# THE INVESTOR'S MONTHLY MANUAL.

The December Number of the INVESTOR'S MONTHLY MANUAL, published on the 31st ult., gives in addition to the usual information the Highest and Lowest Prices of all Stocks and Shares for the Three Years, the Latest Quotations for 1882 (so as to indicate the Exact Movement during the Twelve Months), a Financial History of the Year, including a Tabulated Chronicle of the Year's Events, the Names of the Markets where each Security is chiefly dealt in, besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. In addition, there are furnished the Names of the Chairmen and Secretaries, or Managers, of the various Companies. Price 1s 6d ; by post, 1s 9d.

OFFICE-340 Strand.

A MARKED movement upwards in the rate of discount has occurred this week. The charge for three months' best bills in the open market is now nearly up to the Bank rate, being  $2\frac{15}{16}$  to 3 per cent. There is a good supply of bills at this price. The Bank is reported to be doing a considerable business, and in fine paper, at their published minimum rate. Money is very tight, and was more wanted yesterday than it had been any day this week.

This change in the circumstances of the money market is entirely due to the demand for specie for America. This has been considerable, about 550,000l having been withdrawn from the Bank for this purpose, and it is reported that a further amount may be taken to-morrow. A considerable sum has also been taken from France, thus diminishing the demand, which would otherwise have been concentrated on our market. Reports were current, circu-lated on the strength of very high authority, that the gold withdrawals from this country were not altogether genuine exchange operations. It appears, however, that the transactions would entirely answer as an exchange operation, and this circumstance, together with the fact that large sums were taken on account of banks, and in connection with genuine business transactions would appear to remove the probability of an attempt to manipulate our market, being the cause of the operation. The fact that the New York banks showed a deficiency in their reserve, as marked in the table below, is also in favour of this opinion. Should the movement be an arti-fical one, it may be expected not to last long. If, as we believe, it is genuine, it is, on the other hand, the more likely to continue. It is quite possible, however, that the Bank may be willing to allow its reserve to be reduced to a point considerably lower than what it is at present before raising its charge, and advances till the dividends are paid could be obtained yesterday at the present rate. It is true that the Bank advanced its rate from 3 per cent. to 4 per cent. on August 24th, 1881, on the reserve being reduced to 12,900,000*l*, but it also allowed the reserve to drop to 10,700,000l before raising it in the same propor-tion on August 16th, 1882. On the policy of allowing the reserve to reach so low a point before raising the rate from THE ECONOMIST.

3 per cent. to 4 per cent. we do not now propose to express any opinion. But while we may consider the report that the gold withdrawals for America have been influenced by the desire of speculators in New York to lower prices on our Stock Exchange probably rests on slender foundations, the circumstance that such a report is current, and, as far as we remember, now for the first time, is one which those who form the upper circle in English finance and banking operations will do well to ponder seriously. That such an operation is possible no one conversant with the inner working of our banking affairs can deny, nor equally that it could be carried through at a comparatively small cost. It is also the case that the arrangements under which our banking reserve is held would render such a movement unusually dangerous. Our banking reserve is, as we have frequently had occasion to observe, held by one institution, which is in that sense the centre of our banking system; but the reserve itself is not by any means a central reserve. The great banks of the country do not support, and from their point they cannot sup-port, the Bank of England at any time of pressure. They lean on it at such seasons, while augmenting probably their own holdings with it for the time. They say, and truly, "If we increase our holdings permanently, it will only enable the Bank to compete more effectually against us." But this is no reason for the reserve being, as it frequently is, insufficient, and, as such an event as an artificial withdrawal on speculative account may very likely show, dangerously insufficient. If the banks do not like to keep an adequate reserve within the Bank of England, let them form one outside of it themselves; but somewhere or other an adequate reserve should be held. The responsibility should not be, as at present, diluted till no one knows where it lies.

It will be observed from the table of exchanges below that the Paris rate has moved in our favour during the week. The advance in the market rate here is sufficient to account for this.

## IRISH MEMBERS AND IRISH DISTRESS.

THE debate on Irish distress, which was raised in the House of Commons by some of Mr Parnell's followers on Thursday night, illustrates once more the unintelligent and impracticable zeal with which the avowed champions of the Irish peasantry habitually sacrifice the best interests of the unfortunate clients whom they profess to serve. There are two facts in connection with the existing economic conditions of Ireland which are established beyond controversy in the eyes of all impartial observers. The first is, that the excessive congestion of population upon a barren and intractable soil in those districts of the West in which the distress is at present most keenly felt is such that, even in the most favourable cases, life can barely be sustained. The other is, that a large part of the country is infinitely better adapted by Nature for the grazing of cattle than for the raising of cereals, and that, what with a succession of wet seasons, the increasing competition of American wheatgrowers, and the rise in the price of meat, this natural difference has of late been becoming every year of greater importance. These things being so, upon the periodical recurrence of the acuter phases of the chronic privation and suffering, there are certain sentimental remedies, which it is the plain duty of every true friend of the Irish peasantry to do everything in his power to repudiate and avert. No greater disservice can be done to these poor people than to tempt them to stay where they are in the hope of better times which will never come. The State must unquestionably step in to prevent starvation

Mar. 10, 1883.

and to alleviate extreme distress, but it must, above all things, be careful to avoid the mistaken charity which secures momentary relief at the cost of intensifying the secures momentary relief at the cost of intensifying the disease and debilitating the sufferer. The grant of indiscri-minate outdoor relief and the setting on foot of great public works, which are the favourite specifics of Mr Parnell and his followers, are remedies of this fallacious kind, and can only be seriously demanded by persons who are either ignorant or insincere. The same contempt for facts, the same blind instruction of pattern is a set of the se antagonism to the resistless operation of natural forces, is shown in their hostility to the large grazing farms, which sometimes takes the form of proposals to cut up the pasture lands into potato and rye plots, and to transplant thither the struggling cottiers of the West; sometimes (as in Mr O'Brien's speech on Thursday night) of a suggestion to cripple the development of the most promising of Irish industries by "throwing the burden of poverty on the wealthy graziers, and saddling them with the poor rates.' Follies like these are thrust upon the Government with an assumption of exclusive knowledge, and a bitterness of vituperation which, were the circumstances less serious, might well provoke a smile. The Irish Government has sensibly resolved that, unless in very exceptional cases. relief must be given subject to the workhouse test, and that the only permanent remedy is to be sought in a scheme of emigration. Mr Trevelyan is accordingly abused by Mr Sexton as a "cold and obstinate doctrinaire," while Mr O'Brien declares, in language which, considering the source from which it proceeds and the quarter to which it is indirectly addressed, can scarcely be treated as a mere rhetorical threat, that if he would not "do anything but offer the poor-house or the emigrant ship, the Chief Secretary could hardly hope to escape the execration of the world." It is clear from the inquiries made by Mr Tuke and his committee, that whatever may have been the case a few years ago, the peasants in many districts of the West are willing and anxious to emigrate. All the circumstances of the case point to emigration as the true solution of the problem. What is the world to think of the patriotism or enlightenment of men who deliberately oppose every obstacle in their power to the only effective mode of relieving their suffering fellow-countrymen ?

There is, unfortunately, the strongest reason to believe that the attitude of the Land League party in the House of Commons on this question is dictated mainly, if not solely, by the necessities of their own political position. For the moment they have two paramount objects, which they must pursue at any cost-to divert attention from the past, and to arouse at least the semblance of a new agitation. The question of the degree of intimacy which subsisted between the Land League and the outrage-mongers-for it is now only a question of degree-is one which Mr Parnell has studiously, and so far successfully, evaded, and it may be inferred that it is not to his interest that it should be kept prominently before the public. There is, however, another matter which has been brought into notice this week, and which suggests a doubt whether the Land Leaguers are wise in making the relief of Irish distress the point of departure for their new campaign. Lady Florence Dixie, in a letter to the Times, reviews the finances of the different funds started by the Land League, and points out that in each case there is a considerable balance unaccounted for, which, if still in existence, might easily be applied to the allevia-tion of the present distress. These balances appear to be as follows :-

| Fair Trial Fund      | 984     | 0  | 6  |  |
|----------------------|---------|----|----|--|
| Relief Fund          | 11,104  | 7  | 2  |  |
| Land League Fund     | 125,598 | 17 | 1  |  |
| Parnell Defence Fund | 9,651   | 7  | 8  |  |
| Ladies' Land League  | 5,749   | 17 | 41 |  |
|                      |         |    |    |  |

Total..... 153,088 9 91

With reference to this large sum Mr Parnell and his associates seem to be in a dilemma. Either it is or it is not in hand. If it is, why should not the whole, or, at least, some considerable part, be contributed to relieve the sufferings over which Mr O'Brien and Mr Sexton become so eloquently abusive? Mr Parnell on Thursday night took refuge in the unmeaning generality that the Relief Fund was raised for an entirely different purpose, "to check the tide of landlord oppression," and that it would still be applied to that object. Even if this were so, what is to be said of the Parnell Defence Fund, whose original purpose was long since exhausted, and of the far larger sum which stands to the credit of the Land Leagues We confess that it appears to us, as it will to most impartial critics, that the other alternative is more likely to be true, and that the greater portion of this huge balance has been spent upon purposes and in ways which it is not convenient to avow. But whichever be the correct explanation-and it is quite consistent with all the rules of probability and justice to assume that the more discreditable one is the more accurate -the position of Mr Parnell and his party is such as to deprive them of all claims to sympathy and respect. Either they are guilty of making political capital out of sufferings which they have the power to relieve, or they have appro-priated funds contributed by the Irish all over the world to objects which was not authorised, and which they dare not name.

### THE NEW AMERICAN TAX BILL.

ONE of the most striking peculiarities of the American method of administration, the absence of individual responsibility for great acts, has come out strongly during the past ten days. In the fall elections of last year, the Democrats, reinforced by a secession from the Republicans, who were dissatisfied with the administration of patronage, carried so many seats in the House of Representatives that they would be able when the new Congress met completely to control that body. The new Congress did not meet, however, till March 5th, and the Republicans in the old House, powerful till that time, resolved to deprive their successors of the greater part of their available resources. They were afraid that the large surplus revenue, exceeding 25,000,000/ a year, now devoted to the payment of debt, would be used by the democratic majority either for party purposes, or to establish free trade, and they decided, therefore, to expend it beforehand. In England such a measure would have required the initiative of the Treasury, only the responsible Minister being able to make the proposition, and indeed, as the Ministry would have gone out on losing its majority, it could not have been made at all. In the United States, however, there was no such difficulty. There was, of course, a private deliberation among the party chiefs, and probably some communication with the President, General Arthur, but it was all secret; and then a Senator whose very name is not telegraphed, and who is totally irresponsible except for himself, proposed that twenty millions a year of the national revenue should be given up. In other words, he introduced a Bill on internal taxation and Customs duties under which that amount of revenue was surrendered, the Excise duties, according to the most probable accounts, being lowered by thirteen, and the Customs duties by from five to seven millions. No official was asked anything about the matter. It seems probable that the Treasury as a department was never consulted, for quarrels as to the effect of the reductions ran through all the debates, and there were differences of millions as to the figures; but the Republican Senators knew what they meant, which was to destroy the surplus, and they passed the Bill. It went down accord ingly to the Lower House, where the Democrats, anxious that their own party should deal with the surplus, resisted, declaring that the Senate had no right to initiate a Money Bill. This objection was, however, got over, and after a battle protracted until the Session, and therefore Republican rule, had nearly ended-had indeed arrived within a few hours of its termination-the Bill was passed. The President took only a few hours to consider it, and on his signature it became law, and durable law, for the new majority, now seated in full power, cannot repeal it without the assent of the Senate, which is still Republican, and of the President, who will not, of course, repudiate his own signature.

No measure so great, perhaps, was ever passed under circumstances which seem to Englishmen so unconstitutional. The Bill completely reverses the recent policy of the statesmen who control the Union. That policy has

been to raise revenue by the sharpest taxation the country would bear, especially Excise duties and Customs duties. and pay off the debt accumulated during the Civil War with the proceeds. This policy has been so steadily pur-sued, for eighteen years, that the debt has been reduced from 596,000,000l to about 360,000,000l, and seemed so likely to disappear altogether that plans for rearranging the paper currency, which now rests upon National Bonds held by the National Banks, were being considered. The credit of the Union had been raised until it was about on a par that of Great Britain, and twenty-five per cent. better than that of France, and the world had begun to doubt whether, after all, Republics are not more successful than Monarchies in extracting revenue from the people. The grandeur of the Republic considered in its external aspect has, moreover, been greatly increased, for it has been felt that a people which could now raise four or five hundred millions at three per cent. was on that account alone a great people, one which, on cause shown, could create fleets and armies almost out of the ground. This great policy has been suddenly and unexpectedly abandoned, and the repayment of debt has been reduced to a comparatively slow process; yet no one is visibly responsible. The Government has nothing to do with the matter. The Secretary of the Treasury has no place in Congress, nor is he avowedly, at all events, represented there, nor did he recommend the Bill. The Finance Committees of the Houses, though influential, are not responsible, and the Bill was, in fact, brought in and carried by private members, acting under the guidance of leaders who were in no way answerable for the condition of the Treasury. These leaders again, with their followers, were not acting on a monition, formal or informal, from the people, but directly and avowedly against the views of those whom the people had just placed in power, and who were only kept out of its exercise because the date fixed by the Constitution for taking their seats had not arrived.

Nothing can seem to Englishmen more anarchical, and yet when the system is considered it is seen to be orderly enough. The framers of the Constitution deliberately intended that a beaten party should not go out of power suddenly, but should, as it were, finish up their plans, and the Republicans in using their power have in no way exceeded their con-stitutional right. The Executive Government is neither injured nor affronted, for the Executive is the President, and if the President had disapproved, he had the power to veto the Bill, and he would have exercised it, and this being the case, his opinion must in some informal but sufficient way case, his opinion must in some informal but sufficient way have been taken in advance. And lastly, though no indi-vidual is responsible, the parties are. The Republicans publicly executed a grand party manœuvre, and if that manœuvre is disapproved by the public, it will be just as fatal to them at the polls as if it had been suggested by a responsible and impeachable chief. They will feel the con-sequences as much, and they will consequently be as unwilling to incur popular dislike. If they excite it, not only they, but their President, will be rejected, and this it is the first object of every party in America to avoid. The responsibility to the people is therefore as perfect as in responsibility to the people is therefore as perfect as in England, and it is this, and not the punishment of individuals, which it is the object of free governments to attain. Whether the American method of attaining it is the best one is a different matter. Englishmen think not, because they greatly approve the leadership of individual men, to which the American system is not favourable. No one there can quite rise as a financier to the position of Mr Gladstone, whose proposals have at least twice in his life been cordially accepted by a Parliament which did not understand them, through a conviction that he could in finance make no serious error. The Americans do not seek such leadership, and they obtain this advantage in compensation, that, owing to the dilution of individual responsibility, very great things can be done. It is difficult to apply acrid criticism to party committees. Hardly any Chancellor of the Exchequer would have ventured to propose the searching and widely diffused taxation which followed the Civil War, or to pay off the Debt with such unprecedented rapidity, or to throw away revenue in huge masses, as has been done by the recent Bill. The Americans do not gain great men by their system, but they do gain the power to pass very large measures with compart i rely great ease.

### THE ECONOMIST.

### Mar. 10, 1883.

### DEMOCRATIC FINANCE.

An article in the current number of the *Fortnightly Review* by Mr H. Labouchere, being the remarks of "A Demo-crat on the Coming Democracy," deserves attention for more reasons than one. We do not propose on this occasion to deal with the wholesale alterations Mr Labouchere proposes to make in the constitution of the country, the effect of which would be to make it not only entirely different from what it is now, but from that of any other country in the civilised world, but to inquire, and simply from an economic point of view, into the preposterous system of finance sketched out in it. We use the word preposterous seriously, not it is to be understood from any party, but from a hard, dry, economic point of view. That is "preposterous ' which is unworkable, and Mr Labouchere's plan is unworkable. We give in full the passage in which the proposed system is described.

"Taxation will be based upon the excellent principle that, a certain amount of money being required in order to meet the cost of Government, those ought, in the main, to pay it who can best afford it. The sums that are now levied on industry by means of Customs and Excise will be raised by a progressive income tax and a progressive succession duty. It is very clear that no individual can want more invested capital than such an amount as will produce in interest an income sufficiently large to enable him to gratify all his real and all his acquired wants. More is surplusage, and the owner of this surplusage has no real right to demand that society should be taxed to secure him in the possession of it. What can a man with a fortune beyond the very dreams of avarice do with his money ? He has to compete in thousands with others as rich as himself for the possession of china cups and saucers, which may be intrinsically worth as many pounds, or he employs it in some other equally silly manner. Very large fortunes—as the Americans are learning—are a positive danger to a democratic State. To take from the individual all above a certain amount, however just in theory, might, however, have its disadvantages. To take theory, might, however, have its disadvantages. one-half beyond the amount regarded as alike safe to the State and sufficient for the individual would be beneficial to both, and 50 per cent. might be laid down as the limit to which an income tax should in any case extend. It may be said that in this case accumulation would cease beyond the fixed amount. No harm would ensue if it did, but as a matter of fact, it would not."

Now this is no modern scheme. It is the same in essentials as that proposed by Jack Cade-"There shall be, in England, seven halfpenny loaves sold for a penny; the three-hooped pot shall have ten hoops, and I will make it felony to drink small beer; all the realm shall be in common, and in Cheapside shall my palfrey go to grass. There shall be no money, all shall eat and drink on my score." Mr Labouchere's proposals are not quite so simple as Jack Cade's, but they come to the same thing in the end. The "three-hooped pot" is to be filled more abundantly by the abolition of the Customs and Excise. All are to "eat and drink," not exactly on Mr Labouchere's score, but at the cost of those "who can best afford it."

Such an amount of invested capital as will produce, in interest, an income sufficiently large to enable the possessor to gratify all his real and all his acquired wants is to be allowed. "More is surplusage," and to be taken from its owner by taxation. The calm judgment of Montesquieu, l'impôt sur le superflu finira it par détruire le superflu, tells us how little this system would be likely to answer. The more recent warning of Proudhon-a warning which modern socialists may well take to heart, if they reject the quiet reasoning of Montesquieu, is to the same effect, that a progressive tax is only a *joujou démocratique*, un bilboquet. Proudhon speaks even in harder terms still of a single tax, the scheme indicated by Mr Labouchere-he calls it, in his incisive language une iniquité ideale.

Leaving this point, let us see how the plan would work out. And it is best in these matters to quote experience. The results of a progressive property and income tax in some of the Swiss Cantons are described in M. Paul Leroy-Beaulieu's treatise De la Science des Finances. Thus these taxes are in operation in a very mild form in the Canton of Zurich. The progressive nature of the tax differs, however.

as to incidence on property and income. On property, the whole surplus over 16,000*l* is taxed; on income, the pro gressive quality stops at 400*l* a year. The rate charged does not appear to be large, and the graduations are moderate. But M. Leroy-Beaulieu remarks that the tax, moderate as its scale is, has not succeeded—the frauds on the revenue and the emigration of capital have been considerable, and there has recently been a diminution in the capitals taxed within the Canton. It is also worth of notice that a progressive income tax, which in no case exceeded 2 4-10ths per cent., having been proposed in the Canton of Neuchatel, it was rejected by a very large majority, there being 7,624 votes against, and 4,002 only in favour of the proposition. Instead a proportional income tax was adhered to. This shows what the most practical democracy in Europe thinks of the scheme. And they are perfectly right. There is a limit, and that not a very high one, beyond which the progressive yield of an income tax vanishes.

Again, Mr Labouchere argues that no harm would ensue f accumulation of capital came to an end. But the injury to the country would be incalculable. No fresh enterprises could be undertaken. Those in existence even could not be maintained. The whole of the spirit of mercantile and manufacturing adventure, the whole of the vigour which has advanced the England of to-day-and the condition of the English labourer of to-day as well-immeasurably above what it was, say, some 80 or 100 years ago, would depart. Rows of empty warehouses, of deserted wharves, and of ruined factories would mock the workmen who had driven away the capital, the sap of their life. The experience of Switzerland, of America, and of France makes us believe that the future of this country will be very different from what Mr Labouchere so confidently predicts. Be that as it may, one thing is clear, that the laws of economic science are against his plan. They show that capital under far milder taxation than what he proposes either disappears or emigrates; that a country in which no accumulation of capital goes on soon retrogrades. Economic laws are often misapplied, often misunderstood. Their working is frequently hidden by extraneous circumstances, which produce back currents, so to say, on the surface, perplexing even to the careful investigator. But the laws themselves are as fixed, as inexorable in their working, as the trade winds or the tides, and whoever runs counter to them in finance will find that his card-castle rests on very uncertain foundations.

### PERIODICAL FLUCTUATIONS IN THE RATE OF DISCOUNT.

### III.-GERMANY.

THE fluctuations in the rate of discount in England as compared with France were considered in the Economist of February 10th, and it was shown there that the periodical movement in the rate which in England causes discounts of the latter half of the year to be higher than in the first half has no corresponding feature resembling it in France. The rate in France was even in both half years on ten occasions out of 38, and more frequently higher in the first half-year than in the second half in the proportion of fifteen to thirteen. The tables which follow subdivide the rate of the Bank of Germany in the same manner as the statements of the Banks of England and of France were arranged on the previous occasions, thus allowing an exact comparison to be made between them. The rate of discount of the Bank of Germany is shown in Table I. from 1845 to 1882, and the rate for each year being taken as equal to 100, the proportional numbers opposite to the rate for each half-year show at a glance in which of the two halves of the year the rate was highest. Table II., which follows, collects the facts together. If we take the years 1873 and 1876 as being even, in both of which the rate of the second half of the year was slightly higher than that of the first half, but the difference between the two was not great, the totals work out as follows:-BANK of GERMANY RATE-38 YMARS, 1845-82.

| Even in both half-years | 10 |
|-------------------------|----|
| Higher in first half    | 8  |
| Higher in second half   | 20 |
| *                       |    |
|                         | 90 |

### THE ECONOMIST.

The number of years in which the rate was even in both halves of the year was the same in Germany as in France, but here the resemblance ends. Of the remainder, the rate was higher in the second than in the first half by far the greater number. In Germany, as in England, the tendency to a higher rate in the latter half of the year is very distinctly marked of recent years. If we take the last fifteen years, from 1868 to 1882, in which in England the rate was higher in the later compared with the earlier half of the year in ten years out of the fifteen, in Germany the rate was higher in the latter half of the year eleven out of the fifteen. If we divide the 38 years equally into two parts, the same feature appears. Out of the first nineteen years the rate was higher in the first half twelve times and lower seven times; out of the second nineteen years the rate was higher in the first half only six times and lower thirteen times. The same feature is not equally marked in Germany as in England in the years when the rate is above the average, as the following figures show :---

BANK OF GERMANY RATE—1845-82.—Average Rate, 41 8s 7d. 41 8s 7d per cent., or below, Higher in latter half of year—11 years. Above 41 8s 7d per cent., Higher in latter half of year—9 years.

Liwe take 4 per cent., which we may say about corresponds in Germany to 3 per cent. in England, as the dividing line the difference is more marked. In this case the division is as follows :--

BANK OF GERMANY RATE-1845-82. 4 per cent. or below, Higher in latter half of year—1 year. Above 4 per cent., Higher in latter half of year—19 years.

Though there is this general correspondence between the periodical fluctuations in Germany as in England, the business of the Bank of Germany is as dissimilar from that of the Bank of England as that of the Bank of France is. The Bank of Germany, like the Bank of France, carries on its business over the whole of the country which it serves. It is even more closely identified with the general trade of the country, possessing, including sub-branches, 222 provincial offices, as compared with the 94 of the Bank of France. The constitution of the Bank of Germany was altered in 1876, and made in some respects similar to that of the Bank of England, so far as the treatment of its circulation was concerned, with the great difference, however, that an excess issue is allowed in Germany on certain fixed terms of tax paid on it. The rate has been higher in the second half of the twelvemonth six times out of the seven years which have followed that alteration. But it could be scarcely fair to ascribe the particular fluctuation to the change, inasmuch as it was a distinctly marked feature before. The conclusion which the figures before us support is, that the course of business in Germany must correspond more closely with that in England than the course of business in France does with the other two countries, and that the correspondence of the same feature in the Bank rate in England and Germany is likely to have an influence in maintaining it in both countries

### THE ECONOMIST.

### VIRGINIAN EFFORTS AT REPUDIATION.

THE unblushing, because unchecked, dishonesty of many an American State is about the most repulsive chapter in the history of the Republic. Picture an English county, or an English colony, acting as Virginia has acted within the past dozen years. That State, owing to reckless mismanagement after the war, incurred heavy debts, which it induced its creditors to compromise, upon the basis of writing off onethird of their principal, while, however, solemnly pledging itself to receive the coupons of the reduced debt in payment of all State taxation. But when, immediately after issuing the New Funded bonds, Virginia refused the payment of cash interest upon them, and then, finding the tax-receivable clause irksome, proceeded to repudiate the obligation, we are presented with a picture of official degradation which people upon this side of the Atlantic fail wholly to comprehend. But Virginia found that the United States Supreme Courts would not permit her either to repudiate this tax-clause, nor yet materially to lessen its effects by a wholesale taxation of the coupons when presented. Baffled so far, the State Legislature passed an Act compulsorily refunding the debt into bonds bearing a much lower rate of interest; and it is possible that had the long-suffering bondholders had the slightest faith that a new obligation would be adhered to, they might have been induced to make the exchange. But as it is, they have preferred to retain their existing securities, and to fight the so-called "Coupon-Killer" Acts of the Richmond Legislature right through to the Supreme Courts. These said Acts were so framed as to render it more trouble and expense to prove the genuineness of the coupons tendered for S'ate taxes than the coupons were really worth; and the Council of Foreign Bondholders having taken the matter up in July last year, an extensive registration of the bonds took place in London between September and December at Messrs Martins' bank, and funds were at the same time collected to bring the question before the Supreme Courts. It was the receipt of a telegram by the Council of Foreign Bondholders on Tuesday--"Decision against bondholders that caused an immediate fall of nearly \$20 in the bonds, which, as a last resort, would now probably have to be reconverted under the late Refunding Act. Whether this telegram did not overstate the adverse nature of the decision is, however, in doubt; for subsequent telegrams from the Council's legal advisers at Richmond state-"Decision upholds Act; disastrous, but not hopeless;" and later still-" Decision received, substantially victory." Amid these wholly irreconcilable statements, the confusion at the moment was complete. To-day a further telegram has arrived, to the following effect :---

"Court decides that State cannot forbid collectors to receive coupons. They refuse at their peril. Tax-payer's duty done when he tenders coupon. If he insists on going further, and forcing State to take coupons for her taxes, he must proceed under new law. This is all that is decided against us. We can enjoin collectors from collecting taxes, and sue officers for trespass if they dare levy. Result is State must provide for coupons before she collects any revenue. Case is own, on which complete victory must follow, if energetically pressed."

What this means is, apparently, that the tax-payers may legally tender coupons, but if the State refuses to take them, they must proceed to fulfil the conditions of the "Coupon-Killer" Acts, which is just what Virginia requires. Further than this, more doubtful litigation is necessary.

But records of this character—and Tennessee, North and South Carolinas, Louisiana, and others afford equally discreditable examples—have a wider significance than is to be measured by the depreciation in the market of some \$15,000,000 of Virginia Funded Bonds. It tells our bondholders that dishonesty may, if it so chooses, walk abroad openly in many an American State, and bondholders here cannot tell in how many, neither are they in a position to detect those impurities of administration which usually precede open repudiation, as they can detect them in America. Until dishonesty—whether in State, or railroad administration—is found to be more amenable to national laws, the taint attaching to such States as Virginia—which is at the present day as openly eager to repudiate as ever—will affect credit over a far wider

area. The assets of an apparently lankrupt State should be administered by an authority which is above suspicion; when, indeed, we believe it would be found that Virginia and other States have defaulted not from any necessity at all, but from simple preference for dishonesty.

### BUSINESS NOTES.

EGYPT AND THE WAR INDEMNITY.—In reply to a ques-tion as to whether it was by the advice of Lord Dufferin and the British Financial Adviser that the Egyptian Government was providing for the new Indemnity Loan by cutting down the general administrative expenses of the country, Lord E. Fitzmaurice stated on Thursday night that the manner of providing the indemnity funds had not yet been decided. From this it is reasonable to infer that the report that our Government had expressed to the other Powers an opinion adverse to charging any portion of the expenditure occasioned by the war against the funds applicable to the service of the debt is unfounded. And it would have been better if the statement had been still more explicitly contradicted. Nothing could be more unwise on our part than to starve the Egyptian administration, in order to leave the revenues of the bondholders untouched. That might be the easiest course for the moment, because with France in her present mood the consent of all the Powers to an alteration in the Law of Liquidation might be somewhat difficult to obtain. But in any country the administrative expenditure ought to be the first charge upon the revenues, and it is only the balance remaining after that has been adequately met that the State creditors can expect to receive. Now, the probability is, that if Egypt is to be efficiently administered, and her capabilities developed, the Government expenditure ought to be increased, instead of being reduced. She cannot certainly get the services of European judges, as is proposed, without paying for them; and there are other directions in which a more liberal outlay will have to be incurred. If we remember rightly, Sir A. Colvin himself protested against an encroachment upon the funds available for the Government, on the ground that it would prevent the carrying out of beneficial public works; and if that was so, it is difficult to see how he can now advise anything that will limit still further the administrative expenditure. If there is really good cause to believe that the Government expenditure can now be reduced compatible with a more efficient administration, let that be clearly shown. At present, however, it would seem as if efficiency were being sacrificed to cheapness, simply that a difficult question as to the claims of the bondholders may be evaded; and if this policy is really being pursued, it is certain to lead to trouble.

THE RESUMPTION OF SPECIE PAYMENTS BY ITALY.—An official Decree has now been issued, fixing the 12th of April next as the date for the resumption of specie payments by Italy. On that date it is announced the notes of two francs and under will be payable in silver at all the State treasuries, and these as they come in will be cancelled. The five-franc notes also are to be retired, and these, as well as all notes of higher denominations, are to be payable at certain specified treasuries. The brief telegraphic summary of the Decree, however, does not state whether the option of demanding gold or silver is to rest with the holder of the notes or with the Government, which 3 a very important point, as on it depends, to a considerable extent, Italy's power to retain the gold she has accumulated. If gold should tend to flow out of the country, as it may do, the provision in the Resumption Act, that Customs duties must be paid in gold, unless the Government authorises their payment in notes of denominations not less than 21, will be of use. As to the sources whence the 16,690,000l of gold which the Treasury has collected, the following statement is given :-

|                |         | £         |      |               | £          |

### THE ECONOMIST.

THE ALTERATIONS IN THE UNITED STATES TARIFF ON WOOL AND WOOLLENS.—The most definite information that appears yet to have been received as to the alterations

that appears yet to have been received as to the alterations in the American tariff on wool and woollen goods is given by Messrs J. L. Bowes and Co., of Liverpool, in their cir-cular dated the 8th instant. They report as follows :---The exact details of the changes made by the new American Tariff Bill are not yet fully known in this country, and they are probably so numerous and intricate that letter advices must be awaited before a correct view of the position can be obtained. It is reported in Bradford that the import duties have been raised 2d per yard upon low worsted goods, and 2¼ d per yard upon the better kinds. On the other hand, our own cable advices speak of a reduction of 5 per cent. in the duties upon "cloth" goods, which may mean that there has been an average reduction of that amount upon the manufactures of wool generally.

may mean that there has been an average reduction of that amount upon the manufactures of wool generally. Our information about the raw material is more definite. The article is still, as heretofore, divided into three classes, namely, clothing, combing, and carpet. The old and the new duties are as follows :

| CLOTHING and                         | COMBING.                         |
|--------------------------------------|----------------------------------|
| Old Duty : Costing under 16d per lb, | 10c per lb, and 11 % ad valorem. |
|                                      | 12c " and 10 % "                 |
| New Duty: Costing under 15d per lb,  |                                  |
| " 15d and over "                     | 12e "                            |
| CARPE                                | ET.                              |
| Old Duty : Costing under 6d per lb,  | 3c per lb.                       |
| " 6d and over "                      | 6c "                             |
| New Duty : Costing under 6d per 1b,  | 21c "                            |
| " 6d and over "                      | 5e                               |

" 6d and over " The following examples will make the matter clearer :-

Costing Here. Old Duty. New Duty.

|                        | Per lb.         |         | per lb. | Per lb.  |  |

LOCAL GOVERNMENT IN ENGLAND AND WALES .- Mr William Rathbone has completed in this month's number of the Nineteenth Century the remarks on Local Government in England and Wales, to which we referred in the Economist of 10th Feb. The first point which the reformer in these matters must aim at is the arranging the system of local government on an intelligible and straightforward plan. And in establishing this, the first step is to settle the area over which this authority should extend. There are six or seven principal varieties of area now existing in England the parish, the union, the county, the borough, the local board or Improvement Act district, and the highway district. These areas often overlap each other in a most irregular manner, and there are only two of them, the parish and the union, which could be employed as the primary basis. Mr Rathbone selects of these the union as the best startingpoint. It is true that more than one-quarter of the unionsthat is to say, about 180 of them-extend into more than one These would have to be broken up, and we fear county. that Mr Rathbone under-estimates the difficulties which would have to be met in this operation, owing to the differ-ences in rating which exist between one division and another. The union, however, is undoubtedly the best basis to select as a starting-point. Mr Rathbone proposes to diminish the difficulty as to differences of rating by a readjustment of the system on which the Poor Law is administered, and a very considerable Government subsidy towards the cost of indoor relie!. It is remarkable proof how strongly the idea that a subsidy from Government is the best mode of granting relief to local administration has taken possession of the public mind, that we find Mr Rathbone, who has devoted a very unusual amount of time and patience to the investigation of local government, pro-posing a subsidy from Government in this manner. The system we should wish to see established is a self-contained one-that is to say, one not depending at all, or, at least, only in as small a degree as possible, on Government assistance; one in which the administration of selected taxes should be handed over to the local authorities, which should then be left to their own resources. But though we do not feel able to go altogether the lengths Mr Rathbone does in

his scheme for the readjustment of local burdens, we are glad to see that he has once again put his ideas on the subject clearly before the public. Much more power will have to be given to local bodies, as in the question of licensing and much more information also will have to be given as to their accounts, for, as experience has continually shown, there will always be extravagance where there is not publicity.

TRADES' UNIONS AND FEMALE LABOUR.—Mr Broadhurst, the Secretary of the Parliamentary Committee of the Trades' Union Congress, has given notice of a Bill for "the prohibition of females under 14 years of age working at forges, the measure being brought forward on the ground that in the chain and nail trade juvenile labour is largely employed, in contravention of the Factory Acts, and that the women and girls do iron work which is much too heavy for them, and that they work in a state of undress which is indecent. These assigned motives are no doubt very philanthropic, but it may be doubted whether they fully disclose the object at which the originators of the Bill really aim. Trades' Unions have on all occasions shown themselves inimical to female labour, and are prone, under the guise of seeking to protect women and girls, to seek protection for themselves against the competition of the other sex. And their efforts in this direction require at all times to be very closely watched. In this case, if it be true that the Factory Acts are evaded, the proper course is, surely, to take steps to make the law respected, and not to visit the faults of the employers in contravening the statute upon the employed. A stringent enforcement of the Factory and the Education Acts should go far to remedy the evils which no doubt do exist in the nail trade, and it is in this direction rather than in the putting of new obstacles in the way of females earning a livelihood for themselves, that action should be taken.

IRISH REPRESENTATION IN PARLIAMENT.-Mr A. Loftus Tottenham, the Member for Leitrim, has, failing an opportunity to speak in the debate on the Address in the House of Commons, written a letter to the Times, to point out the numerical fallacy on which Mr Parnell relies in claiming that he, and those who hold his opinions, represent the majority of the inhabitants of Ireland. Reduced to a tabular form the figures work out thus :-

|  | Electors, and Popu-<br>lation of Constituen- | 2<br>Members of House<br>of Commons, Elec-<br>tors, and Population<br>of Constituencies not<br>Supporting Mr<br>Parnell. | 3<br>Percentage of<br>Col. 1 to total. |
|--|--|--|--|
| Members of House<br>of Commons                               |  | 65   | 37                                     |
| Population of con-<br>stituencies                            |  | 3,702,000  | 31                                     |
| Electors (allowing<br>one half in divided<br>representation) |  | 168,038  | 27                                     |

Applying this test, it appears that Mr Parnell's following is more formidable in the House of Commons than it is in Ireland. Even in the House little more than a third-that is to say, 37 percent .- of Irish Members think with him, and those Members represent less than a third-31 per cent.-of the population of the constituencies, and little more than a quarter-27 per cent.-of the body of electors.

The above return, compared with that for the preceding week, exhibits the following changes :-

DECREASE.

|                  | manes.     |
|------------------|------------|
| Circulation      | 18,414,510 |
| Treasury account | 12,878,227 |
| Private deposits | 2,386,472  |
| Cash             | 1,412,957  |
| Discounts        | 22,705,211 |

The outside rate of discount remains unaltered at 21 per cent., but the demand for bills is scarcely so active. There is an increase of 15 millions in the discounts in Paris, but the total is reduced by the running off of bills in the branches, which only appears in this week's return. The London exchange is higher at in this week's return. The London example, but 25f 25c, and gold is being sought on the market for export, but 251 256, and gold is being solght on the market for export, but it can hardly be said to command a premium yet. By the Saturday's steamer from Havre a first remittance of 50,000/ will be made to the United States, and others are expected to follow. Some parcels of gold have also been taken for Amster-dam. The Treasury has drawn this week 12 millions from its current account, and the last 10 millions of the credit opened by the Bank. The cash reserve has increased by three millions by the Bank. The cash reserve has increased by three millions of gold from the circulation, but has lost five millions of silver taken for Italy. It remains as under :--

| Gold<br>Silver | March 8.<br>francs.<br>995,670,033<br>1,079,190,609 | ***** | March 1.<br>francs.<br>992,264,508<br>1,084,009,091 |
|----------------|---|-------|---|
| Total          | 2,074,860,642                                       |       | 2,076,273,599                                       |

Rumours of a refunding of the Five per Cents. have been again in circulation, and, although I believe there is no foundation for them, the recurrence of the report deserves to be noted as evidence of the apprehensions of the money market of some Treasury operations for procuring money. One journal went so far as to say that the Government had decided on exchanging 4f 50c in Three per Cent. Rente for 5 frances of the present stock, demanding from the holder a balance of 4f 50c in cash, which would produce a sum of 300 millions, to be employed in balancing the Budget of 1884. That was the system employed in the refunding of the 4 and 41 per Cent. balancing the Budget of 1804. That was the system employed by M. Fould in the refunding of the 4 and  $4\frac{1}{2}$  per Cents. in 1862. Taking the Three per Cents. at 82, the Fives would be converted on the footing of a value of 1186 50c, their present price being under 1166. An article of the Budget of 1883, however, empowers the Treasury to issue bills for a sum of 400 millions a power which has so far been exercised to a of 400 millions, a power which has so far been exercised to a very limited extent, the rate of interest allowed being only one half per cent. for bills up to eleven months, and 1 per cent. for one year. An increase in the rate of interest is probable, one year. An increase in the rate of interest is probable, for since the reduction to the present rate the public have ceased to deposit money with the Treasury, and the bills in circulation do not exceed one or two millions. But before taking that step the Treasury will have employed its credit at the Bank, which, under the Conventions of 1857 and 1878, a trease with events of 1857 and 1878. agreed to make advances without interest to the amount of 140

ECONOMIST. THE

> millions. As will be seen by the weekly balance-sheet above, the Treasury has taken since last Thursday the balance of 11 millions remaining of that credit. At the same time the will be now due on the difference.

> Rente and the better classed stocks have again improved this week, although to-day's rates are not the highest reached. Suez Canal shares have been freely bought, notwithstanding the un-favourable traffic returns for last month. Gas shares have re-covered from the fall caused by the contention with the Paris municipality. Railway shares are weaker. Subjoined are today's closing prices :--Manah Q 35 1 1

Series 156 of Redeemable Rente has been drawn to be paid

off at par on the 16th April. The Hypotheque Foncière Land Company, founded in 1880, has voted its liquidation in consequence of a condemnation of its founders to fine and the payment of damages for an infrac-tion of the law on public companies, in an operation for increas-ing the capital from  $7\frac{1}{2}$  millions to 10. The new shares were to be circing in exchange for lands, and not to be sold for money to be given in exchange for lands, and not to be sold for money. Returns of the Suez Canal give the receipts in February as

4,240,000f against 5,247,960f in the same month of 1882, and 3,299,360f in 1881. In the first two months of the year the receipts were 9,233,307f in 1883; 10,691,012f in 1882, and 7,807,046f in 1881.

The indirect taxes in January produced a total sum of 183,363,000f. Compared with the estimates this was an increase 183,363,000f. Compared with the estimates this was an increase of 336,000f, and compared with the same month of 1882, an increase of 1,271,000f. The month of January, 1882, had given an increase of 14,720,000f on the estimates and 4,884,000f on the receipts of 1881. The estimates for 1883 were, however, fixed with more exactitude relative to the probable yield, M. Léon Say, by whom they were prepared, considering that the announcements of large surpluses only encouraged extravagence by the appearance of an illusory prosperity, the surpluses being always more than absorbed by the supplementary credits. The diminution in the yearly increase from 4,884,000f to 1,271,000f is a sign of decreased elasticity in the revenue. The surplus of receipts above the estimates, which was 216 millions in 1881, was only 97 milliona in 1882. in 1882.

An interesting discussion took place at the monthly meeting of the Paris Political Economy Club this week, at which M. Léon Say presided, on the question, "Has the cost of living a serious influence on the rate of wages?" MM. F. Passy, de Parieu, Levasseur, Leroy-Beaulieu, Courtois, and other members took part in the debate and the general oninion expressed was took part in the debate, and the general opinion expressed was that the cost of living only governed the rate of wages by pre-venting them falling below the minimum under which the labourer must die or emigrate. Above that minimum wages and the prices of necessaries fluctuate quite independently of each other. The only effect of an increase in the cost of living is that workmen must increase their hours of labour or deprive themselves of some of the luxuries they formerly enjoyed. M. Passy remarked that dearness of food might even become a cause of a fall in wages, as in case of famine workmen would be unable to bargain with masters for the price of their labour and would accept any pay offered. All the speakers agreed that the prices of food had little influence on the rate of wages, which was solely governed by the demand and supply of labour, in countries where, as in France, there was a considerable margin between what was necessary for existence in the lowest condition

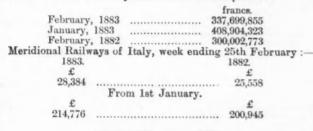

and the wages earned. The Academie Nationale Agricole, Manufacturière, et Com-merciale has offered five medals, gold, silver, and bronze, in the merchaie has onered hve medals, gold, silver, and bronze, in the order of merit, for the best treatises on the following subject:— "Trace out the basis of a treaty of commerce between France and England, which would safeguard, as far as possible, the reciprocal interests of both countries." Papers must be sent in by the 15th September.

The Paris Court of Appeal has confirmed the decision of the

Tribunal of Commerce in the affair of the Union Générale. The issue of new shares is declared null and void, and all dealings in them are cancelled. The 850 francs per share paid for the purchase of the new shares is not, however, returned to the subscribers; 250f is appropriated to the payment of a second-fourth of the capital on the two old shares which gave a right to mberribe to one of the new the remaining 600f ere conferented subscribe to one of the new, the remaining 600f are confiscated for the benefit of creditors of the Union Générale. Shareholders are also called on to pay up the remaining 250f per share uncalled.

called. The Havre cotton market is dull, and holders, to induce buyers, have been willing to make some small concessions in prices, but the official rates have remained unchanged. Spinners in the Rouen district have no difficulty in disposing of the better class of yarns at remunerative prices, but the prices of cottons in packets for hand-looms are in favour of buyers. Good orders for unbleached calicoes have been booked, and printing stuffs are rare. Coloured machine-made fancy goods are cleared off as fast as produced, and stocks are kept down. There is a off as fast as produced, and stocks are kept down. There is a steady demand for handkerchiefs and linings. All linen yarns are firm, and makers demand an advance on current rates for are firm, and makers demand an advance on current rates for orders forward. Buyers have commissions to give out, but hold them over. The market is quite bare of some articles, bed tickings being especially enquired after. The consignations of cloth from Sedan last week amounted to 58,293 kilos, against 47,190 in the same week of 1882. The Paris Bankers' Clearing-house gives the following return for the month of Fabruary and months for comparison

for the month of February and months for comparison :

### GERMANY AND AUSTRIA.

### (FROM OUR OWN CORRESPONDENT.)

VIENNA, March 5.

The Prussian Landtag last week voted the third reading of the Income Tax Bill. The two lowest categories of the tax have thus been abolished, and the lowest income which is now taxed is 900 marks. The number of persons who are freed from paying income tax amounts to 3,740,000. The fol-lowing table shows how the income of the populations will in future be taxed, in comparison to former times:-

|            | Effective Ta<br>According |        | ffective         |        | Number of<br>Persons    |  |

The first category applies to incomes from labour, the latter to interest receipts, salaries of higher officials, officers, &c. At the German Railway Tariff Conference. lately he'd at

Berlin, it was resolved that in future Switzerland is to be allowed Berlin, it was resolved that in future Switzerland is to be allowed to have two consulting votes in the conferences of the Associa-tion; that the special cheap tariff is in future to comprise raw petroleum waste, locomotives, thrashing and sowing machines, and that for the transport of liquids entire cars lined with tiu are to be admitted, the cars to count for nothing in the weight of the article transported. It appears that this last is a very important arrangement, as the wine merchants in Bordeaux are beginning to make use of it, and send their wines filled into railway cars instead of casks, or in immense casks, specially adapted to railway cars for this purpose. In the commission of the Prussian Landtag the question of completing the net of

German canals was discussed. Hitherto little progress has been Rade in the matter of the canal to form a junction between the Rbine and the Ems and from thence to the Elbe, but now the Government is devoting its energy to the promotion of this very important undertaking. The chief sim of this canal is to emaneipate Germany from Holland, because the latter country is continually putting obstacles in the way of German traffic to the sea.

the sea. The receipts of all the German railways, except the Bavarian, were higher during January, 1883, than during the same month of the preceding year, the total receipts being 66,142,768 marks, that is, 1,836,048 marks, or 2.9 per cent., more than in January, 1882. The total length of rails extended over 29,278 kilometres, that is 318 kilometres, or 1 per cent., more than in January, 1882. The iron market has undergone no change whatever; the works of Westphalia still complain that they lack occupation, while the Austrian and Hungarian works are as here a pos-

whilst the Austrian and Hungarian works are as busy as possible

The Austrian Alpine Mining and Steel Works Company publishes the following figures concerning its production during 1882:-Brown ccal, 12,466,320 cwts; ore, 11,682,448 cwts; raw iron, 3,318,746 cwts; cast iron, 161,620 cwts; steel ingots, 1,677,150 cwts; half-refined iron and steel, 1,322,036 cwts; refined iron and steel, 1,515,556 cwts; wire, 105,548 cwts; pins, bolts, &c., 53,964 cwts; steel springs and saws, 33,686 cwts.

The production of kali in the neighbourhood of Magdeburg is so excessively easy and large that the material produced cannot be sold. The Government of Anhalt would like to produce 65,000 cwts per day, but not more than 30,000 cwts can be sold.

The excellent condition of the money market has exerted a avourable influence upon Stock Exchange prices, and many quotations are higher than they were even during the previous week. It is but natural, therefore, that the conversion of the second half of the Hungarian Gold Rente should be continually looked forward to, since the emission of the first half succeeded when the quotations of the Austrian and Hungarian rentes were much lower than at present. The Paris money market, however, which helped to carry out the first part of the opera-tion, is now quite passive. It is, therefore, expected that the syndicate will resolve to complete the emission with the help of the German and English Bourses only.

The Austrian Creditanstalt has just published its dividend The Austrian Creatianstatt has just published its dividend for 1882 at the rate of 15 florins per share. 483,000 florins are to go to the reserve funds, 16 000 florins to be carried over to the new account. According to the last quotation, the interest paid by this institution is 4.77 per cent. The dividend of former years amounted to  $17\frac{1}{2}$  florins in 1881; to 13 florins in 1880 and 1879; to 14 florins in 1878.

The dividend of the Hungarian Credit Bink amounts to 19<sup>1</sup>/<sub>2</sub> florins, against 21 florius in 1881, 19<sup>1</sup>/<sub>2</sub> in 1880, and 25 in 1879.

The lower dividend of the Creditanstalt has encouraged the party speculating for the fall in Barlin, whose engagements are very large.

The German Reichsbank pays 7:05 per cent., against 63 per cent. in 1881.

In the Austrian Reichsrath a most violent parliamentary battle was fought during the past week. The debate on the Budget was the pretext for a most animated discussion between the two chief parties on every possible subject. The chief cause of controversy was that the German Liberal party tried to convince the Finance Minister that the present relatively favourable condition of the country's finances is by no means due to bis excellent management, but only to the condition of the market at large. It must looked upon as a very lucky chance that whilst the Government felt itself bound to raise the tax on coffee and petroleum, these two necessaries of life suddenly experienced a considerable fall in their price. Then, it is certainly not because of any ting done by the Finance Minister that the piper rente rose steadily and continually, so that it has now almost reached the height of silver rente. There can be no doubt that the emission of paper rente to provide for the deficit, instead of gol I rente, was a very great mistake, for if cash payments are ever resumed, the State w.II have to pay the difference to its creditors. The increase in the Customs tariff is proving a great disadvantage to many exporting branches of commerce and industry. For instance, the minu-facturers of ready-made clothing are at a loss how to compete in export with other countries, cloth having become very expensive by the new Customs tariff. Vieuna exports large quantities of becaute the science form with each price and the American shoes and boots, asingle firm with establishments on the American system in Graz and Moravia shipping from 70,000 to 100,000 pairs in one week. This firm was once absolute master of the Australian market, but now it is subjected to England's competition, on account of the heavy duty on leather.

The Austrian and Hungarian Governments have at last agreed upon the conditions for the regulation of the Iron Gate. Hungary is to execute the work, to pay the entire expenses, and to be entitled to levy a tax from all ships passing through the regulated part of the stream.

Austria and Hungary have protested against the conditions

### ECONOMIST. THE

according to which the tobacco monopoly is to be introduced in Turkey, because the existence of Austrian monopoly depôts in Constantinople is no longer to be granted. Negotiations for

In constantinople is no longer to be granted. Regolitations for an airangement have been commenced. The postal savings' banks opened in Austria for the first time at the beginning of January have already become very popular. In less than two months the deposits have risen to one million florins and a half, exclusive of repayments. The amount has been invested in Austrian Rente.

Potices of Books.

(4) Ingall's Foreign Stock Manual. London . Effingham Wilson, Royal Exchange ; F. C. Mathieson, Bartholomew House.

THE 1883 edition of this carefully-compiled little work has been forwarded to us. It is in the well-known form, and duly corrected to date.

(6) The Directory of Directors. By Thomas Ski London: 1 Royal Exchange buildings, E.C. By Thomas Skinner.

THE influx of new companies-electricity, land, and other concerns-early last year renders a new edition of this annual more than usually interesting. Mr Skinner has added 1,774 new names to his list, while 1,193 names have disappeared in the course of the year. The information given is in other ways extended.

(5) The City of London Directory for 1883. London: W. Hand L. Collingridge, City Press Office, Aldersgate street.

KEEPING pace with the expansion of the business population of the City of London, the thirteenth number of this annual has been extended by the addition of several thousands of new names. The utmost care has evidently been taken to bring all the information it contains fully up to date, changes in firms and addresses as late as the end of January being noted. In other r spects, also, the record it gives of City matters is full and accurate, and a more complete and reliable guide could not be desired.

DISCOUNT AND MONEY MARKET .- The ominous drop in the New York exchange last week, coupled with an increasing demand for money over there, was followed by the publication of a return by the Associated Banks, recording the entire disappearance of the surplus upon their legal reserve. Money in New York forthwith became tight, running up at various times to the fancy quotations usual on those occasions, and the sterling exchange fell again to nearly the gold moving point. It never, however, quite reached the point at which such shipments from London become profitable; but as certain financial houses were in want of funds on the other side, they found it convenient to ship. The first 100,000l in gold was taken by a Canadian bank on Monday, and was understood to be on account of the Canadian-Pacific Railway, and a similar amount was taken on Wednesday for New York. This was followed on Thursday by a withdrawal of no less than 340,000l in American eagles in time for to-day's steamer from Southampton. That any of these remittances have actually paid simply as an exchange operation is not to be supposed, but with the prospect of cheap money continuing here, and the requirements of New York houses to be met, it has been found expedient to take part of the required balances from London. The effect upon the London money market has been to place it very much upon the level of Bank rate; and had the rate been advanced yesterday, there is not much doubt that the market would have followed it. There was not, however, any necessity for the Bank to consider the advisability of retracing last week's reduction; for there appears to be a general belief that the present is a passing spasm of the New York money market, promoted partly by speculators, and that it will shortly subside. There is no doubt that the balance of trade payments has now turned in favour of America; but still it has been the pressure for money over there which actually moved the gold. Here the supply of bills is now more plentiful, and at 3 per cent. the Bank of England to-day transacted a large business both in loans and discounts.

The Bank return does not cover yesterday's gold withdrawals, nor show the increased business since accruing. The return would have been a more favourable one but for the addition to the Government securities, which, occurring upon the day the new Treasury bills were issued, points to their having in a great measure been secured by the Bank. There is a drop of 240,000*l* in the reserve, mainly attributable to gold exports on Monday and Wednesday.

Silver is now quoted at  $51\frac{1}{6}d$  per ounce—a fresh rise of  $\frac{1}{6}d$ . The demand is for India, where the sterling exchanges have generally advanced. On Wednesday the Bank of England disposed of the 50 lacs of India Council drafts at the minimum of 1s  $7\frac{9}{16}d$  per rupee, a rise of  $\frac{1}{16}d$  as compared with last week. In addition, telegraphic transfers were sold to the extent of 9 lacs at 1s  $7\frac{11}{16}d$  per rupee, and the amount thus far realised by these drawings since April 1 last has reached 14,162,000/, or within a few thousands of the 14,200,000/ mentioned by Lord Hartington as required during the financial year.

For the Victoria Four per Cent. loan for 3,399,300*l*, 510 tenders were received on Tuesday, amounting to 8,993,000*l*, at prices ranging from the minimum, 100*l* to 100*l* 11s 6d. Tenders at 100*l* 2s 6d received in full, and at 100*l* 2s about 20 per cent. of application. The average yield was 100*l* 3s 6d.

The tenders for 500,000l Hull Corporation Three and a-Half per Cent. Stock were opened on Monday at the Bank of England. The applications amounted to 1,984,900l, at prices varying from 98l per cent. to 94l per cent. (the minimum). Tenders at 95l 1s 6d received about 12 per cent. of the amount applied for, those above that price were allotted in full.

The Ionian Bank has been registered, with limited liability, under the Companies Acts, 1862 to 1880, in accordance with the special powers conferred by the Ionian Bank Act, 1882.

At a special meeting of the Wilts and Dorset Bank, held at Salisbury, it was resolved unanimously to register the company as a limited liability company, and to increase the capital from 600,000l to 2,000,000l, by increasing the nominal amount of each share from 15l to 50l, the entire increase to form a "reserve liability."

The Frankfurter Zeitung observes that the statement of the Reichsbank of 28th February shows a diminished demand for accommodation. The reserve of notes stands at 13,334,500l, against 9,960,500l at the corresponding date last year. The movement of gold from Berlin to Holland may, however, keep the directors of the Reichsbank from lowering further the rate of discount.

We subjoin our usual discount quotations for paper having various periods to run, and a comparison with previous weeks.

The Bank of Bengal has advanced its discount minimum from 6 to 7 per cent., after rising from 5 to 6 per cent. last week.

The Bank of Bombay yesterday raised its discount rate from 5 to 6 per cent.

The discount quotations current in the chief continental cities are as under, market rates showing increased steadiness in Germany:—

At times money has been in very strong demand in New York, owing to the disappearance of the excess upon the legal reserve, coupled, it is said, with market manipulations by interested operators.

The following are the standards for gold points of the four principal gold exchanges:---

| f French.                | m German.                   | S American.                 |

THE STOCK MARKETS.—On some days a moderate amount of business has been transacted upon the Stock Exchange, but the signs of reanimation are very fitful, having regard to the recent rapid fall in money. This week, however, there have been the gold withdrawals and the pressure for money in America to affect London prices, and the fall in Consols is a sufficient indication that the effect of these has been distinctly felt here, even though there does not appear to be any fears entertained that money will rise above 3 per cent. just at present. Up to Tuesday the markets generally were firm; but Tuesday, Wednesday and Thursday were days of depression; and a very bad impression was produced by the advices respecting Virginia bonds. To-day there was a revival, in which Virginia bonds participated, and Egyptian were higher, it being stated that the surplus of the assigned revenues would not be diverted from their original purpose.

The supply of new securities is still upon a fair scale, and the new Trust Company is a leading feature of the week.

COLONIAL GOVERNMENT DEBENTURES. - Queensland and South Australian 4 per Cents. show rises of  $\frac{1}{2}$ , while New Zealand 5-30's and Quebec Loans are quoted 1 higher.

FOREIGN GOVERNMENT SECURITIES .- A fair amount of irregular movement is indicated on the week amongst Foreign Government securities, but the most striking drop of all has occurred in Virginia New Funded Bonds, for the reasons assigned in an earlier column. At one time yesterday these bonds fell to  $40\frac{3}{4}$ —a drop, as compared with the beginning of the year, of over 25 dols—but to-day's advices have caused a rally. Russian have lost some of the rise previously recorded; Turkish have moved irregularly; while Egyptian have again advanced. Otherwise, this department has been featureless

The Imperial Ottoman Bank, Limited, give notice that the interest on the registered bonds of the Ottoman General (5 per Cent.) Debt, and on the bonds stamped for conversion, will be paid on production of the coupons at their offices, Throgmorton street.

The following are the changes for the week, taking the latest unofficial quotations :-

HOME RAILWAYS .- The market for the Ordinary stocks has been a more spirited one this week. The traffic returns were a good deal more favourable, and beyond this the Scotch dividends have given general satisfaction, the improvement of the 3 per cent. in the North British rate being followed by a 4 per cent. increase on the Caledonian corresponding dividend. The Glasgow and South-Western maintains the advance of last year, and as the traffic increase was only about 10,000l, no more was anticipated. Some few stocks are lower, but the general movement is upward. Taff Vale stock has advanced 3, and Furness 1.

The tollowing shows the principal changes for the week in the quotations of ordinary stocks comparing the latest unofficial prices :-

AMERICAN RAILROAD SECURITIES .- The depression early in the week has mostly been recovered. Louisville and Nashville shares are 1 better, and Pennsylvania, and Denver and Rio Grande,  $\frac{1}{2}$ ; but Oregon and Čalifornia Preferred are 1 lower; and New York, Pennsylvania, and Ohio First Mortgage, 1.

FOREIGN RAILWAYS .- Bahia and San Francisco shares have advanced 1; Buenos Ayres Great Southern stock, 1; Central Argentine, 1; Ottoman shares,  $\frac{1}{4}$ ; Porto Alegre and New Hamburg Debenture stock, 1; San Paulo,  $\frac{1}{4}$ ; and

ECONOMIST. THE

### ECONOMIST. THE

Operte

Varna, 4. Mexican Ordinary stock has fallen 1. Amongst the Obligations, Brazilian Imperial, Central Bahia are about 1 higher, and Nitrate Railways 2.

BANKS .- A decided improvement has to be recorded. Agra, Alliance, and Queensland National have all risen 1; Bank of Egypt, Hong Kong and Shanghai, London and County, and Merchant, 1; Consolidated and Imperial Otto-man,  $\frac{1}{6}$ ; and National,  $\frac{1}{2}$ . CANALS.—Suez Canal shares are 6 higher on the week.

COMMERCIAL, INDUSTRIAL, &C.-Anglo-American Brush Electric, 7*l* paid, have risen  $\frac{1}{2}$ , Central Sugar Factories of Brazil  $\frac{1}{2}$ , Great Western Electric  $\frac{1}{8}$ , India Rubber, Gutta Percha  $\frac{1}{2}$ , Liebig's Extract 1, Nobel's Explosives  $\frac{1}{2}$ , and United States Rolling Stock  $\frac{1}{2}$ , British Insulite are down  $\frac{3}{4}$ ,

and Phospho Guano <sup>3</sup>/<sub>4</sub>. FINANCIAL, LAND, &c.—Foreign and Co'onial Govern-ment Trust stock is down 1, and Hudson's Bay <sup>1</sup>/<sub>4</sub>, but most of the Land and Agency companies are rather higher. National Discount and United Discount have both risen 1.

INSURANCE.-Alliance British and Foreign have fallen 1, and Phoenix 5, but Commercial Union, Guardian, and Liverpool and London and Globe are all 1 up, Marine,

and Ocean Marine 1, and Imperial Fire 51. IRON AND COAL.—Lehigh and Wilkes' Barre Coal Bonds have advanced 1.

MINES .- Mason and Barry and Rio Tinto shares are down 1, and United Mexican 1, but St John del Rey stock has risen 10, and Tharsis 1.

SHIPPING .- These shares have been firm. Mercantile Steam have risen 14, Peninsular and Oriental New 12, Royal Mail 1, and Union 1.

TELEGRAPHS.-Anglo American Preferred are down 1. the Deferred 1, and Direct United States 1, but Great

Northern are  $\frac{1}{8}$  up, and Indo-European  $\frac{1}{2}$ . TRAMWAYS.—These shares have mostly risen on the week, the principal provincial lines being from  $\frac{1}{8}$  to  $\frac{1}{2}$ higher. London General Omnibus stock has advanced 5

BULLION. --The following is taken from the eircular of Messrs Pixley and Abell, dated Loudon, March 8:

Gold.—The demand for gold has been active this week, the in-quiries having been for India and America. Resourse has been had to the Bank to fill the orders for the United States, and bars and coin to the value of 540,000/ have been withdrawn. The only arrival to report is the Ballarat with 13,850/ from Australia. The Sutlej has

report is the Ballarat with 10,000 taken 54,000/ to Bombay. Silver.—Fresh orders for the Mint, coming on a market almost bare of supplies, caused a slight improvement in price, and for this week the rate has been 51<sup>4</sup>/<sub>2</sub>d per oz. The arrivals have been 35,000/ from Chili, and 13,800/ from New York. The P. and O. steamer has bare of supplies, caused a slight improvement in price, and for this week the rate has been 51<sup>4</sup>/<sub>2</sub>d per oz. The arrivals have been 35,000/ from Chili, and 13,800/ from New York. The P. and O. steamer has taken 115,000/ to Bombay. Mexican dollars have again realised 49<sup>2</sup>/<sub>4</sub>d per oz and remain tolerably steady at that quotation. Exchange.—The minimum rate announced yesterday at the Bank of England was  $1/7_{16}^{*}$  for bills, and  $1/7_{16}^{*}$  for transfers, showing a rise of  $\frac{1}{70}$  and  $\frac{1}{4}$ d respectively. The allotments were—On Calcutta,

Exchange.—110 market by the set of the set

for Bank bills at 4 months sight, Hong Kong, 3/82 per donar; Shanghai, 5/05 per tael. The 4½ per Cent. Rupee Paper is 855 to 86, and the 4 per Cent. 82½ to 82½. Quotations for Bullion.—Gold.—Bar gold, fine, 77s 9d per oz standard; bar gold, containing 20 dwts silver, 77s 10½d per oz stan-dard; Spanish doubloons, 73s 10d to 73s 10¼d per oz; South American doubloons, 73s 8½d per oz; United States gold coin, 76s 7d per oz.

Silver.—Bar silver, fine, 51<sup>1</sup>/<sub>4</sub>d per oz standard; bar silver, containing 5 grains gold, 51<sup>1</sup>/<sub>2</sub>d per oz standard; cake silver, 55<sup>1</sup>/<sub>8</sub>d per oz; Mexican dollars, 49<sup>3</sup>/<sub>4</sub>d per oz. Quicksilver 5*l* 178 6d; discount, 3 rer cent.

### NOTICES AND REPORTS.

STOCKS

Virginia Bonds.—The Council of Foreign Bondholders have re-ceived a telegram from Messrs Mawry and Co., of Richmond, in the following terms :—" Decision against bondholders."

RAILWAY COMPANIES. Caledonian.-The dividend has been announced at the rate of 5 per cent. per annum, 12,000/ being carried forward. At the corre-sponding period last year the dividend was at the rate of 43 per cent, with 18,900/ carried forward.

Eastern and Miellands.—The gross receipts for the half-year were 17,9254. Compared with the corresponding period of 1881, a con-siderable increase has taken place in the receipts. Glasgow and South-Western.—The directors recommend a dividend

at the rate of  $5\frac{1}{2}$  per cent. per annum on the ordinary stock and  $\frac{1}{2}$  on

the deferred. North British.—The following is the revenue account epitomised for the half-years ended January 31, in 1882 and 1883 :—

| Grass revenue  | 1861-2.<br>£<br>1,275,177<br>609,605    |              | 1882-3.<br>£<br>1,324,440<br>621,244     |  |

**Estimated** capital outlay in the current half-year, 221,175*l*, and in subsequent half-years 1,317,804*l*. The increase in traffic was almost entirely visible in merchandise and minerals, while in working expenses there were savings of 5,100*l* in compensation, and of 4,500*l* in parliamentary charges, as compared with the corresponding half-year. It is proposed to issue 628,434*l* ordinary stock at 95 per cent. The new Tay Bridge is expected to be ready in 1885, and the Earth Bridge work have been compared Forth Bridge works have been commenced.

### BANKS.

Agra.—The net profits for the year were 77,423/, making, with the sum brought down, a total of 86,033/. An interim dividend has already been paid at the rate of 5 per cent. per annum, and it is now proposed to declare a further dividend at the rate of 6, making  $5\frac{1}{2}$ 

arready been pain at the later dividend at the rate of 6, making 5½ for the twelve months. The sum of 28,000l is to be added to reserve, raising it to 190,000l, and 11,033l carried forward. Bank of British Columbia. —At the meeting a dividend at the rate of 6 per cent. was declared, and a bonus of 1 per cent. The business continues satisfactory. Commercial Banking of Sydney.—The profits for the half-year were 86,304l, and the balance from last half-year 9,683l, making 95,988l, which the directors appropriate as follows :—To a dividend for the half-year at the rate of 25 per cent. per annum, 75,000l; to reserve for equalisation of dividends, 10,000l; to undivided balance, 10,988l. Natal.—For the year the disposable profit amounted to 19,518l, which was apportioned as follows :—Dividends and bonus, equal to 17½ per cent. 14,670l; pension fund and bonus to staff, 1,000l; amount carried to reserve, 2,000l; carried forward, 1,848l. Wills and Dorset.—It has been resolved to register the company as a limited liability company, and to increase the capital from 600,000l to 50l, no part of such increased capital being capable of being called up, except in the event of, and for the purpose of, the company being wound up.

[Mar. 10, 1883.

COURSE OF EXCHANGE.

### THE ECONOMIST.

### ASSURANCE COMPANIES.

Railway Passenger Assurance.—At the meeting a dividend of 5s per share was declared, making 8s for the year. The total income from all sources was stated to have been 238,651l, against 236,991l in 1881.

Isso. Scottish Metropolitan Fire.—At the meeting the agreement for the transference of the business to the Caledonian Insurance Company was approved of. It was stated that since the recommendation of the directors in favour of the amalgamation had been issued to the shareholders, the losses on last year's business, instead of being 3,000/, would amount to upwards of 4,000?. The Caledonian Company had, however, undertaken to meet the additional claims in consideration of the Metropolitan shareholders foregoing the interest which it had been arranged to pay them on their new shares between the 1st of January and the 1st of June, 1883. Star Life Assurance.—At the thirty-ninth annual meeting, it was reported that 2,498 policies had been issued for the sum of 757,024/, the annual premiums on which amounted to 24,715/; that the claims paid during the year, the assurance fund is now 2,023,167/, which is invested in first-class securities, the average rate of interest being rather over 4½ per cent. Scottish Metropolitan Fire.-At the meeting the agreement for the

rather over 41 per cent.

MISCELLANEOUS COMPANIES. Artisans', Labourers', and General Dwellings.—The net revenue for the past year was 43,156/. Including the balance brought down and deducting the preference dividend, the amount available is 37,452/, denoting the protocol of the interim payment of  $\frac{1}{2}$  per cent, a dividend is proposed of  $\frac{2}{2}$  per cent, making 5 per cent for the year

Aspley Spinning, Limited.—Creditors must send in their claims by by 6th March to Mr C. E. Sykes, of Huddersfield, the liquidator. Bordeaux Tranucays and Omnibus.—At the meeting, a dividend of 8s per share was declared, making, with the interim payment, 6½ per cent. for the year, as against 5 per cent. for 1881. The company are making satisfactory progress. Brush Electric Light and Power of Austra'asia, Limited.—Creditors must tend in their claims to the liquidators by the 10th of April. This notice "has no reference to claims against the Australasian Electric Light, Power, and Storage Company, Limited, to which company the above-named Brush Electric Light and Power Company of Australasia, Limited, has sold its patent rights."

company the above-named Brush Electric Light and Power Company of Australasia, Limited, has sold its patent rights." *Capitari Gas and Water.*—A dividend of 16s per share on the scrip shares is now being paid by the London and Westminster Bank. *Cape Copper.*—The directors have resolved to declare a dividend of **20s** per share, free of income tax. *Credit Foncier of Mauritius.*—For 1882 there was a net profit of 14,780. The directors recommend a dividend of 10s per share for the befores which with a similar amount paid in Sortember directors have

half-year, which, with a similar amount paid in September, gives a total of 10 per cent. for the year, or the same as for 1881. The reserve has increased by 8,379l during the year, and now stands at 77,052l. *East Coast Steamship.*—The directors recommend a dividend of 6 per cent., free of income tax, for the past half-year, making 10 per cent. [189]

per cent., free of meone and the second start for 1882. East Worcestershire Water Works.—The works have been com-pleted and opened for the supply of water over the whole of the company's district covered by the contract. French Date Coffee, Limited.—Mr James Boyes has been appointed Contract the supply of the super su

official liquidator. Harrow District Gas.—A dividend has been declared at the rate of

61 per cent. per annum. Humber Steam Shipping.-The company have declared a dividend

at the rate of 10 per cent. per annum for the past year. International Financial.—The net profits for the year amounted to

*Advertised of the product of the product of the sear amounted to 44,973l, which, with the balance brought forward, made a total of 70,563l.* A dividend of 3s 3d per share, free of income tax, has been declared, which will absorb 39,375*l. Jenkinson and Day, Limited.*—Creditors must send in their claims by the 30th March to Mr J. J. Gait, of 164 Lancaster road, Notting

by the 30th March to Mr J. J. Gait, of 164 Lancaster road, Notting hill, the official liquidator. Land and Mortgage of Egypt.—The directors have declared a divi-dend of 3s per share, free of income tax. Michell's Worsborough Dale Foundry, Limited.—Creditors must send in their claims by 2nd April, to Mr J. Masterman, of King street chambers, Wakefield, the official liquidators. National Telephone.—At their meeting the directors resolved to pay 6 per cent. preference dividend for the six months ending December 31 last, less income tax. Newcastle and Gateshe ul Gas.—At the annual meeting, a dividend

Newcastle and Gateshe id Gas.-At the annual meeting, a dividend of 9 per cent. was agreed to.

of 9 per cent. was agreed to. People's (Co-operative Permanent Building.—The annual report states that the cash receipts, including the balance from last year, and loans from bankers, amounted to 68,973. The sum of 21,000/ has been advanced to members, making a total of 442,616/ since the commencement of the society. The capital, which includes the reserve (2,229/), has now reached 152,359/. After providing for every liability, there remains a realised profit of 1,947/, from which the directors recommend a bonus of 2 per cent. in the usual manner, 300/ to the directors, and 20/ each to the member auditors. Pr ce's Patent Candle.—The net profit for the year was 50,975/, and after discharging the balance remaining at the debit of profit and loss on December 31, 1881, amounting to 29,243/, and providing for the preference dividend, there remains available 19,662/. It is pro-posed to pay a dividend of 10s per share, leaving 992/. It is suggested that the nominal capital shall be reduced by 150,000/, and the nominal value of the ordinary shares from 20/ to 16/. Raikay Investment.—The directors have resolved to pay the following dividends in respect of the current half-year, viz, at the rate of 4 per cent. per annum on the preference stock, and at the rate of 12 per cent. per annum on the deferred stock.

Shefield Wagon.—For the half-year, the profit and loss account showed a balance of 103/ to credit, which was carried forward. The defalcations of the late secretary were 30,302/. The directors have compromised the company's claim against the Sheffield Banking Company, and have received 12,104/, thereby reducing the loss to the company to 18,197/. The Jerusalem.—Dividends at the rate of 6 per cent. per annum

the company to 18,197*l*. The Jerusalem.—Dividends at the rate of 6 per cent. per amnum (less interim dividend paid in August last) on the preference shares, and 4½ per cent. on the "A" shares are now payable. Tranways and Gen ral Works.—At the ordinary general meeting, the chairman explained the circumstances which have led to the present unfavourable condition of the accounts, and expressed a hope that, as the arbitration upon the claim made by Mr Marmont has been settled, and provision has been made for the costs, the statement of accounts to be submitted in August will be more satis-factory. factory

United Horse Nail, Limited .- An interim dividend has been paid

United Horse Nail, Limited.—An interim dividend has been paid at the rate of 6 per cent. per annum. Western and Brozilian Telegraphs.—A meeting is called for the 15th inst., to declare a dividend of 3 per cent. on the reduced capital. Resolutions will be proposed for the conversion of the ordinary shares into preferred and debenture.

### MINING COMPANIES.

Tolima.---The directors have declared a dividend of 5s per share on the "A" capital.

NEW COMPANIES AND CAPITAL. British Land and Mortgage of America, Limited. — Capital 1,000,000/, in 10l shares, half to be first issued. It is intended to do a land and mortgage business in the United States, and operations are to be commenced in Kansas.

are to be commenced in Kansas. Foreign, American, and General Investments Trust, Limited.— Capital, 2,000,000/, in 10l shares; to be divided, when fully paid, into equal moieties of preferred and deferred stock. First issue, 1,000,000/, in 10l shares. It is intended to construct a trust similar to those of the Foreign and Colonial Government Trust and the to those of the Foreign and Colonial Government Trust and the American Investment Trust, but on a somewhat wider basis. The directors will have power, with the sanction of the trustees, to pur-chase securities not coming within the powers of the old companies, and also power to issue debenture capital, bearing interest not higher than 41 per cent. The trustees and directors of the new concern will be identical with those of the two above-named companies.

concern will be identical with those of the two more and companies, Foster's Chemical Fire Engine, Limited.—Applications will be received for 50,000l in ten per cent. preference shares. It is intended to acquire certain patents, and to take ever the works and business at Bolton as a going concern. Ned ares Copper, Limited.—Capital, 60,000l, in 2l shares, 14,500 being now offered. It is proposed to purchase as a going concern some properties in Norway.

being now offered. It is proposed to purchase as a going concern some properties in Norway. *W. Bell and Co., Limited.*—Capital, 80,000/, in 1/ shares, of which 60,000 are preferred shares, and 20,000 deferred shares. The pre-ferred shares are now offered. The company is formed to take over and develop the business of a patent medicine manufacturer, now being carried on at Reading by Mr W. Belcher, under the title of W. Bell and Co. The vendor is to be remunerated partly by deferred shares, partly by cash, and partly by a commission or royalty of 2½ per cent. upon the future net profits.

### The Commercial Times.

### THE CORN TRADE.

### MARK LANE, FRIDAY EVENING.

MARK LANE, FRIDAY EVENING. The weather having continued very favourable for nearly three weeks in succession, the land has in most directions got into fair working order, and whilst on the forward light soils spring sowing has been satisfactorily accomplished, field work is now making good progress on the more backward and heavier land. Altogether the outlook has sensibly improved. The effect upon the trade is seen in the demand that has been experienced for seed wheat, but more especially for spring corn, and the comparatively firm rates obtain-able for these descriptions, whilst the general trade has entirely lost the recent animation, and the markets for the most part have a drooping tendency. The variations in prices are not, however, very wide. In some of the country markets, wheat has receded 6d to 1s, but not in all, and at Mark Lane the depression has not been more, in many cases not as much. The requirements of labour on the land has prevented farmers from thrashing out to the extent that fine weather would have enabled them to have done with advantage as regards the has prevented farmers from thrashing out to the extent that fine weather would have enabled them to have done with advantage as regards the condition of their produce. Foreign importations have rather fallen off, so that the supplies have kept moderate, and thus prevented any great pressure to sell on the spot. The quantity that will be due for arrival in the ensuing week is also moderate, say, 258,000 qrs. The quantity of wheat and flour on passage has not apparently altered, but the American visible supply shows some further addition, although the shipments are larger. There has also been an increased amount of wheat offering for shipment from the various foreign sources of supply, and coming on a very dull market here has tended to weaken quotations. Sales have been difficult to effect, and where business has been done rates are lower. The principal floating sales have included American red winter at 46s, American terms, for February,

ECONOMIST. THE

Mar. 10, 1883.

and 47s 14d for March-April shipments; Calcutta club, 43s to 43s 9d, for April to July shipments, via Cape. Flour has been dull and drooping all the week. Arrivals in London are large, and America continues to ship freely. The general tone of the market for barley has been steady on the spot and for early delivery, but flat for more distant periods, Danubian, next four months shipment, quoted 22s 6d sellers. The quantity on passage is 54,000 quarters, against 194,000 quarters at this time last year. Egyptian beans have arrived in London rather freely, and buyers have the advantage to the extent of 1s per quarter. There has been rather an irregular market for maize. Round corn is firm in all positions, and flat maize rather the reverse. Supplies of the former here and on passage are somewhat scanty, but of the latter the quantity on the way has increased, as also have American shipments, whilst the visible supply in America is largely accumulating. Oats have been very quiet all the week, but with moderate arrivals the market is steady. The cold weather has rather assisted the market for peas, which are firm at late rates. Agricul-tural seeds have experienced a better demand. The following table estimates the home consumption of wheat

The following table estimates the home consumption of wheat since the 1st September, contrasted with 1881-2, 1880-1, and 1879-80:---

| Imports.  | 1882-3.                            | 1881-2.    | 1880-1.                            | 1879-80.                         |

### IRON AND COAL TRADES.

A slight improvement has taken place in the market for pig iron this week, the quotation for warrants at Glasgow, after touching 48s 2d, being yesterday 40s 8d, or 1d higher than on the previous Friday. At Middlesbro' also a rise is recorded, makers now quoting 41s, and merchants 40s 6d for No. 3.

Matters have likewise, *Iron* writes, taken a more favourable turn in Lancashire, where makers of pig-iron have been able to book orders at 46s 6d for forge and foundry qualities. The quotations of imported brands are also under revision. The change for the better imported brands are also under revision. The change for the better generally has affected the Midland markets as yet only so far as to make prices a little firmer. In the hematite iron market the steady demand for all classes of hematite pig. Mixed parcels of Bessemer are quoted at 52s at works. The crude iron industry of the Forest of Dean does not yet show signs of improvement. There is a

healthier look about the finished iron trade, prices, however, being only a shade better. In Cleveland and Durham ship plates are 6l 2s 6d; boiler plates, 7l 2s 6d to 7l 5s; sheets, 7l 15s; angles, 5l 12s 6d; common bars, 5l 15s to 5l 17s 6d. At Newcastle 6l 5s is the quotation for ship plates delivered to the Tyne shipyards. In Lancashire, prices of manufactured iron are steady, 6l 5s being the minimum price at which bars can be obtained. The finished iron trade of the Midlands still remains quiet, but quotations are firmer. The tinplate market is still dull, but there are signs of its revival. The hardware trade presents an increased volume, with rates remaining as at present. Business at Birmingham shows a slight improvement. At Sheffield the improvement of trade is stated to be marked. Steel is steady. The shipbuilding trade continues as active as ever, and inquiries continue numerous. Engineers are mostly well employed. mostly well employed.

### THE COTTON TRADE. LIVERPOOL.-MARCH 8.

LIVERPOOL.—MARCH 8. Cotton is in limited request, and, though the supply is abundant, quotations are only very slightly reduced. In Sea Island there has been a fair business at firm prices. American continues in limited demand, but prices show no material change. Brazilian is neglected, and only a small business has passed at a partial decline of  $\frac{1}{16}$ d to  $\frac{3}{8}$ d per lb in the lower grades. Egyptian has been in improved demand, and the quotations of brown are raised  $\frac{1}{4}$ d per lb. Peruvian is only in moderate request, and quotations of the lower grades of rough are reduced  $\frac{1}{4}$ d per lb. West Indian and African are generally unchanged. In East Indian a fair business has taken place, but prices are irregular, and quotations are partially reduced  $\frac{1}{4}$ d per lb. "Futures."—The market opened weak at a decline of  $\frac{3}{4}$ d for the mear mont.s, and  $\frac{2}{6}$ d for later positions, but, with more disposition to buy, prices improved  $\frac{1}{4}$ d to  $\frac{2}{6}$ d per lb, and the closing quotations show a decline on the week of generally  $\frac{3}{4}$ d per lb. In Surats a moderate business has been done, and prices have advanced  $\frac{1}{3}$ d to  $\frac{1}{7}$ d per lb. The closing values are—Deliveries : American, any port, I.m.c., March, and March-April,  $5\frac{2}{6}$ d; April-May,  $5\frac{2}{6}$ d; May-June,  $5\frac{2}{6}$ d; J. Surat : The latest transactions are—Ship-ments, mg Broach, f., f.g.c. March-April, Suez,  $5\frac{1}{6}$  c, Cape,  $5\frac{1}{6}$ d; g.g.c. Feb.-March and March-April, Suez, 5d. Delivery, Dhollerah, a.g.g.t. March,  $\frac{4}{6}$ d per lb. g.g.  $f_1$  and  $f_2$  and  $f_3$  and  $f_4$  per lb. The sales of the week amount to 51,960 bales, of which 4,320 are

on speculation, and 5,340 declared for export; the forwarded is 22,720 bales, of which 15,790 are American, 200 Brazil, 1,780 Egyptian, and 4,950 bales East Indian, which make the takings of

By print, and 5,000 bales. Saturday, the 24th, and Monday, the 26th inst. (the Bank Holiday), will be closed holidays in the cotton market. DDICES CUDDENT

### ECONOMIST. THE

In speculation there is an increase of 40,780 bales. The imports this week have amounted to 80,730 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 220,000 bales, against 216,000 bales at the corresponding period last year. The actual exports have been 13,338 bales this week.

### LONDON .--- MARCH 8.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :--

The tone of the market has been dull and inactive, and the tendency of prices, both on the spot and for arrival, is in buyers' favour.

### MANCHESTER, MARCH 8.

There has been no material alteration in the condition of our There has been no material alteration in the condition of our market. The demand improves slowly, and seldom has there been so entire an absence of speculative buying. Yarns for export have more freely sold on Continental account; a larger business has also been done for the Levant and India. Home trade yarns continue to show a drooping tendency, especially in medium counts of twist and weft. Manufacturers have again operated very sparingly. The cloth market keeps weak and inactive. Shooties, mulls and jaconnetts meet with fair inquiry, but in these staples makers are well sold, and the difficulty of delivery stands in the way of further business. There has been more done in heavy shirtings of good quality for Bombay. has been more done in heavy shirtings of good quality for Bombay. Printing cloths have moved only in small quantities. India and China shirtings, ordinary makes, long cloths, Mexicans, and T'cloths have all been more or less neglected, and quotations, when fairly tested been here been here or less neglected. tested, have been adverse to sellers. In miscellaneous cloths, including goods for dyeing and finishing, home houses have bought to an average amount.

### THE WOOL TRADE.

Rather a better feeling is observable in the English wool trade generally, and rather more disposition to negotiate, but only a very small advance is acceded to, and little business can be done, as rates in the country are too high. The following details respecting the current series of colonial wool scales have been supplied to an direct form the culling brokers.

sales have been supplied to us direct from the selling brokers :-

The total catalogue, up to the 8th inst. was 167,563 bales, of which about 11,000 bales had been withdrawn. Messrs Edenborough and Co. report :-- New South Wales and

Mesers Edenborough and Co. report:—New South Wales and Queensland.—The former are in many instances more earthy and seedy than last year, but they are well competed for, more particu-larly when sound in staple ; they do not show any quotable reduc-tion on November rates. Some of the Queensland wools are shorter than last year, but others are very well grown, and sound. Fleece-washed, when well got up, sell fully up to last sales' rates. Victoria. —The medium greasies, from 11d to 1s 0jd per lb, are hardly selling as well as in November. This is principally owing to the wools being very tender in staple, and the large quantity of them which is avail-able. We quote them identify competed for at prices about ide below last sales' rates. The extra superior Western clips that have at pre sent been offered have not generally realised such high prices as at this time last year. The bulk of these clips are, however, very tender in staple, which, of course, seriously affects their value. Superior scoureds are very scarce, and may be quoted 1d per 1b dearer than last sales. Adelaide grease is well competed for, and at the opening was fully up to last sales' rates, but during the last few days it has shown a little weakness. New Zealand.—Some good greasies of the new clip have been offered, and met with ready sale, the opening was fully up to last sales' rates, but during the last few days it has shown a little weakness. New Zealand.—Some good greasies of the new clip have been offered, and met with ready sale, at very full rates. Cape and Natal scoured sold at the opening slightly in buyers' favour, and since then have further given way in price to the extent of about ½d per lb. Some American buyers have been going round the warehouses, but their purchases have not been large up to the present, owing to the difficulty of meeting with suit-able wools. We estimate that they have bought about 2,000 bales. Crossbreds, with the exception of the very finest grades, show little improvement from the low range of prices ruling during 1882. Lambs' wool generally is about 1d per lb higher than last sales. The second series of wool sales will commence on Wednesday, 16th May."

May." From Liverpool Messrs Ronald, Sons, and Co. write us : is no change to report in our market, as the transactions of this week have been on a moderate scale only, but at firm prices. Public sales of River Plate sheep skins were held here on Wednesday, but they did not attract many buyers, as the 952 bales brought forward did not attract many buyers, held are conditioned and did did at the second

did not attract many buyers, as the 952 bales brought forward did not consist of the usual average, both as to quality and condition. Only 380 bales were sold, at about last January sale rates." Our Bradford correspondent writes :---"The settlement of the Ameri-can tariff changes has interested Bradford much. It has led in the first place to some operations in wool on American account, and it is ex-pected to bring out orders for goods which have been withheld by merchants while everything was in a state of uncertainty. The re-duction, being mainly of wool, will not in the long run benefit our trade, except it be in worsted coatings, where the reduction is sub-stantial. The tone of the market generally has improved. Wool has advanced a triffe all round in the finer descriptions, from a farthing to a halfpenny a pound, and is better to sell. Yarn business from abroad is increasing, but the offers do not improve as to price, although spinners have more to pay for wool. But there is more desire to buy, in two-folds, single wefts, and hosiery yarns. Botany yarns are no dearer, although wool is hardening. In stuffs more is doing by the home merchants, but the return of winter weather is an unfavourable influence. Generally speaking, business is better, but profits are very small."

## JUTE, HEMP, AND FLAX TRADES.

Importers of jute do not press sales for distant arrival at current low rates; but there is an absence of speculation, in view of the heavy supplies yet to come forward. Shipments from Calcutta to Great Britain and the Continent during the seven months of the season ending February 28 were about 67,000 tons more than to same date last year. The telegram dated 7th inst. quotes a firm market. First marks, 11/ 5s to 11/ 10s per ton. Freight, 50s to 52s 6d per ton. In Dundee trade is fairly active. Manila hemp has sold to a limited extent, and in Liverpool con-sumers have imported supplies direct. The increased receipts at the

# COLONIAL AND FOREIGN PRODUCE MARKET. FOR REPORT OF THIS DAY'S MARKET SHE "POSTOGRAIT." MINCING LANE, FRIDAY.

SUGAR.—There has been a sudden change in the market, the low prices leading to considerable speculative operations in jaggery and other brown Eastern descriptions at 9d to 1s per cwt recovery on last Friday's rates, with more excitement than at any time since the great movement during the autumn of 1870. The reduction and alteration in the scale of the American duties on 1st July has also stimulated the demand, especially for crystallised Demerara, which is 1s per cwt dearer. As the consumption in the United States will probably increase, and in Europe making satisfactory progress, the surplus supply of beet this season will be readily absorbed. Refined has advanced to the same extent as cane sugar. The sales of West India to yesterday were 431 casks 3,000 smaller packages, including crystallised Demerara by auction, at 26s to 29s; low, 25s to 25s 6d, besides many parcels by private contract from second hands. Re-fining kinds 17s to 18s 66 per cwt. Informs and DELIVERIES of Sugar to March 3, with Stocks en hand. There has been a sudden change in the market, the low STIGAR -

Crystallised Demerara... 25/0 29/0 ... 26/0 30/0 ... 26/0 29/6 ... 23/0 27/0 Penang.—About 1,000 tons native in baskets sold, to arrive, at 13s 3d to 13s 6d. 350 tons on the spot at 12s 9d to 13s. 874 mats by auction part sold: grainy, 24s to 25s; brown syrups, 17s to 17s 6d. Also 800 bags grainy, ex last week's sale, at 24s to 24s 6d. China.—About 20,000 bags brown have sold at 12s 6d to 13s 9d. Mania.—200 tons Taal to arrive via Carp at 12s and 4 000 bags

Manila.-200 tons Taal, to arrive, via Cape, at 13s, and 4,000 bags

Manual 200 tons Taal, to arrive, via Cape, at 138, and 4,000 bags extra superior on the spot 188. *Egyptian.* -2,000 bags syrups sold at 163 6d to 178. *Jaggery.*—Many parcels have changed hands on the spot, the latest prices being: cane, 13s to 13s 3d; Palmyra, 12s. About 10,000 tons, to arrive: cane, most recently, at 13s 10½d to 14s; Palmyra, 12s 101d to 13s.

*Refined.*—A general and active demand has prevailed, and prices are 6d to 1s higher for the week. Large sales in French loaves ..t 26s 6d to 27s, March-April, f.o.b. Here cubes quoted 29s to 32s 6d; Titlers, 29s to 29s 6d per cwt. The Clyde market has

been cleared at advancing prices. Beet Sugar is higher on the Continent. Sales have been made for delivery here up to 20s 9d for German, 88 per cent., March and April

shipment. Market firm, and about 1 per cent, March and Apin shipment. Market firm, and about 1 per cent, dearer for the week. RUM is firmer, and there has been a revival of demand. Over 1,000 puncheons West Indian sold at the late low prices : Demerara, 1s  $6\frac{1}{2}d$  to 1s 7d; smaller packages, 1s  $7\frac{1}{2}d$  to 1s 9d per proof gallon.

Quotations of Jamaica have not transpired. Coco.A.—The market has been steady. Grenada supports the late considerable advance, and fine qualities sold at higher rates on Tuesday. 736 bags found buyers as follows: ordinary to fair 70s 6d to 75s; good to fine, 75s 6d to 80s. 1,378 bags Trinidad brought full

Thesday. 730 bags round buyers as follows: ordinary to fair 705 of to 75s; good to fine, 75s 6d to 80s. 1,378 bags Trinidad brought full prices, from 79s 6d to 85s; clayed, 87s 6d to 89s 6d. 29 bags Ceylon, 90s 6d to 91s. 337 bags African partly found buyers at 56s per cwt. for grey. 350 bags Jerenic withdrawn, also 81 bags Carapano. The stock shows a large decrease compared with that of last year. COFFEE.—The public sale on account of the Netherlands Trading Company held on Wednesday went even better than expected, prices ranging from 1½ to 4 cents over valuations. Good ordinary Java 34 to 34½ cents. Owing to the previous heavy advance, the result did not have any further influence here. A good business has been done, including East India and Brazil to arrive. Indan Manila, 44s to 45s. On the spot prices steady. 242 casks 158 barrels 152 bags plantation Ceylon sold as follows: middling dull to colory, 91s 6d to 97s; good middling to fine, 98s to 103s; bold, 101s to 113s, according to quality; low grown, low middling to mixed bold, 84s to 97s. 35 cases 234 bags East India of old import withdrawn. 207 half bales Mocha, part sold, at 109s for good. 126 bags Manila brought 53s to 53s 6d for pale and mixed. 381 bags African sold at 36s to 36s 6d. 55 barrels 316 bags middling, 80s; fine bold colory, 101s 6d; previous crop, 50s to 56s; low middling, 63s to 64s 6d. 4,401 bags other foreign descriptions chiefly sold, including colory Porto Rico at 85s to 91s; a few lots 80s to 85s 6d, Maracaibo, 56s c. Venezuelan, 79s 6d to 81s; a few lots 80s to 85s 6d, Maracaibo, 56s c. Venezuelan, 79s 6d to 81s; a few lots 80s to 85s 6d, Sa to 56s c. Venezuelan, 79s 6d to 81s; a few lots 80s to 85s 6d, Maracaibo, 56s c. Venezuelan, 79s 6d to 81s; a few lots 80s to 85s 6d; Maracaibo, 56s c. Venezuelan, 79s 6d to 81s; a few lots 80s to 85s 6d; Maracaibo, 56s c. Venezuelan, 79s 6d to 81s; a few lots 80s to 85s 6d; Maracaibo, 56s c. Venezuelan, 79s 6d to 81s; a few lots 80s to 85s 6d; Maracaibo, 56s c. Venezuelan, 79s 6d to 81s; a few l 64s 6d. 4,401 bags other foreign descriptions chiefly sold, including colory Porto Rico at 88s to 91s; a few lots 80s to 85s 6d; Maracaibo, 56s; Venezuelan, 79s 6d to 81s; Savanilla, 72s; mixed Guatimala, 46s to 48s 6d; low middling to middling, 65s 6d to 71s; bold New Granada, 94s 6d; palish, 74s 6d; Honduras, 59s to 64s; fine ordi-nary, 52s 6d to 56s; washed Rio, 65s to 65s 6d. The total stock in Europe showed a further decrease in February, but is still very large in contrast with former verse. in contrast with former years.

TEA.—With the large stock of China still in the hands of importers, the market does not participate in the general improvement upon other produce. At the public sales the lower grades of congou have been further slightly depressed. With these exceptions no change is reported, and the business by private contract has been of moderate extent. The supply at auction during the week amounted to 17,400 packages. Green tea, of desirable quality, realised full rates. Indian firm, and 16,000 packages at public sale found ready buyers. Ceylon sold at  $10\frac{1}{2}$  do 1s  $6\frac{1}{2}$  d per 1b. The statistical position of tee is favour-able, deliveries since the 1st June, 1882, to the end of December being 113 millions more than in 1881-2, Indian showing over  $6\frac{1}{2}$  million TEA.-With the large stock of China still in the hands of importers, able, deriveries since the 1st June, 1852, to the end of December being 113 millions more than in 1881-2, Indian showing over  $6\frac{1}{2}$  million pounds increase. Estimated stock in the United Kingdom, 113,750,000 lbs, against 112,000,000 lbs last year, and 109,000,000 lbs in 1880 at same date.

Saco meets with rather more inquiry, at previous low rates. 2,689 bags by auction chiefly found buyers: fair small, 14s to 14s 6d; low and dingy, 13s to 13s 9d; medium, 15s to 15s 6d; bold, 15s to 15s 6d per cwt

per cwt. SAGO FLOUR.—606 bags Borneo were taken in at 13s 6d per cwt. TAPLOCA has been firm, but less in demand. 2,425 bags Singapore flake partly sold at 1½d to 1§d per lb. 787 bags pearl partly sold at 14s 9d per cwt for seed.

148 9d per cwt for seed. BLACK PEPPER is again rather higher, with further speculative business for arrival, viz., 400 to 500 tons, chiefly Singapore, latterly at 6½d to 6½d; Penang at 5½d to 5½d. At auction, 367 bags Penang sold at 5½d to 5½d. Of 975 bags Siam, a few lots realised 6d; sifted, 6¼d. 307 bags Tellicherry were bought in above the value. 408 bags Malabar part sold at 6½d. 378 bags dusty Batavia kinds brought 53d. 110 bars Singapore out at 64d to 64d were here.

bags Malabar part sold at 6<sub>3</sub>/d. 378 bags dusty Batavia kinds brought 5<sub>3</sub>/d. 119 bags Singapore out at 6<sub>3</sub>/d to 6<sub>4</sub>/d per lb.
WHITE PEPPER has been firm, but less in demand, at current high rates. 85 bags brownish Penang by auction realised 8<sub>3</sub>/d. 87 bags Singapore withdrawn at 10d per lb.
NUTMEGS.—72 cases Penang brought 1d per lb advance : 107's to 108's, 2s 1d to 2s 2d; 83's and 82's, 2s 5d; a few, 2s 4d; 68's and 67's, 3s 1d and 3s 2d; 150's, 1s 7d to 1s 8d; mouldy, in proportion. 7 cases bined for 108's, 2s per lb.

limed Java, 111's, 2s per lb. CLOVES.—Zanzibarhave been speculative, and the latest prices were  $\frac{1}{2}$ d per lb higher. 722 bales chiefly sold at 7 $\frac{1}{2}$ d to 7 $\frac{5}{2}$ d for fair, closing at 7 $\frac{3}{4}$ d; a few lots mixed, 7 $\frac{1}{4}$ d; yesterday, 7 $\frac{7}{6}$ d per lb paid. 16 cases 81 bags Amboyna out, excepting a few cases, which sold at 10d for common. 15 cases Pena stems sold at 14d per lb. 15 cases Penang withdrawn. 252 bales Zanzibar clove

Stock ..... Price Zanzibar CASSIA LIGNEA .- 5,000 to 6,000 boxes sold to arrive at 35s 6d to 36s, being higher.

GINGER.-Of 435 cases 132 bags Cochin, a portion sold : fair rough new crop, 52s 6d to 53s.

new crop, 528 6d to 53s. Previous season's import, part scraped, medium, 568 6d to 57s; small and medium, mixed, 54s to 55s; small, 50s to 53s per cwt, being rather lower. PIMENTO.—Owing to heavy landings, the stock has increased to 34,300 bags. The market is quiet, and 2,085 bags by auction were about one-fourth part sold at 3½d to 3⅔d, being a decline of ½d per lb.

SALTPETRE.-During the week 200 tons Bengal sold for arrivals :

SALTPETRE.—During the week 200 tons Bengal sold for arrivals : steamer, 19s 3d ; distant, via Cape, 19s  $4\frac{1}{2}d$ . On the spot 200 tons at 18s 9d to 19s 3d per ext. according so quality. RICE.—Speculative demand having partly subsided, the market has become quiet, but prices are not lower. Two steamer cargoes Necrancie Arracan of 1,800 tons to 2,000 tons each sold at 7s 6d for the Continent; also one Rangoon at 7s  $10\frac{1}{2}d$ . Two steamer cargoes Rangoon at 7s 9d, March, open charter ; also one Bassein at 7s 6d per cwt, open charter. Transactions on the spot are limited to 4,000 bags Bassein at 7s per cwt. Cleaned rice has sold to a fair extent at firm prices

per cwt, open charter. Transactions on the spot are limited to 4,000 bags Bassein at 7s per cwt. Cleaned rice has sold to a fair extent at firm prices. LINSEED.—Prices of Calcutta are steady, but the market now rather quiet. On the spot, 45s to 45s 3d; for shipment, viâ Cape, 45s to 45s 3d. Bombay, April-June, per steamer, at 44s 9d to this port, and 45s to Hull. Azov seed quoted 43s 6d to 44s per quarter to the U.K. Afloat from Calcutta to London 152,000 quarters, against 117,700 last year. Bombay, 49,500 quarters, against 14,300 quarters. OILS.—Quotations of cocoa-nut remain firm, as last week, and there has not been any feature in the market to report. Ceylon, to arrive, 34/ 10s to 35l. Patna higher. Sagos, 40l. Seed oils have been firmer. A fair demand for English brown rape. On the spot, 38l to 39l; to April the same; middle months, 3dl 10s to 37l; last four, 33/ 15s. Linseed rather quiet. This morning's quotations are : on the spot, 22l 12s 6d to 22l 15s (barrels in proportion); April, 23l 5s; May to August, 24l 5s. Week's shipment from Hull, 308 tons. In fish oils the only change has been a small sale of crude sperm at 711 per tun. Common oils firm. Olive quiet, at the quotations. SPIRITS TURPENTINE has advanced to 46s 6d; to April, 40s 3d to 40s 6d. Last four months quoted 34s per cwt. Stock, 16,000 barrels.

barrels.

PETROLEUM OIL is lower in all positions, and the market has been dull throughout the week, partly owing to sales with short prompt. On the spot, 6d to 6<sup>1</sup>/<sub>4</sub>d; April, 6<sup>1</sup>/<sub>5</sub>d; last four months, 6<sup>1</sup>/<sub>5</sub>d per gallon, sellers. Prices lower in America. Deliveries since 1st January, 129,600 barrels.

-There have not been any transactions the past week. WHALEBONE. Holders are asking an advance, but nothing over 1,000/ per ton has been paid for either Davis' Straits or Arctic.

### ECONOMIST. THE

### Concluded from page 98.

TOBACCO .- Until within the last two days there has been more inquiry for American growths, and large sales were made; but this demand has now, in some measure, subsided, and little has been done. The stocks in first hands are now very small. In substitutes there has been rather more doing. CoArs.—The cold weather caused an active demand for house coals, and the market was readily cleared at 1s per ton advance.

POSTSCRIPT. FRIDAY EVENING. POSISCRIPT. FRIDAY EVENING. SUGAR.—The market continues firm, but is quiet. 1,134 bags Mauritius by action sold at 15s to 21s 6d for brown to yellow syrups. 4,093 bags washed Brazils withdrawn at 15s to 17s 6d. Privately, further business in brown native Penang at 13s.

Intracr ousiness in brown native renang at 13s. MOLASSES.—312 casks Mauritius by auction out at 8s per cwt. COFFEE.—321 casks 29 barrels 362 bags plantation Ceylon sold at high prices for fine marks up to 112s 6d for bold colory. 257 bags East India chiefly bought in ; also 796 half bales Mocha, a portion selling at 103s 6d to 104s for mixed short berry. 37 barrels 249 bags Jamaica went at about previous quotations, at which part of 3,017 bags foreign also sold, including Honduras at 69s 6d to 72s per cwt, according to curatity.

according to quantity. RICE.—No further sales reported. CLOVES.—A large business done in Zanzibar at  $7_8^2$ d to  $8_8^1$ d per lb since the sales. CASSIA LIGNEA.—Further sales reported. On the spot, 35s; to

arrive. 35s 6d.

arrive, 35s 6d. SALTPETRE.—60 tons Bengal near sold at 19s 3d per cwt. METALS.—Tin, 944 12s 6d to 944 15s, cash. Chili copper easier. Scotch pig iron, 47s 74d to 48s per ton cash. ### PROSPECTUS.

**PROSPE** The success of the principle of averaging investments, first introduced by The Foreign and Colonial Government Trust Company and The American Invest-ment Trust Company in the original form of "Trusts," and the high repute in which the Stocks of the Companies into which they were afterwards recon-structed are now held, as evidenced by their market price, ranging at a high premium, has led to the establishment of this Company upon the ame principle, though upon a somewhat wider basis. The Capital of the original Companies is divided into Preferred and De'erred Stocks, the former receiving a Preferential Dividend of £5 per cent. per annum, thus forming a security of a first-class character, suitable for trustees or for such investors as are content with a fixed and certain rate of interest, the latter taking the balance of revenue, and heing therefore necessarily of a more fluctuating character. Since the formation of these Companies the Preferred Stockholders have regularly received five per cent, interest, whilst the Dividend on the De erred Stock of The Foreign and Colonial Governant Trust Company has gradually increased from 51 in 1880 to 7 per cent, whilst the Dividend ment Trust Company has risen from 5 to 61 per cont, in the same neriod. The market price of the Preferred Stock or The Foreign and Colonia Govern-ment Trust Company stands at 116, and the Deferred stock at 115; and the Preferred Stock of The American Investment Trust Company stands at 116, and the Deferred Stock at 112.

the Deferred Stock at 112. The only in vertuances suthorised by the constitution of the Foreign and Governments or States, or other ruling bodies, and the investments of The American Investment Trust Company are limited to those of the United States of America or Canada, restrictions which have often been found inconvenient by preventing the Company are limited to those of the United States must be aware that the choice would be much larger, and the investments could be much wider spread if these restrictions did not exist, whilst equal, if no restriction of its shareholders to take up money on debeatures, which, it is evident, would permit of a large extension of business. No promotion mou new Company will the ment. Dividends will be ment. Dividends will be ment. Dividends will be ment. A copy of the Me Prospectus, and the Prospectus, and the Prospectus, and the Solicitors, Bankers, 6th March, 1883.

The distinguishing features of the new Comany, which will be based upon the same principles and combine all the powers of the two old Companies, will be lst. Power to the directory, with the sanction of the trustees, to purchase shares and securities not coming within the limited powers of the old Companies; and 2ndly, Power to issue debentures or debenture stock bearing interest not higher than 13 per cent. to the extent of one-third of the share capital for the time being paid up, but no faither, to from a first charge both as regards capital and revenue upon all the assets of the Company. In all other respects the principle and basis of the new Company will be the same as that of the two existing Companies—the trustees and directors will be identical—it will be worked in the same office and by the same staff, an arrangement, which will effect an economy in the expenses of the the two panies. With the experience which the Trustees and Directors have new aconired.

307

rangement which will effect an economy in the expenses of the effect and panies. With the experience which the Trustces and Directors have now acquired, they have every reason to believe that the new Company will achieve results equal to, if not greater than, those of the old Companies, and that both its Pre-frred and Deferred Stock will rank as high in public estimation as the Stocks of those Companies. A complete list of the Shares and Securities for the time being held by the Company will be forwarded to each Shareholder and Debenture-holder with the Atual Report. No promotion money has been or will be paid, and the only expenses of the new Company will be those actually incurred in its formation and establish-ment.

ment. Dividends will be payable Half-year'y on March 15 and September 15; the first interim payment on account of divide id being payable on September 15

It is a substantial population of the deposit will be returned in full. If no allotment is made, the deposit will be returned in full. A copy of the Memorandum of As-ociation is printed on the back of this Prospectus, and the Memorandum and Articles of Association can be seen and inspected at the Offices of the Company, or of the Solicitors. Prospectuses and forms of application can be obtained from the Secretary, Solicitors, Bankers, and Brokers.
