

# Millions of people turn to Wikipedia to learn about the world. But they're only getting half of the story.

**Ninety percent of Wikipedia editors are men. That means Wikipedia articles on women are more likely to be missing, or shorter, than articles on men.**

Engaged classrooms have created or improved articles on topics like abortion, birth control, sex work, gender inequality, maternity policies, feminism, pregnancy risks in developing countries, the refugee status of women, and women's roles in the Arab Spring.

**Wikipedia has more articles on women's issues thanks to instructors like you.**

These student-created articles have been viewed more than 350,000 times. That's *350,000 people* who now have more information about women's issues thanks to Wikipedia assignments.

Students can have an impact on the world as they learn. Your students will navigate ideas of knowledge production, representation, critical thinking, evaluating sources, and more — all while making Wikipedia a better source of knowledge for the millions who turn to it every day.

## Together, we can close the gender gap.

Find out more about integrating a Wikipedia assignment into your course by visiting us at [wikiedu.org](http://wikiedu.org) or emailing us at [contact@wikiedu.org](mailto:contact@wikiedu.org). We provide training, guidance, and tools for instructors and students that help them make a difference in the world beyond the classroom.
