RETAIL PRICE LIST

OF

Vines, Plants, Fruit Trees, &c.

FOR SPRING OF 1872.

R. CUMMING & CO.

(SUCCESSORS TO J. KNOX.)

PITTSBURGH, Pa.

TO OUR PATRONS.

WE return thanks to our thousands of customers of the past year for the very liberal patronage they have bestowed upon us, and the many flattering notices of satisfaction with the stock, and the condition in which they have received it, that they have favored us with, which is all the more gratifying to us as showing that our efforts to please our customers are not unappreciated. We are also greatly encouraged thereby to increased effort in the future to procure all the new varieties of fruits and flowers, carefully testing them, and giving to the public the benefit of our experience, and to send out stock, if possible, even better than heretofore.

We hope, by unremitting attention to the interests of our friends, to greatly increase our business. We trust that all our customers of the past year will not only favor us with their orders, but will also induce their friends and neighbors to do the same.

We sought to grow, the past season, a very superior rather than a large stock of the various articles offered in this list. Great care has been bestowed upon the propagation and cultivation of our entire stock, which is in variety the most complete that has ever been grown here or elsewhere, embracing nearly every variety of any merit.

We can safely say, that the stock we offer this Spring is fully equal in all respects to any in the country, and our prices are as low as a genuine article of the best quality can be grown for.

When as many as 500 vines or plants of *any one variety* are ordered, we furnish them at the rate per 1000—less than 500 and as many as 50, at the rate per 100—below 50 and not less than 6, at the rate per dozen—below 6, at the price per single article. This arrangement must be strictly adhered to.

Terms Cash; no departure from this rule except by special agreement.

PACKING.

We make no charge for packing vines or plants on orders at the single and dozen prices. On larger quantities and on trees we charge cost.

Our packing is done in the most careful and thorough manner.

Purchasers will please say whether they wish articles ordered, sent by express or otherwise. When not directed we will send by express. We will make the best possible arrangements with the forwarders. After shipping and giving notice, as is customary, our responsibility ceases.

When the parties are not known to us, orders must be accompanied by the cash or suitable reference. Those who favor us with their orders are requested to send early.

We will fill no order for less than one dollar.

In no case do we pay express charges, except by special agreement with the purchaser.

LARGE PLANTERS AND DEALERS.

We are prepared to supply large planters and dealers stock at special rates, on application.

Parties applying for special rates should send us a list of the articles wanted, when prices will be annexed and list returned. We can sell stock as low as any other reliable Nursery.

CLUB ORDERS.

It will be found a good plan, and effect a great saving, for a number of persons, wanting but small lots, to club together, thus enabling them to get their article at the 100 and 1000 rates, besides saving cost in transportation. We WILL IN ALL CASES ALLOW TO THE GETTER UP OF THE CLUB on all orders amounting to less than \$50 and over \$10, a premium of 10 per cent. On all orders over \$50, a premium of 20 per cent.

MAIL ORDERS.

Our facilities for sending Vines and Plants by mail are unsurpassed, and our success has been so great, that we guarantee safe carriage of every package. We will send by mail, when so directed, all orders for Grape Vines not larger than 2 years old, Raspberries, Blackberries, Gooseberries and Currants, not larger than 2 years old, at the single and dozen prices, and Strawberry plants at the dozen and hundred prices, FREE OF POSTAGE.

For further information see our Descriptive and Illustrated Catalogue, which contains much valuable information on Small Fruit Culture, and will be sent to all applicants enclosing 10 cents.

GRAPES.

MARTHA (WHITE CONCORD) GRAPE.

The popularity of this variety is rapidly increasing, and the demand for vines has been very great. Its reputation as the best hardy White Grape in the country is fully established. We have a very superior stock of vines, which we offer at reduced prices.

Rogers' Hybrids.						

The demand for some of these Hybrids has been very great and is increasing. There is no doubt that some of them are very superior grapes and generally do well. Nos. 3, 9 and 39 are our favorites and we think no one will be disappointed with them. The stock in this country is quite small and there are many spurious plants disseminated. Our stock is propagated from bearing vines in our vineyards.

NEW GRAPES. ARNOLD'S HYBRIDS.

These new Grapes were originated by Charles Arnold, of Paris, Ontario, by crossing the foreign varieties upon the Clinton. They are said to be hardy, healthy and productive; the fruit of great excellence. We do not think they will ever prove valuable vineyard varieties, nor generally healthy. They are worthy of trial, however, by the amateur.

CROTON.

Hybrid, cross between Delaware and Chasselas de Fontainebleau, originated by S. W. Underhill, Croton Point, N. Y. A Grape of fine quality and probably valuable for amateur culture, will not likely prove healthy enough for general vineyard purposes.

STRAWBERRIES.

JUCUNDA—"OUR No. 700."

We believe Strawberries to be the most profitable crop of fruit that can now be grown. The demand for fine fruit at enormous prices is greater than the supply. We have no difficulty in obtaining from 40 to 75 cents per quart for Jucunda—our No. 700, in our own and the Philadelphia and New York markets. We hope to have, in the course of a year or two, *one hundred acres* in Jucunda, our No. 700. On good ground, with the right kind of cultivation, it will yield \$1,000 to the acre. It is undoubtedly a marvellous berry, and no one who has ever seen it on our grounds but has been astonished at the wonderful show of fruit. There is no other variety that can at all compare with it.

CAUTION.

We here take occasion to caution purchasers from buying spurious plants. We last season procured sample plants from three sources, for Jucunda, that proved to be not genuine. There is no doubt that the reputation of this variety has been greatly injured in some sections of the country by the dissemination of many spurious plants.

For further information of this and other varieties, with colored plate, see our Descriptive and Illustrated Catalogue, sent on receipt of 10 cents.

PRICES OF PLANTS.

POT-GROWN STRAWBERRY PLANTS.

We have for several years grown a large quantity of plants in pots, of the leading varieties, that have given very general satisfaction to our customers. They cannot be sent by mail. As the demand for these plants is large, we solicit early orders.

This is a new variety originated by D. W. Herstine, Philadelphia, and strongly recommended by the Fruit Committee of Pennsylvania Horticultural Society. We, however, from our own observation, advise growers to test it before planting largely. It undoubtedly has some merit, but we do not think it will supercede the Clarke, Philadelphia and Naomi, as the leading market varieties.

ENGLISH VARIETIES.

We have imported direct from growers in England, some of the leading varieties that we have found to succeed best with us. We have for several years past fruited over 50 varieties, some of which have proved nearly free from mildew and have yielded fine crops of the most handsome fruit, some berries as large as an egg, and deliciously sweet. We can furnish fine two year old plants.
