NEW CATALOGUE

In presenting our new wholesale catalogue we beg to draw your kind attention to the fact that we are one of the largest growers of Gladioli in America, and that the varieties we offer are absolutely true to name. We are more than ever in a position to give our customers reliable service and dependable quality. Our storage facilities are adequate to take care of 10 million bulbs. Special attention is given to proper storing and treatment; bulbs kept at the right temperature during the winter, will keep their vitality much better.

HINTS FOR FORCING: Buy only the very best at least 1½ inch up and order early. The bulbs for forcing are looked after in the fall, every one is examined and stored away at the right temperature until shipping time. **YOUNG HIGHCROWNED BULBS** are essential. Plant around the middle of January and put the Glads 5-6 inches apart. **DON'T WATER THEM TOO MUCH**, just keep them moist, you can give them plenty of water, when the buds show. Keep the buds at a carnation temperature. Sunshine is essential. Don't plant them where they are shaded too much. One of our customers planted his forcing Glads between his rows of Sweet Peas; at both ends the bulbs flowered well, in the middle many came blind.

We are always at your service. Our life long experience in growing Gladioli is entirely yours. If we can do anything for you, just tell us about it.
