

This day is Published, No. VIII., New Series, Price 8d and 8<sup>1</sup>/<sub>2</sub>d, THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for August, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to August 23.

Advertisements for the next Number, to be published on September 30, must be sent to insure insertion on or before September 28.

OFFICE-340 Strand.

THE TEACHINGS OF THE LAST SESSION NOT ON PARTY BUT ON BUSINESS.

EVERYONE admits that the last Session did not produce the fruits expected from it. At the beginning it was said that "just as in the two past Sessions great things had been done "for Ireland, so now in this Session great things would be done "for England, and something would be done for Scotland." But it cannot be said that this hope has been confirmed. We do not say that nothing has been done; it would be most untrue

A priori indeed it is likely that the rules of the House of Commons should need change. They have been substantially unaltered for many years, and during those years the work of the Commons has enormously augmented, and their position in the Constitution has vitally changed. The outline of those rules was sketched when the House of Commons met but seldom, when little business came before it, when it was a secondary power in the country, when its principal function were to check and to advise the Crown. But now the House of Commons interferes in everything, decides everything, rules everything. It appoints the Cabinet, which is our real executive power ; it removes that Cabinet when it thinks fit. Like all unchecked sovereign bodies, it grows more and more absolute every year. Nothing can be done without its leave -still less can anything be done which it forbids. On two accounts therefore the rules of the Commons ought to be changed. First, because the rules fit to transact a little work occasionally are presumably not those best suited to transact regularly a great deal of work ; and secondly, because the kind of work has changed. When the primary function of the Commons was to state grievances and correct administration, single, impulsive, adventurous members were those most likely to be characteristically useful. The mass of ordinary, sensible men might be too timid for such work. But now that the regular function of Parliament is to transact regular business, the utility of the two classes of members is reversed. The quiet, transacting man is now more likely to be of use than the eager, objecting man. In old times it was primarily expedient to multiply the rights of vehement minorities, for

# THE ECONOMIST.

# [Aug. 26, 1871.

these were the people most fit to arouse the country and check the Grown; but now it is primarily expedient to multiply the rights of the steady majority, for it is that majority which in the main governs us and transacts our business. The power of the minority should not be wholly destroyed, because it is still sometimes useful, but it should be limited; but the coercive authority of the majority should be much increased, because it is now principally important.

The change in the structure of Parliament makes this change in its rules even more necessary. After the Reform Act of 1832 it were found necessary to deprive private members of what was then their most effective weapon. In the old Parliament Sir Francis Burdett, or any other member, could on any evening present a petition, make a speech, raise a debate, and occupy the whole night. And when the members for popular constituencies were a small and feeble minority, it was probably wise to strengthen their faculty of interruption at every risk. But after 1832, when the power of the people became greater and the work grew greater too, the right of private members to derange all business at pleasure was soon perceived to be now as mischievous as it had before been useful. It was abolished, and though fifty years ago it was the most effectual of popular rights, only antiquarians now remember anything about it. Still less after the Act of 1867 is it necessary to strengthen the hands of popular representatives against a majority not appointed by the people; on the contrary, it is the majority which now represents the people, and therefore, though the minority has the right to be heard (and the greatest care should be taken that it may be effectually heard), it has no right to rule, and those practices of Parliament are bad which enable it to rule.

-secondly,- the amendment of the rules of Parlia-Butment is only one of the improvements which will render the action of Parliament easier and more productive. We must provide not only that the wheels of the mill should work well, but that only good things should be put into the mill. And for that purpose the first condition is that, as a rule (and exceptional circumstances apart), only one first-class measure of contentious politics should be introduced in each Session by the Government. In each of the last two years that rule has been infringed by the Government. We do not say or imply that they have done wrong—it would be inconsistent with the purpose of this article to discuss whether they have been right or wrong. But unquestionably the effect has been that all minor measures-all measures beyond the region of party politics-are to a most unusual extent suspended. We could crowd a very long sentence with the list of measures begun but discontinued, and there are measures which the Government are known to have much at heart, but which they have never had a chance of beginning at all. There is only at the disposal of the conductors of public business a certain limited capacity of labour, a certain limited time, a certain limited earnestness. Only a certain amount of work can be obtained from Parliament. What is added to one kind of work is taken from another. If you wish, or if you are obliged, to augment in any Session the party-work of Parliament, infallibly you will diminish the nonparty work. In general, we venture to say that one great political measure is as much as Parliament can effectually pass-perhaps as much as the country can attend to. To attempt more is to cause a vexatious but most important arrear of minor work.

Thirdly. Not only must a Government not attempt too much first-class and political work in any Session, but they should carefully limit and define the secondary and non-political work which each year they will undertake. And this is more difficult than is commonly understood. Not only is there rivalry between various sections of the nation, each wishing for a Bill on its own subject and not caring in the least about other subjects, but there is a rivalry—at least a friendly competition—among Cabinet Ministers themselves. Each wishes (as we have heard it said) for a good *innings* for himself, and is apt to covet the time given to the Bills of a colleague, who is perhaps a rival too. Accordingly it is not easy for a Cabinet or for a Premier to adjust the precedence among so many claims. If six Ministers each want the reins of Parliament, it is not easy to settle which of the six shall or shall not be refused. But there is unhappily a most easy course, which is very dangerous. The Cabinet may decide to bring in all the Bills, and to let the public and the House of Commons see which they think

most important, and which they would prefer to pass, and the almost inevitable consequence is that few or any will pass. All the omnibuses (to use Mr Bright's metaphor) will be jammed at Temple Bar. Several subjects will have been half discussed; on several the public will have formed an incipient judgment, but on no one will there have been a conclusive discussion; on none will public opinion be really mature; on none can we act with an assurance that we are doing our best, and that we shall not need to legislate again on the subject till a new experience has accumulated, or till circumstances change. And till that settled decision has been formed it is dangerous to legislate at all, for else we shall need an almost annual series of amending Acts, which blot the Statute Book, and injure all concerned.

Lastly, it is a great misfortune that we should have two Houses of Parliament as now, and yet only be able to begin measures in one of them. If the two Houses worked as they ought to work many Bills might be first introduced in the Upper House, and after good discussion they might go down to the Lower revised and perfected. But as the relations between the two Houses now stand, for the most part nothing is gained by introducing a really important Bill first into the Lords. The Commons look with much suspicion on the Lords' amendments. The Government thinks probably that they are mistakes, and that its own unamended Bill was better. Those amendments are mostly struck out, and the Bill returned to the Lords, who having before taken much pains to alter it naturally think it was best as they altered it. In the end the Bill falls through, and has to be again begun in the Commons next year, or when opportunity serves it better. This is not the fault either of any Minister or of either House; it is the fault of the Constitution, which has coupled together two opposing Houses, the stronger of which has to speak first, or else there is little chance of the two agreeing to anything interesting.

These four things lie, we are persuaded, at the root of the present bad state of public business, and it is mainly by attending to them and improving them that in the long run the essential state of that business can be permanently made better.

THE RECENT BAILWAY REPORTS. Some weeks since, at the close of the railway half-year, we pointed out various reasons for expecting a remarkable addition to the dividends of the leading lines as compared with the corresponding half-year of 1870. Not only had the traffic increased at a somewhat higher rate than in the previous half-year, which had nevertheless proved exceedingly profitable, but the increase being to a very considerable extent in passengers was likely to prove more beneficial to shareholders than an increase confined to goods. Most of the lines were likewise gaining by the gradual substitution of debenture stocks for their terminable loans at a lower rate of interest. The very fact too that railway business had been improving for some time was sure to make the latest increase the most profitable. The difficulties of adverse times had left numerous arrears to clear off, absorbing a large part of the earlier improvements ; but as the period of prosperity continues, the increase to the business becomes more and more a pure gain. The reports of most of the principal companies have now been issued, and they amply confirm our anticipations.

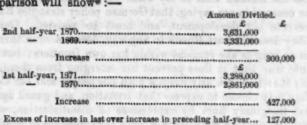

To show this, we subjoin a series of tables analysing the figures of twelve companies, including all the principal ones which have reported, excepting the South-Eastern, which has changed the date of making up its accounts.<sup>\*</sup> Very little need be said by way of explanation.

The net result, as shown by our last table, comes to this—that the amount divided among the ordinary shareholders of the companies referred to for the first half year of 1871 is an increase upon the corresponding half-year of 1870 at the rate of 13s 2d per cent. per annum. Altogether the

\* Since the above was written the Great Western report has appeared.

# THE ECONOMIST.

ordinary capital in these twelve companies amounts to about 122,000,000%, having increased by less than 2,000,000% in the twelvemonth; but whereas the amount divided for the first half of 1870 was 2,861,000% it has now been 3,288,000%-an increase of 427,000%, or about 14.9 per cent. on the amount formerly paid. Thus while the average dividend for the first half of 1870 was at the rate of 4% 15s per cent. per annum, it is now at the rate of 5% 8s 2d per cent. This is very nearly an increase at the rate of  $\frac{4}{3}$  per cent. per annum on the average, and must be considered very striking when the immense mass of the property affected is considered. The increase is at a much greater rate than in the preceding half-year, as the following comparison will show#:--

Thus although the first half of the year is one of smaller business than the second, yet the addition to the profit of the business in the first half of 1871 is greater than the addition in the second half of 1870. The difference is very nearly equal to  $\frac{1}{4}$  per cent., the increase in the second half of 1870 having only been 85 7d per cent., whereas it is now 138 2d.

These figures amply prove, we think, that the profit of railway business has been increasing during the last twelvemonth at an accelerating rate, that in some way or other the expectation of a very profitable half-year has been made good. It will be interesting therefore to trace out the improvement, and show how it has been made.

1. There is no doubt that the mere increase of traffic at an accelerating rate accounts for a great deal. The two half-years compare as follows :---

Increase of traffic in first half-year of 1871, compared with	£	%
corresponding half-year of 1870, compared with corresponding balf-year of 1870, compared with corresponding	912,000	68
half-year of 1869	736,000	5%

We need not explain minutely, as we have often done so before, how it is that differences of one or two per cent. on the traffic have so great an effect on the profits; but the figures in the tables, it will be observed, supply fresh illustrations of the principle. As was the case in the second half of 1870, the working expenses and the preference charges have both increased at a less rate than the gross traffic, and the consequence is a greater proportionate increase of the amount available for dividend. The figures before us show that—

pross traffic increased	6.8 per cent.	
Working expenses	5.9 per cent.	
Preference and debenture charges	2.8 per cent.	
Amount divided	14.9 per cent.	

-the addition to the amount divided moreover, -viz., 427,000*l* -being very nearly half the increase of gross traffic, which is 912,000*l*. There could not be a better illustration of the conditions under which the ordinary shareholder benefits so largely by the increase of the business done.

2. The most important point however is the question whether anything in the nature of the increase of traffic has to do with the accelerated rate of profit, and on that point too our figures, we hope, throw some light. If the tables are examined closely, it will be seen that the companies which have added most to the gross traffic have not gained proportionately in the shape of dividend. If they had done so, we should have expected the companies whose gross traffic increased at the rate of 8 or 9 per cent. and upwards, to have obtained double or treble the additional profit of companies which have added less to their traffic than the average of 6 per cent. But this is far from being the case. A company like the Great Northern, which has only added 3<sup>1</sup>/<sub>2</sub> per cent.

\* For the preceding half-year's figures see Economist of Feb. 25, 1871.

to its gross traffic, gains nearly as much as the London and North-Western, which has added 7 per cent. The reason partly lies in the difference of the proportion of ordinary capital to the business done, but this cannot be the whole explanation, as some companies, like the London and South-Western, which have a large proportion of capital, are among those which have gained most, notwithstanding the relatively small increase of their gross traffic. A farther analysis shows in fact that it is the increase of passenger traffic which is exceptionally productive, and that the net profit is unequally distributed according as the bulk of the increased business is in passengers, or the reverse. From Table II. it will be seen that there are five companies, of whose increased business more than half is in passengers, and we find that in fact they have the largest proportion of net profit compared with the increase of traffic. The figures are :--

A SAL DE MARTINE	Total		Passenger	- Is	ncrease,	Total Inc Divid	
and the second s	of Traffic.		Amount.		% of Gross Traffic	Amount.	% of Gross Taffic,
Great Northera	37,000		21,000		57.0	 33,000	 88.5
London and South-Western	55,000		35,000		63.6	 30,000	 54.5
Brighton			25,000		67.6	 51,000	 1330
London, Chatham, & Dover			6,000		100.0	 6,000	 100.0
Metropolitan	10,000	*****	8,000		80.0	 10,000	 100.0
	145.000		105.000		72.5	 129.000	 399-0

Thus the passenger increase in these cases amounts to about 72 per cent. of the total increase of traffic, whereas on the average, as will be seen from the table, it amounts to only 23 per cent.; and at the same time it is found that whereas the average increase of dividend is about 47 per cent. of the gross traffic, in these cases it is 89 per cent. Even if we allow for special causes, such as the diminution of compensations in the case of the Brighton line, the proportion of the dividend to the gross traffic would still be far in excess of the average. The coincidence therefore between a great increase of passenger traffic and the dividend earned cannot be wholly accidental. There is no other way of accounting for the phenomenon that the lines whose business in the gross has increased least have nevertheless profited most. The addition has been almost all pure profit.

Will the conditions of profit which have been exhibited last half-year continue? If they will, it is evident that the passenger lines, which have been lately in the shade compared with the great goods lines, must speedily come to the front, as they have in fact begun to do. On the whole, we think there is reason for anticipating that we have not seen the end of the movement. The few weeks that have elapsed since the close of the half-year show, if anything, a still quicker rate of progress-Brighton traffic, for instance, having increased between 8 and 9 per cent., instead of about 6 per cent. in the half-year we have been discussing; but the increase we have analysed is satisfactory enough without any addition. And the broad ground for anticipating its longer continuance is simply this-that the increase of goods traffic itself shows no sign of relaxation. Such an increase argues a continuous growth of the business of the country, and of an exceedingly profitable business. The country must be considerably richer than it was a year ago, and will be richer six months hence than it is now. This is the plain reason for expecting the present advance in railway property to continue, and not least in those lines which mostly depend on passengers. Intending investors however should watch the traffics carefully, to see how the current of business is going, and how far the expectation of a growing passenger traffic is fulfilled.

### THE MEETING AT GASTEIN.

THE importance of the meeting of the two Emperors at Gastein seems to us to consist in this, that the worst and most dangerous rumours about it, rumours possibly without the slightest justification, might be true. It is reported—we are not just now examining into the probable truth of the reports —that the Emperors of Germany and Austria are meeting in order that they may settle some common plan of action with regard to the affairs of Roumania—that is, really with regard to action to be apprehended from Russia in alliance with France, and the report is of itself sufficient to throw the whole world into suspense. It is not an irrational report. It is quite pos-

sible, it is indeed very probable, that the four individuals usually named-that is, the two Emperors and their two Chancellors-may think an alliance between Czar Alexander and M. Thiers imminent, and it is absolutely certain that if they did so think they could and would wrap the world in flames. There does not exist any power of any kind which could stop those four persons-Prince Bismarck, Count Beust, M. Thiers and Prince Gortschakoff-from commencing, without any es pecial trouble to themselves, a course of action which would bring on inevitably a general European war-perhaps the greatest calamity under which the world could suffer. Suppose the Russian Czar to say what the Russian papers under the censorship are saying, that German policy strangles Russia, prevents her development, and must be resisted. German policy does not hurt Russia in any way, does not even threaten her so long as she remains within her own frontiers; but it is quite true that it does prevent her emerging from them, and may therefore seriously irritate both her people and her Court. They may choose to express that irritation, and guard against that imaginary hurt by expressions of dissatisfaction, which would at once be received in France as expressions of hostility, and would undoubtedly excite under recent circumstances a keen wish to give that hostility encouragement. Under such circumstances it is most natural that Germany should look round for allies, most natural that she should turn to a semi-German power like Austria for alliance, most natural of all that with victory fresh upon her, with her Treasury full to bursting, and with her armies still on foot, she should wish her policy to be bold. A "bold" policy under such con-ditions means war on a scale never yet seen, and yet a "bold" policy is not only possible but is more probable than a weak one, or one which would result only in diplomatic action. A man who has won a great suit, and has had all his expenses, incidental as well as legal, fully paid up, is very likely indeed to think that another suit would produce more than a quantity of lawyers' letters. He is all the more likely to think so if he thinks the suit certain to come on at some time or other, as it is most probable, or at all events exceedingly probable, that Prince Bismarck does think. It is not likely that the Russian Government, however much influenced-and it is greatly influenced-by the personal regard existing between Czar and Kaiser, really approves the completeness of the German victory. The majority of the English people do not approve it, and the English people have nothing like the interest of the Russian people in the matter-have indeed, while the fleet is in good order, scarcely any direct interest in the matter. It is not improbable therefore that the Russian Government is willing to think over a French alliance, and that Prince Bismarck, aware of that fact, as he is aware of most things which occur or exist in Europe, except perhaps the most sedulously-concealed fact in European politics, the fighting strength of Great Britain, is intent on action which may precipitate the struggle. He has on the boards a question which would serve as a pretext,-namely, the Roumanian debt,-and it is not quite so bad a one as it looks.

It is not generally received that the idea on which Great Britain has always acted in matters of foreign State debts is absolutely "sound." It is undoubtedly most just and expedient. It is most just that as money is lent to foreign Govern-ments by individuals and not by the State, individuals and not the State should recover it. To employ the power of the State is to tax uninterested persons in order to improve the position of the interested. It is expedient that occasions of international quarrel should be limited as far as posible, and should not be allowed to arise when the expenses of procedure must so far exceed the expenses to be recovered by the proceeding. At the same time we are bound to acknowledge that we can imagine a very different morality, and a policy based on other ideas, to be in the ascendant. We do use State power, and expend State money, to arrest a clerk who has embezzled and fied to another country, and we do it to prevent future embezzlements, which would otherwise endanger the security of trade. A great act of repudiation by a solvent State—and by a solvent State we mean a State which if it laid on taxes equal to 7s 6d in the pound of its whole earnings could fully discharge them, that being our own taxation in our worst period-is an act of embezzlement by a trustee, and we know of no moral reason which should prevent its punishment. A war to compel Roumania to pay her debte, however frightful or injurious remight be, would not be necessarily immoral; and if

# THE ECONOMIST.

1029

Prince Bismarck thought a European war advisable, we think the pretext better than a hundred others upon which war has been waged. We do not think he thinks such a war advisable. It is nearly inconceivable that he can desire to call the masses of his master's people, but just recovered from a war in which they have suffered heavily although they have been victorious, to yet another campaign; but it is a terrible reflection that if he desires that, and if the Emperor of Austria is not unwilling, there is no power in Europe which can throw obstacles in his way. The war, whatever its end, would commence, and it is the fact of war quite as much as any result of war which is injurious to the prosperity of mankind.

There is no point upon which the restrictions on individual will which we call constitutional laws break down so utterly as upon this one of war. Almost any Executive person in any country can force on war if he pleases. In the United States the power of declaring war is shared by the President with the elected Senate; but he can order the American troops to perform acts which when once performed leave the Senate no alternatives except submission to his policy, or peaceful acquiescence in invasion. In England the purse belongs to Parliament; but Parliament, while removing any Ministry which declared war without a pretex', would infallibly carry that war on. In Germany the theory is that mobilisation could not be decreed in a cause heartily disliked by the people; but if tomorrow the order were issued to march to Warsaw or Bucharest, in a fortnight masses of troops would be marching on Bucharest or Warsaw. There might be subsequent discontent, but there would be immediate war. France is a Republic, but if M. Thiers on Monday issued, as he legally can issue, an order to attack Rheims, war would be as inevitable as if the whole people had voted for it by plebiscite. The truth is, that under the modern system the machine is almost too perfectly constructed. Any child entrusted with the key can turn on the motive power and set the force going, and then there is no escape from the responsibilities incurred. Six men at the utmost are possessed, de jure and de facto, of the legal right of moving the European armies, and that right once exercised they must be moved to victory. It is scarcely too much to say that if four of them-the four who met at Gasteinsettled any policy, however unpleasing to the remainder of Europe, the remainder of Europe would either have to submit, or to commence a war which might last a generation. No genuine body of representatives from any country would have to be consulted. No previous discussion would be imperative. Bodies of troops would move, and the consequences of their movement could no more be averted or even considered than the consequences of flinging a lucifer match into a gunpowder magazine.

We no not pretend to desire or even to suggest any remedy for this state of affairs—a state which interferes with all the natural operations of European society; but we think it should make men hesitate in their criticisms on the weakness and slowness of Parliamentary Government, which with all (its faults exempts us from these sudden and need-less risks. A Minister under that Government could plunge us into a war not accepted by the people; bu no Minister would voluntarily do it, for two widely different reasons. A Parliamentary Minister must go to war for one or two reasons ; either because he thought it would improve his own position, or because he deemed that it would benefit his country. Clearly no unpopular war could benefit his own position. And clearly also no unpopular, we may say even no sudden, war could benefit his country, inasmuch as no war waged against the will of Parliament, or without an extent of preparation which under a Parliamentary Government requires time, could end in anything but defeat. Government by public meeting is necessarily slow government, and therefore government by men disinclined to sudden enterprises, as well as to those far-reaching alliances and schemes of policy which a meeting like that of Gastein is intended to arrange. Very likely they will not be arranged. The contracting parties will have immense difficulties in trusting one another. But still it is not a pleasant reflection, more especially for fundholders, that if the four gentlemen who met at those baths think war expedient, war is as certain as if it were declared. Lord Granville makes blunders sometimes, but he makes blunders because of a poli-tical system which does not allow us to think that if he hap-

pens to visit Paris half a million lives and the savings of five years will probably be placed in jeopardy.

### BUSINESS NOTES.

THE AMERICAN LOAN.-As we led our readers to expect last week, the issue of the American Conversion loan of 15,000,000l at 5 per cent. has been successful. Subscriptions have come in heavily from all parts of the continent, but the applications have also been numerous from England, and the loan is at least fully subscribed. The amount is also understood to have been mainly subscribed in casb, and not by the exchange of bonds. It may be consi-dered as quite settled therefore that the United States can borrow large sums at 5 per cent., and the likelihood of converting the entire 6 per cent. debt at least at 5 per cent. is now a very strong one,-the great reduction of the quantity of the Five-Twenties which has been effected by this operation making future operations more easy. The interruption to the rise of American credit, caused by the French war, has thus been very brief. The operation however is not only of interest with special reference to America, but as furnishing a corroboration of the opinion we expressed a few weeks ago as to the gradual enhancement in value of all foreign securities. The accumulation of money for investment and the distrust of new channels are now such that all established securities are more and more keenly competed for. As a consequence investors are fain to be content with less and less rates of interest. America, as the leading foreign State which borrows in our markets, feels the improvement most conspicuously, the special causes of her good credit in the rapid reduction of her debt and the increasing security of peace naturally intensifying the effect. There is no doubt however that the ability of America to borrow cheaply is only an index of what foreign States in general will be able to do. In the absence of any new cause of disturbance to the peace of Europe, almost every description of foreign bond-including not a few, we fear, which no permanent investor should ever touch, but which they will persist in taking up-is likely to rise rather rapidly in value. There have been many symptoms of the change during the last month, but the success of the American loan is as yet the most important indication.

BRITISH MERCHANT SHIPPING.—The Board of Trade returns relating to shipping, which have just been issued, continue the story of the prosperity of this branch of industry which was told by the similar returns issued last year. It appears that the total shipping with cargoes entered and cleared at ports of the United Kingdom in 1869 increased as follows, compared with 1868, and that the increase was almost wholly in British shipping :—

almost wholly in Dritis	n snipping 1869. tons.	18	68.	Increase. tons.
Total shipping	30,403,684	29,32	4,676	1,079,008

THE BANKEES' CLEARING-HOUSE RETURNS.—A fortnight since we called attention to the very remarkable increase of the returns of the Bankers' Clearing-house since the 30th of June—the average improvement, as compared with the same period of last year, excluding the Stock Exchange settling days, being 23 per cent. The returns subsequently published show the same remarkable progress, and the return of the present week is not the least striking. There is no settling day included, but the total of the week is nevertheless 90,069,000/, against 60,345,000/ for the corresponding week of last year an increase of about 30,000,000/, or 50 per cent. By this time last year of course the war had begun to have some effect on business, but the effect was not very marked. In any case, there was no such falling off as to account for so large an increase as 50 per cent. now.

STRIKES.—It is a symptom of a prosperous period that we should hear of so many strikes—in the North of England, in Yorkshire, in South Wales, and in other localities as well. The workmen are not only obtaining high wages, but they feel they can put an extreme pressure upon their employers, and are using their power to the utmost. But there are one or two features of the strikes which must excite some alarm as to the future of the industry which they affect. It is stated especially that the practice of "arbitration," which had made so much progress in the iron trade, has at last broken down. It answered when it was an agency for secu-ring to the men their demands, but now that they have become more exacting, and the arbitrators are not so much in their favour, they are disposed to disregard the decisions come to, and trust rather to their own compulsory powers. A state of things has arisen in fact in which they believe they can fight the masters without assistance, and they accordingly laugh at the machinery of arbitration. The result is one which we should have anticipated from the ignorance and jealousy which necessarily prevail among masses of workmen, who can have no exact knowledge of the conditions of profit in a business, and cannot distinguish between the fines which an employer will pay rather than break his contracts, and the rate of wages he can afford if the business is to continue. Great industries are thus liable to continual interruption from the action of ill-informed combinations, and even if the workmen's claims are satisfied for the moment, wages are raised to a most unstable level, which the first breath of adversity will break down, causing fresh misery and heart-burning in the process. The highness of the rate of wages, moreover, is an element in precipitating the close of the prosperous period. Another unsatisfactory feature of the strikes is the increasing activity of the international associations, which seek to prevent the importation of foreign workmen to supply the places of the strikers. The area of unions is being in fact extended till the combination embraces an entire trade, whose members dictate whether the trade shall be carried on or not, not without endless suffering to themselves in ascertaining the conditions from which they cannot escape. England gains so far by the general equalisation of wages which the extension of the area of combination involves; but the equalisation was coming fast enough by the operation of natural causes, and its premature arrival is made costly by the loss of numerical strength implied in the withdrawal of our attractions for immigrants from abroad. The workmen do not see that they have a real interest in the extension of their industry in England, and that they may as well equalise wages by letting foreign workmen come here as by engaging them all in a single Trades' Union. They will probably not be wakened from their dream till they find their wages where they were, and foreign competition more vigorous than ever. Meanwhile the interruption of these strikes to business is very serious. The Great Western R ilway, it is calculated, loses 2,000l or 3,000l or more per week of traffic by the South Wales strike, and other leading railways suffer in a similar manner. The loss is widely felt, and besides the severe local suffering, which is the worst evil, operates as a check to the general progress of the country.

THE INSURANCE OF THE CAMBRIA.—It is not surprising that the underwriters in the case of the Cambria—Morrison v. Universal Marine Insurance Company—which was tried at the Liverpool assizes last week, should have resisted the claim, nor that the jury should have separated without coming to a verdict. The defence was that the in-

surance had been procured by means of fraud and con-cealment of material facts, but it could not be considered that these charges had been made out. The insurance was on a voyage from Bahia to South-West Pass, one of the mouths of the Mississippi, for orders, thence to a port in the Gulf of Mexico to load, and thence to Liverpool—the voyage com-mencing on the 18th of September. In October the plaintiff began to get uneasy about his ship, and on the 8th wrote to London to get it insured, giving all the information in his possession, and expressing his uneasiness. The 8th was on Saturday, and when the plaintiff reached home on that day he was shown the copy of a Liverpool paper containing an ambiguous notice of the "Cambria (quere Callao, quere from "New Orleans) aground North Breaker," and he hastened to town on Monday to communicate the information to his London brokers. A similar notice had appeared in Lloyd's list, where the name Cambria was subsequently altered to Cameo. In these circumstances the plaintiff succeeded in effecting some of his proposals of insurance. It was admitted that had these been all the facts the underwriters would have paid without a word, but the defence was mainly grounded on the assertion that the plaintiff on the 7th of October knew that the ship had been lost - a telegram having passed through the Liverpool Post Office to him to that effect. The plaintiff denied having received such a telegram, and it appeared that the telegram in question was sent out at half-past five on the 7th, but the message boy could not specially recollect its delivery, while the address was not precise. In the end the jury, as we have said, separated without coming to a verdict, a result which is hardly surprising when so much of the evidence was obscure. Might not all questions have been avoided, however, by the underwriters exempting from their risks the chance that the particular report before them applied to the Cambria ? An extreme risk such as the plaintiff put before them should clearly have been limited to purely unknown contingencies, the doubt which had arisen as to whether the ship was actually reported lost justifying the exclusion of that particular accident from the policy should the reports turn out to be true.

REGISTRATION OF TELEGRAMS. - The case of the insurance of the Cambria, to which we have referred above, where so much turned on the defect of evidence as to the delivery of a Post Office telegram, has naturally occasioned suggestions of the expediency of introducing registered telegrams. In the case referred to, if a registered telegram had been delivered, and a receipt taken, it would have been known by independent evidence whether an all-important message had arrived at its destination. One difficulty there was a doubt about the address; but the receipt would have established whether in point of fact the right party had got it. There are endless other cases of course where it would be equally important to establish delivery of a message, which can only be done by registration, and a receipt from the party to which it is addressed. The expediency of the proposal is selfevident, and the precedent established in the case of letters cuts away the ground of any opposition which the department may take. We should not suppose however that Mr Scuda-more will oppose, notwithstanding his objection to distinctions of priority between messages according to the rate of payment. Here there will be no priority, but additional security, costing the department extra trouble, for which it will have extra pay. Possibly there may be objections of detail, as the department is at present oppressed with business, but the main difficulty, as we understand, is in the deficiency of wires; and as the registration of messages, whatever it does, will not sensibly increase the quantity of message matter to be transmitted, it is not easily conceivable what objections of detail there can be to the immediate introduction of the system. As the telegraphic messages, for which registration would be required, are more important than letters, that is an additional reason for pressing the question with some earnestness on the attention of the department.

THE BOARD OF TRADE RETURNS.—The question which Mr Graves put to the Board of Trade just before the close of Parliament was a very necessary one, and will probably be of some service in stopping the error in the Board of Trade Returns to which he referred. What he suggested was that "large quantities of manufactured goods intended for China

# THE ECONOMIST.

1031

" and other Eastern markets left London every month for " and other hastern markets but houten every mount of "transhipment at Marseilles, and that such goods appeared "in the official returns as exported to France." It is plain that nothing can be more misleading than statistics of trade based upon data which are affected by any material error of this kind. Merchants at large will be misinformed as to the extent and nature of our trade both with France and the East, and not only will the trade use of the figures be injured, but statistical inferences of all kinds as to the state of the country and its commercial development will be erroneous. The mistake is exactly similar to the mischievous error, according to which exports to the East were classed among exports to Egypt, and should be remedied as promptly as possible. Mr | suffer the department to go to sleep upon it.

Peel promises that it will be corrected at the end of the present year, and it ought not to be difficult of correction. There could be no difficulty in inviting merchants to state not only the port of immediate destination, but the ultimate destination of the goods, which is the important trade fact for the trade. It would also serve a useful purpose to specify the route of the goods, and as the information will necessarily be in the hands of the Customs authorities, we hope they will publish it. It would not be difficult to do so as respects the aggregate merchandise, and one or two of the principal articles, such as the cotton and woollen manufactures. We hope Mr Graves, having called attention to the subject, will not

# THE ECONOMIST.

[Aug. 26, 1871.

A	comparison	of	this week with last presents	these results :-
	Treasury ba	lan		9,289,663

Treasury Dalance	0,200,000	
Deposits at Paris	24,435,472	
Coin and bullion	13,520,544	
Bills discounted at Paris	13,451,545	
DECREASE.		
Deposits in branches	8,004,742	
Prolonged bills	15,285,537	
Notes in circulation	22,958,160	
Discounts in branches	21,855,394	
Treasury bills	100,000	

The taking up of prolonged bills has been less active this week than last. The item of discounts is not satisfactory, an augmentation at Paris being more than counter-balanced by a decline in the branches

The National Assembly has within the past few weeks made progress in the adoption of the Governmental scheme of taxa-tion. It has decided that on assurances against fire "8 per cent. of the amount of premiums, or in mutual companies 8 per cent. of the profits or contributions, shall be paid." Some deputies contended that the capital assured ought to be taxed, not the annual sum paid by assurers; and they care examples deputies contended that the capital assured ought to be taxed, not the annual sum paid by assurers; and they gave examples to prove that if this were not done gross injustice would be committed, inasmuch as properties of equal value were assured at widely different rates—in some cases at 25f, in others at 1,000f, according to the risks they presented. But the Minister of Finance affirmed that taxation of premiums would produce 9,500,000f, and that of capital only 7,000,000f and that allegation was regarded as an unanswerable argument against the taxing of capital. The Assembly has also decided that what are called "verbal leases," in other words, simple lettings of houses and lands superior to 100f per annum, shall be taxed what are called "verbal leases," in other words, simple lettings of houses and lands superior to 100f per annum, shall be taxed as well as written leases. It was pointed out, however, that the imposition of a tax on such lettings would present great practical inconvenience and be very costly, there being in Paris alone 500,000 such. The Assembly has also dealt with another matter. In order to escape paying registration duties, it has for many years been the practice to inscribe in deeds of sale a smaller sum than that really intended to be paid, the parties making a private arrangement with respect to the parties making a private arrangement with respect to the surplus. To put an end to this fraud, which causes a large loss to the Treasury, the Government proposed to enact that the buyer should only be bound to pay the sum written down. But it was pointed out that this would be giving a premium to dishonesty, and the Chamber resolved that frauds should be punished by a fine of a fourth of the sum disguised. The punished by a fine of a fourth of the sum disguised. The proposition to put a tax of 10c on receipts of all kinds and on cheques was also adopted. With respect to cheques, Baron de Soubeyran, of the Credit Foncier, objected to the taxation of them, for the reason that the Law of 1865, which regulated the introduction and employment of them in France (in the preparation of which he had a large part) declared that they should be exempt from all taxes for ten years; and he contended that for the sake of the 300,000f or 400,000f they might be expected to produce, it was not well to break from a legal that for the sake of the 300,000f or 400,000f they might be expected to produce, it was not well to break from a legal obligation. But he was overruled. The Assembly has also adopted the increase of postage demanded by the Government: it is from 20c to 25c in the country, from 10c to 15c in towns, and is at different rates for registered letters, samples, books, paper, prospectuses, &c. In the discussion of the postage question, M. Wolowski drew attention to the success which has attended in England and Germany the introduction of post cards, circulating at a low rate, and he proposed to adopt such cards in France, at the price of 10c. In his speech he expressed grave doubts of the wisdom of augmenting the postage, reminding the Assembly that in matters of finance one and one do not always make two, and he expressed his conviction that his cards would not only be useful to the public but productive for the Treasury. His observations were re-ceived with marked favour, and the Assembly accepted his motion, but the Director-General of the Post-office having ex-pressed the fear that the adoption of cards would counterpressed the fear that the adoption of cards would counterpressed the fear that the adoption of cards would contain balance the augmentation of receipts expected from the in-crease of postage, the proposition was sent to a Committee for examination, and it is to be considered anew.

In the Assembly yesterday a point of great interest was raised, and it produced an important declaration from the raised, and it produced an important declaration from the Minister of Finance. The point was the propriety of taxing dividends on Government stock—not directly, but on sales or transfers, and the Minister's declaration was this :—" I beg of you to be convinced that the Government never had the inten-tion of touching the *rente*, of imposing on it any tax whatever, of charging in any respect the obligations it has contracted towards the holders of its stock, whether they have held it for years or for six weeks only. The Government will take from them nothing of what it has promised; before all things, it will respect conscientiously the contract into which it has entered with them, and has no intention of imposing on them charges which they never expected. It is determined to re-spect the contracts for loans, and be assured it will honestly keep its promises and engagements." eep its promises and engagements." The news from Versailles is that the desirability, not to say

the necessity, of establishing an income tax becomes more the necessity, of establishing an income tax becomes more apparent every day to the majority of the members of the Assembly; and that consequently there is a probability that the project of M. Casimer Perier, which has already been sanctioned by a Committee, will be adopted. We learn also that the Minister of Finance, by way of compromise, has consented to a duty of 20f the 100 kilogs (8l the ton) on paper for newspapers, instead of 30f he wanted to impose: the said duty replacing the stamp duty, which he also wanted. We are further informed from Versailles that various other taxes are spoken of, among them one for augmenting railway taxes are spoken of, among them one for augmenting railway tariffs. An increase for passengers is perhaps to be feared, but if one be imposed on goods, general condemnation will be manifested. There has long been an outcry from the sea-ports, the agricultural districts, and the manufacturing towns, that the rates now existing are a serious impediment to com-merse and industry; and within the last few days the Govern-ment has received a representation from the manufacturers in the north, that in consequence of them the greater part of the wool, petroleum, and coffee consumed in their region is bought at Antwerp, not in French ports, and they add that they are beginning to get cotton also from Belgium. Almost every day statements are made on the Bourse, and taxes are spoken of, among them one for augmenting railway

Almost every day statements are made on the Bourse, and Almost every day statements are made on the Bourse, and reported in the newspapers, about the payments the Govern-ment is making, or attempting to make, to Prussia on account of the indemnity; but they obtain no official confirmation. Among other things it has been said that it has paid, or is on the point of paying, 250,000,000f by means of bills on London. It is indebted to Switzerland as well as Prussia, and has paid it six millions out of ten due. The money is owing for ap-provisioning the French army that sought refuge in Switzer-land. The remainder of the sum will be paid by instalments by the end of November. by the end of November.

The report spread at London that the great railway com-panies are to raise 200 millions for the Government cannot be correct. These companies have borrowed and are constantly borrowing for themselves, and to enable them to get money the Government guarantees a certain rate of interest. Its credit therefore is better than theirs.

Although the Ministry of Finance announced officially that it was ready to give definitive securities in exchange for the scrip of the 5 per cent. and the Morgan loans, there is, in point of fact, difficulty and delay in getting the exchange effected, and this causes loud complaints among holders. As regards the Morgan loan in particular, persons who subscribed in the country are required to make their exchanges there, though there are now weiding in Paris though they are now residing in Paris.

As the Government has now formally recognised the London loan of 1870 (the Morgan) it is to be presumed that it will soon be admitted to official quotation at the Bourse. It is already quoted at Lyons, Bordeaux, and Marseilles. At its present price it gives a revenue superior to the Fives and the Threes.

The refusal of the Law Courts in Germany to recognise as binding on foreigners the delays granted in France for the payment of commercial bills has been imitated by the Court of Genoa. This last fact has created some sensation in the South of France, and the Society for the Development and Defence of Commerce of Marseilles has petitioned the Bank of France " to refuse to discount or receive any bill bearing the signature of a foreign house which has declined to pay a bill because it was only protested according to the laws in vigour" —*id est*, to the said delays. The Bank has consented. Although a regular Government has been established for months, and though postal and railway communications have long been complete, the Ministry of Commerce has not yet resumed the publication of the monthly returns of imports, exports, and navigation prepared by the Board of Customs" What excuse there can be for this delay no one seems to know, but what is certain is that the absence of the information these documents contain presents at this moment considerable The refusal of the Law Courts in Germany to recognis

these documents contain presents at this moment considerable inconvenience. The publication of the returns of 1870, inter-rupted by the war, has not even been completed, and yet sub-scribers naid for them in adverse

rupted by the war, has not even been completed, and yet sur-scribers paid for them in advance. The Lloyd Rouennais has protested to the Government against the establishment of 3 per cent. duty on raw materials, without drawback, which has been proposed as a substitute for that of 20. The 3 per cent., it says, would be injurious to the export trade. Coming from the town of M. Pouyer-Quertier, the demonstration is significant.

The Bill introduced by Mr Sheridan for the protection of the goods of lodgers has been read a third time in the Lords. It provides that lodgers' goods, upon being seized for rent by the superior landlord, can-not be taken if the lodger has paid his rent and claims them as his own, according to a form prescribed for that purpose. The measure is calcu-lated to improve the value of house property of all descriptions, and especially in the City, where persons frequently hesitate to take and furnish offices expensively unless the lessee of the building happens to be a man of known means.

In 1861, the Bank rate was reduced to 4 per cent. from  $4\frac{1}{2}$  per cent., to which it had been reduced only a short time previously. The cause of the abundance of money was still the restriction of trade consequent on the American war. The American Government was beginning to borrow largely.

In 1868, the 2 per cent.period continued. The preparations for the new elections, chiefly on the question of the Irish Church Disestablishment, were being vigorously prosecuted.

In 1869, there was a great accumulation of money, and the rates in the open market were drooping. The Albert Insurance Company had just been put into liquidation, with about 1,500,000*l* of liabilities, and an estimated deficiency of 1,000,000*l*.

In 1870, the Bank rate was reduced from  $4\frac{1}{2}$  to 4 per cent., the tendency of money to accumulate in Lombard street becoming very marked after the first panic at the outbreak of the war. The movements which preceded the catastrophe of Sedan were now in progress, and it had just been reported that MacMahon, instead of falling back on Paris, would try to relieve the garrison shut up in Metz.

Paris, would try to relieve the garrison shut up in Metz. The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 4,627,0041; in 1868, an excess of 4,241,7521; in 1869, an excess of 4,901,6331; and in 1870, an excess of 79,7091. In 1871, there is an excess of 5,822,3041.

DISCOUNT AND MONEY MARKET .- The market has again continued easy, owing to the great superabundance of money, but there is also a large supply of bills, and a large business is being done. Although there is little nominal change in the rates quoted, it is noticed that there is a little hardening in the terms asked, especially for long-dated paper, and as compared with last week there is even a fractional increase in the rates charged for long-dated trade bills. Four months' bills are quoted  $2\frac{1}{4}$   $2\frac{1}{2}$ , instead of  $2\frac{1}{4}$ ; and six months' are at  $2\frac{3}{4}$  3, instead of  $2\frac{1}{2}$  3. The signs are in fact increasing that we have seen the lowest point in the money market, and that we shall now have a gradual rise in the value of money. Among other causes which are talked of as influencing the market are apprehensions as to the deficiency of the harvest, increased this week by a few days' rain, and the belief that there is still a good deal of German money in London, which may be withdrawn at any moment, while the import of bullion barely keeps pace with the export. The actual demand in the market however is quite sufficient to account for the change in tone, though the slight anxiety manifested in some quarters to make provision for the future, to which the demand is partly due, may of course be due to speculative apprehensions.

At the Bank the demand during the week was very slack, but to-day there is more activity in sympathy with the improved tone outside. The changes in the Bank account of the week show an almost stationary state of business—bullion having only increased 22,232*l* for the week; the private securities having decreased 368,082*l*, but the Government securities having increased 300,000*l*; and the private deposits having decreased 825,623*l*, but the public deposits have increased 397,262*l*. The circulation has also diminished 190,650*l*, and the reserve increased 161,483*l*. Substantially, the position of the Bank as respects reserve and liabilities is unchanged, but the general belief is that it is not likely now

to increase in strength, owing to the tendency of our bullion to go away. From the Bank of France return, which we publish elsewhere, it appears that the stock of bullion in that establishment has increased 540,000*l* for the week. Otherwise there are no material changes to notice.

THE STOCK MARKETS .- The week has been one of almost general dulness on the Stock Exchange, the leading cause being the weakness in English railways, which have experienced a strong reaction after the recent rise, the weak tendency as usual being exaggerated by the bears making heavy sales in the more speculative stocks. The bad weather of the week has also been made an excuse for taking a gloomy view of the prospects of the leading home securities and for apprehensions of dearer money, which would increase the difficulties of carrying over. English securities have likewise been flat, the main causes to which their recent weakness has been ascribed, such as the apprehension of an outflow of bullion and of a greatly deficient harvest, having been more powerful this week than ever. In general the tone of almost all the markets has been dull, though there have been important exceptions in railways, miscellaneous, American, and even in some foreign securities, in consequence of the large supply of money seeking investment, and the favourable view taken of particular securities. The market has been better, and closes better, to-day than it has been during the week, and the reaction downwards has apparently come to an end.

ENGLISH GOVEENMENT SECURITIES. — As there is no material change in this department, we have only to refer our readers to the usual tables, showing the highest and lowest prices of Consols each day, and the closing prices of the principal stocks last Friday and to-day. As in other departments, the market closes firm, a fresh change in the weather having occurred opportunely to allay apprehensions about the harvest.

Subjoined is a list of the highest and lowest prices of Consols every day :---

FOREIGN GOVERNMENT SECURITIES .- As we have stated, this department has been weak, chiefly in sympathy with the dulness in English railways, but the undercurrent has been good, in consequence of the continual process of investment which is going forward. French stocks are almost all frac-tionally better for the week, and this is the case with other descriptions, as will be seen from our subjoined list, notwithstanding the dull tone of the week. In Spanish however, there has been a great deal of fluctuation, in consequence of contradictory announcements about the intentions of the Spanish Finance Minister. Early in the week the rumour was that the Minister would carry out his opinion in favour of paying two-thirds of the interest and giving acknowledgments of indebtedness for the remainder, and this report sent the stocks down. Afterwards, the contradiction of the report made the stocks "good," only how-ever for renewed dulness to set in when a new loan of 20,000,000l nominal, about 6,000,000l effective, was an-nounced, to be issued at 31. On balance for the week Spanish have fallen, though there is a strong opinion in the market that they, as well as the new issue, will very speedily be better. To-day the markets have generally been good, and the tendency is firm at the close.

The telegraphic report respecting the new Spanish loan states that it will be issued almost immediately, and from the arrangements made it appears that the Minister anticipates an immediate subscription in full, without the necessity of longdeferred instalments.

It was stated on Monday that the French Government had made arrangements with the Banque de Paris and other financial institutions in Paris for the payment of 10,000,000/ sterling of the German indemnity by means of three months' bills upon London, in advance of the instalments upon the last loan. It was stated however on the following day that the Germans make difficulties about accepting the bills, and that the arrangements may fall through—the German occupation of the Paris forts being consequently continued. A corresponding statement made on Monday however, to the effect that the French railway companies have agreed to provide 8,000,000/ in consideration of their being allowed an additional centime per kilometre on the passenger traffic, has not been contradicted in the City, though it is exceedingly improbable.

The closing quotations of French securities are—3 per cent. Rentes  $55\frac{3}{16}\frac{5}{16}$ ; Morgan loan,  $98\frac{5}{16}99\frac{7}{16}$ ; and New loan  $6\frac{1}{16}\frac{3}{16}$  prem.

The following are the changes for the week, taking the latest unofficial prices for quotation :--

weakness in this department was so extended as to affect the stock markets generally, and it appears to have been mainly caused by the heavy sales to realise, natural after the great advance which had taken place, aggravated by the usual ex-aggeration of the bears. As usual too the most was made of any unfavourable circumstances which turned up, and these were-the break in the weather, which induced some fear of a deficient harvest, and that the present prosperity of the trade of the country would not continue ; and also the publication of less satisfactory traffics in the southern lines, where the greatest speculation had lately been. The traffics, we believe, are not really unsatisfactory, the lines in question still exhibiting a remarkable progress; and the subsequently published returns have on the whole been very favourable, the average increase of the week being high, and being singularly profitable from the larger portion of it being passenger traffic. The verv most has therefore been made of the unfavourable incidents of the week. To-day the weakness manifested has almost quite disappeared, the continuous purchases of investors and the favourable prospects of the leading lines making the long continuance of a bear account all but impossible. The market has also been favourably affected to-day by the publication of the Great Western report, which exhibits a remarkable period of prosperity, notwithstanding the coal competition and the strikes in South Wales, which have been great drawbacks to the business and profits of the company. The principal announcement and report now expected are those of the Caledonian Company in which there is a great deal of speculation. This evening the market closes firm, and it is believed there will soon be another general advance when it is perceived that the average increase of traffic is maintained.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Aug. 19 to 846,005/, being an increase of 61,135l on the corresponding week of last year. The aggregate for the half-year to date is now 5,181,792l, being an increase of 372,120l on the corresponding week of last year. The principal increases for the week are—London and North-Western, 10,279l; North-Eastern, 9,657l; Lancashire and Yorkshire, 7,265l; North British, 5,086l; and Caledonian, 4,103l. The following shows the details of the increase in each case for the week and for the whole period:—

American Securities.—The new Funding loan has been fully subscribed for, and the applications, though not large on the average, have been of a good character. Very few ex-changes have been made of old bonds. The transactions in the scrip have not been numerous, but the quotation to-day closed at par to 1 premium. Five-Twenties of the 1862 issue have en flat, owing to the prospect of approaching redemption ; he otherwise there is no movement of importance in the market, and the fluctuations on the week are as follows :-

	losing Prices		osing Prices	8	Inc.

JOINT-STOCK BANKS. - There have been numerous purchases in this department, and prices are higher on the average. London and Westminster have been in demand, and close at an advance of  $1\frac{1}{3}$  on the week. Ionian show a rise of 3; Union, 2; Hong Kong and Shanghai,  $1\frac{1}{3}$ ; British Columbia and Colonial, 1; Anglo-Austrian, London and County, London Joint Stock, and Oriental, 1. We note however a decline of 1 in City, 1 in Land Mortgage of India Debentures, and 1 in Metropolitan.

"Rumour attributes," says the Levant Herald, " to Messre Zarifi, Caraphanos, and Dr Edwards, a project for the formation of a joint stock bank in Paris, with a capital of 25,000,000 francs, and with a special view to financial operations in Turkey. The undertaking is to be called the Crédit Européen.

TELEGRAPHS .- The movements in this department, though not generally important, have been in the downward direction. A comparison of the quotations with those current last week shows the following fluctuations :—A decline of 3 in Anglo-Mediterranean, ‡ in British Indian Extension and British Indian Submarine;  $\frac{1}{8}$  in China Submarine, Falmouth and Gibraltar, and Great Northern Extension. Anglo-American have risen 3; British Australian and Panama 1; and Indo-European 1. Telegraph Construction shares closed with dulness, at a fall of 1; Silver's India Rubber and Hooper's Telegraph Works are 11 and 3 lower respectively. MINES.—There has been much flatness in the mining

share market, and the movements have mostly been of an unfavourable character. In British mines we note a decline of 5 in New Seton; 21 in South Wheal Frances and Wheal Seton ; 11 in East Lovell; 1 in East Bassett and Great Wheal Vor, and in Marke Valley and Mwyndy Iron Ore on the week. The principal feature in the foreign market is the

continued pressure of Eberhardts for sale, which close at a decline of 7 on the week, the price having been as low as 29 to. day. Cape Copper are 1 and Colorado Terrible 1 lower.

MISCELLANEOUS. - The chief feature in this department is the demand which has arisen for Sewage Companies' shares. in consequence of the report of the discovery of a chemical process likely to enhance the value of this class of property. Phosphate Sewage shares are quoted at 9 to 10 prem., and Native Guano, with 51 paid, at 42 to 45. As a consequence of this movement, International Financial shares have been in request, as it is understood that that institution is largely interested in this description of property. The shares of the Bituminous Rock Companies have been firmly held; otherwise the general tone of the market has been flat. We note the following changes for the week :- A rise of 2 in Bolckow Vaughan, Darjeeling, North-British Australasian, and Royal Mail Steam; 5 in Scottish Australian Investment, 1 in Foreign and Colonial Government Trust (6 per Cents.), 1 in Madras Irrigation. On the other hand, there is a decline of 5 in London General Omnibus; 1 in Company of African Merchants, Crystal Palace Preference, North Metropolitan Tramways, Roumanian Iron Bridges Annuities, and Peel River Land. London Tramways shares are 1 lower.

Several leading firms, resident both in London and on the continent, have combined for the purpose of forming a society for the introduction of foreign loans, and similar large transactions. The Syndicate Union (Limited) has been formed with a capital of 2,200,000%, of which 1,000,000% have been privately subscribed by the firms in question. The Union is decidedly a strong one, but there are some most influential names conspicuous by their absence, and it may be doubted whether Syndicates, however well adapted for a temporary service, can ever, owing to the opposing interests concerned, become permanent institutions.

A prospectus is issued this evening of the issue of 58,000l per cent. debenture stock of the Ceylon Coffee Estates Company (Limited). The capital of the company is 120,0004 of which 60,000l have been issued in shares, fully paid ; and the prospectus states that the company possesses estates which cost 105,000*l*, including expenditure on the growing crops. The estates, it is also stated, are in good working order, and show a good profit.

A prospectus has appeared of the New Albert Life Assurance, with a capital of 500,000l, in one pound shares. This is a scheme for the reconstruction of the old company. It is proposed that holders of policies in the old company should exchange into the new on the following terms :- A holder of a policy of one thousand pounds to accept a policy of eight hundred and fifty pounds in the new company, with a debenture of hundred and fifty pounds.

In the new undertakings, Val de Travers Asphalte shares are 401 to 11, and Neuchatel Bitumen, 74 to 76 per share; 40<sup>4</sup>/<sub>2</sub> to 1<sup>4</sup>/<sub>3</sub>, and Neuchatel Bitumen, 74 to 76 per share; Anglo-Austrian Bitumen, 2<sup>1</sup>/<sub>2</sub> to 3<sup>1</sup>/<sub>3</sub>; Anglo-Hungarian Bitu-men, 6<sup>3</sup>/<sub>4</sub> to 7<sup>1</sup>/<sub>4</sub>; Anglo-German Bitumen, 3<sup>1</sup>/<sub>4</sub> to 4; Belgian-Dutch Paving, 2<sup>1</sup>/<sub>4</sub> to 2<sup>3</sup>/<sub>4</sub>; Montrotier Asphalte, 3<sup>1</sup>/<sub>2</sub> to 4<sup>1</sup>/<sub>2</sub>; Hungarian Land Credit, <sup>3</sup>/<sub>4</sub> to 1 premium; Mexican Bailway debentures, 4<sup>1</sup>/<sub>3</sub> to 3<sup>1</sup>/<sub>4</sub> discount; Nantyglo Ironworks, 5 to 3 discount; and Bussian Copper Company, 1<sup>1</sup>/<sub>3</sub> to 0<sup>1</sup>/<sub>3</sub> discount. Limmer Asphalte are quoted 3<sup>1</sup>/<sub>4</sub> to 3<sup>1</sup>/<sub>3</sub>; Edinburgh Tramway, <sup>7</sup>/<sub>4</sub> to 1<sup>1</sup>/<sub>8</sub> premium; Native Guano, 41 to 42; and Phosphate Sewage, 7<sup>1</sup>/<sub>2</sub> to 8<sup>1</sup>/<sub>3</sub> premium. BULLION.—The following is taken from the eircular of

BULLION .- The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :-

in bullion during the week : — Gold remains very quiet; there is no continental demand whatever, and nearly all arrivals are sent into the Bank, about 132,000/ having been thus disposed of since the 17th inst. The arrivals during the week comprise—40,060/ per Agnes Muir, from New Zealand; 55,000/ per Caduceus, from New Zealand; 4,300/ per Coslomo, from New Zealand; 37,000/ from New York—total, 136,360/. The Candia has taken 49,580/ to the East, and sovereigns to the value of 119,000/ have been withdrawn from the Bank, also for the East. Silver is without alteration in price, and the demand is only for Hol-

withdrawn from the Bank, also for the East. Silver is without alteration in price, and the demand is only for Hol-land. The imports have been small, comprising only about 30,000/ received from New York. Mexican Dollars.—The old coinage is taken for China, and remains without alteration in price at 593d per oz. The new coinage, at 584d per oz, is only taken for refining purposes. The arrivals consist of about 35,000/ received from New York; and the Candia has taken 40,500/ to the East.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11d per

#### NOTICES AND REPORTS.

STOCKS. Argentine 6 per Cent. Public Works Loan, 1871.—Bonds repre-centing 76,500l have been drawn for redemption on the 1st September. RAILWAY COMPANIES.

Blyth and Tyne .- The net revenue for the half-year, including

1,715/ from the previous account, was 24,892/, out of which the directors recommend the payment of a dividend at the rate of 101 per cent. Buffalo and Lake Huron-A distribution of 1s 6d per share,

Buffalo and Lake Huron—A distribution of 1s 6d per share, free of income tax, is announced, leaving 1,423. Cockermouth, Keswick, and Penrith.—At the meeting a divi-dend at the rate of 3 per cent. per annum was declared. Furness.—The capital account showed that 3,150,729l had been expended, leaving a balance against the account of 56,493l. The revenue account for the half-year ending the 30th of June last showed that 174,928l had been received and 74,735l expended leaving a balance of 100 193l the 30th of June last showed that 174,928' had been received, and 74,735' expended, leaving a balance of 100,193'. A dividend was declared at the rate of 10 per cent. per annum, leaving a balance of 5,530'. Contracts have been entered into for the construction of the tidal basin, which will form the entrance to the proposed new dock, and for the branch line from Arnside to Hincaster. The Barrow loop line from Salt-house Junction to the Hawcoat branch has also been commenced

Great Western .- A dividend for the first half of the year, at the rate of 4½ per cent. per annum, has been notified, as com-pared with 3 per cent. at this time last year, carrying forward about 15,000/.

Great Western and Brentford.-The adopted report explained the injurious effects of the strike in South Wales on the coal traffic, and stated that the net revenue, after providing for in-terest, was 2,833/, to which was added 23/, making 2,856/, and

recommended a dividend at the rate of 24 per cent. per annum on the ordinary shares, carrying forward 50l. *Isle of Wight.*—The half-year's gross earnings, 9,338l, showed an increase of 1,141l, and the working expenses, 7,440l, showed an increase of 1,121l. The balance was 1,898l, applicable to rent charges and interest. rent charges and interest.

rent charges and interest. London, Tilbury, and Southend.—The half-year's revenue was 29,9671, and the expenses 21,9251, leaving a balance of 8,0421. Compared with the account of the corresponding half of last year, there was an increase of 1,7861, in the receipts, and 1,2191 in the expenses. The additional receipts provided by the North London and Great Eastern were 11,9691. Marword and Carlisle.—At the meeting a dividend at the rate

North London and Great Eastern were 11,90%. Maryport and Carlisle.—At the meeting a dividend at the rate of 12½ per cent. per annum was declared. North and South-Western Junction.—The Bill for leasing the line to the London and North-Western, the Midland, and the North London Companies had passed both Houses of Parlia-ment and received the Royal assent. The lease took effect from the 1st of January last. The directors recommended the declaration of a dividend for the past half-year at the rate of 6 per cent. per annum, leaving a balance of 804l for the liqui-dation. dation.

Stratford-upon-Avon.—The receipts for the past half-year amounted to 5,646l, against 5,115l. After payment of all ex-penses and interest there remained a balance of 2,266l, out of which the directors recommended a dividend of 12s per share, being at the rate of 6 per cent. per annum, as against a dividend of 5 per cent.

Waterford and Limerick.—The traffic receipts amounted for the past half-year to 46,648l, and for the corresponding half to 43,336l, showing an increase of 3,312l. The working expenses, including 1,600l improvement of permanent way, stood at 48°27 per cent., against 49°23 per cent. After paying inte-rest there remained an available balance of 19,901l, out of

rest there remained an available balance of 19,901/, out of which the directors proposed to pay the usual preference dividends, and at the rate of 2½ per cent. per annum on the ordinary capital, leaving 500/ for reserve, and 1,211/ for the next account. The capital account showed that 1,352,842/ had been expended. *West Cornwall.*—Under a recent Act the associated com-panies are to allocate to this company 486,000/ of the joint rent-charge stock, and the West Cornwall Company is to be dissolved. The revenue account shows a disposable balance of 6,988/, of which 975/ is required for the preference dividend. The directors recommend a dividend on the original stock at the rate of 2/ 10s per cent. per annum, which leaves 1,677/.

BANKS. Land Mortgage Bank of India.—A call of 1*l* per share has been made payable in two instalments. Merchant Banking.—An interim dividend of 15s per share (6 per cent.) per annum has been declared.

#### MISCELLANEOUS COMPANIES

Belgian Variable Annuities .- The Bank of Belgium and their agents, the Anglo-Austrian Bank, are issuing 400,000 dividend agents, the Anglo-Austrian Bank, are issuing 400,000 dividend certificates at the price of 55f (2/3s 6d) each, authorised by the State for the prosecution of new railways. 1,600 certificates are issued for every kilometre of line brought into operation, and after deducting 18,000f per kil. for the expenses of the State in working the line, one-half the surplus will belong to the annuitants. It is estimated that in a few years 5f per certificate will be earned, and that then the Belgian Government will exercise their option of converting each certificate into a 5f rente. certificate into a 51 rente.

# COMMERCIAL EPITOME.

FRIDAY NIGHT. The accounts from the agricultural districts being of a less satisfactory nature than hitherto, there has been more firmness in the corn trade, and factors were enabled to demand 1s per In the corn trade, and factors were enabled to demand Is per quarter more money for fine qualities, notwithstanding the arrival of a large number of cargoes off coast. French buyers have appeared in the market. Flour is firm in value, but oats, beans, and peas are cheaper. Maize and barley sold at late rates. This week's imports of foreign and colonial produce into London have amounted to 45,210 qrs of wheat, 7,580 barley, 80,170 oats, 550 beans, 11,610 maize, 2,880 sacks and 6,220 barrels of flour. At Liverpool and Wakefield this morning wheat met a fair

and 6,220 barrels of flour. At Liverpool and Wakefield this morning wheat met a fair sale at an advance of 1s per quarter. The Liverpool cotton market opened very firm on Friday last, but on Monday became quiet, and continued so until Wednes-day, when a better tone prevailed. There has since been a very large business done, and at the close prices shows an

week have amounted to 13,875 bales.

week have amounted to 13,875 bales. We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, July 25:—For some days after last mail left, telegrams to hand from Liverpool reported a quiet cotton market, the quotation for fair Dollerah being 7fd on the 17th, and 7fd on the 18th instant. Later advices are, however, more encouraging again, Reuter's message of the 22nd, which reached us vesterday, quoting 7fd with a very however, more encouraging again, Reuter's message of the 22nd, which reached us yesterday, quoting 7<sup>\*</sup>/<sub>3</sub>d with a very firm market, the day's sales having reached a total of 18,000 bales. In the market here, the feeling from day to day has been simply a reflex of the tone of the Liverpool advices, and although prices were reduced from 2 rs to 3 rs per candy during the early part of the week when telegrams read unfavourably, they have recovered the decline within the past day or two, closing firm at about the level of last mail's quotations. The week's business has been very unimportant, say 1.700 candies in all nurchases being confined almost quotations. The week's business has been very unimportant, say 1,700 candies in all, purchases being confined almost exclusively to Barsee, Julgaum, Khandeish, and other low Oomrawuttee descriptions, of which our available stock is now mainly comprised. There are a few small parcels of good Akote, Hingunhaut, and Kirklee cotton, but the quantity is so very trifling that holders are able to stand out for extreme rates. Of Dhollerah offering a passable selection there is scarcely any to be had. In the "time bargain" business there has been a lull during the greater part of the week, but the better accounts now reaching us from Liverpool will probably give a fresh impetus to speculation. We have again to report more seasonable weather, although we are still considerably short of our average rainfall. Sowing is however reported to be going on favourably throughout all the districts, and so far there is no serious cause for alarm. No particulars have yet reached us relative to the area of land being planted with cotton, but all our advices point to fully as large a crop with cotton, but all our advices point to fully as large a crop being sown as last year. From Tinnevelly we have a telegram dated 22nd instant, quoting  $7_{15}$ d, c. and f. Expose of Corros from Bossar to July 24.

Mr Rivett Carnac, the Cotton Commissioner for the Central

Mr Rivett Carnac, the Cotton Commissioner for the Central Provinces, has forwarded us the following telegram, dated Nagpore, July 30, from which it will be seen that the prospects of the Berar crop have much improved :--Reports from Wur-dah Valley and East Berar are favourable. In West Berar sufficient rain has fallen during the week. Mr Dunlop reports -- "Prospects are now better; the young crops look well; they have got a fair though late start." The Imperial Ottoman Bank have furnished the following report, dated Alexandria, August 11:--The discouraging Liverpool advices have produced a decline of about \$d per lb in cotton. Sellers will not listen to offers at any lower rates, and a great deal of cotton has consequently been taken off the market. Contracts have also declined, and just touched equal to 9\$d per lb for fair, November delivery. At present the constant is about 9td, and very few sellers. Business on market. Contracts have also declined, and just touched equal to 9<sup>4</sup>/<sub>2</sub>d per lb for fair, November delivery. At present the quotation is about 9<sup>4</sup>/<sub>2</sub>d, and very few sellers. Business on the spot and for forward delivery has been very moderate throughout the week. Barely fair, 8<sup>4</sup>/<sub>2</sub>d to 8<sup>4</sup>/<sub>3</sub>d per lb, f.o.b.; fair, 8<sup>4</sup>/<sub>4</sub>d to 9d, ditto; fully fair, 9<sup>4</sup>/<sub>3</sub>d, ditto; good fair, 9<sup>4</sup>/<sub>3</sub>d to 9<sup>4</sup>/<sub>3</sub>d, ditto; fair with staple, 9<sup>4</sup>/<sub>2</sub>d to 10<sup>4</sup>/<sub>3</sub>d, ditto. Shipments from July 30 to August 10—England, 1,615 bales; Italy, 15 bales; Austria, 90 bales—total, 1,720 bales. There has been more inquiry for sugar this week, and prices are the turn higher. The deficiency in the stocks in the United Kingdom, as compared with last year, is now 56,000 tons, the

figures being 160,730, against 217,020 tons. Coffee has been in active demand, and values have risen 1s per cwt on the week. Rice afloat has sold freely; but there is no change to note in cocoa. The tea auctions have gone off somew flatly.

The following report, dated July 22, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo :-Broken weather and reduced receipts of produce in Colombo, have had their effects on the clearances of the fortnight, which show a still further decline in our principal staple. The distribution of coffee shipments are given as under:

PLANFAT	IN COFFE	<b>E.</b>	1870.
Fo Great Britain	cwta.		cwis.
Foreign ports	669,355 39,233		760,096 45,599

The improvement in the position of coffee has been well maintained since we last wrote. The transactions of the fortnight have amounted to about 60,000 bushels parchment coffee, mostly of high growth, which have taken place at 12s; the latter figure growers are now unwilling to accept, some holding out for 12s 6d to 12s 9d. Native coffee is scarcely to be had, even at the enhanced quotation of 48s for "picked and dried for shipment."

dried for shipment." Annexed is Messrs William Moran and Co's indigo report, dated Calcutta, July 21, 1871 :--There is no very material change to notice in the prospects of the indigo crop, which are, however, if anything rather less favourable. The season has nearly closed in Eastern Bengal, and the out-turn will probably fall rather short of that of last year. There is no improvement in the advices from Kishnaghur and Jessore, where the plant continues to give a wretched yield, and we fear fine weather for the future can do but little to repair the injury done by the severity of the rains. Burdwan is also doing badly. From Malda, Moorshedabad, Bhagulpore, and Purneah, the advices, on the whole, continue pretty fair, although there is room for improvement in the yield from the plant, and there are some complaints of too much rain and plant, and there are some complaints of too much rain and pressure from the rivers, more especially in the last-named district. From Tirhoot and Chuprah, our accounts vary a district. From Tirhoot and Chupran, our accounts vary a good deal; in some parts the yield from the plant has increased, good deal; in some parts the yield from the plant has increased, while in others there has been too much rain, and a con-sequent reduction in produce. Chumparum continues to do well, and with fine weather and good second cuttings should make a very fine season. In some of the Benares and North-Western Provinces, the fall of rain has lately been excessive; a good deal of late sown plant has been submerged, and the necessary weeding has also been retarded. The Khoontee crop is still said to be looking green and healthy, but has had quite as much rain as is good for it. Messrs A. C. Stewart and Co., of Port Elizabeth, writing on July 14, thus refer to the Cape wool trade:—The arrivals of wool have been less even than in the previous fortnight, owing to heavy rains, which have delayed the few waggons which

wool have been less even than in the previous fortnight, owing to heavy rains, which have delayed the few waggons which are on the road. Rates of carriage from the country towns are declining, and many country dealers who have held back their produce for lower rates will soon be able to forward. Scoured wools, both Uitenhage and country scoured, sell im-mediately on arrival at fully former rates. The few arrivals of fleecewashed have been sold at about our former quotations, but me believe that with larger supplies prices mould decline. of fleecewashed have been sold at about our former quotations, but we believe that with larger supplies, prices would decline. For long-stapled grease wools 7<sup>1</sup>/<sub>2</sub>d to 7<sup>1</sup>/<sub>2</sub>d has been paid to complete shipments. Washing wools are in great request, but the supply is very small. Grease—Full-grown, superior, 6<sup>1</sup>/<sub>2</sub>d to 7d; fine, light, for scouring, 5<sup>1</sup>/<sub>2</sub>d to 6d; heavy and inferior, 5d to 5<sup>1</sup>/<sub>2</sub>d. Fleecewashed—Superior, clean, 10d to 10<sup>3</sup>/<sub>2</sub>d; good average, 8<sup>3</sup>/<sub>2</sub>d to 9<sup>3</sup>/<sub>2</sub>d; inferior and seedy, 7<sup>1</sup>/<sub>2</sub>d to 8<sup>1</sup>/<sub>2</sub>d. Snow-white—Prime Uitenhage scoured, 17d to 18d; second mality ditto. 15<sup>3</sup>/<sub>2</sub>d to 16<sup>1</sup>/<sub>2</sub>d; superior country scoured machine quality ditto, 151d to 161d; superior country scoured, machine

washed, 15½d to 16½d; superior country scoured, 15d to 15½d; inferior to good country scoured, 13d to 14½d. The annexed is dated New York, August 11:-The prospects for a good business season are decidedly auspicious. Some departments of the home trade are thus early beginning to show signs of activity, albeit there is still a large absenteeism from the ranks of our active business men. Prices of nearly all the staple commodities, both of native and foreign production, are so remarkably cheap as to inspire confidence in buyers, and this fact is of sufficient importance in itself to impart a healthy impetus to trade, without fostering a spirit of pernicious speculation, from which there is just now a remarkable absence. But, aside from the important feature of

# THE ECONOMIST.

# [Aug. 26, 1871.

low prices, the country has been blessed with a good harvest, an easy money market throughout the autumn months is reasonably certain, and what is perhaps of paramount im-portance, the world at large is at peace, with no prospect of the recurrence of any political element calculated to interrupt the even current of the affairs of our own or foreign nations. And, besides, the credit of our Government has become so enhanced, the condition of our foreign trade has so improved, and the drift of the surplus capital of Europe is so unmistak-ably in the direction of our shores for investment, that a con-tinued low ruling of gold is almost a foregone conclusion. Here, then, it must be admitted, is a substantial basis for a good, if not an unusually active, fall trade. During the period under review there has been no variation from the extreme low rates for money long current, while the gold premium is unsettled and exchange lower.

from any port, new crop, not below good ordinary, October de-livery, 9<sup>1</sup>/<sub>2</sub>d; October-November shipment, 9<sup>1</sup>/<sub>2</sub>d; Mobile, Sep-tember delivery, not below good ordinary, 9<sup>1</sup>/<sub>3</sub>d; not below strict ordinary, 9<sup>1</sup>/<sub>3</sub>d; low middling, Texas, at sea, 9<sup>1</sup>/<sub>4</sub>d; good ordinary, Teras, at sea, 8<sup>1</sup>/<sub>8</sub>d; ordinary, from any port, steamer named, 7<sup>1</sup>/<sub>8</sub>d; Bahia, basis of fair, mutual allowances, ship named, 8<sup>1</sup>/<sub>8</sub>d; Maranham, basis of fair, mutual allowances, ship named, 8<sup>1</sup>/<sub>8</sub>d; Maranham, basis of fair, mutual allowances, ship named, 9<sup>1</sup>/<sub>6</sub>; Broach, good fair, machine-ginned, at sea, 8<sup>1</sup>/<sub>7</sub>d; Dhollerah, fair new merchants, June sailing, 7<sup>1</sup>/<sub>7</sub>d; Omrawuttee, fair new merchants, ship named, 7<sup>1</sup>/<sub>7</sub>d per 1b.

The sales of the week, including forwarded, amount to 102,010 bales, of which 27,320 are on speculation, and 10,500 declared for export, leaving 64,190 bales to the trade.

25TH AUGUST.—The sales to-day will probably amount to about 15,000 bales, with a steady market.

An increase of import compared with the same date last year of An increase of quantity taken for consumption of An increase of actual exports of An increase of stock of 416.18

In speculation there is an increase of 206,150 bales. The imports this week have amounted to 77,177 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to August 18) is 56,000 bales, against 50,000 bales at the corresponding period last year. The actual exports have been 5,262 bales this week.

#### LONDON .- AUGUST 24.

LONDON.—AUGUST 24. Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :— The market was very quiet until Wednesday, when an active demand arose, which has since increased; prices for arrival, as compared with those of last week, show an advance of  $\frac{1}{3}$ d to  $\frac{1}{3}$ d per lb, but on the spot there is no material change. PRESENT QUOTATIONS.

The cotton m			ned th	-		with	9. 000		mand

The cotton market opened this week with a good demand, but on Monday and Tuesday was quiet, and prices were slightly in favour of buyers. Yesterday the business increased, and today has been very large, with an advance in most descriptions. For Sea Island the demand has only been moderate; without change in prices in the medium and better grades; some sales of common have been made at lower and irregular prices. American was firm in the early part of the week, but on Mon-day and Tuesday was dull and irregular. Yesterday and to day, with an active demand prices have advanced and day and Tuesday was dull and irregular. Yesterday and to-day, with an active demand, prices have advanced, and are now <sup>1</sup>/<sub>2</sub>d to <sup>1</sup>/<sub>2</sub>d higher than last Thursday. New York advices to the 24th instant quote middling Upland 19<sup>1</sup>/<sub>2</sub> cents, costing to sell in Liverpool 9<sup>1</sup>/<sub>1</sub><sup>3</sup>d per lb by steamer. Brazil was in limited request at the opening, but in active demand at the close of the week, quotations showing an advance of <sup>1</sup>/<sub>2</sub>d per lb. Egyptian was pressed for sale in the early part of the week, when lower prices were accepted; the improvement in the general market has since caused holders to assume a firmer tone, and the quotations of last week are resumed. East Indian continues to be freely offered, without change in price in the lower qualities; but the medium and better sorts are attracting more attention from buyers, and close rather dearer. buyers, and close rather dearer.

buyers, and close rather dearer. In cotton to arrive and for future delivery prices gave way in the beginning of the week, but the transactions have since been extensive, and quotations have risen about  $\frac{1}{2}$  d per lb upon the rates of last week. The latest quotations are—American, basis of middling, Texas, nearly due, 94d; from New Orleans, not below good ordinary, September delivery, 94d; October, 975d;

NEW	YORKAugust	11.

NEW YORK.—AUGUST 11. By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Aug. 11. From the figures thus obtained it appears that the total receipts for the seven days have reached 9,454 bales, against 10,472 bales last week, 10,900 bales the previous week, and 10,661 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,988,324 bales, against 2,889,079 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,099,145 bales. The exports for the week ending this evening reach a total of 4,727 bales, of which 4,727 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 137,005 bales. Below we give as made up this evening are now 137,005 bales. Below we give the exports and stocks for the week, and also for the cor-responding week of last season, as telegraphed to us from the various ports to-night :--

The market the past week has exhibited a little more life The market the past week has exhibited a fittle more file, the result of a decline in prices, gradually but almost daily to an export basis, closing to-night at 19c for middling Uplands, and 17½c for low middlings, against 19¾c for middlings, and 18¾c for low middlings last Friday. This continued down-ward movement has been induced by the same causes which have been depressing the market during previous weeks, the depression being increased by the lower rates and weakness of depression being increased by the lower rates and weakness of gold, and further by the arrival of new cotton from several states, indicating a pretty forward condition of the arrow tates, indicating a pretty forward condition of the crop the decline, however, shippers have been able to fill orders to a fair extent, holders showing a disposition to keep a full supply on the market to meet all calls and make some con-cession, if necessary, to effect sales. The forward delivery transactions have been fair in extent, but prices have declined rather more there the prices for each outcome. transactions have been fair in extent, but prices have declined rather more than the prices for spot cotton, especially for the winter months. Low middling closed to-night at 17% c for August, 17% c for September, 17% c for October, 17% c for November, 17% c for December, and 17% c for January. The total sales of this description for the week are 55,100 bales. For immediate delivery the total sales foot up this week 13,341 bales, including 6,826 for export, 4,797 for consumption, 267 for speculation, and 1,451 in transit. Of the above, 585

-New York Commercial and Financial Chronicle.

NEW YORK, Aug. 18.—According to Mesars Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 8,000 bales, and since the 1st of September, 3,995,000 bales. Shipments to England, 15,000 bales; ditto, to France, 3,000 bales. Total since the 1st of September, 2141 000 bales. Stock at all ports 116 000 bales. Middling 3,141,000 bales. Stock at all ports, 116,000 bales. Middling Upland, 8<sup>‡</sup>d, cost and freight, per steamer. NEW YORK.—According to Messrs. Moffatt, Davidis, and

Co.'s report, the receipts of cotton at all United States' ports for the last four days have been 4,000 bales. Shipments to Middling England, 8,000; ditto to France, 4,000 bales. upland, 83d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS MANCHESTER, Aug. 24.-A quiet feeling still continues to prevail in our market, extending to nearly all branches of Prices remain practically unaltered since last week

1043

# THE ECONOMIST.

[Aug. 26, 1871.

Early in the week they showed signs of giving way, and a few pressing sellers sold rather freely. During the last two days, pressing sellers sold rather freely. During the last two days, owing to a stronger and more active cotton market, producers are firmer in their demands, but as buyers see no cause for this they keep aloof, hence no increase of business has occurred. The home trade continues quiet, but with a better prospect for cloth, as the stocks are light, but buyers will soon have to supply themselves for next season's demand. Shipping yarns are quiet, but steady. Cloth for India and China is difficult to move in quantities. The rpward movement in cotton, caused solely, we suppose, by the decreased stock in Liverpool, has rather curtailed business here within narrower limits than before. Though the stock of cotton is decreasing limits than before. Though the stock of cotton is decreasing for the present, larger imports will soon take place to augment it, and as spinners are unusually large holders, their wants will be easily supplied for some time to come.

receipts at the Western markets show a considerable falling receipts at the Western markets show a considerable falling off from last year. The scarcity of sound wheat at this market has compelled buyers to pay a slight advance, but the market has shown little buoyancy, although favoured at the close by some depression in ocean freights. A few boat-loads of prime spring have been sold at \$1.30 to \$1.32 for No. 2, and \$1.34 to \$1.35 for No. 1, with new red and amber winter ranging from \$1.34 to \$1.40; old amber, \$1.44 to \$1.48; and new white, \$1.43 to \$1.50. To-day the scarcity continued, and private advices from Liverpool were better. No. 2 spring sold at \$1.34, and new red and amber winter, \$1.39 to \$1.44. Corn has arrived less freely at the West as well as at this market, and holders have shown much strength, storing freely when their views have not been met. The home market has been good, but in the absence of a full supply of freight room the export movethe absence of a full supply of freight room the export move-ment has been only moderate. To-day, with an advance in Liverpool, the market was firm and active, at 66c to 664c for mixed. The movement in breadstuffs at this market has been as follows :-

9 11 10 0 11 6 10 3 10 11 13 9

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday :---Owing to the advance in cotton producers are demanding an advance of three half-pence to threepence per piece since Tuesday, which is decidedly checking business.

BRADFORD.-The demand for wool is less active than it was a short time ago. The transactions are comparatively few and small, and the upward tendency of prices is, at any rate, arrested, if there is not even a softening tendency in some cases under exceptional circumstances. Good wethers and hogs are still chiefly in demand. Noils and brokes meet with a ready sale at firm prices. There is less business doing in the years and the piece markets

ready sale at firm prices. There is less business doing in the yarn and the piece markets. LEEDS.—The woollen market has been fully attended, the merchants, however, much outnumbering the manufacturers. The latter can more profitably employ their time at home, while so many unfinished orders remain on hand, and the season is fast approaching its waning point. Large quantities of the heavier class continue to be taken for export. The all-wool superfine trade keeps brisk, notwithstanding the high price of the raw material. ROCHDALE —In the flame market there was less eager.

ROCHDALE.—In the flannel market there was less eager-ness among purchasers. Manufacturers have resolutely set their faces against prolonging present prices, and demonstrate plainly enough that the highest of the rates yet paid are sadly out of proportion with the present price of the raw material. Useful wools are reported scarce, and buyers are always met with higher prices than the last they had paid. BELFAST.—Flax—Some samples of new crop offered in our markets; these, however, were limited; quality generally was good, and fair prices were realised. Yarns—Business tran-sacted was to an increased extent. Linens, brown, hand-loom—Demand fair for heavy linens and cloth for dyeing and hollands. Stocks not extensive. Prices unaltered. Power-ROCHDALE .- In the flannel market there was less eager

hollands. Stocks not extensive. Prices unaltered. Power-loom—Demand active for roughs of approved manufacture; manufacturers are well supplied with forward orders, and rates rule very firm. Inferior makes not much inquired for, and prices of same are rather irregular.

#### CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK, Avoust 11. The markets for flour and grain have been less active during the past week, and prices have shown much irregu-larity. The receipts of flour have been liberal, and the pressure has shown a steady increase, under which prices of all grades have again given way loc to 20c per barrel. This decline, however, with a better supply of freight room for foreign markets, and an advance in wheat, has led to a largely increased demand for all grades under \$5.50, and these at the close show some reaction. The quantity taken for export has increased demand for all grades under \$5.50, and these at the close show some reaction. The quantity taken for export has been larger than for several weeks past, and stocks are without further increase. The medium grades are held with rather more confidence, for at the present prices of wheat these flours cannot be manufactured at a profit. To-day low grades of extras were rather firmer, at inside prices; but the higher grades were weak and unsettled. Wheat has arrived much less freely, and notwithstanding the comparatively liberal receipts of new winter at Toledo and St Louis, the aggregate

#### LONDON MARKETS.

#### STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING. The changeable weather of the past week, coupled with the shortness of supplies sent forward by farmers, has had a hardening influence on the corn trade, and contrary to general expectation prices have had an unward tendency. hardening influence on the corn trade, and contrary to general expectation prices have had an upward tendency. Opinions vary considerably with regard to the actual yield of the wheat crop, but there is reason to believe that the general good condition in which the wheats have so far been secured and the fact that the weight per bushel is above the average, will compensate for any deficiency in bulk. Probably it will be found that the deficiency is of no serious importance. The samples of new English exhibited here have not been numerous, but the weights have run up as high as 65 lbs. The prices realised have been equal to those current last week. To-day there was rather more inquiry for foreign, and Russian and Ameri-can sorts commanded Is per quarter over the rates current last week. Flour has moved in sympathy with the wheat market, and the quotations have been firmly maintained. Spring corn generally has been quiet. Barley has proved a large crop, and there now appears to be less reason to complain of the quality, some excellent samples having coine to hand. Much depends upon the character of the weather for the next

# THE ECONOMIST.

week or so for this and other crops. With liberal supplies on offer, Russian and Swedish oats have ruled lower in value; while maize, beans, and peas are also cheaper.

1045

TRANSACTIONS OF THE WEEK. FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT." MINCING LANE, FRIDAY MORNING. SUGAR.—There has been rather more steadiness in the market during the present week, but the demand is by no means active. The refiners have taken full supplies of West India, and several floating cargoes have also sold. On the spot the sales to yesterday reach 2,649 caaks. Barbadoes by auction went at 29s 6d to 32s 6d, and grainy ditto at 34s 6d to 35s 6d. Crystallised Jamaica and Demerara have sold at prices which could not be obtained last week, and refining kinds are now firmer. Manila meets with more inquiry, several parcels, chiefly the lower qualities, finding buyers. Refined is without improvement. Im-ports of cane sugar have been rather liberal, but stocks in all the ports are smaller than usual. The landings last week were 2,600 tons, and the deliveries 4,430 tons, nearly all for home consumption, leaving the stock at the close 73,400 tons, against 105,800 tons in 1870, and 83,530 tons at the close 73,400 tons, against 105,800 tons in 1870, and 83,530 tons

are smaller than usual. The inhologs has week were 2,000 tons, and the deliveries 4,430 tons, nearly all for home consumption, leaving the stock at the close 73,400 tons, against 105,800 tons in 1870, and 83,530 tons in 1869 at the same period. Mauritus.—About 2,500 bags sold privately, including grainy yellow at 36s 6d; soft brown and yellow, 25s to 31s. 1,126 bags by anotion sold at 25s to 29s for soft brown, and 30s to 32s for grey and yellow. Manila.—About 20,000 bags have changed hands. Low brown, 23s; Taal and Zebu, 21s to 26s; clayed, 24s to 26s per cwt. Egyptian.—209 bags soft qualities were withdrawn. Java.—1,750 bags low brown have sold at 22s. Cuba.—157 boxes, part sold at 35s for dry grainy. Floating Cargoes.—Three of West India sold for the United Kingdem at 25s 3d to 25s 7<sup>1</sup>/<sub>2</sub>d; one at 24s 6d to 26s; one Porto Rico at 27s 9d; one of Havaha, No. 11 to 11<sup>1</sup>/<sub>2</sub>, at 29s 36 per cwt. Refined.—The market has been steady, with a moderate business doing in dry goods from about 40s to 42s 6d upwards for titlers. Other kinds of refiners produce remains quiet. MOLASHES—About 250 puncheons West India have sold during the week. Dominica, 11s 6d; Antigua, 12s 6d to 13s per cwt. COFFER—The market has been very active, with higher prices, and the demand from the continent is still good. About 3,000 bags native Ceylon have changed hands by private contract at 57s to 58s, for good ordinary to rather bold quality. Business is also reported for arrival, the prices not given. The sound portion of 1,575 bags by auction sold at 57s to 58s; superior quality and bold, 59s to 60s 6d. 15 casks, 58s 6d. 2,888 casks 1,200 barrels and bags plantation sorts went with spirit at about 2s recovery on last week's quotations : grey, 63s to 73s; colory, low middling dull to middling, 65s to 74s; good middling to fine bold, 75s to 58s, superior quality and bold, 59s to 60s 6d. 15 casks, 58s 6d. 2,88s casks 1,200 barrels and bags plantation sorts went with spirit at about 2s recovery on last week's qu good firsts Rio for the Mediterranean at 54s 6d; one of Santos, at about 58s 6d per cwt for a near port. The stock has further increased to 58s 6d per cwt for a near port. The stock has further increased to 21,110 tons, against 21,960 tons last year, but in 1869 it was 24,400 tons. Landed last week 2,510 tons, delivered 1,730 tons, against 950 tons in the previous s

the previous season. RUM.—The business this week has been chiefly in Jamaica, and the business reported is at 3s 7d to 4s 4d per gallon. There seems less inquiry and several arrivals have taken place. Demarara and all com-mon kinds remain as before. Mauritius quoted is 4d to is 4½d per proof gallon, according to quality. COCOA.—Several parcels of Guayaquil have changed hands at firmer prices, from 50s to 52s, and superior quality at 57s. The market gene-rally is steady. Of 479 bags Trinidad by auction on Wednesday, a portion sold at 64s to 90s for common to good quality. The fine descriptions were bought in. 36 bags Grenada part sold at 58s per cwt. owt

TEA.—There have been further public sales of tea without reserve, at which lower prices occasionally ruled. 15,084 packages brought for-ward to yesterday sold, including a common new season's black leaf congou, at 11d to 113d; other grades 1s 4d to 1s 84d. Scented capers again declined, the range of prices being 11d to 1s 04d per lb. The Abbotsford, from Foo Chow, has arrived with new season's Kaisow congou, and the prices hitherto ranged from 1s 4d to 2s 4d per lb. At the sales of Indian tea there was more demand for good qualities, all in-ferior and weak being dull. Privately, a steady business, and the finest grades show 2d per lb recovery on the secent very depressed quotations RICZ.—Numerous floating cargoes have again sold, including six of Rangoon at 9s 9d to 9s 104d for the continent; one off the coast at

# THE ECONOMIST.

9s 71d, one at 10s 3d, landed terms. Two Necrancie Arracan for the continent at and about 9s 3d; one Moulmein at 10s, ex ship, for Lon-don. 600 tons Raree and Bengal at 9s to 9s 6d, according to terms. 1,364 bags Bengal by auction were bought in.

SAGO .- Increased supplies have resulted in a decline of 3d to 6d upon small grain, at which 3,326 bags partly sold : common to good, 15s to 16s 6d ; a few lots low, 14s 6d. Of 462 boxes, a few lots realised 17s 6d. 275 bags bold brownish part sold at 17s per cwt.

TAPHOCA .- 1,803 bags Penang were taken in. 596 bags good Singa

pore sold at  $2\frac{1}{4}$  do  $2\frac{1}{4}$  dper lb. BLACK PEPPER.—Several sales have been made at a further slight advance. Penang, 6d to  $6\frac{1}{5}$ d; Singapore, 6d to  $6\frac{1}{4}$ . To arrive,  $5\frac{2}{4}$ d to 6d, and  $9\frac{1}{16}$ d to  $6\frac{1}{5}$ d paid respectively. At auction, 475 bags Singa-pore sold at 6d to  $6\frac{1}{5}$ d; a few lots  $6\frac{1}{4}$ d for grey to good. 80 bags Trang at 64d to 64d per lb. WHITE PEPPER.-325 bags partly met with buyers at 10d to 10gd for

WHITE PEPPER.—325 bags party met with buyers at 10d to 10gd for Singapore, including slight sea-damaged. OTHER SPICES.—At the public sales on Wednesday 41 cases brown Penang nutmegs were chiefly taken in above the value. A few lots sold at a further advance, viz., 2s 9d for 107's. 10 casks small limed from Amsterdam sold, prices not given. 2 cases good Penang mace realised the high price of 4s 3d. 40 bags Amboyna cloves sold at 4<sup>1</sup>/<sub>2</sub>d. 52 bags Zanzi-bar at 3d. 220 bags fair quality cinnamon chips at 4<sup>1</sup>/<sub>2</sub>d per 1b. The cinnamon sales on Monday will contain about 2,300 bales. 31 barrels cinnamon sales on Monday will contain about 2,300 bales. 31 barrels Jamica ginger sold steadily at about former rates: low to good, 45s to 76s. 184 cases Cochin went steadily: rough, 40s to 45s; part scraped, 56s to 73s. 562 bags African sea damaged, &c., 28s to 32s. 200 cases cassia vera from Singapore in small bundles part sold at 73s per cwt. SALTPERE.—Transactions have been upon rather a limited scale during the week, and amount to about 700 bags on the spot. Refrac-tion 7½, 27s 6d; 5, 28s, short prompt. No further business re-ported for arrival. Informers and Darivers of Excents to the spot.

Deliveries last week 255 tons. COCHINEAL.—Reports of the Teneriffe crop having suffered injury has stimulated the demand, and business is reported privately at full prices to 1d advance. This improvement was maintained at the sales on Wednesday. 887 bags Teneriffe chiefly sold: silver, 2s 4d to 2s 7d; black, 2s 4d to 3s 9d. 201 bags Honduras: silver, 2s 4d to 2s 9d; black, 2s 9d to 2s 11d. 25 bags Mexican: silver, 2s 3s to 2s 5d; black, 2s 4d to 2s 6d per lb. The stock of Teneriffe is 7,130 serons, against 6,860 and 3,990 serons, &c., in the two preceding years at the same date. There have been delivered 19,210, 12,306, and 14,020 serons, &c., reanectively to present date.

There have been delivered 19,210, 12,306, and 14,020 serons, &c., respectively to present date. OTHER DRYSALTERY GOODS.—At the public sales 1,987 packages cubes gambier part sold at 20s 6d to 21s for good. Block is firm at 16s 3d to 16s 6d. 150 tons sold to arrive at 15s 10gd to 16s, ex ship. 1,300 boxes cutch were taken in at 22s for good. Sales privately have been limited. 1,000 bags Bengel turmeric were bought in at 20s. Orchella weed was taken in at 30s to 60s. 342 bales Persian and Egyptian safflower with-drawn. Business has been done in Bengal by private contract. SHELLAC is steady, and 565 chests by auction partly sold: garnet, 115s to 117s 6d; fine orauge, 140s to 147s 6d; one lot, 150s; button, 120s to 150s per cwt.

120s to 150s per cwt. METALS.—The markets remain rather quiet, excepting for iron which

is still in good demand. Rails fully support the prices quoted, there being a ready business for exportation, which is likely to extend to the is still in good demand. Rails fully support the prices quoted, and being a ready business for exportation, which is likely to extend to the continent. Other sorts of manufactured are unchanged In South pig the operations have been upon a large scale up to 638 6d cash. No sales reported in spelter, and prices are nominally the same as before. English tin offers upon reduced terms. Foreign has been depressed, but now shows some recovery. Stratts, after receding to 130/, became firmer, and sold yesterday at 1311 to 1321. Tin plates are in good demand. Lead has been steady. The market for copper is rather weaker. Chili, &c., 661 10s to 671 10s; Walaroo, 761 per ton. English can be obtained below fixed quotations.

weaker. Chili, &c., 667 10s to 677 10s; Walaroo, 707 per ton. English can be obtained below fixed quotations. HEMP.—There have not been any public sales, but a parcel fair roping, disposed of by private contract, realised full rates. Some business has been done at and about 467 yer ton. At auction yesterday 135 tons Russian went at 307 10s to 307 15s for clean Petersburg, and 327 15s per ter for Rhine. ton for Rhine.

ton for Rhine. JUTE.—Business in Dundee is quiet both for jute and yarns, with prices rather tending downward. Transactions in this market have been unimportant, and 3,118 bales by auction on Wednesday partly sold at about last week's rates. Low, 18/ to 19/; middling to fine, 21/ to 26/ 10s. A parcel of common quality was reported afloat sold yesterday at 19/ per ton.

yesterday at 197 per ton. LINSEED.—A moderate extent of business has been done. Calcutta at 62s 6d to 63s ex ship, summer and autumn shipments, 60s 3d to 60s 9d. A cargo of Odessa off the coast at 57s 71 per quarter. OIL—Olive is firmer, owing to reports of the injury to the olive crops. Business is chiefly restricted to the lower qualities, Mogadore selling at 487 10s. The markets for common fish are depressed, owing to advices of an abundant take at Davis' Straits. Pale seal nominal at 387. Sperm dull. Colonial, 817 per tun. Palm quiet at 377 for Lagos, and inferior sorts in proportion. Cochin cocoa-nut continues scarce. Caylon dull at 387 to 397, and 5s less has been accepted for arrival. Linseed is steady at 327 10s to 327 15s on the spot; 327 demanded to the end of the year. English brown rape steady at 417 15s to 427 per ton, on the spot and to the end of the year. Refined as before. 28.

PETROLEUM is in better demand. American rofined, 1s 5<sup>2</sup>/<sub>4</sub>d to 1s 6d per gallon.

TURPENTINE .- American spirits, after declining to 36s, recovered to

36s 3d to 37s per cwt. TALLOW.—Prices of foreign remain unaltered as for some weeks past, and the market is steady. This morning's quotations are as follow:—Petersburg on the spot, 44s; October to December, 45s; December only, 45s 3d to 45s 6d per cwt. The sales of Australian declared for to-day amount to barely 1,000 casks. PARTICULARS OF TALLOW—Monday, Aug. 21, 1871. 1870. 1870.

HIDES.—The sales of East India on Thursday went at full prices to a slight advance for kips. Tanned hides and buffalo ditto went at steady prices. Total quantity offered, 232,284 hides, of which 190,250 sold.

#### FRIDAY EVENING. POSTSCRIPT.

POSTSCRIPT. FRDAY EVENING. SUGAR.—The market is firmer, and importers demanding rather higher rates. Sales of West India to-day 480 casks. For the week 2,522 casks. Barbadoes by auction was chiefly taken in. Privately 21,000 bags Manila sold: clayed, 24s to 26s 66; Zebu, 22s 66 to 23s. A floating cargo of Bahia in bags at 22s for the United Kingdom. COFFEE.—8,234 bags Costa Rica sold at full market rates. Pale to colory, 62s to 73s 66; a few lots fine, 80s 66. 362 casks 25 barrels 243 bags plantation and 500 bags native Ceylon, sold at previous advanced rates, and 379 cases 1,477 bags East India at steady prices. 158 pack-ages Mocha were bought in.

ages Mocha were bought in. BLACE PEPPER is held for a further advance

SALTPETRE. - 50 tons Bengal in course of landing sold at 28s per cwt,

usual terms.

CUTCH.—862 boxes fine Pegue were taken in at 22s per cwt. METALS.—The chief feature to-day was a decline upon Scotch pig iron to 63s per ton cash. TALLOW.—Foreign unchanged. At auction 976 cssks Australian mostly sold at previous rates: mutton, 42s 6d to 43s 9d; beef, 41s to 41s 9d; mixed melting, 41s 6d to 42s 6d; and inferior, 36s 6d to 38s 6d per cwt per owt.

#### ADDITIONAL NOTICES.

ADDITIONAL NOTICES. Day FRUIT.—The first cargo has arrived this week and further parcels are expected on Monday. Prices opened at from 32s to 38s, and sales were effected at a fair rate, although the quality proved scarcely so satisfactory as buyers had hoped for. Better descriptions are expected by later arrivals. New Valencias were on the market on the 22nd inst., and quality and condition both gave satisfaction, not-withstanding the evident appearance of hurried packing. The whole of the first shipment was readily cleared up, at prices ranging from 32s to 37s; a small portion of exceptionally fine fruit fetching even more. The second cargo is in the river to-day, and will be placed on the market and probably cleared to-morrow. ENGLISH WOOL.—Market very firm. COLONIAL WOOL.—The market remains very firm ; good demand. FLAX.—Market steady.

FLAX.-Market steady. HEMP.-Market for Russian very dull. Manila firm, and a large usiness done for forward delivery.

SILK .--- Market weak, and little doing.

SEEDS .- The seed trade rules rather inactive, owing to the unc tainty prevailing as to the yield of seeds. Thrashings are not satis-factory, and it remains yet to be seen whether the seed crops are not

factory, and it remains yet to be seen whether the source of the over estimated, and quotations were better than expected. TOBACCO.—The market for North American tobacco continues very quiet, and in Kentucky there has been comparatively nothing doing, whilst for Virginia of old import there has been more inquiry; but the stock in first hand is so very small that the operations of buyers have consequently been very limited. In other growths, such as substitutes and segar tobaccos, there has been a fair business done.

and segar tobaccos, there has been a fair business done. LEATHER.—The demand for leather has been good throughout the past week, and although there was not a large attendance of buyers at Leadenhall on Tuesday, the supply of fresh leather was unusually small, and the stocks have been still further reduced. The demand was especially good for light crops, good English butts of all weights, foreign butts, good English shoulders, dressing hides, shaved hides, calf skins, and horse hides. Prices still show an upward tendency, particu-larly of English and foreign butts, and common dressing hides. METALS.—The week has been quiet. Coppor dull of sale, and the few transactions reported have been at slightly reduced rates. Iron continues to hold a firm course. Tin has fluctuated, but has rallied from the lowest point. Spelter is rather neglected. Lead is firm, as also are tin plates.

also are tin plate

#### METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 21.—The total imports of foreign stock into London last week amounted to 17,244 head. In the corresponding week in 1870, we received 11,940; in 1869, 12,570; in 1868, 7,958; and in 1867, 8,163 head.

8,163 head. Less firmness has been noticed in the cattle trade to-day. The sup-plies of stock have been larger, and the quotations have been barely maintained. A large number of foreigners has come to hand, and some well-conditioned animals have been noticed in the supply. The best breeds have made from 5s 2d to 5s 6d per 8 lbs. From our own grazing districts the receipts have been on a fair average scale. Only three Aberdeen beasts have been cffered, and they have been disposed of at 6s per 8 lbs. The best shorthorns have made 5s 8d to 5s 10d per 8 lbs. There has been a good show of sheep in the pens, including a large number of foreign. The trade has been quiet. The best Down<sub>g</sub>

# THE ECONOMIST.

8

have occasionally made 6s 10d, but 6s 6d to 6s 8d per 8 lbs has been the general top quotation. The supply of lambs has been moderate. The demand has been quiet, but prices have ruled firm, at from 6s 6d to 8s per 8 lbs. Large supplies of calves have been on sale. With a slow trade, prices have had a drooping tendency. Pigs have been dull on former terms.

#### HOP MARKET.

BOROUGH, Friday, Aug. 25.—Although the bine has derived much benefit from the recent favourable weather, the crop will be smaller than for many years past. This market has been inactive, but for all classes of hops extreme prices have been realised :—Mid and East Kent, 60s to 147s; Sussex, 60s to 105s; Farnham and country, 90s to 130s; Sussex, 60s to 100s; olds, 20s to 30s.

POTATO MARKETS. BOROUGH AND SPITALFIELDS, Friday, Ang 25.—The supplies of pota-toes have been limited. The market has been quiet, but prices have been steady :—Regents, 60s to 80s; shaws, 40s to 60s; kidneys, 80s to 110s.

#### LIVERPOOL MARKETS.

#### WOOL.

WOOL. (FROM OUR OWN CORRESPONDENT.) FRIDAY, Aug. 25.—Public sales were held here on Wednesday and Thursday last with about 10,000 bales, of which about 8,000 bales were Turkey and other Mediterranean wools, the remainder consisting of Peru, Alpaca, Portugal, Spanish, &c. The attendance was fair, but the demand not equal to absorb so much of one particular class of wool, and a large proportion of Turkey, &c., had consequently to be withdrawn; other kinds sold at about late rates.

#### CORN.

CORN. FRIDAY, Aug. 25.—There has been a fair attendance at this market to-day. Wheat closed with a steady business, at an advance of 2d to 3d per quarter on Tuesday's rates. Flour, 6d to 1s higher; beans, 6d; and maize, 3d dearer; beans, Saidi, 32s 6d to 33s; mixed, 31s to 32s; peas, 39s 6d; oats, 3s 8d to 3s 10d; oatmeal, round, 29s to 29s 6d; fine, 29s 6d to 30s; Indian corn, 29s 9d. The tone of the market was steady.

WAREFIELD, Friday, Aug. 25.—At this market to-day new wheat came to hand sparingly, and met a ready sale at high prices. Old wheat was 1s dearer, with a moderate demand for fine fresh parcels. Another account says:—This market was firm, and fine old red or white wheat account says :--This market was firm, and fine old red or white wheat was 1s dearer than on last Friday. A few samples of new wheat were ahown, but the quality was only moderate.

# The Gazette.

TUESDAY, August 22. BANKRUPTS.

# THE ECONOMIST.

HUBBUCK'S PATENT WHITE ZINC PAINT Is the most durable and beautiful paint known, does not stain or discolour with the atmos-phere of large towns, and by their process, which is patented, is cheaper than White Lead. It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron osed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for

Paint from Grinders who have and their best work. Each Cask of Pure White Zine is stamped— "HUBBUCK, LONDON, PATENT." THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 74 LIME STREET. "For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parentshave remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT, PATROSISED BT THE QUEEN, Is extensively used for all kinds of OUT-DOOR WORK. It is especially applicable to WOOD, IRON, BRICK, STONE, AND (33 New street, Birmingham. For GENTLEMEN. H. # RAILWAYS OF THE SOUTH OF AUSTRIA AND UPPER ITALY.

REPORT presented by the Board of Directors at a GENERAL MEETING, Ordinary and Extraordinary, of the Shareholders, held at Paris, on the 12th July, 1871, BARON ALPHONSE DE ROTHSCHILD in the Chair.

GENTLEMEN, — It is unnecessary to enter into any explanation of the causes which have twice compelled us to postpone your meeting; they are too notorious and too painful to call for any

meeting; they are too notorious and too painful to call for any apology for delay. You are aware that, owing to the insufficient number of shares deposited, you were unable last year to deliberate on the matters which were submitted to you as an extraordinary meeting. This deliberation will therefore be resumed this year, at the same time that you will have, as an ordinary general meeting, to approve, if found correct, the accounts that will be laid before you; to fix the amount of the dividend, and to ratify either the election or the re-election of the different directors. In our election or the re-election of the different directors. In our report we shall follow the same order as usual.

#### CHAPTER I.

#### Works and Expenses of First Establishment.

The seven groups into which the whole of the concessions made to the Company are divided, represented, according to our last year's report, a total length of 4,173 kilometres, of which were worked 3,898 kilometres; to be constructed, 275 kilometres.

Owing to a rectification made in the length of the Villach-Franzensfeste line, and the addition to our network of the Bussoleno to Bardonnèche line, the state of the whole network is at present (July 12) modified as follows :--hilon

Total length Of which are worked	•••••		4	,221 ,898	oa.

South Austrian Network. Length of the Network, 2,237 kilometres, viz.

1. Lines originally conceded, 4,974 kilometres working; 2. Lines, the eventual concession of which was regulated by the Convention of 27th July, 1869, 263 unfinished—total, 2,237 kilometres.

Trieste Line.—The works for enlarging the passengers' station at Vienna have been regularly continued in accordance with the programme adopted two years ago. The covered hall is finished; the new buildings on the arrival side have been finished and are now used; those on the departure side will probably be ready for use at the end of this year; these reconstructions on the site of a station where the traffic is very considerable are subject, either owing to the exigencies of the service or with a view to economy of expenditure, to very strict conditions, which render it impossible to hurry on their execution. The consequence is that, as stated in your previous report, this transformation cannot be completed till some time in the year 1873.

completed till some time in the year 1875. The plan adopted some years back for the goods station at Vienna will be completely carried out in the course of the pre-sent season. The ground so judiciously purchased by the Com-pany in 1869 will allow of successfully making, without any great outlay, such additions to this station as the progress of the traffic may render necessary.

traffic may render necessary. The rebuilding of the passengers' rooms at the Gratz station has commenced, and the new edifice will be ready for use towards the close of 1872, when the line from Gratz to Raab will probably be opened, and the passenger service of that line will most likely be effected in our station.

We have submitted to the Government for the erection of the Trieste station a new project, which presents, both as regards the interests of the Company and those of trade and of the town of Trieste, very considerable advantages as compared with previous plans. This project, received with favour by the Commission of inquiry assembled at Trieste on the 16th of March last, has been

definitively approved by the Ministry, and we hope to be able soon to commence the execution of this important work. With the exception of the Vienna station, the works executed in 1870 on the Vienna-Trieste line and its branches, and on the Croatian and Corinthian lines, are of very little importance; they consist of alterations made in a few small stations, and of the construction of sidings and a few warehouses.

The rolling-mill at Gratz, the results of which, both as to the quality of its produc's and their cost price, continue to be very satisfactory, turned out in 1870 :--

Common iron rails Steel rails Various articles	2,975	

Total ..... 17,299

As we stated last year, the production of the rolling-mills ex-As we stated has year, the production of the Company; we ceeded for the moment the requirements of the Company; we had therefore accepted a first order, for a third party, of 11,000 tons. This has been executed, and we have accepted for 1871 another order for 5,060 tons.

We have completed our manufactory of Bessemer steel by the erection of a furnace on the "Martin" system, which enables us to utilise all the scraps of steel rais, and also to increase our production of the said rails, which are being successively substi-tuted, with the best results, for iron rails on all the sections pre-

senting steep gradients. Hungarian Lines.— The works executed in 1870 consist in lay-ing down several sidings, in the erection of a small number of accessory buildings, and especially of sheds for storing corn. Tyrolese Lines.—The unusual severity of the past winter has caused very trifling interruptions, and, after an experience or four verse is not the the Record in the horizont.

four years, it is now certain that the Brenner line has nothing to fear from snowdrifts and avalanches.

We cannot say \*s much for the inundations, which during the first years inevitably cause damage on lines passing through mountainous regions. Hitherto the Brenner line had escaped this influence, but quite recently a sudden flood has occasioned, in the part lying between Innsbruck and the Col, some rather serious damage, so as to interrupt communication for several days. The effects of this freshet, which made great raviges in the whole valley, and even at Innsbruck, have proved the neces-sity of executing, on several points, works of consolidation, similar to those effected on the southern section of the line after the inundation of 1868 the inundation of 1868.

The works executed on the Tyrolese lines in 1870 are limited to a few alterations and additions in the stations, rendered necessary by the increase of the traffic.

The expenditure in 1870 on the lines of the South Austrian network, as originally conceded, amount to 6,829,798f 21c; the previous outlay was 386,447,157f 53c-total expenditure to 31st Dec., 1870, was 393,276,955f 74c.

Lines eventually conceded by the Convention of 27th July, 1869. (263 kilometres in course of construction). Villach-Franzensfest and St Peter-Fium Lines.—The construc-

tion of these two lines has been pushed on actively, and advances

regularly, so that we may rely on their being completed within the limits of time and expenditure originally proposed. To secure in good time the realisation of the resources neces-sary, we appropriated in November last a second portion of the special loan to these two lines. The amount of this loan has been encessively placed at our disposal at different date. been successively placed at our disposal at different dates, the last of which was the 1st July instant, so that four-fifths of the capital intended for the execution of these lines is now realised.

realised. The expenditure in 1870 on the lines composing this section amounts to the sum of 29,018,561f 15c; previous outlay, 6,054,293f 53c-total to December, 1870, 35,072,854f 68c. *Port of Trieste.*—The construction of the port of Trieste is actively advancing, the works of the embankment in the offing have proceeded with all regularity, the mole is already above water for a length of 300 metres, and the submerged portion is making increasent process. msking incessant progress. The nature of the soil on which the foundations of the first mole rest having caused a preceptible sinking, the additions of further materials was suspended until the subsidence should cease—this appears to be the case at pre-

# THE ECONOMIST.

sent. The execution of the second mole advances rapidly-part of it is already above water; the construction of the third mole has been commenced, and we have good reason to feel assured that, thanks to the experience acquired, the accidents which hindered the works at first will not recur.

#### § II.

Italian Network. Length of the Network, 2,832 kilometres, viz. :-1. Lines belonging to the Company (working, 1,924 kilo-metres; under construction, 60 kilometres), 1,984 kilometres; 2. Lines belong to private companies and worked by the Com-pany, 848 kilometres—total, 2,832 kilometres. Venetian Lines.—The works for the construction of the mari-

time station at Venice, which the Company is executing on the account of the Government, in virtue of the Convention of 4th October, 1868, have been carried on with all the rapidity allowed by the special conditions of the works and the exceptional severity of the past winter. We have good ground to hope that

severity of the past winter. We have good ground to hope that they will be completed by the time appointed. The masonry work of the bridge over the Grand Canal, which is to connect the maritime station with *terra firma*, were finished at the opening of the present year, and the metal bed, already prepared, has been laid down. By the terms of the Convention above-mentioned, the reim-

bursement by the Government of the expenditure for these works is to be made by instalments spread over a number of years. The first two, amounting together to 800,000f in round numbers, have been regularly paid when due.

The modifications in the workshops at Verona, and the enlarge-ment of the station at Mestre, rendered necessary by the increase of the traffic, were completed in 1870.

Lombard and Central Italian Lines.-The works of the definitive bridge on which the Bologna and Venice line crosses the Po at Pontelagoscura have been continued without interrup-tion. Three piles out of five and one of the abutments have been terminated, and the iron bed, the total length of which is metres, is laid for a length of 214 metres.

The expenditure down to 31st December, 1870, amounted to 902,981f 21c.

The works for repairing the damage done by the floods of 1868 in Central Italy, between Poretta and Pracchia, were strengthened and completed in 1870, in consequence of another overflow of the Reno. The outlay for these works, which will be finished in 1871, amounts to the sum of 410,137f, which have been provisionally covered, as well as that of 1,717,406f 93c overended in 1869 to the first establishment account until the ed in 1869, to the first establishment account, until the exper definitive application, at present submitted for the approbation of the Government, shall have been settled.

The constantly-increasing traffic at the Bologna station has rendered indispensable certain additions to the lines and build-ings, and even to the workshops, which could not possibly be deferred. They will be continued in 1871. . *Piedmontese Lines.*—The expenditure on account of the primi-tive network of Piedmont has been applied principally to the following works :—

following works :-

1. The erection at the Turin station of a new workshop for making 40 locomotives, limited to 20 at present, which works will be continued in 1871.

2. The completion of the new station at Coni, and of the Novara market.

The radical reform in the system of coupling, and in the beds of certain bridges on the Turin and Tieino line.
 The continuation of the renewal of the line between Turin

and Genoa, on which 106 kilometres of rails have been replaced, which raises to 274 kilometres the length of single way totally renewed on this line.

5. The renewal of 18 kilometres of the Alexandria-Arona, Alexandria-Placentia, and Turin-Ticino lines. Milan to Vigevana Line.—The Company completely terminated

in 1870 the definitive stations it had undertaken to erect, as well as the works for the defence of the Ticino bridge. The total expense, reckoned at 650,000f, will be reimbursed

The total expense, reckoned at 650,000f, will be reimbursed with interest at 8 per cent., by a deduction from the first divi-dends distributed to the shareholders, in accordance with the Convention concluded with the company that ceded the line. Lines included in the Convention of the 24th January, 1869, with the Italian Government, approved by the Law of 28th August, 1870. The Convention of 4th January, 1869, which has had to under-go certain changes, which we shall explain and discuss in another chapter, was finally approved by the Italian Parliament, and homologated on the 28th August, 1870. The expenses of establishment or of repairs are as follows :--*Tuscan Lines.*-The new buildings for the separate service of the Company at the Florence station were finished in February, 1870, and immediately opened to the public. It was found necessary to modify and increase the number of the lines in the station itself, in order to satisfy the requirements of the traffic. The bridge over the Ombrone at Nievole, between Pistoja and Pisa, has been rebuilt; a new metal bay, 30 metres in the open-ing, has been substituted for the provisional wooden bridge pre-viously existing.

viously existing. The way has been entirely renewed for a length of 6 kilo-metres between Florence and Massa.

We may here remark that, in accordance with the terms of the Convention of the 4th January, 1869, the Company, in taking possession of the Tuscan lines, had contracted the engage-ment to advance to the Government a sum of 45 millions in four successive instalments.

The first three instalments, forming a total of 33 millions. were duly paid into the Italian Treasury; the last instalment will fall due on the 31st December, 1871.

The other outlay for first establishment, which the Company has engaged to make on the Tuscan lines, is for the purchase of the rolling-stock necessary for successively commencing to work each section of this network, and for the improvement of certain works of art, and of the more important stations.

For these purposes we have expended, down to 31st December, 1870, 8,000,000f.

In the four or five years that follow, until the opening of the last section of the lines conceded to our Company by the Com-vention of 4th January, 1869, there remains to be expended about 10.000.000f.

All this expenditure is to be reimbursed to the Company by the Government, out of its share of the proceeds of the working, with interest at 8 per cent. per annum.

The Government is actively proceeding with the execution of the three breaks which still exist in the Tuscan lines between Florence and Nice

Florence and Nice. The section from Savona to the French frontier, which is of great interest for us, will be opened for circulation in the last quarter of the present year for a length of 116 kilometres. The tunnel under the city of Genoa, which is to join the two short lines already worked from Genoa to Savona, and from Genoa to Sestri-Levante, is terminated in small sections, and will very shortly be opened to the public. As for the last section, between Sestri-Levante and Spezzia, which will complete the system of communication between the French and the Italian networks, it cannot be finished owing to

French and the Italian networks, it cannot be finished owing to the present difficulties it presents for some few years to come. The works of the line from Savona to Bra, of which we were

to undertake the working on conditions analogous to those under which we engaged to work the Tuscan network, but without having, on this acccount, any advance to make, are rapidly pro-gressing, and will probably be terminated in the course of 1872. Bussoleno and Bardonneche Line. - This line, which branches off

from the Turin and Susa line, runs to the entrance of the tunnel of Mont Cenis, and directly connects the Italian network with the French.

In virtue of the Convention of 4th January, 1869, our Company resumed on the 1st of November the direction and manage ment of the works of this line, which had been continued by the Government on the bases already stipulated by the Upper Italy in 1869. These works have since been carried on with the utmost activity, notwithstanding the severity of the season. At the stations of Bussoleno and Salbertrand they have already begun the buildings in which the trains are to be composed and decomposed in order to pass over the steep gradients which occur in this part of the line. The tunnel of Mont Cenis, that great work so courageously undertaken and so skilfully con-ducted, will be completed in the course of this month, so that the line may soon be open to the public as far as Modane.

This commercial route, so important for the intercourse between Italy and Austria on the one hand, France, Belgium, and England on the other, will therefore be opened immediately. Its influence on our traffic cannot fail to make itself felt, and the returns of our network must ere long be considerably increased. Redemption of the Shares of the Turin and Susa Line still remaining

in circulation. By the terms of the original Concession of the Turin and Susa line, the Sardinian Government reserved to itself the right of

redeeming this Concession when the Mont Cenis tunnel should be opened, by buying in the shares at the par of 500f. Of the 13,000 shares forming the social capital of the Turin and Susa line, 9,085 belonged to the Victor Emmanuel Company

The Italian Government having redeemed the concession of The Italian Government having redeemed the concession of the Victor Emmanuel in 1863, these shares became the property of the State, until, in 1864, they were ceded to our Company along with the lines forming the Piedmontese network. As to the remaining 3,945 shares which are in the hands of private holders, the Government purely and simply transferred to our Company the right of redemption which it had originally reserved.

reserved.

The unredeemed shares of the Susa line have yielded ever since 1865 a yearly interest of more than 74 per cent., the open-ing of the section from Bussoleno to Bardonneche prolonging the Susa line to the Mont Cenis tunnel, and making that line the principal means of communication between France and Italy,

will certainly add considerably to the value of those shares. In this state of things, we could not hesitate to take advantage of the right of redemption conferred on us by the Convention of 1864, and we have officially informed the holders of the unre-deemed shares of this our decision.

# THE ECONOMIST.

sum of 1,957,500f will be necessary for this operation, which is to be effected towards the close of 1871.

The expenditure incurred in 1870 on the lines of the

Italian network belonging to the Company amounts 28,503,704 76

- (Including 8,471,205f 25c for works executed on the Bussoleno and Bardonneche line, which, according to the Convention of 4th January, 1869, makes part of the Piedmontese network, as above explained.)

The previous expenditure was ...... 304,108,121 29

Total to 31st December, 1870 ..... 332,611,826

As to the expenditure made on the lines belonging to private companies and worked by the Company, it amounts to 5,231,230f 18c, and applies exclusively to the Montferrat lines, of which we shall presently speak.

Law of 28th August, 1870, approving the Convention of 4th January, 1869. In preceding general meetings we have often had to speak of negotiations with the Italian Government extending over several years.

The questions that we had to treat have been successively solved, either by arbitration or by the passing of the law of the 28th August, 1870, which sunctioned the Convention of 4th January, 1869.

We gave you a detailed statement of these different questions in the general meeting of the 28th April, 1869. It will now suffice to lay before you the principal results, in order that you may duly appreciate their importance and their consequences. We may here state that two arbitral awards, given in Decem-

ber, 1867, decided in our favour the questions relative to the Cuneo bonds, and to the proceeds of the lines from Novara to Gozzano, and from Bra to Alexandria.

The first of these awards exempted us from a burden which would have amounted every year, till 1916, to 490,488f 50c, and from 1916 till 1958, to 258,044f 57c.

The second allows us not to include in the returns covered by the guarantee of 28 millions, specially affected to the Piedmont network, a yearly sum of about 850,000f.

The modifications in the terms of our contracts relative to the guarantees are definitively settled by the Law of 28th August, 1870, in the sense indicated by the Convention of 4th January, 1869, with certain restrictions which do not materially affect their advantages. Thus the reimbursement of the guarantees their advantages. Thus the reimbursement of the guarantees will commence in 20 years; if before that date the average gross yearly r-turns of the whole network have not attained 44,000f per kilometre, which was the limit fixed by the Convention of the 4th of January, this reimbursement will be effected by taking no longer the half but the three-fourths of the excess over the gross returns realised in the 20th year.

As regards the income tax, our position for the ensuing twenty years is regulated very nearly on the conditions we announced to the general meeting of 28th April, 1869; that is to say, we are to pay during those twenty years the same sum that we paid in 1867 for the tax on personal property.

As to the land tax, we stand on the same footing as all other landowners; but there is no probability that this tax, already so

heavy, will be increased in any great degree. The Convention of 4th January, 1869, altogether relieved us from any increase of the tax on personality, until the gross annual proceeds of all our lines shall average 44,000f per kilo. metre.

The Law of 28th August has slightly modified this state of things; a maximum term of 20 years has been substituted for the more uncertain limit of a gross income of 44,000f; but all the sums that we should have had to pay during those twenty and the sums that we should have had to pay during those twenty years in addition to the fixed sum liquidated and paid in 1867, either by an augmentation of the quota of taxes, or by the sub-stitution of taxes equal in amount, will have to be carried to account and be reimbursed to the Government from and after the 21st year, by means of a deduction of three-fourths of the excess of the gross returns of the 21st year over those of the 90th as already stated 20th, as already stated.

There is no reason for us to trouble ourselves at present about an eventuality still so distant; what is certain is, that the prin-cipal advantages of the Convention of 4th January, 1869, though somewhat diminished, are definitively secured to us. These advantages are :-

advantages are :--The postponement for twenty years of the reimbursement of the guarantees, the said reimbursement having to be effected without interest by means of the three-fourths of the excess of the gross returns of the 21st year over those of the 20th. The postponement till the same date of the application to our Company of the common law relative to the tax on personalty, and of the reimbursement of the taxes not paid during that same period of twenty years, these new charges having to be covered

and of the reimbursement of the taxes not paid during that same period of twenty years, these new charges having to be covered by the same fraction of the excess of the gross returns. The prolongation of all our concessions, which are extended to 99 years, counted from the 1st of January, 1870, being con-erminous with the concessions enjoyed by our Company on its

Austrian network. This prolongation, indispensable as regards the issues we have still to make, will considerably lighten for the years next ensuing the burden caused by the paying off of the new bonds

The part of the Convention which relates to the concession of the Bussoleno and Bardonneche line, including the Mont Cenis tunnel, has undergone no modification, and the result is that the guarantee of the Piedmontese network is definitively increased by two mill ons, the proportional application of which will take place from the day when the section from Mont Cenis to Modane shall be open to the public, which, according to all appearances, will be in September next. As to the leasing of the Tuscan lines, the Government has

reserved the faculty of annulling the contract ten years after the completion of the whole line—that is, in 13 or 14 years. It is doubtful that the advantages to be derived from this reservation will induce the Government to exercise its right.

# § III. Plant and Rolling-Stock.

Our rolling-stock, including the orders given in 1870, con-sisted on the 31st December last of-1,109 locomotives, 2,788 passenger carriages, 19,471 goods waggons and trucks, with vessels on Italian seas and lakes, comprising ten steamers and

three lighters. We have likewise ordered, in Austria or in Italy, to be delivered as early as possible, in vie \* of the opening of the Villach-Franzensfeste line, of the lines from Savone to the French from-tier, and that of Mont Cenis, as well as in prevision of the increase of traffic-55 locomotives, 150 passenger carriages, and 800 goods waggons.

Our workshops at Warburg and Vienna have continued during the year 1870 the construction of passenger carriages and goods waggons at a very reasonable cost price.

The outlay in 1870 for work and material was ...... 10,357,960 44 And down to the 31st December, 1869 ...... 148,577,151 34

Total expenditure to the 31st December, 1870 ... 158,935,111 78

# THE ECONOMIST.

deficit was only 29 millions, and, according to the terms of our last report, to provide for that sum, as well as for the expen-diture of the year, the sum to be realised in the course of 1870 was, at the date of the general meeting, 58 millions, the realisa-tion of which would have presented no difficulty if the general prosperity had been maintained.

The serious events that occurred during the second half of the year led to a complete cessation in the sale of bonds, and brought about the situation in which we found ourselves at the commencement of the present year, and which was of a nature to excite the ment of the present year, and which was of a nature to excite the most serious uneasiness. There was no time for hesitation, and the Board of Directors exercising the powers originally con-ferred on it in 1866, and which had been reserved by the general meeting in 1870, was resolved to take advantage of the first opportunity that might present itself to terminate the difficulty. Different combinations had been studied and even prepared when the suspension of arms, which led to the peace, intervened. It was then easy to foresee that a treaty of peace, whatever might be the terms of it, would have the immediate or ultimate consequence of a very considerable issue of *rente*, in pre-sence of which the Company would meet with some obstacles in raising its own loan; it was therefore necessary to take advan-tage of the interval which immediately followed the conclusion of peace to negotiate the loan, and in accordance with that idea of peace to negotiate the loan, and in accordance with that idea the Board of Directors concluded the operation of which we have now to give you an account.

The necessity for the immediate negotiation of a loan being once admitted, there would have been a great inconvenience in limiting ourselves to a sum inferior to the requirements of the Company amply sufficient for a period during which the influence of the present crisis on the French market might be felt, and nothing would have been more dangerous than to make repeated appeals to credit in rapid succession. It was therefore neces-sary to fix the amount of the loan so as to meet all the requirements of the Company not only during the present year, but also in a great measure in the next. The sums necessary for that purpose were, at the moment when the loan was issued, as follows :

Advances by credit accounts	63,250,000
Last payment to be made to the Italian G	overnment
(Convention of 4th January, 1869)	
Expenses of establishment in 1871	
Reimbursement of bonds falling due in Septem Reimbursement of bonds falling due in March as	
ber, 1872	
Coupons and amortisation in arrear	12,550,000

157,800,000 The French market being then closed to us, we applied to England, and by the intervention of the powerful firm which

has so large an interest in our undertaking, and whose aid to us has never been wanting, we succeeded in negotiating a loan of 750,000 bonds (obligations) on the following conditions :--

The contracting banking-houses agreed to take the 750,000 bonds at the rate of £8 7s, payable at different periods in succession, and of which the last is fixed for the 15th August next.

The sums to be paid by the association to the Company are stipulated as follows :-

	ITANCE.
19th May, 1871	41,682,500
10th July, 1871	12,549,150
7th August, 1871	11,085,100
15th August, 1871	92,498,250

157.815,000

This great operation, successfully realised, guarantees the Company in the future from all financial embarrassments. Apart from the anticipated requirements mentioned above, and covered by the loan, the charges for which we have to provide can give rise to no difficulty.

With respect to the expenses of establishment, the only one of any importance that remains to be borne, and which refers to the lines comprised in the concession of the 27th July, 1869, accorded by the Austrian Government, is covered by the special loan negotiated at Vienna, and of which four-fifths are now realised

Apart from these lines, there only remains on the Austrian network the completion of the Vienna and Gratz stations, which will be very far advanced in 1872, and the construction of

which will be very far advanced in 1872, and the construction of the Trieste station, which will be spread over several years. With respect to the Italian network, the only expenses to be provided for consist of a sum of about four millions to put the Piedmont network in complete working order; about two millions for the buying in of the shares of the Susa line; and lastly, some expenses for improvements and extensions on the different lines of the network. The expenses remaining to be efforted

different lines of the network. The expenses remaining to be effected on the Lombard and Central Italy lines are for the construction of a certain number of permanent buildings in the stations, to replace the wooden sheds in which the service is now carried on, the enlargement of some goods stations, and the improvement of that of Bologna.

CHAPTER III.

§ VL

Receipts.

The gross working receipts amounted in 1870 to 128,875,177 which— Of 74,121,967 South Austrian network ...... following results : -South Austrian Network. A francs.

Receipts in 1869	77,273,375 74,121,967	
Diminution B.—UPPER ITALY NETWORK. Receipts in 1867	3,151,408 francs. 55,574,718 54,753,210	
- 1870 Diminution	821,508	

The diminution on the two networks combined amounted to 3.972.916f.

In our last report we referred to the causes which led during the first half of 1870 to a considerable falling off in the receipts the first half of 1870 to a considerable falling off in the receipts of the South Austrian network. After the very considerable in-crease realised in 1868 and 1869, a moment of stagnation was probable. The majority of the Austrian railways suffered from the same influences. This check in the traffic was, however, only temporary. The comparative diminution in the receipts on that network, which amounted at the commencement of July to 5,750,000f, became gradually reduced in the last months of the year to a sum of 3,151,408f, and the reduction would have been greater but for the extraordinarily had weather, which impeded greater but for the extraordinarily bad weather, which impeded the traffic during the month of December. The results of the first six months of the present year are

most satisfactory. The increase realised amounts to more than nine millions of francs, notwithstanding the interruption of the

nine minions of francs, notwithstanding the interruption of the service caused in January by the snow. The augmentation is especially large on the Brenner line, and compared with 1870 represents since the 1st January an increase of 47 per cent. The diminution of receipts on the Upper Italy line arises from obvious causes. The commercial relations of Italy with France are of such a nature that the military and political affairs in the latter country could not fail to exercise their influence on the other side of the Alps. At the moment when the war com-menced the receipts of the Italian network presented on the corresponding period of 1869 an increase of a million-and-a-half corresponding period of 1869 an increase of a million-and-a-half of francs; but from that time the traffic did not cease to decrease, and the augmentation realised in the first half-year has not only disappeared, but gave place to the decrease of 821,508f, indicated above.

The total working expenditure amounts to Of which	52,197,476

	Increas		1 301 366	

The total cost of working in the South Austrian network in-crea ed by 1,182,934f, while the gross receipts decreased by 3,151,408f. The proportion of the working expenses to the gross receipts, which was  $33_{70}^{-1}$  in 1869, amounted in 1870 to

36<sub>10</sub>. This augmentation was caused by various causes. The year 1870 was very difficult for the maintenance of the

The removal of the snow, and the repairs of damage caused by the heavy rains and floods, occasioned extraordinary ex-penses; and the repair of the line alone in 1870 shows an in-crease of 855,800f on 1869.

The nature of the traffic has also been somewhat modified; although the receipts from goods trains have diminished by 4,586,000f, there was an increase of more than 100,000 tons, which means that the quantity of goods sent increased in a large. proportion, while the distance diminished considerably (1). The result is that the average cost of carriage on a ton of merchandise diminished by nearly 12 per cent., while the cost

of conveyance increased.

The increase in the working expenses on the Upper Italy net-work arises entirely from the traction service. The mileage increased by 760,596 kilometres in consequence of the opening

	The second	1869.	1870.

# THE ECONOMIST.

We propose to you to accept that view. We believe it would | be superfluous to repeat the considerations we have just referred be superfluous to repeat the considerations we have just referred to, and which, in our opinion, place the speedy amelioration of the position of our enterprise beyond all doubt. We also abstain from repeating the reasons we have made use of in our former reports, to maintain against the objections raised the right to use, with prudence and moderation, the reserves accumulated in previous years. We believe those questions sufficiently eluci-dated, and we confine ourselves to stating the principle, and achieve the principle of the second seco

dated, and we confine ourselves to stating the principle, and asking you to ratify it by applying it. The question being so placed, it remained to determine within what limits the faculty should be used, and on that point there was room for hesitation. If we were living in a period of tran-quillity, and if we were not exposed to see politics add fresh difficulties to those which our enterprise has already experienced, we should not hesitate to propose to you to use our reserves freely ; but in the present state of things we think that the infi-nitely better course would be to sin on the side of prudence, and the divergence which was manifested in the Board imposed upon us extreme moderation. We think therefore that we ought to limit the sum taken from the reserve to the amount necessary to complete a dividend of 15f. complete a dividend of 15f.

If you approve our proposition, the balance sheet will be as follows :-

# 

#### Balance to be carried to reserve account ... 8,916,222 14

Thus, deducting the sum of 1,740,632f 10c, taken from the extra statutory reserve to make up the dividend to 15f, we have a balance left to be carried to the profit and loss account of 1871 of 8,916,222f 14c, perfectly sufficient to place us beyond the

reach of any preoccupation. The instalment distributed in November last year was 7f 50c; there will have to be paid, to make the dividend 15f, another sum of 7f 50c per share, which will be paid on and after the 15th of this month.

#### CHAPTER V.

#### Extraordinary General Meeting.

The last general meeting not having been able, from an in-sufficiency of shares being represented, to constitute itself into an extraordinary meeting, we reproduce here a statement of the transactions to be submitted to your ratification, and the principal object of which is the improvement of the conditions under which we are bound by the terms of the conventions concluded with the Italian Government, to work certain lines belonging to private companies. Lines of Montferrat.-The lines belonging to the Montferrat

Company comprise :

1. A line 98 kilometres in length, from Cavaller-Maggiore (station on the line from Coni to Alexandria), open since 1865, which by the terms of the convention with the Italian Government we are bound to work, and on which we experience every year a considerable loss.

2. A line which, branching at Castagnole station on the above-mentioned line, runs by Asti and Casale to Mortara, across our Piedmontese network, and which was opened for traffic the 5th July, 1870.

From the situation of those lines in the midst of our network and the obligation we are under to work them have arisen numerous difficulties, the greatest of which was the constantlyincreasing loss resulting from working them. To endeavour to ameliorate that state of things and to prevent

for the future the present inconveniences, which threatened to become intolerable, a negotiation was opened with the Montferrat Company, and a convention was arranged, which will be submitted to your approbation. The basis of that agreement, the text of which is annexed to

last year's report, arc as follows :-The Upper Italy Company takes on lease the Montferrat lines for the whole term of their concession, with the liability of mes for the whole term of their concession, with the hability of providing for the 51,891 bonds and the sinking fund for the 28,000 shares issued by the Montferrat Company, the taxes re-maining payable by the holders. The total of those charges represent a sum of 842,000f—about 4,445f per kilometre, a sum which, after 1875, will be increased by about 200f per kilo-metre for the extinguishment of the shares. Out of the 51,891 bonds we have just mentioned, and which form the whole of the sum presearcy to complete the Montferret lines 28,000 of the sum necessary to complete the Montferrat lines, 28,000 had not been issued at the moment the agreement was con-cluded. We thought that it would be advantageous to prevent that emission which was imminent, and we accepted, under the reserve of your approbation, the proposition which was made to us to purchase the right of emitting the 28,000 bonds at the total price of 5,150,388f 35c.

The securities in question would have created for the Company an annual charge for interest and sinking fund of 420,000f. The capital devoted to that purchase having cost us 6½ per cent., that is, 334,775f, we have realised on that head an annual saving of 85,225f.

It results from that combination that the convention made

with the Montferrat Company assures us the possession of these lines for a capital of 5,150,000f, plus the interest on the bond previously issued to the number of 24,000, 386,000f, plus 10f for each of the 3,000 shares of the Brà line, 30,000f, plus finally the sinking fund for the 31,000 shares.

In consequence of that arrangement, and taking into account, on the one hand, some accessory expenditure a' the moment of taking possession, and, on the other, the profit resulting from the contract for the permanent way, those lines stand in the Italian network for a capital of 5,231,230f 18c.

Our Company being charged with the working of these lines it had a great interest in charging itself also with the supply of the material for and the construction of the permanent way which it would have to maintain ; in consequence it made a contract with the Montferrat Company to lay down the rails not yet placed over a length of 94 kilometres. That operation has enabled us to utilise the rails in good condition which we had removed from the line from Turin to Genoa, and replace the latter by steel rails.

Participation in the Purchase of the Vienna Circular Railway.] The Austrian Government, having resolved to sell the Vienna Circular Railway, the six great railway companies (1) whose lines terminate in that capital came to an understanding, and joined together to purchase and work the line in common ; each was to have a sixth share.

After long negotiations, the price was fixed at two millions of florins, which sum was paid to the Government on the 24th February, 1870.

The purchasers have the banefit of the returns from the 1st January, 1870.

The expenditure to be incurred to complete the line and put it in a perfect will not in any case exceed the sum of one million of florins.

The line will be worked in common, under the direction of a special company.

The Vienna Kailway was worked for ten years on account of the State by the Northern Company and our own, united for that purpose.

The interest of this combination for the associated companies, and in particular for ours, is considerable ; the capital engaged is limited, and we have not hesitated to use, in this circumstance, the powers you had confided to us for the regulation of the affairs pending with the Austrian Government.

Contracts relative to the Working of Two Secondary Lines. With a view to facilitate the establishment of useful branches, we have admitted in principle, that our Company might, under certain conditions, undertake the working of those branches.

Two agreements of that kind have been entered into : the frat is relative to a line of 34 kilometres, which leaves the Vienna-Trieste line at the station of Neustadt, and terminates at the station at Grammat Neusiedl, on the line from Vienna to Raab. This line serves numerous manufacturing establishments, whose traffic with Vienna is at present almost exclusively conducted by and will thus, in great part, come to our line from roads, Neustadt to Vienna.

The second agreement concerns a line of 13 kilometres which connects our station of Leoben with the Metallurgie, centre of Vordernberg

The general principles of those contracts are as follows:

The line, the plans of which are drawn up in accord with us, and of which we have the right to superintend the construction, is delivered to us in a state completely prepared for a determined amount of traffic.

All the costs of working and maintenance fall upon us, but all the expenses of enlargement necessitated by the development of traffic, beyond the amount which serves as the basis of construc-

tion, are at the charge of the proprietary company. We shall supply the rolling-stock on receiving a special indemnity.

The Company, to cover its cost and trouble, has a right— 1. To 50 per cent. of the receipts up to 40,000 florins per mile, a minimum of 20,000 florins being guaranteed it in any

case.

2. To 45 per cent. of the receipts exceeding 40,000 florins per mile.

3. To 6 per cent. of the total gross receipts as an indemnity for supplying the rolling-stock.

In conformity with the terms of Article 19 of the Statutes, we submit to the ratification of the general meeting-1. The convention concluded with the Montferrat Company.

2. The Act relative to the participation of our Company in the purchase of the Vienna Circular Railway. 3. The two agreements for working the lines of Grammat-Neusiedl and of Leoben-Vordernberg.

The Emperor Ferdinand Railway Company. The Austrian State Railway Company. The Empress Elizabeth Railway Company. The Emperor Francis Joseph Railway Company. The North-Western Railway Company. The Southern Railway Company.

### THE ECONOMIST.

#### CHAPTER VL. Summary and Conclus

The statement we have just presented to you is doubtless not very satisfactory in what concerns the results of the year 1870. A reduction of  $3\frac{1}{2}$  millions in the receipts, an increase of 1,182,954f in the working expenses, and of 1,537,495f in the charges, have reduced the sum applicable to dividend, and from motives of prudence we are not permitted to propose to you to compensate entirely that deficit by taking the necessary sum compensate entirely that dencit by taking the necessary sum from our previous reserves. That result is assuredly very regret-able; but what must be stated is that it is purely accidental and essentially transitory, and that the situation of the Company has considerably improved during the last few months. On the one hand, in fact, our floating debt has been conso-lidated under conditions which in truth would have been less heavy in better times, but which, considering the circumstances, and in presence of a French loan of 2 milliards, bearing interest at 6 per cent., must be considered as very moderate. The ex-

at 6 per cent., must be considered as very moderate. The ex-penditure still to be made on our network beyond the loans already realised are unimportant; they are almost reduced to improvements which may be rendered necessary by the progress of the traffic; the only charge for which we have henceforth to provide by an emission of bonds is the repayment of 195 millions, falling due in the six years from 1873 to 1878, and there is rea-son to hone that this reasyment divided over a long paried when son to hope that this repayment, divided over a long period, when our network will be in full activity, will be made under condi-tions which will compensate the high charges imposed upon us by the consolidation of our floating debt at a difficult moment.

That is a first fact the importance of which cannot be ex-aggerated, but the point of view which ought especially to pre-occupy us, that on which entirely depends our future, as well immediate as distant, is assuredly the improvement of the returns of our network. We have on that head some considerable facts to state, and certain hopes to mention. In the first place, the gross receipts, which had diminished in 1870 by about  $3\frac{1}{2}$  millions, has regained more than 9 millions in the first half of 1871, and that augmentation comes almost entirely from the Austrian network, when it has been realised by the natural development of the traffic, and without any extraordinary commercial fact. The receipts of the Italian network, restrained hitherto by the events in France, are reviving at this moment, and promise a notable increase for the second half of the financial year, and in addition, the closely-approaching opening of the two lines of Mont Cenis and the Corniche assure to the receipts of this net-work an important amelioration, and which cannot fail to progress rapidly by the development of the commercial relations not only between France and Italy, but between France, Austria, and Hungary. We may, therefore, be permitted to hope that after so many vicissitudes we are approaching a period of calm, in which the resources of our network can be developed in a continuous manner, and justify the confidence we have always had, and now feel more than ever, in its future.

Article 15 of the Convention of 1867 with the Austrian Government imposes on the Company the obligation to divide itself into two distinct companies after 1867, and accords a delay of five years for the regulation of the financial arrangements of the two companies. Those two conditions were difficult to be brought into unison; it is, in fact, quite clear that the two companies could only become independent when the financial arrangements between them shall have been definitively

settled. The Austrian Government having several times raised this question, and demanded that it shall be taken into serious consideration, we cannot avoid deferring to that request, and we are taking steps to present it shortly, with a detailed note on that subject. The negotiation which is about to open on that question requires the assistance of the Austrian and Italian Governments, and we are persuaded that, from the examination and discussion of the elements of the question, will issue a solution guaranteeing the rights and independence of the respective Governments, at the same time that it will take equitably into account the interests of our share-holders, as well as the conditions of working which might exercise holders, as well as the conditions of working which might exercise an influence on the development of the traffic, and on the prosperity of the two networks. It is well understood, moreover, that the Conventions to be made with the two Governments for that object will be submitted to you, and will only become definitive a'ter having received your approbation.

#### Report of Auditors.

The undersigned commissioners, charged with the annual veri-fication of the accounts of the United South of Austria and neation of the accounts of the Onited South of Austria and Upper Italy Rail a y Company, declare that they have verified the balance sheet for the year 1869, and have found it perfectly in conformity with the writings contained in the Great Book of the Company. In witness thereof they append their signature. The Commissioners, LANDAUEE, MILDE. Vienna, 24th Dec., 1870.

The retiring Directors for this year, in accordance with the established order of rotation, are :---

For the Vienna Board-Baron de Morpurgo, Baron Anselme de Rothschild, M. de Somssich.

For the Paris Committee-M. de la Rosière. For the Turin Board-Marquis d'Adda, Chevalier Brot, Commander Restelli.

All of whom we propose to re-elect. We also ask you to ratify the appointment of Baron de Gödel-Lannoy, in the room of M. de Neuwall, deceased.

Resolutions of the Meeting.

The presence sheet, signed at the commencement of the meeting, showed the attendance of 51 proprietors, representing 113,088 shares. I.

The meeting unanimously approves of the accounts for the year 1870, and fixes the dividend at 15f. II.

The meeting unanimously approves of the Convention con-cluded with the Montferrat Railway Company for the leasing of the Cavallermaggiore-Brà-Alexandria and Castagnole-Mortara lines. IIL

The meeting unanimously approves of the participation in the concession of the Vienna Circular Railway, and the leasing of different small lines in Austria. IV.

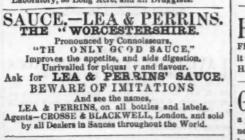

The meeting unanimously re-elects as Directors—Baron de Morpugo, Baron Anselme de Rothschild, M. de Somssich, M. de la Rosière, Marquis d'Adda, Chevalier Brot, Commander Restelli ; and also unanimously conforms the choice made by the Board of Vienna of Baron de Gödel-Lannoy, in the room of M de Neurond M. de Neuwall, deceased.

NEW RIVER COMPANY'S PERPETUAL DEBENTURE STOCK. The Directors of this Company (under the provisions of their Act of 1857) are ISSUING the above STOCK at par, for the purpose of extinguishing their Bond debt.

debt. The interest upon this Stock, at the fixed rate of 4 per cent., is payable half-yearly, on the 1st of February and the 1st of August, in priority of all dividends upon the shares of the Company. Any amount of Stock not being the fraction of a pound can be sub-cribed for and transferred. Applications to be made to New River Office, E.C. ALEX. INGLIS, Clerk of the Company.

Source of the second se

OXYGENATED WATER HOLDS IN U Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints. Laboratory, 36 Long Acre, and all Druggists.

MILNERS' STRONG HOLDFAST and FIRE-RESISTING SAFES (of Six Pro-gressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding gaag in the Cornhill and other rooberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements auring the last fail-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fre and the modern burglar. Milners' Phenix Bafe Works, Liverpool, Mauchester, Sheffield, Ledg, Hull; London depot, 47A Moorgate street, City, mear the Bank of England. Circulars free by post.
