FROM: Chief of Agricultural Administration Bureau.

TO: Prefectural Governors.

SUBJECT: Fertilizer Rationing Linked with Extra Rice Delivery in Addition to Assigned Quota.

According to NOSEI No. 386 dated 13 February 1947, issued by the Vice-Minister of Agriculture and Forestry, you were notified that fertilizers will be rationed on the basis of 2 kan of nitrogenous fertilizer (calculated in terms of the amount of ammonium sulphate) per bale of rice voluntarily delivered in addition to the alloted quota. The procedure is mentioned below, and results on the voluntary delivery of rice should be actually obtained.

1. Calculation of the amount of extra rice delivery is made for each village that has completed its alloted quota, according to paragraphs 2 and 3 of SHOKUKYO No. 189 dated 25 January 1947 issued by the director-general of the Food Control Bureau, the subject of which is "Handling of Extra Delivery of 1946 Rice," on the basis of the amount of each individual extra delivery excluding the amount delivered by farmers without any previous quota.

2. Confirmation of extra rice deliveries will be made according to the notification mentioned above.

FROM: Vice-Minister of Agriculture and Forestry

TO: Prefectural Governors

SUBJECT: Fertilizer Rationing Quota.

The following amount of spring nitrogenous fertilizer alloted for rationing has been settled, and you are requested to take thorough measures towards distribution control in order to increase agricultural production.

1. In accordance with the fertilizer rationing method notified in NOSEI No. 717, 1946 dated 6 July 1946, the rationing amount is calculated as the total of the amount to be rationed for the production of retention food excluding the delivery amount linked with the delivery of rice, white potatoes, sweet potatoes, soy beans, (vegetables) as has been previously decided and notified last year, plus the alloted rationing amount for other crops. The following procedures have been decided.

(1) The area necessary for the production of retention food for farming households is calculated as follows:

(a) Rice: Calculate the necessary yearly retention amount of rice for solely self-consuming farming households. Then calculate the required area for this amount from the average 1946 rice harvest per Tan, and add the planting area of farming households receiving no delivery allotments.

(b) White Potatoes and Sweet Potatoes: Calculate the ratio (retention ratio) between the estimated 1946 production amount and the amount excluding the alloted delivery and purchase amount. The area is computed by multiplying the planned planting area for 1947 by this ratio.

(2) The planned area for this year's spring and summer crops (refer to Form No. 2) shall be adopted for the area required for any other crops than those mentioned in (1) above.

(3) The standard amount of fertilizer to be applied per Tan is decided in the attached sheet, placing first priority on export foodstuff and the most indispensable food.

Furthermore, special consideration is requested in dealing with the following:

(Annex No. 3 cont'd)

(a) Vegetables: Priority shall be given to ration the special vegetable producing district.

(b) Vegetable seedlings: The seedlings shall be divided into two groups, the 1946 autumn and winter crops and the 1947 spring and summer crops. Procedures shall be taken according to notifications from both the Fertilizer Section Chief and the Special Product Division Chief dated 28 July 1946.

Furthermore, orchard saplings are included in the spring and summer crops.

(c) Tobacco: Adjustments have been made according to the planting area as stated in Paragraph 4, NOKYOKU No. 1792 dated 19 October 1946 issued by the chief of the Agricultural Administration Bureau.

(d) Export Flowers and Bulbs: The cultivation of lily and tulip bulbs for export are herewith considered.

(4) Special rations shall be distributed to areas alloted for planting delivery white potatoes in addition to rations linked with the delivery quota, considering last year's yield per Tan.

(5) Investigations are being made for the planned rice planting area, and adjustments shall be made for the increase or decrease in the area owing to new planting or converted planting after the investigations are completed.

2. Rationing within your jurisdiction shall be managed according to Paragraph 3, NOSEI No. 856, 1946 dated 27 July 1946, and after immediately settling plans, shipment instructions shall be sent to the Nippon Fertilizer Co., Ltd., in order to cope with recent stringent transportation conditions.

3. Rationing shall be divided into three periods: January - March, April - May, and June - July instead of a monthly rationing procedure.

Furthermore, sufficient measures shall be taken to manage thoroughly this procedure at preliminary meetings with each prefectural office, and other groups concerned held at the Fertilizer Shipment Council (under consideration) or the Nippon Fertilizer Co., Ltd.

4. The conversion ratio for calcium cyanamide is estimated in terms of ammonium sulphate (20.0%) according to its guaranteed constituent, and the conversion ratio for other nitrogenous fertilizers are the same as before.

(Annex No. 3 cont'd)

5. Applications (including phosphate and potassium fertilizers and selecting desired fertilizer) for a desired amount for experiment and research use shall be submitted, enclosing a detailed statement of plans, by the end of this month, and the remaining fertilizer shall be distributed according to the delivery quota for your prefecture.

SUBJECT: Repair of Agricultural Implements in the Rice Deliver Campaign.

In view of the recent rice delivery results, the repair of agricultural implements will be firmly executed according to the procedures described below, as one measure to be taken in the rice delivery campaign. Your co-operation is requested in order to complete all necessary repairs and promote the delivery of rice.

1. Expected number of implements to be repaired in your To, Do, Fu, or Ken. _____ each

2. Preparations for material needed.

(1) Steel material will be shipped directly to your To, Do, Fu or Ken Agricultural Association by the All-Japan Agricultural Association or the Japan Agricultural Implement Industry Co-operative Union.

A total of _____ tons will be shipped separately for March and April.

Furthermore, it is planned to secure and allot about twenty percent of the steel supplies as special steel.

(2) The alloted amount of cokes will be a total of _____ tons.

March _____ tons

April _____ tons

May _____ tons

Arrangements will be made for the monthly shipment of cokes to your To, Do, Fu, Ken Agricultural Association, and all efforts must be made to secure the cokes. (Specially close contact with the Industry and Commerce Bureau is requested.)

(3) The alloted amount of charcoal will be a total of _____ tons. The Ministry has completed arrangements so that your prefecture will receive one-third of the total amount for each month during March, April and May. The encouragement of the competent office under your jurisdiction is requested.

(Annex No. 4 cont'd)

3. Measures to be taken toward designated repair shops stated in Section (2), (d), paragraph 4 of the summary attached herewith. Additional rice rations for laborers and special rations of sake to encourage production will be delivered. An immediate report on the number of designated repair shops and laborers in each city, town or village is requested.

4. Report on repair results:

The arrangement of a monthly report on repair results, to be submitted to the Chief of Material Supplies Division, Agricultural Administration Bureau, not later than the tenth of the following month, is requested.

Summary on Emergency Measures for Repairing Agricultural Implements

A. Principle

In view of fulfiling the delivery of 1946 rice, the following special measures will be taken in order to grant a priority for repairing agricultural implements belonging to farmers who have completed their delivery quota.

B. Measures

1. Farmers eligible for receiving repairs:

Farmers who have completed their delivery quota by the end of March.

2. Implements to be repaired:

Hoes (edges damaged) -
Expected Number to be repaired: 3,300,000 each

At least one hoe will be repaired for each farmer who has completed his quota.

3. Repairing period:

A suitable repairing period will be fixed between March __ and March 31 in order to fulfil the repairing of hoes.

4. Repairing method:

(1) Repairs will be carried out at adequate prices at a designated repair shop in exchange with a repair ticket issued by the prefectural governor.

(Annex No. 4 cont'd)

Repair tickets will be granted to farmers who have completed their alloted quota by the city, town, or village, according to the opinion of the city, town or village Food Regulation Commission.

(2) Repair Organ.

(a) In principle, one repair shop (among the forges or common repair shops) recommended by the city, town or village agricultural association will be specially designated in each city, town or village.

In accordance with the actual local conditions the number of designated repair shops is subject to change.

(b) The city, town or village agricultural associations will collect the damaged implements using repair tickets, and will take the entire responsibility of repairing them at the designated repair shops, and also supervise the completion of this work.

(c) The city, town or village agricultural associations will make arrangements with the designated repair shops, in order to see that only repairing of agricultural implements by repair tickets will be undertaken during the repair period.

(d) Additional rice rations for laborers and special rations of bounty sake will be delivered to designated repair shops during the repair period.

5. Measures for securing repair material:

(1) Measures will be taken to secure priority in materializing the monthly plan for obtaining repair material as follows:

Name	Specification	Amount Planned	Monthly Quota March	April	May	Remarks
		Tons	Tons	Tons	Tons	
Steel	3.2 m/m plates	1,000	500	300		
Special Steel		200				
Coke		700	277	266	137	
Charcoal		2,600	866	867	867	

Special measures will be taken so that coke and charcoal will arrive at designated repair shops before the repair period.

(2) Steps will be taken to secure material for the designated repair shops: steel and special steel will be delivered by arrangements of the All-Japan Agricultural Association and the Japan Agricultural Implements Industry Co-operative Union, and fuel will be materialized by the prefecture.

6. Establishment of repair promotion organs:

The following central and local committees will be established in order to firmly encourage and also complete this repair project.

(1) Central

The Ministry of Agriculture and Forestry, the All-Japan Agricultural Association, and the Japan Agricultural Implements Industry Co-operative Union will constitute the Central Agricultural Implements Repair Promotion Committee.

(2) Local

(a) Each Fu and Ken will establish a Prefectural Agricultural Implements Repair Promotion Committee comprising the Prefectural Office, Prefectural Agricultural Association and Local Agricultural Implements Industry Control Union.

(b) Each city, town or village will establish a Repair Conference Committee comprising to city, town or village office, agricultural association, farmers' union, Food Regulation Commission and the designated repair shops.

SUBJECT: Special Rationing of Daily Necessities in Recompense for 1946 Rice Delivery.

Although the purchasing of 1946 rice was being carried out smoothly at the beginning, the outlook is very dark being affected by recent social economic conditions. Therefore, a special resolution was reached upon deliberation by the Economic Stabilization Board, the Ministry of Commerce and Industry, and the Ministry of Agriculture and Forestry, in view of the present production status to urge the delivery of rice by releasing a maximum limit of goods in reward.

The following allotment in the annexed sheet has been made to your prefecture, and you are requested to take all necessary measures in order to fulfil the rice quota and securing extra rice delivery, by the most appropriate and most effective application of these goods under the following procedures.

Furthermore, though shipment procedures and other details will be notified in due time, special efforts are appreciated in timely appropriate rationing at the end of the system by previously establishing close connections with rationing organs.

Note

1. Special rations shall be alloted to extra rice deliveries, and as to concrete rationing methods, adequate measures shall be established according to the actual conditions of the delivery campaign in your prefecture.

2. Rationed material shall be paid for. The rationing system is described in the attached sheet with each article. The actual rationing business in cities, town and villages shall be carried out the same as usual.

3. Concrete rationing methods shall be set up immediately and reported to the director-general of the Food Control Bureau. Furthermore, when goods are to be applied to cases except extra rice deliveries, previous connections must be made with the director-general of the Food Control Bureau.

PRINCIPLES FOR THE INSTITUTION OF A COMMITTEE ON ESSENTIAL COMMODITIES FOR AGRICULTURAL DISTRICTS

1. The Committee shall be instituted as a special division in each To, Do, Fu, or Ken Food Committee and function as a consultative and cooperative organ for the prefectural governor to ensure and expedite the proper distribution and supply of commodities essential for agricultural districts.

2. The Committee shall consist of a chairman and members.

   (a) The chairman shall be the prefectural governor.

   (b) The members shall be representatives of producers, the chairman of the respective To, Do, Fu, or Ken Agricultural Association, representatives of local distribution agencies, officials concerned of the Japan Express Company, members of the respective city, town or village Food Adjustment Committee, officials concerned of the respective prefecture, representatives of the Public Procurator's Office concerned, learned or experienced people or others who shall be deemed suitable by the respective prefectural governor.

3. All proceedings of the meetings of the Committee shall be open to the public, and those concerned shall receive full information to be furnished by the Ministry of Agriculture and Forestry and the Ministry of Commerce and Industry concerning the actual condition of the production, transportation and distribution of incentive commodities.

FROM: Vice-Minister of Agriculture and Forestry

TO: Prefectural Governors

SUBJECT: Adjustment of Demand and Supply for Used Straw Products.

In view of the present critical shortage for the demand and supply of straw products, decisions have been made to adjust the demand and supply according to the "Demand and Supply Adjustment Program for Used Straw Products" described below with the object of returning used straw products to the farm villages and adjusting the over-all demand and supply of new and used straw products. Taking the following items into full consideration, your arrangements for perfect operation of this plan are requested.

1. Remarks concerning the program:

(1) "Others designated by the prefectural governor" in paragraph 1 means that those who have a daily capacity for providing more than fifty sheets will be subject to special designation.

(2) The present managing organs will be designated as "Managers for used straw products designated by the prefectural governor" mentioned in Paragraph 2.

(3) The latest date to submit a list of the rationing plans is 10 March as far as the rationing plans for the first quarter of 1947 are concerned.

2. An immediate report must be submitted to the Material Supply Section, Agricultural Administration Bureau, Ministry of Agriculture and Forestry, as soon as the providers and managers of used straw products are appointed, stating their names and addresses. Changes in names and addresses must also be reported.

Demand and Supply Adjustment Program for Used Straw Products

Principle:

In view of the present critical situation for the demand and supply of straw products, the following measures have been taken to meet the shortage of packing material by adjusting the demand and supply of used straw products, in order to return them to the farm villages and adjusting the over-all demand and supply of new and used straw products.

(Annex No. 7 cont'd)

Procedures:

1. Used straw products are empty straw bales and bags provided by food associations, flour mills and others designated by the prefectural governor. (These will be referred to as providers of used straw products in the following paragraphs.)

2. Providers shall sell the straw bales and bags in their original state to managers dealing with used straw products and designated by the prefectural governor on the spot where they are emptied.

3. The To, Do, Fu, or Ken office shall submit a quarterly rationing plan (refer to attached form) to the Ministry of Agriculture and Forestry one month previous to the beginning of every quarter.

4. Measures shall be taken as far as possible to return empty bales and bags to the farm villages when setting up rationing plans. Furthermore, in case of staple food consuming prefectures, measures shall be taken to send the amount of used straw products equivalent to more than 30% (in cases actually exceeding 30%, the actual amount will be considered) of the rice and wheat shipment back to the producing prefectures as return material.

5. The opinions of agricultural associations, farmers' union, rationing managers, food associations and actual consumers shall be consulted in setting up an appropriate rationing plan for used straw products.

6. The Ministry of Agriculture and Forestry shall instruct the To, Do, Fu or Ken office, whenever the necessity arises for regulating the demand and supply, concerning consumers, rationing quantity, rationing period and other necessary items for the adjustment of demand and supply.

7. Rations for the managers of used straw material (cf. Paragraph 2) shall be notified by the To, Do, Fu or Ken office, according to plans (cf. Paragraph 3) and instructions (cf. Paragraph 6).

8. The To, Do, Fu or Ken office shall submit a quarterly report on the actual rationing results of used straw material to the Ministry of Agriculture and Forestry within one month after the end of each quarter.

1. With reference to Memorandum SCAPIN 1023, this Headquarters to the Imperial Japanese Government, the following is published for the information of all concerned.

2. The physical inventory called for in the memorandum is intended to accomplish two important reparations preparatory measures; viz:

(a) Collection of accurate field data for compiling a Reparations Catalog.

(b) Marking of potential reparations items with a distinguishing code number. This physical coding of possible reparations items will likewise serve as a medium for facilitating selection, allocation and ultimate removals of reparations items; and in addition will serve as a check against diversion of reparations potentials into unauthorized channels of disposal or use.

3. In an effort to accomplish this necessary physical inventory in a minimum of time and with a minimum of occupation forces personnel, representatives from Eighth Army and from G-4 Section, GHQ, met with representatives from Reparations Branch, Industrial Division, ESS, GHQ, in Tokyo on March 4 and 8, 1946, and drew up an Inventory Program which has been transmitted to Occupation Force Commanders for guidance in preparing command instructions to subordinate units. Among the key points agreed upon by those conferences, in regard to the inventory were the following:

a. The Reparations Branch, Industrial Division, ESS, GHQ, will furnish a Field Representative to each Division (or to each regional or other such intermediate command echelon as may subsequently be set up) to (1) provide necessary Inventory Program liaison between GHQ and field units responsible for inventory execution, and (2) furnish whatever technical advice and assistance may be required to complete the inventory in as expeditious and effective a manner as possible.

4. Inventory administrative and supervisory levels should take all possible steps to expedite completion of the inventory in the shortest period of time consistent with accuracy and thoroughness.

SUBJECT: Information of General Application Pertaining to Directive Number (SCAPIN - 758), file AG 470.8 (20 Feb 46)GD this Headquarters 20 February 1946 subject: Remodeling Japanese Army Tanks.

1. With reference to Memorandum Number (SCAPIN - 758) this Headquarters to the Imperial Japanese Government, the following is published for the information of all concerned.

2. The combat vehicles released to the Japanese by subject directive are to be used for the purpose of increasing the production of food-stuff and salt and of reconstructing war devastated areas.

3. The vehicles are to be mutilated to such an extent that they can never again be used as combat vehicles.

4. The number of vehicles requested by the Japanese greatly exceeds the number available. Of the quantity available it is intended that the maximum be converted while retaining sufficient spare parts for their maintenance.

5. The vehicles should be released to the Japanese at a rate determined by the speed with which they accomplish the conversion.

6. Records showing place of conversion, number and type of vehicles converted, location and type of use of converted vehicles should be available for surveillance and planning purposes.

7. The Japanese are expected to make direct arrangements with the Eighth Army with respect to the number of vehicles to be released at any one time, the place of conversion, and other necessary details to implement this program. Command instructions pertaining to the execution of surveillance will follow through command channels.

PROCUREMENT REGULATIONS AND PROCEDURES WITHIN JAPAN

1. Circular 5, General Headquarters, Supreme Commander for the Allied Powers, 15 May 1946, is rescinded.

2. The instructions contained herein will govern all requisitions on the Imperial Japanese Government by the Occupation Forces and representatives or missions of Allied Governments in Japan, except for enemy surrendered facilities and equipment held for reparations.

3. The following instructions apply to the submission of requisitions:

a. All United States Army, Air and Naval Forces and all Allied Occupation Forces will submit requisitions for their requirements through the United States Army commanders responsible for the area in which elements of the forces are located.

b. All units of General Headquarters, United States Army Forces, Pacific, will submit requisitions to the Headquarters Commandant, General Headquarters, United States Army Forces, Pacific.

c. The British Commonwealth Sub-Area, Tokyo will submit requisitions directly to the Tokyo detachments of the Tokyo-Kanagawa Military Government District.

d. All representatives or missions of Allied Governments will submit requisitions to the Headquarters Commandant, General Headquarters, United States Army Forces, Pacific.

4. The following special instructions apply to procurement of labor:

a. Requisitions will specify number, classification, place of reporting and period of time labor is required. (See Inclosure 1 - Form for "Labor Requisition for Military Units" and Inclosure 2 - Form for "Labor Requisition for Allied Commissions and Delegations.")

b. The establishment of terms and conditions of em-

ployment, including wages, wage supplements and payments in kind, will be the responsibility of the Japanese Government, as employer.

c. Using agencies will not proselyte labor by giving inducements in the form of money, food and other commodities to the workers.

d. Employees are free to organize and bargain collectively with the Japanese Government as the employer.

5. a. No cash purchases, including cash payments to labor, will be made except in cases of emergency, and then only with the prior approval of the General Procurement Agent, who will be furnished full particulars upon which to base his decisions. (Approval may be obtained verbally.) Cash purchases will be limited to 3,000 yen for each transaction.

b. All cash purchases or payments will be in Japanese yen, and vouchers therefor will bear the certificate: "I certify that this purchase (or payment) is to meet an emergency military requirement which would not conform to standard procurement procedure, because (giving the reason)."

6. There will be no agreement made by any representative of the Allied Occupation Forces or Allied Missions or other representatives of Allied Governments with any agency or representative of the Imperial Japanese Government or with civilian suppliers as to value or price of supplies, facilities, or services obtained except in cases of emergency cash purchases.

7. Supplies and facilities obtained from the Imperial Japanese Government will not be sold. Any cases where unusual disposition of procured items appears justified will be submitted through channels to the Supreme Commander for the Allied Powers with appropriate recommendations.

8. A Procurement Demand (GPA Form 1) is the form instrument to be placed upon the Central Liaison Office, Imperial Japanese Government, or a subordinate office thereof, by the Military Government Units, or other procurement offices designated by the Commanding General, Eighth Army, for the purpose of filling requisitions. Procurement Demands will be processed upon receipt of approved requisitions from using organizations.

9. When the provisions of a Procurement Demand are fulfilled, a receipt (GPA Form 2) will be given the supplier. In the columns

on the right of GPA Form 2, the Military Government Unit processing the original Procurement Demand will enter on all copies, except those given the Japanese, the estimated value in dollars of the supplies, facilities, or services obtained.

10. Upon release to the Imperial Japanese Government of any supplies or facilities which are no longer required by the Allied Occupation Forces, or representatives or Missions of Allied Governments, a release form (as established by Commanding General, Eighth Army) will be accomplished and submitted to the nearest Military Government Unit or other designated procurement office.

11. The Commanding General, Eighth Army, will submit GPA Form 3 monthly to the General Procurement Agent, in accordance with letter, General Headquarters, Supreme Commander for the Allied Powers, AG 315 (4 Mar 46)GPA, 4 March 1946, subject: "GPA Form 3 Monthly Report." GPA Forms 4, 5, and 6 will be submitted quarterly to the General Procurement Agent, in accordance with letter, General Headquarters, Supreme Commander for the Allied Powers, AG 315 (12 Jan 46)GPA, 12 January 1946, subject: "GPA Forms 4, 5, and 6; Instructions for Use."

MEMORANDUM FOR: IMPERIAL JAPANESE GOVERNMENT

THROUGH : Central Liaison Office, Tokyo.

SUBJECT : Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories.

1. The Imperial Japanese Government is notified that the Japanese Aircraft plants, Army and Navy arsenals and laboratories designated on the attached lists are hereby being taken into the custody and control of the Supreme Commander for the Allied Powers.

2. Within seventy-two (72) hours of the time of receipt of this memorandum, the Japanese Government will have qualified representatives of that Government report to the Commanding General, Eighth United States Army, and the Commander, Fifth United States Fleet, to receive instructions in regard to specific plants and installations affected and measures which will be taken to effect custody and control. Of the plants and other installations listed in Inclosure No. 1 (attached) the Commander Fifth United States Fleet will have custody of the Yokosuka Naval Arsenal, the Yokosuka Naval Yard laboratory and the Yokosuka Navy Yard Workman Training School at Yokosuka City, Kanagawa Prefecture. All other plants and installations listed in Inclosure No. 1 will be under the custody of the Commanding General, Eighth United States Army.

3. It is directed that the Imperial Japanese Government make available to the Commanding General, Eighth Army and The Commander, Fifth Fleet, all personnel, equipment and supplies deemed necessary by them for the establishment of proper custody and control, and protective maintenance.

4. You will take action to stop immediately all removals of machinery and equipment from the above-designated plants and installations. No further removals will be permitted without the specific authority of the Commanding General, Eighth Army or the Commander, Fifth Fleet.

5. All permits which have been issued for conversion of listed aircraft plants, arsenals and laboratories to civilian consumer production will be subjected to review by the Commanding General, Eighth Army and the Commander, Fifth Fleet.

SUBJECT : Nutrition Surveys of Civilian Population

1. The Supreme Commander desires actual information on the nutritional health and actual food consumption and food requirements in Japan.

2. The Japanese Government is directed to establish study groups of properly qualified physicians and nutritionists who will conduct nutrition surveys among the civilian populations. These groups will gather actual data on the physical status and the food consumption of individuals, using statistical sampling methods and areas approved by this headquarters. Urban areas are of primary concern and initial surveys will include the largest cities.

3. The methods to be employed by these survey groups and their work in the field will be standardized, coordinated and directed by a central agency in the Japanese Government in accordance with plans submitted to and approved in advance by this headquarters.

4. A complete operational plan for this work will be submitted to this headquarters for approval not later than 20 December 1945.

5. The operational plan will be put into effect immediately upon approval. English translations of survey data received from the field will be submitted to this headquarters each week. Final compilations and analysis of the data will be submitted not later than one week after any one survey is completed.
