RADFORD'S

ARTISTIC HOMES

250 DESIGNS

Being an absolutely brand new book illustrating the newest and most up-to-date designs in modern homes. Great care has been exercised in the selection of original, practical and ideal house designs such as seventy to ninety per cent of the people of today wish to build. Every effort has been made by a corps of experienced licensed architects to provide for the most economical construction, thus giving the contractor and the home builder the benefit of the saving of many hundreds of dollars. This is the largest single book of house designs ever published.

Radford's Artistic Homes

The Americans are a nation of home builders. A man's standing in any community is based largely on the kind of house he lives in. If it is his own home he enjoys an importance that does not attach to the man who pays rent. The instinct of home owning is as natural as the air we breathe. From the bird of the air who builds her nest in the spring to man, the king of all, it finds expression in various forms.

One may wonder, in glancing over the beautiful structures shown in this book, at the marvelous advance made in home architecture in recent years. It is not a difficult stretch of imagination between the makeshift habitations of the early days to the beautiful habitations of comfort and luxury shown in these pages, yet it has been a development slow and sure, keeping pace with the advancement of the race along all lines.

It will be noticed, in glancing over the pages of this book, that there is a wide diversity of design shown in the houses. This is done deliberately, as the taste in home architecture is as wide as that in any other field. There are houses for people of moderate means and there are others for the more wealthy. But in every case the design is made with reference to convenience and economy, and no pains or expense has been spared in their preparation.

We would have you know that every design shown is made by the best architects in the world, who have made a study of home architecture and that alone. So that what you see here represents the best that possibly could be secured. During the many months that it has been in preparation the volume has received the benefit of the most careful attention and many designs have been rejected to make place for others that were considered better. In a word, it is the best that could be secured.

Now, the purpose in presenting this book to the public at this time is to make more easy the problem of house building for the dweller in rural communities, in small towns and in cities, for there are designs here that will be found adapted to any community. In selecting the design of a house there are a number of factors that should be taken into consideration. The size of the lot, the possible slope of the ground and the surrounding buildings have much to do with the design. In other words, the artistic sense will direct the selection of a design that will be in harmony with the surroundings. These are things that should be considered at the outset, for the selection of the design indeed is the most important feature of the problem. Pick a design that assures plenty of room for the needs of the family, and even of its future needs. It will not be necessary to consider the matter of convenience, for the architects have

solved that problem for you in every case. Every house is planned from the inside and not from the outside; that is to say, the convenience of arrangement has been the first consideration, and we believe this fact will be appreciated by the wives and daughters.

Now, as to the location of the house, it should not be placed in the middle of the lot. To provide lawn room and a place for shrubbery and flower beds the house should be at one side or well back so that when the lawn decorations are placed the picture will be artistic and the grounds will seem to be really a part of the house. Often this point is overlooked and an otherwise stylish house is ruined by being out of harmony with the lot on which it sits.

A man who builds a home owes a duty not alone to his family and himself, but he is under a moral obligation to the community as well. What we mean by this statement is that no man has a moral right to build a house that will be unworthy of the community in which he lives or which, by its lack of style, will tend to depreciate the value of property in the neighborhood. In house building, as in all other things in which men engage, the purpose should be improvement and betterment. So we advocate only a house built from accurately drawn plans, a house with style.

As the house may be the habitation of the family for life, no greater calamity in a material way can befall the owner than to discover when the house is complete that it is faulty in arrangement or in appearance. This is apt to be the case with a house built without plans. On the other hand, it is a source of constant joy and satisfaction to live in a house that is properly constructed from accurately drawn plans and which is worthy of the neighborhood.

Let us impress upon your mind one vital thing. NEVER build a house without plans to work from. It is hardly necessary to tell you that no more foolish thing is ever done by a man than to try to build without plans or with rough pencil sketches that are just as bad. We could show you in our files thousands of letters from persons who have ordered plans after failing miserably in their efforts to build without accurate drawings. Here are some of the things that happen to the man who tries to build without plans: His house lacks style, that peculiarly pleasing aspect that is only possible in a house built from an accurate design. He wastes materials. He wastes the time of his workmen. He wastes nervous energy in worry over mistakes, and when the house is done, if it ever is, he has a monstrosity that people laugh at as they go along the street. This window will not be square and that floor will not be level, and worst of all, he himself will be dissatisfied with it.

Now, every design in this book is drawn with a faithful regard for mathematical accuracy, and there is no error to bother the builder. It is safe to say that the saving in materials that will result from building after any of these plans will more than pay the price of them. So be sure you start right—build only with accurately drawn plans.

We Illustrate in this Book

the perspective view and floor plans of over 300 moderate-priced buildings.

In the preparation of this work great care has been exercised in the selection of original, practical and attractive house designs, such as seventy-five to ninety per cent of the people to-day wish to build. In drawing these plans special effort has been made to provide for the MOST ECONOMICAL CONSTRUCTION, thereby giving the home builder and contractor the benefit of the saving of many dollars; for in no case have we put any useless expense upon the building simply to carry out some pet idea. Every plan illustrated will show, by the complete working plans and specifications, that we give you designs that will work out to the best advantage and will give you the most for your money; besides every bit of space has been utilized to the best advantage.

\$100.00 Plans for only \$10.00 This department has for its foundation the best equipped architectural tion the best equipped architectural working plans and specifications at the remarkably low price of only \$7.00 to \$15.00 per set. Every plan we illustrate has been designed by a licensed architect, who stands at the head of his profession in this particular class of work and has made a specialty of low and medium-priced houses. The price usually charged for this work is from \$75.00 to \$100.00.

What We Give You The first question you will ask is, "What do we get in these complete working plans and specifications? Of what do they consist? Are they the cheap printed plans on tissue paper without details or specifications?" We do not blame you for wishing to know what you will get for your money.

Blue Printed Working Plans

The plans we send out are the regular blue printed plans, drawn one-quarter inch scale to the foot, showing all the elevations, floor plans and necessary interior details. All of our plans are printed by electricity on an electric circular blue-printing machine, and we use the very best grade of electric blue-printing paper; every line and figure showing perfect and distinct.

Foundation and Cellar Plans

This sheet shows the shape and size of all the walls, piers, footings, posts, etc., and of what materials they are constructed; shows the location of all windows, doors, chimneys, ash-pits, partitions, and the like. The different wall sections are given, showing their construction and measurements from all the different points.

Floor Plans These plans show the shape and size of all rooms, halls and closets; the location and size of all doors and windows; the position of all plumbing fixtures, gas lights, registers, pantry work, etc., and all the measurements that are necessary are given.

Elevations A front, right, left and rear elevation are furnished with all the plans. These drawings are complete and accurate in every respect. They show the shape, size and location of all doors, windows, porches, cornices, towers, bays, and the like; in fact, give you an exact scale picture of the house as it should be at completion. Full wall sections are given, showing the construction from foundation to roof, the height of stories between the joists, height of plates, pitch of roof, etc.

Roof Plan

This plan is furnished where the roof construction is at all intricate. It shows the location of all hips, valleys, ridges, decks, etc.

All the above drawings are made to scale one-quarter inch to the foot.

Details All necessary details of the interior work, such as door and window casings and trim, base, stools, picture moulding, doors, newel posts, balusters, rails, etc., accompany each set of plans. Part is shown in full size, while some of the larger work, such as stair construction, is drawn to a scale of one and one-half inch to the foot. These blue-prints are substantially and artistically bound in cloth and heavy water-proof paper, making a handsome and durable covering and protection for the plans.

Specifications

The specifications are typewritten on Lakeside Bond Linen paper, and are bound in the same artistic manner as the plans, the same cloth and water-proof paper being used. They consist of twenty-two pages of closely typewritten matter, giving full instructions for carrying out the work. All necessary directions are given in the clearest and most explicit manner, so that there can be no possibility of a misunderstanding.

Basis of Contract The working plans and specifications we furnish can be made the basis of contract between the home builder and the contractor. This will prevent mistakes, which cost money, and they will prevent disputes which are unforeseen and never settled satisfactorily to both parties. When no plans are used the contractor is often obliged to do some work he did not figure on, and the home builder often does not get as much for his money as he expected, simply because there was no basis on which to work and upon which to base the contract.

No Misunderstanding Can Arise when a set of our plans and specifications is before the contractor and the home builder, showing the interior and exterior construction of the house as agreed upon in the contract. Many advantages may be claimed for the complete plans and specifications. They are time savers, and, therefore, money savers. Workmen will not have to wait for instructions when a set of plans is left on the job. They will prevent mistakes in cutting lumber, in placing door and window frames, and in many other places where the contractor is not on the work and the men have received only partial or indefinite instructions. They also give instructions for the working of all material to the best advantage.

Free Plans for Fire Insurance Adjustment You take every precaution to have your house covered by insurance; but do you make any provision for the adjustment of the loss, should you have a fire? There is not one man in ten thousand who will provide for this embarrassing situation. You can call to mind instances in your own locality where settlements have been delayed because the insurance companies wanted some proof which could not be furnished. They demand proof of loss before paying insurance money, and they are entitled to it. We have provided for this and have inaugurated the following plan, which cannot but meet with favor by whoever builds a house from our plans.

Immediately Upon Receipt of Information from you that has been destroyed by fire, either totally or partially, we will forward you, free of cost, a duplicate set of plans and specifications, and in addition we will furnish an affidavit giving the number of the design and the date when furnished, to be used for the adjustment of the insurance.

Without One Cent of Cost to You and without one particle of trouble. We keep a record of the number of the house design and the date it was furnished, so that, in time of

loss, all it will be necessary for you to do is to drop us a line and we will furnish the only reliable method of getting a speedy and satisfactory adjustment. This may be the means of saving you hundreds of dollars, besides much time and worry.

Our Liberal Prices

Many have marveled at our ability to furnish such excellent and complete working plans and specification at such low prices. We do not wonder at this, because we charge but \$7.00 to \$15.00 for a more complete set of working plans and specifications than you would receive if ordered in the ordinary manner, and when drawn especially for you, at a cost of from seventy-five to one hundred dollars. On account of our large business and unusual equipment, and owing to the fact that we divide the cost of these plans among so many, it is possible for us to sell them at these low prices. The margin of profit is very close, but it enables us to sell thousands of sets of plans, which save many times their cost to both the owner and the contractor in erecting even the smallest dwelling.

Our Guarantee

Perhaps there are many who feel that they are running some risk in ordering plans at a distance. We wish to assure our customers that there is no risk whatever. If, upon receipt of these plans, you do not find them exactly as represented, if you do not find them complete and accurate in every respect, if you do not find them as well prepared as those furnished by any architect in the country, or any that you have ever seen, we will refund your money upon the return of the plans from you in perfect condition. All of our plans are prepared by architects standing at the head of their profession, and the standard of their work is the very highest. We could not afford to make this guarantee if we were not positive that we were furnishing the best plans put out in this country, even though our price is not more than one-seventh to one-tenth of the price usually charged.

Bill of Material We do not furnish a bill of material. We state this here particularly, as some people have an idea that a bill of material should accompany each set of plans and specifications. In the first place, our plans are gotten up in a very comprehensive manner, so that any carpenter can easily take off the bill of material without any difficulty. We realize that there are hardly two sections of the country where exactly the same kinds of materials are used, and, moreover, a bill which we might furnish would not be applicable in all sections of the country. We furnish plans and specifications for houses which are built as far north as the Hudson Bay and as far south as the Gulf of Mexico. They are built upon the Atlantic and Pacific Coasts, and you can also find them in Australia and South Africa. Each country and section of a country has its peculiarities as to sizes and qualities; therefore, it would be useless for us to make a list that would not be universal. Our houses, when completed, may look the same whether they are built in Canada or Florida, but the same materials will not be used, for the reason that the customs of the people and the climatic conditions will dictate the kind and amount of materials to be used in their construction.

Estimated Cost

It is impossible for anyone to estimate the cost of a building and have the figures hold good in all sections of the country. We do not claim to be able to do it. The estimated cost of the houses we illustrate is based on the most favorable conditions in all respects, and includes everything but the plumbing and heating. We are not familiar with your local conditions, and, should we claim to know the exact cost of a building in your locality, a child would know that our statement was false. We leave this matter in the hands of the reliable contractors, for they, and they alone, know your local conditions.

We Wish to be Frank With You and therefore make no statement in every respect. If a plan in this book pleases you; if the arrangement of the rooms is satisfactory, and if the exterior is pleasing and attractive, then we make this claim—that it can be built as cheaply as if any other architect designed it, and we believe cheaper.

We Have Studied Economy in construction, and our knowledge of all the material that goes into a house qualifies us to give you the best for your money. We give you a plan that pleases you, one that is attractive, and one where every foot of space is utilized at the least possible cost. Can any architect do more, even at seven to ten times the price we charge you for plans?

Reversing Plans We receive many requests from our patrons for plans exactly according to the designs illustrated, with the one exception of having them reversed or placed in the opposite direction. It is impossible for us to make this change and draw new plans, except at a cost of about eight times our regular price. We see no reason why our regular plans will not answer your purpose. Your carpenter can face the house exactly as you wish it, and the plans will work out as well facing in one direction as in another. We can, however, if you wish, and so instruct us, make you a reversed blue-print and furnish it at our regular price; but in that case all the figures and letters will be reversed, and, therefore, liable to cause as much confusion as if your carpenter reversed the plan himself while constructing the house.

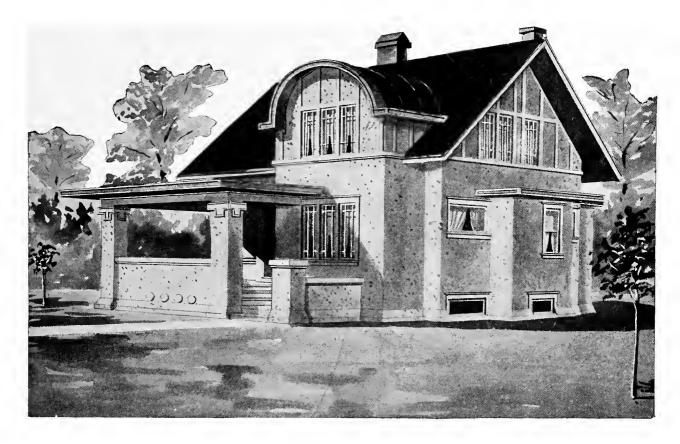

We Would Advise however, in all cases where the plan is to be reversed, and there is the least doubt about the contractor not being able to work from the plans as we have them, that two sets of blue-prints be purchased, one regular and the other reversed, and in such cases we will furnish two sets of blue-prints and one set of specifications for only fifty per cent added to the regular cost, making the \$10.00 plan cost only \$15.00.

Immediate Delivery Guaranteed Our equipment and facilities are such that we can send out the same day we receive order the complete plans and specifications for any house we illustrate. Delivery is made by express whenever possible, otherwise plans and specifications are forwarded by mail.

It is not uncommon to hear of disputes, and even lawsuits, between owners and contractors. It is usually occasioned by lack of plans and proper understanding. One party is probably as much in error as the other.

Don't proceed with the construction of your house until you get complete plans. Experienced contractors are the most particular in this respect, knowing the advantage and saving to both themselves and the home builder.

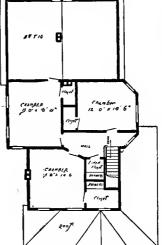

Blue prints consist of cellar and foundation plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

The contractor is often obliged to do some work which he did not figure on, and the home builder often does not get as much as he expected, simply because complete plans and specifications are not used in the construction of the house. We always advise ordering plans plenty of time in advance when you wish to build, for then you will have sufficient opportunity to get in all your bids. We are prepared to fill mail and telegraph orders the same day received.

The houses we illustrate have been designed by licensed architects to meet the needs of the people and they have a reputation for being practical, attractive and artistic.

The prospective builder should not lose sight of the fact that some day it may be necessary or desirable to sell the house, and, if it is attractive and artistic, it can always be disposed of and at a profit to the owner.

Second Floor Plan

SIZE: Width, 24 feet; length, 43 feet, exclusive of porches

Many have marveled at our ability to furnish such excellent and complete working plans and specifications at such

prices.

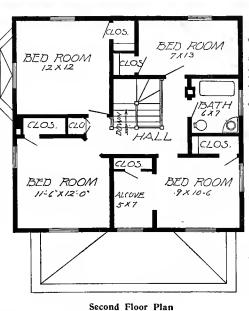

We do not wonder at this, because we charge but five dollars for a more complete set of working plans and specifications than you would receive if ordered in the regular manner, and when drawn especially for you, at a cost of from fifty to seventy-five dollars.

Design No. 2026

Blue prints consist of basement plan; roof plan; first and second floor plans; front, rear, and two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

PRICE

of Blue Prints, together with a complete set of typewritten specifications is

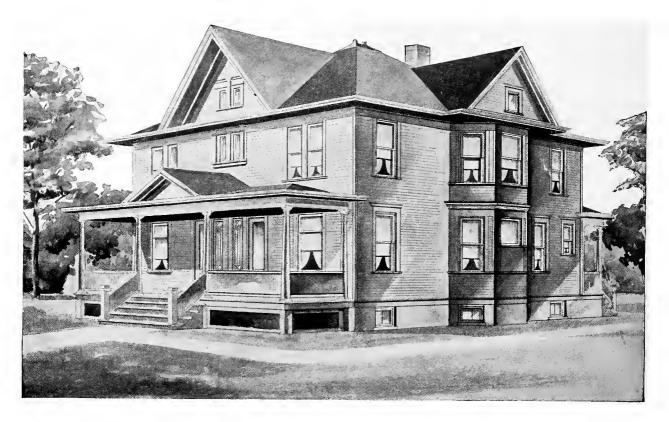

ONLY TWELVE DOLLARS

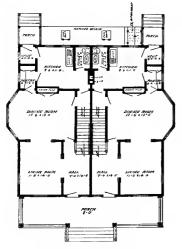

We mail Plans and Specifications the same day order is received.

SIZE: Width, 29 feet 6 inches; length, 28 feet exclusive of porch.

All of our plans are prepared by licensed architects standing at the head of their profession, and the standard of their work is the very highest.

We could not afford to make this guarantee if we were not positive that we were furnishing the best plans put out in this country, even though our price is not more than one-seventh to one-tenth of the price usually charged

First Floor Plan.

Second Floor Plan

SIZE: Width, 29 feet 6 inches; length, 33 feet, exclusive of porches

It costs but little more to have a modern, convenient and pretty home than an old-style box house. Our plans are

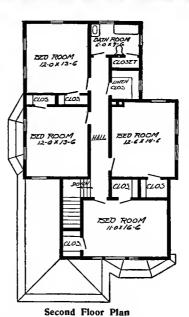

so complete and clear that there will be no difficulty in building the most expensive illustrated.

This perspective view has been accurately drawn to show the house exactly as it will appear when built. No liberties have been taken to have it appear otherwise. This is an exact reproduction of this house.

Blue prints consist of basement plan; roof plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

The prospective builder should not lose sight of the fact that some day it may be necessary or desirable to sell the house, and, if it is attractive and artistic, it can always be disposed of and at a profit to the owner.

The houses we illustrate have been designed by licensed architects to meet the needs of the people and they have a

reputation for being practical, attractive and artistic.

All the houses we illustrate are either low or medium priced. These are the most difficult houses to design. Nearly any acrhitect can design an expensive house, where the saving in cost is not the most important factor. Every plan in this book is designed by a licensed architect, standing at the head of his profession. We do not furnish

any plans which will not stand the closest inspection in every respect.

PRICE

of Blue Prints, together with a complete set of typewitten specifications is

ONLY TEN DOLLARS

We mail Plans and Specifications the same day order is received.

Design No. 2001

Blue prints consist of foundation plan; roof pian; floor plan; front, rear, two side elevations, wall sections and all necessary interior details. Specifications consist of about fifteen pages of typewritten matter.

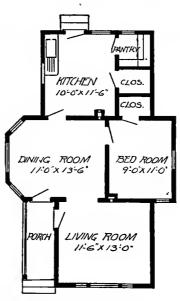

SIZE: Width, 20 feet; length, 40 feet, exclusive of perches

Our plans are all substantially and artistically bound in cloth and waterproof paper. The specifications are bound in the same manner, and the two make a uniform set, worth many times the cost.

The first question you will ask is, What do we get in these working plans and specifications? We furnish the best blue printed plans ever sent out. We do not give you the cheap tissue paper plans.

Blue prints consist of foundation plan; floor plan; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about fifteen pages of typewritten matter.

PRICE

of Blue Prints, together with a complete set of typewritten specifications is

ONLY TEN DOLLARS

We mail Plans and Specifications the same day order is received.

SIZE: Width, 24 feet; length, 36 feet.

All of the plans illustrated in this book have been prepared by licensed architects standing at the head of their profession, and the standard of their work is of the very highest.

We could not afford to make this guarantee if we were not positive that we were furnishing the best plans put out in this country, even though our price is not more than one-seventh to one-tenth the price usually charged.

SIZE: Width, 22 feet 8 inches; length, 42 feet 8 inches, exclusive of porch

Our plans are so clear and explicit that no carpenter or contractor will have the least difficulty in understanding them. We aim to make our plans so plain that there will be a minimum of mistakes.

In drawing these plans special care has been taken to provide for the most economical construction, thereby giving the contractor and the home builder the benefit of the saving of many dollars in material and wages.

SIZE: Width, 32 feet; length, 42 feet 6 inches exclusive of porches.

The majority of the people build only one house in a life time, therefore, it is the duty of every prospective builder to make his home as comfortable and attractive as possible.

This kind of a home costs no more to build than the ordinary structures usually seen in towns and villages, and the prospective builder can well afford to take a little time and investigate the latest designs.

SIZE: Width, 22 feet; length, 52 feet, exclusive of porch

When designing our houses, we have kept in mind the fact that some day the owner may wish to get his money out of his home. We design only practical houses, out of which the owner can readily get his money.

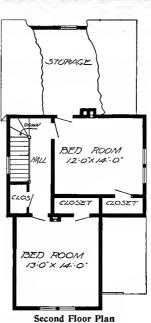

Our plans prevent mistakes in cutting lumber, in placing door and window frames, and in many other places, when

the contractor is not on the job, and the men have received only partial or indefinite instruction.

Blue prints consist of basement plan; roof plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

SIZE: Width, 22 feet; length, 44 feet, 6 inches.

All of our plans are printed by electricity on a circular blue printing machine. We use the very best grade of elec-

tric blue printing paper and take great care to have every line perfect and distinct.

We do not blame you for wishing to know what you will get for your money. The plans we send out are the regular blue printed plans, drawn one-quarter inch scale to the foot, showing all elevations, floor plans and necessary interior details.

Price of Complete Working Plans and Specifications......\$12.00

The Blue Printed Working Plans for this House consist of basement plan, roof plan, first and second floor plans; front, right, left and rear elevations; wall sections and all necessary details.

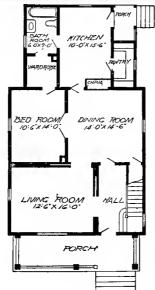

PRICE

of Blue Prints, together with a complete set of typewritten specifications is

ONLY TWELVE DOLLARS

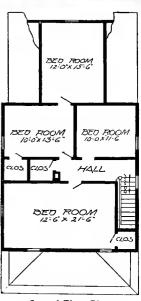

We mail Plans and Specifications the same day order is received.

First Floor Plan

Design No. 2013

Blue prints consist of cellar and foundation plan; roof plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

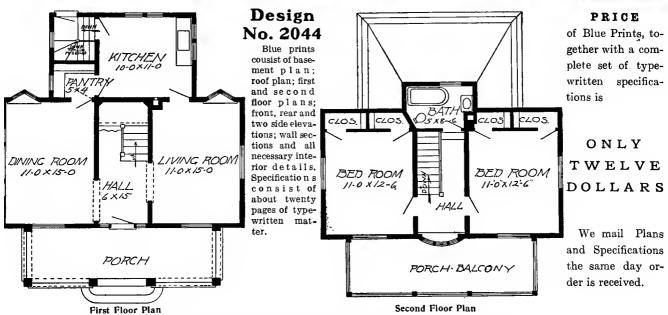

Second Floor Plan

SIZE: Width, 26 feet; length, 44 feet 6 inches, exclusive of porch

The floor plans we furnish show the shape and size of all rooms, halls and closets; the location and size of all doors and windows; the position of all plumbing fixtures, gas lights, registers, pantry work, etc., and all the measurements that are necessary are given.

All necessary details of interior work, such as door and window casings and trim, base, stools, picture moulding, doors, newel posts, balusters, rail, etc., accompany each set of plans. Part is shown in full size, while some of the larger work, such as stair construction, is drawn to a scale of one and one half-inch to the foot.

SIZE: Width, 30 feet; length, 26 feet, 6 inches, exclusive of porch.

On account our large business and unusual equipment, and owing to the fact that we divide the expense among so many, it is possible to sell at these low prices, give such excellent plans and immediate shipment.

The home builder will derive a great deal of satisfaction in watching the construction of his house if he has a set of

complete working plans to examine as the work progresses.

SIZE: Width, 26 feet 9 inches; length, 44 feet 6 inches, exclusive of porch

Our plans are so clear and explicit that no carpenter or contractor will have the least difficulty in understanding them. We aim to make our plans so plain that there will be a minimum of mistakes.

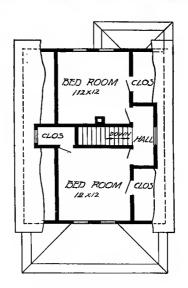

Long experience has taught the contractor that he should not build even the smallest house without working plans.

The lack of experience of the average home builder makes plans necessary for the understanding of the work.

Blue prints consist of basement plan; roof plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

Every house illustrated will show by the complete working plans and specifications that we give you designs that will work out to the best advantage and will give you the most for your money; besides, every bit of space has been utilized to the best advantage.

In the plans we illustrate, the prospective builder is sure to find some plan which will meet his requirements. If, however no plan proves satisfactory, the ideas advanced in these illustrations are well worth the price of the book.

SIZE: Width, 30 feet; length, 30 feet

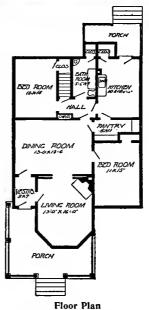

We have boiled down everything in this book so that the readers can see at a glance what is necessary. We do not

give long descriptions of each house, which are valueless to the prospective builder.

Start right. Get plans before you break ground. We have heard of a few cases where our houses have been built without the complete plans. It always proves expensive, as every good contractor can testify. It is never satisfactory to either contractor or home builder

Blue prints consist of basement plan; roof plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

SIZE: Width, 31 feet; length, 45 teet 6 inches exclusive of porches.

The majority of the people build only one house in a life time, therefore, it is the duty of every prospective builder to

make his home as comfortable and attractive as possible.

This kind of a home costs no more to build than the ordinary structures usually seen in towns and villages, and the prospective builder can well afford to take a little time and investigate the latest designs.

If a plan in this pleases you, if the arrangement of the rooms is satisfactory, and if the exterior is pleasing and attractive, we claim that it can be built as cheap or cheaper than if any other architect designed it.

"Be it ever so humble, there is no place like home." It is, or should be, the ambition of every one to some day own a home of his own. The plans we illustrate are such as 75 to 90 per cent of the people build.

Design No. 2049

Blue prints consist of basement plan; roof plan; floor plan; front, rear, two side elevations; wall sections and all necessary interior de-Specifications consist of about fifteen pages of typewritten matter.

SIZE: Width, 29 feet 6 inches; length, 49 feet exclusive of porches.

It is not uncommon to hear of disputes, and even lawsuits, between owners and contractors. It is usually occasioned by lack of plans and proper understanding. One party is probably as much in error as the other.

Don't proceed with the construction of your house until you get complete plans. Experienced contractors are the most particular in this respect, knowing the advantage and saving to both themselves and the home builder.

Size: width, 22 feet; length, 33 feet, exclusive of porches

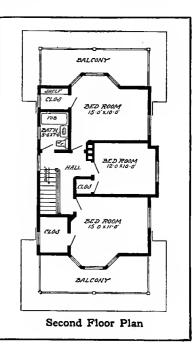

BLUE PRINTS consist of basement plan; first and second floor plans; front, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

ESTIMATING THE COST

It is impossible for us to make an exact estimate of the cost of any of the houses illustrated in this book and have that price hold good in every section of the country. Should we claim to be able to do so, a child would know that our statement was false. The price of labor and material varies so in the different sections that it is absolutely necessary for us to put a price on these houses that is elastic.

The houses shown on these pages are modern, practical and attractive and are the best that the highest architectural skill was able to produce. Every requirement is taken into consideration. Economy in the use of material also was kept constantly in mind.

If there is any house in this book that is pleasing to you, and which you would like to erect, we would advise consultation with your responsible contractor and material dealer. They will go into the matter thoroughly with you on the price proposition and it will not be necessary for you to run any risk whatever. They will be honest and fair with you as to the estimated cost of the building and the price will depend upon the amount of work to be done, the cost of material and the labor conditions. You are well aware that there are certain seasons of the year when you will be able to build a structure for from ten to fifteen per cent less than at other times. You will also experience a fluctuation in the price of building materials, over which we have no control, and you are no doubt well aware that even the finish in the house will increase or decrease the price considerably.

The subject of estimated cost is one which has been discussed at great length by everyone who has done any building, and we have come to the conclusion that the only way we can estimate the cost of the houses we illustrate is, to put a price on them that is attractive and then advise our customers to consult with their reliable dealers and responsible contractors before beginning the work. They being on the on the ground are familiar with local conditions and the only people in position to make you an absolutely correct price.

Never attempt to build without plans and specifications. They prevent mistakes and settle all disputes which may arise. Our plans and specifications can also be made the basis of contract. Start right, know exactly what you are going to do, and then you will find building a home a very pleasant task.

OUR GUARANTEE

There are many who feel that on account of the very low price at which we sell plans and specifications that the plans are of a cheap variety. We wish to assure you that you run no risk whatever. If, upon receipt of the plans, you do not find them exactly as represented, if you do not think them complete and accurate in every respect, if you do not find them as well prepared as those furnished by any architect in the United States, or any that you have ever seen, we will immediately refund your money upon return of the plans in good condition. All of the plans we furnish have been prepared by licensed architects standing at the head of their profession and the standard of their work is of the very highest.

SPECIAL PLANS AFTER YOUR OWN SKETCHES

AT POPULAR PRICES

If you prefer to have a home constructed after your own ideas of arrangement, we would like very much to help you in developing your plans, or assist you in any way to solve the problem of a plan for your new home. There are scores of people who spend years in planning and designing the home they wish to build, and, in many cases, never cease regretting that it does not come up to their requirements. "Home made" plans are inaccurate and cause endless worry, waste of materials and extra expense. With our long experience and with the equipment and the facilities we have for handling work of this kind, we can relieve you of the trouble and anxiety of planning your own home, save you time and money and furnish you with plans that we know will be entirely satisfactory. All we ask is an opportunity to demonstrate our ability to please you.

CORNER OF DRAFTING ROOM.

Our work is by no means confined to the designing and planning of houses, for, in addition to this class of

work, we make a specialty of such work as:
Schoolhouses, Office Buildings, Bank Buildings, Factories, Town and Lodge Halls, Churches, Hotels, Public Libraries, Stores, Farm and Outbuildings and All Kinds of Public Buildings.

Our Special Department is the finest of its kind in the country, being under the personal supervision of Licensed Architects, who have experience in handling all kinds of work, and they have the assistance of a corps of competent draftsmen.

Our location, equipment, and facilities for handling work of all kinds cannot be excelled. Every plan we design or develop is guaranteed to be complete and accurate in every respect. We can get plans out in the quickest time possible and at a price that cannot help but interest you.

Our experience being of such long duration and our work extending over such a large territory, enables us to give you the most satisfactory results in every instance.

Our aim is to please you. Our whole organization is at your service. Consult us before purchasing your

plan. We can save you money.

The Most Wonderful Books Ever Published

A Complete Encyclopedia on the Practical Uses of the Steel Square

Just Published

This very valuable and practical work is published for the first time. It is up to the minute, heing issued January 1, 1907. This splendid edition is a brand new book from cover to cover, written in simple, plain, every-day language so that it can be easily understood and followed. Information of value that has appeared in former works appears in this work, together with a vast amount of new, practical, every-day information, such as is necessary for every progressive and successful carpenter to know.

This Up-to-Date and Practical Work on the application of the steel square, treats of the laying of the rafters, finding the lengths of jacks, securing hevels, laying out hopper hevels, treating of the steel square as a calculating machine, and showing how to measure solids, surfaces and distances.

Special Chapters

chapters treat of the adjustable fence, roof framing, hipped roof framing, hoppers and hopper bevels, combination squares, key to the steel square, possibilities of the steel square, polygons and miters, pitches and roof framing, and miscellaneous rules and examples.

Practical and Instructive Illustrations
scattered through this work. These Illustrations are not technical
mathematical designs, nor geometrical problems, but are the thoroughly practical illustrations of a thoroughly practical itext, bringing
to the attention of the carpenter such points of interest and information as he needs in his every-day business. While the text and descriptive matter are so accurate and easy of comprehension that they could
be understood without even the assistance of the illustrations, never
theless the book has been thoroughly and profusely illustrated with
dlagrams and drawings. diagrams and drawings.

Remember and contains square ever published. They are bound in cloth with attractive cover in every way they can be returned after examination and your money will be refunded.

The December in this work is absolutely up to date (being issued January 1, 1907). Each volume measures 6x9 inches, over 300 pages, being the largest books on the steel over the page. Each volume contains 50 house plans. If not satisfactory in every way they can be returned after examination and your money will be refunded.

The Most Practical Books Ever Published

A Complete Up-to-Date Explanation of Modern Carpentry

New Special Edition

This work, "Practical Carpentry," is absolutely new, being completed only January 1, 1907. It is written in simple, plain, every-day language so that it can be easily understood.

It is the Most Complete most accurate, most up to date and most practical work upon this subject. It contains the best and quickest methods for laying roofs, rafters, stairs, floors, hopper hevels, mitering, coping, splayed work, circular work, and, in fact, for forming all kinds of joinery and carenter work penter work.

Special Chapters are Devoted to Building construction, which takes the carpenter from foundation to roof, with complete illustrations of each detail, such as foundation, windows, cornices, doors, roofs, porch work, etc. There are also special chapters devoted to good and faulty construction and all kinds of framing, geometry, arches, centers, window and door heads, steel square in carpentry, house framing, roofs and roof construction, building construction, covering of roofs, mouldings, joints, straps and other fastenings, stair building and questions and answers on all subjects pertaining to the building industry.

400 Special Illustrations and they illustrate completely and industry the detail and actual construction down to the minutest point. They enable the reader to understand the text easily and to follow the work in hand without difficulty.

Remember
ures 6x9 inches, and is bound in cloth with cover design attractively stamped. Contains more than 300 pages in each volume. Printed on an excellent quality of paper. Each volume contains 50 modern house plans. If not satisfactory in every way they can be returned after examination and your money will be refunded.

We are fortunate in being able to present a number of full-page details, showing the construction of cornices, porches, stairs, etc., which were prepared for this work by G. W. Ashby. They show the construction of each part completely, and complete dimensions are given in all cases.

Radford's Artistic Bungalows

ILLUSTRATING THE BEST IDEAS IN BUNGALOW ARCHITECTURE
JUST OFF THE PRESS

SEE THIS BOOK BEFORE BUILDING YOUR BUNGALOW

It is on account of the great attractiveness of the Bungalow and the great demand for buildings of that construction by home builders that this volume is offered to the public. In its preparation a vast amount of deep study of the subject and tireless energy have been given by the most eminent architects of the country, so that in this volume is condensed the best thought on Bungalow construction that it is possible to secure. The home builder will find here every style of Bungalow that has proved itself worthy of being classed with that form of construction, so that any taste may be suited.

This handsomely bound book, size 8x11 inches, contains the perspective views and floor plans of 208 Bungalows suitable for any climate and for every material. The illustrations show the Bungalows exactly as they will appear when built and the floor plans show the size and arrangement of the rooms. Estimated cost of construction ranging from \$500.00 to \$5,000.00 in price.

This book is printed on the best enameled paper from the finest half tones and zinc etchings (more than 600 half tone cuts and zinc etchings being used to properly illustrate it.)

NEW COMBINED HOUSE AND BARN PLAN BOOK

At A Cost of Many Thousands of Dollars and years of experience of hundreds of the most practical building experts, we have just completed the only COMBINED HOUSE AND BARN PLAN BOOK in existence. It contains about 300 pages, size 8x11 inches, and is handsomely bound in Red Art Boards, making an attractive and durable binding.

Two Massive Books Bound In One
Half Tone Plates and Zinc Etchings which were drawn especially for this work. It contains over 300 Houses, Barn and Farm Buildings, designed and drawn by the best architects and selected for their popularity with the Building Classes.

The Houses Illustrated
Perspective Views and Floor
estimates of cost.

Were selected for their excellence, practical design and economical arrangement.

Plans being shown complete, together with

The Farm Buildings in this book are illustrated by large draw-together with perspective views sufficient to guide the contractor or builder in the construction of any of the buildings described.

Any Person Contemplating Building

a house, barn or other farm building, or any one copy of this massive work, which will be so valuable in helping them to select a design which will be at once practical from every point of view and at the same time economical.

This New and Up=to-Date Book

pany, which is the logical place to look for plans and information on the building of popular priced houses, barns and farm buildings. The Radford Architectural Company is the largest of its kind in the world. They design and sell more complete plans and specifications for all kinds of buildings and they are the largest publishers of Building and Reference Books in the world. The New Combined House and Barn Plan Book, postage paid.....\$1.00

New \$5,000 Book of Barn Plans

The combined thought and work of the best minds in the country in regard to farm buildings. It cost several thousand dollars to compile the book, besides the cost of printing and publishing it. It contains what might be termed a veritable storehouse of practical barn lore not to be found within the covers of any other book, or obtainable in any other way.

The Illustrations in the book are large drawings of floors, sides, ends and frame work, together with perspective views, sufficient to guide any carpenter or builder in the construction of same. It is a book which should be in every farm home, if you only intend to even sit down and read, as the knowledge so gained will be highly valuable in hundreds of other ways.

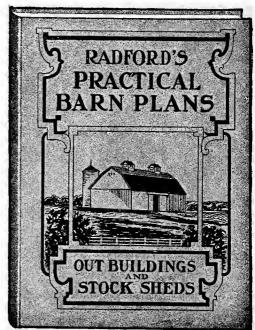

Great Many of the barn plans in this book have been contributed by farmers themselves from all over the United States and who have learned by actual necessities the barn that was most practical and best suited to their needs. They are not fancy barns and buildings, but practical barns such as every farmer likes. They contain a great many little advantages that are not usually found in ordinary barns.

Each and Every Plan in the book is accompanied by a lengthy written description explaining and giving the details of the drawings, and so worded and arranged, numbered and indexed, that it must be readily understood by anyone who reads it. Your money back if you are dissatisfied.

Our New \$5,000 Book of Practical Barn Plans shows just what pictures, plans, specifications and everything necessary and up-to-date for a barn, stock shed, wagon shed, corn crib, poultry house, hog house, horse barn, smoke house, ice house, silo, dairy barn or any other conceivable out-building on the farm. Not only one plan of each, but many of each are shown with all the latest inventions and contrivances for saving time, money and labor.

This Book Was Compiled by Mr. Wm. A. Radford, President of "The Steel Square and Its Uses," and "Practical Carpentry," and the best authority in the country on all matters pertaining to the building industry.

Stores and Flat

Buildings

The Most Popular Plan Book of the Day

The Latest Ideas In Two—Four—Six and Nine Flat Buildings, Stores and Lodge Halls, Bank Buildings and Double Houses.

EVERYTHING BRAND NEW

A Brand New Book—Just Off The Press—Absolutely the first and only book of its kind ever published illustrating over fifty popular designs in low priced flats, store buildings, bank buildings and double houses in different constructions; cement plaster, concrete block, brick, stone and frame. Included in this collection are a large number of stores and bank buildings suitable for the small town or village as well as the large city. No more valuable book could possibly be imagined for the use of anyone contemplating building.

Every building illustrated was designed by a licensed architect standing at the head of his profession who has made a study of economy in construction and our knowledge of the material that goes into the building qualifies us to give you the best for your money. Printed on the finest grade of enamel paper from the very best half tones and zinc etchings, showing the perspective view and floor plans of each and every design, thus giving a picture of the completed building and detailed drawings of the interior arrangement. An approximate estimate of the cost of the building, based on favorable conditions, is given under each design together with a description of the building. Every plan guaranteed to be complete and accurate in every detail. Handsomely bound in cloth.

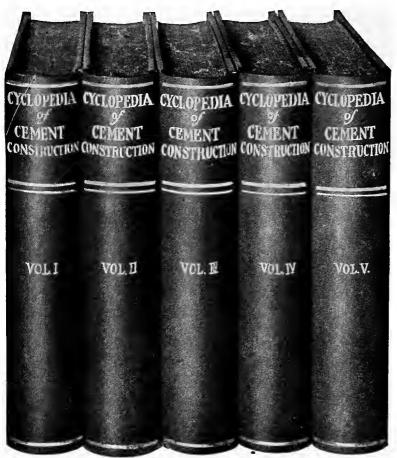

PRICE POSTPAID \$1.00.

CYCLOPEDIA OF CEMENT CONSTRUCTION

FIVE MASSIVE VOLUMES

Two thousand pages—nineteen hundred illustrations, diagrams, charts, plans and working drawings to demonstrate BY PICTURE every example given in the text—supplemented by over three hundred full page half-tone plates of unusual interest; handsomely and durably bound in three-quarter red morocco, full Persian library covers, marble tops.

ABSOLUTELY BRAND NEW

At the cost of thousands of dollars and years of expenence of hundreds of the best known practical cement experts, architects, construction and civil engineers, we have collected and prepared the only Cyclopedia of Cement Construction in existence. There is not one line of useless information in the entire set. From cover to cover of each and every volume the work teems with the most vital kind of instruction to the concrete worker. It covers everything thoroughly, completely and authoritatively, from the history of cement through the various ages clear down to its latest application; from the laying of a cement sidewalk to the building of huge municipal water systems of reinforced concrete, costing millions of dollars.

A \$100,000 SET OF BOOKS

Not a collection of pretty pictures or fascinating tales of fiction, but five great big volumes, full of the soundest kind of instruction on the livest subject in the world today—the uses and the applications of concrete to modern building construction. One hundred thousand dollars is a big sum of money, but it really does not cover the actual expense to us to prepare this set of books. When you consider that the biggest authorities on the use of concrete, only the most expert engineers, have been asked to contribute to this great work, you will readily understand the gigantic nature of the task and will have a slight idea of the immensity of the cost. Then take into consideration the handsome appearance of the volumes, the durable attractive binding, and their great size and scope. If it was not for the fact that we expect to sell many thousand sets we could not afford to make any such offer as this.

Special Introductory Sale

YOURS FOR ONLY \$ 1.00

Because this set of books has cost such an enormous amount of money to prepare, it is an absolute necessity for us to sell a great many thousand sets to get back even the actual cost to us. That is why we must advertise these books in the most effective way at the start. We do not believe we can advertise this set of books in any better way than to place a number of sets in the hands of representative men in the concrete and cement industry. That is why we have set aside the first edition of one thousand sets to sell, if necessary, even at a loss for the sake of the advertising it will give future editions.

YOURS FOR ONLY \$1.00

1,000 Sets at 33 Cents on the Dollar

INCLUDING

a full year's subscription to the

Cement World

The biggest and best coment paper published io the interest of the cement industry. It is a constant source of information to the practical man and the student. It is profusely illustrated, handsomely printed and in every way a high class standard publication.

\$12.80 INSTEAD OF \$38.00

Free on Five Days' Approval-No Risk to You-No Obligation-No Expense

We are assuming a great risk in making an offer of this sort. You realize that. But we do this for one reason only. We know if you order this set of books at this low price and on these liberal terms you will be so entirely satisfied that you will not hesitate to recommend the set to any friend, and we feel sure you will always have a good word to say about the Cyclopedia whenever it is mentioned.

This set of books is built from the ground up. It is for the practical man. It tells the "how" and "why" of everything pertaining to concrete construction without difficult mathematics. There is not a line of text, an illustration, a drawing in the entire set which the average school boy cannot completely and thoroughly understand without going anywhere or to anybody for further explanation. Read over the terms again. You lose nothing whether you buy or not, but by ordering now you get this great big work, which appeals so particularly to you and your means of earning a living, absolutely without risking a cent. Then if you finally decide to buy it, you save yourself \$25.20 on the purchase price, and not only that, but you get the free premium and also a full year's subscription to the Cement World, the greatest cement paper published.

Why delay; why hesitate, when we take all the risk? Read the "No Risk" coupon carefully, sign it and send it in before you lose the circular.

"FRAMING"

A BIG, PRACTICAL, UP-TO-THE-MINUTE BOOK FOR THE ARCHITECT, DRAFTSMAN, CONSTRUCTION MAN, CONTRACTOR, BUILDER AND CARPENTER

THIS book contains the boiled-down essence of all the accurate information on the subject of "Framing" possible to obtain; indispensable to the man who in any way has anything to do with construction.

Wm. A. Radford, editor-in-chief of the American Carpenter and Builder; editor-in-chief of the Cement World, author of "Practical Carpentry," "Steel Square and Its Uses," "Cement Houses and How to Build Them," and other well-known and popular building books, is the author of "FRAMING." This is Mr. Radford's latest book, and it is the largest, the most complete and the most instructive building book ever written by him. It deals with the subject of "Framing" in its multitude of forms and designs in a most thorough manner. Nothing is omitted that will help and guide on the construction of houses, barns, roofs, etc., while particular care has been taken to exclude any and every method of framing that has not been given a thorough and convincing test by experienced builders.

Practical Features of This Great New Book

"FRAMING" will be the largest book of its kind ever published. It consists of 356 pages, size 6 x 9 inches, More than 100 pages of illustrated details will be a feature

and printed from large, clear type on a high-grade book paper. that will make it most valuable.

This large new book, "FRAMING," is written so that any reader can understand every page, every term used and every detail shown. It is entirely free from technicalities, and yet its pages are meaty with instructions to all classes of builders, from the youngest apprentice to the journeyman, as well as the practical builder and the largest contractor.

Practical information is the keynote of "FRAMING." By practical, we mean information that can be successfully applied to the everyday work of the average carpenter, builder and contractor, as well as the more intricate forms of framing that come less often, but about which it is necessary to be fully posted. The book presents problems as they have been worked out by well-known architects and the man on the job.

"FRAMING" is illustrated with over 100 pages of detail drawings, diagrams, detail plates, etc., including many pages of full-page plates never before published, reproducing architects' original drawings, and also details of buildings in all stages of construction.

The many parts into which "FRAMING" is divided makes it especially valuable, for the reason that each particular form of framing is given separate and distinct treatment, and anyone in search of immediate information on any given subject will not have to search through page after page, but will find the desired information under its own section and chapter heading.

"FRAMING" is the largest book on this comprehensive subject that has ever been published. No book attempting to treat this important part of construction has ever before so successfully covered the ground. Every phase, part and detail of framing a house, a roof, a barn or other structure is given and treated fully and exhaustively, with complete details showing each successive step to be taken.

"FRAMING" is practical in that it shows the easiest and most common-sense way to do the work. It does not confine its descriptions to one person's ways or views, but shows many examples of each kind of framing, all of which have been fully tested by experienced workmen and can be relied upon to be absolutely correct.

Largest And Best Book Of Its Kind Ever Published

PARTIAL TABLE OF CONTENTS

FRAMING—General Synopsis

Part I. Framing for all Types of Houses

Chapter 1. Ordinary Frame Houses—Framing complete from foundation to roof Chapter 2. Roof Framing Simplified Chapter 3. Stair Building Simplified Chapter 4. Cement Plastered and English Half-Timbered Houses
Chapter 5. Wood Framing for brick veneer houses Chapter 6. Wood Framing for stone and brick houses

Part II. Barn Framing Complete

Chapter 1. Heavy Timber Barns Chapter 2. Plank Framing Chapter 3. Balloon or Self-Supporting Construction

Part III. Framing of Factories, Stores and Public Buildings

Chapter 1. Mill Construction Chapter 2. Wood Trusses of all kinds Chapter 3. Architectural Framing as in churches, gymnasiums. balls, etc.

Part IV. Miscellaneous Framing

Chapter 1. Scaffolding and Shoring Chapter 2. Wooden Bridges Chapter 3. False Work for Concrete

Part V. Useful Tables and Data

Part VI. Dictionary of Terms and Index

FRAMING—Contents

Part I. Framing for all Types of Housea

Chapter 1. Ordinary Frame Houses-Framing complete from foundation to roof

Preparation for Building—Arrangement of Materials—Building Lines—How to lay them out—Principles of Framing Foundation Work—Posts and piling—Forms for concrete—Basement windows—Bedding of tilles—Received.

for concrete — Basement windows—nedding of sills on masonry
Sill construction—Good and faulty sills—
Cheap sills—All approved types of sill construction
First Floor Joists—Laying out, cutting and setting—Sizes and spacing for common spans—Bridging and brzcing—Beams and supports
Studding—Laying out and cutting, spacing.

Erecting-Bracing-How to make a good corner

Second Floor Joist-End-framing-Sizes and spacing

Spacing Spacing Spacing Constructions—Braced or self-supporting construction—Double partitions for sliding doors—Party walls—Sound-proof partitions—Plaster partitions

Cornice construction—Cood and faulty con-struction—Box cornice—Open cornice— Other approved types of cornice construc-

tion Window Framing-How to frame for and Window Framing—How to frame for and place an ordinary window—Standard sizes
—Special windows—Bays—Oriels—Casements—Dormer window construction—
Trussed openings
Door Framing—How to frame for and hang an ordinary door—Standard sizes—Outside doors—Inside doors—Filding doors—Folding doors—Trussed openings

Flooring—Rough—Finished—Sound proof Porch Framing—Foundation—Flooring—Cir-cular porches—Steps—Balustrade and finish —Porch roof

Miscellaneous Supports and Interior Fram-ing — Attic tanks — Chimney brackets—

ing — Artic tanks — Chimney brackets— Fireplaces Furring — Lathing — Plasterboard—Applica-tion of Interior trim

Chapter 2. Roof-Framing Simplified

What the roof is and how constructed—
Terms defined
Types of Roofs in General Use—Simple
gable roof—Lean-to roof—Gambrel roof—
Hipped ridged roof—Hip and valley roof
Roof and Rafter Framing with the Steel
Square—Ordinary Typical roofs of all
styles figured out in detail for steel square
framing—How to lay out the rafters—Common—Hip and valley—Cripple—Jack—Best
method of procedure mon—Hip and valley—Cripple—Jack—Best method of procedure Short Cuts and Kinks in Roof and Rafter

Framing
Framing
Construction — Purlins—Wind

Ridge Po bracing

Chapter 3. Stair Building Simplified

Approved Types of Stairs in Use in Houses
How to lay out a Flight of Stairs—Headroom
— Proper proportion treads to risers—Landings—Stringers
Framing Construction Adjacent to Stairway
Approved Stairway Construction
Use of Steel Square in Stair Building
Hand Rail and Baluster—How to lay out and

Chapter 4. Cement Plastered and English Half-Timbered Houses

Popularity — Desirable features — Relative cost—Durability
Wall Construction—Timber framing, how

Wall Construction—Timber framing, how different from ordinary frame construction—Furring—Metal lath—Wood lath—Method of procedure
Cement surfacing—Proper proportions of material to use—How prepared—How applied—"Scratch" coat—Browning" coat—Finishing coat—Artistic finishes—Tinting Houses with English Half-Timber Effect—Modern construction—How different from oldtime English method
Other Types of Combined Frame and Con-

Other Types of Combined Frame and Concrete Construction

Chapter 5. Wood Framing for Brick Veneer Part IV. Miscellaneous Framing Houses

General Remarks—Relative cost—Water-proofing—Desirability
Wall Construction—Timber framing—How different from all frame houses Bonding of Masonry to Wood Framing Miscellaneous Special Problems—Window opening—Door openings—Cornice con-struction—Second story finish Use of Cement Blocks for Veneer Construc-

tion
Rules for Figuring Brick, Mason Work,
Mortar, Cement Blocks, etc.

Chapter 6. Timber Framing Entering into the Construction of Stone and Brick Houses

Bedding of Joists Window and Door Framing How to Fasten Wood to Masonry

Row to Fasten wood to Masonry
Furring
Application of Interior Trim
Roof Framing for Extra Heavy Roofing, as
slate, tile, etc.
Special Problems Connected with House
Framing

Part II. Barn Framing

Chapter 1. Heavy Timber Barns

General Principles - Location - Drainage -Foundations, etc.

Typical Details giving proper sizes of all members, proper spacing, etc.

Joists Used in Heavy Framing

Wind Bracing, Snow load, etc.—How to de-termine—Roof Construction and Support

Chapter 2. Plank Framing for Barns

Relative Cost and Desirability

Typical Details showing construction and sizes of all members Proper Construction for the different ordinary sizes of barns

Chapter 3. Balloon or Self-Supporting Coastruction

General Principles

Reneing Roof Construction
Support of Hay Track, etc.
Special Features Connected with Barn Framing—Construction and hanging of doors—Water tight barn floor—Cement flooring, mangers, etc.

Part III. Framing of Factories, Stores and Public Buildings

Chapter 1. Mill Construction

Relative Fireproof Character-Desirability-Cost
Cost
Details of all important parts showing recommended practice
Saw Tooth Roof Construction
Support of Machinery, Shafting, etc.

Chapter 2. Wood Trusses of all Kinds

Principles of Truss Construction-Strength of timbers Typical Trusses of all kinds detailed

Chapter 3. Architectural Framing, as in Churches, gymnasiums, halls, etc. General Principles—Beauty—Strength, etc. Typica! Designs—Detailed Proper Finish, etc.

Chapter 1. Scaffolding Bracket, Pole, Painters', Masonry Shoring

Chapter 2. Wooden Bridges Small Road Bridges Trestle Work, etc.

Chapter 3. False Work in Concrete Construction General Principles

Arch Supports

Part V. Useful Tables and Data

Part VI. Dictionary of Terms and Index

All terms used in framing, building con-struction and architecture defined and ex-plained, with cross reference to full dis-cussion in body of book

THE RADFORD ARCHITECTURAL COMPANY

185 E. Jackson Blvd., CHICAGO, ILL.

178 Fulton St. **NEW YORK, N. Y.**

The up-to-date mechanic in every kind of work trains his brain even more carefully than he ever trained his hand. That is the slogan of Twentieth Century Success-the trained mind in a trained body.

The man who uses the compass, the steel square, the chisel or the saw has got to have a true eye and steady hand. He learns in his apprenticeship how so train his eye and hand to the top notch of efficiency. Too often, however, this same man of the trained body forgets to train the mind that directs the work of the body. This kind of a man with the untrained mind, while he may be able to do mechanical work well enough, cannot do brain work and is bound to get in a rut in the long run. It takes a trained mind to read plans and blue prints; that's why so many workers live and die in the same kind of a position. You have seen the result on the first page of this advertisement. The untrained man becomes THE MAN WHO STOOD STILL.

At the cost of thousands of dollars and years of experience of hundreds of the best known practical building experts, architects and construction engineers, we have collected and prepared the material for the greatest, most comprehensive, the most practical, thorough and understandable

CYCLOPEDIA of CONSTRUCTION, CARPENTRY, BUILDING, and ARCHITECTURE

ever before even conceived.

Twelve Great Big Massive Volumes

and one extra large volume of 350 pages of actual plans, drawn by foremost architects. Selected for their excellence, economy of design and popularity along the building classes. The vol-ume of plans is portfolio size With a Full and is in itself worth the special price asked Year's for the com-Subscription plete set.

Two Kinds of Two Kinds

\$19.80 Instead of \$79.00 Free on Five Days' Approval-No Risk to You—No Obligation—No Expense

We are making this great offer merely to advertise this set of books at the start. This is absolutely the newest, biggest and most comprehensive set of books ever written on the subject of Building Construction. Our entire organization has had a hand in preparing it, and we have picked outside men here and there from the best and most practical material available.

illustrations, diagrams, charts, plans and working drawings-handsomely and durably bound; de luxe in every particular.

> The Radford Architectural Co. Medinah Bullding CHICAGO, ILL.

The difference between the man at the desk and the man at the bench is training—the kind of training that demands well paid positions of dignity and importance.

¶ We don't mean by this that the desk job is always better than the bench job. We don't mean that you should change your present work. We do mean, however, that you must combine more of the desk man's kind of training with your work if you want to continue a live factor in your trade.

The desk man uses one kind of tool that too often the bench man neglects entirely. That tool—the best one in the whole kit is books; practical books that tell how to do your work in the easiest, the best and latest ways; books that tell you all about each and every feature of your work to the smallest detail; books that keep you in touch with the biggest and smallest details of building construction.

Government Statistics prove that the average desk man earn \$22,000.00 more in a lifetime than the average bench man simply because of this main fact—he trains the brain as well as the eye and hand.

American Carpenter and Builder

"The World's Greatest Building Paper"

Endorsed by More Than 30,000 Satisfied Subscribers

BECAUSE it contains more pages of reading matter each month than any other building publication.

BECAUSE its contents are better and more practical.

BECAUSE it covers more subjects.

BECAUSE it has more illustrations and better illustrations.

BECAUSE it has the best writers and contributors in the country.

BECAUSE it has twice as many subscribers as any other publication in its field, each of whom is helping the others through the large and interesting correspondence department.

Its Important Departments

The AMERICAN CARPENTER AND BUILDER covers the building field thoroughly, its various departments being complete in descriptions and illustrations. Not only are the regular methods of construction shown, but also all other features that enter into building, such as heating, plumbing, ventilation, art glass, painting, water supply, decoration, tiling, etc.

Practical House Plans

Each issue of the AMERICAN CARPENTER AND BUILDER contains perspective views, floor plans and details of modern and moderate-cost residences, school buildings, farm buildings, bungalows, cement houses and cottages. These house plans are original and are absolutely correct.

Each number of the AMERICAN CARPENTER AND BUILDER is complete in itself.

Subscription Price, \$2.00 a year, in advance.

DIRECTIONS FOR ORDERING SPECIAL PLANS.

Tear out this page, fill in the blanks below and make a rough pencil sketch on reverse side.
Each small square represents one square foot of floor space, eight to one inch. Sketch first floor plan on one-half of page and second floor on the remainder. With this information we will have no difficulty in planning your house exactly as you desire, and there will be nothing overlooked. Show approximate sizes of rooms on inside.

In case you like one of the designs shown in the books, with the exception of some changes, please give the number of the design, send a rough draft of the changes desired.
