In January, country folks in Holland say the "Foolish Maidens" are up; a nicer old English expression was the "Fair Maids of February" are back again. The French have "Perce-Neige" for this earliest of spring heralds. Their persistency is noteworthy; they thrive in cold climates, are not fussy about being disturbed, and neglected shady places are exactly their paradise. Of them it is often said: "Grandmother planted these." Ideal for rockeries.

They are among the most beautiful of our very early Spring-flowering bulbous subjects; their brilliant blue, varied with white, brightens the garden when few other flowers are in bloom. It is not unusual to see them in bloom in the edge of melting snow. Once established, they become increasingly beautiful for years.
