## REPORT OF THE TRUSTEES.

---

*Hon. Shelby M. Cullom, Governor of Illinois.*

SIR:—As required by law, the trustees of the Illinois Southern Hospital for the Insane submit the third biennial report of the institution.

The present board of trustees met on the twelfth of June, 1877, and organized according to the provisions of an act to regulate the state charitable institutions, approved April 15th, 1875. Mr. C. Kirkpatrick, of Anna, was appointed secretary of the board, and Mr. R. B. Stinson, also of Anna, treasurer of the institution.

On making settlement and closing up his accounts, the former treasurer of the hospital failed to pay over, of the moneys which had come into his hands, the sum of two thousand, nine hundred and ninety-six dollars and ten cents. Upon an investigation of his deposit accounts, he having deposited in various banks, a balance of three hundred and forty-two dollars and eighty cents was found standing in his favor in one bank, for which he gave his check, on which that amount was paid to the present treasurer.

That left a balance of two thousand, six hundred and fifty-three dollars and thirty cents due from him, for which amount, and one hundred and twenty-eight dollars and forty cents interest, judgment was obtained by the trustees, for the use of the state, against the former treasurer, and the sureties on one of his bonds, at the last April term of the circuit court for Williamson county, in which the late treasurer and sureties reside. According to the best information to be obtained, the amount is amply secure. After judgment was rendered, some of the sureties asked that execution should be stayed for a few months with a view to raising the money and paying the judgment.

Their request was complied with, but having failed to pay the judgment, an execution has been issued, which the prosecuting attorney of Williamson county informed the president of the board will be levied upon property amply sufficient to satisfy the judgment, if not paid in due time without levying.

If it becomes necessary to levy on and sell property, we will not be unmindful of our duty and the interests of the state.

Last July Dr. A. T. Barnes tendered his resignation as superintendent of the hospital, to take effect at the earliest day possible. It was dated July 1st, 1878, and was accepted, to take effect as soon as his successor could be appointed and qualified. Mindful of the welfare of the unfortunate inmates of the institution, and the interests of the state, we desired reasonable time to consider the matter.

At a meeting held August 6th, 1878, Dr. Horace Wardner, of Cairo, was appointed superintendent to fill the vacancy occasioned by the resignation of Dr. Barnes, and in September following he took charge of the institution.

We refer you to the reports of Doctors Barnes and Wardner, superintendents, and to the annexed tabular exhibits, which give a full and detailed statement of all transactions and doings for the two years ending the thirtieth of September, 1878, showing the number of persons admitted and discharged during that time, for each year separately; the number remaining in the institution; the average annual number; the receipts, disbursements and expenditures; the value of the property in the hands of the trustees and under their control; the amount of each appropriation, and the unexpended balances remaining in the hands of the treasurer of the institution, and in the state treasury.

On the eighth of November, 1877, the building commissioners turned over to us, and placed under our control, the south wing of the hospital. Some of the halls in it had been completed, furnished and occupied previous to that time. Since then the waste building material and other debris have been removed, and the ground immediately in front of the hospital graded and sodded, so that it presents a more pleasing appearance than formerly. It is in every way much better adapted to the purpose intended than the north wing.

Since June, 1877, the road from Anna has been regraded and covered with gravel. It is now a good, firm road, and can easily be kept in repair with the voluntary labor of male inmates of the hospital. After expending the amount appropriated for the road, a short distance remained uncompleted, which was completed with the labor of some inmates.

As stated by the late superintendent, Dr. Barnes, one of the architects who prepared the plans for the hospital buildings was employed to prepare a plan for building a new barn, not to exceed a cost of three thousand, five hundred dollars, the amount appropriated for that purpose. No bids could be obtained to build it for the amount appropriated. A new barn was a necessity. We reduced the plan until we were assured by a practical builder that it could be built for the amount. Rock was quarried on the hospital grounds, and the foundation laid, and the heavy timber and most of the lumber needed was contracted for and delivered on the ground at the rate of thirteen dollars per one thousand feet. A master builder, carpenters and laborers were employed, at current wages, to build it, and the work was actively commenced last spring. The amount appropriated was expended before the barn was covered with a roof, but most of the materials needed for it had been furnished and were on the ground.

When informed of the state of affairs, the president of the board directed the work to be stopped until the trustees could meet and consider the matter. They convened in July, and after viewing the work that had been done, and the materials on hand, and considering the waste that would result if permitted to remain in such an unprotected state, they assumed the responsibility to apply a part of the appropriation for improvements and repairs to the completion of the barn, in order to prevent the great waste that would inevitably ensue if left uncompleted. We trust that our action will be approved. The barn is now completed so that it can be used for storing hay, feed and straw,

and we have no doubt it can be entirely completed without any further appropriation, by a judicious and economical use of the appropriation made for improvements and repairs.

The dry closet, carpenter shop, and coal house were built, and a rotary oven put in the bakery, for the amount appropriated for those purposes, by the employment of brick-layers, carpenters and laborers, because no satisfactory bids could be obtained to do it for the appropriations made therefor, except the dry closet, for which a bid was obtained within the amount appropriated.

The last general assembly appropriated eighteen hundred dollars for a fire pump and hose. No proposal for the erection of such a pump as would answer the purpose, with the necessary fixtures and hose, was obtained, coming within the amount so appropriated, until a short time ago. It will now be erected as soon as possible.

Before entering upon some other matters, we desire to say that mistakes are sometimes made in rendering verdicts of insanity. In the last two years three persons were brought to this hospital, under verdicts of insanity duly rendered, who were ascertained not to be insane. They were discharged as soon as their friends could be got to remove them.

On the thirtieth day of September, 1878, there were four hundred and fifty-eight patients in this institution; the number is continually increasing, and within a few months it will probably be filled and contain five hundred. To maintain them as now provided by law, entirely at the expense of the state, except for clothing, we estimate that the sum of ninety-two thousand dollars per annum will be required for ordinary expenses. Under that head various expenses are embraced, including salaries and wages of officers and employes, food, medicine, furniture and bedding, fuel, freight and other items of expense. The estimate is based on a per capita cost of a few cents more than three dollars and fifty cents per week, for five hundred patients, considerably less than the cost heretofore, and we would respectfully ask that for their maintenance for two years from the first of July, 1879, the sum of one hundred and eighty-four thousand dollars be appropriated, being ninety-two thousand dollars annually. The expense of keeping an institution of this kind in repair and improving its usefulness is unavoidably somewhat large.

The concrete paving in the wash and engine rooms and bakery is so worn that new paving is needed; the floors in the basement of connecting corridors and domestic department need renewing; some rooms in the basement of the center building and south wing should be floored, plastered and finished for sewing rooms, storing and other purposes, which if done, will give some room in the domestic department very much needed for other uses than the present use thereof; the floors of the north wing need repairing; additional flooring is needed in the basement of center building and north and south wings; the high frame work supporting the water tank has never been enclosed to protect it from rains, it would be economy to enclose and paint it; the water supply is defective and rather precarious, and a considerable outlay is necessary to utilize expenditures heretofore made for supplying water; a conservatory to protect ornamental and flowering plants through the winter is also needed, which is now done temporarily in a part of the basement of the south wing. For the fore-

going and other improvements and repairs constantly needed, and which we will not occupy further space to detail, we respectfully ask an appropriation of five thousand dollars per annum for two years from July 1st, 1879.

As you will see in his report, Dr. Barnes, the former superintendent, thinks less than that amount would be sufficient. After deliberately considering what is needed, and especially the more rapid wear and tear of machinery as it becomes older, we concur with the present superintendent, Dr. Wardner, that the appropriation for improvements and repairs should not be less than it is at present, five thousand dollars per annum.

In order to carry out the plan heretofore adopted for improving the grounds, we respectfully ask an appropriation of fifteen hundred dollars per annum, for two years from July 1st, 1879.

The amount asked may not be sufficient to complete the improvements thereof as planned, but, with the voluntary labor of patients, added to employed help, much can be done towards completion. A considerable amount of grading remains to be done. That is expensive work, as it requires the employment of some teams to plow, scrape and haul ground to grade; and gravel to cover the drives, which has to be hauled some distance. It will be economy to complete the improvement of the grounds as early as possible, in order that they may the sooner yield an adequate return, in picturesque effect, for the outlay of money already made for that purpose.

The apartment now used for a kitchen is, since the occupation of the south wing, and the large increase in number of patients, entirely too small and inadequate (with the small store-room lately added to it) to prepare food suitably, and it is so constructed that no more room can be added to it without building an addition. A special diet kitchen is needed to prepare food for the sick, which cannot well be done as it should be where the general cooking for the hospital is done. It cannot be made palatable as in a kitchen especially fitted for the purpose.

We would therefore respectfully ask an appropriation of three thousand dollars to build a new brick kitchen with slate roof. With some building material on hand which can be used in its construction, we think that will be sufficient.

We have had no plan prepared, as we do not deem it necessary to pay an architect for one. If a new kitchen be built, the one now in use can be fitted for a special diet kitchen.

The necessity for the appropriations asked has been carefully considered. We trust they will meet your approval, and the approval of the general assembly, and deem it unnecessary to say anything about the disastrous results of insufficient appropriations for institutions like this, erected for the maintenance and cure of those unfortunately deprived of their reason, whose condition appeals so strongly to the best feelings of the humane. Many who are brought here with clouded and darkened minds have been discharged cured and have gone away rejoicing in restored reason.

We have endeavored to be as economical as possible in the administration of the affairs of this institution, and in all expenditures have endeavored to keep in view the interests of the state and the welfare of the inmates.

The surplus on ordinary expense account, in the hands of the treasurer of the hospital and not drawn out of the state treasury, will, we trust, satisfy you that we have not been unmiudful of the interests of the state.

The statement of the value of the property in the hands of the trustees, and under their control, is based on the present reduced cost of material and labor and the depreciation resulting from wear and tear.

We close with a recapitulation of the appropriations asked for, as follows:

For ordinary expenses, per annum.....	\$92,000 00
For improvements and repairs, per annum.....	5,000 00
For improvement of grounds, per annum.....	1,500 00
For new kitchen.....	3,000 00

All of which is respectfully submitted, with the reports of superintendents Barnes and Wardner, and accompanying tabular statements.

JOHN E. DETRICH, <i>President</i> ,	}	<i>Trustees.</i>
WM. P. BRUNER,		
E. H. FINCH,		

ANNA, ILLINOIS, October, 1878.

## REPORT OF THE SUPERINTENDENT.

*To the Board of Trustees.*

GENTLEMEN: I herewith submit for your consideration the Third Biennial Report of this Hospital, covering a period from October 1st, 1876, to September 5th, 1878. At the date of my last report there were present in the hospital:

Males.....	159
Females.....	82
	-----
Total.....	241

Since admitted:

Males.....	206
Females.....	182
	-----
Total.....	388

Discharged recovered.....	78
Much improved.....	14
Improved.....	17
Unimproved.....	23
Died.....	43
	-----

Total remaining, September 5th, 1878..... 454

There was an unexpended balance remaining on ordinary expenses, at date of last biennial report, of \$13,791 03, and on special appropriations the following amounts:

Repairs.....	\$1,054 47
Furniture for chapel.....	246 25
Coal house.....	1,000 00
Road from town to Anna.....	271 45
Tight board fence.....	343 46
Carpenter shop and purchase of tools.....	1,056 11
Improvement of the grounds.....	1,572 15
Stock for farm and patients' carriage.....	475 10
Ice house and vegetable cellar.....	79 50
Reservoir.....	279 50
Pump house.....	23 72

The above balances of special appropriations have all been expended in the direction for which the appropriations were made. (For par-

ticulars see itemized statement). The legislature at its last session made the following appropriations :

Improvement of the grounds.....	\$ 2,000 00
Finishing road from town of Anna.....	2,500 00
To complete coal house.....	1,000 00
To complete carpenter shop.....	400 00
Frame barn with stone basement.....	3,500 00
Fire pump and hose.....	1,800 00
Rotary oven.....	1,000 00
Dry closet.....	2,500 00
Improvements and repairs, \$5,000 per annum.....	10,000 00
Ordinary expenses, \$35,000 per annum.....	170,000 00

At the date of the last quarterly report to the board of public charities, July 1st, 1878, the following amounts were unexpended of the above appropriations :

Improvement of the grounds.....	\$ 492 85
Carpenter shop.....	209 39
Barn.....	42 08
Fire pump and hose.....	1,800 00
Rotary oven.....	306 40
Improvements and repairs.....	6,135 79
Ordinary expenses.....	39,135 37
Balance for ordinary expenses remaining in state treasury.....	85,000 00

The outstanding indebtedness on account of ordinary expenses was \$4,726 19. There were

Supplies on hand, estimated at.....	\$6,000 00
Due from counties for clothing.....	4,676 25
Due from individuals for clothing.....	3,419 60

After consultation with yourselves, I employed E. Jungendorf, an architect of St. Louis, to prepare suitable plans for a barn, coal house, carpenter shop, rotary oven and dry closet, and, after submitting the same for your instructions, I proceeded to let the contracts according to plans and specifications. I failed to find bidders inside of the appropriations, except on dry closet, and only on this after cutting down largely below the plans made by the architect. This building was completed, giving us a basement for drying clothes, sufficient for all purposes, and converting the second story into a fine ironing room, both rooms being large enough to answer all demands of the hospital at present. Between the floor of the dry closet and the ironing room there is an air space of nearly three feet, to prevent the dry closet from heating the ironing room. The ironing room has a fire-proof vault for heating irons, and a fine slate roof. It has two large ventilating shafts, so that the hot air may be driven out at top of roof by fan.

The carpenter shop was so arranged in building that we got two stories, using the first for the engineer's machine shop, and the second for carpenter shop. There is yet a small surplus of this appropriation which I intended to use in putting up shafting to run machinery.

I found that the appropriation for rotary oven was not sufficient to build an independent house and put in an oven, as it should have been, the old room being entirely too small, so I decided to remove the old one and put in one of Vale's ten-foot rotary ovens, which is now answering every purpose, and gives good satisfaction.

After careful and diligent inquiry, I found that the appropriation for a fire pump was hardly sufficient to do what I had contemplated at the start: to excavate nearly to a level with the water surface of the lower pond, so as to have but little lift of water for the pump

and to be in close proximity with the house boilers for steam supply; then to put in a good duplex fire-pump, with pipes sufficient to carry water to every floor in the building, with outside connexions to fight fire, together with hose sufficient for all practical purposes in case of fire. This appropriation is still in the hands of the state treasurer. The price of material and labor is so cheap now, that, in my opinion, the work can all be done without asking for any additional money aside from the present appropriation.

The plans for the new barn were greatly reduced, and by your consent, a competent and practical mechanic was employed to superintend its construction, and placed in charge, after giving, as his professional opinion, that the barn could be built for the money. I left him, to be absent five weeks, on leave, and on my return found the material nearly all on the grounds, the foundation up, with but little work done, and the money nearly all exhausted. I at once ordered work to cease, and at the earliest opportunity laid the facts before you for your consideration and further direction. To have allowed the barn to remain in its unfinished condition would have been almost an entire loss of labor and material; besides, the rock had been taken from the foundation of the old barn, leaving it standing only on props, and the hospital without any place to stow hay and grain, or cover for horses and cattle; I therefore urged you to finish the barn out of the fund for improvements and repairs. The barn is now about completed, and I think that the house carpenters can finish the same soon, and that when completed it will give ample room for stock, hay, grain, wagons, buggies, and all machinery for some time to come. The building is an ornament to the farm and hospital, and one of the finest in southern Illinois. I attach no blame to any one, but think the carpenter mistaken in his estimates.

The appropriation for improvement of the grounds has been almost expended in the way of grading, drives, walks, labor and trees. About eighteen hundred ornamental trees have been set out and are nearly all living. A landscape gardener has been constantly employed, together with several hands and patients, and to-day the expensive part of the work has been almost completed, and the grounds are beginning to assume the appearance of nice drives, walks, terraces and lawns. If the legislature will continue to give the hospital a small amount of money annually, with such labor of patients as can be utilized, these grounds may, in time, be made a little paradise.

The appropriation for improvements and repairs has been found to be of great benefit to the hospital in the way of painting, repairing, building, etc.; it is larger than it need be. I regard three thousand dollars per annum in the future as sufficient.

After the commissioners completed the south wing, they, at my urgent solicitation, removed one battery of the old boilers and put in two new drop-flue boilers of the following description: cylindrical in form, seventy-six inches in diameter, twenty-four feet four inches long, each boiler having one furnace five feet five inches wide by six feet two inches in length; eleven flues in each boiler, ten being twelve inches in diameter and one eighteen inches in diameter; shell of boiler, fire-box and smoke connexions, of three-eighths inch best C. H. No. 1 iron, heads of boilers one-half inch; they were in use last winter, and with less coal did all the work without using the other battery. They

have given entire satisfaction, and will, I think, be found amply sufficient for the purposes for which they were intended.

At the date of my last report I was very much dissatisfied with our gas machine, but on notifying Berry Brothers, of Detroit, Mich., the makers of the machine, they at once sent down Mr. Jas. H. Mason, their general agent, who, on examination, found the carburetter to be leaking badly, and, at their expense, removed the old one and put in a new one. It has done well ever since. The old machine not having sufficient capacity to light the new wing, the building commissioners contracted with Mr. Mason to put in an additional machine and air pump, together with a large iron store tank for fifty barrels of gasoline. Since that time we have had good light and very little expense as compared with coal gas. I take great pleasure in saying that I believe Berry Brothers to be honorable gentlemen, and Mr. Jas. H. Mason, in particular, a man worthy the confidence of any people.

The coal-house appropriation has been expended, and we have a fine coal-house with slate roof, and capacity sufficient for over six hundred tons of coal. All the new buildings are of brick with slate roof, except the barn, and are, I think, in keeping with the rest of the hospital.

The road from the town of Anna is about all completed, with the exception of a distance of one hundred yards which needs graveling; it will take an outlay of about one hundred and fifty dollars to complete it. We now have a beautiful drive both summer and winter, and by slight repairs each year the same may be kept in excellent condition. The road will soon pay for itself in the transportation of coal alone, the cost of hauling the same having already been reduced about fifty per cent.

The south wing was completed and occupied about the twenty-eighth of last September, and is a beautiful wing in every particular, and one that will give satisfaction, both in light, heating and ventilation; if I could say as much for the north wing I should be glad; there are many defects in this wing to be remedied at no distant day; they are well known to the board and I simply mention the matter that you may have it under advisement.

The sewerage of the north wing and center building, and the water supply, I regard as in a very uncertain condition; they will, in my opinion, some day give trouble. We have already been having leaks from the sewer main, and are liable, at any time, to have it choked. The location of this pipe is under the basement of building, and at several points it crosses the foundation walls; it is so deep under the ground that great expense and trouble is found in tapping it. It empties within a short distance of the hospital, thereby exposing all the inmates to the poisonous effects of sewer-gas. The water, during the summer months, is so bad that we can scarcely use it for bathing purposes, and absolutely not fit to be used for drinking and cooking, so that we have to carry water in buckets from a spring some distance from the house. The pond is gradually filling up from the surface drains, and the dam constantly exposed to leaks from freshets and crawfish holes, so you see, that in the future, I think we have great reasons for fear on this account.

The policy heretofore followed in locating institutions of this character has seemed to me to be political rather than practical. Men are

often appointed from private life, having no experience whatever in selecting sites for location, or the erection of hospitals, and I imagine, from some of the buildings and locations, men are appointed who never visited a hospital for the insane. If experience is worth anything we should be guided by it.

In this report it is impossible for me to give an itemized statement, or the usual tables. They are all being prepared, and I ask that they be made a part of this report.

It is well known to you, gentlemen, and to the old board of trustees, that I have, on numerous occasions, expressed a very decided desire to resign my present position, but have been persuaded by yourselves and others to remain, at least until the completion of the building. This I have done. On July 1st, 1878, I tendered my resignation, to take effect at the earliest day possible, and it was accepted as soon as my successor could be appointed and qualified. On the sixth of August, 1878, Dr. Horace Wardner, of Cairo, Illinois, was appointed to take the place made vacant by my resignation. Dr. Wardner leaves a large and lucrative private practice to take charge of this hospital, and is a man of age, education and ability, and, I have no doubt, will use every effort to make it a success. He leaves a people who regret to lose his valuable services, and enters a new field for thought and reflection. I trust, gentlemen, that you will give him the same liberal support that you have given me. To him I turn over the care of the unfortunates of this hospital, trusting in God, that under the intelligent management of my successor, many a darkened intellect may be relighted, and that he may be more successful than I have been.

To Dr. F. W. Mercer, who has been associated with me ever since the opening of the institution, I owe many thanks; his education and experience in the specialty eminently qualify him for a higher field.

The other officers and employes, for faithful service, I cheerfully recommend to your favorable consideration.

And to you, gentlemen, who have been my constant guides and support, I owe more than I can express in this report.

A. T. BARNES, *Superintendent.*

ANNA, ILLINOIS, Sept. 5th, 1878.

## SUPPLEMENTAL REPORT.

BY DR. WARDNER.

---

*To the Board of Trustees.*

GENTLEMEN:—The fiscal year and the biennial period closing with the thirtieth of September, it becomes my duty to make such report for your consideration as the short time I have held the position of superintendent enables me to present.

On the sixth of the month I assumed the responsibilities of the office. The report of my predecessor now before you includes the fifth. I have, therefore, only to account for the remaining twenty-five days to avoid a blank in the history of the hospital.

It is found impracticable to separate the reports of the two managements, with their numerous details, and I therefore present them, as shown in the accompanying tables, as one, taking the data from the records as they appear upon the books.

For the completion of the report of the movement of the population, as embodied in Dr. Barnes' statement, I refer you to table number one. Other tables giving statistical information follow it.

The unfinished section of the road to Anna, referred to in his report, has since been completed.

The work has been done by the employes and the patients without any additional expense to the state.

In carrying out the objects for which hospitals are established, sanitary conditions are of prime importance. This institution is doubtless located in as healthy a section as can be found in the southern part of the state. The surface of the country is such as to afford the best of drainage. It is watered by numerous perennial springs, several of which are in the immediate neighborhood of the hospital, but have not yet been utilized to the extent of which they are capable.

### THE WATER SUPPLY.

The reservoir from which the building is supplied is made by the construction of a dam across a ravine, forming a basin into which the water from surface drainage is collected. It is impure and totally unfit for drinking or culinary uses; and, as stated by Dr. Barnes, is objectionable for bathing purposes during the summer months.

The brick reservoir, or cistern below the dam, built to receive the water from a spring, and from a filter, which was to have been con-

nected with the pond, is partly filled with mud, and is useless. This could be made useful by connecting the supply with the discharge pipe, by means of a conducting pipe, in which a gate could be constructed, so as to let the spring water into the cistern, when it is clear, and shut it out during heavy rains, thus preventing the influx of mud.

The walls for a filter have been constructed, through which it was intended to pass the water from the pond, before pumping it into the tank. This has never been completed, and if it was, could not be used while the reservoir, or cistern in which the filtered water would be stored, is in its present condition.

The cost of repairs and changes necessary for putting it into suitable condition to be used, is estimated by our engineer, at two hundred and twenty dollars, and the cost of completing the filter at seventy-five dollars.

This would undoubtedly greatly improve the quality of the water as now supplied to the building.

It is very probable, however, that at no very distant day, the water supply may become a more serious question. In view of this, a careful examination of the springs near the building was recently made.

In the bottom of one of the sink holes, 600 feet south-east of the south wing, there is an opening in the rock, filled with water. The depth of the water on September twenty-sixth, was twelve feet. The spring known as the "big spring," seven hundred and fifteen feet farther, in a south-easterly direction, gave a depth of seventeen and one-half feet of water on the same date.

From this spring, which emerges from an opening in the rocks, there is a considerable stream of water, said to be the head water of the Cache river, and which old residents inform me has never been less than at present.

A temporary dam, which raised the water in a few hours  $10\frac{1}{2}$  inches, also raised it 9 inches at the former; showing a subterranean cavern of considerable extent, filled with water of a very good quality. It is the general opinion that this spring is capable of furnishing an abundant supply for the hospital.

#### VENTILATION AND SEWERAGE.

The defective ventilation and sewerage of the north wing has received attention in Dr. Barnes' report. I desire more particularly, at this time, to call your attention to the necessity of an early extension of the main sewer. It now terminates in a ravine four hundred and seventy feet from the south wing. When the wind is from the southeast, the gases arising at the outlet are carried to the building, where the inmates are exposed to their deleterious influences, especially in the hot months, when it is necessary to keep the windows open.

Several cases of disease lately occurring in this wing are believed to have originated from this cause.

An extension of this sewer five hundred feet would take the outlet so far away as to secure comparative immunity from disease arising from this source.

#### THE KITCHEN.

The facilities for supplying the inmates with suitably prepared food

have been inadequate to the demand since the south wing has been occupied.

Your request for an appropriation for a new kitchen, I most sincerely trust will receive the favorable consideration of the legislature; and that a new one will be built and ready for use at as early a day as possible.

To bridge over the time until it can be constructed, I have instituted such alterations and improvements as the means at command would allow, by which it is expected the cuisine of the hospital will be improved. These improvements consist in enlarging the room by taking in the small store room adjoining the dish room, and fitting a new reservoir for hot water, and a new coffee boiler (tea and coffee being previously prepared in the same boiler) and four new steam kettles, the dish sink reset, wood work painted, and walks and ceiling renovated.

#### BASEMENT.

There is a great deal of room in the basement which could be utilized to great advantage, if it could be finished off into rooms suited to the requirements of the institution. The ground should be covered with asphalt pavement, except in the domestic department where tile would be preferable.

The engineer informs me that the hospital is liable most any time to be deprived of hot water by the giving way of the main pipes, which are fast rusting out; and in consequence new piping will soon be required.

#### THE LAUNDRY.

The old washing machines having worn out, a contract was made on the thirtieth of September with T. H. Watson, of Chicago, for furnishing three reversible machines, of the Watson patent, at a cost of seven hundred and seventy-five dollars.

#### FIRE PUMP.

A contract for the erection of a duplex Washington pump, to be used in case of fire, was awarded to John Davis & Co., of Chicago, they agreeing to furnish a pump with fourteen-inch steam cylinder, six-inch water cylinder, and ten-inch stroke, with all pipe connections, and five hundred feet of four-ply three-inch rubber hose, and put the same in perfect working order for the sum of one thousand, six hundred and ninety-five dollars.

The same parties also contract to furnish a hose carriage for the sum of sixty-five dollars.

During the next two years a greater proportional outlay will be required for repairs than during the past when everything was comparatively new; natural wear and decay are becoming more evident from day to day. In view of these facts it seems to me that the appropriation for improvements and repairs ought not to be less than it is now.

#### QUARANTINE.

In consequence of the near approach of yellow fever, and the con-

sequent general alarm, the hospital was quarantined on the thirteenth of September, and on the twenty-third the excitement having subsided and the danger apparently passed, it was discontinued.\*

#### THE PATIENTS.

A large per cent. of the patients received during the two years for which this report is made, have been from the lower walks of life; a class leading somewhat irregular though not as a rule dissipated or intemperate lives.

Of the whole number admitted, eighteen were convicts, seventeen men and one woman. The physical condition of the patients received was, with few exceptions, much below a healthy standard, and in most, decidedly bad; anæmia and broken health being especially conspicuous amongst the women.

The tobacco habit existed in eighty-seven per cent. of the men, and in fifteen per cent. of the women.

During the early part of 1877 both men and women patients were confined to the older part of the building, the north wing, which was inadequate for the proper accommodation of both sexes; under such circumstances the patients were unavoidably exposed to insalubrious surroundings, and the crowded condition at that time added much to the unsanitary state; since the occupation of the new south wing, however, the condition has been good, and the general health of the patients proportionally improved.

The classification is also more exactly in accord with the best conceived theories.

During the two years the hospital was unfortunate in having a suicide in the house—a lady patient, having escaped the vigilance of her attendant, precipitated herself from a third floor window of the center building; her injuries resulted fatally. A gentleman who was removed by his friends, on a short leave of absence, committed suicide at his home. You will observe that these cases have been carried in to the tables accompanying this report.

The inmates have had great pleasure in the occupation of the south wing. Its plan and arrangement in detail give a home-like appearance to many of the wards, contributing largely to the contentment and cheerfulness of the patients. Amusements have been provided at short intervals during summer and winter, and we can discover unmistakable beneficial result therefrom.

#### DONATIONS.

The hospital is indebted to Rev. John S. Pearson, of New York, for a box of German and English books, newspapers and illustrated magazines; to Mrs. James Bell of Cobden, Illinois, for a lot of house plants; also to the publishers for the following publications:

The Jonesboro Gazette.....	Jonesboro,	Illinois.
The Independent.....	Chebanse,	“
The Farmer and Fruit Grower.....	Anna,	“

---

\* The hospital was again quarantined in October, during a second out-break of yellow fever at Cairo.

The Greenville Advocate .....	Greenville, Illinois.
The Plain Dealer.....	Sparta, “
The Sun.....	Greenville, “
The Centralia Democrat .....	Centralia, “
The Radical Republican.....	Cairo, “

I take great pleasure in expressing my sincere thanks to Dr. F. W. Mercer, senior assistant physician, whose hearty co-operation, ready aid, and knowledge of details in the working of the hospital has rendered my introduction upon the discharge of the responsible duties of my office comparatively free from embarrassment.

I desire also to extend the same sentiment to Dr. E. D. Converse, second assistant physician; Capt. J. B. Fulton, engineer; Chas. Olmsted, clerk, and all the officers and employes of the institution, for the ready and cheerful manner in which their several duties have been performed.

H. WARDNER, *Superintendent.*

CHAPTER 85. REVISED STATUTES 1874, PAGE 681, ENTITLED  
 "LUNATICS."

AN ACT to revise the law in relation to the commitment and detention of lunatics,  
 [Approved March 24, 1874. In force July 1, 1874.]

PETITION.] § 1. *Be it enacted by the people of the state of Illinois, represented in the general assembly,* That when any person is supposed to be insane or distracted, any near relative, or in case there be none, any respectable person residing in the county, may petition the judge of the county court for proceedings to inquire into such alleged insanity or distraction. For the hearing of such application and proceedings thereon, the county court shall be considered as always open.

WRIT—SERVICE.] § 2. Upon the filing of such petition, the judge shall order the clerk of the court to issue a writ, directed to the sheriff, or any constable, or the person having the custody or charge of the alleged insane or distracted person, unless he shall be brought before the court without such writ, requiring the alleged insane person to be brought before him at a time and place to be appointed for the hearing of the matter. It shall be the duty of the officer or person to whom the writ is directed, to execute and return the same, and bring the alleged insane person before the court as directed in the writ.

SUBPENAS.] § 3. The clerk shall also issue subpenas for such witnesses as may be desired on behalf of the petitioner, or of the person alleged to be insane, to appear at a time fixed for the trial of the matter.

JURY—TRIAL.] § 4. At the time fixed for the trial, a jury of six persons, one of whom shall be a physician, shall be impaneled to try the case. The case shall be tried in the presence of the person alleged to be insane, who shall have the right to be assisted by counsel, and may challenge jurors as in civil cases. The court may, for good cause, continue the case from time to time.

VERDICT—FORM.] § 5. After hearing the evidence, the jury shall render their verdict in writing, signed by them, which shall embody the substantial facts shown by the evidence, which verdict may be substantially in the following form :

STATE OF ILLINOIS, }  
 .....County, } ss.

We, the undersigned, jurors in the case of.....(naming the person alleged to be insane), having heard the evidence in the case, are satisfied that said.....is insane, and is a fit person to be sent to a state hospital for the insane; that he is a resident of the state of Illinois, and county of.....; that his age is.....; that his disease is of.....duration; that the cause is supposed to be.....(or is unknown); that the disease is (or is not) with him hereditary; that he is not (or is) subject to epilepsy, and that he does (or does not) manifest homicidal or suicidal tendencies. (If the person be a pauper, the fact shall also be announced in the verdict.)

VERDICT RECORDED—ORDER OF COMMITTAL—APPLICATION.] § 6. Upon the return of the verdict, the same shall be recorded at large by the clerk, and if it appears that the person is insane, and is a fit person to be sent to a state hospital for the insane, the court shall enter an order that the insane person be committed to a state hospital for the insane, and thereupon it shall be the duty of the clerk of the court to make application to the superintendent of some one of the state hospitals for the insane, for the admission of such insane person.

TO WHICH HOSPITAL—APPLICATION, ETC.] § 7. If such insane person is a pauper, the application shall be first made to the nearest hospital, but if he be not a pauper, application shall be made to such one of the state hospitals for the insane as the relatives or friends of the patient shall desire. In any case, if, on account of the crowded condition of any one of the hospitals, or for other good reason, the patient cannot be received therein, or it is not desirable to commit him there, he may be committed to any other of said hospitals. Upon receiving any such application, the superintendent shall immediately inform the clerk whether the patient can be received, and if so, at what time; and if not, shall state the reason why.

WARRANT TO COMMIT.] § 8. Upon receiving notice at what time the patient will be received, the clerk shall, in due season for the conveyance of the person to the hospital by the appointed time, issue a warrant directed to the sheriff or any other suitable person, preferring some relative of the insane person when desired, commanding him to arrest such insane person and convey him to the hospital; and if the clerk is satisfied that it is necessary, he may authorize an assistant to be employed.

FORM OF WARRANT.] § 9. The warrant may be substantially as follows :

STATE OF ILLINOIS, }  
 .....County, } ss.  
*The people of the State of Illinois, to.....*  
 You are hereby commanded forthwith to arrest.....who has been declared to be insane, and convey him to the Northern (or as the case may be) Illinois Hospital for the Insane, (and you are hereby authorized to take to your aid an assistant, if deemed necessary), and of this warrant make due return to this office after its execution.  
 Witness my hand and the seal of the county court of.....county, this.....day of.....  
 A. D. ....

[L. S.]

.....  
*Clerk of the county court.....county.*

INDORSEMENT—RETURN.] § 10. Upon receiving the patient, the superintendent shall indorse upon said warrant, a receipt as follows :

Received this.....day of....., A. D. .... the patient named in the within warrant.  
 Northern (or, as the case may be) Illinois hospital for the insane.  
 .....  
*Superintendent.*

This warrant, with a receipt thereon, shall be returned to the clerk, to be filed by him with the other papers relating to the case.

WHO NOT ADMITTED—IDIOTS DISCHARGED.] § 11. No person having any contagious or infectious disease, and no idiot, shall be admitted to either of the state hospitals. When the trustees and superintendent shall find that an idiot has been received into the hospital, they may discharge him.

TEMPORARY COMMITMENT.] § 12. If the court shall deem it necessary, pending proceedings and previous to verdict, or after verdict and pending admission to the hospital, temporarily to restrain of his liberty the person alleged to be insane, then the court shall make such order in that behalf as the case may require, and the same being

entered of record, a copy thereof certified by the clerk shall authorize such person to be temporarily detained by the sheriff, jailer or other suitable person to whom the same shall be directed.

**COSTS.] § 13.** When a person, not a pauper, is alleged to be insane, and is found by the jury not to be insane, the costs of the proceeding, including the fees of the jury, shall be paid by the petitioner, and judgment may be awarded against him therefor. If such person is found to be insane, such costs shall be paid by his guardian conservator, or relatives, as the court may direct. If the person alleged to be insane is a pauper, the costs of the proceeding, including the fees of the jury, shall be paid out of the county treasury: *Provided*, if such pauper is found not to be insane, the court may, in its discretion, award the costs against the petitioner.

**WHO TO PAY EXPENSES—SHERIFF'S FEES.] § 14.** The expenses of conveying a pauper to the hospital shall be paid by the county in which he resides, and that of any other patient by his guardian, conservator or relatives; and in no case shall any such expenses be paid by the state, or out of any funds for the insane. The fees of the sheriff for conveying any person to a hospital, shall be the same as for conveying convicts to the penitentiary.

**BOND TO FURNISH CLOTHING, ETC.] § 15.** If the person be not a pauper, then one or more persons, relatives or friends of the patient, shall, upon his admission into the hospital, become responsible to the trustees for finding the patient in clothes, and removing him when required; and shall execute a bond conditioned as follows, viz.:

Know all men by these presents, that we ..... and ..... of the county of ..... state of Illinois, are held and firmly bound unto the trustees of the Northern (or as the case may be) Illinois hospital for the insane, in the sum of one hundred dollars (\$100), for the payment of which we jointly and severally bind ourselves firmly by these presents.

The condition of this obligation is, that whereas ..... insane person of the county and state aforesaid, has been admitted as a patient into said hospital for the insane: Now, therefore, if we shall find said patient in suitable and sufficient clothing, whilst... may remain in said institution, and shall promptly pay for such articles of clothing as it may be necessary to procure for said ..... at the hospital, and shall remove... from said hospital when required by the trustees to do so, then this obligation to be void, otherwise to remain in full force.

Witness our hands and seals, this ..... day of ..... A. D. ....

..... [SEAL.]  
 ..... [SEAL.]

**CLOTHING.] § 16.** The clothing to be furnished each patient upon being sent to the hospital, shall not be less than the following: For a male, three new shirts, a new and substantial coat, vest, and two pairs of pantaloons of woolen cloth, three pairs of woolen socks, a black or dark stock or cravat, a good hat or cap, and a pair of new shoes or boots, and a pair of slippers to wear within doors. For a female, in addition to the same quantity of undergarments, shoes and stockings, there shall be two woolen petticoats or skirts, three good dresses, a cloak or shawl, and a decent bonnet. Unless such clothing be delivered in good order to the superintendent, he shall not be bound to receive the patient.

**PAUPERS—COUNTY TO FURNISH CLOTHING, ETC.] § 17.** If the insane person be a pauper, it shall be the duty of the judge of the county court to see that he is furnished with the necessary amount of substantial clothing at the time he is sent to the hospital, and from time to time, while he remains a patient in the hospital, and that he be removed therefrom when required by the trustees; the expense of such clothing and removal shall be paid out of the county treasury, upon the certificate of the judge of the county court.

DISCHARGE OF PATIENT—NOTICE—REMOVAL.] § 18. Whenever the trustees shall order any patient discharged, the superintendent shall at once notify the clerk of the county court of the proper county thereof, if the patient is a pauper, and if not, shall notify all the persons who signed the bond required in section 15 of this act, and request the removal of the patient. If such patient be not removed within thirty days after such notice is received, then the superintendent may return him to the place from whence he came, and the reasonable expense thereof may be recovered by suit on the bond, or in case of a pauper, shall be paid by the proper county.

NON-RESIDENT PATIENTS.] § 19. Whenever application shall be made for a patient not residing within the state, if the superintendent shall be of opinion that from the character of the case it is probably curable, and if there be at the time any room in the hospital, the trustees, in their discretion, may order the patient to be admitted, always taking a satisfactory bond for the maintenance of the patient, and for his removal when required. The rate of maintenance in such cases shall be fixed by the trustees, and two months' pay in advance shall be required. But no such patient shall be detained without the order of a court of competent jurisdiction, or a verdict of a jury.

RESTORATION TO REASON—DISCHARGE.] § 20. When any patient shall be restored to reason, he shall have the right to leave the hospital at any time, and if detained therein contrary to his wishes after such restoration, shall have the privilege of a writ of *habeas corpus* at all times, either on his own application, or that of any other person in his behalf. If the patient is discharged on such writ, and if it appears that the superintendent has acted in bad faith or negligently, the superintendent shall pay all the cost of the proceeding. Such superintendent shall moreover be liable to a civil action for false imprisonment.

COUNTY HOSPITAL.] § 21. This act shall not be construed to prevent the committing of any insane pauper to the hospital for the insane of the county in which he may reside, where such a hospital is provided.

TRIAL BY JURY NECESSARY.] § 22. No superintendent, or other officer or person connected with either of the state hospitals for the insane, or with any hospital or asylum for insane or distracted persons in this state, shall receive, detain or keep in custody, at such hospital or asylum, any person who shall not have been declared insane by the verdict of a jury, and authorized to be confined by the order of a court of competent jurisdiction; and no trial shall be had of the question of the sanity or insanity of any person before any judge or court, without the presence of the person alleged to be insane.

PENALTY.] § 23. If any superintendent, or other officer or person connected with either of the state hospitals for the insane, or with any hospital or asylum for insane or distracted persons, in this state, whether public or private, shall receive or detain any person who has not been declared insane by the verdict of a jury, and whose confinement is not authorized by the order of a court of competent jurisdiction, he shall be confined in the county jail not exceeding one year, or fined not exceeding \$500, or both, and be liable civilly to the person injured, for all damages which he may have sustained; and if he be connected with either of the insane hospitals of this state, he shall be discharged from service therein.
