Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

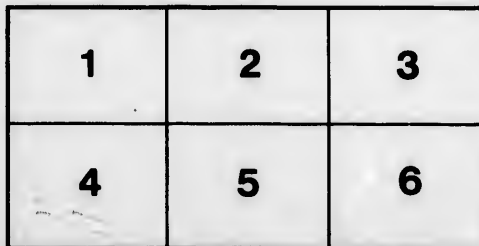

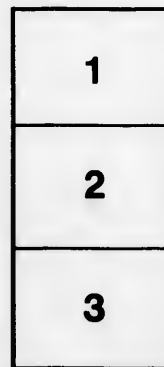

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Explanation of the Articles in the Calendar.

These pages are calculated for Toronto and Quebec, and for ordinary purposes will serve with sufficient accuracy for every city in Canada.

MOON'S PHASES.—This Table gives the times for the two meridians when the moon passes the geocentric longitudes of 0°, 90°, 180° and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this table are given the times at which twilight begins in the morning and ends in the evening, i. e., the times when the sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following table.

Degrees of Latitude.....	42	43	44	45	46	47	48	49	50
1st Correction for Degrees.....	-6 58	-4 5	-2 5	0 0	+2 12	+4 32	+6 59	+9 34	+12 48
2nd Correction for each minute of latitude.....	+ 1 1/2	+ 2 1/2	+ 2 1/2	+ 2 1/2	+ 2 3/4	+ 2 5/8	+ 2 5/8	+ 2 7/8	+ 2 7/8

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar, or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

Thus for latitude 43° 20'. 1st correction = - 4' 5"	2nd correction + 2.0 × 20 = + 40"
" " 47° 40' " " + 4' 32"	" " + 2.5 × 40 = 1' 40"
" " 45° 10' " " + 0' 0"	" " + 2.2 × 10 = 0' 22"

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of Toronto.

When the planetary day is shorter than the mean solar day, and commences soon after the midnight of the preceding day, the planet will sometimes arrive a second time on the meridian before the expiration of the actual civil day. From analogous causes a planet will sometimes rise twice or set twice in the same civil day. When two culminations occur in the same day, or two risings or settings, the times of both are registered.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction both for Toronto and Quebec.

The MOON'S RISING is given from full to change, and her setting from change to full.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for Toronto. They are not corrected for parallax or refraction.

The column SUN ON MERIDIAN gives the time that a watch should shew when the shadow of a sun dial is on the noon mark.

DECLINATION OF THE SUN AT APPARENT NOON.—This column gives the sun's declination at the instant he passes the meridian of Toronto.

MOON'S AGE.—This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the moon's centre passes the meridian of Toronto.

The column, UPPER TRANSIT OF POLE STAR shews for every day the mean time at which the Pole Star makes its upper transit across the meridian of Toronto. It passes in the morning from April 8th to October 8th, and in the evening for the rest of the year.

The five last columns, although computed for Toronto, will serve with sufficient accuracy for the whole of Canada.

The time at which the lower transit of the Pole Star occurs may be found by adding 11 h. 58 m. 2 s. to the time of its preceding upper transit.

From the time of the upper transit of the pole star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Magnitude

The first or
Magnitude

From the times of the upper transit of the Pole Star may be derived, with the aid of the following table, the times of culmination, and of the rising and setting of the principal fixed stars that appear above the horizon of Toronto.

Star Table.

To ascertain when any star found in the following table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage; for the setting of a Star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at Toronto, or at places to the north of Toronto.

TABLE.

Shewing the Illuminated Portion of the Discs of Venus and Mars.

The numbers given in this table represent the width of the illuminated portion of the Discs measured along the diameter that divides the illuminated portion symmetrically—the apparent diameters of the planets being considered as unity.

1859.	Venus.	Mars.	1859.	Venus.	Mars.

Eclipses.

In the year 1859 there will be four Eclipses of the Sun, and two of the Moon.

- A partial Eclipse of the Sun, Feb. 2, invisible in Canada.
- I.—A total Eclipse of the Moon, Feb. 16-17, visible in “
- II.—A partial Eclipse of the Sun, Mar. 4, invisible in “
- IV.—A partial Eclipse of the Sun, July 29, vis. in Canada.
- V.—A total Eclipse of the Moon, Aug. 13, invisible in “
- VI.—A partial Eclipse of the Sun, Aug. 27, invisible in “

I.—PARTIAL ECLIPSE OF THE SUN, FEB. 2.

This Eclipse will be visible only in a small portion of the Southern Ocean, above the parallel of lat. 55° S. Magnitude of the greatest phase = 0·012, the diameter of the Sun being unity.

II.—TOTAL ECLIPSE OF THE MOON, FEBRUARY 16-17.

The first contact with the shadow occurs at 121° from the northernmost point of the Moon's limb towards the East. Magnitude of the Eclipse (Moon's diameter = 1) = 1·693. Duration of total Phase, 1h. 37m. nearly.

Interval between first and last contact of Moon with shadow, 3h. 32m.
 Do. do. do. with Penumbra, 5h. 24m.

The following Table shows the hour and minute, civil local time, at which the different phases commence at certain stations on the morning of February 17th.

PHASES OF THE ECLIPSE.	Halifax.		Quebec.		Montreal.		Kingston.		Toronto.		London.		Detroit.	
	h.	m.	h.	m.	h.	m.	h.	m.	h.	m.	h.	m.	h.	m.
First contact with Penumbra	3	46	3	16	3	6	2	54	2	43	2	35	2	28
First contact with the Shadow	4	42	4	12	4	2	3	50	3	39	3	31	3	24
Beginning of total Phase	5	40	5	9	5	0	4	48	4	37	4	29	4	22

The termination of the different phases will not be visible at the Stations named above, as the Moon will at each of them set totally eclipsed.

III.—PARTIAL ECLIPSE OF THE SUN, March 4.

This Eclipse will be visible in parts of the North Pacific, North-West America, Siberia, and the Arctic Ocean. Magnitude of greatest phase = 0.249 (Sun's diameter = 1).

IV.—PARTIAL ECLIPSE OF THE SUN, July 29.

The Eclipse will be first seen at 8h. 27m. Greenwich mean time, from a point in Northern Asia—lat. 60° 26' N. and long. 6h. 17m. E.

The greatest phase will be seen at 9h. 56m. Greenwich mean time, from a point in lat. 63° 0' N. and long. 1h. 2m. W. Magnitude of the greatest phase = 0.523 (Sun's diameter = 1).

The Eclipse will be last seen at 11h. 25m. Greenwich mean time, from a point in lat. 33° 39' N. and long. 4h. 27m. W.

The mean local times of the first and last apparent contacts, as seen from certain stations in British North America, are given by the following table.

STATION.	Lat.	Long.	Approximate mean local time of					
			First Contact.		Last Contact.			
			h.	m.	h.	m.		
A point in or near Halifax	44	30	4	14.4	5	52.8	7	4.3
Do. Quebec	40	29	4	44.8	5	22.1	6	33.0
Do. Montreal	45	30	4	54.4	5	15.7	6	24.0
Do. Toronto	43	39	5	17.5	5	0.6	6	0.9

V.—TOTAL ECLIPSE OF THE MOON, August 13.

The magnitude of the Eclipse (Moon's diameter = 1) = 1.810.

Duration of total phase..... = 1.40 nearly.
 Interval between first and last contact of the Moon with the Shadow..... 3 56
 Interval between first and last contact of the Moon with the Penumbra..... 6 15

This Eclipse will not be visible in Canada, as the Moon during its occurrence will be below the horizon.

VI.—PARTIAL ECLIPSE OF THE SUN, August 27.

This Eclipse will be visible only in part of the Southern Hemisphere. Magnitude of greatest phase (Sun's diameter = 1) = 0.526.

OUR CALENDAR.

Some months back, an anonymous letter, signed "OBSERVER," appeared in the columns of the *Montreal Gazette*, charging the Astronomical portion of our CANADIAN ALMANAC with gross blunders and absurdities. The ignorance displayed by this *sed-stant* "Observer" is so ridiculous and childish as to render his remarks hardly worth our notice; and, indeed, we should have passed the matter over in silence had not our attention been more than called to the critique by letters from many friends both in Canada and the United States. It is also very possible that some persons may have heard that objections have been made to this department of the Almanac, without knowing what these objections were, and as they a moreover put forth by "Observer" with an air of self-assurance calculated to mislead those unacquainted with the subject, we have determined to publish his letter, and append a few explanatory remarks, which may prevent others from falling into similar errors.

To the Editor of the *Montreal Gazette*.

SIR,—I wish to draw, through you, the attention of Messrs Maclear & Co., of Toronto, to a series of errors of great magnitude which run throughout the whole of their astronomical calculations, as given in their "Canadian Almanac" for 1858. It is alleged that these calculations are made expressly for this publication at the Provincial Observatory at Toronto. I can scarcely imagine this to be the case, else so gross a series of errors could scarcely have been committed; or, if the reality be such, there must have been some egregious oversight. My attention has been drawn to the fact, in attempting to establish a mean local time for the ending of the Solar Eclipse of this morning; and I thought, that as so much space was devoted in this Almanac to astronomical calculations and data of various kinds, that I would have experienced but little difficulty in coming to my conclusion. But I never was so miserably disappointed. Thus I find (according to this Almanac) that the sun rises and sets on this day in Quebec and Toronto at precisely the same moment of time, viz: 6° 13' for former, and 6° 13' for the latter; and that the moon rises in both places at precisely the same moment, viz: 6° 38'.

Now the longitudes of Quebec, Montreal, and Toronto, are respectively 288° 41', 286° 41' 28" 23", and 280° 39' each; or, as usually set down, 71° 10' for the first, 73° 35' for the second, and 79° 21' for the third. West, exhibiting a longitudinal difference between the first and last cities, or Quebec and Toronto, of 8° 5 degrees; and as every 15 degrees of longitude are approximately equivalent to one hour of time, the sun ought to rise in Quebec thirty-two minutes and thirty-three seconds (or approximately so) earlier than what it should in Toronto.

On referring back to the time of the sun rising at the commencement of the year, January 1st, I observe that a difference of only 11 minutes is made between the occurrence of the same event in the two places. From that period to the present, however (March 15), the time has gradually diminished, until it has amounted to nothing. But not only this: it is actually made to rise by that previous amount of time earlier in Toronto than it does in Quebec. Joshua was a fool in comparison with such astronomical achievements as this. He only made the sun stand still for a limited time, but here we have throughout a whole year the sun made to rise (on paper) more early on a westerly place than on an easterly one.

Would it not be wise, Mr. Editor, for the Messrs. Maclear to examine a little more minutely into their astronomical data before issuing them, as sanctioned by, or the work of the "Provincial Observatory of Toronto." If it be true, as stated on the cover, that "the astronomical calculations have been made expressly for this publication at the Provincial Observatory of Toronto." one of two contingencies follows: that the parties concerned are incompetent to their duties or that they have committed a series of the grossest blunders which I have ever witnessed.

Montreal, 15th March, 1858.

Yours very truly,

OBSERVER.

The misapprehension of "Observer" consists in his confounding absolute with local time. Absolute time is independent of the station of the spectator, but local time is measured from the noon of the place: thus MEAN LOCAL TIME is expressed by the number of mean hours, &c., that have elapsed since mean noon, or, what is the same thing, by the angle at the pole between a declination circle through the mean sun and the meridian of the place, reckoned from the meridian towards the west, at the rate of 1h. for 15°. Similarly, APPARENT LOCAL TIME is expressed by the angle between a declination circle through the true sun and the meridian of the place, and measured in the same manner.

If two places, A and B, be on the same parallel, with a difference of long. of 15°, the sun will set at the more westerly place, A, one hour later than at B, reckoned in absolute time, but approximately at the same instant in local time; because the noon from which the local time of A is reckoned occurs one hour later in absolute time than the noon from which the time of B is reckoned.

Again, if two places, C and D, be on the same meridian, and, for example, be both in north latitude, the sun when in north declination will rise earlier in absolute time at the northern station C, than it will at D. When the sun is in south declination he will rise later at C than at D, and when the sun is at the equinoxes he will rise at the same instant at both C and D. Moreover, this will be true also in local time, because the times of both places are reckoned from the same meridian.

If "Observer" would understand that the local time of sunrise depends on the latitude of the place, and only indirectly and that to a very small extent on the longitude, the mystery would be cleared up of the sun rising in January 11 minutes earlier at Toronto than at Quebec; of this difference diminishing and finally vanishing as the sun approaches the equator, and (we may add, if he had examined the Almanac a little further,) of the sun after the equinox rising earlier at Quebec than at Toronto.

Before concluding, we must express our acknowledgments to an anonymous writer, "W." who a few days after in the same journal, the *Montreal Gazette*, published an able letter in reply to "Observer," entitled "A Corrector corrected," in which he very clearly and happily demolishes our friend's attack upon the Almanac, and we regret that our space is too limited to give his letter here. We must, however, explain to "W." the cause of a discrepancy he notices in his letter, as follows: "From it (Table of Semi-diurnal Arcs) "Observer" would have learned that to get the time of the sun's rising for the latitude of Montreal, he had to deduct 5h. 51m. 7sec. from the time it reached the meridian, and "that, therefore, the sun would rise on the 15th inst. (March, 1858), at 6h 17 min. 56 sec. This time is 4 min. 50 sec. later than that given in the Almanac, &c." The difference (4 min. 46 sec.) between the result obtained by "W." and that given in our Almanac is explained on page 2, where it is stated that the time of sunrise is given for the upper limb corrected for refraction. It is, in fact, the time at which the sun first actually appears.

* In Table

↑ Do.

The mean 1834 below the preceding months were the averages for the year of 4 to 2.5.

ary was the lowest in our history.

Another year to our winter, which is December, with a remarkable temperature — 20° was also never occurred before the coldest, but it was a little higher and the low temperature was observed for that heat deviation in Bayonne 30.361 inches and the low record of 10 were 43 inches exceeded in range to the excess was greatest deviation.

The great rising of a full with a full.

Humidity great in April and May and 2 1/2 in Jan and 5 1/2 in the day and

ABSTRACT OF METEOROLOGICAL OBSERVATIONS,

MADE AT THE

Magnetical Observatory, Toronto, Canada West,

For the year of our Lord 1857; compiled from Reports, &c., published in the Canadian Journal.

Table with columns: Month, Temperature (Mean, Highest, Lowest, Range), Barometer (Mean, Highest, Lowest, Range), Warmest Day (Date, Mean Temp., Date, Mean Temp.), Coldest Day (Date, Mean Temp., Date, Mean Temp.), Rain in inches, Snow in inches, No. days Rain, No. days in w., No. Fair Days, Mean Humid., Min of hours, Resultant Direction of Wind, Mean Velocity of Wind, Miles per hour, No. Thunderst.

* In Tables in last year's Almanac, for 1855 & 1856, the figures inserted here were the average range of the months; they should be the yearly range 118.0 and 112.3 respectively.

† Do. do. do. do. 2.033 and 2.021 do.

The mean temperature of the year 1857 was 42.73, being 1.34 below the average of 18 years but 0.57 above that of the preceding year. The mean temperatures of the several months were in seven instances below and in five above the averages for the respective months, the average depression to the average elevation being moreover in the ratio of 4 to 2.5. January was the coldest January and February was the warmest February on record, and the thermometer from their respective averages, but in contrary direction, was so great as to occasion an inversion in the difference between their temperature; for whereas February is on the average 0.24 colder than January, it was in this instance by 5.78 the warmer of the two.

Another example somewhat similar but not amounting to an inversion occurred at the close of the year. November, which on the average is more than 9° warmer than December, was but 1.9° warmer in 1857. January was further remarkable for exhibiting the lowest absolute temperature -20° 1 that ever occurred in January, and February was also remarkable for the highest temperature 52° 4 that ever occurred in February. The minimum of November -39.5 was more than 10° lower than any temperature that occurred before in that month. Jan. was moreover not only the coldest Jan. on record and the coldest month of 1857, but it was absolutely the coldest month ever recorded.

The highest absolute temperature was 88° 2 in August, and the lowest -20° 1 in January.

There were 71 instances in which the temperature at the hour of observation was depressed 20° below the normal for that hour 17 instances only when there was an equal deviation in excess.

Barometer.—The highest reading of the barometer was 30.361 inches, and occurred at 9 p. m. on 1st February, and the lowest 28.452 inches, which was the lowest ever recorded, occurred at 10 a. m. on 19th November. There were 43 instances in which the reading of the barometer exceeded the average, and 44 when it fell short of the average to the extent of half an inch. The greatest deviation in excess was 0.745 at midnight on 10th February, and the greatest deviation in defect was 1.110 at 8 a. m. 19th Nov.

The greatest barometric range within 24 hours was at a rising column was .918 on 8th February, and the greatest with a falling column was .715 on 26th February.

Humidity.—The mean humidity of the year was 79. The greatest monthly humidity being in Jan., and the least in April and May. There were 15 instances of complete saturation of which 7 occurred in Jan., 4 in Feb., 2 in March, and 2 in Dec. The days of the greatest humidity were 23rd Jan and 5th Feb. on both of which the mean humidity of the day amounted to .98. The least humidity at the time

of observation was .31 on the 4th March, and the two driest days were 30th March with a mean humidity .54, and 21st May with a mean humidity .55.

Clouds.—The extent of sky clouded was on the average of the year three-fifths of the whole and for nine months the sky was on the average more than half overcast. December was the most cloudy month, and September the month most free from clouds. The most cloudy hours on the average were from 2 to 4 p. m., and the hour most free from clouds was 10 p. m.

Wind.—The resultant direction of the wind it will be seen from the table was rather more from the north than usual, and both the resultant velocity and the mean velocity were less than in the preceding year. The most windy day was 24th October when the velocity was 27.08 miles per hour. The most windy hour absolutely was 6 a. m. to 7 a. m. on 10th Feb. when the velocity was 44.6 miles per hour. The most windy hour on the average of the year was from noon to 1 p. m. with an average velocity of 10.63 miles per hour, and the least windy hour from 5 to 6 a. m. with an av. vel. of 6.36 miles per hour.

RAIN AND SNOW.—The depth of rain, 33.205 inches, was considerably in excess of that of late years, but the total depth of rain and melted snow, though amounting to 40.585 inches, fell short by about one inch of that of 1855, when the quantity of snow was extraordinarily great. August was the most rainy month, considered with reference to the quantity of rain, and June with reference to the number of rainy days. January with a regard to the quantity of rain and the number of rainy days was the least rainy month, but if snow be reckoned as well as rain January will rank next to August with respect to the amount, and next to June with respect to the number of days of precipitation. The most rainy day was 15th February, when the depth amounted to 1.620 inches, and the heaviest fall of snow was on 16th January with a depth of 5.5 torhes.

THUNDERSTORMS.—Of the 24 thunderstorms enumerated in the table there were but few remarkable for violence. There were besides 9 days when lightning occurred without thunder or hail 3 days of thunder without lightning or hail, and 6 days when hail fell unaccompanied by either.

AURORAS.—The nights favorable for observing Auroras and the number of auroras observed were both considerably less than in the preceding three years, but the aurora that were observed on the nights of 7th May and 17th of November were far more brilliant than any recorded during the same period.

From the 10th to the 13th August the periodic meteors were numerous, and some of considerable brilliancy; in November there was a remarkable absence of these bodies.

REMARKABLE OCCURRENCES IN 1857.

January, 1857.

1. John Britton, antiquary and topographer, died, aged 80.
2. The Archbishop of Paris (Siborn), aged 65, assassinated by a priest, while officiating in the Church of St. Stephen of the Mount, in Paris.—Andrew Ure, M.D., F.R.S., author of the Dictionary of Arts, died, aged 79.—Duchess Henrietta of Wurttemberg died, aged 77.
5. Right Rev. James Wilson, D.D., Bishop of Cork, died.
6. The factories at Canton burnt by the Chinese.—The "Northern Belle," from New York to London, wrecked off Kinszatsa.
8. Conference held in Copenhagen in reference to the Sound dues.
12. The Grand Duke Michael arrived at Genoa.—A great part of Canton burnt during the attack upon it by the English.
13. The "Tynne," West India Mail Steamer, went ashore in a fog off St. Alban's Head, on her homeward voyage.
14. Dutch fleet attacked by the Chinese, who were repulsed.
15. The National Council of Switzerland accept the propositions of England and France in reference to the Neuchâtel difficulty.
16. Conviction of Leopold Redpath for forgery, is transported for life.—120,000 tons of rock dislodged at Holyhead by one blast of powder of 18 00 lbs.
18. Terrible snow storm affecting the Northern portions of the U. States and Canada, accompanied by severe cold.
19. Last night one of the generally coldest experienced in the U. States and Canada this century. Thermometer at Water-town, U. S., marked 40° below zero.
20. Duke of Rutland died, aged 69.
21. Captain Baker and a seaman of the American bark *Henry H. Cripe*, which was lost in a squall on the 15th, picked up at sea by steamer *England* after 40 hours' immersion.
24. Dr. Medhurst, English missionary to China, died, aged 71, he was also a noted linguist, and author of a work on China.—"The Rover's Bride" of St. John, N. H., found water-logged and abandoned in lat. 39° 39' N., long. 41° 52' W.
25. An Amnesty declared for the Lombardo-Venetian Kingdom.—A slight shock of an earthquake felt in Boston, near Nottingham, England.
30. An attempt made to destroy the Europeans in Hong Kong, by poisoning their bread.—Vercor, the assassin of the late Archbishop of Paris, executed.
31. A slight shock of an earthquake felt at Venice, Padua, and other towns in Venetian Lombardy.

February, 1857.

2. In Melbourne, Australia, it is agreed that 8 hours' work shall constitute a day's work, and be paid for as such.
3. Imperial Parliament opened by Royal Commission; the Queen's speech read by the Lord Chancellor.
8. Gen. Outram obtained a victory over the Persians at Koonshab, near Bushire.
9. About \$2,000,000 worth of property destroyed in Albany by the rising of the river and freshet caused by the melting snow.
15. Piratical Junks at Toon-Chung, China, destroyed by the Eagle's and Auckland's boats.
16. Dr. Elisha Kent Kane, the celebrated American Arctic traveller, died at Havana, Cuba, aged 35.—The French legislature opened in the Palace of the Tuilleries by the Emperor in person.
17. Mexico in a complete state of anarchy.—Volcano de Fuego, Guatemala, in an active state of eruption.—Insurrection at Sarawak, China.
18. Francis Elloumere, Earl of Egerton, died, aged 57.
19. Fearful coal-pit explosion at Sandhill, near Wombwell, England, about 180 lives lost.
24. Rev. T. D. Hincks, Orientalist, died, aged 90.
25. *Joseph Names*, passenger ship from London to Melbourne, burnt at sea, fortunately no lives lost.

March, 1857.

3. A Treaty of Peace signed at Paris between Gt. Britain and Persia by Lord Cowley and Ernk Khan.—Election of Mr. Buchanan as President of U. S.—The Imperial Government defeated on the China question by a majority of 10.
4. Inauguration of Mr. Buchanan as President of the United States.
5. Conference at Paris on the subject of the Neuchâtel question.
12. Fearful accident on the Gt. Western Railway, Canada, by the breaking down of the Desjardins Canal bridge, 63 out of 100 lives lost.—John Johnson died 1. Allegheny township, Pennsylvania, aged 103; he served in the Continental Army during the whole of the American revolutionary war.
13. Earl Auherst died, aged 84.
14. Treaty between Denmark and principal States of Europe for abolition of the Sound Dues, signed at Copenhagen.
18. Comet discovered by M. Bruhn at Berlin; this comet is that discovered by M. Groussin in February, 1840, and its return expected this year in May or June.
21. Rev. Dr. Scroesby, Arctic navigator, died, aged 68.—Imperial Parliament prorogued; the Speech, delivered by the Lord Chancellor, announced an immediate dissolution.
26. Capture of Mohammerah by Gen. Outram with a force of 4,500; about 200 Persians killed.—The secession of the States of the Grand Duchy of Nassau opened at Wiesbaden.
27. Charles III., Duke of Parma, aged 31, died at Turin of a wound given by an assassin in the streets the night previous.
30. British fleet left Constantinople.—The Russians raised some of their ships sunk in Sebastopol harbour.
31. Madame Otto Goldschmidt (Jenny Lind) gave birth to a daughter.

April, 1857.

2. A boat containing passengers from Kingston to Cape Vincent, U. S., was capsized, all lost but two.
3. The Sepoys of the 10th Bengal Native Infantry disbanded for mutiny at Barrackpore.
5. Cessation of hostilities again at Persia, Sir Jas. Outram having received intelligence of the treaty of peace.
6. An Aerolite was seen falling near Colmar, France, in the afternoon, it appeared from 11 to 15 inches in length.
11. A Convention signed in Guatemala between the Republic and Peru, by which the former gave adherence to the treaty called "Confidential."
12. H. M. brig *Arab* captured off Cuba a slaver with 370 slaves on board, the survivors of 500, shipped at Kahluda, Africa.
13. Several houses destroyed in Fredrickton, N. B., by the breaking up of the ice in the St. John River and plugging up on land.
14. Princess Beatrice born at Buckingham Palace.
15. A policeman assassinated in the streets of New York by one of two burglars whom he had arrested.
16. Right Rev. William Skinner, Bishop of Aberdeen, died, aged 78.
20. The Grand Duke Constantine of Russia arrived in France on a visit to the Emperor Napoleon.
21. Departure from En land of the Earl of Elgin for China, as special ambassador to the Court of Peking.
22. Resolved in House of Commons that the Dowry of the Princess Royal be £40,000, with an annuity of £8,000.
25. The *Royal Sovereign*, 131 gun screw ship, launched at Portsmouth.
29. Frederick Emerson, an eminent American instructor, died, aged 68.
30. Duchess of Gloucester died, aged 81, the last of the family of George III.—W. B. Buchanan an American poet died, aged 63.—The new Imperial Parliament met to dispatch of business, Mr. Evelyn Denison elected Speaker.

29. Canton assaulted and taken in three divisions, two English 4800 men, and one French 900 men.—Severe shocks of earthquake again felt in Naples, fortunately unattended with any serious accident; vibrations of the earth are being felt daily.

ASTRONOMICAL DISCOVERIES DURING 1857.

Comet I. by Dr. D'Arrest, at Leipzig, 22nd Feb., visible about eight weeks. Comet II, by M. B. uhns, at Berlin, 18th March, visible for about eleven weeks; (this comet is identical with that discovered by M. Borsen, 1844). Planet (43) by Mr. N. Pogson at Oxford 15th April, named Ariadne. Planet (44) by M. Goldschmidt at Paris, 27th May. Comet III, by Dr. Klinkerfues, at Göttingen, 22nd June, visible about four weeks. Planet (45) by M. Goldschmidt, at Paris, 28th June, named Eugenia. Comet IV, by M. Dieu, at the Imperial Observatory at Paris, 2nd July, visible about four weeks; (this comet was discovered also by Dr. O. H. F. Peters, at Dudley U. S., on the 25th, and by Professor Habicht, at Göttingen, on 30th July). Planet (46) by Mr. N. Pogson, at Oxford, 10th August, named Hestia. Comet V, by Dr. Klinkerfues, at Göttingen, 20th August, visible for about six weeks. Planet (47) by Dr. Luther at Bilk, 15th September. Planet (48) by M. Goldschmidt, at Paris, 19th September, named Pales; also another planet (49) by the same person on the same evening, named Doris. Planet (50) by Mr. Ferguson, at Washington U. S., 5th October, named Virginia. (this planet was also detected by Dr. Luther, at Bilk, on the 19th October). Comet VI, by Dr. Donati, at Florence, 10th November, visible for about six weeks.

THE FINANCIAL CRISIS OF 1857-8.

The autumn and winter of 1857-8 will long be remembered by the occurrence of one of the most severe and sudden commercial crises that has been experienced during the present century. The recurrence of such panics at almost regular intervals of eight or ten years for the last hundred years, has afforded matter for much speculation; and political economists have favoured us with many different theories to account for their occurrence. It is not our purpose however to trace the causes of these periodical disasters, but rather to glance at the history of the late "crisis," its effects on the trade and commerce of the world, and particularly its bearings on the agricultural, commercial, and manufacturing interests of Canada.

In tracing the effects of the crisis, its causes will be incidentally discussed. The causes were doubtless different in the different countries; yet so intimate are the relations which bind commercial nations together, that any interruption to the general business of the one is speedily and injuriously felt by all.

Within the last forty years, the commercial world has experienced five distinct "crises," each varying in its apparent causes. The crisis of 1818 is remembered for its severity both in England and the United States. At this period Sir Robert Peel carried his measure restricting the issues of the Bank of England, a law which has been condemned by many monetary writers. In 1825-6 another crisis occurred, induced through famine in England, and a fall in the price of Cotton in the United States. In 1833 another financial revolution took place in the United States consequent upon the establishment of the Treasury by General Jackson, and the removal of government deposits from the United States Bank. In 1837 occurred the greatest commercial and financial crisis of which we have any account, exceeding in its effects and endurance, though not in intensity, that of 1857.

The crisis of 1857 fell like a "thunder-bolt" on the commercial world. The mania for speedy riches had so blinded the public mind, that the dangers, which were accumulating on every side were unperceived or uncared for, till our whole commercial and monetary systems were involved in one common chaos, from which they are only yet slowly emerging.

Scarcely had the abundant harvest of the South and West been secured, when the failure of a large banking establishment in Ohio with its principal agency in New York alarmed the public mind. On the 24th of August, 1857, the Ohio Life and Trust Company closed its doors. The connection of this large institution with other minor concerns soon brought them to a stand, and the alarm, aided and increased by the Electric Telegraph, soon became general. A feeling of universal insecurity created a desire to realize and the best securities depreciated in value. Those *stop children* called bank notes, which are never welcome to the paternal roof, flocked home in thousands, like unwelcome visitors at the most inopportune moment. Discounts were contracted, and merchants, manufacturers and business men generally who had large payments to make, yielded to the pressure. Stocks fell to an unprecedented low figure, and exchange became unsalable. The loss of confidence so essential to commercial activity became after all the great cause of nine-tenths of the evils resulting from the crisis. Houses of undoubted standing were looked upon with distrust. Ample means was no security against failure. The banker looked upon the merchant's paper with suspicion, and the merchant looked upon the Bank note with equal distrust. The poorer classes surrounded the Banks, and in their eagerness to save themselves from loss, withdrew their precious metals, an act which was speedily to deprive them of their daily bread. Deprived of the basis of their circulation the Banks curtailed their discounts, workshops and factories were closed, and thousands of industrious workmen in the principal cities of the United States were thrown out of employment. Mean time the United States country Banks (of which there are over 1000) suspended in dozens, the Banks in Philadelphia followed suit, and on the thirteenth October several New York Banks gave way. On the next day, by general agreement, the whole New York City Banks (except the Chemical) suspended specie payment. The turning point was now reached and men began to breathe freely. The notes of the great majority of the United States Banks being secured by stocks passed freely, and for nearly two months scarcely a Bank in the United States paid specie at its counter.

From the United States the panic passed to England and the continent of Europe. At first it was thought that England could stand the shock without serious difficulty,

but the intimate relations which bind commercial nations together had not been accorded their due importance. Houses in the American trade began to give way, and in their fall involved others in ruin. Banking houses of long standing toppled down side by side with the wild speculator or reckless adventurer. The fair fame of Scottish banking was stained by the failure of one of the principal banking institutions under circumstances so discreditible as to throw even the *wild cat* banking of our western neighbors in the shade. An institution with seven and a-half millions of dollars of paid up capital, and thirty millions of deposits became hopelessly insolvent, and caused it to add an amount of suffering in Scotland greater than that entailed upon the country by the Russian War.

From these scenes of mortification and suffering let us turn to our own country. There was a pressure upon us from England, France, Germany, and the United States, for we were indebted to them all. The price of our principal article of export had fallen nearly one half of per cent. in value within four months. The cry of bank failure was heard on every hand. Exchange in England had gone down to 98, and the Bank of England had raised the rate of interest to ten per cent. The American Bankers were collecting our bank notes over a frontier of a thousand miles, and demanding specie at every bank counter. The United States Banks had suspended specie payment. The Bank of England had been permitted by Government to exceed its legal issues. The bank of France and the bank of Hamburg had received assistance from their respective Governments. In the midst of this general embarrassment and alarm it is a matter not only of congratulation but of pride, that not one Canadian Bank suspended specie payment. Intimately connected with the neighbouring Union in our business relations, having the same legal tender, and being exposed to the same risks from the withdrawal of public confidence, it speaks well for our bank management that not one banking institution in Canada dishonoured its paper for a single day. Not one we believe ever failed, and from the following table it will be seen that public confidence was never for a moment withdrawn.

Dec. 31st..	17991285	30746735	2217237	9157971	8137484

It is true that many parties advised the suspension of specie payment, and a Member of the Provincial Parliament compared the conduct of the Banks to the charge of Malacava, "as mad as it was glorious." The above returns however clearly indicate that no sudden contraction of the currency took place. It cannot be denied that the determination of the Banks to continue specie payments at all hazards, was attended with serious inconvenience to the mercantile community; but on the other hand, the pressure to which these were subjected was the best test of their solvency, and cannot fail ultimately to give confidence in their stability. We must not however attribute the prostration of business in 1858 to the panic of 1857. Canada lost comparatively little by the crisis. She was a debtor, not a creditor both as regards England and the United States. Her great difficulty arose from being pressed for payment at an inconvenient time. Her surplus production on which she relied to meet her engagements had not only depreciated in value, but owing to the loss of banking facilities could not be brought to market. Under these circumstances it need not be wondered at the general business of the country was seriously interrupted. Three fourths of the people of Upper Canada are engaged in agricultural pursuits, and the others are mainly dependent upon these. The fall in the price of wheat was clearly the great cause of our embarrassment. This article is the main element of the prosperity of Upper Canada. Its fall was not caused by the crisis, but was rather the cause of the crisis itself. England, through the full development of her manufacturing industry, is not so entirely dependent upon agriculture. The U. States in their mines and manufactures have also sources of wealth apart from the products of the soil. Hence we see these countries speedily recover from the effects of the

crisis. In Canada it is otherwise. The causes of our difficulties remain. Debts contracted in June, 1857, required double the quantity of produce to discharge them in June 1858. The evil is incurred by our purchases being principally from abroad. The large importations send the gold out of the country and contract the Bank circulation. The scarcity of money prostrates internal trade, and the farmer's home market is destroyed. His returns are diminished on every side, while his liabilities remain the same. The purchase of an extra hundred acres of land which under ordinary circumstances he could have easily met, becomes a source of embarrassment, and he is regarded as a speculator in real estate. The mechanic who in the bright day of prosperity had purchased a village lot, is thrown out of employment; he cannot meet his instalments and the savings of years fall into the hands of the sheriff. The suspension of home industry necessitates large importations of foreign goods and the evil is increased. To show the disastrous results to Canada arising from the fall in the price of wheat and other causes; we have only to state the total exports from Canada for the last three years:—

	1855.	1856.	1857.
Products of Agriculture.....	23,656,395	4,334,083	2,747,516
" the Forest	1,980,980	2,504,070	2,932,516
Other Products	587,480	602,979	682,402

It thus appears that the value of our exports of agricultural products fell nearly one-half between 1855 and 1857. Since 1850 the variations in the price of wheat in the Toronto Market have been as follows:—

Highest price paid for Wheat on the Toronto Market, in each month, for the past eight years:—

MONTH.	1850		1851		1852		1853		1854		1855		1856		1857		1858	
	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.
January.....	4	24	1	1	4	4	6	7	5	3	0	9	0	4	6

April.....	4	74	1	3	0	4	4	7	7	11	3	7	8	6	4	5	3
May.....	5	34	1	3	0	4	4	6	8	11	1	7	0	8	9	4	6
June.....	5	63	1	3	0	4	4	9	8	11	9	7	8	9	10	5	0
July.....	5	34	0	3	1	1	7	8	9	10	6	7	10	9	0
August.....	4	13	10	3	10	5	8	0	10	0	7	0	8	7
September.....	4	43	6	3	10	5	8	4	9	0	7	0	7	6
October.....	3	11	1	3	8	0	2	10	10	0	7	4	4	4
November.....	3	10	3	13	10	6	4	9	9	10	7	10	0	0
December.....	3	9	6	4	6	10	7	9	10	10	10	4	7

From the above it will be seen that within four months the price of wheat fell from 9s. to 4s. 6d., thus diminishing by one-half the ability of Upper Canada to pay her debts; nor was this all. The crisis compelled the banks to diminish their discounts while the Lower Canadian banks, which in time of prosperity had made largely by their Upper Canada business, withdrew their capital to the parent institutions. Our produce merchants whose standing had never been questioned, could not obtain their ordinary banking facilities, and to the fall in price was added for a time the impossibility of sending the produce to market. This is best shown by the following table compiled from the Trade Returns of the wheat and flour exported within the last three years:—

	WHEAT.	FLOUR.
1855.....	Bushels 3,193,748	Barrels, 643,936
1856.....	" 4,997,080	" 875,775
1857.....	" 2,762,684	" 743,949

Here then we have the true causes of the difficulties of Upper Canada. Having purchased goods in England, the United States and Lower Canada, commensurate with her wants and in anticipation of a continuance of high prices and her usual banking accommodation, she found herself suddenly deprived of all these elements of prosperity. What wonder that she felt the crisis more than Lower Canada whose chief article of export (lumber) had increased in value four millions of dollars between 1855 and 1857? Had the picture been reversed, had lumber fallen and wheat remained the same, and had the bank capital been withdrawn from Montreal and centred in Toronto, what would have been the respective condition of the two sections at this moment. The charge of extravagant living and wild speculation is as a drop in the bucket compared to the effect of the causes here pointed out.

A severe but salutary lesson is read to the whole people of Canada in the above statements. The impolicy of

depending so entirely upon the products of agriculture is clearly demonstrated, and never till there is a greater diversity of employments creating a steady and profitable home market to the farmer, will the prosperity of this fine country be placed on a permanent basis. Canada and particularly Western Canada is essentially an agricultural country. As we have said three-fourths of her people are engaged in agriculture, and the other fourth is mainly dependent upon these. Whatever therefore contributes to the prosperity of the farmer tends to advance the interests of all classes in the community. The facilities afforded to the agriculturist by the introduction of railways into Canada have added to the value of real estate in the country an amount almost incredible. In many parts of the Province land has risen from six to forty dollars per acre. The total number of miles of railway in the country is now over 1000, and the increased value of real estate from this cause alone is estimated at over one hundred and fifty millions of dollars. This increase in value however, can only be rendered profitable by a fuller development of the various products of the soil. The experience of the past eight years shows the risks to which the wheat crop is exposed. The risks of the crop itself, and the fluctuations in the price are greater than those of any other commodity. The labours of the mechanic yields a certain return, but the return of the farmer is dependent on many contingencies.—Every wind that blows and every shower that falls in this or in other countries, affects his condition. The avarice of capitalists and the ambition of Kings alike disturb the certainty of his reward. Within three years wheat sold at 11s. 9d. and 4s. 3d. in the Toronto market, and in October, 1851, it fell to 8s. 1d. To the ordinary risks of the crop and the fluctuations in the market must be added the undeniable fact, that continuous cropping must speedily so deteriorate the soil that the wheat culture will be abandoned in Upper Canada. Like the once fertile valley of the Richelieu in Lower Canada, which in 1790 yielded forty bushels per acre, the wheat fields of Western Canada under the present system will become exhausted, and their owners dependent upon the western prairies for their daily bread. In most other productions of the soil there is a steady market and fair prices. While our farmers have been raising wheat to be destroyed by the fly or sold at 80 cents per bushel, our American neighbours have been doing a profitable business in supplying our cities with the common necessities of life. According to the Trade Returns, '57, Canada imported from the U. States the following amount of the undermentioned products of the farm, and chiefly for consumption in Canada West:—

	IMPORTS IN 1857.
Animals.....	\$114,007 6 1
Butter.....	9,974 7 1
Cheese.....	38,967 5 2
Eggs.....	4,604 10 11
Firewood.....	18,054 11 3
Green Fruit.....	39,310 19 6
Hops.....	5,235 7 6
Lard.....	14,684 18 6
Meats.....	225,816 1 11
Plants and Shrubs.....	12,787 4 6
Poultry.....	2,011 4 6
Seeds.....	30,853 16 5
Tallow.....	89,392 7 5
Tobacco unmanufactured.....	30,033 8 0
Vegetables.....	16,477 1 1
	\$249,870 0 10

We commend the above to the consideration of the intelligent farmers of those sections of Upper Canada where the insect has destroyed their crop of wheat. The total imports of free goods in 1857 was £2,160,510, the greater part of which was for agricultural or animal products. Why will not our farmers turn their attention more to the raising of live stock, particularly in those sections of the country where the risk of the wheat crop is the greatest? We have seen on the bleak hills of Scotland ten thousand sheep in a single flock, and while the long winters of Canada may present a great obstacle to the successful raising of stock, there can be no doubt from the success of some of our most intelligent agriculturists, that the raising of this description of stock could be largely and profitably engaged in. Why should the people of Toronto and Hamilton be to a large extent supplied with American butter and cheese, eggs and vegetables? With a soil and climate adapted for raising the best fruit in the world, why should we import a large quantity of apples from the United States. In some orchards on the Hudson as

well as in Ohio the annual returns from fifty acres of orchard is over ten thousand dollars, and employment given to a large class unfitted for the heavier labours of the field. Why again do not our farmers engage in the cultivation of hops, grass seeds and tobacco? The latter might be extensively and profitably grown in the Western Peninsula. The Ottawa district is well adapted for the growth of flax. It is universally admitted that a better system of agriculture and a proper rotation of crops would tend to enrich both the farmer and the soil.

It is true a proper rotation of crops can never be profitably adopted in the absence of those manufacturing cities which consume on the spot those bulky and perishable articles which cannot be carried to a distant market. It is therefore in the interest of the agriculturists to encourage the introduction of manufactures into the Province. If ten millions of pounds invested in railways have added twice that sum to the value of the real estate in the country, an equal amount invested in manufactures would be still of more advantage to the farmer. Looking at the immense water powers of Canada, the waste labour in all our cities, towns and villages, the easy means of communication by our lakes, rivers and railroads, the facilities for attaining the raw material and the duty of twenty per cent. in favour of the Canadian manufacturer, all point to Canada as the future seat of extensive manufactures.

Among the branches of Canadian industry which might be extensively and profitably engaged in, is the manufacture of pot and pearl ashes. This is an article for which there is a steady demand at remunerative prices. It is largely manufactured in Lower Canada, some of the wealthiest "habitans" being largely engaged in it. It requires but a very small capital and the time occupied in the process is very short. There are millions of bushels of wood ashes wasted in Upper Canada which might and ought to be turned to good account. At present large quantities of ashes are collected in Canada by the Americans and carried to Oldenburgh and elsewhere, to be there manufactured into a valuable article of export; certainly our neighbours have no advantage over us in the manufacture of this article. The export of pot and pearl ashes is very considerable, and ought to be double what it is now. Many persons coming to this country with scarcely sufficient means to purchase an ordinary farm, might engage in the manufacture of ashes to great advantage. The ordinary risks of agriculture are avoided, the yield is certain while the price is steady and remunerative.

To show the importance of this branch of business we give below the exports for the last three years:—

EXPORTS OF POTAS.		EXPORTS OF PEARLS.	
Bbls.	Value.	Bbls.	Value.
1855—15,762.....	£130,560	6,666.....	£45,882
1856—17,113.....	168,911	7,359.....	60,384
1857—21,890.....	214,965	7,576.....	71,998

There is no doubt that the productiveness of the soil of Western Canada and the high price of wheat during the last few years has tended unduly to encourage the growth of this cereal to the neglect of other products of the soil, as well as the development of manufacturing industry. The time has however arrived when we must take the next step in the march of civilization. The immense surplus productions of the virgin prairies of the west, and the facilities now afforded them of reaching the eastern markets, cannot fail to produce a low range of prices for years to come. The interest of the agriculturist is not promoted by increasing producers, but by increasing consumers. It is not a full but a bare market that increases the demand for his labour.—It should therefore be the great object of our people to turn to good account all the advantages they enjoy. To develop the manufacturing as well as the agricultural resources of the country. Commencing with the manufacture of those articles requiring the smallest capital and the nearest allied to agricultural pursuits and advancing by degrees to those branches requiring a greater amount of capital and skill. In most northern countries where there is a long season in which out-door labour is suspended, the combination of agricultural and mechanical pursuits becomes a necessity. Articles, the manufacture of which can be carried on in the rural home and around the winter fire, are far more suited to the circumstances of a new country than such as can only be produced by large factories and expensive machinery. At present we are large importers of articles made in the quiet homes of the New England farmers, and so far as Upper Canada is concerned large importers from Lower Canada of articles produced in the French villages of that part of the Province. It is a pleasing feature to note the progress of domestic

manufactures in any part of the country, but it is not very creditable to the enterprise of the Western section that a large portion of the straw goods consumed here is made in Lower Canada, finished in New York, and imported from thence into Upper Canada.

Among the branches of home industry in which the agricultural population might be profitably engaged at certain seasons of the year, and in which they are largely engaged in some parts of the country are the following; the amount of goods of the classes mentioned still imported shows how much might be done towards rendering Canada a self-sustaining country.

IMPORTS IN 1857.

Straw goods.....	£47,642	14	9
Dried fruits (free).....	8,024	1	8
Clothes ready made.....	36,276	16	11
Hats and caps other than fur ..	57,253	5	3
Hosiery.....	39,299	4	7
Pickles and Sauces.....	12,431	11	9
Boots and Shoes.....	81,336	3	7
Earthen Ware.....	69,414	9	6

There are many other articles besides the above in which the female and junior members of the agricultural families of Canada might be profitably employed during the winter season. In the Eastern States and in Lower Canada they are so engaged to a large extent increasing the business of the cities and the wealth of the country. Advancing another step in the scale of manufacturing industry we come to those branches of trade requiring a large outlay in buildings, machinery and material, and concentrating population and production. Among these might be enumerated cotton, woollen and iron manufactures. Of these articles the imports in 1857 were as follows:—

Cottons.....	£1,199,011	9	2
Woolens.....	97,947	6	7
Iron and Hardware.....	489,942	5	2
	£2,666,901	0	11

It is not for us to say whether the manufacture of the above could be profitably engaged in, but we would call the attention of Canadian importers and foreign capitalists to the subject. Cotton can be laid down from the place of growth in ten days and much cheaper than it can be taken to Liverpool or Boston. Wool is now largely exported from the country, and is generally from twenty to thirty per cent. cheaper here than in the New England States. Iron is admitted free or at a low duty. There is a large amount of waste labour in the country which could be cheaply secured if constant employment was given.

In conclusion let us recapitulate the views we have advanced on the crisis of 1857. That it was one of those periodical revolutions consequent upon a withdrawal of confidence in a state of society in which unshaken confidence is the basis of all mercantile transactions and activity. That Canada lost little by the crisis being a *debiter* not a *creditor* abroad. That her difficulties arose from the loss of her banking facilities and a fall in the price of her exportable products. That a return of prosperity will be gradual and slow, and will greatly depend upon the enterprise of the people themselves. That the dependence of Western Canada upon a single product of the soil, uncertain alike in the yield and in the price places her in a false position. That permanent prosperity can only be attained by securing a greater diversity of employments and employing to advantage the waste labour now in the country. That in a northern country agriculture cannot be engaged in at all seasons of the year, and that such seasons should be spent by the younger members of the family in those indoor employments which contribute alike to the prosperity of the country and to the proper training to habits of thrift and industry of the rising generation. That manufacturing prudence in a new country must be developed first in those branches which are most closely allied with agricultural employments. Then in the manufacture of articles in which the home becomes the workshop and the family circle the miniature factory, and lastly in rearing those stately buildings in which inventive genius and mechanical skill multiply and cheapen the productions of labour, and bring within the reach of all, many articles which otherwise must have been confined to the few.

Looking at the immense resources of Canada and the enterprise of her people, we have no fear for the future. Economy in public and private expenditure, confidence in ourselves, and a better appreciation of the advantages we enjoy, will in due time raise our country to the position which she ought to occupy among the nations of the earth.

Address.—To the Honourable the Legislative Assembly of Canada, in Provincial Parliament assembled.
The Petition of ———

Humbly sheweth, That, &c.
Wherefore your Petitioners humbly pray, &c.
[Place and date.]

No Petition to the Legislative Assembly will be received unless there be three genuine signatures on the sheet
of paper or parchment on which the conclusion of the Petition is written or printed. The usage has been, in the
Legislative Assembly, to receive only written Petitions, but at a late session (1855), the Assembly adopted a resolution
to receive printed Petitions in that House. All Petitions must be dated.

AN INDEX TO THE STATUTES,

Passed in the First Session of the Sixth Parliament of the Province of Canada (22 Vic.), alphabetically arranged according to the initial letter of the word most distinctive of the subject-matter treated of in each, and otherwise further classified, so as to facilitate the acquisition of any particular Act required.

Imperial Act.

XCIX. BRITISH COLUMBIA.—To provide for the government of.

CANADIAN PATENTS,

Issued by the Bureau of Agriculture and Statistics, from 1st July, 1857, to 30th June, 1858.

- Henry Going—A Cradler or Self-raker. July 2, 1857.
 Thos. Hector—A self-regulating Candle Shade. July 2, 1857.
 E. M. Chaffee—A new and useful improvement in the preparing, colouring, and applying India Rubber and Gutta Percha to cloth of all kinds, leather, and other articles without the use of solvent, under the name of "Chaffee's Improvement in Rubber and Gutta Percha." July 13, 1857.
 Thomas Shuttleworth and Thomas Modeland—Certain improvements in the construction of mould boards for ploughs. July 23, 1857.
 Leonard Wray—A process for producing and manufacturing fine crytallized sugar, syrup, and molasses from the African, Chinese, and all other varieties of the "Hicoccus Saccharatus" of "Linnaeus." July 23, 1857.
 George Bolster—A match-canvas fire and water proof cement for roofing. July 23, 1857.
 Duncan D. Marr and Edward Chesley—An improvement in the construction of fire places. July 23, 1857.
 Wm. Spofford, Jr.—A new tanning process for hides, &c. July 23, 1857.
 Edward Chesley—An improvement in the construction of carriages. July 23, 1857.
 Henry A. Kirkland and Luke Millington—An accelerative and accommodating strap cutting machine. July 23, 1857.
 Wm. Craig—A spinner, doubler, and twister for the manufacture of twisted yarn. Aug. 7, 1857.
 M. Willoughby—A straw cutter. Aug. 7, 1857.
 Geo. W. Green—The double shuffle churn. Aug. 7, 1857.
 J. A. Wilkinson—An independent lever elongating carriage or buggy spring. Aug. 7, 1857.
 D'Arcy Porter and John W. H. Schneider—A new and useful straw cutter. Aug. 19, 1857.
 Geo. Campbell—The Hecla portable forge. Aug. 19, 1857.
 Gilbert H. Moore—A selfloading cart. Aug. 20, 1857.
 George Cummings—An improved steam engine slide valve. Aug. 20, 1857.
 Charles O'Hara—An oscillating paddle for propelling steam vessels. Aug. 20, 1857.
 J. P. Craig—Iron pianos cast in a single piece. Sep. 4, 1857.
 Martin Neyllon—A seeder to be attached to a gang plough. Aug. 19, 1857.
 Joseph Marks—Certain improvements in spark arresters, chimney and petticoat pipes for locomotives. Sep. 15, 1857.
 Isabelle Morley, administratrix of John Morley—An improved mould board for ploughs. Sep. 15, 1857.
 W. R. Bowen—Feed works to be used in saw mills, called "Bowen's Rotary Reaction Feed Works." Sep. 15, 1857.
 J. G. Munger and H. Harris—A new and improved method of constructing pumps. Sep. 15, 1857.
 C. Dean—A new mode of effecting more perfect combustion in the furnaces of steam boilers, and of saving fuel. Sep. 15, 1857.
 H. Hysert and C. Tanner—A saw machine. Sep. 15, 1857.
 C. M. Tate—An improvement in the construction of Knapp's Lamps for burning rosin oil. Sep. 16, 1857.
 H. De Witt—Barrow wheels to be attached to reaping and mowing machines, and for other purposes. Sep. 16, 1857.
 D. Bruce—A new and improved mode of, and apparatus for, making concentrated animal manure. Oct. 14, 1857.
 J. B. Leroy—A portable farm board fence. Sep. 28, 1857.
 J. Armstrong—A new and improved harrow. Sept. 30, 1857.
 H. Yates—An improvement in the fire box of the boilers of locomotives or other steam engines. Oct. 12, 1857.
 H. Yates—An improvement in perfecting the consumption of sparks and parts, and portions of unconsumed fuel in locomotives and other steam engines. Oct. 12, 1857.
 J. W. McLaren—An improved mould-board for ploughs. Oct. 12, 1857.
 J. McNab, Jr.—A horizontal car coupler. Oct. 12, 1857.
 D. M. Jenner—An improved horse rake. Oct. 13, 1857.
 H. E. Drayton—A new mode of manufacturing gunpowder. Nov. 7, 1857.
 H. Yates—An improved perforated fire grate, feed water heater and damper, combined for locomotives and other steam engines. Nov. 6, 1857.
 V. Parkes—A steam press for making bricks, tiles, &c., from dry clay. Nov. 6, 1857.
 C. R. Parkes—A brick drain pipe, and tile making machine. Nov. 6, 1857.
 W. H. Tuttle—A new and improved sugar handle. Nov. 6, 1857.
 W. Manning—A new and useful machine for cutting or turning out heads for barrels, kegs, casks, or any description of cooper's work. Nov. 6, 1857.
 David Cudney—A vegetable cutter. Nov. 6, 1857.
 Jas. Hale—A churn, to be called "Hale's Improved Churn." Nov. 6, 1857.
 Benj. Hill—A radial-winged propeller. Nov. 6, 1857.
 A. M. Tarbell—A new and useful improvement in the construction of gates. Nov. 7, 1857.
 J. Eaton—A new method of constructing lamps. Nov. 7, 1857.
 Henry Hysert—Certain improvements in stump machines. Nov. 7, 1857.
 W. C. Stiver—A hollow flanged lightning rod. Nov. 7, 1857.
 J. F. Taylor—A new and useful machine for coupling railway cars, termed a "Self-coupler and Coupling Pin Saver." Nov. 18, 1857.
 Robt. Emery—A press for the manufacture of saw-troughs of tin and galvanized iron. Nov. 28, 1857.
 Joseph Labelle—A thrashing and winnowing machine without linen apron. Mar. 3, 1857.
 Duncan Campbell—A revolving angle joint. Nov. 18, 1857.
 S. S. Crouter—A stump, stone, and ship puller. Dec. 16, 1857.
 Adam Caut—A new root cutting machine. Dec. 15, 1857.
 H. Fowler, Jr.—An improved apparatus for washing and wringing clothes. Jan. 12, 1858.
 G. R. Lettore—An improvement in sewing machines. Jan. 11, 1858.
 Calvin French and Luther French—A new and improved straw cutter. Jan. 11, 1858.
 J. P. Clarke—A mode of propelling steam boats, named "Clarke's Series of Paddles." Feb. 8, 1858.
 John Thomas—A new and improved paddle." Feb. 8, 1858.
 Jos. S. Godfrey—A new and improved washing machine. Feb. 12, 1858.
 I. W. Farewell—The Excelsior Straw Feeder. Feb. 13, 1858.
 Wm. G. Oliver—A new and useful method of applying and using electricity as an anesthetic agent in extracting teeth and in other surgical operations. Mar. 16, 1858.
 Job Morris—A new and improved room and house heater. Mar. 16, 1858.
 Dairymple Crawford—(1) An improvement in the manufacture of soap. Mar. 16, 1858.
 Dairymple Crawford—(2) An improvement in the manufacture of soap. Mar. 16, 1858.
 Dairymple Crawford—(3) An improvement in the manufacture of soap. Mar. 16, 1858.
 Jas. Thompson—A certain new and improved method of constructing mangles. Mar. 16, 1858.
 B. M. Hicks—A new method of slating. Mar. 16, 1858.
 W. J. F. Toulmin—A self-generating gas burner and lamp. Mar. 16, 1858.
 J. Soper—An improved clover separator. Mar. 16, 1858.
 A. Bigelow—An endless chain steam plough. Mar. 16, 1858.
 L. Webster—A new and improved bee hive. Mar. 20, 1858.
 Daniel Coombs—A combined churn and cream freezer. Mar. 31, 1858.
 T. M. Bryson—A new and improved method of protecting the toes of boots or shoes. Mar. 31, 1858.
 G. A. Hicks—An improved silvetic oil or self-generating non-explosive fluid gas burner. April 20, 1858.
 J. J. Jessup—A new and useful farm implement, called a "Soil Pulverizer." April 7, 1858.
 Franklin Clarke—An improved machine for cross-cutting logs, cutting fire-wood, &c. April 7, 1858.
 J. Mellig—A machine for pressing or compressing clay or composition by rotary and reciprocating motion into the form of bricks, tiles pipe, artificial stone, &c. Apr. 8, 1858.
 L. Lawrence—A washing & wringing machine. May 1, 1858.
 Almond Bennett—A new and improved bee house, called "Bennett's Platform Bee House." May 1, 1858.
 C. Green—A separating thrashing machine." April 7, 1858.
 C. Doner—Friction sash hangings and lock. May 14, 1858.
 J. W. Forbes—A combined rocking, stave, and heading machine. May 14, 1858.
 R. Davis—An improvement in direct contrail discharge water wheel, and anti-friction circular gates. June 6, 1858.
 Rev. J. Spencer—A malling press and paging machine. June 5, 1858.
 Henry Yates—Improvements in the wing rails of railway crossings. June 8, 1858.
 Alex. Miller—A safety steam alarm. June 8, 1858.
 F. Schofield—Certain improvements in the method of constructing thrashing machines & separators. June 8, 1858.
 R. Lounsbury—A new and useful horse rake. June 9, 1858.
 G. F. Barlow—A new & improved cheese press. June 18, 1858.
 C. W. Smith—A head protector against heat, coup de soleil, &c. June 18, 1858.

HURON AND BRUCE.

Division Courts.

I.—Comprising that part of the Township of Goderich to the north of the Cut Line and the Huron Road, until the same meets the road allowance between the 13th and 14th Concessions, then back along the Huron road to its junction with the Cut line; then west by the road allowance between Concessions 11 and 12 to the River Maitland; then along the River Maitland to Goderich, together with the Township of Colborne. Clerk, P. A. McDougall, Goderich.

II.—Comprising the Township of McKillop, all Tuckersmith south and east of the Mill road, and of the road between Lots 20 and 21 on the 1st and 2nd Concessions, which road runs from the Huron road to the Mill road. Clerk, Ludwig Meyer, Harpurhey.

III.—Comprising the Townships of Huron, Kincardine, and Bruce. Clerk, C. R. Parker, Penetangore.

IV.—Comprising the Townships of Biddulph and McGillivray. Clerk, Geo. Carter, McGillivray.

V.—Comprising the Townships of Stephen, Uxborne, and that portion of the Township of Hay to the east of the 6th and 7th Concessions of the said Township of Hay. Clerk, Thos. Trivitt, Devon, London road.

VI.—Comprising the Townships of Ashfield and Wawanosh. Clerk, John Cooke, Wawanosh.

VII.—Comprising the Township of Stanley, and that portion of the Township of Goderich to the south of the Cut Line and the Huron road, until the same joins the road between the 13th and 14th Concessions of the Township of Goderich; thence along the said Concession road until the same joins the River Bayfield; thence along the said River to Lake Huron, together with all that portion of the Township of Hay to the west of the 6th and 7th Concessions of the said Township of Hay. Clerk, David H. Ritchie, Bayfield.

VIII.—Comprising the Townships of Brant, Carleton Place, and that portion of the Township of Elderslie all south of the 8th Concession, including said 8th Con. Clerk, James Jameson, Walkerton.

IX.—Comprising the Townships of Saugeen, Arran, Amabel, and all of the Township of Elderslie to the north of the 8th Concession of the Township of the said Township of Elderslie. Clerk, John Eastwood, Southampton.

X.—Comprising the Township of Fullert, and that portion of the Maitland Concession of the Township of Goderich which is bounded on the west by a portion of the River Maitland and the road between the 11th and 12th Concessions, extending from the junction of the Cut Line to the said Maitland; the 14th, 15th, 16th, and 17th Concessions of the said Township of Goderich, and that part of the Township of Tuckersmith, bounded on the north west by the London road, on the east by the Huron road, on the south by the Side line between Lots 20 and 21, and on the south by the Mill road. Clerk, Samuel H. Rauce, Clinton.

XI.—Comprising the Townships of Howick, Thornbury, Morris, and Grey. Clerk, Benjamin Fralick, Almsleyville.

XII.—Comprising the Townships of Culross, Kintosa, and that portion of the Township of Greenock from its south boundary up north to the line of road between the 17th and 18th Concessions of the said Township of Greenock. Clerk, George Cromar, Riverside.

VIII.—Comprising the Village of Port Dover, and part of the Township of Woodhouse. Clerk, Saml. Gamble, Port Dover.

NORTHUMBERLAND AND DURHAM.

For Limits, see Almanac, 1858, page 65.

NOTE.—A change in the Limits will be made in November, 1858.

- I. William Cowie Bowmanville
II. Samuel S. Wilnot Newcastle
III. John T. Day Port Hope
IV. J. M. Brodie Millbrook
V. George A. Boswell Cobourg
VI. James G. Rogers Grafton
VII. G. S. Burroll, Colborne Bright'n
VIII. John Douglas Warkworth
IX. Edward H. Smith Smithfield

* Sub Office to VII. Division. Clerk, John Simpson, Brighton.

ONTARIO.

For Limits, see Almanac, 1858, page 66.

- I. L. Fairbanks Whitty
II. Joseph Wilson Pickering
III. Richard Lund Port Perry
IV. Joseph Dickey Uxbridge
V. John Metcalf Carrington
VI. C. Robinson Beaverton

OXFORD.

For Limits, see Almanac, 1858, page 66.

- I. Edwin F. Gahan Woodstock
II. Seth Cowan Dorham
III. D. Matheson Embro
IV. James Barr Norwichville
V. David Caulfield Ingersoll
VI. Charles Hawkins Tilsonburg

PERTH.

For Limits, see Almanac, 1858, page 66.

- I. Raby Williams Stratford
II. Thomas Matheson Mitchell
III. James Coleman, M.D. St. Mary's
IV. William Cossey Shakespeare
V. Samuel Whaley West's Corners

PETERBORO' AND VICTORIA.

Division Courts.

I.—Comprising the Townships of Monaghan, Smith, Ennismore, part of Detro, Dummer, and Otonabee. Clerk, John Joseph Hall, Peterboro'.

II.—Comprising the Townships of Dummer in part, and Asphodel. Clerk, James Foley, Norwood.

III.—Comprising part of the Township of Otonabee. Clerk, G. Read, Keena.

IV.—Comprising the Township of Emily. Clerk, T. Matchett, Onnesco.

V.—Comprising the Town of Lindsay and the Township of Ops. Clerk, J. W. Logie, Lindsay.

VI.—Comprising the Township of Mariposa. Clerk, J. R. Lytle, Oakwood.

VII.—Comprising the Township of Eldon. Clerk, I. Ferguson, Woodville.

VIII.—Comprising the Townships of Verulam, Fenelon, Somerville, Bexley, and Galway. Clerk, T. H. Robertson, Fenelon Falls.

PRESCOTT AND RUSSELL.

Division Courts.

I.—Comprising the Township of Longwell and front concession of the Township of Caledonia, and north-east part of the Township of Alfred. Clerk, S. M. Cushman, L'Orignal.

II.—Comprising the Township of West Hawkesbury, from front of third concession to rear of Township; also the west part of Township of East Hawkesbury, from front of 3rd concession, and bounded on the east by road allowance between Lots 30 and 31 to rear of Township. Clerk, C. Waters, Yankleek Hill.

III.—Comprising the Township of East Hawkesbury—that part extending from front of 3rd concess, and bounded on the west by road allowance between Lots 30 and 31 in each concession to rear of Township. Clerk, Wm. Jameson, Le Foulon P. O.

IV.—Comprising the Township of North Plantagenet and western part of South Plantagenet, and south and north-west parts of Alfred. Clerk, Albert Hagar, Plantagenet Mills.

V.—Comprising the Townships of Cumberland and Clarence. Clerk, J. S. Cameron, Cumberland.

VI.—Comprising the Townships of Russell and Cambridge. Clerk, James Keays, Russell.

VII.—Comprising the Townships of West Hawkesbury and East Hawkesbury—those parts comprising the two front concessions of each. Clerk, Thos. White, Hawkesbury.

VIII.—Comprising the Township of Caledonia (excepting first concession) and also that eastern part of South Plantagenet lying on the eastern side of the Nation River. Clerk, D. D. Barrett, Caledonia Flats.

PRINCE EDWARD.

For Limits, see Almanac, 1858, page 67.

MATHEMATICAL DEPARTMENT.

The two Prizes, of the value of £5 each, offered by the liberality of the Publishers for the best and second best solutions of the Problems in this Almanac for 1857 and 1858, are awarded as follows:—The first, with high commendation, to the Rev. E. J. Senkler, Brockville; the second to Mr. R. S. Finlay, Ridgetown. Those gentlemen will please communicate with the Publishers on the subject. We are happy to be able again to repeat the liberal offer of a Prize of books to the value of \$20 for the best solutions of those in the present issue; all communications (prepaid) must be in the hands of the Publishers on or before July 1st, 1859. Want of space has compelled us to omit several interesting communications, which we trust to be able to take up next year, and at the same time to give, in full, the solutions of some of the more difficult problems. Contributors are invited to forward original questions for insertion, but, bearing in mind how limited our space is, they must not take it in judgement if we do not publish all of them. To one of our contributors, who appears in '57 and '58, under the anonymous title of "A Correspondent," we owe our apologies; his address was, unfortunately lost before his papers came into our hands.

Mathematical Solutions Received from Correspondents.

JOHN CASEY, Plympton.—(1857). Probs. 42, 44, 47, (1858). Prob. 2, 1.
 R. S. FINLAY, Ridgetown.—(1857). Probs. 1, 2, 3, 4, 5, 6, 8, 9, 10, 11, 12, 13, 15, 18, 20, 33, 36, 42, 43, 44, 45, 46, 47, 48, 49, 50. (1858). Probs. 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 14.
 EDGAR FRISBY, Wainfleet.—(1857). Prob. 1. (1858). Probs. 1, 2, 3, 8, 15.
 JOEL E. HENDRICHS, Newville de Kalb Co., Indiana.—(1857). Prob. 41, and a discussion of Prob. 53, 1856, which we will give next ye.
 P. HODGKINSON, Aylmer.—(58). Probs. 2, 3, 4, 8, 10, 15, 17.
 MATTHEW LONG, Vaughan.—(1858). Probs. 1, 2, 3, 4, 6, 7, 8, 9, 10, 14, 15, 17, 18, 19, 20, 23.
 DAVID RAMSDEN, Sr., Kettleby.—(1857). Prob. 45. (1858). Probs. 2, 6, 7.
 REV. E. J. SENKLER, Brockville.—(1857). Probs. all but 30, 38, 39, 40. (1858). Prob. 1, 2, 3, 4, 6, 7, 8, 10, 11, 15, 10, 17, 18, 19, 20, 22, 23, 26, 27, 28, 29, 30, 31, 32, 34, 35.
 THOS. THORPE, Ottawa.—(1857). Probs. 1, 3, 5, 6, 18, 21, 28, 41, 46, 49. (1858). Probs. 1, 2, 3, 7, 8, 10, 17.

Solutions to Mathematical Problems, 1857 and 1858.

1857. PROB. 0. $\frac{1}{2} \left\{ (n-p)(n-p-1)(n-p-2)(n-p-3) - p(p-1)(p-2)(p-3) \right\}$. PROB. 8. Common ratio is 1, -1, or $\sqrt{\frac{1 \pm \sqrt{x}}{2}}$. PROB. 9. The only series is one which has 1 for a common ratio. PROB. 11. The last approximation should have been $\frac{1}{2} (3 + x - 3x^2 + x^3)$. PROB. 12. £106666 $\frac{2}{3}$. PROB. 13. (1) $x=1$, $-\frac{2}{3}$, $\pm \frac{1}{2} \sqrt{x}$; (2) $x=3$, -4. PROB. 14. $x = \frac{n^2-2}{2p} ab \pm \frac{n}{2p} (a^2-b^2) \sqrt{4-n^2}$. PROB. 33. No. Greatest pressure possible is 180 lbs. PROB. 34. 18.5 ft. PROB. 41. \$182.21. PROB. 42. John and Sarah; Hannah and Peter; Elizabeth and William. PROB. 43. 63. PROB. 44. Nearly 12-4548 miles apart. PROB. 45. 1958 and 2479 sq. ft. PROB. 46. 15, 25, 4, 100 £. In this question, C's and D's shares should be multiplied and divided by the abstract number 5, and not by £5. PROB. 47. A's offer is worth £31258, B's 30252, C's 30804. PROB. 48. 419.4 ft. nearly. PROB. 49. 262, 402.057, 279.674 ft. PROB. 50. 2.3262 inches.
 SOLUTIONS FOR YEAR 1358. PROB. 2. Area, 480 sq. chains; sides, 27 and 36 ch. PROB. 3. Distances between trees, 178, 1428, 79.2 yards nearly. PROB. 4. Never; 400 miles is the limit of his journey, which would be eternal. PROB. 5. Reckoning from top to bottom, the ranges for the respective holes are 6, 8, 9.18, 9.8, 10 ft., and the quantity spouted is 506 gallons nearly. PROB. 7. 100. PROB. 8. a sec. 15°, a being side of square. PROB. 11. r being radius of enclosure, the grazing space is $\frac{1}{2} \pi r^2$, or about 8.225 times the enclosure. PROB. 13. For a metal pipe, 2.19 and .23 ft.; for a wooden, .242 and .26 ft. PROB. 14. Generally the deviation in minutes is 16 $\sin \theta$, θ being the time of flight in minutes and θ the latitude. For Toronto in the question, this is about 10' 21". PROB. 15. As the numbers 1, 6, 8, 12. PROB. 16 (1) is spoiled by a misprint, $\sqrt{a^2+x^2}$ should have been $\sqrt{a^2+ax}$. (2) $x=5$, 4, or $\frac{5}{3} \left\{ -3 \pm \sqrt{-55} \right\}$. (3). The pairs for x and y are 0, ± 1 ; -2, 1 or 3; $\pm \sqrt{-1}$, $\pm 1 \pm \sqrt{-1}$; besides other roots answering to $\pm \frac{1}{2} (1 + \sqrt{5})$. PROB. 17. Distance required is one-fourth the product of the measured distances divided by the area of the contained triangle.

PROB. 20. A being the annuity, R the amt of $\$1$ in a year, the sum required is $\frac{A}{(R-1)^2} R^{n-1} \left\{ (n-p) R^{n-p} + 1 \right.$
 $\left. - (n-p+1) R^{n-p} + 1 \right\}$ Prob. 22. $\$924$. Prob. 29. The distance at starting being a , and n the ratio of the velocities,
 the distance sailed is $\frac{a}{1-n^2}$. Prob. 30. $2a$ being the length of the luminous line, A the distance of the point from

its centre, the ratio is $\sqrt{1 + \frac{A^2}{a^2}} : 1 - \frac{A^2}{a^2}$ Prob. 31. About 1.21 times the given distance. Prob. 34. (1). A right cone
 on the axis of the cylinder. (2). The cylinder itself. Prob. 35. It will leave the wall or not, on the instant, according
 as its inclination to the horizon then is greater or less than the complement of half the angle whose cosine is $\frac{1}{2}$, that
 is 56° nearly. No solution in whole numbers has been received, from any correspondent, to Prob. 9 (1858). Proposed
 by Mr. Dunne, nor any to Prob. 12, by P. B.; we therefore re-publish these problems. Will the authors forward their
 own solutions?

Problems contributed by Correspondents.

Prob. 1. By A. McLellan, Jr. The diameter of a solid glass
 ball is 15 inches, what is the greatest cube which can be cut
 out of it; and if the cube be blown into a globe of uniform
 thickness capable of holding 6 gallons of water, what is its
 thickness?
 Prob. 2. By R. S. Finlay. Find an equation which has
 for one of its roots the number 3 together with the continued
 fraction having for denominators 2, 1, 4, 2, 3, 4, 2, 3, &c.
 Prob. 3. "Twelve trees of different kinds of fruit,
 1 in six rows would plant;
 In each row, four—but how to do't,
 I your assistance want."

LADY'S DIARY, 1754. A.D.

By how many different arrangements could this be effected?
 Prob. 4. By Joseph Morrison. Four inaccessible objects
 A, B, C, D, are situated in the same straight line and visible
 at the same time from only one point, E. The distance be-
 tween A and B is 20 chains, and between C and D 12 chains;
 the angle AEB is 20° ; AEC, 38° ; AED, 60° . Required,
 the distance between B and C.

Prob. 5. By H. T. B. Dhe. Scudamore. If the ridge and
 eaves of a house are 40 and 32 ft. high, and the width of
 the house 30 ft., where would a ball, rolling from the ridge
 to the eaves and then falling freely, strike the ground?

Prob. 6. By A. McLellan, Jr. The train A leaves Toronto
 at the same time that the train B leaves Windsor (the rail-
 road being supposed to have double track), and B arrives at
 Toronto 5 hours. A at Windsor 9 hours, after they meet.
 How long was each on the road? Also, if the train A of 50
 tons move at 30 miles per hour on the level rail, the resistance
 of friction on the rail being 8 lbs. per ton, and of the
 atmosphere 33 lbs. on the whole train when it moves at 10
 miles per hour; diameter of driving wheel, 6 feet; area of
 piston, 100 inches; length of stroke, 1.5 feet; resistance due
 to blast-pipe, 1.75 lbs. per inch of the piston (the speed of
 the train being 10 miles per hour), it is required to determine
 the pressure of the steam, the evaporation of the boiler, and
 the number of bushels of coal necessary for a journey of 120
 miles, supposing that one bushel will evaporate 11.5 cubic
 feet of water. Also, if train B of 100 tons, descend an incline
 of 600 feet, the height of the plane being 9 feet, what velocity
 per second will the train acquire, if the friction be
 8 lbs. per ton?

Problems from the University of Toronto Papers.

Prob. 14. Find an arithmetic series every term of which
 can be expressed by 73 & by 98 in suitable scales of notation.
 Prob. 15. A, B, C, start from the same point together to
 travel at uniform rates round a circle which is 14 miles in
 circumference; A going in one direction, B and C in the
 other. A meets C for the first time just opposite to the
 starting point a quarter of an hour after he had met B for
 the first time. A's rate is an integral number of miles per
 hour. How long before all three come together again?
 Prob. 16. A mortgage of $\$500$ is to be repaid by 5 equal
 annual instalments with interest at 6 per cent, yearly on
 the amount remaining unpaid. What should be given for
 the mortgage by a person who wishes to make 10 per cent.
 per annum on his money?
 Prob. 17. If in a given regular hexagon a circle be in-
 scribed, and the points of contact joined, and within the
 new figure another circle be inscribed and its points of
 contact joined, and so on *ad infinitum*. Find the sum of
 the areas of all the hexagons thus formed.
 Prob. 18. In a conic whose centre is O, if GP, OD, and
 OQ, CH be two pairs of conjugate semi-diameters, PE will
 be parallel to OD.
 Prob. 19. Circles are described, taking for diameters the
 radius-vectors of a cardioid drawn from the cusp. Find

Prob. 7. By J. E. York. Find the greatest triangle which
 can be formed in a given ellipse by joining the ends of two
 focal radius-vectors which contain a given angle.

Prob. 8. By R. S. Finlay. A fleet consists of 5 vessels,
 A, B, C, D, and E. A is stationed at Caps Ann, on the N.E.
 of Massachusetts; B is stationed on the East side of Cape
 Cod at a distance of 45 miles, and an angle of $28^\circ 23'$ East of
 South from A; C is stationed 60 miles from A at an angle
 6° North of East; E is to be stationed somewhere yet to be
 determined, and D is to cruise upon the wide, wide sea.
 Whenever D comes in from her cruising excursion, she is
 always to sail in a straight line in the direction of E (passing
 her, if necessary) until she meets all the other vessels of the
 fleet, each of which is to meet her (D) by taking the shortest
 course possible. Now Cengage to sail as much as A and B
 together in meeting D under all circumstances, provided D
 does not cross the line between A and B. Determine where
 the Commodore must station E in order to fulfil these condi-
 tions; and, supposing P to come in 3 times from a point
 $3^\circ W$. of S., 4 times from the S.E., and 5 times from N. by W.
 Required the number of miles sailed by A, B, C, to meet her,
 and the number sailed by D from where she meets the first
 unto where she meets the last vessel. The problem to be
 solved on the supposition that the surface of the sea is plane.

Prob. 9. By H. T. B. Dhe. Scudamore (Newbury). If a
 segment of a sphere and a frustum of a right cone have
 the same altitude and base, and the surface of the frustum
 be osculatory to that of the segment along the boundary
 of their common base, then shall the same frustum be
 equal to the said segment, together with a right cone whose
 altitude is equal to that of the segment and whose base is
 equal to that base of the frustum which is opposite to the
 base of the segment.

Prob. 10. By Joseph Morrison. Find the Moon's Parallax
 in AR for Toronto, when the equatorial horizontal parallax
 is $60' 04''$; the Moon's N. Dec. $2^\circ 46' 10''$; and the ap-
 parent hour-angle 60° ; the radius of the Earth at Toronto
 being 0.998414, equatorial radius being unity.

Prob. 11. By Gunner. In what latitude may a gun be
 fired at noon on the 21st of June so that its sound may be
 heard at noon at every station due west of the former?

Prob. 12. By Wm. Dunne. (See Prob. 9, Alm. 1858, p. 31.)
 Prob. 13. By E. S. (See Prob. 12, Almanac, 1858, p. 31.)

the curve which touches them all, and compare the area
 swept out in its semisphire from the axis with the corre-
 sponding area of the cardioid.

Prob. 20. A solid right cylinder is joined on to a solid
 hemisphere of the same uniform substance, their bases
 being coincident. Find the height of the cylinder, com-
 pared with the radius of the hemisphere, in order that the
 construction may rest when placed with any point of the
 spherical surface in contact with a horizontal plane.

Prob. 21. A circular right cylinder is cut by a plane in-
 clined at 45° to its axis; it is then scooped out into a hollow
 vessel and a lid (supposed to be without weight) is closely
 fitted to the elliptical section by a hinge at the lowest point,
 the cylinder standing with base horizontal and axis vertical.
 What is the density of the heaviest fluid with which the ves-
 sel can be quite full without causing the lid to be lifted—the
 pressure of the atmosphere being 15 lbs. to the square inch?

Prob. 22. A smooth, straight, thin tube is balancing
 horizontally about its middle point, and a particle whose
 weight is $\frac{1}{2}$ that of the tube is shot into it horizontally
 with such a given velocity that it just arrives at the middle
 point of the tube. Find the angular velocity communi-
 cated to the tube.

$$\frac{1}{1} \sin \theta \cos \theta + \frac{1}{2} \sin^2 \theta \cos 2\theta + \frac{1}{3} \frac{(n-1)(n-2)}{3} \sin^3 \theta \cos 3\theta + \dots$$

MUNICIPALITIES, CANADA WEST.

In the following tables relating to the Municipalities of Canada West, the Editor has been obliged to omit the Assessed Value, and Amounts to be realized by Assessment Rate, they having been returned so imperfectly as to render the insertion valueless except as regards particular Municipalities. This omission arises from no unwillingness on the part of the proper authorities to afford the information required, but from the fact that the Assessment Rates are not returnable at a sufficiently early period to enable us to make use of them.

During the last Session of the Canadian Parliament, all previous Municipal laws were repealed and consolidated in one Act (22 Vic, cap. xcix.), which now forms the basis of government of all Municipal Corporations. This Act, as also several other Acts relating to Municipalities generally, our publishers, Messrs. MACLEAR & Co. will reproduce as a MUNICIPAL MANUAL, under the editorship of ROBT. A. HARRISON, Esq., B.C.L., with notes of all decided cases, and a comprehensive index, about the first of December, 1858. The work will be invaluable as a guide or hand-book to all interested in the management of Municipal affairs.

Hospital, Toronto. President, E. M. Hodder, M.D., F.R.C.S., Eng.; Secretary, Charles Gardiner, Medical Supt T. G. H. Members: Drs Wm. C. Gwynne, W. Durie, W. Beaumont, G. Herrick, W. B. Nichol, John Rolph, James Bovell, Joseph Workman, Toronto; James Sampson, Kingston; H. Smith,

Ancaster; James Wilson, Perth; Wm. H. Brown, Prescott; R. Edmondson, Brockville; W. H. Howard, Farmersville; Henry H. Wright, Toronto; Wm. Allison, Markham; Rodk. McDonald, Cornwall; Geo. H. Park, Hamilton; J. Frazer, Pelham; T. C. Macklem, Chippewa; Ephm. Cook, Norwich; G. Southwick, St. Thomas; Wm. T. Atkins, Toronto; W. H. Dalton, Dundas; John Scott, Jas. Richardson, John Small, N. Bethune, and Fran. Badgley, Toronto; and T. Reynolds.

General Hospital, Toronto.—Incorporated 1847—Trustees; Appointed by Government—Jas. Beaty, Geo. Herrick, M.D.; John Scott, M.D.; by Corporation, W. H. Boulton, Mayor; by Board of Trade, Wm. Henderson. Consulting Phys. and Surg's, W. R. Beaumont, F.R.C.S., Eng.; Geo. Herrick, M.D. Attending Phys. & Surg's, W. R. Beaumont, F.R.C.S., Eng.; E. M. Hodder, M.C., F.R.C.S., Eng.; J. Scott, M.D., M.R.C.S., Eng.; J. H. Richardson, M.D., M.R.C.S., Eng.; John Rolph, M.D., M.R.C.S., Eng.; W. T. Atkins, M.D.; N. Bethune, M.D. Resident Medical Officer, Charles Gardner; Sec. and Treas., Jas. W. Brent, Esq. Hours of attendance, 12 o'clock, noon, daily. Visitors are permitted to see their friends every day from 3 to 5 o'clock, p.m., except Saturdays and Sundays.

Provincial Lunatic Asylum, Toronto.— $\frac{2}{3}$ miles west from

the City Hall, on Queen St. Property vested in the Crown. Government appoint Medical Superintendent, and Bursar, and Inspectors who frame by-laws for its government, thoroughly examine the Asylum, and report to the Governor General. The present building was designed to accommodate 264 patients; there are at present 400 in it. The Institution is open to the public between the hours of 11 a.m. and 3 p.m. every day. Saturdays and Sundays excepted, by application to the Medical Superintendent at the Asylum. The admission of patients is regulated by the Act 16 Vic., chap. 188, which requires that the patient be examined by three licensed medical practitioners, verified by Reeve or Mayor collectively, who certify to the insanity. From the over-crowded state of the house, admissions are at present made as vacancies occur, according to priority of applicants, or urgency of cases. Idiots, and persons afflicted with paralysis are inadmissible. Officers of the Institution: Medical Superintendent, Joseph Workman, M.D.; Asst. Physician, B. Workman, M.D.; Bursar, J. McKirdy; Steward, Conlin S. Eastwood; Matron, Marn Ann Parkes.

Note.—A Branch of this Asylum has been established in the University Buildings under the same management.

Henry Scadding, D.D., First Classical Master; James Brown, M.A., Mathematical Master; William Wedd, M.A., Second Classical Master; Geo. M. Evans, M.A., Third Classical Master; C. W. Connon, LL.D., English Classical Master; Michael Barrett, M.A., M.D., First English Master, and Superintendent of College Boarding House; E. J. L. de St. Remy, LL.B., French Master; C. Thompson,

Second English Master; J. Dodd, Commercial Master; Rev. A. Schluter, M.A., German Master; E. Bull, Drawing Master; J. Maui, Instrumental Music Master; — Gymnastics, Fencing, &c. In the eight Forms into which the College is divided, the pupils, besides being thoroughly grounded in Classics and Mathematics, receive progressive instruction in French, Natural Philosophy, Physical Geography, English Literature, English Composition, Elocution and Reading, Arithmetic, Geography, Book-keeping, Writing, &c. The lowest of these eight Forms is the *Preparatory*, into which boys generally enter at the age of eight or nine years. The instruction in this Form is only so far classical as the rudiments of Latin are concerned. More than two-thirds of the time being devoted to the elements of an English education. In the *First*, or next higher Form, a little more time is given to Latin; and in the *Second* the elements of Greek and of Algebra are commenced.

In the *Third*, and the Forms above it, Classics and Mathematics are gradually brought into more and more prominence, while the branches constituting an English education are advanced with equally careful precision. In the *Fifth*, *Sixth*, and *Seventh* Forms German forms a part of the regular course. Although provision is made for the attainment of a sound English education in what are called the *Classical* Forms, there is in addition an English Department, from which Classics only are excluded, the whole time being bestowed on the other subjects taught in the College, German forming also a part of the regular course of the higher Divisions. For the better cultivation of English Literature, Composition, and Elocution in this Department and in the College Forms, a *new mastership* (the English Classical) has been created and recently filled up by the appointment of a gentleman whose reputation as an able master has been well established in public schools in England. Upper Canada College combines, therefore, all the advantages of a Commercial School, with facilities for obtaining a sound Classical training possessed by no other institution in the country. The College year commences with the Autumn Term. The Autumn Term begins Sept. 6; Winter do, Nov. 20; Spring do, Feb. 15; Summer do, May 1. Reports of the progress and conduct of the pupils are sent to parents at the end of each Term. Deducing the Vacations, the Terms are ten weeks each. The Tuition Fee is \$5, and the Boarding House Fee, \$40 per Term. The many improvements made in the arrangement of the College Boarding House have been found to add very materially to the comfort of the boarders. A large paved Ball Court Gymnasium, fitted up with the most approved modern appliances, and a spacious play-ground and cricket ground afford ample facilities for out-door exercise and amusement within the College bounds. The Boarding House is conducted strictly as an integral part of the Institution, its disbursements paid out of, and its returns paid into, the general funds. Prizes of books and certificates of honor are given every year to those who distinguish themselves in any of the subjects taught in the College. His Excellency the Governor General offers annually a valuable Prize of Books for the best examination in the higher departments of Classics and Mathematics. At the Annual Public Examination in July Exhibitions are competed for, varying in value from \$100 to \$20 per annum.

Competition for them all is open to the Grammar Schools of the whole Province. More than two thousand of the youth of the Province have received their education, in whole or in part, in Upper Canada College. It numbers now about 300 pupils. The Principal, the First, Second, and Third Classical Masters, and the Mathematical Master, were all of them pupils of the Institution; as were likewise the greater portion of the Medal-men, Scholars, and Honor men of our Universities.

Bursar's Department of the University and Colleges at Toronto.—Bursar, David Buchan; Cashier or Chief Clerk, Alon Cameron; Book-keeper, M. Drummond; Assistant Clerk, James Nutton; Messenger, Wm. Morrow. Office on U. C. College grounds, corner of Simcoe and Adelaide St's.

University of Queen's College, Kingston.—Opens on the first Wednesday in October, and closes on the first of May. Professors: Rev. Dr. Cook, Principal and Primarius Professor of Divinity; Rev. John B. Mowat, M.A., Hebrew, Biblical Criticism, and Church History; Rev. James Williamson, LL.D., Mathematics and Nat. Philosophy; Rev. Jas. George, D.D., Logic and Mental and Moral Philosophy; Rev. Clinical Medicine and Surgery at the College and Hospital. The lectures in this Faculty are delivered in Toronto.

University of McGill College.—Governing Body: Visitor, His Excellency the Governor General. Governors: The Hon. O. Dewey Day, LL.D., President, Hon. Jas. Ferrier, M.L.C., Hon. Peter McGill, M.L.C., T. B. Anderson, David Davidson, Benjamin Holmes, Andrew Robertson, M.A., Christopher Dunkin, M.A., Wm. Molson, Alex. Morris, M.A. Principal: J. William Dawson, LL.D., F.G.S. Fellows: The Deans of the Faculties of Law, Medicine and Arts, the Rector of the High School, Brown Chamberlin, M.A., B.C.L., W. Jones, M.D., W. B. Lamb, B.C.L. The Governors of the College are the Members of the "Royal Institution for the advancement of Learning," and are nominated by His Excellency the Governor General, under the Act 4, Geo. III. cap. 17. The Governors, Principal and Fellows, constitute the corporation of the University.—Secretary, Registrar: Bursar: William Craig Baynes, B.A. Office, Burnside Hall, 1000 Hours, 10 to 2 every lawful day.—Officers of Instruction, arranged in the order of statutory precedence: John W. Dawson, LL.D., F.G.S., Principal and Professor of Natural History and Agriculture; Rev. Canon Leach, B.C.L., Vice-Principal, Dean of the Faculty of Arts, and Professor of Logic and Moral Philosophy; And. E. H. Hall, M.B., Dean of the Faculty of Medicine, and Professor of the Theory and Practice of Medicine; J. J. C. Abbott, B.C.L., Dean of the Faculty of Law, and Professor of Commercial Law; Henry A. Howe, M.A., Rector of the High School, and Emeritus Professor of Mathematics and Natural Philosophy; Geo. W. Campbell, M.A., M.D., Prof. of Surgery, Archibald Hall, M.D., Professor of Midwifery and Diseases of Women and Children; Wm. Fraser, M.D., Professor of the Institutes of Medicine; Wm. Sutherland, M.D., Professor of Chemistry; Wm. E. Scott, M.D., Professor of Anatomy; Wm. Wright, M.D., Professor of Materia Medica and Pharmacy; Robert P. Howard, M.D., Prof. of Clinical Medicine and Medical Jurisprudence; Rev. A. De Solà, Professor of Hebrew and Oriental Literature; Hon. T. C. Aylwin, D.C.L., Professor of Public and Criminal Law; Frederick W. Torrance, M.A., B.C.L., Professor of Civil Law; R. Lafrenaye, B.C.L., Prof. of Jurisprudence and Legal Bibliography; R. G. Laflamme, B.C.L., Prof. of Customary Law and Law of Real Estate; Charles Smallwood, M.D., LL.D., Professor of Meteorology; Charles F. A. Markgraf, Professor of German Language and Literature; Leon G. Fronteau, B.A., Professor of French Language and Literature; D. C. McCallum, M.D., Professor of Clinical Surgery; Mark J. Hamilton C.E., Professor of Road and Railway Engineering; Alexander Johnson, M.A., Professor of Mathematics and Nat. Philosophy; Rev. G. Cornish, B.A., Prof. of Classical Literature, T. A. Gibson, M.A., First Assistant Master of High School; David Rogor, M.A., Second Assistant do.; W. Bowman, Third Ass't do.; John Follenus, Music Master do.; G. D. Borthwick, Fourth Ass't Master do.; James Duncan, Drawing Master do., Edwin Gould, B.A., College Tutor in History and English Literature; Jas. Kemp, Fifth Ass't Master of High School; Robert Craik, M.D., Demonstrator of Anatomy and Curator of Medical Museum.

University of Bishop's College, Lennoxville.—Incorporated by Royal Charter, 1853.—President of the Corporation and Visitor, Rt. Rev. the Lord Bishop of Quebec. Vice-President of the Corporation and Visitor, Rt. Rev. the Lord Bishop of Montreal. Chancellor, Hon. Edward Bowen, D.C.L. Vice-Chancellor, Hon. Chas. J. S. McCord, D.C.L. Trustees, Hon. E. Hale, M.A., Chairman; Hon. J. S. McCord, D.C.L.; Hon. G. Moffatt, Hon. H. Smith, Hon. W. Sheppard, G. F. Bowen, M.A., W. Baker, M.A., B. T. Morris, M.A., Rev. C. P. Reid, M.A., Rev. L. Doollittle, M.A., Rev. R. Lindsay, M.A., Rev. W. Bond, M.A. College Council: Rev. J. H. Nicolls, D.D., H. Miles, M.A., E. Chapman, M.A., Rev. J. H. Thompson, M.A. Officers of the Corporation: E. Chapman, M.A., Secretary; E. L. Montzambert, M.A., Honorary Counsel; Rev. L. Doollittle, M.A., and B. T. Morris, M.A., Attorneys. Officers of the College: Rev. J. B. Nicolls, D.D., Principal, and

Professor of Classics; H. Miles, M.A., Vice-Principal, and Professor of Mathematics and Natural Philosophy. Rev. J. Henry Thompson, M.A., Professor of Divinity; E. Chapman, M.A., Registrar and Registrar; Rev. J. H. Thompson, M.A., Librarian, Junior Department and Grammar School; Rector, Rev. James W. Williams, M.A.

Knox's College.—Principal and Professor of Systematic Divinity, Rev. M. Willis, D.D.; Professor of Exegetical Divinity, and Philosophy, Rev. G. P. Young, M.A.; Professor of Church History and Evidences of Christianity, Rev. R. Burns, D.D.; Chairman of College Committee (of Synod), Rev. W. Gregg; Secretary, Rev. W. Reid. Session opens on first Wednesday of Oct. and closes in the beginning of April.

The Toronto School of Medicine, in affiliation with the University of Toronto.—Incorporated by Act of Parliament, 1851. Professors: E. M. Hodder, M.D., Obstetrics and Diseases of Women and Children; W. T. Atkins, M.D., Principles and Practice of Surgery; H. I. Wright, M.D., Principles and Practice of Medicine; J. H. Richardson, M.D., Surgical Anatomy; N. Bethune, M.D., Descriptive Anatomy; M. Barrett, M.D., Institutes of Medicine; J. Thorburn, M.D., Medical Jurisprudence; U. Ouden, M.D., Materia Medica and Therapeutics; J. Workman, M.D., Psychological Medicine; J. Rowell, M.D., Demonstrator of Anatomy. Professor Croft, D.C.L., Chemistry and Experimental Philosophy at University College; Professor Wm. Hincks, F.L.S., Botany, &c., at University College.

The Belleville Seminary.—This Institution is the property of the Methodist Episcopal Church, but free to all denominations, no religious creed being taught, and students being required to attend such places of worship as their parents or guardians may direct. The institution is located in Belleville, Co. of Hastings, C. W. Ample accommodation is afforded for the instruction of four hundred students; both sexes are included in the provision, ladies being instructed in the ornamental as well as solid branches, and gentlemen being afforded a commercial, mathematical, and classical education. The Institution was incorporated in 1857.—The following compose the Faculty: Rev. J. H. Johnson, M.A., Principal, and Prof. of Ethics, Belles Lettres, and Mental Philosophy; Rev. A. Carman, B.A., Prof. of Mathematics; _____, Professor of the Latin and Greek Languages and the Natural Sciences; Gilbert E. Goldsmith, English Teacher and Assistant in the Department of Nat. Science. Miss Eliza E. Deaver, Preceptress, and Teacher of Drawing, Embroidery, and the French, German, Italian, and Spanish Languages; Mrs. Frances M. Crowell, Teacher of Music, both Melodeon and Piano Forte. Besides the above, several others, not of the Faculty, are employed to teach in the Institution. The academic year is divided into two sessions; the first session, which consists of thirty weeks, or two terms, commences on the second Thursday in September, and ends about the middle of April following; the second session commences on the first Thursday in May, and continues fourteen weeks. There will be a vacation of a fortnight at the Christmas holidays, between the first and second terms of the first or winter session. This Institution has been for upwards of a year in successful operation, enjoying a liberal patronage.

Canadian Congregational Theological Institute, corner of Adelaide and Francis Streets, Toronto.—Treasurer, Patrick Freeeland, Esq. Secretaries, Rev. T. S. Ellerby; Rev. F. H. Marling, Toronto. Committee: Rev. T. S. Ellerby; Rev. A. Lillie, D.D.; Rev. A. Wickson, A.M.; Rev. T. M. Reikle; Rev. J. T. Byrne; Rev. J. Wood; Rev. J. Porter; A. Christie, Professor of Theology, &c., Rev. A. Lillie, D.D. Classical and Hebrew Tutor, Rev. A. Wickson, A.M. Course: Four Sessions of eight months each, from middle of Oct. to middle of June.

Divinity Hall of the United Presbyterian Synod.—The Divinity Hall meets in Toronto on the third Tuesday in October, and continues in session till the second Thursday in April. Professor, Rev. John Taylor, D.D.

Seminary of Quebec and University Laval.—Very Rev. L. J. Casault, Rev. Louis Gingras, Rev. Leon Gingras, Rev. M. Fougues, Rev. E. A. Taschereau, Rev. Felix Buteau, Rev. E. Methot, Rev. J. F. Baillarge, Rev. C. Lavenderie, Rev. O. Audez, Rev. T. Hamel, Rev. A. Legare, Rev. F. Laliberte, Rev. D. Gauthier, Rev. M. Rioux, Rev. P. Rousset.

St. Anne's College, Quebec.—Very Rev. C. Gouveau, V.G.; Rev. F. Pilote, Rev. A. Blanchette, Rev. A. Pelletier, Rev. P. Lagace, Rev. Mr. Kerrigan, Rev. I. Gasgrain. *Seminaire de St. Hyacinthe.*—S.M. I. S. Desaulniers, I. S. Raymond, Prefet des Etudes; P. Dufresne, P. Leveau, Directeur, F. Tetreau, Procureur; P. O. Allain, J. J. Prince, M. Godard, P. S. Gendron, R. Larue, J. B. Chartier, G. Lamarche.

Seminaire de Montreal.—See Clergy List, page 51, col. 2. *College of L'Assomption, Sandwich, C.W.*—Rev. J. Malbos, Superior; J. Shea, Treasurer; P. Fauteaux, J. Girard, F. Leclerc, W. Oran, Th. Wagner, Professors.

College of Hopedale.—Very Rev. Angus McDonnell, V.G.; resident; Rev. John O'Brien, Michael Stafford, and Isaac McCarthy, Professors.

St. Michael's College, Clover Hill, Toronto.—Rev. J. M. Soulerin, Superior; Rev. G. Vincent, Treasurer; Rev. Messrs. Flannery; Rooney, Northgraves, Gibrat, Professors. Messrs. O'Connor, Murray, Connins, Kennedy, Hegents; S. Klinger, Teacher of Music.

Council of Public Instruction in Upper Canada.—Hon. S. B. Harrison, Q.C., Chairman; Rev. Egerton Hyerson, D.D., Chief Superintendent of Education; Light Rev. A. F. M. de Charbonnel, D.D., R. C. Bishop of Toronto; Rev. H. J. Grasset, B.D.; Hon. J. C. Morrison, Q.C.; Jas. R. Howard; Rev. J. Jennings, D.D.; Rev. Adam Lillie, D.D.; and Rev. J. Barclay, D.D. Members for the purposes of the Grammar School Act: Rev. J. McCaul, LL.D., President of University College, and the Presidents of the Colleges affiliated with the Univ. of Toronto. J. G. Hodgins, M.A., Recording Clk.

Provincial Normal and Model Schools, for the Instruction and Training of Teachers.—Normal School: T. J. Robertson, M.A., Head Master; _____, Second Master; Alex. R. Strachan, Teacher of Book-keeping and Writing; H. F. Sefton, Teacher of Music; J. Bentley, Drawing Master; Henry Goodwin, Teacher of Gymnastics and Calisthenics. Model Schools, in which the Normal School students practice the art of Teaching: David Fotheringham, Master of the Boy's School; Adam Purslow, First Assistant; Richard Moore, Second do. Dorcas Clark, Mistress of Girl's School; Henrietta Shenick, First Assistant; Helen Clark, Second do. and the Teachers of Music, Writing, Book-keeping, Gymnastics and Calisthenics in the Normal School. The Sessions of the Normal School commence on the 8th of January and 8th of August, and close on the 22nd of June and 22nd of December in each year.

Model Grammar School.—George R. R. Cockburn, M.A., Rector; John H. Sangster, First Master; J. K. Johnston, Classical Assistant; Emile Coulon, French Master; A. R. Strachan, Teacher of Book-keeping and Writing; H. F. Sefton, Teacher of Vocal Music; John Bentley, Drawing Master; H. Goodwin, Teacher of Gymnastics.

Grammar Schools.—Each of these Schools is managed by a Board of Trustees appointed by the County Council. There is one Grammar School in each County Town, which receives at least £100 per annum, and where the funds will admit of it, others may be established in different parts of the County. Pupils attending these Schools are prepared for matriculation in the Universities and Colleges. There were 72 Grammar Schools, with 4,073 pupils, in Upper Canada, in 1857.

Common Schools.—Each Township is divided into School Sections of a suitable extent for one School; and in each of those Sections three Trustees are elected to manage its School affairs. In cities, towns, and villages, they are managed by a Board of School Trustees, elected for the Municipality. There were 3,731 Common Schools, with 272,637 pupils, in Upper Canada, in 1857.

Public School Libraries.—Each School and Municipal Corporation, desirous of establishing Free Public Libraries, is aided by the Educational Department granting 100 per cent. on local appropriations, and supplying books from the Depository in connexion with the Department. Up to the end of December, 1857, about 276 Libraries had been established, containing 1000 sub-divisions, and 160,178 vols.

The Total Number of Educational Institutions reported by the Educational Department as in operation in Upper Canada during 1857, was 4,091, attended by 284,565 pupils, and expending \$1,500,000 in their support.

A. NORDHEIMER, Esq.

THOMAS D. HARRIS, Esq.

SOLICITOR,—E. C. JONES, Esq.

SECRETARY AND TREASURER, J. H. MASON, Esq.

The Stock Books of this Society are still open to Subscribers, without the payment of arrears or premium on shares, a new class of Members being formed every month. Shares mature in six years, and are paid up by monthly, yearly, or other periodical instalments, or by a single payment of \$256, a considerable discount being gained by paying in advance. Monthly payment \$4.20 per share, and proportionately for half or quarter shares.

Shares may be withdrawn if desired, at any time before the expiration of six years, compound interest being returned with the amount paid in.

As a reliable and highly remunerative medium for the investment of capital, either in large or small sums, amply secured by Real Estate, this Institution possesses unsurpassed advantages; while to borrowers it presents a mode of repaying their loans, by instalments spread over a number of years.

For Rules, Reports, &c., apply (post-paid) to the Secretary.

RENSSELLAER POLYTECHNIC INSTITUTE.

THE undersigned takes this method of presenting to the inhabitants of Canada the following explanatory statements concerning the Institution named in the above heading.

ITS ESTABLISHMENT.

This Institution was founded in 1824, by the late Hon. Stephen Van Rensselaer, as a *School of Theoretical and Practical Science*. In 1826 it received from the Legislature of the State of New York its Act of Incorporation, with those chartered authorities and privileges usually conveyed to the higher Educational Institutions of the United States.

In 1849 the Institute was re-organized, and in its new form, upon the basis of a general POLYTECHNIC INSTITUTE. Among the changes then introduced were, a material enlargement of its course of study, with a proportionate increase of the time allotted to it, and a correspondingly more elevated and more rigidly held standard of requirements for the admission of Candidates to Graduation Honors.

ITS OBJECTS.

The Institution is designed for the education of ARCHITECTS, CIVIL, MINING, AND TOPOGRAPHICAL ENGINEERS, upon an enlarged basis, and with a liberal development of Mental and Physical culture.

Nevertheless, the educational course presented by the Institute, although especially designed to subserve the wants of the professional classes above mentioned, is intended to be not less available than useful to all others, *whether contemplating a future professional career or not*, who, appreciating and desiring such a course, are willing to submit to the discipline required for its successful accomplishment.

GRADUATION HONORS.

The Institute confers upon such as shall have been found duly entitled to these Honors, the Degrees of CIVIL ENGINEER, TOPOGRAPHICAL ENGINEER, BACHELOR OF SCIENCE, ETC., in accordance with the authority contained in the Bill of Chartered Rights and Privileges, granted by Legislative enactment.

For copies of the *Annual Register* of the Institute, giving detailed information concerning it, apply to

B. FRANKLIN GREENE,

Director, &c., R. P. I.,

**WAIT FOR THE BEST!
WORCESTER'S QUARTO DICTIONARY.**

This great work is rapidly approaching completion, and will we hope be ready for publication in May next. It will contain eighteen hundred pages.

In ORTHOGRAPHY, the work will represent the best usage both in this country and in England.

In the department of ETYMOLOGY this dictionary will be found to be more complete and satisfactory than any other work of the kind.

The DEFINITIONS will be fully and accurately discriminated, and distinguished by numbers, and exemplified whenever practicable, by citations from the best authors.

The ILLUSTRATIONS, by wood cuts, of which there are twelve hundred beautifully executed, will form another novel and useful feature of this Dictionary. There are many terms, the verbal explanation of which, however carefully made, will convey a much less correct idea of their meaning than a pictorial representation, and accordingly it is proposed to adopt this method of exemplifying the definitions in all such cases as seem to require it.

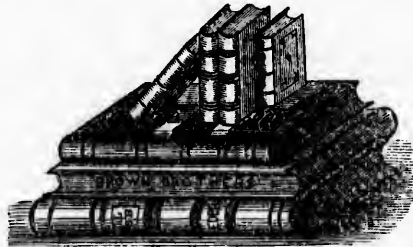

All who want an accurate, comprehensive and complete Dictionary of the English Language will

WAIT AND GET THE BEST.

Solicitor and Secretary—JOHN SYMONS, Esq.

Head Office...16 Masonic Hall, Toronto.

The object of this Company is to encourage the flow of capital to the soil of this Province. The Company is the receiver of such capital, which it then lends to the proprietors of the land, who repay the same by means of a sinking fund of 2 per cent., which extinguishes the debt in about 21 years.—The advantages to the borrower are,

1st He is enabled with great ease to borrow of the Company the sum he requires at a moderate rate of interest.

2nd. By borrowing of this Company there is no possibility of the borrower ever being called upon suddenly or unexpectedly to pay off the debt. When the money is borrowed he enters into a contract to pay a certain fixed sum yearly, in addition to the interest into a sinking fund, and the Company agrees with him that when the amount of these small sums, which bear compound interest equal the amount lent, his debt will be cancelled and his estate will have become entirely free. Experience has shown, under ordinary circumstances, that mortgage debts are rarely repaid in one sum all at once. The repayment is seldom if ever made until after a lapse of years, and then generally by a sale of the estate. This Company offers the borrower the great advantage of paying off his mortgage debt little by little, so that at the end of a certain definite time the estate will be his own, and once more through his own prudence and foresight entirely free. It is a Savings Bank for him, in which he can conveniently place a small annual saving to accumulate at interest and compound interest, and be the means eventually of paying off his debt. It cannot be expected that an individual lender will take any such trouble and agree to receive these small yearly or half-yearly instalments, nor will any borrower take the trouble of investing for himself a small annual payment for a great many years together with the interest as it accrued. The debt is expected by the lender, when paid, to be paid off in one sum or in several large sums. But what the borrower cannot do for himself, and what the lender will not do for him, will be done with the greatest ease by this Company.

3rd. The borrower, on giving notice, will be allowed to pay off his debt at any time, and the different sums he has paid to the sinking Fund, with compound interest will be reckoned in the account.—The advantages offered by this Company to the lender are reciprocal.

1st. The lender has the security of a number of estates collectively, together with the certainty of his interest being paid regularly to the day, without his ever having to seek after, annoy, or dispossess any individual. The Company alone being responsible to him.

2nd. The lender has no anxiety, care, or even thought, as to the character of any individual borrower, or of the value of the land mortgaged.

3rd. The security or debenture which he holds is a marketable commodity, easily transferred from hand to hand, so that he can convert it into money at any moment. If he had invested his money on the old mortgage system he could not do so.

4th. The Sinking Fund of the Company—whilst it makes the borrower feel that every year his debt is decreasing in amount, and secures to him in course of time perfect freedom from debt—is every day improving and making more effectual the security of the lender. There is daily, as it were, money accumulating to meet the sum advanced by the lender, and his security is, in consequence, more and more established.

A part of the capital will be raised in England. There are thousands there as well as in Canada, who will eagerly invest their surplus funds where there can be no risk, and where the interest is certain to be paid to the day. Capitalists advancing money on the security of productive land in a country prosperous beyond parallel, and where the mortgaged institutions are upon a firm basis, have the highest and best security it is possible to give.

The accounts of the Company, which will be under the supervision of the Inspector General, will be made up and the dividend and interest paid half-yearly either in Toronto or London.

The interest paid to shareholders may fairly be expected to be from 7 to 8 per cent. immediately; and, prospectively, the shareholders will participate in the profits either as a bonus or as an addition to their interest which careful calculation shows will then be at least 12 per cent.

It is not expected that more than \$5 per share will be called up at any one time, and then only at long intervals.

A large number of the shares will be reserved for England, and for the remainder application can be made, post paid to the Agents or to the Secretary at the Office of the Company, where further information may be obtained.

THE "GLOBE" NEWSPAPER.

1859.

THE success which has attended the publication of the GLOBE NEWSPAPER since its establishment in 1844, is the best certificate of its merits as a public journal, in the estimation of the community. No labor has been spared, and large outlay has, from time to time been made to render it a comprehensive and reliable

Commercial, Political, and Family Journal.

The gratifying result is that it possesses by far the widest circulation and the greatest advertising patronage in British America. The efforts that have been made in past years to keep pace with journalism in other countries, will be redoubled in future. The EDITORIAL CORPS has been strengthened—the staff of REPORTERS enlarged—and contributions of numerous Correspondents, at home and abroad, will give new interest to its columns.

THE WEEKLY GLOBE,

Is issued every FRIDAY morning at TWO DOLLARS per annum, payable strictly in advance. It is printed on an immense double sheet of paper, of first-rate quality; it is made up to a handsome quarto form, comprising eight pages of seven columns each; and contains more reading matter than any other political newspaper on the continent. Great care is taken in the compilation of the paper; the news is carefully collected from the Daily Edition, and articles specially prepared for the columns. The Market Reports, at home and abroad, receive constant attention.

Any persons sending us Ten Dollars for five (weekly) subscribers will be entitled to an additional copy free.

Ten copies will be sent for Fifteen Dollars!
Twenty-five copies for Thirty-five Dollars!

Eighty copies for One Hundred Dollars!
Clergymen One Dollar per annum.

THE TRI-WEEKLY GLOBE,

Is issued every MONDAY, WEDNESDAY, and FRIDAY, at FOUR DOLLARS per annum, in advance. It is printed on a large sheet, and in its columns is given all that appears in the Daily Edition, with the Telegraphic and other news to the latest moment.

THE DAILY GLOBE,

Is SIX DOLLARS per annum, payable strictly in advance. It is published at four o'clock every morning but Sunday, and is despatched by the early trains to all parts of the country. It is a very large sheet, containing a vast amount of news, mercantile intelligence, and general information, of the latest and most interesting character.

REMITTANCES.

Money Letters, addressed—"THE PUBLISHERS OF THE GLOBE, TORONTO," can be Registered by payment of one penny, and their safe arrival will then be at the risk of the Publisher.

Subscriptions may commence at any period of the year, and be made for any term; and persons desirous of receiving the Paper need not wait for an Agent to call on them, but have only to enclose their money, with their name and Post Office, to

This Association is one of the most extensive Life Assurance Offices in the World. During the last three years alone, there have been upwards of *Three Thousand New Entrants*, Assuring their Lives for nearly *Two Million Pounds Sterling*. The Policy-Holders incur none of the risks of partnership. They are free from all responsibility, and the Sums Assured are Guaranteed.

All the regulations are framed on a liberal footing, and so as to afford the Assured every proper facility. The Association is, however, to be distinguished from nearly every other Assurance Office by its system of Dividing Profits amongst the Assured,—a system at once simple, safe, and equitable, and by which every Policy-Holder enjoys, during his own life, the share of profit allocated to him.

Prospectuses, Forms of Proposal, &c., may be had, gratis, on application, by letter or otherwise.

FROSTED FEET AND CHILBLAINS,
TOOTHACHE,
PAIN IN THE FACE,
NEURALGIA AND RHEUMATISM.

The PAIN KILLER is, by universal consent, allowed to have won for itself, a reputation unsurpassed in the history of medical preparations. Its instantaneous effect in the entire eradication and extinction of PAIN in all its various forms incidental to the human family, and the unsolicited written and verbal testimony of the masses in its favour, have been, and are its own best advertisement.

The ingredients which enter into the PAIN KILLER, being PURELY VEGETABLE, render it a PERFECTLY SAFE and efficacious remedy taken internally, as well as for external applications, when used according to the directions. *The slight stain upon linen from its use in external applications, is readily removed by washing with a little alcohol.*

This medicine, so justly celebrated for the cure of so many of the afflictions incidental to the human family, has now been before the public about EIGHTEEN YEARS, and has found its way into almost every corner of the world; and wherever it has been used, the same opinion is expressed of its real medicinal properties.

In any attack where prompt action upon the system is required, the Pain Killer is invaluable. Its almost instantaneous effect in RELIEVING PAIN is truly wonderful, and when used according to directions is true to its name,

A PAIN KILLER.

It is, in truth, a FAMILY MEDICINE, and should be kept in every family for immediate use. Persons travelling should always have a bottle of this remedy with them. It is not infrequently the case that persons are attacked with disease, and before medical aid can be procured, the patient is beyond the hope of recovery. Captains of vessels should always supply themselves with a few bottles of this remedy before leaving port, as by so doing they will always be in possession of an invaluable remedy to resort to in cases of accidents and sudden attacks of sickness. It has been used in

SEVERE CASES OF THE CHOLERA,

And never has failed in a single case, where it was *thoroughly applied on the first appearance of the symptoms.*

Obtain a copy of the PEOPLES' PAMPHLET, which contains full directions for using the Pain Killer, together with a brief sketch of the first introduction of the medicine, and Recommendationary Notices, Certificates, &c. &c.

The present form (adopted July 1, 1854), in which the Pain Killer is put up, is a flat panel bottle (four sizes) with the words "DAVIS' VEGETABLE PAIN KILLER" blown in the glass, on one side of which is a miniature likeness of Perry Davis, the original inventor of the medicine; on the opposite our note of hand, to counterfeit which is held to be forgery by the laws of the United States. These labels are finely executed steel engravings and the increased cost attending the execution and printing of the same, is incurred for the protection of the public against counterfeits to which a less expensive style is liable.

To those who have so long used and proved the merits of our article, we would say that we shall continue to prepare our Pain Killer of the best and purest materials, and that it shall be every way worthy of their approbation as a family medicine.

Prices, 12½ Cents, 25 Cents, 50 Cents and \$1 per Bottle.

Beware of Counterfeits put up in the Old Style.

NOTICE TO DEALERS IN THE PAIN KILLER.

The name and trade mark "PAIN KILLER," belong exclusively to the proprietors of this medicine. That right has been sustained by courts of law, and any person found selling an article by that name, and not from the manufactory of Perry Davis & Son, will be prosecuted.

The Pain Killer is sold by all respectable Druggists throughout the United States and British Provinces in America, also by Agents in Foreign Countries, whose names are to be found on the Peoples' Pamphlet.

[483]

THE GREAT COAL OIL LAMP.

BEAUTY, BRILLIANCY, AND ECONOMY!

NOT EXPLOSIVE!

TAYLOR'S IMPROVED COAL OIL LAMP.

This celebrated Lamp received the **FIRST PRIZE** and a Diploma, at the Provincial Fair held in the Crystal Palace, Toronto, 1858, and produces one-third more light, at the same cost, than any other Lamp of similar construction. It produces, at the same cost, seven times as much light as Burning Fluid, six times as much as Sperm Oil, twice as much as Rosin (or Lunar Oil), and three times as much as Candles. This is not a random statement, but can be demonstrated to the satisfaction of the most incredulous. It is *perfectly safe*, cannot be *blown up*, and does not affect Insurance.

Old Lamps of every description altered to burn this Oil, and Orders for Lamps and Oil promptly attended to from any part of the country—Address,

TAYLOR, BRO'S,

No. 51 Boulton's Block, Front St., Toronto, C.W.

N.B.—TAYLOR, Bro's are the Sole Manufacturers of the Improved Coal Oil Lamp, and the public are warned against buying any Lamps except from their regular Agents.

The Fourth Septennial Investigation and Division of Profits, as at 31st August, 1856, of

THE EDINBURGH LIFE ASSURANCE COMPANY,

Having been completed, the following Examples of Bonus Additions on a few of the actual existing Assurances, (no mere assumed cases) and the Total Sums now payable under its oldest Policies, will best illustrate the results to all first class lives:—

Total Bonus Additions at 31st August, 1856, on Policies effected in the First Year of the Company's Business.

Age at Assuring.	Sum Insured.	1st Bonus. 31st Aug. 1835.	2nd Bonus 31st Aug. 1842.	3rd Bonus, 31st Aug., 1849.	4th Bonus, 31st Aug., 1856.	Total Bonus.	Total Amount payable under Policy, 31st August, 1856.	Rate per cent. of Total Bonus on Sums Insured.
	£	£ s.	£ s.	£ s.	£ s.	£ s.	£ s.	£ s. d.
60	300	50 2	72 10	168 16	437 11	728 19	1028 10	242 19 8
53	300	40 15	48 18	99 9	236 10	425 12	725 12	141 17 4
52	200	26 9	31 5	62 6	144 5	264 5	464 5	132 2 6
50	993	128 19	146 12	275 8	612 3	1163 2	2162 2	116 6 0
45	1000	116 10	124 4	210 2	422 1	872 17	1872 17	87 5 8
40	1000	107 19	103 0	174 4	302 19	687 13	1687 13	68 15 4
35	1000	104 9	91 10	143 2	242 4	561 5	1561 5	56 2 6
33	1000	106 14	89 19	133 12	225 15	556 0	1556 0	55 12 0
30	1000	101 8	89 3	122 13	119 17	513 1	1513 1	51 6 0
25	300	29 10	26 10	34 13	49 19	140 18	440 18	46 19 4
19	500	46 15	43 4	57 0	74 5	221 4	721 4	44 4 10

Thus at all ages from 19 to 60, on the earliest Policies, the Accumulated Bonuses now range from upwards of £44 per cent. to upwards of £140 per cent. of the sums originally insured; and in one instance to upwards of 242 per cent, or nearly two and one-half times more than the sum assured.

To later Entants the results are, in proportion, equally satisfactory; the Bonus now declared on all Participating Policies of the last seven years' endurance, averaging upwards of one and one-half per cent. per annum of the sums assured, and the gradually-advancing rate of Bonus, as exhibited under each succeeding Declaration, affords the fairest prospect to all present and future Insurers, that these will be maintained, until they also shall derive equally high benefits, when they rank as the oldest Policy holders of the Company.

An Intermediate Bonus, between one Investigation and another, affords all the advantages that may be supposed to accrue from Annual Divisions.

Bonuses may be applied in reduction of Annual Premiums or the Cash Value received.

Liberal Resolutions connected with the conditions of the Policies of this Office make them in every respect a sound, negotiable document, and in all Insurances for Family Provisions, or otherwise, to protect the interests of Representatives, it may confidently be maintained that in no other Life Institution can higher benefits be derived by all first-class lives.

Proposals, and Printed Forms of the Proposal and Declaration for effecting an Insurance, may be had Gratis, at the Head Office, or from any of the Company's Agents.

Rates of Premium on the Non-Participating Scale, extremely moderate, and well adapted for all Insurances connected with Money Transactions.

HEAD OFFICE IN CANADA--WELLINGTON, STREET TORONTO.

Agencies in Galt, Goderich, Hamilton, Kingston, London, and Montreal.

THE CANADIAN GOVERNMENT,

Price, Half-a-Dollar;

BY THE AUTHOR OF "LETTERS FROM
CANADA,"

AND PROPRIETOR OF THE "TORONTO TIMES
AND OLD COUNTRYMAN."

DOCTOR A. TRASK'S
MAGNETIC OINTMENT!
FOR THE CURE OF ALL
INFLAMMATORY DISEASES.

In cases of *Inflammation of the Brain, Inflammation of the Lungs, Inflammation of the Bowels, Inflammatory Rheumatism, and Child-bed Fevers*, it has been used with perfect success; also in cases of *Scarlet Fever, Canker, Rash, and Ulcerated Throat and Lungs*, with like success.

In the epidemic known as the *Putrid Erysipelas*, by which so many valuable lives have been lost, it has been frequently tested, and it has never failed of effecting a speedy and certain cure.

In cases of *Burns, Sprains, Bruises, Frozen Limbs, &c.*, it acts like a charm.

Many eminent Physicians are introducing the Magnetic Ointment into their practice, and speak in the most enthusiastic terms of its success over a large class of diseases.

The following Physicians have handed in their names for reference:

DRS. GEO. & WM. CLEVELAND, Waterville,
DR. BUCKINGHAM, Marshall,
" PRESTON, Sangerfield,

DR. BINGHAM, Utica,
" BRONSON, Clinton,
" BISSELL, Clinton.

TO AVOID COUNTERFEITS the Magnetic Ointment is put up in bottles with the words "A. TRASK'S MAGNETIC OINTMENT" blown in the glass, with the name of "A. TRASK" stamped on the seal, and the WRITTEN SIGNATURE OF S. BUELL, (General Agent,) on the outside label. None other is genuine. It may be found with respectable Druggists and Dealers in most of the cities and villages in the United States and Canadas.

ALL ORDERS should be addressed to

NORTHROP & MOSES,

NEWCASTLE, C. W.,

SOLE AGENTS FOR THE PROVINCE.

DENTISTRY.

MORTIMER D. FRENCH, M.D., D.D.S., DENTIST,

MANUFACTURER OF

Mineral Block and Single Teeth OF EVERY DESCRIPTION.

OFFICE,—CORNER OF BAY AND MELINDA STREETS.

HOURS—FROM 9 A.M. TILL 5 P.M.

TERMS—CASH.

Dr. French has the honor of publishing the following recommendations from Dr. Harris of Baltimore, the Lord Bishop of Toronto, Rev. Dr. Lett, and Lieut. A. P. Douglas.

BALTIMORE, August 5th, 1855.

To the Citizens of Toronto:

I take great pleasure in introducing to the public my friend, M. D. FRENCH, M.D., and graduate of the Baltimore College of Dental Surgery. I have been acquainted with Dr. FRENCH about five years, a considerable portion of which time he has assisted me in practice. He is a gentleman of irreproachable moral character, a thoroughly educated Dentist, and practically skilled in every department of his profession; I therefore recommend him with entire confidence to all who may require the services of a Dentist.

CHAPIN A. HARRIS, A.M., M.D., D.D.S.,
Professor—Baltimore College of Dental Surgery.

TORONTO, October 18th, 1856.

The best recommendation that I can give of Dr. M. D. FRENCH, Surgeon Dentist, is, that he has been employed in this family, and given much satisfaction.

JOHN TORONTO.

I have had occasion to visit Dr. FRENCH, for the purpose of availing myself of his professional skill. I have every reason to be perfectly satisfied with the manner in which he treated me. In fact I never met a Dentist who performs an operation, at best unpleasant, with such gentleness and efficacy.

STEPHEN LETT, St. George's.

GOVERNMENT HOUSE, Toronto, Jan. 15th, 1857.

Dr. M. D. FRENCH, Surgeon Dentist, has both Extracted and Stopped Teeth for me with perfect success, and with less pain to myself than I thought possible.

A. P. DOUGLAS, A.D.C.

Dr. F. has also the honor of referring to the following gentleman:—

Right Rev. A. F. M. CHARBONNEL, D.D., Roman Catholic Bishop of Toronto.

Rev. H. J. GRASETT,

Very Rev. J. M. BRUYERE, Vicar General.

HUGHES, BROTHERS.

THE GREAT ENGLISH REMEDY!

SIR JAMES CLARKE'S

Celebrated Female Pills.

PROTECTED BY ROYAL LETTERS PATENT.

*Prepared from a Prescription of Sir J. Clarke, M.D., Physician
Extraordinary to the Queen.*

This invaluable medicine is unfailing in the cure of all those painful and dangerous diseases to which the female constitution is subject. It moderates all excess, and removes all obstructions, and a speedy cure may be relied on.

TO MARRIED LADIES

It is peculiarly suited. It will in a short time bring on the monthly period with regularity.

Each Bottle, price One Dollar, bears the Government Stamp of Great Britain, to prevent counterfeits.

CAUTION:

These Pills should not be taken by Females during the FIRST THREE MONTHS of Pregnancy, as they are sure to bring on Miscarriage, but at any other time they are safe.

In all cases of Nervous and Spinal Affections, Pain in the Back and Limbs, Fatigue on slight exertion, Palpitation of the Heart, Hysterics and Whites, these Pills will effect a cure when all other means have failed; and although a powerful remedy, do not contain iron, calomel, antimony or anything hurtful to the constitution.

Full directions in the pamphlet around each package, which should be carefully preserved.

THE LEADER

IS PUBLISHED TWICE A DAY,
BY JAMES BEATY,
 PROPRIETOR,
 KING STREET, TORONTO.

THE SEMI-WEEKLY,
 Or UNITED EMPIRE Edition,
ON TUESDAYS AND FRIDAYS.

THE
WEEKLY EDITION.

EVERY WEDNESDAY, AND

THE PATRIOT,

(Weekly), also on WEDNESDAY.

TERMS:

MORNING DAILY EDITION, at FIVE DOLLARS a year in advance, otherwise Six Dollars.

EVENING EDITION same terms.

The SEMI-WEEKLY, or UNITED EMPIRE Edition, at THREE DOLLARS a year in advance; when not so paid, Three and a Half Dollars.

The WEEKLY LEADER, at ONE DOLLAR a year strictly in advance, or Two Dollars if not paid in advance,

The WEEKLY PATRIOT at the same rate, ONE DOLLAR per annum, or Two Dollars if not paid in advance.

Subscriptions to the above Papers will not be discontinued till all arrears are paid and ordered to be stopped, unless at the option of the Proprietor. The subscription will run on, and be payable, whether taken from the Post Office or not, till the amount due be paid up. Money can be safely transmitted through the Post Office, and when enclosed in a letter "Registered," post-paid, and placed in the hands of any Postmaster, it will be at the risk of the Publisher. Such letters, containing money for Subscription or Advertisements, should be addressed "JAMES BEATY," "Leader" or "Patriot" Office, Toronto, as the case may be.

All receipts for moneys will be signed by "ROBERT BEATY," no person out of the office having authority to give receipts.

The Proprietor is now erecting a large Building on the Corner of King Street and Old Post Office Lane, and has purchased another large press from Hoe & Co., of New York. The present engine and boiler for driving the presses connected with the Leader Establishment, have been found too small, and new ones of greater power are ordered so that no greater facilities for Printing can be found in the Province, than at the Leader Office.

THE GREAT AMBASSADOR OF HEALTH TO ALL MANKIND.

HOLLOWAY'S PILLS AND OINTMENT.

THE want of a Sterling Medicinal to meet the ills and necessities of the suffering portion of humanity, and one entirely free from Mineral and other deleterious particles, was severely felt till this all-powerful Medicine was ushered into the World.—HOLLOWAY'S INVALUABLE PILLS have become the HOUSEHOLD REMEDY of all Nations. Their attribute is TO PREVENT as well as TO CURE: they attack the RADIX or ROOT of the complaint, and thus by removing the hidden cause of disease, re invigorate and restore the drooping energies of the system, assisting nature in her task of VITAL and FUNCTIONARY REFORMATION.

SICKLY FEMALES

Should lose no time in trying a few doses of this regulating and renovating remedy, whatever may be their complaint, it can be taken with safety in all periodical and other disorganizations its effect is all but miraculous.

UNREFUTED PROOF.

The testimony of Nations is unanimously borne to the health-giving virtues of this noble remedy and certificates in every living language bear witness to the UNDENIABLENESS of its INTRINSIC WORTH.

THE OINTMENT.

The free admissions of all Nations, as well as the verdict of the leading Hospitals of the Old, as well as the New World, stamp this powerful remedial Agent as the greatest healing preparation ever made known to suffering man. Its PENETRATIVE QUALITIES are more than MARVELLOUS, through the external orifices of the skin, invisible to the naked eye, it reaches the seat of the internal disease; and in all external affections its anti-inflammatory and healing virtues surpass anything else on record, and is Nature's great ally.

ERYSIPELAS AND SALT RHEUM

Are two of the most common and virulent disorders prevalent on this continent, to these the Ointment is especially antagonistic, its *modus operandi* is first to eradicate the venom, and then complete the cure.

BAD LEGS, OLD SORES, AND ULCERS.

Cases of many years standing that have pertinaciously refused to yield to any other remedy or treatment have invariably succumbed to a few applications of this powerful unguent.

CAUTION!—None are genuine unless the words "HOLLOWAY, NEW YORK AND LONDON," are discernible as a *Water-mark* in every leaf of the book of directions around each pot or box; the same may be plainly seen by *holding the leaf to the light*. A handsome Reward will be given to any one rendering such information as may lead to the detection of any party or parties counterfeiting the Medicines, or vending the same knowing them to be spurious.

* * * Sold at the Manufactories of Professor HOLLOWAY, 80 Maiden Lane, New York, and 244 Strand, London, and by all respectable Druggists and Dealers in Medicine throughout the United States, and the civilized World, at 25 cents, 63 cents, and \$1 each, per pot or box.

There is considerable saving by taking the larger sizes.

N. B.—Directions for the guidance of patients in every disorder affixed to each box.

LATE

D. S.

DR. HOOFLAND'S CELEBRATED GERMAN BITTERS,

WILL EFFECTUALLY CURE

Liver Complaint, Dyspepsia, Jaundice, Chronic or Nervous Debility, Diseases of the Kidneys, and all Diseases arising from a disordered Liver or Stomach,

Such as Constipation, Inward Piles, Fulness or Blood to the head, Acidity of the Stomach, Nausea, Heartburn, Disgust for Food, Fulness or Weight in the stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and Difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dimness of Vision, Dots or Webs before the Sight, Fever and Dull Pain in the Head, Deficiency of Perspiration, Yellowness of the Skin and Eyes, Pain in the Side, Back, Chest, Limbs, &c., Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil and great Depression of Spirits.

The Proprietors, in calling the attention of the public to this preparation, to do so with a feeling of the utmost confidence in its virtues and a laption to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale are unrivalled by any similar preparation extant. The testimony in its favor given by prominent and well-known Physicians and individuals in all parts of the country is immense, and a careful perusal of the Almanac, published annually by the proprietor, and to be had gratis of any of his Agents, cannot but satisfy the most skeptical that this remedy is really deserving the great celebrity it has obtained.

DR. HOOFLAND'S BALSAMIC CORDIAL, FOR THE SPEEDY CURE OF

Coughs, Colds, Influenza, Croup, Hoarseness, Bronchitis, Pneumonia, Diseases of the Bowels arising from Cold, Incipient Consumption, and for the relief and (if at all possible) cure of Patients in advanced stages of the latter disease.

This celebrated preparation, like the Bitters, may be confidently relied on. It is designed for a class of diseases more general and more fatal than any other to which the people of this country are subject—those springing from a "slight cold." That eminent authority, Dr. Bell, says: "I will not say that Colds are to our inhabitants what the *Plague* and *Yellow Fever* are to those of other countries; but, I can aver confidently that they usher in disease of greater complexity and mortality than these later."

A further proof of the terrible fatality of diseases resulting from a "common cold" may be seen by a glance at the following statistics, taken from the records of the Board of Health of Philadelphia, confessedly one of the most healthy localities in the Union:—

<p>1852. Total deaths in Philadelphia,..... 10,261</p> <p style="padding-left: 20px;">Died of Consumption..... 1,912</p> <p style="padding-left: 20px;">" " all other diseases (250 in number) 8,349</p> <p style="text-align: right; padding-right: 20px;">—10,261</p>	<p>1853. Total deaths,..... 9,749</p> <p style="padding-left: 20px;">Died of Consumption..... 1,895</p> <p style="padding-left: 20px;">" " all other diseases.....7,854</p> <p style="text-align: right; padding-right: 20px;">—9,749</p>
<p>1854. Total deaths,.....11,814</p> <p style="padding-left: 20px;">Died of Consumption,.....2,178</p> <p style="padding-left: 20px;">" " all other diseases.....9,636</p> <p style="text-align: right; padding-right: 20px;">—11,814</p>	

From these figures, it will be seen that nearly one fourth of the total deaths in the country are caused by consumption to say nothing of the numerous other diseases springing from a "slight cold."

Do not trifle with your health; but, if suffering from a cough, or cold on the lungs, buy a bottle of HOOFLAND'S BALSAMIC CORDIAL, and you may safely count on a cure. Thousands have done so, and have certified to its wonderful effects.

Coughs sometimes proceed from a disordered or dyspeptic state of the stomach, in which case the German Bitters should be used. In cases of weakness, or general debility of the system, resulting from a protracted cough, the German Bitters will be found of great benefit.

Prepared only by DR. C. M. JACKSON, 418 Arch Street Philadelphia, and for sale by Druggists and Storekeepers throughout the United States and Canada. Price 75 cents per Bottle.

For Sale Wholesale and Retail by all the druggists in Canada. Wholesale Agents.—HUGH MILLER, Toronto; LYMANS, SAVAGE & CO., Montreal; J. MUSSON & CO., Quebec; J. WINEB & CO., Hamilton; E. W. PALMER, Kingston.
