DIVERSION OF THE TRADE OF NEW ORLEANS.

In our issue of yesterday we made some comments upon the causes of the backwardness of trade at our port. Among these causes we cited the excessive charges upon produce for which New Orleans has been noted, although it was not our intention to make them bear the entire responsibility of the decay which it is too palpable affects our commerce. Undoubtedly a very large portion of the trade hitherto transacted in New Orleans has been diverted to Western and Northern cities by reason of inducements and advantages which our losses by the war prevented us from offering. We know very well that Cincinnati and St. Louis made haste when the war had terminated, to penetrate into every Southern town and village. The Federal troops had not withdrawn from Louisiana before Cincinnati and St. Louis steamwheel boats were at every landing-place upon our rivers and bayous, flooding the country with their cheap wares in exchange for the cotton it was their main object to get hold of. This was at a time when New Orleans and every Southern city was almost bare of goods such as the people of the interior were in need of, and when they were without the means of transporting them to the interior, even if they had on hand the goods which were in request. From this direct trade between the interior parishes of Louisiana and the Western cities, grew up a connection which has continued to this day. Our country exchanges tell us that "drummers" from St. Louis, Cincinnati and even New York have scoured the State, while our New Orleans houses have been asleep This fact is doubtless known to the latter, as well as the direct steamboat trade which has been going on constantly for these last four years between St. Louis, Cincinnati and the towns of Shreveport and Alexandria, on the Red River, and Monroe and Camden, on the Ouachita. The merchants of New Orleans should not have suffered such a connection to be formed, and if they had been as wide awake as Western men it would not have been formed; but the question now is, can they recover the trade thus diverted? We believe it can be done, provided the proper means are employed, and such inducements offered as will bring our old customers back again. We must, for instance, offer to deliver flour at the same price as St. Louis. So with sugar, molasses, coffee, hard ware and dry goods. There is no other way to compete with our rivals. And then we must reduce the charges upon cotton and sugar to the smallest possible rates. We must do away altogether with charges which Western cities do not make upon consignments made to them. Our factors must be satisfied with their simple commissions and must give up entirely those items which have constituted the staple of the complaints made against their accounts of sales by planters and shippers of produce. Return premiums of insurance and discounts allowed by warehouse keepers and draymen must be credited to the owners of the produce sold and generally we must make up our minds to transact the factorage and commission business on as favorable terms to the planter and merchant of the interior parishes as our Western rivals, unless we are prepared to abandon the contest. New Orleans is no longer master of the trade of the Mississippi Valley. She is from six to ten days farther from European ports than the Atlantic markets of Savannah, Charleston and Baltimore. The railroad system has revolutionized the business, as well as the politics of the country. The mouth of the Mississippi river is no longer the only gateway to the sea, and the distance between New Orleans and the mouth of the river is an immense drawback to this city. All these considerations should stimulate our business men to immediate action towards recovery of our lost trade, or to make up for it in other directions.

Receipts of Cotton at New Orleans.

The following table shows the daily aggregated receipts proper in bales of the respective crops of 1868-70, 1870-71 and 1871-72, received at this port since the first day of September of each year:
