Black Leaf 40

Nicotine Sulphate 40 per cent Nicotine

This is the insecticide that is so highly recommended by Experiment Stations. It destroys Aphid (plant lice), Thrips, Leaf-hoppers on all tree, bush and vine, fruits, vegetables, field crops, flowers and shrubs. Also Apple Red Bug, Pear Psylla and similar soft-bodied sucking insects—all without injury to foliage.

May be combined with other sprays, Highly concentrated. Soluble in water—easy to mix—does not clog nozzles.

You cannot go wrong by ordering Black Leaf, 40 for sucking insects.

THE SON

O mothers, will you longer give your sons
To feed the awful hunger of the guns?
What is the worth of all these battle drums
If from the field the loved one never comes?
What all these loud hosannas to the brave
If all your share is some forgotten grave?
—"I Did Not Raise My Boy to be a Soldier."

Dr. James D. Hughes, for over thirty years superintendent of education of the schools of Toronto, Canada, answered these lines. Greater significance is given to the answer by the fact that Dr. Hughes's own son was killed in battle and lies "somewhere in France." His answer follows:

God gave my son in trust to me;
Christ died for him, and he should be
A man for Christ. He is his own,
And God's and man's; not mine alone.
He was not mine to "give." He gave
Himself that he might help to save
All that a Christian should revere,
All that enlightened men hold dear.

"To feed the guns!" O torpid soul!
Awake, and see life as a whole.
When freedom, honor, justice, right,
Were threatened by the despot's might,
With heart aflame and soul alight,
He bravely went for God to fight
Against base savages, whose pride
The laws of God and man defied;
Who slew the mother and her child,
Who maidens pure and sweet defiled,
He did not go "to feed the guns."
He went to save from ruthless Huns
His home and country, and to be
A guardian of democracy.

"What if he does not come?" you say;
Ah, well! My sky would be more gray,
But through the clouds the sun would shine,
And vital memories be mine.
God's test of manhood is, I know,
Not "Will he come?" but "Did he go?"
My son well knew that he might die,
And yet he went, with purpose high,
To fight for peace, and overthrow
The plans of Christ's relentless foe.

He dreaded not the battle-field;
He went to make fierce vandals yield.
If he comes not again to me
I shall be sad; but not that he
Went like a man—a hero true—
His part unselfishly to do,
My heart will feel exultant pride
That for humanity he died:

"Forgotten grave?" [this selfish plea
Awakes no deep response in me
For, though his grave I may not see;
My boy will ne'er forgotten be.
My real son can never die;
'Tis but his body that may lie
In foreign land, and I shall keep
Remembrance fond, forever, deep
Within my heart of my true son
Because of triumphs that he won.
It matters not where anyone
May lie and sleep when work is done.

It matters not where some men live;
If my dear son his life must give,
Hosannas I will sing for him,
E'en though my eyes with tears be dim.
And when the war is over, when
His gallant comrades come again,
I'll cheer them as they're marching by,
Rejoicing that they did not die.
And when his vacant place I see
My heart will bound with joy that he
Was mine so long—my fair young son—
And cheer for him whose work is done.

Local and Personal

House for rent in center of town.
C. H. WHITMAN.

E. E. Sower for Men's, Boy's and Children's Shoes. Up-to-date Shoe Repairing.

Mrs. N. Burning and daughter have returned to San Francisco having spent several weeks with her parents, Mr. and Mrs. Frank Allen.

Mrs. W. T. Alexander has received the sad news of the death of her only sister, Mrs. Lucinda Bennetts, at Mt. Hope, Wisconsin.

Mrs. and Mrs. W. D. Sturtevant are spending the week-end with Mr. and Mrs. G. W. Snyder at their new bungalow in Alhambra St., Santa Cruz.

Miss Olva Curry, head of the domestic science department of the Hollister grammar school resigned her position and has returned to Campbell. The following is quoted from the Hollister notes, "While here but a short time and her work more or less broken into because of the influenza, Miss Curry made a most favorable impression and her departure is regretted."

Miss Katherine Cooper has returned to Berkeley to resume her work at the University.

Clifford Berry, mention of whose discharge was made in last issue arrived home Saturday evening. He was met at San Francisco by Mrs. Berry, who returned with him.

The entire community rejoices with the Coupland family that their prolonged anxiety was relieved Saturday by the receipt of a letter from Frank, first news from him since October. It was written in December and told of severe fighting on three fronts in which his company had participated, including Chateau Thierry and the Argonne sector.

Mr. E. E. Phelps is with his daughter, Mrs. Hall in Pulmas, County. Mrs. Hall, and family have been ill with the influenza but are reported as recovering nicely.

Mr. Chas. Stallman and family, who some time ago moved to 933 Park avenue, San Jose, have returned to Campbell, having leased the Beardsley home on Johnson avenue, where they will make their home. Mr. Stallman left Saturday for Loomis, Placer Co., where he will for a time assist his brother, L. M. Stallman, on his ranch and chicken farm.

A New Bargain For This Week

Shad, regular price 20c, Friday and Saturday special, 15c. This canned fish may be served in many ways; creamed, for instance, or worked into a chowder. It's excellent. Also, it is exceedingly cheap—15 ounces, nearly a pound of solid fish-meat, for 15c. This low price is just to introduce Canned Shad to more consumers.

For An Invigorating Bath and Other Household Uses---

Parson's Household Ammonia. This is a real "find." Clear ammonia, as you are doubtless aware, irritates the skin and often discolors white fabrics. C. C. PARSON'S AMMONIA is high-test ammonia, combined with substances which give a cloudy appearance and prevent all injurious action. Directions on each bottle treat of the following subjects: To wash clothes snowy white without rubbing; to wash flannels and blankets without shrinking; in the bath; for the shampoo; mosquito or other insect bites; and for the sick room. Having once tried Parson's Household Ammonia you will find it invaluable and dispensable. Being triple strength, it is as cheap as the cheapest. Priced at 25c.

COLORED FLANNELETTES reduced to 30c; white, to 25c.

We are a little overstocked with flannelette, hence the price reduction. Our colored grade is medium heavy, consisting of grays and of stripes in blues and pinks. The white is of a lighter weight, just the thing for spring.

GINGHAM reduced to 35c.

Colors, solid pinks, solid blues, and pretty plaids. This quality of gingham is worth 40c. But prices will come down in a few months. We would rather make the price concession now than carry the goods over and make the same sacrifice later. You are the gainer.

Fraternal Aid Union

Fraternal Aid Union Annual Meeting Saturday 7:30 P. M. will be held at the home of Mr. and Mrs. J. H. Campbell. A full attendance is requested. S. F. Brandenberg, Secretary.

A BattleShip's Housekeeping

On one of the big battle ships, 1,400 loaves of bread are baked every day. The laundry washes 4,000 garments belonging to enlisted men. There is a separate laundry for the officers.

The Montenegro Congress is called the "Skeepsitina". Even in a free country like ours nobody has ever had the nerve to call our congress any thing like that.—Houston Post.

Practical Patriotism

History is filled with examples of noble sacrifices made for human liberty and human progress. Our own halls of fame bear testimony to the existence of that spirit of patriotism and self-sacrifice which has manifested itself in times of great public need. But patriotism—love of country—like religion, is for every-day use and is not reserved for great crises only. Community development is only another term for patriotism. If the rural communities of the United States are preserved, built up and made attractive, the Nation is safe.

METHODS OUTLINED TO MAKE CORDWOOD

Common Plan Is to Cut Trees Into Four-Foot Lengths.

Sawing Is Usually Done by Machines, Driven by Gasoline or Electricity —Small Pieces Can Be Packed Closely.

(Prepared by the United States Department of Agriculture.)

The most common method of making cordwood is to cut the trees into four-foot lengths with the ax and split the larger pieces. The pieces are then piled in a standard cord, which is eight feet long, four feet high, and four feet wide. The contents are 128 cubic feet, of which about 70 per cent is wood and 30 per cent air. Wood cut four feet long can be sold to brick-yards, lime kilns, metal working plants, and other industries, but is too large for household use. This

Wood Piled Ready for Splitting.

method is used chiefly where the tree growth is comparatively small, as in second growth, because such wood splits easily.

Another method, and one better adapted for old growth hard woods, which are difficult to split, is to saw the tree into logs of convenient lengths, say from 10 to 15 feet. These are "snaked" out to the edge of the woodland and there sawed and split into lengths proper for the stove or furnace. The sawing is usually done by machine, driven either by gasoline or by electricity. The wood is piled four feet high and eight feet long, such a pile being called a "stove wood" or "running" cord or "run." When the wood is sawed into 16-inch lengths, as is customary with stove material, three runs are theoretically equivalent to one cord. Actually they contain somewhat more wood, since small pieces can be packed more closely than larger ones.

FARMER NEEDS GOOD ROADS

Motor Has Extended His Sphere of Operation Until 100 Miles Doesn't Worry Him.

There is a reason for American tardiness in road building. We need not be utterly downcast when we hear our highways unfavorably compared with the fine, smooth roads of Europe. We must remember that European highways were hundreds of years in the making and in periods when roads were the sole means of transportation, both civil and military. There were no railroads, no electric lines, no wire communication. Road building was the essence of commercial life and communication.

America started almost with the railroad and the steamboat. Comparatively a few years later we had the telegraph. Our roads were neglected because they were only local in character. Our railroads and telegraph enabled us to leap the centuries. But now we are confronted by a new need. It is the need for better local transportation, says Chicago Tribune. Where formerly the farmer was content with a few miles of dirt roads for his local traffic, he now requires hundreds of miles, for his area has expanded with the advent of gasoline.

A few years back there was the protest that good roads were merely the argument of the automobilist, a species restricted chiefly to metropolitan districts. A part of that argument still obtains—that good roads is the demand of the automobilist; but the automobilist is the farmer. The motor has extended his sphere of operation until 100 miles is of no more concern to him than was ten before.

More Rapid

"In some respects you are greater than Napoleon," remarked the faithful attendant.

"But," protested the deposed ruler, "I'm down and out."

"Yes. Your finish is very much like Napoleon's, and it took you a very much shorter time to reach it."

An Eye to the Remedy

"Did you have influenza?" "No," said Farmer Cornossel. "Seems like I'm to be the last to have it, if I have it at all. An' all the whisky in the neighborhood is about used up already."

WHERE THE NAVY DEPARTMENT IS HOUSED NOW

The navy department has almost completely abandoned the old state, war and navy building on Pennsylvania avenue and has moved into the big, barnlike structure in Potomac park. This building, and its companion building for the army, seen in the distance, constitute one of the largest office buildings in the world. Each of them will accommodate 9,000 people.

AMERICAN HERO, DESPITE LOSS OF FEET, QUALIFIES AS AN AIRMAN

Atlanta Man Fought With Dublin Fusileers Until Injured—Later He Was Made a Flight Commander in the British Air Service and Was Going Big Until He Was Captured by the Huns.

With American Army in France.—Loss of one foot and part of the other did not end the fighting career of Owen Cobb Holleran of Atlanta, Ga. A man with artificial feet is unfit for infantry duty, so Owen was honorably discharged from that branch of the service. Being a soldier of fortune Holleran refused "to be dumped on the army scrap heap," as he expressed it.

In spite of his physical handicap he wormed his way into the British air service, won a pilot's license, operating a type of plane that did not require foot manipulation, became a lieutenant, captain and flight commander. Some climb for a fellow with wooden feet, but not surprising if you knew Holleran. He had all sorts of thrills and adventures, and then one day—but I am getting ahead of my story.

Better let Capt. E. G. Lowry tell it as he told it to me on a rainy night while I was with the British army. He was attached to the American embassy in London before entering the United States army. It was while at the London embassy that he first had the case of Owen Cobb Holleran called to his attention. Captain Lowry's home also is in Atlanta.

Stranger Than Fiction.

"There is material for a book in Holleran's experience," said Captain Lowry. "Stranger than fiction in spots. His papers came to me at the embassy and he has kept up a correspondence. There is a lot in the chap. He is as clever and brave as they make them. He was employed as a clerk in the office of the Southern Bell Telephone company in Atlanta. Like many other young Americans he wanted to see the great war. It got into his blood long before our country was involved. In 1915 he started out from Atlanta with a friend named Gray. They had just \$100 between them for the big adventure. They went to New York and tried to enlist in the British army, but the consul said he couldn't enroll Americans.

"From a crossing policeman they learned that a cattle boat was to sail next day. They decided to work their passage. They applied and got the job. Reaching London, they were accepted at a recruiting station in Scotland Yard. The recruiting sergeant wanted to know what branch of the service they preferred. Holleran replied: 'No choice. Just as soon serve in one branch as the other. My only request is that you send us to a warm climate. I came from the South and I like it hot.'

"You can get it hot enough at any part of the front," replied the sergeant. "I see your point, bud, and we'll see what can be done. With a name like yours I think an Irish outfit is the place for you." Holleran was assigned to the Dublin Fusileers. His friend Gray went to the same regiment. In a few months Holleran's regiment was sent to Gallipoli. He served through that campaign and saw hard fighting. The regiment went with other British units to Egypt to be refitted after the Gallipoli scrap.

Feet Badly Frozen.

"Next Holleran went with the Dublin Fusileers into Serbia with the first allied expedition. In the mountains many of the soldiers suffered from frozen feet and hands. Holleran's feet were badly frozen, and he told me with a grin that he couldn't help seeing the funny side of it after having asked to be sent to a hot place.

"Fate began to extend a helping hand to Holleran away out there. Attached to the British field hospital in Serbia were two American surgeons, one from Georgia and the other from South Carolina. Learning that Holleran hailed from Atlanta, they took special interest in him. They did everything possible to save his feet, but later, to avoid more serious complications and possibly death, they amputated part of each foot.

"Holleran returned to England,

blightly. He was at Cliveden hospital, maintained by Mrs. Astor. He was fitted out with artificial feet there. When it came time to think about sending Holleran back to the states the case was referred to me. But Owen Cobb Holleran did not intend to go home. He said anybody who thought his fighting days were over just because he had game feet had another guess.

"He said he had read about a new type of airplane while at the hospital. It was operated entirely by hand levers, which fact gave him an inspiration. He said he had given the matter much thought on his cot and while sunning himself in a wheel chair. He had finally resolved to become an aviator and he felt confident he could make good.

"The next thing I heard about Holleran he was a full-fledged flyer in the British air force. He made good from the start. One day a very large and official-looking envelope came to me. It contained the honorable discharge of Owen Cobb Holleran from the Dublin Fusileers. It had been sent by the colonel of the regiment, who wrote very flatteringly about the young American. I hadn't seen or heard from Holleran for months. I finally learned the location of his squadron and forwarded the army certificate.

Physical Defect Barred Him.

"A few days later I received a cheerful letter thanking me and inviting me to dine with him at my earliest convenience at the squadron mess. You could have knocked me over with a feather when, at the end of the letter I read that Owen Cobb Holleran was now a captain and flight com-

HERO OF ZEEBRUGGE

Captain Carpenter of H. M. S. Vendictive arrived in New York recently. He is the captain of the proudest if not the most prepossessing ship in the British navy. It was the Vendictive that took the leading part in the most thrilling assault of the war, the object of which was to bottle up the German submarine and destroyer posts in Zeebrugge. Observations made after the raid proved how in Captain Carpenter's words, they gave the dragon's tail "a damn good twist." After the successful raid the Vendictive returned to port, her funnels riddled with bullets, her bridge blown away and battered and scarred in a dozen places.

mander. He mentioned more than once that he regretted his inability to serve his own country when we entered the war, but his physical defect barred him. And he wanted to keep right on fighting the Boche, so he remained in the British service.

"I was very eager to see him and to congratulate him on his success, but had to defer the visit owing to the activities of the British army. It so happened that I selected the day following the most dramatic day in Holleran's career, but I was too late.

"Motoring to the squadron I found English and Canadian and American aviators in a spirited game of baseball. I asked for Captain Holleran. A fellow shouted to a lieutenant who was playing second base. The lieutenant came up panting. He said: 'Captain Holleran is gone.' 'Gone?' I reiterated. 'What do you mean? He isn't dead, is he?'

"No. Taken prisoner by the Boche yesterday. I roomed and chummed with him. Gang miss him terribly. Happened like this: We went on a daylight bombing raid. Holleran led the flight. Before we started he remarked that he had a sort of pre-emptive something was going to happen to him. Our bombing trip was a success. We had orders to fly low on the return and machine-gun certain positions. Ran into heavy enemy fire. Holleran's machine was hit. He went down inside the enemy lines.

"We could see him waving to us. When we saw Boches surround him with leveled guns and saw Hol's arms go up."

"Can you beat it for a melodramatic last scene?" asked Captain Lowry. "Holleran was captured on Sunday, September 15. A game kid. Pity they got him."

CASTOR OIL FROM ORIENT

Thousands of Gallons Are Coming Through the Port of Seattle.

Seattle, Wash.—Thousands of gallons of castor oil are coming through this port from the Orient, and it has been largely due to this importation that America's airplane performance in the war has been so successful. Castor oil has proved to be the best lubricant for airplane motors, but its production in this country was limited.

The United States government encouraged the planting of castor beans, but the crop was a failure. In the Orient crops have been exceedingly bountiful. It is believed the stream of oil flowing into this country soon will be increased owing to the use of airplanes on mail routes.

JUDGE FREES MAN WITH FLU

Court Joins in Rush for Doors When Prisoner's Condition is Disccovered.

Pittsburgh, Pa.—Walter Sanowski went into the criminal court recently as a prisoner and came out scot free and without the regular process of law.

Sanowski was sitting in the prisoner's dock when attention was called to his physical condition. A doctor was called.

"What's his ailment?" asked the judge.

"Influenza," replied the medical man.

Immediately there was a rush for the doors, in which the court joined. His case was dismissed and Sanowski was taken to a hospital.

CAPTURED HUN BAND PLAYS OUR ANTHEM

Pittsburgh, Pa.—In France recently a German regimental band of 60 pieces, whose members had been taken prisoner, played "The Star-Spangled Banner," according to a letter from Corporal Ewan W. Allan of the Three Hundred and Ninetieth Infantry, to his dad. The band was taken during a surprise attack which was made without a barrage preliminary. The German musicians played the air in a very creditable manner, according to Allan.

OBTAIN TWO LITTERS A YEAR

When Sows Are Given Best of Feed and Care This Is Good Way to Increase Production.

(Prepared by the United States Department of Agriculture.)

It is common practice among farmers to require their sows to produce two litters a year. Although the sows have had good care, they will naturally be run down somewhat in condition, because the greater portion of the feed consumed has been utilized for the production of milk.

The sow needs a rest before she is bred again, and the time for this is between the weaning and breeding periods. Intelligent feeding will bring the sow from a thin condition into a good, strong, vigorous condition in a short time. When this is done she will be in proper condition to assume her duty when breeding time arrives. If the sow is bred in a thin, run-down condition, she must resume work immediately, and she will naturally be weak and subject to the inroads of disease. A little cold contracted in this condition may cause death, while a strong, healthy sow will resist such attacks. It is the general belief that sows in good vigorous breeding condition conceive more readily, thus shortening the farrowing period for the herd. Alfalfa, rape, clover, or any pasture which is palatable to swine, with some grain in addition, is excellent feed for bringing the sow back to breeding condition.

There is no good reason why a sow should not produce two litters a year when properly handled. To accomplish this the sow should be bred to farrow, say, for example, in March, and bred again to farrow the early part of September. A sow bred about November 15 will farrow about March 6 to 9. The pigs should nurse eight weeks. The sow should be rebred by May 20 so as to farrow on or after September 8. The pigs could then nurse until November 3. The chances for profitably rearing two crops of pigs from a sow annually are undoubtedly far better in regions of mild climate and short winters than where the winters are long and severe.

SOY BEANS GOOD FOR SHEEP

In Feeding Trials at Wisconsin Station Produced Larger Gains for Given Amount of Feed.

(Prepared by the United States Department of Agriculture.)

In feeding trials with sheep at the Wisconsin station, soy beans produced larger gains for a given amount of feed and a heavier clip of wool. In one experiment two lots of ten lambs each

Sheep Like Soy-Bean Forage as Much as the Meal.

were fed the same roughage. One lot received shelled corn and whole soy beans in equal proportions, while the other received the same quantities of shelled corn and whole oats. The average gain of each lamb during a period of 12 weeks was 16.2 pounds when soy beans constituted a part of the ration, and but 13.7 pounds when oats were used. A pound of gain was produced on 6.11 pounds of grain and 7.11 pounds of roughage in the soy-bean ration, while 7.28 pounds of grain and 8.62 pounds of roughage were required in the oats ration. In another experiment the same rations were fed for 12 weeks to two lots of nine lambs each. The lot receiving the soy-bean ration gained 119 pounds in weight and produced 95.1 pounds of wool, as compared with 71 pounds increase in weight and a production of 81.3 pounds of wool for the lot receiving the oats ration. The second lot also consumed more feed per pound of gain.

HORSE REQUIRES MUCH GRAIN

Necessary for Animal to Maintain Weight and Spirit, and Perform Maximum of Work.

In order to perform the maximum of work and still maintain his weight and spirit, the horse should receive a comparatively large allowance of easily digested grain and a correspondingly small proportion of palatable roughage.

INTELLIGENT USE OF DRAGS

Benefits to Be Derived From Their Use Not Generally Understood in United States.

(Prepared by the United States Department of Agriculture.)

When it is appreciated that of more than 2,000,000 miles of public roads in the United States only about 200,000 miles have been given a hard surface, and of these 200,000 miles approximately one-half are surfaced with gravel, the importance of every effective device for maintaining the sim-

Side View of Split-Log Drag.

pler types of roads becomes readily apparent. It should be observed in this connection that a large part of our total mileage of public roads is entirely unimproved and that the road drag is of little use in improving sand or clay roads which have never been crowned or drained. A much larger part, however, has been sufficiently improved to make the work of the drag effective, and it is unquestionably true that the magnitude of this part is steadily increasing.

Notwithstanding the fact that road drags, made of wood or a combination of wood and metal, have been in use for at least two generations and were described in a text book published as early as 1851, the benefits to be derived from using them are, even now, far from being generally understood. This fact is thoroughly evidenced by the prevalence of very unsatisfactory roads upon which considerably more money is annually expended in hauling materials to fill holes and ruts than would be required to maintain the roads in good condition by the intelligent use of a road drag.

PROTECT ROADS IN WINTER

Water and Not Cold Is Cause of Injury to Highways, Even Those of Best Construction.

The department of agriculture calls attention to the fact that water and not cold is the cause of injury to roads in winter, even those of the best construction. It is obvious, therefore, that it is a matter of economy, from every point of view, that roads should be as dry as possible when winter comes on. During the fall the road should be carefully gone over and all ruts and hollows that can hold water solidly filled in to make the camber of the road surface such that it will drain quickly and thoroughly. Standing pools at the side of the road should also be drained, as they tend to soak and soften the foundations of the road, which may result in bad "heaving" when a freeze comes.

HIGHWAY MODEL IS UNIQUE

Made to Show Just How Relocation of Roads Beters Conditions in Traveling.

The relocation of old roads seems to be something mysterious or uncanny to so many taxpayers that the Pennsylvania highway department has had an unusual model made to show conditions. This model measures six by five feet and was made by a specialist in such work at Washington. It is in relief, with roads, fields, houses, trees and other features of the landscape reproduced to a correct scale. On it are shown three types of poorly located roads frequently found and the proper method of relocating each so as to provide satisfactory grades and connect the terminal points in the most direct manner. The model also shows three types of road construction.

RESTORATION OF OLD PHRASE

Much Has Been Said About "Great Railroad Centers," Now Speak of "Highway Centers."

During the past half century there has been much in the prints about "great railroad centers." A new phrase is gradually but surely coming into use—"great highway centers." It is the restoration of a phrase that is more than 4,000 years old, but it has an entirely modern meaning.

Checking a Presumption.

"There is a rumor that you may be asked to assume leadership of your struggling country," ventured the trusted retainer.

"I have heard such a rumor," answered Wilhelm.

"Well, you may be a painter and a poet and a lot of other things. But there is a limit to human versatility. With your shabby record for truth and veracity, don't you ever try to pose as the George Washington of Germany."

Hun Tactics

"General, should we call this another strategic retreat?"

"Just keep running. Don't stop to explain."

Bronchial Troubles

Soothe the irritation you relieve the distress. Do both quickly and effectively by using promptly a dependable remedy—

PISO'S

STOP! CALOMEL IS QUICKSILVER

It's mercury! Attacks the bones, salivates and makes you sick.

There's no reason why a person should take sickening, salivating calomel when a few cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel.

It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate. Children and grown folks can take Dodson's Liver Tone, because it is perfectly harmless.

Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No more biliousness, constipation, sluggishness, headache, coated tongue or sour stomach. Your druggist says if you don't find Dodson's Liver Tone acts better than horrible calomel your money is waiting for you.—Adv.

Unbreakable
 "One thing you can say in favor of the shades of night."
 "What's that?"
 "You can't break the spring in 'em and have 'em refuse to roll up again."—Florida Times Union.

"I'm a conscientious objector," exclaimed the Prussian General who was about to go out of office.
 "To war?"
 "No. To peace."
 "My wife asked me to bring home a head of cabbage."
 "Yes, sir; large head or small head?"
 "Oh, about 7 1/4," said the man, absent-mindedly.—Pearson's Weekly.

SUFFERING CATS! GIVE THIS MAN THE GOLD MEDAL

No hump! Any corn, whether hard, soft or between the toes, will loosen right up and lift out, without a particle of pain or soreness.

This drug is called freezezone and is a compound of ether discovered by a Cincinnati man.

Ask at any drug store for a small bottle of freezezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callus.

Put a few drops directly upon any tender, aching corn or callus. Instantly the soreness disappears and shortly the corn or callus will loosen and can be lifted off with the fingers.

This drug freezezone doesn't eat out the corns or calluses but shrivels them without even irritating the surrounding skin.

Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezezone have him order it for you.—Adv.

GOOD TIME TO DRAIN PONDS

Of Great Importance That Road Ditches Be Kept Clear and in Good Shape at All Times.

When the farm lands are too wet for cultivation, it will be an ideal time to drain the ponds and keep the road ditches clear and in good shape. To fall to clear the roads in good shape will be failing to move the crops to the market.

Impulsive Utterance

Bliggins prides himself on saying what he thinks.
 "Yes, but he doesn't think before he says it."

DO YOU NEED A KIDNEY MEDICINE?

Dr. Kilmer's Swamp-Root is not recommended for everything, but if you have kidney, liver or bladder trouble, it may be found just the medicine you need. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing, herbal compound—a physician's prescription which has proved its great value in thousands of the most distressing cases, according to reliable testimony.

At druggists in large and medium size bottles. You may have a sample size bottle of this always reliable preparation by Parcel Post, also pamphlet telling about it. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents, also mention this paper.—Adv.

Meals for the Family.

It is a wise plan to have a dozen or more ways of using stale bread crumbs where they may be easily referred to, in order to avoid repeating the same dish until it becomes tiresome.

Any crusts or small bits of bread if placed in the warming oven to dry may then be put through the meat grinder and are ready for countless dishes.

To Camoens in Mesopotamia

Two small black tomes that saw the light
 In Lisbon scores of years ago,
 A wanderer's friend have often proved
 Amid the desert or the snow.

When first I turned the yellowed leaves
 'Twas 'mong the palm trees of Brazil.

Now in the Calif's land I find
 Their magic unabated still.

And when the sweltering troopship streamed
 Through Ormuz strait 'neath molten sky,
 The seaworn galleons of Camoens
 Seemed there at anchor riding high.

Upon the housetops of Bagdad
 I've read of Inez's luckless fate,
 And 'mid the scorching desert dust
 Heard stout Da Gama's sailors' prate.

In long watches of the boat
 That once was held in London town,
 'Twixt twelve of England's sturdy knights
 And Portuguese of far renown.

Now in pursuit of cautious Turk,
 With kit reduced to the absurd,
 One volume still I've brought and read
 Among the mountains of the Kurd.

And so I've scrawled these vagrant lines
 To offer thanks where they are due,
 For many a weary moment cheered
 By these companions tried and true.

—KERMIT ROOSEVELT.
 (From Scribner's Magazine.)

Cuticura Soothes Itching Scalp

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your every-day toilet preparations and have a clear skin and soft, white hands.—Adv.

Queen of Puddings.

Soak one cupful of stale but not dried bread crumbs in three cupfuls of hot milk, add two tablespoonfuls of butter, the yolks of four eggs beaten with one-half cupful of sugar, and a teaspoonful of vanilla with a cupful of corn syrup. Pour into a buttered baking dish and bake forty-five minutes or until set. When the pudding is done spread it with a layer of jelly or jam and cover with a meringue using the whites of the eggs and a little powdered sugar. Brown and serve hot or cold.

Bread Crumb Griddle Cakes.

Take one and a half cupfuls of bread crumbs, two cupfuls of sour milk and let stand over night; in the morning add an egg, a teaspoonful of soda, a half teaspoonful of salt and corn flour to make a thin batter; heat well and fry on a hot greased griddle.

Your Eyes

Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggists or by mail 60c per Bottle. For Book of the Eye free write to Murine Eye Remedy Co., Chicago.

An Interesting Article

An Irish minister announced that he had invented an automatic collection box, which would be passed round in the future.

"It is so arranged," said he, "that if you drop in a shilling it falls noiselessly on a rubber cushion; if you drop in a penny, it will ring a bell that will be distinctly heard by the entire congregation; but if you let fall a button," he continued in a hard voice, "it will fire a pistol."—London Ideas.

TO BREAK IN NEW SHOES ALWAYS USE

Allen's Foot-Ease, the antiseptic powder. It prevents tightness and blistering. Relieves Corns, Bunions, and Swollen, Sweating, Aching Feet. Gives rest and comfort. Accept no substitute. Sample FREE. Address, Allen S. Olmsted, El Roy, N. Y.—Adv.

Crumb Ice Cream.

Take one quart of medium cream, one tablespoonful of vanilla, one teaspoonful of almond extract and one and a half cupfuls of strained honey. Chill and freeze until thick and mushy, then open the freezer and add one cupful of brown bread crumbs. Continue freezing until firm. Remove the dasher and pack to ripen.

With the need for careful saving of flour somewhat over we will still use other cereals because we have learned their value and because they lend variety to our diet.

For the hot griddle cake to serve for the morning meal there is none which is better liked than that made from corn flour. If one is fortunate enough to have on hand plenty of buttermilk the cakes will be still better. Beat one egg, add enough buttermilk to make a batter with corn flour sufficient to satisfy the family, adding a teaspoonful of soda for each pint of buttermilk and salt enough to make them palatable. Beat well and fry on a lightly greased griddle. Cook them as thin as possible.

Rely On Cuticura To Clear Pimples

Soap 25c. Ointment 25 and 50c.

Swift & Company's 1918 Earnings

How They Affected You

During the twelve months ended Nov. 2, 1918 (its fiscal year), Swift & Company transacted the largest volume of business on the smallest margin of profit in its history.

Profits of the meat business—under regulations of the United States Food Administration—were limited to a maximum of 9 per cent on capital employed but not to exceed 2 1/2 cents per dollar of sales.

Swift & Company in the regulated departments earned 7.57 per cent on capital employed and 2.04 cents per dollar of sales, out of which had to be paid interest on borrowed money and taxes. Here is how these earnings affect you.

Live-Stock Raiser—

Swift & Company killed 14,948,000 head of livestock, which weighed alive, 4,971,500,000 pounds.

Swift & Company made a profit of only a fraction of a cent per pound liveweight.

Consumer—

The sales of our meat departments were 4,012,579,000 pounds on which our earnings were less than 1/2 cent per pound.

The per capita consumption of meat in the United States is given as 170 pounds. If a consumer purchased only Swift & Company's products he would contribute only about 78 cents a year, or 1 1/2 cents a week as profit to the

Swift & Company, U.S.A.

LADIES \$1600 REWARD!

Successful "Monthly" Compound, safely relieves some of the longest, most obstinate, abnormal cases in 3 to 5 days. No harm, pain or interference with work. Mail \$2.00; Double Strength \$3.00. BODLEY'S TABLETS. DR. S. J. BOSTON REMEDY CO., OAKLAND CITY, MD.

GRADER IS HANDY IMPLEMENT

Hitched to Tractor Is Does Much to Improve Approaches and Condition of Farm Roads.

A road grader is a handy implement to hitch behind the tractor at odd times, and does much to improve the appearance and condition of the roads around the farm. Regular dragging and grading minimize the cost of road upkeep.

STOMACHS CAN BE MADE NEW—Nerves rebuilt, Kidneys and Livers reconstructed by supplying the system with the necessary building material.

Keeps PERUNA In the House All the time

Breaks up a Cold. Good for Bronchial Inflammations.

Mr. Robert McDougall, R. R. No. 6, Liberty, Indiana, writes:

"I wish to state that I always keep Peruna in the house. I think it is a good medicine to have on hand. If I commence taking a cold, I take Peruna and it breaks it up for me. It is also good for the Bronchial Tubes."

Peruna has served the American people for more than forty years. Those who know its value always have it at hand. Why not you?

A Letter from Bossy

If a cow could speak she would talk about her health as people do—because cows suffer from ailments, little and big, same as human beings.

The most common cow ailments, such as Abortion, Retained Afterbirth, Lost Appetite, Bunches, Scours, etc., result from a diseased condition of the digestive or genital organs. Any of these diseases and many others can be successfully treated or prevented by using Kow-Kure, the great cow

High School Notes
As a rule, when you glance your eye through the High School notes you are interested in reading about the social activities of the school. We hope you will be as fully interested in the fact that this is the week of examinations. We have no time for frivolity. This week determines our fate. Indeed perhaps there will be nothing for us but lessons in the future. Due to the Flu epidemic, all school activities such as baseball, basketball parties, etc., have been called off. It's better to be safe than sorry!

The weather's here, the weather's there,
The weather's every single where,
In places gay or sad;
And yet I think it's strange, the way
We seldom think of it all day
Unless it's bad!

Deciduous Fruit Short Course Varied Experiences Of Y Men

Jan. 24th. to Feb. 1st Inclusive

Friday and Saturday, Jan. 24th & 25th.
Tractor and Implement Demonstration at Cupertino, given by The Santa Clara County Tractor and Implement Dealer's Association. Tractors of all sizes suitable to orchard work, both wheel and Track Laver type, will be demonstrated. Also all types and descriptions of orchard tools will be demonstrated. The nearby orchards will be used as grounds for demonstrational work. The various types of tractors will plow these orchards and all types of plows and orchard tillage machinery will be in operation. A large tent will be provided so that in case of rain the crowd can be sheltered.

Monday, January 27th.
10 A. M. to 12 M.—Continuation of the Tractor and Implement demonstration in actual plowing and tilling of orchards.
1:30 P. M. Lecture: Subject: Discussion of the Principles of Operation and care of tillage machinery and tractors. Professor J. B. Davidson. Followed by further demonstrations of the principles outlined in the lecture. Demonstration of different types of plows will also be a feature of the demonstration following the lecture.
7:30 P. M. Illustrated Lecture: Subject: Impressions of European Agriculture during the War. Dean Thomas F. Hunt.

Tuesday, January 28th.
10 A. M. Lecture: Principles of Soil Fertility and Fertilizers, Professor V. C. Bryant.
11 A. M. Lecture: Cover Crops for the Santa Clara Valley, Professor W. T. Clarke.
1:30 P. M. Lecture: Combining of Sprays, Professor Geo. P. Gray.
2:00 P. M. Spraying Demonstration. Demonstration of Dried Sulphur dust for Red Spider control. Demonstration of commercial crude oil sprays. Professors T. Francis Hunt, E. R. DeOng, W. T. Horne and L. R. Cody.
Odd Fellows Hall at Campbell, California.
7:30 P. M. Lecture: Principles of Soil Fertility and Fertilizers, Professor V. C. Bryant.
8:15 P. M. Lecture: Cover Crops in the Santa Clara Valley, Professor W. T. Clarke.

Wednesday, January 29th.
10:00 A. M. Lecture—Thrip Control, Professor T. Francis Hunt.
10:30 A. M. Lecture: Red Spider Control, E. R. DeOng.

2:30 P. M. Lecture and Demonstration on Frost Control of Deciduous Fruits, Dr. J. C. Whitten.
1:30 P. M. Lecture and Demonstration on the Culture and Pruning of Pears, Professor T. Francis Hunt, Professor R. E. Smith. Given at Mr. V. T. McCurdy's Place, Beacon Avenue.
7:30 P. M. Discussion of Orchard Irrigation Problems in the Santa Clara Valley, Professor Frank Adams and F. J. Veihmyer.

Saturday, February 1st.
Chamber of Commerce in San Jose.
1:30 P. M. General discussion Salvaging Rain Damaged Prunes by Artificial Evaporators, Dryers and other methods. Professor W. V. Cruess

ONE OF THE BIG PROBLEMS, perhaps one of the serious problems that will confront us during the period of demobilization is the employment of returning soldiers and sailors. The men who have left their own work to fight the great fight for humanity must be returned to the same or equally good positions. To fail to discharge this duty would not only be ungrateful and unpatriotic, but would create dangerous industrial and social conditions. The Federal and State governments are grappling with the problem. The national and state Council of Defense, through their committees in charge of this matter, are doing much toward a solution. Our own State Legislature is considering ways and means. But no doubt the full and final solution rests largely with local communities, corporations and individuals.

THE NERVES of some of our state legislators seem to have been pretty thoroughly shattered by the ratification of the prohibition amendment, if certain newspaper stories correctly reflect their psychological state. Somewhere in a recent editorial utterance we read something to the effect that the industrial readjustments necessitated by prohibition were of slight importance compared to the psychological readjustments in the minds of the "wets." It looks like that was a pretty shrewd comment. As an indication of the general "jumpiness" of some of our legislator's nerves we may quote the following from the Chronicle:

One Senator declared tonight it is significant that Dr. Gandier reappeared in Sacramento at a time when there is discussion of the purchase of Lower California. Tijuana is such a short distance from San Diego and Calexico expects to profit by the California prohibition. He suggested Dr. Gandier may want to make all territory dry that is contiguous to California, and may even aspire to become Territorial Governor of Lower California, with Franklin Hichborn, Secretary of State and Mrs. Hester T. Griffith, chief organizer of the New Women's party among the Mexicans and Indians.

Important Address How They Voted

Under auspices of Orchard City Grange
Under the auspices of the Orchard City Grange two professors of the University of California, who are here giving lectures in the Agricultural Short Course, will give instructive addresses Tuesday, Jan. 28th. The subjects are, "Corn crops in the Santa Clara valley", by Prof. W. T. Clarke, and "Principles of Soil Fertility and Fertilizers", by Prof. V. C. Bryant. The meeting will begin at 7:30 P. M. in the Odd Fellows' Hall. The public are cordially invited to attend.

A Soldier Guest at Duncan's home

A welcome guest at the homes of F. E. and J. F. Duncan and the W. C. Cuttings this week is their nephew and cousin Private Frank T. Duncan of the 23rd Engineers, just returned from France. Private Duncan is wearing two gold stripes on his sleeve, indicating a years service over seas. He was under shell fire for twenty-one days, engaged in driving a motor truck carrying ammunition to the front. On the 25th of October, two days after being sent to a rest camp to recuperate, he was severely burned in a fire which destroyed the barracks in which he was sleeping. After spending some time in a hospital in France he was sent to a New York hospital and from there to the Presidio at San Francisco. He has now almost entirely recovered from his injuries and is on his way to Camp Kearny where he will receive his discharge from the army. He has many interesting stories to tell of his experiences "over there" but is more than glad to be once more in the "good old U. S. A." and as soon as released from the army will return to his home near Modesto, to assist his father and brothers in the management of their farm there.

Daily Thought.
Conversation is the vent of character as well as of thought.—Emerson.

SUMMONS

IN THE SUPERIOR COURT OF THE STATE OF California in and for the County of Santa Clara
DANIEL B. MAURICE, Plaintiff, vs. ELLA L. MAURICE, Defendant.
Action brought in the Superior Court of the State of California in and for the County of Santa Clara, and the Complaint filed in the office of the Clerk of said County of Santa Clara.
The People Of The State Of California send greeting to Ella L. Maurice, Defendant.
You are hereby directed to appear and answer the Complaint in an action, entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Santa Clara, within ten days after service on you of this summons, if served within this County, or within thirty days if served elsewhere.
And you are hereby notified that unless you so appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the Complaint as arising upon contract, or will apply to the Court for any other relief demanded in the complaint.
Given under my hand and the Seal of said Superior Court, of the State of California, in and for the County of Santa Clara, this 22nd day of November, 1918.
[SEAL] Henry A. Pfister, Clerk.
Bohnett & Hill, Attorneys for Plaintiff

In Odd Fellows' Hall every Sunday morning, at 11 o'clock. Subject for Sunday, January 26th, is "Truth." You are cordially invited. Sunday School at 9:45.

Campbell Boys Home With the Grizzlies

Mr. James Edward Huntley and the twin sons of Mr. and Mrs. E. D. Harris, Asa and Ira, of the 144 Field Artillery, popularly known as the "Grizzlies," just home from France, walked in on their parents Saturday evening and spent a short furlough at home, returning to report at the Presidio at noon Saturday. Mr. and Mrs. Huntley and Mr. and Mrs. Harris were in San Francisco Saturday to meet the boys on their arrival. They are looking fine, were glad to get home, and with bouquets instead of bayonets decorating the muzzles of their guns, they were a sight to gladden their parent's hearts. They were within eleven days of reaching the front line of battle.

The Never-Old

They who can smile when others hate,
Nor bind the heart with frosts of fate,
Their feet will go with laughter bold
The green roads of the Never-Old!
They who can let the spirit shine
And keep the heart a lighted shrine,
Their feet will guide with fire of gold
The green roads of the Never-Old.
They who can put the self aside
And in Love's saddle leap and ride
Their eyes will see the gates unfold
To green roads of the Never-Old.
—Edwin Markham, in *The People's Home Journal*.
