

The NBI Cybercrime Division is a vital arm of the National Bureau of Investigation (NBI) in the Philippines, tasked with investigating and prosecuting cybercrime. Under the jurisdiction of the Republic Act 10867 or the NBI Reorganization and Modernization Law, the Division has made significant achievements in the local and international scene in the fight against cybercrime.

One of the significant achievements of the NBI Cybercrime Division is its success in investigating and prosecuting high-profile cybercrime cases. These cases include the arrest of notorious hackers who have targeted government websites, financial institutions, and private companies. They have also successfully prosecuted individuals involved in cybersex trafficking, online scams, and cyberbullying.

The NBI Cybercrime Division has also been active in raising awareness on cybercrime prevention and educating the public on how to protect themselves from cybercriminals. They conduct regular training and seminars for various sectors of the society such as students, parents, business owners, and senior citizens. These efforts have helped to reduce the number of cybercrime victims in the Philippines.

In the international scene, the NBI Cybercrime Division has established partnerships with other law enforcement agencies and international organizations to combat cybercrime on a global scale. They have participated in various international operations and have also assisted other countries in investigating cybercrime cases. These collaborations have resulted in the successful arrest and prosecution of international cybercriminals.

The NBI Cybercrime Division is also known for their use of cutting-edge technology and advanced forensic techniques to investigate and prosecute cybercrime cases. They

have a team of highly trained and skilled personnel, who are continuously updated with the latest technologies and techniques cybercriminals use.

Under the leadership of Supervising Agent Christopher Paz, the NBI Cybercrime Division has made significant strides in the fight against cybercrime in the Philippines. The Division's achievements in the local and international scene demonstrate its commitment to protecting the Philippines from cybercrime and ensuring that justice is served for the victims of these crimes.

In summary, the NBI Cybercrime Division has made significant achievements in the local and international scene in the fight against cybercrime. They have successfully investigated and prosecuted high-profile cybercrime cases, raised awareness on cybercrime prevention, established partnerships with other law enforcement agencies and international organizations, and used cutting-edge technology and advanced forensic techniques in their investigations. The Division's achievements demonstrate its commitment to protecting the Philippines from cybercrime and ensuring that justice is served for the victims of these crimes.
