

On March 31 was Published No. 3, Vol. VII., New Series, Price 8d; by post, 9d,

THE INVESTOR'S MONTHLY MANUAL. The INVESTOR'S MONTHLY MANUAL for March gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c, It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to March 28.

Advertisements for the next number, to be published on April 28, must be sent, to insure insertion, on or before April 26.

The December Number of the INVESTOE'S MONTHLY MANUAL gives, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1875 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the Names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1876 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. It is intended, in addition, to furnish the Names of the Chairman and Secretaries, or Managers, of the various Companies. A copious Index is added for purposes of reference. Price 1s 4d; by post, 1s 6d.

OFFICE-340 Strand.

#### THE BUDGET.

THE interest of the Budget statement has this year been a good deal discounted. From the last quarterly account of revenue it was apparent, as we pointed out last week, that there had been a surplus of about 400,000l in the financial

Estimated Revenue of 1877-78 ..... 79,020,000 Expenditure — ..... 78,794,000 Estimated Surplus ..... 226.000 In these circumstances, as the Chancellor of the Exchequer stated, the Budget statement completes itself. There is nothing to be done in the way of putting on or taking off taxes. Nor is the result unsatisfactory considering the present state of trade. It was certainly necessary a year ago to add a penny to the income tax - which was not a pleasant thing to doand this penny is retained, but remembering the recent remissions of taxation and the singular lightness of our taxes as compared with those of any other great country in the world, we have really little to complain of. An additional penny on the income tax for a year or two is no great sum to pay towards meeting an increasing expenditure in years of depression in trade and declining revenue, There may be questions how far the expenditure itself is justified, though much of it undoubtedly is so, especially the increase of the education vote; but allowing the necessity for the expenditure itself, the country is certainly to be congratulated on the financial result being no worse.

It appears to be questioned, however, whether the estimates of revenue for the current year are not still too high, and as that is the main point of interest in the Budget, it may be worth while examining how the facts stand. There is no more responsible duty thrown on the Chancellor of the Exchequer than that of making a careful estimate of his income, and the calculation this year is unusually critical. The controversy mainly turns upon the three great branches of receipt—Customs, Excise, and Stamps—and there is also a question, though less keenly urged, about the income tax. There is, certainly, a large increase in the miscellaneous revenue, but this is mostly a matter of account; while the changes in Post Office and Telegraph revenue and Crown Lands call for no remark.

To take first the question as to Customs, Excise, and Stamps, we think that at first sight it will be admitted there is no appearance of over-estimate. On balance, as we showed last week, these three branches fell off 100,000l in the year ust past as compared with the previous year, and now the

Ales.

#### THE ECONOMIST.

414

Customs Excise	£ 19,850,000 27,500,000	 £ 19,922,000 27,736,000	 £ 72,000 236,000
Stamps	10,920,000	 10,890,000	 + 30,000
Total	57,270,000	 58,548,000	 278,000

Thus the Chancellor of the Exchequer anticipates for these three branches a less receipt by 278,000*l* than their actual yield last year, and a less receipt by 378,000*l* than their actual yield in 1875-6. Allowing for the steady increase of population in the country in the two years, and for the "firm-"ness," to use the Chancellor of the Exchequer's word, with which the revenue has been maintained, this reduction of estimate cannot but be considered most material. The reduction seems even more serious if we compare it with the estimates which the Chancellor of the Exchequer thought would be realised a year ago. The comparison is :—

	Estimate of	Estimate of	F	teduction in
	1877-78.	1876-7.		1877-8.
	£	£		£
Customs	19,850,000	 20,250,000		400,000
Excise	27,500,000	 27,624,000		124,000
Stamps	10,920,000	 11,006,000		80,000

It is urged, however, that trade is very depressed-the answer to which is that this is a general objection, of which little can be made. Trade has been for a year or two quite as depressed as it is now, and we can hardly expect anything worse to the revenue, unless a new calamity occurs. The Chancellor of the Exchequer must find, if possible, some measure of the depression, and there is no guide to him in this language. But, specifically, it is also urged-and this point was more particularly taken by Mr Childers-that the rate of falling off in the last two quarters of the financial year just past has been much greater than what the Chancellor of the Exchequer allows for next year, and that we have to deal with a decline at an increasing rate. Mr Childers remarked, that "for the third quarter of the " year the Customs, Excise, and Stamps gave a result worse " than the Chancellor of the Exchequer's anticipations, at the " rate of 1,250,000l a year, while for the fourth quarter they " gave a result no less than 1,530,000l short of the Budget "estimate. That was a matter of very grave consideration; " and, although he was the last person to question the revenue " estimates which the Chancellor of the Exchequer submitted " to the House on his responsibility after carefully consulting " the heads of the Revenue Departments, he thought it was "right to put this question to the right hon. geutleman-" namely, whether, considering that in the fourth quarter of "the year those sources of income had fallen off at the "rate of a million and a-half a year, were they safe " in only estimating, as they had done, that there "would be a falling-off of something like 200,0001?" And it is no doubt quite true, as we pointed out last week, that the slight falling off in these three branches of revenue for the past year is brought about by a balance between the earlier and the later quarters. In the first two there was an increase of 482,000l, and in the last two a decrease of 582,000/. But there are one or two qualifications which are important when we come to exact deductions like those which Mr Childers has suggested. The *jirst* is, that the falling off from last year's estimates which the Chancellor of the Exchequer allows for is not 200,000l, but 600,000l. The second is that in the last two quarters there was a difference of days to 'their disadvantage, as compared with the previous year. In the last quarter especially, there was no "29th of February," as in the corresponding quarter of 1875-6. As one day less or more in these three branches makes a difference of over 200,000l, so impor-

third is that just because there is a decline in the last two quarters there is the less reason to anticipate a decline during the whole of the current year. The reasonable anticipation would be that there will be a decline in the first two quarters of the current year, when the comparison is with a period in which there was an increase a year ago, but when we come to the last two quarters the revenue will be stationary at the point to which it has already declined. To anticipate a farther decline, with population increasing, would be to anticipate a much worse state of things than now exists, instead of anticipating a continuance of the same state of things. The specific objection to the estimates based on the actual decline in the past, is thus faulty, as well as the general objection on the ground that trade is very depressed.

Regarding the income tax, there is less room for any general objection. The means exist for calculating the yield of this tax with some exactness. In all the Schedules, except Schedule D, there is hardly any room for unforeseen variation, and in the larger part of Schedule D itself, as is well seen from the interesting details in the last Inland Revenue report, there is also little room for such variation. A great deal of Schedule D consists of the returns of public companies, such as railways, canals, gas works, and the like, where the substantial result can be long foreseen. But the specific objection has been made, that the returns of this tax were forced at the close of last year, an impression that this was done regarding other taxes having also been diffused. In proof, the low return of the taxes in the first week of the current financial year has been alleged. But the Chancellor of the Exchequer's explanation on this point, as to which he can speak with authority, is conclusive. There has been no real forcing of the revenue in the sense understood. The effort of the collectors of income tax in the last week of the financial year was simply directed to bring in the estimated amount of tax due. There had been a new assessment, and the preparation of the necessary forms had caused delay in the collection, as is usually the case when there is a new assessment. All that had been done was to make up for previous delay in the last week, and so avoid a non-receipt of income tax belonging to the year, which would have had to be explained. This is a very simple and satisfactory explanation. As to the other taxes, the Chancellor of the Exchequer is less explicit, but he warns us, quite properly, against looking to the results for particular weeks, and hints significantly at the probable return of the second week of the current financial year.

As far as the argument goes, therefore, we are inclined to believe that a sufficient case is made out for accepting the present estimates of revenue. The great branches of receipt show a considerable reduction as compared with last year and the year before, and a still more considerable reduction as compared with last year's estimates. The deductions from the present state of trade and the decline of revenue in the last two quarters, which are believed to require a still more moderate estimate, are also greatly exaggerated, and the necessary qualifications have been lost sight of. Unless a new calamity occurs, we should think it most unlikely that the Estimates will be too little, and we see no ground for anticipating such a calamity. We must calculate on ordinary and not on extraordinary events, or it would be impossible to frame a Budget at all. In the worst event, also, if the estimates are insufficient, we should only postpone for a twelvemonth part of the operation of the new sinking fund. Neither the Government nor the country would wish for this, but it would be better to do so than incur, through excessive timidity, an increase of taxation which may actually be found superfluous. It is certainly most inexpedient to have an alteration of taxes upon a very doubtful calculation that some increase is required.

582,000!. But there are one or two qualifications which are important when we come to exact deductions like those which Mr Childers has suggested. The *jirst* is, that the falling off from last year's *estimates* which the Chancellor of the Exchequer allows for is not 200,000!, but 600,000!. The *second* is that in the last two quarters there was a difference of days to 'their disadvantage, as compared with the previous year. In the last quarter especially, there was no "29th of February," as in the corresponding quarter of 1875-6. As one day less or more in these three branches makes a difference of over 200,000!, so important a qualification should not have been lost sight of. The

Packet Service	767,877

Total Expenditure for the year 1877-78 78,794,044 Estimated surplus, £225,956.

#### THE BUDGET RESOLUTION.

THE following are the proceedings of the Committee of Ways and Means on Thursday evening in passing the Budget Resolution :-

#### (In the Committee.)

(In the Committee.) Resolved,—That, towards raising the Supply granted to Her Majesty, there shall be charged, collected, and paid for one year, commencing on the 6th day of April, 1877, in respect of all property, profits, and gains, mentioned or described as chargeable in the Act of the 16th and 17th years of Her Majesty's reign, cap. 34, the following duties of income tax (that is to say):—For every 20s of the annual value or amount of property, profits, and gains chargeable under Schedules A, C, D, or E of the said Act, the duty of 3d; and for every 20s of the annual value of the occupation of lands, for every 20s of the annual value of the occupation of lands, tenements, hereditaments, and heritages chargeable under Schedule B of the said Act-In England, the duty of 11d; in Scotland and Ireland respectively, the duty of 14d. Subject to the provisions contained in Section 163 of the Act of the 5th and 6th years of Her Majesty's reign, cap. 35, for the exemption of persons whose income is less than 150*l*, and in Section 8 of "The Customs and Inland Revenue Act, 1876," for the relief of persons whose income is less than 400*l*.

#### THE PROSPECT IN THE EAST.

THE complexion of affairs in the East has again become very Turkey refuses to have anything to say to the conwarlike. ditional Protocol, or to make peace with Montenegro on Montenegrin terms, which exceed, as we understand, the terms mentioned in the Protocol; or to send an envoy to Petersburg to treat of disarmament, according to the Russian declaration. And accordingly, in every capital of Europe, war is believed to be inevitable. Though fully sharing this latter view, we should be a little surprised, notwithstanding the gloomy appearances on every side, if war should break out between Russia and Turkey quite immediately. Even if the Protocol is to be considered binding, Russia is bound to consult her co-signatories before putting in an execution in Turkey, and we assume that the decencies of diplomacy will be maintained. And if the Protocol is not to be binding, some explanation must surely take place between the Powers as to the effect the Turkish refusal is to have. There may, therefore, be a short interval of diplomatic action before the first gun is fired-a delay which may be used to bring about peace when peace seems hopeless; but this is the most that now seems possible. The strong drift of events has been to war all along. The passions roused in both Turkey and Russia, the steps taken by members of the war party in Russia to make peace difficult, the apparent willingness of even the peace party in Russia to risk a great deal of menace so as to gain the objects of war without actual fighting, the folly of

the shifty and lying habit of Russian diplomacy, even if the objects of that diplomacy had been consistent and legitimate have all contributed to close up the peaceful issues from the difficulty.

The present aspect of affairs enforces the criticism which we last week passed upon the Protocol arrangement. Even if peace was to be secured in the end, it cannot have been contemplated by the Government that so great a risk of a rupture between Turkey and Russia was immediately to be run. The Government signed the Protocol as a step towards peace, and it is immediately used to support a Russian threat of war. The Russian Government, in fact, treats the Protocol as a ratification of its case against Turkey, and ignores altogether the sort of consideration which was suggested by Count Schouvaloff, that the signature of the Protocol would be con-sidered "something tangible" for the sacrifices Russia had made in mobilising her army. Thus the Government has not secured peace, and has secured, apparently, even a less respite than was to be expected ; while the Protocol is used in the very way that Russian diplomacy had taught us to fear.

What has happened also enforces still more strongly the criticism we passed on Russian policy a little while ago, and thus brings to light one of the main difficulties of the whole Eastern Question. There has been conspicuous bad faith in the whole of this Protocol negotiation on the part of the Russian Government. The Protocol was asked for with a promise or assurance that it would be followed by Russian disarmament. The assurance was meant to be verbally given, as other Russian assurances which have been broken were given, and although this was naturally distrusted, it was thought that when the assurance was inserted in the Protocol, in however guarded a manner, and was fortified by Lord Derby's declaration of the conditional invalidity of the Protocol, there could this time be no doubt of Russian good faith. But instead, the Russian Government at once uses the Protocol for a purpose the very opposite of what it knew the English Government expected when the Protocol was signed. No doubt the war party in Russia may again have gained the upper hand and the peace party may again be risking a great deal of menace, but whatever the cause of the policy, the effect is equally unfortunate. It is very much by means of such a policy that, without fully intending it, the Russian Government has been brought to the brink of war, and it is by means of a similar policy in other matters as well as this, that a solution of the Eastern question is made difficult. The natural solution is that the Powers adjacent to Turkey should put in an execution. They are the most disturbed by the anarchy in Turkey, and they have the largest military force of any Powers interested, with which to interfere. But, in fact, the Russian Government has given so much cause of distrust to that of England, that we are not surprised at a design in all this action, not only against Turkey, but against England, being very generally apprehended. For this, among other reasons, therefore, the English Government dares not let Russia put in an execution without closely watching it, and would almost, if some reports are true, go the length of prohibiting any Russian attack. Co-operation with Russia, for the same reasons, is equally out of the question. There could be no stronger condemnation of Russian policy than this intense distrust it has created, and it is the means of causing immense damage and loss to Russia, which a franker policy in Central Asian and other questions, as well as in the present matter, would have prevented.

The duty of our own Government at such a conjuncture is very clear. If Russia attacks Turkey we must not take any premature steps to protect our interests in the East, whatever action may ultimately be necessary. It is for Russia and Austria primarily, and for Germany in the second place, to decide amongst them as to the fate of the provinces on the Lower Danube. We do not think these Powers are likely to agree to anything which will endanger us, and in their natural antagonism lies our security.

#### THE SALFORD ELECTION.

At a critical period in public affairs, every opportunity of testing the opinion of the country is eagerly looked for. The vacancy created in the election of Salford by the death of Mr Cawley supplies such an opportunity. Salford is a constituency with a peculiar political history. It was enfranchised in 1832, and for many years was represented by that typical Liberal of the old school, M. Joseph Brotherton. It continued true to the

-

Liberal cause, giving large Liberal majorities to Mr Massey and Mr Cheetham, who succeeded Mr Brotherton in the representation of the place as long as the franchise established in 1832 was left untouched. But it is an ominous fact that after the introduction of Household Suffrage under the Reform Act of 1867, the politics of Salford underwent a complete change. Two seats were assigned to the borough, but at the general election of 1868 both were filled by Tories. Mr Cheetham and Mr Rawson, the Liberal candidates, were defeated by a local alderman, Mr Cawley, and a high Protestant politician, Mr Charley. It was evident that Salford did not sympathise with the Irish Church policy of Mr Gladstone. The Liberals, however, pleaded with some show of reason that they had been taken unprepared, that they had made sure of retaining their hold upon a borough which had never before deserted them, and that they would do better next time. But they did not do better next time. At the general election of 1874 Mr Cawley and Mr Charley increased their majorities over their opponents tenfold. Mr Joseph Kay, Q.C., who was then one of the Liberal candidates, and who has now been selected again to champion the Liberal cause, polled fewer votes by 600 than Mr Charley, the second Conservative member. If Mr Kay be now successful, his return will undoubtedly mark a great reaction. It has been the boast of Northern politicians that "what Lancashire thinks to-day England thinks to-morrow." This was proved to be practically true not only in the days of Liberal victories upon the ground of Free-trade and economy, but also in the days of Tory reaction. The revolt of Lancashire from Mr Gladstone in 1868 was ominous of the widespread reverses of 1874.

But is it likely that Mr Kay will be successful in his bold attempt to reconquer Salford for the Liberals? We do not know enough of local politics to say. He has an opponent whose obscurity may be a source of strength, and of weakness. Mr Kay himself is not an obscure personage. He is, we believe, well known in the North as a lawyer, and to all students of political economy his name, at least, is familiar, as the author of a work on the "Social Condition of England " and Europe," published in 1850, and frequently quoted with approbation in Mr Mill's remarkable chapters on the tenure of land. In this book Mr Kay compared the state of England with that of many continental countries in respect of national comfort and educational progress, much to the disadvantage of the former, and his testimony gave him a place among the authorities of the Lancashire Radicals on these questions. His relations, Sir James Kay-Shuttleworth, and Mr Kay-Shuttleworth, the present member for Hastings, are well-known among Liberal politicians. Moreover, Mr Kay has received a certificate of character from Mr Bright, which, if the Salford election is at all likely to go as the Manchester election went last year, ought to be useful. "I am glad," Mr Bright says, "that Mr Kay is the candidate selected by "the Liberal committee. For many years I have wished " to see him in Parliament. His full knowledge of the land " question, his sound opinions upon it, his valuable writings " in the volume published many years ago, and his admirable " letters from time to time in the Manchester Examiner, all " point to him as one qualified in an especial manner to be " useful to the settlement of one of the great questions, not " of the remote but of the near future. There is no other " political question, in my opinion, in which the working "classes of Great Britain and Ireland have so distinct and " pressing an interest as the land question. To free the land " will be as great a blessing to the nation as we have found it " to have been to free the produce of the land. Mr Kay " understands this question thoroughly, and his return to " Parliament will be of essential service to the discussion of "it. If I could speak to every working-man among your "electors, I would urge him to support Mr Kay on this "ground. I need not dwell on his other claims on the good " opinion of every section of the Liberals of Salford. Eng-"lishmen and Irishmen may cordially unite in support of a "man whose policy on the land question is so broad and "so wise, and so calculated to advance the interests of all " who seek to live by honest industry."

It is also certain, whether it be for Mr Kay's advantage or not, that he has received assurances of support from the two factions which gave Mr Jacob Bright the victory in Manchester—the Home Rulers and the advocates of the Permissive Bill. But this support, unfortunately, is only to be purchased

by a quid pro quo, and it has been stated that Mr Kay, if elected, will vote both for the Home Rale motion to be introduced in the House of Commons on the 24th inst., and for the Permissive Bill. The Irish party claim to influence 1.500 votes, and the adherents of Sir Wilfred Lawson, we suppose, as many more; but it should be remembered that neither in 1868 nor in 1874 were these influences arranged upon the side of the successful candidates at Salford. It is certain, however, that much dissatisfaction with the policy of the Government has been gathering in the past three years, and that apart from the Eastern question, upon which, perhaps, opinion is more evenly divided than is sometimes imagined, a vote likely to lead to a change of Administration would possibly find favour with a majority of the present electors even in Salford. How far Mr Kay may alienate Moderate Liberals by his alliance with the Home Rulers and his Permissive Bill party is doubtful. How far his opponents may lose the ground won by Mr Cowley and Mr Charley three years age, by his repudiation of Mr Gladstone's Eastern policy, which some months ago appeared to be the popular policy in the North, is an equally difficult and an equally interesting question. A great Liberal victory, however, could only have one meaning, but we rather anticipate a close struggle.

#### LORD COCHRANE'S PETITION.

There can THE Government is too anxious to avoid defeats. be no doubt that, on the motion concerning Lord Cochrane's petition, whether Sir Stafford Northcote was right or wrong in the line he took, he was wrong in not having the courage of his opinions, and dividing the House on a motion which he had officially declared that the Government could not accept. There is a notion abroad that a Government is more weakened by being defeated on a division than it is by giving way to the pressure of its supporters. We believe that notion to be a No doubt there are cases in which a serious mistake. Government may fairly yield to the pressure of its supporters,we refer especially to cases in which the wisdom of the course under discussion really depends, more or less, on the popular feeling in relation to it. For instance, on a suffrage question, or an education question, where the policy is right or wrong according to the amount of popular sympathy which it obtains or fails to obtain, the Government is quite right to give way to a very strong expression of feeling coming from the independent members of both sides of the House at once. But that does not apply in any degree to a question the real merits of which turn on the principles and experience of administrative officers. If ever there were a question on which public enthusiasm,-however legitimate, as we quite admit that it is in relation to the case of the late Lord Dundonald's wrongs,-if it is to triumph at all, should gain its triumph avowedly over the Government, and not be allowed even to seem to win the Government over to its side, -it is such a question as was raised on Tuesday night in reference to the payment to the late Lord Dundonald's personal representatives of the half-pay which would have been due, had he been in the navy, for the years during which he was so unjustly excluded from the service of his country. We are not at present arguing that the decision of the House of Commons was wrong. Unquestionably the feeling on all sides of the House was most creditable to the nation, and shows how honourable a pride Englishmen and Scotchmen and Irishmen feel in the great achievements of their fellow countrymen, and that too for years after those achievements have been matters of history, and the great achievers have been in their graves. But we are arguing that if that public feeling is to gain expression at the cost of principles which the responsible Government believe, whether erroneously or not, to be of very great importance to the internal administration of this country, it is of the first importance that this conviction should be firmly expressed and supported by the official vote of the Treasury Bench, even if they divided against the whole House. For look at the very different position in which the Administration are placed if they stand boldly by their principles of official action, in spite of a great popular demonstration against them, whenever the precedent which they regard as a dangerous one is brought up again against them. They may say, if they stood properly to their colours in the previous case, "that was a case in " which her Majesty's Government were obliged to protest "against the decision of the House. While quite sympa-" thising in the popular feeling manifested on the occasion,

THE ECONOMIST.

" and recognising its essential justice, they were still of opinion "that the precedent made was most dangerous, and they "were compelled by a sense of official duty to do all in their " power to resist it. They were defeated by a popular enthu-" siasm, the character of which they sincerely honoured, but " they hold firmly to their principle still, and must now again " use their whole official influence to resist any attempt to con-" stitute a precedent out of an exceptional act of popular feel-"ing, which the Administration then regarded, and still " regard, as setting a very dangerous example for official imi-"tation." That would be a perfectly consistent position, and if in any case exciting less enthusiasm, such a stand were taken by the Government, no doubt it would have its due effect, and the dangerous official example set would go no further. But as the case stands, suppose another appeal was made to get the Government to assent to something analogous to the Committee which they resisted so half-heartedly on Tuesday night, and they could make no such reply. It would be argued that by not taking a division, they did practically assent to the Committee moved for by Sir R. Anstruther, and that the Chancellor of the Exchequer's speech amounted to nothing more than an official warning that there was danger in a course of action of that kind. No Government could say that a sincere and resolute official resistance to a precedent which the Administration believed to be a very mischievous precedent, was really offered. The next Government that chooses to acquiesce at once in such a proposal as Sir R. Anstruther's, may, indeed, fairly say that it is but doing frankly what the Government on Tuesday night did virtually. And as it is so much easier to yield to a popular movement than to resist it, we fear that is what may actually happen. It is a complete mistake, at all events on matters into which official judgment enters very largely, to be afraid of defeat. Defeat on a small matter of this kind does not weaken, but strengthens, a Government. At least, people see that it has the courage to maintain boldly its own ideas of wise administration against a very popular demand; and that raises the Government in every one's esteem. To hold an opinion on such matters, and not to stick to it-to utter it in faltering accents, and not challenge the House to override boldly the deliberate convictions of the tried administrators of the country, if they think it worth while—is to gain both the unpopularity which results from want of popular sympathies, and also the unpopularity which results from a vacillating course. It is always better to resist frankly, and be defeated in a matter of that kind, and then to take the defeat with good humour, than to yield, or to appear to yield-which is much the same thing-to a proposal which the Government cannot conscientiously approve.

And though we have hardly the data to form a very clear judgment on the question submitted to the House on Tuesday night, we can at least say this much, that it is very evident how strong the official grounds must have been for deprecating the decision arrived at. Everyone agrees now that the late Lord Dundonald was a naval captain of genius and gallantry almost unsurpassed, not inferior to Nelson, possibly even Nelson's superior. Everyone agrees that he was shockingly ill-treated, and that his disgrace was much more a disgrace to the country than to himself. But, admitting that most fully, it does not in the least follow that after Lord Dundonald is dead-when to him, at least, pecuniary reparation is impossible-when all the reparation has been made to his memory which could have been made, by the restoration of his insignia of the Order of the Bath to their place in Henry VII.'s Chapel in Westminster Abbey-a precedent should be set for refunding the official half-pay of a man who was not in the service of the nation at all during the years for which that half-pay is to be allowed, simply on the ground that if justice had been done he cught to have been, and would have been, in that service. There is more than one dangerous administrative principle here. It is dangerous to admit that pecuniary compensation for a blunder, even if it had ever been due to the man who was the victim of that blunder, is equally due to one who did not suffer the wrong, and therefore does not deserve the compensation. Even granting that Lord Dundonald ought to have received his half-pay, does it follow at all that it is due to his grandson ? He might have spent it if he had had it, in his lifetime, and never left a penny of it to his executors. At all events, it would to him have been personal compensation for a personal wrong; but to h is grandson it is compensation for the wrongs of his grandfather.

What may we not admit if we once admit that a man's grandson may recover from the country for the undeserved sufferings of his grandfather? But there is more than this. It is very dangerous to admit the principle of official pay for service which, whatever be the plea, has never been rendered, Even the case of Sir Robert Wilson did not form a precedent for this. As Sir Stafford Northcote said, in 1830 Sir Robert Wilson was gazetted as a Lieutenant-General dating from 1825, in order that he might be restored to the place in which he would have been, if he had been made Lieutenant-General in 1825, as he ought to have been. And then, when gazetted as Lieutenant-General from 1825, his claim to the back pay between 1825 and 1830 was admitted as a corollary

-i.e., as a technical part of the arrangements for restoring him to his right place in the army. But then the reason for giving him that back pay was that his commission of Lieutenant-General had been ante-dated by five years. No one ever proposed to pay him, and he never asked to be paid, for years in which he was not serving, and in which it was not even assumed, for technical purposes, that he had been serving. Yet this is what is proposed in the case of Lord Dundonald, and therefore it makes a much more startling and dangerous official precedent than Sir Robert Wilson's. And all this is proposed for the sake of doing what is possible to repair a blunder and wiping out a disgrace which are now irreparable. That it was a blunder and disgrace we fully admit. But shall we diminish it by giving Lord Dundonald's representatives arrears of half-pay for a time in which-owing to the blunder of our naval and judicial authorities-he was brilliantly serving other countries, and not serving England at all? We fear this is an attempt to repair what is irreparable. We are sure that the Government, having once determined that the precedent was a most dangerous one, should have persisted in resisting the reopening of this question, and borne the defeat which was no doubt inevitable—and perhaps not greatly to be deplored, if it remains what it ought to be, a purely exceptional case-with the equanimity appropriate to a con-scientious discharge of what they regarded as a clear administrative duty.

#### THE EOARD OF TRADE RETURNS FOR MARCH.

THERE is an extraordinary increase in the imports last month; the exports continue to show a decline. We, as a country, are "calling in" our capital from abroad, and not lending it out again. This is the simple reason of the preponderance of imports over exports, which last month's returns make more prominent than ever. The comparison of the figures, given in a condensed form, for the past month and three months, is as follows :—

	IMPORT	¥.			
1877 1876		March. £ 35,230,000 27,451,000	T	hree Months. £ 93,071,000 91,905,000	
	Increase	7,779,000 23:4 %	***********	7,186,000 7.8 %	
	Export				
1877 1876		March. £ 16,921,000 17,739,000		hree Months. £ 47,261,000 50,876,000	
	Decrease	818,000 4.6 %	***:******	3,615,000	

The imports for the month are 281 per cent. nore than in March, 1876; and, instead of a slight decrease-as there was at the end of February,-there is an increase of 7.8 per cent. in the returns for the present year, as far as it has proceeded. The exports show a decrease of about  $4\frac{1}{2}$  per cent. for the month, the decrease for the three months being as much as 7 per cent.; but we noticed last month that the decrease then shown was exceptionally heavy, and was largely owing to the occurrence of an extra day in February, 1876; and the more moderate character of the present diminution confirms that conclusion. We also remarked that the time was near when values would become a more correct gauge of the extent of our export trade than they had for a long time been; and now, as will be seen from Tables II. and III. below, the decline in values is in few cases more distinct than the falling off in quantities exported. Indeed, in the case of worsted stuffs, for instance, it is the same, viz.,  $26\frac{1}{2}$  per cent., both in quantities and values. But the decrease in quantities is not only very general but very marked, and the depressed state of our foreign trade is evident, whether we look at values or quantities.

In the imports for the month the increase is very general in all materials, and in produce other than what we have

#### THE ECONOMIST.

Woel, sheep			1,431,000		1,853,000		***

125.000 . 234.000 Of these increases, the most conspicuous are cotton and wool. Last month a heavy decline occurred in the price of cotton at Liverpool; the price of middling uplands, which was over 7d at the beginning of the year, had fallen to 61d at the end of March-a decline of 12<sup>1</sup>/<sub>2</sub> per cent.; and stocks have weighed heavily upon the hands of those who hold cotton. In the wool trade, too, marked heaviness has lately been apparent, as a very legitimate result of the large arrivals; but in that case the re-exports are large, 2,045,000l being the figure for March, against 1,139,000l in March, 1876. If stocks are to be continuously swelled in other departments of trade, a new general fall of prices is possible. The power of producing countries to pile masses of goods in British warehouses appears by no means to have ceased ; and the reason is, as we have mentioned above, the return home of British capital, which cannot for the present be employed abroad. On the other side, an accumulation of imports and stocks here is no proof of that encroaching foreign competition in manufac-tures so much feared when trade is so universally slack as it is at present.

The exports show few features of unusual interest. There is still the general decline in aggregate values to which we have become accustomed, and that decline is not so marked in the quantities of the exports as in the values, if, indeed, there is on the whole any absolute decline of quantities at all for the month. There should, however, be some increase, if the exports are to keep pace with the increasing manufacturing population ; otherwise there is practically a falling off. But there is an important exception to the decline, which is in the exports of iron and steel for March. As will be seen in Tables II. and III., the quantity exported showed an increase of 18.8 per cent., and the value an increase of 4.7 per cent.; the increased foreign demand, too, was not simply in pig iron, but also in bar, railroad, hoop, and other iron, and the shipments have not gone to one particular place, but are to various countries, which is to some extent satisfactory, in so far as it indicates the existence of a general demand.

The movements of the precious metals require some attention. As to gold, the imports for the month and three months are small, but the exports for the quarter amount to 6,335,000l, against 3,213,000l for the first three months of 1876. France has taken 2,624,000, but is hardly likely to attract anything like so much now that the discount rate of the Bank of France is reduced; and Germany has taken 2,066,000l. This latter demand is intimately connected with the sales of silver here on German account, and may revive. The imports of silver for the three months are set down at 4,472,000l, of which 2,777,000l is from Germany, and corresponds to the abstraction of gold by that country. The exports of silver are 4,386,000l for the three months, of which 2,918,000l is put down to British India.

2,918,000l is put down to British India. L-IMPORTS of ARTICLES of FOOD into the UNITED KINGDOM during March, 1877, compared with March, 1876.

#### BUSINESS NOTES.

MR BAGEHOT.—The Chancellor of the Exchequer in his Budget statement, having to refer to the recent alteration in the form of Treasury bills, took occasion to introduce a kiudly notice of the late editor of this journal, which we believe it will be interesting to our readers to record :—" While speak-"ing on this subject" he said, "I cannot avoid making a " passing allusion to the name of a gentleman who took a " great interest in this as in many other economical measures, " and who, by his advice, contributed not a little to the suc-" cessful adoption of the scheme in question, but who has " very recently been removed from us, and by whose death I " am sure England has sustained a great loss. I refer to the " late Mr Walter Bagehot (hear, hear), who was well known " to members of this House, and whose reputation extended " over the country."

THE SAVINGS' BANKS DEFICIENCY .- In the course of his Budget statement, Sir Stafford Northcote suggested a plan for bringing the present deficiency on the Savings' Bank accounts regularly before the House. What he proposes is that if there is a deficiency in the interest on the assets in the hands of the National Debt Commissioners to meet the annual sum for interest they owe to the Savings' Banks, the amount is to be voted and appear as part of the expenditure of the year. A surplus, on the other hand, is to be entered as part of the revenue. As the deficiency, it is well known, arises on the old Savings' Bank accounts, and there is a surplus on the Post Office Banks, the effect should be, if there is a proper separation between the two accounts, to bring annually before the public view what the nature of the deficiency is, which will be a very good thing, and probably the first step to the inevitable reform. And as we understand the Chancellor of the Exchequer's statement, the two accounts are to be separated, for he speaks quite distinctly of making the deficiency on the one account part of the expenditure, and the surplus on the other part of the revenue. There are thus two operations mentioned, but the point is so important that we cannot but call attention to it, so as to prevent all doubt. At first the effect on the balance of the Budget will be nil, an excess of interest paid to the Savings' Banks and Friendly Societies, amounting to 122,000l, being balanced by a surplus from the Post Office Savings' Banks amounting in the gross to 159,000%, but which will be liable to a deduction that is now the subject of a correspondence between the Post Office and the Treasury. As another step in the reform, we would again press on the Chancellor of the Exchequer the expediency of

#### THE ECONOMIST.

having a proper valuation made of the assets of the National Debt Commissioners, instead of continuing the present absurd system of valuing stocks at the market price of a certain day in each year.

THE RUSSIAN CUSTOMS RECEIPTS.—From an official bulletin published in the Russian papers it appears that the total customs receipts in the year 1876 amounted to 69,199,227 roubles (8,649,900*l*), being an excess of 7,653,627 roubles (956,703*l*) upon the Budget estimate. Compared with 1875, the receipts for the past year show an increase of 655,690l; they are 1,431,918*l* in excess of the amount realised in 1874, 1,751,700*l* above 1873, 1,855,110*l* above 1872, 2,489,980*l* above 1871, and 3,631,770*l* above 1870. The cost of collection in the past year was about 5 per cent. of the gross receipts, as compared with  $5\frac{1}{3}$  per cent. in 1875, and the net revenue realised by the Treasury amounted to 7,813,800*l*. Comparing the receipts from the principal articles of merchandise upon which import duties are levied, with those of 1875, we have the following :—

	Amount Paid	1	ncrease or De-	-
	in 1876.	C	rease on 1875	
Principal Articles.	£		£	
Tea	2,059,600	+	318,000	
Salt		÷	260,900	
Spirits		+	248,500	
Metals		+	244,900	
Metal wares		+	1,395	
Butter		+	7,100	
Tobacco		+	15,600	
Fruit	259,700	+	60,900	
Oils	185,200	+	2,300	
Manufactures of wool	419,100	_	48,400	
— silk		-	35,900	
- cotton		-	23,200	
— linen		-	9,000	
Cotton yarn		-	11.500	
Sugar, raw		-	274,800	
Other principal articles	1,474,300	-	250,000	

The growth in the revenue for 1876, it will be observed, is above the average of recent years, and considering the widespread commercial depression that has prevailed, such a result is certainly remarkable. No doubt, however, the receipts for the past year have been swollen by the substitution, at the close of the year, of gold for depreciated paper, as the currency in which the payment of duties was enforced, and also by the rush to clear goods before the date on which the gold duties came to be levied.

THE NEW RAILWAY COMBINATION IN AMERICA .- So many attempts to bring about an agreement for a simultaneous advance in the freight rates of the companies owning the four great trunk lines of railroad in the United States have proved abortive, that some incredulity as to the permanence of the agreement now reported to have been concluded, is excusable. And there is the more reason for doubt, as all that is yet known of the terms of the agreement tends to show that what has hitherto been held to be one of the main conditions of a satisfactory settlement, has not been complied with. The Philadelphia correspondent of the Times states that " the New " York Central, the Erie, the Pennsylvania, and the Baltimore " and Ohio Railways, under their new compact, put in opera-"tion on Monday the general advance of passenger rates. "The new freight rates were put in operation to day (Satur-" day the 7th), on the basis of 30c per 100 lb on grain from "Chicago, and 35c from St Louis to New York. The rates " to Philadelphia are 2c, and to Baltimore 3c, below those to But the New York Central Company have all " New York." along contended that it would be impossible for them to enter into, or to adhere to any agreement which enforced higher rates from Chicago to New York, than to the Southern ports. The effect of such a difference of charges they held, would be to divert the grain traffic from New York to the other ports, to which it could be conveyed more cheaply, and in confirmation of this view they have been able to point to the statistics of the movements of grain, which undoubtedly show that for some reason or another such a transfer of trade has really taken place. And the merchants of New York, apprehensive of loss of business, have strongly supported the demand for uniform through rates to all the ports. Therefore, although it appears that in some way or other the railway company has been induced to waive its claims for equal rates, the agitation in their favour is not at all likely to die out, and that is an element of weakness in the settlement. It remains to be seen, too, how this advance

in the rates will affect the railway companies in their competition with the canals. If it induces traders to use the latter more largely than they have been doing, the railway companies may be forced to make some concessions; and although the railway shareholders may well congratulate themselves upon the improvement in their prospects, which the present agreement has effected, it might be well for them not to be over confident of its permanence.

THE AMERICAN SUPPLIES OF BEEF. — The following statement of the quantity and value of the fresh beef exported from the United States to this country during the eight months ended February last, has been drawn up by Mr Young, the able Chief of the Statistical Department at Washington. The growth in the exportation, it will be observed, has been very rapid, the shipments in February being nearly three times those of the previous July. No advance in prices, however, has followed upon the augmented demand. The average price per pound is also stated to have been in July, 8.7 cents; in February, 8.5 cents; and over all, 8.9 cents, or a trifle under 41d per pound :—

THE NON-PUBLICATION OF THE WEEKLY REVENUE ACCOUNT. We have to express our very great regret at the continued non-publication of the weekly revenue account for the last week of the past financial year. The weekly account tells us so much more than the quarterly account tells, and is besides in so much better a form, that the omission of it in any particular week, now that we have become used to it, causes a good deal of inconvenience. But for whatever week it is omitted, it should certainly not be for the last week of the financial year. It is on the weekly account we must depend for an accurate record of the year's expenditure as well as of the revenue, the latter being all that the quarterly account gives in a convenient form ; and it is no sufficient answer to say that we have the particulars in other records, and especially in the Budget statement. The omission spoils the series of weekly accounts, and that is a serious matter. Unfortunately, too, in the present instance, the Budget statement is so inadequately reported, or there has been so serious a slip in the difficult task of quoting long sums in figures, that we are unable to make out from it what all the details of last year's expenditure were, while the Chancellor of the Exchequer is reported to have called his surplus for last year 443,000l, instead of 440,000l, which is the difference between his totals of revenue and expenditure. Had the weekly statement been published we should have had something perfectly exact. We can only suppose that the last weekly account is kept back in order to give the Chancellor of the Exchequer the power of telling first to the world, in his Budget statement, what was the actual surplus of the previous year. But he has not the power to do this, because the issues for the Supply Services are ascertainable from other published accounts, and with that total it is quite easy, as we did last week, to show, within a few pounds, what has been the total expenditure, and consequently, what has been the surplus. We hope that the last weekly account of 1876-7 will yet be published, and that on future occasions there will be no such delay as has now occurred.

THE PUBLIC REVENUE AND EXPENDITURE. The total receipts of the previous week were 1,765,460*l*. The Exchequer issues of the week on account of expenditure were 4,801,923*l*, viz. :--

Permanent charge of debt Interest on local and temporary loans Interest, &c., on Exchequer Bonds (Suez) Other charges on Consolidated fund Supply services	4,375 nil. 45,629

#### [April 14, 1877.

The reduction in the Bank of France rate has produced no effect on the discounts, which have again a small diminution. This continued stagnation in the discount business at the This continued stagnation in the discould busiless at the Bank has, however, caused no surprise, for with private deposits double their usual amount in normal times, it was evident that without a revival of trade, bills would remain as scarce as before, and that the Bank would again find itself scarce as before, and that the bank would again find itself outbid by the private banks and financial houses. Discount on the open market is easy at  $l_2^{\pm}$  per cent. for both commer-cial and bankers paper. But for the apprehension of war the market for stocks and shares might have profited by the lower rate for advances on securities at the banks. The politica situation, however, offers no encouragement to buyers, who are rather disposed to liquidate their operations than to expose themselves to having to do so under more unfavourable conditions. It may not be out of place to repeat that the rate of 2 per cent is not a minimum, as described in the money articles of some of the London papers, but a fixed and invariable rate, so long as it lasts, for all paper accepted by the discount com-mittee. The rate of exchange on London is unvaried at 26f 155c. The movement in specie is small, but gold is still being received from London, and a great part of the expected arrivals from Australia have been secured for Paris.

The variations of prices in the week, in the table given below, show the effect of the warlike news of the last few days. Until yesterday, however, the market gave way steadily, and the offers were confined within reasonable bounds; but on Wednesday's Bourse there was a general sinking, and this became the signal for large orders for sale from the provinces to-day, and which accelerated the movement downward. fall of 1 took place in Rente, and speculators for the fall, who for a long time past have had heavy differences to pay at each settlement, believing that their turn had at last come, pressed sales, and prices for the account closed all round lower than for money. Of the two classes of Rente the Three per Cents. suffered the greatest depreciation, as every fall removes further the fears of a conversion of the newer stock, and encourages arbitrages, the Fives now yielding  $\frac{1}{2}$  per cent. more revenue than the Threes. The other foreign stocks, Italian, Russian, Turkish, and Egyptian, all followed Rente downward, the greatest firmness being exhibited by financial company's shares, which may hope to profit by a better demand for money. Railway shares were also more offered, the last weekly returns being again unfavourable on all the great French lines, the Southern excepted. The Lombard Company, however, show excellent results in the 13th week, which has an augmentation of 308,466f compared with 1876, the surplus since the 1st January now amounting to nearly three millions, or over 18 per cent. The coupons deducted this week are 36f on Orleans shares, 17f 50c on Western, and 49f 50c on Paris gas shares. These last, which had been run up to a price not justified by the amount of the dividend, have lost 80f beyond the coupon. Suez Canal shares have fallen 65f, and the delegations 45f. Egyptian 6 per cent. bonds have gone back 17f 50c to 180f, and the railway bonds 20f to 297f 50c. Subjoined are to-day's closing prices for the account. for the account :-

April 5. April 12.

The appointment of five Protectionists as a consulting The appointment of five Protectionists as a consulting committee to advise the Minister of Commerce in negotiating the new commercial treaty with England, is giving rise to some opposition among the classes that body has the preten-sion to represent. The Chamber of Commerce of Bordeaux has held a special sitting to protest against the composition of the committee, and the Chamber at Lyons has addressed representations to the Minister of Commerce on the same subject. Both Chambers demand that delegates from other subject. Both Chambers demand that delegates from other trades, besides yarnspinners and ironmasters, should be

#### THE ECONOMIST.

admitted, or that the committee should be dissolved; they remark that there was no need for such a body at all, as there exists already a Superior Council of Commerce, in which all the great commercial and manufacturing interests of the country are represented, and which the Minister might consult if necessary.

The Minister of Public Instruction has issued a decree making the study of political economy, hitherto optional, one of the subjects of examination for the degree of licentiate in all the schools of law. If this innovation gives satisfaction to a desire long expressed by the principal French economists, it is desire long expressed by the principal French economists, it is by no means to the taste of the French legists, who have at all times treated this science with contempt. The Gazette des Tribunaux, the leading organ of the law courts, now ridicules the new regulation. "Political economy," it says, " has never been a positive science, and is at most a conjectural art, or a kind of literature, less amusing than the others. In no case can it be considered a branch of law." The basis of the teaching of the law, continues that journal, is the text of the law. But there are no texts of poli-tical economy. In it everything is caprice. Each econo-mist composes his own system, and condemns all others. The Gazette does not dissent from the optional study of political economy by the law students but objects that to make political economy by the law students, but objects that to make it a subject for examination is to impose it, so that no aspirant can become a mag.strate, an advocate, or a notary without learning the theories of Malthus, Adam Smith, and Jean Baptiste Say; without having investigated the merits or the inconveniences of Protection and Free-trade, and without having considered the different phases of the sugar question. The conclusion at which the *Gazette* arrives is that if the Minister of Public Instruction did not think the programme of studies for the licentiate sufficient, there were plenty of other subjects that might have been added to it, more useful than Political Economy. There will be no lack of champions among the economists to take up the challenge thrown down by the Gazette des Tribunaux,

It is announced that conventions have been signed between the Minister of Public Works and the Charentes, Vendée, and Nantais Railway Companies, for the purchase of those lines by the State at a price to be estimated by arbitrators. Negotiations are also going on with the Orleans Company to transfer to the latter the lines taken over, and to construct others of which the surveys had been ordered by a law passed in 1875. A note in the *Débats*, however, admits that difficulties have arisen with that company relative to the tariffs which the Minister insists on having inserted in the convention; also that divergencies have for some time past existed between the Government and the great companies concerning a more equitable classification of merchandise comprised in the four tariffs, and a reduction in the rates for goods in transit, demanded by the see ports. MM. Guillaumin and Co. have just issued a new edition of

MM. Guillaumin and Co. have just issued a new edition of the "Tables of the Prices of the Principal Securities dealt in on the Bourses of Paris, Lyons, and Marseilles from 1797 down to the Present Day," by M. Alphonse Courtois, author of a Treatise on Bourse and Exchange Operations, Manual of the Public Funds, History of the Bank of France, &c. In this new edition the introductory history of the Bourse and the Government stocks, as well as the tables of the highest and lowest prices monthly of about fourteen hundred securities, are brought down to the end of 1876, and full details are given of the different issues of Rente, their capital amount, nominal and effective, &c. The former editions of this work are, however, well known to capitalists, and it will suffice to mention that among the improvements in the present one is the addition of blank columns for the next five years for posting up the record of prices annually. The meeting of shareholders of the Credit Mobilier was held

The meeting of shareholders of the Credit Mobilier was held this week, and M. Richardière, the official receiver appointed by the Tribunal of Commerce, read his report on the situation of the company, and the operations which have brought it into its present difficulties. This document is of great length and occupied over two hours in reading; any intelligible abstract of it without the printed text, which has not yet been published is, therefore, impossible. The ratification of the Porte to the convention modifying

The ratification of the Porte to the convention modifying the arrangement of the International Commission of Constantinople for successively reducing the surtax on shipping in the Suez Canal, has now been received by the company. The three months' notice of a reduction of 50 centimes per ton given in January last, subject to the approval of the Porte, will now take effect from the 15th April.

Austrian notes per 100fl silver ..... 108:00 ... 107:70 ... 107:75

Hard opinions have fallen upon the Prussian Government for having dismissed a great many workmen from the Saarbrücken mines. It was said that as the Government enjoy such favourable pecuniary circumstances, it might allow the men to work to stock.

A statistical abstract just published mentions the production of these coal mines of Saarbrücken to have been the following, in millions of cwt:-1869, 67.2; 1872, 80.4; 1875, 86.4; 1876, 85.8.

The Minister of Finances in Austria has just published the result of the revenues in the year 1876. The direct taxes fetched 90,818,000 florins, that is, 1,552,000 less than in 1875. Indirect duties fetched 166,842,000 florins, that is, 1,260,000 more than in 1875. If compared with the valuation of the Budget, the direct taxes fetched 4,065,000 more than was supposed; the indirect, 3,184,000 more. The total of the income was, therefore, 7,249,000 more than had been supposed.

The Commercial Court of Justice in Pest has decided a lawsuit against the Hungarian Westbahn in favour of the latter. The administration office for European railway effects in Amsterdam had sued the railway to pay its dividends in gold. One of the motives mentioned by the Court was that the railway loan had been insued in silver, and that at the time gold standard had been introduced neither in Holland nor in Germany, and, therefore, the railway's creditors could not possibly have intended receiving their interest in gold. This sentence is a very good precedent for the questions of the same nature arising in Germany, where Austrian cars are continually being seized.

The Shipping Company of the Danube, with its capital of 25,203,000 gulden, had for 1876 an income about 2,400,000 florins higher than in 1875 A total amortisation of 1,700,000fl will be made, and somewhat more than 3 per cent, dividends paid, whilst in 1875 it paid but 2 per cert., and amortised nothing at all. The course that its ships pursue spreads over 3,000 English miles, with many hundred stations.

nothing at all. The course that its snips pursue spreads over 3,000 English miles, with many hundred stations. The General Assembly of the Dux-Bodenbach Railway has not resulted in anything decisive. The administration hopes to treat with the "Société Belge des chemins de Fer," whose representatives have arrived at Vienna. The latter has offered a loan of 4½ million marks at 7 per cent. for six years. If the Government will give it the grant for a line between Vienna and Aspang. The Anglo-Bank, however, still keeps its offer up, but only until to-morrow. The latter has published its situation (of profit and losses), which is the following:—Assets : interest, provisions, &c., 1,760,308 florins; profit, gained by baying up 40,000 florins worth of its own shares, 1,637,948 florins. These are its assets, the total of which amount to 3,398,256 florins. Liabilities: management and taxes, 511,842 florins; osses on effects, 629,326 florins; amortisations of consortship entreprises and help—committee, 681,551 florins; realisations, 33,202 florins; current and report accounts, 1,221,587 florins; rest, 22,748 florins to transport—total, 3,398,256.

The Austrian Credit Anstalt has approved of the report made in its General Assembly, and 2 florins dividend were accordingly paid.

accordingly paid. At the Hungarian Mint in Kremnitz there were struck during the year 1876 the following coins:--

1. SILVER COINS.	Number of Pieces.		Value in Gulden. 4,136,174

The amount of the "other" deposits, compared with the "other" securities, showed in 1867, an excess of 85,1501; in 1874, a deficiency of 156,2491; in 1875, a deficiency of 296,4361; in 1876, an excess of 4,418,0302. In 1877, there is a deficiency of 2,915,6912.

In 1867, the money market appeared to be still gaining ease. Much excitement prevailed as to our relations with Spain, the capture of a British cruiser having raised demands on the part of our Government which were not readily acceded to by the Spanish.

In 1874, the amount of money on offer was largely in excess of requirements, but the Bank's reserve was low, and its rate was therefore retained at 31 per cent.

In 1875, there was an easy tendency in the money market, which would have been more marked if the Bank reserve had been larger. Speculation in the stock market had made prices very sensitive, alleged war preparations in France being the ground of a threatening tone taken up in the Berlin press. A 15,000,000l loan for Russia was offered for public subscription.

In 1876, the event in the stock markets was the dishonour of the Egyptian Treasury bills, the French scheme for raising new money by means of the institution of a financial control in Egypt, having failed. Gold continued to flow in to this market largely from abroad.

The account of the Bank of France for the week ending April 12 shows the following chan

Thur I' orong end t	Survente	Cu	anges

DISCOUNT AND MONEY MARKET .- Rates of discount have not suffered the extreme relapse which sometimes follows the release of the April dividends from the Bank; but the quotation is 15 per cent. for three months' bank bills, which is 1 below what we gave last week. The supply in the open market does not appear to have much increased, the dividend money having been largely returned to the Bank in repayment of advances to dealers at the close of the quarter ; and the loan of two millions on Treasury bills at the end of March has had something to do with keeping the market rates up. To-day, indeed, those rates were quite firm, simply because of the repayments to the Bank, but the demand cannot be reported as sustained, for business in the Bank's discount office has fallen off. Little if any reduction is quoted this week in the charges for long-dated bills.

The news on Wednesday of the rejection of the Protocol by Turkey had little effect on the market value of money; but inasmuch as it tends to still farther repress international business and financing, the effect must be in the direction of reducing the supply of bills, and so of keeping down the rates. The excitement in the City was not confined to the stock markets affected by the present state of politics, but caused a rise of 2s in wheat, and a distinct advance in linseed and saltpetre. And it is significant of the hold which the alarm of war has taken, that wheat has since continued to rise, and is 4s per quarter higher for the week. Freights at Odessa for vessels at hand have advanced, but otherwise the shipping interests have been too well prepared for war to be greatly perturbed.

The Continental exchanges to-day showed one feature very plainly, viz., the depreciatory effect of the present excitement upon the paper currencies of Europe; the Russian rouble having, for instance, fallen to 26<sup>1</sup>/<sub>2</sub>d, from which it hardly recovered at the close, after having been above 29d last week.

The war news appears to have had the effect on the market rates of discount in Germany of raising them, that of Berlin having advanced nearly 1 per cent. for the week, and German Treasury bills (Schatzanweisungen) having been discounted at 3 per cent. on Wednesday, an advance of  $\frac{1}{4}$  in one day.

The Bank return shows a decrease of 3.081.000l on the week in the public deposits-the result of the dividend payments on the funds. The rest is also 683,000l less in consequence of the dividend payments on Bank stock. The other securities are 3,339,000l less, to a large extent probably owing to the repayment of temporary advances made by the Bank at the close of last quarter, when the open market was so bare of money ; but notwithstanding those repayments, and a withdrawal of 154,000l into circulation, the other deposits are 215,000l in excess of what they were last week. The cash reserve is 154,000l less, which corresponds to the increase in the note circulation. The item coin and bullion shows no variation, notwithstanding the recorded influx of 105,000l from abroad, so that an equal sum in coin has apparently been withdrawn for internal circulation.

The price of silver has been higher this week, and closes at 541d per oz, at which price we believe considerable sales have been made; and the Indian exchanges are steady at  $1.9\frac{5}{16}$ . The India Council bills were sold at improved rates on Wednesday, and the demand in India has increased, as may be judged by the simultaneous advance of 1 per cent. in the Bombay and Calcutta Bank rates. Famine expenditure is said to be reducing the supply of silver there ; but there are no doubt in existence some more permanent reasons for the demand for money, among which is the diminished purchasing power of a depreciating currency.

THE	STOCK MARKETS	normous	specu	lative o	ner

rations for the fall have this week been entered into. They began on Wednesday; there was a moderate reaction on Thursday morning, but in the afternoon telegrams from Paris showed great depression, and the fall was renewed and extended; and to-day there was a further decline, but some reaction before the close, on a rumour that the Montenegrin truce was prolonged, and that diplomatic action was not yet hopelessly at an end. Sales are said to have been largely made from Constantinople and from Paris; and they were considered to be of an additionally serious nature, because "Constantinople ' is the centre of the political turmoil, and "Paris" is known to be so largely committed for the rise that, sales once begun, a deluge might at any time be expected. The more violent storm has raged over a limited area, the fierce excitement having been confined chiefly to bear speculations in Russian and Turkish stocks, besides immense operations for the fall in Consols; but it will be seen that no market of a speculative kind has been free from the depression. So heavy have been the amounts of stock forced upon this market, that purchases in one direction have necessarily led to sales in another; and thus it appears that disorganised speculation in foreign Government stocks has depressed the market value of American railways, amongst other securities, not in the slighest degree directly connected with the quarrels of European Powers. Investment business is restrained by the uncertainty of politics, but realisations of any material extent by bona fide holders cannot yet be reported, the operations in anticipation of a fall in Russian stocks being quite another matter.

The uncertainty which has pressed so severely on business and enterprise seems as if it would never end until war or disarmament had become a fact. Neither Power was inclined to declare war until spring, and that is why the crisis has been so long coming. But it is also felt that the crisis has come at last; that the real intentions of both Powers will now be put to the test; and that Turkey can no longer haggle and procrastinate, nor Russia threaten without action, which will make it clear how far each intends to go.

ENGLISH GOVERNMENT SECURITIES. - Speculative sales of Consols have been pressed, as usual when great political excitement prevails. Operators are said to have this week engaged to deliver millions of stock, but the decline is less than <sup>3</sup>/<sub>4</sub> per cent. Were a settlement of the account now to take place, it is thought that a charge for deferring delivery would be obtainable. Exchequer bills, which rise when money cheapens, have advanced, as also has Metropolitan Board of Works stock, those being securities which specu-lators do not appear to have sold, but have rather been in demand.

#### THE ECONOMIST.

#### [April 14, 1877.

COLONIAL GOVERNMENT SECURITIES.—There has been little movement here, but the market is, perhaps, hardly so firm. New Zealand 5 per Cents., 1914 declined 1; and Queensland 4 per Cents., Victoria 6 per Cents., 1883, and Victoria 4 per Cents., each  $\frac{1}{2}$ .

South Australian newspapers remark upon the unusual success of the issue of half a million of the stock of that Government early this year, and, rightly enough, ascribe it to the absence of competing borrowers in the Lordon market. If the remainder of the 2,188,500*l* authorised be placed on equally advantageous terms, it is estimated that the South Australian Treasury will realise in all about 100,000*l* more than was anticipated. A new issue, it is expected, will be made next month.

FOREIGN STOCKS .- The appearance of imminent war in the news of Wednesday caused a severe scare and an immediate drop in most of the speculative stocks, Russian falling 3 to 5 per cent. for the day; Hungarian, 2 to 3; Egyptian, 1 to 11; French and Italian, 1; Turkish, 1 to 1; and South American stocks more or less sharing in the decline. Since Wednesday there has been some reaction, especially in Egyptian; but a further fall on receipt of flat prices from Paris on Thursday, and to-day another decline, prices, nevertheless, closing above the worst points, on the receipt of improved quotations from Paris. The news came in the middle of the settlement, when Russian stock was very scarce for delivery, and yet sales were pressed regardless of the heavy penalty exacted by the buyer for deferring completion of bargains. It is, therefore, taken for granted that heavy operations for the fall have been entered into, in addition to the sales of many of those who had been "caught" with uncovered purchases; and that inference is supported by the known fact that much stock has come on the market, either for sale or loan, although little in comparison with the engagements to deliver. It is, indeed, estimated that such engagements amount to many millions of stock.

The decline for the week is, on the average, 7 per cent. in Russian and Hungarian, 5 in Austrian, 3 in Egyptian, 2 in Turkish; while such stocks as Italian, French, and Portuguese, are also seriously affected. Heavy sales of Italian from Paris were the feature on Thursday, a large account for the rise having been open there.

The composition of the Egyptian Daira debt, it is stated, is still under the care of Mr Goschen; it appears, also, that the Khedive has further offered to "supplement the revenues of the Daira handed over to the creditors by the sum of 100,000l from his Civil List"; and that negotiations for an arrangement are still progressing in London.

ENGLISH RAILWAYS .- The fall here has been mainly the reflection of what has occurred in the foreign stock market; it is not so extreme, and business has been comparatively very limited in this market. Disorganisation in one department of speculation on the Stock Exchange hardly ever fails to tell upon another. The imminence of a collision between Turkey and Russia has deranged the financial system on which speculative stocks are held; sales of foreign stocks have necessarily been attended by purchases, and those who purchase are induced to sell anything they may have. But, in addition to this indirect effect of the threatened quarrel between Russia and Turkey, the traffic returns published this week have not been considered so good as was anticipated. There has been much talk of pawned stock hanging over the market, and no doubt a good deal is very lightly held; but the story that it is to a very large extent placed in the hands of bankers against advances, when the charge for holding purchases from account to account has been so small, and, moreover, an actual bonus would have been often paid to the buyer for the privilege of non-delivery, seems only very partially true. The fall on balances is most severe in the Scotch stocks, both Caledonian and North British being more than 3 per cent. lower. South-Eastern, Brighton, and Chatham Deferred stocks come next, being 2 to 3 down; and the special check to continental traffic connections of those lines which a war would entail is alluded to as partly the cause of the fall. Great Western stock is  $2\frac{3}{4}$  lower, apparently on the bad traffic returns published this and last week. The remaining stocks on our list, it will be seen, are, on the average,  $1\frac{1}{2}$ lower for the week.

The passenger traffic returns for Easter week, compared with Easter week last year—which occurred a fortnight later in the year—show in the main the same features as those we remarked on last week in comparing the Good Friday week returns in the same way. There is again an increase in the Southern lines, and a decrease in the lines running through the coal and iron districts, specially on Great Western, and distinctly also on North-Eastern and Great Northern. On the whole, however, the passenger receipts on the English lines for the fortnight, show a slight improvement on the corresponding receipts during the Easter holidays last year, and that is no unsatisfactory result.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :--

The traffic receipts on seventeen railways of the United Kingdom, of which a list is subjoined (including the principal

THE ECONOMIST.

railways), amounted for the week ending April 8 to 1,006,870*l*, being an increase of 25,258*l* on the corresponding week last year. The principal increases are the Midland, 6,3431; the London and Brighton, 5,4621; the London and North-Western, 4,6071; and the Chatham and Dover, 3,3491-the last mentioned being relatively very considerable.

Philadelphia & Reading General Mort., 1874	55 7		549 53	-	1

The new freight rates, which were last Saturday put in operation by the New York Central, the Erie, the Pennsylvania, and the Baltimore and Ohio railways, are " on the basis of 30c per 100 lb on grain from Chicago, and 35c from St Louis, to New York." A general advance in passenger rates on the four trunk lines also came into force at the beginning of this week.

The following is published as a corrected statement of the Reading Railroad Company's proposed arrangement with its creditors :--

1. The interest on the mortgages coming first and second in the order of priority of lien is to be paid in full.

2. The interest coupons on the general mortgage bonds, for three years from July, 1877-i.e., the next six ensuing coupons-to be paid one-half in cash and the remaining half in scrip bearing interest, to be

one-half in cash and the remaining half in scrip bearing interest, to be paid three years after the date of the respective coupons. 3. All payments of coupons of the debenture bonds to be suspended for the next five years, and scrip bearing interest to be at once given. 4. Ten pet cent. of the floating debt obligations maturing in April, 1877, to be paid in cash, the remaining 90 per cent. to be renewed for the same period as the respective existing notes, and the several credi-tors to continue to hold the collaterals now in their hands without diminution thereof. diminution thereof.

JOINT STOCK BANKS. - The critical condition of political affairs has had its effect on this department, and the undertakings most likely to be affected exhibit great depression. Thus Anglo-Austrian have declined 1; Anglo-Egyptian, 1; Anglo-Hungarian, 12; Bank of Roumania, 14; Imperial Ottoman, 11; London and Mexico and South America, 1 (on the unfavourable report); and London and Westminster, 1. Alliance have improved 1; Hong Kong and Shanghai, 1; and Union of London, 1/2.

TELEGRAPHS .- This market has shared the almost general depression. Anglo-American is about  $2\frac{1}{3}$  lower; Cuba,  $\frac{1}{4}$ ; Direct United States, 11; West India and Panama, 3; and Western and Brazilian, 3.

MINES .- In British mines Assheton rose Amongst MINES.—In British mines Assheton rose  $\frac{1}{4}$ . Amongst foreign undertakings Cape Copper declined 1; Eberhardt,  $\frac{1}{2}$ ; and Rio Tinto, 2; while New Quebrada advanced  $\frac{1}{4}$ .

MISCELLANEOUS.-The following have been the principal movements :- The Foreign and Colonial Government Trust declined about 31 on each issue ; Russian Land Mortgage, 6 ; Rhymney Iron, 1; and Fore Street Warehouse, 1; the chief fall has, however, been in tramways, Edinburgh having receded  $1\frac{1}{2}$ ; Liverpool,  $1\frac{1}{2}$ ; North Metropolitan,  $\frac{3}{4}$ ; and Provincial,  $1\frac{3}{4}$ ; London General Omnibus fell 2, while Amazon Steam rose 1.

BULLION .- The following is taken from the circular of Messrs Pixley and Abell, dated April 12 :-

Gold.-There have been no arrivals of gold during the week. The emand for bars and coin for export has, for the present, ceased; and 105,000%, part of a stock held here, has been sent into the Bank.

Silver .- The banks of Bengal and Bombay have raised their rates for discount; the exchanges come higher from India, and the Indian Council drafts were all allotted yesterday at an advance of  $\frac{1}{2}d$  from the previous week. Silver has consequently improved in value, and a gradual and steady rise from  $53\frac{3}{4}$ d, our last week's quotation, to  $54\frac{1}{4}$ d, the price of to-day, has taken place. The arrivals have been 11,920l from India, 5,000l from New York, and about 70,000l from Germany. The Peninsular and Oriental steamer takes 87,000l to Bombay.

Mexican Dollars, owing to limited arrivals, have improved in value, the last price being 54d per oz.

Exchange on India for banks' drafts at 60 days' sight is 1s 9d per rupee. Tenders for 264 lakhs of rupees of India Council bills were received yesterday, the allotments were as follows:-To Calcutta, rupees 16,50,000, average rate 1s 8.95d per rupee; to Bombay, rupees 10,00,000, average rate 1s 9.01d per rupee. Applications on Applications on rupees 10,00,000, average rate is 9.01d per rupee. Applications on Calcutta for bills at 18 84% d per rupee receive in full, and for tele-graphic transfers at the same rate, 10 per cent. No bills on Bombay, but tenders for telegraphic transfers at 18 84% d per rupee, receive 9 per cent. The latest quotations of exchange from the East for bank bills at 6 months' sight are, from Calcutta, 18 94% d, and from Bombay, 18 94 d per rupee; from Hong Kong, 38 114 d per dollar, and from Shanghai, 58 54 d per tael.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 10½ per oz std; Spanish doubloons, 74s 6d per oz nominal; South American doubloons, 73s 9d per oz; United States gold coin, 76s 3d per oz; German gold coin, 76s 3gd per oz. Silver—Bar silver, fine, 54‡d per oz std; bar silver, containing 5 grains gold, 54¾d per oz std; Mexican dollars, 54d per oz last price. Quieksilver, 71 5s. Discount, 3 per cont.

According to the Gazette return this evening the movements of the precious metals during the week ended 11th April were as follows :-Gold-Import, 26,214l; export, 116,9611. Silver - Import, 181,2551; export, 335,8361. There were no gold movements at the Bank this afternoon.

## NOTICES AND REPORTS.

STOCKS.

Egyptian 5 per cent. Preference Stock.-The coupon due 15th April will be paid on 16th inst. in England, at the Bank of

England, and in France at the Comptoir d'Escompte. Egyptian Finance.—A telegram states that the monthly statement of the receipts of the Treasury of the Egyptian Public Debt shows that "the total encashed up to the present to meet the interest of the Unified debt amounts to 383,000/, that of the railway preference stock to 310,0007, and that of the 1864, 1865, and 1867 loans to 297,0007. It appears, there-fore, almost certain that it will be necessary to have recourse to the encashings of the revenue applicable to the Unified debt for completing the payment of the April coupon of the railway preference stock. The meagreness of the amount available for this stock is ascribed to the payment of old debts. Assur-ances are given in official quarters that the July coupon of the Unified debt will be punctually paid. The first half-yearly purchases of Egyptian stock in the open market by the Trea-sury of the Public Debt have reduced the amount of the Unified debt from 59,000,000l to 58,217,000!."

Egyptian Finance.-It is stated that the negotiations with regard to the Daira debt are still, so far as the English credi-tors are concerned, in the hands of Mr Goschen. Messrs Sandars and Jozon (the representatives respectively of Mr Goschen and the Credit Foncier of France) have been enabled to facilitate a contract which was signed between the Viceroy and the Franco-Egyptian Bank, under which it was agreed that during negotiation the proceeds of the sugar crop of the Daira should be remitted to the Bank of England, to be deposited there in the names of trustees for the benefit of the creditors of the D: ira, to be distributed conformably with any arrangement that might be come to. Just before the departure of Messrs Sandars and Jozon, the Viceroy telegraphed a fresh offer of arrangement to be communicated to Messrs Goschen and Joubert. It was an improvement upon the terms offered by the Viceroy's letter of the 18th November, and communicated by Mr Goschen to the creditors of the Daira. The Viceroy has now offered to supplement the revenues of the Daira, handed over to the creditors, by the

sum of 106,000l from his Civil List. *Turkish* 1854 *Loan.*—The following resolution was passed at a meeting of bondholders :—"That this meeting, while ex-pressing their confidence in Messrs Dent, Palmer, and Co., is desirous that the Council of Foreign Bondholders should give

its assistance and co-operation towards obtaining satisfaction of their just claims from the funds remitted and to be remitted to the Bank of England from Egypt on their account, and should co-operate with Messrs Dent, Palmer, and Co. for that purpose, and should take with their concurrence such proceed-ings as may be advised to be adopted in that behalf."

RAILWAY COMPANIES. Atlantic and Great Western.—The receiver has issued his report and accounts for 1876. The concluding remarks of

report and accounts for 1876. The concluding remarks of this lengthy document are :--The results of the receivership can be comprehensively stated as follows:--The property has been kept intact; and through the two darkest years, thus far, of American railroad operations, it has been improved and strengthened in its relations to all traffic and other in-terests; and, whilst maintaining the tonnage of the line, has been kept in absolutely good condition, certainly without deterioration in any of its parts. After paying all operating expenses, taxes, and all rentals and general expenses, and after further paying \$228,205 on account of additions and construction, strictly chargeable to capital account, but which of present necessity must be provided from the receiver's revenue, there is then shown to be a deficit of \$5,669. The amount of the obligations of the Atlantic and Great Western Railroad receiver's revenue, there is then shown to be a deficit of \$5,669. The amount of the obligations of the Atlantic and Great Western Railroad Company paid by the receiver, under the orders of the Courts, is \$1,264,783, of which amount the receiver has been obliged to furnish in cash from his own revenue the sum of \$966,413. The present total amount of outstanding debt funded in receiver's warrants is \$378,563, of which sum the particular warrants issued to the United States Rolling Stock Company amount to \$280,899. It is seen, therefore, that in round figures there is a floating debt of about \$600,000, which severely hampers and restricts the administration of the affairs of the railroad. railroad.

Coquimbo.-There is a sum available for the six months, inclusive of \$5,304 brought forward, of \$66,484. From this, a dividend of 21 per cent., making 41 per cent. for the year, is recommended, leaving \$4,663 to be carried forward. The passenger traffic has declined in numbers, but improved in value. The expenses have amounted to \$83,415, equal to a saving when compared with the corresponding half of \$16,712.

Eastern of France.—A dividend at the rate of 63 per cent. per annum is officially recommended for 1876. A similar dividend was paid for 1875. Northern of France.—A dividend at the rate of 161 per cent.

per annum is officially recommended for 1876, being at the same rate as in 1875.

#### BANKS.

Bank of England.-At a general court, Mr E. H. Palmer (Dent, Palmer, and Co.) was elected governor, and Mr J. W. Birch (Mildred, Goyeneche, and Co.) deputy-governor, for

the ensuing year. Bank of Victoria.— At the half-yearly meeting at Melbourne, on 6th February, there was an available total shown of 40,571l, from which a dividend, with bonus, at the rate of 12 per cent. was declared, leaving 10,571*l* to be carried forward. reserve fund remains at 230,000*l*. The

Bank of Scotland.-The net profits for the year ended 28th February, including 18,727l brought forward, were 187,080l. The half-yearly dividend, at the rate of 14 per cent., paid last October, took 70,000*l*, and the directors now propose a similar distribution. This will take 87,500*l*, so that the balance left is 29,580/. There is, however, the premium on the new shares issued, which amounts to 375,000/, and the directors propose, accordingly, to add 340,000/ to reserve, raising it to 750,000/, to extinguish the balance of the price paid for the central bank by paying 45,000*l*, and to place 5,000*l* to reduction of premises account, leaving 14,580*l* to be carried forward. The balance sheet shows a liability of 10,409,120l on deposits, and a note circulation of 639,115l.

Chartered of India, Australia, and China.—There is an avail-able balance for 1876, inclusive of 6,989l brought forward, of 119,307l. Of this 20,000l was absorbed by the interim dividend of 21 per cent. in October, and it is now proposed to make a further distribution of 32 per cent., making 6 per cent.

make a further distribution of 32 per cent., making o per cent. for the twelve months, carrying forward 6,307*l*. London of Mexico and South America.—There is a formal profit of 11,862*l* as the result of the half-year, but all this will be required to meet losses in Peru, which will also absorb the balance of 9,277*l* brought forward, and the "exchange reserve" of 13,074*l*. From the balance sheet, the bank appears to have about \$07,000*l* at stake on even denucles and 514,000*l* reserve" of 13,074*l*. From the balance sheet, the bank appears to have about 807,000*l* at stake on over draughts, and 514,000*l* on bills, while it is due on deposit and current account 769,000l, on bills 307,000/, and on notes issued in Mexico and Peru 362,0001. The directors state that the Chilian and Mexican branches are doing well, but the state of affairs at the Peruvian establishment appears to be bad,

#### ASSURANCE COMPANIES.

New York Life Insurance.—The English manager states that the deposit in the hands of the trustees as special security for the British policy-holders has been increased by 30,000l, viz., to 50,000%.

#### MISCELLANEOUS COMPANIES.

Australian Mortgage Land and Finance.—The net profit for the year was 54,348l, including 5,271l brought forward. Of this an interim dividend of 10,000l was paid in November; being at the rate of 10 per cent. per annum; 20,000l

#### THE ECONOMIST.

annum; 6,200l as a bonus of 2s 6d per share; and 5,598l to be carried forward.

Direct United States Cable. - The committee of shareholders state that the obstacles raised in the way of an amicable arrangement with the Anglo-American Company were, upon examination, found to be comparatively slight, and they strongly condemn the wording of the various contracts with Messrs Siemens. At the meeting, Dr Siemens moved the rejection of the report, and the chairman seconded this amendment, remarking that the shareholders should have amendment, rewarking that the shareholders should have time to consider before pronouncing upon it. The report, however, was adopted, and the directors having resigned, the following gentlemen were nominated: Lord Bury, Lord Hawke, Mr Pender, Mr Meares, Mr Gunther, Mr Ford, Mr Mayne, and Mr Underdown. Dr Siemens proposed that the old board should be re-elected, but the chairman said that they would refuse to take office again. Mr Pender maintained they would refuse to take office again. Mr Pender maintained

they would refuse to take office again. Mr Pender maintained that the minority were represented on the new board. *Eastern Extension Telegraph.*—The gross earnings for the second half of 1876 were 110,523l, and the working expenses 59,267l including 23,683l for repairs. After adding the sur-plus from the first half of the year, 55,948l remains, out of which two quarterly dividends of 14 per cent. (making 5 per cent. for 1876) are paid, leaving 6,011l to be carried to reserve. The interruption of the Madras-Penang cable for seven months entailed serious loss, but the Rangoon-Penang cable, now entailed serious loss, but the Rangoon-Penang cable, now successfully laid, provides another route.

successfully laid, provides another route. Freehold Cottage Dwellings.—Capital, 150,000l, in 10,000 ordi-nary and 5,000 preferential shares of 10l each. The under-taking is established "for the purpose of providing improved cottage dwellings for the artisan and labouring classes in the suburbs of London and in provincial towns; and also of acquiring small house property with the object of repairing or reconstructing it so as to improve the sanitary condition thereof for the henefit of such classes " thereof for the benefit of such classes."

Freehold Property Investment .- The directors state that an eligible freehold estate has been purchased at Sevenoaks, con taining 22 acres of building ground, and is now being plotted out. The association being now in operation, the directors propose to close the first issue of shares on May 12, and after that date to commence a fresh issue, at a premium not exceed-

ing 5s per share. Globe Telegraph and Trust. — The company announce an interim dividend for the quarter ending 18th instant, at the

rate of  $4\frac{1}{3}$  per cent. per annum. London Steamboat. — At the annual meeting, the chairman referred to the reduction in fares which had been effected, and to the increasing traffic resulting therefrom. A dividend and bonus, together of 10 per cent., were declared. It was stated that a regatta would be held in July.

Oamaru (New Zealand) 6 per Cent. Harbour Loan. — The tenders for the 65,000l received at the Union Bank of Australia amounted to 81,900l. Prices ranged from par (the minimum) to 102/ 10s. No tender under 100/ 10s received an allotment

Royal Mail Steam .- A dividend is announced for the halfrear ended 31st December of 1l per share, being the same as

for the corresponding period of 1875. Stockton Tramways, Limited.—Creditors are required by 31st May to forward their claims to Mr J. Robinson, 13 Tinkle street, Stockton on-Tees, the official liquidator. Submarine Cables Trust.—It is announced that the coupons will be read on 18th inst be Marce Chen Wille

will be paid on 16th inst. by Messrs. Glyn, Mills, and Co.

#### COMMERCIAL REVIEW.

FRIDAY NIGHT.

Imminent as war appears to be this week, the news has startled our markets rather than altered their course. The prevailing political uncertainty being as yet unrelieved, the fear of war could to no great extent check the speculation in some quarters, because it has for a long time been already checked ; but in other quarters, such as the markets for wheat, saltpetre, linseed, &c., an undeniable speculative activity has to be reported. Apart from these exceptions, the effects of the paralysing uncertainty of many past months have not been much changed, and as a new evidence of the dulness of general trade, it was this week announced from Liverpool that four of the leading steamship companies will reduce the sailings of their steamers by one-half, the arrangement to continue in force for three months.

The following are statistics of the stocks in sight of various articles :

		STOCKS.	
	April 1877.	March, 1877.	April. 1876.
WHEAT.			
Stock in London qrs	180,000		451,000

It will be seen that in most cases, the unconsumed supplies are maintained or have increased during the past month, which could hardly be otherwise considering the large impor-tations of March; but, as in the case of cotton and wheat, it will also be seen that the stocks abroad or in process of ship-

#### THE ECONOMIST.

ment to this country, are much reduced, so that a decrease may be expected scener or later in the heavy supplies which have so depressing an effect upon our markets generally.

The excitement in the wheat trade, which began on Wednesday in a sudden advance of 1s to 2s per qr, and has since been doubled, had been led up to by an increasing firmness during the past week or two. The reason for the previous rise was not altogether of a political nature, but the advance of this week was entirely so. Speculative business would have been more active if there were many cargoes on offer, but there is no doubt that the advance here has been attended by larger purchases in foreign ports; and it seems probable that a continuance of excitements will increase the rise, inasmuch as the supplies in our ports, in ports abroad, and on passage, have lately become much reduced.

Cotton has relapsed into dulness, the political uncertainty having checked demand. Sales of cotton at Liverpool have been trifling, and business at Manchester, both in yarns and goods, very flat. Messrs Ellison and Co.'s Monthly Circular remarks that :—" So far as the prospects of supply go, the position of the market is one of considerable strength compared with the outlook of twelve months ago. The quantity of cotton visible is 30,000 bales more now than then, but the invisible supply is certainly 100,000 bales less; and during the second half of the season there will be a marked reduction in the arrivals from America, India, and Egypt, compared with last year. With a full rate of consumption and ordinary activity in the markets of the world, this strong statistical position would not be without its influence on prices; but at the moment there is neither a full rate of consumption nor ordinary activity in the markets, and the consequence is that the reduced supply does not occasion the least anxiety on the part of buyers anywhere. The reason is that trade everywhere, and in all branches, is dull and depressed, which means that consumption of all articles, instead of keeping pace with the outturn of our mills and workshops, is lagging behind, not much perhaps, but still sufficient to keep the markets in subjection. This state of things is owing mainly to the political uncertainty which has retarded all industrial movements during the past twelve months; and when demand is slow—not to say stagnant—people do not concern themselves about any threatened future curtailment of supplies. But as respects cotton, the strong statistical position to which we have alluded must eventually make itself felt, and though its influence on prices may be modified, it will not be altogether neutralised, by the state of European politics."

neutralised, by the state of European polities." In the wool trade there is continued dulness. For the next auctions in London 189,552 bales are arrived, and the date for opening is expected to be the 8th May. The market has shown no life since the Easter holidays. According to Messrs Jacomb's Circular, "reports from the manufacturing districts, both at home and abroad, do not indicate an animated trade, but the ultimate markets are without any heavy stocks of the raw material. Whatever turn political matters may take in Eastern Europe, it can hardly be worse for trade than the late state of suspense. Attention is now directed to ensuing public sales here, which will commence on or after the 8th May; by that date we shall have imported about two-thirds of the total year's supply of colonial wool; the stock on the spot at the moment will be very heavy." At Bradford, notwithstanding the sluggishness of the demand, firmness in prices is reported. In yarns there is again a fair amount of inquiry for export, but foreign customers require some concession. A little speculative feeling has been shown.

The quarterly meetings of the iron trade have passed off without quoted reductions of prices, but a dull and heavy tone is generally reported, and underselling is complained of in most districts. At Birmingham, it is stated that " quotations by no means represent the actual prices at which sales take place ; underselling is not confined to the common descriptions, but in many instances is applicable to best brands. It is the general opinion that no material improvement will take place in the iron trade whilst the cost of production remains so high. Under present circumstances, however, prices are not likely to descend further, and makers give out that rather than continue reducing, they would cease operations. Many makers, it is known, are working at a loss, in the hope that there will soon be a turn of the tide." The exports of iron of nearly all kinds last month showed for the first time for a long period a distinct improvement on the corresponding month of the previous year; and, notwithstanding the continued reports of depression, it may be that trade has passed its greatest contraction, and prices their extreme depression.

depression. In the produce markets a good deal of increased dulness has resulted from the critical state of politics reported this week. Sugar, coffee, &c., have been neglected, the latter showing a heavy fall; but in such articles as rice, which sympathises with the wheat market, and in linseed and oils, which are dependent on Russian exports, a speculative rise has resulted from the rumours of war.

and a

#### THE COTTON TRADE.

[April 14, 1877.

#### .LIVERPOOL.-APRIL 12.

The cotton market has been depressed throughout the week, with a limited business, and very large supply freely offered. Quotations, though to-day there is more steadiness, show a general decline from last week's rates. For Sea Island the general demand has been small, but one or two exceptional sales have been made of considerable quantity, at irregular and easier prices. American has been dull, and prices have declined generally <sup>1</sup>/<sub>3</sub>d per lb. For Brazilian the demand has been very limited, and quotations are reduced  $\frac{1}{16}$ d to <sup>1</sup>/<sub>3</sub>d per lb. Egyptian has been in moderate request, without quotable change in prices. West Indian and African are unchanged. Rough Peruvian is irregular, and <sup>1</sup>/<sub>3</sub>d per lb lower. Soft staples without quotable change. East Indian has been in limited demand, and, being freely offered, prices have declined about <sup>1</sup>/<sub>3</sub>d per lb.

limited demand, and, being freely offered, prices have declined about  $\frac{1}{3}$ d per lb. "Futures"—The business done during the week has been very moderate in extent, and the market dull and declining up to this morning, since when there has been a slight improvement. The decline for the week is  $\frac{3}{3}$  of for the nearer, and  $\frac{5}{3}$  d for the more distant positions. The total transactions are—Delivery: American, any port, L.M.C. May-June,  $6\frac{3}{3}$  d; June-July,  $6\frac{3}{3}$  d; July-August,  $6\frac{3}{3}$  d; August-September,  $6\frac{14}{3}$  d per lb.

611d per lb. The sales of the week amount to 38,020 bales, of which 3,950 are on speculation, and 4,430 declared for export; the forwarded is 12,860 bales, of which 8,560 are American, 1,040 Brazil, 620 Egyptian, and 2,640 bales Surat, which makes the takings of the trade 42,500 bales. APRIL 13. — The sales to-day will probably amount to

APRIL 13. — The sales to-day will probably amount to about 6,000 bales, with a dull market.

#### THE ECONOMIST.

The above figures show :--An increase of import compared with the same date last year of... A Decrease of quantity taken for consumption of ..... A decrease of actual exports of ..... An increase of stock of ..... bales 254 556 197,610

In speculation there is an increase of 38,660 bales. The imports this week have amounted to 75,971 bales, and the quantity of American cotton reported at sea for Great Britain including cable advices to date) is 173,000 bales, against 228,000 bales at the corresponding period last year. The actual exports have been 5,848 bales this week.

BOMBAY, March 17 .- A further decline has taken place in our market, notwithstanding the rather better aspect of European politics, and the favourable turn which sterling exchange has taken within the last few days. Holders are losing faith in the oft-repeated promises of an early reaction in Liverpool, and certainly the enormous stock which has now accumulated in that port does not encourage the hope that we are on the eve of any important change for the better. The decline on this side has brought a good many exporters into the market, and quite a large business has been done both locally and up-country. At the close buyers are unwilling to go on unless at some reduction from the quotations given below. The following are the figures for the week, viz.:-

	1876.	1877.	
	bales.	bales.	
Total clearances since January 1st	186,283	 196,589

MARKETS IN THE MANUFACTURING DISTRICTS

MANCHESTER, April 12.-Our market has again fallen into the depressed state existant before the holidays, and business is extremely difficult to obtain in any department. In eloth, some few sales have been made in shartings at a decline in value, but other varieties have not been much inquired for. Yarns, both for export and home trade, are very flat, and values somewhat irregular. COMPARATIVE STATEMENT OF THE COTTON TRADE.

#### CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-March 30.

The market for flour has been improving throughout the week, though latterly not so buoyant as at the opening. Business has also been less active, owing to the higher prices, and the indifferent assortments offering. The most decided improvement has been in common shipping extras, of which full lines were taken on Tuesday for Liverpool, and London at \$6. These grades had been abnormally depressed, or rather at S6. These grades had been abnormally depressed, or rather had not improved with other flours, because there was no out-let for them. The reappearance of English buyers in the market was the cause of the advance that is quoted; but of other grades, and especially West India brands and good bakers' flour, the supply was limited, and of the former local millers have been able to sell freely. To-day, the market was quiet and unchanged. The wheat market was an improving. The demand for milling was active all the week, and shippers purchased more freely, taking better qualities than for some weeks previous. The advance, however, checked business towards the close. Receipts of wheat at the Western markets have increased a little, but are still not half as large as last The year, and the visible supply is again largely diminished. section in the north-west, and even as far south as the southern line of Missouri, has been visited by cold storms and wintry weather, which threatens to make dangerous delays in spring sowing. Accounts from the winter crop continue good. There is some renewal of speculation on the war cloud in Europe. Indian corn has been moderately active throughout the week, but the demand was mainly for export.

throughout the week, but the demand was mainly for export. The local trade was checked by bad weather, and latterly, in anticipation of freer supplies, prices gave way. Receipts at the West were moderate, owing, in part, no doubt, to the bad weather. To-day, the market was weak. The following are closing quotations :- Flour: Superfine State and Western, \$5.75 to \$6.15; extra State, &c., \$6.15 to \$6.40; Western spring wheat extras, \$6.20 to \$6.50; ditto winter wheat X. and XX., \$6.20 to \$8.40; eity shipping extras, \$6.15 to \$7.00; eity trade and family brands, \$7.25 to \$8.25; Southern bakers' and family brands, \$7.25 to \$8.25 to \$4.85; eorn meal, Western, &c., \$2.60 to \$2.85 per bl. The visible supply of grain, comprising the stock in granary at the principal points of accumulation at lake and seaboard ports, in transit by rail, on the New York canals and on the lakes, March 24, 1877 :--

#### LONDON MARKETS.

#### STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The political situation in the East of Europe has had considerable effect upon the trade this week, and especially during the last three or four days. Prices of all descriptions of grain have experienced a very decided rise, and at the close to-day there was still an upward tendency. The movement has been most marked in the wheat trade, the statistical position being strong, and prices already advancing from this cause. The quantity of wheat on passage is liberal, amounting to 1,511,000 qrs, against 980,300 qrs last year, but granary stocks, as well as those in the hands of millers, are much reduced. The increased demand induced millers, are much reduced. The increased demand induced by the political influence has, in consequence, had the greater effect upon prices. On English wheat, the supplies of which continue extremely small, the advance is fully 2s to 3s per qr, the best runs ranging as high as 58s to 59s for white, and 55s to 56s for red. On foreign wheats, and especially red descriptions, the advance has been still more decided, viz., 3s to 4s, and in exceptional cases even more. Saxonka is now quoted 58s to 60s; Black Sea, 56s to 58s; Dantzic, 58s to 63s. Californian 58s. Australian 60s to 63s and Now 58s to 63s; Californian, 58s; Australian, 60s to 63s, and New Zealand, 57s to 59s on the spot. The floating cargo trade has also been very strong; but the advance hardly so large. During the week, Ghirka wheats off coast have sold at 51s up to 53s 6d, and Californian at 55s 6d. To-day, higher rates were bid and refused, for Californian, 57s. cargoes on passage and for shipment, large transactions have taken place at proportionately advanced rates. No. 1 Calcutta Club sold at 50s 6d up to 52s; No. 2, from 48s to 51s 6d per 492 lbs; and Californian, 54s to 55s 6d per 500 lbs; Odessa Ghirka, 50s to 52s. Flour has sold more readily, and has risen 2s per sack. The top price of town flour, however, has not been altered. Malting barley continues very firm at the late advance, and grinding sorts have recovered 1s to 2s per qr from the recent depression. Danubian is now quoted 21s6d to 22s on the spot, and floating ; fine Kustendji on passage has been sold at 22s, usual terms. The quantity on passage is 215,000 qrs, against 102,000 qrs last year. Maize has to some extent participated in the general improvement, and on the week there is a rise of about Is to 2s. To-day American mixed quoted 26s 6d to 27s, and round corn 27s 6d to 29s 6d. Off coast, American is worth 26s 3d to 26s 6d, and on passage business was done this after-noon at 25s 6d, also for shipment at 25s 10<sup>1</sup>/<sub>2</sub>d. Oats have, during the last day or two, alvanced rapidly, making a rise of fully 2s on the week, closing this afternoon at 21s to 22s for Libau; 22s to 23s 6d for Swedish, average 38 lbs, and 26s 6d to 27s for 40 lbs. Beans are 1s to 2s higher; on the spot Barbary, Egyptian, and Italian, 32s to 33s per 480 lbs.

#### COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK. FOR REPORT OF THIS DAY'S MARKETS SEE POSTCRIPT

MINCING LANE, FRIDAY.

SUGAR .- During the first three days of the week the market con tinued flat, with prices in favour of the buyers. Refining West India and crystalised Demerara are still quiet, but more demand now prevails for low brown sorts at 6d per cwt recovery on the sales effected prevails for low brown sorts at 6d per cwt recovery on the sales effected previously. The statistical position of sugar, the prospect of an increased demand by the brewers if malt gets dearer, and the had accounts of the Cuba crop, contributes to the improvement. If the new Sugar Convention pass into a law, the refined markets in this kingdom will again become more settled. 560 casks West India sold in singdom will again become more settled. 560 casks We t India sold in three days. Crystalised Demerara, 28s to 31s per cwt. Recent liberal imports of sugar have caused some increase in the stock, but, according to the return made up to the 7th inst., the total at the four ports of the kingdom was still about 30 per cent. under the average stock of the three previous years at same date. IMPORTS and DELIVERIES of SUGAR into LONDON to Apri 7, with Stocks en hand.

PORTS and DELIVERIES of S	UGAR into	Lo	NDON to	Apri	7, with	STO	CKS on hand.

Stock (estimated in U.K.) 119000 ... 154000 ... 141000 ... 212000 Mauritius.—No business reported by private contract on the spot. Bengal.—976 bags by auction sold at 23s 6d to 25s for soft grey and yellow, and 26s for Benares. About 800 bags white Benares by private yellow, and 26s for Benares. About 800 bags white Benares by private contract at 26s to 27s 6d.

contract at 26s to 27s 6d. Jaggery.—About 300 tons have changed hands. At one time 18s accepted for cane. Yesterday 18s 6d to 18s 9d paid. China.—10,174 bags were taken in, and afterwards sold as follows: low brown, 17s 6d; Muscovado, 18s 6d; some clayed at 22s 6d to 24s for brown and yellow. Privately about 1,200 tons have sold, chiefly at 17z 6d to 18s 9d 17s 6d to 18s 9d.

Manila .- The sales have been about 600 tons : Taal, at 17s 6d : Zebu, 18s. Natal.-622 bags sold at 21s 6d to 24s 6d for brown and yellow;

grainy and crystallised, 26s 6d to 28s.

Penang.-133 bags yellow native cane sold at 25s. Privately 1,000 bags native brown at 18s.

bags native brown at 188. Cargoes.—Three have sold for the United Kingdom; one of 550 casks Guadeloupe at 25s; one Mauritius, 7,000 bags syrups and grainy, at 27s all round; one Havana; 1,000 bags centrifugal at 28s 9d, with 124 casks molasses sugar at 23s 3d. Beet Sugar.-Russian crystals rather dearer. Business reported at

9d to 31s 6d. 30:

Refined.-The market was quiet in the early part of the week, but now exhibits more steadiness, and there is a good demand. Clyde produce has been readily saleable. American cubes sold at 35s 9d to French loaves on lower terms during the week, including fine s f o.b. The last price of Say's was 34s 3d per cwt. at 33s f o.b.

RUM.—At the low rates now current there has been more inquiry. Sales of Demerara at 18 71d to 18 8d; up to 18 9d in barrels, Yester-day 550 puncheons, chiefly Demerara and Berbice, sold, price not ven. Mauritius has brought 1s  $3\frac{1}{2}d$  per proof gallon. COFFEE. —A further decline in prices has been established, with heavy

supplies and further arrivals. The Netherlands Trading Company have declared for their next sale, on the 18th inst., 100,400 bags Java; a quantity larger than in April during the two previous years, and stocks in the chief ports of Europe have increased, being, according to the latest estimate, about 94,000 tons. At auction here 5,132 cases 9,567 bags East India sold at 2s to 4s decline for many descriptions: low bags East India sold at 2s to 4s decline for many descriptions: low middling palish and mixed to medium colory, 95s 6d to 103s; bold, 100s to 113s as in quality; some small lots very choice Neilgherry up to 124s; small berry in proportion; Mysore, medium to bold, 108s to 117s 6d. Some very fine withdrawn above the present market value. A few lots native realised high rates, viz., 85s to 86s. 186 bags native Ceylon sold steadily at 81s for good ordinary. 2,217 casks 187 barrels 210 bags plantation Ceylon nearly all sold at 3s to 4s under last Friday's 210 bags plantation Ceylon nearly all sold at 3s to 4s under last Friday's rates, excepting for a few fine marks: low greyish to middling colory, 94s to 100s; good middling to fine, including bold, at 100s 6d to 112s; a few lots 113s to 116s. 326 half-bales Mocha part sold at 103s for mixed long berry, the remainder being taken in above the value. 15 casks 308 barrels 585 bags Jamaica part sold at 75s 6d to 81s for low to very good ordinary, and 88s to 98s 6d for greenish to low middling. 650 bags African withdrawn. 898 bags foreign sold as follows: fine colory Costa Rica, 106s; Central American, Guatimala, &c., 86s 6d to 92s for pale and grey, and 93s 6d to 95s per cwt for colory. colory.

COCOA .- The large supply of colonial brought forward has not weakened prices, there being a good demand since the previous sales held in March. 2,124 bags Grenada all sold at rather higher rates: very common to fair, 54s to 59s 6d; good to fine, 60s to 66s. 1,303 bags Trinidad about half found buyers on former terms. The re-mainder withdrawn above the value. 1,067 bags foreign were chiefly

mainder withdrawn above the value. 1,067 bags foreign were chiefly bought in. 200 bags Surinam sold at 628 6d to 68s per cwt. TEA.—The market is inactive, with very moderate transactions by private contract. There have been further arrivals. 17,760 packages China by auction sold at irregular and cccasionally lower prices. Common to good common red leaf congou,  $7\frac{1}{4}d$  to 8d; fair,  $8\frac{1}{4}d$  to  $11\frac{3}{4}d$ ; common black leaf,  $7\frac{1}{4}d$  to  $8\frac{1}{4}d$ ; some very inferior,  $6\frac{1}{5}d$ . The better grades realised about previous rates. Regarding Indian teas during the past fortnight, "there has been a fair demand, but as it has been The part of the p prices being about  $\frac{1}{2}$ d below the March sales." The imports of Indian tea in three months were 7,106,000 lbs, against 7,913,000 lbs last year; the deliveries 6,567,000 lbs, against 7,148,000 lbs; and the stock at the end of March was 12,105,000 lbs, against 10,153,000 lbs.

RICE.—Sales on the spot have been rather extensive during the past fortnight, including white Bengal at 9s 9d to 10s; Rangoon, 9s to 9s 9d; Bassein, 9s. There has been some speculative demand for cargoes, and prices are now quite 6d above the lowest current last week. Four of new Rang. on, spring shipment bold, at 9s 13d to 9s 3d, open charter. One near at hand at 9s 6d, per steamer, for the continent. One Necrancie Arracan, spring shipment, at 8s 104d, open charter. Three since at 9s 3d, including one now landing at 9s. One of 800 tons Bassein, spring shipment, at 8s 104d. One of 750 tons old Moulmein, off the coast, at 9s 3d, Liverpool quay terms. Cleaned rice is in active demand. demand.

 SAGO.—1,897

 Sage by auction found buyers. Small grain at 188 6d

 18 showed a reduction of 6d. Small at 16s to 17s per cwt went

 about the same as last weak

about the same as last week. SAGO FLOUB.-1,897 bags Singapore were taken in at 155 9d to 165 per cwt.

TAPIOCA.--1,539 bags Singapore flake partly found buyers at 2<sup>1</sup>/<sub>2</sub>d to 2<sup>3</sup>/<sub>4</sub>d for rather small to good. 99 bags good Penang at 2<sup>3</sup>/<sub>2</sub>d per lb. PEARL TAPIOCA.--518 bags partly sold: medium, 18s 6d; extra bold

bullets), 22s per cwt. TAPIOCA FLOUR.—297 bags Singapore were taken in at 17d per lb. BLACK PEPPER.—A few sales are reported privately, including West Coast Penang at 38d. 370 bags damaged by auction withdrawn. Of 1,285 bags Singapore 100 bags only sold at 33d to 37d per lb.

B

#### THE ECONOMIST.

WHITE PEPPER is without further alteration, and the market rather quiet. Privately, fair quality has sold at  $6\frac{3}{2}$ d. At auction, 740 bags about half sold at barely last week's rates; good at  $6\frac{3}{2}$ d to  $6\frac{3}{2}$ d; superior quality at 63d per lb.

rior quality at  $6\frac{3}{4}d$  per lb. OTHER SPICES. -16 cases Penang nutmegs sold steadily as follows: limed, 115's to 110's, 2s 1d to 2s 2d; brown, 98's, 3s; 87's, 3s 4d to 3s 5d; low shrivelled and defective, 1s 7d to 1s 9d; 45 packages West India in the shell, 2s to 2s 2d; 5 cases common reddish Bombay mace have sold at 1s 8d. Of 490 bales Zanzibar cloves, 188 bales sold at  $\frac{1}{4}d$  to  $\frac{1}{3}d$ decline, from 1s 2d to 1s  $2\frac{1}{2}d$ ; one lot, 1s  $2\frac{1}{2}d$  for common to good; 282 bags Amboyna withdrawn at 1s 5d to 1s 9d, excepting a few lots, sea-damaged, which realised 1s 4d to 1s  $6\frac{1}{4}d$ ; 102 boxes were bought in at 1s 10d; 131 bales Zanzibar clove stems sold at  $3\frac{3}{3}d$  to  $3\frac{1}{3}d$ ; one lot,  $3\frac{1}{4}d$  for the sound. Privately, fine Zanzibar cloves have sold at 1s  $2\frac{3}{4}d$ to 1s  $2\frac{7}{4}d$  per lb; 355 cases 675 bags Cochin ginger of the new crop, part sold at 2s to 3s advance upon valuations: good rough, 65s to 36s; ordinary, 52s to 54s; low, 47s to 49s; scraped, small to medium, 65s to 76s; fair to good bold, 77s to 85s. 111 bags African sold at the reduced price of 28s per cwt. 59 bales low quality Japan withdrawn. 196 bags Pimento were taken in at  $4\frac{1}{8}d$ . Since the sale, 4d to  $4\frac{1}{8}d$ per lb paid, with rather a firmer market. SALTPETRE. — There has been some speculative business, at 1s to

SALTPETRE. — There has been some speculative business, at 1s to 1s 3d advance on last week's prices, chiefly owing to the Eastern difficulty. About 600 tons Bengal have sold to arrive up to 22s. 500 tons landing. The last price 21s 4<sup>1</sup>/<sub>2</sub>d per cwt, but now more demanded.

IMPORTS and DELIVEBIES OF SALTPETRE to April 7, with STOCKS on hand.

Importedtons	2420	1890	5010		2700	
Total delivered	3610	 3560	 3590	***	2320

INDIGO.—The sales, which commenced on Monday, concluded yester-day. A decline of 3d to 6d was established, but the buyers acted with much caution. A large proportion of the Bengal of new import was withdrawn. Old and second-hand goods went at the above decline ; Madras and Kurpah at par to 3d per lb under last sale's rates. 8,510 chests in the catalogues, 3,200 chests sol<sup>†</sup>.

COCHINEAL .- Supplies have been small. The chief part of 307 bags Teneriffe by auction was taken in. Some in second hands went at 2d to 3d decline. Silver, 2s 4d to 2s 5d; black, 2s 5d to 2s 10d per lb. 99 bags Mexican taken in, also 46 bags Lima.

OTHER DRYSALTERY GOODS.—The public sales have been devoid of importance and the markets inactive. Gambier has sold to arrive at 18s 101d ex ship, and some landing at 18s 9d ex ship, "all faults." 1,200 bags 120 baskets cubes by auction were taken in at 29s to 30s; blocky, 25s. 516 boxes cutch withdrawn at 25s for common. 480 cases China galls, part sold at lower rates, from 51s 6d to 53s. 21 bales Bengal safflower, middling, 92s 6d per cwt, being lower.

bales Bengal sattlower, middling, 92s 6d per cwt, being lower.
SHELLAC.—At the public sales 1,121 chests, about half found buyers. Orange being 2s to 4s lower. Fine D C at at 6l 5s, showed a 5s to 7s fall. Good second orange, 93s to 94s; native and other orange, 81s to 90s; button, 90s to 100s; dark, 69s; fine garnet, 78s; common, 69s per cwt. Market dull and large supplies afloat.
LAC DYE.—178 chests by auction were taken in. B Mirzapore, at 1s per lb. Other marks at various prices, and there is less demand.

per lb. Other marks at various prices, and there is less demand. METALS.—A quiet feeling has prevailed in these markets, with dimi-nished transactions, at prices favouring the buyers. Sales reported in Straits tin at 69/15s to 70/; Australian, 69/10s; English, 74/. Demand rather slow. No transactions reported in foreign spelter. English sheet zinc is without alteration. 120 tons rolled at the London mills were offered by auction yesterday, and rather more than half sold at 24/5s. South pig iron has not varied in price much. Market steady, with latest sales at 53s 40 to 53s 101d cash. English, lead dull with latest sales at 53s 9d to 53s 10<sup>1</sup>/<sub>2</sub>d cash. English lead dull, at 20l 12s 6d to 21l; Spanish soft, 20l 7s 6d. Copper has lost the improvement last referred to, and the demand is limited. Chili, 70l to 70l 5s; Wallaroo, 77l; Burra, 76l per ton. Quicksilver dull, at 7l 5s per flask, with further arrivals. HEMP.—The importers of Manila will not sell even at an advance

on late rates, and there is more inquiry. Several sales reported during the last ten days at 25l to 27l 10s per ton.

the last ten days at 25l to 27l 10s per ton. JUTE.—Prices have advanced about 10s to 15s, and the market is very firm. The quantity sold to arrive up to yesterday amounied to about 25,000 bales, at 14l 15s to 18l 5s. 7,000 bales May shipment at 18l 5s. A few thousand bales reported sold on the spot at better prices. Of 3,953 bales by auction on Wednesday, about 1,000 bales sold at full rates to 10s recovery, from 15t to 17l 5s per ton. OILS.—An advance of 1l to 1l 10s has been established upon linseed oil. On Wednesday, the price on the spot here was 26l 5s to 26l 10s. Yesterday, the tone of the market hardly so strong, and the quo-tation 26l to 26l 5s; May to August, 26l 15s to 27l; last four months, 27l. English brown rape firm at 35l on the spot, and 35l to 35l 5s for delivery, according to dates; English refined, 37l; English lard oil lower, viz, 55l to 57l. Further arrivals of cocco-nut tend to depress the market. Ceylon, 36l to 36l 15s, according to package. Fine Cochin, through scarcity, has realised 42l. No improvement in palm. Fine Lagos nominally 37l. In Liverpool sales at 1l per ton less. Olive quiet, and some descriptions could be bought for arrival at easier rates. Sperm inactive. Quotation, 85l to 86l. Recent arrivals come chiefly to refiners. Pale seal, 35l per tun. Other fish oils anchanged. unchanged.

PETCOLEUM OIL quiet at 111d to 113d; buyers for the last four months quoted 1s 1d per gallen. SPIRITS TURPENTINE is lower, and the demand is moderate. Am

SPIRITS TURPENTINE is lower, and the demand is moderate. Ame-rican, 27s 6d to 28s; last four months. 25s 3d per cwt. LINSEED.—An active inquiry has prevailed at advancing prices, the market being, of course, effected by the warlike rumours of the last few days. Calcutta, 51s 9d ex ship; 52s ex warehouse. A considerable quantity sold for arrival at 51s 6d to 51s 9d. For Bombay, 53s 6d per qr, ex ship paid. The supply afleat from the East Indies to this kingdom is 200,000 quarters less than at same time last year. time last year.

TALLOW .- The Eastern difficulty has not influenced the market for Russian, which is quiet, with ample supplies of other kinds. Prices are rather easier. Petersburg, 43s; last three months, 43s; old, 42s 6d

HIDES.-The public sales of East India, comprising 88,769 hides, ent flatly, rather less than half the above quantity being sold : prices without material change. 35,395 China or and cow part sold at pre-vious rates, to 41 per 1b decline. 14,796 buffalo went at last sale's quotations to a slight reduction, and the bulk sold.

#### POSTSCRIPT. FRIDAY EVENING.

SUGAR.—Crystalised Demorara by auction went rather dearer, from 28s 6d to 33s 6d for yellow to white; 1,652 bags ditto and Barbice at same range. Sales of West India, 1,104 casks, or 1,680 casks for the week; 1,678 bags Bengal were chiefly taken in. A few lots sold: brown and yellow, 23s to 25s 6d; white Benares, 26s 6d to 28s; 2 612 mathematical states and the sale of the second states and the second states are second states and the second states are second states and the second states are second state

brown and yellow, 25s to 25s 6d; white Benares, 26s 6d to 28s; 2,642 packages Natal: brown and yellow, 20s to 25s; grainy, 25s to 26s 6d. By private contract, 2,000 bags low brown China at 17s 6d. COFFEE.—658 casks 77 barrels 140 bags plantation Ceylon sold chiefly at previous quotations to 1s under, also 847 cases 1,173 bags East India. 792 bags Manila withdrawn. A few lots Iudian sold at 83s. 136 bags Singapore part sold at 73s. 58 half-bales Mocha with-drawn. 3,461 bags foreign part sold. Cargo of Costa Rica, 86s to 98s 6d; Guatimala, 78s 6d to 92s; the latter being lower. Rio was chiefly withdrawn. chiefly withdrawn.

RICE .- Another cargo of Necrancie Arracan sold at 9s 3d. One of Rangoon reported at 9s 54d. TEA.-The catalogues of Indian this week have contained about

7,400 package

SALTPETRE is again higher. 22s to 22s 6d per cwt paid for Bengal to arrive.

DRYSALTERY GOODS.-663 bags Bengal turmeric by auction were taken in at 22s. 200 bags Madras sold at 26s to 27s. 20 bales Bengal safflower were taken in at 4! 10s per cwt. SHELLAC dull. 284 chests by auction to-day were taken in.

METALS.-No alteration in copper; small sales of Straits tin at 69/15s. Scotch pig iron, 53s 9d to 54s per ton cash.

JUTE.-Fully 8,000 bales sold to arrive at rather higher rates. OIL.-No alteration in linseed or rape: 146 casks, &c., cocoa-nut by

auction withdrawn, also some sperm and other fish oils. TALLOW.-No alteration in town or Russian. 1,493 c 1,493 casks Australian by auction, two-thirds sold at about last Friday's prices: fine mutton up to 41s; fine beef up to 39s 3d per cwt.

#### ADDITIONAL NOTICES.

TEA.-The market remains extremely dull, and quotations generally are unchanged.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states, that oranges are selling freely at good rates. Lemons much improved in value. Barcelona, black Spanish, and Turkey nuts in moderate request. More inquiry for new Brazil nuts. St Michal pine-apples in d demand. go

DRY FRUIT .- Dealers have at last come into the market for currants, but their orders are so small, and the demand so small, that transac-tions have been on a most limited scale. Good provincial fruit is now offering at 27s 6d to 28s, the latter having been sold in fair quantity for shipping to the colonies. At public sale on Wednesday, about 100 tons of ordinary Valencia raisins sold at 21s to 22s, and a few fine sorts at 36s, but the bidding was confined to a very small section of the

at 36s, but the bidding was confident to a very shart active of trade, and no general business was done. ENGLISH WOOL.—An exceedingly dull week, hardly anything doing in any kind of wool. Prices rather weak than not. COLONIAL WOOL.—No change to report in value, very little business

doing.

FLAX remains without any alteration in price.

HEMP.—Russian remains very dull, but a better demand for Manila has resulted in some considerable spot business, and now sellers are hardly to be found at quite 1*l* advance on last week's rates. SILK.—Politics still interfere with the silk trade, and there is scarcely

anything doing.

TOBACCO.—The market is without animation, and sales exceedingly stricted. Prices for the better grades fairly maintained, whilst restricted.

common descriptions are drooping. LEATHER.-The trade in all descriptions of leather is still quiet, and prices of most articles have a some what down ward tendency; at the same time, a reduction in prices will not generally tempt buyers to extend their purchases. At Leadenhall, on Tnesday, the demand was very limited. The supplies of fresh goods are moderate, but no article is

specially in request <u>METALS.—The prevailing quiet has been somewhat intensified this</u> week by the course of the Eastern question. Copper has been neglected, and prices of foreign are lower generally by about 20s a ton. Iron without material change. Tin flat in demand, and weak in prices. Spelter, lead, and tin plates all alike without life.

#### METROPOLITAN CATTLE MARKET

MONDAY, April 9. -- The total imports of foreign stock into London last week consisted of 25,059 head. In the corresponding week of last year we received 12,336; in 1875, 21,809; in 1874, 11,829; in 1873 7.690, and in 1875, 15,044

1873, 7,690; and in 1872, 15,844. The cattle trade was rather unsettled, and quotations were The cattle trade was rather unsettled, and quotations were weak. Supplies were again rather short; English beasts came sparingly to hand, and the quality and condition were rather various. Business progressed slowly, and prices had a drooping tendency, even for the choicest descriptions. The best Scots and crosses did not make more than 5s 6d to 5s 8d per 8 lbs. The probability of further restrictions had a disquieting effect. From Norfolk, Suffolk, Essex, and Cambridge-shire, we received alou: 1,600; from other parts of England, about 250; and from Scotland, 72 head. On the foreign side of the market

and the second	1	434 THE ECO	NOMIS	T.			[	Арі	il <b>14</b>	, 187	7.
		were about 100 American, about 400 Dutch, and a few Swedish. The trade here was unsettled, and less money had to be taken. The sheep pens were rather thinly filled, but there was a good show at Deptford. Trade was very slack, and quotations were weak. The best Downs and half-breds, in the wool, made 7s 4d to 7s 6d; and ditto elipped, 6s 4d to 6s 6d per 8 lbs. Lambs changed hands at 8s to 9s per 8 lbs. Calves were in quiet request, at about late rates. At Deptford there were about 50 beasts and 9,000 sheep. It is currently reported that the Privy Council have under their consideration the advisability of having all beasts exhibited at the market killed at the adjoining slaughter-	Of Imports, 1 14 weeks the corresp *.* Of these the head Hom	Exports, ending A ponding p F e articles e Consum	and Hon pril 7, 1 eriod of OR TE duty free ption.	877, show 1876. #### Rebiews.

KEY TO THE LONDON MONEY MARKET. By ARTHUR CRUMP. London: Longmans. 1877. THE tabulated weekly accounts of the Bank of England, which Mr Crump has given in former editions, are supple-mented in this, the sixth, by the analysis of securities on the one side, and balances on the other, furnished in the parlia-mentary returns which have now been annually moved for for some time. The form adopted is convenient, especially as itleaves room for filling up the figures for the current year, on much the same plan as we have long used in our City Article. Mr Crump's figures are sufficiently correct for the general purposes for which they are meant.

TABLES OF DISCOUNT. By T. B. GUMERSALL. London: Effingham Wilson. THESE figures furnish the interest at given rates, between 2½ and 5 per cent., for periods from 1 day to 10 years, and on sums from 1l to 20,000l. The present is the 14th edition.

## BRITISH SEAMEN. By THOMAS BRASSEY, M.P. Longmans. MR BRASSEY here gives in extenso the materials out of which

MR BRASSEY here gives in extense the materials out of which he constructed a lecture delivered at the United Service Insti-tution, with probably a good deal added. The author rejects the idea that seamen as a whole class have deteriorated, but points out the inferior attractions of sailing vessels bound on long voyages, and gives also some practical suggestions for the reform of systems of engaging crews, &c., which seem to be well-based and commendable.

ILLUSTRATED GUIDE AND DIRECTORY OF MANUFACTURERS, IS76. London: 27 Paternoster row, E.C. THIS is the fifth edition of a work which would be more useful to the buyers, merchants, and shippers, for whom it is expressly published, were the information it contains more complete. It gives alphabetically, both according to the in-dustries pursued and the towns in which they are located, the names and occupations of most of the manufacturers of Great Britain and Ireland, and is, therefore, useful to a certain extent. The information, too, is given in three languages.

#### COMMERCIAL AND MISCELLANEOUS NEWS.

Mr J. R. Scott, the Registrar of the London Coal Market, has pub-lished the following statistics of Imports of Coal into the port and district of London, by sea, railway, and canal, during March, 1877:-

(From Messrs Goldsbrough's Wool	Circular,	dat	ed Melbou

urne. February 21.)-Wool-A fair amount of business has been transacted during the month, and full catalogues have been submitted, considering the lateness of the season, the total offered since last summary being 12,113 bales, of which 9,605 bales have been sold. Prices have been well maintained, and increased firmness has been noticeable at the more recent sales, notwithstanding the inferior condition of a considerable proportion of the lots offered. The season may now be considered proportion of the lots offered. The season may now be considered virtually over. With reference to the general condition of the clip, we should class it as being, if anything, rather under the average, a con-siderable proportion showing lighter fleeces than usual, and being also frequently tender in the staple. This is the result of the dry season and consequent scarcity of feed during a great portion of the year. An important feature in the season's operations has been the large quantity of wool from the adjoining colonies which has been sent here for disposal. Strong efforts were made at the commencement of the season to induce consignments to this market, and cheap contracts for freight were made, thus enabling growers in New South Wales and Queensland to forward their clips here at almost nominal cost. Directly these low rates were published, a steady run of consignments commenced, low rates were published, a steady run of consignments commenced, and most of the steamers that have reached here during the last three months have brought wool for sale, more especially since the prices realised for the first lots became known. The usual sales in this market have thus been supplemented to the extent of several thousand bales. More than half the wool grown in Australia is shipped from this part and it must be home in mind that the shipments include this port, and it must be borne in mind that the shipments include nearly all the choice clips—the Victorian wools as a rule taking a much this port higher position than those grown in the other colonies. This arises from the more equable climate, the generally better pastures, and the enterprise of our flockmasters in improving their sheep, and thus ecuring a more valuable class of wool.

(From Messrs Albert Ragg and Co.'s Wool Circular, dated Liverpool, April 5.)—Our second series of public sales for this year commenced on the 20th ult., and closed on the 28th ult. East India wools occupied from the 20th to 23rd ult., when 11,742 bales were offered, of which 8,598 bales were sold. The attendance of home buyers was average, but there were none from the continent. Competition was languid throughout, and prices, with much irregularity, ruled on the average 10 per cent. lower than the previous auctions in January. Miscellaneous ito per cent. lower than the previous auctions in January. Miscellaneous kinds were offered on the 27th and 28th ult. The attendance of buyers was small on the first day for the coarse wools, but rather larger on the second day for the fine grades; there was a poor demand. Alpaca quiet, and stock accumulating. Mohair--Not much doing; during February and March prices ranged from 2s 9d to 3s per lb, the latter being recently paid for a small lot. Sheepskins-Public auctions were held here on the 7th ult. 1,133 bales were offered, and 761 bales sold. Prices ruled fully do per lb lower than the previous sales of 17th Prices ruled fully 1/2d per lb lower than the previous sales of 17th January.

(From Messrs H. W. Eaton and Sons' Silk Circular, dated April 4.) The silk market has been very quiet during the past month, and the transactions have been small, in spite of a brief period of activity, when some considerable sales were made at improved rates, but the general conditions of trade and of foreign politics tended to check operators and a relapse ensued; during the last week the Easter holidays have interfered with the home trade, and consumers seem naturally inclined to write some proceeding. to wait some news of the approaching European crops before com-mitting themselves to any purchases in advance of actual wants. The dealings of the month have been chiefly in Chinas and the lower classes of Tsatlee reel Cantons, and the purchases of the latter descriptions are

going quickly into consumption. (From Messrs E. W. Field and Co.'s Beetroot Sugar Circular, dated (From Messrs E. W. Field and Co.'s Beetroot Sugar Circular, dated Douai, April 4.)—The better feeling noticed at the beginning of March did not last longer than the first week. The decline in prices for the month has been 3s per cwt on crystals, and 1s 9d to 2s per cwt on raws, whilst refined has only given way 1s per cwt. At these reductions a good steady business has been doing, and, in fact, it may be said that our refiners are at last going into stock, which should be considered a healthy sign, so that we may thus safely look forward to an increase in

#### [April 14, 1877.

THE ECONOMIST.

their working. The next two or three months will no doubt furnish us with some precise indications respecting the real diminution in con-sumption. In our opinion, deliveries have simply been retarded with some precise indications respecting the real diminution in con-sumption. In our opinion, deliveries have simply been retarded, and the lost ground will in all probability be regained during the ensuing months, for it cannot be maintained that present prices seriously affect the consumption of such an article. The European crop of 1875-1876 gare an excess in production of 175,000 tons, thus compensating for the diminution in the colonial crops of 1876; the stocks, however, at the end of October same year, showed a reduction of 130,000 tons. It may then well be asked, what will be the state of the stocks in October next, after a deficit of 325,000 tons in the European production, a colonial crop no larger (possibly smaller) than last year, and with diminished stocks in Europe and United States—now 150,000 tons smaller than at same period last year. In France and Belgium, according to present appearances, a larger area of land will not be sown in beet this year; and it does not appear probable that the other beet-producing countries will increase their production, whilst the wet weather we are still experiencing will retard the sowing, and consequently be unfavourable to the germination of the seed and the growth of the plant. (From Messrs William Moran and Co.'s Calcutta Report, dated March

(From Messrs William Moran and Co.'s Calcutta Report, dated March (From Messrs William Moran and Co.'s Calcutta Report, dated March 2.)—Indigo—The little that remains in stock is being gradually dis-posed of by private contract. It is too early to look for any advices of interest concerning the new crop. The October sowings in Lower Bengal are generally well reported on, and in some Zillahs the spring sowings are being put in. Owing to the unusual quantity of rain that fell in Tirhoot and Chuprah during the past two months, sowings will be rather later than usual; the moisture is everywhere reported to be even and the past two months are the spring for a spring to the unusual the spring spring to the spring spring to the spring spring the spring the past two months, sowings will be rather later than usual; the moisture is everywhere reported to be excellent. Tea-Very little tea of really fine quality is now on offer, and the season is virtually closed. Picking has again commenced to a small extent in the Cachar and Darjeeling Terai districts. Prospects for the coming crop are generally favourable, though rain is now wanted in most parts of Assam. At the commencement of the season, we result again draw the attention of planters and egents to the for we would again draw the attention of planters and agents to the season, quent complaints there have been this year on account of loss in weight. We believe that the loss is very often caused by the loose style prevailing in the manner the teas are weighed in the London warehouses, but during the past season several instances have been brought to our notice when the mistake has taken place at the factory, through an inaccurate balance or faulty weights.

A Bombay Market Report, dated March 12, states that silver, although nominally quoted at 553d per oz, is reported to be weak, and there are no buyers. The shipments for the East continue on a liberal scale, and gold is also being imported freely on native account, which will doubtless be exported to England in due time, to the advantage of those interested. As we have pointed out from time to time there are fresh influences arising every day which tend to act strongly on exchange. When the Budget is read on the 21st instant, the important fact as to whether the new loan is to be a sterling or a rupee one will be made known. If the former, we may see a slight rise in rates, as the Council known. If the former, we may see a slight rise in rates, as the Council drawing will necessarily be interfered with: if the latter, we may be prepared for a further fall. The interruption to our trade by the continental difficulties is becoming very serious, and the banks are naturally anxious to get their money home. Although a war must be the means of supporting the price of silver at home, we cannot expect India to go on importing, on the present scale, and its demand being lessened would form a very strong factor in reviewing the probable future of the metal. Fluctuations, such as we have witnessed during the past week, interfere seriously with business, but we fear that we must be prepared for such a state of things for some time to come.

#### CORN IMPORTED AND EXPORTED.
