Thus everything combines to swell the effect of the increased yield. The single drawback is that there is a falling off in stock-2 per cent. in cattle, 8.7 per cent. in sheep, and 16.3 per cent. in pigs; but this decrease is little, and would besides not be so marked, except in sheep, if we include Ireland and not be so marked, except in sheep, if we include Ireland and not merely Great Britain. The decrease in cattle, for instance, in Great Britain, is 107,000, but in Ireland there is an increase of 80,000; so that there is only a diminution of 27,000 in the whole of the United Kingdom. There is a corresponding increase in pigs in Ireland, partly making up the English deficiency. In sheep, however, the Irish decrease of 253,000 swells appreciably the British total of 1,180,000.

The conclusion from these two facts about the harvest is no doubt favourable to the expectation of revived trade. The influence on the profitableness of trade of a good or bad harvest-especially of cheap or dear bread-can hardly be harvest-especially of cheap or dear bread-can hardly be exaggerated. The actual increase caused by a good harvest to the real wealth of the people, which is the secret of the effect, may not be great, may seem hardly worth reckoning compared with the total production of the year, but the result is nevertheless far a great er movement in business, and the difference between very profitable trade and the reverse. A very slight alteration which statisticians would hardly notice ans a great deal to the trader. First one set of people find they have more means for purchases, that is for employing the labour of others; their demand supplies a second set with additional means; and so the effect goes on, the prosperity of each class affected also reacting on the others. The effect is not the less certain because the operation is somewhat slow. A bad harvest tells slowly too; it is not till some time after, or even until there has been a pretty long period of dear bread, that the effect first of one class and then of another restricting their purchases produces or increases a general depression. We expect then produces or increases a general depression. We expect then that in time the full effect of last year's good harvest, and the present average one, will be perceived. There has been a great deal to recover from, as the depression of the 1867 harvest aggravated the depression of a panic; but the in-fluence of the harvest is always of a kind which is sure to act, and it is now acting towards recovery.

THE EUROPEAN ASSURANCE SOCIETY.

THE rumours affecting some assurance companies have re-ceived confirmation this week by the application to wind up rance Society. Obviously, it is premature to de-scribe the society as collapsed, for the directors resist the application, and the hearing has been postponed. But it is not going beyond the limits of comment on a matter still sub judice to say that some of the facts which are not denied, and statements authoritatively made, imply a condition of affairs which we think ought not to exist. The suspi-cion that other companies are in the same plight may well excuse wide-spread distrust and anxiety, not only among the policy-holders in the class of companies whom the suspicion affects, but even among companies of better standing.

The outstanding policies, according to the *Times*, are for an amount between nine and ten millions; there are liabilities or annuities considerably more than 16,000/ per annum; and there are the liabilities besides of a large guarantee business, which supplies an income of 40,000l per annum. To meet these liabilities there is a total premium income of 338,000*l*, apparently not under the mark if pro-perly administered; but in an established insurance company we look for a great deal more. In the European how-ever so far as can be made out from the last balance-sheets published, the accumulated fund at the close of last year was little more than 600,000l, and of this amount The outstanding policies, according to the Times, are of last year was little more than 600,000, and of this amount there are two large doubtful items-41,000l invested in foreign securities, and 348,000l invested in "mortgages, life "interests, reversions, and balance of purchase of businesses "account." What the latter item may mean it is impossible to tell, and investigation only will show. Even if the whole 600,000*l* was good however, it seems, on ordinary insurance principles, an inadequate sum for the alleged liabilities and business of the company. It will be said, of course, that the 595,000/of uncalled capital— Tt the item of capital at call in the balance-sheet-is also a good asset, but a proprietary insurance company should have the

uncalled capital as an additional guarantee, the policies being amply secured without it. Including this sum, however, and treating it and the other assets as good, the total of 1,288,000 still appears insufficient. It is evident on the face of such an account that the interests of the policy-holders are not so safe as they ought to be, and that they have not the fair security to which they are entitled. There is justly addi-tional cause for anxiety in the manifest change for the works in 1868, as shown by the two balance aberts of 31st Decem-ber, 1867, and 31st December, 1868, in spite of the signi-ficant changes in their form. The contrast on the debit side is as follows :---

S1st December, 1867.	• Slat December, 1868.
Sundry accounts 29,4	54 Subscribed capital 779,849 54 Sundry accounts 16,246 59 Life assurance fund 490,729
757,8	1,286,326

n reality t In reality the capital was the same at the two states balance-sheet api merely giving occasion for the entry of "capital at call"on the other side; and the diminution of the Life Assurance fund from 545,000l to 490,000l might have caused some alarm to those who prepared the accounts. The changes on the credit

the state of the state	1867. £		1808. £	D	ACTERAS.

SUMMA OWNERS	11 15 15		1,288,337		

Showing a real diminution of 65,000l in the accumulated assets of the company, which appears rather a serious matter.

The history of the company is again like the Albert-one of amalgamations. The European would appear indeed to have been the greatest offender. In the "Insurance Register," by a Fellow of the Statistical Society," a small pamphlet in which the figures, and in some cases the want of figures, of insurance companies are carefully analysed, so that it is of no little value as a policy-holder's guide, we find the following record of no less than 33 amalgamations. Of these a good many are re-transfers, which are shown by the name of the c absorbed being put in inner columns, the first transfer in the series through which it has passed being to the company above it in the next outer column :-

THE ECONOMIST.

Ceased No. of Years' Title of Extinct Company. Founded. to Exist: Duration. oyal Naval, Military, and East 14 1847 1861 1866 1854 1857 ****** õ 87 1850 1857

The European (No. 2, previously People's Provident) which has absorbed all the others, was established in 1853.

Pending the more complete accounts of the society, which ill und oubtedly now be forthcoming, there is one matter which will require investigation—the quasi-governmental and efficial patronage which it has enjoyed. It is stated that about nine or ten years ago a special Act of Parliament was passed to enable the company to undertake the guarantee of the fidelity of Government employés and others, and that this Act specially provided for the creation of a reserve fund in Government securities specially applicable to such guarantees and Governmentsecurities specially applicable to such guarantees and for the appointment of Government inspectors to examine the affairs of the society. This Act, if it did not give the company Government patronage, has certainly been utilised for advertising purposes, as if it had done so; and it is easy to understand how a connection with the departments would ng np. The point for inquiry is whether the Government a used the powers reserved to it by the Act. It would be no practical use inquiring now what inquiries were made of no practic before the company was authorised to undertake Government guarantee business; but the company once authorised, some one ought to have seen that it continued worthy of credit. If it was necessary to reserve the right of inspection by Government officers, the right should have been exercised—all the more that so much parade was made of Government patro-nage. This failure however cannot fairly be used as an arguant against Government inspection of companies which in-te it, or on whom it is forced by the policy-holders. vite it. policy-holders. e a provision in the direct interest of the Government itself has not in an isolated case been taken advantage of, through some oversight, it does not follow that a regularly-organised machinery to be set in motion by insurers would fail of its object.

An important question has been raised by the resistance the directors to the winding-up, and the grounds of that resistance stated before the Vice-Chancellor on Wednesday. It is an erted that the moneys available for the payment of and americal that the moneys available for the purpose, and that the summary and subscribed capital and the large annual premiums will be sufficient to meet the liabilities as they arise. Whether the directors here make good this plea or not it is likely mough to be urged strongly in other cases, and it may become very difficult to decide whether companies should be wound It is the peculiarity of insurance up or not. that the liabilities are postponed, and if directors can hope to show by any ingenious process that they may meet everything as it arises they will endeavour to do so. Morellally, however, it appears to us that whatever may be the legal requirements to a winding-up, an insurance company which resists going into liquidation should be able to show very much more. What the policy-holders are entitled to is the reasonable prospect of the fulfilment of the engagements to them according to the letter and spirit of their policies; and if a company has got into a position of embaraent and doubt, if it is at all matter for speculation whether it can make good its engagements, if it has not taken the ordinary precautions in insurance business to keep a due proportion of the premiums it receives eafely invested, -- the mere facts that current demands can be met and that it is likely to meet others as they arise, for no more can be alleged, seen insufficient pleas to avert liquidation. It ought at least to be possible to take into account the past conduct as well as the present position of the concern, and to visit on the company the consequences of any acts manifestly tending to a breach of contract. We might tolerate a certain latitude, a certain amount of waste within the limits of the proprietors' capital, though even that may be doubtful where a guarantee of the capital is held out to insurers; but a mpany ought to have no standing where its dealing with the premiums, the money of the insurers which could only be dealt with in a certain way to ensure the fulfilment of the purpose for which it was paid, has been used in a quite dif-ferent way and literally dissipated. The leaning in fact should

be to interpret gross acts tending to a breach of contract as involving that breach where there is any doubt at all as to the future of the company. We trust that in this and other cases policy-holders will insist upon their strong equitable claims, and secure that the position and past conduct of companies on their trial for winding-up are very strictly judged.

1127

M. LOUIS BLANC AND THE IMPERIAL DYNASTY. EVERYONE must admire the honesty and the unyielding fixity of principle which M. Louis Blanc has shown in his letter to the electors of the Eighth Circumscription of the Seine, in which he declines to take the preliminary oath of allegiance to the Empire, and explains his reason for refusing in his own characteristic and pungent style. We do not see how anyone, English or French,-friend of compromise or friend of logic, can possibly differ from M. Louis Blane in thinking th he ought not to take an oath which he does not intend to keep. A good deal of the able reasoning in the letter might have been spared if M. Louis Blanc had said at once-" I should think it very wrong to keep this oath even if I took "it, and therefore as a man who respects his word, I won't "take it." Whatever excuses a casuist may find for a man who breaks an oath, which he believes or pretends to believe was a bad one, it would be hard for any but a professed friend of deceit to find any for a man who takes an oath at the very moment when he deliberately intends to break it. Yet this is the state of mind at which apparently M Louis Blanc points when he writes, "The oath vain formality ? There is one who has so considered it. "And when, after once gaining possession of power, the man "in question prescribed that which he had violated, what was "his aim ? To deprive his adversaries, if it were possible, " his aim's To deprive his adversaries, if it were possible, " of the right to invoke against him the respect for sworn faith. " That was the weapon which he wished to break in our " hands." Now, we confess, that strikes us as a rather Machiavellian suggestion of M. Louis Blane's. Why not suppose that the Emperor suffered sufficiently from the scruples which he overcame to feel confident that the same scruples in the minds of more conscientious men would be too powerful to overcome? We confess that seems to us a rather more probable account of the imposition of the Oath of Allegiance than M. Louis Blanc's—who attributes to the -who attributes to the Emperor exceedingly little respect for the character of his Republican opponents when he makes Louis Napoleon assume that they would never hesitate to take an oath which they intended to break, and then to break it. What the oath has proved to M. Louis Blane, when it constitutes for him a serious obstacle to his re-entrance into political life, why should it not equally have proved to those who have taken the oath : namely an insurmountable obstacle to concurrence in any plots aimed at the subversion of the dynasty ? M. Louis Blan hardly seems to entertain that possibility at all seriously. He assumes almost throughout that the practical alternatives for the former members of the Republican party are to take the oath and break it, or not to take it at all. In one short portion of his letter he may perhaps be contemplating a third course, which even a Republican might possibly conceive the most honourable and right under the circumstances—namely, to take the oath and keep it, working all the while in the direction of institutions as popular and Republican in essence as may be compatible with the ostensible form of an Empire; but if he is, he passes it over far too lightly, and reserve s all the weight of his argument for the denunciation of any hollow and formal acceptance of the oath. But as this portion of his letter seems to us the only serious part of M. Louis Blanc's argument, and to illustrate both the weakness and the strength of the French Republican party, we will give it a little further consideration.

M. Louis Blanc lays it down, then, that every party has conditions of existence proper to itself, —imperious conditions which it cannot afford to despise. When a Legitimist, he says, hows before majesty he is playing his natural part. When a Constitutionalist bends to a policy of expediency, he too is only following the natural drift of his opinions, since " constitutionalism is a policy of expediency, nothing more." But when a Republican swerves, or "seems to swerve before any-" thing but right, he has already thrown off his true " character. For that which constitutes the Republican " party, that which distinguishes it, that which even forms

" the essence of the ideas and sentiments which created it, is " the stubbornness (raideur) of its convictions, the love of the "the stubbornness (raideur) of its convictions, the love of the "straight line,----the care for human dignity rising even into "the passion for equality." Now that sentence clearly con-tains the only argument addressed by M. Louis Blanc to Bepublicans who should seriously think of attempting to realise the self-government and freedom of a Bepublic within the formation of a Bepublic within the forms of an Empire, who should think of taking the oath in earnest as the only qualification for Republicanising the Empire. But even here M. Louis Blanc evidently contem-plates rather the Republican who should "seem" to swerve to swerve from his abstract ideas than the one who really does so. The "seeming," he says, will be as dangerous as the reality, for it robs the Republican party of the uncompromising air of devotion to principle which is its strength. We doubt if even devotion to principle which is its strength. We doubt if even here he contemplates the case of Republicans really willing to give up something of the form to secure the essence; he is arguing rather with those who might not scruple to seem to do so, under the impression that the oath is only a form after all. But still the argument, however intended, cer-tainly does touch both the Republican willing actually to concede something in order to gain much, and him who is only acting concession only acting concession.

We cordially admit, moreover, that M. Louis Blane has a very true instinct for the genius of Republicanism when he says that the unconquerable stubbornness of its attitude—its ardent confession of an immutable principle in the equality for which it fights—is at the root of the enthusinsm it excites. This is so true that, as M. Louis Blanc ably remarks, the socalled republican party in the last Parliament found itself at the elections left far behind by the enthusiasm of the national opinion, found itself the rear-guard when it had supposed itself the van-guard, and no doubt for the reason he assigns, that it had paralysed its influence by its compromise with the unpopular Imperial institutions of the last few years. So far we completely agree with M. Louis Blanc. "Non possumus" is as much the key-note for true Republicanism, when asked to compromise matters with the Empire, as it is for the Pope and the Ultramontanes when asked to compromise matters with the Liberals. The whole enthusiasm of the cry is taken out of the Republican programme, if, after all, instead of fraternity and equality, you are to admit a hereditary crown, an Emperor in the purple, and the whole parapher-nalia of a court. That is to us perfectly self-evident. The Republicans lose the whole power of a symbol The Republicans lose the whole power of a symbol over the imagination in giving up a Republic, however substantially Republican they manage to make the Empire. Therefore M. Louis Blanc is absolutely wise on behalf of his cause in refusing either to temporise or to seem to temporise, and in exhorting all his brother Republicans to refuse in like manner. To strike your flag is apt to be fatal to any cause; but to strike your flag when the flag is the cause-and this seems to us to be very nearly the case with the abstract Republicans-is death to it.

And this is to our minds the chief weakness of M. Louis Blanc's letter that throughout it there runs an assertion that principle and mixed forms of government are incompatible things. Doubtless it is so, if the principle is this, that there is to be no mixture in the form of Government, for than the propo-It is that the total of the second se worth of self-government than of any form of dictation ? that be not the principle of Liberalism, to our minds at least there is no such thing as a principle in politics. We hold that State to be the most highly developed which admits of the largest amount of true self-government, and in which that amount is actually realised. As for making a principle of the form of Government, it seems to us a deliberate sacrifice of the matter to the manner. Is it not obvious to M. Louis Blanc, as it is to very much less brilliant men than M. Louis Blanc, that the form of a Republic frequently covers a far less substantial amount of self-government, of political responsibility exercised by all classes, than the form of a Monarchy covers in other cases ? Would M. Louis Blanc say in such a case that the more self-governed people were the dupes of a policy of expediency, while the less self-governed peop le, who had a Republic without so much popular responsibility, were adhering steadily to the only politics based upon the rule of right? We can hardly understand M. Louis Blanc's devotion

to this nominal Bepublicanism as the only absolutely "straight-line" creed in politics. Is not the straight line the shortest way between two points ? And are not the two points between which you want to find the shortest way in points between which you want to find the shortest way in polities the centre of power and the centre of popular respon-sibility ? Now if a Constitutional Monarchy, or any other modification of Monarchy, brings these two points near together than a formal Republic, how is it possible to talk of this adaptation of means to the true end as a sacrifice of principle

M. Louis Blanc seems to us to have got the true key to the imaginative strength of the Republican party; but we confess that he also seems to us to have deceived his own brilliant intellect into that substitution of the means for the end which is essential to the success of a Republican party. We have never disguised from ourselves that many of the form of a Constitutional Monarchy are empty enough,—that looked at in the light of pure reason, sume conceivable form -that But surely the of Republicanism are far more defensible. minciple in politics cannot be identified with the outward form, but only with that which it is the object of the outward form, but only with that which it is the object of the out-ward form to guard and cultivate,—true freedom, i.e., true popular and national responsibility. If you can get more of this by representative institutions than by calling the whole people together, -as is done, for instance, in the little Republic of Appenzell,—even M. Louis Blanc and the sternest Repub-lican will give up the more democratic form for the less—the form in which the people retain all the power in their own aristocracy of representatives. Why not then go further and admit at once that that constitution is the best for any people which enables them to enjoy and exercise the greatest amount of genuine political responsibility, whether it be dressed in the external costume of a Republic or not?

THE VIENNA PANIC.

(FROM A CORRESPONDENT.) THE Austrian Empire, at all times the prolific parent of paradoxical phenomena, was never more so than at present Those who with unexampled rapidity and vigour have struck down throughout this Empire nearly every political and eccle siastical monopoly, are the most vehement advocates of its restrictive commercial policy; whilst, on the other hand, perhaps a majority of those who would willingly emancipate the Austrian consumer from the taxes he still pays to con mercial monopolists are among the most ardent supporters of ecclesiastical privilege, and in the camp of those who are that champions of national independence will be found the last apologists of social disabilities and feudal traditions. Perhaps however the most noticeable want of apparent sequ between cause and effect on the actual condition of Austrian society is contributed to the list of ano-malies by the striking increase of industrial activity and general material prosperity, which appears to have immediately succeeded to the disastrous issue of a war which dismembered and nearly annihilated the Empire. The late panic on the Vienna bourse has now subsided; but a short explanation of its immediate causes will perhaps be not altogether uninteresting, in so far as it may help to prevent exaggerated notions respecting either the recent u dented activity of this money market, or its present depression.

The Bank Act of 1864 imposed on the National Bank the obligation to resume cash payments; and, by the terms of its charter, the Bank was empowered, not only to issue notes to the amount of its stock in silver, but also to issue 200 million florins' worth of paper over and above that am but, when the Bank was about to comply with the terms of the Act, by resuming cash payments, it was pre-vented from so doing, by an issue of 300 millions florins' worth of State notes, which were constituted legal tender by the Government, for the purpose of carrying on the war in 1866. It must here be mentioned that the Bank Act of 1964 also stimulated that the Government that Act of 1864 also stipulated that the Government should Act of 1864 also stipulated that the Government should guarantee to the shareholders of the National Bans an an-nual dividend of 7 per cent. The actual dividend was con-siderably below this amount; and, in order to make it up, the Treasury, during the years 1866, '67, and '68, expended about a million of florins per annum. M. Brestel, the Finance Minister, naturally anxious to relieve the Treasury of this annual burden, which it was ill able to bear, entered into

agotiations with the directors of the National Bank, with a rise to obtain their assent to the withdrawal of the Govern-nessi guarantee on the 7 per cent. dividend. The directors, observing that they, on their part, were willing to fulfil the terms of the Bank Act by an immediate resumption of each payments, but practically prevented from doing so by the forced currency of the State notes, proposed that they should, in exchange for the guaranteed dividend, be authorised to the state to issue a larger amount of Bank notes than were by the State to issue a larger amount of Bank notes than were by the State to issue a larger amount of Bank notes than were then in circulation,—it being clearly understood that the total amount of Bank paper which would then be put in cir-culation should not exceed the maximum issue of notes authorised by the Bank Act of 1864. By this arrangement it was anticipated that the Bank would be enabled to pay its bareholders a dividend of 7 per cent., without the assistance of the State. The proposal was accepted; and, with the anotion af the State, the Bank increased its issue of notes to the amount of about 300 millions of florins. This money is last out at interest on deposite of debentures and quaranteed is lant out at interest on deposits of debentures and guaranteed hares at short and longer periods. But as the rate of interest on loans (discount) charged by the Bank was lower than the rates allowed by the companies on those debentures, the immediate effect of that step was to attract to the Bank an enormous number of such deposits.

For instance, supposing a person to have purchased 10,000 forms worth of public rentes, paid-up shares, or debentures, basing interest at 5 per cent. in silver, by depositing these securities at the bank, with a payment in bank notes sufficient to cover about one-fourth of their quoted price, he could obtain an advance of about three-fourths of their market value, and if with the money thus advanced he were to pur-there a reak lot of shores or debentures. could by placing chase a new lot of shares or debentures, could by placing chase a new lot of shares or debentures, could by placing these with the Bank at the same rate, and again and again repeating the process, eventually make at the lowest compu-tation of set profit more, and probably much more, than 9 per cent on his money. This alluring possibility was obviously an immense and dangerous temptation to the public to purchase emessive quantities of such securities, and other banks have entainly been advancing money on ordinary joint-stock bank shares and those of industrial enterprises with an absence of precaution probably unprecedented, that is to say with the least possible required margin on a market value inflated by described the bank were to make a sudden call for the redemption of its loans, it is equally obvious that the depositors would have to sell in haste at the risk of a heavy s, and the greater the necessity to sell the greater of course the difficulty of doing so,

This is precisely what has now happened here. There is always at this season of the year, when the harvest is gathered in, a considerable demand for Bank paper from the provinces. To meet this demand the Bank was obliged to call in its notes. Circulating capital had been diverted from its proper destinations, and as a large number of persons without rearre capital had been tempted to speculate on the *bourse*, these speculators were now of course thrown on their backs.

It was feared that all the shares and debentures with which the market has of late been glutted would become absolutely unaleable; and as the Bank was clearly to blame for the injudicious convenience too liberally accorded at the outset of the movement to the purchasers of these securities, it has now been suggested that it should immediately realise the foreign bills of exchange which it holds to the amount of 15 or 20 millions of florins, and therewith purchase abroad the same amount of silver, which will enable it to increase its issue of notes, and so relieve the market. It was feared that all the shares and debentures with which

To the facts I have mentioned the recent panic here is im-mediately attributable; but it has doubtless been aggravated by the not very creditable affair of the Wiener Bank; and by the not very creditable affair of the Wiener Bank; and partly perhaps by the unsettled aspect of political affairs in France: The story of the Wiener Bank is brief. The francial world of Vienna so long despised and re-fused admittance to the favours of their cognisance by the Vienese aristocracy as an orbis veteribus ignotus, has recently been honoured by their discovery of its fertile faids, which are now invaded by a host of highborn adventurers eager for public plunder. To these enterprising

representatives of the Austrian "nobility and gentry" Vienna is indebted for the recent establishment of the Wiener Bank. The shares of this bank at 200fl, of which the Wiener Bank. The shares of this bank at 200f, of which 80 were paid up, were rapidly forced as high as 280, in con-sequence of the wholesale purchase of them by its directors, who were aware that the greater the number of shares bought up by them, the greater also would be the number of bears thereby brought into the arena. Their object was, by locking up these shares, to force the bears to repurchase them at an excessive and fictitious price. But, unluckily for themselves, they neglected to take into that pleasing and patriotic calculation the possibility of money becoming diffi-cult to obtain; and as, in consequence of the circum-stances already explained, they suddenly found them-selves without the means of paying for the immense quantities of shares which they had purchased at exceedingly high rates, they fell, themselves, into the pit which they had digged for others. The result is that, from 280, the shares of the Wiener Bank have suddenly fallen to 80; and that sundry great personages (amongst fallen to 80; and that sundry great personages (amongst whom the Royal House of Guelph is not unrepresented) are now considerably out of pocket. The inconvenience, how-ever, which has been occasioned by this sudden collapse in the artificial value of the Wiener Bank shares, is not extenaiva.

The recent panic has not occasioned the failure of a single house of previous good standing; and I doubt whether the Vienna money market can be permanently or very seriously deranged by any depression of a purely local and non-political character. That class of Austrian securities which have markets at Frankfort, Amsterdam, Berlin, Nurenberg, and other continental cities is generally sound; and, for that reason, when any temporary tightness of the market here makes them fall to exceptionally low prices, there is always a chance of their finding purchasers in those foreign markets. But, on the other hand, any mone-In those foreign markets. But, on the other mand, any mone-tary crisis at Vienna occasioned by *political* causes would be poculiarly disastrous. For, in that case, the alarm of foreign purchasers would suddenly throw back upon the market here large quantities of Austrian securities, and as Vienna takes in return no Prussian or Dutch securities from Berlin or Austrian securities from Berlin or Amsterdam, the inconvenience thereby occasioned to this market would be very severe. At present the recent panic on this bourse has certainly not occasioned any great suffering, for the numerous purchasers of shares and debentures have lately realised such large gains that, on the whole, they can lately realised such large gains that, on the whole, they can afford present losses, and are able to sustain the shock. But by-and-bye, when subsequent instalments have to be paid, I anticipate that the real pinch will begin; and many of the Banks here have certainly, of late, been tempted to extend their transactions beyond the limits of strict prudence. In short, there has been one of those epidemic money-making fevers which not unfrequently accompany a suddenly stimulated circulation of capital in coun-tries where industrial enterprise previously needed development. accompany a suddenly stimulated circulation of capital in coun-tries where industrial enterprise previously needed development. But to this fever the present tightness of the market may perhaps administer a salutary sedative; and as the majority of undertakings recently started in this country is sound, so long as *political* troubles can be avoided, the very considerable progress which, during the last few years, has most un-doubtedly been achieved by Austria in the path of material prosperity, may fairly be expected to continue. In view, how-ever, of the increasing uncertainty of political affairs in France, and the chronic delicacy of the internal politics of Austria herself, it is impossible to contemplate altogether without anxiety the present prospect of the "monde financier" at Vienna.

Vienna, Sept. 23, 1869.

years intervening between the present time and the equilibrium of expenditure with revenue. These measures were-1. An anticipation of the sums due from sales made or to be made of ecclesiastical property, to be effected by reorganising the Domanial Association, 12,400,000? to be thus obtained. 2. The deposit of 4,000,000? by two credit establishments to be entrusted with the service of the Treasury; and-3. A forced loan of 12,000,000?. Now it would seem the Italian Government resorts to borrowing in the ordinary fashion, instead of, or supplementary to, the above ingenious expedients. Either way the result is to make the intermediate expense of carrying on greater than the Minister calculated in the spring. The only advantage of the expedients was their enabling the Government to find the money necessary to fill up the deficits at easier rates than its credit would have allowed in the open market; but the Government comes to the open market after all. What the effect must be in deranging the Minister's calculations need not be described,--the simple fact being that the calculations allowed no margin for disappointments. It is admitted we see that the revenue Budget of the year is " unsatisfactory," and coupled with the known facts of Italian finance an admission of this sort is very serious.

The Daily News publishes a letter from Mr Wells, the United States Special Commissioner of Revenue, to Mr Dudley, the United States' Consul at Liverpool, giving an interesting calculation of the amount of the American debt that may be paid off during the current financial year. The surplus of last financial year, it will be remembered, was between seven and eight millions sterling; and as the saving in expenditure and strictness in collecting revenue had been principally in the last quarter, it is natural to expect more brilliant results when these virtues are practised during a whole year. But Mr Wells's calculation is certainly very striking. Altogether he thinks it very probable that 120,000,000 dols, equivalent to 18,000,0007, will be the surplus. The calculation is :--

Present anrplus	48,000,000 18,000,000 9,500,000 15,000,000 30,000,000
-----------------	---

120,500,000

The two last items are evidently a little doubtful, but it is probable that something will be gained on both heads, and that there will be a surplus considerably above the last. It is assumed of course that there will be no new causes of extra expenditure, and Mr Wells thinks that even if the tariff is reduced it cannot now be reduced in time to affect the income of the year. These causes, however, must affect the additional calculation that the American debt may be paid off in fifteen years, and the promptness with which the internal taxes were got rid of when the Americans turned their minds to it does not make it less unlikely that some day or other very short work will be made with the tariff too.

An authoritative paragraph has been published to the effect that the London Committee of the Albert policy-holders is "engaged in the consideration of proposals both for recon-"struction and for transfer of the business of the Company." It may be doubted whether even in the hands of the policyholders much good will be done by such plans, but they are at least free from a principal objection to anything emanating from the shareholders—that the proposed advantage to the latter was far too evident. The interests of the two classes being antagonistic what the one gained the other must lose, and that was sufficient to upset the shareholders' scheme. In any scheme got up by the policyholders themselves it will besides be possible to provide for the successful prosecution of claims against all concerned in the amalgamations. As to these it is possible that something may be made, though only after a whole crop of law suits, if the account given by correspondents of the proved in evidence, and the other amalgamations should be found to be on a similar footing. There are some certainly good ground for maintaining that in selling the good-will of a husiness, in the profits of which the profit policy-holders had an interest, the directors of the amalgamated companies were

pretending to sell what was not theirs to dispose of, and that at least the proceeds should be accorded to the policy-holders. The claim against the original shareholders in the companies might be still more worth pressing, and it is 'difficult to see how they can be exonerated unless the policy-holders expressly consented to accept the substituted liability. Mere payment of the premiums to a third party nominated by the original obligant in the assurance policy cannot by itself have any effect in relieving the latter. It is his business, and not that of his creditor, to look after the solvency of the party to whom he commits the duty of discharging his obligation.

The twenty-first annual report of Poor Law Board, which has just been issued, contains some interesting figures about the state of pauperism. It is pretty evident that a great deal of the recent outery had very little in it—ao increase being shown, but rather the reverse when a long period is reckoned, although for a year or two back there has been a tendency to increase, as compared with the lowest level which has been reached. Thus, as to the rate of the enpenditure per head of the population, it appears that since 1834 the figures vary between $3s 9 \frac{1}{2}d$ and 5s 5d, these highest and lowest amounts being in 1834 and 1837 respectively, and showing the immediate effect of the passing of the Poor Law. Since 1837, however, the expenditure in 20 years out of 31 has been over 6s per head, and several times the figure of 1868, viz., 6s $11\frac{1}{2}d$, has been nearly reached, or exceeded. Thus, in 1843, the amount was 6s $5\frac{1}{2}d$; in 1848, 7s $1\frac{3}{2}d$; in 1849, 6s $6\frac{1}{2}d$; and in 1863, 6s $4\frac{1}{2}d$. The comparison is still more favourable if we compare the expenditure with the rateable property, the proportion per cent, being given as follows for the years stated :—

	£	8	d		£	8	1
1841	. 1	6	3	1856	1	8	1
1847		6	9	1866			1
1850		7	1	1868	1	5	1

-so that except in 1866 the burden of pauperism has never been less than it was last year on the property liable to support it. The burden would have appeared still smaller by contrast, had the back years chosen for comparison been years in which the rate of expenditure per head was high, instead of being years in which it was rather low. The figures as to the ratio per cent. of the paupers relieved to the whole population are equally instructive, showing that in fact pauperism has been stationary for a good many years, and that the present rate per cent, is about the lowest of the whole time:--

1849		1856			
1850	5.7	1857	4.6	1864	4.9
1851	5.3	1858	4.7	1865	4.6
1852	5.0	1859	4.4	1866	4.3
1853	4.8	1860	4.3	1867	4.4
1854	4.6	1861	4.4	1868	4.6
1955		1969	45	1869	47

This comparison is still more favourable if we take into account that the present percentage of able-bodied paupers to the whole number of paupers, 16.8, is nearly as low as the smallest percentage of any year since 1849, viz., 15.6, and a good deal below the highest, viz., 21. It is a great evil that pauperism should be stationary, but even a stationary state in a country like England which has to contend against a constant drain through emigration upon its able-bodied labourers may mark a real improvement. We should not wish to enfeeble in the least the effort to root out pauperism, but those most earnestly engaged in it will least require the stimulus of the fiction that there is anything exceptionally novel and alarming in the figures of recent years.

Sir Edward Watkin, during his canvase in East Cheshire, has narrated an anecdote which seems worth preserving. It was used to illustrate the economy of the present Government, but perhaps it does more than that. It is to the effect that a friend of the speaker's, Mr Ashton, was some time ago engaged in the uphill work of canvassing the members of the Government to secure a grant of 30,000*l* or 40,000*l* for Owen's College, and while he was speaking with Mr Bright, Mr Baxter, the Secretary for the Admirality, came up, and the following conversation took place:--- "Mr Bright said-" 'Mr Baxter, here is Mr Ashton come up to ask for some " money for Owen's College.' 'How much does he want !" " said Mr Baxter. '30,000*l* or 40,000*l*, was the reply. " Give it him, give it him,' said Mr Baxter ; 'I have saved " double that to-day by a coal contract.'" The truth was, as

THE ECONOMIST.

1131

Mr Ashton found out on inquiry, that was one of the Admiralty extravagancies which Mr Baxter had been inquiring into, and his action regarding which generally he described in the House of Commons during the late Session. The point of the anecdote, however, is after all not economy, but the use of economy. Considering the claims of modern Governments it would be very foolish if they put all they saved in one way into the tax-payer's pockets and did not rather use the money to advantage. There are too many good works standing because extravagance on objects appa-rently indispensable leaves nothing for them, and as new taxet would not be advisable to meet these claims the only way to do so is by thrift. In any case whether new taxes taxes would not be advisable to meet these claims the only way to do so is by thrift. In any case whether new taxes are advisable or not it is clearly preferable to effect the object by thrift if that is possible, the gain through effecting the object of the new expenditure being then without alloy, or rather being enhanced by the presumably greater efficiency of the service on which thrift is practised.

We are glad to observe the Post Office announcement that on and after the 2nd of October next a supplementary mail will be made up for the East, to be despatched via Brindisi. The expectation is that the supplementary mails will reach Alexandria in time for the mails forwarded by Marseilles the previous evening, but it is explained that that mail will not wait for the Brindisi letters. This is in accordance with wais for the Brindisi letters. This is in accordance with Capt. Tyler's report which we noticed some time ago. The arrangements, though somewhat delayed, are "better late "than never." The new route will obviously be tested rigorously; and if it is found that letters and passengers punc-tually arrive at Alexandria, the gain in time by Brindisi will be manifest. The plan ought to succeed, and we hope it will be properly managed.

We are sorry to observe from the last report of the North British Bailway Company that it is apparently going to set the example of reviving the practice of extension which was the proximate cause of the recent and, in many instances, still-continuing embarrassments of railway companies, in-duding the North British Company itself. At the very time when, according to one paragraph of the report, an Act of Par-liament has been obtained for the abandonment of projects estimated to cost 676,000/, the directors propose a new project which will cost 350,000/. It is stated that the Company suffers great disadvantage from the want of direct access to Dundee and the North-Eastern districts of Stotland, and the project is in truth a *revived* one for a bridge arrows the Tay and a tunnel through Dundee. We have never been indiscriminate opponents of extension, which should always be decided on according to circumstances, but espe-cially when a company is in a state of embarrassment or only We are sorry to observe from the last report of the North alrays be decided on according to circumstances, but espe-cially when a company is in a state of embarrassment or only emerging from that state the necessity of the prospect of advantage should be very evident. That is hardly so in the case put forward for this project. The Company it is said already pay 20,000/ for charges affecting their traffic which would be saved by the bridge, but it would take nearly that sum to pay 54 per cent. on the new capital of 350,000/. This might be very satis-factory to those who are asked to supply the money, but the promised advantage to the Company is very little. It cannot matter to the ordinary shareholders whether they pay 20,000/ in the shape of charges or in the shape of interest on the in the shape of charges or in the shape of interest on the capital required for a new line to make them independent. That being so, and taking into account the risks of the estimate being so, and taking into account the risks of the estimate being so, and taking into account the risks of the estimate being so. mates being exceeded, the enterprise seems hardly a specula-tion which the Company should go into, notwithstanding the promise of a "great increase on the existing traffic."

An American traveller in England, describing his railway experiences in the New York Tribune, makes a statement which has some bearing on the supposed immunity from fatigue of travellers on the Pacific Railway. It would seem from the correspondent's statement that impres-sions derived from English railway experience, in-mend of being wide of the mark, would rather be an insufficient test of the fatigue of a long American railway journey. "Say what you will," says the correspondent, "of the arrangements of railroad travelling in "America, and especially of the convenience of baggage "checks, I cannot but give the preference to the English "system. At the end of the journey you feel far less nervous

" and weary than at home. The trip has been a positive " pleasure, instead of a worry and annoyance." We may be amused at the enthusiasm of the phrase about positive plea-sure, but if English railway travelling to our eyes does not deserve such language, what must American travelling be to induce Americans to use it ? The bolief is not quite unjus-tifiable then that the length of the continuous railway journey between the Atlantic and the Pacific is a heavy drawback on its compaction with other routes its competition with other routes.

The Indian Government has just taken a step illustrating the formidable difficulties of an alien civiliaing Government. The very success obtained in carrying out good intentions causes more work. Indirect injurious effects are produced, which are the more noticed on account of the profound peace imposed by our rule. The step to which we allude is that of appointing a Commissioner to inquire into the injury of Impointing a Commissioner to inquire into the injury of Indian fisheries by works of irrigation. Dr Day, the Commis-sioner appointed, had previously placed before the Govern-ment some interesting information regarding the Cauves river in Madras province, and fish ladders have already bes_ ordered for the irrigation dams; and it was the facts elicited in the preliminary inquiry which induced the Government to extend the appointment. It has been ascertained that near the rivers there is a market for fish, that high prices have resulted from the artificial scarcity caused by the interruption of the irrigation works to the caused by the interruption of the irrigation works to the migrations of the fish, and that there has been a loss to a certain branch of the revenue. Hence the necessity of prompt action on the part of the Government. The effect of the instruments of civilisation has no doubt been the same on home rivers, where the question of fishery preservation has become prominent; but the difference in India is that the Government must do everything, and must act without the advantage of information from those affected, waiting to be set in motion by some observant philanthropic servant like by Dr Day, so accustomed are the people to accept the acts of Government in silence. This is to carry on government under enormous difficulties, though greater energy and self-help on the part of the Indian people, which our rule must in time infuse, will assuredly bring difficulties of a different kind.

North British .- The surplus revenue for last half-year will admit of dividends on the preference stocks down to and incluadmit of dividenas on the preference stocks down to and ment-sive of Monkland Preference (Ordinary) stock, and to the extent of 17s per cent. per annum on the Edinburgh and Glasgow Preference (Ordinary) stock, carrying forward a balance of 129l. Ottoman-(Smyrna to Aidin).—The gross revenue has amounted to 36,530l, as compared with 22,217l for the corresponding

to 36,5894, as compared with 22,2177 for the corresponding period. The working expenses were 27,6951; net profit 8,8354, applied to the replacement of wooden bridges by stone and iron. The expenditure on capital account during the half-year was 16,5677 for additional rolling stock, 6,3641 on works specified by Gevernment, 2894 for additional land at Caravan branch, and 304 interest on shares up to the 31st of December, 1865—total, 23,2511. The rolling stock had been maintained in efficient order, and during the half-year six engines and fif.een waggons had been added in accounts to the 30th of June, 1868, to which date the amount due to the company was 178,4422. It would be remembered that the Government, when paying the com-pany 67,0001, stipulated that additional engine and rolling stock should be furnished within a period of four months, and that six months should be allowed the Government to examine accounts which were rendered in September in the new forms prescribed. months should be allowed the Government to examine accounts which were rendered in September in the new forms prescribed. All the stipulations, though very onerous, were fulfilled, but the council of administration regretted to state that no definite set-tlement had yet been arrived at. On the 21st of July Mr Cooke was officially informed that the Government had decided to pay to the company 135,000/ on account. Of this 50,000/ had been received in "mandats" payable in six months, with in-terest added at 12 per cent. per annum, and advices were daily expected of the payment of the remaining 85,000/. With regard to the distribution of the guarantee the new proposition was to the effect that out of the 135,000/ in course of payment, the first debenture-holders should receive 44,600/ for interest in arrear to the lat of May, 1869, at 6 per cent.; 49,560/ on account of overdebenture-holders should receive 44,600? for interest in arrear to the lat of May, 1869, at 6 per cent.; 49,560? on account of over-due principal (20 per cent.) For balance (80 per cent.) of ditto 100? reserved debentures. The second debenture-holders weres to receive, on account of bonds drawn, and interest in arrear to the 1st of May, 1869 (amounting to 116,000?), the sum of 40,840?; total, 135,000?. Of the 302,000? reserved debentures, 247,800? would be appropriated to paying the balance (80 per cent.) of the first debentures, and thus clear them off, and 52,800? in bonds for the contractors' debt, making the disposal together of 299,800? reserved debentures. There would still remain due from the Government about 138,000?, which, after payment of the balance (75,160?), to the second debenture-holders would be divisable among the shareholders. The capital account to the 30th of June last showed that 1,842,720? had been expended.

expended. Portpatrick.—A dividend at the rate of 11 per cent., free of income tax, is announced. Revenue receipts, 10,011/; expenses, 4,695/; net, 5,316/. Capital outlay, 533,722/.

EANKS. Chartered Bank of India, Australia, and China.—A dividend for the half year at the rate of 6 per cent. per annum, free of income tax, is recommended.

London Bank of Mexico and South America.—At the meeting the 5 per cont. per annum dividend was declared, free of tax. National of India.—The report shows an available total of 22,6971, including a previous balance of 3,0463 and recommends an interim dividend at the rate of 6 per cent. per annum, which will absorb 13,9200 and leave 3,7771 to be carried forward. The deposits held amount to 1,100,2281, an increase of 250,5981 on the corresponding date of last year, the reserve fund is 41,000, the linbilities on bills payable are 1,184,2814, and the paid-up capital is 464,0004.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

FINANCE, CREDIT, AND DISCOUNT COMPANIES. Mauritius Land, Credit, and Agency.—The annual report shows that the position has improved. Available balance, 5,3771. After payment of the interim dividend, 4,1271 remains, equal to a further 1s 6d per share, free of income tax; 1,0001 is written of preliminary expenses; 1,0001 is added to reserve (thus 3,5001). The investments have increased 19,6765.

ASSURANCE COMPANIES.

ce.-Mr Price has been appointed sole provi-Albert Insuran sional official liquidator.

European Assurance.—The market price of the shares has of late sustained a heavy fall. A short time ago a call was made upon the shareholders, and on Wednesday two petitions were heard before Vice-Chancellor James for a winding up. The case was ordered to stand over until next Saturday. Besides the annuity business, the outstanding policies are supposed to amount to between 9,000,000/ and 10,000,000/. The company has at various dates from 1849 absorbed 33 separate co

London Assurance Corporation .- The usual dividend of 25s par share is declared.

MISCELLANEOUS COMPANIES.

Austrian Debt-Conversion.—The Times states:—"According to the accounts of the conversion of the Austrian public debt the amount hitherto converted gives a total of 647,000,000 floring, of which England has contributed 80 millions, Hollard 300, South Germany with Frankfort 250, and Hamburg 17 millions. France has not yet sent anything for conversion, owing to a dispute on a question of stamp duty, amounting to 700,000 florins, which the French Government demand."

norms, which the French Government demand. Chartered Gas.—A distribution at the rate of 6 per cent per annum is announced. The new works are rapidly progressing, and it is hoped to bring them into operation by the end of the summer. The amalgamation with the City of London Company is still under the consideration of the Board of Trade. It is stated that 7 per cent. has really been earned during the half Is is half yes

Crystal Palace District Gas.—A reduction in the price of gas is to be made during the Christmas quarter. A new gasholder, 110 feet in diameter, is to be completed next year. The half-year's profits are 6,914/, which, with 214/ brought forward, amounts to 7,128/. The usual 10 and 7 per cent. dividends are announced, free of tax, the balance of "renewal suspanse" (1,023/) is written off, and a surplus of 179/ remains.

India, Australia, and China Submarine Telegraphs.—We are no quested to state that the list of applications for shares in the India, Australia, and China Submarine Telegraphs (Limited) will be closed on Saturday, the 25th instant, for London, and on Monday, the 27th, for the country.

Gloucester Wagon.-Trade has been slack, but the company has obtained some foreign contracts. Dividend, 10 per cent. per annum; reserves, 71,5204.

Metropolitan Railway Carriage and Wagon.—The Chancery suit with the London and North-Western respecting some car-riage works has been decided against the company, and they must take possession; but they think it would be advisable to riage works has been decided against the company, and they must take possession; but they think it would be advisable to advertise for a tenant. The year's net profit was 25,347. Dividend 71 per cent. 2,294/ was placed to redemption, 2,668 to depreciation, and 1,250l to contingent fund; surplus, 3,517l.

Midland Wagon.—The dividend was announced at the rate of 10 per cent. per annum. Business had been dull, and the demand much below the average. The time had arrived for considering the amount of depreciation to be written off the cent of wagons let on hire. The half-year's dividends absorbed 8,000/, and 500/ was added to the contingent fund; surplus, 12.032 12,0381

Muntz's Metal .- An interim dividend at the rate of 5 per cen per annum is announced.

Patent Shaft and Azletree.-Year's net profits, 51,293l, which, with the former balance, was increased to 57,419l. The divi-dend at the rate of 15 per cent. absorbed 40,447l; surplus, The divi-16,9721.

Virginia 5 per Cent, Sterling Loan.—A dividend of 2 per of is payable by Messre Barings on surrender of coupons due the 1st January.

MINING COMPANIES

Anglo-Brazilian.—The loss on July was 2601. Don Pedro North Del Rey.—The profit for July was 3,8584. St John Del Rey.—" Morro velho" loss for July, 2701; "Gaia" loss, 1441,

2,200,00,801 81 2,180,066,283 27 The augmentation of the discounts of the Bank last week was suribed to the demand for money which always arises for the 5th, settling day; but there is a new and still more important one this week-it is of not less than 24,234,000f; so that it may inferred there is an improvement in the "situation." Accom-mand bulkon, and it seems to prove that the need of gold in Now York, reported from London, has not yet made itself felt here. In the private deposits there is an increase of 24,356,000f, and in the circulation of notes a decline of 5,246,000f. The Bourse having ceased to feel alarm respecting the Em-mor's health has been disquieted by the allegation of certain optim of the treaty of Prague, to be admitted into the Northern Confideration, and that all forease new difficulties between france and Prussia. The statement however has not been con-timed. To-day the probability of an advance in the rate of dis-tount, consequent on the demand for gold for the United States, as been discussed. The following are the quotations of the week :-

manufacturing towns in the North and North-East of France to hear the grievances that are urged against the treaty with Eng-land and against the commercial reforms generally. It is to be hoped that he will not attach undue importance to the complaints made, and that he will remember that the interests of consumers of manufactured goods are entitled to more respect than those of producers, the latter being few in number, the former a multi-tude. The manufacturers of Alsace and the Vosges on their part are continuing their agitation against the admission free of duty of foreign tissues to be printed and then exported. From Remire-mont department of the Vosges a petition has been sent to the Emperor declaring that that measure is raincous to French in-dustry. The petitioners however affirm that "they do not ask for protection, and do not want it." but in reality what they demand amounts to this—that printers so hall be condemned to print only French tissues,—and if that be not protection to manufacturare what is it? The printers so designate it.

French tissues,—and if that be not protection to manufacturars what is it? The printers so designate it.
The Society of Political Economy in its last meeting discussed the complaints made by the growers of wool in France of the depressed state of their industry. M. Michel Cnevalier stated that the article had fallen to a low price, because since the cessation of the war in the United States it is in less demand as a substitute for cotton, and because the production of it in Anstralia, La Plata, and the Cape of Good Hope has taken great development. Those facts he said might be disagreeable to native growers, but they were advantageous to the public at large. As to the remedy the producers demand—protection against foreign completition—it was not, he declared, to be thought of. Two other speakers suggested that French agriculturalists could employ their lands more profitably than as grazing grounds for sheep. They admitted that the transition from one industry to another would present difficulties to the parties interested, but it should be undertaken. This wool question has also been treated in a spamphlet by a dealer at Marseilles, M. Caune. He comes to the subject was mentioned some weeks back—namely, that there should be regular auctions of wool at fixed dates in certain towns, and that producers should send their wool to them. In this way they would be certain of a salo, and certain also to get the market value of the day. At present they wit to be visited by people who buy up the wool in driblets, and they higgle and haggle with them for hours together. This antiquated mode of doing business occasions loss of time, and prevents the seller from getting a fair price for his goods. price for his goods.

because the second sec

Inter may need to be a stated in the Economist. Another affair is a maw bank, to be called the Credit Parisien, with the modest capital of 1,000,000f.
If it be true, as stated from London, that the loan of 100,000,000f which Portugual has long been trying to raise, is to be obtained in that eity, and that no provision has been made for satisfying out of it the claims of the French holders of Portuguese railway securities, great disappointment will be fall by these latter, and the Portuguese Government must be prepared to hear itself accused of injustice.
The amalgamation of the Mobilier and Immobiliere Companies was strongly recommended by the Messrs Pereire and others some time ago as the best means of escaping from the embarrassments that beset them. But objections wate raised to the effect that the union of two companies in distress could not make a good one; that the kinds of business of the two were incompatible, one being for banking and apeculation, the other for building nucles; that legal technicalities arising from one being what is celled "commercial," and the other a " civil " company would prevent a fusion; that such a measure by necessitating a change in the ownership of the houses of the Immobiliere would cause an enormous outlay for registration duties, and so forth. It appears, however, from what is said, that the directors of the two companies are seriously studying the means of effecting an analgamation between them, and that, aided by the ingenuity of lawyers, thay hope to elude legal difficulties. As to the incompatibility between the two they say that the object is not 'to continue their respective operations, but to wind them up on the best terms possible, and that it is only by the Mobilier taking the means and

THE ECONOMIST.

[Sept. 25, 1869.

liabilities of the Immobilière that the latter can avoid being made bankrupt, and so having its houses, &c., sold below their value. At the same time the Mobilier, an its principal creditor, has every motive to treat it as tenderly as possible. In case the amalgama-tion should be effected it is thought that the shares of the Mobi-lier would be admitted into the new company on the basis of 3757, and those of the Immobilière for 1257. But at present these figures are little more than conjecture.

The shareholders of the Société Générale expected that in virtue of the modification in the statutes recently voted by them they would receive in October 12f 50c, being 5 per cent. interest for the whole year, instead of as heretofore 6f 25c, the other half being paid in April with the dividend. But the 12f 50c could not be distributed for the reason mentioned in last letter—namely, that the Government has not yet approved of the said modifi-cation. entio

The Bank de Depots et de Comptes Courses announces that subscribers to the shares of the North-East Railway Company can only receive 62 per cent. of their demands, and sub-scribers to obligations 84.

scribers to obligations 84. The Messageries Imperiales is to pay from 1st October 15f as half-year's interest on the two series of 6 per cent. debentures; 12f 50c on the 5 per cent, ones; and 6f 25c on the 5 per cent, pro-visional bonds. It makes a new call of 125f on the provisional debentures.

The compon of the Italian Domain Obligations falling due 1st October is to be paid from that date by the Credit Lyonnais. Deducting the tax the amount of it is 11f and some frections.

The Company de Tonnage de la Basse Seine et de l'Oise is to pay 6f as interest on obligations from 1st October. The Company de l'Eclairage au Gaz et des Hants Fourneaux de Marseille, et des Mines de Portes et Senechas, is from 1st October to distribute 14f per share as balance of dividend of 1868. 1868.

The Company of the Markets (at Paris), called the Temple, and St Honoré, is from 1st October to pay 151 per share on ac-count of dividend of 1869.

count of dividend of 1869. The North of Spain Railway is to pay from 8th October 5f 6240 per obligation, according to the regulation adopted. At Paris the payment is to be made by the Credit Mobilier. The Federal Bank of Berne realised in the first half of the pre-sent year net profits of 225,000f, and they are to be distributed to shareholders from 1st October. The French Groversment has inst published a report on the

to shareholders from 1st October. The French Government has just published a report on the operations of the Colonial Banks in 1867-8, operations which, in addition to discount of bills and advances, comprised loans on de-posit of goods and on security of crops. The result of the year's business was that in Martinique only a dividend of rather more than 4 per cent. was earned, the preceding year having given one of more than 9 $\frac{1}{2}$; in Guadaloupe no dividend was obtained, though in the year before there was one of $6\frac{1}{2}$; La Reunion produced a little more than 5 per cent., a sum slightly inferior to that of 1866-7; Guania gave 8.31, a little more than 2 below the pre-ceding year; and Senegal produced 6, whereas 1866-7 only yielded 2.10. ceding year yielded 2.10.

yielded 2.10. According to an official return 230,536 tons of beetroot sugar were produced from the beginning of the season to the end of August, and the quantity taken for consumption, export, entrepots, &c., was 223,968. The entrepots, including stock in bond, re-ceived 210,797 tons, and sent away 207,094. In the corresponding period of 1867-8 the make was 250,500 tons. A return of the state of the works on the 15th August, issued by the Isthmus of Suez Maritime Canal Company, shows that the quantity of earth extracted during the month ending on that date was 1,548,206 cubic metres, leaving 5,103,169 cubic metres to be removed.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Co for Trade have received, through the Secretary of State for For Affairs, from Her Majesty's Charge d'Affaires at Madrid, a copy + Order issued by the Spanish Government on the 2nd instant, relati the importation of cereals into Spain.

The Right Honourable the Lords of the Committee of Privy C

The Right Honourable the Lords of the Committee of Privy Counsel for Trade have received, through the Secretary of State for Foreign Affairs, from her Majesty's Charge d'Affaires at Madrid, copy of a de-cree issued by the Spanish Government on the 17th instant, relative to the laws concerning anonymous companies in Spanish colonies. During the week ended Sept. 22, the imports of the precious metals were: -- Gold, 24:0.1564; silver, 105,3084. The axports were:--Gold, 512,5014; silver, 160,9564. It has not been practicable to obtain from all parts of England and Wales the information necessary for the completion of the agricultural returns for this year until the present date. With the view of making known as early as possible the chief results exhibited by the returns, the following particulars are furnished in anticipation of the returns in detail :---

THE ECONOMIST.

Advices with regard to the progress of the Suce Canal are to the offset that the Bitter Lakes had an the 5th inst. about 3:20 metres wanting to bring them up to the level of the Mediterranean. Hence, as they wanted on the 15th of August 5 metres to bring them up to that terel, it appears they have risen 1:80 metres in 21 days, being at the rate of about 9 continuers as day. It therefore now seems highly pro-bable that the Lakes may be filled before the 17th of November. The semplation, however, of the rest of the works in time for the proposed epsaing on that day is still considered in some degree uncertain. According to the accounts of the conversion of the Austrian public fields the amount hitherto converted gives a total of 647,000,000 florins, of which England has contributed 80 millions, Holland 300, South Germany with Frankfort 250, and Hamburg 17 millions. France has not dramed. The following is a return of the number of paupers (exclusive of imaties in asylums and vagrants) on the last day of the second week of September, 1869, and of the corresponding week in 1868 :--

Sankers' Clearing-house, Sept. 23, 1969. The return of the Bank of England shows a withdrawal of bullion to the extent of 212,8857. A more favourable feature is the increase in the discounts, which, although not large, evidences a more active trade demand. The reserve shows a decrease of 21,6851, but the proportion of the reserve to the liabilities is unusually large.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1859 :---

In 1859, the Bank rate of discount was 21 per cent. Large arrivals of bullion were announced, and the abundance of capital was demonstrated by the fact of three millions and a half of the new Indian loan of five millions being paid up before the second instalment fell due.

In 1866, large supplies of bullion were arriving from various parters. The Bank of Holland had reduced its rate from quarters. The Bank of Holland Inter readers 5 to 44 per 6 to 54 per cent., and the Bank of England from 5 to 44 per arters.

In 1867, the discount market was heavily supplied with money, for which there was very little demand. The amount of business passing in home stocks was limited, but foreign bonds were in improved request. The cotton trade was quiet, but wheat was rather more active.

but wheat was rather more active. In 1868, attention had been directed to the affairs of the Royal Bank of Liverpool. The Egyptian cotton crop was stated to be largely in excess of all previous seasons. Cotton and corn had ruled dull and drooping in value. The amount of the "other" deposits, as compared with the "other" securities, showed, in 1859, a deficiency of 6,097,938/; in 1866, a deficiency of 4,728,407/; in 1867, an excess of 1,797,586/; and in 1868, an excess of 3,201,485/. In 1869 there is an excess of 2,540,974/. In 1869, there is an excess of 2,540,2741.

In 1869, there is an excess of 2,040,2744. DISCOUNT AND MONEY MARKET.—This market is still very largely supplied with money, and the number of commercial bills offering is small; yet for two or three weeks past there have been signs of a coming advance in the discount rates. The movement being to a quite unimportant degree traceable to trade requirements, the inference would be that the same cause which even is an advance in the radue of money here in which gave rise to an advance in the value of money here in May last from the over-bought state of our foreign market is now again at work, but from the effects of a similar state of things manifesting itself on foreign bourses. The advance in now again at work, but from the effects of a similar state of things manifesting itself on foreign bourses. The advance in the Bank of Vienna rate of discount having been fol-lowed by a similar movement on the Bank of Holland is pretty good evidence of the correctness of this conclusion, as it is well known that at both these places speculation in foreign bonds, and in the shares of various undertakings, has been carried to a dangerous extent for a couple of years past, owing to the stagnation in the ordinary channels in which capitalists expect to find employment for their money. As experience has shown on this money market it is the unex-pacted demand for means of remittance which in such times as these signifies the export of the precious metals, combined with rapid realisations simultaneously, that tightens the money market and causes an advance in the rates of discount. It does not however follow that the supply of money throughout Europe

te

be d

ei

is on the decrease. It would seem on the contrary that upon the adjustment of differences as between one market and the other the stagnation in the various money markets for the moment disturbed will continue yet for some time. The open market rate having advanced to the Bank minimum, a better demand has been experienced at that institution, and should the export of gold to America continue upon the present scale the question of an advance in the terms will on be a matter for serious consideration.

Upon the Stock Exchange the supply of money is some-what curtailed the last day or two, and the terms are 2 to 21 per cont. for short loans against Government security.

The current quotations for mercantile paper having various

ENGLISH GOVERNMENT STOCKS .- Since we last wrote the tendency of the Government funds has been in the downward direction, influenced by various adverse circumstances. Sales of foreign stocks to a more or less considerable extent have been going on in this market on continental account since the first agitation on the Vienna bourse, causing a certain degree of sympathetic depression in higher-classed Go-vernment guaranteed securities. The tendency of the disvernment guaranteed securities. The tendency of the dis-count rates in the general market having been lately in the upward direction since the demand for gold for the Continent has been of a somewhat continuous nature has exercised a prejudicial influence, and the withdrawals of gold latterly on American account suggesting the probability of a rise in the Bank rate caused Consols to recede yesterday to 92% to 92%. To-day the uncertain advices from the Continent have failed to bring a reaction, and Consols close dull at 92% to 92% for money, and 92% to 92% for the account. FOREIGN STOCKS.—The statement of Count Cambray Digny

upon the Grist tax can hardly be looked upon as a satisfactory proof that an equilibrium will be established for the future between revenue and expenditure. The Count says :- " Although the Revenue Budget of the current year be unsatisfactory, there is no ground for uneasiness for the future. The Government has only to pursue the course marked out for as only to pursue the course marked out for them in order to obtain from the Grist tax the sum neces-sary for securing an equilibrium of the Budget, which it would be impossible otherwise to obtain." Considering the disturbances that have already taken place, the heavy way in which the people are taxed, the fact that the later loans have been raised for the purposes of war, and are consequently the reverse of reproductive, one can but think that the Minister is over-sanguine.

The caution which we referred to last week as charac-terising the attitude of operators in this market has by degrees emerged from a passive into an active state as the threatening adverse influences have come into play. It would seem that the illness of the Emperor Napoleon was to be the incident in the first place which was to test the soundness

from a financial point of view of the various European bourses. When once a weak point is discovered, as the other day at Vienna when the momentary delay in meeting acceptances being asked by a house of position led to heavy withdrawals of cash deposits from various institutions by a large banking commit is astonishing how rapidly the alarm spreads. The firm, it is astonishing how rapidly the alarm spreads. The existence of a similar state of credit-tension at Amsterdam, as was lately discovered at Vienna, has led to an advance in the Bank of Holland rate of discount, and considering the state into which matters have drifted between the United States and Spain the fall in the exchange and efflux of gold from this side, unless considerable discretion is exercifuture seems to bode ill for those who are beyond their depth in foreign bonds.

Egyptian securities show a by no means satisfactory strength, and it would seem that the Sultan has already allowed the Viceroy to taste too much of the independence which has given Vicercy to taste too much of the independence which has green rise to the existing jealousy to make it quite certain that the position as defined by the Firman of 1841 can be to the letter returned to. Evidence of this is to be found in the telegraphic assertion from Alexandria that the Vicercy has countermanded the preparations for his departure to Constantinople.

The sudden advance in Brazilian and Argentine bonds on the favourable news relative to the Paraguayan war was partially lost subsequently on realisations.

To-day this market was adversely influenced by low prices from Paris; it was however rumoured that any dif-ference that may exist between the Sultan and the Viceroy of Egypt will be satisfactorily settled in the course of a few days. This caused a slight demand for the Egyptian Seven

b) Egypt win be seemated in the bound of the Egyptian Seren days. This caused a slight demand for the Egyptian Seren per Cent. Loan of 1868, which was at the close of business 75 to 75¹/₂, having been previously offered at 74²/₃. Subjoined are the closing prices of stocks dealt in te-day:—Argentine 6 per Cents., 1868, 80¹/₄ ¹/₄. Brasilian 5 per Cents., 1865, 83¹/₄ ¹/₄. Chilian 7 per Cents., 1866, 101³/₅. The series of the payment of lands will be obtained. Hardly a day has passed for some time without this stock was altogether the period of the payment of lands will be obtained. ment was altogether erroneous, there can be but little doubt that all but a very few of the original holders have transferred their interests ; and like all securities which are raised to fictitious values by sanguine and over-wrought expectation, Metropolitan stock has so far been the reverse of a sound and reliable investment. The large decrease in the Brighton reliable investment. The large decrease in the Brighton traffic, and a heavy fall in South-Eastern Original further depressed the market. To-day the only especial feature has been a demand for Metropolitan, which on influential pur-chases has risen to 88¹/₂ to to 88³/₂.

Subjoined is the usual list of the closing prices of the prin-cipal railway shares last Friday and this day :---

The rise in gold (about 7 per cent. during the last week) in New York has necessarily exercised an adverse effect on American securities, which have fluctuated to a considerable extent. The 5-20 Bonds of 1882 have commanded as usual extent. The 5-20 Bonds of 1882 have commanded as usual the most attention, and have been negotiated as low as 82; the closing quotation this evening however showed more strength at 82§ to 82%. Erie shares have been influenced by enormous speculation, principally carried on in the London market. Heavy sales to realise and a fall in New York have caused a reaction from the highest point attained, but the price to-night was very firm, at 25§ to 25§. TELEGRAPH SHARES.—The number of messages sent by

the French Atlantic cable during the week ending Sept. 18 was 547, yielding 1,3234. The amount of business has been very small, with little variation in prices, the attention of operators being principally directed to the American and Foreign markets.

BANKS.-These shares have been somewhat neglected, con-sequently exhibit little alteration. Anglo-Austrian and Anglo-Hungarian have however been pressed for sale, and show a fall, the latter of 2 and the former of 3 per share.

MISCELLANEOUS SECURITIES.—Transactions have been re-stricted in this class of security, and with the exception of Hudson's Bay shares, which are 2 better, without material alteration.

EXCHANGES.—The exchange is quoted nominally 104 from New York, the fall having exceeded in suddenness and extent even our anticipations, and somewhat perplexed the financial houses. In other respects we have scarcely any variations to record. The rates on Austria and Italy which last week were subject to strong fluctuation have this week been almost quiescent. We quote the rate on Madrid 481 as against a last week, and a rise of 1fl in long Amsterdam. The and for bills is slight.

BULLION.—The following is from Messre Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

the week :--Gold.-As we anticipated last week, further withdrawals have taken place from the Bank, not only for the Continent, but also for the United States, where the deeline in the rate of exchange is likely to cause con-siderable shipments from here. The arrivals comprise :--10,190, per Bangalore, from Alexandris : 20,000, per City of London, from New York : 4,000, per Hansa, from New York : 2,500, per City of Wash-ington, from New York; 67,000, per Yorkshire, from Melbourne : 33,000, per George Thompson, from Melbourne : 59,000, per City of Brussels, from Brazila-total, 195,690. The shipments have been :--28,800, per Ceylon, to India; 71,000, per Main, to New York : 234,000, per City of Brooklyn, to New York-total, 338,800. About 75,000 sovereigns have been sent into the Bank, and about 236,000, chiefly in coin, has been withdrawn for America.

Silver.—The Ceylon has taken 49,300/ to India, and the Shannon 7,200/ to India. The demand has slightly increased, as the amount of Council drafts on India will be decreased on the 29th inst. The price remains firm at 60jd per oz standard.

Mexican Dollars.-The Ceylon has taken 25,370' to China; the de-nand is however but slight, and the price remains as last quoted, 59d per oz.

Exchange on India for Banks' drafts at 60 days' sight is is 11 7-16d to is 11 1 do an all three Presidencies.

India Government Loan Notes remain as last quoted by us, vis., 92 to 92¹/₂ for the 4 per Cents.; 105¹/₂ to 106 for the 5 per Cents.; and 110¹/₂ to 111 for the 5¹/₂ per Cents.

110j to 111 for the 5½ per Cents. Quotations for Bullion.—Gold—Bar gold, 77s 9d per cs std; ditto fine, 77s 9d to 77s 10½d per cs std; ditto refinable, 78s 9d per cs std; Spanish doubloons, 75s to 76s per cs; South American doubloons, 73s 9d to 74s per cs; United States gold coin, 76s 9d to 76s 4d per cs, none hero. Silver—Bar silver, fine, 5a 0½d per cs std, nearest; ditto, sun-taining 5 grains gold, 5a 0½ per cs std; fine cake silver, 5s 5½d per cs. Mexican dollars, 4s 11d per cs, quiet; five-frame pieces, 4s 11½d per az. Quicksilver, 64 17s per bottle; discount, 3 per cent.

The amount of the India Bills at the next biddings at the Bank of England will be 200,000l only.

The fight of the board at height the products of the order during the fortnight, 10,000 bales. We extract the following from Messrs W. Nicol and Co.'s cir-entar, dated Bombay, August 24:-Since the issue of our last circular there has not been a single transaction in ready cotton in this market, and prices remain nominally unaltered. Our stock is now much reduced and of inferior quality, and we cannot therefore expect to see any reaction from the present state of atag-nation until the balance of the old crop begins to come to market in October, by which time also the first of the new crop will be mar at hand. The monsoon continues favourable to the growing crops, and reports from all quarters are most encouraging. Time bargenets of a large yield, and new Oomrawuttee is now selling at a decline of 15 rs to 20 rs per candy from our quotation of last week; in other descriptions we have not heard of any business. In the Dharwar districts there has been renewed excitement and the ative buyers, and prices of Dharwar and Compta have advanced to 330 rs per candy for the former and 305 rs the latter, delivered f.o.b. at Carwar, October and November. Exronr of Corrow from Boamar to Ang. 23. 1869. 1868.

Means E. B. Liddell and Co., of Alexandria, have furnished the following report, dated Sept. 11 :-- Cotton-The state of depression noticed in our last of Srd inst. has continued to inapresses and buyers having almost generally retired from the market, our present quotations can be considered little more than nominal, at 1d decline on the week :- Fair open, 131d to 131d, a and f., per lb; good fair, 141d to 151d, ditto. Some small amples of the new crop have already appeared, judging from which the quality would seem to be superior to that of 1868-1869. EXPORTS.

From 3rd to 11th Sept., 1869 From 1st Nov., 1868, to 3rd Sept.,	Great Britain. bales. 1,112	Continent. bales. 269	Total. bales, 1,381

The public sales of tea have	gone off	without animit	and the

and so are the Tren Derosne sugars of good quality. The stock between here and Matanzas amounts to 263,256 boxes, against 275,799 boxes in 186e. Molasses sugar abundant and in little demand. We quote for Nos. 8 to 10 in boxes 6 rs to 64rs, equal to 19a 3d to 20a 5d, and in hhds 64rs to 7 rs, equal to 18s 3d to 19a 5d, at 16 per cent. premium, f.o.b. Muscowado sugars ex-perienced a good demand here and at outports, and would have been deen dealt in more largely but for the scarcity of vessels. The better kinds of refining sorts are scarce, whilst the lower ones continue abundant. We quote :--Common to ordinary re-fuing, 19s 5d to 20a; fair to good refining, 20s 7d to 21s 9d; grocery, 22s 4d to 23s 11d-at 16 per cent. premium, f.o.b., per cwt. Centrifugal Muscowadoes were in good demand throughout the month, at from 8 rs to 84 rs for No. 12, according to quality and colour. and colour.

1141

The annexed is dated Bahia, Aug. 28 :--Sugar market has been less active ; sales amount to about 1,100 cases and 1,000 bags regular browns at 3,500 rs to 3,580 rs per arrobe, equal to 22s 3d to 22s 6d per cwt. In Nazareths nothing done, and we quote nominally 2,800 rs to 2,900 rs per arrobe, equal to 18s 7d to 19s 1d. Stocks to-day-3,581 cases 250 boxes 636 barrels 17,601 bags, or 3,790 tors, against 2,842 cases 193 boxes 310 barrels 13,160 bags, or 2,911 tons hast year.

Fine qualities of Ceylon coffees have sold at an advance of fully is. per cwt, and other descriptions have maintained late rates with a steady inquiry.

with a steady inquiry. The annexed report, dated Aug. 21, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo :--During the fort-night since the last mail left two vessels have cleared for London, 1 for Mauritius, 1 for Sydney, and 1 for Bombay, the three former with full cargoes of Ceylon produce, including 21,425 cwts of plantation and 9,191 cwts of native coffee, bringing up the total exports of the season to date to 969,615 cwts, as compared with 921,487 cwts at the same period last year; but the increase is entirely in plantation sort, the shipments of native indeed being 20,000 cwts less than the previous season. on tio Re The star

sales, is fully up to that of previous years, and the condition and care displayed in many cases evidence increasing attention to the details of management. Some considerable parcels of Natal pro-duction have commanded relatively very full rates, in consequence of their superiority in staple as compared with the shipments of the neighbouring Cape colonies; but the washing, classification, and packing of these wools are susceptible of very great improve-ment. The quantity of Cape Angora hair offered has been very insignificant; the present value however of the article should give encouragement to shippers, the recent sales of Tarkey having maintained the extreme rate of Ss 11d per lb. The result of the series cannot bat be regarded with the greatest satisfaction by all sections of the trade; for though the improvement in the market has somewhat exceeded general anticipations, and, indeed, would appear to be *quite* as important as is warranted by the present sterm to the long-continued course of depreciation which has a term to the long-continued course of depreciation which has a source of lows and embarrassment alike to grower and manufacturer. is fully up to that of previous years, and the condition and manufacturer.

Measure A. C. Stewart and Co., of Port Elizabeth, writing on the 15th ult., remark :- The wool season being over, there is but little wool coming from the country, and transactions will be limited until October, when our next season begins. Good parlimited until October, when our next season begins. Good par-cels of grease and anow whites fully maintain the quotations given in our last circular, while inferior and seedy wools cannot be sold. Our quotations at this data are:-Grease-Full grown, long, clean, 43d to 54d; fine, light, for scouring, 44d to 44d; inferior, heavy and seedy, 3d to 34d. Fleecewashed-Superior, clean, iong stapled, 74d to 84d; good average, 7d to 74d; inferior and seedy, 54d to 64d. Snow-white-Prime, 134d to 144d; seedy, 9d to 104d. Since our last the only clearances have been :--For London; S.S. Borneo, 2,228 bales; S.S. Northam, 2,558 bales. For Falmouth, for orders: Rosario, 1,120 bales. The annexed is dated New York, Sept. 10:--The money market

beles. For Falmouts, for orders: Rosario, 1,120 bales. The annexed is dated New York, Sept. 10:—The money market has showed a somewhat singular and unexpected activity, not to say stribgency, during the past week. The rate on call loans, from being 6 to 7 per cent. last week, has ranged between 7 per cent. in currency and 1-16 per cent. per day, a large proportion of the business having been done at 7 per cent. in gold. At the close there is an easier feeling on call loans, and after back hours to-day money was loaned at 6 to 7 per cent. The stringency in discounts has been aggravated by the artificial pressure above noted. The purely commercial banks have extended their dis-counts as far as possible, while other banks are employing their means almost entirely on call, the result being that it is difficult to get the best names discounted within the nominal range of 9 to 12 per cent. Time loans on collaterals have been made at the rate of $\frac{1}{2}$ per cent. Additional to the legal rate for 30 days, and 1 per cent. for 60 days, or equal to 13 per cent. per annum. The tone of the dry goods' market is decidedly strong and healthy, and jobbers and sgents are feeling in much better spirits. Prices, as a rule, remain firm at former quotations, although prints have been an exception to this, as we noticed last week. The advance in them each days are the more the been spirits. Prices, as jobbers and sgents are feeling in much better spirits. Prices, as a rule, remain firm at former quotations, although prints have been an exception to this, as we noticed last week. The advance in these goods does not appear to have worked so injuriously in checking cales, as many feared that it would, for they are still taken freely and prices remain firm. The chief activity of the market is more noticeable in prints, domestic and foreign dress goods, and in woollens, than in the staple brown sheetings and other cottons. The latter were purchased in large quantities a few weeks ago, when the low freights offered great inducements to ship goods to distant points, and are therefore in less demand at present. at pre

THE COTTON TRADE.

LIVERPOOL,-SEPT. 23.

LIVERPOOL.—Surt. 23. The cotton market opened with firmness on Friday, but be-came dull at the close, and on Saturday the demand was limited, with much heaviness. On Monday there was great irregularity and depression in prices, with a very small business, but on Tues-day afternoon considerable purchases were made by exporters at very low rates, and the sales have since been rather larger, with more regularity in prices, but the quotations still show a decided decline. In Sea Island the medium grades have de-clined 1d to 2d per lb in the last two weeks. American has been pressed upon the market, and has fallen fully \$d per lb. New York advices to the 23rd instant quote middling 29 cents, which, owing to the low rate of exchange, costs to sell in Liver-pool 12\$d per lb by steamer. Brazil has been neglected, and being freely offered has given way fully \$d per lb. For Egyptian prices are irregular at a decline of \$d to 1d per lb, the better qualities being almost unsaleable. The supply of East India offering having been much in excess of the requirements prices have ruled very irregularly, the quotations exhibiting a decline of about \$d per lb.

D

new merchants, May, June, and July sailing, 9gd; Oomraw May, 9gd; August, 9gd; Bengal, fair new merchants, sailing, 8gd per ib. The sales of the week, including forwarded, amount to a

0 56,230 bales, of which 11,040 are on speculation and 17,100 deels for export, leaving 28,090 bales to the trade. 24rH SEPT.—The sales to-day will probably amount to ab 8,000 bales, with a steady market. PROFES CHEPERS

NEW YORK.-SEPTEMENT 10. NEW YORK.-SEPTEMENT 10. By special telegrams received by us to-night from each of the receipts, exports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Sapt. 10. From the figures thus obtained it appears that the total receipts for the seven days have reached 12,351 bales, against 5,971 bales last week, 1,818 bales the previous week, and 1,361 bales three weeks since. The exports for the week sading this evening reach a total of 494 bales, of which 419 bales were to Great Britain and 75 bales to the continent, while the stocks at all the ports, as made up this evening, are now 12,906 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last means, as telegraphed to us by our own correspondents at the various ports to-ungits:--

RECEIPTS AND THE CBOP. - We have a farther large increa this year.

The exports of cotton this week from New York show an increase from last week, the total reaching 2,148 bales, against 1,256 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1868; and in the last column the total for the same period of the membrane.

THE ECONOMIST.

Sept. 25, 1869.

The following message has been received by Messrs Stokes, M'Haffie, and Co. :--"NEW YORK, Sept. 22.-Four days' receipts of cotton are 23,000 bales, against 15,000 bales in the four days last week. The total receipts for the corresponding week last year were 30,000 bales. Exports to Great Britain, 1,000 bales; to France, 1,000 bales; to Continent, 100 bales. The quotation for Middling Orleans, laid down in Liverpool, with all charges, is 124d Middling Memphis, 124d. Middling Savannah, 12d." The above quotations all include an allowance of 6 per cent. for loss in weight.

MARKETS IN THE MANUFACTURING DISTRICTS

counts from the manufacturing districts must be regarded as tolerably satisfactory on the whole. The wool trade, owing to the increasing firmness in the demand for woollen goods, has ruled fairly active, though the recent improvement in the prices has not been maintained. Hardware goods of all kinds have met a steady inquiry at late rates. Goal and iron have sold freely on a steady inquiry at late rates. Goal and iron have sold freely on former terms, but considerable depression still exists in the cotton goods' market, notwithstanding the recent reduction in the quotations.

quotations. Maxchester, Sept. 23.—This market has continued very quiet throughout the whole week. Yesterday and to-day there was perhaps rather more disposition to do business; the offers, how-ever, were generally too low, and the few sales effected were at the very lowest point, and at prices which were hitherto refused. The large buyers for the East still keep out of the market, and though production of late is again lessened, stocks are on the in-crease, and hearly all orders are running out. Short time and closing of mills will likely be the result if the present depression continues much longer. continues much longer.

BRADFORD.-The business doing in wool to-day is still of a hand-to-mouth character. The transactions are still almost wholly confined to bright-haired wools and the better classes of whoily confined to tright-haired wools and the better classes of hogs. Good North country wools are also in moderate request. But comparatively little is doing in the middle and lower qualities. The wor-ted yarn trade continues very dull and innoimate. Ex-port merchants buy very sparingly, and show no disposition to speculate. The demand is for immediate consumption. There is great torpor in the piece trade, and the demand for all quarters is r duced to the lowest point, and yet prices are pretty firmly maintained.

ROCHDALE .- The flannel trade keeps some what dull, considering the season of the year, buyers purchasing winter stocks with great caution, and not in large bulk. There was no improvement in the demand for Yorkshire goods. Wools are in moderate request, but the demand is scarcely so active as we lately had to report. The prices of flannels and the raw material present no change e last week.

LEEDS .- The markets in the cloth-halls have presented nothing very important, either as to the number of buyers, the amount of business done, or the kinds of goods which changed hands. With the exception of some classes of fancy tweeds, there is no scarcity the exc of stock to satisfy the demand. The prices of wool, woollen yarn and goods are alike firm. The flax trade here keeps somewh

and goods are alike firm. The flax trade here keeps somewhat quiet, but the prices of threads and yarns are steady. LETCESTER.—No new feature has arisen in the wool market to disturb the torpor which has prevailed for the last few weeks. Only choice sorts are in request, and for these staplers are not able to realise remunerative prices. Worstead yarns are still heavy of sale. The improvement in the state of the hosiery trade has been partially lost. There is a steady business doing in the boot and shoe trade. NEWCASTE-ON-TIME.—Notwithstanding the improved tone in Newcaste produce in general, chemicals have not made such pro-gress as was anticipated, and with the exception of perhaps bleaching powder and sulphate of copper all articles remain languid.

languid. CARDIFF.

languid. CANDIFF.—The steam coal trade has, to some extent, been interfered with by the adverse winds and heavy gales which have prevailed. Steam coal proprietors and shippers have a fair amount of orders on their books, and prices have a tendency to improve. The house coal trade is not characterised with any degree of briskness, but the near approach of the winter season will, no

doubt, speedily cause an increase in the demand. The iron trade has not materially altered its position during the past week, considerable activity being evinced at the rail mills.

DUNDEE .- The demand for flax on the spot is very weak DUNDER.—The demand for flax on the spot is very weak, except for the better descriptions, which are rather scarce. As consumers expect to get better quality when the new crop comes forward, they wish to keep their stocks as low as possible, and only buy such smalllots as they require for immediate use. There has lately been an improved demand for tows of fine and mediam quality, and prices are pretty well maintained. Jute has become quieter, and consumers hold back, in expectation that a continuance of large shipments will cause prices to give way. The demand for flax yaras continues very inanimate, and prices are consequently rather irregular. Tow yaras continue to more off at previous prices, but the demand is scarcely so brisk as it was a short time ago. Jute yaras are steady, and prices are unaltered. unaltered.

BELFAST .-- Flax-The markets continues to be tolerably will supplied, and the demand is generally active, at firm prices. For yarns the demand is still inactive, and transactions during the past week have been restricted. In linens the principal business past week have been restricted. In means the principal business transacted was in coarse numbers. Tows have been selling at prices previously current. Stocks have slightly increased. A fair but not active demand exists for heavy linens; prices are steady, and stocks show a slight increase. Some improvement is reported in the demand for good makes of cloth for dyeing and hollands and roughs; prices unaltered.

HUDDERSFIELD .- The attendance of buyers has again been very small for the home trade, although there has been rather more doing on Australian account in the shipping trade. During the week there has been rather more doing in overcoatings for the country trade through local houses. There has only been a q business doing through the week in the local wool trade n s qui . 110 especial inducement to speculate presenting itself to our manufac-turers just now. Employment throughout the district continue generally satisfactory.

WOLVERHAMPION.—The ironmosters continue to receive a continuous supply of orders for general makes of iron, the only branch which is positively flat being plates. The depression in the shipbuilding trade partly accounts for this, but the Tees district is a great competitor in this article.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS

NEW YORK-SEPT. 10. NEW YORK-SEPT. 10. The market has been quite irregular, the fluctuations being very eccentric. Flour has ruled rather dull; shippers early in the week reduced their bids for extra State to \$6.50, and would pay no more, but were not able to buy exceept at 10c to 15c adrance on that figure. They took some extra round hoop Ohio at \$6.55 to \$6.80. The medium winter wheat extras, such as depend on a rule depend have been dull and haver. but flours from same to \$6.80. The medium winter wheat extras, such as depend on a trade demand, have been dull and heavy; but flours from spring wheat of all grades show an improving tendency at the close. Family flours are dull, and all Southern flours are neglected. Re-ceipts are small for the season, but there is no disposition to anon-mulate stocks in store. Wheat has come forward more freely, and the downward tendency noted in our last as resulting from the difficulty of receipting exchange continued until ambre and the downward tendency notes in our list is resulting from the difficulty of negotiating exchange continued until amber winter sold at \$1.53 to \$1.55, and No. 2 spring at \$1.45 to \$1.48 on Tuesday last; but since that date, in the face of dull accounts from Liverpool and lower gold, there has been a recovery of Se to Se per bushel. The advance to-day was 2c per bushel, and was partly due to the necessities of shippers in meeting freight engagements. No. 2 spring closed nominal at \$1.48 to \$1.52, as in quality. Corn has arrived in quite liberal quantities and at the was partly due to the necessities of shippers in meeting freight engagements. No. 2 spring closed nominal at \$1.48 to \$1.52, as in quality. Corn has arrived in quite liberal quantities, and at the close had declined 5c per bushel from the highest price of the week. The prospect of a full supply for the balance of the season may now be considered as very good. Oats, like core, have arrived more freely, but have been very sparingly offered, and by this means prices have been maintained. Rye remains nearly nominal. Barley has not yet arrived in sufficient quantities to establish prices; two car loads of State were forced on sale at \$1.18, but our quotations more nearly represent the market. Barley malt unsettled. Our higher figures for prime old Canada peas remain nominal.

LONDON MARKETS.

STATE OF THE CORN TRADE DURING THE WEEK. MARK LANE, FRIDAY EVENING.

Farmers have shown very little disposition to forward their to market, and but little progress has been made with breaking operations. Harvest labours have been greatly retarded by the recent boisterous weather, and a considerable quantity of main is still out in the fields. It is asserted that a fifth part of the Soutch barley and out crops are yet uncut. Nevertheless the at bulk of the new produce has been secured in excellent order, is found to be very suitable for milling purposes. Trade he ruled dull throughout the country, and an average decline of 1s to 2s per quarter has taken place in the quotations from both old and new wheat. The downward tendency has been further influenced by the continued large arrivals of grain-laden mult off the coast. As however the quantity of produce sage has been greatly reduced by these importations, this en pr is likely to produce considerable firmness later in the season. The samples of barley on offer have not been uniformly good, much of it being thin and of inferior colour. Malting descriptions have ruled firm, but other qualities have given way 6d to Is per quarter. Oats have declined to a nearly similar extent; but beans and peas have been scarce, and have commanded late rates.

Very little change is apparent in the foreign grain markets. There have apparently been but few operations in new wheat for shipment, though it is now offering in considerable quantities. The American wheat crop is evidently a large one, and we are promised extensive supplies from that quarter.

The American wheat crop is evidently a large one, and we are promised extensive supplies from that quarter. Mr Geo, Dornbusch thus reports the state of the floating grain mysels have arrived at ports-of-call-wize, 21 wheat, 17 maize, 2 bens, and 2 linseed. The floating grain trade has this week term inactive. Wheat slow sale at 1s 6d to 2s 6d reduction, ex-terms of the source of the floating grain trade has this week term inactive. Wheat slow sale at 1s 6d to 2s 6d reduction, ex-term inactive. Wheat slow sale at 1s 6d to 2s 6d reduction, ex-term inactive. Wheat slow sale at 1s 6d to 2s 6d reduction, ex-term inactive. Wheat slow sale at 1s 6d to 2s 6d reduction, ex-term inactive. Wheat slow sale at 1s 6d to 2s 6d reduction, ex-term inactive. The rye the trade is at a standstill. The major flow source as follows:--Wheat-25 arrived cargoes: Mrianopoli, 50s 6d to 52s; Berdianski, 46s; Ghirka Taganrog, 4s to 45s 6d; Sarotoff, 46s 9d; Don Ghirka, 46s 6d to 49s 3d; Yaiak, 4s 6d; Sarotoff, 46s 9d; Don Ghirka, 46s 6d to 49s 3d; Yaiak, 6s 6d; Ghirka Odessa, 49s 4jd to 50s 9d; Banat, 45s; prived cargoes: Galatz, 51s 3d to 32s; Moldavian, 30s to 31s; Rabova, 30s 9d to 31s 4jd per 492 1bs; Danubian, 29s 6d to 30s 6d; Walachian, 29s 3d to 30s 1jd; Bulgarian, 29s 9d to 30s 3d; Walachian, 29s 3d to 30s 1jd; Bulgarian, 29s 9d to 30s 3d; Walachian, 29s 6d; Italian, 28s to 31s 6d; Silonica, 28s to 29s 6d per 480 1bs. On passage: Danubian, 30s to 31s; ditto to be hipped (over 45,000 quarters), 32s per 480 1bs; Linseed-Daring the Atow on passage and for shipment at 1s advance on the week. COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK. BEFORT OF THIS DAT'S MA

MINCING LANE, FRIDAY MORNING.

Minorse LANE, FRIDAT MORNING. SUGAR.—The demand has not improved, and prices have experienced some further alight decline upon the lower qualities. West findia meets with a limited inquiry influenced by the dulness of refined, and the sales to yesterday did not exceed 1,000 casks. Barbadoes by anotion, 32s 6d to 38s 6d; grainy, 41s 6d per cwt. A few floating cargoes of foreign have sold for the United Kingdom. Unclayed Manila is rather cheaper, and several parcels have sold. The landings last week were 5,900 tons, and the deliveries for home use retain the late improvement. At the close of last week the stock was 80,820 tons, against 76,950 tons and 103,970 tons in 1868 and 1867 inclusive. The Dutch Trading Company's sale of Java has gone rather higher. Foreign.—A few sales have been made in Porto Rice on former

Foreign.—A few sales have been made in Porto Rice on former terms by private contract. 345 cashs 65 barrels by auction part sold at 33s to 33s 6d for brown to middling yellow. A floating cargo of Hawana sold for the United Kingdom, No. 114, at 23s 6d; 104, 28s. Two of Ouba: Mascovado, 26s to 26s 6d; with some clayed at 28s 6d; one of grainy at 27s per cwt. 25,000 bage unclayed Manila have sold on the spot at 27s 6d to 28s 3d per cwt.

Refined.-The market continues quiet, and prices show a slight decline for the week.

MoLASSES .- About 400 puncheons St Kitts have sold at 16s 6d per owt.

Cocoa.—Trinidad has been firm, with business by private contract. At auction 1,291 bags Trinidad chiefly sold at full rates ranging from 50s to 92s for low to fine, with a few lots 107s to 115s. 490 bags Grenada sold at 45s to 47s; a few lots good, 49s to 54s. 222 bags Guayaquil and 77 bags Surinam were withdrawn.

Rum.-The late advance is maintained, and the market has been irm; 60,000 gallons are required by the Government. Sales reported a Jamaica at 35 7d to 4s 3d per gallon. Leewards have sold at 2s 2d o 2s dd par proof cutoff and the sold at 2s 2d of the sold at 2s in Ja

The Tiss Tong Ti

SHRILAC.—The market is quiet. 780 chests by auction part sold at Inst week's prices. MERALS.—The only change of importance has been the speculative demand for tin. Straits have advanced in price, selling at 181s to 181s 6d, and to arrive, 180s to 180s 6d. No obange in British. Banca is dearer in Holland. Spelter remains quiet. Common plates nominal, at about 200. Scotch pig iron has not quite mnintained last week's ad-vance, being quoted 52s 9d cash. Copper remains unsettled, as the ship-ments do not fail off. Chill bars quoted 677 to 68/ per ton. The quo-tations of British are unsettled. No alteration in other metals. JUTE.—Sales of moderate extent have been effected by private con-tract. At auction, on Wednesday, 3,874 bales were chiefly withdrawn, a small portion selling on former terms, from 15/ 10s to 20/ 10s per ton. Hear, --Russian has been in rather limited demand. Petersburg clean, 34/ to 354. Manila steady, with few sellers, unless at some further advance.

furth r advan

further advance. Litresze.—The market is firmer. Several cargoes of Black See, off the coast, have sold at 57s 6d to 57s 9d; duty shipments at 58s to 58s 6d. Calcutta quoted 62s 3d to 62s 9d per quarter. Otra.—Olive has continued dull. Mogadore, 51/ 10s to 51/ 15s. Sperm without alteration, and the market steady. Cocos-nut has been dull owing to recent larger arrivals. Palm firmer, and fine Lagos quoted 43. Linseed dull, closing at 31/ 5s. English brown rape dull at 39/ to 53/ 15s and 41/ 10s per ton first four months of 1870. Permotizent --American refined dull at 1s 7d to 1s 7dd per gallon. Tatiow.—The market has shown rather an improving tendency owing to short imports, and a steady business has been done this week. New Petersburg, 49s; October to March, 48s 6d to 49s per owt. There is not quite so much business doing this morning. Patrocizes of Taxow.-Monday, Sept. 20, 1882.

POSTSCRIPT.

FRIDAY NIGHT.

POSTSCRIPT. FARAN NEAR. SUGAR.—The market is steady to-day, with rather more inquiry. 300 bushels soft brown Penang by auction to-day sold at 265 6d to 28s. 1,411 bags Penang at 31s to 32s for middling to good brown. 127 bags grainy white Egyptian sold at 43s 6d. 1,038 casks West India found buyers, making the week's business 2,038 casks. Barbadoes by auction obtained previous rates. A floating cargo of Cuba reported for the United Kingdom at 26s 3d per ow. COMME.—The public sales were large, and chiefly comprised planta-tion Ceylon, 1,774 casks 1,567 barrels and bags of which sold with spirit at fully yesterday's rates to 1s per ovt advance. RIGE.—A cargo of 1,000 tons Rangoon sold at 9s 6d ex ship. SHELLO.—557 chests sold at rather lower rates : reddish to good orange, 82s to 88s; liver and livey orange, 77s to 82s. TALLOW.—Prices went 1s 6d to 2s 6d higher. 620 casks 118 cases chiefly sold : Australian sheep, 47s to 48s 3d; beef, 44s to 48s; 186 casks 40 barrels Rio Grande, 44s to 48s per vet.

ADDITIONAL NOTICES. EXPINED SUGAR.—The home market continues steady, without any particular change of note. Dutch-crushed is firm at previous quota-tions.

GREEN FRUTE.--- A lively demand exists for all kinds. The first arrival of Almenia grapes, per steamer, has been received; quality and

condition good, and sold by Keeling and Hunt at public sale at price to encourage further shipments. More summer oranges have been ceived from the Azores, which have been attended with a reduction price, with loss to the shippers. Inquiry for Brazil and Barcelona nu with hurse for the former. 0 14

Botherson good, and the shipments. More summer oranges have been received from the Anores, which have been attended with a reduction in price, with lows to the shippers. Inquiry for Brazil and Barcelona and with buyers for the former.
Dar FRUT.-Currants are extremely quiet, the trade showing no disposition to buy at present prices and heavy arrivals being daily looked for. Valentias have most a brisk sale, and prices of fine finit hear edvanced 2s to 4s, whilst ordinary qualities have fully maintained their position. Sultanas do not attract much strention. Figs sell well, at a slight reduction on last week's prices.
Evatast Woot.-There is rather botter feeling in English wool, more supecially in long wools; the other descriptions are comparatively mediced: in the former an astrance of 4d per 1b can be obtained.
SENS.-The seed trade has ruled firm for most descriptions during the past week.
FAX.-Market quiet:
Ham.-Market steat is small a tooks, and buy presty much from week to week.
FAX.-Market quiet: prices quite nominal.
Tonacco.-There is a decided firmer tone in the American market, and although the stock of all descriptions very limited.
LEATHEE AND HIDES.-The leather market during the past week for a large scale, and prices were not on a large scale, and price were not market also for a large scale, which were scare, and may be any inclusion for side, heavy harness hides, and call kins of light and middle weights jabe for english and foreign bellies, which were scare, and may be the angle of the gal and foreign bellies, which were scare, and may be the area and the speen down increased activity. At Leadenhall on Tuesday the transetions were not on a large scale, and prices were not market for any index price were not market for a barge scale, and price were not market for any foreign the and middle weights jabe for English and foreign bellies, which were scaree, and may be area or al arge scale, and price were not on a farge sc

of sale. TALLOW.—Official market letter issued this evening :--

HOP MARKET.

HUT MARKET. BOROUGH, Friday, Spet. 24.—The accounts from the plantations re-present the yield as much below expectation, and confirm the reports recently received in reference to the damage sustained by the late gales. The market has been firm, and prices have been supported:-Mid. and East Kents, 5/ 10s to 7/10s; Weald of Kents, 4/ 10s to 6/6s; Mid Sussex, 4/ 5s to 5/15s; Mid Farnhams, 5/ 12s to 7/ 10s; New Country, 5/ to 7/7s; Yearlings, 2/ to 3/ 10s.

COAL MARKET.

COAL MARKET. FRIDAY, Sept. 24.—There was a further arrival of sailing ships to-day. The tone of the market was rather dull for house coals, and to effect sales a reduction of 2d had to be submitted to. In Hartley's mailtera-tion. Wallsend: Hartlepool 18s 6d.—Original Hartlepool 19s 6d.— Stewart's 18s 6d.—Heugh Hall 18s 6d.—Original Hartlepool 19s 6d.— Stewart's 18s 6d.—Heugh Hall 18s 6d.—Pittington 16s 6d.—South Kelloe 18s 6d.—Tunstall 17s 3d.—Cowpen Hartley 15s 9d.—Hastings' Hartley 15s 9d.—West Wylam 16s 6d. Ships at market, 70; sold, 19; gas com-tracts, &c., 42.—61; unsold, 9; at sea, 45.

LIVERPOOL MARKETS.

WOOL

FRIDAT, Sept. 24.—We have to report a moderate demand only, as buyers show no disposition to purchase beyond the requirements of present wants. Holders on the other hand continue firm, and there is no change in prices to notice.

CORN.

FRIDAY, Sept. 24,--Wheat was in moderate demand this merning, and prices favoured purchasers. Flour met a slow sale, and was 6d cheaper. Beans and peas wers unaltered. Oatmeal was 6d per load lower. Indian corn was in limited demand, at 6d per quarter reduction; round yellow, 30s.
