WE ARE GOING TO GIVE AWAY A FARM!

TO THE customer sending us the largest order for Nursery Stock selected from this Catalog on or before March 15, 1921, we will make him a Warranty Deed to 40 acres of Arkansas land; will furnish abstract showing clear title. This 40 acres has some improvements on it; house, barn, etc., and is fine fruit land. It will pay you to send us a large order. You cannot plant too much fruit and you will stand a chance of getting this farm.

The name and address of the party who gets this farm will be published in our next Catalog. ARKANSAS NURSERY COMPANY.

Arkansas National Bank

September 4, 1920.

This is to certify that abstract covering the above land is in our possession, also deed made out in blank, and after an examination of the order register of the Arkansas Nursery Co., we will fill out these and send to customer who has placed the largest order.

TOM L. HART, Cashier.

Why the Home Fruit Garden?

A more general culture of fruits in gardens and in home orchards would contribute substantially to the health and pleasure of the average family, besides furnishing a supply of valuable food products at a relatively small outlay of money.

In many localities the difficulty incident to securing fruit in pleasing variety by purchase is an added reason for its home production wherever possible.

A sufficient range in variety of fruits can be produced throughout a large portion of the country to provide a supply in the fresh state for the table during a large part of the year and for canning or otherwise conserving for use when desired.

This bulletin deals with those widely grown fruits, such as the apple, peach, pear, and plum, which are commonly called deciduous. These fruits, with few exceptions, are borne on plants which shed their leaves annually and must be dormant for a period during each year in order to thrive. They become dormant in most cases through the influence of low temperatures.—From Bulletin U. S. Dept. Agriculture.

ARKANSAS STATE PLANT BOARD
Office of the Chief Inspector
LITTLE ROCK

Certificate of Nursery Inspection

No. C8 1920-1921 Issued Aug. 27, 1920

This is to certify that, in accordance with the provisions of the Arkansas Plant Act of 1917, the nursery and premises thereof belonging to Arkansas Nursery Company, of Fayetteville, Arkansas, have been inspected by a duly authorized inspector and were found to be substantially free of injurious insect pests and plant diseases and that, as a condition of the issuance of this certificate, the owner or operator of such nursery has agreed to comply with such requirements as the Chief Inspector has prescribed for the elimination of infested or diseased trees or plants, and has further agreed not to dispose of any nursery stock unless it is covered by a certificate granted by the Chief Inspector of the Arkansas State Plant Board.

This certificate is not transferable and may be revoked for cause.

This certificate expires Sept. 1, 1921.

GEO. B. BECKER,
Chief Inspector.

The Point of View

The commercial grower thinks and operates in terms of his orchard, carload shipments of fruit, and market prices. The one who grows fruit for home use thinks in terms of individual trees or plants and works to secure a supply for family use. The commercial grower measures his success principally by the effect of his bank account; the one who grows fruit for home use, by the regularity and quality of the supply that comes to his table and the satisfaction derived from having it fresh and tree ripened and the product of his own efforts.

The ideal fruit garden or home orchard should contain several different kinds of fruit, represented in many cases by a considerable number of varieties ripening one after another over a long period. Large yields, good shipping quality, and attractiveness in appearance may be made secondary to high dessert quality or special excellence for cooking purposes.—From U. S. Dept. Agriculture Bulletin.

HOW TO ORDER IT'S EASY

WE HAVE tried to make it easy for you to make out your order from this catalog. You do not have any zone rates, express or freight rates to figure out. All you have to do is to make out a list of the varieties you want and send check for the amount. The stock goes to you by prepaid parcel post, express or freight, whichever manner of shipment you indicate on your order. If your order does not amount to \$5.00 add 15c on each dollar to prepay the postage. For instance, if you send an order amounting to \$3.50, you should add 52c for postage.

Time of Shipment

Many people who order Trees, Plants and Seeds from some Nurseries do not get their order when they want it. We can most always send out shipments at any time wanted as we have fine facilities for handling our stock. We have large frost proof packing houses and are advantageously located for shipping both North and South.

Order Early—It Will Pay You

Many people who postpone until the last moment to place their order fail to get their stock. Be sure to place your order early so that you can get what you want and get it planted at the proper time.

How We Ship

It makes no difference where you are located, we can guarantee safe arrival of your plants. Last season we sent orders to far away Honolulu and other foreign countries; to all of the states and into Canada. We can reach you by parcel post, express or freight. We send out nearly all small orders by parcel post. It is very important for you to indicate on the order blank how you want shipment made. If you live off of the railroad and not convenient to

the express office, we can send your order by parcel post unless it be a very large shipment; but if you live convenient to the express office and you have a medium sized order it is best that it be sent by express. We have the best facilities for packing to insure your stock reaching you in perfect condition.

Planting Instructions

We send with each order brief directions for planting, but we will at all times cheerfully give you any information desired as to the planting, cultivating, spraying, or pruning. It is to our interest to see that you make a success of the stock that you purchase from us and we issue bulletins and instructions on the various things pertaining to the growing of trees and plants and will be glad to send free to all customers requesting them or give any special information desired.

How to Make Remittance

Checks look good to us. Do not go to the trouble or expense to buy a money order but send your personal check. This is a good receipt and the safest way of making remittance. If you do not care to send check it would be better to buy money order than to send money loose in the mail.

OUR POSITIVE GUARANTEE

Satisfaction or Your Money Back

We guarantee to refund your money or replace free any Nursery Stock or Seeds you buy from us at any time you did not get value received.

ARKANSAS NURSERY CO.

Fayetteville, Ark.

We mean what we say in the above guarantee. Our first efforts, however, are to please you, to so satisfy you with our hardy Trees, Plants, and Seeds from the heart of the Ozarks that you will never ask for your money back; that you will send us repeat orders and will tell your neighbors also of our fine stock,

but should we fail to please you, your money is cheerfully refunded. No Nursery or Seed House ever made nor can make a fairer offer. That our guarantee means what we say we can give you the names of thousands of satisfied customers, and refer you to our home bank, The Arkansas National Bank, Fayetteville, Ark.

APPLES

OUR farmer forefathers who raised a few apples out back of the barn for their own use—a few bushels for the cellar, a little cider, and a few strings of dried apples—thought they were lucky if they had a few barrels in excess of their own requirements to trade in at the cross-roads general store. When they had a good crop of apples—more through good luck than science and in spite of the vicissitudes of weather and insect pests—the apples rotted on the ground or were fed to the hogs. Such of them as were stored usually spoiled before they could be marketed, due to ignorance of proper packing and storing methods. In fact, apple growing in those days was distinctly a side issue with no certain knowledge back of it and no expectation of any financial returns.

But apple growing today is a far different proposition. It has not only outgrown the former hit or miss method of production, but it has in most cases outgrown the general farmer entirely, and has developed into a highly specialized and exceedingly profitable industry. The apple—always our most popular fruit—is growing in popularity by leaps and bounds. In spite of the enormously increased acreage coming into bearing every year, the demand for “eating” apples keeps ahead of the supply. The real food value of the apple has only been appreciated lately, but today a basket of apples is the favorite centerpiece on the dinner table in every home.

Summer and Early Varieties

Yellow Transparent—One of the best early market apples. Trees medium size, vigorous and hardy, and will bear at two and three years.

Early Harvest—Tree healthy, vigorous and a good bearer. Fruit yellow, with sub-acid flavor, flesh tender and juicy.

Red June—Medium, red; flesh white, tender; good flavor. Abundant bearer.

Red Astrachan—Tree vigorous, hardy and good bearer. Fruit large and handsome, crimson, rather acid, and a good cooker.

Maiden Blush—A fine variety for home use and market. Yellow with red cheek, large, tender and very juicy. Tree medium size, vigorous and hardy.

Liveland Raspberry—Good commercial variety and one of the best early market apples. Tree hardy, vigorous and long lived. Bears young. Fruit medium size, clear waxen white, striped with crimson. Flesh crisp, juicy and almost sweet.

Autumn or Medium Varieties

Wealthy—One of the most desirable of the fall varieties. Fruit medium size, almost solid red color; flesh white, subacid and very good. Splendid keeper. Tree very hardy and a vigorous upright grower.

Black Ben Davis—Profitable to Plant

PRICE LIST

2 3-ft. trees	40c each,	10 for.....	\$3.50	100 for.....	\$30.00
3 4-ft. trees	60c each,	10 for.....	5.00	100 for.....	40.00
4 5-ft. trees	75c each,	10 for.....	6.00	100 for.....	50.00

Duchess—Tree hardy, fine grower and abundant bearer. Fruit large, yellow, tender and juicy. Good commercial variety.

Rome Beauty—Large size, with red stripes; tender juicy and good flavor. A good grower, bears heavily every year. Very desirable for either home or market.

Mammoth Pippin—Large green sub-acid; quality best.

King David—Fine Flavor, Abundant Bearer

APPLES--Continued

Winter or Late Varieties

Arkansas Black—Dark red, almost black, good keeper. Tree comes into bearing young.

Black Ben Davis—An apple of the Ben Davis type; large red apple; a fine market apple. Tree hardy and vigorous.

Ben Davis—Large, round, bright deep red striped; flesh, white sub-acid, firm and juicy. Tree vigorous, upright and productive.

Champion—Bright red, medium size, good keeper and good bearer. Tree hardy and vigorous. A fine commercial variety.

The "True Delicious" Apple—(See illustration on front cover). Fruit is large, with the surface almost covered with a most beautiful brilliant dark red, blending to golden yellow at the blossom end. In quality it is unsurpassed, in flavor sweet, slightly touched with acid, but only enough so as to make it all the more pleasing, with an aroma delightfully fragrant. The flesh is fine-grained, crisp, juicy, melting and withal delicious. In keeping quality it ranks with the best, coming out of storage in March and April in perfect condition. Tree is very hardy.

Grimes Golden—Large golden yellow, juicy, tender and sprightly sub-acid. Very good. Vigorous grower.

Ingram—Medium size, yellow sprinkled with bright carmine stripes; flesh, juicy and of excellent flavor.

Jonathan—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, and rich. A splendid family apple and one of the best commercial varieties. Tree long lived, productive and an early bearer.

King David—Medium size early winter apple; very dark rich red; flesh is firm, juicy and of good quality; a good shipper. Tree is very hardy, vigorous grower, comes into bearing very young.

Mammoth Black Twig—Fruit large, round, dark red, almost black when fully matured. Tree a vigorous grower and abundant bearer.

Stayman Winesap—Tree hardy, vigorous and spreading and an abundant bearer. Fruit dark, rich red, lightly striped. Flesh is firm, crisp and juicy. The Stayman is an apple that is not only desirable in the home orchard, but is one of the most profitable when grown for commercial purposes.

Winesap—Medium size, smooth dark red; flesh yellow, crisp, firm, with a rich, high flavor. Fine in quality and a good keeper. Tree a strong grower, root-growth exceptionally strong; an early and productive bearer.

Grimes Golden—The Finest of All Apples.

Crab Apple trees are hardy as an oak. Will grow anywhere. You can make no more profitable investment than to plant an acre of crab apples. We recommend planting them sixteen feet apart, which is 160 trees to the acre.

IMPROVED VARIETIES

Whitney—One of the largest and handsomest Crabs. Flesh firm, juicy and rich. A great bearer and extra hardy. Tree a vigorous and beautiful grower. Excellent for cider and cooking. Season early.

Transcendent—Tree immensely productive, bearing after the second year. Excellent for sauce or pies, either green or dried, and unsurpassed for cider. Flesh yellow and crisp, with an agreeable flavor. Season medium.

Hyslop—A handsome Crab of excellent quality and unsurpassed for general purposes. Flesh yellow, with a sub-acid, pleasant flavor. Tree highly ornamental. Season late.

Red Siberian—Yellow, pink blush; bears young.

Price of Crab Apple Trees, \$1.00 each.

CRAB APPLES

VALUABLE FOR MARKET

Few understand the value of the crab as a market fruit. They always command a good price and find ready sale. They stand shipping any distance. Packed in strawberry crates they sell for more per crate than strawberries. The yield per acre is much more. One of our customers, who is an extensive fruit grower, says that the most profitable apple that can be grown are the Improved varieties of crabs.

Powersite, Mo., April 23, 1920.

Arkansas Nursery Company,
Fayetteville, Ark.

Gentlemen:

Your favor of the 16th with check for \$6.25 to cover refund on my order is received. The trees also came in by Parcel Post for all of which I thank you.

Yours truly,

J. S. HARRISON.

PEACHES

PRICE LIST

2 3-ft. 50c each, 10 for.....	\$4.00
3 4-ft. 75c each, 10 for.....	6.00
4 5-ft. \$1.00 each, 10 for.....	7.50

Special price on Elberta in large lots for commercial planting.

First Ripening

Mayflower—Earliest peach known, semi-cling, medium size, color bright red; ripens well to the seed. Young and prolific bearer. Tree an upright good grower.

Red Bird—A fine early Peach; bright glowing red. A good shipper. Flesh juicy, firm and most delicious peach flavor imaginable. Tree hardy and vigorous.

Alexander—Medium greenish white, nearly covered with rich red, melting, juicy, sweet.

Second Ripening

Carman—Large creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; very hardy and productive. Good shipper.

Early Crawford—A large yellow Peach of splendid quality; strong grower and prolific fruiter.

Greensboro—The largest and most beautifully colored of all early Peaches; prolific and of excellent quality; juicy; freestone but adheres slightly.

Third Ripening

Belle of Georgia—Very large, white Peach with red cheek; flesh white, firm, and excellent flavor. Tree rapid grower and very productive.

Champlon—Fruit large, beautiful in appearance; flavor delicious. Skin creamy white with red cheek; valuable for commercial orchards very hardy and productive.

Early Elberta—Large freestone Peach, red cheek, yellow fleshed, with distinctive yellow peach flavor and odor. It is a heavy and regular cropper.

Fourth Ripening

Elberta—The most popular Peach grown. Large, yellow with red cheek; flesh yellow, firm, juicy and of high quality. Exceedingly prolific, sure bearer and hardy.

J. H. Hale—Large round, firm; white with red cheek; flesh white, juicy, and very good. Hardy and very productive.

Triumph—Large yellow freestone, nearly covered with red; flesh yellow, juicy with a very agreeable flavor; strong, vigorous, and very productive.

Fifth Ripening

Chinese Cling—Hardy and productive; flesh white, red at the stone, very juicy, melting with a rich, excellent flavor. Clingstone.

Crawford Late—Superb yellow Peach of large size and excellent quality; great bearer. One of the finest late varieties.

Indian—Large, dark claret, very downy, flesh deep red. Much esteemed for pickling and preserving.

Sixth Ripening

Heath Cling—Very large, oblong, creamy white, with a faint blush; flesh greenish white, tender, and juicy. One of the finest for canning purposes. Tree a good grower and excellent bearer.

Lemon Cling—Large oblong, yellow with a red cheek; flesh yellow, firm, with a rich sub-acid flavor.

Stinson October—Large oval, creamy white, with fine blush; flesh white and rich.

SEEDLING PEACHES

Plant a few Seedling Peaches for home use. There is a flavor and quality about Seedling Peaches that appeals to many people. The trees are thrifty and hardy and they will sometimes bear when the budded trees fail. Our trees come from stock that produces large crops of fruit. They are grown in our Mountain Nursery, and are strong, well-rooted trees that will please you.

Common Seedling Peaches—Extra fine trees. Plant some of these trees.

There should be more good varieties of seedlings planted, for there are seasons when there is not a crop of budded varieties, and the seedling trees produce a good crop.

Price 30c each, 10 for \$2.50; 100 for \$15.00.

Elfrida, Ariz., Nov. 24, 1919.

Dear Sirs:

My Apple Trees I received from you last year are doing fine and I want to send you another order soon.

Yours truly,
MRS. SAM WELLS.

QUINCE

Orange — Large, delicate flavor. Bears abundantly while young. Flesh cooks as tender as an apple and without hard spots and cores.

Price of Quince Trees, \$1.00 each.

PLUMS

Plums are easy to grow anywhere. Yet they are not grown on many farms. There is a healthy demand for the fruit. The trees produce abundantly. Everyone likes plums. They are good shippers. All markets can be greatly extended and developed.

Price of Plum Trees 75c each, all varieties.

Abundance—An early pinkish-red plum. Ripens in midseason. Thrives everywhere. A regular and heavy bearer.

Eurbank—Adapted to any soil and climate any other plum is grown. A profitable commercial plum. Requires little care. Ripens in mid-season.

Red June—An early market plum of large size, with deep vermilion red color, with light lemon yellow flesh, very firm, slightly sub-acid. Free from rot. Ripens in early August.

Wickson—A large, long, heart-shaped, deep-maroon red cling plum, with small pit. Tree an upright, vigorous grower. Excellent keeper and shipper. Planted largely for market. Early September.

Lombard—Medium, round, oval, violet-red; juicy, pleasant and good; adheres to the stone. Tree vigorous and productive. A valuable market variety; one of the most hardy and popular. July.

Shiro—Medium sized, yellow and very sweet. The best quality of any of the Japan plums. Recommended highly for garden planting.

Wild Goose—Deep red, very sweet and juicy. Tree a hardy and vigorous grower and an abundant bearer.

Moore's Arctic—Purplish, black skin, with greenish yellow flesh. Juicy, sweet and pleasant and medium size.

Mariana—An unusually strong, rapid grower. Fruit larger than the wild goose, round and of a peculiar light red color.

Gold Beauty—A large variety in a rich yellow. Flesh is very firm and sweet. A variety that always is in big demand.

PRUNES

Italian Prune—Large, dark, purple, flesh greenish yellow. Price \$1.50 each.

French Prune (Fellenberg)—A fine late plum. Fruit large, handsome, of oval shape and purple color. Flesh thick, greenish yellow, juicy and delicious, parts freely from stone. Excellent for drying and preserving. Very productive. Extensively used in Oregon and Washington for drying purposes. Ripens in September. Price \$1.50 each.

New White Nectarine—Try Them

German Prune—A valuable plum of fair quality for dessert, but most esteemed for drying and preserving. Large, long-oval, purple with a thick blue bloom, flesh firm, sweet and pleasant, separating from the stone. Moderate to vigorous in growth. September. Price \$1.50 each.

THE NECTARINE

THERE is a mistaken idea that the Nectarine is a cross between the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The trees bear fully as well as the Peach, and for canning, drying, and shipping it has so many points in its favor it is difficult indeed to comprehend why planters have not engaged in Nectarine culture more extensively than they have. Prof. Bailey, in *Cyclopedia of American Horticulture*, on page 1064 says: "Nectarines thrive wherever Peaches do." As the Nectarine has identically the same habit as the Peach, the cultural directions are the same.

Red Roman—This variety is particularly recommended for home planting. The fruit is very firm and keeps as well as a Peach. It has a delicious flavor, being rich in sugar, tender and juicy. Price \$1.00 each.

New White—This is nearly round with tender white flesh, having a rich vinous flavor, and a small stone. Price \$1.00 each.

Pryor, Okla., R. 3, Box 32
March 3, 1920.

Arkansas Nursery Co.,
Fayetteville, Arkansas.

Kind Sirs:

Trees arrived all O. K. Better trees than I received last year. Thanking you for replacing trees dead in 1919, and I sure will favor you in future with any fruit tree orders I may have.

Yours truly,
A. E. WILLIAMS.

Moundville, Mo., Feb. 6, 1920.

Dear Sirs:

Order No. 7726 received in good condition. Thank you for promptness.

Respectfully,

W. J. SMITH.

PEARS

Price of Pear Trees \$1.00 each.

✓ **Anjou**—Large, greenish, shaded with russet crimson. Flesh is highly flavored and rich. Keeps well until winter holidays.

✓ **Bartlett**—Large size, buttery, very juicy and highly flavored. Bears early and abundantly.

✓ **Early Harvest**—Fruit medium to large. Rich golden yellow, with her cheek, thickly covered with gray dots. Valuable for early market.

✓ **Kiefer**—Fruit large, rich yellow, tinged with red; somewhat rusty and very handsome. Flesh very white, buttery and juicy. Tree a vigorous grower, early and regular bearer. Very productive, and commands the highest market price.

✓ **Garber**—Fruit nearly round, large and juicy. Noted for vigor, freedom from blight, and heavy bearing.

✓ **Seckle**—Small size, yellowish, with a red cheek. Flesh whitish buttery, very tender, juicy and melting. The common sugar pear, and a very prolific bearer.

✓ **Duchess**—A dependable cropper, often fruiting the first season. Fruit large, frequently weighing a pound. A profitable market pear. Ready for use in October and November.

✓ **Clapp's Favorite**—A beautiful fruit of good quality. Tree is an upright and vigorous grower and bears heavy crops of large, juicy pears, with a very agreeable flavor.

✓ **Flemish Beauty**—Large size, yellow when ripe, with patches of brownish red; rich, sugary flavor. Tree is first-class in hardiness, productiveness and early bearing.

✓ **Wilder**—Medium small, yellow, with dark red cheek, sweet and good for dessert. Tree very attractive, of vigorous and symmetrical growth.

✓ **Vermont Beauty**—Medium, roundish, yellow, with carmine cheek. Flesh exceedingly fine, sweet and juicy; a splendid table pear. Tree makes strong, healthy growth and bears early.

Duchess—Fine for eating and canning.

very hardy. It will pay you to plant a few apricots about the place for home use. Price 2 to 3 feet, 40c, 3 to 4 feet 50c.

✓ **Alexander**—An immense bearer. Fruit yellow, flecked with red. Very beautiful. Price 75c each.

✓ **Early Golden**—Fruit beautiful bright yellow, large size, prolific and hardy; tree upright, strong grower. Thrives on any soil. Price \$1.00 each.

✓ **Moorpark**—Large orange, brownish red to the sun; flesh firm, bright orange; parts freely from the stone; juicy, with a rich and luscious flavor. Price 75c each.

✓ **Royal**—A fine large French variety. It is quite high flavored and ripens a week or ten days earlier than the Moorpark; flesh pale orange, firm and juicy, with a rich flavor. Price 75c each.

APRICOTS

THE SEEDLING RUSSIAN APRICOT

A most delicious fruit of the plum species. Is of a distinct flavor and one of the best and most profitable market fruits. The tree bears very young and most profusely. Ripening, as it does between the cherry and peach, the apricot is the most welcome fruit. The tree is slender in form, has beautiful dark green foliage, pretty pink blossoms, and will give very satisfactory results as an ornamental tree in garden or house lot. You will find the Russian Apricot

Russian Apricot—Very Productive.

CHERRIES

✓ **Compass Cherry**—Absolutely hardy everywhere. The cherry was originated at Springfield, Minn. It is a cross between the Sand Cherry and the Minor Plum. Fruit nearly an inch in diameter, a bright red, sweet and juicy, and of very fine flavor. When young and green the fruits have more the appearance of undeveloped Plums, but as they mature they become more round like a cherry. In color the fruit is bright red, when fully ripe a dark wine shade. For canning and culinary purposes this fruit is unsurpassed. The tree is a regular and heavy bearer, and produces fruit the next year after setting out. It will do well from Texas to South Dakota. This will bear good crops of valuable fruit when all other fruit trees fail. Price \$1.00 each.

✓ **Rocky Mountain**—A Cherry of dwarfish habit, perfectly hardy anywhere in the Northwest and stands the coldest winters without protection. Fruit about as large as an Early Richmond, color dark brown to black. Somewhat astringent to eat from the hand, but cooks well and makes fine preserves and jellies. Very early and abundant bearer. This is very ornamental and deserves a place in every yard. Can be planted about as close as currants. Ripens in July after other Cherries are gone. Price 50c each.

GRAPES

NO MATTER how small the home, one can usually find space for from four to six grape vines, which will bear an abundance of luscious fruit which cannot be surpassed. They can be trained over the garden fence, over the veranda, not only furnishing fruit, but making a vine that is beautiful and at the same time furnishing shade. Probably the best way to grow grapes, however, is in rows, planting the vines from six to eight feet apart each way and training on trellis. Work the ground deep and well for grape vines, planting a little deeper than they stood in the nursery rows. Keep pruned severely for the first two or three years, allowing the vines to form four or five main stems, when later growth will suggest individual pruning. We again say plant the grape, for both home and market, for no fruit will come nearer pleasing all tastes and adapting itself to all soils.

Brighton—Bunch large, shouldered; berries medium large, dark red, tender; rich sweet, and of best quality. Vine vigorous and hardy. Price 30c each, 10 for \$2.50.

Campbell Early—Black with purple bloom; bunch and berries large. Juicy with rich sweet flavor; almost seedless; hardy and vigorous growth, and very productive. Its keeping and shipping qualities are equaled by no other early grape. Price 30c each, 10 for \$2.50.

Concord—The most popular grape in America. They grow in full clusters of large berries, with a thin skin; flesh tender, sweet and juicy. Vine a strong grower and very hardy. Price 25c each, 10 for \$2.00.

Cynthiana—Absorbs from the soil more iron than any other plant grown, and grape juice made from this grape is famous for family physician's and hospital use and medical purposes. Price 50c each, 10 for \$4.00, 100 for \$30.00.

Delaware—One of the finest table grapes. Bunches not large; compact and well shouldered. Berries rather small, juicy and sweet, without any hard pulp. Price 30c each, 10 for \$2.50, 100 for \$20.00.

Improved Delaware—Much larger and better grape than the Delaware. The vine is a hardy, vigorous grower. A very fine delicious table and market grape. Price 40c each, 10 for \$3.00, 100 for \$25.00.

Ives Seedling—Black. Bunch long, medium to large, compact; berries medium; skin thick and tough; flesh sweet. It is a good market variety and is highly esteemed for red wine. Vine hardy, very vigorous and healthy. A good shipper. Ripens medium late. Price 40c each, 10 for \$3.00, 100 for \$25.00.

Moore Early—An extra large grape of extraordinary fine sweet flavor. Excellent for home use and one of the hardiest for the far north, ripening about two weeks ahead of the Concord. Berries of large size; succeeds everywhere. A fine market grape. Price 35c each, 10 for \$3.00, 100 for \$25.00.

Niagara—This is one of the very best white grapes in existence. Berries large, light greenish yellow; very fine for table use; very prolific, hardy and of fine flavor. Fruit keeps well, if

Improved Delaware

properly handled. Price 35c each, 10 for \$3.00, 100 for \$25.00.

Scuppernon—This variety is purely Southern, and is of no value to the Northern or Western states. The vine is free from all diseases; fruit never decays. Plant twenty to thirty feet apart in rows. Train on an arbor or trellis and never trim. The product is very large and cultivation reduced to simple form. Price 50c each.

Worden—A splendid grape of the Concord type, larger, better quality and earlier. Vines vigorous, hardy and productive. A valuable market sort. Price 35c each, 10 for \$3.00, 100 for \$25.00.

Route 1.
Oronogo, Mo., Jan. 29, 1919.

Gentlemen:

I received my trees today all in fine shape and was well pleased with them as they were much nicer than I was expecting. I thank you very much for your prompt attention. Think maybe I will send in another order some time.

Truly yours,
JAMES SCOTT.

A SPECIAL OFFER IN GRAPES

With every order amounting to \$15.00 or more, we will send six of these fine Grape Vines, value \$3.00.

CAMPBELL'S EARLY, THE KING OF AMERICAN GRAPES

CAMPBELL'S EARLY GRAPES

This superb new grape is fulfilling all the promises made for it remarkably well. It forms large and handsome clusters thickly set with large round berries covered with a light purple bloom. They are firm fleshed enough to keep and ship admirable, but the tender pulp parts readily from the small seeds, a quality that is now greatly appreciated. The flavor is rich, sweet, delightful. The clusters ripen very early and hold their berries well, keeping in fine condition for a month or more. The vine is vigorous and bears abundantly. Price 50c each, 10 for \$4.50, 100 for \$35.00.

BLACKBERRIES PAY WELL

THERE is a great and increasing demand for blackberries. It is one of the fruits whose culture seems to have been neglected.

Most people have depended upon the supply of wild ones, but the cutting off and burning over of old blackberry slashes and turning these fields into the production of other crops has reduced the wild supply and people have to depend on the cultivated crop or go without them. Even if there were plenty of wild ones the cultivated berry, when well grown, is superior to the wild one and it is much more economical and satisfactory to grow a supply in your own garden than to roam over the fields in search of wild ones.

Prof. L. H. Bailey says there is no fruit capable of yielding greater profits. Mr. R. B. Rushing says profits depend almost entirely on the management the patch receives. There will usually be from 150 to as high as 250 cases of 24 quarts from an acre, and that it is usually consistent to figure on an average of \$100 to \$150 per acre after paying for picking, boxes and express.

For field culture plant three feet apart in rows six feet apart. For garden culture plant four feet apart in rows five feet part. Pinch back canes when they reach a height of three to four feet, which produces a bushy growth, and this doubles the fruiting capacity of each plant.

If planted between the rows of young trees in an orchard they will pay expenses in bringing the orchard to maturity. They will produce fruit two seasons after planting. They do best

on deep, well-drained soil, inclining to sand, but will do well on any soil that will grow a good crop of corn or potatoes.

✓ **Blowers Blackberry**—"The giant of all blackberries." A large, clean, bright berry of exceptionally good quality, with no perceptible core when fully developed. The fruit is exceedingly sweet, the flavor is pleasant, without being peculiar. This is a first-class shipper, standing up well in the market for several days. The season of ripening is from the middle of July until frost, with the bulk of the crop maturing in the month of August. It is a hardy variety. It has endured 20 degrees below zero. The bushes are upright growers, are very hardy and enormously productive. One single plant has the record of producing 2,600 berries. 10 for \$1.50, \$6.00 per 100, \$50.00 per 1,000.

✓ **Early Harvest**—One of the earliest blackberries in cultivation, a compact dwarf grower, fruit rather small and of good quality, heavy bearer. Its extreme earliness makes it a very profitable variety. Bloom stands the spring frosts best of all. 10 for 75c, \$5.00 per 100, \$40.00 per 1,000.

✓ **Mersereau**—This early, mammoth iron-clad blackberry originated in northwestern New York, where the mercury falls to from 15 to 25 degrees below zero, and the plants have never been injured. Berries are sparkling throughout and remain black under all conditions and circumstances. In quality it is exceptionally sweet, rich, melting and luscious, being without core. As a shipper and keeper it is unsurpassed. The canes are of exceedingly strong, upright habit. Foliage large, abundant and entirely free from rust or blight. Its yield is simply enormous. 10 for \$1.00, \$6.00 per 100.

✓ **McDonald**—One of the best berries grown since the first wild berries were cultivated. Combines the firmness and quality of the blackberry with the size, earliness and productiveness of the dewberry. The berries are large, oblong, and very good quality, with good flavor and juiciness. Enormously productive, outyielding any other known variety of blackberry. Ripens two weeks before Early Harvest, which is the earliest ripening of all blackberries. Can be sold for extra price before any other varieties are on the market. 10 for 75c, 100 for \$5.00, 1,000 for \$40.00.

✓ **Rathbun**—A strong, erect grower, with strong stem, branching freely; will root from tip of branches like a raspberry. Hardy, having endured 20 degrees below zero and produced a good crop. Forms a neat, compact bush, four to five feet high, producing its immense fruit abundantly. Fruit is sweet and luscious without hard core, of extra high flavor, jet black, small seeds, firm enough to ship and handle well. Very large size. 10 for \$1.00, 100 for \$6.00, 1,000 for \$50.00.

✓ **Robison Blackberry**—Originated in Texas. Large, delicious berries; very prolific, and a valuable berry for the Southwest. \$5.00 for 100, \$50.00 for 1,000.

✓ **Dallas Blackberry**—A Texas berry, large, black, firm, and a strong grower. Ripens in midseason. Price \$5.00 for 100, \$40.00 for 1,000.

Blowers Blackberries

HOW TO GROW THE M'DONALD BERRY

PLANT two rows of McDonald and one row of Dewberries or Blackberries to pollenize, for every two rows of McDonald planted. Set rows six or seven feet apart and plant every eighteen inches or two feet in the row. The McDonald berry will yield about 100 quart crates per acre where properly cared for and people have found them to be very profitable. They sold this year for \$5.00 per crate, making \$500.00 or more per acre.

After you get the McDonald started the third year mow them off and rake and burn. Do this every third year. Blackberries are a great deal cheaper grown than the Strawberry. They do not require the cultivation that the Strawberry does and any kind of ground is good enough for the Blackberry and they will sell in any market.

BLACKBERRY BY-PRODUCTS

Besides being eaten fresh, the blackberry is dried, canned, made into jam, jellies, and other preserves, and pressed to extract the juice. Dried blackberries are not used as much as formerly, because more convenient methods of preserving have been developed.

The introduction of the lacquered-tin can, which does not discolor the contents as does the ordinary tin when it comes in contact with this acid fruit, has assisted in the rapid expansion of the blackberry-canning industry. The berries may be preserved in a sugar solution or, as is more customary, preserved without sugar by heating. This latter process is very inexpensive and is more satisfactory for the trade, since berries put up in this way can be used for many purposes for which berries preserved with sugar would be unsuitable.—From Bulletin No. 643, U. S. Department Agriculture on "Blackberry Culture." Send for this Bulletin. It is free.

Pine Bluff, Ark., R. 1, Box 141.
Dec. 8, 1919.

Gentlemen:

I received my trees all O. K. and am well pleased with them. I will want another order next year and will remember you.

Yours very truly,

TOM SCALLION.

Columbus, New Mex., Feb. 29, 1920.

Gentlemen:

Our Strawberries arrived all O. K. and I was more than pleased with them. They have attracted all the neighbors around. Thanking you for your prompt attention, I remain,

Respectfully,

MRS. V. L. MASO.

Alto, Texas, March 3, 1920.

Dear Sirs:

The Loganberries arrived today and are all O. K. I am well pleased with the full order. The trees I got from you last spring are all looking fine.

Truly yours,

HARLEY K. DERKS.

Frosa, Texas, April 9, 1920.

Dear Sirs:

My Peach Trees I ordered from you in 1917 are all living and doing fine. They will bear this year. I am well pleased and if these do well I will send you a big order next year.

W. W. GRIFFIN.

McDonald—The most popular early berry for the South.

HOME-GROWN FRUIT IS DESIRABLE

Because it reaches the family fresh and in the best possible condition.

Because the family has fruit of which it would often be deprived if it had to be purchased.

Because if the proper varieties be selected, a continuous supply of fruit of superior quality may be secured, regardless of market prices.

Because any surplus may be sold without difficulty, or may be canned, evaporated, or otherwise conserved for use when fresh fruits is not available.

Because the care of the home fruit garden provides for spare time congenial and profitable occupation which is in reality recreation for those who enjoy seeing things grow.—From Bulletin U. S. Dept. Agriculture.

Easy to Order From This Catalogue

Send check or remit any way most convenient to you. If the amount of your order is less than \$5.00, add 15c to each \$1.00 sent, to pay postage or express. If your order is more than \$5.00, it will be sent prepaid by express or parcel post, whichever you prefer.

Seed orders for any amount are sent prepaid.

DEWBERRIES

A VARIETY of Blackberry that trails on the ground. In size and quality the fruit excels the Blackberry; very profuse bearer and reasonably hardy. Vines should be covered with straw or earth over winter in cold climates. The fruit of the Dewberry is highly prized as a market fruit, owing to its large size and quality.

Lucretia—One of the most widely planted of the Dewberries. It is a strong grower, and exceedingly productive. The fruit is large, luscious and handsome. Glossy, shining black, and ripens from the first to the middle of July, according to the locality. 10 for 75c, 100 for \$5.00, 1,000 for \$30.00.

Austin—Berries very much larger than those of any other Dewberry or Blackberry. It requires no trellis or stakes. The fruit is jet black and of very superior quality and flavor. For productiveness it outrivals all Dewberries. 10 for 75c, 100 for \$5.00, 1,000 for \$30.00.

GOOSEBERRIES

GOOSEBERRIES CAN BE EASILY GROWN

Gooseberries always in great demand by canneries and on markets—are sure croppers even when neglected. They can be shipped long distances and they keep well. Often are planted between the rows of trees in a young orchard. Bear second and third year.

Pearl—Heavy bearer; strong grower. Each 35c, 10 for \$3.00, 100 for \$25.00.

Downing—A popular variety with bushes that grow very stocky. Immensely productive of medium to large size, pale green fruits, about 50 per cent larger than Houghton. Each 35c, 10 for \$2.50, 100 for \$25.00.

Houghton—A pale red gooseberry of fine quality, medium sized and smooth. The bushes are very hardy, vigorous and produce a great amount of fruit. Especially fine for home use. Each 35c, 10 for \$2.50, 100 for \$25.00.

CURRANTS

Fay's Prolific—True to its name, it is very prolific, with fruit of very large size. Popular with most growers, and does particularly well on light soils. Each 35c, 10 for \$2.50, 100 for \$20.00.

Perfection—A new variety of great merit. One of the best on the market, being productive, extremely large, and easy to pick. The flavor is very fine. In size it even exceeds the Fay. One of the most popular varieties, having won medals and diplomas wherever placed on exhibition. Each 50c, 10 for \$4.00.

Red Dutch—An old, well known and popular red currant, with berries of medium size, dark red. A strong, tall, upright grower. Each 30c, 10 for \$2.50, 100 for \$20.00.

Lucretia—the best Dewberry for home and market.

Bonnerdale, Ark., April 7, 1920.

Dear Sirs:

I received the fruit trees O. K. Thank you for prompt delivery.

Yours truly,

A. L. McCOY.

Nesbitt, Miss., May 5, 1920.

Gentlemen:

I must say that I received the Strawberry Plants and feel grateful to you for your hospitality. Being perfectly satisfied with my second lot of plants, you will always have my patronage. Wishing you a good success, I remain,

MRS. EDDIE SMITH.

Taiton, Texas, Feb. 23, 1920.

Gentlemen:

Strawberry Plants came in good condition. They look fine. Thanks.

Yours truly,

JOE DRAPELA.

RASPBERRIES

COMING immediately after Strawberries, when there is a dearth of other fresh fruit, Raspberries are equally desirable for planting in the garden for home use and in the field for market. They are easily cultivated. Beds seldom require renewing. Their season of ripening is long. The fruit bears transportation well, and aside from its demand for immediate consumption, it brings highly remunerative prices for drying and canning.

Red Varieties

Brandywine—Large; bright red; very fine. Valuable for market on account of its fine shipping qualities. 10 for 75c, 100 for \$5.00.

Turner—A beautiful red berry of fine size and excellent quality. One of the hardiest and most productive varieties known. 10 for 75c, 100 for \$5.00.

Miller's Red—Vigorous and sturdy; very early; fruit large and profuse, beautiful and brilliant in color. 10 for 75c, 25 for \$1.50, 100 for \$5.00.

King—Large, crimson; firm; flavor very good; hardy. A new variety. An abundant and early bearer. 10 for 75c, 100 for \$5.00.

Louden—Ripens with the earliest and hangs to the last. In productiveness it is beyond any red raspberry known, and is a famous shipping berry. It is as hardy as the Turner and is of superior quality. 10 for 75c, 25 for \$1.50, 100 for \$5.00.

Cuthbert—(The Queen of the Market). Large, conical; deep rich crimson; firm, of excellent quality. A vigorous grower, entirely hardy and immensely productive. "I regard it as the best raspberry for general culture." — Charles Downing. 10 for 75c, 25 for \$1.50, 100 for \$5.00.

Immediate Returns

\$200 to \$500 From One Acre.

We do not claim that raspberries will make you a fortune without work, but we do claim that you can make good money growing raspberries. Beginning to bear the next year after planting they bring quick returns. Raspberries grown either alone or in combination with other farm products will pay you handsomely for your labor and prove a profitable investment. You will always find a strong local demand for choice raspberries of both red and black varieties. They will stand shipping fully as well as strawberries, and the city markets are never fully supplied with this delicious berry. Under favorable conditions the raspberry crop will bring a cash return of several hundred dollars per acre. We have reports of \$500.00 an acre. Of course this was extra good return and could not be expected unless conditions were very favorable. We can assure you, however, that you will find raspberries a profitable crop.

Raspberries ripen at a time when the appetite of the people is demanding fruit, and they will fill in the gap between strawberries and blackberries. Growing on upright bushes they are easily picked and require less labor for marketing than strawberries do.

Cuthbert—Plant this variety. 'Enjoy Raspberries and cream and a full purse.

BLACK RASPBERRIES

Cumberland—The largest raspberry known, fruit frequently seven-eighths to fifteen-sixteenths of an inch in diameter. Its immense size, firmness and great productiveness entitles it to first consideration; unusually strong grower, throwing up stout, stocky canes; perfectly hardy. Is by far the most profitable raspberry grown for both home and market use. 80c per dozen, \$5.00 per 100.

Gregg—This is a large, late, blue-black berry. Produces heavy growing canes that branch out sparingly; hardy; produces firm, black berries. Late ripening and good quality make it a favorite. 20 for \$1.00, \$4.00 per 100.

Kansas—A seedling originated at Lawrence, Kansas. Berries very large, jet black and of the very best quality. It stands the trying climate of Iowa. 20 for \$1.00, \$4.00 per 100.

STRAWBERRIES

A field of our thrifty Strawberry plants.

Everbearing Strawberries—The idea of having fresh, well flavored strawberries from June to November would have been ridiculed a few years ago. But the Everbearing Strawberry is here in actual fact. It has been tested, tried and proven. It has made good in both commercial and home garden plantings in widely varying parts of the country. The first crop is borne early in the season at the same time as the standard or June bearing varieties, then there is a continuation of blooming, producing ripe fruit throughout the summer, if conditions are favorable. Following this is another blooming period in the late summer and a large crop follows until severe frosts come. We recommend that you plant a few of one or both of the tested varieties described below.

Progressive (S)—Said to be the best of the fall bearing varieties; immense plant maker. Fruit medium size, high colored, red to the core; if picked before too ripe will ship well. \$1.00 for 25, \$3.00 per 100, \$25.00 per 1,000.

Superb (Perfect Flower)—One of the very best. Plants are strong and stand the winter well after producing a heavy crop of fruit from about August 15th to November, according to season. The fruit of Superb is very large, round, rich, dark colored, glossy, attractive and smooth. Each berry is of good shape and ripens all over at once. \$1.00 for 25, \$4.00 per 100, \$30.00 per 1,000.

Spring Bearing Varieties

Klondyke—The hardiest and most popular strawberry known; very productive; a great market variety. \$2.00 per 100, \$15.00 per 1,000.

Lady Thompson—A well-known variety that is quite popular, running medium to large size. A splendid market berry because it is a good shipper and keeps well in storage. \$2.50 per 100, \$15.00 per 1,000.

Senator Dunlap—One of the best for preserving and canning, making a rich red syrup and the berry retains its bright red color. The plant is one of the hardiest and most vigorous. \$2.00 per 100, \$15.00 per 1,000.

Mitchell's Early—An excellent flavored berry that is very productive and one of the best for home planting. \$2.00 per 100, \$15.00 per 1,000.

Aroma—The most profitable and dependable strawberries grown. The flavor is deliciously aromatic and the flesh is firm and velvety, of a smooth solid texture. \$2.00 per 100, \$15.00 per 1,000.

Gandy—An excellent berry with a brisk tartness that is very pleasant. The flesh is very firm so that the berry stands shipping well. \$3.00 per 100, \$25.00 per 1,000.

Gattman, Miss., Feb. 13, 1920.

Sirs:

The Strawberry Plants received in good condition. We are well pleased with them.

Yours truly,

H. G. WEST.

Klondyke Strawberry

GARDEN ROOTS

ASPARAGUS

To plant, see that the ground is well drained. Work it up fine and deep, make it very rich with well-rotted manure. Locate the plants eight inches apart in rows three feet apart, spread out the roots in a trench made deep enough to permit the crowns to be covered with three or four inches of mellow earth. Give the bed a dressing of manure and, except near the seashore, three pounds of salt early every spring. Do not cut for use until the plants have grown two seasons.

Mammoth White Asparagus.

Our Low Price on Asparagus—10 for 50c, \$2.50 for 100, \$20.00 for 1,000.

Palmetto—A very early variety, even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

Conover's Colossal—Very large, makes rapid growth; planted mostly by market gardeners; very productive.

Columbian Mammoth White—A distinct variety of mammoth size, great yield, and superior quality; remarkable for the clear whiteness of its stalks, which retain their purity and color until several inches above the surface.

Glant Argentuall—Palmetto, Barr's Mammoth and Conover's Colossal. The standard market.

HOLT'S MAMMOTH SAGE

Plants of strong growth. Leaves large, borne well above the ground. Of strong flavor and superior quality. Price of Sage Plants 25c each.

SPECIAL OFFER ON GARDEN ROOTS

Only \$2.00, mail, postpaid. A complete garden of health-giving roots sure to please you.

- 50 Columbian White Asparagus
- 12 Horseradish Moneymaker
- 12 Rhubarb Roots

Think of such an offer for only \$2.00—fully worth double that amount.

HORSERADISH

We have a little booklet on growing and marketing Horseradish, telling all about the cultivation, the packing and selling this remarkable herb. Some of our customers are making \$900 per acre in this work. The book is a little gem and will be sent you by mail postpaid for 10 cents.

RHUBARB

People are just beginning to realize the great profit in the culture of rhubarb in the open field; also as a forcing crop for winter. It yields enormous profits. Anyone can succeed, as the culture is very simple.

Mammoth Rhubarb or Pie Plant.

Queen—Strong, vigorous grower, producing extra large stocks of finest quality, of a decided pink color. For canning or cooking in any way its quality is unsurpassed. Each 25c, 10 for \$1.50.

Mammoth Linneaus—Large, early, tender and fine. The very best of all. Each 15c, 10 for \$1.25, 100 for \$10.00.

MONEYMAKER HORSERADISH

A new variety which is proving to be a veritable gold mine to market gardeners; a rapid grower of very large roots. It is much earlier than the old variety of Horseradish, and produces a much larger crop. Growers are able to get their crops into the market while prices are high, making it the most profitable of all root crops of this class. Easy to grow, matures quickly and produces abundantly. Should be in every commercial and home garden. Price 10c each, \$1.00 per dozen, \$8.00 for 100.

Maple, Mo., April 6, 1920.
2819 Burgess Ave.

Dear Sirs:

I received the Strawberry Plants in fine condition and must say that they look like very good plants, and if they bear as I expect them too, you may look for another order from me next year. Thanking you for your kindness, I remain,

Yours truly,
JEROME BITTNER.

MISCELLANEOUS FRUITS

The Giant Himalaya Berry

This new fruit comes from Central Asia, an entirely new berry. It grows a cane twenty to thirty feet in length if left untrimmed. It is usually trained to a wire or over a trellis as a grape vine. The berries are almost coreless and very rich; they need very little sugar in cooking. They have a favor all their own, and are surpassingly good for pies, jellies and jams. Perfectly hardy; makes enormous yield. Introducer claims that from two vines he picked \$31.00 worth of fruit one year, and \$54.00 worth the next. It is well worth giving a trial. Our plants are genuine. Price 20 cents each, \$1.50 per dozen, \$10.00 per 100.

Strawberry-Raspberry

Valuable for the extreme North, as the fruit is borne on the young growth, and is of course hardy in any climate. This is an entirely new fruit, both in habit of growth and form of fruit. Bushes grow one to three feet high and are covered with Raspberries in the shape of Strawberries. Price 10 cents each, \$1.00 per dozen.

Barry Peach

A large white Peach with red blush, similar to the Chinese Cling. We think a better bearer, and equal to if not better in flavor. A very desirable Peach for home planting. This Peach is from a chance seedling that came up on the grounds of W. T. Barry in the city of Fayetteville, Ark. Price \$1.00 each.

Japanese Wineberry

This interesting plant belongs to the Raspberry family. The fruit is borne in large clusters and each berry is at first tightly enveloped by the large calyx, forming a sort of burr. For jelly making, canning and preserving it is without an equal. Price 15 cents each, \$1.50 per dozen, by mail, postpaid.

Ozark Huckleberry

This delicious little berry is a native of the Ozark Mountain range, remarkable for its fine flavor, is a choice fruit for jam, pies and fruit cake. Grows luxuriant, very hardy; a prolific bearer and when given a small amount of attention produces regular annual crops. Will grow on almost any kind of soil, and when once set, is there permanently, never having to be renewed. Each 15c, \$1.50 per dozen.

New Dewberry Premo

Much like Lucretia, but very distinct, and exceedingly early, being seven to ten days ahead and all cleaned off when Lucretia is beginning. Quality and size uniform. Was found in a Lucretia patch. Price 10 cents each, \$1.00 per dozen, \$5.00 per 100, \$40.00 per 1000.

Tull Apple

The Tull Apple is one of the best varieties for planting in the south. It was originated in southern Arkansas. Is a red Apple that ripens in the middle of the summer. A very prolific bearer and fine flavor. This Apple has been planted for several years and has proved to be a very profitable and valuable variety. Price of 1 year Trees, 50c each.

valuable variety.

Crystal White Blackberry

Berries of fine, translucent white, of good size, sweet and pleasant. Canes prolific, but not entirely hardy. Should be planted near other sorts to fruit well. Price 10 cents each, \$1.00 per dozen.

Improved Dwarf Juneberry

A good substitute for the large or Swamp Huckleberry. The fruit is borne in clusters, and is reddish-purple in color and changing to a bluish-black. In flavor it is a mild rich subacid, excellent as a dessert fruit or canned. Price 25 cents each, \$2.50 per dozen.

Paw-Paw or "Arkansas Banana"

A small tree with purple or whitish flowers and handsome foliage. The large fruit is edible and improves by cultivation. Hardy as far north as the middle of Nebraska. Worthy of more extensive planting. Very desirable as an ornamental tree. Price of first-class trees \$1.00 each.

FRUIT AND SHADE TREES

Japanese Persimmon.

Persimmon—(American)

Becoming more popular and better known.

The Persimmon makes a very handsome ornamental tree, and is hardy in this section. The fruit, although pungent when green, becomes sweet and palatable if allowed to remain on the tree exposed to the early frosts. Each \$1.00.

Japan Persimmons

This royal fruit from Japan is deservedly popular. Most beautiful in foliage and fruit, and the most delicious of all fruit. It gains in the estimation of people everywhere when they learn its value. We offer best obtainable varieties, grafter on native stock. Each \$1.50.

Russian Mulberry

This tree has been planted very extensively in the western states for the past fifteen years, and we know of no other tree that will stand as much drouth and neglect and yet make a good growth each year. It makes a very good shade tree, holding its leaves late into the fall; and for a hedge, without thorns, it has no superior. Trees commence to bear at two years old; fruit resembles the blackberry, and will ripen from July to 1st of September. Each 50c, 10 for \$4.00, 100 for \$25.00.

Ever-Bearing Mulberry Trees

These trees are exceedingly rapid growers, and come into heavy bearing in three or four

years. Then for months they continue to ripen large quantities of fine, large fruit good to eat and of the highest value for poultry and hogs, which can be penned around trees and kept fat and healthy. No raisers of chickens or poultry of any kind can afford to be without them if they cost \$5 a tree.

Downing Everbearing—This popular variety is a good grower and bears heavily. Each \$1.00.

Hicks Everbearing—A fine grower and a heavy bearer. Ripens through June, July and August. Each \$1.00.

Abundance Everbearing—Very large, black, handsome; a sweet, rich and excellent variety. Each \$1.00.

Fig Bushes

This luscious and mildly laxative fruit, old almost as time itself—the fruit that refreshed and nourished the men who made history in Bible days, is about the easiest of all to grow. After the first year or two it needs no further attention unless you are far enough north for the branches to be winter killed. With a few cedar or pine bushes stacked around it as cold weather sets in it can be fruited much farther north than is usually believed. In the southern and central parts of the country (except in the mountainous portions of the central parts where it will need protection) it thrives without attention, growing into ten-foot trees and producing amazingly its delicious and wholesome fruit—ten bushels to the tree has been known.

✓ **Brown Turkey**—This popular variety thrives and bears heavily. It requires little attention. It has been known to produce ten bushels to the tree. Each \$1.00.

Figs furnish food and medicine.

NUT TREES

ON THE market, nuts are always in demand and command good prices. There is hardly another branch of tree cultivation from which there is assured such substantial profits. Not only are you each year reaping a large harvest of nuts, but at the same time the trees themselves are growing into many dollars in the form of valuable timber.

Butternut—A fine native tree, producing a large, longish nut, highly prized for its sweet, oily, nutritious kernel. Each \$1.00.

Chestnut, American—The fruit of this well-known native tree need hardly be described. We believe it is considered by all to be the best of all nuts, whether native or foreign. The tree itself is unsurpassed in an ornamental way. Timber very durable, possessing a very fine, straight grain. Each \$1.00.

Filbert—Tree of easy culture, succeeding well in almost any soil. Bears early and abundantly. Nuts almost round, rich and of excellent flavor. Each 50c.

Japan Walnut—Perfectly hardy; a rapid grower, bearing young and abundantly. Highly prized as an ornamental tree. Nuts resemble butternuts. Each \$1.00.

PECANS

Stuart—Pecan trees grow in almost any climate and on almost any kind of soil. The Stuart is a popular variety. It is hardy. Withstands freezing weather. Produces a nut high in quality and of excellent flavor. Each \$1.50.

Wilmot, Ark., Feb. 28, 1920.

Dear Sirs:

All of the plants, trees, etc., received O. K. Thanks for the premium plants. When in need of anything in your line I will remember you.

Yours truly,
H. H. HARRINGTON.

American Chestnut—Do not fail to include some of these in your order.

ENGLISH WALNUT

English Walnut—These seedlings have been thoroughly tested. A soil that will grow apples is pretty sure to grow English Walnut. These nuts sell at 40 to 60 cents per pound. Two or three-foot trees usually give the best results. Each \$1.50.

EASY TO ORDER

All orders for Nursery Stock to the amount of \$5.00 or more are sent charges prepaid. If your order is less than \$5.00 and you wish it sent by parcel post or prepaid express add 15c to each dollar to prepay charges.

Krebs, Okla., March 7, 1920.
Convent of Mercy.

Dear Sirs:

We received the trees. Please accept our sincere thanks for same. We more than appreciate your kindness.

Sincerely,
SISTERS OF MERCY.

Grapeland, Tex., March 27, 1920.

Dear Sirs:

I received the Peach Trees and Berry Plants in a few days after I sent the order and they are surely fine. Better than I looked for.

Very truly,
SAM CASKEY.

ORNAMENTAL TREES

ORNAMENTAL Trees are ever popular because of their rare beauty and utility. They add value to the property and serve as windbreaks to fruit growers and farmers. We carry fast growing kinds at reasonable prices.

Elm—A large tree with spreading branches. Leaves deep rich green. Extensively planted. Each \$1.00.

Maple (sugar)—A good sized variety with wide, spreading branches and beautiful and abundant foliage. A rapid grower. A popular variety. Each \$1.00.

Poplar (Norway)—A rapid growing tree of great hardiness. Used for windbreaks, street trees and ornamental planting. Hardy and widely planted. Each 50c.

Flowering Shrubs

The price of all flowering shrubs is 75c each.

Althea or Rose of Sharon (Hibiscus Syriacus)—Large assortment, many shades of color and type of form and habit, both single and double.

Calycanthus (C. Floridus)—Sweet scented purplish flowers in spring.

Deutzia Gracilis—Dwarfish, flowers pure white, bell shape. Blooms early in April.

Elder, Golden (Sambucus Aurea)—The yellowish green tints of foliage, the white flowers, and the fruits are very pleasing.

Hydrangea Paniculata Grandiflora—Immense panicles of pure white flowers in July, lasting for several weeks.

Hydrangea Arborescens, or Hill of Snow—Immense panicles of pure white flowers; blooms continuously from June to August. Should be planted in partial shade.

Elm.

Lilac (Syringa)—Well known and popular. Purple flowers, exquisite fragrance.

Lilac, White (S. Persia Alba)—This is a variety of Persian. White flowers.

Prunus Pissardi—Small Plum tree. Fruit and new growth very distinct purple.

Snowball (Viburnum Opulis Sterlis)—Produces large globular clusters of white flowers in April; an old favorite.

Snowberry, Red (Symphoricarpus Racemosus Rubrus)—Graceful native shrub with slender drooping branches; white flowers in spring followed by profusion of red berries in fall. Very hardy and drouth-enduring.

Snowberry, White (Symphoricarpus Racemosus)—Similar to red, but berries white.

Spirea Anthony Waterer—A new dwarf Spirea, variegated foliage. Flowers dark crimson; from May until frost.

Spirea Van Houttel—A strong shrub, covered with clusters of white flowers.

White Fringe—A popular and much admired shrub of moderate growth and rounded form with large dark green glossy leaves and drooping panicles of beautiful white fringe-like flowers.

Weigela Rosea (Diervilla)—Long spikes of pink flowers; very hardy.

Althea or Rose of Sharon

ROSES

IT WOULD be impossible to exaggerate the beauty of the rose. The very name suggests beauty and fragrance. It is the flower we love the best and deserves all the affection and care we bestow upon it. To have roses all summer is now a possibility, even with but a small garden. Our list comprises reliable, hardy varieties, producing a large range of colors, which will bloom from spring till November. It is a question of careful selection and we will gladly assist you.

Price of field-grown Roses, \$1.00 each, \$9.00 per dozen.

American Beauty—Large, globular, pink, shaded with carmine; delicious odor.

Anna de Diesbach—This rose was introduced in 1858 and is well known. It is a beautiful shade of carmine-pink; flowers are large, full and very fragrant. On account of its hardiness it's a fine garden sort.

Caroline Testout (The Oregon Rose)—A large rose, especially adapted for table decoration. Deep pink in color, beautiful buds.

Frau Karl Druschki—Pure white; large long buds, perfectly able. It is the best white Hybrid Perpetual known and one of the best novelties of recent years. Will grow wherever other roses can be grown.

Grus an Teplitz—Beautiful crimson red, wonderfully free flowering. One of the finest for outside show.

General Jacqueminot—Bright crimson; large but not full, although very effective; hardy and fragrant. Famous the world over.

Kaiserin Augusta Victoria—Pure white, shading to lemon. Flowers large, fine formed, borne singly on strong, upright stems; continues beautiful even when fully expanded. The fragrance is distinct from other varieties, being a combination of tea and magnolia. Free flowering and vigorous, with glossy foliage.

Killarney—Noted for its freedom of bloom and the large size of its intensely fragrant flowers. Buds are large, long, and pointed. Color flesh, shaded white suffused pale pink.

La France—Probably the best known rose in cultivation. Both flowers and buds are of beautiful form and large size; very sweet; color delicate silvery rose, changing to silvery pink. Starts to bloom when very small and continues until stopped by frost.

Mme. Francisca Kruger—Deep shade of copper-yellow flowers which bloom continuously. Excellent for bedding and massing.

Mrs. John Lang—Very free flowering, commencing to bloom early in the season, and continuing until autumn. Color a soft delicate pink, with a satin tinge, very fragrant.

Margaret Dickson—Magnificent form, white with large pale flesh center. Petals very large, well shaped and of great substance. Foliage very large, dark green. Fragrant. A fine variety.

Madame Plantier—Pure white, above medium size, produced in great abundance early in the season. One of the best hardy white roses, sometimes called the cemetery rose.

Mme. Gabriel Lulzet—Very distinct pink, large, cup-shaped; fragrant. It has no rival as an exhibition rose.

Marshall P. Wilder—Cherry carmine, large size. Good form, very fragrant, perpetual bloomer, vigorous grower; very valuable.

Paul Neyron—Deep red rose; splendid foliage and habit, with larger flowers than any other variety. Free bloomer.

Salet (Moss)—Bright rosy red; a vigorous grower; abundant bloomer, seldom surpassed; pretty in bud.

Ulrich Brunner—Bright cherry-red; very attractive; flowers of fine form carried well upon the plant; petals of great substance; plant hardy, vigorous, and resists mildew.

Climbing Roses

Price of Climbing Roses 75c each, \$8.00 dozen.

Crimson Rambler—This is undoubtedly the most popular of all roses. It is hardy, wonderfully free flowering, rich glowing crimson, intensely bright and vivid in color. The plant is a strong rampant grower, making shoots 10 to 12 feet long after the first year. The flowers are produced in great trusses, pyramidal in shape, often 25 to 30 in a cluster, fairly covering the plant from the ground to the top with a mass of bright glowing crimson. This is the most wonderful rose introduced in the past thirty years.

Dorothy Perkins—An extremely vigorous and hardy rose of the rambler type; a good companion for Crimson Rambler. It is shell pink in color, very free flowering and entirely reliable. The plants are even harder than Crimson Rambler.

White Dorothy Perkins—Same as the pink Dorothy, except in color, which is white.

Yellow Rambler (Goldfinch)—Light canary shade; clusters smaller, individual flowers larger than Crimson.

Climbing American Beauty—The latest triumph in American rose growing—the true climbing American Beauty in all its promise and glory. The same as American Beauty practically. Larger flowers, each produced on separate stems, vivid rosy-crimson in color, with delicious fragrance.

Cherokee, Kansas, April 31, 1920.

Arkansas Nursery Co.,
Fayetteville, Ark.

Dear Sir:

I have received my strawberry plants all O. K. They were alright and fresh.

Yours truly,

R. 1, Box 35.

A. TONNELIER.

ORNAMENTAL VINES

Trumpet Vine

Everyone likes vines on a house. They are practical, beautiful and home-like. They give shade to a window, protection to a porch and beauty to a pillar. Some of the varieties will climb and stick tight to a brick wall.

I wish I could show you pictures of their beautiful colors. They are just ravishing. You get the golden yellow in the Honeysuckle; the orange-scarlet in the trumpet vine; the royal purple and violet in the Jackmanni Clematis; and the snowy white of the Paniculata Clematis. A blooming vine at your front door is a constant benediction.

Boston Ivy—Leaves are small and ivy-like in form. They overlap and form a dense sheet of green. A splendid clinging vine. Needs winter protection. Each 40c.

Cinnamon Vine—Grow from a root like a sweet potato, which is hardy and lives in the ground for years. A rapid grower when well established. Each 25c.

Clematis, Purple (Jackmanni)—The queen of all vines for size and richness of flowers, which are violet purple, 3 to 4 inches in diameter. Needs winter cover. Each \$1.00.

Clematis, White (Paniculata)—The best, hardy white clematis. Vigorous, sweet-scented pure white flowers. Blooms late in summer. Each 75c.

Most vines do best planted in the spring—the earlier the better. I do not advise fall planting for them. If planted in a row along a wall or fence they should usually be planted about 8 feet apart. On a building it is usually best to plant one or two at each window or pillar to be covered.

Trumpet Vine (Bignonia Radicans)—A robust, woody vine, climbing high and twining tightly with numerous roots along its stems. Great, leathery, trumpet-shaped flowers of orange scarlet, clustering all the tips of the branches, bending them gracefully with their weight. In bloom nearly all summer. Extremely valuable for covering old stumps or walls; wherever a showy flowering vine is desired, it will be found most useful and pretty. Can also be grown as a small tree or bush. Each 30c, 3 for 75c.

Honeysuckle (Hall's Evergreen)—Pure white flowers. Very fragrant. Dark green, glossy foliage. Keeps green till Christmas. A fine variety. Each 50c.

Kudzu—A remarkable climber. Grows 70 feet in rich soil in one season. Fine for arbors, old trees and porches. Each 50c.

Honeysuckle (Scarlet Trumpet)—A good hardy climber. Free bloomer. Flowers the shape of a trumpet. Fine for a trellis. Each 30c.

Honeysuckle (Yellow Trumpet)—Similar to above except that flowers are yellow. Very hardy and vigorous. Each 30c.

Matrimony Vine—An old-fashioned hardy shrub vine, grows anywhere, and covered with a profusion of scarlet berries. Good to cover walls or steep banks. Each 30c.

Madeira Vine—Grows from tubers like potatoes which should be taken up and kept in the cellar over winter. Very easily grown and will thrive in any location or soil. Will grow 12 to 15 feet high. Waxy dark green, heart-shaped leaves and racemes of fine white bloom, very fragrant. One of the best vines for planting thickly along the front edge of a porch for quick effect. Should be bought by the dozen. Each 30c.

Wistaria (Purple)—A rapid hardy-growing vine. Produces large drooping purple clusters of flowers in May or June. Each 50c.

Star City, Ark., Dec. 15, 1919.

Gentlemen:

I received the trees the other day. They were in fine condition.

B. D. MEAD.

Watts, Okla., March 4, 1920.

Dear Sirs:

We want to thank you for the fine Strawberry Plants you sent us.

MRS. N. A. THOMAS.

SPRING BULBS

DAHLIAS

THE splendid qualities and gorgeous beauty of the present-day Dahlia have won for it a place at the head of the most important garden plants. None are easier to grow, respond more readily to care and attention, or flower more freely. Few cultivated plants have a wider range of color. The brilliant shades and the free, fluffy, chrysanthemum-like form of its flowers make an enchanting spectacle which never fails to attract attention. Plant about May 1 in a moderately rich soil, covering the tubers three inches deep. Thin to one or two shoots, and when the plant is six inches high cut it off above the second joint so that it may grow into a strong, bushy plant. Give it plenty of sunshine and water, and cultivate well until it begins to bloom; after that stir only the surface soil, just enough to prevent a crust forming. Price 25c each, \$2.00 per dozen.

LILLIES

Lilium Auratum (Gold Banded Japan Lily)—The largest and most beautiful of all the Japanese lilies. The flower is ivory white, with a central band of bright yellow and numerous deep purple spots. Price 50c each.

DASHEENS

Belong to the same family as the Elephant Ear, and resemble them somewhat, but grow more upright; leaf is rounder and of a much darker green in color. They like plenty of water, but will thrive where it is too dry for the Elephant Ear, and many people prefer them to the caladium for this reason alone. It can be

Dahlia

grown on land too damp for ordinary crops. It is a much more rapid grower than the caladium. Try a few bulbs. Each 20c, 3 for 50c, postpaid.

The gladioli is the most satisfactory, the most desirable and the most popular of all garden bulbs. Nothing else of the kind costs so little, and nothing else grows and blooms so rapidly for anybody and everybody, in any soil or climate. It is, in short, the most satisfactory garden flower, thriving and blooming, as it does, with the least care and attention, and makes a display which for brilliancy and beauty of coloring few bulbs can equal and none surpass.

OUR SUPERB MIXED GLADIOLI

Our mixed gladioli are not the poor dull colors, old, discarded red sort and worthless seedlings usually sent out as mixtures. On the contrary they are made up from splendid named sorts, brightest and most varied colors, white, yellow, pink, rose, blush, intense scarlet, carmine, violet, striped, blotched, variegated, etc. Common and poor sorts have been discarded, and this mixture is the highest grade. Each 10c, 75c per dozen.

Tuberose—One of the most delightfully fragrant and beautiful of the summer-flowering bulbs. By skillful management a succession of flowers may be obtained all the year round. For early flowers they can be started in February or March in the greenhouse or hotbed; for a succession they can be planted at intervals as late as July. For flowering in the open border plant about the middle of May, or as soon as the ground becomes warm. Each 10c, \$1.00 per dozen.

Gladioli

CANNAS THE MOST POPULAR BEDDING PLANTS

TWO RECENT NOVELTIES

Extract from the Florist's Review, Sept. 28, 1919

"I HAVE been much impressed with some of the new Cannas that I have tried this summer, and cannot refrain from mentioning two. These are The President and Snow Queen. President is by all odds the best red Canna today, larger and better than Firebird and a free bloomer; the foliage is strong and does not burn, as does that of Firebird. Those who have tried Firebird and lamented that it would not do on account of diseased foliage will rejoice to know that at last we have a Canna that is 'right.' Snow Queen is whiter than any other Canna on the Market. It is also one of the largest individual flowers among Cannas of any color, is as free as the freest, and the trusses are of enormous size. It has a better habit of growth and better foliage than either Eureka or Flag of Truce, the best two whites heretofore. Only in the best reds do we find anything that approaches it in general value."—Floyd Bralliar.

The President

Height 4 feet. In color, a rich, glowing scarlet, and the immense, firm, rounded flowers, 7 inches across when open, are produced on strong, erect stalks well above the large, rich green foliage. "The President" is superior to any other red variety in the quantity and also quality of bloom, and the firm flowers resist drought and heat to a remarkable degree. A large bed of this variety was planted last year on the grounds of the Washington Monument, Washington, D. C. Another "President" Canna bed was on the Garden Pier at Atlantic City, while several more were to be seen in the largest public parks in this country where these beautiful flowers received the unqualified admiration of every Canna-lover. Naturally, a tremendous demand has been created. Get your order placed now for delivery at planting-time. Price 50c each, 5 for \$2.25, 25 for \$10, delivered.

Snow Queen

Height 4 feet. A striking contrast to "The President," and in circular beds Snow Queen makes a splendid border for the outside row with The President in the center. This is a vigorous-growing, white Canna, large in flower and free in bloom. You cannot obtain it elsewhere or find its equal. The flowers are 6 inches across, with rounded petals 2½ inches broad, of firm texture, and having the faintest dots of flesh-pink on the petals, but the effect is snow-white.

Mr. E. C. Vick, Garden Editor, in New York Sun of October 26, 1919, says. "Snow Queen" is by all odds the best white Canna I have ever seen." Price \$1 each, 5 for \$4.50, 25 for \$20, delivered.

Burbank—The color is a pure, strong canary-yellow, with some red spots in throat; a beautiful shade. The flower is often 4 to 5 inches across, and they are profuse bloomers. Green foliage. Height 3 feet 6 inches. 10c each, \$1.00 per dozen.

Special King Humbert—The grandest Canna ever offered. Large heart-shaped leaves of purple madder brown over bronze, the dark ribs sharply defined, crowned with immense heads of orchid-like flowers. Individual petals are of the largest size; velvety orange-scarlet, flecked carmine; rose tinted at margin and base. A combination of leaf and blossom incomparably beautiful. 4 to 4½ feet. 15c each, \$1.25 per dozen.

Wyoming—Seven feet. Purple foliage. One of the most majestic Cannas. Blossoms orange

Canna

colored, true orchid shape, with large rounded petals that flap and flutter in the breeze like glistening silken flags. 10c each, \$1.00 per dozen.

Special \$1.00 Offer

We will make a selection of varieties for you for a complete Canna bed and will choose varieties that will please you. Will send you 20 bulbs for \$1.00, enough for a large bed.

Border your bed with Dasheens and you will have something fancy. Dasheens listed elsewhere in catalogue.

Plant Cannas—Nothing Prettier Canna Beds

Many of our customers write us in regard to the number of Cannas that it requires to fill a bed of certain dimensions. In answer to this question, we offer the following suggestions: Plant Canna about 18 inches apart each way; the tall varieties for the center of bed, and the dwarf growers for the border. For a round bed, 7 feet in diameter, it will take 19 plants.

Cannas should not be planted out-of-doors until after all danger of frost is over. They may be planted as late as June, but the earlier planted, the better the results. The most practical way to care for the roots over winter is to take up the clumps after the first killing frost, leaving some earth adhere to the roots. Place them in a dry cellar where frost will not penetrate. Do not allow the roots to become too dry or the tubers will wither, but care should be taken that they are not too moist to allow mildewing. In spring the bulbs can be started in sand in the house, if kept moist, or can be planted in the open ground as soon as all danger of frost is over.

PERENNIAL PLANTS

Everblooming Butterfly Bush (*Buddleia Variabilis Magnifica*)—This is one of the most valuable and beautiful new plants introduced for years. It was recently discovered in Western China, and thrives in all parts of the United States. It is a hardy perennial, blooming practically all summer, and blooms the first summer from small plants, continuing even after frost. Its hardiness, ease of growth, beautiful color, and piquant fragrance makes it popular everywhere. It is fine as a specimen plant, as a hedge, or as a background, but should not be planted in sod or extreme shade. It gets its name from the fact that it is very attractive to butterflies, and they come from everywhere to feed on its nectar. One-year plants 50c, 2-year 75c.

HOLLYHOCKS—These are known and loved everywhere, and no old-fashioned garden is to the high wall of a house. They can supply a get them in front of your other flowers, as they grow so tall they would hide them. Five to 7 feet high 10c each, \$1.00 per dozen.

Japan Iris—The flowers are of enormous size, averaging eight to ten inches across, charming hues and colors, the prevailing colors being white, crimson, rose, lilac, lavender, violet and blue. The Japan Iris is perfectly hardy and flowers in great profusion in July and August. Each 15c, \$1.00 per dozen.

Perennial Phlox—Instead of the small, dull-hued flowers of olden times we now have immense trusses, all bright and showy, the individual flowers three times the size of the old varieties, and the colors ranging from the purest white to violet. With Perennial Phlox a

Phlox

show of brilliant flowers can be had from June until November. Perfectly hardy. Choice shades of red, white and pink. Each 25c, \$2.00 per dozen.

The Foxgloves are quite stately and highly ornamental plants when well grown, with flower stems at least three feet in height. They are fine for the mixed border, or planted singly in half-shady places near a walk or drive. The racemes of flowers are often two feet in length, containing scores of the prettily spotted thimble-shaped flowers. Perfectly hardy. Mixed varieties, 50c each.

PEONIES

Peonies, especially the modern introductions, are probably the most valuable, and most beloved of all perennial plants. Planted in sun or semi-shade, in single clumps or long beds, or bordering lawns, shrub rows, and carriage drives they give a grand display of large, fragrant blossoms of brilliant colors during June, followed by their exquisite foliage, which is very ornamental during summer months. They are also most effective for home and table decorations, and last longer in water than many other perennials. Avoid buying cheap peonies. They require just as much care as the better kinds, and are disappointing in the end. We grow only varieties that we have thoroughly tested at our trial grounds, and here offer the grandest peonies in commerce.

Planting—Peonies may be planted in spring as soon as the frost is out of the ground. Orders should be sent in at once, so that we can forward when weather permits. Avoid planting too deeply, as this is often the cause of shy blooming; 2 or 3 inches of soil over the crown (eyes), being sufficient. After planting give a hearty mulching of rotten stable manure, and do not transplant the clumps for at least five years, and then only if very necessary. Pink, red and white. Price 50c each.

Peonies

CALIFORNIA PRIVET

ONE OF THE MOST BEAUTIFUL OF HEDGES

Tear down unsightly fences and improve and enhance the value of your property by using Privet.

THIS is a very ornamental shrub, with thick, glossy, nearly evergreen leaves. It is perfectly hardy, and succeeds everywhere. As a low hedge around private lawns it is unequaled; and its handsome appearance, when so used, tends to greatly enhance the beauty and value of the property. Also, as a border for cemetery lots it is very desirable and beautiful.

The idea of planting hedges for use and ornament is a practical one, and rapidly becoming appreciated and popular.

Nothing is more beautiful than a well kept hedge to serve as a boundary line between neighbors, or as a division between lawn and garden, or as a screen to hide unsightly places. By using medium sized plants a hedge can be made as cheaply as a good board fence, and then, with a little care it is becoming every year more and more "a thing of beauty and a joy forever," while on the other hand the board fence is going to decay. We all know that such hedges constitute the principal attraction in our best kept places.

To secure a good hedge it is necessary to plant well. Dig a deep, wide trench and work the soil thoroughly about the roots; press the ground thoroughly and mulch heavily for a distance of two or more feet on either side, according to size of plants.

Price, 10c each, \$6.00 per 100 for 1-year plants; 2-year plants 15c each, \$8.00 per 100.

California Privet Hedge

Amoor River Privet—The Chinese variety, very hardy, has dark green leaves, which persist almost through the winter. Where a stiff, upright hedge is wanted nothing surpasses the Amoor. To add to its attractiveness in foliage it bears erect panicles of beautiful white flowers in June, followed by black berries. 30c each, \$25.00 per 100.

HERBS

Every kitchen garden should have a few herbs. They are easily grown and are always pleasant and desirable for flavoring and perfuming and medicinal purposes.

Golden Seal—Used in gardens for their showy leaves and beautiful red fruit. Roots used in medicine and is very profitable to grow. Per dozen \$1.00, 100 for \$5.00.

Ginseng—The growing of Ginseng is profitable. Ginseng beds can be located in orchards, gardens or woods. Per dozen \$1.50, 100 for \$10.00.

Senga (Seneca, Snake Root)—A medicinal

herb, which grows to height of one foot or more. Leaves one-half inch long. Flowers white or green.. Per dozen \$1.00, 100 for \$5.00.

Pink Root—A handsome hardy perennial herb with slender tufted leaves two or four inches long and red tubular flowers with yellow throats in terminal. Elegant plant for the hardy border. Shade is not necessary for its welfare if planted in good loose deep loam. Per dozen \$1.00, 100 for \$5.00.

Peppermint—Can be grown on any land that will produce corn. Per dozen \$1.00, 100 for \$5.00.

SEEDS

Again this year we come forward with our "Heart of the Ozarks" Vegetable Seeds. Thousands of gardeners and customers were pleased last year, and this year our stocks are much larger. Stocks are fine, and quality considered, prices are low. Remember our satisfaction or money back guarantee protects you.

Loading Mail Car with Parcel Post Shipment.

ASPARAGUS

Culture: As early in the spring as the soil will work up in good shape, sow seeds thinly in drills, one foot apart. When seedlings are 3 to 4 inches tall, thin them out to stand 2 or 3 inches apart in the row. Keep rows free from weeds by frequent cultivation. The following spring, prepare your permanent bed by applying plenty of well-rotted manure and some coarse salt which should be worked into the soil. Set your plants in shallow trenches, 6 inches apart in the row and do not cut the first year. Those who want Asparagus more quickly should set out two-year-old roots at prices given below.

Paimetto—A very early maturing and prolific variety, producing an abundance of early, large and deep green shoots of the best quality. Per pkt. 10c, 12 for \$1.00.

Barr's Mammoth—The stalks are very large, sometimes nearly an inch in diameter and retain their thickness completely up to the top and have close long heads. They are quick growing, tender and of excellent quality. Per pkt. 10c, 12 for \$1.00.

Columbian Mammoth White—This excellent variety furnishes shoots of exceptionally large size and of superior tenderness and flavor. The color is pure white until four to six inches above the surface. Per pkt. 10c, 12 for \$1.00.

Conover's Colossal—The largest and most extensively used green variety. Shoots, bright green, sometimes tinged with purple at the top. Tender and of the best quality. Pkt. 10c, 12 for \$1.00.

Mammoth White Asparagus.

Welch, Okla., Star Route, April 21, 1920.
Sirs:

My order of Raspberries and other berries arrived in fine condition and were all right. They are out and growing. Thanks.

Respectfully,
MRS. MARY A. BURKER.

BEANS

DWARF OR BUNCH BEANS

Price 5c per packet, 12 for 50c.

Early Valentine—Pods long, straight and nearly round, favorite with market gardeners.

Green Pod Stringless—Extra early, very prolific, quite stringless.

Dwarf Black Wax—Known in many localities as Butter Beans. A very superior snap-short, ripening first among the earliest, and having the best characteristics. Pods round, yellowish white, fine flavor.

Kentucky Wonder.

Ft. Smith, Ark., R. 1, Box 81.
Marionville, Mo., March 19, 1920.
Gentlemen:
The plants ordered from you came on time and in good shape. Thanks for the prompt way you do business.
Yours truly,
L. S. BEECHER.

Dwarf Golden Wax—The pods are long, large, brittle and entirely stringless, and of a beautiful rich golden wax color.

POLE OR RUNNING BEANS

Price 5c per packet, 12 for 50c.

Kentucky Wonder—Vine vigorous, climbing well and very productive, bearing its pods in large clusters; pods green, very long, often reaching nine or ten inches; near round when young and very crisp, becoming very irregular and spongy as the beans ripen.

White Cornfield—Extremely early, very productive. Pods are borne in clusters from four to six, broad, thick, solidly fleshy and stringless.

POLE LIMA BEANS

Early Large White Lima—Productive, large, flat pods, rich and of finest flavor. The dry beans are white.

BEETS

Price 5c per packet, 12 for 50c.

Egyptian Early Dark Red—A very early, dark blood red, medium size, tender and sweet; fine for kitchen garden.

Early Blood Turnip—Here we have the old standby, the turnip beet, with its dark red color, well known to so many homesteads.

Long Smooth Blood Red—When fully developed roots average 10 inches long by 3½ inches in diameter at the top. They are almost parsnip-shaped, have firm, sweet, very dark flesh and make ideal pickles.

Egyptian Dark Red Beet.

CARROTS

Danvers' Half Long Carrot

Price 5c per packet, 12 for 50c.

Danvers' Half Long—A rich orange red variety, very smooth and handsome. An excellent market variety. The most desirable main crop variety. Good keeper.

LETTUCE

Price 5c per packet, 12 for 50c.

Early Curled Simpson—Early; forms a compact mass of tender leaves of a yellowish green color.

Black Seeded Simpson—A superior variety; large, light colored heads.

Prize Head—Plant large, deep green, so washed with red as often to appear more red than green, forming a head of a dense mass of leaves rather than one like a cabbage.

Big Boston—One of the most popular of the old standard varieties; desirable for forcing. Especially valuable for early outdoor planting or for late fall planting as it will endure cold weather conditions better than any other variety. Large compact heads of light green leaves, tender and crisp.

CABBAGE

Price 5c per packet, 12 for 50c.

Late Flat Dutch

Early Jersey Wakefield—Market gardeners can find nothing better for an early cabbage. Heads somewhat pointed, extremely solid, superior quality.

Early Dwarf Flat Dutch—Has succeeded admirably on account of its ability to resist heat. It never flaws under the severest sun, and it produces very fine heads after the earliest sorts have disappeared. We recommend it highly.

Late Flat Dutch—Grows to large size; flat, solid heads; a sure header, good keeper and shipper.

CUCUMBERS

Price 5c per packet, 12 for 50c.

Early White Spine—Valuable for the home garden as well as for early market. Under favorable conditions the fruits reach a length of 7 inches. They are borne early and in good numbers. Of uniform shape, almost cylindrical and fairly well covered with small white spines.

Long Green—Very productive; fruits quite long, averaging 10 to 12 inches in length. Very popular both as a slicer and for pickles. One of the best general purpose cucumbers.

Short Green Pickling—This variety is known as Early Fame, and is an excellent sort, both for table use and for pickling. Comes into condition for use a little later than Early Cluster.

Big Boston Lettuce.

CANTALOUPE

Price 5c per packet, 12 for 50c.

Rocky Ford—Very popular; flesh light green color, sweet and delicate flavor.

Ponca City, Okla., Feb. 27, 1920.

Gentlemen:

Received the Strawberries in excellent shape. Am more than pleased with them. Thanking you, I remain,

Yours respectfully,

MRS. L. EMERY.

WATERMELONS

Price 5c per packet, 12 for 50c.

Tom Watson—In the last few yaers this melon has become immensely popular. The average size fruit of this variety reaches the size of 24 to 28 inches long and 12 to 14 inches in diameter. It has a dark mottled green rind, thin, but tough enough to stand shipping long distances. For the home or for the market garden or for

shipping it is a money-maker for the growers. The seed we offer is of the very best strain.

MUSTARD

Price 5c per packet, 12 for 50c.

Southern Giant Curled—Highly esteemed for salads, particularly in the South. The leaves are twice the size of the ordinary white mustard; flavor sweet and pungent.

EGG PLANT

The seed should be planted in a hot bed or box in the house, care being taken that the plants have an even, continuous heat. They do not respond to a setback very readily. Transplant only vigorous plants when the weather is warm.

New York Improved Spineless—Our selected strain of this popular sort has no superior among its kind. It is the most beautiful, as well as edible of the many varieties of egg plant. A well grown specimen never fails to take the premium at the fair. It is absolutely spineless. Pkt. 5c, 12 for 50c.

New York Improved Egg Plant.

RHUBARB OR PIE PLANT

RHUBARB is vigorous and productive. The leaf stalks are very numerous, the longer ones being from 15 to 20 inches in length, and fully one and a half inches wide. The whole plant is nearly 5½ feet in diameter, while the leaves, exclusive of the flower stalks, are about 2½ feet in height. Rhubarb is very highly esteemed for use in pies, tarts, jelly and marmalade, and large quantities are sold in all markets every year. It is the first vegetable of the season, and no garden should be without it.

Culture—Sow the seed in cold frame in the spring and as soon as the plants are large enough transplant into rows five feet apart each way, and each spring work into the soil a

liberal supply of decomposed stable manure. One ounce of seed will sow 75 feet of row. Price 5c per packet, 12 for 50c.

Rhubarb Roots—Rhubarb roots are set out and cultivated as the above, and this method gives edible rhubarb in a very short time.

TOMATOES

Price 5c per packet, 12 for 50c.

Globe—One of the newer sort of unquestionable merit. In season of maturity it closely rivals June Pink, perfecting its first fruits within a week after that recognized standard for earliness. But the fruits are very much handsomer, being nearly round, with a skin free of blemish, filled with solid meat. Globe is unusually prolific. Fruits are borne in clusters of 4 to 6 and frequently 5 clusters are carried by well developed plants. Of finest table quality.

Ponderosa—The fruit ripens early and bears well until very late; very solid, almost seedless; of good sub-acid flavor and of immense size,

The Stone Tomato.

frequently weighing considerably more than 2 pounds. Somewhat scattered on the vine, and a small percentage are rather rough. Our strain, however, is now producing a much smoother fruit than when first introduced. Good tomato for home use; splendid slicer.

Gravett, Ark., March 1, 1920.

Dear Sirs:

Received the Apple Trees and Strawberry Plants in good condition. Thanking you for prompt service, I remain,

Yours respectfully,
JOSEPH WELLS, R. 4.

Stone—The standard bright red main crop sort throughout the country. Solid as a rock, heavy as a stone; as sweet as any tomato can be; these are a few of the points that put Stone in a class of its own. A great favorite with canners on account of its solidity and the great crops which it yields. Always smooth and of good size. See illustration.

GARDEN PEAS

Price 5c per packet, 12 for 50c.

First of All—This is a reliable early cropper of the hardy smooth seed and variety. Not quite as early as Alaska, but great improvement over its parent, old Philadelphia. Extra Early.

Alaska—A variety of remarkable earliness and hardiness. It is a good yielder and produces pods of good size and dark green color, which are well filled with round smooth peas of splendid flavor.

Telephone—A vigorous grower; extra large, well filled pods.

Pangburn, Ark., March 1, 1920.

Gentlemen:

The 100 Cumberland Raspberry Plants arrived in fine shape.

Yours truly,

N. SCHMITT.

PARSNIPS

Price 5c per packet, 12 for 50c.

Hollow Crown—The best for table use; a vegetable of merit easily raised and of great productiveness.

PEPPER

Price 5c per packet, 12 for 50c.

Sweet Bell or Bullnose—A very large pepper or square shape, mild, thick and hard. Suitable for stuffing and for mixing pickles. It is less pungent than other sorts, and notwithstanding its size, it is one of the earliest.

Marshfield, Mo., March 6, 1920.

Dear Sirs:

I received the Pieplant all O. K. Thanking you very much, I remain,

As ever,
MRS. OLIVER DITTRICK.

ONIONS

Price 5c per packet, 12 for 50c.

Large Red Wethersfield—The old standard sort; best for main crop. Large deep red, thick, nearly round, fine grained, pleasant flavored and productive. Ripens in September and keeps well.

Large Red Globe—Medium early; grows to a large size; skin deep red, flesh fine grained, mild and tender. A good yielder.

Improved Yellow Giant—Succeeds everywhere, whether grown for home use or marketing it gives universal satisfaction, yielding onions often 14 inches around. Easily grown.

White Silver Skin—Matures early; rather flat in shape, mild flavor; excellent for winter; very much esteemed for pickling when small.

White Silver Skin Onion.

Long White Lady Finger Radish

PUMPKIN

Price 5c per packet, 12 for 50c.

Kentucky Field—Large round, flattened; hardy and productive. One to two feet in diameter. It has thick flesh of extra fine quality and is a splendid sort for canning, family and market use, and is used largely for stock feeding.

Large Cheese—Best for canning; has heavy, thick, sweet meat; large round flattened variety, with creamy-buff skin. An excellent keeper and very productive; good quality.

RADISHES

Price 5c per packet, 12 for 50c.

Long White Lady Finger—Beautiful in shape; skin and flesh are pure white, very crisp and tender; a most rapid grower and long standing.

Early Scarlet Turnip—A small, round, red, turnip-shaped radish with a small top and of quick growth. An early variety of rich color, crisp and tender.

Long Scarlet—It grows 6 to 7 inches long, half out of the ground. It is very brittle and crisp, and quick growth; color bright scarlet.

Early White Turnip—Very handsome; of quick growth; sweet, juicy and tender; skin ivory white, flesh pure white.

Ocean Springs, Miss., Nov. 30, 1919.

Gentlemen:

The trees I got from you last spring are dandies. One of the Peach Trees ripened two peaches last summer.

Very respectfully,

MORTIMER MONEY.

FLOWER SEED

Price of all flower seeds, per packet, postpaid, 5c each.

Asters—These universally grown and greatly admired flowers have undergone a great improvement in varieties of late years. Our mixtures contain a number of the best strains and furnish a choice selection of cut flowers in many shades of color. Sow indoors or under glass and at different times for a succession of bloom.

Chrysanthemum (Mixed)—These are not the large varieties grown and handled by florists. The annual varieties we offer are of many beautiful colors and similar to large daisies. If the shoots are nipped off when plants are young they become more bushy. For early bloom start indoors, or sow where plants are to bloom.

Cosmos (Mixed)—When many of the garden flowers are through blooming the Cosmos starts in. Tall, graceful, bushy, with feathery foliage. Plants producing a great variety of daisylike flowers in many colors. Sow outdoors after danger of frost is past.

Shasta Daisy—The plant grows fast and increases rapidly. It is a fine bloomer. The flowers measure 2 to 3 inches across and are borne on long stems. They have two rows of long, broad white petals and a yellow center.

Hollyhocks—A favorite with everyone. Tall and stately and always handsome. Most beautiful when seen in groups or long rows with a background of evergreens or shrubbery.

Heliotrope (Mixed)—An old fashioned favorite plant noted for the intense fragrance of the violet colored flowers. If sown early indoors or in hotbeds, large, stocky plants can be produced, which will bloom all season outdoors. Easy to grow from seed. Heliotropes are good pot plants for the house during winter.

Larkspur, Dwarf Bedding—These lovely annuals are quite hardy. The blooms are exceedingly handsome and most suitable for beds. Height 1 foot.

Marigold—One of those appreciated "sure to grow and bloom" garden flowers. Sow in spring where plants are to stand or in boxes and transplant. A continuous display of all shades in yellow and orange flowers late into fall is assured. Grows about 2 feet tall and thrives best in a sandy loam.

NASTURTIUMS

Giant Flowering Dwarf Mixed—These grand new bedding Nasturtiums are brilliant in the extreme. They produce in wonderful abundance large flowers of the most gorgeous hues. The colors are very intense, making a sharp diversity of color not to be found in common mixtures. The plants are strong and vigorous, growing very quickly and producing erect, symmetrical bushes, with foliage from light green to deep blue green.

Tall Giant Flowering Mixed—A wonderful diversity of rich colors and new and striking combinations are found in this unequalled mixture. A row in full bloom is truly gorgeous beyond description, containing as it does every shade and tint of yellow, rose, scarlet, carmine, orange, lemon, bronze, violet, purple, maroon, ruby, cream and pink, both in solid colors and mottled and striped in many showy and exquisite ways.

Pansy (Mixed)—Pansies are familiar to most everyone and few are planting a garden without pansies. During recent years there has been a great improvement in size and color of flowers and in length and strength of flower stems.

Petunia (Mixed)—For vases, urns and window boxes, there is hardly a plant that can compare with petunias. Continues blooming in

a multitude of colors and of drooping habit it is one of the most effective of flowering plants, far superior for these purposes than geraniums. Single and double flowers. Best started in boxes or under glass. Plenty of moisture and rich soil.

Phlox (Mixed)—These beautiful little plants furnish a diversity of color and shades and when sown they make flower garden themselves. Good soil and plenty of water in a sunny location are all they require for constant bloom. Sow out of doors or for early bloom in boxes or under glass.

Poppy (Mixed)—These wonderful plants with their multitude of colors put life into the garden before most any other plants have started. Against a background of green foliage, there are hardly any plants presenting such an intense array or veritable riot of colors. Thrive best in a sandy loam and should be sown very early and only in sunny exposure. Sow several times for succession. Poppies do not transplant well.

Sweet Peas.

Sweet Pea—Spencer Variety (Mixed)—Sweet Peas will grow and blossom in any good garden soil. For best success sow early, as early as the ground can be worked in the spring. Regardless of the weather sow early, in March or early April, in trenches 4 inches deep; cover about 1 inch with soil, and fill the trench as plants grow. Set the support early and hoe often. The Spencer mixture which we offer contains a beautiful mixture of colors and of large, gracefully frilled blossoms.

St. Regis Raspberry

Bears First, Last and All the Time

PRICE:—Each 20c; 10 for \$1.50; 100 for \$10; 1000 for \$75

Ruben Peach

Originated in Sebastian County, Arkansas. This wonderful new Peach is a chance seedling found in a thick woods in August, 1904, loaded with Peaches of large size and excellent quality. In years when the Peach crop has been an entire failure in this section, this tree has yielded heavy crops, proving it to be very hardy. Plant a few trees at least of this valuable variety.

This Peach is very desirable for canning, also fine for shipping. It is a cling-stone and in this section, ripens in August. Price \$1 each, 12 for \$10.

SPECIAL OFFER:

One of these trees given away free with every order amounting to \$10 or more.
