## ADVERTISEMENT.

---

IN the preparation of the following Index, two objects have been specially kept in view: the first, to render it as completely as possible an Index of easy reference to the 'Royal Atlas;' and the second, to make it, as far as was compatible with this primary object, available with regard to other geographical works, and in some degree a substitute for the Gazetteer.

In carrying out the first of these objects, care has been taken to secure insertion of every name that occurs in the 'Royal Atlas;' but, to avoid confusion, these names are now referred only to the principal and largest-scaled Map on which they may appear. The only exception to this is in the case of Rivers which, flowing through a large extent of country, may necessarily appear and be referred to on more than one Map. The original references to the Maps by means of Letters designating spaces on them are still retained; while the positions are more precisely given by means of the Latitudes and Longitudes, calculated as closely as the scale of the Maps would allow. To Towns and Villages alone, no other designation is appended; to Districts, Provinces, Lakes, Rivers, Mountains, &c., their proper designations are added by the appropriate abbreviations.

With a view to the second of the objects referred to—the promotion of the general usefulness of the Index as a work of reference—not only have all the names as they appear in the 'Royal Atlas' been inserted in it, but, so far as they could be collected, all popular variations of these as regards spelling, all historical and now obsolete forms or names, and in general all *aliases*, have also been included, with, of course, reference from these to the form under which the place appears in the work to which the Index primarily refers. Thus, while "Puducheri" and "Kachh" are adopted in the Map as more in consonance with Eastern pronunciation than "Pondicherry" and "Cutch," the latter, as of constant recurrence in ordinary usage, are likewise given in the Index.

In addition to the Countries or Kingdoms, the subdivisions of these countries—as Counties, Provinces, Districts, Presidencies, &c.—have been appended to every name: and it is hoped that this will materially enhance its value, not only as an Index to the 'Royal Atlas,' but for all ordinary purposes of general reference.

The Arrangement adhered to throughout has been the strict Alphabetical one. Such names as Newtown, for instance, will be found under that spelling, whether ordinary usage gives them the form of one word or of two. For a similar reason—that in many cases the prefix has now become an integral part of the name, and in many others it is so employed by some writers, and not by others—all names bearing the prefix Saint under any of its modifications—Sainte, San, Santa, Sao, or Szent—will be found under these heads respectively.
