HEADQUARTERS 59TH DRY CLEANING
Fukuoka, Najima, Japan

APO 929
11 April 1947

This is to certify that the HAKUYOO SHA Laundry is now under operational control of the Allied Forces.

Request that an ample amount of coal (30 TONS per month) thirty tons per month, be furnished to this firm so as to make the Laundry capable of turning out the desired services which the Allied Forces demand.

Further request electricity be furnished in sufficient-amount to operate as for said Laundry & Dry Cleaning Plant.

SUBJECT: Organization of Laundry

TO : Deputy Post Commander
Hakata Sub-Post 6a
APO 24

1. Confirming telephone conversation between Lt. Col. Walters and myself made at 1445, 10 April, the following information is submitted.

2. Headquarters, Eighth Army approved by telephone procurement of Japanese owned and operated laundry in Fukuoka. Captain Denning, QM Section, Eighth Army approved the procurement demand and will take care of the administrative details in connection with the procurement demand. Procurement demand will come down in about a week, can go ahead with the use of the laundry at once. Procurement demand to be ammended - par 2 to provide for owner to employ all help and to provide all supplies including coal, fuel, and power. However, to provide better materials sub-post commander willdraw from depots necessary soap and cleaning fluids for use in laundry, the cost of which is to be deducted from procurement demand payments to laundry owners. Competant military personnel is to be detailed to laundry as supervisors. Laundry is to operate in accordance with Eighth Army Circular 283. Captain Cash, QM Section, I Corps, will be in Fukuoka Wednesday or Thursday of next week to inspect laundry. G-4, I Corps, will radio Division G-4 in reference to approval of procurement demand.

CLO

TO : KYUSHU MILITARY GOVERNMENT REGIONAL OFFICE
Attention: Col Link

FROM : Kyushu Central Liaison Office

SUBJECT: Coal

1. The following is the tabulation of the amount of coal requested by Q.M. and the actual shipment made by Nippon Coal Co. to Q.M. for February and March.

	Q.M. Request	Actual Shipment
Feb	6,000	6,959
Mar	14,000	8,824
	20,000	15,783

2. For April Nippon Coal Co. is requested by Q.M. to make delivery of 14,217 tons. (The balance to cover the shortage of actual shipment for February and March in addition to the allocation for April.)

3. However, inclusive of Individual P.D. the Nippon Coal Co. has delivered 20 091$\frac{3}{4}$ tons of coal for February and March as is shown by the following tabulation.

	Troop	Individual P.D.
Feb	6,959	1,546 $\frac{3}{4}$
Mar	8,824	2,762
	15,783	4,308 $\frac{3}{4}$

Total - 20,091 $\frac{3}{4}$

4. Nippon Coal Co., having delivered 20,091 $\frac{3}{4}$ tons of coal for February and March, is given to understand that if it has to deliver 14,217 tons for April to Q.M. nearly 6,000 tons (4,217 + Individual P.D. which is expected to amount to approximately 1,500 tons) is in excess of the allocation for April. (10,000 tons)

KYUSHU MILITARY GOVERNMENT REGION
HEADQUARTERS & HEADQUARTERS DETACHMENT
Fukuoka, Kyushu, Japan

RSL/ble

4
AG 463.3

APO 929
2 April 1947

SUBJECT: Coal Allocation for Individual Procurement Demands in Kyushu for the Months of February, March and April 1947

TO : Commanding General, Eighth Army, APO 343
(Attn: Mil Govt Section, Major Westenberger)

THRU : Commanding General, I Corps, APO 301
(Attn: Mil Govt Section)

1. A study of coal allocations for the subject months has been completed and shows as follows:

a. Allocation to the 24th Division Quartermaster for troop housing only:

February - 10,000 Tons
March - 10,000 Tons
April - 10,000 Tons

Original allocation was only 6,000 Tons as set out in Eighth Army Radio DX99903, dtd 13 Feb 1947, (see Exhibit 6). However, this was raised to 10,000 Tons by Radio Cite DX82301, TOS, Eighth Army, 25 Feb 1947, (see Exhibit 5).

The full allottment has been withdrawn for the months of February and March.

The 24th Division Quartermaster does not supply coal to the following installations:

1113th Engineers (Requirements: 740 Tons per month)
C.I.C. (Requirements: 15 Tons per month)
Dependent Houses (Requirements: 1800 Tons per month)
Rest Hotels (Requirements: 495 Tons per month)
Extraordinary Request, such as Exhibit 3 - Ltr Hqs 24th Inf Div, 4 Feb 47, "Munitions Disposal Procurement" (Requirements: 420 Tons per month)

TOTAL (Est) 3470 Tons per month

AG
HQ. I CORPS
AG 463

B. On 14 February 1947, Lt. Harry assigned four thousand (4,000) Tons to individual PDs in Kyushu, which was exclusive of the six thousand (6,000) Tons allocated to 24th Division Quartermaster (see Exhibit 7 - Change in Coal Allocation Plan for February). However, when Radio, Cite DX82301, TOS, Eighth Army, 25 Feb 1947, was received by 24th Division Quartermaster, that seemingly cancelled the individual PD

43694

932 ~~41934~~

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

allotment in Kyushu, leaving the 3,470 Tons set forth in Para 1 a above without allocation.

2. All coal consumed in Kyushu has been definitely allocated; therefore, any demands upon the Japanese for coal outside of assigned allotments means that some allocation must be reduced.

3. Procurement Demand FKKH 24, calls for six (6) Tons per day or approximately 180 Tons per month. (From what allocation is this coal to come?) Procurement Demand FKKH 1673A calls for four (4) Tons per day or approximately 120 Tons per month. (From what allocation is this coal to come?) (See exhibit 1 - Ltr Hqs 1113th Engr Const Grp, dtd 27 Nov 1947, "Material Non-Availability").

4. The 1113th Engineers require the Japanese to supply the Iwasaki-Gumi two hundred forty (240) Tons per month and the Kashima-Gumi, two hundred (200) Tons per month. (From what allocation is this coal to come?) (See Exhibit 2 - Certificate, Iwasaki & Co., Ltd. Require 60 Tons Coal Weekly, dtd 27 Aug 1946, signed by Lt. Col. Astaella).

5. The munitions disposal officer requests the Home Ministry to deliver four hundred twenty (420) Tons of coal for a clearance operation. (From what allocation is this to come?) (See Exhibit 3 - Ltr Hqs 24th Inf Div, dtd 4 Feb 1947, "Munitions Disposal Procurement").

6. C.I.C., Dependent Houses and Rest Hotels must be supplied coal but no allocations or central procurement demand covers these items at present. Total two thousand three hundred ten (2310) Tons per month. In addition, the cabarets, beer halls, laundries, officers' quarters, interpreters' dormitories and offices which are used exclusively for military personnel, are required to have coal for heat and cooking, but presently there is no allocation to take care of these requirements.

7. Enclosed as Exhibit 4 is a breakdown of coal for February and March (actual deliveries to dependents' houses, and rest hotels) and an estimate of coal deliveries for the month of April to dependents' houses and rest hotels, as well as a number of questions asked by the Japanese coal distributing company.

8. It is apparent to this headquarters that either the allocation of coal to the Division Quartermaster should be increased to fourteen thousand (14,000) Tons per month, and

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

that that office be required to furnish all the activities set forth above or that Military Government Region should be allotted approximately four thousand (4,000) Tons per months from which these requirements could be filled. Unless some definite and workable plan is promulgated, the delivery of coal to non-divisional occupational troops and other activities in Kyushu will continue to be uncertain, confused and unfair to both the Japanese and to the using unit.

DECLASSIFIED E.O. 13526 SECTION 3-403\NNDC NO. JJ2013

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

DRAFT

1. It is desired to reduce the number of areas in which equipment and facilities are presently under custody as reparations selections in pocle[illegible] facilities. There are over one thousand dispersals of arsenal equipment; over nine hundred of which consist of less than ten machines and the items inventoried in these areas while owned by the Japanese Government were in reality part of the industry in which they were associated. Similarly, over 400 of the approximately 500 aircraft and one hundred of approximately 125 munitions plant dispersals which consist of less than 10 items were not integral parts of those facilities though owned by the companies listed for reparations. It is believed that action taken as directed in the following paragraphs will result in a drastic reduction of areas under surveillance. Most aircraft and privately owned munitions dispersals are expected to be eliminated and arsenal areas reduced to those listed in the SCAPIN's or one or more additional areas for arsenal equipment in each prefecture.

2. Equipment dispersed from arsenals, laboratories, aircraft factories, and privately owned munitions plants to other industrial installations prior to the date the above installations were taken under custody and control will be considered part of the industry with which it is now associated and will be immediately released from custody unless the installation at which it is located has been independently listed as a reparation selection. This should, in general, release equipment from all dispersal areas except those specifically set up for custody and control of idle equipment.

3. Equipment and facilities dispersed from arsenals, aircraft factories, privately owned munitions plants, and laboratories to installations independently listed as a reparations selection will be retained under custody as part of that installation at its present location.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

4. Equipment and facilities of arsenals and government owned laboratories which are not included in 1 and 2 above and which is not in authorized use will be moved to one or more contralized locations within each prefecture if such movement is practical from a viewpoint of adequate facilities for custody and if such action can be taken with due regard to transportation requirements. These equipment and facilities will normally be located in warehouse areas established for custody purposes when such equipment was removed from smaller dispersals. Contralization will, where possible without great administrative difficulty, be done at the address listed by SCAPIN or in a location where evaluation, inspection and packaging can be handled as a unit. Arsenal areas having larger segments of inventoried equipment will be used when practicable for centralization of other arsenal equipment, regardless of code number. No action will be taken to centralize equipment belonging to aircraft factories and privately owned munitions plants.

5. Equipment and facilities in authorized temporary use which has been dispersed subsequent to listing will remain in the dispersed location only as long as such use is necessary. Upon termination of such authorization, items will be returned to the centralized location selected.

6. A summary, by prefecture, of areas which will remain after the action taken above is completed will be submitted by ___(date)___ . This summary will be submitted separately for arsenals, for aircraft factories, for privately owned munitions plants, and for laboratories, even though action directed above is not completed and will include the following information:

Code number, & dispersal area
location of munitions released
location of munitions remaining

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

1. In compliance with G.H.Q. SCAP instruction, all the coal in Japan has been divided into two parts, one is for the use of Occupation Forces and the other is for the civil use of the Japanese people, and even the latter is strictly controlled by the anthorities.

2. The amount of coal demanded by P.D. is as follows:

	Occupation Forces	Individual P.D.	delivered to QM.
Feb.	6,000 ton	4,000 ton	6.000 ton
March	6,000 ton	4,000 ton	9,450 ton
		Remaining 4,550 ton had been used for dependent houses and other uses relating Occupation Forces.	
April.	10,000 ton	No.	

QM requests Nippon Coal Company to deliver the remaining 4,550 ton, but the amount was already consumed by the above mentioned use. Therefore the Company is obliged to furnish from the allocation in April, as there is left up allocation except for civil use. How should the problem be solved.

3. The coal which had been demanded and supplied not by P.D. to coal itself, but in relation with P.D. to other works (for example, coal to Kashima-Gumi and Iwasaki-Gumi) is included in the 4,550 ton above mentioned. If it should not be included in the frame of individual P.D., from what frame should we supply? It is the same as above in the case of coal for cabarets and laundries, and in these cases coal delivery is requested by officers concerned on verbal or written form of requisition. How should we treat those requests?
There is no allocation for them.

4. In April 10,000 tons are allocated to Occupation Forces by P.D. but no individual P.D. is issued for dependent houses and rest hotels. From what source should we furinsh coal for them? This office is of the opinion that 10,000 tons of coal, which is the same as the total amount in Feb. and March, should include that for dependent homes and rest hotels.

Hq I Corps, APO 301,

TO: CG, 24th Inf Div, APO 24

1. It appears that a certain amount of confusion exists among units as to the responsibility for the supply of coal on the island of Kyushu. Coal allocations to your headquarters are intended for the supply of all units in Kyushu.

2. It is desired that this matter be cleared up by conference with Military Government. The following information is submitted for your consideration at such conference:

a. Where a procurement demand for real estate contains a heating clause, it is the responsibility of the Japanese Government to supply the necessary fuel. The fuel is obtained through Japanese channels and not from quartermaster stocks.

b. Where a procurement demand for supplies, services or construction requires the furnishing of coal in order that the Japanese contractor may carry out his contract, it is the responsibility of the Japanese Government to supply the coal. The coal is obtained through Japanese channels and not from quartermaster stocks.

c. Coal for the operation of Occupation Force installations where no procurement demand exists for the Japanese to supply such coal is furnished from quartermaster stocks.

3. Your conference will consider surveys of future coal requirements for the three categories included in the previous paragraph. Consideration should be given to amending procurement demands for real estate where feasible to call upon the Japanese Government to supply the fuel necessary for heat and hot water.

4. The appropriate Japanese officials will be advised in advance of the forecast of coal requirements to fulfill their responsibilities under paragraph 2a and 2b, above.

5. A forecast of coal requirements for quartermaster stocks will be forwarded to this headquarters pursuant to current directives.

6. A copy of the basic letter and action taken by this headquarters

FUKUOKA PREFECTURE

The chief industry in Fukuoka Prefecture is coal mining. The Miike mines provide 14% of Kyushu coal. The Chikuho mines provide 65% of Kyushu coal. The coal production of Kyushu equals 60% of Japan's coal supply.

The Yawata Steel Mill is the largest steel mill in Japan.

The Miike Dyestuff and Mitsubishi Kurosaki plants are important for medicines and dyestuffs.

The Makiyama plant is important for its glass manufacture.

The city of Kurume is the center of rubber manufacture in Kyushu.

Moji and Hakata are principal export-import ports in Kyushu.

OITA MILITARY GOVERNMENT TEAM FAC/tk
APO 929

13 December 1946

AG 463.3

SUBJECT: Coal Supply, Oita Prefecture

TO : Commanding Officer, Kyushu Military Government Region
Hq & Hq Detachment, APO 929

1. Pursuant to instructions contained in Information Bulletin No.29, Kyushu Military Government Region Hq & Hq Detachment, APO 929, dated 29 November 1946, the following report relative to coal supply and requirements is submitted:

a. Military Supply and Needs:

The 19th Infantry reports that requirements from present date to 31 May 1947 will total three thousand and two hundred (3200) tons, and at this time there is stock piled for military use two thousand two hundred and eighty (2280) tons.

b. Civilian Supply and Needs (10 Dec 1946 to 31 March 1947):

Item	Unit	On Hand	Required Dec 1946	Jan 1947	Feb 1947	Mar 1947
Coal	Kilo Ton	5,020	24,133	36,388	36,814	36,814
Coke	"	372	1,108	1,644	1,644	1,644

(Occupation Forces needs not included).

2. For the month of December 1946 the coal requirement was twenty thousand four hundred and thirty-four (20,434) tons. Delivery was four thousand eight hundred and eighty-nine (4,889) tons. For Coke the requirement was one thousand four hundred and thirty-seven (1,437) tons. Delivery amounted to about two hundred and fifty (250) tons.

AG 463.3 (7 Mar 46)GD

SUBJECT: Information of Genral Application Pertaining to Directive, file AG 463.3 (25 Sep 45)GD, this Headquarters, dated 25 September 1945, subject: "Provisions of Coal at Fusan, Korea for use of Commanding General, U.S. Forces in Korea". Reference Scratched

TO : Commanding General, Eighth Army, APO 343.

1. With reference to subject memorandum to the Imperial Japnaese Government, the following is published for the information of all concerned.

2. Due to the lack of enough coal in Korea to meet essantial needs, the Imperial Japnaese Government was directed to export 70/75000 tons of coal monthly. The coal is to be delivered at Fusan and consigned to Commanding General, United Stated Army Forces in Korea. It is to be used in the operation of the Korean railways. The monthly requirement was not shipped in either October or November due to unloading difficulties at Fusan. These difficulties were remedied in December and that port became able to handle 70/75000 tons of coal monthly.

3. Shipments during December and January were short of the quantity called for. The Japanese Government stated that the failure to meet the full committoment was due to the following:

a. Poor communications between loading ports and controlling authorities.
b. Necessity for shipp repairs.
c. Shortage of coal at loading ports.
d. Congestion at Port Miike due to priority in leading British vessels engaged in the Hong Kong coal trade.

4. The following comments are made in connection with the above difficulties:

a. Civil Communications Section, General Headquarters, Supreme Commander for the Allied Powers, has been requested to investigate communication conditions with a view to bringing about inprovements. Arrangements have been made to have Korea report daily ship arrivals and departurss at Fusan. This information is furnished Japnaese authorities daily.

AG 463.3 (7 Mar 46)GD

b. An evaluation of performance during February, and discussions with Shipping Control Administration for Japan disclosed that Japanese shipping is in a serious state of disrepair. The closest coordination of Japanese efforts is required to obtain maximum use of the vessels in service.

c. Coal production at the present time is sufficient to permit loading at most ports, if Japanese efforts to ship coal to such ports are vigorous enough. Proper surveillance will assist in accomplishing this.

d. Conditions at Port Miike are being surveyed by the Eighth Army to ascertain causes of congestion and means of relief. The use of other coal loading ports in Kyushu is being developed by the Eighth Army as a means of relieving the overcrowding of Miike. The British have been requested to cease all priority demands on Japanese facilities in the case of the Hong Kong coal movement. They have also agreed to limit vessel arrivals to two monthly.

5. Advice from the Commanding General, XXIV Corps states that coal shipped to date has had a large percentage of dirt. stones and other matter making it unsatiafactory for railway use. It is desired that an inspection service be established to insure that coal loaded and shipped is of a suitable quality and size, and sufficiently free from foreign material to permit satisfactory use.

6. A close survey of Japanese efforts for February indicated that a sincere effort is being made by central Japanese authorities to meet the committment. The shipping schedule is adequate. Delays are caused by mechanical failures, coal shortages, labor troubles, and so forth. It is desired that the Eighth Army insure thority to overcome these difficulties.

7. The full schedules established and the necessity for their substantial execution require early receipt of infornation on current performance and adverse conditions which can not be overcome locally so that necessary timely action can be taken by central Japanese authorities. Routine Japanese communications are inadequate for this purpose. Therefore it is desired that Eighth Army submit by telephone daily to the Supreme Commander for the Allied Powers the following:

a. Ship sailings for the previous day.

b. Actual and anticipated variations from the established shipping schedule, causes thereof, and action taken locally to eliminated these causes. This information will be furnished the Japanese authorities concerned.

8. Eighth Army Headquarters will furnished forward shipping schedules, information on loading ports and such other date as will assist in performing proper surveillance.

9. There are inclosed copies of directives and communications pertaining to this matter.

MEMORANDUM FOR : IMPERIAL JAPANESE GOVERNMENT.

THROUGH : Central liaison Office, Tokyo.

SUBJECT : Weekly Report on Coal Shipment to Korea.

1. Reference is made to your letter dated 18 January 1946, file C.L.O. Number 283 (3.2), subject as above. It is noted on this accompanying report that the shipments of coal to Korea for December total 49,056 tons and to date for January only 6,564 tons.

2. The unloading difficulties which hampered the discharge of coal at Fusan during the months of October and November have been elimintated and since early December, that port has been in a position to handle 70/75000 tons per month. You will take immediate stops to insure full compliance with Memorandum from Supreme Commander for the Allied Powers to the Imperial Japanese Government dated 25 September 1945, file AG 463.3 (25 Sep 45)GD, subject: "Provision of Coal at Fusan, Korea for use of Commanding General, United States Forces in Korea.

FOR THE SUPREME COMMANDER:

H. W. ALLEN,
Colonel, AGD,
Asst. Adjutant General.

AG 463.3 (15 Feb 46) GD
(SCAPIN - 576-A)

MEMORANDER FOR: THE IMPERIAL JAPANESE GOVERNMENT.

THROUGH : Central Liaison Office, Tokyo.

SUBJECT: : Loading of Coal for Export at Miike.

Reference is made to your letter dated 12 Fobruary 1946. file C.L.O. No. 645 (2.23), subject as above. The loading of all vessels at Port Miike with coal will be in order of the date of arrival. No priorities will be given to class or category of shipments pending further instructions from this headquarters.

FOR THE SUPRENE COMMANDER:

F. J. FITCH,
Brigadier General, AGD,
Adjutant General.

MEMO FOR RECORD:

1. Reference letter from I. J. G. to SCAP dated 12 Feb 46. file C.L.O. No. 645 (2.23), subject: "Loading of Coal for Export at Miike", in which the Japanese Government advises that British vessels arriving at Port Miike to load coal for export to Hong Kong had been demanding Priotity over all other loadings.

2. Due to the limited facilities at Port Miike, there has been a congestion of shipping with some repercussions on the meeting of the commitment of 75,000 tons monthly to Korea. The congestion has been due in part to the demands of British ship masters that their vessels be given priority in loading over any other vessels in the harbor. In some instances this has resulted in a cessation of loading operations already under way on Japanese freighters with resultant delay in their ultimate ETCs and ATDs.

3. The 8th Army has been requested by letter dated 30 Jan 1946, file AG 463.3 (30 Jan 36)GD, subject: "Coal Bunkering and Shipping", to investigate the facilities at Port Miike to determine the actual situation and incidently to recommend measures to improve the conditions at that harbor. The survey is under way and it is not desirable to establish any control measures until the facts are known.

4. The United Kingdom Liaison Mission has been advised to take the necessary steps to prevent the demanding of a priority on the part of British ship masters and, in addition, to develop the possibilities of insuring that British ships arrive at evenly spaced intervals so that something approaching a regularity in shipping and loading schedules can be established for all vessels.

MEMO FOR RECORD:

1. Refer ltr from IJG dtd Jan 46, file CLO No. 1 283 (3.2) subj: "Weekly Report on Coal Shipment to Korea". Figure on coal shipment to Korea show that the requirements of 70/75000 tons monthly is not being approached as follows:

October	6,564 tons
November	53,597 tons
December	49,056 tons

The October and November totals were to some extent the result of inadequate unloading facilities and desorganization at Fusan. However, evaluation of a report from Korea indicates that unloading Major Cosgray, T.C. of the Military Government Section in Korea disclosed that the difficulties formerly hampering unloading had been eliminated and the capacity of the port was sufficient to handle in excess of 70,000 tons monthly.

2. Representatives of the Japanese Coal Company, which is handling the shipments, were interviewed on the failure to meet the required totals and stated that the crux was the inadequacy of shipping due among other things to the necessity for repairs and inability to schedule loadings properly because of communication difficulties. It appears from their statements concerned with this matter.

3. Coordination of the various elements which would bring about the increase is a responsibility of the Japanese Government under the provisions of SCAP Memorandum mentioned above, therefore, no singling out of any one factor as needing correction is necessary.

4. This completes G-4 action on this case.
