Railway & Mining Share List 588 | Railway Traffic Returns 589

On April 28 was Published No. 4, Vol. VII., New Series, Price 8d; by post, 9d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for April gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c, It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to April 25.

Advertisements for the next number, to be published on May 26, must be sent, to insure insertion, on or before May 24.

The December Number of the INVESTOR'S MONTHLY MANUAL gives, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1875 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the Names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1876 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. It is intended, in addition, to furnish the Names of the Chairman and Secretaries, or Managers, of the various Companies. A copious Index is added for purposes of reference. Price 1s 4d; by post, 1s 6d.

OFFICE—346 Strand.

THE MONEY MARKET.

The great political event of the week—the commencement of a new crisis in France—is a distinct influence of an important kind added to those which we referred to last week as likely to keep down the rates for money. In addition to the apprehension caused by the events in Eastern Europe, there will now be apprehension as to the results of this French crisis.

And the effects of this apprehension will be more marked than those due to the apprehensions connected with the Eastern war. By itself that war does not concern the money market much; its effects on the money market are mainly indirect, through the fear of its causing more serious complications. But the French crisis occurs in a country with which we are directly in the closest monetary relations, and the apprehension arising instantly sends money to London for safety. So long as there is trouble in French politics this effect will continue to be marked.

At the same time it is not likely that the accumulation of money in London which the French crisis will promote will lead to an early reduction of the Bank rate. The reserve is so low that some time must elapse before it can reach a point which would justify the Bank in such a step. In times like these an unusually large reserve must be kept, and thus a reduction of the rate will be retarded. But the open market will quickly feel the influence of any new money coming here for safety, and rates outside may accordingly come to be much under the Bank. There is certainly no great surplus of money seeking employment at present, but there is enough to turn the balance in an inactive time, and the addition of continental money coming here for safety will add materially to that surplus.

THE FRENCH CRISIS.

THE misfortunes of France are not at an end. Only a fortnight ago we were able to congratulate her on the great political tact which politicians and journalists were displaying in view of the present situation in Europe, and the seemingly provocatory language of Count Moltke. All were united in saying that France must be jealously neutral, and that no recriminations against Germany should be indulged in; and to this wise conduct—so unlike what would have been expected from France in other times—was largely due the security of Europe against the outbreak of a new war in the West on the occasion of the Eastern conflagration. We might have added that, in other respects, France appeared to be profiting from the comparative freedom she has enjoyed since the close of the Franco-German war, and the political training which Frenchmen have been receiving during a genuine Parliamentary régime, however imperfect the constitution has been in many respects. A few months ago, we think, there was fair ground to hope that the intensity of political animosities would gradually become weaker, that the idea of effecting constitutional and other changes by Parliamentary votes and fresh elections, instead of by coups d'état and insurrections, would take root, and that France was about to end the sterile period of alternate military dictatorships and republican or socialistic saturnalia. But all at once the mischief of the original vice of the present French Constitution-a vice incorporated with it, through the temporary accident of one of the French minorities being placed in a majority by an election in the agony of the war-has once more been brought to light. That vice was the election to the headship of the Executive power, for a fixed term, of a soldier who had no acquaintance with or trust in Parliamentary Government, and whose political sympathies happened to be with the minority, which was temporarily possessed of power, and which was ready to risk anything to retain that power. No choice, as was universally recognised at the time, both in France and out of it, could have been more unfit, even for the successful working of a tried Constitutional sys-

tem, and the prespect could not be looked on without misgiving when the system to be tried was new, and the country was one where system after system had been tried and failed. The only hope was that as the soldier chosen was honest and sincere, and willing to avoid a resort to force to change things violently as he wanted them, the system would be worked somehow until the fixed term came to an end. True, it would be worked only in a jerky and inconvenient fashion, and the forbearance of all parties would be tried, but this would be better than a violent change, and the consequent solution of continuity in the political life of France, while the training, as has been in fact the case, would be of the utmost value to French politicians. But now even this hope is gone. The sincere but unconstitutional soldier has suddenly dismissed a Premier who commanded a majority in a newly elected Chamber, and has replaced him by a Minister of that very minority which France has so decidedly and strongly shown it will have none of. Thus the whole Constitutional prospect in France is over-clouded. The Duc de Broglie and his friends, who would have a Legitimist Monarchy if they could, are again in power, and in circumstances which clearly point to a renewed attempt at making good permanently their hold of that power. The continued existence of Parliamentary Government is thus once more in danger, and all the political wisdom and tact displayed during the last few years, and the valuable political training the French people have had, are apparently to go for

We cannot wonder, therefore, at the commotion which has been excited by Marshal MacMahon's dismissal of M. Jules Simon, for no other alleged cause than a disagreement with the latter as to the degree of opposition to be given to a proposed repeal of the obnoxious Press laws, which the previous Assembly passed. It is the most serious calamity which could threaten France at this moment-even more serious, we think, than an unprovoked attack by Germany, which was lately feared, great as that calamity would have been. France is so far advanced in civilisation that no other Government than a Parliamentary one, in which great questions are settled by discussion, will suit it; but its political training has been so misdirected that it barely fulfils the conditions necessary for Parliamentary institutions. Still, with a little nursing, there was a fair prospect that Parliamentary institutions might grow, and it is the chance of this growth-that is the chance of the best form of Government for a modern State—which is destroyed. France is put back in the path of political progress for many years, while a foreign war, with all its evils, might have had the compensation of strengthening the political vigour of the people and healing the divisions of parties. Of course it is quite possible that Marshal MacMahon and his advisers may shrink from the extreme course they are apparently proposing to themselves-that of first trying another election to see if they will get a Chamber to their mind, and then, if they are not successful, setting the will of the French constituencies at defiance. There would perhaps be little harm in a new election, except for the disturbance it would cause; but there is a just fear of worse being in store, and of Marshal MacMahon having entered on a course from which a coup d'état will be the only issue. It is this fear, we suspect, which has added to the bitterness of M. Gambetta's language in moving a vote of censure on Marshal MacMahon for his unconstitutional procedure, although that language-little as we can blame it in the circumstances—will in turn be held to furnish a new excuse for Marshal MacMahon's advisers to continue their dangerous course.

It is an additional evil of the course taken by Marshal MacMahon, that it increases the danger of foreign war for France. Although the Marshal has thought it worth while to promise to discountenance an Ultramontane policy, it is Ultramontane advisers, and a party which rests upon Ultramontane support, who have got hold of him, and will endeavour to use France for their own purposes. Such a party is at least more likely to plunge France into foreign adventures than a Government which really represents the mind of France, and which has no sinister aims of its own. There is reason to fear that not only will this minority Government have the usual temptation of minority Governments to try foreign war to consolidate itself, but it will have a special temptation, for the sake of restoring Ultramontane power in Europe, to repeat the blunder of the Franco-German war. We can only hope against hope that the sincere but politically ignorant soldier who now governs

France will be made susceptible, in some way, to the outrageousness of his attempt to thwart a whole nation in its policy, and the gravity of the dangers which his folly tends to bring upon it. If he cannot govern conscientiously with the majorities of the representatives who are the choice of the French people, his clear duty is to resign and leave the nation and its Parliament to go their own way.

ENGLISH INTERESTS IN THE EAST.

The result of the debate on Mr Gladstone's Resolutions was so clearly foreseen when we wrote last, though the debate did not finish till Monday, that the record of the division has comparatively little interest. In spite of the partial success of the attempt to unite the Liberal party by emasculating the Resolutions, the Government has had a majority of 131 in favour of its confidence amendment. It has thus gained a great party triumph, which is all the more striking on account of the colourless character of the Resolutions, to which only, and not to a real censure upon the Government, many of those who voted against the Government would consent. Probably their triumph would not have been so great but for their strong profession of neutrality, and determination not to help Turkey; but we cannot believe that any English Ministry at this crisis could have committed themselves to any other policy, or that the debate, as is alleged, was necessary to force them into it. The triumph in a party sense, therefore, is not weakened by the circumstance of its having been obtained at the cost of the Government's borrowing part of its policy from the Opposition.

The policy of the country is thus clearly settled for the present as one of watchful neutrality; but events in war may be so rapid that the chances of our intervention being provoked must still be carefully considered. We doubt if the real gravity of the prospect was sufficiently considered in the debate,—the satisfaction justly felt at the immediate fear of war being removed by the Ministerial declarations helping perhaps to indispose people to look forward even to the very near future. But, though Parliament almost shirks the questions which must come up soon, the country should be fully prepared for them. Fortunately the Ministerial declarations as to "British interests," especially those of Mr Cross and the Chancellor of the Exchequer, furnish a useful starting point for discussion.

We subjoin in full the remarks on this point, both of Mr Cross and the Chancellor of the Exchequer. It will be observed that the text of both is that while there are European interests in what Russia may do, which may be important to us, there are also specially English interests—in other words, the safety of our road to India,—which may be put in peril by the events of the present war. These specially English interests are also the important matter. Moreover two ways are specified by which our road may be imperilled—by Constantinople falling into the hands of a foreign Power, and by the Suez Canal being interfered with. But these are not the only contingencies. Sir Stafford Northcote expressly says, "It is impossible to say what points may possibly be chalflenged. We must wait and see. Of course, my right hon. "friend did not pretend to give an exhaustive list, but he indicated in a clear and distinct manner that our direct road to India should above all things be preserved."

But how is the direct or other road to India likely to be endangered by the events of the war? This is the real turning point of the question of English interests in the East. To a certain extent there is also unanimity in the reply. Every one recognises that any attempt of Russia to occupy Egypt, or the Suez Canal, would be an interference with our direct road to India. It is unlikely enough, in the present outlook of the military situation, that such an attempt will be made; but Russia may have unexpected naval victories which might give her power to attack Egypt, or her military progress in Asia, if the war continues long enough, might bring the Russian troops to Syria, from which to Egypt is but a step. In a game where the unforeseen plays so large a part, it would not be safe to leave even such possibilities out of reckoning.

ments to try foreign war to consolidate itself, but it will have a special temptation, for the sake of restoring Ultramontane power in Europe, to repeat the blunder of the Franco-German war. We can only hope against hope that the sincere but politically ignorant soldier who now governs the sincere but politically ignorant soldier who now governs the sincere but politically ignorant soldier who now governs the sincere but politically ignorant soldier who now governs the salso a common opinion that the Russian occupation of Constantinople, while it would be an attack on European interests generally, would specially threaten our road to India. And with this opinion that the Russian occupation of Constantinople, while it would be an attack on European interests generally, would specially threaten our road to India. And with this opinion the Government apparently agrees.

and obvious than if the Suez Canal were interfered with, and we doubt if the common opinion is sufficiently considered; but Constantinople in the hands of a power like Russia would, it may be admitted, make our protection of the road to India more difficult and costly.

But there is a less common opinion that the road to India will be really threatened by other events in Asia, and this, we think, is what should be most watched. The consideration of it is not absolutely excluded by the words of the Ministerial declarations. Besides our direct road to Egypt, we have a recognised potential road through the Euphrates Valley. In 1872, a select Committee on the scheme of a railway through the Euphrates Valley, which was presided over by the present Chancellor of the Exchequer, came to the conclusion "that "the political and commercial advantages of establishing a " second route [i.e. by the Euphrates Valley] would at any " time be considerable, and might, under possible circumstances, " be exceedingly great; and that it would be worth the while " of the English Government to make an effort to secure "them; considering the moderate pecuniary risk which they "would incur." An interference with the route of such a railway would thus be an interference with a route which it would be desirable politically and commercially for England to establish. But the Russian troops in Asia, if they occupy Erzeroum, will be in the Euphrates Valleythe upper part, it is true, but still with nothing, in a military sense, between them and our route through the Valley. They would be within a month's march of the starting point of the railway on the Mediterranean, and a shorter distance from some part of its course.

Allowing that the Euphrates Valley railway is not an indispensable part of our direct road to India, it is also evident that any advance of Russia in Asia Minor by way of Erzeroum, brings her comparatively near to Syria, or in other words, as all history has shown, to the gates of Egypt. The distance may be very great, but there is no military barrier between, once the Turkish power in those regions is destroyed, which would inevitably result from the Russian occupation of Erzeroum. Russia would then be put in a position to interfere without much warning to us, by a very short advance beyond her frontier.

It is thus clear that very troublesome issues may soon be raised, according to the declarations and expressed opinions of Ministers. They have specified clear cases of what will be interference with our interests, but the line will be difficult to draw in others. Ministers may be well-disposed to let Russia occupy and annex an obscure village or two in Asia Minor, but if the annexations extend, at what point are we to interpose a veto, or take any other measure which may be thought proper to secure our interests? The Emperor of Russia is no doubt deeply pledged not to annex, and if so no questions will be raised, but the nearness of the military events to points which the Government has declared to be of vital interest to us is alarming. It will be impossible for the country to be tranquil, until the war is well over and peace re-established.

It would be a mistake, of course, to assume that any steps which Russia may take threatening to our interests, should be met by war, and war only. On the contrary, one of the difficulties of the matter will be the selection of measures stopping short of war. The mischief of the Russian advance in Asia Minor is that it tends to give the English Empire at one point vital to its cohesion a land frontier towards a firstclass European Power. Our safety from invasion anywhere, and our consequently small military preparations have been hitherto due to our insular position, and the distance of any of our possessions from a military Power of the first class. have not been obliged to join with other continental Powers in the race of bloated armaments. But with the direct road to India through Egypt assailable by land, or becoming liable to be assailed by land, by a great military Power, and with our second potential road through the Euphrates Valley almost bordered by Russian territory, what are our preparations to be? Are we simply to increase our naval and military pre-parations, or to occupy new places for defence as well? This is the sort of question which the Government must consider, while it is also feasible that instead of directly attacking Russia in Asia Minor, we may put greater stress upon her by occupying points of our own within the bounds of Turkish territory. But the prospect of having such questions to consider is not pleasant, though there is really no help for it,

out

roto tly after the outbreak of this lamentable war. It will be easy, perhaps, to occupy points of Turkish territory as an indirect mode of forcing Russia to retire, but it may not be so easy to get away, and so we shall be committed to undesirable annexations ourselves, and perhaps to complications with other European Powers.

Although our efforts will be directed to prevent that war from spreading, it is impossible for any one to say where it will stop. There are English interests, there are European interests, there are world-wide interests which may be concerned. We do not want additional territory—we want nothing. We wish this war had not broken out. Batoum and other places have been spoken of, but there is the Suez Canal, in which not only England, but the world, is seriously concerned. Why the Suez Canal should be attacked by Russia in any shape I cannot imagine. Whether attacked by Russia or by Turkey, that is a question of not only England, but the world, is seriously concerned. Why the Suez Canal should be attacked by Russia in any shape I cannot imagine. Whether attacked by Russia or by Turkey, that is a question of not only English, but European interest. It is the road from the West to the East of the world. Take another place in which not simply England, but the world is interested. I mean Egypt. Well, what am I to say about the Treaties as to the Straits of the Dardenelles and the possession of (Constantinople? Is it necessary for carrying on the war between Russia and Turkey and for the protection of the Christians in Turkey that Constantinople should be either attacked, approached, or occupied? I say "No." These are questions which no country in Europe could regard with indifference: and when I mention them, I hope they are so remote that they will not practically arise. But they are questions which must be considered by any British Government and which any Ministry, even if the right hon. gentleman (Mr Gladstone) himself were at its head, would not dare to neglect, or if it did, the country would very soon send it an answer which it could not mistake. However, I hope, as I have said, these things are in so remote a future that we need not contemplate them. Let me quote the words which the Emperor Alexander used on the 2nd of November last to arr Ambassador. His Majesty said: "He had on several occasions given the mos

(EXTRACT FROM THE CHANCELLOR OF THE EXCHEQUER'S SPEECH.)
When we say this is a struggle that cannot be confined in its progress or consequences to the parties principally concerned—that it may take an extended range which may involve us in consequences which this country cannot afford to disregard, we are told when we speak of British interests we use an ambiguous phrase, and are simply endeavouring to introduce an expression under the cover of which we may, if we please, carry this country into a war in alliance with Turkey. My right hon. friend went a little further than what the noble lord called asserting a negative. He endeavoured to sketch out to the House what, in a general way, might be considered specially the interests of England. I will say very little more than was said by my right hon. friend. I will only point that there are interests which we have in common with most other nations, and these are interests which may be considered more peculiar to ourselves. As regards the interests we have in common with other nations, I see no reason why we should put ourselves forward to fight for these alone, for which other nations may fight if they think it necessary. It is, of course, of interest to all South-Eastern and Eastern Europe that the greatest possible freedom of trade and of navigation should prevail in these parts of the world. There are many matters which are of interest to Europe generally, and I think we may feel contident that those nations which have a closer interest than ourselves will take care at the time they may find most convenient to protect their interests. If called upon, we shall not be found wanting in taking our part with those having common objects with us. But there are other interests, which are in a manner peculiar to ourselves. When I say peculiar to ourselves I do not mean that we are the only nation concerned in them, but we are interested in them so specially that in a sense they may be said to be peculiar to use our read to India—whatever that road may be—is of great im

important degree. It is impossible to say what points may possibly be challenged. We must wait and see. Of course, my right hon. friend did not pretend to give an exhaustive list, but he indicated in a clear and distinct manner that our direct road to India should above all things be preserved.

JOINT STOCK BANKS IN LONDON—GROUP (B)— METROPOLITAN AND ALSO PROVINCIAL.

YEAR 1876.

REPORTS FOR YEAR AND HALF-YEAR ENDED 31 DEC., 1876, COMPARED WITH REPORTS FOR PRECEDING PERIODS 1875-6.

We are now enabled by the appearance in usual course of the report of the National Provincial Bank to complete our analysis of the reports of the London Joint Stock Banks for half-year ended 31 Dec., 1876, by presenting the figures relating to the second Group (B), that is to say, Banks which are Metropolitan and also Provincial.

The first Table (A) gives the share, &c., capital:-

(A) JOINT STOCK BANKS IN LONDON—Group B—Banks Metropolitan and also Provincial—Constitution, May, 1877.

Head Office and Branches.						Share	8.	Paid-up Capital and Reserve. (000's omitted).			
Metropolitan,	Provincial.	Total.	Bank, and when Four	nded.	Nominal.	Paid per Share.	Price.	Paid-up Capital.	Reserve.	Total.	
No.	No.	No.			£	£	£	£	£	R	
25	124	140	1. London and County	1836	50	20	62	1,500,	700,	2,200,	
8	135	140	2. National Provincial	1833	50	21	90	1,570,	900,	2,470,	
8	98	106	3. National	1835	50	30	74	1,500.	80,	1,580,	
36	357	395									
1	33	34	4. Midland, Limited	1863	100	20	26	300,	50,	350,	
16	30	55	5. London & Provincial, I	. 1864	10	5	11	170,	60,	230,	
1	13	14	6. London & Yorkshire, I	. 1872	10	21	13	140,	-	140,	
56	442	498									

NOTE.—The National Provincial Bank have also two classes of shares (201 nominal), with 121 and 61 paid up. The National Bank was eriginally, and for many years, the National Bank of Ireland. The 98 branches, as above, are all in Ireland.

The paid-up capital of the National Provincial has been increased about 100,000l, and there is also some addition to the paid-up capital and reserve of the London and Provincial, consequent on extension of branches.

Table (B) gives the deposits and dividends :-

(B) Joint Stock Banks in London—1876-5—Group B—Banks Metropolitan and also Provincial—Deposits and Dividends.—(0,000's omitted; thus, 48 = 480,000*l*.)

	D						Dividends & Bonus pr. Cent. pr. Annum.				
Banks.	1876.		1875.		1876.		1875.				
	31 Dec.	30 June.	31 Dec.	30 June.	31 Dec.	30 J'ne.	31 Dec.				
	£	£	£	£	%p.a.	%p.a.	%p.a.	%p.a.			
London and County	22,24	21,50	21,40	21,25	16	16	17	16			
National Provincial	26,85	-	25,00	-	21	-	21	-			
National	8,94	8,65	8,86	8,20	12	12	12	11			
	58,03		55,26								
Midland, Limited	1,52	1,44	1,46	1,43	8	8	8	8			
London & Provincial, Lim.	1,66	1,60	1,50	1,40	12	12	121	10			
London & Yorkshire, Lim	48	41	40	51	4	4	43	4			
	61,69		58,62								

Note.—The National Provincial Bank publish only (in May) report and accounts for the year ending at the preceding 31 Dec. To the Deposits of the National Bank must be added 1,453,000l for Notes in Circulation in Ireland.

As the National Provincial Bank only publish their accounts to 31 Dec. of each year, we cannot exhibit the figures of that Bank in accordance with the other cases.

The deposits of the London and County are about ³/₄ million, and those of the National Provincial nearly 2 millions more than at end of 1875. In the other cases there is not much change.

The dividends of the three larger Banks for 1876, compare as follows with previous years:—

	Per (Cent.	Per Ce	nt.	Per Cen	ıt
Banks.	187	76.	1875		1874.	
London and County	16	*****	161	*****	. 20	
National Provincial				*****		
National	12		. 111		. 10±	

The National Provincial say in their report, in explanation of the stationary dividend, notwithstanding larger deposits, that the average Bank of England rate for 1876 was 2l 12s 1d, or 12s 3d per cent. per annum less than for 1875; and that 1876 was characterised by stagnation in almost every department of trade, and consequently that the business of banking has been less profitable than in former years.

less profitable than in former years.

Table (C) gives the cash and Government securities and the

acceptances:—

(C) JOINT STOCK BANKS IN LONDON, 1876-5—Group B—Banks
Metropolitan and also Provincial—Cash and Government Securities
and Acceptances.—(000's omitted; thus 8,710, = 8,710,000%)

	Cash		Jovernn rities.	Acceptances.					
Banks.	1876.		18	1875.		1876.		1875.	
	31 Dec.	30 June.	31 Dec.	30 June.	31 Dec.	30 June.	31 Dec.	30 June.	
	£	£	£	£	£	£	£	£	
London & County	8,710,	7,836,	8,257,	8,294,	3,048,	2,380,	2,162,	1,960,	
National Provincial	9,405,		8,280,	-	700,	-	602,	-	
National	2,506,	2,395,	2,310,	1,994,	15,	14,	14,	8,	
			19,147,				2,778,		
Midland, Limited	321,	226,	238,	206,	-	-	-	-	
Lon. & Provin., Lim.	592,	-	597,	576,	-	-	-	_	
Lon. & Yorks., Lim.	82,	64,	78,	89,	-	-	-	-	
			20,040,				2,778,		

The acceptances of the London and County are over 3 millions, or nearly a million more than at end of '75. Those of the National Provincial are a little higher, but still under \(^3\) million.

The next Table (D) collects into systematic form the profit and loss results of each of the six Banks for the six half-years 1874-5-6, so far as the published accounts will permit. The notes at the foot of the Table explain the method of construction.

(D) Joint Stock Banks in London, 1874-5-6—Group B—Banks Metropolitan and also Provincial—Profit and Loss Results. (In cols. 1 and 2 the 0.000's are omitted: thus 1.27 = 1.270.000L)

Note.—1. The National Provincial do not give the Expenses, and hence the figures shown in col. 5, represent the Profits, after deducting Interest allowed to customers, Rebate on bills at end of year, and Expenses. The National Provincial publish their accounts only at 31 Dec. of each year.

2. This table (D) is constructed on simple and obvious principles:—
The profits of Banking are derived from two sources: first, from the income obtained by the investment of the Paid-up Capital and the Reserves of undivided profits; and, secondly, from the profits arising from the employment of funds belonging to customers—that is to say, deposite and balances of current accounts—supplemented by commissions for agency business transacted for Country and Foreign Banks, for Acceptances given on behalf of customers and correspondents against securities of various kinds lodged by the parties as collateral guarantee. The first may be called Investment, and the second Business, profits. It is reasonable to suppose that the Bunks realise quite 4 per cent. per annum on the investment of their paid-up Capital and reserves, and if the amount representing this interest be deducted from the total sum which remains at credit of Profit and Loss after providing for bad debts, for interest allowed on deposits and credit balances, for depreciation and repair of premises and property, for rebate on current bills held under discount, the figures which remain will of necessity represent the amount of profits yielded by the Business apart from the Investment of Capital and Reserves; and the most satisfactory mode of exhibiting the ultimate result will be by calculating the percentage of the Business Profits on the amount of the Cash Deposits. It is clear, for example, that a Bank employing its deposits chiefly in the discount of Bills of the highest class, in the purchase of securities of the most solid and most marketable character, and deriving but little profit for commissions or acceptances and credits, will exhibit a smaller percentage of profit on deposits than the case of Banks managed on principles le s rigid. The expenses of management in like manner are best shown when reduced to a percentage on the deposits.

3. It must be remembered that in the case of the National Bank there is, as part of its Irish business, a Note Circulation (at 31 Dec., 1876) of 1,453,000l, and that the National is the only Bank in the list having a circulation of notes of any kind. At 2 per cent. per annum only, the profit on the National Bank circulation would be, say, 29,000l.

4. The National Provincial had a note circulation in England and Wales of over 400,000l, but this had to be relinquished under the clauses of the Act of 1844, when the Bank entered upon London business.

The average rates of profit derived by the Banks on Deposits (before deducting expenses) exhibits, as might be expected, a progressive fall in the larger cases. Thus:—

1874-6-AVERAGE RATE PER CENT. PER ANNUM OF PROFIT ON DEPOSITE Defore deducting EXPENSES.

DEPOSITS DEIORE	aeau	CHILL	East	AFEN	DEB				
	18	76.		18	75.		18	74.	
Banks.	8	d		8	d		5	d	
London and County	18	8		22	4	***	22	2	
National Provincial	15	7	***	22	-	***	18	-

Lendon and Provincial		-	***	40	-	***	40	-	
y Yorkshire		6		31	-	***	-		

The decline is 3s 8d per cent. with the London and County, and 6s 5d per cent. with the National Provincial. Thanks to its Irish business, the National makes twice as much upon its deposits as either of the Banks just named; and the three younger Banks are also enabled, by means of their Branches in the smaller towns, and the consequent more special character of their business, to make upon their deposits double the average rates exhibited by the London and County and the National Provincial.

In order to show more in detail the character of the Provincial Banking business of the last seven years, 1870-6, we give in Table (E) the yearly figures of the London and County and the National Provincial Banks:—

(E) London and County Bank and National Provincial Banks—Condition at 31 Dec., in the Seven Years, 1870-6. (In cols. 1, 2, 3, 4 the 0'000's are omitted; thus, 1,00 = 1,000,000l. In cols. 6, 7, 8, and 9 the 00's are omitted; thus, 322,0 = 322,000l).

Note.—The London and County Bank have increased their branches, between 1870 and 1875, from 145 to 148—the latter number being composed of 24 Metropelitan, and 124 Country branches. The National Provincial have increased their branches, between 1870 and 1875, from 132 to 134—the latter number being composed of 4 Metropolitan, and 130 Country branches.

The progress of the deposits in each of these cases in the seven years 1870-76 is remarkable. The London and County increase is 50 per cent., or from 13½ to 22½ millions; and the National Provincial go far towards doubling their deposits, viz., from 16 to 27 millions. In the case of the London and County the years 1873 and 1875 have been the most profitable. In 1873 the profits (before deducting expenses) were 426,000l, on 18 millions of deposits; and in 1875 the profits were 475,000l, on 21½ million of deposits. The expenses, however, amount to considerably more than half the gross profits. They were 240,000l in '73, and 253,000l in '75, the number of Branches having remained practically the same. Deducting the expenses from the gross profits, the ultimate net profits of the London and County, say, 13s 4d per cent. per annum, are lower in 1876 than in any year since 1869. In 1875 the gross profits were 475,000l, and in 1876 only 407,000l.

In the case of the National Provincial the most profitable years were 1872, when the net profits (after deducting expenses) were 292,000l, or 28s per cent. per annum on the 20½ millions of deposits—and 1873, when the figures were 332,000l, or 30s per cent. per annum on 22 millions of deposits. In 1876 the National Provincial's net profits are only 209,000l, or 15s 7d per cent. per annum on 27 millions of deposits.

As we pointed out last year the London and County has a source of profit, which is avoided by the National Provincial, viz., the commission on acceptances. The acceptances of the London and County are over three millions, or more than four times the similar obligations on the part of the National Provincial.

THE COUNTY FRANCHISE.

MR BRIGHT'S speech at the Exeter Hall Conference on the county franchise question deserves all the praise it has received, even from the most hostile critics, as an admirable specimen of that weighty and dominating rhetoric of which he is a master. It is also an important political event. The Conference over which Mr Bright presided was composed "of " delegates from all parts of the country, chiefly agricultural "labourers," who had been convened to agree upon measures in support of Mr Trevelyan's motion for the extension of household suffrage to counties. The delegates, as might have been expected, were very unanimous and very enthusiastic, and Mr Bright's impassioned advocacy of the unrepresented classes was warmly received. But though Mr Bright apparently believes that the Reform Bill of 1867 was carried by the dead weight of immense and unreasoning public meetings, we may venture to doubt the political value of demonstrations like that over which he presided on Wednesday afternoon. Those who take part in these movements rarely attempt to look at the other side of the question, and there is always another side which Mr Bright, in particular, has never been able to recognise. Not only is there another side, but it is necessary to examine it carefully before any question, so considerable as county representation, can be dealt with by the Legislature. No Parliament, whether swayed by a Liberal or a Conservative majority, would consent to make so vast a change as that demanded by Mr Bright, after hearing the arguments in favour of the change only. This is one reason among many why we are doubtful of the value of "demonstrations" in the discussion of any complex political question.

For it cannot be denied that the question of the franchise is a very complex one, while Mr Bright and his friends would treat it as a very simple one. The Exeter Hall Conference was called to support Mr Trevelyan's Bill, and Mr Trevelyan's Bill proposes nothing more than the change of the qualification in counties from a 12l rating franchise to household suffrage. This is spoken of as an assimilation of the conditions of political power in the counties and towns; and so it would be, to a certain extent, in the unrepresented towns of considerable size, the grievances of which Mr Bright pushed forward into the forefront of his argument. If there are one hundred towns in England, each containing more than 10,000 inhabitants, which are not represented as boroughs, we have to admit, so far, that a very valuable element in the representation of the country is excluded from its fair share of power. But Mr Trevelyan's Bill would not practically include this class. They would still be swamped, in many of the counties at least, in the mass of agricultural labourers, who represent a totally different element. An unrepresented town of 10,000 inhabitants, in a county of 200,000, would gain little or nothing, we venture to say, by the change from a 12l rating franchise to household suffrage. Their opinions would have no better chance of prevailing in the election of the county members. So far, the change introduced by Mr Trevelyan's Bill would produce no appreciable effect, but in the rural districts it would, no doubt, accomplish a revolution. Whether the transfer of political power from the landowning class, and the landleasing class, to the agricultural labourer would be advantageous for the country, is more than doubtful, and if any such change were to be made, the most intelligent, active, and prosperous part of the community, the townspeople, would be entitled to ask that other compensatory changes should, at the same time, be in-troduced. Mr Bright's argument that the change would set an incalculable new power in motion, is really an argument against the change, except under conditions which would give their full political value to the most progressive, fruitful, and stable elements in our polity. We do not want to see the intelli-gence which, in spite of "the leap in the dark," still predominates in our large borough constituencies overborne by the enfranchisement of the labourers, nine-tenths of whom up to the present time have been as unfit for the exercise of political power as the Russian serfs or the American negroes after their emancipation. We have little sympathy with the political ideas of the landowners who generally rule the counties, and the farmers, who ought to be able to assert their right to speak for themselves, seem very slow in learning that they have any interests apart from their prejudices. But we cannot help feeling that the agricultural labourers would probably be much more ignorant and intractable, and that

their numerical superiority would be dangerously powerful not only as against the landlords and farmers, but quite as much against the intelligent opinion of the boroughs. If every agricultural labourer had a vote, and if no other change were made in the present distribution of political power, can we not imagine the Tichborne infatuation running a furious course and bringing into the House of Commons perhaps a hundred Dr Kenealys? If Mr Trevelyan's motion were to be successful, there would be, doubtless, a great constitutional change, as Mr Bright boasts; but all the probabilities are that, unless it be balanced by other changes, its practical effect for a long time to come would be injurious to the country. We are not concerned to point out just now the compensatory changes which might make the extension of household suffrage to the counties innocuous and even valuable, but we may mention a few points which the House of Commons will have to consider whenever the redistribution of political power comes before it in a practical form. The more populous boroughs have a strong claim for increased representation, as compared with the less populous boroughs; England and Scotland have a similar claim for increased representation, as compared with Ireland; and there would perhaps be much to be said for something like equal electoral districts, which seems wholly inadmissible in the crude change which Mr Trevelyan asks the House of Commons to accept, and which Mr Bright applauds as a new and promising departure in politics.

BUSINESS NOTES.

THE "BEAR" ACCOUNT IN RUSSIAN STOCKS .- At the last Stock Exchange settlement as much as 2 per cent. had to be paid by operators for the fall in Russian 1873 stock to enable them to continue their engagements for another fortnight. All the other stocks are also "scarce," though not quite so scarce, and the scarcity has continued a long time—so much so, it is said, that speculators who bought Russian stocks at higher prices than those now ruling, have already covered themselves against a further fall by the amount of "backwardations" they have received from the opposing operators. A nice question thus arises, we think, as to what the true value of Russian stock would be in a really open market which had not got into a peculiar position for a time through the incidental results of speculative manipulation. It is quite plain theoretically that any given stock, no matter how rotten intrinsically, might come to be speculatively handled so as to be quoted and dealt in in the market at prices which do not correspond at all to the current estimates of its value for investment. If the stock is limited in quantity and people who do not possess it, acting in ignorance of each other's doings, not only in one market, but in many, gradually enter into engagements to deliver the stock until the engagements exceed the quanty of the stock which can really come to market, or which may even be in existence, then a state of things arises in which these speculative sellers are "cornered," and must pay what price the counter-operators please to fix, both to continue and to close their engagements, or be ruined. And something of the kind, it is supposed, has happened in Russian stocks. The magnitude of the speculative engagements for the fall, especially in the 1873 issue, has come to exceed greatly the amount of the floating stock, and the opportunity has immediately been made use of by counter-operators to aggravate the scarcity, and so compel the speculative sellers to submit to extortionate terms to get out of their bargains. The price of Russian stocks at present is thus no real evidence of the degree of Russian credit, and would be quite consistent with a very sudden fall at any moment, when the speculative sellers have finally succeeded in closing, or have all been ruined, and the disposal of the stock which has been locked-up comes to be tried. We should be inclined to say, however, that the reaction in Russian stocks from the lowest prices is not wholly the effect of a speculative handling of them apart from the estimates of their value. The question of the final disposal of the stock locked up, which we have referred to, indicates a real danger of counter-operators against speculative sellers in such a campaign. To enable them to corner the bears they must buy and lock up real stock, and it would be of little use making a large profit on the speculative operation, if they had afterwards a large and increasing amount of stock to dispose of, which no one would buy at any price. There must, therefore, have been a real opinion at work that the causes of

Russian discredit were only temporary, and we believe, in fact, there is in financial circles a very common opinion that the war will be localised, that a Russian victory will soon facilitate the making of peace, for which Russia is really eager, and that then it will be easy enough for Russia to float a new loan and begin a new period of peaceful development. We should doubt ourselves whether that opinion is well-founded, and the present aspect of the campaign for Russia is certainly not very promising; but that the opinion has existed is necessary to explain the phenomena of the recent movements in Russian stocks. If so, and if there should be a prolonged war instead of a quick success for Russia, there would be nothing in the mere speculative handling of Russian stocks which we have seen, to prevent one of the greatest and most disastrous falls in it which has ever occurred on the Stock Exchange in any security.

THE BOLIVIAN LOAN.—An agreement, of which the following are the main provisions, has, it is announced been entered into by the Bolivian Government and the agent of the Bondholders Commtttee.

holders Commtttee.

The Republic of Bolivia cedes and transfers to the above-mentioned boudholders all the rights and action which, in virtue and in consequence of the said loan, it has and can have, be it to dispose of the existing funds in deposit in the Bank of England in London; be it to demand the disembarge or to continue the retention, in case of necessity, of said funds; or be it finally to employ them and the interest upon them to the use and purpose that the Republic itself could do.

The Committee of Bondholders accepting this cession and transfer for themselves and for said bondholders, assume all the responsibility and obligation of costs and local expenses occasioned by reason

transfer for themselves and for said bondholders, assume all the responsibility and obligation of costs and legal expenses occasioned by reason of said loan. . . . Moreover the said committee, for itself and for all the bondholders, declares Bolivia and its Government free of all pledge, obligation, and responsibility for principal and interest of said loan."

And the evident object of this arrangement is to obtain possession on behalf of the bondholders of that portion of the Bolivian loan which, in terms of the original prospectus, was paid into the Bank of England, and which, with accumulated paid into the Bank of England, and which, with accumulated interest, now amounts to about 700,000l. But we doubt very much whether if this contract be ratified, the bondholders will be placed in any better position as regards this money than before. All that it gave them in return for the surrender of their claims is the consent of the Bolivian Government to the restitution of the unappropriated balance of the loan, and that has already been obtained, and has been declared by our Courts of law to be, practically, worthless. In the disposal of the money, indeed, the Bolivian Government may in this sense be said to have no voice at all. It was never intended that it should be handed over to them or their nominees, and, in fact, special precautions were taken when the loan was issued to prevent this particular portion of it from being thus appropriated. The sum now in the Bank of England was expressly devoted to the construction of a line of railway, and in order to insure that it would be applied to no other purpose, it was invested in the names of trustees, who were empowered to use it only in payment of the works, as these proceeded. This trust, constituted for a particular object, it has already been decided, can only be annulled when it has been shown that the purpose for which it was originally formed is impossible of accomplishment. But that the proposed works are impossible of execution the bondholders have hitherto failed to show, and we are quite unable to see how this proposed contract will help them out of that difficulty. The very precaution upon which the subscribers to this loan relied, as a means of keeping the control of their money in their own hands, has resulted in placing it beyond their disposal, and the unfortunate position in which they are thus placed affords another illustration of the impossibility of finding any other efficient security for a foreign loan than the solvency and good faith of the borrowing State.

THE NEW YORK GOLD MARKET.—American papers report the final closing on the 30th of April last of the Gold Room in New York, the place in which, for the past fifteen years, the business of buying and selling gold has been conducted. Organised in the early days of the Civil War the Room was, during the first years of its existence, the centre of enormous speculative transactions. The wide fluctuations in the premium on gold arising not only from successive depreciations of the paper currency through repeated over issues, but also from actual or apprehended legislation affecting the free commerce in gold, gave ample scope for the operations of

those "gold rings," whose transactions were at times on so large a scale as to exert a sensible influence even upon the money market of this country. How great were the facilities for, and the temptations to gambling in gold, may readily be gathered from the fact that after the suspension of specie payments, the gold premium rose in little more than a year from 10 to 80 per cent., and that in 1864 it one day touched 184 per cent., although the average for the year was only a little above 100 per cent. In recent years, however, the premium has been gradually diminishing, and not only has it now fallen so low that there is little scope for any movement of sufficient magnitude to tempt speculation, but there is also less chance of frequent fluctuations since those causes which at first operated to render the value of the metal uncertain, have to a large extent been removed. Although, therefore, gold must still be bought and sold, the transactions, now that the speculative element has been eliminated, have been found to be no longer sufficiently profitable to keep up a special institution, and the business has been transferred to the Stock Exchange. The change is one upon which the country may well be congratulated, marking as it does a decided advance in the way to a resumption of specie payments.

Russian Railway Traffic.—The traffic returns of the Russian railway system for the whole of 1876, are now issued. From the official figures published in the Journal de St Petersbourg, it appears that the gross receipts during the year were 146,207,553rs (18,276,000l), being an increase of 5,194,275rs (649,000l) on the year 1875. The receipts per verst ($\frac{5}{8}$ of a mile) are stated as, on the average, 8,260°30rs, or 1°40 per cent. above 1875. The following relates to some of the principal lines:—

		I	ncrease

But these figures are of an irregular nature, the Odessa line showing an increase of 10.50, whilst the neighbouring Kharkov-Nicolaïev shows a decrease of 18.59; but the lines branching from the Kiev district on the whole show an improvement, and while traffic in the railway district in the direct South of Russia compares somewhat unfavourably with the traffic for 1875, the South-Western lines have in many cases gained business during the past year.

UNREASONABLE CONTRACTS.—A case of a nature which it is to be hoped does not often arise, was decided by the Court of Appeal on Wednesday last. A Mr Lovejoy became, in 1868, a borrowing member of the Birkbeck Building Society, and obtained a loan of 1,400l, repayable, principal and interest, by monthly instalments extending over five years. His payments were not kept up, and in 1871 the Society, in terms of their mortgage, took possession of the property upon which the advance was made. A year ago, however, Mr Lovejoy brought an action for redemption of the mortgage, and the Society then presented an account for 4,687l, consisting of 1,747l in respect of principal and interest, and the enormous sum of 2,940l for fines, which they claimed the right to impose by virtue of a certain table in their rules. In that table a progressive series of fines for six months was set out, commencing with a fine of 6d for the first month, increasing to 1s the second month, 2s for the third month, and so on. Nothing was specified as to the fines for the seventh and succeeding month, but the Society assumed the power to levy them on the same progressive scale, and while they claimed 11 8s as the fine on the instalment due on the 1st of December, 1871, they demanded no less than 821 12s as the fine payable on the instalment due on the 1st of October, 1876. On receipt of this account, Mr Lovejoy took out a summons to moderate the claim of the Society, and the Master of the Rolls decided that, according to the true meaning of the rules, the fines could not be charged beyond the six months, and that only one fine of 15s 6d accrued in respect of each share. He accordingly reduced the claim of the Society for fines from 2,940l to 21l 14s, and in giving this decision, he expressed his cpinion that, even if the Society's claim had been consistent with the true construction of the rules, it would have been utterly unreasonable, and could not have been supported. This seems to us a somewhat mischievous doctrine. It infringes upon the right of private contract to a dangerous extent, for if the Courts of law are to decide what are, and what are not reasonable contracts, there can be no certainty in any case that a binding arrangement has been entered into, and business becomes invested with an amount of risk that must seriously interfere with its proper conduct. We are glad therefore to see that the Lords of Appeal, before whom the case has been brought, have given no countenance to the theory of the Master of the Rolls. They directed their attention not to the reasonable or unreasonable nature of the agreement, but to what constituted a reasonable interpretation of its terms, and while agreeing with the Master of the Rolls that no more than six months' fines could be levied, they have altered his decision so far as to impose the maximum fine of On each instalment, there-5s per share on all the 28 shares. fore, they have allowed a fine of 7l, and as there are 60 instalments in arrear, Mr Lovejoy has been mulcted in the sum of 420l in fines in addition to the principal and interest. Even on this most liberal interpretation of the contract the Birkbeck Building Society has been awarded only about one-seventh of the amount which it demanded, and we should think that the insight which has been afforded into the way in which the business of such institutions is conducted is not at all calculated to raise the principle of "fines," which is one source of their prosperity, in the public estimation.

Manchester and Calcutta Prices.—We receive the following from an important Manchester firm with reference to our quotation last week from the Manchester Examiner, as to the alleged excess of Manchester prices over Calcutta prices of cotton goods. We threw doubt last week on the supposition that the figures were a true representation of actual transactions between the two capitals, but our correspondents have a great deal to say on the figures themselves. They say in

a great deal to say on the figures themselves. They say:—

The figures given in the letter are as far from being correct as they well can be. Calcutta letters received to-day, dated April 20th, and Calcutta telegrams received to day, dated May 12th, show the rupee prices are most incorrect. Manchester costs of to-day, or on any day since May 1st, differ very widely from those contained in the letter. We do not go into the question of equivalents given in that letter, because, as no exchange is given for a basis of calculations, it is impossible to say how nearly they approach the truth; but, broadly speaking, we say they, too, are incorrect. But as to the gross rupee prices given and the Manchester costs, we can merely state that in one case quoted the buying and selling prices taken collectively show a difference of 6d per piece, or 20 per cent. from actual facts, thus:—

Examiner letter, Ir 9a 6p; actual rates in Calcutta middle of April, Ir 12a 6p; difference, 3 annas, or about 4½d. Price in telegram dated 12th May, Ir 12a. Manchester cost in Examiner letter, 2s 7½d; goods bought to-day and previously, 2s 6d. Again: 8th last letter actual sales, 5r 8a; telegram, 5r 6a; Examiner letter, 5r 6a; no difference, but see costs. Examiner letter costs, 8r 4½a; actual purchase on Friday, 7r 9a; difference, 7½ pice. The other quotations seem at least as void of actual truth.

Banking in St Petersburg. — The St Petersburg Discount Bank has published a report of its operations for 1876, which is very instructive. Notwithstanding the trying times of the past year, the dividend declared is as much as $11\frac{3}{5}$ per cent., which is not only high in itself, but compares favourably with the dividend of $9\frac{3}{5}$ per cent. paid in 1875. Curiously, too, this increase of dividend is obtained notwithstanding a contraction of business. It is stated that the current accounts, although greater in number, have diminished in amount by 39 million roubles (about 5,000,000l); the discounts of Russian bills have diminished 13 million roubles; advances on securities 8 millions; while the market value of its stocks is reduced by 136,000 roubles. Nevertheless, the business year concludes with profit of 362,000 roubles in

excess of 1875. The profits of the bank have been swelled—first, by discount operations, 255,000rs; second, by bourse operations, 246,000rs; third, by a reduction in the interest on current accounts, 157,000rs, and on deposit accounts, 43,000rs. The aggregate losses for the year are set down at 101,000rs. The reserve capital of the bank is raised to 791,000rs. The net profit available for distribution is 1,540,000rs. Of this sum, after deducting various certain or doubtful losses, and a transfer to reserve for profits in 1877, in all 140,000rs, there are distributed—120,000rs to reserve capital, in accordance with the bank's statutes; 120,000rs to the administration, leaving 1,160,000rs (145,000l), or 29rs per share to the shareholders. As above stated, this is equal to 113 per cent. per annum.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the receipts on account of revenue during the week ending May 12, as compared with the correspond ing period of last year:—

Σ.	period of last year:			
		Receipts of Week Endin May 12.	g	Corresponding Period of 1876.

Private deposits	27,081,086
Cash	12,783,126
Discounts	7,553,595
Decrease.	

Treasury account 3,493,930

The advances on securities have also increased two millions. The Bank Council has not made to-day any change in its rate of discount, as was thought possible, to reduce the margin between the rate here and those in the other continental places.

Money is still abundant, and has rarely been more so, and although the placing of paper under two per cent. may be difficult, the cause has been the fear of the Bank of France raising its rate. The consequence was that many houses hastened to discount their bills, while the banks which had funds disposable reserved them in the hope that they might shortly employ them to more advantage. The accounts from the provinces are in accord in describing the amount of idle money as large. In many towns the banks have ceased to allow any interest on deposits. The depositors, on their side, tired of seeing their money remain unproductive, take advantage of the low price of Rente to invest, which explains the large daily balance of purchases through the Receivers-general. The amount of Rente taken by them during the week ending yesterday was 150,000f of the Three per Cents. and 354,000f of the Fives, or capitalised at five per cent., an investment of over eight millions in the five days, the Bourse having been closed on Thursday last. The demands for money in trade are small, and do not constitute a motive for a change in the Bank of France rate. If that rate was still three per cent., the moment would, perhaps, be ill chosen for reducing it; but since it is two per cent. there are no serious reasons for raising it. Speculation is, besides, quiet at this moment, and the low value of money strengthens confidence and encourages investments in good securities. Although the Bank of France has withdrawn all its notes of less than 100f, and only issues those with great reluctance, the cash reserve shows no signs of diminishing, and so long as there shall be no danger of France being drawn into the war, and there shall be no speculation in foreign securities that would require an export of money or render the exchanges less favourable to France, the value of money should remain within its present limits. The rate on London is again higher, but it has not yet reached a point to prevent the importation of gold taken from the market.

The "discounts" of purchases for the end of the month have continued during the week on a large scale, and between Friday last and yesterday there was taken in that way 518,000f of Three per Cent. Rente and 420,000f of the Fives, besides 75 shares of the Northern Railway, 700 of the Paris to Mediterranean, 25,000f of Italian Rente, and 9,600f of Austrian Gold Rente. The object of the manœuvre is well known; the great houses by which the discounts are managed have no need for the Rentes and other stocks, of which they have more than they can well hold, but, being heavily engaged

for the rise in the expectation that the Eastern question would have been patched up, they require a rise at any cost. Their first step was to continue to buy, but, finding that there were always sellers to meet them, and having a large command of money, they employ this means of crushing their adversaries. The discounts of French Rente alone have required an outlay of 20 millions, and so far the success has scarcely responded to their expectations. They had appeared to be nearly at an end yesterday, when only 25,000f of Rente was taken, but there has been to-day a renewal, and over 100,000f has been demanded, notwithstanding the expectation that the political crisis would produce a fall in stocks, or, perhaps, for that reason to counteract the expected reaction. The market opened heavy, with a fall of nearly \(\frac{3}{4}\), but closed firm with a small rise. Other securities remain at last week's rates, with little business doing. The discount of Paris to Lyons railway shares has been without effect on prices, which are a fraction lower. The new Austrian Gold Rente is firm at 54\(\frac{1}{4}\). Subjoined are the closing quotations for the account:—

The Chamber of Deputies was to have elected to-day in its bureaux the committee of 33 members to examine the new tariff bill. The more exciting political news will probably cause this business to be overlooked, or to be hurried through more expeditiously than would have been the case in a calmer moment. The appointment of a committee on a bill of this importance is usually preceded by a discussion in each bureau, but nothing of the kind is now to be expected. Political crises are by no means rare in France; but the general opinion is that the situation has never looked more menacing than at this moment, and that the country will now have its attention absorbed by more serious business than tariffs and treaties of commerce. With regard to the negotiations for the English Treaty, they have been at a standstill during the last week; and even had the political difficulty not arisen, nothing could have been done before a decision had been come to with respect to the wine duties. Under the present circumstances, it would not be surprising if the remaining English commissioner were to return to London, and the negotiations to be abandoned entirely until quieter times. Professor Abel has been here for some days to make representations to the French customs concerning the duties on mineral oils, the classification of which has given rise to complaints by the English exporters.

plaints by the English exporters.

The Bulletin Financier publishes a synoptical table of the situation of the nine principal financial establishments in Paris on the 31st March, to show the amount of their assets and liabilities, and of their engagements. The Bank of France is not included in this table; the companies comprised in it being the Credit Industriel, Societé des Depots et Comptes Courants, Société Générale, Credit Foncier, Comptoir d'Escompte, Credit Lyonnais, Algerian Company, Sous-Comptoir des Entrepeneurs, and Banque de Paris et des Pays Bas. With respect to their liabilities, the first item is their capital, of a nominal amount of 665 millions, of which 395 millions is paid up; to this latter sum must be added their reserves, amounting to 105 millions, making an available sum of 506 millions due to their shareholders; the next item is the deposits—at call 471 millions, at fixed dates 221 millions, and current accounts 375 millions—together 1,067 millions; then acceptances 72 millions and long dated bonds 1,451 millions, making a total sum of 3,090 millions. The employ of that sum was a follows in round numbers: cash and drawing accounts at the Bank of France 86 millions; bills out for collection 6½ millions; inland bills 589 millions; foreign bills 25½ millions; advances and loans 1,467 millions; current accounts 408 millions reports 135 millions; financial participations 239 millions Rente shares, bonds, &c., 87 millions.

The following is the value of the foreign trade of France during the first four months of 1877, compared with the same

The imports during the month of April amounted to 283 millions, against 314 millions in March; the exports to 317 millions, or 5 millions less than in the preceding month. The detailed customs tables have not yet been issued.

A suit in which was raised the question of the legality of Bourse "options" for the account has just been decided before the Paris Court of Appeal, which in its judgment laid down the following two principles in this matter:—"The sale at option for the account of a security negotiable on the Bourse does not necessarily imply that it is a gambling transaction, or that the right of the purchaser to execute the contract, or to cancel it on abandoning the forfeit, forms a condition of a nature to vitiate the convention; it is for the judge to consider what was the common intention of the parties, and to declare null and void the contract for option when not to be followed by the delivery of the securities bought or sold, and to be settled only by the payment of a difference; and to declare it valid if concluded by the parties, or by one only, with the serious intention to carry it out. In the case before the Court the defendant, M. de la Salle, sold in June, 1874, 10,000f of Five per Cent. Rente for delivery at the end of July, at 50 centimes premium, that is to say, the buyer to have the right to annul the purchase on payment of a forfeit of 50 centimes per five francs of Rente. A great rise having taken place in the interval, the buyer claimed the delivery of the stock, and the seller not possessing it the agent de change was forced to buy in at a loss of 7,900f. tion of a nature to vitiate the convention; it is for the judge it the agent de change was forced to buy in at a loss of 7,900f. The action was brought to recover that sum, but the Civil Tribunal before which the cause came first, gave judgment that the debt was not recoverable as being a gaming transaction. The Court of Appeal has now quashed that verdict, and given judgment for the amount, on the ground that the agent de change had no reason to suppose that de la Salle did not intend to deliver the stock, and to settle by the payment of a difference only, and that the agent de change was, therefore, justified in presuming that the sale was not a fictitious one.

The following are the latest quotations of the produce mar-

The following are the latest quotations of the produce markets at Havre per 50 kilos (1 cwt) duty paid:—
Cotton.—The Syndicate of brokers, at the last weekly revision of the price current, reduced some of the United States and Indian sorts one to three francs. The present rates are:—New Orleans, low middling, 73f; good ordinary, 68f; Georgia, 72f and 61f; Pernambuco, fair, 75f; Sorocaba, 71f; Oomrawuttee, good fair, 61f; Tinnevelly, 64f; Bengal, 54f. Sales last week, 4,657 bales; importations, 5,849. Stock, 216,610 bales, of which, 185,000 from the United States, against 187,380 and 127,000 in same week last year.
Coffee (in bond).—Guatemala, 123f; Costa Rica, 117f; Rio, 85f to 98f; Santos, 92f to 108f; Cayes, 102f; Babia, 88f. Sales last week, 21,219 bags; importations, 10,278. Stock, 268,526 and 2,872 tierces, against 232,138 and 775 in same week last year.
Hidden,—Valparaiso, salted, 81f 50f; Rio Grande, 75f; Chicago, 58f; Buenos Ayres, dry, 150f.

GERMANY AND AUSTRIA.

(FROM OUR OWN CORRESPONDENT.) VIENNA, May 15.

Since my last letter the rise of the German Imperial Bank rate of discount, mentioned in the Economist already, has taken place. The Bank of Frankfort immediately imitated this measure, and the other lesser banks will certainly follow. The Bourse has looked upon this event as merely a measure taken to prevent the export of gold. One reason for it was of course the rise of the Bank of England rate of discount, the more especially as the German currency reform in a great measure depends upon the condition of the London gold market. On the other side, the stagnation to be remarked in the Bank's business has at last been interrupted. The circulation of notes had increased by 50 million marks since the end of March, and the discounts by quite as much. Coin and bullion had continued increasing until the end of May, but the last returns, dated May 9, give a reduction of 17 millions. This is some proof that a

little run had taken place on the Bank's gold, which is probably owing to the depressed condition of the foreign exchanges. The reason of the turn in the latter is as yet unknown, but as Germany took a very small part in the last corn speculation, and would be in a condition to export if last corn speculation, and would be in a condition to export it it took any part at all, we must suppose that these reasons cannot be sought in real commerce, but that they are owing to complications of the Stock Exchange. The war is certainly a cause why numbers of capitalists look out for very safe investments. The German States have very few debts indeed, and what titles they are, cannot be had, as the proprietors will, of course not give them up. Foreign stocks of a solid of course, not give them up. Foreign stocks of a solid character are, therefore, more sought for than at other times. The German capitalists used to be very fond of investing their money in bonds of the United States, but since the price of them rose so high, French "rente" was preferred, which pays higher interest than the English Consols, and is considered as a very safe investment.

The returns of the German and Austrian National Bank for the last six weeks were the following:

CIRCULAT	TION OF NOTES.	
	Austrian	German
	Bank.	Bank.
*	Millions	Millions
1877.	Gulden.	Mark.
March 21-23	271.5	666-9
April 11-15	264.5	708-6

May 7-9		719.1
	ND BULLION.	
March 21-23	136.6	555.8
April 11-15	136.6	564.5
April 23-25		571.0
May 7-9		554.5
Dı	SCOUNTS.	
March 21-23	97.8	321.2
April 11-15		351-5
April 23-25	95.2	359-4
May 7-9		371.3

The fact that the Austrian National Bank's circulation of notes has increased by 18 million florins since the middle of April, is owing to the "coupon" for May in some part, and also to an increase of business bills. A part of the belligerent nations' requirements are procured in Austria. Thus, the Austrian cloth manufacturers are working almost exclusively for Turkey. Almost all the money received for the May "coupon" has been again invested in Austrian "rente." Notwithstanding the general stagnation in the Stock Exchange, the rente has somewhat risen.

In Hungary, 1868, 102,384,502fl; 1869, 99,334,049fl; 1870, 109,981,352fl; 1871, 113,747,180fl; 1872, 114,976,984fl; 1873, 115,503,806fl; 1874, 120,599,823fl; 1875, 123,490,848fl; average, 112,502,318fl, or 29.008 per cent. of the total revenue of both countries:

A German court of justice has given its vote in favour of Austrian debtors in the question of Austrian interest. The town court of Breslau pronounced that although the coupons of the Austrian Hypothekar-Credit Anstalt's were calculated in thalers, still they could best be considered as payable in Austrian silver florins.

The General Assembly of the Anglo-Austrian Bank took place yesterday. The balance reported was the following:—

e yesterday. The barance reported was t	
Assets.	Florins.
Cash	2,232,302
Discounts	
Securities	3,387,418
Loans on securities and warrants	1,120,865
Coal mines	2,063,294
Property and inventory	1,922,247
Debtors	23,070,611
TotalLiabilities.	38,628,237 Florina.
Capital in shares	
Reserved fund	1,281,015
Cash bonds	1.045,300
Accepts and cheques	9.476.279
Uncashed dividends	13,299
Creditors	7,589,598
Profits	22,745

The General Assembly decided upon putting these poor profits to account of next year, and to pay no dividend. A reduction of the capital was also voted, that is to say, that the 40,000 shares which had been bought up, according to a decision of the last General Assembly, are to be destroyed. Besides this, 10,000 further shares are to be bought up, and also destroyed, by which means the capital will be reduced to 18 million florins. From the general reserve funds, amounting to 1,281,015 gulden, are to be taken 781,015 gulden, with which a special reserve fund is to be laid up. The profits from the 10,000 shares that are to be bought back are also to go to the coffers of this special reserve fund. go to the coffers of this special reserve fund.

Clearing-house return	400	141.751.000	119,503,000	105,272,000	108,973,000

The amount of the "other" deposits, compared with the "other" securities, showed in 1867, a deficiency of 1,745,1831; in 1874, a deficiency of 534,9851; in 1875, a deficiency of 685,7211; in 1876, an excess of 3,047,8371. In 1877, there is an excess of 2,338,409l.

In 1867, the conference on the Luxemburg question having led to a settlement politically, the money market responded by becoming calmer also. The depression in Brighton Railway stock attracted much attention.

In 1874, the money market was assuming increased ease. Politics in France were unsettled, owing to the defeat and resignation of the Duc de Broglie.

In 1875, the demand for money, usual in May, was subsiding. Gold was, however, absorbed internally, and a monetary crisis at Rio, involving the failure of the banking house of Maua and Co., caused an efflux of sovereigns. The Bank of France, it was announced, would not return to specie payments until the 1st January, 1878.

In 1876, the money and stock markets were very quiet, the chief exception being a drop in Argentine Government securities on the announcement of a suspension of cash payment by the Bank of Buenos Ayres.

The account of the Bank of France for the week ending May 17 shows the following changes :-

Assets.	May 17.		May 11.		Increase) e	Decrease.

DISCOUNT AND MONEY MARKET.—Market rates of discount are not materially changed, and have remained with little variation at $2\frac{3}{4}$ per cent. for three months' bank bills; but the floating supply of money increased on the arrival of half a million of gold from Australia, and short loans were easier at the beginning of the week than afterwards, the quotation to-day being $2\frac{1}{2}$ per cent. in Lombard street. The present demand for money is partly on Scotch account, but also, and chiefly, in preparation for payments due next (Whit) Monday, which is a holiday. The Bank return shows that although 415,000l in gold came in on balance from abroad, yet money was withdrawn, chiefly for Scotland, and the coin and bullion is only 156,000l more than the Bank had a week ago, notwithstanding that import.

The changes in the Bank accounts are otherwise unimportant. The other securities are 282,000*l* less, and that being a repayment to the Bank, about corresponds, allowing for a decrease in the deposits, to the increase of 224,000*l* in the unlent reserve in the Banking Department. That reserve now amounts to 11,515,000*l*, which is a low point, and accounts for the sensitive condition of the money market.

The political trouble in France has much significance for the money market. War in the East of Europe has, hitherto, tended to expel cash from the other cities of the continent, and to send it to Paris, as well as hither, for safe keeping. But Paris will no longer be able to compete with London in point of political security. Already, the rate of exchange has become more favourable to us, and a still stronger tendency would be apparent than at present, did not the Stock Exchange operations run, for the moment, in the direction of buying stock from Paris, in order to close speculative accounts here before the holidays.

In Berlin, the rise last week in the German Bank rate has been to some extent followed by the market rate of discount; but while the former was raised from 4 to 5 per cent., the market value of money in German cities is scarcely $3\frac{1}{2}$ per cent. At that rate Treasury bills were negotiated this week in Berlin. And the rate of exchange in Berlin on Paris is still at a point which allows German gold to trickle away to France.

We subjoin our usual quotations for mercantile paper having various periods to run:

Bank bills	-3 r	nonths	***************************************	23	per cent.
Do	4	-	******************	27	per cent.
Do	6	-	****************	27	per cent.
Trade bills	3 n	nonths	***************	3	per cent.
Do	4	-	************	31	per cent.
Do	6	-	*******	34	per cent.

The allowances at the private and joint stock banks and discount houses are as follows:—

THE STOCK MARKETS .- Little has occurred this week to affect the markets. The events were a Stock Exchange settlement, at which three small brokers defaulted, and Russian stock was scarcer than ever, and a Ministerial crisis in France, which had an adverse effect at the time upon Paris prices on Wednesday. And these events, in relation to the alarming political occurrences of recent times, are of minor importance. Uncertainty still exists as to the upshot of the war between Russia and Turkey; but the debates in Parliament last week allayed the more pressing fears on the score of English intervention, and the prevailing tone of affairs has lately been dull and inactive. The approach of the Whitsuntide holidays contributes to check business in the stock markets as in most of the other speculative markets of the kingdom. Investment business is very limited, and stock brokers still obtain very few commissions, so unenterprising is the prevailing state of mind amongst the public. To-day business was very quiet because it is a Jewish holiday, and because the approach of Whitsuntide in-

duces operators to suspend action. What occurred was principally a general rise on the closing of weak accounts for the fall. Paris prices closed with apparent strength, notwithstanding the grave character of the crisis, which has resulted in forcing a non-Republican Ministry on Republican France.

Since the war speculation began, the London Stock Exchange as a body have operated for the fall, and are currently supposed to have gained much money by doing so. But, taking Russian 1873 stock as the representative of the speculative market, bear operators have had continually-settlement after settlement—to pay for non-delivery of the stock which they sold; and in some cases, we believe, the heavy charges so incurred have equalled and exceeded the profit obtained by buying at the lower price and selling at the higher. In these columns it has been repeatedly remarked that large sales "for the fall "-speculative sales that is-could not have been made unless there had been, on the other part, large buyers; for every contract requires two parties; and at the settlement in Russian stock this week, it came out more distinctly than ever that there was a very strong counter speculation for the rise. As much as 2 per cent. was obtained for non-delivery of stock until next settlement, and terms so high could not have been exacted unless there were some buyers ready and able to absorb any supply of importance which might come on the market. It is possible that so strong a market for Russian stock as has been shown of late, notwithstanding reported Russian reverses in the field, must be based upon something more solid than the skilful operations of a few dealers, who merely look at the state of the market. But, on the other hand, the reverses in Asia seem to be really serious; and, after all the talk of a loan to Russia, the operation is now said to have been checked, the Russian Government, we are told, objecting to the open manner in which the Paris syndicate sought to distribute their

ENGLISH GOVERNMENT SECURITIES.—Consols have not been without fluctuations, but there was a rise at the close, and the quotation is now 3-16 above last week's, purchases being made to cover operations for the fall in case something should happen during the holidays. Indian stocks show a marked rise, Sir Stafford Northcote's allusion to our firm purpose to keep the road to India clear, assisted, too, perhaps by the Russian reverses in Asia Minor, being favourable in their effect.

COLONIAL GOVERNMENT SECURITIES.—There has been some recovery here, but prices, with one or two exceptions, have not materially changed. Canadian 4 per Cent. Loans have advanced $\frac{1}{2}$; New Zealand, $4\frac{1}{2}$; 5-30, $1\frac{1}{2}$; and South Australian 5 per Cent., 1. There has been a decline of $\frac{1}{2}$ in Cape of Good Hope $4\frac{1}{2}$ per Cent.; 1 in Mauritius 6 per Cent., 1882; and $\frac{1}{2}$ in Queensland 4 per Cent.

Foreign Stocks.—On Monday, when the first day of the settlement arrived, Russian stock was found to be very scarce on the market, and sellers were fined 2 per cent. for deferring delivery of the 1873 stock until next account. A rise immediately took place, purchases being pressed by those with accounts open for the fall in order to avoid paying so heavy a charge; and the market generally responded in sympathy with the special upward movement in Russian stocks. On Thursday, it may be added, when some of the same stock was publicly "bought in" against sellers who had been unable to complete their bargains at the settlement, the fine paid was only 1½ per cent., that being the difference between the price then given for money and the quoted price for delivery of stock at next settlement. But on Wednesday, the previous upward movement, based as it was on the temporary requirements of the market, ceased, and on news of the French

Ministerial crisis was reversed. Egyptian stocks had previously been comparatively weak, and gave way further on the withdrawal of support from Paris; but, at the close, everything is better on the closing of bear accounts, in view of the holidays. The new Egyptian stocks are about 1 per cent. higher for the week; Russian, \(\frac{1}{2}\). French and Italian remain at some decline, notwithstanding the support still given by miscellaneous investors in France. Mexican have advanced, on hopes of an arrangement by the new Government, and Argentine show a rise.

The Turkish Tribute Loans of 1854 and 1871 are the subject of a special mission from the Ministry of Finance at Constantinople. At present, those loans receive only half-coupons in cash, in consequence of the Decree of 1875, and, in the meanwhile, the surplus Egyptian tribute money is constantly accumulating in the Bank of England. The accumulation cannot be touched by the Porte, nor can the bondholders get at it. But the Turkish Government has this negative command over the accumulated money, that it can make a new Decree, and stop payment altogether. Apparently resting on this power, the delegate from Constantinople is reported to require a new loan, on condition of apportioning part of the tribute money to payment of the existing claims upon it.

The following are the changes for the week, taking the latest unofficial quotations:—

ENGLISH RAILWAYS.—The market for speculative home railways has been on the whole steadier than that for foreign stocks; and on Wednesday, when the latter were depressed on news from Paris, this department was strong. Traffic returns were then published, which, showing as they do a continued improvement in the goods receipts, seemed to have a good effect, the sustained increase in that more solid portion of railway revenue promising much better for the future than could any increase of passenger receipts alone. On Wednesday, too, a report circulated that the junction will shortly be completed between the Metropolitan District and the London and South-Western, to the great advantage of the former; and that stock rose 2 per cent., the rise in one stock, as usual, having a general effect on the market. Great Eastern specially advanced on Thursday, when it was reported that

the directors of that and the Great Northern Company had met for the purpose of considering upon amalgamation. To-day there was a further improvement, and Metropolitan District, Ordinary and Preference stocks, are 3 higher for the week; Great Eastern, $1\frac{1}{2}$; Metropolitan, $1\frac{3}{4}$. The other lines generally show a moderate increase, Brighton and South-Eastern being exceptions to the rise.

The fortnightly statement of the Sheffield Company shows the traffic receipts of the line to have been 521,000l up to the 6th of May, or about 1,000l less than during the corresponding number of days last year. The expenses on the other hand are set down at 297,000l, which is a decrease of 6,000l. Thus there has been an improvement in the receipts, but the comparison of expenditure is not so favourable as in previous statements. The following figures show the state of progress during the current half-year:—

						D	ecrea	se
						In Traffic		In
						Receipts.		Expenses.
Staten						£		£
1st January	to	28th	January.	1877	**********	4.000	******	7,000
	to	25th	February,	-	************	6,000	*****	0.000
Name .	to	26th	March,	-	*************	5.000		9,000
No.	to	6th	May.	-	***************************************	1.000		6.000

—so that the net earnings are but 5,000*l* more than at the beginning of May last year, that increase arising not from an absolute increase of traffic, but from saving in current expenses.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices:—

The traffic receipts on seventeen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending May 13 to 998,676l, being an increase of 9,855l on the corresponding week last year. The principal increases are the Midland, 4,827l; the Great Eastern, 3,234l; and the London and North-Western, 3,189l. The Great Western shows a decrease of 3,757l.

RAILWAY TRAFFIC RETURNS

	Week	s's Receipts.		Receipts of ar te date

the same of the	998,676	+ 9,855	. 17,056,864	+ 96,359		

In these cases the aggregate is calculated from the beginning of February.
 For the South-Eastern the aggregate is given for two days lines this year than set, and in the case of the goods traffic for one whole week less than last year.

Foreign and Colonial Railways.—Prices here have generally advanced, but Indian lines show a very marked rise, the effect of the resolute tone of the Ministerial declarations about our Indian possessions, being increased by the existence of a bear account which had to be covered. The following are the changes for the week:—

American Securities.—United States Government Bonds have generally advanced, rather in consequence of investments being driven away from other quarters, than from any special event. The railway securities appear to have been affected favourably by the following telegram:—"The New York Central, Erie, Pennsylvania, and Baltimore and Ohio Railways have agreed upon a basis for joint earnings on Westbound traffic out of New York, to take effect on the 1st of July, each company to get a certain proportion agreed upon." The following are the changes for the week:—

JOINT STOCK BANKS. — The following have been the principal changes:—British North American advanced 1; Chartered of India, $\frac{1}{2}$; London Chartered of Australia, $\frac{1}{3}$; and London and Provincial, $\frac{1}{4}$. On the other hand, Imperial fell $\frac{1}{2}$; London of Mexico, $\frac{1}{2}$; London Joint Stock, $\frac{1}{2}$; Union of Australia, $\frac{1}{3}$; and Union of London, $\frac{1}{2}$.

TELEGRAPHS.—Direct United States advanced $\frac{1}{2}$; Eastern, $\frac{1}{8}$; Eastern Extension, $\frac{1}{8}$; and Globe, $\frac{1}{8}$. There was a decline of $\frac{1}{2}$ in Direct Spanish.

Mines.—In British mines, West Chiverton improved 1. In foreign mines, Rio Tinto rose 2; and St John del Rey, 10; while Cape Copper fell 1.

MISCELLANEOUS.—American Investment Trust have risen 3; City of Montreal, 1; City of Wellington, \(\frac{1}{2}\); St Louis City, 1; and United States Mortgage, 5; while Auckland Harbour have fallen 1; the second issue of the Foreign and Colonial Government Trust, 5; and Railway Debenture Trust, \(\frac{1}{2}\). In coal and iron companies Eobw Vale advanced \(\frac{1}{2}\); but Nantyglo and Blaina gave way 1; and Pelsall Coal, 3. Fore street Warehouse rose \(\frac{1}{2}\); Telegraph Construction, \(\frac{1}{2}\); Assam Tea, 1; London General Omnibus, 2; and Gas Light

and Coke, 4. City Offices fell $\frac{1}{4}$; India Rubber, Gutta Percha, and Telegraph, 1; British American Land, 1; Hudson's Bay, $\frac{1}{2}$; and Phosphate Sewage, $\frac{1}{4}$. The most general depression, however, has been in tramways—Dublin having fallen $\frac{1}{4}$; Liverpool United, $\frac{3}{8}$; London, $\frac{1}{4}$; North Metropolitan, $\frac{3}{8}$; and Provincial, $\frac{1}{2}$.

Bullion.—The following is taken from the circular of Messrs Pixley and Abell, dated May 17:—

Gold.—With the exception of the withdrawal of 156,000l, sovereigns, the orders for gold have been more than met by the large arrivals we have to report, and the Bank has therefore received 571,000l, in bars and coin, from Australia; and it is not improbable that further amounts will be sent in. We have received 714,600l from Australia, 265,000l from New York, 29,700l from the West Indies, 31,200l from the Brazils; total, 1,040,500l. The Australia has taken 10,000l to Calcutta.

Silver.—A rather large business has been done during the week at 54\frac{5}{6}\text{d} per oz for India, and at this rate the silver by the Pacific and West India steamers was placed. The market is, however, very quiet now, and 54\frac{2}{3}\text{d} per oz is the nearest quotation, this being nominal. The arrivals have been 43,520l from the Pacific, 35,630l from the West Indies, and 180,000l from Germany; total, 259,150l. The Peninsular and Oriental steamer leaving to-day takes 206,000l to India and 15,000l to China.

Mexican Dollars.—The amounts left on the market, and those that came to hand from New York have been sold at 55d per oz. The Peninsular and Oriental steamer leaving to-day takes 190,200l to China and the Straits.

Exchange on India for banks' drafts at 60 days' sight is 1s 9d per rupee. Tenders were received yesterday for $26\frac{1}{2}$ lakhs of rupees of India Council drafts. The amounts ellotted were—to Calcutta, rupees 21,49,000, average rate, 1s 9.06d; to Bombay, rupees 5,01,000, average rate, 1s 9.06d. Applications for telegraphic transfers at 1s 9d per rupee, receive 6 per cent., and for bills at the same rate, in full. The latest quotations of exchange from the East for bank bills at 6 months' sight, are from Bombay and Calcutta, 1s $9\frac{3}{2}$ d per rupee; from Hong Kong, 4s $0\frac{1}{2}$ d per dollar; and from Shanghai, 5s $5\frac{1}{4}$ d per tael.

Quotations for Bullion.—Gold—Bar gold, fine, 77s 9d per oz std; ditte refinable, 77s 10½d per oz std; Spanish doubloons, 74s to 75s per oz nominal; South American doubloons, 73s 9d per oz; United States gold coin, 76s 4d per oz; German gold coin, 76s 3½d per oz. Silver—Bar silver, fine, 54½d per oz std nearest; bar silver, centaining 5 grains gold, 54½d per oz std nearest; Mexican dellars 55d per oz. Quieksilver, 7l 5s. Discount, 3 per cent.

The sum of 37,000l in gold has been bought by the Bank this afternoon.

According to the Gazette return this evening the movements of the precious metals during the week ending 16th May, were as follows:—Gold—Import, 862,954l; export, 284,969l. Silver—Import, 337,548l; export, 214,240.

NOTICES AND REPORTS.

STOCKS.

Bolivian Bonds. - The committee sent an agent in January last to Bolivia to obtain the rectification of a convention signed on the 30th June, 1876, between the chairman of the committee and the then Bolivian Minister here. The Government refused to confirm the convention, but the agent has signed

the following contract in its stead:

Article 1.—The Republic of Bolivia cedes and transfers to the abovementioned bondholders all the rights and action which, in virtue and in consequence of the said loan, it has and can have, be it to dispose of the existing funds in deposit in the Bank of England, in London; be it to demand the disembargo or continue the retention, in case of necessity, of said funds; or be it finally to employ them, and the interest upon them, to the use and purpose that the Republic itself could do.

Article 2.—The committee of bondholders of the loan, accepting this

Article 2.—The committee of bondholders of the lean, accepting this cession and transfer for themselves and for said bondholders, assume all the responsibility and obligation of costs and legal expenses cecasioned by reason of said loan, be it with respect to commissions, lawsuits, interests, and costs which may have taken place in relation to and in consequence of the said loan, or for any other legal cause.

Article 3.—Moreover, the said committee for itself and for all the bondholders declares Bolivia and its Government free of all pledge, obligation and responsibility for principal and interest of said loan it

obligation, and responsibility for principal and interest of said loan, it being for them to undertake to come to an understanding exclusively

by themselves, and independent of all participation of Bolivia with the said contractor, George E. Church, relative to any arrangement or reclamation on his part in regard to the loan and its emergencies.

Article 5.—The present being ratified by the committee of bondholders in London, it shall be authenticated in due form, and there shall be sent to the Government of Bolivia a sworn or legalised copy,

and thus the business of the church loan and all its consequences will be definitely terminated for this Republic.

Queensland Government 4 per Cent. Debentures. — The Union Bank of Australia invite tenders for 740,700l, redeemable 1st July, 1915, and secured upon the consolidated revenues of the colony. Tenders will be received until the 28th inst., and no tender will be accepted at less than 91 per cent.

United States Finance.—A telegram states that the Secretary of the Treasury has sold to the syndicate for the issue of the 4½ per cent. loan, \$5,000,000 of this stock at par for gold coin, which will be exchanged for currency at the discretion of the Government as a step towards the resumption of specie pay-

RAILWAY COMPANIES. Lehigh Valley 6 per Cent. Consolidated Mortgage Bonds.—Messrs J. S. Morgan and Co. announce that the coupons due 1st June will be paid at their offices on that date.

London and North Western New 5 per Cent. Preference Stock.—

At a meeting, the directors were empowered to issue the sum of 823,000l, 5 per cent. preference stock at 20 per cent. premium. Dividends will accrue from 1st July next.

Great Indian Peninsula.—The company notify the payment by June 30 of a call of 2l on all the company's shares having

16l, 10l, or 6l already paid thereon.

Northern of Bennos Ayres.—The receipts for the year ended December last show a decrease of 8,350l, while the expenses amounted to 61.32 per cent of the gross receipts, as compared with 55.78 per cent in the previous year. These results are attributed to the severe commercial crisis. After providing for debenture interest and other charges, there remains 9,9911, which it is suggested holders of the guaranteed preference shares should, as on former occasions, agree to take in the company's six per cent. preference debenture stock, in lieu of cash, for the dividend earned during the last year. If this proposal be adopted, the directors will be able to declare a dividend at the rate of 7 per cent. per annum on the guaranteed preference shares for the year ended December, 1876, and carry forward 340l. The net profit for the last year is insufficient to pay a dividend on the deferred preference and ordinary shares.

ASSURANCE COMPANIES. Guardian Fire and Life.—The directors recommend a dividend and bonus of 2l 10s per share, making, with the interim payment in January, 3l 15s per share for the year.

New York Life Insurance. — The total income for 1876 was

1,563,558l, out of which the premiums and annuities amounted to 1,182,168l. The total expenditure was 1,050,759l, of which the claims absorbed 327,137l. The excess of income over expenditure was 512,799l. The total assets were 6,632,743l, and the liabilities 5,396,548l, the surplus of assets over liabilities being 1,236,194l.

liabilities being 1,236,194l.

Queen Insurance.—The fire premiums for 1876 amounted to 403,815l, being an increase of 33,810l on those of 1875, and the losses to 227,628l. The surplus, including 15,491l brought forward was 103,248l, out of which 60,000l was added to reserves, making those funds 280,000l, and 16,243l was carried forward. A dividend and bonus at the rate of 15 per cent. per annum was declared. In the life department new policies had been issued for 200,979l, and the life fund, by the additions made to it for the year, now represents 66 per cent. of the entire net premiums received on every policy in f. r.e.

Railway Accident Mutual Assurance, Limited.—Mr S. Lovelock,

of 19, Coleman street has been appointed official liquidator.

MISCELLANEOUS COMPANIES.

Brynmaur Coal and Iron, Limited.—Creditors are to forward their claims, by 12th June, to Mr J. Fraser, 9 King's Arms' yard, E.C., one of the voluntary liquidators.

Bahia Gas .- The profits for the half-year ended 31st of December, 1876, added to the balance brought forward, were 4,361l, out of which it is proposed to carry 500l to reserve, and to pay a dividend of 3 per cent. per annum, leaving 236l to be carried forward.

Gellydeg Colliery, Limited.-Mr James Waddell has been appointed liquidator.

German Union Telegraph and Trust. — The receipts for the year ended 1st May, including 12l brought forward, were 11,613l, and the expenses 493l, leaving an available balance of 11,120l. An interim dividend of 5s 9d was paid in January, and a further similar distribution is now recommended, being at the rate of $5\frac{3}{4}$ per cent., while 12l is carried forward. The reduction of dividend is stated to be entirely due to an increase of the amount placed to reserve for the renewal of plant.

House Property and Investment.—The company state that, after issuing the first fully paid 4,000 shares of 25l each in thirty-six weeks, it has in twenty-three weeks also allotted the second issue of 4,000 25l shares at 1l premium, and during the last week allotted 223 of the third issue at 2l premium.

Hooper's Telegraph Works, Limited .- Creditors are to forward their claims to Mr A. A. Broad, 35 Walbrook, E.C., one of the official liquidators, by 25th June.

McGowan and Co., Limited. - Creditors are required, by 25th May, to send in their claims to Mr James Frisby, of 57 Moorgate street, E.C., the liquidator.

Natal Land and Colonisation .- The gross income for 1876 was 16,754l, and, after deducting expenses, there remains 4,268l, out of which the full dividend on the eight per cent. preference shares absorbs 3,963l. The prospects of the undertaking are described as encouraging, the profits having increased, the debentures having been placed at lower rates, and the railways under construction and the harbour works bidding fair to make "Natal the great highway of South-Eastern

Regent Ironworks, Limited.—Creditors are to forward their claims to Mr C. A. Harrison, of Waterloo street, Birmingham, the official liquidator, by 8th June.

Sheffield Metal, Limited.—Creditors are required by 15th June to send in their claims to Messrs J. Edey and H. Pearson, of 27 Change alley, Norfolk street, Sheffield, the liquidators.

Stoomvaart Maatschappj) (Nederland).—The company announce a dividend of 5 per cent. per annum for 1876. English shareholders can receive their dividend in London at the exchange of 12fl 1f—£ sterling—on presentation of the coupons at Messrs Samuel Montagu and Co.'s.

COMMERCIAL REVIEW.

FRIDAY NIGHT.

Trade, which there is little doubt is tending to improve beneath the surface, shows general dulness; and although the Parliamentary debates last week served to remove much of the anxious feeling lest England should be drawn into war, yet the continued struggle in Turkey dulls the tone of many of our markets; it perhaps also represses much of the latent improvement which is said to exist, and to the existence of which the statistics of bankers' clearing and goods railway traffic go far to testify. While a state of war, and of political uncertainty arising from war, undoubtedly acts against activity in many branches of our trade, there are others which war stimulates; but it seems that while this country feels the repression, it is America which largely feels the stimulus of war on trade. "Whatever the ultimate effects on this country of the war," is the better opinion in New York, "it is certain that it has already quickened general trade, and that it will continue to do so at least during the present year." And in the meanwhile mills, factories, looms, furnaces, are comparatively ill-employed at home, and markets for raw material show that dulness which arises from quiet demand for manufactured goods. In and near Manchester reduced production is thought probable, and "the coming holidays," we are told, "will be utilised as far as possible to keep down production; and it is doubtful whether there will not be a marked increase of short-time working after Whit-week." While at Leeds "a great deal of machinery is standing idle, and it is expected that the holidays at Whitsuntide will be of a more extended character than the operatives will relish." Increased demand for coal, which may not be without general effect upon prices, is this week reported from some districts; and it appears to arise not only from threatened strikes, but also from shipping requirements. In freights at Hartlepool an upward tendency is reported as again setting in to the Mediterranean ports. Baltic coal freights, and those to most of the northern European ports, were also rather firmer.

Neutral vessels in the Sea of Azof are now not allowed further delay in loading, and a telegram states that eighteen steamers are on the way from Taganrog, few of which have been able to obtain any of the grain they were chartered for. On the Danube all traffic between Orsova and the sea is arrested.

In the corn trade everything appears to be stopped; there has been hardly any speculation, and little ordinary business, but prices are distinctly lower, and the markets have been usually reported weak, closing without recovery, notwith standing the explusion of vessels from Taganrog without cargoes. How much is coming from America cannot yet be estimated, the recent rise having been accompanied by large contracts for forward delivery; and the same kind of uncertainty exists about the amount which will be attracted from India, as well as from the Baltic provinces, or even from the neighbourhood of the Danube itself. After so unsettling a period as has just been passed through, the tendency is naturally to remain quiet, not so much in order to estimate what is likely to be the rate of supply during the next few months, as to guard against any reactionary movement in prices, such as might easily come about after the upward plunge they recently took. The appearance of the weather is also very closely watched, and its mildness has perhaps not been without some effect already in adding calmness to the lately excited wheat markets.

The cotton trade appears to drag, sales at Live points ings mall amounts, while business in Manchester has been dull, and stocks are said to be accumulating. To-day, been dull, and stocks are said to be accumulating. however, some improvement was reported, the low prices bringing in buyers. Short time and diminished produc-tion are much talked about, and the Whitsuntide holidays are relied upon to reduce the activity of the Lancashire mills. As to the statistical position of cotton, Messrs Neill Bros. and Co.'s Circular, dated 15th May, calculates the receipts of American cotton to show "a deficiency of 125,000 bales or 3 per cent. compared with last year, the Gulf receipts being 181,000 bales or 8½ per cent. less, and the Atlantic 56,000 bales or 3½ per cent. greater. During the five months since 15th December this since 15th December, this season's receipts have fallen short

of those of 1875-6 by 399,000 bales. Shipments have lately been maintained on a fair scale for the season, those to the contin nt being rather above the average. But excluding France, which has imported freely, the continent is 184,000 bales or 28 per cent. behind last year."

Business in the produce markets is reduced on the approach of the Whitsuntide holidays. Sugar has been in strong demand during the week, principally for America, but gains strength because of the confirmed accounts of a deficient yield in Cuba. Coffee closes firm after some previous weakness. seeds have been, on the whole, dull, and close so. Rice, provisions, tallow, jute, metals, are all dull markets.

On the state of the wine and spirit trades, Messrs Matthew ark and Co. report:—"The actual commencement of war in Clark and Co. report :-Clark and Co. report:— The actual communication of the Europe has stimulated business in spirits, principally rums, Some but as yet it has not influenced our brandy market. parcels were sacrificed at public auction about a fortnight ago, and dealers seem indisposed to operate as long as these speculative lots are likely to appear. Meanwhile, home consumption continues steadily to increase—our bonded stock to decrease—the natural consequences of which must shortly lead to revival of demand here. On the other side the vines have hitherto escaped frost, but we hear nothing of the abatement of the phylloxera.

COTTON THE

LIVERPOOL -- MAY 17.

The cotton market continued dull, and quotations generally were slightly reduced; there is now a more general demand and steadier feeling at the decline. For Sea Island the demand has been moderate. American continues in fair request, but with the free supply offering prices are partially $\frac{1}{16}$ d per lb easier. Brazilian is still dull of sale, and there is a further decline of $\frac{1}{16}$ d to $\frac{1}{8}$ d per lb. Egyptian has been in moderate demand, and prices of the lower qualities are $\frac{1}{8}$ d per lb lower. West Indian is quite neglected, and quotations are reduced ½d per lb. Peruvian is in small request, but quotations remain unaltered. In East Indian a fair business has been transacted,

but quotations show a partial reduction of \$\frac{1}{16}\$d to \$\frac{1}{8}\$d per lb.

"Futures"—The business during the week has been exceedingly small, and on the whole the tone has been flat until today, when an improved feeling set in, and the market closes very firm. The sales of the week amount to 54,010 bales, of which 2,880 are on speculation, and 6,500 declared for export; the forwarded is 7,450 bales, of which 3,730 are American, 550 Brazil, 530 Egyptian, and 2,640 bales Surat, which makes the takings of the trade 52,080 bales.

MAY 18th.—The sales to-day will probably amount to about 12,000 bales with a few resolut

12,000 bales with a firm market. PRICES CURRENT.

Imports from Jan. 1 to May 17 Exports from Jan. 1 to May 17 Stock, May 17 Consumption from Jan. 1 to May 17

The above figures show:

In speculation there is an increase of 39,110 bales. imports this week have amounted to 86,067 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 120,000 bales, against 162,000 bales at the corresponding period last year. The actual exports have been 8,142 bales this week.

Pr

LONDON.-MAY 17.

Annexed is a portion of the circular issued this week by the Lendon Cotton Brokers' Association:—

(The demand on the spot throughout the week has been very limited, and quotations are reduced about \$\frac{1}{8}\$d per lb. American futures have been neglected, and close about \$\frac{1}{16}\$d per lb below last week's prices.

BOMBAY, April 21.—The past week has generally been one BOMBAY, April 21.—The past week has generally been one of extreme depression in our market, partly on account of the warlike tenour of European advices, but chiefly owing to the dearth of money, the scarcity of which has at times caused something like a panic locally. Until yesterday, sales of cotton were practically impossible, excepting for forward delivery, and holders gave way in price daily, without finding their position, financially, in any way improved. Yesterday, however, the banks came out as free buyers of bills, and a more easy feeling prevails with more disposition, on the part however, the banks came out as free buyers of bills, and a more easy feeling prevails with more disposition on the part of exporters to operate. The home advices in hand this morning, also, are decidedly more encouraging. Crop movement—Latest accounts from Kattiawar advise very small arrivals at the ports—especially at Bhownuggur and Mowa, from which the cream of the crop is shipped. We are inclined to believe, however, that this arises quite as much from the unwillingness of holders to accept present rates as from shortness in yield. In the Berars the arrivals have been small, and a ness in yield. In the Berars the arrivals have been small, and a considerable quantity of cotton has been carted back from the market, holders preferring to store their stocks rather than accept current quotations. The Hingunghât season is now over, and, by the end of the month, very little Broach will be left in the districts. The following are the figures for the week, viz. :-

MARKETS IN THE MANUFACTURING DISTRICTS.

Manchester, May 17.—Our market continues extremely sluggish, and business is only concluded where prices of a speculative character are being accepted. In cloth some few sales are reported of the better makes of shirtings, and also in Dhooties and jacconetts; but in other classes there is little demand, and that only at ruinously low rates. Yarns for export are quiet, but orders are in the market if spinners are in the market of spinners and had induced to accept the extremely low prices of spinners. could be induced to accept the extremely low prices offering. For the home trade there is little doing and stocks are rapidly

accumulating.

NOTTINGHAM.—In the lace trade the utmost depression is reported. Only a few assorting up orders are placed, and a large quantity of machinery remains idle. The prospects of the trade are not considered encouraging, as the large stocks on the market keep down the demand. Very little is being

done in silk fancy goods. Inquiries for raw and spun silk are extremely limited, and no description of goods is in active request. Lace yarns are flat. The hosiery trade is without improvement.

BELFAST .- Prices of fine yarns are without alteration. larger business has been done in coarse goods, and rough browns have been more freely bought. Prices much firmer. Drills are also in good demand, chiefly for export account. Dress linens are very quiet. Bleached linens, handkerchiefs, and damasks are in fair request. On continental account there is still much quietness in trade.

DUNDEE.—The improvement lately felt has been further DUNDEE.—The improvement lately feit has been further developed; prices of linen goods have been advanced, and the demand has been more active. The market for flax goods on the spot have been very firm, but the assortment left in sellers' hands is now somewhat meagre; and this, as well as the near prospect consumers have of receiving their winter purchases tends to restrict spot business. There have been no arrivals with flax during the week. Messrs Armitstead and Co.'s Report dated May 15 states:—

Report, dated May 15, states:—

The advices from Russia report the markets there to have a still upward tendency; the exchange on the other hand has been slightly upward tendency; the exchange on the other hand has been slightly easier, but the supplies are everywhere still insignificant, and contract business does not take place to any extent. In Archangel goods no recent transactions are reported, and there is very little offering for sale; sellers are disposed to hold what stocks they have for considerably higher prices than buyers would be willing to grant at present. At St Petersburg there is very little flax offering, and holders are very firm in their demands. The advices from the Pscow and Narva disricts are without change; little business in flax, which is very firmly held. At Pernau there is still a good deal of excitement in the market; supplies are coming forward very sparingly, and buyers are induced to At Pernau there is still a good deal of excitement in the market; supplies are coming forward very sparingly, and buyers are induced to pay high rates for anything that offers for sale; the navigation at Pernau is now open, several sailers having arrived. In the Riga market there is little doing, dealers being unable to offer either flax or hemp, except at excessive prices, S.Ro. 57 said to have been paid for K. By telegraph from Riga to-day flax very little for sale; proportionate to S.Ro. 57 58 for K paying; old wrack reported done at S.Ro. 48. Exchange 26d. Exchange, 26d.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK-May 4.

The speculative advance in flour received a check on the date of our last, and in the course of the week prices have given way from day to day, with little doing, and great irregularity prevailing. The quieter accounts from Liverpool, and liberal receipts at the Western markets, have been elements of weakness. The decline from the highest figures was, at the close of yesterday's business, about 50 cents to 75 cents per barrel. To-day the market was steadier. The wheat market has, like flour, ruled dull, drooping, and unsettled; and for some grades, prices fell off about 15 cents per bushel, while other grades were better sustained. There has been an important increase in the receipts of winter wheat at the leading markets, but of spring wheat the deliveries from the hands of farmers continue small. Indian corn was decidedly higher early in the week. The report of the closing of the Danube precipitated an active speculation; but the report that the ports of the Danube will not be closed, caused report that the ports of the Danube will not be closed, caused a sharp reaction. To-day, the market was dearer, at 67 cents to 67½ cents for steamer mixed on the spot, and 66 cents to 66¼ cents for May. Rye has lost a portion of the recent advance. Oats have been active. An important advance in prices has taken place, and the close yesterday was at the highest figures of the season. To-day the market was unsettled but generally firm settled, but generally firm.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The weather has been changeable, with occasional heavy rains, but fine at intervals; and vegetation, although backward, has improved. The dulness in the trade, which set in towards the close of last week, continues, and the tone of depression noticed at that time has been further developed, The supplies of English wheat remain very small, and foreign imports have not largely increased; but buyers holding off, the quantity on offer accumulates, and holders, in consequence. have shown more desire to sell. From the principal shipping markets on the continent, and also from America, quotations come lower. Under these influences, combined with fine weather at intervals, the markets throughout the kingdom have become more depressed during the week, and prices have further given way 1s to 2s, making the decline about 4s to 5s per qr from the late highest point. On the spot, American spring wheat is now worth from 63s to 65s; Dantzic, 62s to 66s. English white ranges up to 70s, and red up to 68s. The floating cargo trade has been equally dull, and wheats have receded in value, making the decline about

the same as above quoted. Ghirkas off coast have sold at 66s 9d down to 65s per 492 lb; Californian at 66s 6d per 500 lbs, for the United Kingdom. The quantity of wheat on passage has been rather diminished by recent arrivals, but forward sales have only been practicable at reduced rates. Calcutta has sold at 59s to 62s per 402 lbs; white Spanish at 66s per 480 lbs, usual floating terms. Flour, influenced Calcutta has sold at 59s to 62s per 402 lbs; white Spainsh at 66s per 480 lbs, usual floating terms. Flour, influenced by the depression in the price of wheat, has receded 1s to 2s per barrel, and 2s to 3s per sack. Malting barley is scarce, and in consequence maintains its value, but grinding sorts, of which there are full supplies, have given way about 1s per qr, both on the spot and floating. Off coast Danubian sold at 26s 3d, and Odessa at 28s, but at close these rates were not obtainable. Beans and peas have, during the last day or two, been quite neglected, and quotaduring the last day or two, been quite neglected, and quotations are nominal. Maize has shown increased heaviness in all positions. Imports have been liberal; there are some 25 cargoes on sale off coast, and about 50 cargoes due to arrive in the course of seven or eight days. Buyers in consequence act with much reserve, and prices are weak. For American mixed 28s is now the nearest value on the spot and off coast, and the tendency is still downwards. Oats have ruled very dull all the week, and the opening of the port of Riga has tended to increase the depression. The first cargo thence arrived to-day, and sales were effected at 19s to 20s; common oats of other imports selling at proportionate rates, being again decidedly lower, and making the fall about 4s per qr from the late highest point, so that the late advance has now been almost entirely

COLONIAL AND FOREIGN PRODUCE MARKETS TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE POSTCRIPT.

MINCING LANE, FRIDAY.

Sugar.-Low brown sorts have not supported the advance last quoted, and are at present quiet, with full supplies offering. Refining and crystalised West India sugars continue firm, the latter being 6d per cwt dearer, with a good demand by the trade. The general tone of the market is more subdued, owing to the large supplies now due. Several cargoes have sold latterly, including one St Vincent's at 29s 6d, with guarantee of quality at 29s 6d for the United Kingdom. Refining sorts on the spot sell at 26s 6d to 28s. Numerous parcels of crystalised yellow Demerara have changed hands at 32s 6d to 34s 6d. Total casks sold to yesterday 764 casks, part in public sale; barrels and bags in proportien: Barbadoes, 26s to 28s 6d; grainy and crystalised, 29s to 32s. Refined is better in all positions. According to the returns of sugar for the chief ports in the United Kingdom, the landings and deliveries during last week were nearly on a par, and at the close the stock was still about 25 per cent, under the average of the three preceding years at corresponding date. Present quotations are 6s to 9s higher than in 1876. Refined shows 8s to 9s per cwt advance gene-

NITRATE SODA has advanced, owing to the reported earthquake at Iquique. Yesterday a cargo off the coast sold at 15s for the United Kingdom. This morning, 14s 6d per cwt accepted on the spot.

SALTPETRE.—Transactions during the week have been limited on the spot. To arrive about 150 to 170 tons reported, at some decline on last Friday's quotations, the bulk at 25s 6d and a portion at 26s 3d per cwt. May to June shipment.

METALS.—There have been few changes to report in the leading markets, and business generally is rather quiet. Tin was steadier at 70/ to 70/ 10s; Australian, 69/ 10s; English ingots quoted 74/ to 75/. The telegram from Glasgow reports the market as steady at 54s 44d 70l to 70l 10s; Australian, 69l 10s; English ingots quoted 74l to 75l, The telegram from Glasgow reports the market as steady at 54s 44d first 14 days in May, 1,500 tons. Chill steady g.o.b., 68l 15s to 69l eash. Bottle; demand inactive. Selisian spelter quiet, at 20l 5s. English Jute.—The market has become slow, owing to the subsidence of

lead is lower, viz., 21/2s 6d to 21/7s 6d. Soft Spanish, 20/15s per ton.

JUTE.—The market has become slow, owing to the subsidence of 17/10s to 20/5s. On the spot 5s to 10s reduction from the late highest point has been accepted. The statistical position continues strong, and HEMP.—Supplies of Manila by auction have been larger than for a but the buyers did not offer late enhanced rates, and the chief part decline, and a few lots sound at 27/15s to 30/10s. Of 646 bales other OILS.—There has been a further slight decline established upon seed oils during the week, and this morning the markets are quiet: Linguist and the support of the superior of the superior seed.

OILS.—There has been a further slight decline established upon seed oils during the week, and this morning the markets are quiet: Linseed on the spot, 29l 10s to 29l 15s; May to August, about the brown rape on the spot, 36l to 36l 5s; May to August, about the brown rape on the spot, 36l to 36l 5s; May to August, the same; last four months, 36l 15s to 37l; refined, 38l 5s to 38l 10s. Palm firm. Fine Cochin quoted 42l. English lard oil, 35l per ton. A limited quantity of sperm has sold at 83l. Common oils are all but neglected. Olive Spirits Turpentine.—A good business has been done in American.

Spirits Turpenting.—A good business has been done in American. In the spot 28s 3d to 28s 6d; last four months, 25s 3d per cwt.

On the spot 28s 3d to 28s 6d; last four months, 25s 3d per cwt.

LINSEED.—The market, at one time firmer, is now quiet, with prices in favour of the buyers: Calcutta, 58s ex ship; 58s 6d to 59s ex ware-house; April to June shipments, 55s 3d to 56s 6d per quarter.

Petroleum Oil quiet and lower, viz.: 10gd to 10gd on the spot; last four months, 11gd per gallon. A good business done in the latter position.

HIDES.—At the sales of East India held yesterday, prices were HIDES.—At the sales of East India neig yesterday, prices were irregular, but without material change. Of 66,919 hides, rather more than half sold. Rangoon hides chiefly bought in, owing to the reduced offers made. Of 32,513 China, about 9,100 sold at 4gd to 7gd. 7,703 half sold on formar terms.

offers made. Of 32,513 China, about 9,100 sold at 4±d to 7±d. 7,703 buffalo rather less than half sold on former terms.

TALLOW.—Since the public sales last week the market has been quiet, and there is a fair supply of Australian declared for to-day. Other tallow: Petersburg, new, 44s 6d; last three months, 44s 6d per ext. sellers.

POSTSCRIPT.

Sugar.—The market is without alteration excepting for crystalised SUGAR.—The market is without alteration excepting for crystalised Demerara, which shows 6d advance, and the parcels by auction sold at 23s 6d to 35s 6d for grey to good yellow. Total sales of West India 916 casks; for the week, 1,790 casks. Grocery Jamaica sold at 28s Manila at 21s 6d for Ito Ito. 800 bags Penang at 21s to 21s 6d. 1.100 bags Bengal at previous quotations.

Manila at 21s 6d for Ilo Ilo. 800 bags Penang at 21s to 21s 6d. 1,100 bags Bengal at previous quotations.

COPFEE.—The public sales of 412 casks 31 barrels 80 bags plantation Ceylon went at fully yesterday's rates. 816 cases 974 bags East India at full to rather higher prices, for fine, including medium to bold Naidoobatam at 110s 6d to 120s; medium to bold Mysore at 113s 6d to 124s. 3,217 bags foreign, part sold at previous rates for Gautemala And Central American. Rio withdrawn. A few pale washed sold at RICE.—2,185 bags Manila out.

RICE.—2,185 bags white Bengal by auction were taken in at 12s 6d to 13s per cwt.

to 13s per cwt.

SHELLAC —713 chests by auction about two-thirds sold, fine orange 93s; livery orange, 71s to 72s; garnet, 53s to 58s; low button, 56s to

LAC DYE.—280 chests by auction part sold, DT 11d to 111d, good,

LAC DYE.—280 chests by auction part sold, DT 11d to 11½d, good, 8¾d; low marks 1d to 1½d per lb.

GAMBIER.—606 bales pressed cubes part sold at 26s to 27s 3d. 382 bags free cubes out at 30s.

TURMARIC.—601 bags fair Bengal part sold at 20s 6d.

METALS.—154 cases China out 56s 6d per cwt.

GALLS.—154 cases China out 56s 6d per cwt.

Teduced from June until December next. Scotch pig iron easier, viz.,

ots.—Linseed dull at 29s 10d on the spot. Rape quiet at 36/

English brown, 131 pipes. 52 casks cocoa-nut by auction out.

TALLOW. — 131 casks Australian in the public sales barely half-sold material change. Town the same as last Friday.

ADDITIONAL NOTICES.

Business may be considered closed for the Whitsuntide holidays.

Silk.—There has been a decided improvement in China and Japan silk, owing to unfavourable accounts of the crop from the continent and mischief. Holders are now very firm, and refuse to sell unless at a substantial advance.

substantial advance.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states, that oranges have improved in value, and are selling freely. Lemons reduced in price, and sale dull. More inquiry for Brazil and Turkey nuts; Barcelona nuts without alteration. Large arrivals of St Michael pine-apples, which are realising moderate rates. Onions lower in price. Leather.—The demand for almost all kinds of leather has fallen off considerably since our last report, and at Leadenhall on Tuesiay, only a

limited business was done, the attendance of buyers being small. The supplies of fresh leather are moderate, but generally adequate to the requirements, and late prices are well maintained.

FLAX.—As holders of New Zealand are asking higher prices, business has been very restricted this week.

SEEDS.—The trade continues in a lifeless state.

HEMP.—Russian remains firm, but Manila has become dull, chiefly

owing to the large quantity (about 5,100 bales) offered at auction this week, when only about 900 bales were sold, at a reduction of 1l per ton on last week's private sales.

TOBACCO.—But little business has been done in American growths TOBACCO.—But little business has been done in American growths during the past week, and what few transactions have taken place were comprised of the best descriptions obtainable in the market, and although holders show every disposition to meet the views of buyers, the common grades are very slow of sale. For export there has been scarcely any inquiry. Suitable classes of other growths have been in scattered demand.

active demand.

METALS.—There has been very little life in any branch. Copper rules quiet, and prices have not varied. Iron is without change. Tin has been dealt in moderately at last week's rates. Lead is a shade less firm in price. Spelter continues quiet, and tin plates flat.

METROPOLITAN CATTLE MARKET

Monday, May 14.—The total imports of foreign stock into London
last week consisted of 15,694 head. In the corresponding week of
last year we received 18,692; in 1875, 16,439; in 1874, 15,990; in

last year we received 18,692; in 1875, 16,439; in 1874, 15,990; in 1873, 18,571; and in 1872, 18,337.

The cattle trade is entirely without feature. Supplies of stock are very short, but amply sufficient for requirements. Beasts came to hand very sparingly, and of the supply offered about one-half was foreign. In the home supply there was nothing special to notice beyond the shortness of the supply. Business continued very quiet, quotations ruling more or less nominal. The top price for the best Scots and crosses was 5s 6d, and occasionally 5s 8d per 8 lbs, but the latter was quite exceptional. From Norfolk, Suffolk, Essex, and Cambridgeshire we received about 600, from other parts of England about 100, and from Scotland 34 head. On the foreign side of the market was a moderate supply of beasts from Denmark, Spain, and Sweden. The demand was quiet, at about late rates. The sheep pens were less freely supplied. Sales progressed badly, but the market was not devoid of steadiness so far as relates to the Dorset breeds. The best Downs and half-breds sold at 6s to 6s 2d per 8 lbs, but many good useful animals were disposed of at a lower figure. Lambs sold at about 7s 6d to 8s per 8lbs. At Deptford were 18 beasts, and about 12,000 sheep. sheep.

METROPOLITAN MEAT MARKET.

May 14.—The supply of meat on offer this morning, although short, was more than sufficient for the demand, and in the majority of instances prices ruled in favour of the buyer.

		re	r s	108	Dy	the caroass,

MESSRS MACMILLAN & CO.'S PUBLICATIONS.

The RUSSO-TURKISH WAR. The full st and most recent Information about the ORGANISATION and STRENGTH of the ARMIES and NAVIES, the FINANCES, the POPULATION, the TRADE and COMMERCE, and the general resources of RUSSIA and TURKEY, as well as of all other Countries of the World, is given, from Official Returns, in THE STATESMAN'S YEAR-BOOK for 1877, by F. MARTIN, Fourteenth Annual Publication. Crown 8vo, 10s 6d.

The OTTOMAN POWER in EUROPE; Its Nature, its Growth, and its Decline. Crown Svo, with 3 Coloured Maps, price 7s 6d. [This day

Professor HUXLEY'S AMERICAN ADDRESSES, with a LECTURE on the STUDY of BIOLOGY. 8vo, 6s 6d. [This day.

PERU: Incidents of Travel and Exporation in the Land of the Incas. By E. G. SQUIER, M.A., F.S.A., late U.S. Commissioner to Peru. 8vo, with 300 illustrations, 21s. [This day. "This highly interesting book will be found well worth perusal, containing, as it does, the impressions of a cultured observer, who evidently knew how to make the most of his opportunities. Mr Squier writes in a lively style throughout, and yet manages to convey a great deal of solid information about the past av well as the present of Peru. The numerous illustrations with which the work is embellished deserve a word of praise for their fidelity."—GLOBS.

A HISTORY of CAVALRY from the EARLIEST TIMES; with Lessons for the Fature.
By Lieut. Col. GEORGE T. DENISON, Commanding the Governor-General's Body Guard,
Canada. Svo, with Maps and Plans, 18s.

[This day.
THIRD EDITION, now ready,

THIRD EDITION, now ready,

LOG LETTERS from the CHALLENGER. By Lord GEORGE CAMPBELL. 8vo, with Map, 12s 6d.

A delightful book, which we heartily commend to the general reader.......Lord George Campbell has been able to fill his compact volume with information of which very little is stale, and which affords an ample store of entertainment."—SATURDAY REVIEW.

He Lord George's lively pages the reader is carried pleasantly along, as though over halcyon sens, past almost every country ou the face of the globe. He will enjoy landing at the various ports, as the energetic sublicutenant must have done; he will lose his heart, in true sailor fashion, to one dusky beauty after another, and he will, we can answer for it, turn the last page of the volume with regret that he is parting from the cheeriest and pleasantest of fellow-travellers."—TIMES.

SECCOD EDITION, now ready.

Mrs OLIPHANT'S "The MAKERS of FLORENCE:" Dante, Giotto, Savonarola, and

Mrs OLIPHANT'S "The MAKERS of FLORENCE:" Dante, Giotto, Savonarola, and their City. Royal 8vo, with numerous Illustrations by P. H. Delamotte, and Portrait of Savonarola, engraved by Jeens, cloth elegant, 21s.

"We are grateful to Mrs Oliphant for her eloquent and beautiful sketches of Dante, Fra Angelico, and Savonarola. They are pictoresque, full of life, and rich in detail, and they are charmingly illustrated by the art of the engraver."—SPECTATOR.

NEW AND COMPLETE EDITION.

MERCANTILE | QUEENSLAND GOVERNMENT

Authorised by Act of the Colonial Legislature, 40 Vic., No. 19, assented to 1st December, 1876.

TENDERS FOR £740,700.

The UNION BANK OF AUSTRALIA are empowered, as Financial Agents of the Government of Queensland, to negotiate a Sale of Debentures, amounting to £740,700, being the total amount of the above Loan, which is secured upon the consolidated revenues of the colony, and is authorised for the execution of certain permanent works of public utility and convenience, viz., railways, roads and bridges, telegraphs, harbours and rivers improvement, water supply, &c., and certain other purposes.

The Debentures bear interest at four per cent. per amum, commencing from 1st July, 1677, the coupons being payable on the 1st January and 1st July in each year, at the offices of the Banking Agents of the Govern-ment in London.

The principal sum will be payable on the 1st July, 1915, in London, Brisbane, Sydney, or Melbourne, at the option of the holder.

ne option of the noticer.

Copies of the Act authorising the loan can be seen the Union Bank of Australia, 1 Bank buildings,

The colony of Queensland comprises the North-Eastern portion of the continent of Australia, having an area of 678,600 square miles, with a scaboard of 2,250 miles. It had at latest dates 265 miles of railway open, and 4,459 miles of electric telegraphs.

The following comparison and statistics are extracted from the Public Returns:—

from the Public Returns :		Yen	5,
Population	1860. 28,056		1875. 177.615
Revenue (general)	178,589	***	1,261,464
Expenditure (general)	161,503	***	1,404,198
Imports	742,023		3,328,009
Progress of Agriculture -	523,477	***	3,857,576

There are in Queensland between seven and eight millions of sheep, and nearly two millions of cattle and

millions of sheep, and nearly two millions of cattle and horses.

The exports in 1875 were £3,850,000 sterling, comprising gold, copper, tin, wool, cotton, timber, rum, sugar, tallow, hides, and preserved meats.

Sugar is new being extensively cultivated—about 15,000 acres being under cane.

The deposits with the various banks in the colony have increased from £286,900 in 1860, to £3,091,680 at December, 1876; while the £avings Banks' deposits amounted at the latter date to £41,975.

Tenders will be received at the Union Bank of Australis, until Two o'clock, on Monday, the £8th instant, where and when they will be opened by the Directors, in the presence of such of the applicants as may attend.

The Debentures will be allotted to the highest bidders, but no Tender will be accepted at less than £91 for every £100 of Debentures.

Tenders at a price including a fraction of a shilling other than sixpence will not be preferentially accepted, and should the equivalent Tenders exceed the amount of the Debentures to be allotted, a pro rata distribution will be made.

Payment will be required as follows, viz.:—

Five per cent. on application, and the balance on Wedesday, the 11th July next, when the Debentures, or Scrip for the same, will be delivered.

Forms of Tender may be obtained of the Union Bank of Australia, 1 Bank buildings,

of Australia.

Union Bank of Australia, 1 Bank buildings,
Lothbury, E.C., 17th May, 1877.

** Owing to a change in the date of making up these
Returns, three half-years' interest on loans is included
in this total.

† Latest figures for 1876.

HOLLOWAY'S PILLS AND HOLLOWAY'S PILLS AND OINTMENT.—The most valuable prop rties that any remedy or combination of remedies can possess are those of a tonic and a purifying character. A tonic medicine imparts vigour to the whole system, and consequently is necessary in low, weak, and feeble states; a purifying medicine acts by eliminating from the blood useless and effete matter, and so is necessary in nearly every case of deviation from health; generally these remedies are distinct, but in Holloway's pills and ointment these two properties are combined, and there is scarcely any condition of the human organism which may be considered a departure from the normal standard in which these remedies are not in the highest degree applicable—they thus act in both ways.

TURKISH LOAN OF 1871.

Notice is hereby given, that in consequence of a requisition having been addressed to the Council of Foreign Bondholders, a GENERAL MEETING of the holders of Bonds of the Turkish Loan of 1871 is convened by the Council to be held at the Council-house, 17 Moorgate street, E.C., on THURSDAY, the 24th of May, at TWELVE o'clock noon, for the purpose of requesting the Council of Foreign Bondholders to make arrangements to act, and to take such proceedings on their behalf, as may be requisite.

The chair will be taken by the Right Hon. E. P. Bouverie. Bondholders who are unable to attend may obtain forms of proxy on application.

HYDE CLARKE, Secretary.

Council-house, 17 Moorgate street, E.C., May 17, 1877.

ATLANTIC & GREAT WESTERN RAILROAD COMPANY.

TO THE BOND AND STOCKHOLDERS.

At the aggregate meeting of Bond and Stockholders, held at No. 1 Queen Victoria street, London, on Wednesday, 17th January, 1877, the following resolution was unanimously passed:—

"That in the opinion of this meeting the Trustees should give notice fixing the 30th day of April as the last day for receiving deposits of Bonds under the Scheme, and that all who do not come in by that day may be excluded by the Trustees, except upon special terms."

Pursuant to this resolution, direct notice thereof and fixing the 30th day of April, 1877, as the last day for the deposit of securities, has been given to every known Bond and Stockholder, and in addition, repeated advertisements have been inserted in the leading metropolitan and provincial journals of the United Kingdom. The result, as regards Bonds, is as follows:—

The Trustees desire to intimate that no farther deposits of Bonds or Stock under the Revised Official Scheme of Arrangement can be accepted, except upon condition that the depositors shall pay a definite subscription towards the expenses of the Scheme, of every description, at the following rates:

22 for each 1st Mortgage Bond of 1,000 dols.

21 — 2nd — 2nd

11 s — 3rd

21 per cent, on Reorganisation (1870) Stock.

13 per share on the Preferred and Common Stock.

Up to the 30th June next, the Trustees will treat this payment as a contribution towards the Reconstruction expenses, and will give a receipt entitling the bearer, when the Reconstruction is complete, and on presenting a receipt or receipts of this kind, amounting in the aggregate to at least £20, to a Bond of the Reconstructed Company for 100 dols, part of the intended i sue of Prior Lien Bones to the amount of 7,000,000 dols, provided for by the Revised Official Scheme of Arrangement, to be issued on the completion of the Reconstruction.

After the 30th June next, no Bonds or Stock will be received except upon payment of an absolute subscription at the above rates, which will not be repayable.

The Trustees do not by this step in the least degree attempt to interfere with the legal rights of the Bondholders who have not deposited, to participate according to their priorities in the cash proceeds of the sale of the Line, should any Surplus remain available for distribution after payment of the receiver's indebtedness and other prior charges. Acting, however, in accordance with the unanihous resolution passed by the Bondholders, they decline to allow any addition to the number of persons, who have, under the Revised Official Scheme of Arrangement, joined together for the purpose of purchasing and becoming the future owners of the line, except upon condition that every future depositor shall make in the manner indicated, a reasonable contribution towards the expenses of carrying out the Scheme of Official Scheme of Arrangemen

"BRAIN AND NERVE FOOD." BIRLEY'S

SYRUP OF FREE PHOSPHORUS.

THIS INVALUABLE PREPARATION of Phosphorus which has previously been rendered
absolutely pure is justly held in the highest estimation.
Phosphorus has been called a "divine remedy:" and,
truly, when it is distilled and its perfect solubility thus
secured, its action upon the human system justifies this
distinction. This is the case with BIRLEY'S SYRUPOF FREE PHOSPHORUS, which has gained a
reputation perhaps more richly deserved than that of
any other medicinal agent. And yet it is, in truth,
a FOOD. Assimilable, as it is, at once, lift the nervous
system, without being a stimulant, its use cannot be too
strongly urged, not only in the case of the invalid as a
restorative, but in that of the healthful as a preservative.

restorative, but in that of the heating as a preserva-tive.

It is sent out in imperial pint bottles only, at Ten-Shillings each, bottle and case included, but not carriage paid. The quantity to be taken is such that the pint lasts nearly three months, and is sufficient to-work the most satisfactory results. Post Office Orders to be made payable, in advance, to the SOLE METRO-POLITAN AGENT.

THE POND'S EXTRACT CO.,

482 OXFORD STREET, LONDON.

BANQUE DE PARIS ET DES PAYS BAS.

Report presented by the Board of Directors in the General Ordinary Meeting of the 12th May, 1877.

GENTLEMEN,—In conformity with Art. 24 of our statutes, we have to about to you the accounts of our Society for 1876.

That year has not been favourable to the development of the business of credit establishments. The successive phases of the Eastern question have not ceased for a single day to keep the European markets on their guard, and to shackle the spirit of enterprise. The instability of the situation has necessited great reserve in new undertakings and emissions, which can only be attempted under favour of a period of assured tranquillity. Disposable capital naturally takes refuge in essentially temporary investments, and the competition of the offers has led to a considerable reduction in the rate of interest, either for discount or for reports. discount or for reports,

Faithful to the rules of prudence which we have already expounded before you, we have not thought advisable, under such conditions, to offer te the public any new affair during the last year. We have devoted all our attention to undertakings already engaged in, and have confined ourselves to some short dated operations which have been wound up favourably; but the profits on our accounts of interests and loons for carrying over Bourse purchases (reports), have been reduced

to such a point by the abundance of money, that the final result of the year is very considerably inferior to that of former years.

We have had no occasion to depart from our reserve, except for the issue of the new loan contracted in 1876 by the City of Paris. We took a large share in it both for our clients and for ourselves, and, as in the preceding year we have had no preceding year. in the preceding year, we have had no reason to regret our confidence in that first-class investment.

We have wound up our branch at Antwerp, the maintenance of which would only have been really useful had we wished to engage in commercial operations properly speaking. We were led to acknowledge the difficulty of following at a distance, with all the vigilance necessary, the direct discount of commercial paper, the normal profit on which is not always in proportion to the risk incurred. An opportunity having presented itself for our business and our transferring connection to an esteemed establishment, placed under most honourable patronage, we had the less hesitation in taking advantage of it that the Banque de Paris et des Pays Bas appeared to us to be sufficiently represented in Belgium by our Brussels branch, the importance of which has considerably increased.

The results of our three branches at Amsterdam Brussels and

The results of our three branches at Amsterdam, Brussels, and Geneva have been affected, as those at the head office, by the low price of money; nevertheless, their net produce has not varied greatly from that of the preceding year. If you will only remember the financial commotions which unsettled the Belgian market during the year, the fact that our Society suffered no loss under that head deserves to be signalised to you

signalised to you.

The balance sheet which we submit to you, drawn up on bases which we have several times mentioned in preceding reports, amounts to a total sum of 209 millions, instead of 231 millions, as in 1875. The impossibility of obtaining a remunerative interest in reports, has led us to reduce that branch of our operations, and to employ in French Treasury bonds and advances on security, a part of the sums we are

accustomed to lend on the Bourse.

The capital devoted to the business of the branches is reduced by four millions, due in great part to the suppression of the branch at Antwerp.

The profit and loss account for the year shows a gross profit of 4,090,430f 37c, or, compared with the previous year, a diminution of 4,800,000f—one-half of which is in the account of interests and reports, and the other in the account of the securities held by the Bank, which, in the uncertain period through which we are passing, have not obtained the increase of value which we had reason to expect.

The composition for the stamp duty and the taxes (not including the transfer duty and the income tax deducted from the coupons paid) represent a charge of 125,217f 34c, or within a small fraction the same amount as last year.

The general expenses of the central establishment amount to 654,912f 23c, or a decrease of about 56,000f on the same item for 1875. The pension and relief fund for the employés in Paris received this year a donation of 5,000f only, instead of 20,000f. It has appeared to us fair to establish a certain relation between the annual gratuities to that fund, and the amount of the profits realised by the Company.

that fund, and the amount of the profits realised by the Company.

The different charges we have enumerated being deducted, the net profits for the year amount to 3,291,612f 22c, or, after the formation of the legal reserve, 3,127,031f 60c, which represents for the capital a net produce of five per cent.

Our Company has been, unfortunately, the victim of frauds committed by a clerk who had entered our offices with the best recommendation during the first months of its foundation, and who, by his activity and intelligence, had arrived at the commendation, and who, by his

dation during the first months of its foundation, and who, by his activity and intelligence, had arrived, at the commencement of the year of which we are giving an account, at the post of chef de service. He abused his new situation and the confidence he had acquired by his previous good conduct, to effect, by means of forgeries, frauds to the amount of 559,000f. The culprit is in the hands of justice, which will

shortly decide on his future.

We propose, gentlemen, to take the amount of these frauds from the provident fund, adding that the Council, abandoning its right, has refused to take from that sum the ten per cent. which belongs to it in the special fund.

In conformity with considerations expressed in preceding reports, when we asked you to put aside a part of our profits to meet too great variations between the annual dividends, we also propose to you to take from the provident fund the necessary sum to increase to 30f the dividend on our shares for 1876.

If you approve of our proposals the total of our reserves of the year 1876, will still represent a sum of 9,549,141f 18c.

As before, we have met in the direction and staff of employes of all ranks, with an intelligent and devoted assistance, the more appreciable in proportion to the difficulties of the circumstances. We are happy to acknowledge it before you.

The Directors drawn by lot to retire this year are M. H. Bamberger and M. J. Stern. By Art. 20 of the statutes, they are eligible for

Our colleague and friend, M. E. Fould, has been led, from motives of health, to pass the greater part of the year away from Paris. He has in consequence requested us to receive his resignation, and before a determination fimly expressed we have been forced to consent to accept it. You will associate with us, gentlemen, in the expression of the

it. You will associate with us, gentlemen, in the expression of the regret that his withdrawal causes us.

We have also to announce to you that from personal considerations,
M. Cunin-Gridaine has resigned his functions as Auditor. The Board will preserve a favourable recollection of his useful co-operation since the foundation of our Company.

Your Auditor, M. F. Thomas, has taken as his colleague, in the room of M. Cunin-Gridaine, in conformity with Art. 32 of the statutes, M.

Charles Berthier.
You have to decide on that choice which is submitted with confidence for your ratification.

EXTRACT FROM THE REPORT OF THE COMMISSIONERS.

The total assets amount to 209,033,575f 86c. That total comprises, under the head of fixed accounts and current accounts of the a sum of 11,122,231f 30c, which is reproduced among the liabilities, and

a sum of 11,122,2311 30c, which is reproduced among the habilities, and forms only a balance entry.

That account besides, presents a great utility, as it exhibits the amount of the capital placed by the central office at the disposal of the branches. A comparison with the year 1875 exhibits a decrease of 4,176,859f, due principally to the closing of the Antwerp branch.

After deduction of that sum of 11,122,231f, and 62,500,000f for the

After deduction of that sum of 11,122,231f, and 62,500,000f for the uncalled capital, the assets are reduced to 135,411,284f, spread over fourteen accounts, of which six—cash at Bank, discounts, disposable funds in banks, reports, coupons to be received, and liquidation of the 31st December—amount together to 41,596,210f, representing operations now terminated, and not calling for any observation.

The other accounts—advances on security, correspondents in France and abroad, Government securities, shares and bonds, and divers participations—have been the subject of a most attentive examination by

us. They have appeared to present the same conditions of a wise division of the risks, and of a prudent and rigorous estimate, as we have indicated in our preceding reports, and which can but consolidate the bases of your Company.

No change has taken place in the account of land and house pro

Among the liabilities you will remark that of the eight accounts of which it is composed—four, namely, the capital, legal reserve, provident fund, and profit and loss account—amount to 139,929,617f, or two-thirds of the total amount, and form only a debt to the establishment itself.

The liabilities of the Bank towards other parties do not exceed 53 millions, and consists entirely of the three accounts—bills due, 1,517,747f; current accounts of Syndicates, 72,213f; and correspon-

dents in France and abroad, 51,596,018f.

The balance of profits, representing a net revenue of 5 per cent. per annum, after deduction of 134,580f 62c for the legal reserve, is much less than in preceding years; but that result is too clearly explained by the general stagnation of business, the absence of any new issues, and the extremely low value of money during the whole of the year 1876. It is present to you to take I per cent from the special provision.

1876. It is proposed to you to take 1 per cent. from the special provident fund to increase the dividend by 1 per cent, or to 30f for the year.

The provident fund would still amount to 7,460,055f 56c and would form, with the legal reserve, increased to 2,089,085f 62c, a total sum of 9,549,141f 18c. The deduction proposed for this year is less by about 153,000f than the sum by which you had increased your reserves in

We, therefore, propose to you, gentlemen, to approve of the accounts for the year 1876, as presented by the Board of Directors.

The Commissioners,

CH. GIDE.

Paris, 20th April, 1877.

E. LEVIEZ.

The Meeting adopted unanimously the four resolutions—(1) fixing the dividend for 1876 at 30f, of which 20f was paid on the 1st January, and 10f will be distributed on the 1st July; (2) re-elected M. H. Bamberger and M. J. Stern as Directors; (3) confirmed the appointment of M. C. Berthier as Auditor; (4) named M. E. Leviez and M. H. Singer as Commissioners to draw up a report on the accounts of 1877 for the next general meeting.
