För människor som du och jag.

The diagram illustrates the collaborative nature of Wikipedia. Five diverse individuals—two women and three men of different ethnicities—are shown, each connected by a line to a template of a Wikipedia article page. The template includes the Wikipedia logo, a sidebar with links like 'Main page', 'Contents', and 'Community', and sections for 'Community' and 'Perspectives from various disciplines'.

Community
From Wikipedia, the free encyclopedia

For other uses, see [Community](#) (disambiguation).

The term **community** has two distinct communitative meanings:
1) a small, social unit of any size that shares common values:
community or international community, and 2) in biology:
organisms sharing a populated environment.

In **human communities**, intent, belief, resources, preference conditions may be present and common, affecting the kohesiveness.

Since the advent of the **Internet**, the concept of community can now gather virtually in an online community and share location. Prior to the internet, virtual communities (like social networks) were limited by the constraints of available communication and transport.

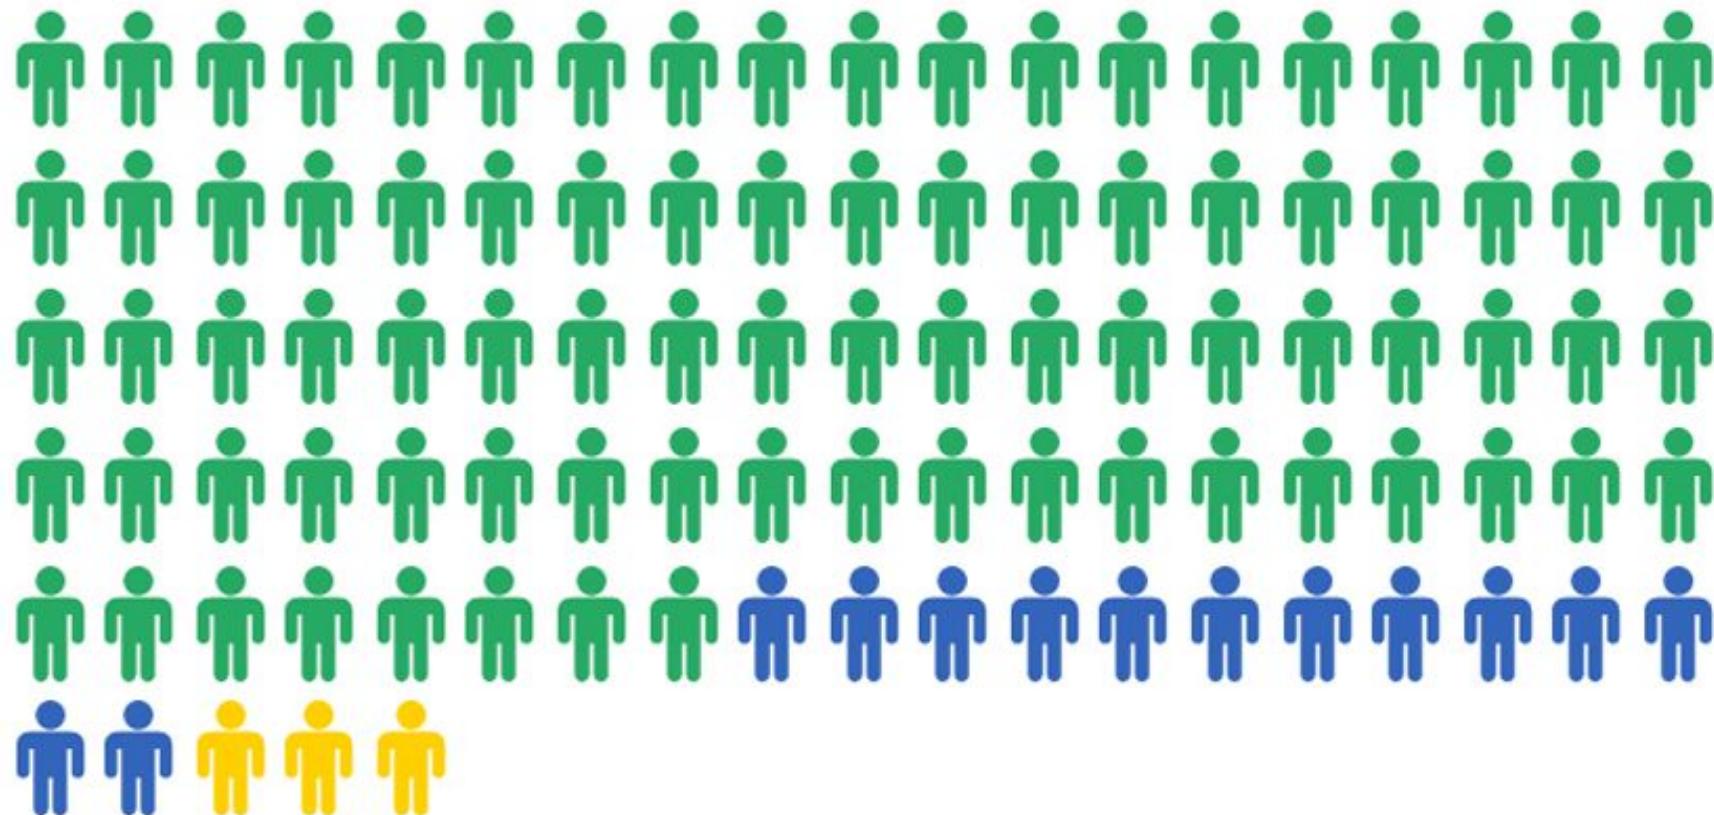

The word "community" is derived from the Old French *communitas* (*com*, "with/together" + *muris*, "gift"), a broad category of people sharing a commonality.
