PROGRAM

# What is NASA's Launch Services Program?

The NASA Launch Services Program's job is to act as a broker, matching spacecrafts with rockets. LSP is responsible for launching NASA's unmanned rockets that go to planets and observe the earth and the universe holding payloads that range from weather satellites to Mars Rovers.
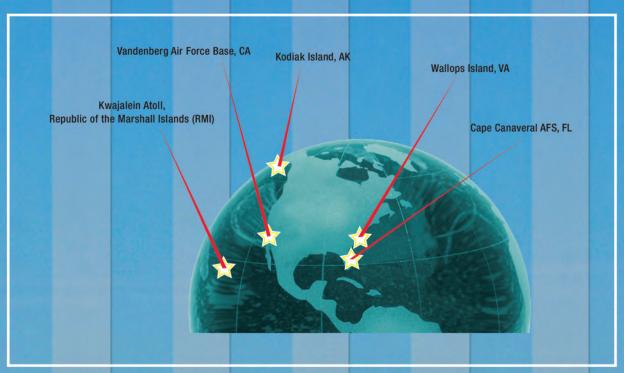

## Where do we launch from?

*Primary launch sites are:*

**Cape Canaveral Air Force Station (CCAFS) in Florida**

**Vandenberg Air Force Base (VAFB) in California**

*Other launch locations are:*

**NASA's Wallops Flight Facility in Virginia**

**Kwajalein Atoll in the South Pacific's Republic of the Marshall Islands**

**Kodiak Island in Alaska**

Vandenberg Air Force Base, CA

Kodiak Island, AK

Wallops Island, VA

Kwajalein Atoll,
Republic of the Marshall Islands (RMI)

Cape Canaveral AFS, FL
