

OFFICE-340 Strand.

#### THE STATE OF THE CITY.

SINCE we last wrote there has been a succession of severe failures, of which the full particulars will be found in our City article, the worst being that of Alex. Collie and Co. in the East India trade, who seem to have been long sustained by drawing accommodation bills on various houses, all of whom have of course perished at the same time. Almost all the firms which have now failed have been supported for a long time by the London Discount Market-the bills being, in the first instance, discounted either by Messrs Sanderson's, of whom we spoke a fort-night since, or by Messrs Young, Borthwick, and Co., a smaller firm of bill-brokers, who have collapsed since. These bills

therefore, been doing bill-broker's business without the know ledge of bills which a good bill-broker has, or the careful scrutiny of bills which he practises. They have been giving rates for money which can only "pay," or be justified, if that money can be employed without making considerable bad debts, and they have made such bad debts.

Thirdly, a doubt presses on many minds whether any organisation, or any amount of care, will enable such very large sums to be employed at such high rates of interest on call or on short notice. Certainly the present amount of capacity and the present degree of organisation are not adequate. And in the long run the test is the balance sheet. If a bank engages to pay more for money than it can properly make, it will do unsound business to try to make it pay, and the conse-quence will be serious loss. Late events prove that important changes are necessary; so many bad bills could not otherwise

have been so long maintained in circulation, nor would so much money for which high rates were given have been employed in their re-discount.

These failures have, for the moment, prevented the fall in the value of money, which was impending, but as soon as credit settles again, there is no doubt that the rate of discount will fall. We can hardly rejoice sufficiently that these misfortunes happened when money was cheap, and the Bank reserve daily strengthening; if they had happened when money was 7 or 8 per cent., and when there was a heavy foreign drain upon a small Bank reserve, the calamity would have been of the greatest magnitude.

# THE SPECIAL DANGERS OF HIGH COMMERCIAL DEVELOPMENTS.

AT a time when we are all somewhat disposed to blame commercial men for what we call their speculative indiscretions, people are too apt to forget how much excuse there is in the high development which modern commerce has assumed, for the sort of restless activity which, whether you blame it or not, is almost certain to result in indiscretions. Political economy has to a certain extent misled literary men-and, therefore, popular opinion, which of course takes its tone very much from what the newspapers say—as to the kind of faculty needed in commerce. There can be no question that that kind of faculty-we speak of course of that engaged in the higher departments of productive and distributive industryis of a very rare and a very remarkable, though also, of course, of a very narrow kind, and that literary men who are always repeating the old formula of economical science, about the "wages of superintendence," "the reward of abstinence," "the cost of insurance," as if these three phrases adequately described the faculty needed for conducting either a large manufacturer's, or a large merchant's, or a large banker's, or bill discounter's business, simply throw dust in their own eyes. The qualities required in the higher departments of commerce are to the qualities required in the lower departments very much what the qualities needed by a great strategist, who has to handle armies of half-a-million of men, and to calculate exactly where they should be distributed, are to the qualities needed by the soldier or the non-commissioned officer, who has nothing more to do than to go through with his own little and well-learned task of obedience to orders, and the exact transmission of them. Now, let anybody once realise this, and realise it fully, and it will be matter for very little wonder that the commercial men who have the power requisite, or think they have it, for great combinations, are not always willing to confine themselves within the limits which strict prudence requires. For prudence, of course, in these matters means incurring no obligation which there is not a very strong presumption that they will be able to meet. In other words, prudence is strictly limited by the capital at the disposal of these men. Now, when a man has a great capacity for many wide combinations, it is not unnatural that his intellectual interests and calculations should far outrun the means at his disposal, and that he should, without any ignoble or unworthy unscrupulousness-though of course not without fault-be eager to avail himself of any advantage which the confidence of others may give him for extending his operations. We often talk as if the haste to be rich, the mere desire of wealth, were the only motive power in these great speculative transactions which, when they fail, cause so much misery and so much scandal. But no mistake can be greater. We do not for a moment mean that the desire to be rich, the passion for making wealth, is not far too great-and in a considerable measure the cause of the speculative rashness we see. But it is not by any means the sole cause, hardly, perhaps, even the chief cause. We find as a rule, that the men who can handle, or who think they can handle large armies well, are apt to favour war, when any international question arises which involves war; and if this be so,—and the bias to war must almost always, even in this case, be unconscious, for nobedy knows so well as great generals what misery war involves,—how much more natural it is that those who can handle, or who think they can handle, great commercial combinations well, and who of course anticipate from them, not the misery which war always causes even to the victor, but the satisfaction and enjoyment which useful commercial enterprises bring hardly less to the mere agents who conduct them and to the passive population of consumers to whose advantage they are

ultimately to conduce than to the authors of them, should feel a bias of which they are unconscious in favour of the exercise of their faculty, and against the timid counsels which would have them keep within the strictest limits of prudence. Our belief is that it is quite as much the natural heat of imaginative faculty,-for however odd the word "imaginative" may sound in connection with the may sound in connection with the enterprises of the manufacturer or the merchant, it is an imaginative faculty of a particular kind, and nothing short of it, which fits a man for the conception and execution of those great commercial operations, -which leads men to embark in transactions larger than their resources will properly admit, as the haste to be rich, which, however, no doubt mingles with and vivifies that imaginative faculty. Commerce in the present day is as difficult and full of problems which interest and fascinate the intellect in a certain somewhat narrow way, as war or politics. No doubt there is not the same public recognition of these problems and of the kind of power needed to solve them. But that only makes the matter worse. Where a pursuit is one which not only occupies the keenest intellect, but success in which wins considerable admiration and fame on its own account, and without regard at all to the pecuniary rewards it brings, a part of the charm of it consists in the social honour enjoyed. But though the rich commercial man enjoys plenty of honour on account of his riches, there is hardly any public appreciation of the faculty which enabled him to win those riches, and yet in all probability, it is that, and not the rewards it has gained him, on which he really prides himself. And the less his peculiar ability is really recognised in the world, the more it is to him in secret, and the more eager he is to find himself the kind of work in which he takes delight, and in which he realises the conscious-ness of his own power. We are, indeed, persuaded that very much speculation indeed is due to this nobler excuse for it—the natural tendency of compressed force to expand and make it-self fairly visible at least to the mind which wields it. Just as the born mathematician or musician will find himself mathematical or musical work to do, even at the sacrifice of worldly prospects which are of very considerable importance to him, so the manufacturer or merchant, born with a genius for the sort of combination which is needed in the higher commerce, will find himself employment for his faculty even at the risk of a failure far more painful to him than mere wealth could ever be delightful. Men of the world do not recognise this, for they do not know the sort of faculty needed in commerce, and even the ablest commercial men, when out of their special element, will seem as stupid and devoid of life as a great mathematician will often appear when he is condemned to listen to gossip, or a great musician when he hears of nothing but politics. The sleepy-looking, commercial man, who hardly knows what literature means, and never heard of either Mr Mill, or Mr Darwin, or the spectroscope, has often beneath that dull outside an intelligence as wakeful and restless as that of a French wit. And it is this eager intelligence of his, conscious of great power, or of the misleading symptoms of great power, which, quite as much as any mere thirst for wealth, leads him into operations extending beyond the scope of his legitimate means.

We are anxious that this should be fairly recognised. because we are quite sure that the world does injustice to the magnates of the City when it accuses the unfortunate among them of lightly playing with what is not their own to spend, in mere greediness and avarice. There is greediness and avarice enough, no doubt; but, probably, hardly more in the City than in the West-end. The chief difference is that, in the City, such greediness as there is enters so completely into the chief work of life, that no man can really tell where it is that his intellectual interest in his work ends, and his craving for wealth begins. As far as we can see, by far the best check on this intense vitality and recklessness of the commercial intelligence would result from such wider culture as would give these men other keen intellectual interests as well as those which are identified with their occupations. It is not the widelycultivated men who are the most eager in their commercial enterprises. They have other channels for their intellectual life and energy, and accordingly they can afford to limit the energy of their commercial enterprise within the bounds of prudence. It is the men who have no other intellectual life except the life of commercial enterprise, who are the truly dangerous men-not dangerous because they are generally less scrupul-

# THE ECONOMIST.

ous, but because they are more eager for the full employment of their powers, than their better educated contemporaries. The energy of commerce runs with a strong current, in part at least, because it runs between such very narrow banks. Let it find a number of different mouths, a delta instead of a single opening, and it will not rush on with the same dangerous velocity. Culture always diminishes intensity. And in the commercial world we could well afford to favour that result.

#### THE RELATIVE GROWTH OF THE EUROPEAN GREAT POWERS.

A SHORT time ago it was asserted prominently in a leading article in *Thé Times*, that "relatively to other nations, "England is at least as strong to-day as she was on the eve "of the great French war." If our contemporary had asserted that relatively to other nations it is very much stronger now than it was throughout that great contest, it would have been within the mark. The changes in the relative numbers of the population of the chief European States since those days have, in truth, been of singular magnitude, and it would not be possible to understand the politics of modern Europe without a clear conception of them.

It is not easy to conceive at first, with the knowledge of our present numbers, though we are still vulgarly supposed to be present numbers, though we are still vulgarly supposed to be a small State in that respect, how very small a people the English were at the beginning of the present cen-tury, and how great relatively were their neigh-bours. The figures before the present century are not very good, but at the outbreak of the great wars—say in the year 1791—the population of Great Britain was estimated at something like ten millions, but for France the estimate was over 26,000,000. Such was, the dis-parity between us and our antaconist when we externed parity between us and our antagonist when we entered on that contest. Even if we include Ireland, our numbers were still only about 14,000,000, or little more than half the French total; but Ireland ought properly to be excluded in such a comparison as being, from its state of active disaffection, a drain upon the resources of Great Britain rather than an addition to them. Now the population of Great Britain may be put at  $27\frac{1}{2}$  millions, against 36 millions in France; or if we include Ireland, which is now much less of a counterweight than it was for many years after 1790, we are at present  $32\frac{3}{4}$  millions, against 36 millions in France. That is to say, from being a State with a half or a third of the numbers of France we have become a State almost equal in point of numbers. If the growth of resources has been at all in proportion-and it has been quickest, we should say, in Eng-land-the change in the relative force of the two countries is immense, and may give us some notion of what the relative power of England must now be towards any State of the numbers which France possessed during the great war. But this is not the only revolution which has occurred; and

But this is not the only revolution which has occurred; and if we take the figures just at the close of the war, those of other countries being for that period more available, we shall have even a better idea of the great transformation which this century has witnessed. The great powers of Europe were then and are now, as follows :--

|                  | Numbers.<br>(1811.)   | % of<br>Total. | Numbers.<br>(1871-5.) | % of<br>Total. |
|------------------|-----------------------|----------------|-----------------------|----------------|
| Great Britain    | 12,000,000            | . 8.7          | 27,500,000            | 12.8           |
| France           | 29,000,000<br>(1816.) | 20.8           | 36,000,000            | 16.8           |
| Germany          | 21,000,000            | . 14.8         | 41,000,000            | 19.0           |
| Austria          | 28,000,000*           | . 20.0         | 36,000,000            | 16.8           |
| Russia in Europe | 48,000,000            | . 35.7         | 71,000,000            | 34.6           |
| The start        | 100 000 000           | 100.0          | 011 500 000           | 100-0          |

Total....... 138,000,000 ... 100-0 ... 211,500,000 ... 100-0 \* We have not the exact figures before us, but this is the best estimate we can form. Great Britain thus contained at the end of the Great War about 9 per cent. of the population of the Great Powers which entered into the contest, and at present it contains about 13 per cent.—a very material difference indeed. Though still the smallest in numbers also, the disparity between it and any other single State is much less. It was then less than half any of its neighbours, if we except, perhaps, Germany, which ought not, strictly speaking, to be reckoned as a great Power at all at that time in consequence of its disunion; now the population of Great Britain is about three-fourths that of each of its three neighbours, France, Germany, and Austria, and more than a third of Russia in Europe, whereas, in 1811, it was less than a fourth of that immense State. The other great change, it will be observed, is the

great increase of Germany, which now dwarfs both France and Austria, and has more than half the numbers of Russia; whereas, even in its divided state in 1816, its population was about half that of France and less than half that of Russia. And the transformation which has occurred becomes still more striking if we take into account the fact that France, towards the end of the war, included in its effective strength the Low Countries, Italy north of Rome, and part of Switzerland, making it an empire of 45,000,000 inhabitants, as against a divided Germany of 20,000,000 inhabitants, an Austria of less than 30,000,000, and Great Britain with a paltry 12,000,000 inhabitants; the United Kingdom at the latter date including Ireland, still containing only about a third of the population of the French Empire.

The conclusions to be drawn from this great transformation in the relative numbers of different Powers are most important. We see now why it is that the old feeling about the danger of French supremacy on the continent has disappeared. Then it was a French Empire as big as several of its neighbours combined, and overwhelming compared with any one of them, which all Europe hated and feared. Now France is only one of several great States, one of which-England-is, for the first time for centuries, nearly equal in numbers and enormously superior in resources; and another, Germany, is greater in population, and in immediately de-veloped warlike power, although, perhaps, not in undeveloped resources. And no other Power has yet taken the place which France then held. Germany comes nearest to doing so on account of the disproportionate development of her purely military preparation as compared with her neighbours, which can only be considered a passing phenomenon. Permanently, there are several Powers in Europe to balance each other, whereas in 1815 the problem was to find a counterpoise to the single and overwhelming strength of France, which had just been overcome by a tremendous effort of united Europe. If no new convulsion and redistribution of territory should now occur, the equilibrium in Europe must be pronounced inherently more stable than it was sixty years ago.

As regards our own position, the change is also very great. While there is no single Power on the continent at the present time in the position of France before 1815, England is both more powerful as regards numbers relatively to all combined, and far more powerful with reference to the strongest individual State. In 1815 we were immensely overshadowed, like our neighbours, by the numbers of France; now we are not materially less than any, except, perhaps, Russia, where our disparity is at least less than it was, and is always of less importance on account of the scattered settlements of the Russian people and their defective civilisation. Of course all this is dealing with the question on the footing of mere numbers, but we do not think there will be any doubt as to our resources having developed in proportion since 1815, whatever doubts may exist as to the consequences which would result in a contest from the greater or less degree of our relative preparation compared with what it was in 1790, which would apparently be a question more easy to raise than to settle.

These remarks would, of course, be strengthened if we also took into account the fact that Italy, from being a geographical expression, has become an important State, if not one of the great Powers; but our argument is strong enough without this addition.

We should argue, then, in the *first* place, that the old argument for English interference in Continental affairs has diminished in force. At the beginning of the century we were one of several minor States, and we combined with our neighbours for self-preservation. It has been argued since by those who have grown accustomed to the undisputed naval supremacy of England, that we should have done better to let the Continent alone, as we have since done to our advantage, but the gigantic efforts of France to be supreme at sea as well as by land, efforts which we had to combat, go to prove that trust in our insular isolation was not then so easy a policy as it now seems. Now, however, being one of several equal, or nearly equal powers, our interference is not called for by the same urgent plea of self-preservation. In the days of duelling third parties did not interfere between the principals, but a ring was made for them. In the same way it is at least arguable now, that when two great powers in the European family have a quarrel, it depends much upon the cause of the

quarrel whether the neighbours should not treat the affair as a duel and let them fight it out. There was certainly much in the conduct of both France and Germany before 1870 to induce us to let them fight out their duel and suffer the consequences of their own blunders.

In the second place, if interference should ever become necessary, as we hope it may not, or if we are ourselves attacked by one or more of our neighbours, our power to come out of the struggle with credit, spart always from the question of our state of military preparation, which we do not now discuss, is far greater than it was. Our effective numbers and resources are obviously greater, as above shown. It is the custom, no doubt, to imagine that England could not form great armies, but those who think so should recal the numbers we had under arms in the great wars out of so much smaller and poorer a population, and also the gigantic levies of the United States during their civil war, although the "North" was a smaller state in point of numbers and wealth than the United Kingdom now is. If we do not form large armies, it is from choice or inattention to the subject, not from want of ability. We could thus interfere more effectively to of ability. We could thus interfere more effectively to assist an ally than before 1815, provided our state of preparation is relatively the same, as we think perhaps it is. Notoriously, for instance, our state of preparation was nothing to signify, compared with that of France, at the rupture of the peace of Amiens. For a continental struggle we had no army, and France had large armies practi-cally on a war footing. The supposition now is that modern wars are shorter than they were before 1815, that military events are decided more quickly after the outbreak of hostilities; but this is more than doubtful if one only considers such campaigns as those of Marengo. Austerlitz. considers such campaigns as those of Marengo, Austerlitz, Jena, and Waterloo. It depends upon circumstances whether wars are short or not, and there were short wars sixty years ago, just as in 1866 and 1870. If we have to support an ally with contile developed more have to support an ally with scantily-developed means against a highly prepared enemy, that will only be a repetition of what we did all through the Napoleonic contest. It should be a source of security to us now, as it was then, that no war in which a continental Power engages with us can be short, and for the same reason which then existed, that our

be short, and for the same transformer, we need hardly say, is neither resources are inaccessible to the enemy. Our object in thus writing, we need hardly say, is neither to magnify our power, nor to induce an improper satisfaction with our present state of military preparation. We wish merely to show how changed Europe is, and how it has not changed for the worse, but rather for the better, since the beginning of the century, both as regards the chronic conditions of peaceful equilibrium, and as regards England's inherent ability to hold her own in any contest. We must not throw away our advantages by interference when it is uncalled for; but we must equally avoid the depressing notion that England is relatively weaker to the continent than it was, whereas it is relatively stronger.

#### THE ENGLISH RAILWAY TRAFFICS FOR THE CURRENT HALF-YEAR.

At the beginning of May, we called attention to some remarkable characteristics of English railway traffics for the current half-year, which had then begun to manifest themselves. The increase was at a greater rate than had been exhibited for several half-years, and it was also mainly in goods traffic, a sign of a commencement having been made of a new cycle of improvement. Since we wrote, these characteristics have become much more decided. The increase for the half-year has now gone on so long, and reached so large a total, as to convert the promise of a large increase for the half-year into a certainty. It is still also, for the most part, in goods traffic that the increase is shown. A short analysis will bring out the importance of these features, and their bearing on the present prospects of railway property.

First, as to the great increase of traffic itself, it will be seen from the usual table of the gross receipts of the principal railways in our money article, that the aggregate increase to date on the railways there mentioned is \$46,000/, or at the rate of about 4 per cent. At the corresponding date last year, the aggregate increase was only 607,000/, while for the remaining period of the half-year a comparison had then to be made with weeks of large increase in the corresponding period of the previous year, and now the comparison falls to be made with weeks when the traffic was stationary. The present accrued

increase of 846,000/ is thus likely to be greatly added to, while at the end of the first half-year of 1874, the accrued increase was still only 615,000/. It will probably be within the mark to assume that at the end of the current half-year, the increase will be about 1,000,000/, as compared with 615,000/ in the first half of 1874, and 554,000/ in the second half of the year.

Taking a broad view of the matter, such a position of the railways in regard to traffics is highly satisfactory. Assuming that the special causes of increased working expenses are still in force to the same additional amount as in 1874-caused which were then sufficient to affect many dividends seriously it would not follow that the effect would now be the same. The increase of traffics obviously gives the companies more power to cope with any special increase of working expenses. Unless, therefore, some wholly new cause of increased working expenses has arisen there cannot be a fresh retrogression to anything like the same extent as last year, and the increase primá facie is great enough to cause an increase of dividend. If the working expenses have diminished, as there is reason to believe they may have done, the prospects as regards dividend must be favourable indeed.

The second point we have referred to is the fact of the increase being mainly in goods. To show this we subjoin an analysis of the results as regards passengers and goods of the majority of the eighteen principal railways dealt with in our money article. Out of a total increase of 669,000l thus dealt with, it appears that the increase in goods is more than fourfifths of the total, or 550,000l. As we pointed out when we wrote at the beginning of May last, this is a reversal of the usual proportion which has been exhibited since 1871, from which date the share of passengers in the total increase went on steadily increasing, until last year it was over 60 per cent., the aggregates being also so small that the amount of increase of goods after such a stationary period is usually most promising. The inference is that the growth of the country is again causing the volume of business to expand, and the increase in usual course and " barring accidents," should for some time go on at an an accelerated rate. As the harvest of last year, and the consequently long period of cheap wheat which we have now had, were also of a nature to give such a stimulus to trade, there is the more reason for concluding that the improvement will continue and increase. It is highly probable we shall have even better traffics in the next two or three half-years than in this.

While the increase of goods is thus more important than that of passengers, it should be noted that the passenger traffic itself is in a more satisfactory condition than it promised to be two months ago. The appearances then were that the passenger traffic was falling off altogether, and we could only suppose that this was partly to be accounted for by the Midland change in respect of first and second-class passengers. We should say that this change has undoubtedly had some effect, as the passenger traffic on the London and North-Western, Great Northern, and other lines likely to be affected by the Midland change, is the least satisfactory of any. Otherwise, however, the half-year has evidently been more fortunate than it promised to be as regards pleasure traffic, and the immediate benefit to the railways is, of course, proportionately greater than what would arise from the same increase of goods.

Such being the facts as to traffics, the probability of a considerable increase of dividends very soon obviously comes into view. As we have above explained the increase of traffic is so much greater than that of 1874, as to fully compensate, and more than compensate, a special increase of working expenses equal to what then took place. But in all probability the increase of working expenses is now at diminishing rate. As we showed in a short table which we published on Feb. 27th last, the rate of increase of working expenses rose quickly from 4.7 per cent. in 1870, to 19 per cent. in the first half-year of 1873, and has since fallen with equal rapidity to 3.8 per cent. in the second half-year of 1874. In the usual order we are still at the diminishing period of the rate of increase of working expenses. Several other facts also point in the same direction. Coal, iron, and other materials are Several other facts also point in all cheaper, and the lapse of time since last year, when the great reduction took place, may be presumed to

# THE ECONOMIST.

have enabled the companies to obtain an actual reduction in their contracts corresponding to the reduction in market price. That they reaped some benefit in the second half of 1874 was manifest, and the circumstances are such that they should now reap additional benefit. In addition it is also known from the fortnightly statements of receipts and expenses of the Sheffield Company, and the similar monthly statements of the South-Eastern Company, that in these cases such a diminution of working cost is reported to be in progress. As our readers know, we doubt much whether such statements for a short period are to be relied on, but as at least indicating an opinion on the part of the administration of these lines as to how the half year will turn out, they confirm the impression made by the other facts we have specified. It remains to be seen how far the accounts of the companies during this half-year and the next will bear out such anticipations. We cannot but think it will be most surprising if the improvement of dividends, as the result of reduced prices of coal and materials, which seems in one or two cases to have been unduly deferred or converted into a diminution, should not be at last realised. The absence of improvement would certainly justify investigation either by the shareholders who receive too little, or by those who have obtained an increaseupon the ground in the latter case that if their neighbours are properly paid, and the lines are properly managed, then their own dividends must be partly paid out of capital.

INCREASE in ENGLISH RAILWAY RECEIPTS, distinguishing Passengers from Goods Traffic, for 24 weeks, 1875, compared with the Corresponding Period Last Year.

### BUSINESS NOTES.

THE COINAGE OF 1874 .- The annual report of the Master of the Mint, which has just been issued, is again a most interesting document, a leading point being that the coinage of gold, which had fallen very low in 1873, had fallen still lower in 1874. In 1873 it was 3,300,000l, as against 15,000,000l in 1872, and 10,000,000l in 1871; but in 1874 it is only 1,462,000/. The average of late years has been about 5,000,000/. This diminution, it is explained, "is, in a great "measure, to be accounted for by the magnitude of the coin-"ages just referred to; but it should also be mentioned that "the importations into the Bank of England during the year " of Australian sovereigns and half-sovereigns, which are now " of the same design as those issued from the Mint in London, "and are equally legal tender in the United Kingdom, have "again been considerable, having amounted to 1,972,000l, "and have contributed, in a sensible degree, towards main-"taining the supply of gold coin required for circulation in "this country. Since the conclusion of the gold coinage in "the month of September, no intimation has been received "from the Bank of England that the coinage of that metal "will be resumed." The total number of pieces struck in 1874 was 27,467,142, as against 41,846,269 in 1873, including a small coinage of the value of 8,000l for Newfoundland. The total value of the British coins struck during the year, at the Mint, and by contract, was :-

THE EFFECT OF DISCHARGE IN BANKREPTCY .- An interesting and important question in the interpretation of the Bankruptcy Act of 1869, which has almost forced on the judges the necessity of making the law on the point, has just come before the Court of Appeal in Chancery. The facts of the case-Ebb v. Boulnois-were that the plaintiff, who had obtained his discharge under a petition for liquidation in June, 1871, but leaving the liquidation itself still pending, afterwards sold a piece of ground which he had subsequently acquired to the defendant, but on a suit for specific performance being now brought, the latter pleaded that the property was really vested in the trustees of the plaintiff, under the liquidation which had not been closed. This brought up the whole question of the effect of the discharge under the Bankruptcy Act. The defendant relied upon section 15, which provides, inter alia, that the property divisible among the creditors shall comprise "all such property as may " belong to or be vested in the bankrupt at the commence-"ment of the bankruptcy, or may be acquired by or "devolve on him during its continuance." The plantiff, on the other hand, relied on the following clause in section 48: "When a bankruptcy is closed, or at any time "during its continuance, with the assent of the creditors "testified by the special resolution, the bankrupt may apply "to the Court for an order of discharge." The difficulty is that the first clause enacts distinctly that all property acquired during the continuance of the bankruptcy, shall vest in the trustees, but the second clause enacts that the bankrupt may be "discharged" in a certain way while the bankruptcy continues, and "discharge" would be a meaningless term if the after-acquired property of the bankrupt remained liable. Eventually the Court have decided for the view that the words as to "discharge" shall over-rule the other, thus cutting the knot of a difficulty which is really created by the inconsistent language of the same Act of Parliament in different sections. Lord Justice James in giving judgment, expressly said that section 15 must be read as if it had been made "subject to the proviso bereinafter contained in section

"48." Common sense, he thought, must be applied to reconcile the two enactments, and most people will no doubt agree with him.

AN OPPORTUNITY FOR CANADA. - An agent for the Canadian Government is understood to be in this country on a financial mission with reference to the Pacific Bailway which Canada has undertaken to construct, and perhaps it may be suggested that there is at present a good opportunity of removing the main cause of the natural difficulties of his mission, to the great advantage both of English investors and of the Canadian Government. The difficulty which Canada meets with in any new borrowings for railway purposes is obviously the past unprofitableness of English investments in Canadian railways. At the present moment the apparent loss on the two great investments in the Grand Trunk and Great Western of Canada railways is so extreme that no new enterprise can easily be broached. But the low state of these investments provides the very opportunity which Canada can make use of. Why not buy up the lines in a time of depreciation, contenting present holders with a good bonus upon actual market prices, which a State can afford to pay for such a purpose, and then convert the lines into State railways, which would undoubtedly in a few years be a source of great profit to the State? As we have frequently pointed out, the best opportunity the State has had for acquiring the railways of the United Kingdom was lost in 1867, when railway property was greatly depreciated. The magnitude of the task has sirce been increased so much by the growth and prosperity of the railways, that no Government dares to face it. But the opportunity we then lost, Canada still has; while, at one stroke, the credit of Canadian railway investments in this country will be restored, so that the Government could casily find all the money it really required. Of course, if the suggestion is adopted, the Canadian Government would have to give a good deal more than present market prices; but we have little doubt the agent in this country would find all concerned in a reasonable frame of mind, and that a transaction which would be beneficial to Canada would be possible.

THE ARGENTINE FINANCES IN 1874 .- The Buenos Ayres Standard, of the 15th ult., received by the last mail, contains an account of the opening of Congress, including a speech by President Avellaneda, in which amongst other things he describes the effect of the war, and the financial crisis of last year on the finances of the Republic. The first point is that the year had ended with a very large deficit.

| The total expenditure was<br>And the receipts were |  | \$<br>5,957,000<br>3,305,000 |   |
|--|--|------------------------------|---|
|  |  |                              | Į |

additional apparently to the war expenditure of the year, estimated at 3,900,000 dols, or 780,000*l*. Actually what is called the ordinary Budget shows an expendi-ture of 19,681,000 dols, or 3,936,000*l*, being a deficit of about 600,000l compared with the above receipts. The second point is that this deficit arises mainly from a reduction of Customs duties. The receipts from imports in 1873 were 16,516,000 dols, and the actual yield was only 12,540,000 dols, a difference of 3,976,000 dols, or 795,000l, the de-ficiency in the estimate of the year being of about the same amount. In previous years the estimat s of the Government have frequently been exceeded in the result ; and as was the case with the falling off in the income of the Peruvian Customs, which we referred to the other day, the change now observed is most significant of the depression which the raw material-producing countries have been passing through. The President states that the falling off in the imports themselves amounts to 4,337,000l, although the exports had only diminished 2,857,000 dols, or 571,000L Thirdly, the deficit would have been worse, but for a saving of 3,702,000 dols, or 740,000l, compared with the estimates. Lastly, we observe there is a comparison drawn by the Minister between the expense of suppressing the late revolt and that of suppressing previous ones. The first revolt in Entre Rios, he states, cost 1,500,000l; the second, 920,000l; but the one of September last, as above stated, has only cost 780,0001; this diminution of the cost of suppressing insurrection being cited by the President as an illustration of the increased power of the Central Government. The President also makes the following statements as to the present position of the Treasury :-

ments as to the present position of the Treasury :---We have paid the war expenses and met the ordinary expenditure of the budget, in spite of a decline in revenue; we have also paid 4½ mil-lions fts of arrears to the War Office between January 1, 1874, and April 30, 1875. We have also paid for the arms and ships bought in Europe, and for which no funds had been set apart. All this has been done without injury to our credit, or even having to negotiate the balance of the loan in London. The Finance Minister, even at the darkest moment, paid no higher for money than the National Bank rate. The Public Works of the 1871 loan proceed without interruption, and are defrayed out of the lean.

The Finance Minister jealously guards our credit in Europe. The money is already in London for payment of the July coupons of the 1824 and 1868 loans, besides a considerable sum remitted for the cou-pons due next September on the Public Works loan of 1871.

Such are the results of a most unfavourable year in the Argentine Republic; and the country should now, in a year like the present, if no fresh political difficulty turns up, have an opportunity of showing the real financial resources it possesses, apart from the adventitious growth of years like 1872 and 1873, and free from disturbances like those of last year.

THE MONETARY CRISIS AT RIO .- According to the accounts lately received by mail, the measures of relief adopted in the monetary crisis at Rio do not seem to have been accurately described in the telegrams. It was stated in them that the measure of relief adopted by the Government was the issue of 25,000 contos of reis of Government paper ; but this was confused by the statement that the paper was to bear interest not exceeding 51 per cent., which looked not unlike a statement that the Government was issuing a new loan, as well as giving relief to the money market. According to the Anglo-Brazilian Times, however, the Bill brought in by the Brazilian Minister of Finance was "to authorise the issue of small Treasury bills "of four to twelve months' date, to a total of not over 25,000 contos of reis, and for a temporary issue of current money to a like amount, to be applied to loans to banks of deposit on " sufficient securities, or, as regards the issue of currency, to " the redemption of Treasury bills or stock." The telegraph was thus imperfect in mixing up the two measures of relief

adopted, and so concealing the fact that the Government was really increasing its irredeemable paper, which was, of course, the obvious measure of relief in the crisis, notwithstanding the dangers attending its use incidental at all times to an irredeemable currency. Subsequent telegrams have stated that the crisis has subsided, but it remains to be seen at what Subsequent telegrams bave stated cost, and whether the country escapes the evil of increased depreciation of the currency.

THE POWERS OF DIRECTORS .- The case of Riche v. the Ashbury Railway Carriage and Iron Company, involving an important question as to the powers of directors in making contracts, and which we referred to about a year ago, when it was before the Court of Exchequer Chamber,\* has now been decided on appeal by the House of Lords. The decision is a reversal of that of the Court below, which was in favour of the plaintiff, and against the company, so that it is now held there are objects as to which the directors of a limited company are incompetent to contract, even where, as in the present case, special meetings had been called to assent to the contract, and no express dissent had been recorded. The main facts of the case were that the company was incorporated to construct railway rolling-stock, and carry on business as mechanical engineers, but the contract now in question was for the construction of a railway from Brussels to Antwerp and Tournai, which it was supposed would give the company the advantage of supplying all the rolling-stock. Although, however, this contract was ratified, as stated, at the general meeting of the company, and by affixing the company's seal, no shareholders dissenting, the House of Lords have now decided that it is ultra vires, and the company are entitled to repudiate it. They hold that the contracts in question were beyond the scope and limits of the objects of the company as set forth in their memorandum of association, and that they were consequently not merely voidable, but absolutely void under the provisions of the Joint Stock Companies Act. Unfortunately, the case is so meagrely reported, that the grounds of difference from the courts below are not apparent. The latter acted mainly upon the peculiarity of the constitution of the company as an incorporated company, and not a mere company under the Limited Liability Acts, but this reasoning has evidently been disregarded by the House of Lords, though we do not know on what grounds.

THE PUBLIC REVENUE AND EXPENDITURE. The following are the Receipts on account of Kevenue during the week ending June 12, as compared with the corres

off by anticipation in transactions for the account, but the payment only commences on the 1st July. The demand for money for discount has been more brisk during the past week, and  $3\frac{1}{4}$  is now obtained for trade bills. Great activity has also been shown in the exchange business, English and German paper being in most request. The rate for sight on London, after receding to 25f 27½c, recovered yesterday to 25f 30c, paper of all dates being taken at 25f 28c. Berlin also advanced to 121¾ the 100 marks for short and 121 $\frac{7}{16}$ long. At Berlin the exchange on Paris has at the same time dropped from 81 marks 75 to 81.70 the 100 francs. The demand for paper on Amsterdam, which recently carried the Paris rate up to 213¼ the 100 florins, has now ceased, and bills are now offered at 209½ to  $\frac{3}{4}$ . The rates for the other principal continental places are Madrid 498 to 499 the 100 dollars; Vienna, 221 to  $\frac{1}{4}$  the 100 florins; St Petersburg, 339½ to 341 the 100 roubles. Italy is firm at 5¼ to 6 discount.

The fluctuations in the prices of Rente during the week have been within narrow limits. Nothing is yet known relative to the results of the conversion of the Morgan loan, but the time for the declarations being now past, the Three per Cents. have been heavy, and last week's rates have been barely maintained, while the Fives have advanced  $\frac{1}{2}$ . It is supposed that a considerable portion of the Morgan loan is still held in England, and that, after being converted into Three per Cents., these will be discharged on the French market, holders having little inducement to retain this stock at the reduced rate of interest. The Six per Cent. bonds remain at the abnormal price of 520f, their real value being now 515f, less  $3\frac{1}{2}$ months' interest. The cash purchases of the Five per Cents., through the Receivers-General of Taxes, still average over 50,000f of Rente duily; but speculation is dull, and the margin of the rates for options at the end of the month has contracted to a few centimes, and all expectation of any considerable rise would seem to be abandoned for the present.

Italian Rente continues to be the firmest of the foreign funds, and some powerful influence seems to be at work to drive this stock above 73; rumours are, however, general that a large loan is not far distant. Turkish Fives have fluctuated between 44·15 and 43·90; the bonds of 1869 have lost 3f, those of 1873 are weaker at 263f 25c. The Sociéte Générale announces the payment of the coupons of the Peruvian Five and Six per Cent. loans on the 1st of July. The latter has, nevertheless, lost 1 in the week. Spanish Three show no sign of recovery. Russian bonds are in great favour; those of 1870 have gained 1 at 105, and those of 1867 and 1869 are firm at 430. Bank of France shares have gained 20f 1c, and other financial companies have generally improved. Credit Mobilier are, of course, an exception, and the prospect of the new Board of Directors being involved immediately in a new lawsuit caused a fall of nearly 20f yesterday; to-day there has been a partial recovery. Franco-Hollandaise Bank shares have again receded 3f 75c at 318f 75c. Spanish Credit Mobilier have made a rebound from 625 to 685.

About the state of the six great railway companies in the

has been made, and has contributed to precipitate the fall. The receipts of the six great railway companies in the twenty-first week again show an increase of 1,292,640f compared with the same week last year, making a total gain of 24,892,700f since the 1st January. The Lombard Company's returns are as usual a week in advance of those of the French lines. The twenty-second week has a diminution of 79,622f on the South of Austria section attenuated by a small augmentation of 6,824f on the Upper Italy. The results since the commencement of the year, nevertheless, mark an increase of 1,223,621f on the two sections companed with 1874. The shares of the four French companies which had risen last week, have since been stationary, but the Western and Eastern, which had then remained behindhand, have now improved in their turn. Lombard shares resist any further depreciation. Paris Gas shares, after a rise of 32f 50c last week, have again improved 20f. Suez Canal shares are held firmer, although the receipts are diminishing; the month of June is, however, the least productive of the year. The Messageries shares have gained 12f 50c, at 592f 50c. The Committee of the Assembly charged to examine M. Guichard's Bill, with the object of terminating the contract for the mail service, have given a decision adverse to it, leaving entire liberty to the Government to negotiate for certain modifications in the terms. Subjoined are to-day's prices for the account:—

The Committee on the Budget has received from the Govermment the draft of the Bill for the adhesion of France to the international postal convention of Berne, with a proposed tariff for letters and printed papers sent from France abroad. It may be remembered that this convention received the adhesion of twenty-one different States, but that the delegate of France withheld his signature, as it was considered that the French Budget could not afford to make the sacrifice the adoption of the new rates would entail. The Government, since pressed by the Chambers of Commerce, and convinced of the hopelessness of holding out against the rest of Europe, has at last consented to enter the Postal Union after, however, obtaining from the other States certain concessions, the principal of which are that the new tariffs shall not be applied in France before the 1st January next, so as to leave intact the Budget of this year; and that no further reductions of the rates fixed in the convention of last year shall be made unless agreed to unanimously by all the contracting Powers. The rates fixed at Berne were as follows:—For letters, 25 centimes, or twopence-halfpenny for each 15 grammes (half an ounce), with the option of reducing the rate to 20 centimes, or increasing it to 32 centimes; unpaid letters; books, papers, &c., 7 centimes per 56 grammes, with a margin of 5 centimes to 11. Those are the principal provisions, but other articles fix the rates for transit over intermediate country is to retain integrally the sums received by it, the countries to which the letters are addressed reciprocally delivering gratis the letters for winder the trates for letters prepaid at 30 centimes, or threepence per 15 grammes; for post cards, 15 centimes, and for books and napers 5 centimes per 50 grammes, the minimum rate. The Additional ocean postage is 10 centimes for letters, 5 centimes, or 20 centimes for the two places respectively. The letter rates between France and England being already only 30 centimes, no reduction of p

A note in the report of the committee on the Bill for the reimbursement of the Morgan Loan—which document has been rather tardily published, after the Bill itself had been voted—derives a special interest from the recent re-opening of the question of Savings Banks in both the English and French Parliaments. In France the funds of those establishments are managed, under the direction of the State, by the Caisse des Depôts et Consignations, which allows interest at the rate of 4 per cent. on the sums deposited with it. Those sums may be placed in the Treasury in current account at the same rate of interest, but the Minister of Finance has the right to limit the amount of such deposits with the Treasury, and to require that the surplus should be employed in the purchase of Rente and Railway Debentures. According to the note in the Bill relative to the Morgan Loan the Savings Banks deposits with the Treasury amounted on the 24th May last to a little over 63 millions of france; and a sum of 525,583,124f had been invested in Rente and Railway Bonds. But the actual value of those investments on that date was only 430,736,239f; so that, if realised immediately, the loss weed have amounted to 44,846,845f. As those purchases were made on account of the State, which is responsible for both the interests and the capital, it would have had to bear the whole of the loss arising from the depreciation.

A fresh incident in the contest between the adversaries of the railway monopoly and the department of Public Worksoccurred this week in the Assembly. Of three Bills before the Chamber, relative to which the two parties are at issue, one refers to an outer circular railway round Paris, at a mean distance of about ten miles from the capital, and which the Council-General of the Seine-et-Oise, thro I which depart-

ment it everywhere runs, had conceded to an independent company as a line of local interest, but which the Minister of Public Works wishes to grant to a Syndicate of four of the great companies. By a law of 1870, the declaration of public works, without the usual formality of a Bill, for any branch lines of less than 20 kilometres (about 12½ miles) in length. The committee to which the Railway Bill in question has been referred learned that M. Caillaux, the present Minister, was about to take advantage of his prerogative to declare of public utility three sections of less than 20 kilometres each of the line in question, to three of the Syndicated Companies, evidently with the object of prejudging the decision of the Assembly on the general question, as those sections form part of the general plan of the great companies, Baron de Janzé, one of the members of the committee, in consequence, in order to anticipate that manœure, presented a Bill on Monday to declare that the declaration of public utility for lines of less than 20 kilometres could only be made by a law, and demanded the declaration of urgency, according to which a single reading is sufficient for the Bill to become law. The Minister of Public Works was absent from the Assembly at the moment, and the demand for the declaration of urgency not being opposed, was granted. He however attended the next day and protested warmly against what had been done in his absence, complaining that he had not been informed of the application that was, to be made, and while not denying that he contemplated issuing the three decrees of public utility, announced his intention of exercising a right conferred on him by the rules, of demanding the withdrawal of the declaration of urgency when the report of the Committee on Baron de Janzé's proposition was presented. That declaration provoked a reply from the other side, and the discussion became so envenomed as to require the frequent interference of the President, one of the deputies stigmatising the proceeding of t

The Credit Mobilier held, on Monday last, the meeting of shareholders announced, and in which a statement of the present situation of the company was communicated, and the board of directors, elected on the 2nd March, gave in their resignation, declining to offer themselves for re-election. new Board was chosen, with Baron Emile d'Erlanger for President, and comprising among its members Lord William Montagu Hay. According to the statement presented the as-sets of the company, which on the 2nd March, the date on which M. Philippart and his friends took the direction, amounted to 86,295,000f, were on the 11th of June only 77,092,446f, showing a loss of 9,202,554f. The diminution in the assets is in a large measure caused by the devrecision. 77,092,446f, showing a loss of 9,202,554f. The diminution in the assets is in a large measure caused by the depreciation in the value of the securities which represent the capital, and by forced sales of assets at a low price to ob-tain resources for urgent requirements. A recovery in the value of the assets would, of course, reduce the amount of the losses for the last three months. So far as may be judged from the brief entries in the statement, the Phillipart administration was not responsible for the resolu-Phillipart administration was not responsible for the whole of this deficit. A sum of 2,835,000f is set down as resulting from the sale of 15,800 shares of the Franco-Hollandaise Bank for the end of January, and which shares had to be bought in after the 2nd March. In the contest between the direction of Baron Haussmann and the party which wished to bring in M. Philippart, the Credit Mobilier sold largely Franco-Hollandaise Bank shares as a means of damaging the credit of M. Philippart, he being chiefly identified with that Bank. The purchases were carried over at each settlement, and the shares were only bought in after the accession of the new board, which has had to bear the loss. The company is now indebted to the Bank of Belgium for a sum of 5,600,000f and to Baron Erlanger for 5,000,000f, for which advances securities held by the Credit Mobilier have been given as a pledge. The assistance afforded by Baron Erlanger was given on the con-dition that M. Philippart and the other members of the late board should not present themselves for re-election. M. Philippart, in taking leave of the shareholders, read an address, in which he acknowledged his defeat by a combina-tion of the forces of his adversaries and here a shareholders. tion of the forces of his adversaries, and by manœuvres which no credit could resist. He admits that the judicial authority, although deceived, could with difficulty have acted otherwis than it did under the circumstances of the charges brought against him; nevertheless, the subsequent decision that there were no grounds for those charges could not undo the dis-astrous effect they had produced. The losses he attributes to the necessity of defending on the Bourse-the field on which the battle had finally to be fought-the value of the shares of the Credit Mobilier, and of the banks which had become

guarantees of the Auxiliary Company of the Credit Mobilier, which it had been proposed to establish after the defeat of the project for a direct increase of the capital of the old company.

It is probable that an attempt will be made to set aside the decisions come to at the meeting of the Credit Mobilier just held. By the company's statutes the accounts on which a vote of the meeting is to be taken should be communicated to the cherchelders of the interict beforehand. A number of the a vote of the meeting is to be taken should be commercial to the shareholders a fortnight beforehand. A number of the proprietors demanded the postponement of the meeting for such a time as to permit them to examine the situation of the such a time as to permit them to examine the situation of the company before coming to any resolution. That objection was overruled by the majority on the ground that the accounts were not submitted for approval, but were simply a communi-cation for the information of the meeting. A member of the minority, nevertheless, protested against the legality of the meeting, and threatened to demand the nullity of the pro-ceedings before the law courts.

An action to decide a question of the liability of carriers for the declarations of value made to the customs has just been decided before the Paris Court of Appeal. A parcel of alpaca was sent by MM. Braubach Bros., of Cologne, to M. Bourgeois, of Paris; the goods were delivered to M. Vraucken, carrier, at Cologne, who consigned them to M. Geireu, a carrier in Paris, and were accompanied by a note delivered by MM. Braubach Bros. declaring the value of the parcel at 2,685f. Gireu declared the value to the Paris customs according to the note received, but the customs had the alpaca appraised, and the experts having fixed its value at 3,471f, exercised the right of pre-emption. M. Bourgeois brought an action before the Tribunal of Commerce against Gireu, claiming the sum of 3,471f for the value of the alpaca, and 1,500f as damages. Gireu offered the 2,685f, with 5 per cent. additional he had received from the customs, denying any further liability; he, however, brought Vraucken into the action to cover his own responsibility, in the eventuality of an adverse verdict. The Tribunal of Commerce gave judg-ment against Bourgeois, holding that the value being entered in the carrier's note, and Gireu having instructions to deliver the goods at the domicile of Bourgeois, he was not bound to give notice to the latter before making the declara-tion to the customs. Bourgeois took the case before the Court of Appeal, which has now given an entirely opposite An action to decide a question of the liability of carriers tion to the customs. Bourgeois took the case before the Court of Appeal, which has now given an entirely opposite verdict, condemning Gireu to pay to the appellant 3,471f for the goods, and 500f as damages, on the ground that he had rendered himself liable by acting without instructions. Judgment was given against Gireu in his subsidiary action against Vraucken, and as none of the parties had brought Braubach Bros., by whom the note containing the false declaration had been issued, into the suit, Gireu remains charged with the penalty. Foreign transport agents have hitherto been accustomed to pass goods through the customs, making the required declarations, on the faith of the papers tion to the customs. Bourgeois took the case before the making the required declarations, on the faith of the papers accompanying the goods, thus avoiding delay; but this deci-sion making them answerable for the sincerity of the values announced, will probably cause them in future to decline such a responsibility.

The following are the latest quotations of the produce

The following are the latest quotations of the produce markets at Havre per 50 kilos (1 cwt), duty paid :--COTTON.-The Syndicate of brokers, in revising the official price current at the end of last week, reduced the United States produce from If to 2f, and the Indian from 1f to 3f, leaving the others without change. ### GERMANY AND AUSTRIA. (FROM OUR OWN CORRESPONDENT.)

#### VIENNA, June 14.

Last week a deputation from the Yorkshire Chambers of Commerce arrived here, and had an interview with the Minister of Finances, Depretis. The deputation, consisting of Mr Barron and Mr Olroyd, was, together with its inter-preter, Mr Unna, introduced by the British ambassador, Sir Andrew Buchanan. The business of the English deputies was the following complaint :—In Austria, not more than a month ago, an order had been issued, whereby an alteration had been made in the charge on woollen goods of a certain

class. The two classes of goods in question are the "fulled or milled," for which in the treaty 15 florins per cwt had been charged, and the "unfulled" or "unmilled," the charge for which amounted to 35 florins per cwt. Now, an order appeared in Prague, according to which goods admitted there at 15 florins per cwt were to be raised to 35 florins from the 31st of May. The deputation asked if this was not acting in contravention of a treaty? contravention of a treaty?

Minister Depretis told them that the higher charge was made on the ground that the goods in question are made of cotion warps, and cannot be classed as "milled" or "fulled" cotton warps, and cannot be classed as "milled" or "fulled" goods, as these in Austria are exclusively woollen. This possibility of cotton warps had been overlooked at the time when the treaty was made. The manufacturers of Austria had called the Government's attention to the fact, and it was with a view of adhering to the sense, not to the word, of law, that the change had been made. On this the Englishmen urged that the reduction of the new charge, which in reality was like a prohibition, was of vital importance to Yorkshire, because within a very short time the goods in question, for which orders have been given and accepted, are to be delivered. Now, with the new daties imposed, these goods, representing a value of about 500,000/, would be thrown entirely on the hands of the manufacturers. Besides, notification of the change had not been made before the middle of May, which gave English manufacturers no time for consideration; it was a very unfair change indeed. The the middle of May, which gave English manufacturers no time for consideration; it was a very unfair change indeed. The Minister once more replied that he is the interpreter of the law, and that the goods sent by England under the name of "fulled" or "milled," could not fairly be classed as such; whereupon the English deputation showed the patterns sup-plied by the Austrian Government to the British Government of the treat may make and and archive to the treat to the at the time when the treaty was made, and explained to the Minister that out of four, three represented as "fulled" goods were themselves cotton warps. The Minister then promised to consider the question, and gave the deputation a hope of resolving it to their satisfaction. The deputies will remain here so long as the question remains undecided.

The condition of the Austrian-Lombard railroad is still the almost exclusive object of interest to our men of business and capitalists. It begins to become clear that the sale of this railway to the Parisian Company was a mistake. Any other method for getting out of financial difficulties would have been preferable. Government was obliged to grant the under-takars a pumber of farours which have been abued and takers a number of favours, which have been abused, and have only served to enrich the latter. Thus complaints are heard on the subject of the Government's having granted the company exemption from taxes, which corresponds to a yearly donation of three millions of gulden. Then the annual meeting of the company is at present still being held in *Paris*. Besides, it is scarcely fair that of the capital, amounting to 6394 millions of gulden, but 150 millions should have been Besides, it is scarcely fair that of the capital, amounting to 6394 millions of gulden, but 150 millions should have been issued in shares, whilst the rest consists in debentures. Even during the emission of these debentures the interests of the company were carelessly treated. 347 millions of gulden's worth of debentures were issued at the price of 47 per cent., and 150 millions' worth of the emission of 1871 were sold at 41 per cent. The fact that the Paris house principally engaged in the affair has immensely gained by it, whilst the railroad is still suffering from the consequences, has been noticed and looked upon with anything but a benevolent eye. Add to this that the Austrian part of the railway works better than the Italian, whilst the latter has been granted greater favours, as for instance the subvention for the St. Gothard railway, by which the Astrian part is damaged, instead of profiting by it. It is for all these reasons that the Austrian shareholders have moved for a separation of the Italian and Austrian parts of the railway. The hope has been expressed that the Austrian Government will persuade the Italian Go-vernment to the necessary steps to be taken for such a pur-pose. Meanwhile the Austrian Bourse has followed the example of the Bourse of Paris, and decided upon selling the Lombards without fort a separation due example of the Bourse of Paris, and decided upon selling the Lombards without first cutting the coupons due.

The official Custom returns of Austria and Hungary for the first quarter of this year have just been published. Accord-ing to these returns import has decreased, and export in-creased, when compared to the corresponding months last year. In the first months-

|            |    | 1874. |         | 1875. |
|------------|----|-------|---------|-------|
| amounted i | to | 133-7 | ******* | 126.5 |

Protectionists will conclude from these figures that commerce has fared better this year than last.

It may be of interest to report in this place that the increase of import, remarked during the last eight years, of which protectionists complain so bitterly, in reality applies to raw material, especially to iron, flax, hemp, and cotton. Now as these materials have been used by manufacturers of the country, we may conclude from this fact a progress of in-dustry, certainly not a going back in it. A few months ago the pneumatic system was applied to the post and telegraph offices of the whole of the town of

Vienna, in use for telegrams and light letters only. There are a rate of postage for the transmission by that route is given in the ten offices, which exchange letters and messages every quarter of an hour, from eight o'clock in the morning to nine p.m. The authorities of Berlin have decided upon adopting the same system, and have asked information on the subject in Paris and London.

The demand for shares of the Imperial Bank has been much greater than last week's news allowed us to suppose. Nine hundred millions of marks, equal to fifteen times the amount required, have been subscribed. In the repartition of shares those who have subscribed for a small number are to be most favoured. According to the returns published by the Reichs-anzeiger, there were at the end of May 37 millions worth of banknotes of different German banks, less in circulation, than at the end of April. On the 31st May the circulation amounted to :

Marks

157,103,992 in notes of 50 marks and les

196,476,349 in notes of from 50-100 marks. 858,601,871 in notes of 100 marks and more. The Governments of Oldenbourg and Weimar are, it is stated, withdrawing their State paper money. The Bank of Oldenbourg, which had the care of the State's paper, will in its stead issue notes.

It is said that the new Bavarian Note Bank has been authorised by Government. The Reichsanzeiger of the 11th inst. makes known the fact

that the nine mints in the German Empire are authorised to coin money for private persons. The price demanded for coining is fixed at three marks per pound of fine gold. The gold must be delivered up in ingots weighing not less than five pounds. Three more marks will have to be paid for testing the fine gold contained in an ingot of five pounds.

The railway between Cologne and Münden has decided upon introducing an important reduction of its tariff. It has fixed the price for the conveyance of goods not under the weight of 5,000 kilograms, to be carried from Hamburg, Bremen, and Harburg to the West of Germany, so low, that Bremen, for instance, will be able to compete with Antwerp as far as Düsseldorf, and with Rotterdam as far as Dortmund. The tariff is to be reduced in some parts to half, in others to a quarter, of what it was. 100 kilograms to be conveyed to Düsseldorf will pay :--

This extraordinarily low tariff only applies in cases when cars are at hand which would otherwise return empty from Hamburg, Harburg, and Bremen.

Since the great salt mines have been discovered in Germany the production of salt has, within the ten years since 1863, increased from 8 millions to 20 millions of hundredweights.

In the commercial circles of Southern Germany greater extension is intended to be given to Bills of Exchange, espe-cially where they replace book debts, which are still for the most part in use

Most part in use. A congress of German plysicians has been held last week at Eisenach. It occupied itself with the questions of the institution of sanitary committees, the better control of chemists' shops, and the compulsory examination of meat for the consumption of the public.

The Federal Assembly in Switzerland is discussing an Act on the Regulation of Note Banks, founded on the German Law, inasmuch as it prescribes that the notes of each bank must be accepted by all, whilst it proposes not to found a Central Bank.

# COMMERCIAL AND MISCELLANEOUS NEWS.

The following is issued by the Post Office on the subject of the general postal union :-

postal union :--In accordance with the provisions of an International Treaty con-cluded at Berne on the 9th October last, the whole of the States of Europe, the United States of America, and Egypt, have formed themselves into a general postal union, for the reciprocal exchange of correspondence, and have agreed to adopt low and uniform rates of postage for all corre-spondence despatched from one State of the union to another. As a general messure these provisions which extend to the terms and the set of the s spondence despatched from one State of the union to another. As a general measure, these provisions, which extend to letters, post cards, newspapers, and other printed papers, patterns of merchandise, and legal and commercial documents, will take effect on the 1st July next, but, in the case of France, not until the 1st January, 1876. All corre-spondence addressed to France will continue subject to the existing rates of postage, and it will be necessary in some cases to levy temporarily higher rates than the union rates on the letters, &c., forwarded by the route of France to other States of the union, but such letters, &c., will be forwarded through France only in these cases where letters, &c., will be forwarded through France only in those case

Via Brindisi. Via Marseilles.

Only correspondence for Alsace and Lorraine will be forwarded via France. Via Italy.

Upon letters posted unpaid double the above rates will be charged on delivery.

Registration.-Letters, post cards, newspapers, and other printed papers, patterns, and legal and commercial documents addressed to any of the above countries may be registered. The registration fee will be 4d in all cases, which, in addition to the postage, must be pre-paid. The transmission of letters containing gold or silver money, jewels, or valuable articles, or anything liable to Customs' duties, through the post, to any of the countries and places named in the Table, is prohibited. øy,

Foreign Post Cards.—The post cards which have been manufactured for use in this country bear an impressed stamp of the value of 14d. The additional postage, therefore, required in those cases, where they will be forwarded via France, must be prepaid by means of adhesive stamps to be affixed to the cards. On the front (or stamped) side of a post card-nothing must be written or printed, except the address.

Newspapers .--The ordinary charge on a newspaper addressed to any country of the union is one penny per four ounces. But, for the pre-sent, the charge on newspapers sent through France, except to Belgium, will be twopence per four ounces. In all cases the postage must be prepaid.

prepaid. Printed Papers.—Under the term "Printed Papers" are compre-hended stitched or bound books, pamphlets, music, visiting cards, circu-lars, catalogues, prospectuses, announcements, and notices of various kinds, whether printed, engraved, or lithographed, as well as photographs. Printed papers must, as a rule, contain no writing, MS. figure or mark whatever, beyond a simple stroke marking a particular passage of the text to which it is desired to call attention. But proofs of printing or of music may have corrections upon them, made with a pen, and may have manuscripts not of the nature of a letter annexed to them, the corrections or manuscripts to relate exclusively to the text, or the execution of the work. Circulars, notices, &,, may bear the signature corrections or manuscripts to relate exclusively to the text, or the execution of the work. Circulars, notices, & 3, may bear the signature of the sender, with his trade or profession, and may also indicate the place of origin and the date. In the case of books, a manuscript dedication or a complimentary inscription from the author will be allowed. Stock or share lists, prices current, and market reports, printed or lithographed, may have the prices added in writing or by means of any impression whatever.

Legal and Commercial Documents.-Legal and commercial documents be forwarded at the same charge as printed papers. Under the "Legal and Commercial Documents," are comprised Acts or deeds Under the ay term term "Legal and Commercial Documents, are comprised Acts of deeds of all kinds drawn up by public functionaries, invoices, copies or ex-tracts of deeds written upon stamped or unstamped paper, scores or shoots of MS. music, and, in general, all MS. papers and documents which are not of the nature of a letter. Patterns of Merchandise.—Patterns or samples of merchandise may

Patterns of Merchandise.—Patterns or samples of merchandise may be forwarded at the same charge as printed papers to any of the countries of the union under the following conditions:—1. They must be placed in bags or boxes or in envelopes, the fastenings of which are removable so as to admit of an easy examination. 2. The patterns and samples must not have any saleable value, nor bear any MS. writing other than the name, or the trade or profession, of the sender, the address of the person for whom the packet is intended, a manufacturer's or trade mark, numbers, and prices. 3. These articles must not be introduced into a letter or into a packet of any other kind. No packet of patterns exceeding half a pound in weight, and no packet of printed papers or of legal or commercial documents exceeding two pounds in weight, can be forwarded to any of the countries of the union. nion

# THE ECONOMIST.

All newspapers, printed papers, and legal and commercial documents addressed to any country of the union must be posted in conformity with the several conditions now applicable to similar articles sent out of

with the several conditions now applicable to similar articles sent out of the United Kingdom. New Stamp of the value of Twopence-haltpenny.—For the convenience of persons corresponding with the countries of the union, a new ad-hesive postage stamp of the value of twopence-halfpenny has been issued, and may be procured at all Post Offices.—By command of the Postmaster-General. General Post Office, June 17, 1875.

A German paper states that the steel works of Frederick Krupp, of A German paper states that the steel works of Frederick Krupp, of Essen, are about to receive a very important addition in their machinery. The largest steam hammer in use at these works at the present time is one capable of working a mass of steel 50 tons in weight, and erected at a cost of 2,800,000f. It is now in contempiation to build a new steam hammer capable of beating up a mass of steel of double the weight—viz., 100 tons. The new machine, it is estimated, will cost 5,000,000f, and will be the most powerful in the world, and it may be expected that the size and weight of the German artillery will be enor-mously increased, as the new steam hammer will permit the working up of larger masses of metal than up to the present time has been thought to be possible by scientific engineers. thought to be possible by scientific engineers.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1865, a deficiency of 6,581,2561; in 1872, a deficiency of 3,339,3331; in 1873, a deficiency of 5,958,5611; and in 1874, an excess of In 1875, there is an excess of 1,212,8221. 694.4451.

In 1865, the tendency in the money market continuing in the direction of ease for a time, the Bank rate was reduced from  $3\frac{1}{3}$  to 3 per cent. The coming Parliamentary elections had caused some withdrawals of money to the provinces, but the bullion movement from abroad was favourable to London. In 1872, a further reduction occurred in the Bank rate. Receipts of bullion were still large. But the open market rates were firm, and for long-dated paper especially so, on account of the approaching new French loan and the payment

to be made by France to Germany. In 1873, the value of money was tending downwards although the market was to some extent unsettled. Mr

Lowe's Bank Issue Bill met with unanimous opposition. In 1874, a reduction of the Bank rate to 21 per cent. was made, money being plentiful and good bills very scarce in the discount market. Public securities were firm in price with the exception of the Erie, and the Atlantic and Great Western Railway, reduced freight charges having diminished their receipts considerably. A Canadian loan for 4,000,000*l* had been issued and well applied for. Some election successes of the Bonapartists had contributed to consolidate the French parties opposing that section.

The account of the Bank of France for the week ending June 17 shows the following changes :-

<sup>6</sup> Converting the reichs-marc at 1s; the Austrian florin at 2s; and the franc at 254 per 12. American currency is reduced into English money at 2s 5d per dol, the liam specie being taken at 4s 2d per dol. Net deposits are left in dols on account of the mixture of currency and specie.

DISCOUNT AND MONEY MARKET .- Another sudden change has passed over the money market, resembling that which followed the reported difficulties of Messrs Sanderson and Co., but from which the market, when we last week wrote, seemed to have fully recovered. Up to Monday money continued very easy, and even on Tuesday the minimum rate was really 3 per cent., or less, but on Tuesday afternoon an event occurred, the suspension of Messrs Alex. Collie and Co., of Manchester and London, with liabilities estimated at 3,000,000l, which has produced a large crop of suspensions, including one firm of bill-brokers, and induced the renewal of the precautions commenced at the time of Messrs Sanderson's failure. The rate for three months' bills is accordingly quite up to Bank rate this afternoon, with a corresponding advance in other quotations since last week, while the market, it will be understood, is really most unsettled, owing to the general un-willingness to enter into fresh engagements. There has also been a good business at the Bank. This afternoon there has been rather more money offering than there was yesterday, the feeling as to failures having become quieter, but it is yet too early to say that there is any substantial relaxation in the precautions which this fresh crop of disasters has occasioned.

The failures have occurred much more suddenly than those connected with Messrs Sanderson's suspension. On Tuesday about mid-day it was rumoured that some serious difficulty had occurred in the East Indian shipping trade, a fact which in itself caused no surprise, but the name of Messrs Alex. Collie and Co. was hardly mentioned until late in the afternoon, when a formal circular was issued. The impression immediately was very great. The liabilities of the firm were not only large, but although a new firm, having been only established in 1863, it had always enjoyed good credit, and the bills it had discounted were widely distributed throughout the market. It was soon known, also, that the suspension meant the discovery that a considerable mass of acceptances which had been rather freely taken in some quarters were those of people who were really dependent on Messre Collie for being financed, and who in some cases, it is alleged, had accepted only for a commission. Thus the failure was on a larger scale than the Aberdare one, and there was the same discovery as to the bad quality of some of the paper. The suspension of one firm, that of Messre Shand and Co., East India merchants, was immediately announced with Messrs Collie's; on the following day another firm was announced; and since then each day has brought a crop of suspensions of which a full list is subjoined under our heading of "Failures and Embarrass-"ments," the largest number of announcements being made in the course of Thursday, which was rather a gloomy day in the city. In addition, Messrs Collie's suspension brought about on Thursday the stoppage of Messrs Young, Borthwick and Co., the firm of bill-brokers above referred to, with liabilities, it is believed, exceeding two millions, though, of course, the remark applies to them which was made in the case of Messrs Sanderson's, that a large amount of these nominal liabilities may run off as the bills which the firm have guaranteed are paid. The firm was of fair reputation, though its business was only third or fourth rate, and it is understood now that an excessive amount of

Measrs Collie's paper passed through their hands. On the same day also, the stoppage of Messrs Collie led to the suspension at Manchester, of the old-established firm of Messrs J. P. Westhead and Co., with liabilities exceeding 200,000*l*, an event which has caused a great deal of excitement in that city. The firm had been established for seventy years, and was in the bighest credit, and it is alleged in the Manchester papers that the difficulties have arisen through a junior partner accepting for Messrs Collie to the extent of 110,000*l*, without the knowledge of the senior partners. The two failures combined have cast a great gloom over Manchester, and the markets for cotton and piece goods have been very flat. The holders of the engagements of all these firms in London are mainly the bill-brokers, and some of the largest banks, who have re-discounted or made advances for the above bill-broking firm which has suspended. As in the case of the Aberdare failures, therefore, the losses fall as a rule upon very strong institutions, whose management, however, ought to have prevented such mishaps.

The excitement during the week was increased by the announcement, on Wednesday afternoon, of another failure arising out of the Aberdare embarrassments—that of Messrs. Robert Benson and Co., American merchants, and agents for the Illinois Central Railroad Company, with liabilities of about a million. The firm has not lately been in such good credit as it once was, but its position was formerly a high one, and its late senior partner, who died a few months ago, was a director of the London and North-Western Railway. The difficulties seem to have arisen entirely from the firm going out of its usual business as an Exchange house; but its engagements in that capacity had already been reduced in consequence of its attempted extensions in other directions, and the suspension is now of more importance as an aggravation of the Aberdare losses than as an independent failure likely to lead to others.

To-day only a few additional failures have been recorded, all arising out of Messrs Collie's; and although a few more are still expected the feeling is decidedly quiter.

The changes in the Bank return, as was expected, are extremely favourable, and in any other circumstances would no doubt have led to a reduction of the Bank rate, especially with the continued influx of gold from abroad. The ballion shows the large increase of 912,000l, of which the sum of 644,000l was from abroad, the remainder being from the country; and as the circulation has also diminished 412,000*l*, the result is a total addition of 1,324,000*l* to the reserve, which now stands at 12,385,000l. The private securities have also run off to the extent of 1,765,000l, while the private deposits have diminished 527,000%. The other changes are unimportant, consisting of an increase of 141,000l in the public deposits, and of 38,000l in the Government securities. Since the return was made up, however, it is not improbable that some unfavourable changes may have occurred, the banks having again been increasing their balances, and so causing an increase of the private securities.

We subjoin our usual quotations for mercantile paper having various periods to run, subject, however, to the remark above made as to the unsettled state of the market :--

| Bank bills | -31    |       | B                                  | 31   |     | cent. |       |

## THE ECONOMIST.

Last Saturday the National Bank of Belgium reduced its rate from 31 to 3 per cent.

THE STOCK MARKETS .- In consequence of the above failures and their apprehended effects on the money market, the prices of the leading stocks have been subjected to violent fluctuations, the fact of the failures occurring in the midst of a strong speculative movement for the rise in certain securities aggra vating the extent of the changes. Up to Tuesday morning all the markets were buoyant, especially for English railways, the disposition to purchase manifest when we last wrote having gone on increasing. On Tuesday afternoon, however, there was a sudden arrest on the evidence of large sales being pressed both of Consols and other securities, in anticipation, as it afterwards proved, of the announcement of Messrs Collie's suspension. And since Tuesday, in spite of partial rallies, the tone was increasingly dull as the extent of the disasters commenced on Tuesday, gradually became known, until to-day when there has been an important rally occasioned by the quieter feeling in the money market above referred to-the principal movement upwards again being in English railways. The markets are extremely sensitive both ways, the strong opinion in favour of a rise acting at once, as soon as each wave of apprehension caused by failures passes away, and the apprehension when it is renewed taking effect upon a large body of holders, among whom many weak holders must be included, and also inducing speculative sales in anticipation of these weak holders being "shaken out." On balance for the week, so far as we can judge, the speculative sales seem rather to have preponderated, notwithstanding a moderate rise of price, and the markets are consequently strengthened for a violent recovery if the present apprehensions of a monetary crisis arising out of the commercial disasters pass away. Besides railways Consols have been the most important market affected, the market for foreign stocks, on account of the little business doing for a

long time, having been unusually devoid of animation. In addition to the other changes a good deal of attention has naturally been given this week to Joint Stock Bank shares and the shares of discount companies, which have both fallen heavily, though the latter have partially recovered to-day in consequence of the magnitude of the sales for the fall, which seem to have been made, and which have the usual effect of making a strong market. In Bank shares the fall has been most severe ; but of course, owing to Leeman's act, no speculative account can be opened. The apprehen-sion is widely spread that the dividends this year will be seriously affected, and the actual causes of apprehension are of course aggravated by the usual Stock Exchange exaggerations.

ENGLISH GOVERNMENT SECURITIES .- Consols and other Government Stocks reached a high price on Monday evening. Consols marking 931 to 3, ex div.; but late in the day, and on Tuesday, large sales were pressed in anticipation of the failures, and during the week the price of 924 was touched. Since yesterday the tendency, as in other markets, has been towards improvement, the abundance of money and scarcity of first-class investments encouraging the speculative opinion that this class of securities must speedily rise in value when the present apprehensions pass away. The rise, it is also anticipated, will be all the greater in consequence of the greater cheapness of money, which must be the final result of the present check.

FOREIGN GOVERNMENT SECURITIES .- This department has been comparatively inanimate, though it has participated in the general depression of Wednesday and Thursday-the leading speculative stocks, and principally Peraviar, all exhibiting a moderate fall. To-day, there has been almost a complete recovery, and finally there is little change for the week.

We have received the following from the Council of Foreign Bondholders with reference to Spanish coupons :-

TO THE EDITOR OF THE ECONOMIST. SEE,—I am directed by the Council of Foreign Bondholders to inform you that some of the Spanish holders of coupons of the Three per Cent. External Debt of Spain having caused their London correspondents to bring the recent arrangement for a settlement of three of the eventue coupons under the consideration of the committee of the Stock Ex-change the committee of the Stock Exchange, the committee, after examination, came to the following reso-lution:--Resolved--- "That the propositions made by the Spanish Government, through the Council of Foreign Bondholders for the liquinish Government, through the Council of Foreign Bondholders for the inqui-dation of the overdue Spanish coupons of the 30th June and 31st December, 1873, and the 30th June, 1874, have been assented to by the general body of bondholders, at meetings duly convened, and held on the 6th March and 29th December, 1874, and that in the opinion of the committee of the Stock Exchange there is not any obstacle to the carry-ing into effect the settlement then agreed to.' This resolution having been confirmed and communicated to the council, the council trust that no further obstacles to the accomplish-ment of the agreement will arise and that the Spanish Government

ment of the arrangement will arise, and that the Spanish Government will issue the advertisement without further delay.—I am, Sir, your obedient servant, HYDE CLARKE, Secretary.

Council-house, 10 Moorgate street, 18th June, 1875. The following are the changes for the week, taking the

ENGLISH RAILWAYS .- The strong upward movement, which seemed to have commenced when we last wrote, was maintained on Saturday and Monday, on which days there was an average rise of upwards of 2 per cent. ; but on Tuesday half the ground gained was almost quite suddenly lost, and by Thursday afternoon the quotations were, in most cases, lower than they were a week ago. The changes, to a great extent, were caused either by speculative sales, or by the precaution of jobbers to lower the prices during the failures, which naturally had the effect of checking fresh purchases. As sales have taken place on balance during this lowering of price, apart from the speculative sales at first pressed, the sensitiveness of the markets on the least lull occurring in the course

# [June 19, 1875.

of the present disasters is fully accounted for. The traffic returns published during the week have again exhibited large increase

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest

JOINT STOCK BANKS .- Losses in connection with this week's failures have been attributed to various London banking houses, and Indian bank shares have also shown some depression. The following have fallen :—London and Westminster,  $5\frac{1}{2}$ ; Union,  $4\frac{1}{2}$ ; Joint Stock,  $2\frac{1}{2}$ ; Alliance, 1; Consolidated, \$; London and County, 11; ditto, New, 1; Oriental, 1; Agra, <sup>3</sup>/<sub>4</sub>; Bank of Alexandria, <sup>1</sup>/<sub>4</sub>; Chartered of India, Aus-tralia, and China, <sup>1</sup>/<sub>2</sub>; Chartered Mercantile, 1<sup>1</sup>/<sub>3</sub>; Imperial Ottoman, 1; Anglo-Austrian, 1.

TELEGRAPHS .- While Anglo-American shares have been in demand, and show a show of 3 for the week, those of the Direct Cable are 11 lower. Globe Trust is 1 higher. The following have fallen : Submarine, 25; Submarine Trust, 2; Telegraph Construction, 11.

MINTS .- In the foreign mining share market, St John del Rey have advanced 15; Russia Copper, 1; Cape Copper, 1; Almada, 1. On the other side, Rio Tinto have fallen

MISCELLANEOUS.—Among bonds, &c., Russian Land Mort-gage are 2 higher. On the other side, Share Investment Preference have fallen 1; ditto Deferred, 1. The principal feature is the fall in financial companies' shares, National Discount having dropped  $1\frac{1}{4}$ ; London Financial,  $\frac{1}{2}$ ; General Credit,  $\frac{1}{3}$ ; United Discount,  $\frac{1}{4}$ . Among land shares, North British Australasian have fallen 5; Scottish Australian, 5; Australian Agricultural, 1; Van Dieman's Land, 11. Native Guano have fallen 3; Phosphate Sewage, 1.

FAILURES AND EMBARRASSMENTS .- Messrs Alexander Collie and Co., of Manchester and London, suspended payment on Tuesday last. The liabilities of the firm are estimated at 3,000,000l, but 500,000l only is the estimate of those unsecured. The firm had been engaged chiefly in the Indian trade, consigning goods thither at their own risk, and also doing business as a commission house on a very large scale. Losses in Stock Exchange speculations are also reported to have led to the stoppage, the immediate cause of which may have been the failure of Messrs Sanderson and Co. last week.

Messrs Young, Borthwick, and Co., bill-brokers of Lombard. street, have, in consequence of the failure of Messrs Collie, found it necessary to stop payment also. The liabilities are over 2,000,000/, out consist partly of the debts of the Manchester house in question, and are, therefore, merely in the form of an extra guarantee, or the same liabilities in a different shape.

In addition, a good many firms in the East Indian trade have been brought down as a result of Messra Collie's stoppage, viz.: Messrs Shand and Co., East India merchants, of Rood lane. Liabilities about 309,0001. Messrs Rainbow, Holberton, and Co., of St Helen's place. Liabilities about 150,000*l*. Messrs John Anderson and Co., of Philpot lane, 200,000*l*. Messrs Malcolm, Hudson, and Co., of Crosby square, 200,000*l*. Messrs John Strachan and Co., 121 Bishopsgate street, 200,000*l*. Mr J. C. Fowlie, of 78 Leadenball street, 100,000*l*. Messrs Henry Adamson and Sons, of 75 Mark lane. Liabilities small. Messrs J. P. Westhead and Co., manufacturers, of Manchester; liabilities 200,000l to 300,000l, chiefly falling on the neighbourhood. The bills have also been returned of Messrs N. Alexander, Son, and Co., East India merchants, of Great Winchester street. Liabilities, 300,0007.

Messes Robert Benson and Co., American merchants, of King's Arms yard, have also suspended, with liabilities reaching nearly a million sterling. The failure, although in a different branch of trade to those above-mentioned, is attributed to the same original cause, viz., the stoppage of Fothergill, Hankey, and Co. Their dealings were largely in railway iron with the United States.

In addition there have been some isolated failures, but of comparatively small dimensions. Among these are Messrs Gonzales and Co., of Palmerston buildings, in the South American trade; Messrs Empey, Johnson, and Co., of Manchester, the latter in consequence of a failure in Montrealthat of Henry Davis and Co., in the dry goods trade. BULLION.—Messrs Pixley and Abell's Bullion Circular states

that gold, with the exception of 400,000l taken for Spain, has not been in demand for export, and that the arrivals go into the Bank. Silver has been firmer at  $55\frac{5}{8}d$  per oz. standard. The Indian Council Bills offered were taken at the same price as the tenders previously quoted.

According to the Gazette return of this evening the move ment in the precicus metals during the week ended June 16, have been as follows :-Gold-Import, 1,159,726l; export, 52,400l. Silver-Import, 297,440l; export, 160,928l. The sum of 117,000l in gold was taken to the Bank to-day.

COURSE OF THE EXCHANGES.

Bonds of the General Ottoman Debt, in the proportion of 551 of the former against 1061 of the latter, can deposit their bonds at the office of Messrs R. Raphael and Sons.

the office of Messrs R. Raphael and Sons. RAILWAY COMPANIES. Atlantic and Great Western—Leased Lines Rental Trust Bonds, 1872.—Vice-Chancellor Hall has appointed Mr Henry Wollaston Blake receiver, with a view to the immediate distribution among the bondholders of the funds already in hand. It is stated that those funds arising from dividends on the shares of the Cleveland and Mahoning Valley Railway Company, held as security, are sufficient to admit of the pay-ment of 41 los upon each coupon of 71 due 1st January last. Accordingly, payment on account, at the above rate, will be made on the 25th instant. Central Uruguan of Montevideo.—It is stated that the Govern-

Central Uruguay of Montevideo.—It is stated that the Govern-ment guarantee has not yet been settled, and the London board are unaware of the cause of the delay, and that no dividend for 1874 can be paid until a settlement takes place. A general meeting must be held to confirm the proposed addition to the statutes, the directors will not call the shareholders together for the present. The net profit for the year was \$83,246, equivalent to 17,712*l*, leaving a deficit to be covered by the guarantee of the Government of 53,084*l*.

East Indian .- A dividend, in excess of the guarantee of 1 per cent. is announced for the second half of last year, making with the payment of 2l 10s last January, a total dividend of  $7\frac{6}{5}$  per cent. out of the profits earned in 1874.

East London.—At an extraordinary meeting, the directors were authorised to issue 400,000*l* in debenture stock, which will enable them to carry the line into the Great Eastern terminus at Broad street. They will have to pay 5,000*l* a year for this station accommodation, and the use of a quarter of a mile of line.

Isle of Man.—After payment of the preference charges, a dividend has been declared of 2 per cent. Loudon, Chatham, and Dover.—A meeting has been held to consider a bill "for conferring further powers on the Seven-oaks, Maidstone, and Tunbridge Company, for the construc-tion of works, the purchase of lands, and the raising of money and otherwise in relation to their underking, and for other numeroer". "The hill was compared

and otherwise in relation to their underking, and for other purposes." The bill was approved. Mexican.—At a special meeting, the report, which was adopted, stated that negotiations have been concluded with the principal creditors, the general result of the arrangement being that, with a few exceptions, "the claims for principal moneys, which have been settled as amounting to 2,033,261/, and claims for interest to December 31, 1873, which have been settled as amounting to 1,615,317/ (the creditors agreeing to relinquish the interest which has accrued since 31st December. relinquish the interest which has accrued since 31st December, relinquish the interest which has accrued since 31st December, 1873), shall be satisfied by the issue of 2,545,000/ eight per cent. bonds, to be exchanged (on all doubts being removed as to the form in which the assent of the Mexican Government has been given), for the like amount of eight per cent. first preference shares, and of 1,010,300/ six per cent. second pre-ference shares, and by the assignment to them of arrears of subventions remaining uncollected on March 1, 1875." *Oude and Rohilkund.*—The net earnings for the half-year ended December, wer 32,271*l*. There was no extension of the line, the total length open for traffic being 540 miles. No decision has been made respecting the extension of the main

Ine, the total length open for traine being 540 miles. No decision has been made respecting the extension of the main line from Moradabad to join the Scinde, Punjaub, and Delhi Railway at Saharanpore, about 120 miles, the construction of the main line from Akberpore to Buxar, 101 miles, and the branch from Moradabad to Ramnugger, 47 miles. Capital received 5,505,983*l*, and expended 4,771,807*l*, leaving a balance

of 734,176l. Uruguay Central and Hygueritas of Montevideo-7 per Cent. Bonds.-The London and River Plate Bank notify that they will pay, on the 30th inst. the coupons due on that date. [CONTINUED ON PAGE 738.]

# June 19, 1875.

#### [CONTINUED FROM PAGE 735.]

....

-The receipts for the year were 34,322l, or Royal Swedish .-1,302/ in excess of the previous year, notwithstanding the depression in the iron trade. The expenses have, however, been heavy, in consequence of renewals of bridges and rails. The net profit is 13,131/, or 1,666/ below 1873. During the year the company not only paid two years' interest on the obligations, but also redeemed bonds, equal in amount to 1 per cent of the total debt cent. of the total debt.

Wellington, Grey, and Bruce .- The numbers are published of bonds which have been drawn for repayment at par on 1st July.

#### BANKS.

BANKS. Anglo-Hungarian.—In accordance with the resolutions passed at a meeting at Budapesth on 31st May, the shareholders are required to pay a call of ten florins, Austrian currency, per share viz., five florins by the 10th July, and five florins by the 10th September. On the first instalment of the call being paid, the sum of fifty florins will be stamped off each existing share certificate, and after payment of the second instalment, the share certificates will be converted and liberated from further liability, by the exchange of one share of 100 florins, Austrian currency, fully paid up, for each two-and-a-half share certificates of forty florins each. The call is payable here at 9s per five florins. here at 9s per five florins.

#### ASSURANCE COMPANIES

British and Foreign Marine.—An interim dividend of 6s per share, free of income tax, is payable on the 1st July. English and Scottish Marine Assurance, Limited.—A meeting will be held on 14th July, to receive the accounts of the

liquidators and dissolve the company. London and Provincial Marine.—The usual interest payment at the rate of 10 per cent. per annum, free of income tax, is announced.

Northern Assurance.-The annual report shows that in the fire department the premiums amounted to 313,364/, the losses to 173,609*l*, and that the reserve fund was increased to 314,947*l*. The new business in the life department, was 295,869*l* on 488 lives, the annual premiums being 9,730l; the claims amounted to 80,402l; and the funds were increased to 1,073,936l. A dividend of 10s, and a bonus of 5s per share were declared, making a distribution of 25s per share for the year.

#### MISCELLANEOUS COMPANIES.

Air Gas, Limited .- On a second petition being presented, Vice-Chancellor Hall made an order for the compulsory winding up.

Australian Agricultural.-The directors recommend a dividend of 2l per share, free of income tax, making, with the 2l paid

of 2l per share, free of income tax, making, with the 2l paid in February, 4l per share for the year 1874. Brazilian Submarine Telegraph.—The directors have declared an interim dividend of 2s 6d per share, or 5 per cent. per annum, free of income tax, for the quarter ended March 31. Charles Cammell and Co.—The directors have declared a divi-dend at the rate of 6 per cent., including the interim dividend already paid, leaving, after adding 10,000l to reserve, 9,128l to be carried forward

be carried forward. Consolidated Land of France, Limited.—Creditors are re-quested to send in their claims by the 9th of July. The 14th

is appointed for the adjudication. Delaware and Hudson Canal.—There was an available balance of \$2,818,078 for the year, notwithstanding that there was a diminution in the output of coal and of the gross receipts of the railways. The net receipts were about the same as in the previous year. After payment of \$768,246 for interest on the funded debt, which amounts to \$12,764,079, there remained \$2,049,832 applicable to dividend on the share capital of \$20,000,000.

Direct United States Cable .- The company announce that their cable has been completely laid, and that direct commu-nication now exists with the United States. Due intimation of the cable being available for the transmission of messages with full particulars as to rates, will be published at an early date.

Ebbw Vale Steel, Iron, and Coal.—A loss is shown on the year's working of 19,538l, making, including the interim divi-dend paid in December last, a total debit of 56,776l, to be carried forward to next year. The directors state that a limited forward to next year. The directors state that a limited period of unexampled and inflated prosperity has been suc-ceeded by a great collapse in prices and depression. It having It having been decided to raise a sum not exceeding 500,000l in 5 per cent. debentures, all the money that was required has been

obtained free of brokerage and other expenses. Great Northern Telegraph.—Interest on the shares at the rate of 5 per cent. per annum, will be paid on 1st proximo by Messrs C. J. Hambro and Son. Hudson's Bay.—The committee recommend a dividend of 15s

" for the purpose of receiving the resignation of the existing directors and for the election of new directors."

Newfoundland Land.—At a meeting, it was resolved to create 30,000 ten per cent, preference shares of 3l each, and to offer now 4,000 shares pro rata to the sbareholders in right of their

existing holdings. New Zealand Loan and Mercantile Agency Company, Limited.— The directors announce an ad interim dividend of 10 per cent. per annum for the past half-year, payable on 2nd July. MINING COMPANIES.

MINING COMPANIES. Almada and Tirito Consolidated Silver Mining.—The net profits for the half-year were 9,445l, against 4,806l for 1874, and the available total, after deducting the dividend paid in March, but including the above profit, is 20,653l, which exist in stores, ores in course of reduction in Mexico, and those prepared for shipment and in transitu. Australian United Gold Mining, Limited.—It has been decided that the company shall be wound up voluntarily, and Messrs H. W. Lamb, and J. H. Murchison have been appointed liquidators.

liquidators.

Cape Copper Mining.-A dividend of 20s per share, free of income tax, has been declared.

income tax, has been declared. St John del Rey.—The net profit on the working of the mines for the year has been  $83,241\ell$ , making, including interest accrued on funds in hand and the amount brought forward, an available total of  $89,538\ell$ . A dividend of 10 per cent. has already been paid, and it is now proposed to pay a further dividend of 20 per cent. and to carry forward 3,699\ell. The quantity of mineral raised from the mine during the twelve months was 40,226 tons, and the quantity stamped was 40.647 tons.

40,647 tons. Sweetland Creek Gold Mining.—There has been a gros duce of 5,522 ozs gold, realising 21,806l, at a cost of 13 13.0081. leaving a profit of 8,797*l*. Three dividends, amounting to 6,000*l*, have been paid during the year. The balance available is 2,871*l*. As a portion of this has been probably expended, the directors do not consider it advisable to declare any divi-dend. They propose, however, to carry 5 per cent. on the dividends paid during the year to reserve, and to write off the tunnel cost incurred during the year. This will absorb 1,346/, leaving 1.524/.

# The Commercial Times.

#### POST OFFICE ANNOUNCEMENT.

The French mail packet on the Brazil line leaving Bordeaux on the 5th of each month, which, owing to the prevalence of yellow fever at Rio de Janeiro, has for some time past omitted to call at that port, will resume its regular itinerary, commencing on the 5th July next.

with Manchester, had not attracted special attention of late, although the unprofitable nature of that trade has often been alluded to. The announcement of the failure of Messrs Alex. Collie and Co. thus appeared sudden, and its importance was increased. At present it is satisfactory to note that no diffi-culties have resulted outside the circle immediately affected by the sudden calling-in of assets by so large a firm, and the real losses appear to have fallen on the individual traders and joint stock financial houses best able to bear them. Be-yond this special circle, the effect on general business has been surprisingly small; more caution has been merely observed in all dealings, whether on the part of sellers or buyers. In a state surprisingly small; more caution has been merely observed in all dealings, whether on the part of sellers or buyers. In a state of generally unsound trade the object would be to sell freely, but no such tendency is apparent in the various commercial markets of the kingdom at present, and money is not in such demand as to lead to general depression. Although British wheatcrops "look well" according to general report the same cannot be said of the crops on the continent, where grain markets have shown considerable firmness at an advance in quotations. At home the lead has been followed, and the more readily that prices from New York also show a decided advance this week. Supplies of foreign wheat imme-

and the more readily that prices from New York also show a decided advance this week. Supplies of foreign wheat imme-diately at hand are fairly abundant and the quantity on pas-sage keeps up to the estimate of current wants, but the wea-ther has been sufficient to raise prices abroad, and to take away any pressure to sell here. Home supplies are very short just now in the provincial markets in consequence of this rally, and the opinion gains ground that prices have passed their lowest and are likely to rise. An advance of 1s to 2s per qr. is required by sellers of English wheat, and foreign is also firm to a less extent, but in no case are markets active at the higher quotations, millers remaining very cautious and supplyhigher quotations, millers remaining very cautious and supply-ing current requirements only.

ing current requirements only. Cotton has fallen in price both at Liverpool and New York; but the cause of the fall originated in the failures at Manchester. Considering the extent of those failures it is not very severe, and latterly has been recovered in some part. The issue of the official report of the American cotton crop from Washington appears to have had some effect in steadying prices. The increased acreage planted is about 1½ per cent., and the condition at the beginning of this month was 96 per cent. of an average against 83½ per cent. a year ago. The con-dition is likely, as usual, to be very variable, however, during the summer months, and no great increase of crop over that of last season is anticipated. At Manchester the shock of Messrs Collie and Co.'s failure came upon a dull market and did not directly affect it much, as the liabilities were princi-pally in London. Indirectly, through the resulting stoppage of Messrs Westhead and Co., manufacturers, some trouble has become appparent, and there remains a great disinclina-tion to do business. Under these circumstances stocks accumution to do business. Under these circumstances stocks accumu-late, prices tend to give way, and the markets for yarns and cotton goods are very unsettled.

The London wool sales have come to a close without any loss of the growing firmness which distinguished the course of prices up to the close. In the manufacturing districts, various failures connected with the Manchester trade, besides some more directly affecting the woollen trades of Yorkshire and Scotland, have given business a very dull appearance. Prices for wool at Bradford and York have given way in the absence of demand, although there is no great pressure of new wool at the local fairs and markets. Quietude and caution are the characteristics of business; wool is neither offered nor inquired for with any activity, and if quotations for yarns and goods are upheld they are in most cases nominal. Spinners are still reported well engaged. Piece goods are bought only for immediate requirements. The iron trade has not outwardly shown any effects from The London wool sales have come to a close without any loss

The iron trade has not outwardly shown any effects from the new disturbances in the money market, but there is a little more dulness and disinclination to give out fresh orders. There is, perhaps, more general disinclination to take them at present prices, except from houses enjoying the first credit. Best iron remains steady, but the declining tendency in coal continues to affect lower descriptions which are offered in the markets. Pig iron, with the exception alluded to, is, in most districts, lower for the week, and finished iron tends in the same direction. The wages question is in course of settle-ment, at a lower minimum basis than that hitherto fixed in the Derby scale as a guide for South Staffordshire and the North of England.

The produce markets, though showing little animation, reflect little of the depression resulting in some branches of trade from the failures announced during the week. The market for sugar remains dall, but cargoes are taken for the market for sugar remains dull, but cargoes are taken for the continent at full prices. Messrs Carey and Browne's circular states that "pending a definite arrangement of refining in France, Holland, and Belgium, which it is hoped may result from the recent conference on the subject held in Belgium, refiners seem unwilling to anticipate requirements, and their purchases are limited to immediate wants." Coffee, after showing further dulness, has again been in demand at some recovery in price. Tea dull and weak where transactions occur.

Oils and seeds with a tendency to but without actual improve ment. Metals quiet, and sometimes weak as to price.

#### EXTRACTS FROM TRADE CIRCULARS.

(From Messrs Willans, Overbury, and Co.'s Report on the London Colonial Wool Sales, dated June 17.)-The second (From Messrs Willans, Overbury, and Co.'s Report on the London Colonial Wool Sales, dated June 17.)—The second series of colonial wool sales for the current year, which com-menced on the 4th ultimo, terminated this day. The following quantities have passed the hammer :—From New South Wales and Queensland, 50,047 bales; from Victoria, 110,467; from Tasmania, 6,319; from South Australia, 38,296; from New Zealand, 35,682; from Western Australia, 5,469; from the Cape of Good Hope, 24,992—total, 271,272 bales. Prices during these sales have been marked on the whole by great steadiness, having regard to the length of the series and the large quantity placed on the market. Commencing with a slight improvement in Capes, and very firm rates for Australian and New Zealand wools, an upward tendency set in at an early period. This upward tendency gradually developed into a positive advance on certain descriptions, which, when the market was at its best, was quoted as follows:—Snow white Capes, 1½ per lb; fleece, ld; superior Sydney fleeces, 2d; extra fine Port Phillip combing fleeces, 3d; washed crossbreds, 2d; greasy, 1d per lb. Very large purchases have been made on continental account, chiefly for France, but it is understood that America has been entirely inactive. The total quantity taken for export is estimated at 135,000 bales. 135,000 bales.

(From the Flax Supply Association's Report of the Irish Flax Crop.)—As the condition and prospect of the Irish flax crop is this year of more than usual importance, queries were issued, since the May report was published, to districts in each county in Ulster; also to the Flax-growing districts in Munster, Leinster, and Connaught, to ascertain the progress which the crop had made since the report above alluded to, and it is most satisfactory to observe the favourable influence which the recent copious rains have produced on the crop in its various stages of growth. its various stages of growth.

The cotton market further declined about \$d per lb at the close of last week, but opened on Monday with increased demand and a hardening tendency. Yesterday the advices from London of commercial failures had an unfavourable demand and a hardening tendency. Testerday the advices from London of commercial failures had an unfavourable influence; prices gave way and became irregular, though the business was considerable. There has been more steadiness to-day, but quotations generally show a marked reduction. Sea Island continues in fair demand at steady rates. American, after falling about  $\frac{1}{3}$  der Ib and a partial recovery, has again given way, and is quoted about  $\frac{3}{16}$  d per Iblower than last week. In Brazilian a fair business has been done, quotations being generally reduced  $\frac{1}{3}$  d per Ib. Egyptian continues dull of sale, at a partial decline of  $\frac{1}{3}$  d per Ib. West Indian and African are in demand at previous rates. Peruvian continues dull of sale, but quotations are unchanged. East Indian has partaken in the general dulness, and only a moderate business has been done, at a decline of  $\frac{1}{16}$  d to  $\frac{1}{3}$  d per Ib. In cotton " to arrive" and for future delivery the transac-tions have been considerable, with much fluctuations in prices. The latest quotations show a decline of about  $\frac{1}{16}$  d per Ib. The sales of the week amount to 57,520 bales, of which 3,270 are on speculation, and 6,700 declared for export, leaving

# THE ECONOMIST.

#### MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 17 .- We have little to add to our report of last week. In all departments, both of cloth and yarn, there seems an entire absence of inquiry, and the heavy failures already announced, and the rumours of still further complications have naturally intensified the feeling of depression now so long apparent in this market. As to actual business, the transactions concluded during the past week have been merely nominal, and in no case of such a nature as to show an inclination for business in any direction.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The wool market is quiet. The various failures in other parts of the kingdom, though they had no direct effect on this district, tend to produce a quiet and cautious feeling in this market. Home-trade spinners con-tinue well engaged. No improvement can be reported in the piece market. Prices are steady.

LEEDS .- In the cloth halls business was of a limited extent. Purchases have been confined to present requirements. In the warehouses, to which the leading buyers now resort, a good trade is doing, and many of them have placed orders to a large amount. The shipping houses also report a better state of things, and manufacturers have orders in hand which will keep them employed for some time. Prices are gradually hardening.

BIRMINGHAM.-A rather gloomy feeling pervaded the meeting, when the chief topic of discussion was the new batch of failures, to which one or two additions were made by telegraph before the meeting separated. So far, this district has escaped very well, and trade, though depressed, is believed to be fairly sound, but business in the local iron trade has been very unprofitable for a long time past. Meanwhile great caution is observable on all hands, and transactions are con-fined within the narrowest limits. Manufacturers are less eager about replacing orders in the present unsettled state of commercial affairs.

DUNDEE.—In jute materials there is a more hopeful feeling, as it is expected that short time and stoppage of machinery will gradually bring round the trade to a more healthy position. In the linen departments there has been rather more activity, in consequence of the prospects of a higher range of flax prices resulting from the damage done to

reial), 4.85 dols, Gold at New York, 115 men at New York (co

this year's crops on the continent; the small supplies coming forward from the Baltic, the exhausted state of stocks of flax

forward from the Baltic, the exhausted state of stocks of flax of good medium quality on this side, and the unfavourable prospects of replenishing same by early importations. MIDDLESBOROUGH.—The market was well attended, and business was improved in tone, there being a better demand for pig iron. Prices, however, were lower. The stock of iron is increasing so rapidly that at least a dozen furnaces will be blown out at an early date, and production reduced to about the requirements. A few rail orders, mostly on colonial account, continue to be received but comparatively little new account, continue to be received, but comparatively little new business is done in this or any other description of finished iron.

WOLVERHAMPTON.—Transactions in pig iron were few. Finished iron of second quality sold in small lots, at prices slightly in buyers' favour. Coal dull, but firmer.

#### CORN.

#### AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-June 4.

There has been some further depression in the flour market, especially in the low grades, and notably superfine, in sym-pathy with a further decline in wheat, with a slight increase in supplies. The wheat market has declined under increased supplies by canal and rail, dull accounts from abroad, and an advance in ocean freights. Yesterday the market assumed a firmer tone, gold and exchange were higher, and freights easier. Stocks are large, but receipts show a large falling off as com-pared with last year; and, at the present rate of movement, stocks must undergo a rapid reduction. Crop accounts con-tinue, on the whole, quite favourable. The harvest has begun in the extreme South. Indian corn showed continued weak-ness at the opening, and as late as Wednesday there were sales of "steamer" mixed at 72½e to 73c, and sail mixed at 80c to 81c; but yesterday a variety of favourable circum-stances prevailed, and the close was fully 2e higher, with a large business. Of corn, as of wheat, there is a large falling off of receipts. To-day, the market was firmer but quiet. Rye lower and unsettled. Canada peas offered at \$1.18 in bond, without buyers. Barley malt active for early arrival, at full prices. Oats depressed. advance in ocean freights. Yesterday the market assumed a

### LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

Rain has been very general throughout the country during the week, and from all accounts has done much good to the growing crops, of which the reports, with very few exceptions, continue extremely favourable. In France, too, the weather has improved. The deliveries of home-grown wheat have further fallen off, and prices have in many of the country markets again advanced 1s to 2s per qr upon these descriptions. At Mark lane the receipts of English have been very meagre, but country which has in some cross realised but except on prime red wheat, which has in some cases realised Is per qr more, quotations are not appreciably altered, though very firm. The imports of foreign wheat have rather increased, but in the early part of the week the supplies were sufficiently moderate to enable factors to obtain 1s advance on American spring descriptions, transactions, however, being of only limited extent; and prices of all other kinds of foreign remaining firm at previous rates. Latterly, the American telegrams have shown weaker markets over there, with some reaction from the recent advance; and although the adverse movement in freights prevents any tangible fall in the actual cost of export the effect has been rather to weaken our market, and to day American spring wheat for shipment was quoted is per quarter worse; whilst on the spot the extreme rates bid earlier in the week were not repeated. From the northern contiearlier in the week were not repeated. From the northern conti-nental producing ports the quotations come again dearer, and from the south of Russia firm; but these latter ports are still shipping freely, and mainly from this cause the quantity of wheat on passage continues to increase, amounting now to about 1,400,000 qrs. English flour in some of the provincial markets has followed wheat with a rise of 6d to 1s per sack; but there is nowhere improvement in the value of foreign, of which the imports have increased, and in London outstions but there is nowhere improvement in the value of foreign, of which the imports have increased, and in London quotations of all descriptions are unchanged. With some falling off in the supplies of home-grown as well as foreign, barley has realised firmer prices; but the trade is not active, in any position. Azoff barley has most engaged attention, at 24s 3d per 400 lbs. Large arrivals of beans have caused a decided reduction in the value of foreign descriptions of the commence per 400 lbs. Large arrivals of beans have caused a decided reduction in the value of foreign descriptions of the commoner qualities; Barbary quoted at 36s to 38s; Egyptian, of which the supplies have largely consisted, are held at about 36s per 480 lbs on the spot. Off the coast, Larache have sold at 34s, usual floating terms. Peas have been easier to buy, and occa-sionally Is per qr lower. The first supplies of oats from St Petersburg this season have come in this week, and have met

a steady sale, at 22s to 23s per 304 lbs; light, undried Riga and Reval have sold slowly, at 19s to 20s 6d per 304 lbs. Stout oats are dearer, with few offering. Maize rather ad-vanced at the commencement of the week, on higher quotations from New York, but the market closes quiet.

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE POSTS MINCING LANE, FRIDAY MORNING.

MINGING LANE, FRIDAY MORNING. SUGAR.—The market has been devoid of animation, with increasing supplies, and a cossation of speculative operations. Transactions in West India have been unusually limited, viz., 1,178 casks to yesterday. Prices generally are unchanged, but sales to any extent could only be made at some decline. Barbadoes by suction was chiefly taken in, a few lots selling at 20s to 21s 6d. Crystalised Demerara sold at 23s to 26s 6d, and fine white at 28s 6d to 29s. Low brown sorts have sold at rates in favour of the buyers. A good business has been done in float-ing cargoes, the importers selling at moderate prices. Refined does not maintain the recent improvement. Beet productions unchanged. The landings of sugar during the past week were considerably in excess of the landings, and the stock in the chief ports of the United Kingdom at the close was estimated at 163,500 tons, against 231,000 tons in 1874. At the same date in 1873 it was about 170,000 tons; in 1872 about 87,000 tons.

87.000 tons.

Jaggery. -100 tons to arrive at 15s. Natal.-1,019 bags found buyers at 18s 6d to 20s for brown, and 17s

*Foreign*.-1,676 bags Reunion, by auction, were taken in at 24s for soft grainy yellow. The sound of 3,267 bags Martinique partly sold at 28s 6d for fine crystalised white, and 26s to 26s 6d per cwt for the washed. 758 casks 240 barrels Porto Rico part sold at 22s 6d to 24s 6d for low to good yellow. Privately, 300 tons Manila, at 16s per cwt for Ho Ho. ewt for Ilo Ilo.

One of Havana, clayed No. 12, at 24s 6d ; one De-Floating Cargoes. Floating Cargoez.—One of Havana, clayed No. 12, at 24s 6d; ona De-rosne, No. 141, at 26s 9d; one, same number, no price given; one Porto Rico, at 23s. The above for various foreign ports, with other cargoes not reported. One Porto Rico, at 21s 9d; two of West India Trinidad, at 20s; Tobago, at 20s 9d for the United Kingdom; also one Cuba: Centrifugal, 24s 6d; Muscovado, 20s 9d; and molasses sugar at 18s 6d. *Refined.*—There has been less inquiry for dry goods than quoted last week. Say's loaves, for delivery here, have sold at 29s 6d. Pieces and Civda crushed rather otherware with a mediante amount of humans

Clyde crushed rather cheaper, with a moderate amount of business

doing. MoLASSEE.—No sales reported in West India. 96 casks Australian French, by auction, sold at 14s to 15s per cwt. COFFEE.—The heavy quantity of plantation Ceylon and East India again brought to public sale has all found buyers, and met an active demand. Prices irregular and occasionally 1s to 2s lower than on Friday bet. The latest stock return for this port showed that an increase of again or or prior sate has an round onyers, and net an accete demand. Prices irregular and occasionally 1s to 2s lower than on Friday last. The latest stock return for this port showed that an increase of more than usual importance had taken place, and the imports have to this date been larger than the deliveries. 3,376 casks 184 barrels 1,938 bags plantation Ceylon by auction all sold: pale and greyish, 99s to 106s, small in proportion; colory, 102s to 105s 6d; good to very fine bold, 106s to 116s; small in proportion. 2,401 cases 3,178 bags East India: Neilghery, 101s to 116a 6d: Coorg and Wynaad, 99s to 108s 6d; small 96s to 100s as in quality; Mysore, 108s to 123s for small to bold; Native Cochin, &c., 91s to 93s 6d. 127 packages Mocha withdrawn. Of 7 casks 65 barrels 1,273 bags Jamaica partly sold: ordinary and pale, 83s to 90s; low middling, 98s to 101s. Of 6,851 bags Costa Riea about three-fourths sold : low and ordinary, 83a to 87s 6d; fine ordinary to low middling, 89s to 94s 6d; middling to superior colory, 95s to 106s 6d. 711 bags Rio chiefly withdrawn. 5,521 bags other foreign, part sold, including Guatimala at 88s to 104s; New Granada at 84s 6d. During the week a cargo of Santos has sold at 82s. The Dutch sale on the 23rd instant will contain 85,600 bags. Increars and Damivennes of Correr to Longen 157

INDIGO .- Declarations for the ensuing sales now amount to 11,550 chests.

OTHER DRYSALTERY GOODS .- Gambier has been in demand, at advancing prices, and several sales reported for arrival at 26s to 27s, according to date of shipment. On the spot, 27s 6d to 28s, and even 29s paid for block. A large business done in Myrabolanes, at 10s to 17s. Sales of Bengal turmeric at 23s to 24s; the latter price paid for a parcel sold by auction. 187 cases China galls were bought in at 53s nor ext. Catch has redd at 23s par ext.

178. Shos of Benghi turtuente at 258 to 278, the latter price pair for a parcel sold by auction. 187 cases China galls were bought in at 53s per cwt. Catch has sold at 23s per cwt. SHELLAC has been dull. By private contract fine orange sold at 13l 15s. 259 chests by auction were chiefly taken in. A few lots second orange sold at easier rates, from 10l 15s to 10l 17s 6d per cwt. METALS.—These markets, which remain rather quiet, have not under-gone any material change since last Friday. The demand for iron has been of a very moderate character, and there are not at pre-sent any symptoms of the foreign trade improving. Scotch pig steady, and the shipments have been upon a more extended scale. Latest sales at 58s 3d to 58s 4½ d cash. The market for lead is quiet. No transactions reported in Silesian spelter. At the usual public sale of sheet zinc rolled at the London mills 140 tons were offered and 85 tons sold at 27l 12s 6d. Copper generally dull, with prices partly nomical. Chili 82l for good ordinary, and Burra last sold at 87l 10s. English can be bought upon rather lower terms. Tin has advanced, and since last Friday a considerable quantity sold. The market is now more quiet, latest quotations: Straits, 84l to 84l 10s cash;

advanced, and since last Friday a considerable quantity sold. The market is now more quiet, latest quotations: Straits, 84*l* to 84*l* 10s cash; for delivery this and next month, 84*l*. During the week business to arrive at 83*l* to 84*l*. Australian has sold at 82*l* to 82*l* 10s per ton. JUTE.—During the week a few parcels have sold partly for arrival, and the market is quiet here as well as in Dundee. Public sales were held on Wednesday, viz., 12,245 bales, of which about one-third part sold, the bulk "without reserve" at some reduction, and rates are now at an unusually low point. The range in the above sale for the portion sold was 9*l* 5s to 17*l* 5s per ton for common to good quality. MANILA HEMP.—The next public sales will be held on the 23rd inst. A steady market and very moderate transactions reported by private contract.

contract.

contract. HINES.—The sales of East India have gone heavily, and, in many cases, at a decline of 1d per lb. Quantity offered, 99,964, and only 19,616 sold. No alteration to report in buffalo hides. LINSEED is dull, and lower. Calcutta, 508 6d; Bombay, 51s. Some of the latter by auction, realised 51s. Contracts made in Calcutta to arrive, at 51s 6d to 52s 3d per quarter, according to date of shipnt.

Ment. OILS.—The markets generally have been quiet. Sperm can be bought at about 100% for good. Common oils dull. Olive has continued slow. A few sales are reported, including Mogadore, at 38% per tun. Moderate transactions in linseed oil at lower rates. On the spot, 24% 5s

to 241 7s 6d; last six months quoted about 24/ 15s. English brown rape dull, and 30/ to 30/ 5s accepted, and for delivery this and next month, 30/ 10s, the nearest value; last four months, 31/ 10s; refined, 32/ to 32/ 5s; foreign, 33/ 10s, and the latter is scarce. The markets for cocca-nut and palm are unsettled, with comparatively small tran-sactions. Prices about the same as last week—the former, 37/ 5s to 37/ 15s; Ceylon, 41/ 10s to 43/ 10s; the latter, 34/ per tun for fine Lagos. PERFORMENT OUL, quick Prices on the same Asid to 9d. last for PETROLEUM OIL quiet. Prices on the spot, 8ªd to 9d; last four months, 10d to 10 d per lb.

SPIRITS TURPENTINE .- Sales at lower rates. American, 22s 3d to

22s 6d; July to December, 23s to 23s 6d. TALLOW.—There has not been any change in foreign. Petersburg is firm. This morning the quotation is 44s to 44s 3d; old, 43s to 43s 3d per cwt. Moderate supplies of Australian and old at 43s per cwt.

POSTSCRIPT. FRIDAT EVENING. SUGAR.—The public sales were confined to West India, which went stead at easier rates for crystalised Demerara, viz., 23s to 26s for low to fine, and 26s to 27s for white. Barbadoes chiefly bought in. Refining kinds of West India dull. To-day's sales 691 casks, making 1,915 casks for the week. A cargo of Cuba, 1,167 casks and 285 boxes, sold at 21s for the United Kingdom. The bought in portion of the Porto Rice this week at 21s for orev. Rice this week at 21s for grey. COFFEE.-396 casks 21 barrels 8:2 bags plantation Ceylon and 157

cases 1,374 bags East India sold at firmer prices, and the decline quoted upon some kinds during the week is recovered. 312 bags native Ceylon realised high prices: bold, 97s 6d to 98s 6d; smaller of good quality, 89s 6d to 90s 6d. 780 bags Manila part sold at S3s to 84s 6d. 265 bags Singapore sold at 76s 6d to 80s 6d; fine bold, 94s. 233 bags African were taken in at 75s.

RICE quiet.

RICE quiet. SHELLAC.-341 chests by auction were chiefly withdrawn. SAFFLOWER.-57 bales Bengal sold at lower rates, from 67s 6d to 80s per cwt for middling to good. LAC DYE.-255 chests partly sold at lower rates, from 1d to 5d

per lb.

METALS .- Scotch pig iron, 58s 9d cash.

TALLOW.-Russian and town tallow unaltered. 819 casks Australian by auction, went at fully last week's rates, and nearly all sold. Mutton, 40s to 43s; beef, 36s 6d to 40s 9d. 100 casks home melted, part sold at 37s 6d. 212 packages Singapore vegetable tallow withdrawn.

#### ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states the orange market is well sustained. Lemons have improved in value, particularly those of good quality. Barcelona and new Brazil nuts in moderate request. Lisbon onions are much lower in price, owing to

moderate request. Lisbon onions are much lower in price, owing to very large supplies; the same also applies to new potatoes from Malta and Lisbon, which are much reduced in value. First cargoes West India pine apples have arrived, and sell at moderate rates, owing to earliness of the season, and some of the fruit being small in size. TEA.—The market is very dull, and hardly any business doing by private contract. The sales passed heavily, and a farther decline of  $\frac{1}{3}$ d per lb on black leaf Congous, and of 1d on young Hysons, was recorded. Rumours of excessive shipments from China, and of further mercan-tile and financial embarrassments, tend to increase the depression. DRY FRUIT.—The market is without any change, and hardly any business is doing.

usiness is doing. ENGLISH Wool quieter, manufacturers having supplied themselves

r immediate requirements. FLAX .- Market steady.

HEMP.—Market for Russian is steady. Manila is firmer, and a good business doing at an advance of fully 2/ per ton; this article is now very firmly held SILK.—Very little doing in silk, buyers waiting for the large public

sales of next week.

SEEDS .- There is very little business passing in seeds, and quotations

ToBacco.-There has been rather more doing during the past of ToBacco.-There has been rather more freely, but only for their TOBACCO.—There has been rather more doing during the past week, home buyers having operated rather more freely, but only for their im-mediate requirements. There is but little inclination to operate for stock, as holders will make no concession upon present rates, even for parcels

as holders will make no concession upon present rates, even for parcels round. For export, there is but little stock now offering, and high prices are obtainable for fine grades. For substitutes there has been an active demand, and segar tobaccos are much wanted. LEATHER.— There has been a very dull trade in leather throughout the past week, and at Leadenhall on Tuesday, the demand was again restricted to the immediate requirements of buyers. The supplies of fresh goods are moderate; the articles principally in request are bark-tanned English butts 24 lb and under, and good call skins of all weights, which are not plentiful. Prices are unaltered. METALE.—We found the large failures and free circulation of rumours

METALS.—We found the large failures and free circulation of rumours engrossing general attention, to the exclusion of business. Copper is quiet, and the week's operations have been unusually small; but prices have not given way more than about 10s per ton. Iron is very dull. Tin has shown a little life, being about 20s a ton dearer, for some kinds, at the sease of the week is dearer. at the close of the week. Spelter is firm, but lead and tin plates are both cheaper.

#### METROPOLITAN CATTLE MARKET.

METROPOLITAN CATTLE MARKET. MONDAY, June 14.—The total imports of foreign stock into London last week amounted to 17,619 head. In the corresponding week in last year we received 12,210; in 1873, 21,842; in 1872, 8,444; in 1871, 14,869; and in 1870, 8,168 head. In the cattle trade to-day there has been an increased amount of steadiness. The supplies have been less numerous than on Thursday last. The receipts of home-fed heasts have been about the average, and some good serviceable stock has again been offered. For prime breeds there has been a healthy inquiry, at steady prices; otherwise, the trade has been quiet, quotations ruling about on a par with those current on Monday last. The best Scots and crosses have sold at 5s 10d

June 19, 1875.

# THE ECONOMIST.

01 1

## 743

the

to 6s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we have received about 1,800 head, from other parts of England about 500, and from Scotland 71 head. On the foreign side of the market there have been about 400 Dutch and 250 Danish beasts. With a quiet market, quotations have been unaltered. In the sheep pens there has been a less extended supply, and prime breeds have been rather scarce, consequently the actual weight of meat exhibited has been compara-tively smaller than usual. Throughout the demand has been steady, and for the best breeds 2d per 8 lbs more money has been paid. The best Devons and half-breds sell at 6s 8d to 6s 10d per 8 lbs. Lambs have been dull, and the top prices have fallen to 7s 4d per 8 lbs. Calves have changed hands quietly, at about late rates. Pigs have been in-active. At Deptford there have been 360 German, and 140 French beasts. beasts.
