The air coordinator advised the flight that their run was "right in", so it is presumed that some enemy personnel were killed, though the results could not be observed.

(p) Were Photographs Taken? Photographs of Damage, WhenTaken, Should Be Attached By Staple.

⁽o) RESULTS: (For all hits claimed on ship targets and for land targets of special interest, draw diagram, top or side view or both, as appropriate, showing type and location of hits. For all targets give location and effect of hits, and identify by numbers above. Use additional sheets if necessary).

At 1530(K), 28 February, 1945, Lioutenant D. H. THOMPSON, U.S.H.R., lod a combat air patrol over INO JIMA, consisting of one division from VC-77 and one from VC-85.

At 1745(K), just prior to return to base, the flight was ordered to strafe personnel in the gullies in areas 185 G & B. With clouds at 2000' it was necessary to start strafing runs from the base of the clouds, with pull out at from 400' - 800'. The pilots were advised to expend no more than 75% of their assumition, so as to have enough for protection in the event of a Japanese evening air attack in the area. Only three rather shallow strafing runs were made, with the results unobserved, but BANJO advised that the second run especially was "right in". The first run was perhaps a bit too close to our approaching troops for safety, so on the second run the siming point was moved about 200 yards eastward, with excellent results.

A small amount of inaccurate light AA was observed.

(Reclassify when filled out)

One gun failed to fire. Otherwise all equipment performed normally.
