THE VALUE OF A NAME

FT I

OR over forty years now we have been growing and selling trees, plants and shrubs this time our aim has been to satisfy our customers and make our name stand for honesty and a square deal. No nurseryman or any other business man could withstand the test of time over a period as long as this who had not treated his customers right and given value for value received. This has always been our policy and will

continue to be so while this firm exists. We take this opportunity to thank those who favor us with orders, whether large or small and assure you that we will put forth every effort to please and satisfy you.

This section had one of the most bountiful fruit crops last season and everyone who had the trees certainly enjoyed an abundance of fresh fruit. If you envied your neighbor's supply and had to depend upon his surplus for your own needs, better plan now to plant enough trees to insure plenty of fresh fruit for your own family in the future.

Nursery stock of many kinds is still scarce and we especially urge you to order early in the season. We have a full line of stock at present but will be unable to replenish many items once our supply is exhausted. Our section of the state had more rain than many others and we also irrigated much of our stock so that our trees and plants are of fine quality. Prices on most items are also lower than they have been for a long time so that now is surely the proper time to do that deferred planting.

Remember, we are a catalog firm and our catalog is our agent. The price it makes to you is the same it makes to the other fellow and is usually about half an agent's price. We pack stock free. We replace losses at half-price. We ship you good stock in good condition. Favor us with a trial order and let us do the rest.

Sincerely,

J. W. STEVENSON, Proprietor NORTH BEND NURSERIES, North Bend, Neb.

Parcel Post

Nursery stock is charged the same rate as merchandise.

We pack mailing trees and plants in the best moss, using wax paper next the roots and tough "Kraft" paper on outside. Can send bundles of fifty pounds or less, but they must not be more than seven feet in length and circumference.

On large orders we will only charge the exact amount of postage required and will return all surplus postage.

Replacing—We will replace all fruit trees and plants that die from any cause at half our retail price.

Few firms are as liberal as we are about replacing. Most of the firms make no promise to replace.

Guarantee—We aim to have our stock true to name and carefully labeled; yet, while we exercise the greatest care to do this we will not be held responsible for any sum greater than the cost of the stock that proves untrue.

We guarantee trees to leave us well packed and to reach you in good condition. If delayed too long in transit or damaged, have the Agent make a note of it on the bill or receipt.

Varieties—As far as possible, leave the selection of varieties to us. We will use our experience with fruit in Nebraska for the past forty years for your benefit. Many select too many varieties, and often not the best sorts. When varieties become exhausted we reserve the right to substitute others of the same class and value or of larger size, except when orders are marked "No substitution."

A Descriptive Catalog will be furnished for ten cents. If an order is sent we will credit the amount on the order.

We also have a "Home Beautifying Booklet" with plans for landscaping your grounds which will be mailed you for 10 cents.

Directions for Planting will be sent to each one ordering.

Prices for 6 at a dozen rate, 5 at 10 rate, 50 at 100 rate, 500 at 1,000 rate, though several varieties in a class make up the number.

References—First National Bank, First State Bank of North Bend, or R. H. Haverfield, Datel & Datel, prominent merchants of North Bend.

Location—Patrons who wish to drive after their trees will find us located 6 blocks north and four west of the Union Pacific depot. Look for our tall evergreen grove.

Freight and Express Charges can be paid at destination, as our guarantee is accepted by railroad and express companies. Small bales of 50 pounds or less go as cheap by express as by freight, and when such is the case we send by express.

Owing to the fact that the prepayment of freight on some orders and not on others is inconvenient and tends to confusion and mistakes, we do not this year offer to prepay the freight, but offer a 10 per cent premium in stock on all orders amounting to \$5.00 or over. This 10 per cent premium usually exceeds the amount of the freight. We also allow you to make your own selection of stock for the premium and do not limit you to a few things which you may not care for.

Heeling in and Planting—When trees are received heel in immediately so that mellow earth comes in contact with all the roots, and water the roots if the earth is dry. Do not let the bale or box be exposed to sun or wind an hour if you can avoid it, and in planting do not let the roots get dry for a moment. In planting make a hole sufficiently large so roots will not be bent or twisted. It is a good plan to have roots grouted or dipped in mud before planting. Plant one or two inches deeper than the trees stood in the nursery. Pack the soil firmly about the roots, and after roots are covered add a bucket of water. When soaked away fill up the hole nearly even with the surface, but have the soil on top loose. Where water is plentiful fill up the hole partly with fine, loose surface soil and settle it about the roots with water instead of tamping it in. Cultivate with hoe or cultivator every ten days or oftener till middle of August. Nothing should be allowed to grow within two or three feet of the tree. Shorten branches to one-half of last season's growth, and leave only four or five limbs on an apple tree.

In planting valuable trees a tube of wood or cement may be set in the hole six inches from the tree and to same depth the tree is planted. The roots of the tree can be more effectually watered through it with half the amount of water applied at the surface. The water usually applied at the surface seldom reaches as far as the roots.

Dynamite may be used very successfully for making holes for planting trees, especially when there is hardpan under the soil. The dynamite will loosen the hard soil to a depth of six to ten feet and trees planted there will grow rapidly and not suffer with drouth or surface water.

If you receive two or more catalogs, please pass the extras to neighbors or to friends who may need them.

Payment may be made by check or money order or bank draft.

PREMIUM FOR EARLY ORDERS

In addition to our 10 per cent premium to pay freight we offer an additional premium of 5% on orders sent in before February 15th and 3 per cent on orders sent in with the cash before March 1, and such orders shall have precedence in packing.

Help us in this way to give you better service, better stock and better prices by getting your orders in before our packing season begins.

NURSERY STOCK IS SCARCE and many who wait until the last moment to order are going to be disappointed in obtaining stock this season. This is especially true of large sized apple and cherry trees and many varieties of ornamental stock.

APPLES

F we were to be restricted to one kind of fruit only, no doubt popular choice would select the apple to be that one kind. I have yet to meet the man who did not enjoy eating a good apple and nature has kindly made them as good for us as they are enjoyable to eat. Each family should have an abundance of this delicious and healthful fruit and the best way to do this is to grow your own supply. We offer a wide range of varieties and where apples are grown solely for home use it is well to select choice varieties covering the entire range of the ripening season.

Summer Apples

Early Harvest—Tree healthy, vigorous and a good bearer. Fruit medium size, nearly round, somewhat flattened; surface smooth, clear, waxy yellow, rarely blushed; flesh tender, juicy, acid to sub-acid; flavor good. July.

Red Astrachan—Tree vigorous, upright, hardy and productive. Fruit medium to large; surface smooth, marbled and striped on greenish yellow; flavor acid. July and August.

Carolina Red June—Tree a moderate, upright grower; an early and abundant bearer. Fruit small to medium, oblong, surface smooth, color dark red, with white ground; flesh white, very tender, fine grained, juicy, acid. July and August.

Duchess of Oidenburg—A large, beautiful apple, roundish. Streaked red and yellow. Tender, juicy and pleasant. Tree a vigorous, fine grower and abundant bearer. Very hardy. August and September.

Sweet June—Tree is strong, upright, very productive. Fruit small to medium, round; greenish yellow; flesh white, fine grained, tender. July and August.

Yellow Transparent—A Russian apple. The tree is a hardy, upright grower; regular and early bearer, medium size. Color a rich, transparent yellow with a faint flush on sunny side; flesh melting, juicy, sub-acid. July and August.

Liveland Raspberry—Very early, medium to large. Handsome color, red and yellow. Originated in Iowa. Hardy and very productive. July and August.

Autumn Apples

Malden Blush—Medium; beautifully flushed with red; tender and pleasant; a fair grower; productive. August and September.

Are You Buying Apples From the Store? Then-

Autumn Apples—Continued

Wolf River—(Wisconsin) — Very large, roundish, irregular, yellow covered with dark crimson, coarse grained, juicy. Octobercrimson, December.

Wealthy—(Minnesota)—Medium to large, roundish, oblate, striped bright crimson to dark solid red. A very attractive fruit, very julcy, sub-acid. September to November. Fameuse or Snow—Medium, roundish, flattened; deep, solid red, sometimes striped; julcy, fine grained; mild sub-acid. October-November.

November.

Estalline—Season September. A seedling of Duchess. This is one of the hardiest va-

rleties grown, found doing well in many parts of North Dakota. Tree is a fast spreading grower. Limbs heavily should-ered, enabling the tree to carry its immense crops of fruit. Apple medium in size and of a dark purplish-red when fully ripe. Flavor excellent. Bears generally second year and annually thereafter. The best variety known for planting on sandy soils. Peerless — (Minnesota) — Medium to large, roundish, conical, greenish, striped with dull red, firm; sub-acid. October-January. Other varieties: Pound Sweet, Ramsdell Sweet, Utters Red, ets.

Winter Apples

Jonathan—Medium size, yellow, nearly covered with red; a delicious dessert apple; always demands high market prices; vigorous

and productive.

Northern Spy—A well known winter sort.

A most delicious eating apple. Color yellow

striped with red. Tree hardy and productive.

Patten's Greening—A Duchess seedling from northern Iowa. Tree very hardy and productive. Fruit full medium, olive green with some dull red stripes and splashes. Flavor pleasant, sprightly, sub-acid. A superior cooking fruit. December to February. Ingram—A seedling of Janet. Tree more upright; fruit medium size, roundish, inclined to conical; yellow ground; striped, bright red, flesh greenish-yellow, delicate, tender, juicy, sub-acid. A late keeper.

Gano—Fruit is bright red on yellow ground, with no stripes; large; oblong, surface smooth, polished; dots minute; basin shallow, sometimes deep; eye large, cavity deep, brown in color; stem medium to long; core medium. Tree healthy, vigorous and prolific bearer. January to April.

Janet—Medium size; greenish yellow with red; excellent for all purposes; vigorous but slow grower. Very late.

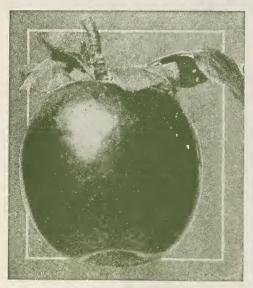

Banana—Medium size; deep yellow; has delicate banana perfume; very popular.

Ben Davis-Medium size; red striped; rather coarse grained, but great market variety; tree rarely fails to crop.
Delicious-Large, dark red; fine grained; a melting, delicious flavor; largely planted

everywhere.

Plan To Plant Another Tree.

Winter Apples—Continued

Missouri Pippin—Large; mostly red; good quality; hardy; an early bearer; good keeper.

Grimes' Golden—Tree upright and hardy; fruitful, color golden yellow when ripe; me-dium to large; quality sub-acid, mild and

melting: valuable in any orchard. Early winter sort.

Stayman's Winesap—Medium size; green and yellow; popular for all purposes; quick and vigorous grower.

Talman's Sweet—Medium size; pale yellow; sweet and juicy; vigorous and productive.

Winesap—Medium size; deep red; firm, crisp and juicy; popular everywhere; very productive and an early bearer.

York Imperial—Medium large; yellow, covered with bright red; a great variety for cold storage and market; tree vigorous.

Mammoth Black Twig—It is one of the most valuable and profitable apples grown. It resembles in every way the Winesap, of which it is no doubt a sport, except that it is one-third to one-half larger. The trees are also the same in habit of growth, color of bark and foliage, but the Black Twig is the stronger grower and makes a handsome tree in the nursery and orchard.

Northwestern Greening—Fruit medium to large, averaging from seven to eight ounces each and very uniform in size. Color greenish yellow, flesh juicy, firm and fine grained. Very fine quality and flavor. Tree is very hardy and a thrifty grower, an early and continuous bearer. One of the longest keepers known. January to spring.

ers known. January to spring.
Other sorts are Salome, Windsor, Reagan's Red or Black Ben Davis. This is better quality than Ben Davis. King David is another popular sort. We have dropped Bismark and some other sorts because they are so subject to blight.

Crab Apples

Same Prices as Apple Trees.

They are entirely hardy, and do well in any kind of soil, in the most exposed situations.

They come into bearing very early, generally the second year, and bear every year.

They are unequaled for jelly, and can be ried, cooked, canned and preserved with the skin on, thus saving work.

Florence-Large, handsome: crimson, splashed with darker red; prolific; valuable. September.

General Grant—Large, roundish oblate; yellow, with stripes of deep red, and dark red, almost black on the sunny exposures; flesh white, moderately fine grained, mild, sub-acid flavor. September and October.

Golden Beauty-A large handsome crab,

amber or golden yellow in color. genuine sweet crab. Season September.

Hyslop—Tree a moderate grower making a beautiful shaped, thrifty tree; bears young; fruit large, nearly round, flattened at the ends; skin smooth, color dark, rich red on yellow ground; flavor very good.

Martha—This is one of the best. The ground is bright yellow, nearly overspread with light bright red. Of good size.

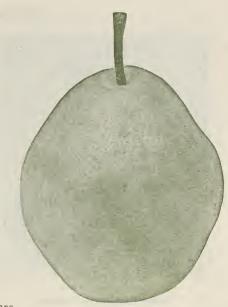

Red Siberian—Medium size, red in color. An excellent crab for pickling and preserving. Tree very hardy. Comes into bearing young.

Whitney No. 20—Tree thrifty, upright grower; fruit large, skin smooth, striped and splashed with carmine; flesh firm, juicy, of pleasant flavor. One of the very best. August.

Hoed Crops or Small Fruits Grown in Young Orchards for the First 4 or 6 Years

Many people, not familiar with raising fruit, dislike to sacrifice an acre or two from their farm land for orchard purposes, their main objection being that it takes so long before the orchard bears fruit and they begin to get returns from the land. Instead, this land requires considerable extra care. It certainly would be a waste of land, if it could not be used for any other purpose. However, the entire space between the young trees may be planted to vegetables or small fruit. The proper cultivation and fertilizing of these will benefit the fruit trees also, and stimulate their growth. Unless hoed crops or small fruits are planted in an orchard, the trees are generally neglected. Grapes, currants, gooseberries, and, best of all, strawberries, may be planted between the rows of apple trees. From two to three hundred dollars an acre can be cleared from land planted to several varieties of fruits, such as currants, gooseberries and strawberries.

Seckel Pears

Pears

Plant standard pears 20 feet apart and dwarf pears 10 feet. Cut out the leaders in standard sorts and thus compel them to form bushy tops.

Bartlett—Large size with often a beautiful blush to the sun; buttery, very juicy and highly flavored; bears early and abundantly; very popular. August.

Clapp's Favorite—Very large, yellowish green to full yellow when ripe, marbled with dull red in the sun and covered with small russet specks, vinous, melting and rich; season August.

Kleffer's Hybrid—The pear was raised from Chinese Sand Pear accidentally crossed with the Bartlett or some other kind grown near it; is an early and very prolific bearer; the fruit is of good quality, wonderfully showy, and is valuable for the table and market; it never rots at the core, and is as nearly blight proof as is possible for any pear to be. October.

Duchess D'Angouleme—Very large, dull greenish yellow streaked and spotted with russet; flesh white, buttery and very juicy, with rich and very excellent flavor, on the quince order, to which stock this variety seems well adapted; it is always fine; the large and fine appearance of this fruit makes it a great favorite. September.

Seckel—Small, skin rich yellowish brown when ripe, with a dull brownish red cheek, flesh very fine grained, sweet, is exceedingly juley, melting, buttery; the richest, highest flevored pear known. August and September.

Fiemish Beauty—Is large, beautiful, juicy, melting, rich and fine; good bearer, is hardy everywhere. August and September.

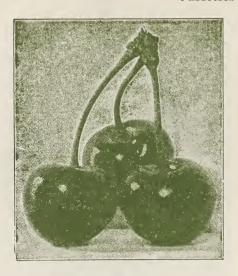

Cherries

Budded on Mahaleb or Mazzard roots and will not sprout unless planted too deep. If planted too deep the tree will start roots near the surface and sprouts will start from them. The bud should be covered about two inches below the surface. Sweet or Heart Cherries do not succeed well, but will furnish them, if wanted.

Would recommend	Early Richmond,	Montmorency,	Dyehouse,	Wragg,	English	Morello.

Can You Afford Not to Grow Your Own Fruit Supply?

Varieties of Cherries

Early Richmond Cherries

English Morello—Tree moderate grower, hardy; an early and great bearer; the most valuable of the late varieties. Fruit large, round; skin dark red, becoming nearly black when fully ripe; flesh dark red, tender, juicy and of a pleasant sub-acid flavor when fully ripe. July.

May Duke—An old, well known excellent variety. One of the best and most dependable of the Duke class. Fruit large, dark red, juicy and rich; almost sweet. The tree is rather dwarf in habit, vigorous and productive. Ripens in June.

Dyehouse—This variety partakes both of the Morello and Duke wood and fruit. A very early and sure bearer; ripens a week before Early Richmond; is of better quality and productive. Season June.

Large Montmorency—A fine large bright red cherry of the Richmond class but larger and more solid; a more upright grower, equally hardy and productive. Equal to Early Richmond in value. Ripens ten days later.

Wragg—Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the prairie regions of the Northwest. Appears identical in tree and fruit with English Morello, but is claimed to be a new variety. Valuable late cherry. July.

Early Richmond—Everywhere the most popular. Tree strong, thrifty grower, making a large, symmetrical head; fruit medium size, dark red, melting, juicy; sprightly acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season, June.

Black Tartarlan—Large, juicy, rich, mild and sweet; vigorous and productive. Early.

Dwarf Rocky Mountain Cherry—May be used as an ornamental bush and also for fruit. 3 to 4 ft. trees, 50c; per 10, \$4.50;

Compass Cherry-Plum—Originated in Minnesota. Is a cross between the sand cherry and plum. Absolutely hardy everywhere and especially desirable wherever it is hard to raise fruit. Fruit about an inch in diameter and purple when ripe. Resembles a plum more than a cherry. Will bear next year after planting and is a heavy bearer. Prices as follows:

	4			Each	Per 10	Per 100
5	to	6	feet	\$0.75	\$7.00	\$65.00
			feet		5.50	50.00
3	to	4	feet	45	4.00	38.00

Have You Included a Few Grape Vines in Your Order?

The grape is one of the best and healthiest fruits we have. Grows in most any kind of soil that is not wet, any side hill will do for a vineyard. Those who have only a lot or two or a small garden can plant them alongside a building or fence. They will take up very little room, and if properly taken care of, will bear an abundance of fruit almost every year. They make a splendid screen for unsightly buildings, or can be trained over walls and fences, repaying many times over with healthful and refreshing fruit, their small cost and care.

Plums

There is no fruit that we can grow with great assurance of success and derive more pleasure and profit from than our improved grafted plums. When on native roots they are perfectly hardy and thrive anywhere throughout the state. They invariably produce fruit the second or third season after planting; are subject to but few diseases, and require but little care to produce bountifully. It is a good idea to plant several varieties, giving not only a succession of fruit, but the cross-pollination that seems essential to a good crop.

Plant ten or twelve feet apart in thicket form to insure fertilization. Head back in the spring, thus keeping them close headed and stocky and preventing them from breaking down when loaded with fruit. By proper assortment you may have plums from July 15th to October 15th.

We offer four varieties of Professor Hansen's best Hybrid Plums, a cross between American Hardy Native Plums and choice European sorts. They are good growers and very hardy. They bear second year after planting.

Hansen Plums

Opata—From the Indian word for bouquet. The first of the Hansen plums to ripen. Fruit greenish, flavor very pleasant. Tree of low spreading growth and should be allowed to grow in this form. Will bloom and bear next year from planting.

Sapa—Sioux Indian for black as the fruit when fully ripe is almost black and the flesh is very dark. This variety is fine for jellies and preserves as the skin of the fruit is very tender and disappears in cooking.

Hanska—Sloux word for tall, referring to the habit of growth of this variety. Does not fruit quite so soon as the other varieties. Fruit is large, bright red in color with a bluish bloom. Of the best quality both for eating and canning.

Waneta—Pronounced the masterpiece among the Hansen Plums. Described as combining hardiness, immense size, delicious quality, long keeping, beautiful color, small pit and early bearing, often producing a good crop in two years from planting.

Burwood

American Plums

Surprise—Grown from seed in Brown County, Minn., in 1886. Professor Crane-field, Madison, Wis., says: "The very best plum so far tested in our orchard." Fruit hand dark red. Long keeper, plum so har tested in our orchard. Fruit prune-shaped, dark red. Long keeper, therefore valuable for market. Ripe from September 1 to 10. Tree a thrifty, upright grower; hardy and productive. A fine tree in orchard.

Weaver-Large, purple with a blue bloom; very prolific; a constant and regular bearer and of good quality. Tree very hardy. Au-

Wild Goose-The most popular fruit with some fruit growers. Tree a vigorous, upright grower; fruit medium to large, rich golden yellow, shaded with red; flesh yellow and juicy; flavor rich and good.

Wolf-Fruit large, a perfect freestone. As to quality we find them superb for cooking and for serving with sugar as we use peaches. Tree a good grower: hardy. Au-

Wyant-Large, round, oblong. shape, dark red; skin thick; peels readily; flesh firm; freestone, and of excellent quality. Native of Iowa and hardy.

Forest Garden—Large, roundish, oblong, deep red with yellow tinge, firm, sub-acid. August-September.

De Soto—Large, oval, light yellow to red, sometimes mottled, juicy, good quality; an early and regular bearer, producing large crops. September.

Stoddard-One of the largest of the native plums originated in lowa. It is a light pinkish red color, very handsome, with a tough, sweet skin. Quality fair.

Burwood-We consider the Burwood, which is a hybrid plum introduced by Theo. Williams of Omaha, to be absolutely the finest plum that can be grown in this section. It is a prolific and early bearer and the plums are as large as seedling peaches and have a distinct peach flavor. They are not highly acid when cooked, like the American sorts but make a mild and delicious sauce. If you have never tried them, "Plan to plant another tree" and make it a Burwood.

We have discarded Japan and European Plums as they are too easily winter killed in our climate. Plant Hanson and Burwood instead and avoid being disappointed. These plums surpass the foreign varieties in hardiness, productiveness and also in flavor.

Peaches

Peaches are being extensively planted in Nebraska and have yielded good crops. The hardiest sorts of budded peaches are much hardier than seedlings. It is a very common mistake to suppose that seedlings of peach or apple are hardier than selected budded or grafted sorts. The quality of the fruit of such seedlings is usually very poor. We recommend as best and hardiest the following sorts, which ripen nearly in the order given here Alexander, Amsden, Hale's Early Triumph, season July; Champion, Crawford's Early, Bokara No. 3 (claimed to be the hardiest peach known), season August. September sorts are Hill's Chili, Elberta, Crosby, Wright, Baily, Beer's Smock. Clingstone sorts are Old Mixon Cling, Blood Cling, season September. The earliest sorts are clings. The Wright and Bailey are very hardy, but not as good quality as the others, and not ripe until last of September. Hardiest sorts same price as others.

Elberta—Very large, tender and juicy; the greatest market variety.

Carman—A new, hardy rot-proof peach, almost as large and fine as Elberta; skin pale yellow with blush on sunny side; flesh almost white, tender, melting, with rich, sweet, superior flavor. By far the finest early peach in cultivation. Ships well. Au-

sweet, superior flavor. By far the finest early peach in cultivation. Ships well. August. (f.)
Hale's Early—Fruit Medium size; skin clear, smooth, white, delicately marbled with bright and dark red on the sunny side; flesh very melting, juicy and high flavored. July 10th to 20th.

Champler—Beyond doubt this is the above

July 10th to 20th.

Champlon—Beyond doubt this is the champion early peach of America. Tree and fruit buds extremely hardy—has stood 18 degrees below zero and produced a full crop the following summer. Fruit often ten inches in circumference; quality A-1; a remarkably good shipper. August.

Bokara—The best of Prof. Budd's importations from Bokara; said to be the hardiest peach grown. Large, fine quality, immensely productive. Last of August. (f.)

Heath's Cling—Large, luscious but rather dry; tree hardy and productive.

Crosby-Medium size, orange; a good tree; very hardy.

very hardy.

J. H. Hale—A new peach. This is a chance seedling, discovered by Mr. Hale, a large peach grower in the East. The fruit is larger than the Elberta, a perfect freestone, is of a rich golden yellow, covered with carmine. Skin thick and entirely without fuzz. The flesh is dark yellow, fine grained and firm, parting as easily from the pit as any elberta. The flavor is excellent, absolutely of the best. The tree is hardy, bears young and profusely, probably the best bearer known.

Apricots

Apricots are usually hardier than peach trees, particularly the budded Russian	sorts.
Apricots are usually hardler than peach trees, particularly and I to August 1. Russian sorts: Alexander, Alexis, Gibb, J. L. Budd; season July 1 to August 1.	Other
sorts are Harris, Early Golden and Superb.

Raspberries

Raspberries are a most delicious fruit, both for eating raw and for canning. They are hardy and easily grown and also find a ready sale at good prices commercially. We have never been able to completely supply our home market demand for this fruit. We have had plenty of moisture this fall and will have an unsually fine supply of plants of both the red and black varieties. Plant two feet by six. Pinch back black caps first year when 1 to 1½ feet high.

Do not expect a 100 per cent in transplanting raspberries, as you will be disappointed. We consider a 50 per cent stand good in nursery planting. Vacancies can soon be filled by the value of the plants.

Why Be Satisfied with Stale, Half-Spoiled Fruit? Pick It Fresh From the Vines.

St. Regis Everbearing Raspberry

This is a red raspberry which will continue to bear throughout the summer if given sufficient moisture. It is bright red in color and of delicious flavor. It has borne here as late as October 7. Prices, each, 10c; per 10, postpaid, 75c; per 25, postpaid, \$1.50; per 100, \$5.00.

Blackberries and Dewberries

We picked a bumper crop from our blackberry vines this season, and if you could have tasted the big, delicious berries am sure you would want some in your own garden. They grow well planted along fences, where they utilize waste ground and serve as an added bar-

rier to trespassers.

Plant 3 to 7 feet. Pinch or cut new growth of Blackberries back when 2 feet high.

Treat suckers of Blackberries and Red Raspberries between the rows as weeds and cut them off once or twice in the spring. We can furnish other sorts, but do not recommend that the spring of t\$0.10 \$0.60

Improved Dwarf Juneberries

The Juneberry is a delicious little berry that deserves to be more widely planted. It is perfectly hardy, and not affected by drouth. Have friend wife add some to the cherries when canning and she will never leave them out again. It is a good ornamental bush. It will do well in all parts of the state, and all should have it.

Each \$1.50 1.25 \$12.50 Can send small size by mail at 10 cents extra per 10.

Elderberries

A well known bush which bears a fine fruit for pies or wine or jelly. Price, 20c each; 10 for \$1.50. Parcel post, 23c each.

Hazel Nuts or Filberts

Plants 18 to 24 inches, each, 15c; per 10, \$1.00; per 100, \$8.00. They grow nicely and soon increase. 10 by mail. postpaid. Asparagus

This deserves to be ranked among the best early vegetables, as it satisfies the longing for something from the garden before the other vegetables are ready for use. A bed of asparagus, once established, requires very little care and never needs renewing.

Plant in rich soil, 2 feet apart, in rows. Set roots 6 inches below the surface, covering with 3 inches of soil; fill in the first season while cultivating.

Conover's Collossal and Palmetto are the best sorts. 2-year-old, per 10 (by mail), 30c; per 100, \$2.00. Parcel Post, 25c per 100 extra. 1-year plants, per 100, \$1.50. Parcel post 20c extra.

Rhubarb or Pie Plant

\$10.00

Horseradish By mail.... ..\$0.60

HIMALAYA BERRY. We have tried it and consider it worthless. Are You Eating Dried Prunes For Sauce? Then—

Grapes

Grapes are delicious and healthful and come at a season when there is not much other fruit. Plant several varieties and have grapes continuously for several weeks.

Last year every one who had the vines had a bumper crop of grapes, yet there was no over supply anywhere and the market could have absorbed many more. Grape vines are again very reasonable in price so now is the time to plant that vineyard.

Grapes should be pruned in November and the younger vines taken from the trellis and covered with mulching.

Plan To Plant Another Tree.

Strawberries

We have had, on the whole, a very favorable season for the growth of strawberry plants, and we will have a fine stand of both common and everbearing sorts from which to supply your needs. The vines did not set so many plants as in some years, so consequently the new plants are extra strong and heavy and I feel sure will please you. We have narrowed down our list of varieties to those which have proved best suited to this section and most profitable to the average grower.

We have been growing strawberry plants ever since we came to Nebraska in 1880, and have tested out many hundreds of varieties in that time. Many of these were highly praised in the East, but we found them unsuited to Nebraska, and this is one of the main reasons why you should not send a great distance away for strawberry plants or other nursery stock. We offer you a selection of varieties that is tried and tested, and we feel sure will give satisfaction.

give satisfaction.

strawberries are listed as pistillate (P) or staminate (S).

The blossoms are either perfect or imperfect. The imperfect are called pistillate, because destitute of stamens containing pollen, and have only pistils to receive the pollen from a staminate variety marked (S) near them or in a parallel row. Remember the staminate or fertile sorts will bear alone, but the pistillate sorts will not. We usually plant one row of staminate to two of pistillate.

Packing and Shipping—We use great care in packing, so that plants will reach destination in first-class condition and that plants shall be true to name and carefully labeled. If shipments are made late in the season and weather warm they should be expressed. Early in the season they may be shipped by freight. When plants are bought near home the express charges will be at least one dollar per thousand less than charges on shipments from the East, and risk of plants heating in transit is not half so great.

Parcel Post—We can send plants my mail postpaid that are bought at the rate of twenty-five, but if a hundred is to be sent add 10 cents for postage, within 150 miles; 300 miles to 600 miles, 15 cents; over 600 miles, 20 cents.

We Have Tried All Strawberries Listed and Know Them To Be Good.

When the rlants are received dip the roots only in water or thin mud and lay them loosely in a cool cellar or heel them in in a shady place, spreading each bunch to occupy one or two feet of the drill, packing dirt firmly about the roots, but leaving tops uncovered. Water them often until ready to plant. If so treated they will be in better condition to replant than if planted on arrival if the weather is dry.

We charge double price for plants in August and September, or \$2.00 per 100 for stand-

ard sorts.

We charge double price for plants in August and September, or \$2.00 per 100 for standard sorts.

Our plants are dug fresh as ordered and not handled by two or more firms before you get them. We dig the whole row, thus getting the strong plants near the center of the row. Plant in rows as wide apart as corn rows and have the plants about 15 inches apart in the row, requiring about 10,000 plants for an acre, or 62 plants per square rod.

In planting have the crowns even with the pressed surface of the ground and press the soil firmly about the roots, which should not be bunched together in planting. Cultivate them every week. Tolerate no weeds. Pinch off all fruit stems first year. Do not allow rows to spread more than 18 to 24 inches wide, and cut all runners that reach beyond that limit. It is a great mistake to let them grow too thickly, like grass.

Spray your plants with Bordeaux to prevent rust.

To save your berries from late frosts turn the mulching over on the plants and blossoms till danger is past. After first crop of fruit is picked trim your rows down with plow or spade to ten inches and let runners start new plants on the edge of the plowed space. Cover with mulching from November 15th to December 1st, and rake off into space between rows when plants begin to grow in the spring. If for any cause you do not get a good stand of plants, write us as early as you know it, and we will help you out with more plants free of charge if we are to blame for poor condition of them, or will not charge more than half price. Can ship plants till the 20th of May. Lime dust made by slacking fresh lime with strong lye water and slifted on strawberry or vegetable plants when dew is on is an excellent remedy for insects and beneficial to the plant. A little flour added to the lime will make it stick a long time. Can add parls green if needed. We have more varieties than we are listing; only catalog those we have a surplus of.

PRICES OF LEADING STANDARD SORTS

In giving the order for 1,000 or more, not less than 200 of a sort si	hould be	selecte	đ.
Dunion (C) At the emergence station in Tillerin it may be seen a	25	100	1,000
Dunlap (S)—At the experiment station in Illinois it was pronounced the best for three years among eighty-two other varieties. We have great confidence in this sort. It has a fine berry, is prolific; stands drouth, heat and cold, and transplants easily. There is danger of it matting together too thickly in the row. The lead-			
ing sort now	.40	1.00	6.00
tion; very productive of large berries. The Gibson is a strong, healthy plant	.50	1.50	8.00

AROMA (P) Late

The berries are large to very large, and hold up well to end of season. It has been claimed to produce twice as much fruit as Gandy, but we would hardly think it probable, where both are grown under the same conditions. The quality of fruit is good. We recommend this sort to anyone wanting a late market berry. If large, bright colored berries, late in season, are an object to you, then try Aroma, and you will be pleased.

25 100 1000

.....\$0.50

THE COOPER

We will have a very limited number of plants of this variety to offer this season. This is the variety which has created such a furore among Michigan growers the past season or two. The introducer says, "It is the most beautiful, largest and heaviest yielding variety we have ever seen and we have tested hundreds during the past forty years." It is the strawberry without a fault, solid with no core or hollow centers, no green tips, bright red in color and a flavor as good as the best. Eighteen berries will often fill a quart and the plants are very large and productive with wonderful vitality and unexcelled root system. We advise you to order early so the plants can be reserved for you.

100 \$3.50 \$1.00

DR. BURRILL (S)

This variety is strongly staminate, with a long blooming season, making it an especially good pollenizer for pistillate sorts. In plant growth it is remarkably strong and healthy, with very deep root system, making it a great drouth resister. Its foliage is large and brilliant dark green, very tough and resistant to disease.

It will not do its best in fruit, if allowed to set too many plants and we advise cutting runners freely. 25 \$0.40 100 1.000 Prices \$1.00

KELLOG'S PREMIER (S) Early

The Premier is a strong pollenizer, and plants grow large and root deeply. It succeeds in all climates, and is wonderfully productive of large, beautiful formed deep red berries of the very finest quality. The berries are ideal for canning and shipping to long distant markets. Best early sort,

\$1.25

Everbearing Strawberries

What lingering doubts may have been felt as to the practical value of this new race of strawberries are rapidly vanishing in the light of experience. There is now scarcely a discordant note in the general praise of their qualities for the home garden, and the developments of the present season indicate a greater value for the market garden than had before seemed probable. They have been on trial over a wide territory for about six years and the following points clearly demonstrated.

years and the following points clearly demonstrated.

1st. Extreme health of foliage. Nothing approaching it has been exhibited by any of the old line varieties. This is especially true of the Progressive which scarcely shows a rusted leaf while other varieties planted near it may be badly affected. All strawberry growers know that healthy foliage means capacity for heavy fruiting.

2nd. Extreme hardiness of plant. Even the plants that by accident may have been left uncovered along the rows generally come through the winter in good condition.

3rd. The plants produce a good crop the season they are set. The planter does not have to wait a year for returns; really only a few weeks. This enlarges the opportunity of tenant farmers, and those who must have fruit at once.

4th. They are the only early strawberry. Affords a good picking a week before the first early varieties of the old kind.

5th. The crop they bear in June compares well with the old varieties, especially in unfavorable seasons where frost or heat cuts short the main crop.

6th. The quality is simply exquisite, far sweeter than the standard kinds that we have been growing for twenty years. In this matter the Progressive is decidedly at the head.

head.

Progressive—Plant much like Dunlap, strong, healthy and very hardy; good plant maker. Fruit good medium size, dark red inside and out; blossoms strongly staminate; every bloom makes a perfect berry; bloom and fruit well protected by the foliage, a most valuable feature, as it takes hard freezing to injure the fruit. Progressive is the most perpetual, giving good pickings for over three months in the fall when the weather is favorable. Progressive fruits alike on the new as well as old plants; nothing unusual to see bloom and berries on the new plants even before they take root. We regard Progressive as our most valuable Fall-bearing Strawberry.

Superb (S)—Originated by Mr. Samuel Cooper of New York from whom we obtained our plants of this variety. The fruit is large, dark red, glossy, firm and of extra good quality. It is widely advertised by Michigan growers as best of all the everbearing sorts. We find that it is not equal to Progressive for productiveness the first year, as Superb only bears fruit on the parent plant the first year, while the other sorts also bear on the runner plants, which makes an important difference in the yield the first year. It is claimed they excel in yield the second year. Last spring the Superb yielded more fruit of superior quality than the common sorts.

Peerless is a new sort we offer. We obtained them from Mr. Samuel Cooper of New York, who was the discoverer of the first Everbearing Strawberry in 1909.

The berries are handsome and larger in size than other everbearing sorts. Are nearly equal to Progressive in productiveness. The plants are large, healthy and free from rust. We consider this a most valuable berry. Last spring it out-bore the Dunlap and the berries lasted a week later than the Progressive.

Planting—If planted in the garden, plant 1 by 3 feet. Pick off all fruit stems until August 1st, to allow the plant to become well rooted and established. Early runners may be planted by putting some soil on the joint where the leaf starts. One year plants, after bearing in June, should be treated the same as other sorts. Mow off the tops, narrow down the rows and cultivate between them. Would advise planting a new patch each year. Some of the Progressive plants set too many fruit stems and these should be thinned out. Prices of everbearing plants:

Mail	Mail	Mail	Mail	Exp.
Doz.	. 25	50	100	1000
Progressive\$0.50	\$0.75	\$1.10	\$2.00	\$12.00
Superb	75	1.10	2.00	12.00
Peerless	1.00	1.30	2.50

Select Evergreens			
Select Hvergreens			

Evergreens should be planted in the spring when sap is starting new growth. We handle transplanted trees, which are much safer to transplant than seedlings. Western grown evergreens succeed much better than Eastern trees, as our atmosphere has much less moisture than that of the East. Roots should not get dry for a moment on account of the resinous nature of the sap. Dip the roots in mud thick enough to adhere, and settle good soil about the roots with water. Leave surface about tree, basin shape to hold water and mulching. Water thoroughly, but not too often, till November. The Black Hills Spruce and Ponderosa Pine, and the Colorado Evergreens are all succeeding well. The Jack Pine is doing remarkably well on the government reservations in this state. It transplants with very little loss. We recommend it for windbreaks instead of cedars. Scotch and Austrian Pines are excellent for windbreaks and stand drouth. White Pine transplants micely, and is handsomest of the pines, but will not stand extreme drouth.

Platte Valley Cedars		
riatte valle vacuals		

Owing to the insistent demand we will again offer Platte Valley cedar seedlings for sale. We quit propagating them on account of the cedar rust affecting certain kinds of apple trees, causing rust on the foliage. However, the cedars which grow wild along the Platte River do not sem to be affected, so will supply you this spring with fresh dug, native cedar seedlings. We will take up as many as possible with the earth on the roots, so they will be practically sure to grow. If the river is very high in the spring we may be delayed in getting them out and not able to ship as early as other stock. Prices with soil on

Ornamental Shrubs

We believe there is no house so poor and unpretentious that it cannot be made to look cheery and homelike by the planting about it of trees, shrubs and vines, and no house so magnificent that it does not need the softening touch of flowers about it. We know the busy housewives all love flowers, but we also appreciate the fact that they do not have the time to give to tender plants that require much care. For this reason we are giving below a list of perfectly hardy shrubs that once planted and established in good soil require no more care and bloom not one season, but year after year. Surely a few dollars is not too much to invest in something that will give you pleasure for a lifetime.

Can send smaller sizes by mail at same price.

Eac	h	10
Althea, Rose of Sharon—Flowers of large size, bell-shaped, double, full, and of brilliant and striking colors, borne in great profusion in August and September; make beautiful ornamental hedge. We offer them in three colors, double rose, double red and double white; 3 to 4 feet		\$4.50 4.00
Almond, Double Flowering—Pink. A branching shrub two to four feet, with broad, lanceolate, bright green leaves. Native of China and Japan. Flowers double, rose color and borne in great profusion in early spring. One of the first shrubs to flower. One of the best flowering shrubs and highly recommended; 2 to 3 feet	rE	
White. Same as the pink variety in growth and habit, but bearing white	J	
flowers. They should be planted together; 2 to 3 feet	15	
The flowers are a pleasing shade of violet-mauve, and are borne in dense cylindrical spikes, which under liberal cultivation, are from 12 to 15 inches in length by 3 inches in diameter; it succeeds everywhere and flowers freely the first season planted. Needs protection in winter. No. 1 strong		
plants		4.00
3 to 4 foot trees	00	
Barberry Thunbergl—A valuable little shrub that fits in almost every planting. Grows about everywhere, handsome foliage of bright green, oval leaves that turn to brilliant shades of orange and red in the fall. Slender, grace-		
ful branches protected by thorns, are lined with little scarlet berries from early autumn well into winter. Very valuable for a low hedge.

fragrance; very popular	15	

10 Each Cornus (Dogwood)—The shrubby dogwoods are mainly valuable for the brilliancy of their barks and berries and the handsome variegations of their foliage. All varieties do well in the shade. foliage. All varieties do well in the shade. 2 to 3 feet \$4.00 3 to 4 feet Cranberry, High-bush—A very decorative native shrub, growing eight to ten feet high, with white flowers in May, followed by beautiful showy clusters of scarlet fruits; 2 to 3 feet..... 4.50 Currant (Flowering)—This is a large graceful ornamental shrub, which produces fragrant yellow flowers and large quantities of large black currants 4.50 Deutzias—Valuable shrubs having a dainty bell or tassel-shaped flower borne thickly in wreaths along their branches in May. Useful in landscape work Euonymus (Burning Bush)—Tall growing shrub with slender branches. Flowers appear in numerous small forked cymes, succeeded by large, deeply lobed fruits of strawberry pink with white seeds and orange arils; 2 to 3 feet 45 4.00 .65 Elder (Golden leaved)—Contrasted with other shrubs the golden yellow leaves of this European Elder give heightened effects in tone and color. Flowers white, in flat topped cymes. Grows naturally 10 to 15 feet but can be pruned into a neat compact little bush..... 4.50 Forsythia (Golden Bell)-These splendid old shrubs growing 8 to 10 feet tall eventually, light up the garden with glinting masses of yellow, very early in the spring before the leaves appear..... .45 Fringe (Purple or Smoke Tree)—A familiar shrub that is made attractive in summer by the light, airy or mist-like covering of the panicles of bloom. This is one of the most interesting shrubs to group with others on account of its peculiar flowers.

2 to 3 feet.

3 to 4 feet. Honeysuckle (Tartarian or Upright)—A tall growing bush attaining 8 to 10 feet if left unpruned. Very bright in the early spring with its pink and red flowers and resplendent in the fall with orange and red berries. Makes a nice hedge if kept pruned.

2 to 3 feet 18 to 24 inches 3.00 Do Its Surroundings Add to the Beauty of Your Home?

If Not, Why Not?

Hydrangea (Paniculata Grandiflora)—This panicled, hardy flower is familiar to almost everyone, as the most conspicuous shrub in any collection during August and September. The massive plumes of white flowers bend the branches with their weight, changing finally to pink and bronzy green. Very attractive; also in tree form, making a well branched tree 6 to 8 feet tall, producing many large panicles of flowers.		10
18 to 24 inches Hydrangea, Hills of Snow—A vigorous shrub, with large clusters of white flowers, similar to Snowhall, but larger, from June to August. Very	.60	\$7.00 5.50
showy in large groups. 18 to 24 inches 2 to 3 feet Japan Quince—Very early in the spring this fine old shrub is completely covered with dazzling scarlet flowers, followed by small quince-shaped fruits which are quite fragrant. Growth bushy with protecting thorns. Suitable		5.50 7.00
which are quite fragrant. Growth bushy with protecting thorns. Suitable for hedges. 2 to 3 feet 18 to 24 inches		4.50 3.50

The following should be planted in the fall: Snow Drop, Crocus, Crown Imperial, Hyacinths, Jonquils, Narcissus, Tulips. Liliums can be planted in the fall or spring and Peonies in the fall or spring, but fall is preferred for planting.

If you wish to plant any of these bulbs in the fall write for prices at that time, as it is impossible to price them so far ahead.

A House Becomes a Home When Adorned With Shrubs and Flowers.

Roses

Our Roses are all very strong two-year-old plants, and are not to be compared with the puny greenhouse plants from two-inch pots.

Write U. S. Department of Agriculture, Washington, D. C., for Farmers' Bulletin No. 750. It will give you a vast amount of information about Roses. It is free.

Hybrid Perpetuals

These are hybrids or crosses between June and Monthly roses, partaking of the hardiness of one parent and the perpetual blooming habit of the other. They are by far the most popular family of roses, needing good soil and culture, as they can only bloom on new shoots of the current season. Free manuring after the first crop will insure better blooms later in the season.

Hybrid Perpetual Roses

Prices: 65c for No. 1 grade hybrid perpetuals, except as noted.

If ordered by mail, add 5c to the order for each plant, or 10c for three. Mention your second choice.

Alfred Colomb—Bright carmine red; clear color; large, deeply built form; exceedingly fine

Anne de Diesbach (Glory of Paris)-Brilliant carmine pink. A superb garden sort; fragrant; one of the hardiest and best.

Baronne de Bonstettin-Rich, dark red, passing to velvety maroon; highly fragrant; very double.

Coquette des Alps—One of the finest pure white hybrid perpetuals; large, full, finely formed flower; pure white, sometimes faintly

formed flower; pure white, sometimes faintly tinged with pale bush; profuse bloomer.

General Jacqueminot—This might be called the rose for the million, for it is still a universal favorite. Bright crimson-scarlet, exceedingly rich and velvety.

General Washington—Color brilliant crim-

son; very rich and beautiful; large, per-fectly double and a free bloomer.

John Hopper—Bright rose with a carmine center; large and full.

Madam Charles Wood—Flowers large; dazzling crimson; a constant bloomer; very fine. Magna Charta—Bright, clear pink, flushed with violet crimson; flowers large, fine form, sweet, very double and free bloomer.

sweet, very double and free bloomer.

Mrs. John Laing—Deep rose; large, fine form; fragrant, vigorous grower and hardy. One of the most profuse bloomers.

Marshall P. Wilder—New; color cherry carmine; continues in bloom long after others are out of flower; exquisite.

Paul Neyron—Deep rose color, good foliage and by far the largest variety in cultivation; one of the best.

Mad. Plantiag. New double.

Mad. Plantler—Very double, pure white; extremely hardy. Price, 50c.

American Beauty-One of the best and American Beauty—One of the best and most valuable roses, both for garden and house culture. Color rosy crimson, exquisitely shaded and very handsome. Extra large, full flowers and fine buds. The plant is a constant bloomer. Each shoot produces a bud. The fragrance is delightful. Vigorous growth and has the ever-blooming qualities of the Tea Rose. Protect in the winter.

Frau Karl Druschkl or White American Beauty—A pure paper white, free flowering, large size Hybrid Perpetual. It is a remarklarge size Hybrid Perpetual. It is a remarkably handsome plant with bright, heavy foliage and strong, upright growth. The bloom is perfect in form on fine, long stems, and of the purest possible white. There is nothing in the line of perfectly hardy roses that can compare with this one. Price, 75c.

P. C. de Rohan-Dark crimson, changing to maroon.

Ulrich Bruner-Brilliant cherry crimson:

very strong grower.

Clio—Flesh color, shading center: large and fine form. shading to rose in the

"Baby Ramblers"-A type of rose which "Baby Ramblers"—A type of rose which is very popular for bedding purposes or for borders around rose beds, or along walks. They form shapely, compact, bushy specimens about 18 inches high and produce in great profusion immense trusses of small flowers from May till severe frost. Colors, red, pink, white and yellow. Prices: 75c each, 10 for \$7.00.

Climbing Roses

50c Each for No. 1 Grade.

Crimson Rambler—The famous crimson clustered climber, so extremely effective when grown on pillars and trellises. The plant is a vigorous grower, making shoots 8 to 10 feet long in a season. The foliage is large and glossy; the plant looks like a mass of double crimson flowers when in bloom. The panicles are large and remain perfect for several weeks. Perfectly hardy anywhere anywhere.

anywhere.
Yellow Rambler—Flowers of medium size, in immense clusters; very sweet scented; a clear, decided yellow. The hardiest of all yellow climbing roses. It is a rampant grower, well established plants often making a growth of 10 to 12 feet in a season.

White Rambier-Resembles Crimson Ram-

White Rambler—Resembles Crimson Rambler in foliage and habit; flowers pure white. Baltimore Belle—Pale bluish, is almost white; very double and fragrant.

Queen of the Prairle—Bright rose color; large and double; very vigorous and rapid in its growth; the best climbing rose.

Blue Rambler—Hailed by rose growers as the forerunner of a genuinely cornflower blue rose; is a seedling of Crimson Rambler; very vigorous and hardy and free blooming.

Flowers of Fairfield-A sort of the wellknown and famous Crimson Rambler climbing rose. This new rose produces its lovely flowers until killing frost stops further growth. Each, 60c.

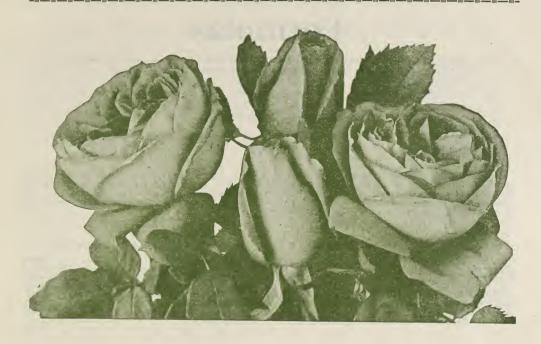

Dorothy Perkins—Flowers in clusters of 25 to 30 of a beautiful shell-pink. A rapid climber.

climber.

Red Dorothy Perkins or Excelsa—Same as above only the blossoms are red.

Thousand Beauty Rose—A new climbing rose, producing on the same bush so many different colored flowers that it is impossible to describe the variations, hence the very fitting name. Blooming profusely from beginning of June until last of July. Colors run from tender rose to bright rose and carmine with white and yellow tints showing; a strong grower and hardy. Each, 60c.

Your Wife Is Entitled To a Few Choice Rose Bushes in Her Flower Garden.

Moss Roses

The Moss Rose is as hardy as any rose can be, and an extra vigorous grower. They are much admired on account of their bright, healthy foliage and mossy-like covering of the buds. While they bloom but once a year, the flowers are large, beautiful and plentiful.

Capt. John Ingram—Dark, velvety purple; full and fine.

Giory of Mosses-Pale rose; very large, full and beautiful.

Perpetual White—Pure white. It blooms in large clusters. Price each, 75c.

· Austrian Roses

This class flowers on extreme ends of wood of previous season's growth; very little pruning is therefore required.

Harrison's Yellow—Double; bright yellow; very showy and fine.

Persian Yellow—Deep, bright yellow; small but handsome; double; a very early bloomer and much the finest hardy yellow rose. Price each, 75c.

Rugosa Roses

Alba—A splendid white variety; highly scented.

Carman—A hybrid obtained by crossing the pink Rugosa with Harrison's Yellow. Flowers the color of Gen. Jacqueminot and bloom in clusters, continuing nearly all summer. A strong grower; handsome foliage; hardy.

Rubra—Bright rosy-crimson; flowers succeeded by red berries; a very handsome shrub. Price each, 75c.

Hybrid Tea Roses

Price, No. 1, 75c.

Gruss an Teplitz—Large, rich scarlet, shading to velvety crimson; fragrant, and flowers in great abundance all summer. Valuable for bedding.

La France—Delicate silvery rose, shaded with cerise pink, often silvery pink with peach shading. Very large, double and superb form. Flowers continuously throughout the season. None can surpass the delicacy of its coloring; in fragrance, incomparable; in form, perfect. Sweetest and most useful of all roses.

TREE PROTECTORS—Made of wood veneer; protect the tree from rabbits, insects and sun scald. Price \$2.00 per 100. Easily applied. Wet the veneer and tie around tree with small wire or cord.

Formulas

Black knot on plums or cherries should be cut out and burned as soon as discovered.

For aphides or plant lice use kerosene emulsion on all plants.

BORDEAUX MIXTURE

Copper Sulphate	 6 pounds
Quicklime	 4 pounds
Water	 0 gallons

Dissolve the copper sulphate by putting it in a bag of coarse cloth and hanging this in a vessel holding at least 4 gallons, so that it is just covered by the water. Use an earthen or wooden vessel. Slake the lime in an equal amount of water. Then mix the two and add enough water to make 40 gallons. It is then ready for immediate use. For rots, moulds, mildews and all fungous diseases.

AMMONIACAL COPPER CARBONATE

The copper carbonate is best dissolved in large bottles, where it will keep indefinitely, and it should be diluted with water as required. For same purposes as Bordeaux.

COPPER SULPHATE SOLUTION

PARIS GREEN

Paris Green	1 pound

If this mixture is to be used on peach trees, 1 pound quicklime should be added. Repeated applications will injure most foliage, unless lime is added. Paris green and Bordeaux can be applied with perfect safety. The action of neither is weakened, and the Paris Green loses all caustic properties. For insects which chew.

Arsenate of Lead is probably the best poison for insects. It adheres to foliage and does not injure it. Use 2 pounds to 50 gallons of water.

Arsenate of Lead is used mostly for spraying trees. Two pounds to 50 gallons of water.

KEROSENE EMULSION

Hard Soap½	pound
Boiling Water 1	gallon
Kerosene 2	

Dissolve the soap in the water, add the kerosene, and churn with a pump for 5 to 10 minutes. Dilute 10 to 15 times before applying. For insects which suck, caggabe worms, and all insects which have soft bodies.

"HOME BEAUTIFYING SUGGESTIONS" BOOKLET

We have purchased a supply of the above valuable booklets for those of our customers who are at all interested in improving the appearance of their homes. We consider it one of the best helps that home owners can get outside of the expensive services of the Landscape Architect.

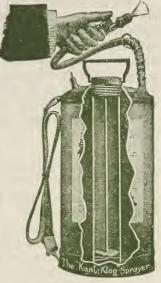

Will be glad to send you one of these booklets for the nominal sum of 10 cents and this charge will be refunded in case you send an order.

The "Kan't-Klog" Sprayer, Style G

The sprayer body is made of heavy polished brass or galvanized steel, as desired. Top and bottom are dome shaped; joined to body under heavy pressure, making a complete double seam. The body is supported and further strengthened by a heavy steel band around the bottom. When completed this body is tested under double the pressure formerly used, so enabling you to get a finer spray for a greater length of time than with any sprayer we have ever made. ever made.

SPRAYER MADE WILL THROW A SPRAY OF EQUAL FINENESS FARTHER THAN THIS MACHINE WILL THROW IT.

The air pump is made of heavy brass two inches in diameter. Hose couplings are solid brass, standard cut threads, ends heavily ribbed to prevent hose slipping off. Hose is high grade, three-ply, supported by a coiled spring, bell-shaped at outer end to prevent breaking. A safety valve is provided to allow air to escape after the necessary pressure has been obtaind. The "Kant-Klog" nozzle furnished with this machine without extra charge makes two bell sprays of different size, volume and fineness; one flat spray and two sizes of straight streams. The thumb pressure Spring Hose-Cock shown above is also furnished with Style G without extra cost. Sprayer holds between four and five gallons and can be carried either by carrier strap or air pump handle.

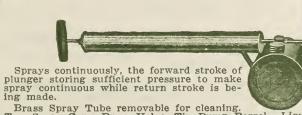

Style G

DIRECTIONS

A few seconds' working of the air pump thoroughly agitates the solution and charges the sprayer with compressed air. This being a very powerful and elastic force will, as soon as the thumb presses the "Shut-off," force out the liquid in the form of either a spray or a solid, continuous stream as desired. After sprayer is charged you need not stop for anything; just walk along from one row to another, the machine will supply sufficient spray to enable you to do work as fast as you can walk. The great saving in time, labor and solution, even on small sprayings, will more than pay for this splendid machine the first month it is used, to say nothing of the big increase in crops as a result of spraying prop-

Brass Spray Tube removable for cleaning.
Two Spray Caps, Brass Valve, Tin Pump Barrel. Liqui of tin. Capacity one quart. Price, \$1.10 each; postpald.

A NEW FORCE PUMP

Junior No. 5—Does away entirely with the objectionable foot-rest, clamps, leather suction, packing, etc.

This pump requires no fastening of any kind, holds itself down and works anywhere and everywhere. All the operator need do is to press the plunger down. It rises of itself, the upward stroke being made by a brass spring forcing the cylinder apart.

The all brass suction working within a brass cylinder with all brass valves, does away entirely with all leather, rubber, or other packing. It is practically limpossible for any part to get out of order.

Will throw three sizes of solid continuous streams and two sizes of fine round sprays. Has automatic mixer to keep solution stirred, pleases everybody and will last a lifetime.

Weighs only 4 pounds and is ready for instant use everywhere. Price of Junior No. 5, \$3.80. 3-Foot Brass Extension Pipe, 65c.

Junior No. 5

OUR BARGAIN PAGE

We are proud of this page, for we honestly belive that the items listed here are exceptional values at the prices at which they are offered. We could not buy these things at wholesale and offer them at these prices: only the fact that we have a good stock on hand, enables us to do so. We know that this page will be a popular one and feel that it deserves to be but to start the ball a rolling we are going to add to the first 50 bargain orders that we receive 3 extra fine gladioli bulbs, absolutely free. We will add the bulbs to any of the bargain offers but you will have to speak quick to get them.

Neither our freight nor early order discount applies to these offers:

WHAT \$1.00 WILL BUY

- (a) 8 No. 1 Concord Grapes, 6 St. Regis Everbearing Red Raspberries and 6 Black Raspberries. Regular retail value. \$1.25. All for \$1.00 post paid.
- (b) 6 heavy 2 year Rhubarb Roots and 25 Asparagus. Regular price \$1.25. Sent post paid for \$1.00.
- (c) 50 Progressive Everbearing Strawberry Plants and 50 Dunlap. Regular price \$1.50. Post paid \$1.00.

THREE \$3.00 BARGAINS

- (g) 10 Concord No. 1, 10 St. Regis Raspberries, 10 Dewberries, 10 Rhubarb and 25 Asparagus; all for \$3.00.
- (h) 10 Concord No. 1, 10 St. Regis Red Raspberry, 10 Black Raspberry, 50 Everbearing Strawberry and 50 Dunlap Strawberries; a \$3.60 value for \$3.00.

Copy of State Entomologist's Certificate of Nursery Inspection:

This is to certify that on the 5th day of July, 1923, the growing stock and premises of the North Bend Nurseries, J. W. Stevenson, Proprietor, of North Bend, Nebr., was inspected and no San Jose Scale was found nor indications that it had ever been present in the nursery or its vicinity. The stock is apparently in a healthy condition and free from other dangerous insect pests and fungous diseases.

MYRON H. SWENK, State Entomologist.

By R. W. Dawson, Deputy.

This certificate is good until July 1, 1923.

SEED CORN

California Wonder Corn—After another year's trial we are still much pleased with this corn. Although perhaps injured a little by the drouth of last summer it yielded 90 bushels to the acre which was 30 bushels more than the best corn around here. It is a white corn and the stalks grow very tall and heavy. It would be a fine silo corn. Price, 75 cents per peck; \$2.00 per bushel.

Pride of the North—A yellow 90-day corn. We plant this usually from the middle to the last of June. After allowing our old strawberry beds to fruit they are plowed up and this corn planted. If you want an early maturing corn this is it. Price, 75 cents per peck; \$2.00 per bushel.

Stowell's Evergreen—A medium to late sweet corn. We like sweet corn at our house and we usually have it from July until October if the frost keeps off that long. You can, too, by planting several different times a week apart. Price, 15 cents per pound or \$1.00 per peck.

We would refer those wishing field seeds to the Younkerman Ceed Co., of Council Bluffs, Iowa, as a trustworthy and reliable firm.

GARDEN AND FLOWER PLANTS FOR SALE

Sweet Potato, Tomato, Cabbage, Cauliflower, Egg Plant, Pepper, Celery, Pansy, Asters, Carnation, Snapdragon.
