amendments in the 109th Congress

Both USA PATRIOT Act reauthorization statutes—P.L. 109-177(H.R. 3199) and P.L. 109-178 (S. 2271)—amended the NSL statutes. They provided for judicial enforcement of the letter requests and for judicial review of both the requests and accompanying nondisclosure requirements. They established specific penalties for failure to comply or to observe the nondisclosure requirements. They made it clear that the nondisclosure requirements do not preclude a recipient from consulting an attorney. They provided a mechanism to lift the nondisclosure requirement. Finally, they expanded congressional oversight and called for an Inspector General's audit of use of the authority.

Inspector General's Reports

The USA PATRIOT Improvement and Reauthorization Act instructed the Department of Justice's Inspector General to review and report on the FBI's use of NSLs. In early March 2007, the Inspector General released the first of two required reports that covered calendar years 2003 through 2005. The second, covering the time period through the end of calendar year 2006, was released in March 2008.

The initial report noted that FBI use of NSLs had increased dramatically, expanding from 8,500 requests in 2000 to 47,000 in 2005. Seventy-four percent were issued in conjunction with counterterrorism investigations, most of the rest in connection with counterintelligence investigations, and less than 1 percent as part of a foreign computer intrusion investigation. During the three years under review, the percentage of NSLs used to investigate Americans ("U.S. persons") increased from 39% in 2003 to 53% in 2005. A substantial majority of the requests involve records relating to telephone or e-mail communications. The report is somewhat critical of the FBI's initial performance:

> *[W]e found that the FBI used NSLs in violation of applicable NSL statutes, Attorney General Guidelines, and internal FBI policies. In addition, we found that the FBI circumvented the requirements of the ECPA NSL statute when it issued at least 739 "exigent letters" to obtain telephone toll billing records and subscriber information from three telephone companies without first issuing NSLs.*

The second IG Report reviewed the FBI's use of national security letter authority during calendar year 2006 and the corrective measures taken following the issuance of the IG's first report. The second Report concluded that the FBI's use of national security letters in 2006 continued the upward trend previously identified; the percentage of NSL requests generated from investigations of U.S. persons increased from 39% of all NSL requests in 2003 to 57% in 2006; the FBI and DoJ are committed to correcting the problems identified in IG Report I and have made significant progress; and it is too early to say whether the corrective measures will resolve the problems previously identified.

NSLs in Court

Prior to amendment, two lower federal court cases had indicated that the NSLs and practices surrounding their use were contrary to the requirements of the First Amendment. On appeal, one was dismissed as moot and the other sent back for reconsideration in light of the amendments. Following remand and amendment of the NSL statutes, the District Court for the Southern District of New York again concluded that the amended NSL secrecy requirements violated both First Amendment free speech.

The Court of Appeals was similarly disposed, but concluded that the government could invoke the secrecy and judicial review authority of the 18 U.S.C. 2709 and 18 U.S.C. 3511 in a limited, but constitutionally permissible manner. It stated that:

> *If the Government uses the suggested reciprocal notice procedure as a means of initiating judicial review, there appears to be no impediment to the Government's including notice of a recipient's opportunity to contest the nondisclosure requirement in an NSL. If such notice is given, time limits on the nondisclosure requirement pending judicial review, as reflected in Freedman, would have to be applied to make the review procedure constitutional. We would deem it to be within our judicial authority to conform subsection 2709(c) to First Amendment requirements, by limiting the duration of the nondisclosure requirement, absent a ruling favorable to the Government upon judicial review, to the 10-day period in which the NSL recipient decides whether to contest the nondisclosure requirement, the 30-day period in which the Government considers whether to seek judicial review, and a further period of 60 days in which a court must adjudicate the*

> *merits, unless special circumstances warrant additional time. If the NSL recipient declines timely to precipitate Government-initiated judicial review, the nondisclosure requirement would continue, subject to the recipient's existing opportunities for annual challenges to the nondisclosure requirement provided by subsection 3511(b). If such an annual challenge is made, the standards and burden of proof that we have specified for an initial challenge would apply, although the Government would not be obliged to initiate judicial review.*

Given the possibility of constitutional application, the court saw no reason to invalidate sections 2709(c) and 3511(b) in toto. The exclusive presumptions of section 3511 cannot survive, the court declared, but the First Amendment finds no offense in the remainder of the two sections except, the court observed, "to the extent that they fail to provide for Government-initiated judicial review. The Government can respond to this partial invalidation ruling by using the suggested reciprocal notice procedure."

On remand under the procedure suggested by the Court of Appeals, the government submitted the declaration of the senior FBI official concerning the continued need for secrecy concerning the NSL. Following an ex parte, in camera hearing, the district court concluded the government had met its burden, but granted the plaintiff's motion for a unclassified, redacted summary of the FBI declaration.

Summary

Five federal statutes authorize intelligence officials to request certain business record information in connection with national security investigations. The authority to issue these national security letters (NSLs) is comparable to the authority to issue administrative subpoenas. The USA PATRIOT Act expanded the authority under four of the NSL statutes and created the fifth. Thereafter, the authority has been reported to have been widely used. Prospects of its continued use dimmed, however, after two lower federal courts held the lack of judicial review and the absolute confidentiality requirements in one of the statutes rendered it constitutionally suspect.

A report by the Department of Justice's Inspector General (IG) found that in its pre-amendment use of expanded USA PATRIOT Act authority the FBI had "used NSLs in violation of applicable NSL statutes, Attorney General Guidelines, and internal FBI policies," but that no criminal laws had been broken. A year later, a second IG report confirmed the findings of the first, and noted the corrective measures taken in response.

The USA PATRIOT Improvement and Reauthorization Act (H.R. 3199), P.L. 109-177, and its companion P.L. 109-178, amended the five NSL sections to expressly provide for judicial review of both the NSLs and the confidentiality requirements that attend them. The sections have also been made explicitly judicially enforceable and sanctions recognized for failure to comply with an NSL request or to breach NSL confidentiality requirements with the intent to obstruct justice. The use of the authority has been made subject to greater congressional

oversight. Following amendment, an appellate court dismissed one of the earlier cases as moot and remanded the second for reconsideration in light of the amendments. On remand, the lower court found the amended procedure contrary to the demands of the First Amendment. The Court of Appeals, however, ruled that the amended statutes could withstand constitutional scrutiny, if the government confined itself to a procedure which requires (1) notice to the recipient of its option to object to a secrecy requirement; (2) upon recipient objection, prompt judicial review at the government's petition and burden; and (3) meaningful judicial review without conclusive weight afforded a government certification of risk. Using this procedure, the district court upheld continuation of the Doe nondisclosure requirement following an ex parte, in camera hearing and granted the plaintiff's motion for an unclassified, redacted summary of the government declaration on which the court's decision was based.

The text of the five provisions—section 1114(a)(5) of the Right to Financial Privacy Act (12 U.S.C. 3414(a)(5)); sections 626 and 627 of the Fair Credit Reporting Act (15 U.S.C. 1681u, 1681v); section 2709 of title 18 of the United States Code; and section 802 of the National Security Act (50 U.S.C. 436)—in their amended form have been appended. This report is available abridged—without footnotes, appendices, and most of the citations to authority—as CRS Report RS22406, National Security Letters in Foreign Intelligence Investigations: A Glimpse of the Legal Background and Recent Amendments, by Charles Doyle.

Introduction

Five statutory provisions vest government agencies responsible for certain foreign intelligence investigations (principally the Federal Bureau of Investigation (FBI)) with authority to issue written commands comparable to administrative subpoenas.[2658] A National Security Letter (NSL) seeks customer and consumer transaction information in national security investigations from communications providers, financial institutions and credit agencies. Section 505 of the USA PATRIOT Act expanded the circumstances under which an NSL could be used.[2659] Subsequent press accounts suggested that their use had become wide-spread.[2660] Two lower federal courts, however, found the uncertainties,

Federal administrative subpoena authority is discussed in U.S. Department of Justice, Office of Legal Policy, Report to Congress on the Use of Administrative Subpoena Authorities by Executive Branch Agencies and Entities [2002], available on March 6, 2006 at http://www.usdoj.gov/olp/intro.pdf; see also CRS Report RL33321, Administrative Subpoenas in Criminal Investigations: A Brief Legal Analysis, abridged as CRS Report RS22407, Administrative Subpoenas in Criminal Investigations: A Sketch, both by Charles Doyle.

[2659] P.L. 1-7-56, 115 Stat. 365 (2001).

[2660] From calendar year 2003 through 2005, the FBI issued approximately 44,000 NSLs containing 143,074 requests. In one investigation, it issued 9 NSLs requesting information

practices and policies associated with the use of NSL authority contrary to the First Amendment right of freedom of speech, and thus brought into question the extent to which NSL authority could be used in the future.[2661] The USA PATRIOT Improvement and Reauthorization Act,[2662] and P.L. 109-178 (S. 2271) amended the NSL statutes and related law to address some of the concerns raised by critics and the courts.[2663] As a consequence, the Second Circuit dismissed one of the lower court cases as moot and remanded the other for reconsideration in light of the amendments.[2664] On reconsideration, the district court opinion continued to be troubled by the First Amendment implications of the nondisclosure features of 18 U.S.C. 2709, even as amended.[2665] The appellate court was comparable concerned, but concluded that the government might invoke the authority of 18 U.S.C. 2709 and 18 U.S.C. 3511 in a limited but constitutionally acceptable manner.[2666] On remand under the procedure envisioned by the Second Circuit panel, the district court found a continuing need to maintain the original secrecy order, but ordered the government to provide the plaintiffs with an unclassified, redacted summary of the declaration upon which the court's decision was based.[2667]

[2667] *Doe v. Holder*, _____ F.Supp.2d _____ (2009 WL 2432320) (S.D.N.Y. Aug. 5, 2009).

Background

The ancestor of the first NSL letter provision is a statutory exception to privacy protections afforded by the Right to Financial Privacy Act (RFPA).[2668] Its history is not particularly instructive and consists primarily of a determination that the exception in its original form should not be too broadly construed.[2669] But the exception was just that, an exception. It was neither an affirmative grant of authority to request information nor a command to financial institutions to provided information when asked. It removed the restrictions on the release of customer information imposed on financial institutions by the Right to Financial Privacy Act, but it left them free to decline to comply when asked to do so.

> *[I]n certain significant instances, financial institutions [had] declined to grant the FBI access to financial records in response to requests under Section 1114(a). The FBI informed the Committee that the problem occurs particularly in States which have State constitutional privacy protection provisions or State banking privacy laws. In those States, financial institutions decline to grant the FBI access because State law prohibits them from granting such access and the RFPA, since it permits but does not mandate such access, does not override State law. In such a situation, the concerned financial institutions which might otherwise desire to grant the FBI access to a customer's record will not do so, because State law does not allow such cooperation, and cooperation might expose them to liability to the customer whose records the FBI sought access. H.Rept. 99-690, at 15-6 (1986).*

Congress responded with passage of the first NSL statute as an amendment to the Right to Financial Privacy Act, affirmatively giving the FBI access to financial institution records in certain foreign intelligence cases.[2670] At the same time in

---

[2668] Section 1114, P.L. 95-630, 92 Stat. 3706 (1978); now codified at 12 U.S.C. 3414(a)(1) (A), (B): "Nothing in this chapter (except sections 3415, 3417, 3418, and 3421 of this title) shall apply to the production and disclosure of financial records pursuant to requests from – (A) a Government authority authorized to conduct foreign counter- or foreign positive- intelligence activities for purposes of conducting such activities; [or] (B) the Secret Service for the purpose of conducting its protective functions (18 U.S.C. 3056; 3 U.S.C. 202, P.L.90-331, as amended)."

[2669] "Section 1114 provides for special procedures in the case of foreign intelligence ... though the committee believes that some privacy protections may well be necessary for financial records sought during a foreign intelligence investigation, there are special problems in this area which make consideration of such protections in other congressional forums more appropriate. Nevertheless, the committee intends that this exemption be used only for legitimate foreign intelligence investigations: investigations proceeding only under the rubric of "national security" do not qualify. Rather this exception is available only to those U.S. Government officials specifically authorized to investigate the intelligence operations of foreign governments," H.Rept. 95-1383, at 55 (1978).

[2670] P.L. 99-569, §404, 100 Stat. 3197 (1986); 12 U.S.C. 3414(a)(5)(A)(1988 ed.).

the Electronic Communications Privacy Act, it afforded the FBI comparable access to the telephone company and other communications service provider customer information.[2671] Together the two NSL provisions afforded the FBI access to communications and financial business records under limited circumstances—customer and customer transaction information held by telephone carriers and banks pertaining to a foreign power or its agents relevant to a foreign counter-intelligence investigation.[2672]

Both the communications provider section and the Right to Financial Privacy Act section contained nondisclosure provisions[2673] and limitations on further dissemination except pursuant of guidelines promulgated by the Attorney General.[2674] Neither had an express enforcement mechanism nor identified penalties for failure to comply with either the NSL or the nondisclosure instruction.

In the mid-1990s, Congress added two more NSL provisions—one permits NSL use in connection with the investigation of government employee leaks of classified information under the National Security Act;[2675] and the other grants the FBI access to credit agency records pursuant to the Fair Credit Reporting Act, under much the same conditions as apply to the records of financial institutions.[2676] The FBI asked for the Fair Credit Reporting Act amendment as a threshold mechanism to enable it to make more effective use of its bank record access authority:

> *FBI's right of access under the Right of Financial Privacy Act cannot be effectively used, however, until the FBI discovers which financial institutions are being utilized by the subject of a counterintelligence investigation. Consumer reports maintained by credit bureaus are a ready source of such information, but,*

[2671] 18 U.S.C. 2709 (1988 ed.); see also, S.Rept. 99-541, at 43 (1986)("This provision is substantially the same as language recently reported by the Intelligence Committee as section 503 of the Intelligence Authorization Act for Fiscal Year 1987, [P.L. 99-569]").

[2672] 18 U.S.C. 2709 (1988 ed.); 12 U.S.C. 3414(a)(5)(A)(1988 ed.).

[2673] 18 U.S.C. 2709(c)("No wire or electronic communication service provider, or officer, employee, or agent thereof, shall disclose to any person that the Federal Bureau of Investigation has sought or obtained access to information or records under this section"); see also, 12 U.S.C. 3414(a)(5)(D). Note that unlike section 3486, the prohibition is neither temporary nor judicially supervised.

[2674] 18 U.S.C. 2709(d)(1988 ed.); 12 U.S.C. 3414(a)(5)(B)(1988 ed.).

[2676] 15 U.S.C. 1681u.

> *although such report[s] are readily available to the private sector, they are not available to FBI counterintelligence investigators....*
>
> *FBI has made a specific showing ... that the effort to identify financial institutions in order to make use of FBI authority under the Right to Financial Privacy Act can not only be time-consuming and resource-intensive, but can also require the use of investigative techniques— such as physical and electronic surveillance, review of mail covers, and canvassing of all banks in an area—that would appear to be more intrusive than the review of credit reports. H.Rept. 104-427, at 36 (1996).*[2677]

The National Security Act NSL provision authorized access to credit and financial institution records of federal employees with security clearances who were required to give their consent as a condition for clearance.[2678] Passed in the wake of the Ames espionage case, it is limited to investigations of classified information leaks. As noted at the time, "The Committee believes section 801 will serve as a deterrent to espionage for financial gain without burdening investigative agencies with unproductive recordkeeping or subjecting employees to new reporting requirements.... The Committee recognizes that consumer credit records have been notoriously inaccurate, and expects that information obtained pursuant to this section alone will not be the basis of an action or decision adverse to the interest of the employee involved."[2679]

Both the Fair Credit Reporting Act section and the National Security Act section contain dissemination restrictions;[2680] as well as safe harbor (immunity),[2681] and nondisclosure provisions.[2682] Neither has an explicit penalty for improper disclosure of the request, but the Fair Credit Reporting Act section expressly authorizes judicial enforcement.[2683]

[2677] The Senate Intelligence Committee had made similar observations in a prior Congress when considering legislation that ultimately became the National Security Amendment, H.Rept. 103-256, at 17-22 (1994).

[2678] 50 U.S.C. 456 (1994 ed.).

[2682] 15 U.S.C. 1681u(d); 50 U.S.C. 436(b).

[2683] 15 U.S.C. 1681u(c).

The USA PATRIOT Act amended three of the four existing NSL statutes and added a fifth. In each of the three NSL statutes available exclusively to the FBI—the Electronic Communications Privacy Act section (18 U.S.C. 2709), the Right to Financial Privacy Act section (12 U.S.C. 3414(a)(5)), and the Fair Credit Reporting Act section (15 U.S.C. 1681u)—Section 505 of the USA PATRIOT Act:

- expanded FBI issuing authority beyond FBI headquarter officials to include the heads of the FBI field offices (i.e., Special Agents in Charge (SAC));
- eliminated the requirement that the record information sought pertain to a foreign power or the agent of a foreign power;
- required instead that the NSL request be relevant to an investigation to protect against international terrorism or foreign spying;
- added the caveat that no such investigation of an American can be predicated exclusively of First Amendment protected activities.[2684]

The amendments allowed NSL authority to be employed more quickly (without the delays associated with prior approval from FBI headquarters) and more widely (without requiring that the information pertain to a foreign power or its agents).[2685]

[2684] P.L. 107-56, §505, 115 Stat. 365-66 (2001).

[2685] "The information acquired through NSLs is extremely valuable to national security investigations…. Unfortunately, however, NSLs were of limited utility prior to the PATRIOT Act. While records held by third parties may generally be subpoenaed by a grand jury in a criminal investigation so long as those records are relevant, the standard for obtaining such records through an NSL was much higher before October of 2001.

"The FBI had to have specific and articulable facts that the information requested pertained to a foreign power or an agent of a foreign power. This requirement often prohibited the FBI from using NSLs to develop evidence at the early stage of an investigation, which is precisely when they are the most useful.

"The prior standard, Mr. Chairman, put the cart before the horse. Agents trying to determine whether or not there were specific and articulable facts that a certain individual was a terrorist or spy were precluded from using an NSL in this inquiry because, in order to use an NSL, they first had to be in possession of such facts.

"Suppose, for example, investigators were tracking a known al-Qaeda operative and saw him having lunch with three individuals. A responsible agent would want to conduct a preliminary investigation of those individuals and find out, among other things, with whom they had recently been in communication.

"Before the passage of the PATRIOT Act, however, the FBI could not have issued an NSL to obtain such information. While investigators could have demonstrated that this information was relevant to an ongoing terrorism investigation, they could not have demonstrated sufficient specific, and articulable facts that the individuals in question were agents of a foreign power," Material Witness Provisions of the Criminal Code, and the Implementation of the USA PATRIOT Act: Section 505 That Addresses National Security Letters, and Section 804 That Addresses Jurisdiction Over Crimes Committed at U.S. Facilities Abroad: Hearing Before the Subcomm. on Crime, Terrorism, and Homeland Security of the House Comm. on the Judiciary, 109th Cong., 1st Sess. at 9-10 (2005) (testimony of Matthew Berry, Office of Legal Policy, U.S. Department of Justice).

Subsection 358(g) of the USA PATRIOT Act amended the Fair Credit Reporting Act to add a fifth and final NSL section; the provision had one particularly noteworthy feature, it was available not merely to the FBI but to any government agency investigating or analyzing international terrorism:

> *Notwithstanding section 1681b of this title or any other provision of this subchapter, a consumer reporting agency shall furnish a consumer report of a consumer and all other information in a consumer's file to a government agency authorized to conduct investigations of, or intelligence or counterintelligence activities or analysis related to, international terrorism when presented with a written certification by such government agency that such information is necessary for the agency's conduct or such investigation, activity or analysis.*[2686]

Although the subsection's legislative history treats it as a matter of first impression,[2687] Congress's obvious intent was to provide other agencies with the national security letter authority comparable to that enjoyed by the FBI under the Fair Credit Reporting Act. The new section had a nondisclosure and a safe harbor subsection, 15 U.S.C. 1681v(c), (e), but no express means of judicial enforcement or penalties for improper disclosure of a request under the section.

In the 108th Congress, the scope of the Right to Financial Privacy Act NSL was enlarged by defining the financial institutions subject to the authority to include not only banks and credit unions but also car dealers, jewelers, and real estate agents, among others.[2688] The same Congress saw a number of proposals

---

[2686] P.L. 107-56, §358(g), 115 Stat. 327 (2001).

[2687] E.g., H.Rept. 107-250, at 60-1 ("This section facilitates government access to information contained in suspected terrorists' credit reports when the government inquiry relates to an investigation, of or intelligence activity or analysis relating to, domestic or international terrorism. Even though private entities such as lender and insurers can access an individual's credit history, the government is strictly limited in its ability under current law to obtain the information. This section would permit those investigating suspected terrorists prompt access to credit histories that may reveal key information about the terrorist's plan or source of refunding – without notifying the target").

[2688] P.L. 108-177, §374, 117 Stat. 2628 (2004), 12 U.S.C. 3414(d), adopts the definition of financial institution found in 31 U.S.C. 5312(a)(2), (c)(1), i.e.: "(A) an insured bank (as defined in 12 U.S.C. 1813(h)); (B) a commercial bank or trust company; (C) a private banker; (D) an agency or branch of a foreign bank in the United States; (E) any credit union; (F) a thrift institution; (G) a broker or dealer registered with the Securities and Exchange Commission; (H) a broker or dealer in securities or commodities; (I) an investment banker or investment company; (J) a currency exchange; (K) an issuer, redeemer, or cashier of travelers' checks, checks, money orders, or similar instruments; (L) an operator of a credit card system; (M) an insurance company; (N) a dealer in precious metals, stones, or jewels; (O) a pawnbroker; (P) a loan or finance company; (Q)

introduced to exempt libraries from the reach of the communications NSL,[2689] to increase congressional oversight over the use of NSL authority,[2690] and to add the USA PATRIOT Act section 505 NSL amendments to the list of those temporary sections scheduled to expire on December 31, 2005.[2691] The 108th also witnessed the introduction of proposals that ultimately evolved into the NSL amendments in the USA PATRIOT Improvement and Reauthorization Act. H.R. 3179, introduced by Representative Sensenbrenner. They would have reinforced the five national security letter provisions with explicit authority for judicial enforcement[2692] and with criminal penalties for improper disclosure of the issuance of such letters. The penalties were to be the same as those proposed under the general administrative subpoena bills offered in the 108th—imprisonment for not more than five years when committed with the intent to obstruct and for not more than one year otherwise, proposed 18 U.S.C. 1510(e). A Justice Department witness explained that, "Oftentimes, the premature disclosure of an ongoing terrorism investigation can lead to a host of negative repercussions, including the destruction of evidence, the flight of suspected terrorists, and the frustration of efforts to identify additional terrorist conspirators. For these reasons, the FBI has forgone using NSLs in some investigations for fear that the recipients of those NSLs would compromise an

a travel agency; (R) a licensed sender of money or any other person who engages as a business in the transmission of funds, including any person who engages as a business in an informal money transfer system or any network of people who engage as a business in facilitating the transfer of money domestically or internationally outside of the conventional financial institutions system; (S) a telegraph company; (T) a business engaged in vehicle sales, including automobile, airplane, and boat sales; (U) persons involved in real estate closings and settlements; (V) the United States Postal Service; (W) an agency of the United States Government or of a State or local government carrying out a duty or power of a business described in this paragraph; (X) a casino, gambling casino, or gaming establishment with an annual gaming revenue of more than $1,000,000 which – (i) is licensed as a casino, gambling casino, or gaming establishment under the laws of any State or any political subdivision of any State; or (ii) is an Indian gaming operation conducted under or pursuant to the Indian Gaming Regulatory Act other than an operation which is limited to class I gaming (as defined in section 4(6) of such Act); (Y) any business or agency which engages in any activity which the Secretary of the Treasury determines, by regulation, to be an activity which is similar to, related to, or a substitute for any activity in which any business described in this paragraph is authorized to engage; (Z) any other business designated by the Secretary whose cash transactions have a high degree of usefulness in criminal, tax, or regulatory matters; [or (AA)] any futures commission merchant, commodity trading advisor, or commodity pool operator registered, or required to register, under the Commodity Exchange Act."

[2689] H.R. 3352, §5 (Rep. Otter); S. 1158, §3 (Sen. Boxer); S. 1507, §2 (Sen. Feingold); S. 1552, §4(b) (Sen. Murkowski); and S. 1709, §5 (Sen. Craig).

[2690] S. 436, §3 (Sen. Leahy).

[2691] H.R. 3171, §4 (Rep. Kucinich); H.R. 3352, §7 (Rep. Otter); S. 1695, §2 (Sen. Leahy); and S. 1709, §6 (Sen. Craig).

[2692] In *Doe v. Ashcroft*, 334 F.Supp.2d 471, 496-501 (S.D.N.Y. 2004), the Government argued unsuccessfully that the NSL statutes should be understood to include an implicit judicial enforcement component.

investigation by disclosing the fact that they had been sent an NSL."[2693] The enforcement provision would have been backed by the court's contempt power, proposed 18 U.S.C. 2332h.[2694] It had no explicit provisions, however, to permit the recipient to file a motion to quash or modify the NSL request.

Pre-amendment Judicial Action

Proponents of legislative proposals in the 108th Congress did not enjoy the benefit of two court decisions that colored the debate over NSL authority during the 109th Congress. *Doe v. Ashcroft*,[2695] reached much the same conclusion on the First Amendment issue: narrowly defined, the government's and *Doe v. Gonzales*[2696] suggested that the NSL statutes could not withstand constitutional scrutiny unless more explicit provisions were made for judicial review and permissible disclosure by recipients. In essence, *Doe v. Ashcroft* found that the language of 18 U.S.C. 2709 and the practices surrounding its use offended (1) the Fourth Amendment because "in all but the exceptional case it [had] the effect of authorizing coercive searches effectively immune from any judicial process," 334 F.Supp.2d at 506, and (2) the First Amendment because its sweeping, permanent secrecy order feature applied "in every case, to every person, in perpetuity, with no vehicle for the ban to ever be lifted from the recipient or other persons affected under any circumstances, either by the FBI itself, or pursuant to judicial process," id. at 476.

NSL Amendments in the 109th Congress

[2693] Anti-Terrorism Intelligence Tools Improvement Act of 2003: Hearing Before the Subcomm. on Crime, Terrorism, and Homeland Security (House Hearing), 108th Cong., 2nd Sess., 7-8 (2004)(prepared statement of United States Assistant Attorney General Daniel J. Bryant).

[2694] Proposed 18 U.S.C. 2332h ("In the case of a refusal to comply with a request for records, a report, or other information made to any person under section 2709(b) of this title, section 625 (a) or (b) or 626 of the Fair Credit Reporting Act [15 U.S.C. 1681u, 1681v], section 1114(a)(5)A) of the right to Financial Privacy Act [12 U.S.C. 3414, or section 802(a) of the National Security Act of 1947 [50 U.S.C. 436(a)], the Attorney General may invoke the aid of any court of the United States within the jurisdiction of which the investigation is carried on or the person resides, carries on business, or may be found, to compel compliance with the request. The court may issue an order requiring the person to comply with the request. Any failure to obey the order of the court may be punished by the court as contempt thereof. Any process under this section may be served in any judicial district in which the person may be found").

[2695] 334 F.Supp.2d 471 (S.D.N.Y. 2004), vac'd and remanded, 449 F.3d 415 (2d Cir. 2006), after remand, 500 F.Supp.2d 379 (S.D.N.Y. 2007), aff'd in part, rev'd in part and remanded, 549 F.3d 861 (2d Cir. 2008), after remand, _____ F.Supp.2d _____ (2009 WL 2432320)(S.D.N.Y. Aug. 5, 2009).

[2696] 386 F.Supp.2d 66 (D.Conn. 2005), dism'd as moot, 449 F.3d 415 (2d Cir. 2006).

Both USA PATRIOT Act reauthorization statutes—P.L. 109-177(H.R. 3199) and P.L. 109-178 (S. 2271)[2697]—amended each of the NSL statutes. They

- created a judicial enforcement mechanism and a judicial review procedure for both the requests and accompanying nondisclosure requirements;[2698]
- established specific penalties for failure to comply or to observe the nondisclosure requirements;[2699]
- made it clear that the nondisclosure requirements did not preclude a recipient from consulting an attorney;[2700]
- provided a process to ease the nondisclosure requirement;[2701]
- expanded congressional oversight;[2702]
- called for an Inspector General's audit of use of the authority.[2703]

Post-Amendment NSL Attributes

Addressees and Certifying Officials

The five NSL statutes share a number of common attributes, although each has its own individual features as well. They are most distinctive with respect to the nature of the businesses to whom they may be addressed. The Electronic Communication Privacy Act NSLs are addressed to communications providers.[2704] Those issued under the authority of the Right to Financial Privacy Act may be directed to any financial institution, which as noted earlier, includes not only banks and credit unions, but credit card companies, car dealers, jewelers and a number of entities that are likely the scene of large cash transactions.[2705] The Fair Credit Reporting Act NSLs may be addressed to consumer credit reporting agencies.[2706] Recipients of the National Security Act NSLs may include

either financial institutions or consumer credit reporting agencies as well as any commercial entity with information concerning an agency employee's travel.[2707]

FBI officials are authorized to provide the initial certification required for issuance of an NSL under any of the five statutes. In three instances, the authority is exclusive; in the other two, it is enjoyed by other federal officials as well. In the case of the Electronic Communications Privacy Act NSL section, the Right to Financial Privacy Act section, and one of the Fair Credit Report Act NSL sections, issuance requires the certification of either the Director of the FBI, a senior FBI official (no lower than the Deputy Assistant Director), or the Special Agent in Charge of an FBI field office.[2708]

Certifying officials under the other statutes are described more broadly. The National Security Act NSL section contemplates certification by officials from a wider range of agencies; the second Fair Credit Reporting Act NSL section allows certification by both a wider range of agencies and a wider range of officials. Senior officials no lower than Assistant Secretary or Assistant Director of an agency whose employee with access to classified material is under investigation may certify a National Security Act NSL request.[2709] A designated supervisory official of any agency "authorized to conduct investigations of, or intelligence or counterintelligence activities and analysis related to, international terrorism" may certify a NSL request under the second, more recent Fair Credit Reporting Act section.[2710]

Purpose, Standards, Information Covered

Although variously phrased, the purpose for each of the NSLs is to acquire information related to the requesting agency's national security concerns. The most common statement of purpose is "to protect against international terrorism or clandestine intelligence activities."[2711] The more recent of the Fair Credit Reporting Act NSL sections simply indicates that the information must be sought for the requesting intelligence agency's investigation, activity or analysis.[2712] The National Security Act NSL authority is available to conduct law enforcement

[2712] 15 U.S.C. 1681v(a).

investigations, counterintelligence inquiries, and security determinations.[2713] As to standards, the Electronic Communications Privacy Act authorizes NSLs for relevant information.[2714] The same standard may apply to the others which are a little more cryptic, authorizing NSLs when the information is "sought for"[2715] or "is necessary"[2716] for the statutory purpose.

The communications NSL provision and the earlier of the two credit agency NSL statutes are fairly specific in their descriptions of the information that may be requested through an NSL. An Electronic Communications Privacy Act NSL may request a customer's name, address, length of service and billing records.[2717] The older of the two Fair Credit Report Act sections authorizes a NSL to acquire name, address or former address, place or former place of employment, and the name and address of any financial institution with which the consumer has or once had an account.[2718] The Right to Financial Privacy Act NSL provision covers the financial records of a financial institution's customers;[2719] the second and more recent Fair Credit Reporting Act NSL provision covers a consumer reporting agency's consumer reports and "all other" consumer information in its files.[2720] The National Security Act provision is at once the most inclusive and the most restricted. It authorizes NSLs for financial information and records and consumer reports held by any financial agency, institution, holding company or consumer reporting agency, and for travel information held by any commercial entity.[2721] On the other hand, it is the only provision that limits the information provided to that pertaining to the target of the agency's investigation and to information of a kind whose disclosure the target has previously approved.[2722]

Confidentiality

[2713] 50 U.S.C. 436(a)(1).

[2714] 18 U.S.C. 2709(b).

[2715] 15 U.S.C. 1681u(a); 12 U.S.C. 3414(a)(5)(A).

[2716] 15 U.S.C. 1681v; 50 U.S.C. 436(a).

[2717] 18 U.S.C. 2709(b).

[2718] 15 U.S.C. 1681u(a),(b).

[2719] 12 U.S.C. 3414(a)(5)(A).

[2720] 15 U.S.C. 1681v(a).

[2721] 50 U.S.C. 436(a)(1).

[2722] 50 U.S.C. 436(a)(2),(3).

Prior to their amendment in the 109th Congress, the NSL statutes generally featured an open ended confidentiality clause. The communications NSL provision for example declared, "No wire or electronic communication service provider, or officer, or employee, or agent thereof, shall disclose to any person that the Federal Bureau of Investigation has sought or obtained access to information or records under this section."[2723] The statutes did not indicate whether a recipient might consult an attorney in order to ascertain his rights and obligations nor whether it might ever be lifted. It was this silence in the face of a seemingly absolute, permanent nondisclosure command that the early Doe courts found constitutionally unacceptable[2724] and that perhaps led to the reconstruction of the NSL confidentiality requirements in their current form.

As NSL statutes now read, secrecy is not absolutely required. Instead NSL recipients are bound to secrecy only upon the certification of the requesting agency that disclosure of the request or response may result in a danger to national security; may interfere with diplomatic relations or with a criminal, counterterrorism, or counterintelligence investigation; or may endanger the physical safety of an individual. A recipient may disclose the request to those necessary to comply with the request and to an attorney the recipient consults for related legal advice or assistance. In doing so, the recipient must advise them of the secrecy requirements. Aside from its attorney and at the agency's election, the recipient must also identify those to whom it has disclosed the request. A recipient may petition the court to modify or extinguish any NSL secrecy requirement within a year of issuance.[2725] Thereafter, it may petition to have the veil of secrecy lifted, although it may resubmit a rejected request only once a year.[2726] In all instances, section 3511 declares conclusive and warranting continued secrecy the certification by certain officials that disclosure might create a danger to national security, interfere with diplomatic relations or ongoing investigations, or jeopardize personal safety.[2727] A breach of a confidentiality requirement committed knowingly and with the intent to obstruct an investigation or related judicial proceedings is punishable by imprisonment for

[2727] 28 U.S.C. 3511(b)(2), (3). The Second Circuit has declared this component of the procedure unconstitutional, *John Doe, Inc.v. Mukasey*, 549 F.3d at 883.

not more than five years and/or a fine of not more than $250,000 (not more than $500,000 for an organization).[2728]

Judicial Review and Enforcement

In addition to authority to review and set aside NSL nondisclosure requirements, the federal courts also enjoy jurisdiction to review and enforce the underlying NSL requests. Recipients may petition and be granted an order modifying or setting aside an NSL, if the court finds that compliance would be unreasonable, oppressive, or otherwise unlawful.[2729] Subpoenas issued under the Federal Rules of Criminal Procedure may be modified or quashed if compliance would be unreasonable or oppressive.[2730] The Rule affords protection against undue burdens and protects privileged communications.[2731] Compliance with a particular NSL might be unduly burdensome in some situations, but the circumstances under which NSLs are used suggest few federally recognized privileges. The Rule also imposes a relevancy requirement, but in the context of an investigation a motion to quash will be denied unless it can be shown that "there is no reasonable possibility that the category of materials the Government seeks will produce information relevant" to the investigation.[2732] The authority to modify or set aside a NSL that is unlawful affords the court an opportunity to determine whether the NSL in question complies with the statutory provisions under which it was issued. On the other hand, the court's authority may be invoked to enforce the NSL against a recalcitrant recipient and failure to comply thereafter is punishable as contempt of court.[2733]

Dissemination

Attorney General guidelines govern the sharing of information acquired in response to NSLs under two statutes.[2734] A third, the older of the two Fair Credit

---

[2729] 28 U.S.C. 3511.

[2730] F.R.Crim.P. 17(c)(2).

[2731] 2 WRIGHT, FEDERAL PRACTICE AND PROCEDURE §275 (Crim. 3d ed. 2000).

[2732] *United States v. R. Enterprises, Inc.*, 498 U.S. 292, 301 (1991).

[2733] 28 U.S.C. 3511(c).

[2734] 12 U.S.C. 3414(a)(5)(B)("The Federal Bureau of Investigation may disseminate information obtained pursuant to this paragraph only as provided in guidelines approved by the Attorney General for foreign intelligence collection and foreign counterintelligence investigations conducted by the Federal Bureau of Investigation, and, with respect to dissemination to an agency of the United States, only if such information is clearly relevant to the authorized responsibilities of such agency"); see also, 18 U.S.C. 2709(d).

Report Act sections, limits dissemination to sharing within the FBI, with other agencies to the extent necessary to secure approval of a foreign counterintelligence investigation, or with military investigators when the information concerns a member of the Armed Forces.[2735] The National Security Act authorizes dissemination of NSL information to the agency of the employee under investigation, to the Justice Department for law enforcement or counterintelligence purposes, or to another federal agency if the information is clearly relevant to its mission.[2736] The more recent Fair Credit Reporting Act NSL section has no explicit provision on restricting dissemination.[2737]

Liability, Fees and Oversight

Since judicial enforcement is a feature new to all but one of the NSL statutes,[2738] they might be expected to include other incentives to overcome recipient resistance. Three do offer immunity from civil liability for recipients who comply in good faith,[2739] and two offer fees or reimbursement to defer the costs of compliance.[2740]

The confidentiality that necessarily surrounds NSL requests could give rise to concerns of governmental overreaching. Consequently, regular reports on the use of NSL authority must be made to the congressional intelligence and judiciary committees and in some instances to the banking committees.[2741] Moreover, section 119 of the USA PATRIOT Improvement and Reauthorization Act instructs the Inspector General of the Department of Justice to audit and to report to the judiciary and intelligence committees as to the Department's use of the authority in the years following expansion of the authority in the USA PATRIOT Act. The section also directs the Attorney General and the Director of National Intelligence to report to Congress on the feasibility of establishing minimization requirements for the NSLs.

Inspector General's Reports

IG Report I

Section 119 of the USA PATRIOT Improvement and Reauthorization Act, P.L. 109-177, 120 Stat. 219 (2006), instructed the Department of Justice's Inspector General to review and report on the FBI's use of NSLs. In early March 2007, the Inspector General released the first of two required reports that covered calendar years 2003 through 2005. The second, covering the time period through the end of calendar year 2006, was released in March 2008.

The initial report notes that FBI use of NSLs has increased dramatically, expanding from 8,500 requests in 2000 to 47,000 in 2005, IG Report I at 120. Seventy-four percent were issued in conjunction with counterterrorism investigations, most of the rest in connection with counterintelligence investigations, and less than 1 percent as part of a foreign computer intrusion investigation, Id. During the three years under review, the percentage of NSLs used to investigate Americans ("U.S. persons") increased from 39% in 2003 to 53% in 2005.[2742] A substantial majority of the requests involve records relating to telephone or e-mail communications, IG Report I at 120.

The report is somewhat critical of the FBI's initial performance:

> *[W]e found that the FBI used NSLs in violation of applicable NSL statutes, Attorney General Guidelines, and internal FBI policies. In addition, we found that the FBI circumvented the requirements of the ECPA NSL statute when it issued at least 739 "exigent letters" to obtain telephone toll billing records and subscriber information from three telephone companies without first issuing NSLs. Moreover, in a few other instances, the FBI sought or obtained telephone toll billing records in the absence of a national security investigation, when it sought and obtained consumer full credit reports in a counterintelligence investigation, and when it sought and obtained financial records and telephone toll billing records without first issuing NSLs. Id. at 124.*

More specifically, the Report found that:

[2742] Id. A "U.S. person" is generally understood to mean "a citizen of the United States, an alien lawfully admitted for permanent residence (as defined in section 1101(a)(2) of title 8), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence, or a corporation which is incorporated in the United States, but does not include a corporation or an association which is a foreign power, as defined in subsection(a)(1), (2), or (3) of this section," 50 U.S.C. 1801.

- a "significant number of NSL-related possible violations are not being identified or reported" as required
- the only FBI data collection system produced "inaccurate" results
- a "significant number of NSL-related possible violations are not being identified or reported" as required
- the FBI issued over 700 exigent letters acquiring information in a manner that "circumvented the ECPA NSL statute and violated the Attorney General's Guidelines … and internal FBI policy"
- the FBI's Counterterrorism Division initiated over 300 NSLs in a manner that precluded effective review prior to approval
- 60% of the individual files examined showed violations of FBI internal control policies
- the FBI did not retain signed copies of the NSLs it issues
- the FBI had not provided clear guidance on the application of the Attorney General's least-intrusive-feasible-investigative-technique standard in the case of NSLs
- the precise interpretation of toll billing information as it appears in the ECPA NSL statute is unclear
- SAC supervision of the attorneys responsible for review of the legal adequacy of proposed NSLs made some of the attorneys reluctant to question the adequacy of the underlying investigation previously approved by the SAC
- there was no indication that the FBI's misuse of NSL authority constituted criminal conduct
- personnel both at FBI headquarters and in the field consider NSL use indispensable
- information generated by NSLs is fed into a number of FBI systems. IG Report I at 121-24.

Exigent Letters

Prior to enactment of the ECPA, the Supreme Court held that customers had no Fourth Amendment protected privacy rights in the records the telephone company maintained relating to their telephone use.[2743] Where a recognized expectation of privacy exists for Fourth Amendment purposes, the Amendment's usual demands such as those of probable cause, particularity, and a warrant may be eased in the face of exigent circumstances. For example, the Fourth Amendment requirement that officers must knock and announce their purpose before forcibly entering a building to execute a warrant can be eased in the presence of certain exigent circumstances such as the threat of the destruction of

[2743] Smith v. Maryland, 442 U.S. 735, 745 (1979).

evidence or danger to the officers.[2744] Satisfying Fourth Amendment requirements, however, does not necessary satisfy statutory demands.

The ECPA prohibits communications service providers from supplying information concerning customer records unless one of the statutory exceptions applies.[2745] There are specific exceptions for disclosure upon receipt of a grand jury subpoena[2746] or an NSL.[2747] A service provider who knowingly or intentionally violates the prohibition is subject to civil liability,[2748] but there are no criminal penalties for the breach.

The Inspector General found that contrary to assertions that "the FBI would obtain telephone records only after it served NSLs or grand jury subpoenas, the FBI obtained telephone bill records and subscriber information prior to serving NSLs or grand jury subpoenas" by use "exigent letters."[2749] The FBI responded that it had barred the use of exigent letters, but emphasized that the term "exigent letter" does not include emergency disclosures under the exception now found in 18 U.S.C. 2702(c) (4). Thus, the FBI might request that a service provider invoke that exception to the record disclosure bar "if the provider reasonably believes that an emergency involving immediate danger of death or serious physical injury to any person justifies disclosure of the information," 18 U.S.C. 2702(c)(4).

IG Report II

The second IG Report reviewed the FBI's use of national security letter authority during calendar year 2006 and the corrective measures taken following the issuance of the IG's first report. The second Report concluded that:

- "the FBI's use of national security letters in 2006 continued the upward trend ... identified ... for the period covering 2003 through 2006"
- "the percentage of NSL requests generated from investigations of U.S. persons continued to increase significantly, from approximately 39% of all NSL requests issued in 2003 to approximately 57% of all NSL requests issued in 2006"

[2744] Richards v. Wisconsin, 520 U.S. 385, 391 (1997); Wilson v. Arkansas, 514 U.S. 927, 936 (1995).

[2745] 18 U.S.C. 2702(c).

[2746] 18 U.S.C. 2703(c)(2).

[2747] 18 U.S.C. 2709(a).

[2748] 18 U.S.C. 2707(a).

[2749] IG Report I at 90.

- the FBI and DoJ are committed to correcting the problems identified in IG Report I and "have made significant progress in addressing the need to improve compliance in the FBI's use of NSLs"
- "it is too early to definitively state whether the new systems and controls developed by the FBI and the Department will eliminate fully the problems with NSLs that we identified," IG Report II at 8-9.

Post-Amendment Judicial Action

Following the 2006 USA PATRIOT Act amendments, the District Court for the Southern District of New York revisited the issue anew and concluded that the revised NSL procedures violated both First Amendment and separation of powers principles.[2750] It enjoined Justice Department officials from issuing NSLs under section 2709 or from enforcing compliance with existing orders.[2751] However, it stayed the order pending appeal.[2752] The Court of Appeals was similarly disposed, but concluded that the government could invoke the secrecy and judicial review authority of the 18 U.S.C. 2709 and 18 U.S.C. 3511 in a limited, but constitutionally permissible manner.[2753]

The issues before the Court of Appeals were (1) whether the nondisclosure features of section 2709(c) should be subject to First Amendment strict scrutiny and (2) whether judicial review subject to the conclusive weight of an executive branch certification under section 3511 posed constitutional concerns.

The pre-amendment Doe cases had concluded that section 2709(c), which then broadly prohibited disclosure of receipt of an NSL, "work[ed] as both a prior restraint on speech and a content-based restriction, and hence, [was] subject to strict scrutiny."[2754] "Under strict scrutiny review," the Supreme Court has explained, "the Government must demonstrate that the nondisclosure requirement is narrowly tailored to promote a compelling Government interest."[2755] Moreover, there can be "no less restrictive alternatives that would be at least as effective in achieving the legitimate purpose that the statute was

[2755] Playboy Entertainment 529 U.S. 803, 813 (2000).

enacted to serve."[2756] When a suspect prior restraint comes in the form of a licensing scheme, under which expression is banned for want government permission as in Freedman v. Maryland, the scheme must include prompt judicial review at the petition and burden of the regulator.[2757]

Yet, the courts have been unwilling to classify as constitutionally suspect all instances of apparent prior restraint. The government in its presentation to the Second Circuit point to a number of instances where withstanding an apparent prior restraint regulators were held to a less demanding standard—citing cases involving pre-trial discovery gag orders, grand jury secrecy, the confidentiality surrounding inquiry into judicial misconduct, and the secrecy agreements signed by national security employees.[2758]

In fact when the Supreme Court assessed the First Amendment validity of a pre-trial discovery gag order, it concluded that the relevant questions were two: first, "whether the practice in question furthers an important or substantial governmental interest unrelated to the suppression of expression;" and second, "whether the limitation of First Amendment freedoms is no greater than is necessary or essential to the protection of the particular governmental interest involved."[2759]

The members of the Second Circuit panel could not agree on whether section 2709(c), as amended, constituted a prior restraint subject to strict scrutiny analysis, or should be judged by a somewhat less demanding standard. The lack of consensus proved of little consequence, because the government conceded that strict scrutiny analysis was appropriate,[2760] and because the panel agreed the result would be the same under the factor common to both standards—is the

[2759] *Seattle Times Co. v. Rhinehard*, 467 U.S. at 32.

[2760] *John Doe, Inc. v. Mukasey*, 549 F.3d at 878.

restriction on expression narrowly tailored as possible to protect the governmental interest.[2761]

The government's interest in national security is indisputably compelling.[2762] Unwilling to read section 2709(c) procedure as a licensing scheme, the Second Circuit panel nevertheless concluded that "in the absence of Government-initiated judicial review, subsection 3511(b) is not narrowly tailored to conform to First Amendment protected standards."[2763] Moreover, the judicial review must be real. It must "place on the Government the burden to show a good reason to believe that disclosure may result in an enumerated harm, i.e. a harm related to an authorized investigation to protect against international terrorism or clandestine intelligence activities."[2764] Such judicial review may occur ex parte and in camera, but it may not be bound by the executive's conclusive certification of harm feature of section 3511. In the eyes of the court, there is no meaningful judicial review "of the decision of the Executive Branch to prohibit speech if the position of the Executive Branch that speech would be harmful is 'conclusive' on the reviewing court, absent only a demonstration of bad faith."[2765] "To accept deference to that extraordinary degree would be to reduce strict scrutiny to no scrutiny, save only in the rarest of situations where bad faith could be shown," it concluded.[2766]

Yet the court envisioned a procedure under which NSL secrecy provision might survive:

> *We deem it beyond the authority of a court to "interpret" or "revise" the NSL statutes to create the constitutionally required obligation of the Governmentto initiate judicial review of a nondisclosure requirement. However, the Government might be able to assume such an obligation without additional legislation....*
>
> *If the Government uses the suggested reciprocal notice procedure as a means of initiating judicial review, there appears to be no impediment to the Government's including notice of a recipient's opportunity to contest the nondisclosure requirement in an NSL. If*

[2764] *Id.* at 881.

[2765] *Id.* at 882.

[2766] *Id.*

> *such notice is given, time limits on the nondisclosure requirement pending judicial review, as reflected in Freedman, would have to be applied to make the review procedure constitutional. We would deem it to be within our judicial authority to conform subsection 2709(c) to First Amendment requirements, by limiting the duration of the nondisclosure requirement, absent a ruling favorable to the Government upon judicial review, to the 10-day period in which the NSL recipient decides whether to contest the nondisclosure requirement, the 30-day period in which the Government considers whether to seek judicial review, and a further period of 60 days in which a court must adjudicate the merits, unless special circumstances warrant additional time. If the NSL recipient declines timely to precipitate Government-initiated judicial review, the nondisclosure requirement would continue, subject to the recipient's existing opportunities for annual challenges to the nondisclosure requirement provided by subsection 3511(b). If such an annual challenge is made, the standards and burden of proof that we have specified for an initial challenge would apply, although the Government would not be obliged to initiate judicial review.*[2767]

Given the possibility of constitutional application, the court saw no reason to invalidate sections 2709(c) and 3511(b) in toto. The exclusive presumptions of section 3511 cannot survive, the court declared, but the First Amendment finds no offense in the remainder of the two sections except "to the extent that they fail to provide for Government-initiated judicial review. The Government can respond to this partial invalidation ruling by using the suggested reciprocal notice procedure."[2768]

On remand under the procedure suggested by the Court of Appeals, the government submitted the declaration of the senior FBI official concerning the continued need for secrecy concerning the NSL. Following an ex parte, in camera hearing, the district court concluded the government had met its burden, but granted the plaintiff's motion for a unclassified, redacted summary of the FBI declaration.[2769]

Legislative Attorney
American Law Division

March 2, 1989

The Congressional Research Service works exclusively for the Congress, conducting research, analyzing legislation, and providing information at the request of committees, Members, and their staffs.

The Service makes such research available, without partisan bias, in many forms including studies, reports, compilations, digests, and background briefings. Upon request, CRS assists committees in analyzing legislative proposals and issues, and in assessing the possible effects of these proposals and their alternatives. The Service's senior specialists and subject analysts are also available for personal consultations in their respective fields of expertise.

Summary

When a violation of criminal law potentially implicates sensitive national security concerns, the Executive Branch may face a dilemma of either declining to prosecute a violation of law or risking disclosure of sensitive materials during a criminal trial. Prior to 1980 it was particularly difficult to assess whether a successful prosecution could proceed without jeopardizing disclosure of sensitive information because the government had no means of determining the extent, nature, or relevance of classified information at issue prior to its introduction at trial. In 1980, however, Congress enacted the Classified Information Procedures Act (CIPA) to provide a means for determining at an early stage whether a "disclose or dismiss" dilemma exists in a potential prosecution or whether a prosecution may proceed that both protects information the Executive regards as sensitive to security and assures the defendant a fair trial consistent with the mandates of the Constitution.

Among its core provisions, CIPA initiates an early focus on security issues by requiring a defendant in a criminal case to notify the prosecution and the court prior to trial of any classified information that he reasonably expects to disclose in his defense. Also, the notice provision is a continuing one, and a defendant must provide a separate notice of any additional classified information that he becomes aware of after his initial notice and intends to use. A defendant may not introduce any classified information that was not included in a CIPA notice.

Issues on the use, relevance, and admissibility of classified information that either was included in a notice by the defendant or is expected to be used by the prosecution are considered by the court in pretrial hearings. Under current case law, the court to some degree may take national security interests into account in determining admissibility, If a court finds that certain classified information is admissible into evidence, the court then may consider a request by the government to substitute summaries or redacted documents in lieu of original documents, The court may authorize a substitution in such a case only when a substitution affords a defendant substantially the same opportunity to defend himself as introduction of the original documents would, Once a court makes its findings on what information must, in fairnesa to the defendant, be introduced, the Attorney General may file an objection to disclosure on national security grounds, and the prosecution thereafter must be partially or completely dismissed.

The courts generally have upheld CIPA to constitutional challenge and have enforced the sanctions set forth in the statute in appropriate cases. However, the judge in the Iran-Contra prosecutions has ruled that CIPA procedures must give way when they risk excessive exposure of the defendant's case, Thie ruling furthers a frequently made observation that CIPA ie most effective in resolving potentially troublesome cases in which the classified information at risk proves to be only marginally sensitive or marginally relevant, It remains problematic whether the disclose or dismiss dilemma posed by a prosecution involving sensitive information at its core can be resolved in a manner that preserves the rights of the defendant,

Classified Information Procedures Act (CIPA): An Overview

The Executive Branch of our Government has the authority to prosecute violations of federal criminal law.[2770] The Executive Branch also takes measures to protect information in its possession relating to national security and to prevent its disclosure.[2771] When a violation of criminal law potentially implicates sensitive national security concerns, the Executive thus may face a dilemma of

---

[2770] U.S. CONST. art. 2, § 3, cl. 3 (President to take care that the laws be faithfully executed).

[2771] Exec. Order No. 12356, 47 Fed, Reg. 14874, 15657 (1982).

either declining to prosecute a violation of law or risking disclosure of sensitive materials during a criminal trial.[2772] Prior to 1980 it was particularly difficult to assem whether a successful prosecution could proceed without jeopardizing disclosure of sensitive information because the government had no means of determining the extent, nature, or relevance of classified information at issue prior to its introduction at trial, In 1980, however, Congress enacted the Classified Information Procedures Act (CIPA)[2773] in order to provide a discrete and orderly framework for determining at an early stage whether a "disclose or dismiss" dilemma exists in a potential prosecution or whether a prosecution may proceed that both protects information the Executive regards as sensitive to security and assures the defendant a fair trial consistent with the mandates of the Constitution.

I. Legislative History of CIPA

During the 1970's the number of prosecutions in which the actual or prospective disclosure of classified information became an issue substantially increased and wae expected to increase further. [2774] The term "graymail" came into use to refer "to actions of a criminal defendant in seeking access to, revealing, or threatening to reveal classified information in connection with his defense."[2775] The problems that arose during this period from the inability to resolve issues relating to classified information prior to trial was described by Assistant Attorney General Philip Heymann as follows:

> *To fully understand the problem, it is necessary to examine the decision making process in criminal cases involving classified information. Under present procedures, decisions regarding the relevance and admissibility of evidence are normally made as they arise during the course of the trial. In advance of trial, the government often must guess whether the defendant will seek to disclose certain classified information and speculate whether it will be found admissible if objected to at trial. In addition, there is some question whether material will be disclosed at trial and the damage inflicted before a ruling on the use of the information can be obtained. The situation is further complicated in cases where the government expects to disclose some classified item in*

[2772] Criminal defendants enjoy a constitutional right to a public trial, U.S. CONST. amend. VI.

[2775] H.R. Rep. No. 96-831 at 7.

presenting its case. Without a procedure for pre-trial rulings on the disclosure of classified information, the deck is stacked against proceeding with these cases because all of the sensitive items that might be disclosed at trial must be weighed in assessing whether the prosecution is sufficiently important to incur the national security risks.

In the past, the government has foregone prosecution of conduct it believed to violate criminal laws in order to avoid compromising national security information. The costs of such decisions go beyond the failure to redress particular instances of illegal conduct. Such determinations foster the perception that government officials and private persons with access to military or technological secrets have a broad de facto immunity from prosecution for a variety of crimes. This perception not only undermines the public's confidence in the fair administration of criminal justice but it also promotes concern that there is no effective check against improper conduct by members of our intelligence agencies.[2776]

Mr. Heymann's remarks were made in hearings on unauthorized disclosure of classified information conducted by a panel of the House Intelligence Committee in January 1979. During the previous year, a subcommittee of the Senate Select Committee on Intelligence had completed an extensive study of national security information and the administration of justice.[2777] In its subsequent report of its study, the subcommittee prefaced its detailed discussion and recommendations with the following observations on the difficulty of prosecuting national security cases:

The subcommittee discovered that enforcement of laws intended to protect national security information often requires disclosure of the very information the laws seek to protect. Indeed, the more sensitive the information compromised, the more difficult it becomes to enforce the laws that guard our national security. At times then, regardless of whether the compromise is to a

[2776] *Graymail Legislation: Hearings Before the Subcommittee on Legislation ofthe House Permanent Select Committee on Intelligence*, 96th Cong., 1st Sess. 4-6 (1979) (statement of Assistant Attorney General Philip Heymann).

[2777] Staff of the Subcommittee on Secrecy and Disclosure of the Senate Select Committee on Intelligence, 95th Cong., 2d Sess., National Security Secrets and the Administration of Justice (Comm. Print 1978)) [hereinafter cited as Senate Print]. Among the proceedings held during the study was The Use of Classified Information in Litigation: Hearings Before the Subcommittee on Secrecy and Disclosure of the Senate Select Committee on Intelligence, 95th Cong., 2d Sess. (1978).

> *newspaper reporter or directly to a foreign agent, the Government often must choose between disclosing classified information in a prosecution or letting the conduct go unpunished, In the words of one Justice Department official who testified before the subcommittee, To what extent must we harm the national security in order to protect the national security?"*[2778]

Subsequent discussion in the report further highlighted the conflicts that often exist within the Executive branch:

> *At the heart of this failure of enforcement is a very deep- seated conflict between the concerns of the intelligence community on the one hand, and the Department of Justice on the other in enforcing the espionage statutes, The conflict arises over whether publicly to disclose classified information necessary to conduct the investigation and to proceed with the prosecution. Indeed this question of whether or which classified information is to be used in a particular judicial proceeding is a pervasive problem that goes well beyond enforcement of the espionage statute.*[2779]

In light of the intrabranch conflict that it perceived to inhere in national security cases, many of the subcommittee's recommendations focused on actions within the Executive Branch, Among these recommendations were (1) development of administrative procedures for disciplining employees responsible for violations of security or other laws, (2) issuance of guidelines by the Attorney General regarding the responsibility of the intelligence community to report crimes, and (3) issuance of binding regulations by the Attorney General setting forth procedures for the provision by intelligence agencies of information relevant to criminal proceedings.[2780] Other recommendations of the subcommittee focused on suggestions for congressional legislation. Perhaps foremost among these recommendations were consideration of a special omnibus pretrial proceeding to be used in cases where national secrets were likely to arise.[2781]

In July 1979, three bills were introduced proposing procedures similar to those discussed in the report of the Senate subcommittee. These bills were H.R. 4736, the House Intelligence Committee bill; H.R. 4745, the Administration bill; and S. 1482, the Senate Judiciary Committee bill. The House bills were referred to both the House Intelligence Committee and the House Judiciary Committee. The

Subcommittee on Legislation of the House Intelligence Committee held hearings on the two House bills in August and September of 1979.[2782] Using H.R. 4736 as its vehicle, the House Intelligence Committee favorably reported a classified information procedures bill March 18, 1980.[2783] The Subcommittee on Civil and Constitutional Rights of the House Judiciary Committee held further hearings on H.R. 4736 in April and May of 1980.[2784] On September 17, 1980, the Judiciary Committee also reported H.R. 4736 favorably with an amendment requiring that reports on prosecutions implicating national security and on the operation of the legislation be submitted to both the Intelligence and the Judiciary Committee.[2785] The bill subsequently passed the House by voice vote September 22, 1980, without further amendment as its version of S. 1482.[2786] In the Senate, S. 1482 had been referred to the Senate Judiciary Committee and reported to the full Senate June 18, 1980.[2787] The bill passed the Senate by voice vote without further amendment June 25.[2788] While the versions of S. 1482 that were passed by the respective Houses were substantially similar, several differences between them remained to be resolved at conference, Among these differences were the reach of the Act (as reflected in the definition of the type of information that would trigger the pretrial procedure process), the sequence of various presentations during the pretrial hearing, and the standard for allowing presentation of evidence at trial in an alternative form, The conference resolved these issues by adopting the broader Senate version of protected information, a hybrid two-stage hearing procedure, and the more restrictive House standard for allowing disclosure of alternative evidence.[2789]

II. Procedures for Assessing Classified Information

A. Pretrial Conference

[2785] H.R. Rep. No. 96-831, Part 2, 96th Cong., 2d Sess. (1980).

[2786] 126 Cong. Rec. H9311 (daily ed. September 22, 1980).

[2787] S. Rep. No. 96-823, 96th Cong., 2d Sess. (1980).

[2788] 126 Cong. S8195 (daily ed. June 25, 1980).

[2789] H.R. Rep. No. 96-1436, 96th Cong., 2d Sess. (1980).

CIPA was enacted October 15, 1980, as Public Law 96-456,[2790] The procedures that it sets forth for early resolution of security issues begin with the right of either party or the court to call at any time after indictment for a prompt pretrial conference on matters relating to classified information that may arise during the course of the prosecution.[2791] Among the matters addressed at a pretrial conference under CIPA are the timing of discovery, the provision by the defendant of the notice of intent to disclose classified information required elsewhere in CIPA, and the initiation of hearings to determine what classified information may be presented at trial.[2792] The court also may consider other matters relating to the conduct of the trial during the pretrial conference.[2793] An admission made by the defense during a pretrial conference may not be used against the defendant unless it is in writing and signed.[2794]

B. Pretrial Discovery

With respect to discovery, CIPA allows the United States to make an *ex parte* showing to the court seeking to limit the disclosure of classified information to the defendant during the course of discovery under the Federal Rules of Criminal Procedure.[2795] Upon a sufficient showing, the court may authorize the government to delete specified items of classified information from documents to be made available to the defendant, to substitute a summary of information in classified documents for the documents themselves, or to substitute a statement admitting relevant facts that the classified information being sought would tend to prove.[2796]

The courts have upheld the examination of documents ex parte during discovery under CIPA to constitutional challenge.[2797] Furthermore, the courts also have

[2791] CIPA, § 2.

[2792] *Id.*

[2793] *Id.*

[2794] *Id.*

[2795] CIPA, § 4.

[2796] *Id.*

[2797] *United States v. Jolliff*, 548 F. Supp. 229, 231-232 (D. Md. 1981). The Federal Rules of Criminal Procedure also provide for *ex parte* examinations. Fed. R. Crim. P. 6(d)(l). Nonetheless, *ex parte* discovery proceedings still are criticized, particularly with respect to determining in what form otherwise discoverable evidence will be presented to a defendant. *E.g.*, Tamanaha, *A Critical Review of the Classified Information Procedures Act*, 13 Am. J. Cr. L. 277, 306-315 (1986) [hereinafter Tamanaha].

recognized a qualified governmental privilege to withhold certain material during discovery in CIPA cases that is similar in scope to the privilege to withhold an informant's identity recognized by the Supreme Court in Rovario v. United SWS.[2798] In CIPA cases, the government may withhold classified information during discovery without an adverse effect on its prosecution unless the defendant can show that disclosure of the information being sought not only is relevant, but also is central to the defense or is essential to a fair determination of the case.[2799] Moreover, it should be recalled that even when classified information is held to be discoverable after applying a *Rovario*-type balancing test, a court, upon a proper *ex parte* showing, still may order the release of the information sought in an alternative form.[2800] Nonetheless, courts will disallow substitution for the original information sought where it finds the proposed substitution to be inadequate to protect the defendant's interests.[2801]

C. Defendant's Notice of Classified Information

One major innovation of CIPA is to require the defendant to provide formal written notice to the government and the court of an intent to disclose classified information.[2802] Under this requirement, if a defendant reasonably expects to disclose or cause the disclosure of classified information in any manner in connection with trial or pretrial proceedings, the defendant must give notice to the court and the government within a period of time specified by the court or, where no time is specified, within thirty days prior to trial.[2803] A notice of an intent to disclose must include a brief description of the information at issue. The notice requirement is a continuing one, and whenever the defendant learns of additional classified material that he may reasonably expect to introduce, he must provide additional notice to the government and the court, Once notice is given, the defendant may not disclose information known or believed to be classified until a hearing on its use has been held and an appeal, if any, has been completed. The court may prohibit the defendant from disclosing during criminal proceedings any classified information not included in a notice and may prohibit the defendant from examining any witness with respect to that information. On the other hand, because giving prior notice may put the defendant at an unfair disadvantage, the government must provide the defendant the information it

expects to use to rebut the classified information in the notice whenever a court determines that the classified information in the notice may be disclosed during criminal proceedings. Failure by the government to provide rebuttal information may result in sanctions on the government similar to those that may be imposed upon a defendant for failure to give notice.

Various aspects of the notice requirement have been litigated before the United States district courts and courts of appeals.[2804] During the course of this litigation, the courts at times have imposed sanctions on defendants who failed to provide adequate notice and denied them opportunity to pursue certain issues at trial, Courts imposing sanctions have characterized defendant's pretrial notice as "the central document in CIPA,"[2805] explaining that "without sufficient notice that sets forth with specificity the classified information that the defendant reasonably believes necessary to his defense, the government is unable to weigh the costa of, or consider alternatives to, disclosure."[2806] Furthermore, the courta have upheld the notice requirement to constitutional challenge.[2807] The Supreme Court itself does not appear to have addressed the CIPA notice provision.[2808] It recently has, however, upheld a State Supreme Court rule that precluded the introduction of certain testimony because defendant had failed to comply with a pretrial disclosure requirement.[2809]

D. Hearings to Consider Classified Information

A pretrial notification by the defendant of an intent to introduce classified material would appear to be the primary means of alerting the court and other

---

[2804] *E.g., U.S. v. Badia*, 827 F.2d 1458 (llth Cir. 1987) (defendant's failure, despite government warning, to provide particularized notice of intent to disclose classified information held to preclude raising certain matters at trial even though the government may have had reason to believe that defendant intended to assert a defense implicating security matters); United States v. Wilson, 760 F.2d 7 (2d Cir. 1984) (notification requirement upheld to constitutional challenge based on fifth amendment); United Shtee v. Collins, 720 F.2d 1195 (llth Cir. 1983) (defendant's notice held to be too general to comply with CIPAJs requirement of a particularized notice setting forth specifically the classified information that may be disclosed); Unifed States v. Jollifi 648 F,Supp. 229 (D.Md, 1981) (notification requirement upheld to constitutional challenge).

[2806] *United States v. Badia*, 827 F.2d at 1465. See also *United States v. Collins*, 720 F.2d at 1199-1200 (requiring defendant to state with particularity which items he reasonably expects to disclose in his defense).

[2807] *See United States v. Wilson*, 750 F.2d at 9 and cases cited therein.

[2808] *E.g*., 479 U.S. 839 (1986) *denying cert. to United States v. Wilson*, 750 F.2d 7 (2d Cir. 1984).

[2809] *Taylor v. Illinois*, __U.S.__, 108 S.Ct. 646 (1988) (defendant's constitutional right to present testimony in his own behalf held not to prevent absolutely a rule that bars testimony for failure to comply with pretrial disclosure rule when weighty countervailing public interests are at stake).

parties to a prospective classified information issue at trial. Presumably, classified information isaues also could arise in other ways. For example, matters possibly could arise during trial that implicate sensitive information that could not have reasonably been foreseen prior to trial to be at issue. Also, issues relative to the government's use of classified information in its case may remain to be resolved in a judicial context. This may be so even though in many national security prosecutions any intrabranch conflict over what materials may be revealed during a public trial consistent with security interests presumably is resolved prior to a decision by the Department of Justice to seek an indictment. For example, a decision on whether to go forward with a prosecution may depend upon a ruling by the court on whether certain information may be introduced in alternative form. In other situations--prosecutions after appointment of an independent counsel under the Title VI of the Ethics in Government Act of 1978,[2810] for example-- circumstances may militate against full resolution of security issues within the Executive Branch prior to bringing formal charges.

Regardless of how classified information issues arise, however, CIPA sets forth a hearing procedure for resolving them.[2811] The hearing procedure provided, conducted at an early stage and outside of trial, determines separately (1) whether the classified information sought to be used is admissible and therefore should be disclosed[2812] and, (2) if disclosure of particular information is authorized, in what form it may be introduced.[2813] An initial hearing on classified information may be requested by the government within a period specified by the court.[2814] At issue at the hearing are "all determinations concerning the use, relevance, or admissibility of classified information that would otherwise be made during the trial or pretrial proceeding,"[2815] Both the government and the defendant may participate in a hearing, even though the hearing is conducted *in camera* upon certification by the Attorney General.[2816] The government must notify the defendant as to what material is to be considered at the hearing.[2817]

[2816] Id.

[2817] CIPA, § 6(b).

This notification may describe the material by generic category only if the material has not previously been made available to the defendant?[2818]

When the government's request for a hearing is filed prior to a particular pretrial proceeding or trial, the court must rule prior to the commencement of further proceedings.[2819] The court must state in writing the basis of its determination concerning the use, relevance, or admissibility of each item of classified information.[2820] A finding that classified information may be disclosed may trigger the alternative disclosure procedures. If the court determines that specific classified information may be disclosed, the government may move that the court, in lieu of disclosure, order the substitution of a statement admitting relevant facts or of a summary of the information.[2821]

The court is required to authorize substitution upon finding, after a further hearing, that a statement or summary will provide the defendant "with

substantially the same ability to make his defense as would disclosure of the specific classified information."[2822] In connection with the motion for substitution, the government may submit an affidavit by the Attorney General explaining the basis for the classification of the information at issue and that disclosure of the information would cause identifiable damage to the national security.[2823] An affidavit filed by the Attorney General may be examined *ex parte*.[2824]

The court must order a defendant not to disclose otherwise admissible classified information whenever a substitution motion by the government is denied and the Attorney General files an additional affidavit with the court still objecting to the

disclosure of the classified information at issue.[2825] In such an event, the court must dismiss the prosecution unless the court finds that dismissal would not serve the interests of justice and orders other appropriate action in lieu of dismissal.[2826] Further appropriate action may include, but need not be limited to, dismissing specified counts only, finding against the government on issues to which the undisclosed information pertains, or striking or precluding specified testimony.[2827] An order dismissing a prosecution in whole or part or mandating other appropriate action may not take effect until after the government has had an opportunity to appeal the order and, if the appeal is unsuccessful, to withdraw its objection to disclosure.[2828] The government may appeal a decision authorizing disclosure or imposing sanctions for nondisclosure immediately.[2829] Such an interlocutory appeal must be considered by the court of appeals on an expedited basis.[2830]

Much of the litigation on the "use, relevance, and admissibility" stage of CIPA hearings has addressed the appropriate scope of inquiry at that point. More particularly, litigants have questioned whether the government's interest in protecting classified information may be taken into account in determining what evidence may be admitted into evidence at all or whether that interest may be taken into account only when determining what alternative form, if any, otherwise admissible information may be introduced. The lead case in the area is *United States v. Smith*.[2831] Smith, a former Army employee charged with eelling certain material to the Soviet Union, sought to introduce classified information to support his defense that he had believed he was participating in a CIA double agent operation when transferred the material at iseue. The district court and a panel of the court of appeals ruled that some of the information Smith sought to introduce was admissible because it wa relevant evidence under the Federal Rules of Criminal Procedures.[2832] According to these decisions, the government's interest in protecting classified information in the hands of the defendant is

---

[2832] *United States v. Smith*, 750 F.2d 1215 (4th Cir, 1984); *United States v. Smith*, 592 F. Supp. 424 (E.D. Va. 1984).

pertinent in CIPA hearing only at the stage of determining whether otherwise relevant information may be introduced in an alternative form. The court of appeals ruling en barn disagreed.[2833] It rather held that a *Rovario*-type balancing test was appropriate not only during discovery in classified information cases, but also during relevance, use, and admissibility hearings.[2834] This ruling thus allows the government to use national security interests to preclude the introduction of some classified information altogether, rather than be restricted to using those concerns only for the purpose of substituting alternative evidence. Nonetheless, even under this ruling, the defendant may be authorized to introduce classified material upon a showing that the material is "essential" or "necessary to the defense" and not "merely cumu1ative"nor "speculative.[2835] The en barn ruling in Smith has been followed in later cases."[2836]

There does not appear to be much reported litigation on the substitution procedures that follow a finding that classified information is relevant and admissible. However, even though the government may make a more complete and *ex parte* representation to the court at that stage on the sensitivity of the material at issue, it .may be difficult to convince a court that evidence already found during the first stage of hearings to be central to the defendant's case nevertheless must be admitted only in a substituted form, Again, CPA only permits a substitution to be made if it will leave the defendant with "substantially the same ability to make his defense."[2837]

At least one court has held that introduction of edited documents would be unfair to the defendant because of their diminished effect.[2838]

E. Other CIPA Provisions

In addition to the notification and hearing procedures for determining admissibility, CIPA sets forth separate standards governing the introduction of classified information into evidence. For example, CIPA states that a court may order that only part of a classified document or a redacted version of a classified document be introduced if admission of a complete document is unnecessary and

---

[2833] *United States v. Smith*, 780 F.2d 1102 (4th Cir. 1984) (ruling 7-5 en banc).

[2834] 780 F.2d at 1106-1110.

[2835] *See* 780 F.2d at 1110.

[2836] *E.g,, United States v. Zettl*, 835 F.2d 1059 (4th Cir, 1987).

[2837] CIPA, § 6(c).

[2838] *United States v. Clegg*, 846 F.2d 1221, 1224 (9th Cir. 1988).

consideration of an incomplete document is not unfair.[2839] Furthermore, the government may object to any question or line of inquiry that may require the witness to disclose classified information not previously found to be admissible. Following an objection by the government, the court is to determine whether a prospective response may be admitted without compromising classified information.[2840] Also, in an espionage or similar case requiring the government to prove that material relates to the national defense or constitutes classified information, CIPA requires the government to notify the defendant of the specific material it expects to rely upon to establish the national security element of the offense so that the defendant may have adequate time to prepare a defense.[2841]

Two provisions of CIPA require other branches of government to adopt procedures relating to classified and the courts. First, CIPA directs the Chief Justice of the United States, in consultation with the Attorney General, the Director of Central Intelligence, and the Secretary of Defense, to prescribe rules establishing procedures for the protection of classified information in the custody of the federal courts.[2842] Chief Justice Burger complied with this directive and issued security procedures February 12, 1981.[2843] Second, CIPA directs the Attorney General to issue guidelines specifying the factors to be used by the Department of Justice in deciding whether to undertake a prosecution in which classified information may be revealed.[2844] Third, CIPA further requires the Justice Department to prepare detailed written findings whenever it declines to prosecute a case pursuant to the guidelines.[2845] Decisions not to prosecute under the guidelines also must, "c]onsistent with applicable authorities and duties, including those conferred by the Constitution upon the executive and legislative branches," be reported by the Justice Department to the respective Intelligence Committees and Judiciary Committees.[2846]

[2839] CIPA, § 8(b).

[2840] Presumably these provisions primarily are intended to supplement the notice and hearing requirements that apply when a defendant has a reasonable expectation that classified information may be disclosed. In other words, the provisions appear primarily intended to cover those situations where the defendant does not have a reasonable expectation that classified information is implicated and does not realize that an answer to his inquiries may be classified.

[2845] CIPA, § 12(b).

[2846] CIPA, § 13.

III. Criticism and Recent Developments: Rulings in the Trial of Lt. Col. Oliver North

In their discussions of CIPA, courts and commentators have remarked that the Act is not intended to make substantive changes regarding defendants' rights and the use of classified information.[2847] Rather, according to these authorities, CIPA is intended only to put in place procedural rules that facilitate early rulings on the admissibility of classified information alleged to be at issue and on the acceptability of substitutions for evidence found to be both sensitive and admissible.[2848] At times, however, the procedural scheme set forth in CIPA itself may be seen as adversely affecting a defendant's rights, particularly where the defense expects to introduce a large amount of relevant classified information.

Orders of District Judge Gesell issued in the course of proceedings arising from the Iran-Contra affair illustrate how close adherence to CIPA may be seen ae compromising a defendant.[2849] The focus of the Iran-Contra affair are allegations that certain individuals secretly applied funds, including funds generated by a classified government effort to free Americans held in the Middle East, to various unauthorized purposes through deceiving Congress, obstructing investigations, and other unlawful means.[2850] Of the four individuals indicted so far through the Independent Counsel appointed to investigate these events, most of the CIPA litigation has concerned the prosecution of Lieutenant Colonel Oliver North. After observing that "the most sensitive information and most critical national security intelligence methods and sources available to the government" appeared to be "inextricably enmeshed in the events challenged by the indictment [of Lt. Col. North]," Judge Gesell stated the following regarding the application of CIPA:

> *It will be impossible to conduct this case under the precise strictures of CPA, not only because of this broad intrusion into classified areas of information but also because it is impossible in advance to determine and correctly rule on all issues of relevance, materiality and admissibility. It probably was never contemplated that classified information problems of this magnitude would be presented to a trial judge in a case ...*
>
> ...

[2847] *Eg., United States v, Smith*, 780 F.2d at 1106 (majority opinion), 1112 (dissent); *Tamamha, supra* n.28, at 294.

[2848] Id.

[2849] *United Stubs v. Poindexter*, 698 F. Supp. 316 (D.D.C. 1988); *Unites States v. North*, 698 F. Supp. 323 (D.D.C. 1988).

[2850] 698 F. Supp, at 302.

> *[In enacting CIPA Congress] emphasized that the Court should not undertake to balance the national security interests of the government against the rights of the defendant but rather that in the end remedies and sanctions against the government must be designed to make the defendant whole again. Thus while a limited opportunity for creative judicial adjustment of CIPA procedures exists, in the end, defendant's constitutional rights must control.*
>
> *. . . Counsel for North has urged that strict application of CIPA will force North to reveal to the government well in advance his strategy, his evidence, and, indeed, even aspects of his defense. . . . This, it is argued with considerable force, will place North at a practical and tactical disadvantage, infringing upon his constitutional rights under the Fifth and Sixth Amendments. . . . The Court has determined that many of these concerns can hopefully be avoided by applying pretrial procedures consistent with the congressional intent underlying CIPA. A way must be found to preserve defendant's constitutional rights that still affords adequate protection for national security concerns.*[2851]

Judge Gesell thus saw his task not as applying CIPA, which he believed would infringe upon the rights of Lt. Col. North, but rather as trying to at least preserve the spirit of CIPA by fashioning procedures that were tailored to the needs of the case before him. The procedure subsequently outlined by Judge Gesell largely followed the notice provisions in CIPA but differed from CIPA in the diminished role given to the prosecution and, to a lesser degree, the court during pretrial review of material intended to be used by the defense. Rather than determining use and relevance issues at hearings where the prosecution was to be present, as is the case under CIPA, Judge Gesell set out a procedure under which the court and the defense alone were to meet concerning the use and relevance of item contained in the notice given by the defense. At these ex prte meetings, the judge was to actively explore with defense counsel possible substitutions for the classified information sought to be introduced, After the court, without divulging defeme strategy, then ruled on the relevance and materiality of the remaining classified documente contained in the defense's notice, the court was to notify the interagency hkforce that was determining which documents could be released for the purpose of having these remaining documents reviewed, Only then could the prosecuting Independent Counsel become actively involved in examining materials in the defense's case, and this participation was limited to seeking substitutions for documents found by the taskforce to be too sensitive for full disclosure, Beyond reviewing classified documents contained in the defense's notice, Judge Gesell refused to consider in advance the subjects to be covered in the defense's opening statement or in the testimony of the defense witnesses,

---

[2851] 698 F. Supp. at 319, 320, 321.

including the defendant's. Judge Gesell also gave the defense broad rights to discover information redacted in documents intended to be used by the prosecution.[2852]

IV. Conclusion

In ruling that CIPA procedures must give way when they risk excessive exposure of the defendant's case, Judge Gesell highlights the limited efficacy of CIPA in highly sensitive cases. Judge Gesell's opinion suggests that the more a defendant relies on sensitive information, the more difficult it is to fashion procedures for resolving security issues. Furthermore, CIPA never has been seen as assuring that all security issues could be resolved. Rather CIPA is most effective as a means for resolving potentially troublesome cases in which the classified information at risk proves to be only marginally relevant or marginally sensitive. It remains problematic whether the disclose or dismiss dilemma posed by a prosecution involving sensitive information at its core can be resolved in a manner that preserves the rights of the defendant.

Resources, Science, and Industry Division

Summary

The Communications Assistance for Law Enforcement Act (CALEA, P.L. 103414, 47 U.S.C. 1001-1010), enacted October 25, 1994, is intended to preserve the ability of law enforcement officials to conduct electronic surveillance effectively and efficiently despite the deployment of new digital technologies and wireless services that have altered the character of electronic surveillance. CALEA requires telecommunications carriers to modify their equipment, facilities, and services, wherever reasonably achievable, to ensure that they are able to comply with authorized electronic surveillance actions.

Since 2004, the Federal Communications Commission (FCC) has been considering a number of questions as to how to apply CALEA to new technologies, such as Voice over Internet Protocol (VoIP). In August 2005, in response to a March 2004 petition by a group of law enforcement agencies, the FCC released a Notice of Proposed Rulemaking and Declaratory Ruling which required providers of certain broadband and interconnected VoIP services to accommodate law enforcement wiretaps. The FCC found that these services could be considered replacements for conventional telecommunications services already subject to wiretap rules, including circuit-switched voice service and dial-up Internet access. The Order is limited to facilities-based broadband Internet access service providers and VoIP providers that offer services that use the public switched telephone network ("interconnected VoIP providers).

In May 2006, the FCC addressed several outstanding issues regarding CALEA implementation. Among other clarifications, the FCC (1) affirmed its May 14, 2007 compliance deadline for facilities-based broadband Internet access and interconnected VoIP services, and clarified that the date applied to all such providers; (2) explained that the FCC does not plan to intervene in the standards-setting process in this matter; (3) permitted telecommunications carriers the option of using Trusted Third Parties to assist in meeting their CALEA obligations; (4) restricted the availability of compliance extensions to equipment, facilities, and services deployed prior to October 25, 1998; (5) found that the FCC may enforce action under section 229(a) of the Communications Act against carriers that fail to comply with CALEA; and (6) concluded that carriers are responsible for CALEA development and implementation costs for post-January 1, 1995, equipment and facilities, and declined to adopt a national surcharge to recover CALEA costs.

In June 2006, the United States Court of Appeals for the District of Columbia Circuit affirmed the FCC's decision concluding that VoIP and facilities-based broadband Internet access providers have CALEA obligations similar to those of telephone companies.

Background

In the early 1990s the Federal Bureau of Investigation (FBI) asked Congress for legislation to assist law enforcement agencies to continue conducting electronic surveillance. The FBI argued that the deployment of digital technologies in public telephone systems was making it increasingly difficult for law enforcement agencies to conduct electronic surveillance of communications over public telephone networks. As a result of these arguments and concerns from the telecommunications industry,[2853] as well as issues raised by groups advocating protection of privacy rights,[2854] the Communications Assistance for Law Enforcement Act (CALEA) was enacted on October 25, 1994 (47 U.S.C. 1001-1021), in the final days of the 103rd Congress.

CALEA is intended to preserve the ability of law enforcement officials to conduct electronic surveillance effectively and efficiently, despite the deployment of new digital technologies and wireless services by the telecommunications industry.

[2853] In this report, the telecommunications industry includes common carrier telephone companies, mobile wireless telecommunications providers, telecommunications equipment manufacturers, and other entities that provide telecommunications services to the public.

[2854] Privacy rights groups involved in the CALEA debate include the Electronic Privacy Information Center, the Electronic Frontier Foundation, advocacy groups which both support on-line privacy rights of individuals, the Center for Democracy and Technology, which also advocates electronic privacy (and is funded primarily by the telecommunications, computer, and media industries), and the American Civil Liberties Union (ACLU), which represents a broad array of civil rights based on the First and Fourth Amendments.

CALEA requires telecommunications carriers to modify their equipment, facilities, and services to ensure that they are able to comply with authorized electronic surveillance. These modifications were originally planned to be completed by October 25, 1998. Since that time, the Federal Communications Commission (FCC) issued two additional orders establishing June 30, 2002, as the date by which telecommunications carries must have upgraded all their systems.[2855] Equipment manufacturers have fulfilled their obligation to provide CALEA solutions and carriers are implementing them. The FBI and FCC continue to monitor and review the implementation of this program.

Some Technical Terms

As a result of the revolution in digital technology in telecommunications, the process of wiretapping and other electronic surveillance has become more complex, and legal ambiguities have been introduced. As a background to understanding the problems associated with CALEA implementation, the definitions of several terms are necessary. Electronic surveillance refers to either the interception of communications content (as in a conversation) also known as wiretapping, or the acquisition of call-identifying information (the number dialed). The latter activity is accomplished through the use of pen register devices, which capture call-identifying information for numbers of outgoing calls from the location of lawful interception, and traps and traces, which capture information for numbers received at the location of lawful interception, much like consumer caller ID systems. Under current federal law, law enforcement (i.e., police or the FBI) must obtain a court order before conducting any of these activities. However, a wiretap requires a higher "evidentiary burden" than a pen register or trap and trace, including showing that there is probable cause for believing that a person is committing one of a list of specific crimes.[2856]

Under traditional analog technology, it was easy to separate the above categories of electronic surveillance. However, the advent of digital signal transmission technologies has made that distinction less clear. Information signals (voice or data) can be transmitted over telephone networks in one of two ways: circuit-switched and packet-switched modes.[2857] In circuit-switched systems, a communications path is established between the parties and dedicated

[2856] See CRS Report 98-326, Privacy: An Overview of Federal Statutes Governing Wiretapping and Electronic Eavesdropping, by Gina Stevens and Charles Doyle.

[2857] Switches are network devices that select a path or circuit for sending data to its next destination over the telephone network. Switches may also include functions of the router, a device also used in computer networks, that determines the route and adjacent network point for data to be sent.

exclusively to one conversation for the duration of the call. In packet-switched systems, the information is broken down into smaller pieces called "packets"using a digital process. Each packet contains a small part of the message content along with call-identifying information called a "header" that indicates the origination and destination points of the information. Each packet is transmitted separately and is reassembled into the complete message at the destination point.

The packet-switched mode is the signal transmission technology used in all Internet communications. Packet switching is considered a more efficient use of a network than circuit switching because the same line can be used for multiple communications simultaneously. Although the circuit-switched mode was historically used in all voice telephone calls, the packet-switched mode is increasingly being used for voice and data transmissions over telephone networks.

CALEA's Main Provisions

CALEA requires telecommunications carriers to assist law enforcement in performing electronic surveillance on their digital networks pursuant to court order or other lawful authorization. The telecommunications industry, privacy rights groups, and law enforcement agencies agree that CALEA was not intended to expand law enforcement's authority to conduct electronic surveillance. On the contrary, CALEA was intended only to ensure that after law enforcement obtains the appropriate legal authority, carriers will have the necessary capabilities and sufficient capacity to assist law enforcement in conducting digital electronic surveillance regardless of the specific telecommunications systems or services deployed.

CALEA (47 U.S.C. 1002) directs the telecommunications industry to design, develop, and deploy solutions that meet certain assistance capability requirements for telecommunications carriers to support law enforcement in the conduct of lawfully-authorized electronic surveillance. Pursuant to a court order or other lawful authorization, carriers must be able, within certain limitations, to: (1) expeditiously isolate all wire and electronic communications of a target transmitted by the carrier within its service area; (2) expeditiously isolate call-identifying information that is reasonably available on a target; (3) provide intercepted communications and call-identifying information to law enforcement; and (4) carry out intercepts unobtrusively, so targets are not made aware of the electronic surveillance, and in a manner that does not compromise the privacy and security of other communications.

To allow carriers to give law enforcement the means to conduct its wiretaps, CALEA (47 U.S.C. 1003) requires the Attorney General to determine the number of simultaneous interceptions (law enforcement agencies' estimate of their maximum capacity requirements) that telecommunications carriers must be able to support.

To maintain privacy rights of individuals, CALEA (47 U.S.C. 1004) requires telecommunications carriers to ensure that any interception of communications or access to call-identifying information that is conducted within their premises can only be done with a court order. It also requires the specific intervention of an officer or employee of the carrier acting in accordance with regulations prescribed by the Federal Communications Commission (FCC).

CALEA (47 U.S.C. 1005) directs telecommunications carriers to consult with telecommunications equipment manufacturers to develop equipment necessary to comply with the capability and capacity requirements identified by the FBI. For efficient industry-wide implementation of the above requirements, CALEA (47 U.S.C. 1006) directs the law enforcement community to coordinate with the telecommunications industry and state utility commissions to develop suitable technical standards and establish compliance dates for equipment. In its *Eighth Annual Report*, the FBI stated that, "to date, most manufacturers have either complete, or nearly complete, CALEA solutions available for their carrier customers."[2858]

CALEA (47 U.S.C. 1008) gives the Attorney General, subject to the availability of appropriations, authority to pay telecommunications carriers for all reasonable costs directly associated with the modifications performed by carriers in connection with equipment, facilities, and services installed or deployed on or before January 1, 1995 (known as the "grandfather" date).

Major Events Following Enactment of CALEA

Initial Delays

CALEA gave implementation responsibility to the Attorney General, who, in turn, delegated the responsibility to the FBI. The FBI leads that nationwide effort on behalf of federal, state, and local law enforcement agencies. FBI officials initially anticipated that it would take a year for a standard to be developed and agreed upon by law enforcement, the telecommunications carriers, and the equipment manufacturers. Telecommunications consultants estimated that it would take the industry another three years to design, build and deploy new systems to comply with CALEA. Instead, industry and law enforcement became involved in a protracted dispute over what should be required for law enforcement's wiretapping capabilities.

By March 1997, the completion of the capability standard was overdue by 16 months. The FBI attempted to expedite the industry's implementation of CALEA by releasing regulations that included a cost recovery plan for the federal government's payment of costs associated with CALEA, as well as capability and

[2858] Eighth Annual Report, p. 5.

capacity requirements for the industry to meet. The plan required more extensive upgrades to networks than the telecommunications industry believed were necessary for law enforcement to preserve its wiretapping capabilities. Industry groups and privacy advocates disputed the FBI's plan. They argued that the FBI was attempting to expand its surveillance capabilities beyond the congressional intention of CALEA, and was attempting to unfairly shift costs and accountability away from the federal government onto private industry. Furthermore, the industry argued that, without an adopted capability standard, it could not begin designing, manufacturing, and purchasing the equipment to achieve CALEA compliance.

In December 1997, the Telecommunications Industry Association (TIA, representing telecommunications equipment manufacturers) adopted, over the objections of the law enforcement community, a technical standard, J-STD-025, also known as the "J-standard." This standard prescribes upgrades to network devices to meet CALEA's assistance capability requirements for local exchange, cellular, and broadband personal communications services (PCS). Although the FBI claimed that the J-standard did not provide all of the capabilities needed, the industry asserted that CALEA's language stated that telecommunications carriers would be compliant if they met publicly available standards adopted by the industry.

Privacy rights groups, on the other hand, protested two aspects of the J-standard that they asserted would make information beyond what is legally required available to law enforcement. One was a feature enabling the telecommunications network to provide location information for users of mobile wireless telecommunications services. The location information protocols in J-STD-025 allow law enforcement agencies to obtain information on the physical location of the nearest cell site (i.e., the receiver/transmitter antenna and base station) of mobile phone handsets at the beginning and end of each call. Wireless carriers are now deploying another technology (called triangulation) that will enable the carriers, and law enforcement, to track wireless telephone users more precisely, potentially within a few meters. The other was a feature enabling the network to access packet-mode data from telephone calls using more advanced systems. Privacy rights groups argued that these capabilities would violate the Fourth Amendment rights of individuals against unreasonable searches and seizures. Despite these objections, telecommunications manufacturers began designing new switches and upgrades to existing switches according to the J-standard.

Currently, equipment manufacturers have successfully incorporated the J-standard into their new equipment and carriers are now well underway with their efforts to upgrade their systems.

The FBI's "Punch List"

In the negotiations to develop the J-standard, TIA had refused to include some of the capabilities that law enforcement officials claimed they needed to facilitate

digital wiretapping. As a result, in March 1998, the FBI petitioned the FCC to require the telecommunications industry to adopt eleven additional capabilities. Industry and privacy rights groups protested that the FBI's plan would unlawfully expand enforcement capabilities. Eventually, the "punch-list"[2859] included the following six[2860] items:

- Content of subject-initiated conference calls — Would enable law enforcement to access the content of conference calls supported by the subject's service (including the call content of parties on hold).
- Party hold, join, drop — Messages would be sent to law enforcement that identify the active parties of a call. Specifically, on a conference call, these messages would indicate whether a party is on hold, has joined or has been dropped from the conference call.
- Subject-initiated dialing and signaling information — Access to all dialing and signaling information available from the subject would inform law enforcement of a subject's use of features (such as the use of flash-hook and other feature keys).
- In-band and out-of-band signaling (notification message) — A message would be sent to law enforcement whenever a subject's service sends a tone or other network message to the subject or associate (e.g., notification that a line is ringing or busy).
- Timing information — Information necessary to correlate call-identifying information with the call content of a communications interception.
- Dialed digit extraction — Information would include those digits dialed by a subject after the initial call setup is completed.[2861]

Capacity Requirements

The FBI's subsequent implementation actions were also opposed by the telecommunications industry. In March 1998, the FBI announced its estimated capacity requirements for local exchange, cellular, and broadband PCS.[2862] The industry protested the FBI's estimates, arguing that it would require telephone carriers to accommodate thousands of wiretaps simultaneously, an impractical and unnecessary burden. In July 1998, the FBI developed guidelines and procedures to facilitate small carrier compliance with its capacity requirements,

---

[2859] The "punch list" was named as such by the telecommunications industry, which believed the FBI was improperly forcing industry to comply with the FBI's requirements.

[2860] The additional capabilities originally requested by the FBI that were not included were: standardized delivery interface; separated delivery, surveillance status; continuity check tone (c-tone); and feature status.

[2861] Federal Register 63 page 63639, FCC, Further Notice of Proposed Rulemaking, November 16, 1998.

[2862] Federal Register 63, page 12217, FBI, Final Notice of Capacity, March 12, 1998.

and asked carriers to identify any systems or services that did not have the capacity to accommodate those requirements. In December 1998, the FBI began a proceeding to develop capacity requirements for services other than local exchange, cellular, and broadband PCS, asked additional questions of interested parties in June 2000.[2863] These technologies and services included paging, mobile satellite services, specialized mobile radio, and enhanced specialized mobile radio. To date, the proceeding is still pending.

Previous FCC Actions

As a result of petitions from the industry and the FBI, the FCC became involved in the implementation of CALEA. In October 1997, the FCC released its first Notice of Proposed Rule Making (NPRM) on CALEA implementation.[2864] The NPRM sought comments from interested parties regarding a set of policies and procedures proposed by the FCC for telecommunications carriers to follow. The proposed procedures would (1) preclude the unlawful interception of communications, (2) ensure that authorized interceptions are performed, (3) maintain secure and adequate records of any interceptions, and (4) determine what entities should be subject to these requirements, whether the requirements are reasonable, and whether to grant extensions of time for compliance with the requirements.

In response to the NPRM, telecommunications carriers, privacy rights groups, and the FBI submitted comments to the FCC to attempt to influence the final decision. Then, in April 1998, the FCC released a Public Notice requesting comments on issues raised in those petitions concerning the dates that carriers were required to comply with CALEA and the dispute over the J-standard. Based on comments it received, the FCC extended the implementation deadline until June 30, 2000, stating that without a standard, the necessary equipment would not be available in time.[2865]

In October 1998, the FCC initiated a proceeding to review the technical capabilities prescribed by the J-standard.[2866] The goal of that proceeding was to determine whether telecommunications carriers should be required under CALEA to meet the FBI's "punch list" items. The FCC addressed these issues in

several documents released over the following year. In March 1999, the FCC's First Report and Order established the minimum capability requirements for telecommunications carriers to comply with CALEA.[2867] Telecommunications carriers were required to ensure that only lawful wiretaps occur on their premises and that the occurrence of wiretaps is not divulged to anyone other than authorized law enforcement personnel. On August 2, 1999, the FCC decided to allow carriers to decide how long they would maintain their records of law enforcement's wiretap, pen register, and trap and trace interceptions.[2868] On August 31, 1999, the Second Report and Order established a definition for "telecommunications carrier" to include all common carriers, cable operators, electric and other utilities that offer telecommunications services to the public, commercial mobile radio services, and service resellers.[2869] The definition did not include Internet service providers (ISPs), which were explicitly excluded under the CALEA statute.

The FCC's Third Report and Order, released August 31, 1999, adopted technical requirements for wireline, cellular, and broadband PCS carriers to comply with CALEA requirements.[2870] The ruling adopted the J-standard, including the two capabilities that were opposed by the privacy rights groups (i.e., the ability to provide location information and packet-mode data to law enforcement). As described above, the FCC also adopted six of the punch list capabilities requested by the FBI to be implemented by telecommunications carriers. The Order required all aspects of the J-standard except for the packet-mode data collection capability to be implemented by June 30, 2000. The Order required carriers to comply with the packet-mode data capability and the six punch list capabilities by September 30, 2001.[2871] (The FCC ultimately extended the date by which all telecommunications carriers must have upgraded their systems to June 30, 2002.[2872])

On April 9, 2001, the FCC adopted its Second Order on Reconsideration,[2873] which clarified the arrangements telecommunications carriers must make to

ensure that law enforcement agencies can contact them when necessary, and the interception activity that triggers a record-keeping requirement.

In September 2001, FCC released a tandem Order[2874] and Public Notice[2875] on CALEA implementation. In the Order, the Commission extended until November 19, 2001, the deadline by which wireline, cellular, and broadband personal communications services (PCS) carriers must implement a packet-mode communications electronic surveillance capability, or to seek individual relief under section 107(c) of CALEA. The notice explained the petitioning process for telecommunications carriers seeking relief under section 107(c) for an extension of the new compliance deadline with respect to packet-mode communications, as well as other safe harbor standards.

Finally, on April 11, 2002, the FCC released an Order on Remand,[2876] which responded to a decision issued by the United States Court of Appeals for the District of Columbia Circuit[2877] vacating four of the punch list electronic surveillance capabilities mandated by the Third Report and Order in this proceeding. The FCC found that all of the capabilities were necessary and authorized by CALEA and had to be provided by wireline, cellular, and broadband PCS telecommunications carriers by June 30, 2002. The FCC also required that two additional punch list capabilities that were mandated by the Third Report and Order, but not reviewed by the Court of Appeals be provided by that same date.

The FCC granted preliminary extensions to requesting carriers with respect to punch list implementation that will expire on June 30, 2004. It granted preliminary extensions in connection with "packet" services that had been scheduled to expire on November 19, 2003, but that date was further extended to January 30, 2004. No further action with respect to that extension has been taken.

Government Activity: 2004 - Present

The FBI and other law enforcement agencies, the FCC, and Congress are all concerned with CALEA-related issues, particularly with respect to packet-based services (i.e., voice over Internet Protocol [VoIP]) and "push-to-talk" services offered by wireless providers.

FBI Activity

The FBI has remained active in promoting its positions related to its CALEA powers.

Comments to the FCC's Wireless Broadband Task Force Report

On April 22, 2005, the DOJ filed comments on the FCC's Wireless Broadband Task Force Report,[2878] requesting that the FCC "continue to preserve the vital national security and criminal law enforcement capabilities of CALEA as it develops a deregulatory framework for wireless broadband Internet access services." Reply comments in the proceeding were due May 23, 2005.

Notice of Information Collection Under Review

On April 13, 2005, the FBI published a 60-day Notice of Information Collection Under Review.[2879] The notice announced a CALEA Readiness Survey program, which seeks to evaluate the effectiveness of CIU programs for implementing CALEA solutions in the Public Switched Telephone Network. Comments in this proceeding were accepted until June 13, 2005.

Petition for Declaratory Ruling

On March 10, 2004, the FBI, the Department of Justice (DOJ), and the Drug Enforcement Administration petitioned the FCC to identify additional telecommunications services not identified specifically within CALEA that should be subject to it.[2880] The services named in the FBI petition include some now considered beyond the scope of CALEA by many observers, including services that fall under the FCC's definition of "information services" under the Communications Act of 1934. However, CALEA provides the FCC a broader framework to determine that a service is a "telecommunications service." Comments and replies to the petition were due April 12 and April 27, 2004, respectively. The FCC ruled on this Petition on August 5, 2005, discussed below (See "FCC Action," page 10).

Inspector General Report

[2879] 70 Fed. Reg. 19,503 (2005). This document is available online at [http://www.askcalea.net/docs/20050413_70fr19503.pdf].

[2880] Joint Petition for Expedited Rulemaking of United States Department of Justice, Federal Bureau of Investigation, and Drug Enforcement Administration, RM-10865, March 10, 2004.

The FBI's Inspector General issued a report in April 2004 on CALEA implementation.[2881] In its report, the IG expressed concern over the cost estimates for obtaining CALEA compliance, which have varied widely. Industry has stated it believes estimates full compliance will cost approximately $1.3 billion; the FBI has estimated costs in the range of $500 million to $1 billion. Further, in December 2003, the FBI estimated that an additional $204 million would be necessary to complete deployment of CALEA. The IG stated in its report that it did not believe implementation costs could be determined with any degree of specificity, but that it was unlikely CALEA could be implemented with the $49.5 million that remains unobligated from current funding.

FCC Activity

In response to law enforcement's petition and after considering the comments and replies from interested parties, the FCC released an NPRM and Declaratory Ruling on August 4, 2004.[2882] Additionally, the FCC has issued two Orders in this matter.

Declaratory Ruling

In the Declaratory Ruling accompanying the NPRM, the FCC clarified that commercial wireless "push-to-talk" services are subject to CALEA, regardless of the technologies that wireless providers choose to apply in offering them.

First Report and Order

On August 5, 2005, the FCC ruled that providers of certain broadband and interconnected VoIP services must accommodate law enforcement wiretaps.[2883] The FCC found that these services can be considered replacements for conventional telecommunications services currently subject to wiretap rules, including circuit-switched voice service and dial-up Internet access. As such, the new services are covered by CALEA, which requires the FCC to preserve the ability of law enforcement to conduct wiretaps as technology evolves. The rules

[2881] U.S. Department of Justice, Office of the Inspector General of the, entitled "Implementation of the Communications Assistance for Law Enforcement Act by the Federal Bureau of Investigation," available at [http://www.usdoj.gov/oig/reports/FBI/ a0419/index.htm], April 7, 2004.

[2882] In the Matter of Communications Assistance for Law Enforcement Act and Broadband Access and Services, Notice of Proposed Rulemaking and Declaratory Ruling, FCC 04-187, ET Docket 04-295, RM-10865, adopted August 4, 2004, released August 9, 2004. Available online at [http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-04-187A1.pdf]. See also Federal Register 69, page 56976.

[2883] In the Matter of Communications Assistance for Law Enforcement Act and Broadband Access and Services, First Report and Order and Further Notice of Proposed Rulemaking, FCC 05-153, ET Docket 04-295, RM-10865, adopted August 5, 2005, released September 23, 2005. Available online at [http://hraunfoss.fcc.gov/edocs_public/attachmatch/ FCC-05-153A1.pdf].

are limited to facilities-based broadband Internet access service providers and VoIP providers that offer services permitting users to receive calls from, and place calls to, the public switched telephone network — these providers are called interconnected VoIP providers.

In making its ruling, the FCC found that the definition of "telecommunications carrier" in CALEA is broader than the definition of that term in the Communications Act and can, therefore, include providers of services that are not classified as telecommunications services under the Communications Act. CALEA contains a broader definition of telecommunications provider that authorizes the FCC to classify an entity a telecommunications carrier if it finds that such service is a replacement for a substantial portion of the local telephone exchange.

The FCC established a deadline of 18 months from the effective date of the Order for providers to achieve full compliance and adopted a Further Notice of Proposed Rulemaking to seek more information about whether specific classes of facilities-based broadband Internet access providers should be exempt from CALEA (i.e., small and rural providers and providers of broadband networks for educational and research institutions).

A coalition of organizations filed a Petition for Review with the United States Court of Appeals for the District of Columbia Circuit on October 25, 2005.[2884] Specifically, the "petitioners seek relief from the Order on the grounds that it exceeds the Commission's statutory authority and is arbitrary, capricious, unsupported by substantial evidence, and contrary to law. Petitioners request that this Court vacate the Order and the Final Rules adopted therein and grant such other relief as may be appropriate."[2885]

Second Report and Order

On May 3, 2006,[2886] the FCC addressed several issues regarding CALEA implementation, specifically, the Order:

- Affirms the May 14, 2007, CALEA compliance deadline for facilities-based broadband Internet access and interconnected VoIP services (as

---

[2884] The coalition is composed of CompTel, American Library Association, Association of Research Libraries, Center for Democracy & Technology, Electronic Frontier Foundation, Electronic Privacy Information Center, Pulver.com, and Sun Microsystems.

[2885] A copy of the Petition, No. 05-1408, is available online at [http://www.cdt.org/ digi_tele/20051025caleapetition.pdf].

[2886] In the Matter of Communications Assistance for Law Enforcement Act and Broadband Access and Services, Second Report and Order and Memorandum Opinion and Order, FCC 06-56, ET Docket 04-295, adopted May 3, 2006. This Order has not yet been released, but the news release is available online at [http://hraunfoss.fcc.gov/edocs_public/ attachmatch/DOC-265221A1.pdf].

established by the First Report and Order) and clarifies that the date will apply to all such providers.
- Explains that the FCC does not plan, at this time, to intervene in the standards-setting process in this matter.
- Permits telecommunications carriers the option of using Trusted Third Parties (TTPs) to assist in meeting their CALEA obligations.
- Restricts the availability of compliance extensions to equipment, facilities, and services deployed prior to October 25, 1998.
- Finds that the commission may, in addition to law enforcement remedies available through the courts, take separate enforcement action under section 229(a) of the Communications Act against carriers that fail to comply with CALEA.
- Concludes that carriers are responsible for CALEA development and implementation costs for post-January 1, 1995, equipment and facilities, and declines to adopt a national surcharge to recover CALEA costs.
- Requires all carriers providing facilities-based broadband Internet access and interconnected VoIP service to submit interim reports to the FCC to ensure that they will be CALEA-compliant by May 14, 2007, and also requires all such providers to which CALEA obligations were applied in the First Report and Order to come into compliance with the system security requirements in the commission's rules within 90 days of the effective date of this Second Report and Order.

Court Challenge

In June 2006, the United States Court of Appeals for the District of Columbia Circuit affirmed the FCC's decision concluding that VoIP and facilities-based broadband Internet access providers have CALEA obligations similar to those of telephone companies.[2887]

Congressional Activity: 108th-110th Congress

No bills have been introduced in the 110th Congress and none were introduced during the 109th Congress that would have amended the CALEA statute. Two bills were introduced in the 108th Congress that would have had an impact on CALEA-related powers for law enforcement, although neither would have actually amended the CALEA statute.

House of Representatives, 108th Congress

In the House of Representatives, H.R. 4129, the VOIP Regulatory Freedom Act of 2004, was introduced by Representative Pickering on April 2, 2004, and referred to the Committee on Energy and Commerce, Subcommittee on

[2887] American Council on Education v. FCC, No. 05-1404 (Consolidated with 05-1408, 05-1438, 05-1451, 05-1453). Argued May 5, 2006; decided June 9, 2006. Available online at [http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-266204A1.pdf].

Telecommunications and the Internet on April 8, 2004.[2888] The subcommittee also held a hearing on September 8, 2004, "Law Enforcement Access to Communications in a Digital Age." Although that hearing was not held specifically to address H.R. 4129, it did touch on many of the implementation issues that are facing service providers and law enforcement.[2889]

Senate, 108th Congress

In the Senate, S. 2281, the VOIP Regulatory Freedom Act of 2004, was introduced and referred to the Committee on Commerce, Science, and Transportation by Senator Sununu on April 5, 2004. This bill was intended as a companion bill to H.R. 4757, the Advanced Internet Communications Services Act of 2004, although H.R. 4757 did not contain any CALEA-related provisions.

A hearing on S. 2281 was held by the Committee on Commerce, Science, and Transportation on June 16, 2004,[2890] and the bill was ordered to be reported with an amendment in the nature of a substitute favorably on July 22, 2004; the substitute language was significantly different than that in the original bill. On November 19, 2004, the bill was again reported by Senator McCain and placed on the Senate Legislative Calendar, first without written a report on November 19, 2004, and then with a written report on December 7, 2004 (see S.Rept. 108-425).

Comparison of the House and Senate CALEA-Related Provisions in the 108th Congress

Neither bill would have amended CALEA — each provided its own statutory requirements separate from CALEA. However, the House bill contained much more specific language than the Senate bill, which only stated that the FCC "shall require a provider of a connected VoIP application to provide access to necessary information to law enforcement agencies not less than that require of information service providers."[2891] A "connected VoIP application" is defined in both bills as "a VoIP application that is capable of receiving voice communications from or sending voice communications to the public switched network, or both."

[2888] The VOIP Regulatory Freedom Act of 2004, H.R. 4129, Section 4 (c)(1)-(3).

[2889] The House held other hearings during the 108th Congress that addressed telecommunications and Internet-related issues. A full list of the hearings held by the Committee on Energy and Commerce is available online at [http://energycommerce.house.gov/108/action.htm].

[2890] The Senate held other hearings during the 108th Congress that addressed telecommunications and Internet-related issues. A full list of the hearings held by the Committee on Commerce, Science, and Transportation is available online at [http://commerce.senate.gov/hearings/index.cfm].

[2891] The VOIP Regulatory Freedom Act of 2004, S. 2281, Section 4 (c).

The House bill, which was seen as much more favorable to law enforcement interests than the Senate bill, would have required the FCC to conduct a proceeding within 180 days of the date of enactment to "determine whether it is technologically feasible and reasonable" to apply the assistance capability requirements now applied to the "equipments, facilities, or services of a telecommunications carrier" to a connected VoIP application.[2892] If the FCC were to have made an affirmative determination in this case, it would have be required to establish "rules, technical requirements, and standards" to apply such requirements while also protecting privacy and security, minimizing the costs of implementation, continuing to encourage the development of new technologies, and providing a reasonable time for compliance. In developing these rules, the FCC would have been required to consult with affected service providers, equipment manufacturers, the U.S. Attorney General, state and local law enforcement, and other interested parties.[2893]

[2892] The bill would also require the FCC to undertake such a proceeding every six months until such time as a determination is made.

[2893] See also Tech Law Journal, "Summary of VOIP Related Bills," July 21-25, 2004. Available online at [http://www.techlawjournal.com/home/newsbriefs/2004/07e.asp]. This article also contains a comparison of the non-CALEA-related provisions of these bills.

TITLE 50: WAR AND NATIONAL DEFENSE

50 U.S.C. Chapter 15: National Security (50 U.S.C. §§ 401-442a)

Subchapter III: Accountability for Intelligence Activities (50 U.S.C. §§ 413-415c)

Sensitive Covert Action Notifications: Oversight Options for Congress, R40691 (January 29, 2010).

Summary

Legislation enacted in 1980 gave the executive branch authority to limit advance notification of especially sensitive covert actions to eight Members of Congress—the "Gang of Eight"—when the President determines that it is essential to limit prior notice in order to meet extraordinary circumstances affecting U.S. vital interests. In such cases, the executive branch is permitted by statute to limit notification to the chairmen and ranking minority members of the two congressional intelligence committees, the Speaker and minority leader of the House, and Senate majority and minority leaders, rather than to notify the full intelligence committees, as is required in cases involving covert actions determined to be less sensitive.

Congress, in approving this new procedure in 1980, during the Iran hostage crisis, said it intended to preserve operational secrecy in those "rare" cases involving especially sensitive covert actions while providing the President with advance consultation with the leaders in Congress and the leadership of the

intelligence committees who have special expertise and responsibility in intelligence matters. The intent appeared to some to be to provide the President, on a short-term basis, a greater degree of operational security as long as sensitive operations were underway. In 1991, in a further elaboration of its intent following the Iran-Contra Affair, congressional report language stated that limiting notification to the Gang of Eight should occur only in situations involving covert actions of such extraordinary sensitivity or risk to life that knowledge of such activity should be restricted to as few individuals as possible.

In its mark-up of H.R. 2701, the FY2010 Intelligence Authorization Act, the House Permanent Select Committee on Intelligence (HPSCI) replaced the Gang of Eight statutory provision, adopting in its place a statutory requirement that each of the intelligence committees establish written procedures as may be necessary to govern such notifications. According to committee report language, the adopted provision vests the authority to limit such briefings with the committees, rather than the President.

On July 8, 2009, the executive branch issued a Statement of Administration Policy (SAP) in which it stated that it strongly objected to the House Committee's action to replace the Gang of Eight statutory provision, and that the President's senior advisors would recommend that the President veto the FY2010 Intelligence Authorization Act if the committee's language was retained in the final bill.

The Senate Intelligence Committee, in its version of the FY2010 Intelligence Authorization Act, left unchanged the Gang of Eight statutory structure, but approved several changes that would tighten certain aspects of current covert action reporting requirements. Although the executive branch has not issued a Statement of Administration Policy with regard to the Senate's bill, Director of National Intelligence Admiral Dennis Blair has indicated that he would recommend that the President veto the bill if the covert action notification changes contained in the bill remained in final legislation. Congress has not acted on the FY2010 Intelligence Authorization bill.

With Congress considering possible changes in covert action congressional notifications, this report describes the statutory provision authorizing Gang of Eight notifications, reviews the legislative history of the provision, and examines both the impact of such notifications on congressional oversight as well as options that Congress might consider to possibly improve oversight.

Requirements for Notifications of Sensitive Covert Actions to Congress

Under current statute, the President generally is required keep the congressional intelligence committees fully and currently informed of all covert actions[2894] and that any covert action[2895] "finding"[2896] shall be reported to the committees as soon as possible after such approval and before the initiation of the covert action authorized by the finding.

If, however, the President determines that it is essential to limit access to a covert action finding in order to "meet extraordinary circumstances affecting vital interests of the United States,"[2897] then rather than providing advanced notification to the full congressional intelligence committees, as is generally required, the President may limit such notification to the "Gang of Eight," and any other congressional leaders he may choose to inform. The statute defines the "Gang of Eight" as being comprised of the chairmen and ranking members of the two congressional intelligence committees and the House and Senate majority and minority leadership.[2898]

In report language accompanying the 1980 enactment, Congress established its intent to preserve the secrecy necessary for very sensitive covert actions, while providing the President with a process for consulting in advance with congressional leaders, including the intelligence committee chairmen and ranking minority members, "who have special expertise and responsibility in intelligence matters."[2899] Such consultation, according to Congress, would ensure

---

[2894] National Security Act as amended, Sec. 503 [50 U.S.C. 413b] (b) and (c).

[2895] A covert action is defined in statute as an activity or activities of the United States Government to influence political, economic, or military conditions abroad, where it is intended that the role of the United States Government will not be apparent or acknowledged publicly. See the National Security Act of 1947, Sec. 503(e), 50 U.S.C. 413b(e).

[2896] A Finding is a presidential determination that an activity is necessary to "support identifiable foreign policy objectives" and "is important to he national security of the Untied States." See Intelligence Authorization Act for FY1991, P.L. 102-88, Title VI, Sec. 602 (a) (2), 50 U.S.C. 413b (a).

[2897] National Security Act of 1947 as amended, Sec. 503 [50 U.S.C. 413b] (c) (2). See Addendum A, Title V of the National Security Act as amended. The authorization for Gang of Eight notification also permits the President to notify "such other Member or Members of the congressional leadership as may be included by the President."

[2898] Ibid.

[2899] Addendum A, S.Rept. 96-730, 96th Cong., 2nd sess. (1980), p. 10. This report accompanied S. 2284, from which Title V of P.L. 96-450 is derived. Gang of Eight notification was included in a new Title V, Sec. 501, Sec. 501 (a) (1) added to the National Security Act of 1947 as amended by Sec. 407 (a) (3) of P.L. 96-450.

strong oversight, while at the same time, "share the President's burden on difficult decisions concerning significant activities."[2900]

In 1991, following the Iran-Contra Affair,[2901] Intelligence Conference Committee Conferees more specifically stated that Gang of Eight notifications should be used only when "the President is faced with a covert action of such extraordinary sensitivity or risk to life that knowledge of the covert action should be restricted to as few individuals as possible."[2902] Congressional Conferees also indicated that they expected the executive branch to hold itself to the same standard by similarly limiting knowledge of such sensitive covert actions within the executive.[2903]

Additional Gang of Eight Requirements

In addition to having to determine that vital interests are implicated, the President must comply with four additional statutory conditions in notifying the Gang of Eight. First, the President is required to provide a statement setting out the reasons for limiting notification to the Gang of Eight, rather than the full intelligence committees.[2904] The two intelligence committee chairmen, both Gang of Eight Members, also must be provided signed copies of the covert action finding in question.[2905] Third, the President is required to provide the Gang of Eight advance notice of the covert action in question.[2906] And, lastly, Gang of

---

[2900] Ibid.

[2901] The Iran-Contra affair was a secret initiative by the administration of President Ronald Reagan in the 1980s to provide funds to the Nicaraguan Democratic Resistance from profits gained by selling arms to Iran. The purpose was at least two-fold: to financially support the Nicaraguan Democratic Resistance and to secure the release of American hostages held by pro-Iranian groups in Lebanon.

[2902] Joint Explanatory Statement of the Committee of Conference, accompanying Conf.Rept. 102-166, 102nd Congress, 1st sess. (1991), p. 28. The Joint Explanatory Statement accompanied H.R. 1455, the FY1991 Intelligence Authorization Act, which was subsequently signed into law (P.L. 102-88). The "risk to life" language is not repeated in statute.

[2903] Ibid.

[2904] National Security Act of 1947 as amended, Sec. 503 [50 U.S.C. 413b] (c) (4). The statute does not explicitly specify whether such a statement should be in writing, nor specifically to whom such a statement should be provided.

[2905] Ibid.

[2906] National Security Act of 1947 as amended, Sec. 503 [50 U.S.C. 413b] (c) (2). The President must comply with these last two requirements—providing signed copies of the covert action and providing advance notification—when notifying the full committees of covert action operations that are determined to be less sensitive than "Gang of Eight" covert actions. Sec. 503 [50 U.S.C. 413b] (a) (1) requires a written finding unless immediate action by the U.S. is required and time does not permit preparation of a written finding. In the latter situation, a contemporaneous

Eight Members must be notified of any significant changes in a previously approved covert action, or any significant undertaking pursuant to a previously approved finding.[2907]

When Prior Notice to the Gang of Eight is Withheld

Although the statute requires that the President provide the Gang of Eight advance notice of certain covert actions, it also recognizes the President's constitutional authority to withhold such prior notice altogether by imposing certain additional conditions on the President should the decision be made to withhold. If prior notice is withheld, the President must "fully inform" the congressional intelligence committees[2908] in a "timely fashion"[2909] after the commencement of the covert action. The President also is required to provide a statement of the reasons for withholding prior notice to the Gang of Eight.[2910] In other words, a decision by the executive branch to withhold prior notice from the Gang of Eight would appear to effectively prevent the executive branch from limiting an-after-the-fact notification to the Gang of Eight, even if the President had determined initially that the covert action in question warranted Gang of Eight treatment. Rather, barring prior notice to the Gang of Eight, the executive

---

written record must be immediately reduced to a written finding as soon as possible within 48 hours.

[2907] Ibid, (d).

[2908] National Security Act of 1947 as amended, Sec. 503 [50 U.S.C. 413b] (c) (3).

[2909] Ibid. What constitutes "timely fashion" was the subject of intense debate between the congressional intelligence committees and the executive branch during the consideration of the fiscal year 1991 Intelligence Authorization Act. At that time, House and Senate intelligence committee conferees noted that the executive branch had asserted that the President's constitutional authorities "permit the President to withhold notice of covert actions from the committees for as long as he deems necessary." The conferees disputed the President's assertion, claiming that the appropriate meaning of "timely fashion" is "within a few days." Specifically, conferees stated, "While the conferees recognize that they cannot foreclose by statute the possibility that the President may assert a constitutional basis for withholding notice of covert actions for periods longer than 'a few days,' they believe that the President's stated intention to act under the 'timely notice' requirement of existing law to make a notification 'within a few days' is the appropriate manner to proceed under this provision, and is consistent with what the conferees believe is its meaning and intent." The conference report included the text of a letter sent to the chairman of the House Intelligence Committee, in which President George H.W. Bush stated: "In those rare instances where prior notice is not provided, I anticipate that notice will be provided within a few days. Any withholding beyond this period will be based upon my assertion of authorities granted this office by the Constitution..." See H.Conf.Rept. 102-166, 102nd Cong., 1st sess., pp. 27-28 (1991). Despite President George H.W. Bush's refusal to commit to either "timely" notification as defined by Congress, or any notification at all, Robert M. Gates, President George H.W. Bush's nominee as Director of Central Intelligence, said he believed that non-notification should be withheld for no more than a few days at the most, and that he would contemplate resignation if it extended beyond that time period. See Congressional Quarterly Almanac, 102nd Cong., 1st sess., 1991, Vol. XLVII, p. 482.

[2910] Ibid.

branch would then be required to inform the full intelligence committees of the covert action in "timely fashion." In doing so, Congress appeared to envision a covert action, the initiation of which would require a short-term period of heightened operational security.

Congress Signaled Its Intent That the Gang of Eight Would Decide When To Inform the Intelligence Committees

During the Senate's 1980 debate of the Gang of Eight provision, congressional sponsors said their intent was that the Gang of Eight would reserve the right to determine the appropriate time to inform the full intelligence committees of the covert action of which they had been notified.[2911]

The position of sponsors that the Gang of Eight would determine when to notify the full intelligence committees underscores the point that while the statute provides the President this limited notification option, it appears to be largely silent on what happens after the President exercises this particular option. Sponsors thus made it clear that they expected the intelligence committees to establish certain procedures to govern how the Gang of Eight was to notify the full intelligence committees. Senator Walter Huddleston, Senate floor manager for the legislation, said "the intent is that the full oversight committees will be fully informed at such time the eight leaders determine is appropriate. The committees will establish the procedures for the discharge of this responsibility."[2912]

Senator Huddleston's comments referred to Sec. 501(c) of Title V of the National Security Act which stipulates that "The President and the congressional intelligence committees shall each establish such procedures as may be necessary to carry out the provisions of this title."

With regard to Sec. 501(c), Senate report language stated:

> *The authority for procedures established by the Select Committees is based on the current practices of the committees in establishing their own rules. One or both committees may, for example, adopt procedures under which designated members are assigned responsibility on behalf of the committee to receive information in particular types of circumstances, such as when all members*

[2911] See Addendum B, copy of the Senate debate as recorded in the Congressional Record, 96th Congress, 2nd Session, Volume 126—Part 20, September 17, 1980 to September 24, 1980. See p. 17693.

[2912] Ibid, p. 17693.

cannot attend a meeting or when certain highly sensitive information is involved.[2913]

Congressional intent thus appeared to be that the collective membership of each intelligence committee, rather than the committee leadership, would develop such procedures.[2914] Moreover, the rules that each committee have subsequently adopted, while they deal in detail as to how the committees are to conduct their business, do not appear to address any procedures that might guide Gang of Eight notifications generally. Rather, to the extent that any such procedures have been adopted, those procedures appear to have been put into place at the executive branch's insistence, according to congressional participants.[2915]

Congress Approved Gang of Eight Notifications in 1980, Following the Iran Hostage Rescue Attempt

Congress approved the Gang of Eight notification provision in 1980 as part of a broader package of statutory intelligence oversight measures generally aimed at tightening intelligence oversight while also providing the Central Intelligence Agency (CIA) greater leeway to carry out covert operations,[2916] following a failed covert operation to rescue American embassy hostages in Iran.[2917]

Congressional approval came after President Jimmy Carter decided not to notify the intelligence committees of the operation in advance because of concerns over operational security and the risk of disclosure. Director of Central Intelligence

[2913] See addendum B, S.Rept. 96-730, 96th Cong, 2nd sess. See p. 13 of the report.

[2914] Ibid, p. 12.

[2915] Letter from Representative Jane Harman to President George W. Bush, January 4, 2006. Another example of the informality which sometimes informs the intelligence notification process involves so-called Gang of Four notifications. The Gang of Four consists of the chairmen of the congressional intelligence committees, the Vice Chairman of the Senate Intelligence Committee and the Ranking Member of the House Intelligence Committee. The executive branch frequently limits certain intelligence notifications to these four Members, sometimes including committee staff directors, even though neither statute, or committee rules, appear to make provision for such notifications.

[2916] Congressional Quarterly Almanac, Vol. XXXVI, 1980, p. 66.

[2917] There actually were two separate operations — both of which constituted covert actions, since neither was undertaken to collect intelligence — to rescue U.S. embassy personnel after Iranian "students" overran the U.S. Embassy in Tehran on Nov. 4, 1979. The failed operation involved an attempted airborne rescue of U.S. hostages which was aborted when three of the rescue helicopters experienced mechanical difficulties. A subsequent collision of one of the helicopters and a refueling plane left seven American rescuers dead. An earlier effort resulted in the successful extrication of six Americans who had been working at the U.S. embassy but had avoided capture by taking refuge in the residences of the Canadian ambassador and deputy chief of mission.

Stansfield Turner briefed the congressional intelligence committees only after the operations had been conducted. Although most members reportedly expressed their understanding of the demands for secrecy and thus the Administration's decision to withhold prior notification,[2918] Senate Intelligence Committee Chairman Birch Bayh expressed concern that the executive branch's action reflected a distrust of the committees. He suggested that future administrations could address disclosure concerns by notifying a more limited number of Members "so that at least somebody in the oversight mechanism would know.... If oversight is to function better, you first need it to function [at all]."[2919] Such sentiments appear to have contributed to the subsequent decision by Congress to permit the executive branch to notify the Gang of Eight in such cases.[2920]

Authority of Gang of Eight to Affect Covert Action

Even with statutory arrangements governing covert action, including Gang of Eight covert actions, Congress does not have the authority under statute to veto outright a covert action. Indeed, former Senator Howard Baker successfully pushed the inclusion in the 1980 legislative package of a provision making clear that Congress did not have approval authority over the initiation of any particular covert action.[2921]

Nonetheless, the Gang of Eight Members, as do the intelligence committees, arguably have the authority to influence whether and how such covert actions are conducted over time. For example, Members could express opposition to the initiation of a particular covert action. Some observers assert that in the absence of Members' agreement to the initiation of the covert action involved, barring such agreement, an administration would have to think carefully before proceeding with such a covert action as planned.[2922]

[2918] At the time, the Hughes-Ryan Amendment of 1974 requiring that the executive branch report on Central Intelligence Agency covert operations to as many as eight congressional committees, including the intelligence committees, was still the law.

[2919] See L. Britt Snider, The Agency and the Hill, CIA's Relationship With Congress, 1946-2004, (Washington, D.C.: Center For the Study of Intelligence, Central Intelligence Agency, 2008), p. 283.

[2920] Ibid.

[2921] National Security Act of 1947 as amended, Sec. 501[50 U.S.C. 413] (a) (2).

[2922] L. Britt Snider, The Agency and the Hill, CIA's Relationship With Congress, 1946-2004, (Washington, D.C.: Center For the Study of Intelligence, Central Intelligence Agency, 2008), p. 311. See also Mike Soraghan, "Reyes Backs Pelosi On Intel Briefings," The Hill, May 1, 2009. House Intelligence Committee Ranking Member Peter Hoekstra reportedly stated that Members of Congress are able to challenge policies they disagree with. "This is nuts, this saying, 'I couldn't do anything,'" Hoekstra told the Hill, adding that he at least once complained to then President Bush and got a policy changed, according to the newspaper.

The Gang of Eight over time could also influence funding for such operations. Initial funding for a covert action generally comes from the CIA's Reserve for Contingency Fund, for which Congress provides an annual appropriation. Once appropriated, the CIA can fund a covert action using money from this fund, without having to seek congressional approval. But the executive branch generally must seek additional funds to replenish the reserve on an annual basis. If the Gang of Eight, including the two committee chairmen and ranking members, were to agree not to continue funding for a certain covert action, they arguably could impress on the membership of the two committees not to replenish the reserve fund, providing they informed the committees of the covert action, a decision which the congressional sponsors said they intended to be left to the discretion of the Gang of Eight in any case.

Thus, the Gang of Eight could influence the intelligence committees to increase, decrease or eliminate authorized funding of a particular covert action. Some observers point out, however, that the leaders' overall effectiveness in influencing a particular covert action turns at least as much on their capability to conduct effective oversight of covert action as it does on their legal authority.

Impact on Congressional Intelligence Oversight

The impact of Gang of Eight notifications on the effectiveness of congressional intelligence oversight continues to be debated.

Supporters of the Gang of Eight process contend that such notifications continue to serve their original purpose, which, they assert, is to protect operational security of particularly sensitive covert actions that involve vital U.S. interests while still involving Congress in oversight. Further, they point out that although Members receiving these notifications may be constrained in sharing detailed information about the notifications with other intelligence committee members and staff, these same Members can raise concerns directly with the President and the congressional leadership and thereby seek to have any concerns addressed.[2923] Supporters also argue that Members receiving these restricted briefings have at their disposal a number of legislative remedies if they decide to oppose a particular covert action program, including the capability to use the appropriations process to withhold funding until the executive branch behaves according to Congress's will.[2924]

Critics counter with the following points. First, they say, Gang of Eight notifications do not provide for effective congressional oversight because

---

[2923] See Congressional Quarterly transcript of press conference given by Representative Peter Hoekstra, December 21, 2005.

[2924] See Tim Starks, "Pelosi Controversy Suggests Changes to Congressional Briefings Are Due," Congressional Quarterly, May 14, 2009.

participating Members "cannot take notes, seek the advice of their counsel, or even discuss the issues raised with their committee colleagues."[2925] Second, they contend that Gang of Eight notifications have been "overused."[2926] Third, they assert that, in certain instances, the executive branch did not provide an opportunity to Gang of Eight Members to approve or disapprove of the program being briefed to them.[2927] And fourth, they contend that the "limited information provided Congress was so overly restricted that it prevented members of Congress from conducting meaningful oversight."[2928]

Directors of National Intelligence and Central Intelligence Agency Critical of Gang of Eight Notifications For Non-Covert Actions

During their respective Senate confirmation hearings, Director of National Intelligence (DNI) Dennis Blair and CIA Director Leon Panetta criticized the use of the Gang of Eight notification procedure to notify Congress of the National Security Agency's (NSA) electronic communications surveillance program—often referred to as the Terrorist Surveillance Program, or TSP—and the CIA's detention, interrogation and rendition program. DNI Blair said both programs "involved sensitive collection activities rather than covert actions. The 'Gang of 8' notice is available … only where notice of covert action is concerned, and its use in these programs was not expressly allowed."[2929] Director Panetta said "the NSA surveillance program was not a covert action program, and, therefore, limiting notification to the 'gang of eight' was inappropriate."[2930] DNI Blair said that,

[2925] See letter from Representative Jane Harman to President George W. Bush, January 4, 2006, regarding the National Security Agency (NSA) electronic communications surveillance program, often referred to as the Terrorist Surveillance Program, or TSP.

[2926] See Tim Starks, "Pelosi Controversy Suggests Changes to Congressional Briefings Are Due," Congressional Quarterly, May 14, 2009.

[2927] Press release from Senator John D. (Jay) Rockefeller, December 19, 2005, commenting on the Terrorist Surveillance Program initiated by the George W. Bush Administration. As discussed earlier in this memorandum, under Sec. 501(a)(2), nothing in Title V "shall be construed as requiring the approval of the congressional intelligence committees as a condition precedent to the initiation of any significant anticipated intelligence activity.

[2928] Ibid.

[2929] See "Additional Pre-hearing Questions for Dennis C. Blair upon nomination to be Director of National Intelligence," Question/Answer 4(C), at http://intelligence.senate.gov/090122/blairresponses.pdf.

[2930] See "Additional Pre-hearing Questions for the Record For the Honorable Leon E. Panetta upon his selection to be the Director of The Central Intelligence Agency," Question/Answer 23 at http://intelligence.senate.gov/090205/answers.pdf. In his response, Director Panetta did not address whether the CIA's detention, interrogation and rendition program was an intelligence collection program, or a covert action program. Former CIA Director Michael Hayden, has said

because of the restrictive nature of Gang of Eight notifications in these two instances, "the intelligence committees were prevented from carrying out their oversight responsibilities."[2931] Director Panetta, expressing similar sentiments, said that such limited notifications "restrict the ability of the intelligence committees to conduct oversight."[2932]

House Intelligence Committee Replaces Gang of Eight Procedure in FY2010 Intelligence Authorization Act

In marking up its version of the FY2010 Intelligence Authorization Act, the House Intelligence Committee replaced the Gang of Eight statutory provision, adopting in its place a statutory requirement that each of the intelligence committees establish written procedures as may be necessary to govern such notifications.

The current Gang of Eight statutory provision stipulates:

> *If the President determines that it is essential to limit access to the finding to meet extraordinary circumstances affecting vital interest of the United States, the finding may be reported to the chairmen and ranking minority members of the congressional intelligence committees, the Speaker and the minority leader of the House of Representatives, the majority and minority leaders of the Senate, and such other member or members of the congressional leadership as may be included by the President*[2933]

---

that the program "... began life as a covert action ... " See Australian Broadcasting Corporation, AM, April 17, 2009.

Before the notification briefings were subsequently expanded to include more Members, the executive treated both programs as particularly sensitive collection programs insofar as notification was concerned, in that it limited its initial notification to the Gang of Four. See letter from Representative Jane Harman to President George W. Bush, December 21, 2005, in which she makes reference to the Administration's use of the Gang of Four notification process, used initially to notify Congress. The Bush Administration also employed the Gang of Four notification procedure to notify Congress of the CIA's detention, interrogation and rendition program. See "Members Briefings on Enhanced Interrogation Techniques (EITs)," released by the CIA on May 6, 2009. A listing of the briefings can be found at http://www.humanevents.com/downloads-pdfs/EIT%20Briefings.pdf.

[2931] See "Additional Pre-hearing Questions for Dennis C. Blair upon nomination to be Director of National Intelligence," Question/Answer 4(C), at http://intelligence.senate.gov/090122/blairresponses.pdf.

[2932] See "Additional Pre-hearing Questions for the Record For the Honorable Leon E. Panetta upon his selection to be the Director of The Central Intelligence Agency," Question/Answer 23 at http://intelligence.senate.gov/090205/answers.pdf.

[2933] Sec. 503 of the National Security Act [50 U.S.C. 413b] (c)(2).

The substitute language approved by the House Intelligence Committee stipulates:

> *If, pursuant to the procedures established by each of the congressional intelligence committees under Section 501(c), one of the congressional intelligence committees determines that not all members of that committee are required to have access to a finding under this subsection, the President may limit access to such findings or such notice as provided in such procedures.*[2934]

According to committee report language, the provision:

> *requires the President to brief all members of the congressional intelligence committees, but implicitly provides for the possibility of more restricted briefings pursuant to the written procedures established by the congressional intelligence committees, pursuant to the revised Section 501 (c). This language vests the authority to limit the briefings with the committees, rather than the President.*[2935]

The Report's reference to a revision of Sec. 501 of the National Security Act pertained to the committee's approval of statutory language requiring that the President and the congressional intelligence committees each establish such "written" procedures as may be necessary to carry out the statutes provisions.[2936] Current statute does require that any such procedures be in writing.

In approving the new provision, the committee rejected an amendment that would have authorized the committee's chairman and ranking member to decide whether to comply with a presidential request to limit access to certain intelligence information, including covert actions.

The rejected amendment stipulated that if the chairman and ranking member were unable to agree on whether or how to limit such access, access to the information would be limited if so requested by the President.[2937]

[2934] See Intelligence Authorization Act for Fiscal Year 2010, H.R. 2701, Sec. 321 [111th Congress, 1st sess.].

[2935] See H.Rept. 111-186, accompanying the Intelligence Authorization Act for Fiscal Year 2010, pp. 21-22 [111th Congress, 1st sess.].

[2936] See Intelligence Authorization Act for 2010, H.R. 2701, Sec. 321 (b).

[2937] See Intelligence Authorization Act For 2009, H.R. 5959, Sec. 502 (b). This language applied to reports of intelligence activities other than covert action. The amendment offered to the FY2010 Intelligence Authorization Act during the Committee's markup was extended to include reporting of covert actions.

According to the views of the minority contained in the report, the provision adopted by the committee:

> *nowhere creates a statutory presumption that all Members of the Committee should be briefed. Instead, it would require the Committee to unilaterally develop procedures for the handling of reporting on sensitive matters, even though the President has significant constitutional authorities in the area of national security that Courts have repeatedly said must be considered with and balanced against the authorities of Congress. The provision nowhere provides a mechanism for ensuring that decisions within the Committee are made on a bipartisan basis or for reconciling any dispute between the branches with respect to such reporting, which is a receipt for Constitutional gridlock that could be disastrous with respect to such sensitive matters.*[2938]

The House Intelligence Committee Adopted Several Other Covert Action-Related Measures as Part of FY2010 Intelligence Bill

The House Intelligence Committee adopted several additional statutory changes with regard to covert action notifications. One such change would require that the information or material concerning covert actions include any information or material relating to the legal authority under which a covert action is being or was conducted, and any information or material relating to legal issues upon which guidance was sought in carrying out or planning the covert action, including dissenting legal views.[2939]

Another change would require that the President provide Members who are not notified of a particular covert action, pursuant to the procedures established by the each of the committees, with general information on the content of the covert action.[2940]

The committee also adopted a provision that would permit a member who objects to a particular covert action that has been notified to submit an objection to the

[2940] Ibid, (g) (2).

Director of National Intelligence. The DNI is required to notify the President of the objection no later than 48 hours after the objection has been submitted.[2941]

Finally, the committee approved covert action-related provisions that would

- require that the CIA inspector general audit each covert action every three years;[2942]
- require that the President maintain a record of the Members of Congress notified of a covert action and to provide such record within 30 days after the notification is provided;[2943] and
- define the current statutory phrase "significant undertaking" to mean an activity involving the potential for loss of life; requiring an expansion of existing authorities, including authorities relating to research, development, or operations; resulting in the expenditure of significant funds or other resources; requiring notification under section 504; giving rise to a significant risk of disclosing intelligence sources or methods; or possibly causing serious damage to the diplomatic relations if the activity were to be disclosed without authorization.[2944]

Senate Intelligence Committee Tightened Certain Covert Action Reporting Requirements

In its version of the FY2010 Intelligence Authorization Act, the Senate Intelligence Committee left unchanged the Gang of Eight statutory structure, but approved several changes that would tighten certain aspects of current covert action reporting requirements.

The committee adopted language stating that there shall be no exception to the requirements of Title V off the National Security Act to inform the intelligence committees of all covert actions.[2945] The committee voted to require that all members of the intelligence committees be notified when the executive branch does not provide information "in full" to all members.[2946] In such cases, the Director of National Intelligence would be required to provide in writing to the committees in a "timely manner" a statement explaining the reasons for withholding certain information from the full membership and a description of

the main features of the covert action in question. The executive branch also would be required to include in reports to Congress on covert actions an explanation of the significance of the covert action and report any change to a covert action,[2947] rather than any "significant" change,[2948] as is currently required under statute.

Finally, the committee approved language that would require that the executive branch provide to the intelligence committees any information or material regarding the legal authority under which a covert action is or was conducted,[2949] and that funding for an intelligence activity would be provided only if the intelligence committees had been fully and currently informed of that activity, or had been notified when the executive branch did not provide information in full to all members.[2950]

In additional views accompanying the committee's report[2951] on the legislation, Senators John Rockefeller and Olympia Snowe said they supported the committee-adopted language because, they wrote, it would improve the notification processes, while not eliminating the Gang of Eight procedure, "which many of us believe can serve an important purpose for quick and timely notifications on extraordinarily sensitive covert actions."[2952]

A small number of the committee members opposed the notification provision contained in the bill that would require the executive branch to notify the full membership of the intelligence committees when a covert action notification does not disclose all information regarding such an activity to all members of the committees. In additional views, they stated that the adopted provision would modify the current balance in the National Security Act with respect to the congressional notification procedures and that such a provision "will unnecessarily increase the tension between the Legislative and Executive branches over information access."[2953]

Executive Branch Threatens Veto Of House and Senate Versions of 2010 Intelligence Authorization Act

On July 8, 2009, the executive branch issued a Statement of Administration Policy (SAP)[2954] in which it stated that it strongly objected to the House committee's action to replace the Gang of Eight statutory provision, and that the President's senior advisors would recommend that the President veto the FY2010 Intelligence Authorization Act if the committee's language was retained in the final bill. According to the executive branch's statement, the committee's new statutory language "would run afoul of tradition by restricting an important established means by which the President protects the most sensitive intelligence activities that are carried out in the Nation's vital national security interests."[2955]

Although the executive branch has not issued a Statement of Administration Policy with regard to the Senate's bill, Director of National Intelligence Admiral Dennis Blair has indicated that he would recommend that the President veto the bill if the covert action notification changes it contained remained in final legislation.[2956]

Gang of Eight Notifications: The Historic Record

Notwithstanding the continuing debate over the merits of such notifications, what remains less clear is the historic record of compliance with Gang of Eight provisions set out in statute. Questions include: have such notifications generally been limited to covert actions, ones that conform to congressional intent that such covert actions be highly sensitive and involve the risk to life? When prior notification is limited to the Gang of Eight, has the executive branch provided an explanatory statement as to why it limited notification to the Gang of Eight? If the Gang of Eight is not provided prior notice, has the executive branch then informed the intelligence committees at a later date and provided a reason why prior notification was not provided? Has the Gang of Eight, once notified, ever then made a determination to notify the intelligence committees, a prerogative envisioned by its congressional sponsors? Have the congressional intelligence committees, at any time since they were established, attempted to develop procedures to guide Gang of Eight notifications, as envisioned by the sponsors of the Gang of Eight provision?

Possible Gang of Eight Options

The 111th Congress, in its assessment, could deem that the Gang of Eight notification procedure, as currently provided for in statute and by practice, continues to strike a reasonable balance between the twin objectives of operational security and congressional oversight. If, however, changes are sought, Congress could consider the following options.

Alternative One

Congress could adopt the approach approved by the House Intelligence Committee during its markup of the FY2010 Intelligence Authorization Act. This approach would eliminate the Gang of Eight statutory provision, according to its sponsors, substituting instead a provision that its sponsors said would require that the President brief all members of the congressional intelligence committees, while implicitly providing for the possibility of more restricted briefings pursuant to the written procedures that would be established by the congressional intelligence committees as may be necessary to carry out the statute's provisions.

Alternative Two

Congress could adopt the approach approved by the Senate Intelligence Committee during its markup of the FY2010 Intelligence Authorization Act. Rather than eliminating the current Gang of Eight statutory provision, the Senate language would make no exception to the requirement that the intelligence committees be notified of all covert actions. The language also would require that all members of the intelligence committees be notified when the executive branch did not provide information "in full" to all members about a particular covert action. In such cases, the Director of National Intelligence would be required to provide in writing to the committees in a "timely manner" a statement explaining the reasons for withholding certain information from the full membership and a description of the main features of the covert action in question. The executive branch also would be required to include in reports to Congress on covert actions an explanation of the significance of the covert action being considered and report any change to a covert action, rather than any "significant" change, as is currently required under statute. Finally, under the Senate Committee's provisions, the executive branch would be required to provide any information or material regarding the legal authority under which a covert action is or was conducted, and funding for a particular covert action would be provided only if the intelligence committees had been fully and currently informed of that activity, or had been notified if the executive branch had not provided information in full to all members of the two intelligence committees.

Alternative Three

Congress could adopt the provision supported by some members of the House Intelligence Committee but ultimately rejected by a majority of the committee membership that would have authorized the chairmen and ranking members of

the intelligence committees to decide whether to comply with a presidential request to limit access to certain intelligence information, including covert actions. The amendment stipulated that if the chairman and ranking member were unable to agree on whether or how to limit such access, access to the information would be limited, if so requested by the President.

Alternative Four

If Congress were to decide to preserve the Gang of Eight notification procedure, but were to consider modifying the process, such modifications could include specifying explicitly in statute that

- Gang of Eight notifications are permitted only in situations involving covert action, rather than in those situations involving non-covert action programs, including sensitive intelligence collection programs;
- a Gang of Eight notification remain in place as long as sensitive operations are underway. Once such operational sensitivities no longer prevail, however, the full membership of the intelligence committees would be informed;
- Gang of Eight Members, rather than the executive branch, will decide when to notify the full membership of the intelligence committees.
- the executive branch be required to provide a statement of the reasons, in writing, for limiting notification to the Gang of Eight, and that the executive branch provide a written statement to the congressional intelligence committees in a timely fashion when it does not provide prior notice of a covert action to the Gang of Eight.
- Pursuant to Sec. 501(c) of the National Security Act, which requires the establishment of procedures as may be necessary to carry out the provisions of the statute, Congress could require that the congressional intelligence committees establish certain procedures that would govern Gang of Eight notifications, as the sponsors of the Gang of Eight provision apparently originally intended. Such procedures could include permitting Gang of Eight Members to take notes as such briefings and establishing a process of more formal consultation between Gang of Eight Members.[2957]

Alternative Five

Congress statutorily could eliminate the Gang of Eight procedure and bring sensitive covert actions notifications back within the intelligence committee structure by permitting the President to limit initial briefings of such operations

[2957] Given the demands of timing and scheduling, according to former executive branch officials, in the interest of time, Gang of Eight Members are sometimes notified by secure phone. If scheduling permits, briefings are provided to Gang of Eight Members, often on an individual basis. It is unclear whether Gang of Eight Members ever have requested to be briefed as a group, or whether certain time and scheduling constraints would make such a request practical.

to the chairmen and ranking members of the two intelligence committees, the so-called "Gang of Four" formulation. Under this change, committee leadership could be permitted to consult with House and Senate leaders, and staff, and inform the full intelligence committees when they determine it to be appropriate.

Alternative Six

Congress statutorily could require that the executive branch inform the full membership of the intelligence committees of all covert actions, irrespective of their perceived sensitivity.

Conclusion: Striking a Balance

Striking the proper balance between effective oversight and security remains a challenge to Congress and the executive. Doing so in cases involving particularly sensitive covert actions presents a special challenge. Success turns on a number of factors, not the least of which is the degree of comity and trust that defines the relationship between the legislative and executive branches. More trust can lead to greater flexibility in notification procedures. When trust in the relationship is lacking, however, the legislative branch may see a need to tighten and make more precise the notification architecture, so as to assure what it views as being an appropriate flow of information, thus enabling effective oversight.

Statutory Procedures under Which Congress Is To Be Informed of U.S. Intelligence Activities, Including Covert Actions (i.e. Gang of Eight), Memorandum (January 18, 2006).

ALFRED CUMMING, CONGRESSIONAL RESEARCH SERV., STATUTORY PROCEDURES UNDER WHICH CONGRESS IS TO BE INFORMED OF U.S. INTELLIGENCE ACTIVITIES, INCLUDING COVERT ACTIONS, MEMORANDUM (2006), , *available at* http://www.intelligencelaw.com/library/secondary/crs/pdf/memo_1-18-2006.pdf.

FROM:
Alfred Cumming
Specialist in Intelligence and National Security
Foreign Affairs, Defense and Trade Division

Introduction

This memorandum examines certain existing statutory procedures that govern how the executive branch is to keep Congress informed of U.S. intelligence activities, reviews pertinent legislative history underpinning the development of those procedures, and looks at the notification process that reportedly was followed in informing certain Members of Congress of the President's decision to authorize the National Security Agency (NSA) to collect signals intelligence within the United States. According to U.S. Attorney General Alberto Gonzales, the program involved "intercepts of contents of communications where...one party to the communication is outside the United States" and the government has "a reasonable basis to conclude that one party to the communication is a member of al Qaeda, affiliated with al Qaeda, or a member of an organization affiliated with al Qaeda, or working in support of al Qaeda."[2958]

Statutory Obligations of the President to Ensure that Intelligence Committees Are Kept "Fully and Currently Informed"

Under current statute,[2959] the President is to ensure that the congressional intelligence committees are kept "fully and currently informed"[2960] of U.S.

[2958] Press Release, White House, Press Briefing by Attorney General Alberto Gonzales and General Michael Hayden, Principal Deputy Director for National Intelligence (Dec. 19, 2005), available at [http://www.whitehouse.gov/news/releases/2005/12/20051219-1.html].

[2959] National Security Act of 1947, Secs. 501-503 [50 U.S.C. 413 -413(b)]. In a change enacted as part of the fiscal year (FY) 1991 Intelligence Authorization Act (P.L. 102-88), Congress, for the first time, placed a statutory obligation upon the President to ensure that the congressional

intelligence activities, including any"significant anticipated intelligence activity."[2961] According to legislative history, the term "fully and currently informed," is intended to mean that complete and timely notice of actions and policies is provided, and that the committees will be informed of intelligence activities in such detail as the committees may require.[2962] Further, the Senate in report language said it expected the executive branch not to limit itself to providing full and complete information upon request from the committees, but to affirmatively keep the committees fully and currently informed.[2963]

---

intelligence committees are kept fully and currently informed of United States intelligence activities, including any significant anticipated intelligence activity. Until 1991, the Director of Central Intelligence and the intelligence agency heads had been statutorily responsible for keeping the congressional intelligence committees fully and currently informed of such activities under changes enacted in 1980. See FY1981 Intelligence Authorization Act, Sec. 501(a) (P.L. 96-450). In enacting the FY 1981 Act, the Senate Select Committee on Intelligence (SSCI) asserted that one of its principal goals was to modify the Hughes-Ryan Amendment of 1974, which required reports on CIA covert operations to as many as eight congressional committees, and substituting in its place a general provision requiring prior notice of covert operations and full access by the two intelligence committees to information concerning all intelligence activities. See S.Rept. No. 96-730, 96th Congress, 2nd sess., pp. 2-3 (1980).

In reporting its version of the FY 1991 Intelligence Authorization Act, the SSCI asserted that overall responsibility for keeping the intelligence committees fully and currently informed should be vested in the President because of the importance and sensitivity of secret intelligence activities that may affect vital national interests, and because the President, who exercises authority over all departments, agencies and entities in the executive branch, may have unique knowledge of such activities. See S.Rept. No.102-85, 102 Congress, 1 sess., p. 30 (1991).

[2960] The phrase "fully and currently informed" originated in the requirement contained in Sec. 202 of the Atomic Energy Act of 1946. Identical wording also is contained in S.Res. 400, 94th Congress, which created the SSCI. See Sec. 11(a) of the resolution. Historic practice has been that in fully and currently informing the intelligence committees about intelligence activities, other than covert actions, the executive branch generally has communicated such information – almost always in classified form – to the Chairmen and Ranking Members of the intelligence committees, often in writing. Such communications then are made available to the rest of the committee membership.

[2961] In Senate report language accompanying the FY1991 Intelligence Authorization Act (P.L. 102-88),the SSCI wrote, "The requirement to report significant anticipated activities means, in practice, that the committees should be advised of important new program initiatives and specific activities that have major foreign policy implications." See S.Rept. No. 102-85, 102 Congress, 1 sess., p. 32 (1991).

[2962] In explaining its use of the phrase fully and currently informed in report language accompanying the FY1981 Intelligence Authorization Act (P.L. 96-450), the SSCI noted: "... For over thirty years this authority served the information needs of the Joint Committee on Atomic Energy well by assuring it complete and timely notice of actions and policies of the Federal government in the field of atomic energy. The language is also contained in Senate Resolution 400, 94th Congress, and has served the Select Committee well by ensuring that the Committee is informed of intelligence activities in such detail as the committee may require... " See S.Rept. No. 96-730, 96th Congress, 2nd sess., p. 7 (1980).

[2963] Ibid.

Although the President has a legal obligation to ensure that the congressional intelligence committees are fully and currently informed of all intelligence activities, the statute distinguishes between "intelligence activities"[2964] and "covert action"[2965] as a separate category of intelligence activities, and establishes different reporting mechanisms for each.

Reporting Requirements For Intelligence Activities, Including Significant Anticipated Intelligence Activities

For all intelligence activities, including any significant anticipated intelligence activity other than covert action, the statute requires that "the congressional intelligence committees" are to be kept "fully and currently informed" of such activities;[2966] with an exception possibly being because limiting such notification would be necessary to protect intelligence sources and methods.[2967]

[2964] Although the term intelligence activities is defined in statute to include covert actions and financial intelligence activities, "intelligence activities" are not further defined in law. See National Security Act of 1947, Sec. 501 [50 U.S.C. 413] (f). In report language accompanying the FY1991 Intelligence Authorization Act (P.L. 102-88), however, the SSCI described intelligence activities as consisting of "... the gathering of information ...," while characterizing covert action as "…. an instrument of foreign policy ... that goes beyond information gathering." S.Rept. No. 102-85, 102nd Cong., 1st sess., pp. 33-34 (1991). More detailed definitions of intelligence activities and "intelligence-related activities" are contained in the Senate resolution and the House Rule which established the SSCI and the House Permanent Select Committee on Intelligence (HPSCI), respectively. See Sec. 14(a) of S.Res. 400, and Sec. 10(a) of House Rule XLVIII.

[2965] The term covert action is defined in statute to mean "... an activity or activities of the United States Government to influence political, economic, or military conditions abroad, where it is intended that the role of the United States Government will not be apparent or acknowledged publicly..." See the National Security Act of 1947, Sec. 503 [50 U.S.C. 413b] (e). In enacting the FY1991 Intelligence Authorization Act (P.L. 102-88), Congress, for the first time, statutorily defined the term covert action. The definition was intended to supersede the references to Central Intelligence Agency (CIA) "operations" abroad contained in the Hughes-Ryan Amendment, and to "special activities" as defined by Executive Order 12333, signed by President Ronald Reagan on Dec. 4, 1981. According to Senate report language accompanying the Senate's version of the FY1991 Act, the statutory definition of covert action was intended to reflect current practice as it had developed under the Hughes–Ryan Amendment and the executive order definition of "special activities." According to the SSCI, the statutory definition was meant to clarify the understanding of covert action activities that require presidential findings and reporting to Congress, not to relax or go beyond previous understandings. See S.Rept. No. 102-85, 102 Congress, 1 sess., p. 42 (1991).

[2966] National Security Act of 1947, Sec. 501 [50 U.S.C. 413 (a)(1) and Sec. 502 [50 U.S.C. 413a] (a)(1). Common practice by the executive branch in informing the intelligence committees about intelligence activities, other than Gang of Eight notifications, has been to communicate such information to the chairmen and ranking members of the two committees, often in writing. Such communications then generally are made available to the rest of the committee membership, and follow-up briefings by the executive branch are scheduled when determined to be necessary.

[2967] National Security Act of 1947, Sec. 502 [50 U.S.C. 413a] (a).

Another statutory provision specifically requires that the Director of National Intelligence (DNI) and the intelligence agency heads "keep the intelligence committees fully and currently informed of all intelligence activities…"[2968] and "…furnish the congressional intelligence committees any information or material concerning intelligence activities, other than covert actions…"[2969] which is within their control. The statute further requires that any report to the intelligence committees regarding a significant anticipated intelligence activity be submitted to the intelligence committees in writing, and that any such report contain a concise statement of any pertinent facts as well as an explanation of the significance of the intelligence activity in question.[2970]

Other than there being a possible exception that would authorize a more limited notification in order to protect intelligence sources and methods, the law would appear to contain no other language authorizing the President, the DNI or the intelligence agency heads to determine the number of intelligence committee members that are informed of "all intelligence activities….", other than covert action. Rather, the law requires that the "congressional intelligence committees" be kept fully and currently informed of all intelligence activities.[2971]

In keeping the congressional intelligence committees fully and currently informed, the DNI is required to show "due regard for the protection from unauthorized disclosure of classified information relating to sensitive intelligence sources and methods or other exceptionally sensitive matters."[2972] According to Senate report language accompanying the FY1991 Intelligence Authorization Act, the "protection from unauthorized disclosure" language was "… intended to have the same meaning as the legislative history of the similar preambular clause in existing law."[2973] That underlying preambular clause states:

However, it is recognized that in extremely rare circumstances a need to preserve essential secrecy may result in a decision not to impart certain sensitive aspects of operations or collection programs to the oversight committees in order to

protect extremely sensitive intelligence sources and methods.[2974] [emphasis added]

Covert Action Reporting Requirements

By contrast, the President is legally authorized to limit congressional access to a covert action finding if he determines that it is essential to do so in order "to meet extraordinary circumstances affecting vital interests of the United States…"[2975] If he makes such a determination, the President is authorized to limit reporting of such a covert action finding to the chairmen and ranking members of the congressional intelligence committees, the House and Senate majority and minority leaders, and any other member or members of the congressional leadership that the President may designate. This covert action finding notification procedure is sometimes referred to as a "Gang of Eight" notification, because such a notification usually involves the notification of eight Members of Congress.[2976]

The statute does not define, nor does accompanying congressional report language indicate, what would constitute "extraordinary circumstances affecting vital interests."[2977] The President appears to have the sole discretion in making such a determination. In enacting the statutory language as part of the FY1991 Intelligence Authorization Act, conferees stated: "… that this provision be utilized when the President is faced with a covert action of such extraordinary sensitivity or risk to life that knowledge of the covert action should be restricted to as few individuals as possible."[2978]

If the President does not report to the intelligence committees as soon as possible after approving a covert action finding and before its initiation, or if he does not provide a more limited Gang of Eight notification, he must, in "a timely

---

[2974] S.Rept. No. 96-730, 96 Congress, 2 sess., p. 6 (1980).

[2975] National Security Act of 1947, Sec. 503 [50 U.S.C. 413b] (c) (2). Although the President is required to provide the congressional intelligence committees prior notice before initiating a covert action, the statute does permit the President, in certain extraordinary circumstances to either withhold prior notice altogether, or to limit it to the "Gang of Eight." In either case, the President is required to fully inform the committees of the particular covert action "in a timely fashion" and provide a statement of the reasons for not giving the committees prior notice.

[2976] Even though the President is authorized to notify another member, or members, of the congressional leadership beyond those serving in the eight leadership positions designated in the statute, the reporting process remains known colloquially as a "Gang of Eight" notification.

[2977] National Security Act of 1947, Sec. 503 [50 U.S.C. 413b] (c) (2).

[2978] H.Conf.Rept. No. 102-166, 102 Congress, 1 sess., p. 28 (1991).

fashion,"[2979] fully inform the committees of the covert action and provide a statement of the reasons for not providing the intelligence committees prior notice.

Congress Limits Use of "Gang of Eight" Notice to Covert Actions

In enacting the FY1991 Intelligence Authorization Act, Congress restricted the President's authority to limit prior notice to only members of the Gang of Eight to findings involving covert actions, provided the President determined that doing so was "...essential...to meet extraordinary circumstances..." affecting U.S. vital interests.[2980] The 1991 Act restricted the President's authority to provide Congress the more limited Gang of Eight prior notices only in situations involving covert action, and not in those situations involving other non-covert action intelligence activities. With regard to intelligence activities, other than those involving covert action, the executive branch was legally obligated to inform "the congressional intelligence committees."[2981] Congress in 1991 signaled its view that the earlier 1980 congressional reporting requirements had been intended to apply primarily to covert actions, rather than to all intelligence activities.[2982]

[2979] What constitutes "timely fashion" was the subject of intense debate between the congressional intelligence committees and the executive branch during the consideration of the FY1991 Intelligence Authorization Act. At that time, House and Senate intelligence committee conferees noted that the executive branch had asserted that the President's constitutional authorities "...permit the President to withhold notice of covert actions from the committees for as long as he deems necessary." The conferees disputed the assertion, claiming that the appropriate meaning of "timely fashion" is "within a few days." Specifically, conferees stated, "... While the conferees recognize that they cannot foreclose by statute the possibility that the President may assert a constitutional basis for withholding notice of covert actions for periods longer than "a few days," they believe that the President's stated intention to act under the "timely notice" requirement of existing law to make a notification "within a few days" is the appropriate manner to proceed under this provision, and is consistent with what the conferees believe is its meaning and intent." The conference report includes the text of a letter sent to the House Intelligence Committee chairman, in which President George H.W. Bush stated: "... In those rare instances where prior notice is not provided, I anticipate that notice will be provided within a few days. Any withholding beyond this period will be based upon my assertion of authorities granted this office by the Constitution..." See H.Conf.Rept. No. 102-166, 102 Congress, 1 sess, pp. 27-28 (1991).

[2980] P.L. 96-450, Sec. 501(a) (1) (B). In addition to limiting Gang of Eight limited prior notice authority, P.L. 96-450 included several other covert action program reforms enacted by Congress, the stated intention of which was put in place a more coherent and comprehensive statutory oversight framework for covert action and other intelligence activities. The reforms included the requirements that covert action findings be in writing; a finding may not be retroactive; a finding may not authorize any action that would violate the Constitution or any statute of the United States; and, a finding must identify any third parties (third countries or private parties outside normal U.S. Government controls) who implement a covert action in any significant way.

NSA Domestic Surveillance

In a Dec. 17, 2005 radio address, President George W. Bush said that he had authorized NSA to intercept the international communications of people with known links to al Qaeda and related terrorist organizations in the weeks following the September 11 terrorist attacks.[2983] He said that executive branch representatives had since briefed congressional leaders more than a dozen times regarding the NSA program and its activities,[2984] and that the Members who were briefed were given an opportunity to express their approval or disapproval of the program.[2985] Two of the Members who were briefed, and who said they voiced concerns about the program, disputed that they were provided an opportunity to either approve or disapprove the NSA program.[2986] Other Members who said they were informed about the program said they could not recall certain members objecting to or disagreeing with the program moving forward.[2987]

NSA Program Notification Limited to Gang Of Eight

Some of the Members of Congress who were briefed about the program said that the executive branch had limited its briefings of the legislative branch to the Gang of Eight.[2988] They further asserted that the executive branch had prohibited them from sharing any information about the program with congressional colleagues, including members of the two congressional intelligence committees.[2989]

Based upon publicly reported descriptions of the program, the NSA surveillance program would appear to fall more closely under the definition of an intelligence collection program, rather than qualify as a covert action program as defined by

statute.[2990] The term covert action is defined in statute to mean "... an activity or activities of the United States Government to influence political, economic, or military conditions abroad, where it is intended that the role of the United States Government will not be apparent or acknowledged publicly..."[2991]

If the NSA surveillance program were to considered an intelligence collection program, limiting congressional notification of the NSA program to the Gang of Eight, which some Members who were briefed about the program contend, would appear to be inconsistent with the law, which requires that the "congressional intelligence committees be kept fully and currently informed of all intelligence activities,"[2992] other than those involving covert actions.

It may be argued that there apparently is no provision in law restricting whether and how the leaders of the committees share with the membership information pertaining to intelligence activities that the executive branch has provided to the chairmen and ranking members. Nor apparently is there any legal provision which sets forth any procedures that would govern the access of appropriately cleared committee staff to such classified information.

Both committees have adopted rules that govern access by committee members to such matters, contained in hardcopy, e.g. "papers" and "material." The House Permanent Select Committee on Intelligence (HPSCI) committee rules stipulate: "All Members of the Committee shall at all times have access to all classified papers and other material received by the Committee from any source."[2993] According to the Senate Select Committee (SSCI) on Intelligence committee rules, "Each member of the Committee shall at all times have access to all papers and other material received from any source."[2994] Both committees also reserve the right to determine committee staff access to information in the committees' possession.[2995]

[2990] National Security Act of 1947, Sec. 503(e)(1). According to this section of the law, the term covert action does not include, among other activities, those activities, the primary purpose of which is to acquire intelligence. Representative Jane Harman, Ranking Member of the HPSCI, made this point in a Jan. 4, 2006 letter to President Bush.

[2991] National Security Act of 1947, Sec. 503 [50 U.S.C. 413b] (e).

[2992] Sec. 501 [50 U.S.C. 413] (a) (1) and Sec. 502 [50 U.S.C. 413a] (a) (1).

[2993] Rules of Procedure For the Permanent Select Committee on Intelligence, United States House of Representatives, 108th Congress, Rule 14 (b).

[2994] Rules of Procedure For the Select Committee on Intelligence, United States Senate (Amended Jan. 26, 2005), Rule 9.3.

[2995] Rules of Procedure For the Permanent Select Committee on Intelligence, United States House of Representatives, 108th Congress, Rule 14 (b); and Rules of Procedure For the Select Committee on Intelligence, United States Senate (Amended Jan. 26, 2005), Rule 9.5.

Moreover, in an indication that both chambers have taken steps to affirmatively set out procedures to govern the handling of classified information in the possession of Congress, both chambers have made available to the committees a process under which each could disclose publicly any information in its possession – including classified material – if either committee determined that the public interest would be served by doing so.[2996]

Protection of Intelligence Sources and Methods

The executive branch may argue that it limited its briefing of the NSA program to the Gang of Eight, and further instructed those Members not to share information about the program with other members of the intelligence committees, in order to protect intelligence sources and methods. Limiting the sharing of intelligence information so as to protect intelligence sources and methods is an accepted Intelligence Community practice. Such practice is based upon the theory that as more individuals are informed about certain intelligence information, the greater is the risk that sources and methods will be disclosed, inadvertently or otherwise. Although limiting its briefing of the NSA program to the Gang of Eight may or may not be inconsistent with the legal requirement that the intelligence committees be kept fully and currently informed of intelligence activities, other than those involving covert action, the executive branch could assert that it also is legally required to pay "... due regard for the protection from unauthorized disclosure of classified information relating to sensitive intelligence sources and methods or other exceptionally sensitive matters..."[2997]

Congress has recognized such a necessity and stated its intent that the executive branch, in extremely rare circumstances, may need "...to preserve essential secrecy.." and thus may decide "...not to impart certain sensitive aspects of operations or collection programs to the oversight committees in order to protect extremely sensitive intelligence sources and methods..."[2998] In acknowledging this narrow need, however, Congress did not explicitly recognize, in statute or report language, the executive branch's right to withhold from the intelligence committees information about the existence of the intelligence operations and collection programs, but rather only its authority to hold back information pertaining to certain sensitive aspects of such operations and programs. [emphasis added]

The executive branch may assert that the mere discussion of the NSA program generally could expose certain intelligence sources and methods to disclosure,

thus making it necessary to limit the number of those knowledgeable of the program in order to reduce the risk of such disclosure occurring.

Notification Precedent

The executive branch could point out that despite the current statutory obligation of keeping the intelligence committees fully and currently informed of intelligence activities, other than those involving covert action, the leadership of these two committees over time have accepted executive branch practice of limiting notification of intelligence activities in some cases to either the Gang of Eight, or to the chairmen and ranking members of the intelligence committees.[2999]

[2999] House of Representatives Democratic Leader Nancy Pelosi has argued that the executive branch employs "a-need-to -know" principle in deciding which Members of the congressional intelligence committees should be kept fully and currently informed of certain intelligence information, and thus, sometimes, limit the sharing of intelligence information to the chairmen and ranking members of the committees. She asserts that Congress should adopt a similar principle, and contends that the entire membership of the intelligence committees must be kept informed if Congress is to conduct effective oversight of the intelligence community. See Nancy Pelosi, "The Gap in Intelligence Oversight," Washington Post, Jan. 15, 2006, p. B7.

"Gang of Four" Congressional Intelligence Notifications, R40698 (January 29, 2010).

R40698

Summary

"Gang of Four" intelligence notifications generally are oral briefings of certain particularly sensitive *non-covert action intelligence activities*, including principally, but not exclusively, intelligence collection programs, that the Intelligence Community typically limits to the chairmen and ranking members of the two congressional intelligence committees, and at times, but not always, to their respective staff directors.

Gang of Four notifications are not based in statute but have constituted a practice generally accepted by the leadership of the intelligence committees and that is employed when the Intelligence Community believes a particular intelligence activity to be of such sensitivity that a restricted notification is warranted in order to reduce the risk of disclosure, inadvertent or otherwise. Intelligence activities viewed as being less sensitive typically are briefed to the full membership of each committee.

In either case—whether a given briefing about non-covert action intelligence activities is limited to the Gang of Four, or provided to the full membership of the intelligence committees—the current statute conditions the provision of any such information on the need to protect from unauthorized disclosure classified information relating to sensitive intelligence sources and methods or other exceptionally sensitive matters.

Congress has said that its intent in this regard is that in extremely rare circumstances a need to preserve essential secrecy may result in a decision not to impart certain sensitive aspects of operations or collection programs to the

intelligence oversight committees in order to protect extremely sensitive intelligence sources and methods. With regard to the phrase "other exceptionally sensitive matters," Congress has said its intent in using this phrase is to refer to other extremely sensitive categories of classified information such as information concerning the operational details of military deployment and extraordinarily sensitive diplomatic contacts, which the intelligence committees do not routinely require to satisfy their responsibilities.

This report reviews the history of Gang of Four notification process and compares this procedure with that of the "Gang of Eight" notification procedure. The "Gang of Eight" procedure is statutorily based and provides that that the Chairmen and Ranking Members of the intelligence committee, along with the Speaker and minority leader of the House, and Senate majority and minority leaders—rather than the full membership of the intelligence committees—are to receive prior notice of particularly sensitive covert action programs, if the President determines that limited access to such programs is essential to meet extraordinary circumstances affecting vital U.S. interests.

Although the FY2010 Intelligence Authorization bills approved by the two congressional intelligence committees address Gang of Eight covert action notifications, neither of the two bills reference Gang of Four notifications. Congress has not acted on the FY2010 Intelligence Authorization bill.

Not Statute-Based "Gang of Four" Briefings

The "Gang of Four" intelligence notification procedure has no basis in statute. Nor is such a procedure referenced in the rules of either of the two congressional intelligence committees. Rather, this particular notification procedure could be reasonably characterized as a more informal notification procedure that, over time, has come to be used by the executive branch, and generally accepted by the leadership of the intelligence committees, to provide limited notification of particularly sensitive intelligence activities to the committees' chairmen and ranking members. At times, the committees' majority and minority staff directors have been included in such briefings.

The use of Gang of Four notifications pre-dates the establishment of the congressional intelligence committees in the mid-1970s.[3000] Initially, such limited notifications were used to inform relevant congressional committee leadership of especially sensitive intelligence matters, including both covert action and intelligence collection programs.[3001] Observers commenting on such

---

[3000] The Senate Select Committee on Intelligence was established in 1976; the House Permanent Select on Intelligence was established in 1977.

[3001] See The CIA and Congress; the Untold Story From Truman to Kennedy, by David M. Barrett, University Press of Kansas, 2005, pp. 100-103.

notifications used during this time period characterized them as being oral and often cursory, and being limited to committee chairmen and ranking members and one or two senior staff members.[3002]

In 1980, when Congress approved the new "Gang of Eight"[3003] notification procedure for particularly sensitive covert action programs, use of the Gang of Four process came to be generally limited to notifying the committee leadership of sensitive non-covert action intelligence programs.

Protection of Sources and Methods or Other Exceptionally Sensitive Matters

In 1980, Congress also adopted statutory language requiring that, except for covert action notifications, which are governed by a separate set of statutory requirements, the Intelligence Community is obligated to keep the congressional intelligence committees fully and currently informed of all intelligence activities and furnished with any information or material concerning such intelligence activities.[3004] Congress conditioned these two reporting requirements on the need to protect from unauthorized disclosure classified information relating to sensitive intelligence sources and methods or other exceptionally sensitive matters.[3005] Report language stated:

> *The Administration recognizes that the intelligence oversight committees of the House and Senate are authorized to receive such information. However, it is recognized that in extremely rare circumstances a need to preserve essential secrecy may result in a decision not to impart certain sensitive aspects of operations or collection programs to the oversight committees in order to protect extremely sensitive intelligence sources and methods.[3006] [emphasis added]*

In 1991, Congress adopted new but similar language with regard to the protection of sources and methods, adding in statute the phrase "other exceptionally

[3003] See the National Security Act of 1947 as amended, Sec. 503 [50 U.S.C. 413b] (c) (2).

[3004] See P.L. 96-450, Sec. 501 (a).

[3005] Ibid.

[3006] See S.Rept. 96-730, p. 6 [96th Congress, 1st sess.] This Report accompanied S. 2284, a proposed Intelligence Oversight Act of 1980.

sensitive matters." Doing so, according to accompanying report language, would more accurately reflect and was intended to have the same meaning as the legislative history of the 1980 statutory change. The Report language stated that the added phrase:

> *... is intended to refer to other extremely sensitive categories of classified information such as information concerning the operational details of military deployments, and extraordinarily sensitive diplomatic contacts, which the intelligence committees do not routinely require to satisfy their responsibilities.*[3007] *[emphasis added]*

The issue of Intelligence Community reporting obligations has been raised anew in recently published reports, reportedly prompting the House Intelligence Committee to launch an investigation to determine whether there was any past decision or direction to withhold information from the Committee. Committee Republicans have asserted that the investigation represents an effort to protect Democratic leader, House Speaker Nancy Pelosi, who has asserted that the CIA mislead her about its terrorist interrogation program. See Tabassum Zakaria, "U.S. House Launches Investigation into CIA Program, Reuters, July 17, 2009, and "House Intel Committee to Investigate CIA Program," Associated Press, July 17, 2009. Senate Intelligence Chairman Dianne Feinstein reportedly has said that current Director of Central Intelligence Leon Panetta recently told lawmakers that former Vice President Richard Cheney had ordered that information regarding a secret Central Intelligence Agency initiative had been withheld from the congressional intelligence committees. Sen. Feinstein was quoted as saying, "We were kept in the dark. That's something that should never, ever happen again." Withholding such information from Congress, she reportedly said, "is a big problem, because the law is very clear." See Siobhan Gorman, "CIA Had Secret Al Qaeda Plan," Wall Street Journal, July 13, 2009. Other Members of the Intelligence Committees reportedly have disagreed with Sen. Feinstein's assessment, in whole or in part. Sen. Christopher Bond, Vice Chairman of the Senate Intelligence Committee, was quoted as saying, "There is absolutely no evidence that anyone lied to or misled Congress." Bond also reportedly stated, "The CIA doesn't have the time, we don't have the time, to be briefed on everything the agency's doing around the world. Every time they sneeze, we don't hear about it, unless it's a significant impact, or there's a major impact on our activity. And this was another activity to collect better information on potential threats. It did not work ... it's not an interrogation program. It didn't even rise to the level of covert action." See Ronald Kessler, "Sen. Bond: Democrats Conducting 'Jihad' to Protect Pelosi" Newsmax.com, July 13, 2009. Senator Bond also reportedly has stated that the Committee's records indicate that the CIA

[3007] See S. Rept. 102-85, accompanying S. 1325, which authorized FY1991 Intelligence appropriations.

appropriately notified Members of the CIA's program, a claim which Chairman Feinstein rejected. See Chris Strohm, "Bond Fires Back at Democrats Over CIA's Secret Program," Congress Daily/A.M., July 16, 2009. Congressman Peter Hoekstra, Ranking Member of the House Intelligence Committee, reportedly stated that that he would not judge the CIA harshly in the case of the unidentified program, because it was not fully operational. But he said that in general, the CIA had not been as forthcoming as the law required. See Scott Shane, "Cheney is Linked to Concealment of the C.I.A. Project," New York Times, July 12, 2009. According to other reports, former President George W. Bush authorized killing al-Qaida leaders shortly after Sept. 11 terrorist attacks, and that Congress was made aware of that. However, according to this report, Director Panetta also told Members that according to notes that he had been given on the early months of the program, then-Vice President Cheney directed the CIA not to inform Congress of the specifics of the secret program. See Pamela Hess, "Officials: CIA Program Targeted al-Qaida Leaders," Associated Press, July 13, 2009.

Use of Limited Notifications Continued After Establishment of Congressional Intelligence Committees

In the wake of congressional investigations undertaken in the mid-1970s that documented a pattern of misconduct on the part of U.S. intelligence agencies, Congress tightened its oversight of the Intelligence Community by establishing intelligence committees in the House and Senate that were to be exclusively devoted to intelligence oversight. Until these two committees were established, Congress's oversight of the intelligence agencies, although more assertive than is generally understood, particularly insofar as the Central Intelligence Agency (CIA) was concerned, was generally viewed as limited and informal.[3008] That approach began to change in the face of the revelations of wrong-doing by the Intelligence Community.

In the resolutions establishing the intelligence committees, Congress set out several new obligations that, at least in the case of the Senate, emphasized certain executive branch obligations to keep the two new intelligence committees fully and currently informed of all intelligence activities, including both collection and covert action programs.[3009] Although legally non-binding, the "sense of the

---

[3008] See The CIA and Congress; the Untold Story From Truman to Kennedy, by David M. Barrett, University Press of Kansas, 2005, for an overview of congressional intelligence oversight during this period.

[3009] The origin of the phrase "fully and currently informed" is the requirement contained in Sec. 202 of the Atomic Energy Act of 1946. The language also is contained in S.Res. 400, 94th Congress and, according to congressional sponsors who inserted the language in statute, the requirement has well served both the Joint Committee on Atomic Energy and the Senate

Senate" resolution establishing the committee also stated that the intelligence agencies should keep the committee informed of "any significant anticipated activities," and provide such information as may be requested by the committee relating to matters within its jurisdiction. Although the House did not include similar language in its resolution, both committees took the position that they were "appropriate committees" for the purposes of receiving notice of covert actions, a position to which the administration of President Jimmy Carter acquiesced.[3010]

Despite the Senate's directive that the Senate's new intelligence committee be kept fully and currently informed of all intelligence activities, the executive branch continued its practice of limiting notification of certain sensitive intelligence activities, including covert and collection operations, to the committees' chairmen and ranking members—the Gang of Four —with the apparent acquiescence of the committees' leadership. According to one account, the Committee's chairman, Senator Birch Bayh[3011] said:

> *There were a couple of other areas where the president wouldn't tell the entire committee. He let me know but not the entire committee. I suggested to Goldwater[3012] we keep it to ourselves. Barry concurred. There were a couple of others we decided to tell to the entire committee.[3013]*

Intelligence Committee by ensuring that the Committee would remain informed in such detail as the Committee required. Sponsors pointed out in report language accompanying the statutory change that the responsibility of the executive branch is not limited to providing full and complete information upon request from the intelligence committees but, rather, includes "an affirmative duty on the part of the head of each entity to keep the committees fully and currently informed all major policies, directive, and intelligence activities." See S.Rept. 96-730, p. 7, accompanying S. 2284, the Intelligence Oversight Act of 1980, May 15, 1980.

[3010] See "Legislative Oversight of Intelligence Activities: The U.S. Experience," Report prepared by the Select Committee on Intelligence, United States Senate, 103rd Congress, 2nd sess., October 1994, p. 6.

[3011] Senator Birch Bayh was named chairman after Senator Daniel Inouye, the Committee's first chairman, resigned as chairman.

[3012] Senator Barry Goldwater was the Committee's vice chairman during this period of time. The Senate Intelligence Committee's establishing resolution called for the establishment of a committee vice chairman, rather than a "ranking member." The vice chairman acts in the "place and stead" of the committee chairman in the absence of the chairman. See S.Res. 400, Sec. 2 (c), 94th Congress.

[3013] See Frank J. Smist, Jr., Congress Oversees the United States Intelligence Community, Second Edition, 1947-1994, The University of Tennessee Press, 1994, p. 121.

According to this same account, there were other sensitive operations about which the committee and its chairman received no notification.[3014]

Gang of Four members reportedly continue to keep the contents of sensitive briefings to themselves, although on certain occasions, the chairman and ranking member of the House Intelligence Committee reportedly have agreed to share the information with their respective party leaders.[3015] According to at least one Gang of Four member, the choice to do so is not always the lawmakers' to make. Representative Silvestre Reyes, the current chairman of the House Intelligence Committee, reportedly said that, during the administration of President George W. Bush, he was unable to have legal counsel or subject matter experts in attendance during such restricted briefings, leaving the committee unable to conduct oversight. "We were at a huge disadvantage, because [the administration and the intelligence community] called the shots," Reyes reportedly stated.[3016]

1979 Iran Hostage Crisis

Although Senate Intelligence Committee Chairman Bayh appeared to accept the practice of restricted Gang of Four notifications, he reportedly was furious[3017] when he learned President Carter had not informed him in advance of the 1980 covert efforts to rescue U.S. hostages held in Iran because of concerns over operational security and the risk of disclosure.[3018] Director of Central Intelligence Stansfield Turner briefed the full intelligence committees, but only after the operations had been conducted.[3019]

[3014] Ibid.

[3015] See Shane Harris, "The Survivor," National Journal, June 6, 2009, pp. 36-43.

[3016] Ibid, p. 42.

[3017] See Frank J. Smist, Jr., Congress Oversees the United States Intelligence Community, Second Edition, 1947-1994, The University of Tennessee Press, 1994, p. 121.

[3018] At the time of the 1980 Iran covert hostage rescue operation, existing law—the 1974 Hughes-Ryan Amendment— required notification of any proposed covert action program to up to eight congressional committees "in a timely fashion"—a phrase generally interpreted to mean that the president could inform Congress of covert operations after the fact. See the Congressional Quarterly Almanac, Vol. XXXVI, 1980, p. 66.

[3019] There actually were two separate operations—both of which constituted covert actions, since neither was undertaken to collect intelligence—to rescue U.S. embassy personnel after Iranian "students" overran the U.S. Embassy in Tehran on November 4, 1979. The failed operation involved an attempted airborne rescue of U.S. hostages which was aborted when three of the rescue helicopters experienced mechanical difficulties. A subsequent collision of one of the helicopters and a refueling plane left several American rescuers dead. An earlier effort resulted in the successful extrication of Americans who had been working at the U.S. embassy but had avoided capture by taking refuge in the residences of the Canadian ambassador and deputy chief of mission. See L. Britt Snider, The Agency and the Hill, CIA's Relationship With Congress, 1946-

Bayh expressed his concern that the executive branch's action reflected a distrust of the intelligence committees. "It would have been so easy to tell us," he was quoted as saying. "Any leaker of that information would be hung up by his thumbs. I expressed my anger to Carter about not informing us. Carter had a thing about not being able to trust the committee."[3020]

Other members of the Committee, however, apparently were quite sympathetic to the administration's concerns and expressed their understanding of the demands of secrecy and the subsequent decision to withhold prior notification. One, a senior Republican on the Committee, was quoted as saying, "The more people you tell, the more danger there is of losing life. I say: 'To hell with the Congress.'"[3021]

Despite the overall sympathy shown for President Carter's position by other members of the intelligence committees, Senator Bayh suggested that future administrations could address disclosure concerns by notifying a more limited number of members, a special subcommittee of five or seven, "so that at least somebody in the oversight mechanism would know .... If oversight is to function better, you first need it to function."[3022] This general sentiment appeared to prevail.

Later in 1980, Congress approved in statute the new Gang of Eight notification procedure. Henceforth, the intelligence committees' leadership, the Speaker and minority leader of the House, and Senate majority and minority leaders, were to be provided prior notice of particularly sensitive covert action programs if the President determined that limited access to such programs was essential to meet extraordinary circumstances affecting vital U.S. interests.[3023] At that time, neither the statute nor accompanying report language further defined what would constitute "extraordinary circumstances affecting vital U.S. interests," although in 1991, Intelligence Conference Committee Conferees stated that the Gang of Eight notification procedure should be invoked when "the President is faced with a covert action of such extraordinary sensitivity or risk to life that knowledge of the covert action should be restricted to as few individuals as

possible."[3024] Conferees also indicated that they expected the executive branch to hold itself to the same standard by similarly limiting knowledge of such sensitive covert actions within the executive.[3025]

Distinctions Between Gang of Four and Gang of Eight Notifications

Gang of Four and Gang of Eight[3026] notifications differ in several ways. A principal difference is that the Gang of Four notification procedure is not based in statute, as previously mentioned, but rather is a more informal notification process that generally has been accepted by the leadership of the intelligence committees over time.

By contrast, the Gang of Eight procedure is provided for in statute, and imposes certain legal obligations on the executive branch. When employing this particular notification procedure, the President must make a determination that vital U.S. interests are at stake if a notification is to be restricted to the Gang of Eight[3027] and provide a statement setting forth the reasons for limiting notification to the Gang of Eight, rather than notifying the full membership of the intelligence committees.[3028] The President also is required to provide the Gang of Eight advance notice of the covert action in question,[3029] although the statute also recognizes the President's constitutional authority to withhold such prior notice altogether.[3030] Finally, the chairmen of the intelligence committees, both Gang of

[3024] Joint Explanatory Statement of the Committee of Conference, accompany Conf.Rept. 102-166, 102nd Congress, 1st sess. (1991), p. 28. The Joint Explanatory Statement accompanied H.R. 1455, the FY1991 Intelligence Authorization, Act, which was subsequently signed into law (P.L. 102-88). The "risk to life" language is not in statute.

[3025] Ibid.

[3026] For an in-depth review of Gang of Eight procedures, see CRS Report R40691, Sensitive Covert Action Notifications: Oversight Options for Congress, by Alfred Cumming.

[3027] See the National Security Act of 1947 as amended, Sec. 503 [50 U.S.C. 413b](c)(2).

[3028] Ibid, Sec. 503 [50 U.S.C. 413b](c)(4). That statute does not explicitly specify whether such a statement must be in writing, nor does it explicitly specify to whom such a statement should be provided.

[3029] Ibid, Sec. 503 [50 U.S.C. 413b](c)(2). The President must comply with these last two requirements—providing signed copies of the covert action and providing advance notification—when notifying the full committees of covert action operations that are determined to be less sensitive than Gang of Eight covert actions.

[3030] If, however, the President withholds prior notice for the Gang of Eight, he must "fully inform" the congressional intelligence committees in a "timely fashion" after commencement of the covert action in question. See the National Security Act of 1947 as amended, Sec. 503 [50 U.S.C. 413b](c)(3).

Eight Members, must be provided signed copies of the covert action finding in question,[3031] and Gang of Eight Members must be notified of any significant changes in a previously approved covert action, or any significant undertaking pursuant to a previously approved finding.[3032]

A second distinction between the two notification procedures, at least since 1980 when the Gang of Eight procedure was first adopted in statute, is that Gang of Four notifications generally are limited to non-covert action intelligence activities, including principally but not exclusively intelligence collection programs viewed by the Intelligence Community as being particularly sensitive. Gang of Eight notifications, by contrast, are statutorily limited to especially sensitive covert action programs.

Third, the two procedures also appear to differ with regard to certain restrictions that have been placed on Members who are briefed. With regard to Gang of Eight briefings, Members have been unable to take notes, seek the advice of their counsel, or discuss the issues raised with their committee colleagues.[3033] Historically, such conditions appear to have been imposed by the executive branch and to have been generally complied with by those Members who have been notified.[3034] With regard to Gang of Four procedures, however, such procedures appear to have been generally more informal and flexible. For example, staff directors have been included in certain Gang of Four briefings, and note-taking, at least in certain instances, has not been explicitly prohibited.

Notwithstanding these distinctions, there arguably is no provision in statute that restricts whether and how the Chairmen and Ranking Members of the intelligence committees share with committee members information pertaining to intelligence activities that the executive branch has provided only to the committee leadership, either through Gang of Four or Gang of Eight notifications. Nor apparently is there any statutory provision which sets forth any procedures that would govern the access of appropriately cleared committee staff to such classified information. As discussed earlier, there have been instances when intelligence committee leadership has decided to inform the full

membership of the intelligence committees of certain Gang of Four notifications.[3035]

Despite a statutory provision directing the intelligence committees to establish certain procedures that may be necessary to carry out the statutory provisions requiring that the committees be kept fully and currently informed of intelligence activities, the committees apparently have not established such procedures with regard to Gang of Four and Gang of Eight notifications.[3036] If the intelligence committees were to do so, congressional intent would appear to indicate that the establishment of such procedures would be a committee responsibility, rather than one left to the discretion of the committees' chairmen and ranking members.[3037]

Impact of Limited Notifications on Congressional Oversight

The impact of such limited congressional intelligence notification procedures as Gang of Four and Gang of Eight continues to be debated.

Supporters of Gang of Eight notifications, for example, assert that such restricted notifications continue to serve their original purpose, which is to protect operational security of particularly sensitive intelligence activities while they are on-going. Further, they point out that although Members receiving these notifications may be constrained in sharing detailed information about the notifications with other intelligence committee members and staff, these same Members can raise concerns directly with the President and the congressional leadership and thereby seek to have any concerns addressed.[3038] Supporters also argue that Members receiving these restricted briefings have at their disposal a number of legislative remedies if they decide to oppose particular programs,

---

[3035] See footnote 14.

[3036] In marking up its version of the FY2010 Intelligence Authorization Act, the House Permanent Select Committee on Intelligence replaced the Gang of Eight statutory provision, adopting instead a statutory requirement that each of the intelligence committees establish written procedures as may be necessary to govern such notifications. The executive branch on July 8, 2009, issued a Statement of Administration which stated that the President's senior advisors would recommend that the President veto the FY2010 Intelligence Authorization Act if the Committee's language was retained in the final bill.

[3037] See S.Rept. 96-730, 96th Cong., 2nd sess. (1980), p. 12. This report accompanied S. 2284, from which Title V of P.L. 96-450 is derived.

[3038] See Congressional Quarterly transcript of press conference given by Representative Peter Hoekstra, December 21, 2005.

including the capability to use the appropriations process to withhold funding until the executive branch behaves according to Congress's will.[3039]

Some critics counter that restricted notifications such as Gang of Eight do not provide for effective congressional oversight because participating Members "cannot take notes, seek the advice of their counsel, or even discuss the issues raised with their committee colleagues."[3040] Other critics contend that restricted notifications such as Gang of Eight and Gang of Four briefings have been "overused."[3041] Some critics also assert, with regard to the Gang of Four notification procedure, that its use is unlawful because such a procedure is not statutorily based.[3042]

Directors of National Intelligence and Central Intelligence Agency Critical of Gang of Eight Notifications For Non-Covert Actions

During his Senate confirmation hearings, Director of National Intelligence (DNI) Admiral Dennis Blair criticized the use of the Gang of Eight notification procedure to notify Congress of the National Security Agency's (NSA) electronic communications surveillance program—often referred to as the Terrorist Surveillance Program, or TSP—and the CIA's detention, interrogation and rendition program. Both programs, DNI Blair said, " ... involved sensitive collection activities rather than covert actions. The "Gang of 8" notice is available ... only where notice of covert action is concerned, and its used in these programs was not expressly allowed."[3043] DNI Blair said that because of the restrictive

Before the notification briefings were expanded to include more members, the executive appeared to treat both programs as particularly sensitive collection programs insofar as congressional notification was concerned, in that it limited its initial notification to the Gang of Four. See letter from Representative Jane Harman to President George W. Bush, December 21, 2005, in which she makes reference to the Administration's use of the Gang of Four notification process, used initially to notify Congress of the NSA's terrorist surveillance program. The Bush Administration apparently also employed the Gang of Four notification procedure to notify Congress of the CIA's

nature of Gang of Eight notifications, its use in these two instances prevented the intelligence committees "from carrying out their oversight responsibilities."[3044]

CIA Director (DCIA) Panetta, during his confirmation process, said the NSA's Surveillance Program was not a covert action program, and thus restricting notification of that program to the Gang of Eight was "inappropriate."[3045] Although in his response DCIA Panetta did not address whether the CIA's detention, interrogation and rendition program was an intelligence collection program, or a covert action program, he did assert that where covert action is concerned, the Gang of Eight notification procedure "ought to be limited to extraordinary cases, where operational details will be revealed whose disclosure might jeopardize those involved …This result might be justified so long as lives remain at risk, but not after the danger has passed."[3046] He went on to say that restricted Gang of Eight notifications deny the eight Members the ability to conduct oversight because they "cannot tell anyone else what they have heard, and are thereby denied the ability to seek professional advice from their staffs or consult with knowledgeable members."[3047]

Both Directors Support Gang of Four Notifications Under Certain Circumstances

During their respective confirmations, DNI Blair and DCIA Panetta said they would limit the use of notification of certain sensitive intelligence activities, other than covert actions, to the chairmen and ranking members of the intelligence committees for special cases involving the potential for the loss of life if an intelligence operation were to be exposed. Both officials prefaced their respective statements by referencing the statutory requirement that informing the committees of such intelligence activities be done "To the extent consistent with due regard for the protection from unauthorized disclosure of classified information relating to sensitive intelligence sources and methods or other

[3047] Ibid.

exceptionally sensitive matters ... "[3048] Both officials said they interpreted the phrase to provide a degree of latitude in deciding how—not whether – extremely sensitive matters would be brought to the committees' attention.

DNI Blair stated, "In such cases, it may be prudent to begin by notifying the leaders and staff directors of the intelligence committees and attempt to reach an accommodation with them in terms of how and when the committee as a whole should be brought into the matter in question."[3049]

In responding specifically to a question for the record as to when he would believe notification of an intelligence activity may be limited to the chairman and vice chairman or ranking member, DNI Blair referred specifically to "extremely sensitive" collection activities "... which could involve the loss of life if disclosed – I would go to the leaders of the intelligence committees first, to discuss my concerns and how and when notice could prudently be provided to the entire committee."[3050]

Conclusion

The Gang of Four notification procedure has no basis in statute. Rather, this procedure could be reasonably characterized as a more informal notification process that, at various times, has been used by the executive branch, to provide limited notification of particularly sensitive intelligence activities to the chairmen and ranking members of the intelligence committees. The Gang of Four procedure appears to have been a practice that has been generally accepted by the chairmen and ranking members of the intelligence committees over time, although there is some indication that, on occasion, committee leadership has resisted the executive branch and its use of this particular notification procedure.[3051]

Further, in approving Sec. 501[50 U.S.C. 413](c) of the National Security Act of 1947, which calls on the President and the congressional intelligence committees to establish such procedures as may be necessary to carry out the provisions of this title—referring to the Act's Title V—it appears that congressional intent was that the full membership of the committees, rather than the chairmen and

ranking members, would determine such procedures. No such procedures appear to have been developed with regard to the Gang of Four and Gang of Eight notifications.

The Gang of Eight notification procedure, by contrast, is based in statute. Its use is limited to especially sensitive covert actions in which the President determines that such limited notification is essential to meet extraordinary circumstances affecting vital U.S. interests.

Striking the proper balance between effective oversight and security remains a challenge for Congress and the executive. Doing so in cases involving particularly sensitive collection and covert action programs presents a special challenge. Success turns on a number of factors, not the least of which is the degree of comity and trust that exists in the relationship between the legislative and executive branches. More trust can lead to greater flexibility in notification procedures. When trust in the relationship is lacking, however, the legislative branch may see a need to tighten and make more precise the notification architecture, so as to assure, in its view, that an appropriate flow of information occurs, thus enabling effective oversight.

Summary

Published reports have suggested that in the wake of the 9/11 terrorist attacks, the Pentagon has expanded its counter-terrorism intelligence activities as part of what the Bush Administration termed the global war on terror. Some observers have asserted that the Department of Defense (DOD) may have been conducting certain kinds of counterterrorism intelligence activities that would statutorily qualify as "covert actions," and thus require a presidential finding and the notification of the congressional intelligence committees.

Defense officials have asserted that none of DOD's current counter-terrorist intelligence activities constitute covert action as defined under the law, and therefore, do not require a presidential finding and the notification of the intelligence committees. Rather, they contend that DOD conducts only "clandestine activities." Although the term is not defined by statute, these officials characterize such activities as constituting actions that are conducted in secret, but which constitute "passive" intelligence information gathering. By comparison, covert action, they contend, is "active," in that its aim is to elicit change in the political, economic, military, or diplomatic behavior of a target.

Some of DOD's activities have been variously described publicly as efforts to collect intelligence on terrorists that will aid in planning counter-terrorism missions; to prepare for potential missions to disrupt, capture or kill them; and to help local militaries conduct counter-terrorism missions of their own.

Senior U.S. intelligence community officials have conceded that the line separating Central Intelligence Agency (CIA) and DOD intelligence activities has

blurred, making it more difficult to distinguish between the traditional secret intelligence missions carried out by each. They also have acknowledged that the U.S. Intelligence Community confronts a major challenge in clarifying the roles and responsibilities of various intelligence agencies with regard to clandestine activities. Some Pentagon officials have appeared to indicate that DOD's activities should be limited to clandestine or passive activities, pointing out that if such operations are discovered or are inadvertently revealed, the U.S. government would be able to preserve the option of acknowledging such activity, thus assuring the military personnel who are involved some safeguards that are afforded under the Geneva Conventions. Covert actions, by contrast, constitute activities in which the role of the U.S. government is not intended to be apparent or to be acknowledged publicly. Those who participate in such activities could jeopardize any rights they may have under the Geneva Conventions, according to these officials.

In committee report language accompanying H.R. 2701, the FY2010 Intelligence Authorization Act, the House Permanent Select Committee on Intelligence (HPSCI) expressed its concern that the distinction between the CIA's intelligence-gathering activities and DOD's clandestine operations is becoming blurred and called on the Defense Department to meet its obligations to inform the Committee of such activities.

This report examines the statutory procedures governing covert action and associated questions to consider.

Introduction

Some observers assert that since 9/11 the Pentagon has begun to conduct certain types of counterterrorism intelligence activities that may meet the statutory definition of a covert action. The Pentagon, while stating that it has attempted to improve the quality of its intelligence program in the wake of 9/11, has contended that it does not conduct covert actions.

Congress in 1990 toughened procedures governing intelligence covert actions in the wake of the Iran-Contra affair, after it was discovered that the Reagan Administration had secretly sold arms to Iran, an avowed enemy that had it branded as terrorist, and used the proceeds to fund the Nicaraguan Democratic Resistance, also referred to by some as "Contras." In response, Congress adopted several statutory changes, including enacting several restrictions on the conduct of covert actions and establishing new procedures by which Congress is notified of covert action programs. In an important change, Congress for the first time statutorily defined covert action to mean "an activity or activities of the United States Government to influence political, economic, or military conditions

abroad, where it is intended that the role of the United States Government will not be apparent or acknowledged publicly."[3052]

The 1991 statutory changes remain in effect today. This report examines the legislative background surrounding covert action and poses several related policy questions.

Background

In 1974, Congress asserted statutory control over covert actions in response to revelations about covert military operations in Southeast Asia and other intelligence activities. It approved the Hughes-Ryan Amendment to the Foreign Assistance Act of 1961 requiring that no appropriated funds could be expended by the CIA for covert actions unless and until the President found that each such operation was important to national security, and provided the appropriate committees of Congress with a description and scope of each operation in a timely fashion.[3053] The phrase "timely fashion" was not defined in statute.

In 1980, Congress endeavored to provide the two new congressional intelligence committees with a more comprehensive statutory framework under which to conduct oversight.[3054] As part of this effort, Congress repealed the Hughes-Ryan Amendment and replaced it with a statutory requirement that the executive branch limit its reporting on covert actions to the two intelligence committees, and established certain procedures for notifying Congress prior to the implementation of such operations. Specifically, the statute stipulates that if the President determines it is essential to limit prior notice to meet extraordinary circumstances affecting the vital interests of the United States, the President may limit prior notice to the chairmen and ranking minority members of the intelligence committees, the speaker and minority leader of the House, and the majority and minority leaders of the Senate—a formulation that has become known as the "Gang of Eight." If prior notice is withheld, the President is required to inform the Committees in a "timely fashion" and provide a statement of the reasons for not giving prior notice.[3055]

In 1984, in the wake of the mining of Nicaraguan harbors in support of the Nicaraguan Democratic Resistance, the chairman and vice chairman of the

---

[3052] Sec. 503(e) of the National Security Act of 1947 [50 U.S.C. 413b].

[3053] P.L. 93-559 (1974). The "appropriate committees of Congress" was interpreted to include the Committees on Armed Services, Foreign Relations (Senate) and Foreign Affairs (House), and Appropriations of each House of Congress, a total of six committees.

[3054] The Senate Select Committee on Intelligence was established in 1976. The House Permanent Select Committee on Intelligence was established in 1977.

[3055] P.L. 96-450 (1980).

Senate Select Committee on Intelligence signed an informal agreement—which became known as the "Casey Accords"—with then-Director of Central Intelligence (DCI) William Casey establishing certain procedures that would govern the reporting of covert actions to Congress. In 1986, the committee's principals and the DCI signed an addendum to the earlier agreement, stipulating that the Committee would receive prior notice if "significant military equipment actually is to be supplied for the first time in an ongoing operation … even if there is no requirement for separate higher authority or Presidential approval." This agreement reportedly was reached several months after President Reagan signed the January 17, 1986, Iran Finding which authorized the secret transfer of certain missiles to Iran.[3056]

Following the Iran-Contra revelations, President Ronald Reagan in 1987 issued National Security Decision Directive 286 prohibiting retroactive findings and requiring that findings be written. The executive branch, without congressional consent, can revise or revoke such National Security Directives.

In 1988, acting on a recommendation made by the Congressional Iran-Contra Committee, the Senate approved bipartisan legislation that would have required that the President notify the congressional intelligence committees within 48 hours of the implementation of a covert action if prior notice had not been provided. The House did not vote on the measure.

Still concerned by the fall-out from the Iran-Contra affair, Congress in 1990 attempted to tighten its oversight of covert action. The Senate Intelligence Committee approved a new set of statutory reporting requirements, citing the ambiguous, confusing and incomplete congressional mandate governing covert actions under the then-current law. After the bill was modified in conference, Congress approved the changes.[3057]

President George H.W. Bush pocket-vetoed the 1990 legislation, citing several concerns, including conference report language indicating congressional intent that the intelligence committees be notified "within a few days" when prior notice of a covert action was not provided, and that prior notice could only be withheld in "exigent circumstances."[3058] The legislation also contained language stipulating that a U.S. government request of a foreign government or a private citizen to conduct covert action would constitute a covert action.

[3056] W. Michael Reisman and James E. Baker, Regulating Covert Action, 1992, (Yale University Press) pp. 131-132.

[3057] S. 2834.

[3058] Memorandum of Disapproval issued by President George H.W. Bush, Nov. 30, 1990.

In 1991, after asserting in new conference language its intent as to the meaning of "timely fashion" and eliminating any reference to third-party covert action requests, Congress approved and the President signed into law the new measures.[3059] President Bush noted in his signing statement his satisfaction that the revised provision concerning "timely" notice to Congress of covert actions incorporates without substantive change the requirement found in existing law, and that any reference to third-party requests had been eliminated. Those covert action provisions remain in effect today.[3060]

Post 9/11 Concerns

Since the 9/11 terrorist attacks, concerns have surfaced with regard to the Pentagon's expanded intelligence counterterrorism efforts. Some lawmakers reportedly have expressed concern that the Pentagon is creating a parallel intelligence capability independent from the CIA or other American authorities, and one that encroaches on the CIA's realm.[3061] It has been suggested that the Pentagon has adopted a broad definition of its current authority to conduct "traditional military activities" and "prepare the battlefield."[3062] Senior Defense Department officials reportedly have responded that the Pentagon's need for

---

[3059] P.L. 102-88. See covert action requirements in Sec. 503 of the National Security Act of 1947 [50 U.S.C. 413b].

[3060] Although the covert action statute has remained virtually unchanged, Congress has addressed some related concerns. The FY2004 defense authorization law (P.L. 108-136) included a provision requiring the Secretary of Defense to report to Congress on the Special Operations Forces' changing role in counterterrorism, and on the implications of those changes, if any, on the Special Operations command. Also included was a provision requiring that any Special Operations Command-led missions be authorized by the President or the Secretary of Defense. In the 2004 intelligence authorization law, conferees reaffirmed the "functional definition of covert action" and cited the "critical importance to the requirements for covert action approval and notification" contained in the 1991 intelligence authorization law. For a more detailed discussion of these and related issues, see Helen Fessenden, CQ Weekly, "Intelligence: Hill's Oversight Role At Risk, Mar. 27, 2004, p. 734. In the FY2009 Duncan Hunter National Defense Authorization Act, Congress increased, from $25 to $35 million, the amount of annually authorized funds available to the Secretary of Defense, with the concurrence of the relevant Ambassador, "...to provide support to foreign forces, irregular forces, groups, or individuals supporting or facilitating ongoing military operations by United States special operations forces to combat terrorism." Congress also extended the Defense Secretary's authority to spend such funds through fiscal year 2011. Under previously existing law, the Secretary of Defense was required to notify the congressional defense committees "... expeditiously, and in any event in not less than 48 hours, of the use of such authority with respect to that operation." Under the new law, the Secretary is required to notify the committees within 48 hours of the use of such authority. Congress reaffirmed that the Secretary's authority does not constitute the authority to conduct a covert action. See Section 1208, P.L. 110-417.

[3061] Eric Schmitt, New York Times, "Clash Forseen Between CIA and Pentagon," May 10, 2006, p 1. For a discussion of this and related issues, see Jennifer D. Kibbe, "Covert and Action and the Pentagon," Intelligence and National Security, February, 2007.

[3062] Ibid.

intelligence to support ground troops after 9/11 requires a more extensive Pentagon intelligence operation, and they suggest that any difference in DOD's approach is due more to the amount of intelligence gathering that is necessarily being carried out, rather than to any difference in the activity it is conducting.[3063] These same officials, however, also reportedly contend that American troops were now more likely to be working with indigenous forces in countries like Iraq or Afghanistan to combat stateless terrorist organizations and need as much flexibility as possible.[3064]

Late 2008 media reports have stated that the U.S. military since 2004 has used broad, secret authority to carry out nearly a dozen previously undisclosed attacks against Al Qaeda and other militants in Syria, Pakistan and elsewhere.[3065] According to other media reports, DOD has been paying private contractors in Iraq to produce news stories and other media products to "engage and inspire" the local population to support U.S. objectives and the Iraqi government. The products may or may not be non-attributable to coalition forces.[3066]

Adding even more complexity to DOD and CIA mission differences, according to Director of National Intelligence Dennis C. Blair,[3067] is that there often is not a "bright line" between traditional secret intelligence missions carried out by the military and those by the CIA, requiring that such operations be considered on a case-by-case basis.[3068] The DNI said the executive branch would be guided by two criteria. First, the President and those in the military and intelligence chains of command would maintain the flexibility to design and execute an operation solely for the purpose of accomplishing the mission. Second, he said, such operations would be approved by the appropriate authorities, coordinated in the field, and reported to the relevant congressional committees, including the Intelligence, Armed Services and Appropriations Committees.

[3067] Admiral Dennis C. Blair was confirmed as Director of National Intelligence by the U.S. Senate by unanimous consent on a Jan. 28, 2009. He succeeded retired Admiral J. Michael McConnell.

[3068] See "Questions for the Record for Admiral Dennis C. Blair upon nomination to be Director of National Intelligence," Senate Select Committee on Intelligence, Jan. 22, 2009. See the Senate Intelligence Committee's website [http://intelligence.senate.gov], "Recent Action," "Responses to Dennis C. Blair Post-hearing Questions," and "Covert Action."

DNI Blair's views appear to comport with comments previously made by CIA Director Michael Hayden who reportedly stated that it has become more difficult to distinguish between traditional secret military and CIA intelligence missions and that any problems resulting from overlapping missions would be resolved case-by-case.[3069] Stating the military's perspective, General James R. Clapper, Jr., the Pentagon's Under Secretary of Defense for Intelligence, testified before the Senate Armed Services Committee that within the statutory context of the meaning of covert action, "covert activities are normally not conducted ... by uniformed military forces."[3070] In written responses to questions posed by the Senate Armed Services Committee in advance of the hearing, General Clapper asserted that it was his understanding that "military forces are not conducting 'covert action,'" but are instead confining their actions to clandestine activities.[3071] Although testifying that the term "clandestine activities" is not defined by statute, he characterized such activity as consisting of those actions that are conducted in secret, but which constitute "passive" intelligence information gathering. By contrast, covert action, he suggested, is "active," in that its aim is to elicit change in the political, economic, military, or diplomatic behavior of a target.[3072] In comments before the committee, he further noted that clandestine activity can be conducted in support of a covert activity.[3073] He also distinguished between a covert action, in which the government's participation is unacknowledged, and a clandestine activity, which although intended to be secret, can be publicly acknowledged if it is discovered or inadvertently revealed.[3074] Being able to publicly acknowledge such an activity provides the military personnel who are involved certain protections under the Geneva

---

[3069] See Karen DeYoung and Walter Pincus, Washington Post, "U.S. to fund Pro-American Publicity in Iraqi Media," Oct. 3, 2008, p. A-1. The Department of Defense makes the following distinction between a clandestine operation and a covert action: a clandestine operation is an operation sponsored or conducted by governmental departments or agencies in such a way as to assure secrecy or concealment. Such an operation differs from a covert action in that emphasis is placed on concealment of the operation rather than on the concealment of the identity of the sponsor. According to DOD, in special operations, an activity may be both covert and clandestine and may focus equally on operational considerations and intelligence-related activities. See "Department of Defense Dictionary of Military and Associated Terms," Joint Publication 1-02, August 8, 2006.

Conventions, according to General Clapper, who suggested that those who participate in covert actions could jeopardize any rights they may have under the Geneva Conventions. He recommended "that, to the maximum extent possible, there needs to be a line drawn (between clandestine and covert activities) from an oversight perspective and as well [sic] as a risk perspective."[3075]

Some observers suggest that Congress needs to increase its oversight of military activities that some contend may not meet the definition of covert action, and may therefore, be exempt from the degree of congressional oversight accorded to covert actions. Others contend that increased oversight would hamper the military's effectiveness.[3076]

The Senate Intelligence Committee has expressed its concern that the USD(I) has interpreted Title 10 to expand "military source operations" authority, thus allowing the Services and Combatant Commands to conduct clandestine HUMINT operations worldwide. "These activities can come awfully close to activities that constitute covert action," the Committee stated in questions for the record posed to DNI following his confirmation hearing before the Committee.[3077]

Current Statute Governing Covert Actions

The current statute with regard to covert action remains virtually unchanged since it was signed into law in 1991.[3078] In essence it codified elements of the "Casey Accords," the President's 1988 national security directive and various legislative initiatives.

The legislation approved that year, according to the conferees,[3079] for the first time imposed the following requirements pertaining to covert action:

- A finding must be in writing.
- A finding may not retroactively authorize covert activities which have already occurred.

[3078] Sec. 503 of the National Security Act of 1947 [50 U.S.C. 413b].

[3079] Joint Explanatory Statement of the Committee of Conference, H.R. 1455, Jul. 25, 1991.

- The President must determine that the covert action is necessary to support identifiable foreign policy objectives of the United States.
- A finding must specify all government agencies involved and whether any third party will be involved.
- A finding may not authorize any action intended to influence United States political processes, public opinion, policies or media.
- A finding may not authorize any action which violates the Constitution of the United States or any statutes of the United States.
- Notification to the congressional leaders specified in the bill must be followed by submission of the written finding to the chairmen of the intelligence committees.
- The intelligence committees must be informed of significant changes in covert actions.
- No funds may be spent by any department, agency or entity of the executive branch on a covert action until there has been a signed, written finding.

The term "covert action" was defined for the first time in statute to mean "... an activity or activities of the United States Government to influence political, economic, or military conditions abroad, where it is intended that the role of the United States will not be apparent or acknowledged publicly...."[3080]

In 1991, Congressional conferees said this new definition was intended to clarify understandings of intelligence activities requiring the President's approval, not to relax or go beyond previous understandings. Conferees also signaled their intent that government activities aimed at misleading a potential adversary to the true nature of U.S. military capabilities, intentions or operations, for example, would not be included under the definition. And they stated that covert action does not apply to acknowledged U.S. government activities which are intended to influence public opinion or governmental attitudes in foreign countries. To mislead or to misrepresent the true nature of an acknowledged U.S. activity does not make it a covert action, according to the conferees.[3081]

Exceptions Under the Statutory Definition of Covert Action

In approving a statutory definition of covert action, Congress also statutorily stipulated four categories of activities which would not constitute covert action. They are: (1) activities the primary purpose of which is to acquire intelligence, traditional counterintelligence activities, traditional activities to improve or maintain the operational security of U.S. government programs, or administrative activities; (2) traditional diplomatic or military activities or

---

[3080] Ibid.

[3081] Ibid.

routine support to such activities; (3) traditional law enforcement activities conducted by U.S. government law enforcement agencies or routine support to such activities; and (4) activities to provide routine support to the overt activities (other than activities described in the first three categories) of other U.S. government agencies abroad.[3082]

This report addresses the second category of activities—traditional military activities and routine support to those activities.

Traditional Military Activities

Conferees stated:

> *It is the intent of the conferees that "traditional military activities" include activities by military personnel under the direction and control of a United States military commander (whether or not the U.S. sponsorship of such activities is apparent or later to be acknowledged) preceding and related to hostilities which are either anticipated (meaning approval has been given by the National Command Authorities for the activities and or operational planning for hostilities) to involve U.S. military forces, or where such hostilities involving United States military forces are ongoing, and, where the fact of the U.S. role in the overall operation is apparent or to be acknowledged publicly. In this regard, the conferees intend to draw a line between activities that are and are not under the direction and control of the military commander. Activities that are not under the direction and control of a military commander should not be considered as "traditional military activities."*[3083]

Routine Support of Traditional Military Activities

Conferees further stated that whether or not activities undertaken well in advance of a possible or eventual U.S. military operation constitute "covert action" will depend in most cases upon whether they constitute "routine support" and referenced the report accompanying the Senate bill for an explanation of the term.[3084]

The report accompanying the Senate bill[3085] states:

[3082] Ibid.

[3083] Joint Explanatory Statement of the Committee of Conference, H.R. 1455, Jul. 25, 1991.

[3084] Ibid.

[3085] S.Rept. 102-85, S. 1325, 102nd Congress, 1st Session (1991).

> *The committee considers as "routine support" unilateral U.S. activities to provide or arrange for logistical or other support for U.S. military forces in the event of a military operation that is to be publicly acknowledged. Examples include caching communications equipment or weapons, the lease or purchase from unwitting sources of residential or commercial property to support an aspect of an operation, or obtaining currency or documentation for possible operational uses, if the operation as a whole is to be publicly acknowledged.*

The report goes on to state:

> *The committee would regard as "other-than-routine" support activities undertaken in another country which involve other than unilateral activities. Examples of such activity include clandestine attempts to recruit or train foreign nationals with access to the target country to support U.S. forces in the event of a military operation; clandestine [efforts] to influence foreign nationals of the target country concerned to take certain actions in the event of a U.S. military operation; clandestine efforts to influence and effect [sic] public opinion in the country concerned where U.S. sponsorship of such efforts is concealed; and clandestine efforts to influence foreign officials in third countries to take certain actions without the knowledge or approval of their government in the event of a U.S. military operation.*

As the congressional conferees declared in 1991, timing of such activities—whether proximate to a military operation, or well in advance—does not define "other-than-routine" support of military activities. Rather, whether such activities constitute "other-than-routine" support, and thus constitute covert action, will depend, in most cases, on whether such an activity is unilateral in nature, that is, whether U.S. government personnel conduct the activity, or whether they enlist the assistance of foreign nationals.

House Intelligence Committee Calls on DOD to Inform Committee of Intelligence Activities

In committee report language accompanying the FY2010 Intelligence Authorization Act, the House Permanent Select Committee on Intelligence (HPSCI) expressed its concern that the distinction between the CIA's intelligence-gathering activities and DOD's clandestine operations is becoming

blurred and called on the Defense Department to meets its obligations to inform the Committee of such activities.[3086]

The Committee said that DOD frequently labels its clandestine activities as "Operational Preparation of the Environment" (OPE) to distinguish particular operations as traditional military activities and not as intelligence functions. According to the Committee's report, the overuse of this term "has made the distinction all but meaningless" and that there are no clear guidelines or principles for making consistent determinations in this regard.[3087]

The Committee stated:

> *Clandestine military intelligence-gathering operations, even those legitimately recognized as OPE, carry the same diplomatic and national security risks as traditional intelligence-gathering activities. While the purpose of many such operations is to gather intelligence, DOD has shown a propensity to apply the OPE label where the slightest nexus of a theoretical, distant military operation might one day exist. Consequently, these activities often escape the scrutiny of the intelligence committees, and the congressional defense committees cannot be expected to exercise oversight outside of their jurisdiction.[3088]*

If DOD does not meet its obligations to inform the Committee of intelligence activities, the report warned, the Committee would consider clarifying the Department's obligation to do so.[3089]

Possible Policy Issues for the 111th Congress

The lines defining mission and authorities with regard to covert action are less than clear. The lack of clarity raises a number of policy questions for the 111th Congress, including the following far-from-exclusive list.

- How should Congress define its oversight role? Which committees should be involved?
- Can the U.S. military improve the effectiveness of its intelligence operations without at some point enlisting the support of foreign nationals

---

[3086] See H.Rept. 111-186, accompanying H.R. 2701, the FY2010 Intelligence Authorization Act. See "Committee Statement and Views, D., Areas of Special Interest," Oversight of Intelligence Activities.

[3087] Ibid.

[3088] Ibid.

[3089] Ibid.

in such a way that such activity could be viewed as "non-routine support" to traditional military activities, that is, a covert action?

- Is it appropriate to view U.S. counterterrorism efforts in the context of a global battlefield and to view the military as having the authority to "prepare" that battlefield, and can "anticipated" military action precede the onset of hostilities by months or years?
- Is it appropriate to view the military as being involved in "a war" against terrorists, and thus its activities as constituting "traditional military activities" as it wages that war?
- By asserting that its activities do not constitute covert actions, is the Pentagon trying to avoid the statutory requirements governing covert action, including a signed presidential finding, congressional notification, and oversight by the congressional intelligence committees? Or, as Pentagon officials suggest, is DOD, in the wake of 9/11, fulfilling a greater number of intelligence needs associated with combating terrorism that are sanctioned in statute and do not fall under the statutory definition of covert action?
- Since 1991, when Congress last comprehensively addressed the issue of covert action, has the environment in which the U.S. military operates changed sufficiently to warrant a review of the statute that applies to covert actions?

In his 1991 signing statement, President George H.W. Bush argued that Congress's definition of "covert action" was unnecessary. He went on to state that in determining whether particular military activities constitute covert actions, he would continue to bear in mind the historic missions of the Armed Forces to protect the United States and its interests, influence foreign capabilities and intentions, and conduct activities preparatory to the execution of operations.

Subchapter IV: Protection of Certain National Security Information (50 U.S.C. §§ 421-426)

Intelligence Identities Protection Act, RS21636 (October 3, 2003).

Summary

Recent news accounts have focused attention on the question of whether disclosure of the identity of a United States intelligence agent could give rise to criminal liability. In 1982, Congress passed the Intelligence Identities Protection Act, P.L.97-200. The Act, as amended,[3090] is codified at 50 U.S.C. §§ 421-426. Under 50 U.S.C. § 421 criminal penalties are provided, in certain circumstances, for intentional, unauthorized disclosure of information identifying a covert agent, where those making such a disclosure know that the information disclosed identifies the covert agent as such and that the United States is taking affirmative measures to conceal the covert agent's foreign intelligence relationship to the United States. Other sections of the Act provide exceptions and defenses to prosecution, make provision for extraterritorial application of the offenses in section 421, include reporting requirements to Congress, and set forth definitions of the terms used in the Act. There do not appear to be any published cases involving prosecutions under this Act.

Introduction

In 1982, the Intelligence Identities Protection Act was enacted into law as an amendment to the National Security Act of 1947. This Act was a response to

---

[3090] Act of July 26, 1947, c. 343, Title VI, §§ 601-606, as added by P.L. 97-200, § 2(a), 96 Stat. 122 (June 23, 1982). The definitions section, 50 U.S.C. § 426, and fine provisions, 50 U.S.C. §§ 421(a), (b), and (c), were amended in 1999 by P.L. 106-120, Title III, §§ 304(a) and (b), 113 Stat. 1611 (Dec. 3, 1999), while the defenses and exceptions provision in 50 U.S.C. § 422 and the reporting requirements in 50 U.S.C. § 423 were amended in 2002 by P.L. 107-306, Title III, §§ 353(b)(1)(B), 353(b)(9), and Title VIII, § 811(b)(1)(E), 116 Stat. 2402, 2422 (Nov. 27, 2002).

concerns of members of the House and Senate Intelligence Committees and others in Congress "about the systematic effort by a small group of Americans, including some former intelligence agency employees, to disclose the names of covert intelligence agents."[3091] The Senate Judiciary Committee's report also discussed the efforts of Philip Agee, Lewis Wolf, and others to identify and disclose U.S. intelligence officers as part of "a systematic effort to destroy the ability of [U.S.] intelligence agencies to operate clandestinely," and their apparent repercussions.[3092] Such disclosures preceded and may have contributed to circumstances resulting in the death or attempted assassination of some CIA officers, expulsion of others from a foreign country following charges of spying, and impairment of relations with foreign intelligence sources. Two of Agee's books revealed over 1,000 names of alleged CIA officers. Wolf was co-editor of the "Covert Action Information Bulletin," a publication which contained a section entitled "Naming Names." Wolf claimed to have revealed the names of over 2,000 CIA officers. He also provided addresses, phone numbers, license tag numbers, and colors of the automobiles of some alleged intelligence agents.[3093] Such calculated disclosures set the stage for the consideration and passage of the Intelligence Identities Protection Act.

The criminal provisions of the Act are contained in 50 U.S.C. § 421:

> *§ 421. Protection of identities of certain United States undercover intelligence officers, agents, informants, and sources*
>
> (a) Disclosure of information by persons having or having had access to classified information that identifies covert agent
>
> *Whoever, having or having had authorized access to classified information that identifies a covert agent, intentionally discloses any information identifying such covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such covert agent and that the*

[3091] S. Rep. 97-201, at 1, reprinted in 1982 U.S.C.C.A.N. 145. In this report, the Senate Judiciary Committee reviewed the legislative history of S. 391 and the companion bill, H.R. 4, and their predecessors beginning with proposals in the 94th and 95th Congresses. The Congress passed H.R. 4, in lieu of the Senate bill, after amending the House bill to encompass much of the language of the Senate bill.

(1981); Intelligence Identities Protection Act of 1981 — S. 391: Hearing before the Subcomm. on Security and Terrorism of the Senate Comm. on the Judiciary,97th Cong., 1st Sess. (1981).

[3093] S. Rep. 97-201, at 7-10, reprinted in 1982 U.S.C.C.A.N. at 151-54.

United States is taking affirmative measures to conceal such covert agent's intelligence relationship to the United States, shall be fined under Title 18 or imprisoned not more than ten years, or both.

(b) Disclosure of information by persons who learn identify of covert agents as result of having access to classified information

Whoever, as a result of having authorized access to classified information, learns the identity of a covert agent and intentionally discloses any information identifying such covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such covert agent and that the United States is taking affirmative measures to conceal such covert agent's intelligence relationship to the United States, shall be fined under Title 18 or imprisoned not more than five years , or both.

(c) Disclosure of information by persons in course of pattern of activities intended to identify and expose covert agents

Whoever, in the course of a pattern of activities intended to identify and expose covert agents and with reason to believe that such activities would impair or impede the foreign intelligence activities of the United States, discloses any information that identifies an individual as a covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such individual and that the United States is taking affirmative measures to conceal such individual's classified intelligence relationship to the United States, shall be fined under Title 18 or imprisoned not more than three years, or both.

(d) Imposition of consecutive sentences

A term of imprisonment imposed under this section shall be consecutive to any other sentence of imprisonment.

Each of these offenses is a felony. Under 18 U.S.C. § 3571, individuals convicted of a felony may be fined the greater of either the amount set forth in the offense statute or an amount not more than $250,000, while the maximum fine for an organization convicted of a felony would be the greater of the amount set forth in the offense statute or an amount of not more than $500,000. This section also provides for an alternative fine based on pecuniary gain or loss. If anyone has

derived pecuniary gain from the offense or if the offense results in pecuniary loss to any person, the defendant may be fined not more than the greater of twice the gross gain or twice the gross loss, unless the imposition of a fine under this subsection would unduly complicate or prolong the sentencing process.

The offenses set forth in 50 U.S.C. §§ 421 (a), (b), and (c) share some elements in common: (1) intentional disclosure[3094] of the identity of a covert agent[3095] (2) to someone not authorized to receive classified information, (3) knowing that the information disclosed identifies that agent, and (4) knowing further that the United States is taking affirmative measures to conceal the agent's intelligence relationship with the United States.

Subsections 421(a) and (b) contemplate offenses where the perpetrator has or has had authorized access to classified information, while subsection 421(c) has no similar requirement. Under 50 U.S.C. § 421(a), an offender must have or have had access to classified information which identifies a covert agent. Under 50 U.S.C. § 421(b), the perpetrator must have learned the identity of a covert agent as a result of having authorized access to classified information. In contrast to these provisions, subsection 421(c) does not require that the perpetrator have or have had authorized access to classified information. Rather, it provides that the perpetrator must disclose the identity of the covert agent (1) in the course of a pattern of activities intended to identify and expose covert agents, and (2) must make the disclosure with reason to believe that his or her activities would impair

---

[3094] 50 U.S.C. § 426 (3) defines "disclose" to mean "to communicate, provide, impart, transmit, transfer, convey, publish, or otherwise make available."

[3095] 50 U.S.C. § 426(4) defines "covert agent" to mean:

(A) a present or retired officer or employee of an intelligence agency or a present or retired member of the armed forces assigned to duty with an intelligence agency —

(i) whose identity as such an officer, employee, or member is classified information, and

(ii) who is serving outside the United States or has within the last five years served outside the United States; or

(B) a United States citizen whose intelligence relationship to the United States is classified information, and —

(i) who resides and acts outside the United States as an agent of, or informant or source of operational assistance to, and intelligence agency, or

(ii) who is at the time of the disclosure acting as an agent of, or informant to, the foreign counterintelligence or foreign counterterrorism components of the Federal Bureau of Investigation; or

(C) an individual, other than a United States citizen, whose past or present intelligence relationship to the United States is classified information and who is a present or former agent of, or a present or former informant or source of operational assistance to, an intelligence agency.

or impede U.S. foreign intelligence activities. Subsection 426(10) defines a "pattern of activities" as involving "a series of acts with a common purpose or objective."

Much of the focus of attention during the consideration of the measure was upon subsection 421(c), and its First Amendment implications.[3096] The Senate Judiciary and the Conference Committee addressed these concerns at length. Both concluded that the language of the measure would pass constitutional muster.[3097] The Conference Committee characterized the goal of the provision as follows:

> *The record indicates that the harm this bill seeks to prevent is most likely to result from disclosure of covert agents' identities in such a course designed, first, to make an effort at identifying covert agents and, second, to expose such agents publicly. The gratuitous listing of agents' names in certain publications goes far beyond information that might contribute to informed public debate on foreign policy or foreign intelligence activities. That effort to identify U.S. intelligence officers and agents in countries throughout the world and to expose their identities repeatedly ... serves no legitimate purpose. It does not alert to abuses; it does not further civil liberties; it does not enlighten public debate; and it does not contribute one iota to the goal of an educated and informed electorate. Instead, it reflects a total disregard for the consequences that may jeopardize the lives and safety of individuals and damage the ability of the United States to safeguard the national defense and conduct an effective foreign policy....*
>
> *The standard adopted in section 601(c) applies criminal penalties only in very limited circumstances to deter those who make it their business to ferret out and publish the identities of agents. At the same time, it does not affect the First Amendment rights of those who disclose the identities of agents as an integral part of another enterprise such as news media reporting of intelligence failures or abuses, academic studies of U.S. government policies and programs, or a private organization's enforcement of its internal rules.[3098]*

[3096] U.S. CONST. Amend I. H. Conf. Rep. 97-580, at 6-8; reprinted in 1982 U.S.C.C.A.N., at 17072.

[3097] S. Rep. 97-201, at 14-18; reprinted in 1982 U.S.C.C.A.N., at 158-62; H. Conf. Rep. 97-580, at 7-10; reprinted in 1982 U.S.C.C.A.N., at 171-75.

[3098] H. Conf. Rep. 97-580, at 7-8; reprinted in 1982 U.S.C.C.A.N., at 171-72.

The Conference Committee distinguished between the main purpose of a person engaged in "the business of 'naming names,'" whose intent is to identify and expose covert agents, and side effects of one's conduct that one "anticipates but allows to occur." "Those who republish previous disclosures and critics of U.S. intelligence would all stand beyond the reach of the law if they did not engage in a pattern of activities intended to identify and expose covert agents."[3099] Despite these assurances, some commentators have questioned the constitutional sufficiency of subsection 421(c) on First Amendment grounds, finding it overbroad, and questioning the absence of a specific intent requirement instead of the "reason to believe" standard.[3100] The courts have yet to consider the issue.

Under 50 U.S.C. § 422, it is a defense to a prosecution under 50 U.S.C. § 421 that, prior to the commission of the offense, the United States publicly acknowledged or revealed the intelligence relationship to the United States of the covert agent involved. In addition, this provision precludes prosecution of anyone other than the person who made the disclosure of the identity of a covert agent for a section 421 offense on the grounds of misprision of felony, aiding and abetting, or conspiracy, unless the elements of subsection 421(c) are satisfied. Nor is it an offense against section 421 for a person to transmit information directly to either the House or Senate intelligence committees. An agent cannot be prosecuted for disclosing just his own identification as a covert agent.

Section 423 requires the President, after receiving information from the Director of Intelligence, to report to the House and Senate intelligence committees annually on measures to protect covert agents, and other relevant information. Such reports are exempt from any publication or disclosure requirement.

Section 424 authorizes extraterritorial jurisdiction where the offender is a U.S. citizen or a permanent resident alien.

Under section 425, the Act may not be construed to permit withholding of information from Congress or a committee of the House or Senate. Finally, section 426 includes the definitions of terms used in this subchapter.

There do not appear to be any published cases involving prosecutions under this Act. Depending upon the circumstances of a given case, other criminal statutes may also be implicated.[3101]

Summary

Congress enacted the USA PATRIOT Act soon after the 9/11 terrorist attacks. The most controversial sections of the act facilitate the federal government's collection of more information, from a greater number of sources, than had previously been authorized in criminal or foreign intelligence investigations. The Foreign Intelligence Surveillance Act (FISA), the Electronic Communications Privacy Act (ECPA), and the national security letter (NSL) statutes were all bolstered. With the changes came greater access to records showing an individual's spending and communication patterns as well as increased authority to intercept e-mail and telephone conversations and to search homes and businesses. In some cases, evidentiary standards required to obtain court approval for the collection of information were lowered. Other approaches included expanding the scope of information subject to search, adding flexibility to the methods by which information could be collected, and broadening the purposes for which information may be sought.

Some perceived the changes as necessary to unearth terrorist cells and update investigative authorities to respond to the new technologies and characteristics of ever-shifting threats. Others argued that authorities granted by the USA PATRIOT Act and subsequent measures could unnecessarily undermine constitutional rights over time. In response to such concerns, sunset provisions were established for many of the changes.

Subsequent measures made most of the USA PATRIOT Act changes permanent. However, three authorities affecting the collection of foreign intelligence information are set to expire on February 28, 2011: the lone wolf, roving wiretap, and business record sections of FISA. The 111th Congress replaced an earlier expiration date with the 2011 date. Before that change was made, the impending expiration prompted legislative proposals which revisit changes made by the USA PATRIOT Act and related measures. Two such bills—the USA PATRIOT Act Sunset Extension Act of 2009 (S. 1692) and the USA PATRIOT Amendments Act of 2009 (H.R. 3845)—were reported from their respective judiciary committees.

In addition to the expiring provisions, these and other bills introduced during the 111th Congress (e.g., S. 1686, S. 1725, S. 1726, S. 2336, H.R. 1800, H.R. 3846, H.R. 3969, and H.R. 4005) address a range of issues, including national security letters, minimization requirements, nondisclosure requirements (gag orders), interception of international communications, and retroactive repeal of communication provider immunity for Terrorist Surveillance Program (TSP) assistance. This report surveys the legal environment in which the legislative proposals arise.

Introduction

Shortly after the 9/11 terrorist attacks, Congress enacted the USA PATRIOT Act, in part, to "provid[e] enhanced investigative tools" to "assist in the prevention of future terrorist activities and the preliminary acts and crimes which further such activities."[3102] To that end, the act eased restrictions on the government's ability to collect information regarding people's activities and conversations, both in domestic criminal investigations and in the realms of foreign intelligence gathering and national security. The changes are perceived by many to be necessary in light of the new breed of threats in a post-9/11 world.[3103] The expanded authorities also prompted concerns regarding the appropriate balance between national security interests and civil liberties.[3104] In part for that reason, the changes were revisited and modified in subsequent measures.[3105]

Several bills introduced during the 111th Congress propose further adjustments to USA PATRIOT Act provisions and related authorities for the government's collection of private information. Two relevant bills—the USA PATRIOT Act Sunset Extension Act of 2009 (S. 1692) and the USA PATRIOT Amendments Act of 2009 (H.R. 3845)—were reported from their respective judiciary committees.[3106]

These and other legislative proposals were catalyzed, in part, by a sunset date (originally December 31, 2009) for three amendments which expanded authorities for the collection of foreign intelligence information.[3107] The sunset

[3102] Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001, P.L. 107-56; H.Rept. 107-236, pt. 1, at 41 (2001).

[3103] See, e.g., Reauthorizing the USA PATRIOT Act: Ensuring Liberty and Security: Hearing Before the S. Judiciary Comm., 111th Cong. (Sept. 23, 2009) (statement of Kenneth L. Wainstein, Partner, O'Melveny & Myers and former Ass't Atty'y Gen. for National Security).

[3104] See, e.g., Unchecked National Security Letter Powers and Our Civil Liberties: Hearing Before the House Perm. Select Comm. on Intelligence, 110th Cong. (Mar. 28, 2007) (statement of Lisa Graves, then Deputy Director, Center for National Security Studies).

[3105] See, e.g., USA PATRIOT Improvement and Reauthorization Act of 2005, P.L. 109-177; An act to amend the USA PATRIOT Act to extend the sunset of certain provisions of that act to July 1, 2006, P.L. 109-160; USA PATRIOT Act Additional Reauthorizing Amendments Act of 2006, P.L. 109-178; Protect America Act of 2007, P.L. 110-55; FISA Amendments Act of 2008, P.L. 110-261.

[3106] Additional relevant proposals include, for example, S. 1686, S. 1725, S. 1726, S. 2336, H.R. 1800, H.R. 3846, H.R. 3969, and H.R. 4005.

[3107] Although the three expiring provisions are thought of as the "expiring Patriot Act provisions," see, e.g., Reauthorizing the USA PATRIOT Act: Ensuring Liberty and Security: Hearing Before the Senate Comm. on the Judiciary, 111th Cong. (Sept. 23, 2009) (statement of Sen. Leahy), only two of the three expiring provisions were enacted in the Patriot Act. See P.L. 107-56, § 206, 50 U.S.C. § 1805(c)(2)(B) (known as the "roving wiretap" provision); Id. at § 215, 50 U.S.C. §§ 1861-2

date is now February 28, 2011.[3108] However, bills introduced during the 111th Congress cover a range of authorities expanded by the USA PATRIOT Act in addition to the expiring provisions.

This report discusses the history of constitutional interpretations and legislative responses relevant to the collection of private information for criminal investigation, foreign intelligence gathering, and national security purposes. Next, it summarizes the relevant statutory frameworks and changes made by the USA PATRIOT Act and subsequent measures. It then examines congressional oversight, judicial review, and "minimization procedures" designed to limit the extent of government intrusions where possible. Finally, it discusses several related matters likely to play a role in the legislative debate surrounding reauthorization of the expiring provisions.

Constitutional Limitations

Constitutional limitations restrict the government's ability to access private information. The Fourth Amendment to the U.S. Constitution is particularly relevant. To the extent that government activity burdens individuals' freedom of speech and related rights, the First Amendment may also play a role.

Fourth Amendment

The Fourth Amendment to the U.S. Constitution provides a right "of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures."[3109] Many of the government activities discussed in this report have the potential to constitute a search as that term is defined in Fourth Amendment jurisprudence. Namely, government action constitutes a search when it intrudes upon a person's "reasonable expectation of privacy," which requires both that an "individual manifested a subjective expectation of privacy in the searched object" and that "society is willing to recognize that expectation as reasonable."[3110]

Thus, the Fourth Amendment ultimately limits the government's ability to conduct a range of activities, such as physical searches of homes or offices and

---

(known as the "business records" or "library" provision). The third provision, known as the "lone wolf" provision, is Section 6001(a) of the Intelligence Reform and Terrorism Protection Act (IRTPA). P.L. 108-458, 50 U.S.C. § 1801(b)(1)(C).

[3108] P.L. 111-141 (extending the date for the expiring provisions from February 28, 2010, to February 28, 2011). See also Department of Defense Appropriations Act, 2010, P.L. 111-118, § 1004 (extending the date for the expiring provisions from December 31, 2009, to February 28, 2010).

[3109] U.S. Const. amend. IV.

[3110] Kyllo v. United States, 533 U.S. 27, 33 (2001) (citing California v. Ciraolo, 476 U.S. 207, 211 (1986)).

listening to phone conversations. As a general rule, the Fourth Amendment requires the government to demonstrate "probable cause" and obtain a warrant (unless a recognized warrant exception applies) before conducting a search.[3111] This rule applies most clearly in criminal investigations. For example, an officer conducting a criminal investigation typically may not search a person's belongings without first obtaining a warrant that describes the property for which sufficient evidence justifies a search.

The extent to which the Fourth Amendment warrant requirement applies to the government's collection of information for intelligence gathering and other purposes unrelated to criminal investigations is unclear. Although the surveillance of wire or oral communications for criminal law enforcement purposes was held to be subject to the warrant requirement of the Fourth Amendment in 1967,[3112] neither the Supreme Court nor Congress sought to regulate the use of such surveillance for national security purposes at that time. Several years later, the Supreme Court invalidated warrantless electronic surveillance of domestic organizations for national security purposes, but indicated that its conclusion might differ if the electronic surveillance targeted foreign powers or their agents.[3113] A lower court has since upheld the statutory scheme governing the gathering of foreign intelligence information against a Fourth Amendment challenge, despite an assumption that orders issued pursuant to the statute might not constitute "warrants" for Fourth Amendment purposes.[3114] The Supreme Court has not yet directly addressed the issue. However, even if the warrant requirement was found not to apply to searches for foreign intelligence or national security purposes, such searches would

---

[3111] See, e.g., Atwater v. City of Lago Vista, 532 U.S. 318, 354 (2001) (recognizing a warrant exception for arrest of an individual who commits a crime in an officer's presence, as long as the arrest is supported by probable cause). Probable cause is "a fluid concept—turning on the assessment of probabilities in particular factual contexts." Illinois v. Gates, 462 U.S. 213, 232 (1983). For example, for issuance of a search warrant, probable cause requires an issuing magistrate to determine, based on specific evidence, whether there exists a "fair probability" that, for example, an area contains contraband. Id. at 238. Exceptions to the warrant requirement include, for example, "exigent circumstances" where people's lives are at risk or illegal items in "plain view" during a search authorized for other items.

[3112] Katz v. United States, 389 U.S. 347, 353 (1967), overruling Olmstead v. United States, 277 U.S. 438 (1928).

[3113] United States v. U.S. District Court, 407 U.S. 297, 313-14, 321-24 (1972) (also referred to as the Keith case, so named for the District Court judge who initially ordered disclosure of unlawful warrantless electronic surveillance to the defendants). See also In re Directives, 551 F.3d 1004, 1011 (Foreign Intell. Surveillance Ct. Rev. 2008) (holding that the foreign intelligence surveillance of targets reasonably believed to be outside of the U.S. qualifies for the "special needs" exception to the warrant requirement).

[3114] In re Sealed Case, 310 F.3d 717, 738-46 (Foreign Intell. Surveillance Ct. Rev. 2002).

presumably be subject to the general Fourth Amendment "reasonableness" test.[3115]

In contrast with its rulings on surveillance, the Supreme Court has not historically applied the protections of the Fourth Amendment to documents held by third parties. In 1976, it held that financial records in the possession of third parties could be obtained by the government without a warrant.[3116] Later, it likewise held that the installation and use of a pen register—a device used to capture telephone numbers dialed—does not constitute a Fourth Amendment search.[3117] The reasoning was that individuals have a lesser expectation of privacy with regard to information held by third parties.

First Amendment

The First Amendment to the U.S. Constitution restricts government efforts to prohibit the free exercise of religion or to abridge free speech, freedom of the press, the right to peaceful assembly, or the right to petition for redress of grievances.[3118] Two First Amendment concerns arise with regard to electronic surveillance, access to records, and related investigatory activities. One addresses direct restrictions on speech that may accompany government collection of private information, such as non-disclosure requirements accompanying orders compelling government access to business records, discussed infra. A second concern is that overly broad authorities permitting government intrusion may lead to a "chilling" (i.e., stifling) effect on public discourse.[3119] Some post-9/11 laws address the latter issue directly, for example by prohibiting investigations based solely on a person's First Amendment activities.[3120] Despite safeguards,

---

[3115] The "general reasonableness," or "totality-of-the circumstances," test requires a court to determine the constitutionality of a search or seizure "by assessing, on the one hand, the degree to which [a search or seizure] intrudes upon an individual's privacy and, on the other, the degree to which it is needed for the promotion of legitimate governmental interests." Samson v. California, 547 U.S. 843, 848 (2006).

[3116] United States v. Miller, 425 U.S. 435 (1976).

[3117] Smith v. Maryland, 442 U.S. 735, 745-46 (1979).

[3118] U.S. Const. amend. I.

[3119] See U.S. District Court, 407 U.S. at 314 ("The price of lawful public dissent must not be a dread of subjection to an unchecked surveillance power. Nor must the fear of unauthorized official eavesdropping deter vigorous citizen dissent and discussion of Government action in private conversation. For private dissent, no less than open public discourse, is essential to our free society.").

[3120] See, e.g., 50 U.S.C. § 1842(c).

there is concern that post-9/11 authorities may have been used to circumvent First Amendment limitations on analogous authorities.[3121]

History of Congressional Action Congress addressed the federal government's access to private information following key Supreme Court decisions interpreting the Fourth Amendment. In 1968, it enacted legislation, Title III of the Omnibus Crime Control and Safe Streets Act, which outlawed the unauthorized interception of wire or oral communications and authorized interception under court supervision for law enforcement purposes.[3122] Later, it passed the Electronic Communications Privacy Act (ECPA), which incorporated and modernized Title III to cover electronic as well as wire and oral communications.[3123]

In the years following the Supreme Court's 1972 ruling on surveillance (the "Keith case"), Congress actively examined the intelligence practices of past presidential administrations and found that every administration since Franklin D. Roosevelt engaged in electronic surveillance without prior judicial approval.[3124] It also found that the authority was sometimes abused.[3125] Partly in light of these findings, Congress enacted the Foreign Intelligence Surveillance Act (FISA)[3126] to create a statutory framework for the use of electronic surveillance to collect foreign intelligence information.

[3121] See, e.g., Office of the Inspector General, Department of Justice, A Review of the FBI's Use of Section 215 Orders for Business Records in 2006, Mar. 2008, http://www.usdoj.gov/oig/special/s0803a/final.pdf, at 5 (expressing concern that the FBI had issued a national security letter after the FISA court had twice declined to grant an order for the same material due to First Amendment objections).

[3122] P.L. 90-351, 18 U.S.C. §§ 2510-2520 (1970 ed. Supp.IV).

[3123] P.L. 99-508, 18 U.S.C. §§ 2510-2520 (1988 ed. Supp.II).

[3124] See S. Rept. 95-604(I), at 7, 1978 U.S.C.C.A.N. 3904, 3908.

[3125] The report of a congressional committee convened to examine intelligence gathering after Watergate stated: "Too many people have been spied upon by too many government agencies and too much information has been collected. The government has often undertaken the secret surveillance of citizens on the basis of their political beliefs, even when those beliefs posed no threat of violence or illegal acts on behalf of a hostile foreign power. The Government, operating primarily through secret informants, but also using other intrusive techniques such as wiretaps, microphone 'bugs', surreptitious mail opening, and break-ins, has swept in vast amounts of information about the personal lives, views, and associations of American citizens." See Intelligence Activities and the Rights of Americans, Final Report of the Select Committee to Study Governmental Operations with respect to Intelligence Activities and the Rights of Americans, United States Senate, Book II, S. Rept. 94-755, at 5 (1976) (hereinafter Church Committee Final Report). See also Supplementary Detailed Staff Reports on Intelligence Activities and the Rights of Americans, Church Committee Final Report,, Book III, S. Rept. 94-755, at 271-351.

[3126] P.L. 95-511, 50 U.S.C. § 1801 et seq.

Similarly, in response to the Supreme Court's rulings regarding the Fourth Amendment's non-application to documents held by third parties, Congress enacted the Right to Financial Privacy Act (RFPA)[3127] to constrain government authorities' access to individuals' financial records. Although these privacy protections are subject to a foreign intelligence exception,[3128] government authorities were not authorized to compel financial institutions to secretly turn over financial records until 1986.[3129] That year, the FBI was also given authority, in the form of FBI-issued "national security letters," to access customer records held by telephone companies and other communications service providers in specified instances justified by a national security rationale.[3130] Two additional national security letter authorities were enacted in the mid-1990s. The first provided access to credit and financial records of federal employees with security clearances.[3131] The second gave the FBI access to credit agency records in order to facilitate the identification of financial institutions utilized by the target of an investigation.[3132]

Intelligence gathering laws were expanded during the same time period. In 1994, FISA was amended to cover physical searches for foreign intelligence purposes.[3133] Four years later, Congress amended FISA to permit the Foreign Intelligence Surveillance Court to issue orders authorizing

(1) the use of pen registers and trap and trace devices to track calling patterns;[3134] and (2) the production of some business records not available through existing national security letter authorities.[3135]

The USA PATRIOT Act,[3136] enacted in 2001, represented a broad expansion of existing statutory authorities. It eliminated barriers to cooperation between law

enforcement and foreign intelligence investigations, modified surveillance authorities under both FISA and ECPA, and created a fifth category of national security letters. Many of these provisions were made temporary, subject to sunset in 2005.[3137]

In 2004, Congress enacted the Intelligence Reform and Terrorism Prevention Act. Among other things, the act amended FISA to allow targeting so-called "lone wolves" or individuals believed to be engaged in terrorism, but who were not linked to a known terrorist organization.[3138] The "lone wolf" provision was given an expiration date to match that which applied to many of the USA PATRIOT Act provisions.

The next year, Congress reauthorized the USA PATRIOT Act, making the majority of its expiring provisions permanent.[3139] However, two of its most controversial provisions, discussed infra, together with the 2004 lone wolf provision, were given a new sunset date of December 31, 2009.[3140]

Also in 2005, President Bush acknowledged that he had authorized a Terrorist Surveillance Program (TSP), which captured some international communications apparently procured without judicial or statutory authority. As discussed infra, Congress subsequently enacted the Protect America Act and the FISA Amendments Act of 2008, which addressed issues raised in response to the TSP.

In December 2009 and again in February 2010, Congress temporarily extended the sunset date for the lone wolf and two USA PATRIOT Act provisions which were scheduled to sunset in 2009.[3141] They are now set to expire on February 28, 2011.

Statutory Framework

The applicable statutory regime or procedural rules differ according to the purpose for which the federal government collects private information. In criminal law enforcement investigations, the Federal Rules of Criminal Procedure, ECPA, and other provisions in Title 18 of the U.S. Code apply. In

[3140] Id. at §§ 102(b), 103.

[3141] Department of Defense Appropriations Act, 2010, P.L. 111-118, § 1004 (extending the expiration date to February 28, 2010); P.L. 111-141 (extending the date to February 28, 2011).

contrast, the collection of foreign intelligence information is governed by FISA. Finally, five national security statutes, discussed infra, regulate the issuance of national security letters. Statutes in these areas provide analogous authorities for various government activities but require that different standards and procedures be satisfied.

Federal Rules of Criminal Procedure and Subpoena Authorities

In criminal cases, federal officials ordinarily gain access to spaces, documents, and other private materials pursuant to a warrant (during investigation) or a subpoena (during prosecution). In criminal investigations, Federal Rule of Criminal Procedure 41 provides procedures applicable to search warrants to obtain evidence of a crime; contraband, fruits of crime, or other items illegally possessed; or property "designed for use, intended for use, or used in committing a crime."[3142]

During the indictment phase, federal grand juries have the power to investigate the possibility that a federal crime has been committed within the judicial district in which they are convened and enjoy the benefit of the subpoena power of the court within whose district they sit.[3143] However, grand jury subpoenas are limited. Namely, like criminal search warrants, their purpose must have a criminal nexus.

Other subpoena authorities include those issued during the discovery or trial phases of a criminal prosecution and those issued by federal agencies pursuant to specific statutes.[3144] Although they are analogous to authorities relied upon to acquire third party documents in national security or foreign intelligence gathering investigations, agency administrative subpoenas and grand jury subpoenas are unlikely to provide an alternative means to acquire third party

[3142] Fed. R. Crim. Pro. 41(c). See also 18 U.S.C. § 3103a (adding to the grounds provided in Rule 41 that "a warrant may be issued to search for or seize any property that constitutes evidence of a criminal offense in violation of the laws of the United States," and permitting delayed notice of a search in some circumstances). In general, statutes in Title 18 of the U.S. Code governing searches and seizures in criminal cases incorporate relevant sections of Federal Rule of Criminal Procedure 41 by reference. See, e.g., 18 U.S.C. § 3103 (incorporating the grounds for which a search warrant may be issued). However, some provisions add statutory requirements. See, e.g., 18 U.S.C. § 3109 (adding procedures for breaking doors or windows to execute a search warrant).

[3143] United States v. Williams, 504 U.S. 36, 48 (1992).

[3144] For example, administrative subpoenas are available for use in the investigation by the Drug Enforcement Administration; by federal agency inspectors general; and in health care fraud, child abuse, and presidential protection investigations. See 21 U.S.C. § 876; 5 U.S.C. App. (III) § 6; 18 U.S.C. § 3486.

documents in a national security investigation and thus have not been a significant issue in post 9/11 legislation.[3145]

Electronic Communications Privacy Act (ECPA)

The Electronic Communications Privacy Act (ECPA) provides three sets of general prohibitions accompanied by law enforcement exceptions that operate under judicial supervision.[3146] These address (1) the interception of wire, oral or electronic communications (wiretapping);[3147] (2) access to the content of stored electronic communications and to communications transaction records;[3148] and (3) the use of trap and trace devices and pen registers (essentially in and out secret "caller id" devices).[3149]

ECPA generally prohibits interception of wire, oral, or electronic communications by means of an electronic, mechanical or other device but sets forth a number of exceptions to the general prohibition.[3150] It limits the types of criminal cases in which electronic surveillance may be used and requires court orders authorizing electronic surveillance to be supported by probable cause to believe that the target is engaged in criminal activities, that normal investigative techniques are insufficient, and that the facilities that are the subject of surveillance will be used by the target.[3151] It also limits the use and dissemination of information

---

[3145] Subpoena authorities are unlikely to substitute for authorities applicable in national security investigations. For administrative subpoenas, one reason is that relevant statutes do not impose a gag order component; thus, national security information might be compromised. More importantly, national security investigations and the type of investigations in which such subpoenas may be used will only rarely coincide. However, criminal investigations in which grand jury subpoenas are sought may intersect with foreign intelligence investigations under FISA in situations involving criminal conduct that also has national security implications, such as international terrorism or espionage.

[3146] See CRS Report 98-326, Privacy: An Overview of Federal Statutes Governing Wiretapping and Electronic Eavesdropping, by Gina Stevens and Charles Doyle, for a more detailed discussion of the federal laws governing wiretapping and electronic eavesdropping, along with appendices including copies of the texts of ECPA and FISA.

[3147] 18 U.S.C. §§ 2510-2522.

[3148] 18 U.S.C. §§ 2701-2712.

[3149] 18 U.S.C. §§ 3121-3127. Pen registers capture the numbers dialed on a telephone line; trap and trace devices identify the originating number of a call on a particular phone line. See 18 U.S.C. § 3127(3)-(4).

[3150] 18 U.S.C. § 2511.

[3151] 18 U.S.C. §§ 2516, 2518(3).

intercepted.[3152] In addition, when an interception order expires, authorities must notify those whose communications have been intercepted.[3153] Moreover, it declares that the FISA and ECPA procedures are the exclusive means for accomplishing electronic surveillance as defined in FISA and for intercepting wire, oral, or electronic communications.[3154]

Whereas provisions governing interception of communications in criminal investigations reflect a concern for Fourth Amendment requirements,[3155] portions of ECPA which address stored communications and the use of pen registers and trap and trace devices are less demanding and reflect Supreme Court jurisprudence suggesting that third party business records and communications entrusted to third parties are not typically protected.[3156] Government authorities may have access to communications stored with providers, and related communications records, under a search warrant, subpoena, or court order,[3157] or when voluntarily surrendered by providers in emergency circumstances.[3158] However, as with the interception of communications, ECPA limits the government's use and dissemination of information and requires that targets be notified.[3159]

Foreign Intelligence Surveillance Act (FISA)

FISA governs the gathering of information about foreign powers, including international terrorist organizations such as al Qaeda, and their agents.[3160]

[3152] 18 U.S.C. § 2517.

[3153] 18 U.S.C. § 2518(8).

[3154] 18 U.S.C. § 2511(2)(f). FISA defines electronic surveillance to include more than the interception of wire, oral, or electronic communications, 50 U.S.C. § 1801(f), but places limitations on its definition based upon the location or identity of some or all of the parties to the communications involved.

[3155] Berger v. New York, 388 U.S. 41 (1967); Katz v. United States, 389 U.S. 347 (1967); S. Rept. 90-1097, at 66 (1967).

[3156] Smith v. Maryland, 442 U.S. 735 (1979); United States v. Miller, 425 U.S. 435 (1976); S. Rept. 99-541, at 3 (1986).

[3157] 18 U.S.C. § 2503. But communications held by electronic communications providers for less than 180 days require a warrant, 18 U.S.C. § 2703(a).

[3158] 18 U.S.C. § 2702.

[3159] 18 U.S.C. §§ 2517, 2518(8).

[3160] See 50 U.S.C. § 1801(a) (definition of "foreign power").

Although it is often discussed in relation to the prevention of terrorism, it applies to the gathering of foreign intelligence information for other purposes.[3161]

Although some exceptions apply,[3162] government agencies typically must obtain authorization from the Foreign Intelligence Surveillance Court (FISC), a neutral judicial decision maker, when gathering foreign intelligence information pursuant to FISA. Orders issued by the FISC authorize federal officials to conduct electronic surveillance[3163] or physical searches;[3164] utilize pen registers and trap and trace devices;[3165] access specified business records and other tangible things;[3166] or target U.S. persons reasonably believed to be abroad.[3167]

Although requiring a nexus to a foreign power or foreign intelligence is a common theme, different standards apply for each type of FISA order. For electronic surveillance orders, FISA currently requires that an application include, among other things, a "statement of the facts and circumstances relied upon" to justify the government's belief that a target is a foreign power or its agent.[3168] It must also describe the identity, if known, or a description of the

---

[3161] For example, it extends to the collection of information necessary for the conduct of foreign affairs. See 50 U.S.C. § 1801(e) (definition of "foreign intelligence information").

[3162] For example, FISA provides for emergency authorization of electronic surveillance or a physical search by the Attorney General in some circumstances, while an order is sought. 50 U.S.C. §§ 1805(e) and 1824(e), respectively. It also allows physical searches to be conducted in absence of a court order for periods of up to one year where the target is a foreign nation or component of a foreign nation, a faction of a foreign nation or nations not substantially composed of U.S. persons, or an entity openly acknowledged by a foreign government or governments to be directed and controlled by such government or governments, as long as the Attorney General: (1) certifies that the physical search is directed solely at a foreign power, there is no substantial likelihood that the search will "involve the premises, information, material, or property of a United States person," and proposed minimization procedures meet specified standards; and (2) fulfills various reporting requirements regarding minimization procedures. 50 U.S.C. § 1822. See also 50 U.S.C. § 1802 (electronic surveillance of such foreign powers for up to one year without a court order).

[3163] 50 U.S.C. §§ 1801-1808. FISA authorizes electronic surveillance without a FISA order in specified instances involving communications between foreign powers. 50 U.S.C. § 1802.

[3164] 50 U.S.C. §§ 1822-1826.

[3165] 50 U.S.C. §§ 1841-1846.

[3166] 50 U.S.C. §§ 1861-1862.

[3167] 50 U.S.C. §§ 1881b, 1881c. As discussed infra, FISA also currently includes a statutory framework for targeting non-U.S. persons abroad to acquire foreign intelligence information pursuant to a joint Attorney General/Director of National Intelligence (DNI) authorization in specified circumstances. 50 U.S.C. § 1881a.

[3168] 50 U.S.C. § 1804(a)(4).

specific target of the electronic surveillance and the nature and location of each of the facilities or places at which the electronic surveillance will be directed, if known.[3169] When the nature and location are unknown, the FISC must direct the relevant officials to provide notice to the FISC of specific information within 10 days of the date on which surveillance begins to be directed at a new facility or place.[3170] FISA also requires that less intrusive means of information gathering be used before an electronic surveillance order may be granted. Specifically, an application for an order authorizing electronic surveillance must include a certification that the information sought under the order is foreign intelligence information, and that the information may not reasonably be obtained by normal investigative techniques, together with a statement of the basis upon which such certifications rest.[3171] Relatedly, an application for an electronic surveillance order must specify proposed "minimization procedures."[3172]

For physical searches, the government typically must provide, among other things, "the identity, if known, or a description of the target of the search," and "a statement of the facts and circumstances relied upon by the applicant to justify the applicant's belief that ... the target of the physical search is a foreign power or an agent of a foreign power."[3173]

For FISA orders authorizing pen registers and trap and trace devices, although limited exceptions apply,[3174] an application generally must certify that "the information likely to be obtained is foreign intelligence information not concerning a United States person or is relevant to an ongoing investigation to protect against international terrorism or clandestine intelligence activities."[3175]

Finally, for orders to access records and other tangible things, FISA currently requires both "a statement of facts showing that there are reasonable grounds to believe that the tangible things sought are relevant to a [foreign intelligence,

[3171] 50 U.S.C. § 1804(a)(7)(C) and (E).

[3172] Id. at § 1804(a)(5). Minimization procedures, examined in greater detail infra, are safeguards which limit the government's use of collected information.

[3173] 50 U.S.C. § 1823(a).

[3174] The exceptions authorize: (1) emergency authorization by the Attorney General for up to 48 hours, if specified criteria are met, while an application for a FISC order is pursued; and (2) the installation and use of pen registers and trap and trace devices for up to 15 calendar days following a congressional declaration of war). 50 U.S.C. §§ 1843, 1844.

[3175] 50 U.S.C. § 1842(c).

international terrorism, or espionage investigation]" and an "enumeration of minimization procedures" to be applied.[3176] These provisions also include recipient non-disclosure provisions, grounds for recipients to challenge such production or nondisclosure requirements, and government reporting requirements.[3177]

Many of these statutes include a requirement intended to safeguard individuals' freedom of speech and other First Amendment protections. In particular, investigations generally must not be based solely on a U.S. citizen's exercise of his or her First Amendment rights.[3178]

National Security Letter Statutes

Five federal statutes require businesses—namely communications providers, financial institutions, and consumer credit entities—to produce specified records to federal officials in national security investigations.[3179] Absent a statutory prohibition or some other specific legal impediment, federal authorities are free to request, and to receive voluntarily, access to third party business records. These national security letter (NSL) statutes are designed to carve out narrow national security exceptions to prohibitions on government information gathering in ECPA, the Right to Financial Privacy Act, and the Fair Credit Reporting Act.

Unlike with warrants in criminal investigations or orders issued under FISA, NSLs are issued directly by federal officials, without approval by any judicial body. They are analogous to orders for tangible things issued in intelligence gathering investigations pursuant to FISA because they are a demand for business records and their use is confined to national security investigations. Yet unlike FISA orders, they are not issued by a court and are available for only the records of three narrow categories of businesses. Moreover, the FBI issues tens of

[3176] 50 U.S.C. § 1861(b)(2).

[3177] 50 U.S.C. §§ 1861-1862.

[3178] See, e.g., 50 U.S.C. §§ 1805(a)(2)(A) (electronic surveillance), 1824(a)(2)(A) (physical searches),1842(c) (pen register or trap and trace device).

[3179] The NSL statutes are: 18 U.S.C. § 2709 of ECPA; section 1114(a)(5) of the Right to Financial Privacy Act (12 U.S.C. § 3414(a)(5)); sections 626 and 627 of the Fair Credit Reporting Act (15 U.S.C. §§1681u and 1681v); and section 802 of the National Security Act of 1947 (50 U.S.C. § 436). For a more detailed discussion of the NSL statutes and the proposals to amend them see, CRS Report RL33320, National Security Letters in Foreign Intelligence Investigations: Legal Background and Recent Amendments, by Charles Doyle, and CRS Report R40887, National Security Letters: Proposed Amendments in the 111th Congress, by Charles Doyle.

thousands of NSLs a year,[3180] while the FISA court approves only a handful of tangible-item orders a year.[3181]

Only the FBI may issue NSLs under the communications provider, financial institution, and the narrower of the two consumer credit agency statutes. Authority under the other consumer credit agency statute is available to the agencies of the intelligence community, and authority under the National Security Act extends to both intelligence and law enforcement agencies.

The information available under each of the statutes varies. The National Security Act statute reaches an extensive array of financial and consumer credit records, but only applies to federal employees and individuals who have consented to disclosure of the information.[3182] The more sweeping consumer credit statute extends to any consumer information held by a consumer credit reporting agency but only when sought in connection with an investigation into international terrorism.[3183] The communications provider NSL statute applies to provider transaction records concerning customers' names, addresses, length of service, and billing records sought in connection with an inquiry into international terrorism or clandestine intelligence activities.[3184] The more circumspect of the consumer credit NSL statutes covers credit agency records concerning consumers' names, current and former addresses, current and former places of employment, and the identification of financial institutions in which they have or had accounts—sought in connection with an inquiry into international terrorism and clandestine intelligence activities.[3185] The financial institution NSL statute reaches customer transaction records of banks, credit unions, and a long list of other businesses that often deal in cash (pawn shops, casinos, car dealerships, jewelers, etc.), again sought in connection with an inquiry into international terrorism and clandestine intelligence activities.[3186]

[3180] According to reports by the Department of Justice Inspector General's Office, the FBI issued 39,346 NSL requests in 2003, 56,507 in 2004, 47,221 in 2005, and 49,425 in 2006. Office of the Inspector General, U.S. Department of Justice, A Review of the Federal Bureau of Investigation's Use of National Security Letters (March 2008) at 110.

[3181] The Justice Department reported that the FISA court issued 13 tangible item orders in 2008 and 17 in 2007, Letters dated May 14, 2009 from Ass't Att'y Gen. Ronald Weich to Vice-President Biden, Senators Reid and McConnell, Speaker Pelosi, and Congressmen Hoyer and Boehner, http://www.justice.gov/nsd/foia/reading_room/2008fisa-ltr.pdf.

[3182] 50 U.S.C. § 436.

NSL recipients may be bound by nondisclosure requirements under each of the statutes.[3187] However, they may seek judicial review of any secrecy requirement imposed and of the NSL itself.[3188]

Changes Made by the USA PATRIOT Act and Subsequent Measures

The USA PATRIOT Act and subsequent measures made far-reaching changes expanding the government's authority to collect private information pursuant to FISA, ECPA, and the NSL statutes.[3189] Absent congressional intervention, three of the amendments to FISA—the lone wolf, roving wiretap, and business record provisions—will expire on February 28, 2011.

Lowering of the Wall Between Criminal Investigations and Foreign Intelligence Gathering

The USA PATRIOT Act lowered somewhat the wall traditionally separating criminal investigation from foreign intelligence gathering. Prior to the act, FISA required that foreign intelligence gathering be the sole or primary purpose of an investigation; thus, activities conducted with an additional rationale of criminal investigation were required to adhere to criminal procedure requirements. Section 218 of the act amended the standard to require that foreign intelligence gathering be a "significant" rather than "the [sole]" purpose of surveillance or a search for which a court order is sought under FISA.[3190] Thus, the presence of ancillary criminal investigation purposes no longer eliminates the ability to rely on FISA authorities, so long as a significant foreign intelligence purpose also exists. Relatedly, as discussed infra, the USA PATRIOT Act and subsequent measures increased the scope of international terrorism-related activities which now fall within the ambit of the federal criminal code.

The act also attempted to improve communication between foreign intelligence and criminal law enforcement agencies. To that end, it includes several provisions that authorize information sharing. For example, section 504

[3187] The terms "nondisclosure requirements," "secrecy requirements," and "gag orders" are used interchangeably throughout this report.

[3188] 18 U.S.C. § 3511; John Doe, Inc. v. Mukasey, 549 F.3d 861 (2d Cir. 2008). See also discussion regarding judicial oversight, infra.

[3189] Expansions were also made to some related authorities. For example, the USA PATRIOT Act and subsequent legislation amended the grand jury secrecy rule to permit prosecutors to disclose grand jury information to federal, state, local, or foreign law enforcement or intelligence officials under certain circumstances.

[3190] 50 U.S.C. § 1804(a)(7)(B) (electronic surveillance); 50 U.S.C. § 1823(a)(7)(B) (physical searches).

authorizes federal officers to consult with criminal law enforcement officers regarding information obtained from a physical search in order "to coordinate efforts to investigate or protect against" various national security threats.[3191]

Expansion of Persons Subject to Investigation

Several post-9/11 measures addressed threshold or definitional issues affecting the range of persons whose communications, records, or effects might be investigated as part of foreign intelligence gathering. The controversial 2004 lone wolf provision, one of the three expiring provisions, is especially significant. It expanded the definition of "agent of a foreign power" in FISA to include a non-U.S. person who "knowingly engages in sabotage or international terrorism, or activities that are in preparation therefor, for or on behalf of a foreign power."[3192] Because FISA orders—including those for surveillance, physical searches, pen registers, trap and trace devices, and business records—require evidence indicating that a target is a foreign power or its agent, the broadened definition makes the authorities applicable to targets for which a link to an international terrorist organization or other foreign power is not yet supported by probable cause.[3193]

Another important expansion followed in the wake of revelations regarding the Terrorist Surveillance Program. Two measures, discussed in greater detail infra,[3194] eased federal officials' ability to gather foreign intelligence information between persons in the United States and others thought to be located outside of the United States. In the first, now expired, measure, Congress exempted "surveillance directed at a person reasonably believed to be located outside of the United States" from the definition of "electronic surveillance" under FISA.[3195] Although this made it unnecessary to obtain a FISA order to conduct such surveillance, Congress simultaneously established temporary procedures governing the capture of communications for specified groups of targets

[3195] The Protect America Act of 2007, P.L. 110-55.

reasonably believed to be located overseas.[3196] The second measure provides separate authorities with differing standards for targeting non-U.S. persons and U.S. persons reasonably believed to be located outside the United States.[3197]

Finally, by authorizing the collection of information believed to be relevant to a national security or foreign intelligence investigation, the USA PATRIOT Act and its successors in several instances widened the circle of persons whose communications or effects might fall within the ambit of authorities for intelligence gathering.[3198] Authorities had previously limited that circle to persons believed to be agents of foreign powers.

Expansion of Electronic Surveillance Authorities

The USA PATRIOT Act amended electronic surveillance authorities in ECPA and FISA. The amendments to ECPA primarily address matters other than the interception of the content of communications. However, the act did add several terrorism-related offenses to the list of federal crimes that may serve as the basis for an interception order.[3199] It also authorizes intercepting officers to share information with various federal intelligence and law enforcement officials[3200] and provides explicit disciplinary provisions for intentional violations by federal employees.[3201]

Moreover, section 217 created a new exception to ECPA's general prohibition on the interception of electronic communications. The exception permits law enforcement officials to intercept the communications of an intruder into someone else's computer or computer system with the consent of system's owner or operator.[3202] The exception is limited to the trespasser's communications to, through, and from the invaded system.

An additional important amendment to ECPA broadened the stored communication language in an effort to treat stored voice mail in the same

manner as e-mail.[3203] Finally, section 220 amended ECPA to permit nationwide service of search warrants of material held by service providers,[3204] and section 212 amended it to allow for emergency disclosures by service providers.[3205]

Likewise, the USA PATRIOT Act and its progeny made several changes to FISA's electronic surveillance authorities. The so-called "roving wiretap" provision, section 206 of the USA PATRIOT Act, permits roving or multipoint wiretaps where the Foreign Intelligence Surveillance Court finds that the actions of the target of the application for electronic surveillance under FISA may have the effect of thwarting the identification of a specific communications or other common carrier, landlord, custodian, or specified person to whom the order to furnish information, facilities, or technical assistance in connection with the wiretap should be directed.[3206] As amended by P.L. 109-177, this finding must be based upon specific facts provided in the application.[3207] In addition, section 207 of the USA PATRIOT Act extended the duration of FISA wiretaps and extensions thereof.[3208]

Section 225 added a new provision to FISA that bars suits against any wire or electronic service provider, custodian, landlord, or other person that furnishes information, facilities, or technical assistance in connection with electronic surveillance pursuant to a FISC order or with a request for emergency assistance under FISA.[3209]

Expansion of Authorities to Conduct Physical Searches

"Physical searches," as defined by FISA, are analogous to searches authorized by warrants in criminal investigations.[3210] The most notable amendment specific to

[3206] 50 U.S.C. § 1805(c)(2)(B).

[3207] Id.

[3208] P.L. 107-56, § 207, 50 U.S.C. § 1805(e).

[3209] P.L. 107-56, § 225, 50 U.S.C. § 1805(i). This section was expanded by section 314(a)(2)(D) of the Intelligence Authorization Act for Fiscal Year 2002, P.L. 107-108, to cover those who provide such assistance in connection with a FISA order authorizing a physical search or emergency assistance.

[3210] The definition of "physical search" in FISA incorporates the standard—"reasonable expectation of privacy"—which typically triggers the Fourth Amendment warrant requirement in criminal investigations. See 50 U.S.C. § 1821(5) (defining "physical search" as: "any physical

FISA provisions governing orders for physical searches, made by section 207 of the USA PATRIOT Act, increased the maximum duration of physical search orders targeting persons other than a foreign power.[3211] The maximum duration of such orders was 45 days but is now 120 days for searches targeting an agent of a foreign power and 90 days for other targets.[3212]

Expansion of Authorities for Pen Registers and Trap and Trace Devices

The USA PATRIOT Act amended both FISA and ECPA provisions relevant to the use of pen register and trap and trace devices. The most notable amendment to FISA was made in section 214. Previously, the use of pen registers and similar devices could be authorized only for investigations to gather foreign intelligence information or information concerning international terrorism. Section 214 broadened the purposes for which the devices may be authorized by allowing their use in "any investigation to obtain foreign intelligence information not concerning a United States person or to protect against international terrorism or clandestine intelligence activities."[3213] However, it prohibits any investigation involving a United States person that is "conducted solely upon the basis of activities protected by the first amendment to the Constitution."[3214]

Section 216 amended the ECPA to authorize courts to issue orders for the use of pen registers and trap and trace devices anywhere within the United States.[3215] The statute previously limited their application to the issuing court's jurisdiction. It also authorizes the use of such devices to capture source and addressee information for computer conversations (e.g., e-mail) as well as telephone conversations.[3216]

---

intrusion within the United States into premises or property (including examination of the interior of property by technical means) that is intended to result in a seizure, reproduction, inspection, or alteration of information, material, or property, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, but does not include (A) "electronic surveillance" ... or (B) the acquisition by the United States Government of foreign intelligence information from international or foreign communications, or foreign intelligence activities conducted in accordance with otherwise applicable Federal law ....") (emphasis added).

[3211] P.L. 107-56, §207, 50 U.S.C. § 1824(d). The maximum duration of a physical search order targeting a foreign power was and is one year.

Expanded Access to Records and Other Tangible Things

As mentioned, the USA PATRIOT Act focused in part on the statutory tools available in antiterrorism investigations. Some of those tools enable agents to unearth documents that reveal the paper trail of crime and of the activities of international terrorist organizations and other foreign powers and their agents—grand jury, administrative, and judicial subpoenas; search warrants; court orders under the Electronic Communications Privacy Act (ECPA) and the Foreign Intelligence Surveillance Act (FISA); and national security letters (NSLs). The most important changes were made to FISA and the national security letter statutes. The USA PATRIOT Act and the related legislation that followed sought to make those implements more effective within a system of reinforced civil liberties safeguards.

National Security Letters

The USA PATRIOT Act expanded authorities for agency-issued national security letters. It authorized their issuance with the approval of the Special Agents in Charge of FBI field offices (SACs); broadened the range of permissible targets; and enacted the community-wide-all-consumer credit-information national security letter statute.[3217] Prior to the USA PATRIOT Act, the national security letter statutes permitted issuance only upon government certification of specific and articulable facts, giving reason to believe that the information sought pertained to a foreign power or one of its agents.[3218] Now, they require a certification that the information is relevant to, or is sought for, a particular national security investigation.[3219] The change means that national security letters may be issued at a stage in the investigation when the precise relationship (if any) of a subject to a specific terrorist organization or other foreign power has yet to be established. It also means that information is more likely to be gathered from people several steps removed from a foreign power or its agents and is more likely to pertain to individuals not ultimately of interest.

Reports of the inspector general of the Department of Justice indicate that the FBI previously did not find pre-amendment national security letters particularly useful but now considers them indispensable.[3220] Information gleaned from

national security letter responses is used to produce analytical intelligence reports; further investigations; provide the basis for FISA orders and pursue other investigative techniques; and help decide whether to open, continue, or close an investigation or line of inquiry.[3221] However, the inspector general also found that, at least initially, "the FBI used national security letters in violation of applicable national security letter statutes, Attorney General Guidelines, and internal FBI policies."[3222]

FISA Orders for Business Records and Other Tangible Things

Section 215 of the USA PATRIOT Act, one of the three amendments to FISA scheduled to expire on February 28, 2011, was perhaps the act's most controversial provision. It expanded the authority for FISA orders compelling records and other tangible things in two ways. First, it enlarged the scope of materials that may be sought. Prior to the enactment of the USA PATRIOT Act, FISA authorized court orders for access to only four types of business records: car rental records, housing accommodation (e.g., hotel/motel) records, storage rental records, and travel (e.g., airline/train) records.[3223] As amended, the section authorizes the FISC to issue orders for access to "any tangible things."[3224] Second, the section lowered the standard which must be met before the court may issue such orders. The previous standard required a showing of specific and articulable facts giving reason to believe the information related to a foreign power or the agent of a foreign power. As amended, the provision now requires "a statement of facts showing that there are reasonable grounds to believe that the tangible things sought are relevant to a [foreign intelligence, international terrorism, or espionage investigation.]"[3225]

Specific concerns regarding the provision's potential application to library records and other materials thought to be particularly private or sensitive prompted further revisions to the relevant FISA authorities. In 2006, Congress modified the tangible item provisions to restrict the officials who may apply for orders covering library, bookstore, gun sale, tax or medical records to senior FBI

Inspector General, U.S. Department of Justice, A Review of the Federal Bureau of Investigation's Use of National Security Letters (March 2008) (IG Rept. II) at 114-16.

[3221] IG Rept. I at 46.

[3222] Id. at 124. Second IG's report indicated it was too soon to tell whether the FBI had eliminated the problems identified in the first report, IG Rept. II at 161.

[3223] 50 U.S.C. §§ 1861-1862 (2000 ed.).

[3224] 50 U.S.C. § 1861(a)(1).

[3225] 50 U.S.C. §§ 1861-1863.

headquarters officials; for other types of materials, FBI field office SACs may also apply.[3226]

The 2006 measures also called for audits of the use of section 215 authority by the Justice Department's inspector general.[3227] The resulting reports indicate that the authority was exercised only relatively infrequently and most often in part to secure information that is now available under FISA trap and trace authority.[3228] Prior to the 2006 amendments, FISA trap and trace authority did not permit the order to include a demand for related customer record information, a problem authorities overcame by submitting a FISA tangible item order request in combination with a FISA trap and trace order request.[3229] The 2006 amendments enlarged FISA trap and trace authority so that such "combo" FISA applications are no longer necessary.[3230] The FISA court approved six "pure" section 215 requests in 2004; 14 in 2005; 15 in 2006; 17 in 2007; and 18 in 2008.[3231] The IG reports suggest several reasons for the sparse use. The approval process is less familiar, multi-layered, sometimes cumbersome, and time consuming.[3232] Moreover, voluntary compliance, NSLs, grand jury subpoenas, or FISA trap and trace orders can often provide access to the same documents more quickly.[3233] Nevertheless, the Justice Department considers section 215 authority to be a valuable tool when these alternative means are not available.[3234]

A final important change affected the burden of proof for the standard of relevancy. Record checks are often the "stuff" of running down leads. Before 2006, FISA tangible-item orders were available when "sought" for certain national security investigations—that is, sometimes to determine whether they

would be relevant, not because they were determined to be relevant.[3235] In such cases, FISA responses not infrequently included irrelevant information. After the 2006 amendments, the orders authorize government access only to relevant information.[3236] However, records are declared "presumptively relevant" if they pertain to a foreign power or one of its agents, to the suspected agent who is the subject of the investigation, or to an individual in contact with, or known to, such an agent.[3237] The relevancy presumption seems to make acquisition of information pertaining to "innocent" Americans more likely. Foreign agents may "know" many people, some involved in their nefarious activities, others not. The amendment creates a presumption of relevancy for information pertaining to both groups.

New Statutory Authority to Conduct "Sneak and Peek" Searches

As a general rule, the Federal Rules of Criminal Procedure require officers executing a search warrant to give notice that they have done so and to leave an inventory of the property they have seized.[3238] Section 213 of the USA PATRIOT Act, as amended, permits delayed notice search warrants under some circumstances.[3239] A delayed notice, or "sneak and peek," search warrant is one that authorizes law enforcement officers to secretly enter a home or business, either physically or virtually, conduct a search, take pictures or copy documents, and depart without taking any tangible evidence or leaving notice of their presence. Before section 213, the federal courts agreed that such warrants might be issued under certain exigent circumstances, but disagreed over whether an unnoticed search in the absence of sufficient exigent circumstances constituted a Fourth Amendment violation as well as a violation of the federal rules. They also disagreed as to whether notice might be delayed for longer than seven days or some similar short period of time without court approval.[3240]

The law now permits a delayed notification for 30 days or more for such warrants. In addition, the period of delay may be renewed and extended for intervals of 90 days or more if there is reason to believe that immediate notification will "result in (A) endangering the life or physical safety of an individual; (B) flight from prosecution; (C) destruction of or tampering with

evidence; (D) intimidation of potential witnesses; or (E) otherwise seriously jeopardizing an investigation."[3241]

In FY2008, federal courts issued 763 delayed notice warrants, most often for 90 days.[3242] Drug cases accounted for 474 of the initial warrants and for 369 of the 528 extensions granted; terrorism cases accounted for three of the warrants and two of the extensions.[3243] Thus, even when there is a criminal nexus, delayed notice search warrants do not appear to be a regular employed investigative tool in national security investigations.

Judicial Oversight and Minimization Procedures

Congress relies on three types of safeguards to protect against abuse of the new authority established by the USA PATRIOT Act and its successors: congressional oversight, judicial oversight, and minimization procedures.

Congressional Oversight

Measures following the USA PATRIOT Act established various reporting and notification requirements, presumably to provide transparency regarding the use of enhanced authorities. For example, section 6002 of the FISAAmendments Act of 2004,P.L. 108-458, requires the Attorney General, on a semiannual basis, to report to relevant committees regarding the use of various FISA authorities, Foreign Intelligence Surveillance Court decisions, and related matters for each preceding six-month period.[3244]

Congress instituted additional reporting requirements when it reauthorized and made permanent many USA PATRIOT Act provisions in 2005. For example, section 114 of the USA PATRIOT Improvement and Reauthorization Act of 2005 enhanced congressional oversight of delayed notice search warrants by requiring that no later than 30 days after the expiration or denial of such a warrant, the issuing or denying judge notify the Administrative Office of the U.S. Courts of (1) an application for a delayed notice search warrant; (2) whether the warrant was either granted, modified, or denied; (3) the length of time of the delay in giving

---

[3241] 18 U.S.C. §§ 3103a(b), 2705(b). In other Fourth Amendment cases, the Supreme Court has identified the destruction of evidence, threats to individual safety, and risk of the suspect's flight as among the permissible exigent circumstances justify delayed notice. See, e.g., Wilson v. Arkansas, 514 U.S. 927, 936 (1995).

[3242] Administrative Office of the United States Courts, Report of the Director of the Administrative Office of the United States Courts on Applications for Delayed-Notice Search Warrants and Extensions, EC-2350, 155 Cong. Rec. S7555 (daily ed. July 15, 2009) at 1-2.

[3243] Id. at 6.

[3244] P.L. 108-458, § 6002, 50 U.S.C. 1801 note.

notice; and (4) the offense specified in the warrant or the application.[3245] In addition, it requires the Director of the Administrative Office to submit an annual report to Congress summarizing the use of delayed notice warrants.[3246]

Similarly, section 209 of the 2005 reauthorization measure instituted a semi-annual reporting requirement, whereby the Attorney General must report to the Senate Judiciary Committee and the House and Senate Intelligence Committees regarding physical searches conducted pursuant to FISA, and must submit to those committees and the House Judiciary Committee a report with statistical information concerning the number of emergency physical search orders authorized or denied by the Attorney General.[3247] Likewise, section 128 requires that the Judiciary Committees receive full reports on the use of the FISA's pen register and trap and trace authority every six months.[3248]

Judicial Oversight

Notification requirements facilitate judicial oversight as well. For example, section 216 of the USA PATRIOT Act requires law enforcement officers to submit a detailed report to the court authorizing the search describing information collected via pen registers and trap and trace devices.[3249] The requirement was likely a response to objections that e-mail header information, now authorized to be collected, can be more revealing than a telephone number.

Congress and the courts have also addressed individuals' direct access to judicial review. For example, section 223 of the USA PATRIOT Act amended ECPA to authorize a cause of action against the United States for willful violation by federal employees of the stored communications and records provisions, of the court-ordered interception provisions, and of the FISA electronic surveillance, physical search, pen register, or trap and trace device provisions.[3250]

The federal courts have in some cases determined that insufficient access to judicial review raises constitutional problems. In the context of national security letters, the U.S. Court of Appeals for the Second Circuit, in John Doe, Inc. v.

[3245] P.L. 109-177, § 114, 18 U.S.C. § 3103a(d)(1).

[3246] Id.

[3247] P.L. 109-177, § 109(a), 50 U.S.C. § 1826.

[3248] P.L. 109-177, § 128(b), 50 U.S.C. § 1846(a).

[3249] P.L. 107-56, § 216, 18 U.S.C. § 3123(a)(3).

[3250] P.L. 107-56, § 223(c), 18 U.S.C. §§ 2510(19), 2712.

Mukasey,[3251] held that the current gag order and accompanying judicial review provisions only survive First Amendment scrutiny if the government takes specified actions. Namely, it must promptly petition for judicial review (at the recipient's option) and convince the district court that the proposed secrecy provision is narrowly crafted to meet the statutorily identified adverse consequences of disclosure.[3252] The John Doe, Inc. court also found unconstitutional the statutory requirement (18 U.S.C. § 3511(b)) that a reviewing court give conclusive weight to the government's certification that disclosure might have adverse consequences.[3253]

Judicial review of nondisclosure orders accompanying FISA tangible items orders would seem to stand on different footing. The First Amendment defect in the NSL provisions is the want of prompt judicial involvement. The nondisclosure orders under FISA are issued by the FISC, a neutral judicial body, and consequently would seem to suffer no such malady. The statute, however, establishes an intricate procedure under which a recipient must wait a year before filing a motion to modify or set aside a nondisclosure requirement.[3254] Petitions, which survive a screening process designed to weed out frivolous challenges, may be granted only if the judge concludes that there is no reason to believe that disclosure would endanger national security or individual safety or would interfere with a diplomatic relations or a criminal, counter-terrorism, or counter-intelligence investigation.[3255] As in the NSL statute provision to which the Second Circuit objected,[3256] the government's certification of a possible adverse impact on national security or diplomatic relations is conclusive.[3257] If a petition is denied, a renewed petition may not be filed until a year later.[3258]

[3251] 549 F.3d 861 (2d. Cir. 2008).

[3252] For national security letters, such consequences include danger to the national security or to individual safety, or interference with diplomatic relations or with a criminal counter-intelligence, or counter-terrorism investigation. In a criminal context, disclosure of an officer's purpose to execute a warrant may be excused if disclosure is likely to result in adverse consequences such as the loss of evidence, flight of a suspect, or a danger to individual safety, Wilson v. Arkansas, 514 U.S. 927, 935-36 (1995).

[3257] 50 U.S.C. § 1861(f)(2)(C)(ii).

[3258] 50 U.S.C. § 1861(f)(2)(C)(iii).

Although FISA does not say so in so many words, the recipient of a FISA order who disobeys an order of the court probably stands in contempt of court.[3259] It may be assumed that FISA court-issued orders would be beyond reproach on First Amendment grounds when issued. Yet, the time bars on release from a gag order for which the need has passed might be thought troubling. The time bars notwithstanding, however, a recipient might find an effective avenue for timely review by refusing to comply with the order to produce followed by a challenge to the gag order at the subsequent show cause or habeas hearing.

Minimization Procedures

Minimization means different things in different contexts. In an abstract sense, it means capturing, keeping, using, and passing on to others no more information than is necessary to satisfy the purposes for which the statutory authority to do so was given. Under ECPA, it means procedures to minimize the interception of communications other than those for which the Title III order was granted.[3260] Under FISA, minimization means, roughly, procedures to curtail the interception of the communications of Americans consistent with national security needs.[3261] FISA also has provisions governing the use of FISA-generated evidence in subsequent federal or state proceedings under which district courts may review the legality of the use of FISA authority and suppress the resulting evidence when appropriate.[3262] As discussed supra, in addition to requiring minimization procedures specific to an investigation, both ECPA and FISA also place general limitations on the use of authorities and the information collected. For example, ECPA restricts the use and dissemination of information collected.[3263]

Today, the national security letter statutes have no comparable provisions, although most have dissemination limits.[3264] Section 119 of the USA PATRIOT Improvement and Reauthorization Act of 2005 directed the Attorney General to report on the feasibility of establishing national security letter minimization procedures.[3265] A report prepared by the Justice Department's inspector general discussed efforts of the Justice Department to formulate such procedures and

[3264] 18 U.S.C. § 2709(d); 12 U.S.C. § 3414(a)(5)(B); 15 U.S.C. § 1681u(f); 50 U.S.C. § 436(e).

[3265] P.L. 109-177, § 119(f).

reservations concerning the initial proposals.[3266] The inspector general has also testified that such procedures are needed and overdue, but acknowledged that the task has proven challenging.[3267] He expressed the view that the national security letter minimization procedures should address "collection of information through national security letters, how the FBI can upload national security information in FBI databases, the dissemination of NSL information, the appropriate tagging and tracking of national security letter derived information in FBI databases and files, and the time period for retention of national security letter obtained information."[3268]

Unlike the NSL statutes, section 215 of the USA PATRIOT Act, as amended, has an explicit minimization component, which calls for procedures governing the retention and dissemination of records and other tangible things collected pursuant to FISA orders.[3269] The Justice Department, however, failed to reach internal consensus on issues such as "the time period for retention of information, definitional issues of 'U.S. person identifying information,' and whether to include procedures for addressing material received in response to, but beyond the scope of, the FISA Court order; uploading information into FBI databases; and handling large or sensitive data collections."[3270] Accordingly, it issued interim procedures, which the inspector general concluded "do not adequately address the intent and requirements of the [law] for minimization requirements."[3271]

Related Matters

A few key ancillary matters are likely to be raised in the legislative debate surrounding reauthorization of the USA PATRIOT Act and related authorities. One is the increasingly murky relationship between intelligence gathering authorities and the federal criminal code. Provisions enacted in the wake of the Terrorist Surveillance Program, including retroactive immunity for communications providers and authorities regarding persons located outside the United States that are set to expire in 2012 may also be explored.

Nexus Between Intelligence Gathering and Federal Criminal Statutes

[3269] 50 U.S.C. § 1861(g).

[3270] IG 215 Rept. II at 76.

[3271] Id. at 87.

Despite some lessening of traditional divisions between criminal law enforcement and foreign intelligence gathering resulting from the USA PATRIOT Act and subsequent measures, the purpose of government activity, and the resulting statutory framework, continues to have important consequences for the scope and nature of information collection likely to be authorized. Searches and surveillance in criminal investigations must be justified by indicia of criminal conduct.[3272] In contrast, a significant purpose of an electronic surveillance or a physical search conducted pursuant to FISA must be the collection of foreign intelligence information,[3273] and those activities must be supported by probable cause to believe both (1) that the person targeted by the order is a foreign power or its agent, and (2) that the subject of the search (i.e., the telecommunications at which the surveillance is directed or place to be searched) is owned, possessed, in transit to or from, or is being or is about to be used by the target.[3274] Likewise, the use of national security letters is generally limited to investigations of international terrorism or for clandestine intelligence activities.

Thus, the presence of a criminal law enforcement rationale is significant. Federal intelligence agents may avail themselves of grand jury subpoenas and other criminal law enforcement tools when there is a nexus to a criminal offense. The existence of that nexus often depends upon the reach of federal substantive anti-terrorism law. Federal law prohibits certain violent acts of terrorism such as aircraft sabotage and the use of weapons of mass destruction.[3275] It also condemns misconduct committed in anticipation of violent acts of terrorism such as providing material support to terrorism organizations or accepting military training from terrorist organizations.[3276] Moreover, terrorist offenses often serve as an element of other federal crimes such as racketeering or supply the basis for expanded procedural options in areas such as the statute of limitations.[3277] For example, federal law extends the general five-year statute of limitations for

---

[3272] See Fed. R. Crim. P. 41(c); 18 U.S.C. § 2518(3).

[3273] See, e.g., 50 U.S.C. § 1804(a)(7)(B) (2008). Prior to 2001, the statute had required that "the purpose" of a FISA warrant be foreign intelligence collection.

[3274] 50 U.S.C. § 1805(a)(2)(A) and (B) (electronic surveillance); 50 U.S.C. § 1824(a)(2) (physical search). In contrast, federal criminal search warrants require probable cause to believe that instrumentalities, evidence, or fruits of a crime will be found in the place to be searched. See Fed. R. Crim. P. 41(c).

[3275] 18 U.S.C. § 32 (destruction aircraft or aircraft facilities); 18 U.S.C. § 2332a (use of weapons of mass destruction).

[3276] 18 U.S.C. § 2339B (providing material support); 18 U.S.C. § 2339D (military training). While section 2339B covers attempted violations, section 2339D does not.

[3277] 18 U.S.C. §§ 1961-1962 (racketeering); 18 U.S.C. § 3286 (statute of limitations).

prosecution of a federal crime to eight years when the offense is one defined as a federal crime of terrorism.[3278]

Two federal statutes, both amended by the USA PATRIOT Act, outlaw providing material support for terrorists. One prohibits providing support for federal crimes of terrorism or similar offenses;[3279] the other providing support for designated terrorist organizations.[3280] The second declares in part that "[w]hoever knowingly provides material support or resources to a foreign terrorist organization, or attempts or conspires to do so, shall be fined under this title or imprisoned not more than 15 years, or both."[3281] Conviction requires proof that the defendant either knew that the organization had been designated a foreign terrorist organization or that it engaged in terrorism.[3282] It does not require the government to prove that the support was provided with the intent to further the organization's illicit activities.[3283] The Ninth Circuit has held that the terms "training" and "service" as used in these sections to describe prohibited forms of material support are unconstitutionally vague.[3284] The Supreme Court has agreed to hear arguments which assert that they are incompatible with the prohibitions of the First Amendment and unconstitutionally vague.[3285]

In addition to the racketeering and statute of limitation provisions, federal crimes of terrorism appear in a number of federal statutes. In some instances, the presence of a federal crime of terrorism is an element of the offense.[3286] In others,

---

[3278] 18 U.S.C. § 2332b(g)(5) classifies over forty federal offenses as "federal crimes of terrorism."

[3279] 18 U.S.C. § 2339A.

[3280] 18 U.S.C. § 2339B. Neither section explicitly covers material support of the families of terrorist suicide bombers.

[3281] 18 U.S.C. § 2339B(a)(1).

[3282] More precisely, it requires that it had been designated or that the organization has or is engaged in terrorist activity as defined in 8 U.S.C. § 1182(a)(3)(B), or in terrorism as defined in 22 U.S.C. § 2656f(d)(2).

[3283] Humanitarian Law Project v. Mukasey, 552 F.3d 916, 927 (9th Cir. 2009), cert. granted, _____ S.Ct. _____ (Sept. 30, 2009); United States v. Warsame, 537 F.3d 1005, 1021-22 (D. Minn. 2008).

[3284] Humanitarian Law Project v. Mukasey, 552 F.3d 916, 928-30 (9th Cir. 2009), cert. granted, _____ S.Ct. _____ (Sept. 30, 2009).

[3285] Humanitarian Law Project v. Holder (Doc. No. 08-1498), _____ S.Ct. _____ (Sept. 30, 2009); Holder v. Humanitarian Law Project (Doc. No. 09-89), _____ S.Ct. _____ (Sept. 30, 2009).

[3286] 18 U.S.C. § 2283 (transportation of explosives or weapons of mass destruction knowing they are intended to be used commit a federal crime of terrorism) and § 2284 (transportation of a terrorist who intends to commit, or is in flight following commission of, a federal crime of terrorism).

investigation of a federal crime of terrorism constitutes an exception to an otherwise applicable privacy restriction.[3287] As a general rule, the Sentencing Guidelines recommend more severe sentences for federal crimes of terrorism.[3288]

In addition to the material support crime, federal law uses an alternative terrorism cross reference with at least equal regularity. Namely, 18 U.S.C. § 2331 provides an element for some offenses, such as one which makes it a federal crime to commit bribery affecting port security with the intent to commit international or domestic terrorism.[3289] It too supplies the grounds for an exception to otherwise binding privacy restrictions.[3290] And, several federal crimes are more severely punished when they are committed in furtherance of international or domestic terrorism.[3291]

The difference between the two cross references is one of specificity on one hand and a terrorism nexus on the other. 18 U.S.C. § 2332b(g)(5)(B) provides a relatively limited list of specific federal crimes that need not necessarily be committed in a terrorist context.[3292] 18 U.S.C. § 2331, on the other hand, includes any federal, state, or foreign crime of violence, but only if committed for terrorist purposes.[3293] The domestic terrorism definition of section 2331 originated in the USA PATRIOT Act.[3294] Critics have suggested that its want of specificity threatens possible misuse against political dissents.[3295]

[3287] 20 U.S.C. §§ 1232g(j), 9573(e) (court orders for access to confidential educational records).

[3288] U.S.S.G. § 3A1.4.

[3289] 18 U.S.C. § 226.

[3290] 20 U.S.C. § 1232g(j), § 9573(e) (court orders for access to confidential educational records).

[3291] E.g., 18 U.S.C. § 1001 (false statements), § 1028 (fraud relating to identification documents), § 1505 (obstruction of administrative proceedings).

[3292] 18 U.S.C. § 2332b(g)(5) consists of two elements: a terrorism element ("an offense that is calculated to influence or affect the conduct of government by intimidation or coercion, or to retaliate against government conduct," 18 U.S.C. § 2332b(g)(5)(A)) and one listing specific federal crimes ("an offense that … is a violation of [specified sections]," 18 U.S.C. § 2332b(g)(5)(B)). Most statutes cross reference only to section 2332b(g)(5)(B).

[3293] See 18 U.S.C. § 2331(1) (defining "international terrorism"); 18 U.S.C. § 2331(5) (defining "domestic terrorism").

Aftermath of the Terrorist Surveillance Program (TSP)

In late 2005, the New York Times reported that the federal government had "monitored the international telephone calls and international e-mail messages of hundreds, perhaps thousands, of people in the United States without warrants."[3296] Subsequently, President Bush acknowledged that, after the attacks of September 11, 2001, he had authorized the National Security Agency to "intercept international communications into and out of the United States" by "persons linked to al Qaeda or related terrorist organizations" based upon "his constitutional authority to conduct warrantless wartime electronic surveillance of the enemy,"[3297] despite the general rule that electronic surveillance by the federal government is unlawful unless conducted pursuant to the Foreign Intelligence Surveillance Act (FISA) or Title III of the Omnibus Crime Control and Safe Streets Act (Title III).[3298] Now discontinued, the TSP appears to have been active from shortly after September 11, 2001, to some time in January of 2007.[3299]

Following these revelations, Congress enacted the Protect America Act, P.L. 110-55, and the FISA Amendments Act of 2008, P.L. 110-261. They addressed several issues raised in public discussions regarding the TSP. Two provisions likely to arise in the current legislative debate include (1) retroactive immunity for telecommunications providers who played a role in the TSP; and (2) temporary provisions applying different procedures and standards to targets under FISA depending upon the person's nationality and geographic location.

Retroactive Immunity for Telecommunications Providers

After private citizens and interest groups became aware of the TSP, they filed dozens of lawsuits alleging various statutory and constitutional violations by the telecommunications companies that participated in the program.[3300] During

[3300] Id. at 7.

litigation, the government moved for the dismissal of the cases on the basis of the state secrets privilege, which bars the disclosure during litigation of information that, "in the interest of national security, should not be divulged."[3301] While the district court left open the possibility that the privilege might lead to dismissal at a later date, it declined to dismiss the suits before the discovery stage in the litigation.[3302]

Insofar as many of the details of the TSP remain classified, it is likely that assertions of the state secrets privilege would have been central to the disposition of the civil suits against telecommunications providers. However, the enactment of the 2008 FISAAmendments Act provided the Attorney General with the authority to seek the dismissal of these lawsuits.[3303] Under the 2008 law, no civil case against a covered telecommunications company could proceed if the Attorney General certified that any assistance given by the defendant was given in connection with the TSP between September 11, 2001, and January 17, 2007, and the defendant received written assurances that the TSP was authorized by the President and determined to be lawful.[3304] Dismissal was required if the court found that the certified facts were supported by "substantial evidence." In September of 2008, Attorney General Mukasey made the necessary certification and moved to dismiss the civil suits against the telecommunications providers.[3305] In June of 2009, the consolidated suits were dismissed after the district court found the certification to be supported by substantial evidence.[3306] That decision was appealed to the Ninth Circuit, and is currently pending.

Were Congress to act subsequently to repeal the retroactive immunity provided by the FAA, the defendants might argue that such a repeal violates their due process rights[3307] or the constitutionally required separation of powers.[3308]

[3304] Alternatively, the Attorney General can certify that the alleged assistance was not in fact provided by the defendant. 50 U.S.C. § 1885a(a)(5).

[3305] See Public Certification of the Attorney General of the U.S., In re Nat'l Security Telecommunications Records Litigation, MDL Dkt. No. 06-1791-VRW (N.D. Cal. Sep. 19, 2008) (on file with author).

[3306] In re NSA Telcoms. Records Litig., 633 F. Supp. 2d 949 (N.D. Cal. 2009).

[3307] Chase Sec. Corp. v. Donaldson, 325 U.S. 304, 315-316 (1945) (noting in dicta that "some rules of law probably could not be changed retroactively without hardship and oppression" to the extent that it would be considered a violation of the Due Process Clause).

However, courts have generally only upheld such claims where the party was in possession of a final, unreviewable judgment. Although, at this time, the cases have been dismissed by the district court, that dismissal has not been reduced to a final, unreviewable judgment as it is currently being reviewed by the Ninth Circuit. Therefore, legislative modification of the retroactive immunity enjoyed by these defendants under the FISA Amendments Act remains a possibility.

Provisions Expiring in 2012

After the TSP activities were concluded in 2007, Congress enacted the Protect America Act, which established a mechanism for the acquisition, via a certification by the Director of National Intelligence (DNI) and the Attorney General but without a court order, of foreign intelligence information concerning a person reasonably believed to be outside the United States.[3309] This temporary authority ultimately expired after approximately six months, on February 16, 2008. Several months later, the Congress enacted the FISA Amendments Act of 2008, which created separate procedures for targeting non-U.S. persons and U.S. persons reasonably believed to be outside the United States under a new Title VII of FISA.[3310] Title VII is set to expire on December 31, 2012.

Pursuant to Title VII, non-U.S. persons reasonably believed to be abroad may be targeted to acquire foreign intelligence information pursuant to a joint Attorney General/Director of National Intelligence (DNI) authorization if certain criteria are met.[3311] The authority may not be used for reverse targeting—in situations where the true focus of the collection effort is a person in the United States.[3312] Title VII requires a FISC order to authorize the targeting U.S. persons reasonably believed to be abroad.[3313] The targeting procedures, minimization procedures, and supporting certifications by the Attorney General and the DNI, applicable to the targeting of non-U.S. persons reasonably believed to be outside the United States, are subject to judicial review by the FISC. In addition, electronic communications service providers directed by the Attorney General and the DNI to provide assistance in connection with such acquisitions from targeted non-U.S. persons may challenge such directives before the FISC, with appeal to the Foreign

Intelligence Surveillance Court of Review, and, if necessary, to the Supreme Court. Probable cause determinations, minimization procedures, and certifications with respect to the targeting of U.S. persons reasonably believed to be outside the United States are also subject to judicial review.

Conclusion

As with previous USA PATRIOT Act reauthorization debates, the slated expiration of FISA amendments in 2011 (and provisions concerning persons reasonably believed to be abroad in 2012) may prompt an examination of authorities for government collection of private information. As mentioned, bills introduced in the 111th Congress (before a key expiration date was temporarily extended) propose significant changes to existing authorities. Congress is likely to revisit those proposals when it considers a longer-term extension of expiring provisions.

Arguments raised in the debate in the 111th Congress reflect fundamental questions regarding the level of government intrusion necessary to ensure the country's safety. Referring to the expiring provisions, the U.S. Department of Justice asserts that the expanded authorities have proven to be important and effective intelligence gathering tools.[3314] Thus, although it is "willing to consider" proposals to modify authorities to provide additional privacy protections, the Justice Department warns that care should be taken to ensure that any changes to existing authorities "do not undermine the effectiveness of [the expiring FISA amendments]."[3315]

Countervailing arguments assert that amendments enacted following the 9/11 terrorist attacks undermined citizens' civil liberties unnecessarily.[3316] Specifically, they argue that the broader the authorities for the collection of foreign intelligence information, the greater the likelihood that U.S. citizens' private conversations or documents will be swept within the scope of an authorized investigation. For example, a concern might be that the authority for "roving wiretaps" increases the likelihood that innocent conversations involving U.S. citizens will be the subject of electronic surveillance. Likewise, at least one commentator asserts that national security letters have a "too diffuse" focus, which leads to anecdotal evidence showing that "their effectiveness is disproportionately small compared with the extent of ... the invasion of privacy

Summary

The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act, P. L. 107-56, is part of the Congressional response to September 11. It is the merger of two similar bills. S.1510 passed the Senate on October 11, 147 Cong.Rec. S10604, and H.R.2975 passed the House on October 12 after substituting the language of H.R.3108 for its text, 147 Cong.Rec. H6775. Having informally resolved their differences, the House enacted the measure in final form on October 24, 147 Cong.Rec. H7282, and the Senate on October 25, 147 Cong.Rec. S11059.

The Act consists of ten titles which, among other things:

- give federal law enforcement and intelligence officers greater authority (at least temporarily) to gather and share evidence particularly with respect to wire and electronic communications;
- amend federal money laundering laws, particularly those involving overseas financial activities;
- create new federal crimes, increase the penalties for existing federal crimes, and adjust existing federal criminal procedure, particularly with respect to acts of terrorism;
- modify immigration law, increasing the ability of federal authorities to prevent foreign terrorists from entering the U.S., to detain foreign terrorist suspects, to deport foreign terrorists, and to mitigate the adverse immigration consequences for the foreign victims of September 11; and

- authorize appropriations to enhance the capacity of immigration, law enforcement, and intelligence agencies to more effectively respond to the threats of terrorism.

Several proposals, offered while the Act was under consideration, were not among the provisions ultimately enacted, e.g., revision of the McDade-Murtha Amendment (relating to the application of professional conduct standards to federal prosecutors), measures to combat illegal Internet gambling, and are thus beyond the scope of this report.

Introduction

The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act, Public Law 107-56, is part of the Congressional response to September 11. It is the merger of two similar bills. S.1510 passed the Senate on October 11, 147 Cong.Rec. S10604, and H.R.2975 passed the House on October 12 after substituting the language of H.R.3108 for its text, 147 Cong.Rec. H6775. Having informally resolving their differences, the House enacted the measure in final form on October 24, 147 Cong.Rec. H7282, and the Senate on October 25, 147 Cong.Rec. S11059.

The report of the House Committee on the Judiciary, H.Rept. 107-236 on H.R.2975, and the report of the House Committee on Financial Services, H.Rept. 107-250 on H.R. 3004, each explain some of the issues ultimately resolved in the Act.

This is a section by section analysis of the Act as enacted. The analysis borrows the explanations of the House Committee of the Judiciary, in a number of those instances where the language of the Committee bill and the language of the Act are identical.

Section 1. Short Title and Table of Contents

The Act may be cited as the "Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001."

Section 2. Construction; Severability

Section 2 confirms that the Act's provisions should be given maximum effect and that should any provision be found invalid or unenforceable it should be severed and the remainder the Act allowed to remain in effect.

Title I – Enhancing Domestic Security Against Terrorism

Section 101. Counterterrorism Fund

Congress created a Counterterrorism Fund to reimburse the Department of Justice for the costs of reestablishing operating capacity lost as a consequence of

the destruction of the Alfred P. Murrah Federal Building in Oklahoma City and for other counterterrorism expenditures, Public Law 104-19, 109 Stat. 249 (1995). This section takes a similar course in order to reimburse the Justice Department for the costs of (1) reestablishing the operating capacity of facilities damaged or destroyed by terrorists; (2) preventing, investigating and prosecuting terrorism by various means including the payment of rewards (without limitation); and (3) conducting terrorism threat assessments of federal facilities. The Fund is also available to reimburse federal agencies for costs associated with overseas detention of individuals accused of terrorism in violation of United States law.

Section 102. Sense of Congress Condemning Discrimination Against Arab and Muslim Americans

It is the sense of Congress that the civil rights and civil liberties of all Americans, including Arab Americans, Muslim Americans, and Americans from South Asia, should be protected; that violence and discrimination against any American should be condemned; and that the patriotism of Americans from every ethnic, racial, and religious background should be acknowledged.

Section 103. Increased Funding for the Technical Support Center at the Federal Bureau of Investigation

This section authorizes appropriations of $200 million for each of fiscal years 2002, 2003, and 2004 for the FBI's Technical Support Center, created by section 811 of the Antiterrorism and Effective Death Penalty Act of 1996 (Public Law 104-132, 110 Stat. 1314 (1996).

Section 104. Requests for Military Assistance to Enforce Prohibition in Certain Emergencies

The Posse Comitatus Act and its administrative auxiliaries, 18 U.S.C. 1385, 10 U.S.C. 375, ban the use of the armed forces to execute civilian law, absent explicit statutory permission. Pre-existing statutory exceptions covered Department of Justice requests for technical assistance in connection with emergencies involving biological, chemical or nuclear weapons, 18 U.S.C. 2332e, 175a, 229E, 831(e), and 10 U.S.C. 382. This section amends section 2332e to include emergencies involving other weapons of mass destruction.

Section 105. Expansion of National Electronic Crime Task Force Initiative

In order to counter various forms of electronic crime including those directed against the Nation's critical infrastructure and financial systems, this section instructs the Director of the United States Secret Service to establish a network of electronic crime task forces modeled after the New York Electronic Crimes Task Force.

Section 106. Presidential Authority

The International Emergency Economic Powers Act (IEEPA), 50 U.S.C. 1701 et seq., grants the President emergency economic powers when faced with extraordinary threats to our national security, foreign policy or economic well being. Under such conditions, for example, he may freeze the assets located in this country of a foreign nation or national responsible for the threat. During war time, the Trading with the Enemy Act (TWEA) gives him the power to confiscate enemy property located in the United States , 50 U.S.C. App. 1 et seq.

Section 106 amends section 703 of IEEPA, 50 U.S.C. 1702, to permit the President to confiscate foreign property in response to foreign aggression. The authority becomes available when the United States is engaged in armed hostilities or has been attacked by a foreign country or its nationals. At that time, the property of any foreign person, organization, or nation which planned, authorized, aided or engaged in the hostilities or attack becomes forfeitable. The President or his delegate may determine the particulars under which the property is confiscated, administered and disposed of, subject to an innocent owner defense created by section 316 of the USA PATRIOT Act. Elsewhere, the USA PATRIOT Act gives the President an alternative means to confiscate the same property on similar grounds (section 806).

Section 106 is intriguing because on one hand it seems a logical extension of IEEPA and TWEA, but on the other it appears to revive the constitutionally suspect forfeiture of estate. Forfeiture of estate was a creature of the common law.[3318] Upon conviction and attainder, a felon or traitor forfeited all of his property. Statutory forfeiture, a more familiar feature of American law, consists of the confiscation of contraband, the fruits of crimes, and the means to commit a crime – untaxed whiskey, the drug dealer's profits, and the rum runner's ship.

Three distinguishing features characterize forfeiture of estate. The property is lost solely by reason of its ownership by the felon or traitor; there need be no other nexus to the crime. As a consequence, it works the confiscation of all of a felon's property, not just his crime-related property. Third, it extinguishes his future right to hold property and no title to property may pass through him to his heirs.[3319]

[3318] "Three kinds of forfeiture were established in England at the time the Eighth Amendment was ratified in the United States: deodand, forfeiture, and statutory forfeiture. . . . Of England's three kinds of forfeiture, only the third took hold in the United States," Austin v. United States, 509 U.S. 602, 611-12 (1993).

[3319] Statutory forfeitures have often been accomplished through civil proceedings conducted in rem with the offending property treated as defendant. As a result, some came to believe that the necessity of the property owner's criminal conviction constituted the essential distinction between forfeiture of estate and statutory forfeiture. Yet, occasional forfeiture statutes have predicated confiscation upon the owner's conviction throughout our history. Moreover, it defies credibility to claim that forfeiture of estate's only ameliorating attribute is its only essential element.

It is this last feature, this "corruption of the blood", which the authors of the Constitution found most distasteful. They decreed that "no attainder of treason shall work corruption of blood, or forfeiture except during the life of the person attainted," U.S.Const. Art. III, §3, cl.2. And when first assembled in Congress, they extended the ban to all federal crimes: "no conviction or judgment for any offences aforesaid, shall work corruption of blood, or any forfeiture of estate," 1 Stat. 117 (1790).[3320]

During the Civil War, Congress authorized the confiscation of the property of supporters of the Confederacy, 12 Stat. 589 (1862), but in deference to President Lincoln's constitutional doubts interest in the property reverted to the offender's heirs upon his death, 12 Stat. 627 (1862).

On the other hand, confiscation under the Trading With the Enemy Act (TWEA), looks for all intents and purposes like the confiscation of estate of the property of an enemy nation or national, 50 U.S.C. App. 5(b). Yet the Supreme Court has upheld TWEA as a valid exercise of the war power without mentioning of any obstacle interposed by constitutional reservations concerning forfeiture of estate, Silesian American Corp. v. Clark, 332 U.S. 469 (1947).[3321]

Section 106 also amends IEEPA to cover situations where either the covered foreign person or the covered property are within this country or otherwise subject to the jurisdiction of the United States. It allows the President to freeze assets during the pendency any International Emergency Economic Act investigation rather than await its outcome as was previously the case. Finally, it permits the government to present, in secret (ex parte and in camera), any classified information upon which an IEEPA decision has been based should the decision be subject to judicial review.

Title II – Enhanced Surveillance Procedures

Section 201. Authority to Intercept Wire, Oral, and Electronic Communications Relating to Terrorism

Title III of the Omnibus Crime Control and Safe Streets Act of 1968, 18 U.S.C. 2510 et seq. establishes a judicially supervised procedure under which law

---

[3320] The statutory ban, and its successors, remained in effect until 1984 when it was repealed through misunderstanding as part of comprehensive revision of federal criminal law, 18 U.S.C. 3563 (1982 ed.).

[3321] Cf., Societe Internationale v. Rogers, 357 U.S. 197, 211 (1958)("this summary power to seize property which is believed to be enemy-owned is rescued from constitutional invalidity under the Due Process and Just Compensation Clauses of the Fifth Amendment only by those provisions of the Act which afford a non-enemy claimant a later judicial hearing as to the propriety of the seizure")(no suggestion that due process likewise condemns forfeiture of estate in cases that do not involve treason).

enforcement authorities may intercept wire, oral, or electronic communications. The procedure, however, is only available in connection with the investigations of specifically designated serious crimes. Section 201 adds several terrorism offenses to Title III's list of designated offenses:

- chemical weapons offenses, 18 U.S.C. 229;
- use of weapons of mass destruction, 18 U.S.C. 2332a;
- violent acts of terrorism transcending national borders, 18 U.S.C. 2332b;
- financial transactions with countries which support terrorism, 18 U.S.C. 2332d;
- material support of terrorists, 18 U.S.C. 2339A; and
- material support of terrorist organizations, 18 U.S.C. 2339B.

The section makes a technical correction in 18 U.S.C. 2516 by designating as 18 U.S.C. 2516(1)(r) one of the two paragraphs previously identified as 18 U.S.C. 2516(1)(p). Section 201 is subject to the sunset provisions of section 224.

Section 202. Authority to Intercept Wire, Oral, and Electronic Communications Relating to Computer Fraud and Abuse Offenses

Section 202 adds computer fraud and abuse to the Title III predicate offense list. This section is subject to the sunset provisions of section 224.

Section 203. Authority to Share Criminal Investigative Information

Previously, federal law enforcement officers who uncovered details of the activities of international terrorist organizations or of foreign agents in this country were often not free to pass the information on to federal intelligence officers. This section allows federal law enforcement officers to share a limited range of foreign intelligence information, notwithstanding earlier limitations such as those involving the use of grand jury information or Title III evidence.

Rule 6(e) of the Federal Rules of Criminal Procedure prohibits disclosure of matters occurring before a federal grand jury. The Rule recognizes exceptions for disclosures in other judicial proceedings, to prevent abuse of the grand jury process, for presentation of evidence to other grand juries, and to state law enforcement officials.

Section 203 creates an exception for intelligence matters. It covers information (1) related to the protection of the United States against a foreign attack or other foreign hostile action, against sabotage or international terrorism by a foreign power or its agents, or against foreign clandestine intelligence activities; (2) concerning a foreign power or territory related to the national defense, security, or foreign affairs activities of the United States; or (3) constituting foreign intelligence or counterintelligence as defined in section 3 of the National Security Act of 1947 (that is, (a) "information relating to the capabilities, intentions, or activities of foreign governments or elements thereof, foreign organizations, or foreign persons" or (b) "information gathered and activities conducted to protect

against espionage, other intelligence activities, sabotage, or assassinations conducted by or on behalf of foreign governments or elements thereof, foreign organizations, or foreign persons," 50 U.S.C. 401a(2), (3)).

Now when such information comes to light during the course of a federal grand jury investigation, it may be passed on to other Federal law enforcement, intelligence, protective, immigration, national defense, or national security officials, but only for use in the official duties. Within a reasonable time thereafter, Federal prosecutors must notify the court of the disclosure under seal. Prosecutors must also follow disclosure procedures outlined by the Attorney General when sharing intelligence information that identifies an American citizen or a permanent resident alien.

When authorities executing a Title III interception order discover this same type of intelligence evidence, they may reveal it to any of these same officers for use in their official duties. Before the passage of section 203, such information could only be shared for law enforcement purposes, 18 U.S.C. 2517. As in the case of grand jury information, Title III intelligence information that identifies an American citizen or a permanent resident alien can be divulged only pursuant to disclosure procedures outlined by the Attorney General.

Finally, section 203 creates a generic exception to any other law which purports to bar federal law enforcement officials from disclosing this type of intelligence information to these federal officers for official use. The section's amendments to Title III are subject to the sunset provisions of section 224, the grand jury and generic exceptions are not.

Section 204. Clarification of Intelligence Exceptions From Limitations on Interception and Disclosure of Wire, Oral and Electronic Communications

Title III at one time stated that the interception of wire or oral communications for foreign intelligence purposes should be governed by the provisions of the Foreign Intelligence Surveillance Act (FISA) rather than those of Title III or of chapter 121 of title 18 of the United States Code (relating to stored wire and electronic communications and transactional records access) or of the Federal Communications Act, 18 U.S.C. 2511(2)(f). Section 204 amends this instruction in 18 U.S.C. 2511(2)(f) to confirm that in foreign intelligence investigations, FISA governs the interception of electronic communications and the use of pen registers and trap and trace devices as well. This section is subject to the sunset provisions of section 224.

Section 205. Employment of Translators by the Federal Bureau of Investigation

Existing law sometimes waives personnel requirements and limitations in order to fill positions requiring foreign language skills, e.g., 22 U.S.C. 1474(1)(relating to employment of translators with respect to United States Information and

Educational Exchange Programs); 22 U.S.C. 4024(a)(4)(B) (relating to the employment of linguists in connection United States Foreign Service training).

Section 205 waives otherwise applicable personnel requirements and limitations to permit the Federal Bureau of Investigation (FBI) to hire translators expeditiously to support counterintelligence investigations and operations. The Director of the FBI will see to the necessary security requirements. The Attorney General will report to the Committees on the Judiciary on the number of translators employed by the FBI and by the Department of Justice, on the impediments to using translators employed by other government agencies, on the FBI's needs, and on his recommendations to meet the FBI's needs for translation services. This section is not subject to the sunset provisions of section 224.

Section 206. Roving Surveillance Authority Under the Foreign Intelligence Surveillance Act of 1978

Speaking of identical language in an earlier bill, the House Committee on the Judiciary explained: "Section 1805(c)(2)(B) of title 50, permits the FISA court to order third parties, like common carriers, custodians, landlords and others, who are specified in the order, (specified persons) to provide assistance and information to law enforcement authorities in the installation of a wiretap or the collection of information related to a foreign intelligence investigation.

"Section 152 amends 1805(c)(2)(B) to insert language that permits the FISA court to direct the order to <other persons' if the court finds that Section 1805(c)(2)(B) of title 50, permits the FISA court to order third parties, like common carriers, custodians, landlords and others, who are specified in the order, (specified persons) to provide assistance and information to law enforcement authorities in the installation of a wiretap or the collection of information related to a foreign intelligence investigation. Section 152 amends 1805(c)(2)(B) to insert language that permits the FISA court to direct the order to <other persons' if the court finds that the `actions of the target of the application may have the effect of thwarting the identification of a specified person,' who would be required to assist in the installation of any court-authorized intercept. This amendment is intended to expand the existing authority to allow for circumstances where the court finds that the actions of a target may thwart the identification of a specified person in the order. This is usually accomplished by the target moving his location. The move necessitates the use of third parties other than those specified in the original order to assist in installation of the listening device.

"This amendment allows the FISA court to compel any such new necessary parties to assist in the installation and to furnish all information, facilities, or technical assistance necessary without specifically naming such persons. Nevertheless, the target of the electronic surveillance must still be identified or described in the order as under existing law.

"For example, international terrorists and foreign intelligence officers are trained to thwart surveillance by changing hotels, cell phones, Internet accounts, etc. just prior to important meetings or communications. Under present law, each time this happens the government must return to the FISA court for a new order just to change the name of the third party needed to assist in the new installation. The amendment permits the court to issue a generic order that can be presented to the new carrier, landlord or custodian directing their assistance to assure that the surveillance may be undertaken as soon as technically feasible," H.Rept. 107-256, at 59-60 (2001). This section is subject to the sunset provisions of section 224.

Section 207. Duration of FISA Surveillance of Non-United States Persons Who are Agents of a Foreign Power

Prior to the USA PATRIOT Act, unless directed at a foreign power, FISA surveillance orders and extensions expired after ninety days, and FISA physical search orders and extensions were effective for no more forty-five days, 50 U.S.C. 1805(e), 1824(d)(2000 ed.). Section 207 extends the tenure of physical search orders to ninety days. Surveillance and physical search orders may now remain in effect for up to 120 days with extensions for up to a year, 50 U.S.C. 1805(e), 1824(d). This represents a compromise over the Justice Department's original proposal which would have set the required expiration date for orders at one year instead of 120 days. This section is subject to the sunset provisions of section 224.

Section 208. Designation of Judges

FISA is in essence a series of procedures available to secure court orders in certain foreign intelligence cases. It operates through a special court which before passage of section 208 consisted of seven judges, scattered throughout the country, two of whom are now from the Washington, D.C. area. Section 208 authorizes the appointment of four additional judges and requires that three members of the court reside within twenty miles of the District of Columbia, 50 U.S.C. 1803(a). This section is not subject to the sunset provisions of section 224.

Section 209. Seizure of Voice-Mail Messages Pursuant to Warrants

Section 209 treats voice mail like e-mail. Thus, Federal officers may gain access with a warrant or court order. They need no longer resort to the more demanding regime of Title III that applies in the case of live telephone conversations, United States v. Smith, 155 F.3d 1050, 1055-56 (9th Cir. 1998). This section is subject to the sunset provisions of section 224.

Section 210. Scope of Subpoenas for Records of Electronic Communications

"Terrorists and other criminals often use aliases in registering for Internet and telephone services. This creates a problem for law enforcement attempting to identify the suspects of terrorist acts or criminal acts that often support the terrorists. While the government currently can subpoena electronic

communications or a remote computing services provider for the name, address and length of service of a suspect, this information does not help when the suspected terrorist or criminal lies about his or her identity. Permitting investigators to obtain credit card and other payment information by a subpoena, along with subscriber information (already permitted to be obtained under current law), will help law enforcement track a suspect and establish his or her true identity.

"This section amend[s] 18 U.S.C. 2703(c) to authorize a subpoena for transactional records to include information regarding the form of payment in order to assist law enforcement in determining the user's identity," H.Rept. 107-236, at 56-7 (2001). This section is not subject to the sunset provisions of section 224.

Section 211. Clarification of Scope

Telephone and electronic communications providers may be required to provide law enforcement officials with customer identifying information without notifying their customers, 18 U.S.C. 2705(b). Cable companies are prohibited from disclosing customer identifying information without customer approval, 47 U.S.C. 551 et. seq. When cable companies began to offer communications services, uncertainty arose over whether law enforcement access to their customers records was to be governed by the standards applicable to the communications industry or by the earlier cable standards, see In re Application of U.S.A. for an Order Pursuant to 18 U.S.C. 2703(d), 158 F.Supp.2d 644 (D.Md. 2001)(holding the cable provisions implicitly repealed and summarizing existing ambivalent case law).

Section 211 resolves the question by amending the Communications Act, 47 U.S.C. 551, to make it clear that when a cable company offers communications services it is subject to the provisions of Title III, and chapters 121 and 206 of title 18 of the United States Code (relating to stored wire and electronic communications and transactional records access and to pen registers and trap and trace devices, respectively). Cable customer video subscription records, however, remain in the shelter of the Communications Act protection. Section 211 is not subject to the sunset provisions of section 224.

Section 212. Emergency Disclosure of Electronic Communications to Protect Life and Limb

As the House Committee on the Judiciary observed with respect to a substantively identical provision: "This section amends 18 U.S.C. 2702 to authorize electronic communications service providers to disclose the communications (or records relating to such communications) of their customers or subscribers if the provider reasonably believes that an emergency involving immediate danger of death or serious physical injury to any person requires disclosure of the information without delay.

"This section would also amend the law to allow communications providers to disclose non-content information (such as the subscriber's login records). Under current law, the communications provider is expressly permitted to disclose content information but not expressly permitted to provide non-content information. This change would cure this problem and would permit the disclosure of the less-protected information, parallel to the disclosure of the more protected information." H.Rept. 107-236, at 58 (2001). This section is subject to the sunset provisions of section 224.

Section 213. Authority for Delaying Notice of the Execution of a Warrant

Standing alone, Rule 41 of the Federal Rules of Criminal Procedure seems to preclude delayed notification of the execution of "sneak and peek" warrants. A sneak and peek warrant is one that authorizes officers to secretly enter (either physically or electronically), conduct a search, observe, take measurements, conduct examinations, smell, take pictures, copy documents, download or transmit computer files, and the like; and depart without taking any tangible evidence or leaving notice of their presence. The Rule on its face requires that after the execution of a federal search warrant officers leave a copy of the warrant and an inventory of what they have seized and advise the issuing court what they have done, F.R.Crim.P. 41(d).

The lower federal courts are divided over the extent to which the Rule reflects Fourth Amendment requirements. The Ninth Circuit sees the Fourth Amendment in Rule 41, United States v. Freitas, 800 F.2d 1451, 1453 (9th Cir. 1986). The Fourth Circuit finds no Fourth Amendment offense in search warrants secretly executed and seizures of intangible evidence that remain unannounced until weeks thereafter, United States v. Simons, 206 F.3d 392 (4th Cir. 2000). The Second Circuit, whose views the Congress found persuasive, 147 Cong.Rec. H7197 (daily ed. Oct. 23, 2001), thinks the validity of sneak and peek warrants and of delayed notice are better judged by Rule 41 standards, United States v. Pangburn, 983 F.2d 449 (2d Cir. 1993).

Section 213 rests on the belief that the Fourth Amendment does not condemn either sneak and peek warrants or delayed notice. For searches conducted under a warrant issued pursuant to Rule 41 or under a warrant or court order issued pursuant to any other rule of law, it adopts the delayed notification standards of 18 U.S.C. 2705 (relating to delayed notification of the execution of a court order authorizing government access to electronic communications held in third party storage for longer than 180 days). An issuing court may order notice delayed for a reasonable period of time and with good cause extensions, if it finds reasonable cause to believe that contemporaneous notification may have any of the adverse consequences described in section 2705. Section 2705 mentions "(A) endangering the life or physical safety of an individual; (B) flight from prosecution; (C) destruction of or tampering with evidence; (D) intimidation of potential witnesses; or (E) otherwise seriously jeopardize an investigation or

unduly delay a trial" as the kinds of adverse consequences that justify delay. Unless the court concludes seizure is reasonably necessary, the section only permits delayed notification if the warrant prohibits the seizure of any stored wire or electronic information (unless otherwise authorized), of any tangible property, or of any wire or oral communications. Section 213 is not subject to the sunset provisions of section 224.

Section 214. Pen Register and Trap and Trace Authority Under FISA

Trap and trace devices and pen registers are devices which secretly identify the source and destination of calls made to and from a particular telephone. Intelligence officers may use them pursuant to a court order authorized in the Foreign Intelligence Surveillance Act. Section 214 grants the request of the Department of Justice for elimination of the requirements which limited FISA pen register and trap and trace device orders to facilities used by foreign agents or those engaged in international terrorist or clandestine intelligence activities, 50 U.S.C. 1842(c)(3)(2000 ed.). Applicants must still certify that the devices are likely to reveal information relevant to a foreign intelligence investigation.

Section 214 also adjusts the language of the FISA pen register-trap and trace authority to permit its use to capture source and destination information for electronic communications (e.g., e-mail) as well as telephone communications, 50 U.S.C. 1842(d). Finally, the section makes it clear that requests for a FISA pen register-trap and trace order, like requests for other FISA orders, directed against Americans and permanent resident aliens (U.S. persons) may not be based solely on activities protected by the First Amendment, 50 U.S.C. 1842, 1843. Section 214 is subject to the sunset provisions of section 224.

Section 215. Access to Records and Other Items Under the Foreign Intelligence Surveillance Act

FISA previously allowed senior officials of the Federal Bureau of Investigation to apply for a court order, in connection with a foreign intelligence investigation, for access to the records of common carriers, public accommodation providers, physical storage facility operators, and vehicle rental agencies, 50 U.S.C. 1861-1863 (2000 ed.).

Section 215 rewrites those provisions. Assistant Special Agents in Charge of the FBI field offices may now also apply. The court orders extend to any tangible object held by anyone. Items sought need not relate to an identified foreign agent or foreign power as was once the case, but they may only be sought as part of an investigation to protect the United States from international terrorism or clandestine intelligence activities. Nor may they be sought in conjunction with the investigation of an American or permanent resident alien predicated solely on the basis of activities protected by the First Amendment. There is a good faith defense for anyone who produces items in response to a court order under the

section and production does not constitute a waiver of applicable privilege. Section 215 is subject to the sunset provisions of section 224.

Section 216. Modification of Authorities Relating to Use of Pen Registers and Trap and Trace Devices

With one critical exception, Section 216 tracks language in a similar section of H.R. 2975. The House Committee on Judiciary's description of that section is instructive: "Under 18 U.S.C. 3121(b), law enforcement may obtain authorization from a court, upon certification that the information to be obtained is relevant to a pending criminal investigation, to install and use a 'pen register' device that identifies the telephone numbers dialed or pulsed from (outgoing calls) or a 'trap and trace' device that identifies the telephone numbers to a particular telephone (incoming calls). These court authorizations do not permit capturing or recording of the content of any such communication under the terms of the court order.

"Currently, the government must apply for a new pen/trap order in every jurisdiction where the target telephone is located. This can cause serious delays that could be devastating to an investigation, particularly where additional criminal or terrorist acts are planned.

"Section [216] does not change the requirement under 18 U.S.C. 3121 that law enforcement seek a court order to install and use pen registers/trap and trace devices. It does not change the law requiring that the attorney for the government certify to the court that the information sought is relevant to an ongoing criminal investigation.

"This section does change the current law requiring the government to obtain the order in the jurisdiction where the telephone (or its equivalent) is located. This section authorizes the court with jurisdiction over the offense of the investigation to issue the order, thus streamlining an investigation and eliminating the need to intrude upon the resources of courts and prosecutors with no connection to the investigation.

"Under the bill, 18 U.S.C. 3123(a) would authorize courts to issue a single pen register/trap and trace order that could be executed in multiple jurisdictions anywhere in the United States. The bill divides the existing 18 U.S.C. 3123(a) into two paragraphs. The new subsection (a)(1) applies to Federal investigations and provides that the order may be issued to any provider of communication services within the United States whose assistance is appropriate to the effectuation of the order. Subsection (a)(2) applies to State law enforcement and does not change the current authority granted to State officials.

"This section updates the language of the statute to clarify that the pen/register authority applies to modern communication technologies. Current statutory references to the target <line,' for example, are revised to encompass a <line or other facility.' Such a facility includes: a cellular telephone number; a specific

cellular telephone identified by its electronic serial number (ESN); an Internet user account or e-mail address; or an Internet Protocol (IP) address, port number, or similar computer network address or range of addresses. In addition, because the statute takes into account a wide variety of such facilities, section 3123(b)(1)(C) allows applicants for pen register or trap and trace orders to submit a description of the communications to be traced using any of these or other identifiers.

"Moreover, the section clarifies that orders for the installation of pen register and trap and trace devices may obtain any non-content information – 'dialing, routing, addressing, and signaling information' – utilized in the processing or transmitting of wire and electronic communications.[3322] Just as today, such an order could not be used to intercept the contents of communications protected by the wiretap statute. The amendments reinforce the statutorily prescribed line between a communication's contents and non-content information, a line identical to the constitutional distinction drawn by the U.S. Supreme Court in Smith v. Maryland, 442 U.S. 735, 741 43 (1979).

"Thus, for example, an order under the statute could not authorize the collection of email subject lines, which are clearly content. Further, an order could not be used to collect information other than 'dialing, routing, addressing, and signaling' information, such as the portion of a URL (Uniform Resource Locator) specifying Web search terms or the name of a requested file or article.

"This concept, that the information properly obtained by using a pen register or trap and trace device is non-content information, applies across the board to all communications media, and to actual connections as well as attempted connections (such as busy signals and similar signals in the telephone context and packets that merely request a telnet connection in the Internet context).

"Further, because the pen register or trap and trace 'device' is often incapable of being physically 'attached' to the target facility due to the nature of modern communication technology, section 101 makes two other related changes. First, in recognition of the fact that such functions are commonly performed today by software instead of physical mechanisms, the section allows the pen register or trap and trace device to be 'attached or applied' to the target facility. Likewise, the definitions of 'pen register' and 'trap and trace device' in section 3127 are revised to include an intangible 'process' (such as a software routine) which collects the same information as a physical device.

[3322] "Thus, for example, non-content information contained in the 'options field' of a network packet header constitutes 'signaling' information and is properly obtained by an authorized pen register or trap and trace device."

"Section [216](c) amends the definition section to include a new nexus standard under 3127(2)(A) to provide that the issuing court must have jurisdiction over the crime being investigated rather than the communication line upon which the device is to be installed. This section is also amended to account for the new technologies relating to the different modes of communication.

"Section [216](d) amends section 3124(d) to ensure that communication providers continue to be covered under that section. Technology providers are concerned that the single order provisions of section 101 of the bill eliminates the protection of 3124(d) of title 18 that provides that 'no cause of action shall lie in any court against any provider of a wire or electronic communication service, its officers, employees, agents, or other specified persons for providing information, facilities, or assistance in accordance with the terms of a court order.' Once there is a nation-wide order it will not specify the provider and thus, the providers believe they could become liable upon compliance with the order. The intent of the current statutory language is to protect providers who comply with court orders, which direct them to assist law enforcement in obtaining the non-content information. The bill removes the phrase 'the terms of' so that the phrase reads 'in accordance with a court order.' This will keep the requirement of a court order but protect the providers even when that order does not specify the provider.

"Current practice includes compliance with pen registers and trap and trace orders by the service provider using its systems and technologies to provide the government all non-content information ordered by the order without the installation of an additional device by the government to capture that order. It is intended that these alternative compliance procedures should continue when the provider is willing and technologically able to comply with the order by these means in an efficient, complete and timely manner.

"Additionally, this section clarifies that upon request, those being served with the generic pen/trap order created under this section shall receive written or electronic certification from the serving officer or official stating that the assistance provided is related to the order," H.Rept. 107-236, at 52-4 (2001).

The critical difference in section 216 is its reporting feature. Federal agents executing a pen register or trap and trace order involving an electronic communications service to the public must report the details of the device's installation and use to the issuing court within 30 days of termination of the order. This section is not subject to the sunset provisions of section 224.

Section 217. Interception of Computer Trespasser Communications

"Cyberattacks may be the work of terrorists or criminals. These attacks come in many forms that cost companies and citizens millions of dollars and endanger public safety. For instance, the denial-of-service attacks, where the objective of the attack is to disable the computer system, can shut down businesses or emergency responders or national security centers. This type of attack causes the

target site's servers to run out of memory and become incapable of responding to the queries of legitimate customers or users. The victims of these computer trespasser's should be able to authorize law enforcement to intercept the trespasser's communications. Section [217] amends current law to clarify that law enforcement may intercept such communications when authorized by the victims, under limited circumstances.

"Section [217](1) of the bill adds to the definitions under 18 U.S.C. 2510 the term: (1) <protected computer' and provides that the term has the same meaning set forth in 1030 of title 18; and (2) the term <computer trespasser' means a person who is accessing a protected computer without authorization and thus has no reasonable expectation of privacy in any communication transmitted to, through, or from the protected computer.

"Section [217](2) of the bill amends current law to allow victims of computer intrusions to authorize law enforcement to intercept the communications of a computer trespasser [that have been transmitted to, from or through the protected computer], under limited circumstances. The circumstances are: (1) the owner or operator of the protected computer must authorize the interception of the trespasser's communications; (2) the person who intercepts the communication must be lawfully engaged in an investigation; (3) the person acting under color of law has reasonable grounds to believe that the contents of the computer trespasser's communication to be intercepted will be relevant to the investigation; and (4) the investigator may only intercept communications of the computer trespasser," H.Rept. 107-236, at 55-6 (2001). This section is subject to the sunset provisions of section 224.

Section 218. Foreign Intelligence Information

The USA PATRIOT Act contemplates a closer working relationship between criminal and intelligence investigators than has previously been the case. As originally enacted the application for a FISA surveillance order required certification of the fact that "the purpose for the surveillance is to obtain foreign intelligence information," 50 U.S.C. 1804(a)(7)(B)(2000 ed.)(emphasis added). From the beginning, defendants have questioned whether authorities had used a FISA surveillance order against them in order to avoid the predicate crime threshold for a Title III order. Out of these challenges arose the notion that perhaps "the purpose" might not always mean the sole purpose.[3323]

[3323] In United States v. Truong Dinh Hung, 629 F.2d 908, 915 (4th Cir. 1980), decided after FISA became effective but on the basis of pre-existing law, the court declared, "as the district court ruled, the executive should be excused from securing a warrant only when the surveillance is conducted <primarily' for foreign intelligence reasons. We think that the district court adopted the proper test, because once surveillance becomes primarily a criminal investigation, the courts are entirely competent to make the usual probable cause determination, and because, importantly, individual privacy interests come to the fore and government foreign policy concerns

The Justice Department sought FISA surveillance and physical search authority on the basis of "a" foreign intelligence purpose. Section 218 instead demands certification that foreign intelligence gathering is a "significant purpose" for the FISA surveillance or physical search order application, 50 U.S.C. 1804(a)(7)(B), 1823(a)(7)(B). This a more exacting standard than the "a purpose" threshold proposed by the Justice Department, but a clear departure from the original "the purpose" entry point. FISA once described a singular foreign intelligence focus prerequisite for any FISA surveillance application, a focus that implicitly discouraged law enforcement participation. Section 218 encourages coordination between intelligence and law enforcement officials. Section 504, discussed below, confirms that such coordination is no impediment to a "significant purpose" certification, 50 U.S.C. 1806(k), 1825(k). Section 218 is subject to the sunset provisions of section 224.

Section 219. Single-Jurisdiction Search Warrants for Terrorism

"Rule 41(a) of the Federal Rules of Criminal Procedure currently requires that a search warrant be obtained within the judicial district where the property to be searched is located. The only exception is where property or a person now in the district might leave before the warrant is executed. This restriction often causes unnecessary delays and burdens on law enforcement officers investigating

---

recede when the government is primarily attempted to form the basis for a criminal prosecution." Subsequent case law, however, is not as clear as it might be: e.g., United States v. Duggan, 743 F.2d 59, 77 (2d Cir. 1984)("FISA permits federal officials to obtain orders authorizing electronic surveillance for the purpose of obtaining foreign intelligence information. The requirement that foreign intelligence information be the primary objective of the surveillance is plain not only from the language of Sec. 1802(b) but also from the requirements in Sec. 1804 as to what the application must contain. The application must contain a certification by a designated official of the executive branch that the purpose of the surveillance is to acquire foreign intelligence information, and the certification must set forth the basis for the certifying officials's belief that the information sought is the type of foreign intelligence information described"); United States v. Pelton, 835 F.2d 1067, 1075-76 (4th Cir. 1987)("We also reject Pelton's claim that the 1985 FISA surveillance was conducted primarily for the purpose of his criminal prosecution, and not primarily for the purpose of obtaining foreign intelligence information. . . . We agree with the district court that the primary purpose of the surveillance, both initially and throughout was to gather foreign intelligence information. It is clear that otherwise valid FISA surveillance is not tainted simply because the government can anticipate that the fruits of the surveillance may later be used . . . as evidence in a criminal trial"); United States v. Sarkissian, 841 F.2d 959, 907-8 (9th Cir. 1988)("Defendants rely on the primary purpose test articulated in United States v. Truong Dinh Hung. . . . One other court has applied the primary purpose test. Another court has rejected it . . . distinguishing Truong. A third court has declined to decide the issue. We also decline to decide the issue"); United States v. Johnson, 952 F.2d 565, 572 (1st Cir. 1991)("Appellants attack the government's surveillance on the ground that it was undertaken not for foreign intelligence purposes, but to gather evidence for a criminal prosecution. FISA applications must contain, among other things, a certification that the purpose of the requested surveillance is the gathering of foreign intelligence information. . . .Although the evidence obtained under FISA subsequently may be used in criminal prosecutions, the investigation of criminal activity cannot be the primary purpose of the surveillance").

terrorist activities that have occurred across multiple judicial districts. These delays can have serious adverse consequences on an ongoing terrorism investigation," H.Rept. 107-236, at 72 (2001).

Section 219 allows a magistrate in the district in which a domestic or international terrorism investigation is being conducted to issue a warrant to be executed either "within or outside the district," F.R. Crim. P. 41(a)(3). Although most useful in criminal investigations spanning a number of states within the United States, nothing in the section expressly precludes its application overseas when the law of the place permits such execution.

The Fourth Amendment does not apply to the overseas searches of the property of foreign nationals, United States v. Verdugo-Urquidez, 494 U.S. 259 (1990), but it does reach the search of American property overseas by American authorities, United States v. Barona, 56 F.3d 1087, 1092 (9th Cir. 1995). Yet neither Rule 41 nor any other provision of prior federal law apparently contemplated extraterritorial execution of federal search warrants, cf., F.R.Crim.P.41, Advisory Committee Notes: 1990 Amendment (discussing a proposal for exterritorial execution that the Supreme Court rejected).[3324] Section 219 is not subject to the sunset provisions of section 224.

Section 220. Nationwide Service of Search Warrants for Electronic Evidence

"Title 18 U.S.C. 2703(a) requires a search warrant to compel service providers to disclose unopened e-mails. This section does not affect the requirement for a search warrant, but rather attempts to address the investigative delays caused by the cross-jurisdictional nature of the Internet. Currently, Federal Rules of Criminal Procedure 41 requires that the 'warrant' be obtained 'within the district' where the property is located. An investigator, for example, located in Boston who is investigating a suspected terrorist in that city, might have to seek a suspect's electronic e-mail from an Internet service provider (ISP) account located in California. The investigator would then need to coordinate with agents, prosecutors and judges in the district in California where the ISP is located to obtain a warrant to search. These time delays could be devastating to an investigation, especially where additional criminal or terrorist acts are planned.

[3324] The Code does still carry remnants of the consular courts which speak of the overseas execution of arrest warrants in places where the United States has "extraterritorial jurisdiction," 18 U.S.C. 3042. The history of the provision makes it clear that the phrase "extraterritorial jurisdiction" was intended to coincide with those places in which we had consular courts, see, S.ReptNo. 73-217, at. 3 (1934), reprinted, 78 Cong.Rec. 4982-983 (1934)("The countries to which the proposed bill, if enacted into law, would relate are the following, in which the United States exercises extraterritorial jurisdiction: China, Egypt, Ethiopia, Muscat, and Morocco"); 22 U.S.C. 141 (1926 ed.)(conferring judicial powers on consular courts there identified as those located in China, Egypt, Ethiopia, Muscat, Morocco, Siam and Turkey).

"Section [220] amends 2703 to authorize the court with jurisdiction over the investigation to issue the warrant directly, without requiring the intervention of its counterpart in the district where the ISP is located," H.Rept. 107-236, at 57 (2001). Section 220 is subject to the sunset provisions of section 224.

Section 221. Trade Sanctions

The Trade Sanctions Reform and Export Enhancement Act of 2000, Title IX of Public Law 106-387, 114 Stat. 1549A-67, restricts the President's authority to impose unilateral agricultural and medical sanctions, subject to certain exceptions. One of the exceptions permits an export ban on products that might be "used to facilitate the development or production of a chemical or biological weapon or weapon of mass destruction,"§904(2)(C). Section 221 amends paragraph 904(2)(C) to enlarge the ban to reach products that might facilitate the design, development or production of such weapons. The section amends subsection 906(a) of the trade sanctions act to allow for the sale of agricultural and medical products to entities in Syria and North Korea and to permit such sales under license to areas of Afghanistan controlled by the Taliban.

The section further declares that the trade sanctions act should not be construed to curtail criminal or civil penalties available with respect to the export of agricultural products, medicine, or medical devices in violation of restrictions on dealings with:

- a foreign individual or entity designated pursuant to Executive Order 12947, 50 U.S.C. 1701 note (Prohibiting Transactions With Terrorists);
- a foreign terrorist organization, 18 U.S.C. 2339B;
- a foreign individual or entity designated pursuant to Executive Order 13224, 66 Fed.Reg. 49077 (Sept. 25, 2001)(Blocking Property . . . [of] Persons Who . . . Support Terrorism);
- a narcotics trafficker designated pursuant to Executive Order 12979, 50 U.S.C. 1701 note (Blocking Assets . . . With Significant Narcotics Traffickers) or to the Foreign Narcotics Kingpin Designation Act, Public Law 106-120; or
- any foreign individual or entity subject to restriction for involvement in weapons of mass destruction or missile proliferation.

This section is not subject to the sunset provisions of section 224.

Section 222. Assistance to Law Enforcement Agencies

FISA, Title III, and the related provisions of law now compel communications service providers to assist in the execution of court orders issued under those authorities, e.g., 50 U.S.C. 1805(c)(2)(B), 18 U.S.C. 2518(4). The House Committee on the Judiciary observed with regard to an earlier version of this section that, "this Act is not intended to affect obligations under the Communications Assistance for Law Enforcement Act, 47 U.S.C. 1001 et seq., nor

does the Act impose any additional technical obligation or requirement on a provider of wire or electronic communication service or other person to furnish facilities or technical assistance," H.Rept. 107-236, at 62-3 (2001). In its final form, the section guarantees reasonable reimbursement for the costs of service providers, landlords, custodians and others who supply facilities and technical assistance pursuant to section 216 (relating to law enforcement pen registers and trap and trace orders). This section is not subject to the sunset provisions of section 224.

Section 223. Civil Liability of Certain Unauthorized Disclosures

Section 223 establishes a claim against the United States for not less than $10,000 and costs for violations of Title III, chapter 121, or the Foreign Intelligence Surveillance Act (FISA), and emphasizes the prospect of administrative discipline for offending federal officials. This section is subject to the sunset provisions of section 224.

Section 224. Sunset

Several of the amendments which grant federal law enforcement or intelligence officers expanded interception powers expire with respect to any foreign intelligence investigation initiated after January 1, 2006 and to any criminal investigation of misconduct occurring only after that date. The provisions which expire are:

- section 201 (authority to intercept wire, oral, and electronic communications relating to terrorism);
- section 202 (authority to intercept wire, oral, and electronic communications relating to computer fraud and abuse offenses);
- subsection 203(b) (authority to share electronic, wire, and oral interception information);
- subsection 203(d) (general authority to share foreign intelligence information);
- section 204 (clarification of intelligence exceptions from limitations on interception and disclosure of wire, oral, and electronic communications);
- section 206 (roving surveillance authority under the Foreign Intelligence Surveillance Act of 1978);
- section 207 (duration of FISA surveillance of non-United States persons who are agents of a foreign power),
- section 209 (seizure of voice-mail messages pursuant to warrants);
- section 212 (emergency disclosure of electronic surveillance);
- section 214 (pen register and trap and trace authority under FISA);
- section 215 (access to records and other items under the Foreign Intelligence Surveillance Act);
- section 217 (interception of computer trespasser communications);
- section 218 (foreign intelligence information);

- section 220 (nationwide service of search warrants for electronic evidence);
- section 223 (civil liability for certain unauthorized disclosures); and
- section 225 (immunity for compliance with FISA wiretap).

The permanent sections and subsections of title II, which do not expire, are:

- subsection 203(a) (sharing grand jury information);
- subsection 203(c) (Attorney General guidelines for sharing grand jury
- information);
- section 205 (employment of FBI translators);
- section 208 (number and residence of FISA court judges);
- section 210 (nationwide subpoenas for electronic communications records),
- section 211 (clarification of scope of cable provider obligations);
- section 213 (delayed notification of sneak and peek warrant execution);
- section 216 (modification of authorities relating to pen registers and trap and trace devices);
- section 219 (single-jurisdiction search warrants for terrorism);
- section 221 (trade sanctions); and
- section 222 (assistance to law enforcement agencies).

Section 225. Immunity for Compliance With FISA Wiretap

The Foreign Intelligence Surveillance Act orders may include instructions requiring communications service providers and others to assist officers in the execution of the order, 50 U.S.C. 1805(c)(2)(B), 1824(c)(2)(B), 1842(c)(2)(B). Section 225 immunizes those who do from civil liability, 50 U.S.C. 1805(h). This section is subject to the sunset provisions of section 224.

Title III – International Money Laundering Abatement and Anti-Terrorist Financing Act of 2001[3325]

Section 301. Short Title

The popular name for Title III of the USA PATRIOT Act is the International Money Laundering Abatement and Financial Anti-Terrorism Act of 2001.

Section 302. Findings and Purposes

Section 302 describes the findings and purposes for the enactment of the International Money Laundering Abatement and Financial Anti-Terrorism Act.

[3325] M. Maureen Murphy, a legislative attorney in the American Law Division prepared the section by section analysis of Title III.

Section 303. 4-Year Congressional Review; Expedited Consideration

The International Money Laundering Abatement and Financial Anti-Terrorism Act of this title will sunset after four years upon passage of joint resolution of repealed. Any joint resolution of repeal is to be afforded "fact track" consideration.

Subtitle A–International Counter Money Laundering and Related Measures

Section 311. Special Measures for Jurisdictions, Financial Institutions, or International Transactions of Primary Money Laundering Concern

Section 311 authorizes the Secretary of the Treasury (the Secretary) to impose certain regulatory restrictions, known as "special measures," upon finding that a jurisdiction outside the U.S., a financial institution outside the U.S., a class of transactions involving a jurisdiction outside the U.S., or a type of account, is "of primary money laundering concern." To make this finding, the Secretary must consult with the Secretary of State and the Attorney General and consider certain factors relating to the foreign jurisdiction or the particular institution targeted. Among the factors relating to a jurisdiction are: involvement with organized crime or terrorists, bank secrecy laws and regulations, the existence a mutual legal assistance treaty with the U.S., and level of official corruption. The special measures generally involve detailed record keeping and reporting requirements relating to underlying transactions and beneficial ownership of accounts. Special measures could involve prohibiting the maintenance of payable-through or correspondent accounts for such institutions or jurisdictions, provided that there has been consultation with the Secretary of State, the Attorney General, and the Chairman of the Federal Reserve Board, as well as with other appropriate federal banking agencies and consideration has been given to whether other nations have taken similar action, whether there would be a significant competitive disadvantage on U.S. financial institutions, and effect upon the international payment system. "Account" is defined for banks, with authority delegated to the Secretary to define the term for other financial services businesses upon consultation with the appropriate federal regulators. The Secretary is required to issue a regulation defining "beneficial ownership" for purposes of this legislation.

Section 312. Special Due Diligence for Correspondent Accounts and Private Banking Accounts

Section 312 requires every financial institution with a private banking or correspondent account for a foreign person or bank to establish policies and controls designed to detect and report money laundering through the accounts. If a correspondent account is maintained for a foreign bank that operates under an offshore license–i.e., does not and may not do banking business in the chartering country–or that is licensed by a jurisdiction designated for special measures or listed as non-cooperative by an international organization in which the U.S. participates and concurs, enhanced due diligence policies are required.

For correspondent accounts for foreign banks, U.S. banks, at the minimum, must secure ownership information on the foreign bank, maintain enhanced scrutiny of the account, and ascertain due diligence information on the foreign banks for which the target bank provides correspondent banking services. For foreign private banking clients, i.e., those with aggregated deposits of $1,000,000, information must be secured on the identity of the owners of the accounts, including beneficial owners, and the source of the funds; enhanced scrutiny is required for accounts held for senior foreign political figures. This section becomes effective 9 months after enactment; regulations must be issued within 6 months of enactment.

Section 313. Prohibition on United States Correspondent Accounts with Foreign Shell Banks

Section 313 prohibits U.S. banks, thrifts, private banks, foreign bank agencies and branches operating in the U.S., and brokers and dealers licensed under the Securities Exchanges Act of 1934, 15 U.S.C. 78a et seq., from maintaining correspondent accounts for foreign shell banks–banks that have no physical presence in any country. It requires that the covered institutions take reasonable steps to preclude their providing services to such shell banks through other banks and requires the Secretary to issue implementing regulations.

Section 314. Cooperative Efforts to Deter Money Laundering

Section 314 requires the Secretary to issue regulations within 120 days of enactment to encourage further cooperation among financial institutions and regulatory and law enforcement authorities to promote sharing information on individuals, entities, and organizations engaged inor suspected of engaging interrorist acts or money laundering. In these regulations, the Secretary may require each financial institution to designate persons to receive information and to monitor accounts and to establish procedures to protect the shared information. No information received by a financial institution under this provision may be used for any purpose other than identifying and reporting activities involving terrorism or money laundering. If a financial institution uses this information for those purposes, it may not be held liable for unauthorized disclosure or failure to provide a notice under any law or regulation, state or federal, or any contract or agreement. The Secretary is required to provide a semiannual report analyzing suspicious activity reports.

Section 315. Inclusion of Foreign Corruption Offenses As Money Laundering Crimes

Section 315 adds to the list of offenses under foreign law, the proceeds of which may form an element of a federal money laundering prosecution: any crime of violence; bribery of a public official; theft, embezzlement, or misappropriation of public funds; certain smuggling or export control violations; and, offenses for which the U.S. would be obliged to extradite alleged offenders. Also added would

be certain offenses under the U.S. criminal code relating to customs, importation of firearms, firearms trafficking, computer fraud and abuse, and felony violations of the Foreign Agents Registration Act.

Section 316. Anti-Terrorist Forfeiture Protection

Prior to enactment of the USA PATRIOT Act, the President had authority to order the vesting of seized foreign assets under the Trading With the Enemy Act §5(b), 50 U.S.C. App. 5(b), which applies when there has been a declaration of war, but not under the International Emergency Economic Powers Act (IEEPA), 50 U.S.C. 1702), which applies when the President has declared the existence of an unusual or extraordinary threat to the U.S. national security, foreign policy, or economy having its source, in whole or substantial part, outside the United States. Section 106 of the new law amends IEEPA to authorize the President, "when the United States is engaged in armed hostilities or has been attacked by a foreign country or foreign nationals," to "confiscate any property, subject to the jurisdiction of the United States, of any foreign person, foreign organization, or foreign country that he determines has planned, authorized, aided, or engaged in such hostilities or attacks against the United States."

Section 316 authorizes judicial review of confiscation of terrorist related assets and sets forth two defenses for those claiming the property that must be proven by a preponderance of the evidence: (1) that the property is not subject to forfeiture under the applicable law, and (2) the innocent owner defense detailed in the criminal forfeiture provision of 18 U.S.C. 983(d). It also authorizes the government to offer otherwise inadmissible evidence provided the court finds that complying with the Federal Rules of Evidence would jeopardize national security. There is also a clause alluding to the right to raise Constitutional claims and claims under the Administrative Procedure Act and a savings clause preserving other remedies.

Section 317. Long-Arm Jurisdiction Over Foreign Money Launderers

Section 317 provides jurisdiction over foreign persons, including financial institutions, for substantive money laundering offenses under 18 U.S.C. 1956 and 1957, provided there is a valid service of process and either the offense involved a transaction in the U.S. or the property has been the subject of a forfeiture judgment or a criminal sentence. The district courts are authorized to appoint a receiver to take control of the property.

Section 318. Laundering Money Through a Foreign Bank

Section 318 amends the substantive money laundering criminal statute, 18 U.S.C. 1956, to cover laundering money through a foreign bank.

Section 319. Forfeiture of Funds in United States Interbank Accounts

Section 319 amends 18 U.S.C. 981 to permit forfeiture, including forfeiture under the Controlled Substances laws, of accounts in offshore offices of foreign banks by substituting funds in interbank accounts in U.S. financial institutions up to the value of the funds in the targeted account. The section authorizes the Attorney General to suspend or terminate such a forfeiture action on conflict-of-law grounds or upon a finding that to do so would be in the interest of justice and would not harm the national interests of the U.S.

Section 319, effective within 60 days of enactment, amends the Currency and Transaction Reporting Act, 31 U.S.C. 5311, et seq., to require U.S. banks, thrifts, private banks, foreign bank agencies and branches operating in the U.S., and brokers and dealers licensed under the Securities Exchanges Act of 1934, 15 U.S.C. 78a et seq., to provide federal regulators, upon request, information on the institution's compliance with anti-money laundering requirements or on a customer's account, within 120 hours. It also authorizes the Secretary of the Treasury or the Attorney General to subpoena records from a foreign bank that has a correspondent account in the U.S. that relate to that account, including records maintained abroad. It requires U.S. institutions maintaining correspondent accounts for foreign banks to maintain records identifying the owners of such foreign banks and indicating the name and address of a U.S. resident authorized to accept service of legal process for records relating to the correspondent account. U.S. institutions having such correspondent accounts are required to provide federal law enforcement officers with these names and addresses within 7 days of receiving a request and are required to terminate correspondent accounts within 10 business days of receiving a notice from the Secretary or the Attorney General that the foreign bank has failed to comply with a subpoena or to contest its issuance. U.S. financial institutions are not to be held liable for terminating such accounts and are subject to civil penalties of $10,000 per day for failing to do so.

This section also amends the criminal forfeiture provisions of the Controlled Substances Act, 21 U.S.C. 853(p) and 853(e) to permit a court to order return to the jurisdiction of substitute assets, property that may be substituted for unreachable property subject to forfeiture, and to issue a pre-trial order to a defendant to repatriate such substitute assets.

Section 320. Proceeds of Foreign Crimes

Section 320 authorizes the forfeiture of property derived from or traceable to violations of felonious foreign controlled substances laws, provided the offense is punishable by death or a term of imprisonment of more than one year under the law of the foreign nation and under U.S. law, had it occurred within the jurisdiction of the U.S.

Section 321. Financial Institutions Specified in Subchapter II of Chapter 53 of Title 31, United States Code

Section 321 adds credit unions and CFTC-regulated or registered futures commission merchants, commodity trading advisors, and commodity pool operators to the specific list of financial institutions subject to the requirements of the Currency and Foreign Transaction Reporting Act. Pre-existing law did not specifically include these entities although it delegated broad authority to the Secretary to apply the requirements to "any other business ... whose cash transactions have a high degree of usefulness in criminal, tax, or regulatory matters."

Section 322. Corporation Represented by a Fugitive

Section 322 amends 28 U.S.C. 2466 to include corporations having a majority stockholder who is a fugitive, thus, disallowing such corporations to file innocent owner to successfully pursue innocent owner claims in a civil or criminal forfeiture cases.

Section 323. Enforcement of Foreign Judgments

Section 323 amends 28 U.S.C. 2467 to extend authority for judicial enforcement of foreign confiscation from the previous provisions limiting such enforcement to confiscations related to drug trafficking offenses. Under the newly enacted provision U.S. district courts may enforce foreign confiscations related to any offense under foreign law that, if committed under U.S. law, would have permitted forfeiture.

Section 324. Report and Recommendation

Section 324 requires the Secretary of the Treasury, within 30 months of enactment, to report on operations respecting the provisions relating to international counter-money laundering measures and any recommendations to Congress as to advisable legislative action.

Section 325. Concentration Accounts at Financial Institutions

Section 325 authorizes the Secretary of the Treasury to prescribe regulations governing maintenance of concentration accounts by financial institutions. If issued, such regulations must prohibit financial institutions from allowing clients to direct transactions through those accounts, prohibit financial institutions from informing customers of the means of identifying such accounts, and require each financial institution to establish written procedures to document all transactions involving a concentration account that amounts belonging to each customer may be identified.

Section 326. Verification of Identification

Section 326 requires the Secretary of the Treasury, jointly with appropriate regulators of financial institutions, within a year of enactment, to prescribe

minimum standards for identifying customers opening accounts at financial institutions. These are to include procedures to verify customer identity and maintain records of information used to verify identity. They are also to require that government lists of terrorists and terrorist organizations be consulted. Under this section, the Secretary is required to submit a report to Congress within six months of enactment, recommending a means of insuring similarly accurate identification of foreign nationals, requiring an identification number similar to a Social Security number or a tax identification number for foreign nationals opening accounts at financial institutions, and setting up a system for financial institutions to review information held by government agencies to verify identities of foreign nationals opening accounts.

Section 327. Consideration of Anti-Money Laundering Record

Section 327 amends the Bank Holding Company Act and The Federal Deposit Insurance Act, to require that, before approving certain acquisition or merger applications under the Bank Holding Company Act or the Federal Deposit Insurance Act, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation must consider the institution's effectiveness in combating money laundering.

Section 328. International Cooperation on Identification of Originators of Wire Transfers

Section 328 requires the Secretary of the Treasury to encourage foreign governments to require the name of the originator in wire transfer instructions and include it from origination to disbursement. The Secretary is to report annually on progress toward this end to House Financial Services Committee and Senate Banking, Housing, and Urban Affairs Committee.

Section 329. Criminal Penalties

Section 329 criminalizes the soliciting of a bribe by anyone acting on behalf of an entity of the Federal Government in connection with the administration of the International Money Laundering Abatement and Anti-Terrorist Financing Act of 2001, subject to a fine of up to three time the value of the thing of value constituting the bribe, 15 years imprisonment, or both.

Section 330. International Cooperation in Investigations of Money Laundering, Financial Crimes, and the Finances of Terrorist Groups

Section 330 states the sense of Congress that international negotiations should be pursued for further cooperative efforts to insure that foreign financial institutions maintain adequate records relating to foreign terrorist organizations and money launderers and make such records available to U.S. law enforcement officials and domestic financial institution supervisors.

Subtitle B–Bank Secrecy Act Amendments and Related Improvements

Section 351. Amendments Relating to Reporting of Suspicious Activities

Section 351 amends the Currency and Foreign Transactions Reporting Act, 31 U.S.C. 5318(g)(3), to extend the safe harbor provisions for financial institutions and their employees who provide information as to possible law violations to cover all voluntary disclosures of possible law violations made to any federal government agency. Also covered are employees or agents of institutions who require others to make such disclosures. The immunity provided under the legislation covers potential liability under contracts and other legally enforceable agreements. Previously, immunity was provided only for disclosures of violation of law or regulation pursuant to law or regulation; there was no specific immunity for those requiring others to make disclosures; and, immunity extended only to liability under laws or regulations of the United States or constitution, law, or regulation of a state or political subdivision thereof. The section makes it clear that the liability does not extend to prosecutions brought by governmental entities. Disclosure to the subject of the tip-off is prohibited. Information disclosed about potential law violations may be used in employment references to other financial institutions as well as, under the rules of the securities exchanges, in termination notices.

Section 352. Anti-Money Laundering Programs

Section 352, effective 180 days after enactment, requires each financial institution to develop an anti-money laundering program to include development of internal policies, designation of a compliance officer, ongoing employee training, and an independent audit function to test the programs. It authorizes the Secretary of the Treasury to prescribe minimum standards for such programs and to exempt those financial institutions that are not covered by the regulations promulgated under the Currency and Foreign Transactions Reporting Act. It requires the Secretary to prescribe regulations that consider the extent to which the requirements imposed under this section comport with the size, location, and activities of the financial institutions to which they apply.

Section 353. Penalties for Violations of Geographic Targeting Orders and Certain Recordkeeping Requirements, and Lengthening Effective Period of Geographic Targeting Orders

Section 353 extends the civil and criminal penalties under the Currency and Foreign Transactions Reporting Act, 31 U.S.C. 5321(a) and 5322, to include violations of geographic targeting orders issued under that Act and willful violations of regulations prescribed under the record keeping requirements of the Bank Secrecy Act, found in Section 21 of the FDIA, 12 U.S.C. 1829(b), or violations of regulations covering uninsured financial institutions issued by Treasury under the authority of 12 U.S.C. 1951 -1959. Before enactment of USA-PATRIOT, 12 U.S.C. 1829(b) carried no criminal penalties and set civil penalties

for violations of regulations issued under 12 U.S.C. 1829(b) at up to $10,000. Section 1955 of Title 12, U.S.C. carried civil penalties of up to $10,000; and, 12 U.S.C. 1956 carried a criminal penalty of up to $1,000 and imprisonment for one year. 31 U.S.C. 5321(a) permits civil penalties of $25,000 or the amount of the instrument (not to exceed $100,000); 31 U.S.C. 5322 permits criminal penalties of up to $250,000 in fines and imprisonment of up to 5 years for a single offense and enhancement for offenses committed in conjunction with other offenses or as a pattern of criminal activity.

The section also extends the prohibitions on structuring transactions to avoid reporting requirements, 31 U.S.C. 5324, to cover structuring to avoid geographic targeting orders and record keeping requirements of the Bank Secrecy Act, found in Section 21 of the FDIA, 12 U.S.C. 1829(b) and 12 U.S.C. 1951-1959. It extends the permissible length of geographic targeting orders from 60 to 180 days.

Section 354. Anti-Money Laundering Strategy

Section 354 includes among the areas suggested for inclusion in the annual anti-money laundering strategy data regarding the funding of international terrorism acts.

Section 355. Authorization to Include Suspicions of Illegal Activity in Written Employment References

Section 355 authorizes depository institutions, "[n]otwithstanding any other provision of law," to disclose the possible involvement of institution-affiliated parties in potentially unlawful activity. Such disclosures may be made to other insured depository institutions requesting employment references, provided the disclosure is not made with malicious intent.

Section 356. Reporting of Suspicious Activities Reports by Securities Brokers and Dealers; Investment Company Study

Section 356 requires the Secretary of the Treasury, by January 1, 2002, to publish proposed regulations requiring registered brokers and dealers to file suspicious activity reports under 31 U.S.C. 5318(g). It also authorizes the Secretary to prescribe such regulations for futures commission merchants, commodity trading advisors, and commodity pool operators registered under the Commodity Exchange Act. It also requires a report, within one year of enactment, recommending effective regulations under the Currency and Foreign Transactions Reporting Act for investment companies, as defined in the Investment Company Act of 1940, and to evaluate the possibility of requiring trusts and personal holding companies to disclose their beneficial owners when opening accounts at depository institutions.

Section 357. Special Report on Administration of Bank Secrecy Provisions

Section 357 requires the Secretary of the Treasury to submit a report, within six months of enactment, on the role of the Internal Revenue Service in administering the Bank Secrecy Act's Currency and Foreign Transactions Reporting Act. The report is specifically to address such issues as whether processing of information is to be shifted from the Internal Revenue Service and whether the Internal Revenue Service is to retain authority for auditing money services and gaming businesses' compliance.

Section 358. Bank Secrecy Provisions and Activities of United States Intelligence Agencies to Fight International Terrorism

Section 358 authorizes the Secretary of the Treasury to refer suspicious activity reports to U.S. intelligence agencies for use in the conduct of intelligence or counterintelligence activities to protect against international terrorism. It authorizes the release of information under the Currency and Foreign Transactions Reporting Act and other provisions of the Bank Secrecy Act, the Right to Financial Privacy Act, and the Fair Credit Reporting Act, to U.S. intelligence agencies by amending 31 U.S.C. 5311, 5318(g)(4)(b), 5319; 12 U.S.C. 1829(b), 1953; 12 U.S.C. 3412(a); 15 U.S.C. 1681x.

Section 359. Reporting of Suspicious Activities by Underground Banking Systems

Section 359 specifically includes "a licensed sender of money or any other person who engages as a business in the transmission of funds, including any person who engages as a business in an informal money transfer system or any network of people who engage as a business in facilitating the transfer of money domestically or internationally outside of the conventional financial institutions system" as a "financial institution" subject to the requirements of the Currency and Foreign Transactions Reporting Act. It subjects them to any regulations promulgated under the authority of section 21 of the Federal Deposit Insurance Act, 12 U.S.C. 1829b. That section of the law provides authority for the regulations issued under 31 C.F.R. Part 103, requiring reports of currency and foreign transactions, including those requiring suspicious activity reports from money services businesses, 31 C.F.R. § 103.20. Section 359 also mandates a report by the Secretary, within a year of enactment, on whether further legislation is needed with respect to these underground banking systems, including whether the threshold for reporting suspicious activities ($2,000) should be lowered for them.

Section 360. Use of Authority of United States Executive Directors

Section 360 authorizes the President to direct the U. S. Executive Directors of international financial institutions to use their voice and vote to support countries or entities that have contributed to the U.S. anti-terrorism efforts and ensure that no funds of their institutions are paid to persons who threaten to commit or support terrorism. International financial institutions, as defined in 22 U.S.C. 262r(c)(2), include the International Monetary Fund, the International

Bank for Reconstruction, the European Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Multilateral Investment Guarantee Agency, the African Development Bank, the African Development Fund, the Asian Development Bank, the Bank for Economic Development and Cooperation in the Middle East and North Africa, and the InterAmerican Investment Corporation.

Section 361. Financial Crimes Enforcement Network (FinCEN)

Section 361, by enacting 31 U.S.C. 310, transforms FinCEN from a Treasury Department bureau established administratively to a statutory bureau in the Treasury Department. It specifies that it is to be headed by a Director to be appointed by the Secretary. It details its duties and powers, not all of which are summarized here. Subject to applicable legal requirements and guidance by Treasury, FinCEN is to maintain a government-wide data access service to information collected under the anti-money laundering reporting laws, information on currency flows, and other records maintained by other government offices as well as privately and publically available information. It is to analyze and disseminate data : (1) to federal, state, local, and foreign law enforcement officials to identify possible criminal activity; and (2) to regulatory officials to identify possible violations of the anti-money laundering reporting requirements. It is to determine emerging trends and methods in money laundering, and support intelligence activities against international terrorism.

FinCEN is to establish and maintain a financial crimes communications center to furnish law enforcement authorities with intelligence information relating to investigations and undercover operations. It is to furnish informational services to financial institutions, federal regulatory agencies, and law enforcement authorities, in the interest of countering terrorism, organized crime, money laundering, and other financial crimes. It is to assist law enforcement and regulatory authorities in combating the use of informal nonbank networks permitting transfer of funds or the equivalent of funds without records and in insuring compliance with criminal and tax laws. It is to provide computer and data support and data analysis to the Secretary of the Treasury for tracking and controlling foreign assets. It is to administer the anti-money laundering reporting requirements as delegated by the Secretary of the Treasury.

Section 361 further specifies that the Secretary is to proscribe procedures with respect to the government-wide data access service and the financial crimes communications center maintained by FinCEN to provide efficient entry, retrieval, and dissemination of information. This is to include a method for submitting reports by Internet, cataloguing of information, and prompt initial review of suspicious activity reports. Section 361 requires the Secretary to develop, in accordance with the Privacy Act, 5 U.S.C. 552a, and the Right to Financial Privacy Act, 12 U.S.C. 3401, et seq., procedures for determining access, limits on use, and "how information about activities or relationships which

involve or are closely associated with the exercise of constitutional rights are screened out."

Appropriations of such sums as are necessary are authorized for fiscal years through 2005.

The Secretary is to study methods for improving compliance with the reporting requirements under 31 U.S.C. 5314, relating to foreign currency transactions, and to submit an annual report to Congress on the subject, beginning six months after enactment.

Section 362. Establishment of Highly Secure Network

Section 362 requires the Secretary to establish as operational within nine months, a highly secure network in FinCEN to allow financial institutions to file electronically reports required under the Bank Secrecy Act and to provide financial institutions with alerts and other information regarding suspicious activities warranting immediate and enhanced scrutiny.

Section 363. Increase in Civil and Criminal Penalties for Money Laundering

Section 363 amends 31 U.S.C. 5321(a) and 5322 to permit the Secretary to impose a civil money penalty and a court to impose a criminal penalty equal to 2 times the amount of the transaction, but not more than $1,000,000 for violations of the suspicious activity reporting requirements, under 31 U.S.C. 5318(i) and (j) or any special measures imposed under 31 U.S.C. 5318A. Under pre-existing law, the Secretary had authority to impose a civil money penalty of the amount of the transaction, up to $100,000, or $25,000; and, a criminal fine for a violation of the suspicious activity reporting requirement was set at not more than $250,000.

Section 364. Uniform Protection Authority for Federal Reserve Facilities

Section 364 authorizes the Federal Reserve Board to issue regulations, subject to the approval of the Attorney General, to authorize personnel to act as law enforcement officers to protect the Board's personnel, property, and operations, including the Federal Reserve banks, and for such personnel to carry firearms and make arrests. Pre-existing law provided no such authority.

Section 365. Reports Relating to Coins and Currency Received in Non-Financial Trade of Business

Section 365 adds a new section to the anti-money laundering reporting requirements, 31 U.S.C. 5331. It requires anyone engaging in a trade or business, who receives $10,000 in coins or currency (including foreign currency and financial instruments) in a single transaction or in two related transactions to file a report on the transaction to FinCEN as prescribed by the Secretary in regulations. The form for such reports must include the name and address of the

person from whom the coins or currency are received, the date and nature of the transaction, and such other information as the Secretary may prescribe. Exemptions are made for reports filed by financial institutions under 31 U.S.C. 5313 and its implementing regulations, and for transactions occurring outside the United States–unless the Secretary so prescribes. The section also includes a provision that prohibits structuring transactions to cause such businesses to evade these reporting requirements or requirements under implementing regulations.[3326] "Nonfinancial trade or business" is defined to mean any trade or business other than a financial institution subject to reporting requirements under 31 U.S.C. 5313 and regulations thereunder.

Under pre-existing law, the Secretary had broad authority to apply the reporting requirements of 31 U.S.C. 5313 by regulation. Under 31 U.S.C. 5312 "financial institution" is defined explicitly to include many non-financial businesses including vehicle sales, real estate closings, the United States Postal Service, and casinos. 31 U.S.C. 5312(a)(2)(T), (U), (V), and (X). It also may include any business or agency determined by the Secretary to engage in an activity that is a substitute for any of the activities listed as "financial institutions," and "any other business designated by the Secretary whose cash transactions have a high degree of usefulness in criminal, tax, or regulatory matters." 31 U.S.C. 5312(a)(2)(Z) and (Y). The Secretary has, thus far, not chosen to exercise this power broadly. The new law provides even more comprehensive authority but does not require reports until regulations are issued.

Section 366. Efficient Use of Currency Transaction Report System

Section 366 requires the Secretary to study expanding the statutory exemption system to the currency transaction reporting requirements , under 31 U.S.C. 5313, authorizing exemptions for transactions with various entities and qualified business customers from the domestic currency and coin reporting requirements. The study is to address methods for improving financial institutions' use of these exemptions to reduce the submission of reports with little or no value for law enforcement purposes. A report on this is required within one year.

Subtitle C–Currency Crimes and Protection

Section 371. Bulk Cash Smuggling into or out of the United States

Section 371 creates a new criminal offense, knowingly concealing more than $10,000 and transporting it or attempting to transfer it out of or into the United States. Conviction under the statute is subject to imprisonment for up to 5 years and forfeiture of any property involved in the offense. Preexisting law, 31 U.S.C. 5316, requires a report by anyone transporting monetary instruments, defined to

[3326] There appears to be a typographical error in the text of the legislation. The prohibition on structuring refers to 31 U.S.C. 5333, rather than to 5331.

include currency, of more than $10,000 into or out of the U.S. In United States v. Bajakajian, 524 U.S. 324 (1998), the Supreme Court ruled it unconstitutional to require forfeiture of $357,144, in cash that the defendant possessed legitimately and was attempting to carry with him when leaving the United States. The Court found the penalty disproportional to the gravity of the offense and a violation of the Excessive Fines Clause of the Eighth Amendment to the U. S. Constitution. In reaching that decision, the Court considered the fact that the offense was merely a reporting offense since it was not illegal to transport the currency.

Section 372. Forfeiture in Currency Reporting Cases

Section 372 authorizes criminal forfeiture and civil forfeitures for violations of the reporting requirements relating to monetary instruments and makes the criminal forfeiture procedures of section 413 of the Controlled Substances Act and the civil forfeiture procedures of 18 U.S.C. 981(a)(1)(A) (money laundering) applicable to criminal and civil forfeiture, respectively, under 31 U.S.C. 5313 (reports on domestic coins and currency), 5316 (reports on exporting monetary instruments), and 5324 (structuring transactions to evade reporting requirements). Pre-existing law authorized forfeiture of any property involved in the transaction in violation of 31 U.S.C. 5324(b) (international monetary instruments) or property traceable to such property under customs procedures, as held by the court in United States v. Twenty Thousand Seven Hundred Fifty-Seven Dollars and Eight-Three Cents ($20,757.83) Canadian Currency, 769 F. 2d 479 (8th Cir. 1985).

Section 373. Illegal Money Transmitting Businesses

Section. 373 prohibits anyone from knowingly conducting, controlling, managing, supervising, directing, or owning a money transmitting business: (1) without a license in a state that requires such a license and subjects operating without a licence to state misdemeanor or felony penalties; (2) not registered with Treasury under 31 U.S.C. 5330; or (3) involves the transportation or transmission of funds that the defendants knows to have been derived from a criminal offense or are intended to be used to promote or support unlawful activity. The section prescribes a federal penalty of up to five years' imprisonment and criminal fines and authorizes civil forfeiture of property involved in transactions in connection with this offense.

Under the Money Laundering Suppression Act of 1994, 31 U.S.C. 5330(a), the Secretary of the Treasury is required to establish a system to register money transmitting businesses. FinCEN's regulations require registration by December 31, 2001. 31 C.F.R. §103.41.

Section 374. Counterfeiting Domestic Currency and Obligations

Section 374 extends the definition of counterfeiting obligations of the United States to cover analog, digital, or electronic images, as well as "any plate, stone, or

other thing or part thereof, used to counterfeit" such obligations or securities, as provided in pre-existing law, 18 U.S.C. 470(2). This section is also amended to provide similar penalties for offenses committed outside the U.S. as are applicable to those within the U.S. Other provisions increase the penalties under other counterfeiting statutes to 20 years' imprisonment: 18 U.S.C. 471 (obligations or securities of the U.S.); 472 (uttering counterfeit obligations or securities); 473 (dealing in counterfeit obligations or securities); and, 474 (using plates or stones for counterfeiting).

The section amends 18 U.S.C. 474 to cover counterfeiting involving an analog, digital or electronic image of U.S. obligations, unless authorized by Treasury. It amends 18 U.S.C. 476 (taking impressions of tools used for obligations or securities of the U.S.) to increase the penalty from 10 years to 25 years' imprisonment. It amends 18 U.S.C. 477 (possessing or selling impressions of tools used for obligations or securities) to cover an analog, digital, or electronic image. It raises the penalty for connecting parts of different notes, 18 U.S.C. 484, from five years' to ten years' imprisonment, and for offenses under 18 U.S.C. 493 (bonds and obligations of certain lending agencies), from five to ten years' imprisonment.

Section 375. Counterfeiting Foreign Currency and Obligations

Section 375 increases the penalties for violations of various offenses involving foreign currency and obligations as follows: 18 U.S.C. 478 (foreign obligations or securities, penalty raised from five to 20 years); 18 U.S.C. 479 (uttering counterfeit foreign obligations, penalty raised from three to 20 years); 18 U.S.C. 480 (possessing counter foreign obligations or securities, penalty raised from one to 20 years); 18 U.S.C. 481 (plates or stones for counterfeiting foreign obligations or securities, penalty raised from five to 20 years); 18 U.S.C. 482 (foreign bank notes, penalty raised from two to twenty years); and 18 U.S.C. 483 (foreign bank notes, penalty raised from two to 20 years). The section also criminalizes counterfeiting involving an analog, digital, or electronic image of foreign obligations and securities. It adds 18 U.S.C. 2339B, providing material support to designated foreign terrorist organizations as a predicate for a money laundering prosecution under 18 U.S.C. 1956.

Section 377. Extraterritorial Jurisdiction

Section 377 enhances the applicability of 18 U.S.C. 1029 (computer fraud) by covering offenses committed outside the U.S. that involve an access device issued by a U.S. entity, such as a credit card, provided the defendant transports, delivers, conveys, transfers to or through, or otherwise stores, secrets, or holds within the jurisdiction of the U.S., any article used to assist in the commission of the offense or the proceeds of such offense or property derived therefrom.

Title IV – Protecting the Border
Subtitle A – Protecting the Northern Border

Section 401. Ensuring Adequate Personnel on the Northern Border

Annual appropriation legislation ordinarily authorizes the number of work years ("full time equivalents") that an agency may devote to a particular mission. Section 401 authorizes the Attorney General to waive the limitation applicable to Immigration and Naturalization Service (INS) personnel assigned to the Northern Border.

Section 402. Northern Border Personnel

Section 402 authorizes appropriations in the amounts necessary to triple the number of Border Patrol, Custom Service, and the Immigration and Naturalization Service (INS) personnel in each state along the Northern Border of the United States. It authorizes appropriations of an additional $50 million each for INS and the Customs Service to improve and supplement their monitoring equipment at the Northern Border.

Section 403. Access by the Department of State and the INS to Certain Identifying Information in the Criminal History Records of Visa Applicants and Applicants for Admission to the United States

Section 403 authorizes the appropriations necessary to provide the State Department and INS with access to the Federal Bureau of Investigation's automated National Criminal Information Files and to permit the National Institute of Standards and Technology to development the standards necessary to accommodate the transfer of information. All United States consular officers responsible for issuing visas, border inspection officers, and law enforcement and intelligence officers with alien investigation and identification responsibilities will use access to ensure that applicants for entry into the United States have no criminal record here. The FBI will provide access without charge except, at least initially, for fingerprint processing. The Secretary of State will promulgate regulations to ensure the confidentiality and appropriate use of the FBI information. The Attorney General and Secretary of State, in consultation with the Secretary of the Treasury, must report within 18 months of enactment and every two years thereafter on development, implementation, efficacy and privacy implications of the process. Sections 405 and 1008, discussed below, call for studies and reports to Congress on the feasibility of related enhancements in the systems to which this section gives access.

Section 404. Limited Authority to Pay Overtime

In more normal times, Justice Department appropriations legislation placed a $30,000 cap on the amount of overtime that could paid individual INS officers. In light of the extraordinary circumstances at the end of the last fiscal year,

section 404 repeals the limitation contained in the INS appropriation for border services for fiscal year 2001, 114 Stat. 2762-58 to 2762A-59 (2000).

Section 405. Report on the Integrated Automated Fingerprint Identification System for Ports of Entry and Overseas Consular Posts

Section 405 directs the Attorney General, after consultation with the Secretaries of State, the Treasury, and Transportation, as well as other appropriate agency heads, to study and report upon the feasibility of enhancing the FBI's Integrated Automated Fingerprint Identification System (IAFIS) and other identification systems in order to better screen applications seeking to enter this country. The section authorizes appropriations of $2 million to the purpose.

Subtitle B – Enhanced Immigration Provisions

Section 411. Definitions Relating to Terrorism

Foreign nationals (aliens) are deportable from the United States if they were inadmissible at the time they entered the country or if they have subsequently engaged in terrorist activity, 8 U.S.C. 1227(a)(1)(A),(a)(4)(B), 1182(a)(3)(B)(iv). Aliens may be inadmissible for any number of terrorism-related reasons, 8 U.S.C. 1182(a)(3)(B). Section 411 adds to the terrorism-related grounds upon which an alien may be denied admission into the United States.

Prior law recognized five categories of terrorism-related factors which rendered an alien inadmissible. Section 411 redefines two of these, engaging in terrorist activity and representing a terrorist organization, 8 U.S.C. 1182(a)(3)(B)(iv), (a)(3)(B)(i)(IV), and it adds three more, espousing terrorist activity, being the spouse or child of an inadmissible alien, associating with a terrorist organization and intending to engage in activities that could endanger the welfare, safety or security of the United States, 8 U.S.C. 1182(a)(3)(B)(i)(VI), (a)(3)(B)(i)(VII), 1182(a)(3)(F).

Earlier law defined engaging in terrorist activity, which is grounds for both inadmissibility and deportation, to encompass soliciting on behalf of a terrorist organization or providing material support to a terrorist organization, 8 U.S.C. 1182(a)(3)(B)(iii)(2000 ed.). It did not explain in so many words, however, what constituted a "terrorist organization," although it presumably at the very least included groups designated a terrorist organizations under section 219 of the Immigration and Nationality Act (8 U.S.C. 1189). Although only effective after designation, §411(c), section 411 defines "terrorist organization" to include not only organizations designated under section 219 but also organizations which the Secretary has identified in the Federal Register as having provided material support for, committed, incited, planned, or gathered information on potential targets of, terrorist acts of violence, 8 U.S.C. 1182(a)(3)(B)(vi), (a)(3)(B)(iv). It then recasts the definition of engaging in terrorist activities to include solicitation on behalf of such organizations, or recruiting on their behalf, or providing them with material support, 8 U.S.C. 1182(a)(3)(B)(iv). Nevertheless, section 411

permits the Secretary of State or Attorney General to conclude that the material support prohibition does not apply to particular aliens, 8 U.S.C. 1182(a)(3)(B)(vi).

Prior law made representatives of terrorist organizations designated by the Secretary under section 219 (8 U.S.C. 1189) inadmissible, 8 U.S.C. 1182(a)(3)(B)(i) (IV)(2000 ed.). And so they remain. Section 411 makes representatives of political, social or similar groups, whose public endorsements of terrorist activities undermines our efforts to reduce or eliminate terrorism, inadmissible as well, 8 U.S.C. 1882(a)(3) (B)(i)(IV).

An individual who uses his or her place of prominence to endorse, espouse, or advocate support for terrorist activities or terrorist organizations in a manner which the Secretary of State concludes undermines our efforts to reduce or eliminate terrorism becomes inadmissible under section 411, 8 U.S.C. 1182(a)(3)(B)(i)(VI).

The spouse or child of an alien, who is inadmissible on terrorist grounds for activity occurring within the last 5 years, is likewise inadmissible, unless the child or spouse was reasonably unaware of the disqualify conduct or has repudiated the disqualify conduct, 8 U.S.C. 1182(a)(3)(B)(i)(VII), 1182(a)(3)(B)(ii).

Finally, any alien, whom the Secretary of State or the Attorney General conclude has associated with a terrorist organization and intends to engage in conduct dangerous to the welfare, safety, security of the United States while in their country, is inadmissible, 8 U.S.C. 1182(a)(3)(F).

Section 219 of the Immigration and Nationality Act (8 U.S.C. 1189) permits the Secretary to designate as terrorist organizations any foreign group which he finds to have engaged in terrorist activities. A second subsection 411(c) permits him to designate groups which as subnational groups or clandestine agents, engage in "premeditated, politically motivated violence perpetrated against noncombatant targets," or groups which retain the capacity and intent to engage in terrorism or terrorist activity, 8 U.S.C. 1189(a)(1)(B).

Section 412. Mandatory Detention of Suspected Terrorists; Habeas Corpus; Judicial Review

Section 412 permits the Attorney General to detain alien terrorist suspects for up to seven days, 8 U.S.C. 1226a. He must certify that he has reasonable grounds to believe that the suspects either are engaged in conduct which threatens the national security of the United States or are inadmissible or deportable on grounds of terrorism, espionage, sabotage, or sedition. Within seven days, the Attorney General must initiate removal or criminal proceedings or release the alien. If the alien is held, the determination must be reexamined every six months to confirm that the alien's release would threaten national security or endanger some individual or the general public. The Attorney General's determinations are

subject to review only under writs of habeas corpus issued out of any federal district court but appealable only to the United States Court of Appeals for the District Columbia. The Attorney General must report to the Judiciary Committee on the details of the operation of section 412.

Uncertain is the relationship between section 412 and the President's Military Order of November 13, 2001, which allows the Secretary of Defense to detain designated alien terrorist suspects, within the United States or elsewhere, without express limitation or condition except with regard to food, water, shelter, clothing, medical treatment, religious exercise, and a proscription on invidious discrimination, 66 Fed.Reg. 57833, 57834 (Nov. 16, 2001).

Section 413. Multilateral Cooperation Against Terrorists

State Department records concerning its processing of visa applications are confidential and generally available only for court and law enforcement purposes, 8 U.S.C. 1202(f). Section 413 authorizes the Secretary of State to share the information with other countries in order to combat terrorism, drug trafficking, gun running, smuggling of immigrants, or other criminal activity, either on a case by case basis or pursuant to a general agreement.

Section 414. Visa Integrity and Security

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1365a, instructed the Attorney General to implement an integrated entry and exit data system for airports, seaports and land border ports of entry. Section 414 expresses the sense of Congress that he should do so expeditiously and authorizes such appropriations as are necessary.

The section also directs the Attorney General and the Secretary of State to focus particularly on the use of biometric technology and tamper-resistant documents readable at ports of entry and to see to the development of a system that can be used by federal law enforcement officers to identify and detain individuals who pose a threat to U.S. national security.

Finally, it calls for the Office of Home Land Security to report to the Congress within a year of the enactment on the information needed for federal authorities to identify those seeking to enter the United States who are associated with terrorists organizations or otherwise pose a threat to our national security.

Section 415. Participation of Office of Homeland Security on Entry-Exit Task Force

Section 415 adds the Office of Home Land Security to the Integrated Entry and Exit Data System Task Force, 8 U.S.C. 1365a note.

Section 416. Foreign Student Monitoring Program

Section 417 authorizes appropriations of $36.8 million for the period ending on January 1, 2003 to implement and expand the program for collection of information relating to nonimmigrant foreign students and other exchange program participants, 8 U.S.C. 1372. The section adds air flight schools, language training schools, and vocations schools to the list of institutions whose students are to be included in the reporting requirement.

Section 417. Machine Readable Passports

Section 217 of the Immigration and Nationality Act permits a visa waiver program with respect to foreign tourists from countries which among things issue machine-readable passports that comply with international standards (or anticipate being able to do so prior to October 1, 2003), 8 U.S.C. 1187(c). Section 417 directs the Secretary of State to report the results of annual audits of the progress of program countries towards full implementation of machine-readable passport capability, of the existence of programs to prevent passport theft and counterfeiting, and of the development of tamper-proof passports. Subject to a progress waiver by the Secretary of State, the section limits the countries eligible for visa waiver program participation to those who have machine-readable passports as of October 1, 2003 (rather than October 1, 2007 as was previously the case).

Section 418. Prevention of Consulate Shopping

Section 418 commands the Secretary of State to determine whether consular shopping is a problem, to take steps to remedy any such problem, and to report to Congress on the action taken.

Subtitle C – Preservation of Immigration Benefits for Victims of Terrorism

The House Committee on the Judiciary explained a similar subtitle by noting that, "It is certain that some aliens fell victim to the terrorist attacks on the U.S. on September 11. This subtitle endeavors to modify immigration law to provide humanitarian relief to these victims and their family members," H.Rept. 107-236, at 66. Since the subtitle in the USA PATRIOT Act is largely unchanged from the subtitle reported out by the House Committee on the Judiciary, the analysis that follows is largely that of the Committee.

Section 421. Special Immigration Status

"The [USA PATRIOT] Act provides permanent resident status through the special immigrant program to an alien who was the beneficiary of a petition filed (on or before September 11) to grant the alien permanent residence as an employer-sponsored immigrant or of an application for labor certification (filed on or before September 11), if the petition or application was rendered null because of the disability of the beneficiary or loss of employment of the beneficiary due to physical damage to, or destruction of, the business of the petitioner or applicant

as a direct result of the terrorist attacks on September 11, or because of the death of the petitioner or applicant as a direct result of the terrorist attacks. Permanent residence would be granted to an alien who was the spouse or child of an alien who was the beneficiary of a petition filed on or before September 11 to grant the beneficiary permanent residence as a family-sponsored immigrant (as long as the spouse or child follows to join not later than September 11, 2003). Permanent residence would be granted to the beneficiary of a petition for a nonimmigrant visa as the spouse or the fiancé (and their children) of a U.S. citizen where the petitioning citizen died as a direct result of the terrorist attack. The section also provides permanent resident status to the grandparents of a child both of whose parents died as a result of the terrorist attacks, if either of such deceased parents was a citizen of the U.S. or a permanent resident," H.Rept. 107-236, at 66-7 (2001).

Section 422. Extension of Filing or Reentry Deadlines

"The Act provides that an alien who was legally in a nonimmigrant status and was disabled as a direct result of the terrorist attacks on September 11 (and his or her spouse and children) may remain lawfully in the U.S. (and receive work authorization) until the later of the date that his or her status normally terminates or September 11, 2002. Such status is also provided to the nonimmigrant spouse and children of an alien who died as a direct result of the terrorist attacks.

Where an alien was prevented from taking timely action because of office closures, airline schedule disruptions or other similar impediments, the "Act provides that an alien who was lawfully present as a nonimmigrant at the time of the terrorist attacks will be granted 60 additional days to file an application for extension or change of status if the alien was prevented from so filing as a direct result of the terrorist attacks. Also, an alien who was lawfully present as a nonimmigrant at the time of the attacks but was then unable to timely depart the U.S. as a direct result of the attacks will be considered to have departed legally if doing so before November 11. An alien who was in lawful nonimmigrant status at the time of the attacks (and his or her spouse and children) but not in the U.S. at that time and was then prevented from returning to the U.S. in order to file a timely application for an extension of status as a direct result of the terrorist attacks will be given 60 additional days to file an application and will have his or her status extended 60 days beyond the original due date of the application.

"Under current law, winners of the fiscal year 2001 diversity visa lottery must enter the U.S. or adjust status by September 30, 2001. The Act provides that such an alien may enter the U.S. or adjust status until April 1, 2002, if the alien was prevented from doing so by September 30, 2001 as a direct result of the terrorist attacks. If the visa quota for the 2001 diversity visa program has already been exceeded, the alien shall be counted under the 2002 program. Also, if a winner of the 2001 lottery died as a direct result of the terrorist attacks, the spouse and children of the alien shall still be eligible for permanent residence under the

program. The ceiling placed on the number of diversity immigrants shall not be exceeded in any case.

"Under the Act, in the case of an alien who was issued an immigrant visa that expires before December 31, 2001, if the alien was unable to timely enter the U.S. as a direct result of the terrorist attacks, the validity shall be extended until December 31.

"Under the Act, in the case of an alien who was granted parole that expired on or after September 11, if the alien was unable to enter the U.S. prior to the expiration date as a direct result of the terrorist attacks, the parole is extended an additional 90 days.

"Under the Act, in the case of an alien granted voluntary departure that expired between September 11 and October 11, 2001, voluntary departure is extended an additional 30 days," H.Rept. 107-236, at 67-8 (2001).

Section 423. Humanitarian Relief or Certain Surviving Spouses and Children

"Current law provides that an alien who was the spouse of a U.S. citizen for at least 2 years before the citizen died shall remain eligible for immigrant status as an immediate relative. This also applies to the children of the alien. The Act provides that if the citizen died as a direct result of the terrorist attacks, the 2 year requirement is waived.

"The Act provides that if an alien spouse, child, or unmarried adult son or daughter had been the beneficiary of an immigrant visa petition filed by a permanent resident who died as a direct result of the terrorist attacks, the alien will still be eligible for permanent residence. In addition, if an alien spouse, child, or unmarried adult son or daughter of a permanent resident who died as a direct result of the terrorist attacks was present in the U.S. on September 11 but had not yet been petitioned for permanent residence, the alien can self-petition for permanent residence.

"The Act provides that an alien spouse or child of an alien who 1) died as a direct result of the terrorist attacks and 2) was a permanent resident (petitioned-for by an employer) or an applicant for adjustment of status for an employment-based immigrant visa, may have his or her application for adjustment adjudicated despite the death (if the application was filed prior to the death)," H.Rept. 107-236, at 68 (2001).

Section 424. "Age-out" Protection for Children

"Under current law, certain visas are only available to an alien until the alien's 21st birthday. The Act provides that an alien whose 21st birthday occurs this September and who is a beneficiary for a petition or application filed on or before September 11 shall be considered to remain a child for 90 days after the alien's

21st birthday. For an alien whose 21st birthday occurs after this September, (and who had a petition for application filed on his or her behalf on or before September 11) the alien shall be considered to remain a child for 45 days after the alien's 21st birthday," H.Rept. 107-236, at 68 (2001).

Section 425. Temporary Administrative Relief

"The Act provides that temporary administrative relief may be provided to an alien who was lawfully present on September 10, was on that date the spouse, parent or child of someone who died or was disabled as a direct result of the terrorist attacks, and is not otherwise entitled to relief under any other provision of Subtitle [C]," H.Rept. 107-236, at 68 (2001).

Section 426. Evidence of Death, Disability, or Loss of Employment

"The Attorney General shall establish appropriate standards for evidence demonstrating that a death, disability, or loss of employment due to physical damage to, or destruction of, a business, occurred as a direct result of the terrorist attacks on September 11. The Attorney General is not required to promulgate regulations prior to implementing Subtitle [C]," H.Rept. 107-326, at 68-9 (2001).

Section 427. No Benefits to Terrorists or Family Members of Terrorists

"No benefit under Subtitle B shall be provided to anyone culpable for the terrorist attacks on September 11 or to any family member of such an individual," H.Rept. 107-236, at 69 (2001).

Section 428. Definitions

"The term 'specified terrorist activity' means any terrorist activity conducted against the Government or the people of the U.S. on September 11, 2001," H.Rept. 107-236, at 69 (2001).

Title V – Removing Obstacles to Investigating Terrorism

Section 501. Attorney General's Authority to Pay Rewards to Combat Terrorism

The Attorney General enjoys the power to pay rewards in criminal cases, but his power under other authorities is often subject to caps on the amount he might pay. Thus as a general rule, he may award amounts up to $25,000 for the capture of federal offenders, 18 U.S.C. 3059, and may pay rewards in any amount in recognition of assistance to the Department of Justices as long as the Appropriations and Judiciary Committees are notified of any rewards in excess of $100,000, 18 U.S.C. 3059B. Although he has special reward authority in terrorism cases, individual awards are capped at $500,000, (the ceiling for the total amount paid in such rewards is $5 million), and rewards of $100,000 or more require his personal approval or that of the President, 18 U.S.C. 3071-3077.

Over the last several years, annual appropriation acts have raised the $500,000 cap to $2 million and the $5 million ceiling to $10 million, e.g., Public Law 106-553, 114 Stat. 2762-67 (2000); Public Law 106-113, 113 Stat. 1501A-19 (1999); Public Law105-277, 112 Stat. 2681-66 (1998).

The USA PATRIOT Act supplies the Attorney General with the power to pay rewards to combat terrorism in any amount and without an aggregate limitation, but for rewards of $250,000 or more it insists on personal approval of the Attorney General or the President and on notification of the Appropriations and Judiciary Committees, §501. The funds to pay the rewards may come from any federal department or agency. In addition, the counterterrorism fund of section 101 can be used "without limitation" to pay rewards to prevent, investigate, or prosecute terrorism.

Section 502. Secretary of State's Authority to Pay Rewards

The Secretary of State's reward authority was already somewhat more generous than that of the Attorney General. He may pay rewards of up to $5 million for information in international terrorism cases as long as he personally approves payments in excess of $100,000, 22 U.S.C. 2708. The Act removes the $5 million cap and allows rewards to be paid for information concerning the whereabouts of terrorist leaders and facilitating the dissolution of terrorist organizations, §502.

Section 503. DNA Identification of Terrorists and Other Violent Offenders.

Federal law allows the Attorney General to collect DNA samples from federal prisoners convicted of a variety of violent crimes, 42 U.S.C. 14135a(d)(2). Section 503 expands the range. It permits samples to be taken from any federal prisoner convicted of a federal crime of terrorism (as defined in 18 U.S.C. 2332b(g)(5)(B)), or a crime of violence (as defined by 18 U.S.C. 16), or attempt or conspiracy to commit a crime of terrorism or violence.

Section 504. Coordination With Law Enforcement

Federal intelligence officers who wish to conduct electronic surveillance or physical searches under a FISA court order must certify that the acquisition of foreign intelligence information constitutes a significant purpose for the surveillance or search, 50 U.S.C. 1805(a)(7)(B), 1823(a)(7)(B). Section 504 confirms that the certification requirement does not preclude intelligence officers operating under FISA orders from coordinating their investigations with law enforcement officers in cases involving a foreign attack or other grave hostile attack, sabotage or international terrorism by a foreign power or agent, or foreign clandestine intelligence activities.

Section 505. Miscellaneous National Security Authorities

Three statutes, the Electronic Privacy Act, the Right to Financial Privacy Act, and Fair Credit Reporting Act, authorize third parties to release confidential communication transaction records, financial reports, and credit information for intelligence purposes upon the written request of senior FBI officials. Prior to section 505, the FBI was required to assert that the information sought was related to a foreign power, foreign agent, an international terrorist, or an individual engaged in clandestine intelligence activities, 18 U.S.C. 2709(b)(2), 12 U.S.C. 3414(a)(5), 15 U.S.C. 1681u. In an explanation that applies to all three statutory provisions, the House Committee on the Judiciary described the change made in the Electronic Privacy Act section: "Section 2709 of title 18 permits the Director of the Federal Bureau of Investigation to request, through a National Security Letter (NSL), subscriber information and toll billing records of a wire or electronic communication service provider. The request must certify (1) that the information sought is relevant to an authorized foreign counterintelligence investigation; and (2) there are specific and articulable facts that the person or entity to whom the information sought pertains is a foreign power or an agent of a foreign power as defined in FISA. This requirement is more burdensome than the corresponding criminal authorities, which require only a certification of relevance. The additional requirement of documentation of specific and articulable facts showing the person or entity is a foreign power or an agent of a foreign power cause substantial delays in counterintelligence and counterterrorism investigations. Such delays are unacceptable as our law enforcement and intelligence community works to thwart additional terrorist attacks that threaten the national security of the United States and her citizens' lives and livelihoods.

"Section [505] amends title 18 U.S.C. 2709 to mirror criminal subpoenas and allow a NSL to be issued when the FBI certifies, the information sought is 'relevant to an authorized foreign counterintelligence investigation,'" H.Rept. 107-236, at 61-2 (2001).

Section 506. Extension of Secret Service Jurisdiction

The federal computer fraud and abuse section, 18 U.S.C. 1030, originally vested the Secret Service with investigative jurisdiction over violations other than those dealing with classified information under 18 U.S.C. 1030(a)(1). The Secret Service also enjoyed investigative authority over offenses involving credit and debit card frauds as well as offenses involving false identification documents or devices, 18 U.S.C.3056(b)(3)(2000 ed.).

Section 506 preserves the Service's jurisdiction with respect to section 1030. It explicitly notes the FBI's investigative jurisdiction over offenses under paragraph 1030(a)(1) and the FBI's concurrent jurisdiction over offenses under the remainder of 18 U.S.C. 1030. The section amends paragraph 3056(b)(3) to enlarge the Service's jurisdiction from offenses involving "credit and debit card frauds, and false identification documents and devices" to crimes involving "access device fraud, false identification documents or devices, and any fraud or

other criminal or unlawful activity in or against any federally insured financial institution."

Section 507. Disclosure of Educational Records

Section 507 calls for an ex parte court order procedure under which senior Justice Department officials may seek authorization to collect educational records relevant to an investigation or prosecution of a crime of terrorism (as an exception to the confidentiality requirements of the General Education Provisions Act, 20 U.S.C. 1232g). Educational institutions who comply receive immunity from liability for the disclosure.

Section 508. Disclosure of Information From NCES Surveys

Section 508 creates a similar ex parte court order procedure under which senior Justice Department officials may seek authorization to collect individually identifiable information from the National Center for Education (as an exception to the confidentiality requirements of the National Education Statistics Act, 20 U.S.C. 9007). Officers and employees of the Center who cooperate receive immunity from liability for the disclosure.

Title VI – Providing for Victims of Terrorism, Public Safety Officers, and Their Families
Subtitle A – Aid to Families of Public Safety Officers

Section 611. Expedited Payment for Public Safety Officers Involved in the Prevention, Investigation, Rescue, or Recovery Efforts Related to a Terrorist Attack

Federal law authorizes benefits for those victimized by the death or catastrophic injury resulting in permanent and total disability of a public safety officer in the line of duty, subject to certain limitation, 42 U.S.C. 3796 et seq. Gross negligence, substantial contributory negligence, and employment other than in a civilian capacity are among the disqualifying factors, 42 U.S.C. 3796a, and there is a $5 million cap on benefits awarded in any fiscal year, 42 U.S.C. 3796. In cases of death or catastrophic injury sustained in the line of duty in relation to a terrorist attack, section 611 waives the cap and these disqualifications and orders the Bureau of Justice Assistance, which administers the program, to make payments within 30 days of receipt of a public agency's certification of eligibility in a particular case.

Section 612. Technical Correction With Respect to Expedited Payments for Heroic Public Safety Officers

Public Law 107-37, 115 Stat. 219 (2001), makes the same adjustments as those of section 611 for death and catastrophic injuries sustained in the line of duty in the course of rescue or recovery efforts related to the terrorist attacks of September 11. Section 612 confirms certain technical corrections made by the clerk and that

the Public Law extends to death and catastrophic injuries producing permanent and total disability.

Section 613. Public Safety Officers Benefit Program Payment Increases

Section 613 raises the amount of the benefit from $100,000 to $250,000, effective January 1, 2001, 42 U.S.C. 3796.

Section 614. Office of Justice Programs

Title I of the Omnibus Crime Control and Safe Streets Act (Pubic Law 90-351), as amended, creates the Office of Justice Programs (OJP) and a series of federal criminal justice and related assistance programs administered under its auspices, 42 U.S.C. 3711 et seq. In 1998, while Congress was considering reauthorization of some of those programs, it authorized the Office of Justice Programs to exercise authority over and approve grants, contracts and the like with respect to it's programs during fiscal year 1999, Public Law 105-277, 112 Stat. 2681-67 (1998). The following year, it renewed that authority for fiscal year 2000, but denied OJP authority to approve grants under the National Institute of Justice, the Bureau of Justice Statistics, and a few Juvenile Justice and Delinquency Prevention programs, Public Law 106-113, 113 Stat. 1501A-20 (1999). The fiscal year 2001 appropriations act carried forward by cross reference the same provisions with the same limitations, Public Law 106-553, 114 Stat. 2762A-67 (2000). Section 614 removes the limitations.

Subtitle B – Amendments to the Victims of Crime Act of 1984

Section 621. Crime Victims Fund

The Crime Victims Fund receives most of the fines collected for violations of federal criminal law and distributes them for purposes of victim assistance and compensation, 42 U.S.C. 10601-10604. Section 621 authorizes the Fund to receive gifts from private individuals. It instructs the Department of Justice, which administers the Fund, to distribute every fiscal year between 90 and 110% of the amount distributed in the previous year (120% in any year when the amount on hand is twice the amount distributed the previous year).

Pre-existing law allocated 48.5% of the amounts available under the Fund to crime victim compensation grants, 48.5% to crime victim assistance grants, and 3% to discretionary grants, 42 U.S.C. 10601(d)(4)(2000 ed.). Section 621 reduces the amounts available for compensation and assistance grants by 1% and increases to 5% the amount available for discretionary grants.

The section allows the Department of Justice to establish a $50 million antiterrorism emergency reserve for supplemental grants to compensate and assist victims of terrorism or mass violence. It also removes the otherwise

applicable caps on the amounts transferred to the Fund in response to the terrorist acts of September 11.

Section 622. Crime Victim Compensation

Before passage of section 622, individual victim compensation program grants were capped at 40% of the amount awarded in the previous year. Section 622 lifts the cap to 60% beginning in fiscal year 2003.

It also (1) removes the requirement that an eligible state crime victim compensation program provide compensation to state residents for terrorist crimes committed overseas, 42 U.S.C. 10602(b)(6)(B); (2) drops crimes involving terrorism from the definition of "compensable crimes," 42 U.S.C. 10602(d)(3); (3) provides that unlike other victim compensation, victim compensation received under Title IV of the Air Transportation Safety and System Stabilization Act (September 11 Victim Compensation Fund), Public Law 107-42, 115 Stat. 237, 49 U.S.C. 40101 note, may be considered income, a resource, or an asset for purposes of qualifying as an indigent for any federal or federal supported grant or benefit program, 42 U.S.C. 10602(c); (4) adds Title IV victim compensation to the "double dipping" restriction that applies to victim compensation programs, 42 U.S.C. 10602(e); and (5) allows the Virgin Islands to participate as a state in the victim compensation grant program, 42 U.S.C. 10602(d)(4).

Section 623. Crime Victim Assistance

Section 623 expands the crime victim assistance grant program to permit grants to federal agencies who perform local law enforcement functions in or on behalf of the District of Columbia, the Virgin Islands, or any other U.S. territory or possessions. It prohibits program discrimination against crime victims based on their disagreement with the manner in which the state is prosecuting the underlying offense, 42 U.S.C.10603(b)(1)(F); allows grants to be used for program evaluation and compliance efforts, 42 U.S.C. 10603(c)(1)(A); for fellowships, clinical internships, and training programs, 42 U.S.C. 10603(c)(3)(E). Finally, it reverses the preference for victim service grants over demonstration projects and training grants, so that not more than 50% of the amounts available for crime victim assistance grants shall be used for victim service grants and not less than 50% for demonstration projects and training grants, 42 U.S.C. 10603(c)(2).

Section 624. Victims of Terrorism

Title VIII of the Omnibus Diplomatic Security and Antiterrorism Act of 1986, Public Law 99-399, 100 Stat. 879 (1986), provides victims' benefits for the Iranian hostages, 5 U.S.C. 5569. The Antiterrorism and Effective Death Penalty Act, Public Law 104-132, 110 Stat. 1243, 42 U.S.C. 10603b, and the Victims of Trafficking and Violence Protection Act of 2000, Public Law 106-386, 114 Stat.

1545, 42 U.S.C. 10603c, establish compensation programs for victims of terrorism or mass destruction and victims of international terrorism respectively.

Prior to the enactment of section 624 only the states were eligible for compensation and assistance grants on behalf of the victims of terrorism or mass destruction occurring within the United States, and victims eligible for benefits under the diplomatic security law were ineligible for compensation and assistance under the general provisions covering victims of terrorism or mass destruction occurring abroad, 42 U.S.C. 10603b(2000 ed.). Section 624 removes the diplomatic security law disqualification and permits grants to victim service organizations – federal, state, local and nongovernmental agencies – to provide emergency victim relief, 42 U.S.C. 10603b.

Further, the section reduces the amount of compensation available to victims of international terrorism generally by any amount a victim has received under the diplomatic security law, 42 U.S.C. 10603c.

Title VII – Increased Information Sharing for Critical Infrastructure Protection

Section 701. Expansion of Regional Information Sharing Systems to Facilitate Federal-State-Local Law Enforcement Response Related to Terrorist Attacks

The Office of Justice Programs is authorized to make grants and enter into contracts with state and local law enforcement agencies and with nonprofit organizations to identify and combat multi-jurisdictional criminal conspiracies, 42 U.S.C. 3796h. Section 701 amends section 3796h to authorize appropriations of $50 million for fiscal year 2002 and $100 million for fiscal year 2003 to be used to establish and operate a secure information sharing system to combat multi-jurisdictional terrorist conspiracies and activities.

Title VIII – Strengthening the Criminal Laws Against Terrorism

Section 801. Terrorist Attacks and Other Acts of Violence Against Mass Transportation Systems

Pre-existing federal law criminalized, among other things, wrecking trains, 18 U.S.C. 1992; damaging commercial motor vehicles or their facilities, 18 U.S.C. 33, or threatening to do so, 18 U.S.C. 35; destroying vessels within the navigable waters of the United States, 18 U.S.C. 2273; destruction of vehicles or other property used in activities affecting interstate or foreign commerce by fire or explosives, 18 U.S.C. 844(i); possession of a biological agent or toxin as a weapon or a threat, attempt, or conspiracy to do so, 18 U.S.C. 175; use of a weapon of mass destruction affecting interstate or foreign commerce or a threat, attempt, or conspiracy to do so, 18 U.S.C. 2332a; commission of a federal crime of violence while armed with a firearm, or of federal felony while in possession an explosive,

18 U.S.C. 924(c), 844(h); and conspiracy to commit a federal crime, 18 U.S.C. 371.

Section 801 fills in some of the gaps in these proscriptions. It makes terrorist attacks and other acts of violence against mass transportation systems federal crimes, punishable by imprisonment for any term of years or life if the conveyance is occupied at the time of the offense, and imprisonment for not more than twenty years in other cases. Under its provisions, it is a crime to willfully

- wreck, derail, burn, or disable mass transit;
- place a biological agent or destructive device on mass transit recklessly or with the intent to endanger;
- -burn or place a biological agent or destructive device in or near a mass transit facility knowing a conveyance is likely to be disabled;
- impair a mass transit signal system;
- -interfere with a mass transit dispatcher, operator, or maintenance personnel in the performance of their duties recklessly or with the intent to endanger;
- -act with the intent to kill or seriously injure someone on mass transit property;
- convey a false alarm concerning violations of the section;
- attempt to violate the section;
- threaten or conspire to violate the section

when the violation involves interstate travel, communication, or transportation of materials or that involves a carrier engaged in or affecting interstate or foreign commerce, 18 U.S.C. 1993.

Section 802. Definition of Domestic Terrorism

Section 802 adjusts the definition of international terrorism in 18 U.S.C. 2331 and borrows from it to define domestic terrorism. Section 2331 has for some time defined international terrorism as those criminal acts of violence, committed primarily overseas or internationally, that appear to be intended to intimidate or coerce a civilian population, or to influence a governmental policy by intimidation or coercion, or to affect the conduct of a government by assassination or kidnaping, 18 U.S.C. 2331(1). Section 802 simply modifies this last element to include acts that appear to be intended to affect the conduct of a government by mass destruction, assassination or kidnaping.

It defines domestic terrorism as those criminal acts dangerous to human life, committed primarily within the United States, that appear to be intended to intimidate or coerce a civilian population, or to influence a governmental policy by intimidation or coercion, or to affect the conduct of a government by mass destruction, assassination or kidnaping, 18 U.S.C. 2331(5).

Section 803. Prohibition Against Harboring Terrorists

It is a federal crime to harbor aliens, 8 U.S.C. 1324, or those engaged in espionage, 18 U.S.C. 792, or to commit misprision of a felony (which may take the form of harboring the felon), 18 U.S.C. 4, or to act as an accessory after the fact to a federal crime (including by harboring the offender), 18 U.S.C. 3. The Justice Department asked that a terrorist harboring offense be added to the espionage section, and that it be given extraterritorial effect and venue flexibility.

Section 803 instead establishes a separate offense which punishes harboring terrorists by imprisonment for not more than ten years and/or a fine of not more than $250,000, 18 U.S.C. 2339. The predicate offense list consists of:

- destruction of aircraft or their facilities, 18 U.S.C. 32;
- biological weapons offenses, 18 U.S.C. 175;
- chemical weapons offenses, 18 U.S.C. 229; ! nuclear weapons offenses, 18 U.S.C. 831;
- bombing federal buildings, 18 U.S.C. 844(f);
- destruction of an energy facility, 18 U.S.C. 1366;
- violence committed against maritime navigational facilities, 18 U.S.C. 2280;
- offenses involving weapons of mass destruction, 18 U.S.C. 2232a;
- international terrorism, 18 U.S.C. 2232b;
- sabotage of a nuclear facility, 42 U.S.C. 2284;
- air piracy, 49 U.S.C. 46502.

It permits prosecution either at the place the harboring occurred or where the underlying act of terrorism committed by the sheltered terrorist might be prosecuted. In order to enjoy the full benefits of section 803, the prosecution may have to establish a nexus between the act of terrorism and the site of concealment, U.S. Const. Art. III, §2, cl.3; Amend. IV; United States v. Cabrales, 524 U.S. 1 (1998). On the other hand, if the acts of terrorism occur in the United States or over which the United States has jurisdiction, the crime of harboring the terrorist even overseas can be prosecuted in the United States in all likelihood without amending existing law, cf., United States v. Felix-Gutierrez, 940 F.2d 1200, 1205 (9th Cir. 1991)("crime of accessory after the fact gives rise to extraterritorial jurisdiction to the same extent as the underlying offense").

Section 804. Jurisdiction Over Crimes Committed at U.S. Facilities Abroad

Crime is usually outlawed, prosecuted and punished where it is committed. In the case of the United States, this a matter of practical and diplomatic preference rather than constitutional necessity. Consequently, a surprising number of federal criminal laws have extraterritorial application. In some instances, the statute proscribing the misconduct expressly permits the exercise of extraterritorial jurisdiction, e.g., 18 U.S.C. 2332a (relating to use of weapons of mass destruction by an American overseas). In others, such as those banning

assassination of Members of Congress, 18 U.S.C. 351, or the attempted murder of federal law enforcement officers, 18 U.S.C. 1114, the court will assume Congress intended the prohibitions to have extraterritorial reach.[3327]

Section 804 touches upon extraterritoriality only to a limited extent and in somewhat unusual manner. The special maritime and territorial jurisdiction of the United States represent two variations of the extraterritorial jurisdiction. Congress has made most common law crimes – murder, sexual abuse, kidnaping, assault, robbery, theft and the like – federal crimes when committed within the special maritime and territorial jurisdiction of the United States.

The special maritime jurisdiction of the United States extends to the vessels of the United States. Historically, the territorial jurisdiction of the United States was thought to reach those areas over which Congress enjoyed state-like legislative jurisdiction. For some time, those territories were located exclusively within the confines of the United States, but over the years came to include at least temporarily, Hawaii, the Philippines, and other American overseas territories and possessions. Recently, the lower federal courts have become divided over the question of whether laws enacted to apply within federal enclaves within the United States and American territories overseas might also apply to areas overseas over which the United States has proprietary control, compare, United States v. Gatlin, 216 F.3d 207 (2d Cir. 2000); United States v. Laden, 92 F.Supp.2d 189 (S.D.N.Y. 2000); with, United States v. Corey, 232 F.3d 1166 (9th Cir. 2000); United States v. Erdos, 474 F.2d 157 (4th Cir. 1973). The section resolves the conflict by declaring within the territorial jurisdiction of the United States includes those overseas areas used by American governmental entities for their activities or residences for their personnel, at least to the extent that crimes are committed by or against an American. It is intended as a residual provision and therefore does not apply where it would conflict with a treaty obligation or where the offender is covered by the Military Extraterritorial Jurisdiction Act (18 U.S.C. 3261).

Section 805. Material Support of Terrorism

Sections 2339A and 2339B of title 18 of the United States Code ban providing material support to individuals and to organizations that commit various crimes of terrorism. Section 804 amends the sections in several ways, some at the behest of the Justice Department. Section 2339B (support of a terrorist organization) joins section 2339A (support of a terrorist) as a money laundering predicate offense, 18 U.S.C. 1956(c)(7)(D) The predicate offense list of 18 U.S.C. 2339A (support to terrorists) grows to include:

[3327] United Stats v. Layton, 855 F.2d 1388 (9th Cir. 1981); United States v. Benitez, 741 F.2d 1312 (11th Cir. 1984) United States v. Bowman, 260 U.S. 94 (1922); Ford v. United States, 273 U.S. 593 (1927).

- chemical weapons offenses, 18 U.S.C. 229;
- terrorist attacks on mass transportation, 18 U.S.C. 1993 ;
- sabotage of a nuclear facility, 42 U.S.C. 2284; and
- sabotage of interstate pipelines, 49 U.S.C. 60123(b).

Section 805 also adds expert advice or assistance of the types of assistance that may not be provided under section 2339A. Prosecutions grounded on providing material assistance in the form of expert advice may encounter the same First Amendment vagueness problems some courts have found in assistance which takes the form of "training"and "personnel," Humanitarian Law Project v. Reno, 205 F.3d 1130, 1137-136 (9th Cir. 2000).

Finally, the section declares that a prosecution for violation of section 2339A (support of terrorists) may be brought where the support is provided or where the predicate act of terrorism occurs. The full benefit of this amendment may have to await clarification in the law concerning venue, U.S.Const. Art.III, §2, cl.3; Amend. IV; United States v. Cabrales, 524 U.S. 1 (1998).

Section 806. Assets of Foreign Terrorist Organizations

Modern forfeiture law strips criminals of the proceeds and instruments of crime. Terrorism, however, neither produces profits of drug dealing nor requires the specialized equipment of the rum runner or the counterfeiter. Consequently, most forfeiture statutes do not reach the crimes of terrorism. Nevertheless terrorism, particularly international terrorism, requires financing; cash is the essential instrumentality of terrorism. The USA PATRIOT Act attacks terrorism at its most vulnerable spot, its need for financial support. The Act's invigorating of the International Economic Emergency Powers Act asset forfeiture and its money laundering measures are calculated to encumber and prevent terrorism by drying up its sources of financial support.

Section 806 supplies another tool for that effort. It subjects to civil forfeiture property wherever located: (1) which belongs to an individual or entity planning or engaging in domestic or international terrorism against the United States (as defined in 18 U.S.C. 2331) or which affords the individual a source of influence over a terrorist organization; (2) which is acquired or maintained for use in furtherance of acts of domestic or international terrorism committed against Americans; or (3) which is derived from or is useful for the commission of acts of domestic or international terrorism committed against the Americans, 18 U.S.C. 981(a)(1)(G). The section is something of a rarity in that it creates a forfeiture of estate (confiscation based solely on the property's relation to an offender rather than to the offense; discussed earlier with respect to section 106), traditionally thought to be at odds with the concept of civil in rem forfeiture and with the bans on corruption of the blood, U.S.Const. Art.III, §3, cl.2; Amend.V; United States v. Grande, 620 F.2d 1026 (4th Cir. 1980).

Section 807. Technical Clarification Relating to Provision of Material Support to Terrorism

The Trade Sanctions Reform and Export Enhancement Act of 2000, Title IX of Public Law 106-387, 114 Stat. 1549A-69, limits the power of the President to unilaterally impose export restrictions on agricultural and medical products, subject to certain exceptions. Section 807 builds on the pronouncement of section 221(b)(2) to confirm that the trade sanctions bill should not be construed to limit or otherwise amend the prohibitions on providing material support to terrorist or terrorist organizations found in 18 U.S.C. 2339A and 2339B.

Section 808. Definition of Federal Crime of Terrorism

Paragraph 2332b(g)(5)(b) lists a number of violent federal crimes within its definition of "federal crime[s] of terrorism" for purposes of the section's prohibition on acts of terrorism transcending national boundaries. Section 808 amends the definition for consistency with its use in various other sections of the USA PATRIOT Act. The Section drops a number of less serious crimes from the definition, such as simple assault (18 U.S.C. 351(e)), bomb scares (18 U.S.C. 844(e)), and malicious mischief (18 U.S.C. 1361), after reaffirming that the omitted offenses remain within the investigative jurisdiction of the Department of Justice. It places several more serious crimes within the definition, crimes like biological weapons offenses (18 U.S.C. 175b), cybercrime (18 U.S.C. 1030), terrorists attacks on mass transit (18 U.S.C. 1993), and various violent crimes committed aboard aircraft within U.S. jurisdiction (49 U.S.C. 46504, 46505(b)(3),(c), 46505).

Section 809. No Statute of Limitations for Certain Terrorism Offenses

Prosecution for murder may be initiated at any time; there is no statute of limitations, 18 U.S.C. 3281. With a few exceptions, there is a five year statute of limitations on the prosecution of other federal crimes. Among the relevant exceptions before the USA PATRIOT Act was enacted, were an eight year statute of limitations for several terrorist offenses, 18 U.S.C. 3286,[3328] and a ten year statute of limitations for arson in federal enclaves and explosives offenses involving federal property, property used in an activity affecting interstate

[3328] 18 U.S.C. 32 (destruction of aircraft or aircraft facilities), 37 (violence at international airports), 112 (assaults on foreign dignitaries), 351 (crimes of violence against Members of Congress), 1116 (killing foreign dignitaries), 1203 (hostage taking), 1361 (destruction of federal property), 1751 (crimes of violence against the President), 2280 (violence against maritime navigation), 2281 (violence on maritime platforms), 2332 (terrorist violence against Americans overseas), 2332a (use of weapons of mass destruction), 2332b (acts of terrorism transcending national boundaries), 2340A (torture); 49 U.S.C. 46502 (air piracy), 46504 (interference with a flight crew), 46505 (carrying a weapon aboard an aircraft), and 46506 (assault, theft, robbery, sexual abuse, murder, manslaughter or attempted murder or manslaughter in the special aircraft jurisdiction of the United States).

commerce, and use of an explosive during the commission of a federal offense, 18 U.S.C. 3295. The Administration recommended the elimination of a statute of limitations in terrorism cases.

Section 809 takes a less dramatic approach. It eliminates the statute of limitations for any federal crime of terrorism (as defined by 18 U.S.C. 2332b(g)(5)(B), with the amendments of §808) that risks or results in a death or serious bodily injury, 18 U.S.C. 3286. In the absence of such a risk or result, all other terrorism offenses become subject to the eight year statute of limitations unless already covered by the ten year statute for explosives and arson offenses, 18 U.S.C. 3286 (§809).

Section 810. Alternative Maximum Penalties for Terrorism Offenses

The Justice Department suggested an alternative term of imprisonment up to life imprisonment for anyone convicted of an offense designated a terrorist crime. It described the proposal as analogous to standard fine provisions of 18 U.S.C. 3571(b),(c), which in 1984 established a basic fine of $250,000 for any individual who committed a federal felony, notwithstanding the lower maximum fine described in the statute that outlawed the offense.

The proposal, however, failed to identify the critical elements that would trigger the alternative. Both practical and constitutional challenges might be thought to attend this failure to distinguish between those convicted of some "garden variety" crime of terrorism and the more serious offender meriting the alternative, supplementary penalty. Section 810 instead opts to simply increase the maximum penalties for various crimes of terrorism, particularly those which involve the taking of a human life and are not already capital offenses. It increases the maximum terms of imprisonment:

- for life-threatening arson or arson of a dwelling committed within a federal enclave, from 20 years to any term of years or life, 18 U.S.C. 81;
- for causing more than $100,000 in damage to, or significantly impairing the operation of an energy facility, from 10 to 20 years (or any term of years or life, if death results), 18 U.S.C. 1366;
- for providing material support to a terrorist or a terrorist organization, from 10 to 15 years (or any term of years or life, if death results), 18 U.S.C. 2339A, 2339B;
- for destruction of national defense materials, from 10 to 20 years (or any term of years or life, if death results), 18 U.S.C. 2155;
- for sabotage of a nuclear facility, from 10 to 20 years (or any term of years or life, if death results), 42 U.S.C. 2284;
- for carrying a weapon or explosive aboard an aircraft within U.S. special aircraft jurisdiction, from 15 to 20 years (or any term of years or life, if death results), 49 U.S.C. 46505; and
- for sabotage of interstate gas pipeline facilities, from 15 to 20 years (or any term of years or life, if death results), 49 U.S.C. 60123.

Section 811. Penalties for Terrorist Conspiracies

It is a separate federal offense punishable by imprisonment for not more than five years to conspire to commit any federal felony, 18 U.S.C. 371. Coconspirators are likewise subject to punishment for the underlying offense and for any other crimes committed in furtherance of the conspiracy. Nevertheless, some federal criminal statutes impose the same penalties for both the crimes they proscribe and for conspiracy to commit. Again, section 811, opts for a less sweeping approach than the Administration had proposed. It establishes equivalent sanctions for conspiracy and the underlying offense in cases of:

- arson committed within a federal enclave, 18 U.S.C. 81;
- killing committed while armed with a firearm in a federal building, 18
- U.S.C. 930(c);
- destruction of communications facilities, 18 U.S.C. 1362;
- destruction of property within a federal enclave, 18 U.S.C. 1363;
- causing a train wreck, 18 U.S.C. 1922;
- providing material support to a terrorist, 18 U.S.C. 2339A;
- torture committed overseas under color of law, 18 U.S.C. 2340A;
- sabotage of a nuclear facility, 42 U.S.C. 2284;
- interfering with a flight crew within U.S. special aircraft jurisdiction, 49 U.S.C. 46504;
- carrying a weapon or explosive abroad an aircraft with U.S. special aircraft jurisdiction, 49 U.S.C. 46505; and
- sabotage of interstate gas pipeline facilities, 49 U.S.C. 60123.

Section 812. Post-Release Supervision of Terrorists

When federal courts impose a sentence of a year or more upon a convicted defendant, they must also impose a term of supervised release, 18 U.S.C. 3583; U.S.S.G. §5D1.1. Supervised release is not unlike parole, except that it is ordinarily imposed in addition to rather than in lieu of a term, or portion of a term, of imprisonment. The term may be no longer than 5 years for most crimes and violations of the conditions of release may result in imprisonment for up to an additional 5 years, 18 U.S.C. 3583(e). There were proposals to create a maximum supervisory term of life for those convicted of acts of terrorism (subject to the calibrations of the Sentencing Commission). Section 812 amends section 3583 to provide for a supervisory release term of life or any term of years following conviction for a federal crime of terrorism as defined in 18 U.S.C. 2332b which resulted in death or involved a foreseeable risk of death or serious bodily injury, 18 U.S.C. 3583(j).

Section 813. Inclusion of Acts of Terrorism as Racketeering Activity

Section 813 accepts the Administration's recommendation that all federal crimes of terrorism be included on the predicate offense list for RICO (racketeer

influenced and corrupt organizations) which proscribes acquiring or operating, through the patterned commission of any of a series of predicate offenses, an enterprise whose activities affect interstate or foreign commerce, 18 U.S.C. 1961.

Section 814. Deterrence and Prevention of Cyberterrorism

Computer fraud and abuse is a federal crime when it involves a federally protected computer, i.e., a federal computer, a computer used by financial institutions, or a computer used in interstate or foreign commerce, 18 U.S.C. 1030. Section 814 increases the penalty for intentionally damaging a protected computer from imprisonment for not more than 5 years to imprisonment for not more than 10 years. It also raises the penalty for either intentionally or recklessly damaging a protected computer after having previously been convicted of computer abuse from imprisonment for not more than 10 years to imprisonment for not more than 20 years.

In order to trigger criminal or civil liability for causing damage to a federally protected computer, the damage must fall into one of several categories. It must involve losses of $5000 or more, or adversely affect certain medical data, or cause a physical injury, or threaten public health or safety. Section 814 supplies a fifth category – damage affecting a computer system used by or for the government for the administration of justice, national defense, or national security.

Section 814 supplies an explicit definition for the kinds of losses that may be considered in order to determine whether the $5000 threshold has been met. They consist of any reasonable cost including but not limited to those incurred to take corrective action, make damage assessments, and effect recuperation, as well as the consequential costs of interrupted service.

Section 815. Additional Defense to Civil Actions Relating to Preserving Records in Response to Government Requests

Section 2707(e) of title 18 of the United States Code affords communications service providers with a good faith defense to civil or criminal liability for their cooperation in response to a warrant, subpoena or court order. Section 2703(f) requires them to return over records and other evidence at government request. Section 815 extends the good faith defense of section 2707(e) to cover civil and criminal liability for service provider cooperation with a request under section 2703(f).

Section 816. Development and Support of Cybersecurity Forensic Capabilities

Section 816 authorizes annual appropriations of $50 million to establish regional computer forensic laboratories.

Section 817. Expansion of the Biological Weapons Statute

Prior to enactment of the USA PATRIOT Act, federal law proscribed the use of biological agents or toxins as weapons, 18 U.S.C. 175. Section 817 supplements existing law with two federal crimes. First, it outlaws possession of a type or quantity of biological agents or toxins that cannot be justified for peaceful purposes, 18 U.S.C. 175(b). Second, consistent with federal prohibitions on the possession of firearms, 18 U.S.C. 922(g), and explosives, 18 U.S.C. 842(i), it makes it a federal offense for certain individuals – convicted felons, illegal aliens, and fugitives and the like – to possess biological toxins or agents, 18 U.S.C. 175b. Both offenses are punishable by imprisonment for not more than ten years and/or a fine of not more than $250,000.

Title IX – Improved Intelligence

Section 901. Responsibilities of Director of Central Intelligence Regarding Foreign Intelligence Collected Under Foreign Intelligence Surveillance Act of 1978

Only the President or the Attorney General may authorize application for a FISA surveillance or physical search order, 50 U.S.C. 1802, 1804, 1822, 1823. Information acquired by means of a FISA order may be shared with other federal officials, including members of the intelligence community, as long as minimization procedures are observed, 50 U.S.C. 1806, 1825. FISA minimization procedures are crafted "consistent with the need of the United States to obtain, produce, and disseminate foreign intelligence information," 50 U.S.C. 1801(h), 1821(4).

Section 901 amends the National Security Act of 1947, 50 U.S.C. 403-3(c), instructing the Director of the Central Intelligence[3329] to establish priorities and requirements concerning the use of the Foreign Intelligence Surveillance Act (FISA) and to assist the Attorney General to ensure that information generated by the execution of FISA surveillance and physical search orders is disseminated so as to be used efficiently and effectively for foreign intelligence purposes. The intelligence community, however, must work through the good offices of the Attorney General to use FISA orders in the performance of its responsibilities, since in the absence of specific statutory or executive order authority, the Director is not permitted to direct, manage, or undertake execution of a FISA order.

Section 902. Inclusion of International Terrorist Activities Within the Scope of Foreign Intelligence Under the National Security Act of 1947

[3329] The Director of Central Intelligence is simultaneously Director of the Central Intelligence Agency (CIA), the President's principal advisor on national security intelligence matters, and coordinating head of the intelligence community, 50 U.S.C. 403(a).

Section 3 of the National Security Act defines the kind of information that constitutes "foreign intelligence" for purposes of the Act, 50 U.S.C. 5401a(2). Section 902 adds information relating to the activities of international terrorists to the definition.

Section 903. Sense of Congress on the Establishment and Maintenance of Intelligence Relationships to Acquire Information on Terrorists and Terrorist Organizations

Section 903 expresses the sense of Congress that members of the intelligence community should be outgoing in their efforts to acquire information about terrorists and terrorist organizations.

Section 904. Temporary Authority to Defer Submittal to Congress of Reports on Intelligence and Intelligence-Related Matters

Section 904 permits intelligence community agencies to defer submission of required intelligence reports to Congress (other than the reports on covert actions required under 50 U.S.C. 413a, 413b) until February 1, 2002. They may delay submission further, if compliance would impede counterintelligence activities.

Section 905. Disclosure to Director of Central Intelligence of Foreign Intelligence-Related Information With Respect to Criminal Investigations

The Attorney General in consultation with the Director of Central Intelligence has been directed in section 905 to develop guidelines to ensure the dissemination to the intelligence community of foreign intelligence information unearthed during the course of a criminal investigation. The guidelines may embody exceptions necessary to prevent jeopardizing an ongoing criminal investigation or other significant law enforcement interests. They should contain a means for reporting back to the intelligence community on the action taken or to be taken on the basis of information which elements of the intelligence community have passed to the Justice Department.

Section 906. Foreign Terrorist Asset Tracking Center

Following the attacks of September 11, the Treasury Department announced the creation of an inter-agency foreign terrorist asset tracking center, which reportedly consists of agents from the Customs Service, Office of Foreign Asset Control (OFAC), Internal Revenue Service, FBI, and CIA.

Section 906 asks for a joint report from the Secretary of the Treasury, the Attorney General, and the Director of Central Intelligence on the feasibility of reconfiguring the Center and OFAC into an entity able to analyze the financial capabilities and resources of international terrorists organizations, on the extent to which the Financial Crimes Enforcement Center (FinCEN) should be included,

and on a legislative proposal detailing the specifics of any such entity found whose creation they find feasible and desirable.

Section 907. National Virtual Translation Center

Section 907 instructs the Director of Central Intelligence, in consultation with the Director of the FBI to report on the establishment of a national virtual translation center for the purpose providing timely and accurate translations of foreign intelligence.

Section 908. Training of Government Officials Regarding Identification and Use of Foreign Intelligence

Section 908 authorizes the necessary appropriations to train federal officials who do not ordinarily deal with foreign intelligence matters and state and local government officials who may encounter foreign intelligence in the course of a terrorist attack. The training would assist the officials to identify and use foreign intelligence information in the performance of their duties.

Title X – Miscellaneous

Section 1001. Review of the Department of Justice

As the House Judiciary Committee, from which this proposal first emerged, explained, "In the wake of several significant incidents of security lapses and breach of regulations, there has arisen the need for independent oversight of the Federal Bureau of Investigation. Oversight of the Federal Bureau of Investigation is currently under the jurisdiction of the Department of Justice Office of Professional Responsibility. This section directs the Inspector General of the Department of Justice to appoint a Deputy Inspector General for Civil Rights, Civil Liberties, and the Federal Bureau of Investigation who shall be responsible for supervising independent oversight of the FBI until September 30, 2004. This section also directs the Deputy Inspector to review all information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees of the Department of Justice, which could include allegations of inappropriate profiling at the border," H.Rept. 107-236, at 78. (2001).

Section 1002. Sense of Congress

Section 1002 expresses the sense of Congress that the rights of all Americans include those of Sikh-Americans should be protected in the quest to apprehend those responsible for the attacks of September 11; that violence or discrimination against any Americans including Sikh-Americans should be condemned; law enforcement authorities should work to prevent all Americans including Sikh-Americans from becoming crime victims; and that federal authorities should prosecute those responsible to the fullest extent of the law.

Section 1003. Definition of "Electronic Surveillance"

The Foreign Intelligence Surveillance Act (FISA) allows federal authorities to conduct "electronic surveillance" under certain limited foreign intelligence gathering purposes. Section 217 allows federal law enforcement officers to intercept the communications of computer trespassers within the system in which they are intruders, 18 U.S.C. 2511(2)(i). Section 1003 amends FISA to make it clear that the computer trespasser exception does not apply to FISA surveillance orders. FISA surveillance orders may be issued to acquire the communications of a computer trespasser, 50 U.S.C. 1801(f)(2).

Section 1004. Venue in Money Laundering Cases

The Constitution provides that, the "Trial of all Crimes . . . shall be held in the State where the said Crimes shall have been committed; but when not committed within any State, the Trial shall be at such Place or Places as the Congress may by Law have directed," U.S.Const. Art.III, §2, 3, and that "[i]n all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law," U.S.Const. Amend. VI. When a crime begins in one district and continues on to another, trial may be constitutionally held in either district, United States v. Anderson, 328 U.S. 699, 704-5 (1946). Thus, the federal crime of conspiracy, which consists of the agreement to commit a federal crime plus an overt act committed in furtherance of the conspiracy, may be tried wherever the agreement occurred or wherever an overt act in its furtherance was committed, Hyde v. United States, 225 U.S. 347, 363 (1912).

This doctrine of continuing offenses, however, is not boundless. In United States v. Cabrales, 524 U.S. 1 (1998), a unanimous Supreme Court held that a charge of laundering of the proceeds of a Missouri drug trafficking operation in Florida could not tried in Missouri. In the course of its opinion, the Court observed, that "[m]oney laundering. . . arguably might rank as a continuing offense, triable in more that one place, if the launderer acquired the funds in one district and transported them into another," 524 U.S. at 8.

Section 1004 relies on this language when it permits a prosecution for money laundering in violation of either 18 U.S.C. 1956 or 1957 in the place where the predicate offense occurred "if the defendant participated in the transfer of the proceeds" of the predicate offense from the district in which the predicate offense occurred into the district in which the laundering occurred, 18 U.S.C. 1956(i)(1). The section also permits prosecution where an overt act in furtherance of conspiracy to violation the money laundering sections occurs, 18 U.S.C. 1956(i)(2).

Section 1005. First Responders Assistance Act

Section 1005 authorizes appropriations of $25 million for each fiscal year from 2003 through 2007 to permit the Attorney General to make grants to state and

local governments for terrorism prevention and antiterrorism training of fire fighters and other first responders. Each state from which a qualified grant application is submitted is entitled to no less than 0.5% of the total amount appropriated under section 1005 for that year.

Section 1006. Inadmissibility of Aliens Engaged in Money Laundering

Section 1006 makes aliens who have participated in money laundering inadmissible for admission into the United States. The Secretary of State is instructed to maintain a watchlist to be consulted to ensure that aliens involved in money laundering are not allowed to enter this country.

Section 1007. Authorization of Funds for DEA Police Training in South and Central Asia

The Taliban and al Qaeda reportedly fund their activities in part by trafficking in heroin. The material used to process the heroin flow into Afghanistan from South and Central Asia and the processed heroin is transported into world commerce through Turkey. Section 1007 authorizes appropriations of $5 million for Drug Enforcement Administration training for the police of Turkey and of the countries of South and Central Asia in order to disrupt heroin production in Afghanistan.

Section 1008. Feasibility Study on Use of Biometric Identifier Scanning System With Access to the FBI Integrated Automated Fingerprint Identification System at Overseas Consular Posts and Points of Entry to the United States

"Section 1008 requires the Attorney General to conduct a study of the feasibility of utilizing a biometric identifier (fingerprint) scanning system at consular offices and points of entry into the United States to identify aliens who may be wanted in connection with criminal or terrorist investigations in the United States or abroad. A biometric fingerprint scanning system is a sophisticated computer scanning technology that analyzes a person's fingerprint and compares the measurement with a verified sample digitally stored in the system. The accuracy of these systems is claimed to be above 99.9%. The biometric identifier system contemplated by this section would have access to the database of the Federal Bureau of Investigation Integrated Automated Fingerprint Identification System. The section requires that the Attorney General shall submit a summary of the findings of the study to Congress within 90 days.

Section 1009. Study of Access

Section 1009 authorizes $250,000 for the Federal Bureau of Investigation to study the feasibility of providing airlines with computer access to the names of those the federal government suspects of terrorism.

Section 1010. Temporary Authority to Contract With Local and State Governments for Performance of Security Functions at United States Military Installations

Subject to limited exceptions, the Department of Defense may not contract for fire fighting or security-guard functions to be performed on military installations, 10 U.S.C. 2465. Section 1010 creates another exception and allows neighboring state and local authorities to perform security functions for military installations and facilities pursuant to contracts with the Defense Department for a period up to 180 days after the completion of Operation Enduring Freedom.

Section 1011. Crimes Against Charitable Americans

The Telemarketing and Consumer Fraud and Abuse Prevention Act, 15 U.S.C. 6101 et seq. empowers the Federal Trade Commission (FTC) to promulgate regulations to prevent telemarketing deception. It is a federal crime to impersonate members or agents of the Red Cross for fraudulent purposes, 18 U.S.C. 917. And the federal criminal code imposes special penalties for telemarketing fraud, 18 U.S.C. 2325-2327.

Section 1011 brings telephone charitable solicitations under the FTC's regulatory umbrella, 15 U.S.C. 6102, 6106. It increases the penalty for impersonating Red Cross members or agents in order make fraudulent charitable solicitations from imprisonment for not more than 1 year to imprisonment for not more than 5 years, 18 U.S.C. 917. It also amends 18 U.S.C. 2325 in order make the enhanced telemarketing fraud penalties applicable to fraudulent charitable telephone solicitations, 18 U.S.C. 2325.

Section 1012. Limitation on Issuance of Hazmat Licenses

The Secretary of Transportation exercises regulatory authority over the safe interstate transportation of hazardous materials (hazmat), 49 U.S.C. 5101 et seq., and over commercial motor vehicle operators, 49 U.S.C. 31301 et seq. Section 1012 enacts 49 U.S.C. 5103a, which limits the issuance of hazmat licenses to instances where the Secretary of Transportation has certified that the applicant is not a security risk. It allows the states to request a background check from the Attorney General for a criminal record, for illegal alien status, and with Interpol. It expands the definition of hazardous materials to include chemical and biological materials and agents, and authorizes the Secretary of the Transportation to require the states to report relevant related information. Section 1012 also amends 49 U.S.C. 31305 with respect to the minimum standards for commercial motor vehicle operator fitness to include a determination that the applicant has been determined under section 5103a not to pose a security risk.

Section 1013. Expressing the Sense of the Senate Concerning the Provision of Funding for Bioterrorism Preparedness and Response

Section 1013 expresses the sense of the Senate that there should be an expanded level of public expenditures to prepare and respond to threats of bioterrorism.

Section 1014. Grant Program for State and Local Domestic Preparedness Support

Section 1014 authorizes appropriations in whatever sums are necessary for fiscal years 2002 through 2007 to make OJP grants to the state and local units of government to enhance their capacity to respond to terrorist attacks including those involving use of weapons of mass destruction, biological, chemical, nuclear, radiological, incendiary, chemical and explosive devises. The grants may be used to train and equip first responders. The Department of Justice may use no more than 3% of the appropriations for salaries and administrative expenses and each state is entitled to not less than 0.75% of the amount appropriated in any given fiscal year (not less than 0.25% for each of Guam, the Virgin Islands, American Samoa and the Northern Mariana Islands).

Section 1015. Expansion and Reauthorization of the Crime Identification Technology Act for Antiterrorism Grants to States and Localities

The Crime Identification Technology Act, Public Law 105-251, 112 Stat. 1871 (1998), 42 U.S.C. 14601, authorizes the OJP to issue state and local grants for the development of various integrated information and identification systems and for that purpose authorizes appropriations of $250 million for each fiscal year through 2003. Section 1015 amends section 14601 to permit grants for related terrorism purposes and extends the authorization of appropriations in the amount of $250 million per year through fiscal year 2007.

Section 1016. Critical Infrastructures Protection

Section 1016 authorizes appropriations of $20 million for fiscal year 2002 to be used by the Department of Defense's Defense Threat Reduction Agency for activities of National Infrastructure Simulation and Analysis Center.

Congressional Research Service ˜
The Library of Congress

SUMMARY

The USA PATRIOT Act passed in the wake of the September 11 terrorist attacks. It flows from a consultation draft circulated by the Department of Justice, to which Congress made substantial modifications and additions. The stated purpose of the Act is to enable law enforcement officials to track down and punish those responsible for the attacks and to protect against any similar attacks.

The Act grants federal officials greater powers to trace and intercept terrorists' communications both for law enforcement and foreign intelligence purposes. It reenforces federal anti-money laundering laws and regulations in an effort to deny terrorists the resources necessary for future attacks. It tightens our immigration laws to close our borders to foreign terrorists and to expel those among us. Finally, it creates a few new federal crimes, such as the one outlawing terrorists' attacks on mass transit; increases the penalties for many others; and institutes several procedural changes, such as a longer statute of limitations for crimes of terrorism.

Critics have suggested that it may go too far. The authority to monitor e-mail traffic, to share grand jury information with intelligence and immigration officers, to confiscate property, and to impose new book-keeping requirements on financial institutions, are among the features troubling to some.

The Act itself responds to some of these reservations. Many of the wiretapping and foreign intelligence amendments sunset on December 31, 2005. The Act

creates judicial safeguards for e-mail monitoring and grand jury disclosures; recognizes innocent owner defenses to forfeiture; and entrusts enhanced anti-money laundering powers to those regulatory authorities whose concerns include the wellbeing of our financial institutions.

This report, stripped of its citations and footnotes, is available in an abbreviated form as The USA PATRIOT Act: A Sketch, CRS REP.NO. RS21203. In addition, much of the information contained here may also be found under a different arrangement in a report entitled, Terrorism: Section by Section Analysis of the USA PATRIOT Act, CRS REP.NO. RL31200 (Dec. 10, 2001). A wider array of terrorism-related analysis appears on the CRS terrorism electronic briefing book page.

INTRODUCTION

Congress passed the USA PATRIOT Act (the Act) in response to the terrorists' attacks of September 11, 2001.[3330] The Act gives federal officials greater authority to track and intercept communications, both for law enforcement and foreign intelligence gathering purposes. It vests the Secretary of the Treasury with regulatory powers to combat corruption of U.S. financial institutions for foreign money laundering purposes. It seeks to further close our borders to foreign terrorists and to detain and remove those within our borders. It creates new crimes, new penalties, and new procedural efficiencies for use against domestic and international terrorists. Although it is not without safeguards, critics contend some of its provisions go too far. Although it grants many of the enhancements sought by the Department of Justice, others are concerned that it does not go far enough.

The Act originated as H.R.2975 (the PATRIOT Act) in the House and S.1510 in the Senate (the USA Act).[3331] S.1510 passed the Senate on October 11, 2001, 147 Cong.Rec. S10604 (daily ed.). The House Judiciary Committee reported out an amended version of H.R. 2975 on the same day, H.R.Rep.No. 107-236. The House passed H.R. 2975 the following day after substituting the text of H.R. 3108, 147 Cong.Rec. H6775-776 (daily ed. Oct. 12, 2001). The House-passed version incorporated most of the money laundering provisions found in an earlier House bill, H.R. 3004, many of which had counterparts in S.1510 as approved by

---

[3330] P.L. 107-56, 115 Stat. 272 (2001); its full title is the "Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT)."

[3331] H.R. 2975 was introduced by Representative Sensenbrenner for himself and Representatives Conyers, Hyde, Coble, Goodlatte, Jenkins, Jackson-Lee, Cannon, Meehan, Graham, Bachus, Wexler, Hostettler, Keller, Issa, Hart, Flake, Schiff, Thomas, Goss, Rangel, Berman and Lofgren; S.1510 by Senator Daschle for himself and Senators Lott, Leahy, Hatch, Graham, Shelby and Sarbanes.

the Senate.[3332] The House subsequently passed a clean bill, H.R. 3162 (under suspension of the rules), which resolved the differences between H.R. 2975 and S.1510, 147 Cong. Rec. H7224 (daily ed. Oct. 24, 2001). The Senate agreed, 147 Cong. Rec. S10969 (daily ed. Oct. 24, 2001), and H.R. 3162 was sent to the President who signed it on October 26, 2001.

CRIMINAL INVESTIGATIONS: TRACKING AND GATHERING COMMUNICATIONS

A portion of the Act addresses issues suggested originally in a Department of Justice proposal circulated in mid-September.[3333] The first of its suggestions called for amendments to federal surveillance laws, laws which govern the capture and tracking of suspected terrorists' communications within the United States. Federal law features a three tiered system, erected for the dual purpose of protecting the confidentiality of private telephone, face-to-face, and computer communications while enabling authorities to identify and intercept criminal communications.[3334]

The tiers reflected the Supreme Court's interpretation of the Fourth Amendment's ban on unreasonable searches and seizures.[3335] The Amendment protects private conversations, Berger v. New York, 388 U.S. 41 (1967); Katz v. United States, 389 U.S. 347 (1967). It does not cloak information, even highly personal information, for which there is no individual justifiable expectation of privacy, such as telephone company records of calls made to and from an individual's home, Smith v. Maryland, 442 U.S. 735 (1979), or bank records of an individual's financial dealings, United States v. Miller, 425 U.S. 435 (1976).

[3332] H.R. 3004 was introduced by Representative Oxley for himself and Represenatives LaFalce, Leach, Maloney, Roukema, Bentsen, Hooley, Bereuter, Baker, Bachus, King, Kelly, Gillmore, Cantor, Riley, Latourette, Green (of Wisconsin), and Grucci; and reported out of the House Financial Services Committee with amendments on October 15, 2001, H.R.Rep.No. 107-250. H.R. 3004, as reported out, included Internet gambling amendments that were not included in H.R. 2975/H.R.3108.

[3333] The Department's proposal, dated September 20, 2001, came with a brief section by section analysis. Both the proposal (Draft) and analysis (DoJ) were printed as an appendix in Administration's Draft Anti-Terrorism Act of 2001, Hearing Before the House Comm. on the Judiciary, 107th Cong., 1st Sess. 54 (2001).

[3334] For a general discussion of federal law in the area prior to enactment of the Act, see, Stevens & Doyle, Privacy: An Overview of Federal Statutes Governing Wiretappping and Electronic Eavesdropping, CRS REP.NO. 98-327A (Aug. 8, 2001); Fishman & McKenna, WIRETAPPING AND EAVESDROPPING (2d ed. 1995 & 2001 Supp.).

[3335] "The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized," U.S. Const. Amend. IV.

Congress responded to Berger and Katz, with Title III of the Omnibus Crime Control and Safe Streets Act of 1968, 18 U.S.C. 2510-2522 (Title III). Title III, as amended, generally prohibits electronic eavesdropping on telephone conversations, face-to-face conversations, or computer and other forms of electronic communications, 18 U.S.C. 2511.[3336] At the same time, it gives authorities a narrowly defined process for electronic surveillance to be used as a last resort in serious criminal cases. When approved by senior Justice Department officials,[3337] law enforcement officers may seek a court order authorizing them to secretly capture conversations concerning any of a statutory list of offenses (predicate offenses), 18 U.S.C. 2516.[3338]

[3336] Although there are technical differences, the interception processes are popularly known as wiretapping, electronic eavesdropping, or electronic surveillance. The terms are used interchangeable here for purposes of convenience, but strictly speaking, wiretapping is limited to the mechanical or electronic interception of telephone conversations, while electronic eavesdropping or electronic surveillance refers to mechanical or electronic interception of communications generally.

[3337] "The Attorney General, Deputy Attorney General, Associate Attorney General, or any Assistant Attorney General, any acting Assistant Attorney General, or any Deputy Assistant Attorney General or acting Deputy Assistant Attorney General in the Criminal Division specially designated by the Attorney General, may authorize an application to a Federal judge of competent jurisdiction for, and such judge may grant in conformity with section 2518 of this chapter an order authorizing or approving the interception of wire or oral communications by the Federal Bureau of Investigation, or a Federal agency having responsibility for the investigation of the offense as to which the application is made, when such interception may provide or has provided evidence of" one or more predicate offense, 18 U.S.C. 2516.

[3338] The predicate offense list includes (a) felony violations of 42 U.S.C. 2274 through 2277 (enforcement of the Atomic Energy Act of 1954), 42 U.S.C. 2284 (sabotage of nuclear facilities or fuel), or of 18 U.S.C. ch. 37 (espionage), ch. 90 (protection of trade secrets), ch. 105 (sabotage), ch. 115 (treason), ch. 102 (riots), ch. 65 (malicious mischief), ch. 111 (destruction of vessels), or ch. 81 (piracy); (b) a violation of 29 U.S.C. 186 or 501(c) (restrictions on payments and loans to labor organizations), or any offense which involves murder, kidnapping, robbery, or extortion, and which is punishable under title 18 of the United States Code; (c) any offense which is punishable under 18 U.S.C. 201 (bribery of public officials and witnesses), 215 (bribery of bank officials), 224 (bribery in sporting contests), 844 (d), (e), (f), (g), (h), or (i) (unlawful use of explosives), 1032 (concealment of assets), 1084 (transmission of wagering information), 751 (escape), 1014 (loans and credit applications generally; renewals and discounts), 1503, 1512, and 1513 (influencing or injuring an officer, juror, or witness generally), 1510 (obstruction of criminal investigations), 1511 (obstruction of State or local law enforcement), 1751 (presidential and presidential staff assassination, kidnaping, or assault), 1951 (interference with commerce by threats or violence), 1952 (interstate and foreign travel or transportation in aid of racketeering enterprises), 1958 (use of interstate commerce facilities in the commission of murder for hire), 1959 (violent crimes in aid of racketeering activity), 1954 (offer, acceptance, or solicitation to influence operations of employee benefit plan), 1955 (prohibition of business enterprises of gambling), 1956 (laundering of monetary instruments), 1957 (engaging in monetary transactions in property derived from specified unlawful activity), 659 (theft from interstate shipment), 664 (embezzlement from pension and welfare funds), 1030 (computer abuse felonies), 1343 (fraud by wire, radio, or television), 1344 (bank fraud), 2251 and 2252 (sexual exploitation of children), 2312, 2313, 2314, and 2315 (interstate transportation of stolen property), 2321 (trafficking in certain motor vehicles or motor vehicle parts), 1203 (hostage taking), 1029 (fraud and related activity in connection with

Title III court orders come replete with instructions describing the permissible duration and scope of the surveillance as well as the conversations which may be seized and the efforts to be taken to minimize the seizure of innocent conversations, 18 U.S.C. 2518. The court notifies the parties to any conversations seized under the order after the order expires, 18 U.S.C. 2518(8).

Below Title III, the next tier of privacy protection covers some of those matters which the Supreme Court has described as beyond the reach of the Fourth Amendment protection – telephone records, e-mail held in third party storage, and the like, 18 U.S.C. 2701-2709 (Chapter 121). Here, the law permits law enforcement access, ordinarily pursuant to a warrant or court order or under a subpoena in some cases, but in connection with any criminal investigation and without the extraordinary levels of approval or constraint that mark a Title III interception, 18 U.S.C. 2703.

---

access devices), 3146 (penalty for failure to appear), 3521(b)(3) (witness relocation and assistance), 32 (destruction of aircraft or aircraft facilities), 38 (aircraft parts fraud), 1963 (violations with respect to racketeer influenced and corrupt organizations), 115 (threatening or retaliating against a Federal official), 1341 (mail fraud), 351 (violations with respect to congressional, Cabinet, or Supreme Court assassinations, kidnaping, or assault), 831 (prohibited transactions involving nuclear materials), 33 (destruction of motor vehicles or motor vehicle facilities), 175 (biological weapons), 1992 (wrecking trains), a felony violation of 1028 (production of false identification documentation), 1425 (procurement of citizenship or nationalization unlawfully), 1426 (reproduction of naturalization or citizenship papers), 1427 (sale of naturalization or citizenship papers), 1541 (passport issuance without authority), 1542 (false statements in passport applications), 1543 (forgery or false use of passports), 1544 (misuse of passports), or 1546 (fraud and misuse of visas, permits, and other documents); (d) any offense involving counterfeiting punishable under 18 U.S.C. 471, 472, or 473; (e) any offense involving fraud connected with a case under title 11 or the manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic drugs, marihuana, or other dangerous drugs, punishable under any law of the United States; (f) any offense including extortionate credit transactions under 18 U.S.C. 892, 893, or 894; (g) a violation of 31 U.S.C. 5322 (dealing with the reporting of currency transactions); (h) any felony violation of 18 U.S.C. 2511 and 2512 (interception and disclosure of certain communications and to certain intercepting devices); (i) any felony violation of 18 U.S.C. ch. 71 (obscenity); (j) 49 U.S.C. 60123(b) (destruction of a natural gas pipeline), 46502 (aircraft piracy); (k) 22 U.S.C. 2778 (Arms Export Control Act); (l) the location of any fugitive from justice from an offense described in this section; (m) a violation of 8 U.S.C. 1324, 1327, or 1328; (n) any felony violation of 18 U.S.C. 922, 924 (firearms); (o) any violation of 26 U.S.C. 5861 (firearms); (p) a felony violation of 18 U.S.C. 1028 (production of false identification documents), 1542 (false statements in passport applications), 1546 (fraud and misuse of visas, permits, and other documents) or a violation of 8 U.S.C. 1324, 1327, or 1328 (smuggling of aliens); (p) 229 (chemical weapons), 2332 (terrorist violence against Americans overseas), 2332a (weapons of mass destruction), 2332b (multinational terrorism), 2332d (financial transactions with countries supporting terrorism), 2339A (support of terrorist), 2332B (support of terrorist organizations); (r) any conspiracy to commit any of these, 18 U.S.C. 2516(1)(crimes added by the Act in italics). Other than telephone face to face conversations (i.e., electronic communications), the approval of senior Justice Department officials is not required and an order may be sought in any felony investigation, 18 U.S.C. 2516(3).

Least demanding and perhaps least intrusive of all is the procedure that governs court orders approving the government's use of trap and trace devices and pen registers, a kind of secret "caller id", which identify the source and destination of calls made to and from a particular telephone, 18 U.S.C. 3121-3127 (Chapter 206). The orders are available based on the government's certification, rather than a finding of the court, that the use of the device is likely to produce information relevant to the investigation of a crime, any crime, 18 U.S.C. 3123. The devices record no more than the identity of the participants in a telephone conversation,[3339] but neither the orders nor the results they produce need ever be revealed to the participants.

The Act modifies the procedures at each of the three levels. It:

- permits pen register and trap and trace orders for electronic communications (e.g., e-mail)
- authorizes nationwide execution of court orders for pen registers, trap and trace devices, and access to stored e-mail or communication records
- treats stored voice mail like stored e-mail (rather than like telephone conversations)
- permits authorities to intercept communications to and from a trespasser within a computer system (with the permission of the system's owner)
- adds terrorist and computer crimes to Title III's predicate offense list
- reenforces protection for those who help execute Title III, ch. 121, and ch. 206 orders
- encourages cooperation between law enforcement and foreign intelligence investigators
- establishes a claim against the U.S. for certain communications privacy violations by government personnel
- terminates the authority found in many of the these provisions and several of the foreign intelligence amendments with a sunset provision (Dec. 31, 2005).

Pen Registers and Trap and Trace Devices

In section 216, the Act allows court orders authorizing trap and trace devices and pen registers to be used to capture source and addressee information for computer conversations (e.g., e-mail) as well as telephone conversations, 18 U.S.C. 3121, 3123. In answer to objections that e-mail header information can be more revealing than a telephone number, it creates a detailed report to the court, 18 U.S.C. 3123(a)(3).[3340]

[3339] Or more precisely, they reveal no more than the identity of the numbers assigned to the telephone lines activated for a particular communication.

[3340] "Where the law enforcement agency implementing an ex parte order under this subsection seeks to do so by installing and using its own pen register or trap and trace device on a packet-switched data network of a provider of electronic communication service to the public the agency shall ensure that a record will be maintained which will identify – (i) any officer or officers who

The use of pen registers or trap and trace devices was limited at one time to the judicial district in which the order was issued, 18 U.S.C. 3123 (2000 ed.). Under section 216, a court with jurisdiction over the crime under investigation may issue an order to be executed anywhere in the United States, 18 U.S.C. 3123(b)(1)(C), 3127(2).[3341]

Communications Records and Stored E-Mail

With respect to chapter 126, relating among other things to the content of stored e-mail and to communications records held by third parties, the law permits criminal investigators to retrieve the content of electronic communications in storage, like e-mail, with a search warrant, and if the communication has been in remote storage for more than 180 days without notifying the subscriber, 18 U.S.C. 2703(a),(b). A warrant will also suffice to seize records describing telephone and other communications transactions without customer notice, 18 U.S.C. 2703(c). In the absence of the probable cause necessary for a warrant but with a showing of reasonable grounds to believe that the information sought is relevant to a criminal investigation, officers are entitled to a court order mandating access to electronic communications in remote storage for more than 180 days or to communications records, 18 U.S.C. 2703(b),(c). They can obtain a limited amount of record information (subscribers' names and addresses, telephone numbers, billing records and the like) using an administrative, grand jury, or trial court subpoena, 18 U.S.C. 2703(c)(1)(C). There is no subscriber notification in record cases. Elsewhere, the court may delay customer notification in the face of exigent circumstances or if notice is likely to seriously jeopardize the investigation or unduly delay the trial, 18 U.S.C. 2705.

In order to streamline the investigation process, the Act, in section 210, adds credit card and bank account numbers to the information law enforcement

---

installed the device and any officer or officers who accessed the device to obtain information from the network; (ii) the date and time the device was installed, the date and time the device was uninstalled, and the date, time, and duration of each time the device is accessed to obtain information; (iii) the configuration of the device at the time of its installation and any subsequent modification thereof; and (iv) any information which has been collected by the device. To the extent that the pen register or trap and trace device can be set automatically to record this information electronically, the record shall be maintained electronically throughout the installation and use of the such device. "(B) The record maintained under subparagraph (A) shall be provided ex parte and under seal to the court which entered the ex parte order authorizing the installation and use of the device within 30 days after termination of the order (including any extensions thereof)," section 216(b)(1).

[3341] The Justice Department urged the change in the name of expediency, "At present, the government must apply for new pen trap orders in every jurisdiction where an investigation is being pursued. Hence, law enforcement officers tracking a suspected terrorist in multiple jurisdictions must waste valuable time and resources by obtaining a duplicative order in each jurisdiction," DoJ at §101. Here and throughout citations to the United States Code (U.S.C.) without reference to an edition refer to the current Code; references to the 2000 edition of the Code refer to the law prior to amendment by the Act.

officials maysubpoena from a communications service provider's customer records, 18 U.S.C. 2703(c)(1)(C).[3342]

Another streamlining amendment, section 220, eliminates the jurisdictional restrictions on access to the content of stored e-mail pursuant to a court order. Previously, only a federal court in the district in which the e-mail was stored could issue the order. Under section 220, federal courts in the district where an offense under investigation occurred may issue orders applicable "without geographic limitation," 18 U.S.C. 2703.[3343]

The Act, in section 209, treats voice mail like e-mail, that is, subject to the warrant or court order procedure, rather than to the more demanding coverage of Title III once required, United States v. Smith, 155 F.3d 1050, 1055-56 (9th Cir. 1998).

Finally, the Act resolves a conflict between chapter 121 and the federal law governing cable companies. Government entities may have access to cable company customer records only under a court order following an adversary hearing if they can show that the records will evidence that the customer is or has engaged in criminal activity, 47 U.S.C. 511(h). When cable companies began offering telephone and other communications services the question arose whether the more demanding cable rules applied or whether law enforcement

---

[3342] Prior to the amendment, "investigators [could] not use a subpoena to obtain such records as credit card number or other form of payment. In many cases, users register with Internet service providers using false names, making the form of payment critical to determining the user's true identity. . . . this information [could] only be obtained by the slower and more cumbersome process of a court order. In fast-moving investigation[s] such as terrorist bombings – in which Internet communications are a critical method of identifying conspirators and in determining the source of the attacks – the delay necessitated by the use of court orders can often be important. Obtaining billing and other information can identify not only the perpetrator but also give valuable information about the financial accounts of those responsible and their conspirators," DoJ at §107.

[3343] Speaking of the law before amendment, DoJ explained, "Current law requires the government to use a search warrant to compel a provider to disclose unopened e-mail. 18 U.S.C. §2703(a). Because Federal Rule of Criminal Procedure 41 requires that the 'property' to be obtained 'be within the district' of the issuing court, however, the rule may not allow the issuance of §2703(a) warrants for e-mail located in other districts. Thus, for example, where an investigator in Boston is seeking electronic e-mail in the Yahoo! account of a suspected terrorist, he may need to coordinate with agents, prosecutors, and judges in the Northern District of California, none of whom have any other involvement in the investigation. This electronic communications information can be critical in establishing relationships, motives, means, and plans of terrorists. Moreover, it is equally relevant to cyber-incidents in which a terrorist motive has not (but may well be) identified. Finally, even cases that require the quickest response (kidnappings, threats, or other dangers to public safety or the economy) may rest on evidence gathered under §2703(a). To further public safety, this section accordingly authorizes courts with jurisdiction over investigations to compel evidence directly, without requiring the intervention of their counterparts in other districts where major Internet service providers are located," DoJ at §108.

agencies were entitled to ex parte court orders under the no-notice procedures applicable to communications providers.[3344] The Act makes it clear that the cable rules apply when cable television viewing services are involved and that the communications rules of chapter 121 apply when a cable company or anyone else provides communications services, section 211.

Electronic Surveillance

To Title III's predicate offense list, the Act adds cybercrime (18 U.S.C. 1030) and several terrorists crimes, sections 201, 202.[3345] A second cybercrime initiative, section 217, permits law enforcement officials to intercept the communications of an intruder within a protected computer system (i.e., a system used by the federal government, a financial institution, or one used in interstate or foreign commerce or communication), without the necessity of a warrant or court order, 18 U.S.C. 2511(2)(i). Yet only the interloper's intruding communications, those to or from the invaded system, are exposed under the section. The Justice Department originally sought the change because the law then did not clearly allow victims of computer trespassing to request law enforcement assistance in monitoring unauthorized attacks as they occur.[3346]

[3344] See e.g., DoJ at §109 ("Law enforcement must have the capability to trace, intercept, and obtain records of the communications of terrorists and other criminals with great speed, even if they choose to use a cable provider for their telephone and Internet service. This section amends the Cable Communications Policy Act ('Cable Act') to clarify that when a cable company acts as a telephone company or an Internet service provider, it must comply with the same laws governing the interception and disclosure of wire and electronic communications that apply to any other telephone company or Internet service provider. The Cable Act, passed in 1984 to regulate various aspects of the cable television industry, could not take into account the changes in technology that have occurred over the last seventeen years. Cable television companies now often provide Internet access and telephone service in addition to television programming. Because of perceived conflicts between the Cable Act and laws that govern law enforcement's access to communications and records of communications carried by cable companies, cable providers have refused to comply with lawful court orders, thereby slowing or ending critical investigations").

[3345] 18 U.S.C. 229 (chemical weapons), 2332(terrorist acts of violence committed against Americans overseas), 2332a(use of weapons of mass destruction), 2332b(acts of terrorism transcending national boundaries), 2332d(financial transactions with countries which support terrorists), 2339A(providing material support to terrorists), and 2339B(providing material support to terrorist organizations).

[3346] "Because service providers often lack the expertise, equipment, or financial resources required to monitor attacks themselves as permitted under current law, they often have no way to exercise their rights to protect themselves from unauthorized attackers. Moreover, such attackers can target critical infrastructures and engage in cyberterrorism," DoJ at §106. Elsewhere the Act defines "electronic surveillance" for purposes of the Foreign Intelligence Surveillance Act (FISA) to emphasize that the law enforcement authority for this intruder surveillance does not confer similar authority for purposes of foreign intelligence gathering, section 1003 (50 U.S.C. 1801(f)(2)).

Criminal Investigators' Access to Foreign Intelligence Information

The Act clearly contemplates closer working relations between criminal investigators and foreign intelligence investigators, particular in cases of international terrorism.[3347] It amends the Foreign Intelligence Surveillance Act (FISA) to that end. As originally enacted, the application for a surveillance order under FISA required certification of the fact that "the purpose for the surveillance is to obtain foreign intelligence information," 50 U.S.C. 1804(a)(7)(B)(2000 ed.) (emphasis added), although it anticipated that any evidence divulged as a result might be turned over to law enforcement officials. Defendants often questioned whether authorities had used a FISA surveillance order against them in order to avoid the predicate crime threshold for a Title III order. Out of these challenges arose the notion that perhaps "the purpose" might not always mean the sole purpose. The case law indicated that, while an expectation that evidence of a crime might be discovered did not preclude a FISA order, at such time as a criminal prosecution became the focus of the investigation officials were required to either end surveillance or secure an order under Title III.[3348]

[3347] For a general discussion of federal intelligence and law enforcement cooperation, see, Best, Intelligence and Law Enforcement: Countering Transnational Threats to the U.S., CRS REP.NO. RL30252 (Dec. 3, 2001).

[3348] Before FISA, several lower federal courts recognized a foreign intelligence exception to the Fourth Amendment's warrant clause. It is here that the "primary purpose" notion originated. In United States v. Truong Dinh Hung, 629 F.2d 908, 915 (4th Cir. 1980), decided after FISA on the basis of pre-existing law, the court declared, "as the district court ruled, the executive should be excused from securing a warrant only when the surveillance is conducted 'primarily' for foreign intelligence reasons. We think that the district court adopted the proper test, because once surveillance becomes primarily a criminal investigation, the courts are entirely competent to make the usual probable cause determination, and because, importantly, individual privacy interests come to the fore and government foreign policy concerns recede when the government is primarily attempting to form the basis for a criminal prosecution." Subsequent case law, however, is not as clear as it might be: see e.g., United States v. Duggan, 743 F.2d 59, 77 (2d Cir. 1984)("FISA permits federal officials to obtain orders authorizing electronic surveillance 'for the purpose of obtaining foreign intelligence information.' The requirement that foreign intelligence information be the primary objective of the surveillance is plain not only from the language of Sec. 1802(b) but also from the requirements in Sec. 1804 as to what the application must contain. The application must contain a certification by a designated official of the executive branch that the purpose of the surveillance is to acquire foreign intelligence information, and the certification must set forth the basis for the certifying officials's belief that the information sought is the type of foreign intelligence information described"); United States v. Pelton, 835 F.2d 1067, 1075-76 (4th Cir. 1987)("We also reject Pelton's claim that the 1985 FISA surveillance was conducted primarily for the purpose of his criminal prosecution, and not primarily for the purpose of obtaining foreign intelligence information. . . . We agree with the district court that the primary purpose of the surveillance, both initially and throughout was to gather foreign intelligence information. It is clear that otherwise valid FISA surveillance is not tainted simply because the government can anticipate that the fruits of the surveillance may later be used . . . as evidence in a criminal trial"); United States v. Sarkissian, 841 F.2d 959, 907-8 (9th Cir. 1988)("Defendants rely on the primary purpose test articulated in United States v. Truong Dinh Hung. . . . One other court has applied the primary purpose test. Another court has rejected it . . . distinguishing

The Justice Department sought FISA surveillance and physical search authority on the basis of "a" foreign intelligence purpose.[3349] Section 218 of the Act insists that foreign intelligence gathering be a "significant purpose" for the request for the FISA surveillance or physical search order, 50 U.S.C. 1804(a)(7)(B), 1823(a)(7)(B), a more demanding standard than the "a purpose" threshold proposed by the Justice Department, but a clear departure from the original "the purpose" entry point. FISA once described a singular foreign intelligence focus prerequisite for any FISA surveillance application. Section 504 of the Act further encourages coordination between intelligence and law enforcement officials, and states that such coordination is no impediment to a "significant purpose" certification, 50 U.S.C. 1806(k), 1825(k).[3350]

Protective Measures

The Act reenforces two kinds of safeguards, one set designed to prevent abuse and the other to protect those who assist the government. The sunset clause is perhaps the best known of the Act's safeguards. Under the direction of section 224, many of the law enforcement and foreign intelligence authorities granted by the Act expire as of December 31, 2005.[3351] The Act also fills some of the gaps in

---

Truong. A third court has declined to decide the issue. We also decline to decide the issue"); United States v. Johnson, 952 F.2d 565, 572 (1st Cir. 1991)("Appellants attack the government's surveillance on the ground that it was undertaken not for foreign intelligence purposes, but to gather evidence for a criminal prosecution. FISA applications must contain, among other things, a certification that the purpose of the requested surveillance is the gathering of foreign intelligence information. . . . Although the evidence obtained under FISA subsequently may be used in criminal prosecutions, the investigation of criminal activity cannot be the primary purpose of the surveillance").

[3349] "Current law requires that FISA be used only where foreign intelligence gathering is the sole or primary purpose of the investigation. This section will clarify that the certification of a FISA request is supportable where foreign intelligence gathering is 'a' purpose of the investigation. This change would eliminate the current need continually to evaluate the relative weight of criminal and intelligence purposes, and would facilitate information sharing between law enforcement and foreign intelligence authorities which is critical to the success of anti-terrorism efforts," DoJ at §153.

[3350] "(k)(1) Federal officers who conduct electronic surveillance to acquire foreign intelligence information under this title may consult with Federal law enforcement officers to coordinate efforts to investigate or protect against – (A) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power; (B) sabotage or international terrorism by a foreign power or an agent of a foreign power; or (C) clandestine intelligence activities by an intelligence service or network of a foreign power or by an agent of a foreign power. (2) Coordination authorized under paragraph (1) shall not preclude the certification required by section 104(a)(7)(B) or the entry of an order under section 105." FISA defines "foreign power" and "agent of a foreign power" broadly, see note 33, infra, quoting, 50 U.S.C. 1801.

[3351] "(a) Except as provided in subsection (b), this title and the amendments made by this title (other than sections 203(a)[sharing grand jury information], 203(c)[procedures for sharing grand jury information], 205 [FBI translators], 208 [seizure of stored voice-mail], 210[subpoenas for communications provider customer records], 211[access to cable company communication service

earlier sanctions available for official, abusive invasions of privacy. Prior law made it a federal crime to violate Title III (wiretapping), chapter 121 (e-mail and communications records), or chapter 206 (pen registers and trap and trace devices).[3352] Victims of offenses under Title III and chapter 121 (but not chapter 206) were entitled to damages (punitive damages in some cases) and reasonable attorneys' fees,[3353] but could not recover against the United States.[3354] Chapter 121 alone insisted upon an investigation into whether disciplinary action ought to be taken when federal officers or employees were found to have intentionally violated its proscriptions, 18 U.S.C. 2707.

The Act augments these sanctions by authorizing a claim against the United States for not less than $10,000 and costs for violations of Title III, chapter 121, or the Foreign Intelligence Surveillance Act (FISA), by federal officials, and emphasizing the prospect of administrative discipline for offending federal officials, section 223.

Finally, the Act instructs the Department of Justice's Inspector General to designate an official to receive and review complaints of civil liberties violations by DoJ officers and employees, section 1001.

The second category of protective measures applies to service providers and others who help authorities track and gather communications information. For

---

records], 213[sneak and peek], 216[pen register and trap and trace device amendments], 221[trade sanctions], and 222[assistance to law enforcement], and the amendments made by those sections) shall cease to have effect on December 31, 2005. "(b) With respect to any particular foreign intelligence investigation that began before the date on which the provisions referred to in subsection (a) cease to have effect, or with respect to any particular offense or potential offense that began or occurred before the date on which such provisions cease to have effect, such provisions shall continue in effect," section 224. The sections which expire are: 201 and 202 (adding certain terrorism crimes to the predicate list for Title III), 293(b)(sharing Title III information with foreign intelligence officers), 204 (clarifying the foreign intelligence exception to the law enforcement pen register and trap and trace device provisions), 206 (roving foreign intelligence surveillance), 207 (duration of foreign intelligence surveillance orders and extensions), 209 (treatment of voice mail as e-mail rather than as telephone conversation), 212 (service provider disclosures in emergency cases), 214 (authority for pen registers and trap and trace devices in foreign intelligence cases), 215 (production of tangible items in foreign intelligence investigations), 217 (intercepting computer trespassers' communications), 218 (foreign intelligence surveillance when foreign intelligence gathering is "a significant" reason rather than "the" reason for the surveillance), 219 (nationwide terrorism search warrants), 220 (nationwide communication records and stored e-mail search warrants), 223 (civil liability and administrative discipline for violations of Title III, chapter 121, and certain foreign intelligence prohibitions), and 225 (immunity for foreign intelligence surveillance assistance).

[3352] 18 U.S.C. 2511, 2701, and 3121 (2000 ed.), respectively.

[3353] 18 U.S.C. 2520 and 2707 (2000 ed.).

[3354] Spock v. United States, 464 F.Supp. 510, 514 n.2 (S.D.N.Y. 1978); Asmar v. IRS, 680 F.Supp. 248, 250 (E.D.Mich. 1987).

example, section 815 immunizes service providers who in good faith preserve customer records at the government's request until a court order authorizing access can be obtained.[3355] Another allows providers to disclose customer records to protect the provider's rights and property and to disclose stored customer communications and records in emergency circumstances, section 212. Under pre-existing law providers could disclose the content of stored communications but not customer records. The Justice Department recommended the changes in the interests of greater protection against cybercrimes committed by terrorists and others.[3356] A third section, section 222 promises reasonable compensation for service providers and anyone else who help law enforcement install or apply pen registers or trap and trace devices,[3357] but makes it clear that nothing in the Act is intended to expand communications providers' obligation to make modifications in their systems in order to accommodate law enforcement needs.[3358]

[3355] Prior law already granted service providers immunity for disclosure of customer records in compliance with a court access order, 18 U.S.C. 2703(f).

[3356] "Existing law contains no provision that allows providers of electronic communications service to disclose the communications (or records relating to such communications) of their customers or subscribers in emergencies that threaten death or serious bodily injury. This section amends 18 U.S.C. §2702 to authorize such disclosures if the provider reasonably believes that an emergency involving immediate danger of death or serious physical injury to any person requires disclosure of the information without delay. "Current law also contains an odd disconnect: a provider may disclose the contents of the customer's communications in order to protect its rights or property but the current statute does not expressly permit a provider to voluntarily disclose non-content records (such as a subscriber's login records). 18 U.S.C. 2702(b)(5). This problem substantially hinders the ability of providers to protect themselves from cyber-terrorists and criminals. Yet the right to disclose the contents of communications necessarily implies the less intrusive ability to disclose non-content records. In order to promote the protection of our nation's critical infrastructures, this section's amendments allow communications providers to voluntarily disclose both content and non-content records to protect their computer systems," DoJ at § 110.

[3357] Chapter 206 had long guaranteed providers and others reasonable compensation, 18 U.S.C. 3124(c), but section 216 of the Act expands the circumstances under which the authorities may request assistance including requests for the help of those not specifically mentioned in the court order. Section 222 makes it clear the expanded obligation to provide assistance is matched by a corresponding right to compensation.

[3358] Thus in the name of assisting in the execution of Title III, chapter 121, or chapter 206 order, the courts may not cite the Act as the basis for an order compelling a service provider to make system modifications or provide any other technical assistance not already required under 18 U.S.C. 2518(4), 2706, or 3124(c), see, H.R.Rep.No. 107-236, at 62-3 (2001) (emphasis added) ("This Act is not intended to affect obligations under Communications Assistance for Law Enforcement Act [which addresses law enforcement-beneficial system modifications and the compensation to be paid for the changes], nor does the act impose any additional technical obligation or requirement on a provider of wire or electronic communication service or other person to furnish facilities or technical assistance").

Although both criminal investigations and foreign intelligence investigations are conducted in the United States, criminal investigations seek information about unlawful activity; foreign intelligence investigations seek information about other countries and their citizens. Foreign intelligence is not limited to criminal, hostile, or even governmental activity. Simply being foreign is enough.[3359]

Restrictions on intelligence gathering within the United States mirror American abhorrence of the creation of a secret police, coupled with memories of intelligence gathering practices during the Vietnam conflict which some felt threatened to chill robust public debate. Yet there is no absolute ban on foreign intelligence gathering in the United States. Congress enacted the Foreign Intelligence Surveillance Act (FISA),[3360] something of a Title III for foreign intelligence wiretapping conducted in this country, after the Supreme Court made it clear that the President's authority to see to national security was insufficient to excuse warrantless wiretapping of suspected terrorists who had no identifiable foreign connections, United States v. United States District Court, 407 U.S. 297 (1972). FISA later grew to include procedures for physical searches in foreign intelligence cases, 50 U.S.C. 1821-1829, for pen register and trap and trace orders, 50 U.S.C. 1841-1846, and for access to records from businesses engaged in car rentals, motel accommodations, and storage lockers, 50 U.S.C. 1861-1863 (2000 ed.). Intelligence authorities gained narrow passages through other privacy barriers as well.[3361]

In many instances, access was limited to information related to the activities of foreign governments or their agents in this country, not simply relating to something foreign here. FISA, for example, is directed at foreign governments, international terrorists, and their agents, spies and saboteurs.[3362] There were and

---

[3359] E.g., As amended by section 902 of the Act, "'foreign intelligence' means information relating to the capabilities, intentions, or activities of foreign governments or elements thereof, foreign organizations, or foreign persons, or international terrorist activities," 50 U.S.C. 401a(2)(language added by the Act in italics).

[3360] 50 U.S.C. 1801 et seq.

[3361] E.g., 18 U.S.C. 2709 (counterintelligence access to telephone toll and transaction records), 12 U.S.C. 3414 (right to financial privacy), 15 U.S.C. 1681u(fair credit reporting).

[3362] "As used in this subchapter: (a) 'Foreign power' means – (1) a foreign government or any component thereof, whether or not recognized by the United States; (2) a faction of a foreign nation or nations, not substantially composed of United States persons; (3) an entity that is openly acknowledged by a foreign government or governments to be directed and controlled by such foreign government or governments; (4) a group engaged in international terrorism or activities in preparation therefor; (5) a foreign-based political organization, not substantially composed of United States persons; or (6) an entity that is directed and controlled by a foreign government or governments. "(b) 'Agent of a foreign power' means – (1) any person other than a United States person, who – (A) acts in the United States as an officer or employee of a foreign

still are extra safeguards if it appears that an intelligence investigation may generate information about Americans ("United States persons," i.e., citizens or permanent resident aliens).[3363] The procedures tend to operate under judicial supervision and tend to be confidential as a matter of law, prudence, and practice.

The Act eases some of the restrictions on foreign intelligence gathering within the United States, and affords the U.S. intelligence community greater access to

---

power, or as a member of a foreign power as defined in subsection (a)(4) of this section; (B) acts for or on behalf of a foreign power which engages in clandestine intelligence activities in the United States contrary to the interests of the United States, when the circumstances of such person's presence in the United States indicate that such person may engage in such activities in the United States, or when such person knowingly aids or abets any person in the conduct of such activities or knowingly conspires with any person to engage in such activities; or (2) any person who – (A) knowingly engages in clandestine intelligence gathering activities for or on behalf of a foreign power, which activities involve or may involve a violation of the criminal statutes of the United States; (B) pursuant to the direction of an intelligence service or network of a foreign power, knowingly engages in any other clandestine intelligence activities for or on behalf of such foreign power, which activities involve or are about to involve a violation of the criminal statutes of the United States;(C) knowingly engages in sabotage or international terrorism, or activities that are in preparation therefor, or on behalf of a foreign power; (D) knowingly enters the United States under a false or fraudulent identity for or on behalf of a foreign power or, while in the United States, knowingly assumes a false or fraudulent identity for or on behalf of a foreign power; or (E) knowingly aids or abets any person in the conduct of activities described in subparagraph (A), (B), or (C) or knowingly conspires with any person to engage in activities described in subparagraph (A), (B), or (C). "(c) 'International terrorism' means activities that – (1) involve violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State, or that would be a criminal violation if committed within the jurisdiction of the United States or any State; (2) appear to be intended – (A) to intimidate or coerce a civilian population; (B) to influence the policy of a government by intimidation or coercion; or (C) to affect the conduct of a government by assassination or kidnaping; and (3) occur totally outside the United States, or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum. "(d) 'Sabotage' means activities that involve a violation of chapter 105 of Title 18, or that would involve such a violation if committed against the United States. "(e) 'foreign intelligence information' means – (1) information that relates to, and if concerning a United States person is necessary to, the ability of the United States to protect against – (A) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power; (B) sabotage or international terrorism by a foreign power or an agent of a foreign power; or (C) clandestine intelligence activities by an intelligence service or network of a foreign power or by an agent of a foreign power; or (2) information with respect to a foreign power or foreign territory that relates to, and if concerning a United States person is necessary to – (A) the national defense or the security of the United States; or (B) the conduct of the foreign affairs of the United States," 50 U.S.C. 1801.

[3363] Strictly speaking for FISA purposes, a United States person "means a citizen of the United States, an alien lawfully admitted for permanent residence (as defined in section 1101(a)(20) of Title 8), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence, or a corporation which is incorporated in the United States, but does not include a corporation or an association which is a foreign power, as defined in subsection (a)(1), (2), or (3) of this section," 50 U.S.C. 1801(i).

information unearthed during a criminal investigation, but it also establishes and expands safeguards against official abuse. More specifically, it:

- permits "roving" surveillance (court orders omitting the identification of the particular instrument, facilities, or place where the surveillance is to occur when the court finds the target is likely to thwart identification with particularity)
- increases the number of judges on the FISA court from 7 to 11
- allows application for a FISA surveillance or search order when gathering foreign intelligence is a significant reason for the application rather than the reason
- authorizes pen register and trap & trace device orders for e-mail as well as telephone conversations
- sanctions court ordered access to any tangible item rather than only business records held by lodging, car rental, and locker rental businesses
- carries a sunset provision
- establishes a claim against the U.S. for certain communications privacy violations by government personnel
- expands the prohibition against FISA orders based solely on an American's exercise of his or her First Amendment rights.

FISA

FISA is in essence a series of procedures available to secure court orders in certain foreign intelligence cases.[3364] It operates through the judges of a special court which prior to the Act consisted of seven judges, scattered throughout the country, two of whom were from the Washington, D.C. area. The Act, in section 208, authorizes the appointment of four additional judges and requires that three members of the court reside within twenty miles of the District of Columbia, 50 U.S.C. 1803(a).

Search and Surveillance for Intelligence Purposes

Unless directed at a foreign power, the maximum duration for FISA surveillance orders and extensions was once ninety days and forty-five days for physical search orders and extensions, 50 U.S.C. 1805(e), 1824(d)(2000 ed.). The Act, in section 207, extends the maximum tenure of physical search orders to ninety days and in the case of both surveillance orders and physical search orders extends the maximum life of an order involving an agent of a foreign power to 120 days, with extensions for up to a year, 50 U.S.C. 1805(e), 1824(d). This represents a compromise over the Justice Department's original proposal which

---

[3364] For a general discussion of FISA prior to enactment of the Act, see, Bazan, The Foreign Intelligence Surveillance Act: An Overview of the Statutory Framework for Electronic Surveillance, CRS REP.NO. RL30465 (Sept. 18, 2001).

would have set the required expiration date for orders at one year instead of 120 days, Draft at §151.[3365]

Section 901 of the Act address a concern raised during the 106th Congress relating to the availability of the FISA orders and the effective use of information gleaned from the execution of a FISA order.[3366] It vests the Director of Central Intelligence with the responsibility to formulate requirements and priorities for the use of FISA to collect foreign intelligence information. He is also charged

---

[3365] See also, DoJ at §151, "This section reforms a critical aspect of the Foreign Intelligence Surveillance Act (FISA). It will enable the Foreign Intelligence Surveillance Court (FISC), which presides over applications made by the U.S. government under FISA, to authorize the search and surveillance in the U.S. of officers and employees of foreign powers and foreign members of international terrorist groups for up to a year. Currently, the FISC may only authorize such searches and surveillance for up to 45 days and 90 days, respectively. The proposed change would bring the authorization period in line with that allowed for search and surveillance of the foreign establishments for which the foreign officers and employees work. The proposed change would have no effect on electronic surveillance of U.S. citizens or permanent resident aliens." Section 314 of the Intelligence Authorization Act for Fiscal Year 2002 (Intelligence Authorization Act), P.L. 107-108, 115 Stat. 1394, 1402 (2001), further amended some of the time limits relating to FISA surveillance and physical searches, extending from 24 hours to 72 hours: (a) the time period during which agents might disseminate or use information secured pursuant to a FISA surveillance or search order but otherwise protected from dissemination or use by the order's minimization requirements; and (b) the permissible duration of emergency surveillance or searches after which surveillance or the search must stop or a FISA order application filed (50 U.S.C. 1801(h)(4), 1821(4)(D), 1805(f), 1824(e)).

[3366] See e.g., S.Rep.No. 106-352, at 3, 6, 7 (2000)("The Office of Intelligence Policy and Review (OIPR) in the Department of Justice is responsible for advising the Attorney General on matters relating to the national security of the United States. As part of its responsibilities, the OIPR prepares and presents to the Foreign Intelligence Surveillance Court (FISC) all applications for electronic surveillance and physical searches under the Foreign Intelligence Surveillance Act . . . . Agencies have informed the Committee that the FISA application process, as interpreted by the OIPR is administratively burdensome and, at times, extremely slow. Many applications undergo months of scrutiny before submission to the court because the OIPR prescribes standards and restrictions not imposed by the statute. . . . In particular, the OIPR has been criticized for an overly restrictive interpretation of the FISA 'currency' requirement. This is the issue of how recent a subject's activities must be to support a finding of probable cause that the subject is engaged in clandestine intelligence gathering activities. . . .While existing law does not specifically address ``past activities,'' it does not preclude, and legislative history supports, the conclusion that past activities may be part of the totality of circumstances considered by the FISC in making a probable cause determination. . . . By definition, information collected pursuant to a court order issued under the Foreign Intelligence Surveillance Act is foreign intelligence not law enforcement information. Accordingly, the Committee wants to clarify that the FISA `take' can and must be shared by the Federal Bureau of Investigation with appropriate intelligence agencies. For the intelligence mission of the United States to be successful, there must be a cooperative and concerted effort among intelligence agencies. Any information collected by one agency under foreign intelligence authorities that could assist another agency in executing its lawful mission should be shared fully and promptly. Only then can the United States Government pursue aggressively important national security targets including, for example, counterterrorist and counternarcotics targets"); see also, 147 Cong. Rec. S799-803 (daily ed. Feb. 24, 2000)(remarks of Sens. Specter, Torricelli and Biden).

with the responsibility of assisting the Attorney General in the efficient and effective dissemination of FISA generated information (50 U.S.C. 403-3(c)).

Pen Registers and Trap and Trace Devices for Intelligence Gathering

Section 214 grants the request of the Department of Justice by dropping requirements which limited FISA pen register and trap and trace device orders to facilities used by foreign agents or those engaged in international terrorist or clandestine intelligence activities, 50 U.S.C. 1842(c)(3)(2000 ed.).[3367] It is enough that the order is sought as part of an investigation to protect against international terrorism or clandestine intelligence activities and is not motivated solely by an American's exercise of his or her First Amendment rights. Elsewhere (section 505), the Act drops a similar limitation for intelligence officials' access to telephone records, 18 U.S.C. 2709(b), and under the Right to Financial Privacy Act, 12 U.S.C. 3414(a)(5)(A), as well as the Fair Credit Reporting Act, 15 U.S.C. 1681u.[3368]

[3367] "When added to FISA two years ago, the pen register/trap and trace section was intended to mirror the criminal pen/trap authority defined in 18 U.S.C. §3123. The FISA authority differs from the criminal authority in that it requires, in addition to a showing of relevance, an additional factual showing that the communications device has been used to contact an 'agent of a foreign power' engaged in international terrorism or clandestine intelligence activities. This has the effect of making the FISA pen/trap authority much more difficult to obtain. In fact, the process of obtaining FISA pen/trap authority is only slightly less burdensome than the process for obtaining full electronic surveillance authority under FISA. This stands in stark contrast to the criminal pen/trap authority, which can be obtained quickly from a local court, on the basis of a certification that the information to be obtained is relevant to an ongoing investigation. The amendment simply eliminates the 'agent of a foreign power' prong from the predication, and thus makes the FISA authority more closely track the criminal authority," DoJ at §155.

[3368] Except in the case of certain credit information, these are not court procedures, but written requests for third party records which would otherwise to be entitled to confidentiality. Section 505, in response to the Justice Department's suggestion, allows FBI field offices to make the requests, see DoJ at §157 ("At the present time, National Security Letter (NSL) authority exists in three separate statutes: the Electronic Communications Privacy Act (for telephone and electronic communications records), the Financial Right to Privacy Act (for financial records), and the Fair Credit Reporting Act (for credit records). Like the FISA pen register/trap and trace authority described above, NSL authority requires both a showing of relevance and a showing of links to an 'agent of a foreign power.' In this respect, they are substantially more demanding than the analogous criminal authorities, which require only a certification of relevance. Because the NSLs require documentation of the facts supporting the 'agent of a foreign power' predicate and because they require the signature of a high-ranking official at FBI headquarters, they often take months to be issued. This is in stark contrast to criminal subpoenas, which can be used to obtain the same information, and are issued rapidly at the local level. In many cases, counterintelligence and counterterrorism investigations suffer substantial delays while waiting for NSLs to be prepared, returned from headquarters, and served. The section would streamline the process of obtaining NSL authority, and also clarify the FISA Court can issue orders compelling production of consumer reports").

Section 214 adjusts the language of the FISA pen register-trap and trace authority to permit its use to capture source and destination information relating to electronic communications (e.g., e-mail) as well as telephone communications, 50 U.S.C. 1842(d). The section makes it clear that requests for a FISA pen register-trap and trace order, like requests for other FISA orders, directed against Americans (U.S. persons) may not be based solely on activities protected by the First Amendment, 50 U.S.C. 1842, 1843.

Third Party Cooperation and Tangible Evidence

As in the case of criminal investigations, the Act has several sections designed to encourage third party cooperation and to immunize third parties from civil liability for their assistance. FISA orders may include instructions directing specifically identified third parties to assist in the execution of the order, 50 U.S.C. 1805(c)(2)(B). The Act permits inclusion of a general directive for assistance when the target's activities are designed to prevent more specific identification, section 206, and immunizes in 50 U.S.C. 1805(h), those who provide such assistance, section 225.[3369]

Prior to the Act, FISA allowed federal intelligence officers to seek a court order for access to certain car rental, storage, and hotel accommodation records, 50 U.S.C. 1861 to 1863 (2000 ed.). The Justice Department asked that the authority be replaced with permission to issue administrative subpoenas for any tangible item regardless of the business (if any) of the custodian.[3370] The Act amends the

---

[3369] When it requested the amendment, the Department of Justice explained that the "provision expands the obligations of third parties to furnish assistance to the government under FISA. Under current FISA provisions, the government can seek information and assistance from common carriers, landlords, custodians and other persons specified in court-ordered surveillance. Section 152 would amend FISA to expand existing authority to allow, 'in circumstances where the Court finds that the actions of the target of the application may have the effect of thwarting the identification of a specified person that a common carrier, landlord, custodian or other persons not specified in the Court's order be required to furnish the applicant information and technical assistance necessary to accomplish electronic surveillance in a manner that will protect its secrecy and produce a minimum of interference with the services that such person is providing to the target of electronic surveillance.' This would enhance the FBI's ability to monitor international terrorists and intelligence officers who are trained to thwart surveillance by rapidly changing hotel accommodations, cell phones, Internet accounts, etc., just prior to important meetings or communications. Under the current law, the government would have to return to the FISA Court for an order that named the new carrier, landlord, etc., before effecting surveillance. Under the proposed amendment, the FBI could simply present the newly discovered carrier, landlord, custodian or other person with a generic order issued by the Court and could then effect FISA coverage as soon as technically feasible," DoJ at 152. Section 314 of the Intelligence Authorization Act immunizes those who assist in the execution of either a FISA surveillance or physical search order (50 U.S.C. 1805(i)), 115 Stat. 1402.

[3370] "The 'business records' section of FISA (50 U.S.C. §§ 1861 and 1862) requires a formal pleading to the Court and the signature of a FISA judge (or magistrate). In practice, this makes the authority unavailable for most investigative contexts. The time and difficulty involved in getting such pleadings before the Court usually outweighs the importance of the business records

provisions, preserving the court order requirement. Yet it allows the procedure to be used in foreign intelligence investigations, conducted to protect against international terrorism or clandestine intelligence activities,[3371] in order to seize any tangible item regardless of who is in possession of the item, and continues in place the immunity for good faith compliance by third party custodians, section 215.

In a related provision, Section 358 amends the –

- purposes section of the Currency and Foreign Transaction Reporting Act (31 U.S.C. 5311);
- suspicious activities reporting requirements section of that Act (31 U.S.C. 5318(g)(4)(B);
- availability of records section of that Act (31 U.S.C. 5319);
- purposes section of the Bank Secrecy Act (12 U.S.C. 1829b(a);
- the Secretary of the Treasury's authority over uninsured banks and other financial institutions under that Act (12 U.S.C. 1953(a);
- access provisions of the Right to Financial Privacy Act (12 U.S.C. 3412(2)(a), 3414(a)(1), 3420(a)(2); and
- access provisions of the Fair Credit Reporting Act (15 U.S.C. 1681u, 1681v; to clarify and authorize access of federal intelligence authorities to the reports and information gathered and protected under those Acts.[3372]

---

sought. Since its enactment, the authority has been sought less than five times. This section would delete the old authority and replace it with a general 'administrative subpoena' authority for documents and records. This authority, modeled on the administrative subpoena authority available to drug investigators pursuant to Title 21, allows the Attorney General to compel production of such records upon a finding that the information is relevant," DoJ at §156.

[3371] Section 314 of the Intelligence Authorization Act further amended the section to permit orders relating to investigations "to obtain foreign intelligence information not concerning a United States person" in addition to those conducted to protect against terrorism and clandestine activities, 50 U.S.C. 1861(a)(1).

[3372] H.R. Rep. No. 107-205, at 60-1 (2001)("This section clarifies the authority of the Secretary of the Treasury to share Bank Secrecy Act information with the intelligence community for intelligence or counterintelligence activities related to domestic or international terrorism. Under current law, the Secretary may share BSA information with the intelligence community for the purpose of investigating and prosecuting terrorism. This section would make clear that the intelligence community may use this information for purposes unrelated to law enforcement. "The provision would also expand a Right to Financial Privacy Act (RFPA) exemption, currently applicable to law enforcement inquiries, to allow an agency or department to share relevant financial records with another agency or department involved in intelligence or counterintelligence activities, investigations, or analyses related to domestic or international terrorism. The section would also exempt from most provisions of the RFPA a government authority engaged in investigations of or analyses related to domestic or international terrorism. This section would also authorize the sharing of financial records obtained through a Federal grand jury subpoena when relevant to intelligence or counterintelligence activities, investigations, or analyses related to domestic or international terrorism. In each case, the transferring governmental entity must certify that there is reason to believe that the financial records are relevant to such an activity, investigation, or analysis. "Finally, this section facilitates government

Access to Law Enforcement Information

Shortly after September 11, sources within both Congress and the Administration stressed the need for law enforcement and intelligence agencies to more effectively share information about terrorists and their activities. On September 14, the Senate Select Committee on Intelligence observed that, "effective sharing of information between and among the various components of the government-wide effort to combat terrorists is also essential, and is presently hindered by cultural, bureaucratic, resource, training and, in some cases, legal obstacles," H.R. Rep. No. 107-63, at 10 (2001). The Justice Department's consultation draft of September 20 offered three sections which would have greatly expanded the intelligence community's access to information collected as part of a criminal investigation. First, it suggested that information generated through the execution of a Title III order might be shared in connection with the duties of any executive branch official, Draft at §103.[3373]

Second, it recommended a change in Rule 6(e) of the Federal Rules of Criminal Procedure that would allow disclosure of grand jury material to intelligence officials, Draft at §354.[3374]

---

access to information contained in suspected terrorists' credit reports when the governmental inquiry relates to an investigation of, or intelligence activity or analysis relating to, domestic or international terrorism. Even though private entities such as lenders and insurers can access an individual's credit history, the government is strictly limited in its ability under current law to obtain the information. This section would permit those investigating suspected terrorists prompt access to credit histories that may reveal key information about the terrorist's plan or source of funding--without notifying the target. To obtain the information, the governmental authority must certify to the credit bureau that the information is necessary to conduct a terrorism investigation or analysis. The amendment would also create a safe harbor from liability for credit bureaus acting in good faith that comply with a government agency's request for information").

[3373] See also, DoJ at §103, "This section facilities the disclosure of Title III information to other components of the intelligence community in terrorism investigations. At present, 18 U.S.C. §2517(1) generally allows information obtained via wiretap to be disclosed only to the extent that it will assist a criminal investigation. One must obtain a court order to disclose Title III information in non-criminal proceedings. Section 109 [103] would modify the wiretap statutes to permit the disclosure of Title III-generated information to a non-law enforcement officer for such purposes as furthering an intelligence investigation. This will harmonize Title III standards with those of the Foreign Intelligence Surveillance Act (FISA), which allows such information-sharing. Allowing disclosure under Title III is particularly appropriate given that the requirements for obtaining a Title III surveillance order in general are more stringent than for a FISA order, and because the attendant privacy concerns in either situation are similar and are adequately protected by existing statutory provisions."

[3374] See also, DoJ at §354, "This section makes changes in Rule 6(e) of the Federal Rules of Criminal Procedure, relating to grand jury secrecy, to facilitate the sharing of information with federal law enforcement, intelligence, protective, national defense, and immigration personnel in terrorism and national security cases. The section is in part complimentary to section 154 of the bill, relating to sharing of foreign intelligence information, and reflects a similar purpose of promoting a coordinated governmental response to terrorist and national security threats."

Third, it proposed elimination of all constraints on sharing foreign intelligence information uncovered during a law enforcement investigation, mentioning by name the constraints in Rule 6(e) and Title III, Draft at §154.[3375]

The Act combines versions of all three in section 203. Perhaps because of the nature of the federal grand jury, resolution of the grand jury provision proved especially difficult. The federal grand jury is an exceptional institution. Its purpose is to determine if a crime has been committed, and if so by whom; to indict the guilty; and to refuse to indict the innocent. Its probes may begin without probable cause or any other threshold of suspicion.[3376] It examines witnesses and evidence ordinarily secured in its name and questioned before it by Justice Department prosecutors. Its affairs are conducted in private and outside the presence of the court. Only the attorney for the government, witnesses under examination, and a court reporter may attend its proceedings, F.R. Crim. P. 6(d). Matters occurring before the grand jury are secret and may be disclosed by the attending attorney for the government and those assisting the grand jury only in the performance of their duties; in presentation to a successor grand jury; or under court order for judicial proceedings, for inquiry into misconduct before the grand jury, or for state criminal proceedings, F.R.Crim.P. 6(e).

The Act, in section 203(a), allows disclosure of matters occurring before the grand jury to "any federal law enforcement, intelligence, protective, immigration,

---

Contrary to the implication here section 154 deals with sharing information gathered by law enforcement officials not with information gathered by intelligence officers

[3375] See also, DoJ at §154, "This section provides that foreign intelligence information obtained in criminal investigations, including grand jury and electronic surveillance information, may be shared with other federal government personnel having responsibilities relating to the defense of the nation and its interests. With limited exceptions, it is presently impossible for criminal investigators to share information obtained through a grand jury (including through the use of grand jury subpoenas) and information obtained from electronic surveillance authorized under Title III with the intelligence community. This limitation will be very significant in some criminal investigations. For example, grand jury subpoenas often are used to obtain telephone, computer, financial and other business records in organized crime investigations. Thus, these relatively basic investigative materials are inaccessible for examination by intelligence community analysts working on related transnational organized crime groups. A similar problem occurs in computer intrusion investigations: grand jury subpoenas and Title III intercepts are used to collect transactional data and to monitor the unknown intruders. The intelligence community will have an equal interest in such information, because the intruder may be acting on behalf of a foreign power."

[3376] Blair v. United States, 250 U.S. 273, 281 (1919)(the grand jury "is a grand inquest, a body with powers of investigation and inquisition, the scope of whose inquiries is not to be limited narrowly by questions of propriety or forecasts of whether any particular individual will be found properly subject to an accusation of crime").

national defense, or national security" officer to assist in the performance of his official duties, F.R.Crim.P. 6(e)(3)(C)(i)(V).[3377]

Critics may protest that the change could lead to the use of the grand jury for intelligence gathering purposes, or less euphemistically, to spy on Americans.[3378] The proposal was never among those scheduled to sunset, but earlier versions of the section followed the path used for most other disclosures of grand jury material: prior court approval, H.R.Rep.No. 107-236, at 73 (2001). The Act, in section 203(a), instead calls for confidential notification of the court that a disclosure has occurred and the entity to whom it was made, F.R. Crim. P. 6(e)(3)(C)(iii). It also insists that the Attorney General establish implementing procedures for instances when the disclosure "identifies" Americans (U.S. persons), section 203(c).

[3377] These officers may receive: (1) "foreign intelligence information" that is, information regardless whether it involves Americans or foreign nationals that "[a] relates to the ability of the United States to protect against – (aa) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power; (bb) sabotage or international terrorism by a foreign power or an agent of a foreign power; (cc) clandestine intelligence activities by an intelligence service or network of a foreign power;" or [b] "with respect to a foreign power or foreign territory that relates to – (aa) the national defense or security of the United States; or (bb) the conduct of the foreign affairs of the United States," F.R.Crim.P. 6(e)(3)(C)(iv); (2) when the matters involve foreign intelligence or counterintelligence, that is, [a] "information relating to the capabilities, intentions, or activities of foreign governments or elements thereof, foreign organizations, or foreign persons, or international terrorist activities" or [b] "information gathered and activities conducted, to protect against espionage, other intelligence activities, sabotage, or assassinations conducted on behalf of foreign governments or elements thereof, foreign organizations, or foreign persons, or international terrorist activities," 50 U.S.C. 401a(2),(3)(language added by section 902 of the Act in italics).

[3378] Beale & Felman, The Consequences of Enlisting Federal Grand Juries in the War on Terrorism: Assessing the USA PATRIOT Act's Changes to Grand Jury Secrecy, 25 HARVARD JOURNAL OF LAW & PUBLIC POLICY 699, 719-20 (2002)("There is a significant danger that the rule permitting disclosure will be treated as the de facto authorization of an expansion of the grand jury's investigative role to encompass seeking material relevant only to matters of national security, national defense, immigration, and so forth. The grand jury's awesome powers should not be unwittingly extended to a much wider range of issues. . . Since the grand jury operates in secret, there are no public checks on the scope of its investigations, and witnesses are not permitted to challenge its jurisdiction. Only the supervising court is in a position to keep the grand jury's investigation within proper bounds. Requiring judicial approval of foreign intelligence and counterintelligence information disclosures would provide a natural check against the temptation to manipulate the grand jury to develop information for unauthorized purposes"); but see, Scheidegger et al., Federalist Society White Paper on The USA PATRIOT Act of 2001: Criminal Procedure Sections 6 (Nov. 2001)("The grand jury secrecy rule is a rule of policy which has always had exceptions, and it has been frequently modified. The secrecy rule has no credible claim to constitutional stature").

Law enforcement officials may share Title III information with the intelligence community under the same conditions, section 203(b),[3379] although the grand jury and Title III sharing provisions differ in at least three important respects. The court need not be notified of Title III disclosures. On the other hand, the authority for sharing Title III information expires on December 31, 2005, section 224, and agencies and their personnel guilty of intentional improper disclosures may be subject to a claim for damages and disciplinary action, 18 U.S.C. 2520.

The third subsection of section 203 remains something of an enigma. It speaks in much the same language as its counterparts. It allows law enforcement officials to share information with the intelligence community, "notwithstanding any other provisions of law," section 203(d).[3380] It either swallows the other subsections, or supplements them. Several factors argue for its classification as a supplement. Congress is unlikely to have crafted subsections (a), (b) and (c) only to completely nullify them in subsection (d). Without a clear indication to the contrary, the courts are unlikely to find that Congress intended nullification.[3381] By gathering

---

[3379] Information derived from a Title III interception may be shared with any other federal law enforcement, intelligence, protective, immigration, national defense, or national security officer if it regards: (1) "foreign intelligence information" that is, information irrespective of whether it involves Americans or foreign nationals that "[A] relates to the ability of the United States to protect against – (i) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power; (ii) sabotage or international terrorism by a foreign power or an agent of a foreign power; (iii) clandestine intelligence activities by an intelligence service or network of a foreign power;" or [B] "with respect to a foreign power or foreign territory that relates to – (i) the national defense or security of the United States; or (ii) the conduct of the foreign affairs of the United States;" (2) when the matters involve foreign intelligence or counterintelligence as defined by 50 U.S.C. 401a (as amended by section 902 of the Act), i.e., "As used in this Act: (1) The term 'intelligence' includes foreign intelligence and counterintelligence. (2) The term 'foreign intelligence' means information relating to the capabilities, intentions, or activities of foreign governments or elements thereof, foreign organizations, or foreign persons, or international terrorist activities. (3) The term 'counterintelligence' means information gathered and activities conducted, to protect against espionage, other intelligence activities, sabotage, or assassinations conducted by or on behalf of foreign governments or elements thereof, foreign organizations, or foreign persons, or international terrorist activities" (language added by section 902 in italics).

[3380] "Notwithstanding any other provision of law, it shall be lawful for foreign intelligence or counterintelligence (as defined in section 3 of the National Security Act of 1947 (50 U.S.C.) or foreign intelligence information obtained as part of a criminal investigation to be disclosed to any federal law enforcement, intelligence, protective, immigration, national defense, or national security official in order to assist the official receiving that information in the performance of his official duties. Any federal official who receives information pursuant to this provision may use that information only as necessary in the conduct of that person's official duties subject to any limitations on the unauthorized disclosure of such information," §203(d)(1). The subsection goes to define "foreign intelligence information" in the same terms used to define that phrase in Title III (18 U.S.C. 2510(19)) and in Rule 6(e)(F.R.Crim.P.6(e)(3)(C)(iv)), §203(d)(2).

[3381] Duncan v. Walker, 121 S.Ct. 2120, 2125 (2001)(internal quotation marks and parallel citations omitted)("It is our duty to give effect, if possible, to every clause and word of a statute. United States v. Menasche, 348 U.S. 528, 538-539 (1955) (quoting Montclair v. Ramsdell, 107 U.S. 147,

the three into a single section Congress avoided the suggestion that the phrase "notwithstanding any other provision of law" constitutes surplusage. The Title III and grand jury sharing procedures are not in other provisions of law, they are now subsections of the same provision of law. Moreover, Congress seemed to signal an intent for the subsections to operate in tandem when it dropped the language of the original Justice Department proposal which expressly identified Title III and Rule 6(e) as examples of the restrictions to be overcome by the universal sharing language.[3382]

Section 203 deals with earlier legal impediments to sharing foreign intelligence information unearthed during the course of a criminal investigation. Section 905 looks to dissolve the barriers may be more cultural than legal. Under it, the Attorney General is to issue guidelines governing the transmittal to the Director of Central Intelligence of foreign intelligence information that surfaces in the course of a criminal investigation. The section also instructs the Attorney General to promulgate guidelines covering reports to the Director of Central Intelligence on whether a criminal investigation has been initiated or declined based on an intelligence community referral, 50 U.S.C. 403-5b. To ensure effective use of increased information sharing, section 908 calls for training of federal, state and local officials to enable them to recognize foreign intelligence information which they encounter in their work and how to use it in the performance of their duties, 28 U.S.C. 509 note.

Increasing Institutional Capacity

As noted elsewhere, the Act liberalizes authority for the FBI to hire translators, section 203, which enhances its capacity to conduct both criminal and foreign intelligence investigations. The Act also reflects sentiments expressed earlier concerning coordinated efforts to develop a computerized translation capability

---

152 (1883)); see also Williams v. Taylor, 529 U.S. 362, 404 (2000) (describing this rule as a cardinal principle of statutory construction); Market Co. v. Hoffman, 101 U.S. 112, 115 (1879)(As early as in Bacon's Abridgment, sect. 2, it was said that a statute ought, upon the whole, to be so construed that, if it can be prevented, no clause, sentence, or word shall be superfluous, void, or insignificant). We are thus reluctant to treat statutory terms as surplusage in any setting. Babbitt v. Sweet Home Chapter, Communities for Great Ore., 515 U.S. 687, 698 (1995); see also Ratzlaf v. United States, 510 U.S. 135, 140 (1994)"). It is not possible to conclude that Congress intended the universal subsection (d) to apply until sunset and the grand jury and Title III subsections (a), (b), and (c) to operate thereafter, because the Title III subsection expires at the same time as the universal subsection.

[3382] Draft at §154, "Notwithstanding any other provision of law, it shall be lawful for foreign intelligence information obtained as part of a criminal investigation (including, without limitation, information subject to Rule 6(e) of the Federal Rules of Criminal Procedure and information obtained pursuant to chapter 119 of title 18, United States Code [i.e. Title III]) to be provided to any federal law enforcement, intelligence, protective, or national defense personnel, or any federal personnel responsible for administering the immigration laws of the United States, or to the President and the Vice President of the United States."

to be used in foreign intelligence gathering.[3383] Section 907 instructs the Director of the Central Intelligence, in consultation with the Director of the FBI, to report on the creation of a National Virtual Translation Center. The report is to include information concerning staffing, allocation of resources, compatibility with comparable systems to be used for law enforcement purposes, and features which permit its efficient and secure use by all of the intelligence agencies.

MONEY LAUNDERING

In federal law, money laundering is the flow of cash or other valuables derived from, or intended to facilitate, the commission of a criminal offense. It is the movement of the fruits and instruments of crime. Federal authorities attack money laundering through regulations, international cooperation, criminal sanctions, and forfeiture.[3384] The Act bolsters federal efforts in each area.

Regulation

Prior to passage of the Act, the Treasury Department already enjoyed considerable authority to impose reporting and record-keeping standards on financial institutions generally and with respect to anti-money laundering matters in particular.[3385]

[3383] "The Committee is concerned that intelligence in general, and intelligence related to terrorism in particular, is increasingly reliant on the ability of the Intelligence Community to quickly, accurately and efficiently translate information in a large number of languages. Many of the languages for which translation capabilities are limited within the United States Government are the languages that are of critical importance in our counterterrorism efforts. The Committee believes that this problem can be alleviated by applying cutting-edge, internet-like technology to create a 'National Virtual Translation Center.' Such a center would link secure locations maintained by the Intelligence Community throughout the country and would apply digital technology to network, store, retrieve, and catalogue the audio and textual information. Foreign intelligence could be collected technically in one location, translated in a second location, and provided to an Intelligence Community analyst in a third location. "The Committee notes that the CIA, FBI NSA and other intelligence agencies have applied new technology to this problem. The Committee believes that these efforts should be coordinated so that the solution can be applied on a Community-wide basis. Accordingly, the Committee directs the Director of Central Intelligence, in consultation with the Director of the FBI, and other heads of departments and agencies within the Intelligence Community, to prepare and submit to the intelligence committees by June 1, 2002, a report concerning the feasibility and structure of a National Virtual Translation Center, including recommendations regarding the establishment of such a center and the funding necessary to do so," S. Rep. No. 107-63, at 11 (2001).

[3384] For a brief overview, see, Murphy, Money Laundering: Current Law and Proposals, CRS REP.NO. RS21032 (DEC. 21, 2001).

[3385] See e.g,, 12 U.S.C. 1829b (retention or records by insured depository institutions), 1951-1959 (record-keeping by financial institutions); 31 U.S.C. 5311 ("It is the purpose of this subchapter [31 U.S.C. 5311 et seq.] (except section 5315 [relating to foreign current transaction reports]) to require certain reports or records where they have a high degree of usefulness in criminal, tax, or regulatory investigations or proceedings").

For instance, under the Currency and Financial Transaction Reporting Act, a component of the Bank Secrecy Act, anyone who transports more than $10,000 into or out of the United States must report that fact to the Treasury Department, 31 U.S.C. 5316. Banks, credit unions, and certain other financial institutions must likewise report identifying information relating to cash transactions in excess of $10,000 to the Treasury Department (CTRs), 31 U.S.C. 5313, 31 C.F.R. §103.22. Other businesses are required to report to the Internal Revenue Service the particulars relating to any transaction involving more than $10,000 in cash, 26 U.S.C. 6050I. Banks must file suspicious activity reports (SARs) with the Treasury Department's Financial Crimes Enforcement Network (FinCEN) for any transactions involving more than $5,000 which they suspect may be derived from illegal activity, 31 U.S.C. 5318(g), 31 C.F.R. §103.18. Money transmission businesses and those that deal in traveler's checks or money orders are under a similar obligation for suspicious activities involving more than $2,000, 31 U.S.C. 5318(g), 31 C.F.R. §103.18.

Among other things, the Act expands the authority of the Secretary of the Treasury over these reporting requirements. He is to promulgate regulations, pursuant to sections 356 and 321, under which securities brokers and dealers as well as commodity merchants, advisors and pool operators must file suspicious activity reports, 31 U.S.C. 5318 note; 31 U.S.C. 5312(2)(c)(1). Businesses which were only to report cash transactions involving more than $10,000 to the IRS are now required to files SARs as well,[3386] reflecting Congress' view that the information provided the IRS may be valuable for other law enforcement purposes.[3387] This concern is likewise reflected in section 357 which asks the

---

[3386] Section 365, 31 U.S.C. 5331; Sec. 321, 31 U.S.C. 5312.

[3387] H.R.Rep.No. 107-250, at 38-9 (2001)("Most importantly, the Committee found significant shortcomings in the use of information already in possession of the government. Section 6050I of the Internal Revenue Code requires that any person engaged in a trade or business (other than financial institutions required to report under the Bank Secrecy Act) file a report with the Federal government on cash transactions in excess of $10,000. Reports filed pursuant to this requirement provide law enforcement authorities with a paper trail that can, among other things, lead to the detection and prosecution of money laundering activity. "Under current law, non-financial institutions are required to report cash transactions exceeding $10,000 to the Internal Revenue Service (IRS) on IRS Form 8300. Because the requirement that such reports be filed is contained in the Internal Revenue Code, Form 8300 information is considered tax return information, and is subject to the procedural and record-keeping requirements of section 6103 of the Internal Revenue Code. For example, section 6103(p)(4)(E) requires agencies seeking Form 8300 information to file a report with the Secretary of the Treasury that describes the procedures established and utilized by the agency for ensuring the confidentiality of the information. IRS requires that agencies requesting Form 8300 information file a 'Safeguard Procedures Report' which must be approved by the IRS before any such information can be released. For that reason, Federal, State and local law enforcement agencies are not given access to the Form 8300s as Congress anticipated when it last amended this statute. See 26 U.S.C. 6103(l)(15). "While the IRS uses Form 8300 to identify individuals who may be engaged in tax evasion, Form 8300

Secretary of the Treasury to report on the Internal Revenue Service's role in the administration of the Currency and Foreign Transaction Reporting Act (31 U.S.C. 5311 et seq.), and what transfers of authority, if any, are appropriate.

Sections 351 and 355 address the liability for disclosure of suspicious activity reports (SARs). Prior to the Act, federal law prohibited financial institutions and their officers and employees from tipping off any of the participants in a suspicious transaction, 31 U.S.C. 5318(g)(2)(2000 ed.). Federal law, however, immunized the institutions and their officers and employees from liability for filing the reports and for failing to disclose that they had done so, 31 U.S.C. 5318(g)(3)(2000 ed.). Section 351 makes changes in both the immunity and the proscription. It adds government officials who have access to the reports to the anti-tip ban, 31 U.S.C. 5318(g)(2)(A). It allows, but does not require, institutions to reveal SAR information in the context of employment references to other financial institutions, 31 U.S.C. 5318(g)(2)(B). Finally, it makes clear that the immunity does not extend to immunity from governmental action.[3388] Section

---

information can also be instrumental in helping law enforcement authorities trace cash payments by drug traffickers and other criminals for luxury cars, jewelry, and other expensive merchandise. Because of the restrictions on their dissemination outlined above, however, Form 8300s are not nearly as accessible to law enforcement authorities as the various reports mandated by the Bank Secrecy Act, which can typically be retrieved electronically from a database maintained by the Treasury Department. The differential access to the two kinds of reports is made anomalous by the fact that Form 8300 elicits much the same information that is required to be disclosed by the Bank Secrecy Act. For example, just as Form 8300 seeks the name, address, and social security number of a customer who engages in a cash transaction exceeding $10,000 with a trade or business, Currency Transaction Reports (CTRs) mandated by the Bank Secrecy Act require the same information to be reported on a cash transaction exceeding $10,000 between a financial institution and its customer").

[3388] "Subsection (a) of section [351] makes certain technical and clarifying amendments to 31 U.S.C. 5318(g)(3), the Bank Secrecy Act's 'safe harbor' provision that protects financial institutions that disclose possible violations of law or regulation from civil liability for reporting their suspicions and for not alerting those identified in the reports. The safe harbor is directed at Suspicious Activity Reports and similar reports to the government and regulatory authorities under the Bank Secrecy Act. "First, section [351](a) amends section 5318(g)(3) to make clear that the safe harbor from civil liability applies in arbitration, as well as judicial, proceedings. Second, it amends section 5318(g)(3) to clarify the safe harbor's coverage of voluntary disclosures (that is, those not covered by the SAR regulatory reporting requirement). The language in section 5318(g)(3)(A) providing that 'any financial institution that * * * makes a disclosure pursuant to * * * any other authority * * * shall not be liable to any person' is not intended to avoid the application of the reporting and disclosure provisions of the Federal securities laws to any person, or to insulate any issuers from private rights of actions for disclosures made under the Federal securities laws. "Subsection [351](b) amends section 5318(g)(2) of title 31--which currently prohibits notification of any person involved in a transaction reported in a SAR that a SAR has been filed--to clarify (1) that any government officer or employee who learns that a SAR has been filed may not disclose that fact to any person identified in the SAR, except as necessary to fulfill the officer or employee's official duties, and (2) that disclosure by a financial institution of potential wrongdoing in a written employment reference provided in response to a request from another financial institution pursuant to section 18(v) of the Federal Deposit Insurance Act, or in a written termination notice or employment reference provided in accordance with the rules of a

355 expands the immunity to cover disclosures in employment references to other insured depository financial institutions provided disclosure is not done with malicious intent.[3389]

The Financial Crimes Enforcement Network (FinCEN), a component within the Treasury Department long responsible for these anti-money laundering reporting and record-keeping requirements, 31 C.F.R. pt. 103, was administratively created in 1990 to provide other government agencies with an "intelligence and analytical network in support of the detection, investigation, and prosecution of domestic and international money laundering and other financial crimes," 55 Fed.Reg. 18433 (May 2, 1990).

The Act, in section 361, makes FinCEN a creature of statute, a bureau within the Treasury Department, 31 U.S.C. 310. Section 362 charges it with the responsibility of establishing a highly secure network to allow financial institutions to file required reports electronically and to permit FinCEN to provide those institutions with alerts and other information concerning money laundering protective measures, 31 U.S.C. 310 note.

Special Measures

In extraordinary circumstances involving international financial matters, the Act grants the Secretary of the Treasury, in consultation with other appropriate regulatory authorities, the power to issue regulations and orders involving additional required "special measures" and additional "due diligence" requirements to combat money laundering. The special measure authority, available under section 311, comes to life with the determination that particular institutions, jurisdictions, types of accounts, or types of transactions pose a primary money laundering concern.[3390] These special measures may require U.S. financial institutions to:

---

securities self-regulatory organization, is not prohibited simply because the potential wrongdoing was also reported in a SAR," H.R.Rep.No. 107-250, at 66 (2001).

[3389] 31 U.S.C. 1828(w). "This section deals with the same employment reference issue addressed in section [351] but with respect to title 12. Occasionally banks develop suspicions that a bank officer or employee has engaged in potentially unlawful activity. These suspicions typically result in the bank filing a SAR. Under present law, however, the ability of banks to share these suspicions in written employment references with other banks when such an officer or employee seeks new employment is unclear. Section 208 would amend 12 U.S.C. 1828 to permit a bank, upon request by another bank, to share information in a written employment reference concerning the possible involvement of a current or former officer or employee in potentially unlawful activity without fear of civil liability for sharing the information, but only to the extent that the disclosure does not contain information which the bank knows to be false, and the bank has not acted with malice or with reckless disregard for the truth in making the disclosure," H.R.Rep.No. 107-250, at 67 (2001).

[3390] 31 U.S.C. 5318A. The circumstances considered in the case of a suspect jurisdiction are: evidence of organized crime or terrorist transactions there; the extent to which the jurisdiction's bank secrecy or other regulatory practices encourage foreign use; the extent and effectiveness of

- maintain more extensive records and submit additional reports relating to participants in foreign financial transactions with which they are involved
- secure beneficial ownership information with respect to accounts maintained for foreign customers
- adhere to "know-your-customer" requirements concerning foreign customers who use "payable-through accounts" held by the U.S. entity for foreign financial institutions
- keep identification records on foreign financial institutions' customers whose transactions are routed through the foreign financial institution's correspondent accounts with the U.S. financial institution
- honor limitations on correspondent or payable-through accounts maintained for foreign financial institutions.[3391]

---

the jurisdiction's banking regulation; the volume of financial transactions in relation to the size of the jurisdiction's economy; whether international watch dog groups (such as the Financial Action Task Force) have identified the jurisdiction as an offshore banking or secrecy haven; the existence or absence of a mutual legal assistance treaty between the U.S. and the jurisdiction; and the extent of official corruption within the jurisdiction. The institutional circumstances weighed before imposing special measures with respect to particular institutions or types of accounts or transactions include the intent to which the suspect institution or types of accounts or transactions are particularly attractive to money launderers, the extent to which they can be used by legitimate businesses, and the extent to which focused measures are likely to be successful.

[3391] The House report describes these measures in greater detail: "Section [311] adds a new section 5318A to the Bank Secrecy Act, authorizing the Secretary of the Treasury to require domestic financial institutions and agencies to take one or more of five 'special measures' if the Secretary finds that reasonable grounds exist to conclude that a foreign jurisdiction, a financial institution operating outside the United States, a class of international transactions, or one or more types of accounts is a 'primary money laundering concern.' Prior to invoking any of the special measures contained in section 5318A(b), the Secretary is required to consult with the Chairman of the Board of Governors of the Federal Reserve System, any other appropriate Federal banking agency, the Securities and Exchange Commission, the National Credit Union Administration Board, and, in the sole discretion of the Secretary, such other agencies and interested parties as the Secretary may find to be appropriate. Among other things, this consultation is designed to ensure that the Secretary possesses information on the effect that any particular special measure may have on the domestic and international banking system. In addition, the Committee encourages the Secretary to consult with non-governmental 'interested parties,' including, for example, the Bank Secrecy Act Advisory Group, to obtain input from those who may be subject to a regulation or order under this section. "Prior to invoking any of the special measures contained in section 5318A, the Secretary must consider three discrete factors, namely (1) whether other countries or multilateral groups have taken similar action; (2) whether the imposition of the measure would create a significant competitive disadvantage, including any significant cost or burden associated with compliance, for firms organized or licensed in the United States; and (3) the extent to which the action would have an adverse systemic impact on the payment system or legitimate business transactions. "Finally, subsection (a) makes clear that this new authority is not to be construed as superseding or restricting any other authority of the Secretary or any other agency. "Subsection (b) of the new section 5318A outlines the five 'special measures' the Secretary may invoke against a foreign jurisdiction, financial institution operating outside the U.S., class of transaction within, or involving, a jurisdiction outside the U.S., or one or more types of accounts, that he finds to be of primary money laundering concern. "The first such measure would require domestic financial institutions to maintain records and/or file reports on certain transactions

Due Diligence

Section 312 demands that all U.S. financial institutions have policies, procedures, and controls in place to identify instances where their correspondent and private banking accounts with foreign individuals and entities might be used for money laundering purposes, 31 U.S.C. 5318(i). They must establish enhanced due diligence standards for correspondent accounts held for offshore banking institutions (whose licenses prohibit them from conducting financial activities in

---

involving the primary money laundering concern, to include any information the Secretary requires, such as the identity and address of participants in a transaction, the legal capacity in which the participant is acting, the beneficial ownership of the funds (in accordance with steps that the Secretary determines to be reasonable and practicable to obtain such information), and a description of the transaction. The records and/or reports authorized by this section must involve transactions from a foreign jurisdiction, a financial institution operating outside the United States, or class of international transactions within, or involving, a foreign jurisdiction, and are not to include transactions that both originate and terminate in, and only involve, domestic financial institutions. "The second special measure would require domestic financial institutions to take such steps as the Secretary determines to be reasonable and practicable to ascertain beneficial ownership of accounts opened or maintained in the U.S. by a foreign person (excluding publicly traded foreign corporations) associated with what has been determined to be a primary money laundering concern. "The third special measure the Secretary could impose in the case of a primary money laundering concern would require domestic financial institutions, as a condition of opening or maintaining a 'payable-through account' for a foreign financial institution, to identify each customer (and representative of the customer) who is permitted to use or whose transactions flow through such an account, and to obtain for each customer (and representative) information that is substantially comparable to the information it would obtain with respect to its own customers. A 'payable-through account' is defined for purposes of the legislation as an account, including a transaction account (as defined in section 19(b)(1)(C) of the Federal Reserve Act), opened at a depository institution by a foreign financial institution by means of which the foreign financial institution permits its customers to engage, either directly or through a sub-account, in banking activities usual in connection with the business of banking in the United States. "The fourth special measure the Secretary could impose in the case of a primary money laundering concern would require domestic financial institutions, as a condition of opening or maintaining a 'correspondent' account for a foreign financial institution, to identify each customer (and representative of the customer) who is permitted to use or whose transactions flow through such an account, and to obtain for each customer (and representative) information that is substantially comparable to the information that it would obtain with respect to its own customers. With respect to a bank, the term 'correspondent account' means an account established to receive deposits from and make payments on behalf of a foreign financial institution. "The fifth measure the Secretary could impose in the case of a primary money laundering concern would prohibit or impose conditions (beyond those already provided for in the third and fourth measures) on domestic financial institutions' correspondent or payable-through accounts with foreign banking institutions. In addition to the required consultation with the Chairman of the Board of Governors of the Federal Reserve, prior to imposing this measure the Secretary is also directed to consult with the Secretary of State and the Attorney General. "The five special measures authorized by this section may be imposed in any sequence or combination as the Secretary determines. The first four special measures may be imposed by regulation, order, or otherwise as permitted by law. However, if the Secretary proceeds by issuing an order, the order must be accompanied by a notice of proposed rulemaking relating to the imposition of the special measure, and may not remain in effect for more than 120 days, except pursuant to a regulation prescribed on or before the end of the 120-day period. The fifth special measure may be imposed only by regulation," H.R. Rep. No. 107-250, at 68-9.

---

the jurisdiction in which they are licensed) or institutions in money laundering jurisdictions designated by the Secretary of the Treasury or by international watch dog groups such as the Financial Action Task Force. The standards must at least involve reasonable efforts to identify the ownership of foreign institutions which are not publicly held; closely monitor the accounts for money laundering activity; and to hold any foreign bank, for whom the U.S. institution has a correspondent account, to the same standards with respect to other correspondent accounts maintained by the foreign bank. In the case of private banking accounts of $1 million or more, U.S. financial institutions must keep records of the owners of the accounts and the source of funds deposited in the accounts. They must report suspicious transactions and, when the accounts are held for foreign officials, guard against transactions involving foreign official corruption.[3392]

[3392] See generally, H.R. Rep. No. 107-250, at 71-2 ("Section [312] amends 31 U.S.C. 5318 to require financial institutions that establish, maintain, administer, or manage private banking or correspondent accounts for non-U.S. persons to establish appropriate, specific, and, where necessary, enhanced due diligence policies, procedures, and controls to detect and report instances of money laundering through those accounts. "The section requires financial institutions to apply enhanced due diligence procedures when opening or maintaining a correspondent account for a foreign bank operating (1) under a license to conduct banking activities which, as a condition of the license, prohibits the licensed entity from conducting banking activities with the citizens of, or with the local currency of, the country which issued the license; or (2) under a license issued by a foreign country that has been designated (a) as non-cooperative with international anti-money laundering principles by an intergovernmental group or organization of which the United States is a member, with which designation the Secretary of the Treasury concurs, or (b) by the Secretary as warranting special measures due to money laundering concerns. "The enhanced due diligence procedures include (1) ascertaining the identity of each of the owners of the foreign bank (except for banks that are publicly traded); (2) conducting enhanced scrutiny of the correspondent account to guard against money laundering and report any suspicious activity; and (3) ascertaining whether the foreign bank provides correspondent accounts to other foreign banks and, if so, the identity of those foreign banks and related due diligence information. "For private banking accounts requested or maintained by a non-United States person, a financial institution is required to implement procedures for (1) ascertaining the identity of the nominal and beneficial owners of, and the source of funds deposited into, the account as needed to guard against money laundering and report suspicious activity; and (2) conducting enhanced scrutiny of any such account requested or maintained by, or on behalf of, a senior foreign political figure, or his immediate family members or close associates, to prevent, detect and report transactions that may involve the proceeds of foreign corruption. A private bank account is defined as an account (or any combination of accounts) that requires a minimum aggregate deposit of funds or other assets of not less than $1 million; is established on behalf of one or more individuals who have a direct or beneficial ownership in the account; and is assigned to, or administered or managed by, an officer, employee or agent of a financial institution acting as a liaison between the institution and the direct or beneficial owner of the account. "This section directs the Secretary of the Treasury, within 6 months of enactment of this bill and in consultation with appropriate Federal functional regulators, to further define and clarify, by regulation, the requirements imposed by this section").

The Act establishes several other regulatory mechanisms directed at the activities involving U.S. financial institutions and foreign individuals or institutions. Section 313, for instance, in another restriction on correspondent accounts for foreign financial institutions, prohibits U.S. financial institutions from maintaining correspondent accounts either directly or indirectly for foreign shell banks (banks with no physical place of business[3393]) which have no affiliation with any financial institution through which their banking activities are subject to regulatory supervision.[3394]

The Act, in section 325, empowers the Secretary of the Treasury to promulgate regulations to prevent financial institutions from allowing their customers to conceal their financial activities by taking advantage of the institutions' concentration account practices.[3395]

The Secretary of the Treasury is instructed in section 326 to issue regulations for financial institutions' minimum new customer identification standards and record-keeping and to recommend a means to effectively verify the identification of foreign customers.[3396]

[3393] Or more exactly, a bank which has no physical presence in any country; a "physical presence" for a foreign bank is defined as "a place of business that – (i) is maintained by a foreign bank; (ii) is located at a fixed address (other than solely an electronic address) in a country in which the foreign bank is authorized to conduct banking activities, at which location the foreign bank – (I) employs 1 or more individuals on a full-time basis; and (II) maintains operating records relating to its banking activities; and (iii) is subject to inspection by the banking authority which licensed the foreign bank to conduct banking activities," 31 U.S.C. 5318(j)(4).

[3394] 31 U.S.C. 5318(j); H.R.Rep.No. 107-250, at 72 (2001).

[3395] The Act does not define "concentration accounts," although the House Financial Services Committee report provides some incite into the section's intent, H.R.Rep.No. 107-250, at 72-3 (2001)("This section gives the Secretary of the Treasury discretionary authority to prescribe regulations governing the maintenance of concentration accounts by financial institutions, to ensure that these accounts are not used to prevent association of the identity of an individual customer with the movement of funds of which the customer is the direct or beneficial owner. If promulgated, the regulations are required to prohibit financial institutions from allowing clients to direct transactions into, out of, or through the concentration accounts of the institution; prohibit financial institutions and their employees from informing customers of the existence of, or means of identifying, the concentration accounts of the institution; and to establish written procedures governing the documentation of all transactions involving a concentration account.")

[3396] 31 U.S.C. 5318(l); H.R.Rep.No. 107-250, at 62-3 (2001)("Section [326](a) amends 31 U.S.C. 5318 by adding a new subsection governing the identification of account holders. Paragraph (1) directs Treasury to prescribe regulations setting forth minimum standards for customer identification by financial institutions in connection with the opening of an account. By referencing 'customers' in this section, the Committee intends that the regulations prescribed by Treasury take an approach similar to that of regulations promulgated under title V of the Gramm-Leach-Bliley Act of 1999, where the functional regulators defined 'customers' and 'customer

Federal regulatory authorities must approve the merger of various financial institutions under the Bank Holding Company Act, 12 U.S.C. 1842, and the Federal Deposit Insurance Act, 12 U.S.C. 1828. Section 327 requires consideration of an institution's anti-money laundering record when such mergers are proposed, 12 U.S.C. 1842(c)(6), 1828(c)(11).

Section 314 directs the Secretary of the Treasury to promulgate regulations in order to encourage financial institutions and law enforcement agencies to share information concerning suspected money laundering and terrorist activities, 31 U.S.C. 5311 note.

---

relationship' for purposes of the financial privacy rules. Under this approach, for example, where a mutual fund sells its shares to the public through a broker-dealer and maintains a 'street name' or omnibus account in the broker-dealer's name, the individual purchasers of the fund shares are customers of the broker-dealer, rather than the mutual fund. The mutual fund would not be required to 'look through' the broker-dealer to identify and verify the identities of those customers. Similarly, where a mutual fund sells its shares to a qualified retirement plan, the plan, and not its participants, would be the fund's customers. Thus, the fund would not be required to 'look through' the plan to identify its participants. "Paragraph (2) requires that the regulations must, at a minimum, require financial institutions to implement procedures to verify (to the extent reasonable and practicable) the identity of any person seeking to open an account, maintain records of the information used to do so, and consult applicable lists of known or suspected terrorists or terrorist organizations. The lists of known or suspected terrorists that the Committee intends financial institutions to consult are those already supplied to financial institutions by the Office of Foreign Asset Control (OFAC), and occasionally by law enforcement and regulatory authorities, as in the days immediately following the September 11, 2001, attacks on the World Trade Center and the Pentagon. It is the Committee's intent that the verification procedures prescribed by Treasury make use of information currently obtained by most financial institutions in the account opening process. It is not the Committee's intent for the regulations to require verification procedures that are prohibitively expensive or impractical. "Paragraph (3) requires that Treasury consider the various types of accounts maintained by various financial institutions, the various methods of opening accounts, and the various types of identifying information available in promulgating its regulations. This would require Treasury to consider, for example, the feasibility of obtaining particular types of information for accounts opened through the mail, electronically, or in other situations where the accountholder is not physically present at the financial institution. Millions of Americans open accounts at mutual funds, broker-dealers, and other financial institutions in this manner; it is not the Committee's intent that the regulations adopted pursuant to this legislation impose burdens that would make this prohibitively expensive or impractical. This provision allows Treasury to adopt regulations that are appropriately tailored to these types of accounts. "Current regulatory guidance instructs depository institutions to make reasonable efforts to determine the true identity of all customers requesting an institution's services. (See, e.g., FDIC Division of Supervision Manual of Exam Policies, section 9.4 VI.) The Committee intends that the regulations prescribed under this section adopt a similar approach, and impose requirements appropriate to the size, location, and type of business of an institution. "Paragraph (4) requires that Treasury consult with the appropriate functional regulator in developing the regulations. This will help ensure that the regulations are appropriately tailored to the business practices of various types of financial institutions, and the risks that such practices may pose. "Paragraph (5) gives each functional regulator the authority to exempt, by regulation or order, any financial institution or type of account from the regulations prescribed under paragraph (1). "Paragraph (6) requires that Treasury's regulations prescribed under paragraph (1) become effective within one year after enactment of this bill").

Section 319(b) requires U.S. financial institutions to respond to bank regulatory authorities' requests for anti-money laundering records (within 120 hours) and to Justice or Treasury Department subpoenas or summons for records concerning foreign deposits (within 7 days), 31 U.S.C. 5318(k). Section 319 also calls for civil penalties of up to $10,000 a day for financial institutions who have failed to terminate correspondent accounts with foreign institutions that have ignored Treasury or Justice Department subpoenas or summons, 31 U.S.C. 5318(k)(3).

Section 352 directs the Secretary of the Treasury to promulgate regulations, in consultation with other appropriate regulatory authorities, requiring financial institutions to maintain anti-money laundering programs which must include at least a compliance officer; an employee training program; the development of internal policies, procedures and controls; and an independent audit feature.[3397]

Section 359 subjects money transmitters to the regulations and requirements of the Currency and Foreign Transactions Reporting Act (31 U.S.C. 5311 et seq.) and directs the Secretary of the Treasury to report on the need for additional legislation relating to domestic and international underground banking systems.

Federal law obligates the Administration to develop a national strategy for combating money laundering and related financial crimes, 31 U.S.C. 5341. Section 354 insists that the strategy contain data relating to the funding of international terrorism and efforts to prevent, detect, and prosecute such funding, 31 U.S.C. 5341(b)(12).

Section 364 authorizes the Board of Governors of the Federal Reserve to hire guards to protect members of the Board, as well as the Board's property and personnel and that of any Federal Reserve bank. The guards may carry firearms and make arrests, 12 U.S.C. 248(q).

Reports to Congress

Section 366 instructs the Secretary of the Treasury to report on methods of improving the compliance of financial institutions with the currency transaction reporting requirements and on the possibility of expanding exemptions to the requirements with an eye to improving the quality of data available for law enforcement purposes and reducing the number of unnecessary filings.[3398]

Section 324 instructs the Secretary of the Treasury to report on the execution of authority granted under the International Counter Money Laundering and

[3398] 31 U.S.C. 5313 note; H.R.Rep.No. 107-205, at 65 (2001).

Related Measures subtitle (III-A) of the Act and to recommend any appropriate related legislation, 31 U.S.C. 5311 note.

International Cooperation

Reflecting concern about the ability of law enforcement officials to trace money transfers to this country from overseas, section 328 instructs the Secretary of the Treasury, Secretary of State and Attorney General to make every effort to encourage other governments to require identification of the originator of international wire transfers.[3399]

Section 330 expresses the sense of the Congress that the Administration should seek to negotiate international agreements to enable U.S. law enforcement officials to track the financial activities of foreign terrorist organizations, money launderers and other criminals.

Section 360 authorizes the Secretary of the Treasury to direct the U.S. Executive Directors of the various international financial institutions (i.e., the International Monetary Fund, the International Bank for Reconstruction and Development, the European Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Multilateral Investment Guarantee Agency, the African Development Bank, the African Development Fund, the Asian Development Bank, the Bank for Economic Development and Cooperation in the Middle East and North Africa, and the InterAmerican Investment Corporation): (1) to support the loan and other benefit efforts on behalf of countries that the President determines have supported our anti-terrorism efforts, and (2) to vote to ensure that funds from those institutions are not used to support terrorism.

[3399] H.R. Rep. No. 107-250, at 67 (2001)("This section directs the Secretary of the Treasury, in consultation with the Attorney General and the Secretary of State, to (1) take all reasonable steps to encourage foreign governments to require the inclusion of the name of the originator in wire transfer instructions sent to the U.S. and other countries; and (2) report annually to Congress on Treasury's progress in achieving this objective, and on impediments to instituting a regime in which all appropriate identification about wire transfer recipients is included with wire transfers from their point of origination until disbursement. "The Committee is concerned that inadequate information on the originator of wire transfers from a number of foreign jurisdictions makes it difficult for both law enforcement and financial institutions to properly understand the source of funds entering the United States in wire transfers. Such a lack of clarity could aid money launderers or terrorists in moving their funds into the United States financial system. Additionally, while arguments have been made that there are technical impediments to requiring that complete addressee information appear on all wire transfers terminating in or passing through the United States, the Committee believes that having such information is technically feasible and would aid both financial institutions in performing due diligence and law enforcement in tracking or seizing money that is the derivative of or would be used in the commission of a crime").

Crimes

Federal criminal money laundering statutes punish both concealing the fruits of old offenses and financing new ones. They proscribe financial transactions which:

- involve more than $10,000 derived from one of a list of specified underlying crimes, 18 U.S.C. 1957, or
- are intended to promote any of the designated predicate offenses, or
- are intended to evade taxes, or
- are designed to conceal the proceeds generated by any of the predicate offenses, or
- are crafted to avoid transaction reporting requirements, 18 U.S.C. 1956.

They also condemn transporting funds into, out of, or through the United States with the intent to further a predicate offense, conceal its proceeds, or evade reporting requirements, 18 U.S.C. 1956. Offenders face imprisonment for up to twenty years, fines of up to $500,000, civil penalties, 18 U.S.C. 1956, 1957, and confiscation of the illicit funds involved in a violation or in any of the predicate offenses, 18 U.S.C. 981, 982.

The Act contains a number of new money laundering crimes, as well as amendments and increased penalties for existing crimes. Section 315, for example, adds several crimes to the federal money laundering predicate offense list of 18 U.S.C. 1956. The newly added predicate offenses include crimes in violation of the laws of the other nations when the proceeds are involved in financial transactions in this country: crimes of violence, public corruption, smuggling, and offenses condemned in treaties to which we are a party, 18 U.S.C. 1956(c)(7)(B). Additional federal crimes also join the predicate list:

- 18 U.S.C. 541 (goods falsely classified)
- 18 U.S.C. 922(1) (unlawful importation of firearms)
- 18 U.S.C. 924(n) (firearms trafficking)
- 18 U.S.C. 1030 (computer fraud and abuse)
- felony violations of the Foreign Agents Registration Act, 22 U.S.C. 618.

As the report accompanying H.R. 3004 explains:

> *This amendment enlarges the list of foreign crimes that can lead to money laundering prosecutions in this country when the proceeds of additional foreign crimes are laundered in the United States. The additional crimes include all crimes of violence, public corruption, and offenses covered by existing bilateral extradition treaties. The Committee intends this provision to send a strong signal that the United States will not tolerate the use of its financial institutions for the purpose of laundering the proceeds of such activities. H.R. Rep. No. 107-250, at 55 (2000).*

In this same vein, section 376 adds the crime of providing material support to a terrorist organization (18 U.S.C. 2339B) to the predicate offense list and section 318 expands 18 U.S.C. 1956 to cover financial transactions conducted in foreign financial institutions.[3400]

Section 329 makes it a federal crime to corruptly administer the money laundering regulatory scheme. Offenders are punishable by imprisonment for not more than 15 years and a fine of not more than three times the amount of the bribe.

Section 5326 of title 31 authorizes the Secretary of the Treasury to impose temporary, enhanced reporting requirements upon financial institutions in areas victimized by substantial money laundering activity (geographic targeting regulations and orders). Section 353 makes it clear that the civil sanctions, criminal penalties, and prohibitions on smurfing (structuring transactions to evade reporting requirements) apply to violations of the regulations and orders issued under 31 U.S.C. 5326.[3401] It also extends the permissible length of the temporary geographical orders from 60 to 180 days.

Violations of the special measures and special due diligence requirements of sections 311 and 312 are subject to both civil and criminal penalties by virtue of section 363's amendments to 31 U.S.C. 5321(a) and 5322. The amendments authorize civil penalties and criminal fines of twice the amount of the transaction

---

[3400] "[S]ection 1956 of title 18, United States Code, makes it an offense to conduct a transaction involving a financial institution if the transaction involves criminally derived property. Similarly, 18 U.S.C. 1957 creates an offense relating to the deposit, withdrawal, transfer or exchange of criminally derived funds 'by, to or through a financial institution.' For the purposes of both statutes, the term 'financial institution' is defined in 31 U.S.C. 5312. See 18 U.S.C. 1956(c)(6); 18 U.S.C. 1957(f). "The definition of 'financial institution' in 5312 does not explicitly include foreign banks. Such banks may well be covered because they fall within the meaning of 'commercial bank' or other terms in the statute, but as presently drafted, there is some confusion over whether the government can rely on section 5312 to prosecute an offense under either 1956 or 1957 involving a transaction through a foreign bank, even if the offense occurs in part in the United States. For example, if a person in the United States sends criminal proceeds abroad--say to a Mexican bank--and launders them through a series of financial transactions, the government conceivably could not rely on the definition of a 'financial institution' in 1956(c)(6) to establish that the transaction was a 'financial transaction' within the meaning of 1956(c)(4)(B) (defining a 'financial transaction' as a transaction involving the use of a 'financial institution'), or that it was a 'monetary transaction' within the meaning of 1957(f) (defining 'monetary transaction' as, inter alia, a transaction that would be a 'financial transaction' under 1956(c)(4)(B)). "Similarly, the money laundering laws in effect in most countries simply make it an offense to launder the proceeds of any crime, foreign or domestic. In the United States, however, the money laundering statute is violated only when a person launders the proceeds of one of the crimes set forth on a list of 'specified unlawful activities.' 18 U.S.C. 1956(c)(7). Currently only a handful of foreign crimes appear on that list. See 1956(c)(7)(B)," H.R.Rep.No. 107-250, at 38 (2000).

[3401] Cf., H.R.Rep.No. 107-250, at 57.

but not more than $1 million. Criminal offenders would be subject to a fine in the same amount.

Earlier federal law prohibited the operation of illegal money transmitting businesses, 18 U.S.C. 1960. Section 373 amends the proscription to make it clear that the prohibition must be breached "knowingly" and to cover businesses which are otherwise lawful but which transmit funds they know are derived from or intended for illegal activities. It also amends 18 U.S.C. 981(a)(1)(A) to permit civil forfeiture of property involved in a transaction in violation of 18 U.S.C. 1960.[3402]

Sections 374 and 375 of the Act seek to curtail economic terrorism by increasing and making more uniform the penalties for counterfeiting U.S. or foreign currency and by making it clear that the prohibitions against possession of counterfeiting paraphernalia extend to their electronic equivalents.[3403] They increase the maximum terms of imprisonment for violation of:

- 18 U.S.C. 471 (obligations or securities of the U.S.) from 15 to 20 years;

[3402] "The operation of an unlicensed money transmitting business is a violation of Federal law under 18 U.S.C. 1960. First, section 104 clarifies the scienter requirement in 1960 to avoid the problems that occurred when the Supreme Court interpreted the currency transaction reporting statutes to require proof that the defendant knew that structuring a cash transaction to avoid the reporting requirements had been made a criminal offense. See Ratzlaf v. United States, 114 S. Ct. 655 (1994). The proposal makes clear that an offense under 1960 is a general intent crime for which a defendant is liable if he knowingly operates an unlicensed money transmitting business. For purposes of a criminal prosecution, the Government would not have to show that the defendant knew that a State license was required or that the Federal registration requirements promulgated pursuant to 31 U.S.C. 5330 applied to the business. "Second, section 104 expands the definition of an unlicensed money transmitting business to include a business engaged in the transportation or transmission of funds that the defendant knows are derived from a criminal offense, or are intended to be used for an unlawful purpose. Thus, a person who agrees to transmit or to transport drug proceeds for a drug dealer, or funds from any source for a terrorist, knowing such funds are to be used to commit a terrorist act, would be engaged in the operation of an unlicensed money transmitting business. It would not be necessary for the Government to show that the business was a storefront or other formal business open to walk-in trade. To the contrary, it would be sufficient to show that the defendant offered his services as a money transmitter to another. "Finally, when Congress enacted 1960 in 1992, it provided for criminal but not civil forfeiture. The proposal corrects this oversight, and allows the government to obtain forfeiture of property involved in the operation of an illegal money transmitting business even if the perpetrator is a fugitive," H.R.Rep.No. 107-250, at 54 (2001).

[3403] "This section makes it a criminal offense to possess an electronic image of an obligation or security document of the United States with intent to defraud. The provision harmonizes counterfeiting language to clarify that possessing either analog or digital copies with intent to defraud constitutes an offense. This section mimics existing language that makes it a felony to possess the plates from which currency can be printed, and takes into account the fact that most counterfeit currency seized today is generated by computers or computer-based equipment. The section also increases maximum sentences for a series of counterfeiting offenses," H.R.Rep.No. 107-250, at 75-6 (2001).

- 18 U.S.C. 472 (uttering counterfeit obligations and securities) from 15 to 20 years;
- 18 U.S.C. 473 (dealing in counterfeit obligations and securities) from 10 to 20 years;
- 18 U.S.C. 476 (taking impressions of tools used for obligations and securities) from 10 to 25 years;
- 18 U.S.C. 477 (possessing or selling impressions of tools used for obligations or securities) from 10 to 25 years;
- 18 U.S.C. 484 (connecting parts of different notes) from 5 to 10 years;
- 18 U.S.C. 493 (bonds and obligations of certain lending agencies) from 5 to 10 years;
- 18 U.S.C. 478 (foreign obligations or securities) from 5 to 20 years;
- 18 U.S.C. 479 (uttering counterfeit foreign obligations or securities) from 3 to 20 years;
- 18 U.S.C. 480 (possessing counterfeit foreign obligations or securities) from 1 to 20 years;
- 18 U.S.C. 481 (plates, stones, or analog, digital, or electronic images for counterfeiting foreign obligations or securities) from 5 to 25 years;
- 18 U.S.C. 482 (foreign bank notes) from 2 to 20 years; and
- 18 U.S.C. 483 (uttering counterfeit foreign bank notes) from 1 to 20 years.

Aliens believed to have engaged in money laundering may not enter the United States, section 1006 (8 U.S.C. 1182(a)(2)(I)). The same section directs the Secretary of State to maintain a watchlist to ensure that they are not admitted, 8 U.S.C. 1182 note.

Bulk Cash

Customs officials ask travelers leaving the United States whether they are taking $10,000 or more in cash with them. Section 1001 of title 18 of the United States Code makes a false response punishable by imprisonment for not more than 5 years. Section 5322 of title 31 makes failure to report taking $10,000 or more to or from the United States punishable by the same penalties. The Act's bulk cash smuggling offense, section 371, augments these proscriptions with a somewhat unique feature, 31 U.S.C. 5332 – a criminal forfeiture of the smuggled cash in lieu of a criminal fine. The basic offense outlaws smuggling cash into or out of the United States. The concealment element of the offense seems to cover everything but in-sight possession as long as an amount $10,000 or more is carried in manner to evade reporting.[3404]

The section appears to be the product of reactions to the Supreme Court's decision in United States v. Bajakian, 524 U.S. 321 (1998). There officials had

---

[3404] "For purposes of this section, the concealment of currency on the person of any individual includes concealment in any article of clothing worn by the individual or in any luggage, backpack, or other container worn or carried by such individual," 31 U.S.C. 5332(a)(2).

confiscation $350,000 because Bajakian attempted to leave the country without declaring it, a violation of 31 U.S.C. 5322. In the view of the Court, the confiscation was grossly disproportionate to the gravity of the offense and consequently contrary to the Constitution's excessive fines clause, 524 U.S. at 337. The Committee Report accompanying H.R. 3004 explains the Justice Department's assurance that casting surreptitious removal of cash from the United States as a smuggling rather than a false reporting offense will avoid the adverse consequences of the Supreme Court's examination of forfeiture in false reporting cases under the Constitution's Excessive Fines Clause.[3405]

Section 5317 of title 31 once called for civil forfeiture of property traceable to a violation of 31 U.S.C. 5316 (reports on exporting or importing money instruments worth $10,000 or more). Section 372 of the Act recasts section 5317 to provide for civil and criminal forfeitures for violations of 31 U.S.C. 5316, of 31 U.S.C. 5313 (reports on domestic coins and currency transactions involving $10,000 or more) and of 31 U.S.C. 5324 (structuring transactions to evade reporting requirements (smurfing)).

Extraterritorial Jurisdiction

The Act makes 18 U.S.C. 1029, the federal statute condemning various crimes involving credit cards, PIN numbers and other access devices, applicable overseas if the card or device is issued by or controlled by an American bank or other entity and some article is held in or transported to or through the United States during the course of the offense, section 377. The change was part of the original

---

[3405] "As recent Congressional hearings have demonstrated, currency smuggling is an extremely serious law enforcement problem. Hundreds of millions of dollars in U.S. currency – representing the proceeds of drug trafficking and other criminal offenses – is annually transported out of the United States to foreign countries in shipments of bulk cash. Smugglers use all available means to transport the currency out of the country, from false bottoms in personal luggage, to secret compartments in automobiles, to concealment in durable goods exported for sale abroad. . . . "Presently, the only law enforcement weapon against such smuggling is section 5316 of title 31, United States Code, which makes it an offense to transport more than $10,000 in currency or monetary instruments into, or out of, the United State without filing a report with the United States Customs Service. The effectiveness of section 5316 as a law enforcement tool has been diminished, however, by a recent Supreme Court decision. In United States v. Bajakajian, 118 S.Ct. 2028 (1998), the Supreme Court held that section 5316 constitutes a mere reporting violation, which is not a serious offense for purposes of the Excessive Fines Clause of the Eighth Amendment. Accordingly, confiscation of the full amount of the smuggled currency is unconstitutional, even if the smuggler took elaborate steps to conceal the currency and otherwise obstruct justice. "Confiscation of the smuggled currency is, of course, the most effective weapon that can be employed against currency smugglers. Accordingly, in response to the Bajakajian decision, the Department of Justice proposed making the act of bulk cash smuggling itself a criminal offense, and to authorize the imposition of the full range of civil and criminal sanctions when the offense is discovered. Because the act of concealing currency for the purpose of smuggling it out of the United States is inherently more serious than simply failing to file a Customs report, strong and meaningful sanctions, such as confiscation of the smuggled currency, are likely to withstand Eighth Amendment challenges to the new statute," H.R.Rep.No. 107-250 at 36-7 (2001).

Justice Department proposals. Justice explained that, "[financial crime[] admits of no border, utilizing the integrated global financial network for ill purposes. This provision would apply the financial crimes prohibitions to conduct committed abroad, so long as the tools or proceeds of the crimes pass through or are in the United States," DoJ at §408. The section, however, appears to limit the otherwise applicable extraterritorial jurisdiction implicit in section 1029, since federal courts would likely recognize extraterritorial jurisdiction over a violation under either circumstance (issued by a U.S. entity or physical presence in the U.S.) as well as a number of others.[3406]

Venue

Section 1004 relies on dicta in United States v. Cabrales, 524 U.S. 1, 8 (1998), in order to permit a money laundering prosecution to be brought in the place where the crime which generated the funds occurred, "if the defendant participated in the transfer of the proceeds," 18 U.S.C. 1956(i).

Ordinarily, the Constitution requires that a crime be prosecuted in the state and district in which it occurs, in the case of money laundering,[3407] in the state and district in which the monetary transaction takes place. The Supreme Court in Cabrales held that a charge of money laundering in Florida, of the proceeds of a Missouri drug trafficking, could not be tried in Missouri. The Court declared in dicta, however, that "money laundering . . . arguably might rank as a continuing offense, triable in more than one place, if the launderer acquired the funds in one district and transported them into another," 524 U.S. at 8.[3408]

[3406] United States v. Bowman, 260 U.S. 94, 97-8 (1922); Ford v. United States, 273 U.S. 593, 623 (1927). For a general discussion of the extraterritorial application of federal criminal law, see, Doyle, Extraterritorial Application of American Criminal Law, CRS REP.NO. 94-166A (Mar. 13, 1999).

[3407] "The trial of all crimes . . . shall be held in the state where the said crimes shall have been committed; but when not committed within any state, the trial shall be at such place or places as the Congress may by law have directed," U.S.Const. Art.III, §2, cl.3. "[I]n all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the state and district wherein the crime shall have been committed; which district shall have been previously ascertained by law," U.S.Const. Amend. VI.

[3408] See also, United States v. Rodriguez-Moreno, 526 U.S. 275, 280-81 n.4 (1999) (holding that acquiring and using a firearm in Maryland in connection with a kidnaping in New Jersey might constitutionally be prosecuted in New Jersey under a statute which outlawed possession of a firearm "during and in relation to" a crime of violence.

Forfeiture

Forfeiture is the government confiscation of property as a consequence of crime.[3409] The forfeiture amendments of the Act fall into two categories. Some make adjustments to those portions of federal forfeiture law which govern the confiscation of property derived from, or used to facilitate, various federal crimes. Others follow the pattern used for the war-time confiscation of the property of enemy aliens under the Trading With the Enemy Act, 50 U.S.C. App. 1 et seq. (TWEA), forfeitures which turn on the ownership of the property rather than upon its proximity to any particular crime.

Constitutional Considerations

The Act adds TWEA-like amendments to the International Emergency Economic Powers Act (IEEPA), 50 U.S.C. 1701 et seq., which already allowed the President to freeze the assets of foreign terrorists under certain conditions. Under IEEPA, as amended by section 106 of the Act, the President or his delegate may confiscate and dispose of any property, within the jurisdiction of the United States, belonging to any foreign individual, foreign entity, or foreign country whom they determine to have planned, authorized, aided or engaged in an attack on the United States by a foreign country or foreign nationals. The section also permits the government to present secretly (ex parte and in camera) any classified information upon which the forfeiture was based should the decision be subject to judicial review. The Justice Department requested the section as a revival of the President's powers in times of unconventional wars.[3410] By virtue of

---

[3409] For general background information, see, Doyle, Crime and Forfeiture, CRS REP.NO. 97-139A (Oct. 11, 2000).

[3410] "This section is designed to accomplish two principal objectives. First, the section restores to the President, in limited circumstances involving armed hostilities or attacks against the United States, the power to confiscate and vest in the United States property of enemies during times of national emergency, which was contained in the Trading with the Enemy Act, 50 App. U.S.C. §5(b)(TWEA) until 1977. Until the International Economic Emergency Act (IEEPA) was passed in 1977, section 5(b) permitted the President to vest enemy property in the United States during time of war or national emergency. When IEEPA was passed, it did not expressly include a provision permitting the vesting of property in the United States, and section 5(b) of TWEA was amended to apply only 'during the time of war.' 50 App. U.S.C. §5(b). "This new provision tracks the vesting language currently in section 5(b) of TWEA and permits the President, only in the limited circumstances when the United States is engaged in military hostilities or has been subject to an attack, to confiscate property of any foreign country, person, or organization involved in hostilities or attacks on the United States. Like the original provision in TWEA, it is an exercise of Congress's war power under Article I, section 8, clause 11 of the Constitution and is designed to apply to unconventional warfare where Congress has not formally declared war against a foreign nation. "The second principal purpose of this amendment to IEEPA is to ensure that reviewing courts may base their rulings on an examination of the complete administrative record in sensitive national security or terrorism cases without requiring the United States to compromise classified information. New section (c) would authorize a reviewing court, in the process of verifying that determinations made by the executive branch were based upon substantial evidence and were not arbitrary or capricious, to consider classified evidence ex parte and in camera. This would ensure that reviewing courts have the best and most complete information upon which to

section 316, property owners may initiate a challenge to a confiscation by filing a claim under the rules applicable in maritime confiscations. The section permits two defenses to forfeiture – that the property is not subject to confiscation under section 106 or that the claimant is entitled to the innocent owner defense of 18 U.S.C. 983(d).[3411] The characterization of the defenses as "affirmative defense" indicates that the claimant bears the burden of proof. The innocent owner defenses of 18 U.S.C. 983(d) are probably not available in cases under section 106, since that section is explicitly excepted from the coverage of 18 U.S.C. 983.[3412] The challenge proceedings permit the court to admit evidence, such as hearsay evidence, that would not otherwise be admissible under the Federal Rules of Evidence if the evidence is reliable and if national security might be imperiled should dictates of the Federal Rules be followed, §316(b). The section recognizes the rights of claimants to proceed alternatively under the Constitution or the Administrative Procedure Act.[3413]

The Justice Department also recommended enactment of an overlapping provision which ultimately passed as section 806 of the Act without any real discussion of the relationship of the two sections.[3414] Section 806 authorizes

---

base their decisions without forcing the United States to choose between compromising highly sensitive intelligence information or declining to take action against individuals or entities that may present a serious threat to the United States or its nationals. A similar accommodation mechanism was enacted by Congress in the Anti-Terrorism and Effective Death Penalty Act of 1996, 8 U.S.C. §1189(b)(2)," DoJ at §159.

[3411] "An owner of property that is confiscated under any provision of law relating to the confiscation of assets of suspected international terrorists, may contest that confiscation by filing a claim in the manner set forth in the Federal Rules of Civil Procedure (Supplemental Rules for Certain Admiralty and Maritime Claims), and asserting as an affirmative defense that – (1) the property is not subject to confiscation under such provision of law; or (2) the innocent owner provisions of section 983(d) of title 18, United States Code, apply to the case," Sec. 316(a).

[3412] 18 U.S.C. 983(i)(2)(D).

[3413] "The exclusion of certain provisions of Federal law from the definition of the term 'civil forfeiture statute' in section 983(i) of title 18, United States Code, shall not be construed to deny an owner of property the right to contest the confiscation of assets of suspected international terrorists under – (A) subsection (a) of this section; (B) the Constitution; or (C) subschapter II of chapter 5 of title 5, United States Code (commonly known as the 'Administrative Procedure Act')," Sec. 316(c)(1).

[3414] "Current law does not contain any authority tailored specifically to the confiscation of terrorist assets. Instead, currently, forfeiture is authorized only in narrow circumstances for the proceeds of murder, arson, and some terrorism offenses, or for laundering the proceeds of such offenses. However, most terrorism offenses do not yield 'proceeds,' and available current forfeiture laws require detailed tracing that is quite difficult for accounts coming through the banks of countries used by many terrorists. "This section increases the government's ability to strike at terrorist organizations' economic base by permitting the forfeiture of its property regardless of the source of the property, and regardless of whether the property has actually been used to commit a terrorism offense. This is similar in concept to the forfeiture now available under RICO. In parity with the drug forfeiture laws, the section also authorizes the forfeiture of property used or

confiscation of all property, regardless of where it is found, of any individual, entity, or organization engaged in domestic or international terrorism (as defined in 18 U.S.C. 2331),[3415] against the United States, Americans or their property, 18 U.S.C. 981(a)(1)(G). Section 806 as discussed below also calls for the more common confiscation of property derived from and or facilitating acts of domestic or international terrorism against the United States or its citizens. Confiscations under 806 may be challenged under the procedures of 18 U.S.C. 983, since they are not exempted there. To the extent that forfeiture under section 806 is based on international rather than domestic terrorism, claimants may also use the procedures of section 316.

Confiscation based solely on the fact that the property is owned by a criminal offender, rather than that it is derived from or facilitates some crime is fairly uncommon. It is the mark of common law forfeiture of estate. At common law, a felon forfeited all of his property. Most contemporary forfeiture statutes employ statutory forfeiture, a more familiar presence in American law,[3416] which consists of the confiscation of things whose possession is criminal, of the fruits of crime, and of the means of crime – untaxed whiskey, the drug dealer's profits, and the rum runner's ship.

Three characteristics set forfeiture of estate apart. The property is lost solely by reason of its ownership by a felon. All of a felon's property is confiscated, not merely that which is related to the crime for which he is convicted. Finally, it

---

intended to be used to facilitate a terrorist act, regardless of its source. There is no need for a separate criminal forfeiture provision because criminal forfeiture is incorporated under current law by reference. The provision is retroactive to permit it to be applied to the events of September 11, 2001," DoJ, at §403. The House Report on H.R. 2975 which contained versions of both sections is no more explicit on the relation of the two sections.

[3415] "(1) the term 'international terrorism' means activities that – (A) involve violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State, or that would be a criminal violation if committed within the jurisdiction of the United States or of any State; (B) appear to be intended – (i) to intimidate or coerce a civilian population; (ii) to influence the policy of a government by intimidation or coercion; or (iii) to affect the conduct of a government by mass destruction, assassination or kidnapping; and (C) occur primarily outside the territorial jurisdiction of the United States, or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to intimidate or coerce, or the locale in which their perpetrators operate or seek asylum . . . (5) the term 'domestic terrorism' means activities that – (A) involve acts dangerous to human life that are a violation of the criminal laws of the United States or of any State; (B) appear to be intended – (i) to intimidate or coerce a civilian population; (ii) to influence the policy of a government by intimidation or coercion; or (iii) to affect the conduct of a government by mass destruction, assassination or kidnapping; and (C) occur primarily within the territorial jurisdiction of the United States," 18 U.S.C. 2331(1),(5)(as amended by section 802 of the Act).

[3416] Austin v. United States, 509 U.S. 602, 611-12 (1993)("Three kinds of forfeiture were established in England at the time the Eighth Amendment was ratified in the United States: deodand, forfeiture, and statutory forfeiture . . . . Of England's three kinds of forfeiture, only the third took hold in the United States").

occasions attainder which negates the felon's right to hold property or for title to property to pass through him to his heirs. It was with this in mind, that the Framers declared that "no attainder of treason shall work corruption of blood or forfeiture exception during the life of the person attainted."[3417] And for this reason, President Lincoln insisted that the confiscated real estate of Confederate supporters should revert their heirs at death.[3418]

Neither section 106 nor 806 require conviction of the terrorist property owner.[3419] Both call for forfeiture of all of the terrorist's property, without requiring any nexus to the terrorist's offenses other than terrorist ownership. Neither makes any explicit provision for the terrorist's heirs. Section 106 applies only to foreign persons, organizations, or countries, but section 806 recognizes no such distinction.

Of course, the Supreme Court long ago confirmed the constitutional validity of a seemingly similar pattern in TWEA under the President's war powers.[3420] The Court was careful to point out, however, that the TWEA procedure was not really forfeiture or confiscation for the benefit of the United States, but by express statutory provision a liquidation measure to protect the creditors of enemy property owners.[3421] Neither section 106 nor 806 are part of TWEA and neither

---

[3417] U.S.Const. Art.III, §3, cl.2.

[3418] 12 Stat. 589, 627 (1862). Some would suggest a fourth distinction: that it follows a felony conviction. This is hardly a distinction, since over time legislation creating statutory forfeitures has employed criminal in personam proceedings following criminal conviction as a means of accomplishing confiscation.

[3419] Although by operation of law property subject to civil forfeiture of section 806 may be confiscated upon conviction of the property owner for any crime of domestic or international terrorism, 28 U.S.C. 2461(c)("If a forfeiture of property is authorized in connection with a violation of an Act of Congress, and any person is charged in an indictment or information with such violation but no specific statutory provision is made for criminal forfeiture upon conviction, the Government may include the forfeiture in the indictment or information in accordance with the Federal Rules of Criminal Procedure, and upon conviction, the court shall order the forfeiture of the property in accordance with the procedures set forth in section 413 of the Controlled Substances Act").

[3420] Silesian American Corp. V. Clark, 332 U.S. 469 (1947); cf., Societe Internationale v. Rogers, 357 U.S. 197, 211 (1958)("this summary power to seize property which is believed to be enemy-owned is rescued from constitutional invalidity under the Due Process and Just Compensation Clauses of the Fifth Amendment only by those provisions of the Act which afford a non-enemy claimant a later judicial hearing as to the propriety of the seizure").

[3421] Zittman v. McGrath, 341 U.S. 471, 473-74 (1951)(citing 50 U.S.C.App. 34) ("While the statute under which the funds are to be 'held, administered and accounted for' authorizes the vesting of such foreign-owned property in the custodian and its administration 'in the interest of and for the benefit of the United States,' it is not a confiscation measure, but a liquidation measure for the

explicitly treats the proceeds of confiscation as a fund for the benefit of creditors. Moreover, broad as the President's war powers may be, they would hardly seem to provide a justification for section 806, which embraces domestic terrorism and is neither limited to foreign offenders nor predicated upon war-like hostilities.

Criminal forfeitures, civil forfeitures with punitive as well as remedial purposes, and civil forfeitures whose effect is so punitive as to negate any presumption of remedial purpose, all raise other constitutional points of interest. The Eighth Amendment's excessive fines clause prohibits criminal forfeitures, and civil forfeitures with at least some punitive purposes, that are grossly disproportionate to the gravity of the crimes which trigger them.[3422] The Fifth Amendment's double jeopardy clause applies to criminal forfeitures and civil forfeitures which are so punitive as to negate any presumption of remedial purposes.[3423] The same has been said of the applicability of the ex post facto clause.[3424]

The limitations on criminal forfeitures would apply to the forfeitures under section 806 when prosecuted as criminal forfeitures by operation of 28 U.S.C. 2461(c). The offenses that activate section 106 and 806 confiscations, however, are of such gravity that successful excessive fine clause challenges are unlikely, even if the value of confiscated property were extraordinarily high.

On the other hand, there is more than a little support for the argument that section 106 and 806 constitute punitive rather than remedial measures. They are potentially severe. Section 806 calls for the total impoverishment of those to whom it applies (all assets foreign and domestic), while section 106 anticipates confiscation of all assets within the jurisdiction of the United States. They seem to undermine any claim to remedial purpose by reaching those assets that neither facilitate the commission of terrorism nor constitute its fruits. Moreover, in its analysis of the language of section 806, the Justice Department described it as conceptually akin to the criminal forfeiture provisions of RICO.[3425] If the courts find section 106 or 806 are civil in name but criminal in nature, they may well

---

protection of American creditors. It provides for the filing and proving of claims and states that the funds 'shall be equitably applied for the payments of debts").

[3422] United States v. Bajakajian, 524 U.S. 321, 337 (1998); Austin v. United States, 509 U.S. 602, 622 (1993).

[3423] United States v. Ursery, 518 U.S. 267, 278 (1996).

[3424] See e.g., United States v. Certain Funds (Hong Kong and Shanghai Banking Corp.), 96 F.3d 20, 26-7 (2d Cir. 1996). Where the ex post facto clauses do not apply, the validity of retroactive statutes is judged by due process clause standards. There is a presumption against retroactive application in such instances absent a clear indication of contrary Congressional intent grounded in the view that due process demands certain minimal notice of the law's demands, Landgraf v. USI Film Products, 511 U.S. 244, 265-66 (1994).

[3425] DoJ, at §403.

conclude that efforts to enforce the sections are bound by the limitations of the double jeopardy and ex post facto clauses.

Other Forfeiture Amendments

In order to more effectively enforce money laundering penalties and prosecute civil forfeiture actions involving foreign individuals or entities, section 317 of the Act establishes a procedure for long-arm jurisdiction over individuals and entities located overseas and for the appointment of a federal receiver to take control of contested assets during the pendency of the proceedings.[3426]

In the case of inter-bank accounts where a bank in a foreign nation has an account in a bank located in the United States, section 319(a) allows seizure of funds in an account here when the foreign bank has received money laundering or drug trafficking deposits overseas.[3427] Confiscation proceedings are conducted pursuant to 18 U.S.C. 953.

[3426] 18 U.S.C. 1956(b). Cf., H.R.Rep.No. 107-250, at 54-5 (2001)("The first provision in this section creates a long arm statute that gives the district court jurisdiction over a foreign person, including a foreign bank, that commits a money laundering offense in the United States or converts laundered funds that have been forfeited to the Government to his own use. Thus, if the Government files a civil enforcement action under section 1956(b), or files a civil lawsuit to recover forfeited property from a third party, the district court would have jurisdiction over the defendant if the defendant has been served with process pursuant to the applicable statutes or rules of procedure, and the constitutional requirement of minimum contacts is satisfied in one of three ways: the money laundering offense took place in the United States; in the case of converted property, the property was the property of the United States by virtue of a civil or criminal forfeiture judgment; or in the case of a financial institution, the defendant maintained a correspondent bank account at another bank in the United States. Under this provision, for example, the district courts would have had jurisdiction over the defendant in the circumstances described in United States v. Swiss American Bank, 191 F.3d 30 (1st Cir. 1999). "The second provision, modeled on 18 U.S.C. 1345(b), gives the district court the power to restrain property, issue seizure warrants, or take other action necessary to ensure that a defendant in an action covered by the statute does not dissipate the assets that would be needed to satisfy a judgment. "This section also authorizes a court, on the motion of the Government or a State or Federal regulator, to appoint a receiver to gather and protect assets needed to satisfy a judgment under sections 1956 and 957, and the forfeiture provisions in sections 981 and 982. This authority is intended to apply in three circumstances: (1) when there is a judgment in a criminal case, including an order of restitution, following a conviction for a violation of section 1956 or 1957; (2) when there is a judgment in a civil case under section 1956(b) assessing a penalty for a violation of either section 1956 or 1957; and (3) when there is a civil forfeiture judgment under section 981 or a criminal forfeiture judgment, including a personal money judgment, under section 982. "The amendment also makes section 1956(b) applicable to violations of section 1957. It applies to conduct occurring before the effective date of the Act").

[3427] 18 U.S.C. 981(k). H.R.Rep.No. 107-250, at 57-8 (2001)("Section 114 creates a new provision in the civil forfeiture statute, 18 U.S.C. 981(k), authorizing the forfeiture of funds found in an interbank account. The new provision is necessary to reconcile the law regarding the forfeiture of funds in bank accounts with the realities of the global movement of electronic funds and the use of off-shore banks to insulate criminal proceeds from forfeiture. "To prevent drug dealers and other criminals from taking advantage of certain nuances of forfeiture law to insulate their

Federal law has for some time permitted criminal forfeiture orders to reach substitute assets if the property of the defendant subject to confiscation has become unavailable. Section 319(d) establishes a procedure under which a convicted defendant may be ordered to transfer property to this country from overseas if the property is subject to confiscation.[3428]

Prior to enactment of the Act, federal law permitted confiscation of any property in the United States that could be traced to a drug offense committed overseas, if the offense was punishable as a felony under the laws of the nation where it occurred and if the offense would have been a felony if committed here.[3429] Section 320 enlarges this provisions to cover not only drug offenses but any of the crimes in the money laundering predicate offense list of 18 U.S.C. 1956(c)(7)(B), and continues the reciprocal felony requirements.[3430] This treatment is

---

property from forfeiture even though it is deposited in a bank account in the United States, it is necessary to change the law regarding the location of the debt that a bank owes to its depositor, and the identity of the real party in interest with standing to contest the forfeiture. The amendment in this section addresses the location issue by treating a deposit made into an account in a foreign bank that has a correspondent account at a U.S. bank as if the deposit had been made into the U.S. bank directly. Second, the section treats the deposit in the correspondent account as a debt owed directly to the depositor, and not as a debt owed to the respondent bank. In other words, the correspondent account is treated as if it were the foreign bank itself, and the funds in the correspondent account were debts owed to the foreign bank's customers. "Under this arrangement, if funds traceable to criminal activity are deposited into a foreign bank, the Government may bring a forfeiture action against funds in that bank's correspondent account, and only the initial depositor, and not the intermediary bank, would have standing to contest it. "The section authorizes the Attorney General to suspend or terminate a forfeiture in cases where there exists a conflict of laws between the U.S. and the jurisdiction in which the foreign bank is located, where such suspension or termination would be in the interest of justice and not harm U.S. national interests").

[3428] Cf., H.R. Rep. No. 107-250, at 58-9 (2001) ("Section 116 authorizes a court to order a criminal defendant to repatriate his property to the United States in criminal cases. In criminal forfeiture cases, the sentencing court is authorized to order the forfeiture of 'substitute assets' when the defendant has placed the property otherwise subject to forfeiture 'beyond the jurisdiction of the court.' Frequently, this provision is applied when a defendant has transferred drug proceeds or other criminally derived property to a foreign country. In many cases, however, the defendant has no other assets in the United States of a value commensurate with the forfeitable property overseas. In such cases, ordering the forfeiture of substitute assets is a hollow sanction. "This section amends 21 U.S.C. 853 to make clear that a court in a criminal case may issue a repatriation order--either post-trial as part of the criminal sentence and judgment, or pre-trial pursuant to the court's authority under 21 U.S.C. 853(e) to restrain property--so that they will be available for forfeiture. Failure to comply with such an order would be punishable as a contempt of court, or it could result in a sentencing enhancement, such as a longer prison term, under the U.S. Sentencing Guidelines, or both").

[3429] 18 U.S.C. 981(a)(1)(B).

[3430] H.R. Rep. No. 107-250, at 56 (2001)("This section is intended to reinforce the United States' compliance with the Vienna Convention. It amends 18 U.S.C. 981(a)(1)(B) to allow the United States to institute its own action against the proceeds of foreign criminal offenses when such

comparable to the early coverage of the federal statute, 28 U.S.C. 2467, which permitted enforcement of foreign confiscation orders in the case of drug offenses or the crimes on the money laundering predicate offense list. Section 323 of the Act amends the foreign forfeiture enforcement statute to (1) expand the grounds for enforcement to include any crime which would have provided the grounds for confiscation had the offense been committed in the United States; (2) to authorize restraining orders to freeze the target property while enforcement litigation is pending; and (3) to limit the absence-of-timely-notice defense.[3431]

---

proceeds are found in the United States. As required by the Vienna Convention, it also authorizes the confiscation of property used to facilitate such crimes. The list of foreign crimes to which this section applies is determined by cross-reference to the foreign crimes that are money laundering predicates under 1956(c)(7)(B). This section will permit the forfeiture of property involved in conduct occurring before the effective date of the Act").

[3431] H.R. Rep. No. 107-250, at 59-60 (2001)("Under current law, 28 U.S.C. 2467(d) gives Federal courts the authority to enforce civil and criminal forfeiture judgments entered by foreign courts. This section amends that provision to include a mechanism for preserving property subject to forfeiture in a foreign country. "Specifically, a Federal court could issue a restraining order under 18 U.S.C. 983(j) or register and enforce a foreign restraining order, if the Attorney General certified that such foreign order was obtained in accordance with the principles of due process. A person seeking to contest the restraining order could do so on the ground that 28 U.S.C. 2467 was not properly applied to the particular case, but could not oppose the restraining order on any ground that could also be raised in the proceedings pending in a foreign court. This provision prevents a litigant from taking 'two bites at the apple' by raising objections to the basis for the forfeiture in the Federal court that he also raised, or is entitled to raise, in the foreign court where the forfeiture action is pending. It complements the existing provision in section 2467(e) providing that the Federal court is bound by the findings of fact of the foreign court, and may not look behind such findings in determining whether to enter an order enforcing a foreign forfeiture judgment. "This section also amends 28 U.S.C. 2467 to make clear that it is not necessary to prove that the person asserting an interest in the property received actual notice of the forfeiture proceedings. As is the case with respect to forfeitures under U.S. law, it is sufficient if the foreign nation takes steps to provide notice, in accordance with the principles of due process. See Gonzalez v. United States, 1997 WL 278123 (S.D.N.Y. 1997) ('the [G]overnment is not required to ensure actual receipt of notice that is properly mailed'); Albajon v. Gugliotta , 72 F. Supp. 2d 1362 (S.D. Fla. 1999) (notice sent to various addresses on claimant's identifications, and mailed after claimant released from jail, is sufficient to satisfy due process, even if claimant never received notice); United States v. Schiavo , 897 F. Supp. 644, 648 49 (D. Mass. 1995) (sending notice to fugitive's last known address is sufficient; due process satisfied even if he did not receive the notice). "Finally, 28 U.S.C. 2467 is amended to authorize the enforcement of a forfeiture judgment based on any foreign offense that would constitute an offense giving rise to a civil or criminal forfeiture of the same property if the offense had been committed in the United States. This is one of two safeguards that the statute contains against the enforcement of judgments that the United States does not consider appropriate for enforcement: if the judgment is based on an act that would not constitute a crime in the United States, such as removing assets from the reach of a repressive regime, it could not be enforced. In addition, section 2467 already provides that a foreign judgment may only be enforced by a Federal court at the request of the United States, and only after the Attorney General has certified that the judgment was obtained in accordance with the principles of due process. Thus, neither a foreign Government nor a foreign private party could enforce a foreign judgment on its own under this provision."). Note that the safeguard to which the report refers is the range of foreign offenses that will support an enforceable confiscation order, i.e., drug offenses and crimes on the money laundering predicate offense list,

A fugitive may not challenge a federal forfeiture.[3432] Section 322 applies this fugitive disentitlement to corporations whose major shareholder is a fugitive or whose representative in the confiscation proceedings is a fugitive.

Section 906 instructs the Attorney General, the Secretary of the Treasury, and the Director of Central Intelligence to submit a joint report with recommendations relating to the reconfiguration of the Foreign Terrorist Asset Tracking Center, the Office of Foreign Assets Control, and possibly FinCEN in "order to establish a capability to provide for the effective and efficient analysis and dissemination of foreign intelligence relating to the financial capabilities and resources of international terrorist organizations."

ALIEN TERRORISTS AND VICTIMS

The Act contains a number of provisions designed to prevent alien terrorists from entering the United States, particularly from Canada; to enable authorities to detain and deport alien terrorists and those who support them; and to provide humanitarian immigration relief for foreign victims of the attacks on September 11.

Border Protection

The border protection provisions:

- authorize the appropriations necessary to triple the number of Border Patrol, Customs Service, and Immigration and Naturalization Service (INS) personnel stationed along the Northern Border, section 401
- authorize appropriations of an additional $50 million for both INS and the Customers Service to upgrade their border surveillance equipment, section 402
- remove for fiscal year 2001 the $30,000 ceiling on INS overtime pay for border duty, section 404
- authorize appropriations of $2 million for a report to be prepared by the Attorney General on the feasibility of enhancing the FBI's Integrated Automated Fingerprint Identification System (IAFIS) and similar systems to improve the reliability of visa applicant screening, section 405
- authorize the appropriations necessary to provide the State Department and INS with criminal record identification information relating to visa applicants and other applicants for admission to the United States, section 403.

---

and that the amendment narrows that safeguard by adding additional foreign offenses, i.e., any foreign equivalent of a federal crime which would support a confiscation order.

[3432] 28 U.S.C. 2466.

- instruct the Attorney General to report on the feasibility of the use of a biometric identifier scanning system with access to IAFIS for overseas consular posts and points of entry into the United States, section 1007
