INTRODUCTION.

MAP OF THE WORLD.

Ortelius and Mercator, in the 16th century, conceived the idea of dividing all known lands into three great divisions; the Old World, comprising Europe, Asia, and Africa; the New World, or America; and the Terra Australis or Magellanica, Austra, or Southern World; to which Varenius added the Arctic World. At a later period, when the Pacific became more extensively known, while the notion of a Southern or Antarctic continent still prevailed, De Brosses proposed the names of Australia for the island of New Holland and the surrounding groups; Polynesia for the groups of islands scattered over the Pacific; and Magellania for the supposed Southern Continent. Geographers have now agreed to consider the Island World of the Pacific Ocean as a third division, under the name of Oceania.

Adopting this classification, Walckenaer divides the land area of the globe into three great portions called worlds, which are completely separated from each other by the circumfluent ocean.

Old World, subdivided into Europe, Asia, and Africa.

New World, subdivided into North America and South America.

Maritime World or Oceania, subdivided into Malaysia, Australia, and Polynesia.

The ocean, with its inland bays and seas, covers an area of nearly 147,800,000 square miles, or about three-fourths of the surface of the globe. Laplace has calculated from the influence of the sun and moon upon our planet, that the depth of the sea cannot exceed 26,500 feet. If we suppose its mean depth to be about two miles, its cubic contents will be nearly 300,000,000 cubic miles.

The ocean forms in fact a single mass of fluid surrounding the land, and penetrating the continents with numerous indentures. But geographers generally divide it into five great basins: —

The Pacific Ocean, 11,000 miles in length from east to west, and 8,000 in breadth, covers an area of 50,000,000 square miles.

The Atlantic, 8,600 miles in length from north to south, and from 1,800 to 5,400 in breadth, covers about 25,000,000 square miles.

The Indian Ocean, lying between 40 degrees S. and 25 degrees N. lat. is about 4,500 miles in length, and as many in breadth, covering a surface of 17,000,000 square miles.

The Antarctic Ocean, lying round the South Pole, and joining the Indian Ocean in the latitude of 40 degrees S. and the Pacific in 50 degrees, embraces an area of about 30,000,000 square miles.

The Arctic Ocean surrounds the North Pole, lying to the North of Asia and America, and having a circuit of about 8,400.

The whole land area of the globe has been differently estimated; the most recent and most accurate calculations make it 50,200,000 square miles, distributed as follows: —

Divisions.	Square Miles.
Old World, or Eastern Continent,	31,230,000
Europe,	3,724,000

CLIMATOLOGY.

The climate of a country comprehends whatever relates to the degree of heat and cold to which it is subject, the dryness and moisture of the air, its healthiness or insalubrity. The causes which affect and determine the climate of a place are nine: 1. The action of the sun upon the atmosphere; 2. The internal heat of the globe; 3. The height of the place above the level of the sea; 4. The general exposure of the region; 5. The position of the mountains relative to the cardinal points; 6. The neighbourhood of the sea and its relative position; 7. The geological character of the soil; 8. The degree of cultivation which it has received, and the density of the population collected upon it; and, 9. The prevalent winds.

These causes, acting together or separately, determine the character of a climate as moist and warm, dry and warm, mild and moist, mild and dry, cold and moist, cold and dry, &c.

The torrid zone has but two seasons: the wet and the dry. The latter is considered as the summer, and the former as the winter of the regions within this zone, but they are in direct opposition to the astronomical seasons, as the rains follow the sun. In some districts there are two rainy and two dry seasons every year. The temperature is uniform to the distance of 10 or 15 degrees from the equator; but in the neighbourhood of the tropics there is a great difference between the temperature when the sun is in the zenith and when he is in the opposite solstice of any place. The climate of the equatorial zone is more temperate than that of the tropical regions, in which extreme heats prevail during the presence of the sun.

In the temperate zones only is the year divided into the four seasons, exhibiting the agreeable vicissitude of heat and cold, the varied charms of spring and autumn, the tempered fires of summer, and the healthful rigours of winter. This regular succession of the annual changes can, however, hardly be considered to extend farther than from 35° to 60° of latitude.

In the frigid zones two seasons only are known; a long and severe winter is abruptly followed by the insupportable heats of a short but burning summer; this harsh transition and strong contrast are occasioned by the great length of the days in summer and the shortness of the days, or total absence of the sun in winter.

The decrease of heat as we recede from the equator follows the same laws in the two hemispheres, being no greater in the southern than in the northern, but varies according to the longitude. On the west of Europe the cold increases less with the latitude than in any other quarter. Under meridians which are 90° either east or west of London, the increase of cold, as we go northward, is more rapid than in England. According to Humboldt, continents and large islands are warmer on their western sides than on the eastern. The climate of Eastern Asia comes nearer to that of Eastern America than that of Western Europe. Thus, the latitudes of Naples, Pekin, and Philadelphia, are respectively 41°, 40°, and 40°, whilst their mean temperatures are 63.3°, 54.8°, and 53.4°. Such differences are rendered more sensible when we connect the places having the same mean temperature by lines which Humboldt denominates isothermal lines, or lines of equal heat. Thus, the isothermal line of 59° F. traverses the latitude of 43° in Europe, but descends to latitude 36° in America; the isothermal line of 41° F. passes from latitude 60° in Europe to latitude 48° in America; but since the western coast of North America is warmer than the eastern, the isothermal lines being traced round the northern hemisphere, would have concave summits at the east side of both worlds, and convex at the west.

The difference between the mean temperature of summer and winter amounts to nothing at the equator, but increases continually with the latitude. The extreme difference of the seasons is comparatively small in Western Europe, but is great where the mean annual temperature is low, as on the east coasts of Asia and America. If we draw a line in a north-east direction from Bordeaux to Warsaw, and continue it to the Wolga, in latitude 55°, then all places under this line, at the same elevation, will have nearly the same summer temperature of 69° or 70° F. The lines of equal winter temperature decline in an opposite direction. Thus a straight line drawn from Edinburgh to Milan almost at right angles to the former line, would pass over places which, if equally elevated, would have nearly the same winter temperature of 37° or 38° F.

The extremes of temperature are experienced chiefly in large inland tracts, and little felt in small islands remote from continents. In the United States intense cold is felt when the wind blows from the frozen regions round Hudson's Bay. From snow-clad mountains gusts of cold wind, called *snow winds*, rush down and cool the adjacent plains. The heat accumulates to an astonishing degree when the wind passes over extensive deserts of burning sand, which are said, in some instances in Africa, to be heated to the boiling point. This fine sand, or rather dust, sometimes rises in the air and obscures it like a fog, communicating to it an intolerable heat. In Arctic countries the temperature is very much regulated by the freezing of the water and the melting of the ice; by the freezing of the water great quantities of heat are given out, which moderate the severity of the winter's cold, and thus save from destruction the Arctic land animals and plants, while in summer the intensity of the heat, produced by the long continuance of the sun above the horizon, is moderated by the abstraction of a considerable portion of that heat by the water during the melting of the ice. Had the Arctic regions been entirely of land, neither plants nor animals could have existed in them; for during summer, owing to the sun remaining above the horizon for months, an elevation of atmospheric temperature would have been produced fatal to animals and plants; and in winter, the long darkness and intense cold would have proved equally fatal. The cold of the icy regions of the north has been alleged to reach the southern latitudes by currents of air, and thus to lower their temperature.

The following table contains a summary of the results of Humboldt's researches on this interesting subject. The temperatures have been reduced to Fahrenheit's scale, and the longitudes are reckoned from Greenwich.

THE WORLD AS KNOWN TO THE ANCIENTS.

The oldest geographical record extant is the account given by Moses of the settlements of the descendants of Noah, after the Flood. These, however, with few exceptions, cannot be identified with the nations and countries made known to us by the Greeks and Romans, from whom we have derived all the other information we possess of the ancient world; and we are, therefore, compelled to descend at once, through the dark interval of many centuries, to inquire, What was the extent of the sacred Historian's personal acquaintance with the Earth's surface? This we shall find to have been extremely limited. The geography of the Hebrews, in the time of Moses, may be said to have been confined to Palestine, Egypt, the northern parts of Arabia, and Aram, the latter probably including both Syria and Assyria. Even in the later times of the kings and prophets of Israel and Judah, the Hebrew geography seems not to have extended beyond Assyria, Media, Persia, and Ethiopia, with, perhaps, some vague conceptions of Europe under the name of the Isles of the Gentiles. Solomon, indeed, sent ships to Tarshish and Ophir; but the navigators were Phœnicians, and the commerce thus begun was of too short continuance to enable the nation to acquire much knowledge of foreign countries.

The great geographers of those early ages, the most celebrated explorers of unknown regions, were the Phœnicians. This enterprising people being precluded by the nature of their country from extending their dominion by land, and invited by the numerous facilities for communication which were presented by the adjacent sea, seem early to have directed their attention to foreign commerce and maritime discovery. They established factories, and planted colonies, in almost every country along the shores of the Mediterranean, and possessed Cadiz and several other stations beyond the Western Straits. They likewise explored the western coasts of Africa to an extent now unknown; visited the British islands in quest of tin; and probably colonized Ireland. To the eastward, they appear to have carried on an equally extensive trade, which centered in Babylon, the greatest and most luxurious city of Western Asia; but the records of both Babylon and Phœnicia have perished, and we are indebted to a few imperfect notices by the Greek and the Hebrew writers for all our knowledge of this adventurous people.

Next to the writings of the Old Testament, the Iliad and Odyssey of Homer, with the poems of Hesiod, are the oldest geographical works which have descended to us. In the days of these early writers, the earth appears to have been regarded as a flat circular disk, surrounded by the ocean stream. The extent of the known world, according to Homer, reached only from Colchis (Imerita) on the east, to somewhere about Sicily on the west. Towards the south, he was acquainted with Egypt, and mentions also the Ethiopians; but, towards the north, his information was bounded by Thrace. Hesiod knew of the Lygyes, who dwelt beyond the Tyrrenhians, and of the river Eridanus (Rhine?) which flowed northward to the ocean. He also mentions the amber which was collected at its mouth, and the singing swans which frequented its waters and those of the ocean.

Between the time of Homer and that of Herodotus, a period of four centuries, the Greeks had spread themselves over several of the countries adjoining to the Mediterranean, and had planted colonies in Asia Minor, Libya, Italy, Sicily, and even Gaul and Spain; all of which kept up a constant intercourse with the mother country. The father of history, who had visited in person Egypt, Syria, Assyria, Babylon, Asia Minor, and Italy, has left us an account of the world as known in his time, the middle of the fifth century B. C. He describes the Indians as the people farthest east, and the country beyond them as a desert of sand (the Thur?); to the southward, he mentions Arabia and Ethiopia; he was acquainted with Libya as far as the Atlantes; but beyond them he seems not to have known the name of any place; he only tells us that there was a habitable country as far west as the pillars of Hercules, and even beyond them. His knowledge of the west of Europe was equally imperfect. He had heard of the river Eridanus, from which the Greeks obtained their amber, and of the Cassiterides, from which they procured their tin; but he had endeavoured, he says, without success, to meet with any one who, from personal observation, could describe to him the sea which washed that part of Europe. With the Ister (Danube) he appears to have been well acquainted; and he knew that the Caspian was a sea unconnected with any other.

For some time after the age of Herodotus, the knowledge of the world possessed by the Greeks appears to have been nearly stationary. Military enterprise at length opened up an extensive field of discovery. The wide regions of the East were made known by the conquests of Alexander the Great; numerous voyages and travels were undertaken in different directions; geographical knowledge abounded at the court of Ptolemy Euergetes; and it was there that Eratosthenes completed a system of geography about two centuries B. C. The limits of his positive knowledge terminated eastward at the Ganges. Of the sources of the Nile his knowledge was as extensive as that of the present day. To the west and north he was acquainted with Albion and Thulé; but with respect to the western part of Africa, he added nothing to the information left by Herodotus.

Our space prevents us from giving in detail the progress of geography down to the time of Strabo, at the beginning of the first century of the Christian era. The limits of his knowledge were, to the north, Ierné, or Ireland, and the mouth of the Elbe; to the north-east, the Tanais or Don; to the east, Ceylon and *Thinæ?* but to the south, he cut off the half of Africa, and supposed that the Atlantic and the Indian Oceans met under the equator.

Several other writers, nearly contemporaneous with Strabo, have left us accounts of the world, not differing materially from his; but all the information contained in them, along with the subsequent discoveries, have been embodied in the works of Ptolemy, the Alexandrian geographer, who flourished at the end of the first, and beginning of the second century of the Christian era. His knowledge extended from the Atlantic Ocean to the peninsula beyond the Ganges, and to the country of Serica, supposed to be China or Thibet; but owing to the enormous expansion of his measurements, he carries the limits of the world, in both of these directions, many degrees of longitude beyond their true position. To the north-east, he was acquainted with the Caspian Sea, and the countries between it and India; but not with their true extent and configuration. Europe, as delineated by him, is also considerably different from its real form; but it comprises Spain, France, Britain, and Ireland, the Western and Northern Isles of Scotland, Germany, and the Cimbric peninsula, adjoining which he places the four *Scanian* islands, which may be those of Denmark, or probably, the Scandinavian peninsula; and, farther east, he was acquainted with Sarmatia as far as the Rha or Volga. But the most interesting portion of his work is that which relates to central Africa. He there describes several mountains, lakes, and large rivers (Geir and Nigeir;) the situation and courses of which have completely puzzled, and continue to puzzle and perplex all modern geographers.

After the publication of Ptolemy's work, the geography of the world was considerably extended, and Germany, Sarmatia, and the countries round the Black Sea and the Caucasus, became better known. In the sixth century, *Ancient Geography* may be said to have reached its utmost extent by the addition of Sweden and Norway, or Scandinavia, the last advance which it made before the world sank into the darkness of the middle ages. During this dreary period, it is needless to trace its progress, or rather, for a while, its retrogression; but immediately preceding the great events of the fifteenth century, the geographical knowledge possessed by the nations of Western Europe, who had succeeded the Greeks and Romans, as the custodiers of lingering science and civilization, was very limited. In fact, the somewhat vague notions of the Far East, communicated by Marco Polo and succeeding travellers, were almost the only additions made to geography for many centuries. Iceland, indeed, was known, but no ship had sailed to the north-east beyond Norway; and all the countries to the east of the Black Sea and the Baltic, and to the southward of Egypt and Barbary, were still unexplored, though some of them were probably known by name. But all at once the face of the world was changed. The great father of modern maritime discovery sent out his first ship in A. D. 1412; and before the end of the century, America was discovered, and India reached by sailing round Africa. In less than thirty years after the first voyage of Columbus, the farthest east and the farthest west had met; and, for the first time since the Flood of Noah, the earth was proved to be, what geometers had suspected, a globe; and not, as Homer, and Hesiod, and other uninstructed people have imagined, a disk.

POPULATION OF THE WORLD.

"All the calculations," says Malte-Brun, "which have been made upon this subject are chimerical, and it is impossible to state any which shall even approximate to the truth." Notwithstanding this declaration, Malte-Brun himself, as well as other geographers and statists, have amused themselves with this chimera; and the result of their conjectures will be seen in the following tables:—

EXTENT AND POPULATION OF THE GREAT DIVISIONS OF THE WORLD.

It is difficult to state, with any degree of precision, the number of adherents belonging to each religion actually existing in the world. The following Table exhibits the estimates of the most distinguished statists, all of which may be regarded as nearly contemporaneous, since those of Malte-Brun and Graberg were published not farther back than from 1810 to 1813; MM. Walckenaer and Eyries, in their new edition of Pinkerton's Geography in 1827; that of Hassel in the same year; and Balbi's in 1837–8.

Religions.	Malte-Brun.	Graberg.	Pinkerton.	Hassel.	Balbi.
Christianity in all its branches,	228,000,000	236,000,000	235,000,000	252,566,000	260,000,000
Judaism,	5,000,000	5,000,000	5,000,000	3,930,000	4,000,000
Islam,	110,000,000	120,000,000	120,000,000	120,105,000	96,000,000
Brahminism,	60,000,000	60,000,000	60,000,000	111,353,000	60,000,000
Buddhism,	150,000,000	150,000,000	180,000,000	315,977,000	170,000,000
All other religions,	100,000,000	115,000,000	100,000,000	134,490,000	147,000,000
Total,	653,000,000	686,000,000	700,000,000	938,421,000	737,000,000

Balbi's estimate in detail is as follows:—

Christianity — The Latin or Romish Church,		139,000,000 ?
The Greek Church, and all its branches,		62,000,000 ? ?
The Protestant Churches and Sects,		59,000,000 ?
Total of Christianity,		260,000,000
Judaism,		4,000,000 ?
Islam, or Mahometanism,		96,000,000 ? ?
Brahminism,		60,000,000 ? ?
Buddhism,		170,000,000 ? ?
Religion of Confucius, Sintism, Mythological Naturalism, Nanekism, and Fetishism,		147,000,000 ? ?
Total of all religions,		737,000,000 ? ?

Balbi however appears, in the foregoing statements, to have under-rated the numbers of the followers of Brahma and Buddha, which we would estimate thus:—

Brahminism,	120,000,000
Buddhism,	320,000,000
All other religions (as in Balbi's estimate,)	507,000,000
Total,	947,000,000

Our reason for departing so widely from Balbi's estimate of the Brahminists and Buddhists is simply this: The population of India is believed by those best acquainted with the country, to fall very little short of 200,000,000* of which nine-tenths profess Brahminism. To keep within bounds, we have restricted our estimate to 120,000,000. The absolute population of the whole Chinese empire, which contains the bulk of the Buddhists, Balbi estimates by his approximative method at 150,000,000. Messrs Gutzlaff and Morrison give it, upon the authority of an actual census, at 367,000,000; and M. Gutzlaff declares himself to be "fully persuaded that the last imperial census is as near the truth as it can be ascertained."† Those parts of the empire which he visited are extremely populous. He took the trouble of examining some parts of the census, and numbering the houses of small districts, and invariably found that the population was under-rated. We have therefore made our estimate of the number of Buddhists correspond with what we believe to be the real amount of the population of the Buddhist countries.‡ With respect to Islam, we are not disposed to increase the estimate, because, from extreme misgovernment, and the immense extent of sandy deserts which occupy so great a part of the Mahometan world, the population of these countries is really very small in proportion to their size. The best estimates, however, upon the subject, are merely conjectural.

* Martin's British Colonies, vol. i.

† Gutzlaff's Sketch of Chinese History, vol. i.

‡ Professor Neuman of Munich, in an article on the nations and literature of the East, published in the Journal Asiatique, August, 1834, gives the following tabular estimate of the number of the Buddhists:

China,	200,000,000	Indo-China,	25,000,000
Mandchoos and Mongols,	5,400,000	Ceylon,	600,000
Japan and Loo-Choo,	25,000,000	Nepaul,	2,000,000
Thibet and Boutan,	6,000,000		
Corea,	5,000 000	Total,	269,000,000

The difference between Professor Neuman's estimate and our own arises chiefly from his having under-rated the population of China.

EUROPE.

Europe forms the north-western portion of the Eastern Hemisphere, or Old World, and is situate between 34° and 82° N. lat. if Spitzbergen be included, and between 24° W. and 71° E. long., including Iceland and Novaiya Zemlia. But the extremities of the continental portion are comprised within narrower limits; Cape Nord Kyn, the most northern point, being in lat. 71° 6′ N.; the two most southern points, Punta de Tarifa in Spain, in lat. 36°, and Cape Matapan in the Morea, in lat. 36° 17′ N.; the most western point, Cape St Vincent, in 9° W. long.; and the most eastern point, in the Ural Mountains, near Iekaterinburg, in 60° 20′ E. long. The greatest length of the Continent is in the direction of north-east and south-west, from the mouth of the river Kara, on the Arctic Ocean, to Cape St Vincent, in Spain, and is estimated at 3490 British miles. The greatest breadth, from Cape Matapan to Cape Nord Kyn, is about 2420 miles. The superficial area is estimated to contain about 3,900,000 square miles.

Europe is at present divided into eighty two sovereign states; but of these a great proportion belong to the Germanic or the Swiss confederation, and can scarcely be considered as really independent. The following table exhibits, at one view, the names of the principal political divisions — the numbers and the religion of their population — and the names of their capital cities, the smaller German states being all classed as one under the name of "German States," and the Swiss Cantons under that of Switzerland.

ENGLAND AND WALES.

England and Wales occupy the southern, and by much the larger portion of the island of Great Britain, and are situate between 50° and 55° 50′ N. lat., and 2° E. and 5° 40′ W. long. They form an extensive triangular peninsula, bounded on three sides by the sea, and separated at the northern angle from Scotland by a line which extends from the north-eastern corner of the Solway Firth to the mouth of the river Tweed.

The following table contains the names of the counties of England and Wales, and their dependencies; their area in square miles and imperial acres; their population at the period of the last general census in 1851, the names of their chief, or, as they are called, county towns, and the number of their Parliamentary Representatives.

Note.—Hampshire (originally Southamptonshire) is now usually called Hants; Berkshire is called Berks; Buckinghamshire, Bucks; Hertfordshire, Herts; Nottinghamshire, Notts; Shropshire, Salop; and Wiltonshire, Wilts. The Isle of Wight, and Berwick-upon-Tweed, are dependencies of the Crown of England, not attached to any county. Berwick, however, is represented in the Imperial Parliament, and subject to the Laws and Supreme Courts of England; Man and the Norman Isles have laws, legislatures, and judiciary establishments of their own.

The greatest lineal extent of England is about 367 miles, between the Land's End in Cornwall, and the north-eastern coast of Norfolk; from the coast of Dorsetshire to Berwick-upon-Tweed, measured along the second meridian west, the length is 362 miles; from the Land's End to the North Foreland, the breadth is 330 miles; from St David's Head to Lowestoft in Suffolk, about 300 miles; from Lancaster Bay to Bridlington Bay in Yorkshire, the breadth is contracted to 110 miles; and from the head of the Solway Firth to Tynemouth, it is farther diminished to 64. The superficial extent amounts to about 57,812 square miles, or 36,999,680 English statute acres.

England and Wales are divided into shires or counties, most of which are subdivided into hundreds, and these, again, into parishes, which are both ecclesiastical and civil divisions. Yorkshire is divided into three unequal parts called Ridings, which are again subdivided into wapentakes. Cumberland, Westmoreland, Northumberland, and Durham, are divided into wards, Kent into lathes, and Sussex into rapes.

SCOTLAND.

Scotland occupies the northern portion of Great Britain, and has numberless islands along its western and northern coasts. The longest line which can be drawn on the mainland is 280 miles, from the Mull of Galloway to Dunnet Head. The greatest length, measured along the meridian, is 274 miles, from the Mull of Galloway to Cape Wrath. The breadth is very variable, the greatest being 146 miles, from Buchan-ness in Aberdeenshire, to the most westerly point of Ross-shire, but the country is so penetrated by inlets of the sea, that there is actually no place which is more than 40 miles inland. The area has been estimated at 32,164 square miles, or 20,586,930 imperial acres.

Scotland is divided into thirty-three shires or sheriffdoms, subdivided into parishes, which last are at once ecclesiastical and civil divisions. The following table contains the names and extent of the shires in square miles and acres, the area of the arable, pasture, and meadow land, the population in 1851, and the names of the ancient districts or provinces which make up the modern shires, names which are still in popular use, and are also employed in legal documents.

IRELAND.

IRELAND is situate to the west of Great Britain, from which it is separated by the Irish Sea and St George's Channel. It is of a rhomboidal form, having its longer side nearly in the direction of the meridian, and its shorter from north-east to south-west. In the direction of its greatest diagonal, from Browhead to Fairhead, Ireland measures 306 miles, but its greatest length on a meridian, is only 235. Its greatest breadth, from the extremity of the Mullet peninsula, in Mayo, to the mouth of Lough Strangford, is 182 miles; but from Dublin to Galway, the narrowest part, it is only 110. The island contains an area of 32,035 square miles, or 20,499,550 imperial acres; whereof 14,603,415 acres are cultivated, or capable of cultivation, the remainder being covered with mountains, bogs, and lakes. The sea which separates Ireland from Great Britain, varies considerably in breadth: the shortest distance between the two islands is from Fair Head in Antrim, to the Mull of Cantire in Argyllshire, which is 12 miles; from Port-Patrick in Galloway, to the nearest point of Antrim, it is 22 miles; from Holy Head, to Howth Head, it is 60 miles; and from Carnsore Point in Wexford, to St David's Head in South Wales, about 50 miles. The greatest width of the Irish Sea is 130 miles.

Ireland is divided popularly, but not officially, into four provinces,—*Leinster*, *Ulster*, *Connaught*, and *Munster*. The real administrative division is into thirty-two counties, which are subdivided into 252 baronies. Parishes likewise form both civil and ecclesiastical divisions; but their limits do not always correspond to those of the counties and baronies; some of them extending not only into different baronies, but even into different counties. The following Table contains the names of the counties arranged into provinces, their extent in square miles and imperial acres, and the names of the county towns.

FRANCE.

FRANCE is situate nearly in the middle of the northern temperate zone, between 42° 20′, and 51° 5′ N. lat., and 8° 25′ E., and 4° 43′ W. longitude. Its greatest length, from the most westerly point of Finistere to Antibes in the Department of the Var, is about 665 British miles; and the greatest breadth, from Givet in Ardennes to Mont Horumba, near Saint Jean Pied de Port in the Lower Pyrenees, 576. The superficial area, as stated in the *Statistique de la France*, is 52,768,618 hectares—equal to 185,515 English square miles, or 118,729,600 English acres.

Before the Revolution of 1789, France was divided into 33 Governments, or Provinces of very unequal extent, which were sub-divided into generalities, and sub-delegations. It is now divided into 86 Departments, or Prefectures, named generally after their principal river, mountain, or some other natural feature. These Departments are divided into 363 Sub-Prefectures, or Arrondissements; these into 2845 Cantons, and these into 38,623 Communes. Each Department is under the charge of a Prefect; each Arrondissement of a Sub-Prefect; and each Commune of a Maire; besides other officers of various ranks and duties.

* The amount of the Revenue is stated in Swiss francs, each worth about 15d. sterling.
† Switzerland being both a German and a French country, most of the principal places have both a German and a French name. Sometimes, however, there is also an Italian name, as *Bellinzona*, and some of them have even three forms, as, *Chiavenna, Cleven, Cleves*, the first of which is the Italian, the second the German, and the third the French form of the same name.

HOLLAND AND BELGIUM.

THE kingdom of Holland comprehends the northern provinces of the late kingdom of the Netherlands, which was established by the Congress of Vienna in 1815, and dissolved in consequence of the revolution which broke out at Brussels in September, 1830.

Besides these, the Dutch claim the islands of Oruba and Orubilla, that of Bonaire, or Buenos Ayres, with the Bird Islands, all on the northern coast of South America. These, however, have few or no resident inhabitants, but a few persons occasionally resort to them to take turtles, or to collect salt.

BELGIUM, or the kingdom of the Belgians, is composed of the southern provinces of the late kingdom of the Netherlands.

* Rather more than a third part of each of these two provinces, with their chief towns, Luxemburg and Maestricht, has been confirmed to Holland by the recent treaty. Luxemburg is one of the federal fortresses of the Germanic Confederation, though the civil possession of the town and district has been assigned to the King of Holland, as Grand Duke of Luxemburg.

EMPIRE OF AUSTRIA.

THE Empire of Austria is situate in the centre of Europe, between 42° and 51° N. lat., and 9° and 27° E. long. Its greatest length, from Sesto Calende on the Ticino, in the Duchy of Milan, to the confluence of the Podhorze and the Dniester, at the eastern extremity of Galicia, is 750 geographical miles; and its breadth, from Trau, on the Adriatic Sea, in Dalmatia, to the northern extremity of Bohemia, 442 miles. It is formed by the union of different countries, inhabited by people differing in race, language, religion, form of government, manners, customs, and institutions, who have no natural connection with each other, and are held together by the single tie of a common sovereign and a central government.

The German geographers agree in dividing into four great portions all the countries of which the Empire is composed, viz.:—1. The German provinces; 2. The Polish provinces; 3. The Hungarian provinces, among which they reckon not only Hungary, Transylvania, and the Military borders, but also the kingdom of Dalmatia; 4. The Italian provinces, in which they include only the Lombardo-Venetian kingdom. But the Empire is actually divided into fifteen governments, which are subdivided into circles, provinces, counties, districts, &c. The population, in July 1850, amounted to 36,050,467.

KINGDOM OF PRUSSIA.

The kingdom of Prussia is situate, like Austria, nearly in the centre of Europe, and, like it, is composed of various countries, provinces, and districts, inhabited by people of different races and languages, and who have no other bond of union than that of being placed under a common sovereign. Exclusive of Neufchatel, and some small isolated districts in Saxony, the kingdom is formed of two large, unequal, and perfectly distinct tracts of country, separated from each other by the German States of Hanover and Brunswick, Hesse, Nassau, and the kingdom and duchies of Saxé. The outline is extremely irregular; and it would be difficult to guess with any degree of certainty at the length and breadth. We may, however, mention that the distance between the north-eastern and south-western extremities of the kingdom is upwards of 700 miles. The area of the kingdom is reckoned at about 5077 German, or 81,232 geographical square miles.

The kingdom is now divided into eight provinces, which are subdivided into twenty-five *Regierungs bezirke*, (governments or arrondissements,) and again portioned out into 328 circles. The canton of Neufchatel is not comprised in any of these divisions, nor in the following Table, but will be found in the illustration of the Map of Switzerland. The Princes of Hohenzollern ceded the sovereignty of their states to the King of Prussia in 1851.

RUSSIAN EMPIRE.

This vast empire extends along the shores of the Arctic Ocean from the 21st meridian E. of Greenwich, to the 140th W., or through 199 degrees of longitude; equal, in the latitude of the Arctic circle, to 6,577 geographical, or 7,590 English miles. This immense extent of country is divided by Behring's Straits into two perfectly distinct portions, the smaller of which forms the north-western extremity of America. Of the larger, or European and Asiatic portion, the breadth varies from 1900 English miles in long. 45° E., to 460 in long. 160°; giving a superficial area of 3,409,000 square geographical miles, or about 4,740,000 square English miles, with an average population of less than 15 to the square mile.

SWEDEN AND NORWAY.

These two countries form together a large peninsula, lying between the Atlantic Ocean on the west, and the Baltic Sea and Gulf of Bothnia on the east. The greatest length, from Falsterbo, in the province of Malmo, to Cape Nord Kyn in Finmark, exceeds 1000 geographical miles, and the superficial area is about 292,700 square English miles, of which 170,150 belong to Sweden, the remainder to Norway.

Though forming only one geographical region, and subject to the same sovereign, Sweden and Norway are, nevertheless, two perfectly distinct states, with separate governments, legislatures, and financial and judicial establishments. Sweden is divided into twenty-four *lan* or shires, each of which is subdivided into *fogderier* or districts. Norway is divided into seventeen *amts* or bailiwicks, according to the following table:—

I. SWEDEN—

Sweden Proper contains the *lans* of Stockholm, Upsala, Westeras, Nykoping, Oerebro, Carlstad, Stora-kopparberg, Gefleborg; corresponding to the ancient provinces of Upland, Sodermanland, Westmanland, Nerike, Warmeland, Delarne, Gestrikland, and Helsingland.

Gothia contains the *lans* of Linkoping, Calmar, Jonkoping, Kronoberg, Blekinge, Skaraborg, Elfsborg, Gotheborg and Bohus, Halmstad, Christianstad, Malmohus, Gottland; corresponding to the ancient provinces of Ostergothland, Smaland, Blekinge, Westergothland, Dasland, Halland, Skane, and the islands of Gottland and Oeland.

Nordland contains the *lans* of Nordbotten, Westerbotten, Westernorrland, Jamtland; corresponding to the ancient provinces of Wester Bothnia and Lapmark, Medelpadia and Angermanland, Jamtland and Herjeadalen.

II. NORWAY—

Sondenfields contains the *amts* of Aggershuus, Smaalekene, Hedemarken, Christian, Buskerud, Bratsberg, Nedenoes and Raabygdelaget, Lister and Mandal, Stavanger, Jarlsberg, and Laurvig.

Nordenfields contains the *amts* of Sondre-Bergenhuus, Nordre-Bergenhuus, Romsdal, Sondre-Trondheim, Nordre-Trondheim.

Norlandens contains the *amts* of Nordland and Finmarken.

In 1751, the population of Sweden amounted to 1,785,727; in 1800, to 2,347,303; and in 1845 to 3,316,536. Norway, in 1825, contained 1,051,318 inhabitants; and in 1840, the population was 1,243,700, shewing an increase of nearly 200,000 during the preceding 15 years. In Sweden, the annual number of births is 1 in 28 of the population; in Norway, 1 to 34. In Sweden, the marriages are 1 in 112; in Norway, 1 in 130; but in Sweden the mortality is 1 in 34½, in Norway, only 1 in 48. The standing army amounts to 33,000 men, but in time of war it may be raised by conscription to 240,000.

In 1825, the inhabitants of the towns of Sweden amounted to 279,645, or about one-tenth of the population. Stockholm had then a population of 79,183; Gothenburg, 26,702; Carlskrona, 11,943; all the other towns are little better than villages. In Norway, the three principal towns, Christiania, Bergen, and Trondheim, contain respectively, 23,121; 22,839; and 12,731. In the end of 1848 the population of Sweden amounted to 3,399,341; and in the end of 1845 that of Norway to 1,328,471.

ITALY.

Italy is situate in the middle of the southern region of Europe, and consists chiefly of a long narrow peninsula, projected into the Mediterranean Sea, and separated on the north-west and north from France, Switzerland, and Germany, by the Alps, which form, in most places, an almost impassable barrier. Including Sardinia and Sicily, but without Corsica, which belongs to France, the superficial extent of Italy exceeds 120,000 square English miles.

Since the downfall of the Roman Empire, Italy has never formed one state. It has always been parcelled out among numerous Princes and Lords, and now contains eight Sovereign states, one of which indeed forms an integral part of the Austrian empire, while the others are all politically subject to the predominating influence of Austria.

* This includes the *Duchy of Savoy*, which lies beyond the limits of Italy, on the north-west side of the Alps. It includes also the *Principality of Monaco*, a sort of mediatized State of very small extent on the sea-coast.

DENMARK.

Denmark is situate at the mouth of the Baltic Sea, between 53° and 58° N. Lat., and 7° and 13° E. Long., and is composed of a large peninsula and a number of islands, the total superficial area of which is supposed to amount to about 21,000 square English miles. The *Kingdom of Denmark*, properly so called, comprises only the peninsula of *North Jutland*, *the islands* between Jutland and Sweden, and the island of *Bornholm*. To these possessions have been added at different times the *duchy of Schleswick*, or *South Jutland*, the *Faroe Islands* in the Atlantic Ocean, the *duchies of Holstein* and *Lauenburg*, with the *lordship of Pinneberg*, the *county of Ransau*, and the *city of Altona*, which originally formed part of the German empire; and as sovereign of which the king now ranks as a member of the Germanic confederation.

The *Kingdom of Denmark* has been for a long time divided into *bailiwicks*, the administration of which is entirely separated from the judicial department; but in the *duchies*, which are also divided into bailiwicks, the bailies are at once ministerial and judicial officers. In the following table, the first column contains the names of the bailiwicks, and the second, the countries or islands in which they are situate.

SPAIN AND PORTUGAL.

These two countries, though politically independent, form one geographical region, and cannot well be described separately. They form together a large and compact peninsula situate at the south-western extremity of Europe, and containing about 167,000 square geographical miles; of which the *Kingdom of Spain* contains 137,400, and the *Kingdom of Portugal*, 29,600.

KINGDOM OF SPAIN.

By a royal decree, dated 30th November, 1833, the Spanish territory in the Peninsula and adjacent islands, was divided into forty-nine provinces, taking their names from their respective capitals, except Navarre, Biscay, Alava, and Guipuscoa, which retain their ancient denominations; but for military purposes, these are arranged into twelve Captain-generalships.

* Many Spanish names are spelled indifferently with j or x, both of which letters have exactly the same sound; both being pronounced as gutturals, without the slightest resemblance to the sound of the same letters in English. For example—Mexico, Truxillo, Ximenes, Guadalaxara, Xucar, Loxa, are also spelled Mejico, Trujillo, Jimenes, Guadalajara, Jucar, and Loja; but in both cases the pronunciation is the same, viz. Meh-hico, Trooh-hillyo, Hhimenes, Guadalah-hara, Hhucar, Loh-ha. *Ch* is pronounced invariably the same as in the English words chair, cheese, child, choke, chuse, never hard like the Italian *ch*. The Spaniards have also a letter which they call n, *con tilde*, the sound of which is liquid, like the *gn* in French and Italian. The double *ll* is also liquid, like the Italian *gl*.

Colonies and Foreign Possessions.—These have dwindled away, till only a few scattered islands in different parts of the world are all that now remain to the Queen of Spain and the Indies. In the West Indies, the Islands of *Cuba* and *Port-Rico* contain an area of 35,400 square geographical miles, and a population of 1,000,000. In Asia, the Spaniards possess *Luçon*, and some of the smaller *Philippine* Islands, with part of *Mindanao* and *Paragoa* and the *Marianne* Islands. In Africa, the Spaniards possess *Ceuta*, opposite Gibraltar, and the *Presidios* of *Penon-de-Velez*, *Alheucemas*, and *Melilla*, on the coast of Barbary; and the *Canary Islands*, in the Atlantic.

TURKEY, OR OTTOMAN EMPIRE.

The Ottoman Empire, in its present diminished state, still comprehends a portion of the three divisions of the old world. In Europe, it includes *Rumelia*, or the countries lying between the Danube and the frontier of Greece; in Asia, it includes *Asia-Minor*, a portion of *Armenia*, *Syria*, *Hedjas*, and the countries watered by the *Euphrates* and *Tigris*; and in Africa, *Tripoli* and *Barca*, which are all under the absolute sovereignty of the *Padishah*, or Emperor. Besides these, *Egypt*, though possessed by a sovereign Pasha, is still considered as a part of the Empire. Of the superficial area of this wide spread Empire, no proper estimate can be made; inasmuch as the African and Asiatic portions of it extend into sandy deserts, where they have no determinate boundaries. Its extreme limits, however, the north-western, and the south-eastern, are nearly 2000 miles asunder; and the breadth of the Empire stretches through 25° of lat., or about 1700 miles. It is scarcely possible to form an estimate of the population; if known to the officers of government, they do not think proper to publish it; and all that can be affirmed of it is, that it is very thinly scattered, and that the bulk of the inhabitants are every where sunk in the lowest state of ignorance and poverty. The Ottoman Turks are a branch of the great Toorkee family from Central Asia; but their proper designation is Osmanlee or Othmanlee, so called from Osman or Othman, the founder of the Empire, and the ancestor of the Imperial Family. Their total number is believed not to exceed 4,000,000; the rest of the population of the Empire consists of Greeks, Arabs, Armenians, Turkomans, Kurdes, Druses, Maronites, Jews, &c.

The Turkish dominions in Europe and Asia were, till lately, divided into two great portions, each of which was under the charge of a *Beghlerbegh* (Lord of Lords.) The one of these officers resided either at Monastir or Sophia, in Rumelia; the other sometimes at Angora, sometimes at Kutahya. Besides this general division, there were smaller governments called *eyalet*, or principalities, which were subdivided into *livas* and *sanjaks* (banners.) The *eyalets* were under the superintendence of viziers or pashas of three tails, and the *livas*, of mirmirans, or pashas of two tails. At the commencement of the seventeenth century, the Empire contained 44 eyalets, and 220 livas; but, at present, scarcely more than half of these remain; and, besides, the limits of the provinces have been and are continually changing.

In Africa. Egypt was possessed for several years by Mehemet Ali, an Albanian, who, after having massacred or expelled the Mameluke *Beys*, who so long domineered over the country, resisted all the open or secret attempts of his master to supplant him, and ruled the whole region of the lower Nile as sovereign prince. He is now dead, but the Government has been established in his family as an hereditary possession, with a nominal acknowledgment of the Emperor's supremacy. *Tripoli* and *Barca* were possessed for more than a century by a family of hereditary *Beys* or *Bashaws*,* who were entirely independent of the Sultan; but at last, in 1835, they were restored to the empire, and the Beys supplanted by the Capitan Pasha; so that Tripoli is again a province of Turkey.

Wallachia and Moldavia extend along the north side of the Danube, from the Pruth to the borders of Hungary and Transylvania; the former containing an area of 21,600 square geographical miles, with a population of less than 1,000,000; the latter an area of 11,600 miles, with a population of about 450,000. These countries were formerly provinces of the Turkish Empire, governed by princes called Hospodars, who were chosen by the Sultan from the Greeks of Constantinople, and invested with regal authority — the attainment of the office being dependent upon the price offered for it. By the treaty of Buckharest, in 1812, the Czar acquired the right of interfering in matters connected with the religion of the people; and by the treaty of Adrianople, in 1829, this power of interference was so greatly extended, that they may now be considered as virtually provinces of Russia. To the Sultan, indeed, they still pay a small annual tribute, as an acknowledgment of his sovereignty; and he continues to appoint the Hospodar, selecting him from a list presented by the boyars (nobles), a class who are completely subject to the domineering influence of Russia. The Hospodar, when once elected, holds his office for life. The government, however, is of the worst possible kind; every thing is in the most wretched disorder; and the people are divided into the two classes of tyrants and slaves.

Servia is a small province of about 9000 square geographical miles, with a population of about 380,000. In the early part of the present century it was governed by Czerni Georges, a native, who had served in the Austrian army, and who, enraged at the atrocities committed on his countrymen by the Turks, had rebelled, and expelled them. The Sultan, deeming it hopeless to recover the absolute dominion of the province, resolved to resign it to a native governor, who should have the entire management of the internal administration, on payment of a certain tribute; while the fortresses should be garrisoned by Turks, and the external relations remain under the Imperial control. Georges being dead before this arrangement took place, Milotsch Obrenovich, a person who had risen to distinction during the troubles, was chosen Prince, and the dignity was guaranteed to him and his heirs by Turkey and Russia; but he has been recently deposed and expelled, and the government remains in an unsettled state.

* This is the old English spelling of *Pasha*, or, as the French call it, *Pacha*.

KINGDOM OF HELLAS, OR GREECE.

This kingdom forms the south-eastern extremity of Europe, and is nearly peninsular, being bounded on three sides by the Archipelago and the Mediterranean Sea. Its greatest length, from north to south, is about 172 miles, and the greatest breadth of its continental portion about 150; comprising an area of about 14,000 square geographical miles. It comprises the ancient Peloponnesus or Morea; the Turkish province of Livadia, and part of those of Carlilli and Lepanto, or Eastern and Western Hellas; Eubea, or Negropont; the Cyclades, and a part of the Sporades, or *scattered* islands of the Archipelago. Greece formed part of the Turkish empire till 1821, when the people revolted. After a long and severe struggle they succeeded, with the assistance of the European powers, in achieving their independence. In 1832, the country was formed into the new kingdom of Hellas, and Otho, a son of the king of Bavaria, appointed king. *Greece* is only the Western-European name of the country. The natives call it *Hellas*, and themselves *Hellenes*.

The population of the kingdom, according to the latest accounts, amounts to 1,032,900, distributed thus:—

Hellas proper, formerly Livadia,	257,000
Island of Eubea, formerly Negropont,	70,000
Peloponnesus, or Morea,	530,000
The Sporades, or scattered islands,	55,100
The Cyclades,	120,800
	1,032,900

The kingdom has been divided into shires, or departments, of which Hellas proper contains 9; Eubea, 2; Peloponnesus, 14; and the Cyclades, 4; viz.,

I. Hellas:—Attica, Thebes, Beotia, Phthiotis, Phocis, Euritania, Trichonia, Acarnania, Etolia.
II. Eubea:—Eubea, Karystos.
III. Peloponnesus:—Argolis, Corinth, Hydra, Achaia, Cyllené, Elis, Triphyllia, Pylia, Messenia, Mantinea, Gortynia, Cymiria, Lacedemon, Laconia.
IV. Cyclades:—Tinos, Syros, Naxos, Melos, Thera.

UNITED STATES OF THE IONIAN ISLANDS.

These States consist of the islands of Corfu, Paxo, Antipaxo, Fano, Santa Maura, Theaki, Cephalonia, Zante, Cerigo, and Cerigotto, with several other islets and rocks, lying along the western and southern coasts of Turkey and Greece. They were formerly a portion of the foreign possessions of Venice; but, after the downfall of that ancient republic, they came into the possession of the French, who were, in turn, expelled by the British; and, by the peace of Paris, in 1814, the Ionian Islands were left in possession of the latter. They form a sort of Republic, or rather what has been called a Constitutional Monarchy, the supreme authority being vested in a Senate, and a Lord High Commissioner, appointed by the Queen of Great Britain, and representing her as Sovereign. The fortresses are garrisoned by British troops; and the city of Corfu, in the island of that name, is the seat of government. The population, in 1844, amounted to 219,797.

ASIA.

Asia is situate entirely in the Northern Hemisphere, between 1° and 77° N. lat., and 26° and 170° E. long.; and forms one continuous mass of land, the greatest length of which, from Suez to Behring's Strait, is about 7370 geographical miles; and the breadth from Cape Comorin, in India, to Cape Taimura, in Siberia, about 4320. The superficial area is estimated at upwards of 12,000,000 square geographical, or 16,000,000 square English miles. Asia is bounded on the north, by the Arctic Ocean; on the east and south-east, by the Pacific; on the south, by the Indian Ocean; and on the west, by the Urals, Caspian Sea, Caucasus, Black Sea, Archipelago, Mediterranean Sea, Isthmus of Suez, and Red Sea.

POLITICAL DIVISIONS.

Ottoman Empire, comprising *Asia-Minor* and *Syria*, with part of *Armenia*, and the countries watered by the Euphrates and Tigris, or the ancient *Assyria*, *Babylonia*, and *Chaldæa*. — *Chief Towns:* Smyrna, Kutahya, Erzroum, Antioch, Aleppo, Damascus, Jerusalem, Baghdad, Bussrah.

Arabia, possessed generally by numerous independent tribes; but the north-western part, and nearly the whole coast of the Red Sea, with the holy cities of Mecca and Medina, are under the dominion of the Ottoman Sultan. In the south-western corner is situate the considerable territory of the *Imam of Sana;* while the south-eastern corner and all the coast is under the dominion or influence of the powerful Sultan, usually miscalled the *Imam of Muskat*, who even extends his sway along the coast of Africa as far as Zanzibar.

The Kingdom of Iran or Persia. *Chief towns:* Tehran, Ispahan, Tauris, Shiraz, Meshed. *

Turkestan, possessed by numerous independent khans, the principal of whom are the khans of Bokhara, Khiva, Kokand, &c. *Chief towns:* Bokhara, Khiva, Samarkand, Khojand, Tashkend, Balkh.

Afghanistan, possessed by the numerous tribes of a warlike people who call themselves *Pustanneh*, but whom the Persians call *Affghanee*. They were recently subject to the kingdom of Cabul, established about the middle of last century by Ahmed Shah Abdallee, but are at present in a state of anarchical independence. *Chief Towns:* Cabul, Candahar, Ghizni, Peshawar. Herat and a small adjoining district form an independent kingdom.

Beloochistan, a desert country possessed by the Beloochees, a nomade people, most of whom acknowledge the supremacy of the Khan of Kelat or Kulat.

India. See separate table.

Eastern Peninsula, containing the kingdoms of *Burmah* and *Siam*, the *Empire of Annam;* the Malay states of *Quedah*, *Perak*, *Salangore*, *Johore*, *Pahang*, *Kemamang*, *Tringano*, *Calantan*, *Patani;* the British provinces of *Tennasserim*, *Wellesley*, and *Malacca*, with the adjacent islands of *Penang* and *Sincapore;* and the country of the *Laos*, called also *Shyans* or *Shans*.

Chinese Empire, comprising *China*, *Corea*, *Loochoo*, *Formosa*, *Manchooria*, *Mongolia*, *Thibet*, *Soongaria*, and *Little Bukharia*, with a population variously estimated between 130 and 372 millions! See separate table.

Russian Empire, comprising *Siberia*, *Georgia*, *Mingrelia*, *Imeritia*, and portions of *Armenia*, *Azerbijan*, and *Ghilan;* the *Caucasus*, and the *Steppes of Astrakhan* and the *Kirghiz*. See illustrations of Russian Empire, in Europe.

Little Thibet. A mountainous region possessed by independent chieftains or princes, some of whom claim descent from Alexander the Great.

The Empire of Japan, consisting of a cluster of large islands to the north-east of China.

* The vowels in Asiatic names are pronounced like those of the *Italian*, and not of the *English* alphabet. For example, Iran, Tehran, Ispahan, Shiraz, Cabul, Ghilan, Mazanderan, are pronounced — Eerawn, Teghrawn, 'Spahawn, Sheerawz, Kawbul, Gheelawn, Mazand'rawn.

INDIA.

India is situate in the Northern Hemisphere, between 7° 57′ and 35° N. lat., and between 66° 58′ and 95° E. long., measuring 1870 English miles in its greatest length from north to south, and nearly as much in its greatest breadth, in lat. 26° north, from the western border of Sinde to the eastern border of Assam. The natural boundaries of India are clearly defined. On the north it is bounded by the long range of the Himalayas; on the south, by the Indian Ocean; on the east, and south-east, by the range of mountains which separates Assam and Arracan from the Birman Empire, and terminates at Cape Negrais; and on the west, by the Suleiman mountains, which extend from the Suffeid Koh, near Cabul, to Ras Moaree, and are connected, at their northern extremity with the protruding spurs of the Himalayas. The whole country within these extensive limits is, with partial exceptions, either directly governed by the British East India Company, or more or less connected with it as tributary or allied. The superficial area exceeds 1,200,000 square miles.

India has never formed one empire, and has therefore not been subjected to any general system of administrative divisions. Different parts of the country, however, have obtained certain popular and geographical names, which are of frequent occurrence, and must therefore be mentioned as a necessary illustration of the geography of the country. 1. The mountainous region between the Sub-Himalayas and the great chain, has been called Northern India, and the British portion is known familiarly as The Hills. Northern India comprises the beautiful valley of *Cashmere*, drained by the River of Jylum; the districts of *Kunnawar*, *Gurwal*, *Kumaon;* the Kingdom of *Nepaul;* the territory of *Sikim;* and *Bootan*, or the country of Deb Rajah. 2. The Punjab or Punjaub (the country of the Five waters,) is the region watered by the Indus and its great tributaries, the Vehut, Chenab, Ravee, Gurrah, Beeas, and Sutlege. It is divided into two portions by the *Salt Range*, a chain of hills extending across the bed of the Indus, and forming a table-land of considerable elevation on its northern side. 3. Rajpootana, called also Rajwara and Rajahstan, (the country of the Rajpoots) occupies the middle space between the Indus and the Ganges, on both sides of the Aravulli mountains, and extends southwards to the Runn. 4. Hindoostan is the popular name of the whole country which extends from the Hills, the Punjaub, and Rajwara, to the frontiers of Bengal, and comprises the Mogul subahs or provinces of *Delhi*, *Agra*, *Allahabad*, *Oude*, and *Bahar;* and the districts or regions of *Hurrianee*, *Rohilcund*, *Doab*, and *Bundelcund*. 5. Bengal, the alluvial plain at the mouths of the Ganges and Brahmapootra, intersected in all directions by their innumerable branches. 6. Malwah, or Central India, a table-land, supported by the Vindhya and Aravulli mountains, about 2000 feet above the level of the sea, and sloping to the north-east. 7. Gujrat or Guzerate, the country on both sides of the Gulf of Cambay, including also the large peninsula of *Kattywar* or *Cattiwar*, which lies between the Gulf of Cutch and the Gulf of Cambay. 8. Cutch or Kach'h, a small peninsula to the west of Gujrat, between the Runn and the sea. 9. Sinde, the region at the mouth of the Indus. 10. The Deccan, Dekkan, or Dukkhun, extending from the Nerbuddah on the north, to the Kistnah and Tumbudrah rivers on the south: comprising the old Mogul provinces of *Khandeish*, *Berar*, *Aurungabad*, *Bejapoor or Visiapoor*, *Beder*, *Nandere*, and *Hydrabad*. The name, however, is now generally restricted to that province of the Bombay Presidency of which Poonah is the capital, and which lies between the Ghauts and the western border of the Nizam's territories. 11. The Carnatic, is divided into two regions, styled respectively Payen-ghaut and Bala-ghaut,* or the Lower and the Upper; the former comprehending the low maritime plains along the coast of Coromandel, from the Kistnah to Cape Comorin; the latter comprehending the elevated table-land between the Eastern and the Western Ghauts, including Mysore. 12. Malabar, a long narrow strip between the Western Ghauts and the sea, extending 350 miles to the north-west of Cape Comorin, and including Travancore, Cochin, and the British province of Malabar. 13. Canara, a similar strip, to the north of Malabar. 14. The Concan or Konkan, a similar strip extending northward from Canara to Gujrat, and formerly included in the Mogul provinces of Aurungabad and Bejapoor. 15. Gundwana and Orissa, a wild, and in some parts still unexplored, region, between Bengal, the Deccan, and Carnatic; the maritime portion being Orissa, the inland Gundwana, but with no well defined boundaries between them, or in any other direction, except the sea-coast. The south-western part of Orissa has been known by the name of the Northern Circars, since it was acquired by the Presidency of Madras in the year 1766. 16. Assam, the valley of the Brahmaputra, to the north-east of Bengal. 17. Arracan, a narrow strip of country, to the south-east of Bengal, between the Anapectomiou mountains and the sea.

The political divisions of India may be arranged into nine classes:—1. Territories directly subject to the officers of the British East India Company; 2. Princes, with whom the British government have treaties of alliance, offensive and defensive, who have a right on their part to claim protection, external and internal, from the British government, and grant to the latter the right of interference in their internal affairs; 3. Princes with whom the British government have treaties of alliance, offensive and defensive, but without the right of internal interference, except when required by the princes themselves; 4. Princes mostly tributary, who acknowledge the supremacy of the British government, and are bound to co-operate with them, but who are supreme rulers in their own dominions; 5. Princes, with promise of guarantee and protection from the British government, but supreme in their own dominions; 6. Princes with whom the British government have relations of amity and friendship; 7. Princes protected by the British government, with right to the latter to control their internal affairs; 8. Independent native states; 9. Possessions of foreign powers. The following table exhibits the estimated extent and population of these various territories:—

* The first of these names signifies literally, "Below the passes;" the other, "Above the passes." *Ghaut* means a mountain pass, or, generally, an ascending or descending road or stair; but the name is usually, though improperly, applied by Europeans to the mountains themselves, which are traversed by the *Ghauts*.

	*1,217,632	165,089,500

* These numbers are only approximations, and those of the population are almost entirely conjectural. The Rajah of Mysore has, for some years, been suspended from his regal functions on account of misgovernment, and his states administered by an agent or commissioner of the Madras Presidency. The Rajahs of Sattara and Sawuntwaree, and some others, have been nearly falling into the same predicament; and the Ameers of Sinde have been recently (1843) deposed, and their dominions, except that of Khyrpoor, have now become a British province. Daoudputra has also been recently added to the list of protected states. Lahore has been divided into the two states of Lahore and Jamoo, the latter politically dependant on the British Empire, and the former, directly subject.

DEPENDENCIES OF BRITISH INDIA.

Ceylon.—This magnificent island, "the gem of the Eastern seas," as it has been called, is situate near the southern extremity of the Carnatic, and separated from it by the Strait of Manaar, the navigation of which is completely obstructed by Adam's Bridge, a ridge of rock and sand which extends across it. The greatest length of Ceylon is about 270 miles from north to south; the greatest breadth from east to west, about 140; the superficial area is about 25,000 square miles. The population, according to the census of 1836, amounted to 1,093,828. The interior of the island is formed of ranges of elevated table-land and lofty mountains, while nearly all round the coast there is a broad belt of rich alluvial soil, well watered by numerous streams. Ceylon is completely under the influence of the monsoons; the north-east prevailing from November to February, and the south-west from April to September, the intervening months having variable winds or calms. The eastern side of the island, is generally hot and dry, the western temperate and humid, and the climate of the southern coast is more congenial to Europeans than, perhaps, any part of the continent of India. In Ceylon, as in India, they have taken advantage of the interior highlands to form delightfully cool and invigorating retreats. Ceylon is entirely a crown colony, unconnected with the East India Company, the governor and officers of government being appointed directly by the sovereign of Great Britain. The revenue, in 1836, amounted to L.400,533, and the civil and military expenditure to L.325,275. For several years every thing in the island has experienced the most rapid and beneficial improvement; excellent roads, as good as the best in Britain, have been formed to facilitate communication; and Ceylon promises to be, at no distant date, one of the most splendid possessions of the crown.

Pulo-Penang,* or Pinang, (officially Prince of Wales Island,) is situate two miles off the western coast of the Malayan peninsula, between 5° 15′ and 5° 29′ N. lat., and 100° E. long., and forms an irregular four-sided area of 160 square miles, with a group of lofty hills in the centre. Connected with Penang there is, on the opposite mainland, a territory called Wellesley Province, extending 35 miles along the coast and four inland. The total population of the two settlements amounted, in 1828, to 60,153.

The city of Malacca, situate on the south-west coast of the peninsula, in lat. 2° 14′ N. is the capital of a territory extending 40 miles along the shore and 30 inland, containing, however, only about 800 square miles, and a population of 34,333. At the southern extremity of the peninsula is the small island of Sincapore, or Singapore, containing an area of 270 square miles, where a settlement was formed in 1818, and has since risen to a considerable degree of importance as an *entrepot* for the trade of the eastern islands. Population in 1834, 26,349, of whom only 130 were whites, the rest being Malays, Chinese, and natives of the other eastern countries.

The provinces of Martaban, Re or Ye, Tavoy, and Mergui, to the south-east of the Birman Empire, were acquired from the Birmans in 1826, and comprise an area of about 32,800 square miles, with a very scanty population, scarcely exceeding 50,000 souls. The principal town is *Moulmein*, *Maulmain*, *Moelmin*, or *Maulamyaing*, a very thriving settlement on the south or left bank of the Saluen River, opposite Martaban, the frontier town of Birmah.

Penang, Malacca, Sincapore, the island of Labuan, on the north-west coast of Borneo, and the Birman provinces, are political dependencies of the Government of British India.

* The word *Pulo*, prefixed to this and many other names in the East Indian Archipelago, is the common Malay word for *island*. Pulo-Penang, in particular, means "Betel-nut Island," the Malays conceiving its form to bear some resemblance to that vegetable production.

CHINA.

China proper is divided into eighteen provinces, which are subdivided into *Foo*, *Chew*, and *Heen*. The extent and population of these provinces are stated in the following table:

PROVINCES.	Area in Square Eng. Miles.	Population in 1813. Absolute.	Population in 1813. Relative.	CHIEF TOWNS.
Pe-che-lee	58,949	27,990,874	474	Peking.

Shen-si	154,008	10,207,256	165	Si-ngan-foo.
Kan-suh		15,193,125		Lan-chew-foo.
Total	1,297,999	367,659,901	283	Pe-king.

The maritime cities opened to European commerce are Canton, Amoy, Fow-chew-foo, Shang-hae, and Ning-po.

AFRICA.

Africa is situate in both the Northern and Southern Hemispheres, between 37° 20′ north, and 34° 50′ south latitude; and between 51° 22′ east, and 17° 32′ west longitude. The greatest length from Cape Serrat, in Tunis, to Cape Lagulhas, its southern extremity, exceeds 5000 English miles; and its greatest breadth, from Cape Verde to Cape Gardafui, is about 4800. The superficial area amounts to 8,902,000 square geographical, or nearly 12,000,000 of square English miles.

Africa is usually divided by geographers into two great sections, called North Africa and South Africa, separated by the Equator, or rather, perhaps, by a line drawn obliquely from Cape Gardafui to Biafra. North Africa comprehends two great regions, which may be named the Region of the Nile and Moghreb;* the former comprising *Abyssinia*, *Nubia, and Egypt*; and the latter divided by the Arabs into four parts, viz. 1. Beled-ul-Berabers,* the country of the Berabers, or Barbary; which is subdivided into *Barka*, *Afrikiyeh*, (Tunis and Tripoli,) *Moghreb-ul-Ausat* (the Middle-west, or Algiers,) and *Moghreb-ul-Acksa*, (the Far west, including Marocco, Fez, Tafilelt, and Sigilmessa;) 2. Beled-ul-Jerid,* (the Date-stick Country,) a long narrow tract between the Atlas mountains and the Desert; 3. Es-Sahara, (the Desert;) and, 4. Beled-es-Soudan, (the Black Country, or the Country of the Blacks, called also by Europeans *Nigritia* or *Negroland*.) The last of these portions may be farther subdivided into four parts:—1. *Eastern Soudan*, or the basin of the Tchad, and other great lakes; 2. *Western Soudan*, or the basin of the Joliba-Quorra; 3. *Guinea*, the maritime region between the sea and the mountains of Kong; and, 4. *Senegambia*, the country watered by the rivers Senegal and Gambia, and their branches. None of these divisions have any well defined boundaries, except where they border upon the sea.

South Africa comprehends *Congo*, *Loango*, *Angola*, and *Benguela*, on the west coast; *Ajen*, *Zanguebar* or *Zanzibar*, *Mozambico*, *Sofala*, and *Caffraria* or *Kafferland*, on the east coast; and the *Colony of the Cape of Good Hope*, or *South Africa*, at the southern extremity. The whole of the interior is unknown, and none of the countries above mentioned, except the last, have definite boundaries. To these divisions may be added the islands, viz., *Madagascar*, *Bourbon*, *Mauritius*, *Comora*, *Socotra*, and others, on the east coast; *Madeira* and *Porto Santo*, the *Canary Islands*, *Cape Verd Islands*, *St Helena*, *Ascension*, *Fernando-po*, *Principé*, *St Thomas*, and *Annobon*, on the west.

* *Moghreb* signifies the *West;* and all the people of Western Africa are called by the Eastern Arabs *Moghrebins* or *Moggrubbins* (*i. e.* Westmen or Westlanders.) *Beled* is variously expressed in Roman letters.—Beled, Belled, Biled, Blad, Bled. *Jerid* is the name of the dry branches of the date tree, used as javelins.

EGYPT.

Egypt is situate in the north-eastern corner of Africa, and in the lower part of the region of the Nile; but of the large area of 150,000 square miles comprised within its nominal limits, little more than a tenth part is occupied by cultivated soil, the remainder consisting of salt-marshes, sandy plains, and rocky and barren mountains. The cultivable lands of Egypt consist of the long narrow valley of the Nile, which extends more than 500 miles along the course of the river, with a breadth varying from two miles and a half to ten; and a large triangular plain, measuring about 150 miles along the sea-coast, and about 100 inland, to the point where it joins the valley. Besides these there is likewise the province of Faioum, which is watered by a branch of the Nile, and comprises about 340 square miles.

The inhabitants may be classed as Arabs, Copts, Turks, Syrians, Jews, Greeks, Armenians, Franks, and other foreigners. The Arabs form the great body of the people; the Copts are the reputed descendants of the ancient native Aiguptioi or Egyptians; and the Turks are the dominant race. The numbers of each class are nearly as follows:—

Arabs,	1,750,000
Copts,	150,000
Turks,	10,000
Syrians,	5,000
Greeks,	5,000
Armenians,	2,000
Jews,	5,000
Franks and other foreigners,	70,000
	1,927,000

SOUTH AFRICA, CAPELAND, OR CAPE COLONY.

This territory is situate at the southern extremity of Africa. It was originally possessed by the Hottentots and Caffres. In the seventeenth century it was colonized by the Dutch, and, in 1806, was taken possession of by the British Government, and confirmed to Britain by the treaty of Vienna in 1815. The territory is divided into two provinces, named the Western and the Eastern; and these are subdivided into districts, as stated in the following Table:—

Provinces.	Districts.	Area in Sq. Miles.	White Population.	Black Population.	Total Population.	Chief Towns.
Western.	Capetown,	9½	14,041	5,702	19,743	Capetown.

AMERICA.

The continent of America extends from the 54th degree of south latitude to the 71st degree of north latitude; its extreme length, from the Straits of Magellan to Behring's Straits, being 10,500 English miles. Beyond these limits, the islands of Tierra del Fuego extends one degree farther south; and, on the North-east, Greenland and the Arctic Islands, have been traced to 78° of latitude. The extent of the continent, and the islands connected with it, is estimated as follows:—

North America,	7,400,000
South America,	6,300,000
West Indies, Tierra Del Fuego, and islands in the east and west coasts,	150,000
Greenland, and Arctic islands to the north of Hudson's Strait,	900,000
Square English Miles,	14,750,000

NORTH AMERICA.

North America lies between 8° and 72° north latitude, and 55° and 168° west longitude. The greater part of it forms a compact mass, but the outline of its coasts is exceedingly irregular, and nearly one-third of its entire length consists of a long narrow tract between the Atlantic and the Pacific Oceans. The longest straight line which can be drawn overland, extends from Cape Lisburn, in Russian America, to Cape Florida, a distance of 4260 miles; but the length of a somewhat winding line, stretching from the Isthmus of Panama, to the Arctic Ocean, west of Mackenzie's river, falls little short of 5900. Its greatest breadth, between 62° and 54° north latitude, is nearly 3000 miles; while to the south of the 30th parallel it becomes gradually narrower, till at Panama it is not more than 30 miles across.

Although a large portion of North America is still occupied by the aboriginal tribes, and there are extensive tracts unfitted for the residence of civilized man, yet the whole continent has been, at least nominally, divided by lines of demarcation among certain European powers, and their colonists.

1. *Danish America* comprises Iceland, Greenland, and the islands of Santa Cruz, St Thomas, and St John, in the West Indies.

2. *Russian America* consists of the north-western peninsula, with a strip of coast reaching to the most southerly point of Prince of Wales' Island. The only establishments, however, besides the capital, within this vast territory, are a few factories and forts of the Russian American Fur Company. The capital is *New Arkhangel*, on Sitka Island, a town with 1000 inhabitants. The company have also a fortified factory at Bodega, on the coast of California.

3. *British America* comprises all that immense region which lies between the Polar Basin and the United States. The boundary between the territories of Great Britain and the United States, is, by the convention of 1846, continued westward along the 49th parallel of north latitude to the middle of the channel which separates the continent from Vancouver's Island, and by the Straits of Fuca. The British territory is divided into Hudson's Bay and North-western territory, Labrador, Upper Canada, Lower Canada, New Brunswick, Nova Scotia, and the islands of Newfoundland, Cape Breton, Prince Edward, Anticosti, Bermudas, and Bahamas; several West India Islands, and Honduras in Central America.

4. *The United States of North America* occupy the middle region of the continent, extending from the Atlantic to the Pacific. It also comprehends that large territory which was lately the republic of Texas.

5. *The Republic of Mexico* occupies the peninsular region south-west of the United States.

6. *The Republic of Guatimala*, or *United States of Central America*, occupies the long narrow tract between the Caribbean Sea and the Pacific Ocean. The greater part of the territory is yet a wilderness.

7. *The Republic of Hayti*, comprising the island formerly named Hispaniola and San-Domingo.

8. *Spanish America*, now consisting only of the islands of Cuba and Porto Rico.

9. *French North America* comprehends the islands of St Pierre and Miquelon in the Gulf of St Lawrence, and Guadalupe and Martinique, with their dependencies in the West Indies.

10. *Dutch North America* comprehends the islands of St Eustatius, and Saba, and part of St Martin in the West Indies.

11. *Swedish America*, which is limited to the small island of St Bartholomew in the West Indies.

* For this very awkward and indistinctive name, Washington Irving has proposed to substitute *Appalachia* or *Alleghania* as the national appellation; the latter, in its English form, *Alleghany*, seems to be the preferable name.

UNITED STATES OF NORTH AMERICA.

The confederacy consists at present of thirty-one States, four territories, and one district. Since the date of last census in 1840, the following States have been added, viz.: Florida, Texas, California, Wisconsin, and Iowa; and the territories of Oregon, Minesota, Utah, and New Mexico.

BRITISH AMERICA.

The British dominions in North America are divided into the four provinces of Canada, New Brunswick, Nova Scotia, Prince Edward's Island, and Newfoundland; besides the Hudson's Bay and north-west territory, and the Bermudas or Somers' Islands, in the Atlantic Ocean. To each of these provinces a constitution has been granted, founded on that of the mother country; and each has a governor, or lieutenant-governor, a legislative council appointed by the Crown, and a house of commons or representatives chosen by the people.

WEST INDIES.

These islands are divided into four principal groups, as follows:—

1. The Greater Antilles, Cuba, Hayti, Jamaica, Porto-Rico.

2. The Caribee Islands, consisting of Tobago, and all the islands between it and Porto-Rico; subdivided into, 1. The *Leeward Islands*, consisting of Dominica, and all the islands to the north of it; and, 2. The *Windward Islands*, consisting of Martinique, with the islands which lie to the south of it. St Thomas, St John, Santa Cruz, Tortola, Virgin-Gorda, and their dependencies, are also called the *Virgin Islands*.

3. The Bahamas or Lucayos, consisting of all the low islands to the north of Cuba.

4. The Smaller Antilles, consisting of the islands along the coast of South America, viz. Trinidad, Margarita, Tortuga, Salada, Orchilla, Buen-Aire, Curaçoa, and Oruba.

MEXICO.

The Republic of Mexico was divided, by the constitution of 1824, into 19 States, 4 Territories, and the Federal District; but a decree of 1835 provided for a new division of the country into departments. Before the declaration of independence, February 24, 1821, Mexico or New Spain, was a viceroyalty of Spain, and was divided into 12 intendencies and 3 provinces, and now contains a population of about 7,687,000.

TEXAS.*

This lately independent republic is situate on the north-west side of the Gulf of Mexico. As a republic, it claimed the whole country from the south-western frontier of the United States, to the Rio Bravo del Norte, and along that river to its sources in the 42° north latitude, comprising altogether an area of between 400,000 and 500,000 square miles. The superficial extent, as comprised within the limits defined by the first Texan Congress, extends to 397,319 square miles. It was formed by a number of citizens of the United States, who obtained grants of land from the Mexican government, and in 1835 declared themselves independent. A convention of delegates, in 1836, adopted a constitution closely resembling that of the United States. In 1845, by an arrangement entered into at Austin between the American government and that of Texas, it became one of the confederacy of the United States. The executive authority is vested in a governor, and in other respects its internal government is similar to that of the other states. It is divided into eight judicial districts. Its public debts amount to 9,949,007 dollars, and its yearly revenue in 1840 amounted to 802,054 dollars. The population is differently stated, but may probably amount to 350,000, chiefly Anglo-Americans.

* The Anglo-Americans, according to the analogy of their language, pronounce this name Tecksas; the Mexicans, according to the analogy of theirs, pronounce it Teghas, or Teh-has.

CENTRAL AMERICA.

This country, which was formerly a province of Spain, and styled the Captain-Generalship of Guatemala, was declared independent by the people on the 15th of December, 1821, and was incorporated with Mexico; but on the fall of Iturbide, it disconnected itself from Mexico, and was formed into a separate independent republic under the title of Federal Republic of Central America. It is now divided into five Independent States, viz.:—1. *Guatemala*, population 935,000; 2. *San Salvador*, population 363,009; 3. *Nicaragua*, population 363,000; 4. *Costa Rica*, population 198,000; 5. *Honduras*, population 308,000.

SOUTH AMERICA.

This extensive continent is a peninsula, connected with North America by the narrow isthmus of Panama or Darien, which in one part is only thirty miles across, and not more than 633 feet above the level of the Pacific Ocean. The greatest length of the peninsula from north to south is 4550 miles, and its greatest breadth 3200. It covers an area of 6,500,000 square miles, about three-fourths of which lie between the tropics, and the other fourth within the southern temperate zone.

Divisions.—New Granada, Venezuela, Equador or Ecuador, Peru, Bolivia, or Upper Peru, Chili, the Argentine Republic, or United States of Rio de la Plata, Paraguay, Uruguay, Brazil, Guyana, Patagonia, and the Archipelago of Tierra del Fuego.

Soon after the invasion of Spain by the French in 1808, a revolutionary spirit began to manifest itself in the Spanish colonies; and in a short time all these colonies successively declared themselves independent, and formed republican constitutions, most of which were modelled, in a great measure, upon the constitution of the United States. The people, however, were little accustomed to free institutions, and were ill prepared, by character, education, and habits, to sustain a republican government; and their condition, since the declarations of independence, has been, for the most part, a state of revolution, disorder, and misrule. But the history and statistics of these republics are very imperfectly known.

OCEANIA.

The islands to the south-east of Asia have been usually considered as appendages of that continent; but they are now classed by the Continental geographers along with the islands of the Pacific Ocean, as a fifth division of the World, under the name of Oceania or Oceanica. Oceania is divided into Western Oceania, or Malaysia; Central Oceania, or Australasia; and Eastern Oceania, or Polynesia.

MALAYSIA.

This division derives its name from the Malays, a peculiar variety of the human race, to which the dominant people of the Archipelago belong; and may be subdivided into the following groups, viz.:—

1. The *Sumatran group*, comprising Sumatra, Banca, Billiton, Lingan, Panjour, and other islands on the east and west coasts of Sumatra.
2. The *Javan group*, comprising Java, Madua, Bali, Lombock, &c.
3. The *Sumbava-Timor group*, comprising Sumbava, Flores, Solor, Sabrao, Lomblem, Panter, Ombay, Timor, Simao, Rotti, Dao, Savou, Sumba, or Sandlewood, &c.
4. The *Moluccas*, comprising Amboyna, Ceram, Booro, Goram, Banda, Lonthoir, Pulo Aii, Letti, Moa, Lackar, Sermatta, Kissir, Wetter, Grand Kay, Timorlaut, Gilolo, Ternate, Tidor, Batchian, Pulo Obi, Mysol, Popo, &c.
5. The *Celebes group*, comprising Celebes, Sangir, Siao, Banca, Xoulla, Bouton, Salayer, &c.
6. The *Group of Borneo*, comprising Borneo, Natuna, and other islands.
7. The *Philippines*, consisting of about a thousand islands, the principal of which are Luçon, Mindanao, Palawan, &c.

AUSTRALASIA.

This name signifies "South Asia," and was originally intended for New Holland, but is now so extended as to include not only that great island, but also Papua, or New Guinea, Wageeoo, Arroo, Louisiade, New Britain, New Ireland, the Solomon Isles, New Hebrides, New Caledonia, Norfolk Island, New Zealand, Van Diemen's Land, and a number of smaller islands between and adjoining to these.

POLYNESIA,

Or the "Many Islands," is the name given to the innumerable islands scattered over the Pacific Ocean to the south of the 40° of north latitude, and west of the 188° meridian west. Many of them are arranged in groups or clusters, while others occur at solitary distances. The principal groups are:—

The *Hawaiian Archipelago* (*Sandwich Islands;*) the *Georgian* and *Society Islands*, including *Tahiti* (*Otaheite;*) the *Low Islands;* the *Marquesas*, and *Washington Islands;* the *Harvey Islands;* the *Navigator's Islands;* *Dangerous Archipelago;* *Tonga*, *Friendly* and *Feejee Islands;* the *Carotine Islands;* the *Marian* or *Ladrone Islands;* the *Bonin Islands;* *Easter Island*, &c. &c.

The Polynesian Islands and New Zealand are inhabited by various tribes, all referrible to the Malay variety of mankind, who speak various dialects of one common language. Of these the New Zealanders are the finest race, though some others have made greater progress in civilization, particularly the Hawaiians, who form a very enterprising commercial nation, under a monarchical government.

Of the Malaysian islands, Java, Madura, Banca, Billiton, Lingan, Tanjong-pinang, Padary, Palembang, and their dependencies in Sumatra; most of the Moluccas, Macassar, and other portions of Celebes; and part of Timor, belong either mediately or immediately to the King of Holland, whose Governor-General resides at the city of Batavia, in Java. The Portuguese possess a part of Timor. The Spaniards possess portions of Luçon, Mindinao, and others of the Phillippines; their capital is the city of Manilla, in Luçon. The rest of Malaysia is possessed by numerous independent princes and tribes. The dominant people are chiefly of the tawny or brown variety of mankind; but several of the smaller islands, the interior of Borneo and Sumatra, and all Australasia, except new Zealand, are occupied by people of the Ethiopic or Negro race.

AUSTRALIA.

Australia is now, in Britain at least, the generally received name of the large island formerly called New Holland, which contains a superficial area of more than 3,000,000 of square miles. Within the last half century, various British colonies, distinguished by the names of New South Wales, Victoria, North Australia, South Australia, and Western Australia, have been planted on its shores.

New South Wales was discovered by Cook, who sailed along the whole coast, from Cape Howe to Cape York, in the year 1770. In January, 1788, a convict settlement was established at Port Jackson; but for many years the progress of discovery and improvement was very slow. It was only in 1813, that the first passage across the Blue Mountains, a range which runs parallel to the coast, was effected; but since that time, colonists have flocked to the settlement, and its progress has been unusually rapid. The country around Sydney, the capital, is divided into twenty counties, named, Argyle, Bathurst, Bligh, Brisbane, Camden, Cook, Cumberland, Durham, Georgiana, Gloucester, Hunter, King, Macquarrie, Murray, Northumberland, Phillip, Roxburgh, St Vincent, Wellington, Westmoreland. The Crown lands beyond the limits of the counties are divided into eight districts, named, Port Macquarrie, New-England, Liverpool Plains, and Bligh, along the northern borders, between the sea and the Macquarrie river; Wellington, between the Macquarrie and the Lachlan; Lachlan, between the Lachlan and the Morrumbidgee; Morrumbidgee, between that river and the Murray, and Mancroo on the East coast. The population of New South Wales, on the 31st of December 1851, amounted to 197,168, comprising 113,032 males, and 84,136 females. Since March 1851, the increase by immigration was 7891; by births, 6396; the decrease by departures was 4902; by deaths, 2167; shewing an actual increase, during that period, of 7218. The total number of immigrants for the preceding twenty years was 85,179. The number of births during the year 1851, was 7675; of marriages, 1915; of deaths, 2600. The total number of acres in crops in that year was 152,027, being an increase over the preceding, of 5500 acres. The revenue in 1851 amounted to £486,698, and the expenditure to £444,108.

Victoria, formerly called Australia Felix, and Port Philip, lies S.W. of New South Wales, between latitude 34° and 39° S.; and longitude 141° and 150° E., having an estimated area of 80,000 square miles. Its principal towns are, Melbourne, Geelong, and Portland. By the census of 1846, its population was only 32,879; but by that of March 1851, it had increased to 77,345, comprising 46,202 males, and 31,143 females. Of these, 20,470 were born in the colony; 29,285 in England and Wales; 14,618 in Ireland; and 8053 in Scotland;—37,433 were Episcopalians; 11,608 Presbyterians; and 18,014 Roman Catholics

North Australia extends westward from the Gulf of Carpentaria. The only settlement yet established is at Port Essington, on the north side of Coburg peninsula, where a new town, named Victoria, was founded in 1838.

South Australia comprises that portion of New Holland which is situate between the 132° and 141° of east longitude, and the tropic of Capricorn, and the south coast. It has been recently erected into a colony, and the first settlements have been formed upon the east side of the Gulf of St Vincent. The capital has been fixed at the town of *Adelaide*, which already contains 15,000 inhabitants. At 31st December 1848, the population of the colony amounted to 38,666.

Western Australia.—The first settlers in this colony arrived at the Swan River in 1829. The limits of the colony are between 31° and 35° south latitude, and between the west coast and 129° east longitude, comprising a territory 1280 miles in length, from north to south, and 800 in breadth. The principal settlements are at Swan River, but settlers have also spread to a considerable distance inland and along the coast, and fifteen counties have been already formed, viz., Twiss, Perth, Murray, Wellington, Nelson, Sussex, Lanark, York, Grantham, Wicklow, Goderich, Stirling, Hay, Plantagenet, Kent. The principal towns are *Perth* and *Freemantle*, on the Swan river, in Perth county: and *Albany*, on King George's Sound in Plantagenet county. The population at 31st December 1848, amounted to no more than 4464.

Gold Regions of Australia.—The discovery of gold fields in New South Wales and Victoria, in 1851, has caused an extraordinary influx of people into these territories. The gold was first discovered in the Bathurst district of New South Wales, and the digging was commenced there in May of that year; but it was soon afterwards discovered in much greater abundance in Victoria. It was estimated that, on the 1st of April 1852, about 50,000 persons were engaged at the diggings in Victoria, and there were then probably about 15,000 at New South Wales. The total quantity of gold exported from New South Wales, up to 26th July 1852, amounted in value to £1,759,745; and from Victoria, to about £2,400,000. The quantity of gold exported from Melbourne during the week preceding the 1st of November 1852, was 162,501 oz.

Tasmania, or Van Dieman's Land, is a large island separated from N. S. Wales by Bass' Strait. It is about 210 miles in length from north to south, and about 150 from east to west, comprising an area of 24,000 square miles, or 15,000,000 of acres. The southern part of the island was discovered in 1642, by Abel Tasman, a Dutchman, who gave it its present name in honour of Anthony Van Dieman, the Governor-General of the Dutch East Indies. Its insularity was proved by Messrs Bass and Flinders, who sailed round it in 1799. A small penal settlement for convicts was established in 1803; and early in 1804, Governor Collins arrived in the river Derwent, took formal possession of the country, and founded Hobart Town, now the capital of the island. The population at 1st March 1851, amounted to 70,130, viz. free population, 53,031; convict population 17,099.

Norfolk Island, 900 miles E.N.E. of Sydney, is a penal settlement reserved exclusively for convicts.

New Zealand consists of two large islands, nearly adjoining each other, which extend 800 miles in length, with an average breadth of only 100, and a smaller island at the southern extremity. Along its great extent of coast there are numerous harbours of unrivalled excellence, into some of which fine rivers enter, after having passed through districts of great extent and fertility. The insular position of the country, and the lofty mountains which intersect it, insure a perpetual supply of moisture, and hence the country abounds in beautiful forests. The climate is one of the finest and most equable in the world; and, indeed, no other country possesses so many requisites for becoming a great commercial and naval power. The natives are subdivided into very small communities or families, without any individual who possesses the slightest political authority, and are excessively jealous of each other. They are thus likely to become an easy prey to the European colonists, who are intruding themselves upon them; and it is not unlikely that this, the finest of the Polynesian races, may ere long become extinct, or at best, the hewers of wood and the drawers of water to their powerful invaders. These islands were discovered in 1642 by Abel Tasman, a Dutch navigator, who bestowed upon them their present name, in honour of the province of Zealand, in Holland. They were more fully explored by Cook, whose name is attached to the strait which he discovered between the two great islands. The northmost island is named *Eaheinomawee*, the middle one *Tavai-Poennamo*, and the southmost *Stewart's Island*. To the two former have been latterly attached the names of New Ulster and New Munster.

In May, 1840, the sovereignty of Britain over these islands was declared by Captain Hobson, the first governor appointed by the Crown. He has founded his capital at Aukland, on Waitemata Harbour, one of the most eligible places in New Zealand. An English company has founded the settlement of Wellington, at Port Nicholson, on Cook's Strait; New Plymouth, on the S.W. coast of the North Island; and Nelson, on the south side of Cook's Strait; and the tide of emigration is flowing strongly towards these islands.

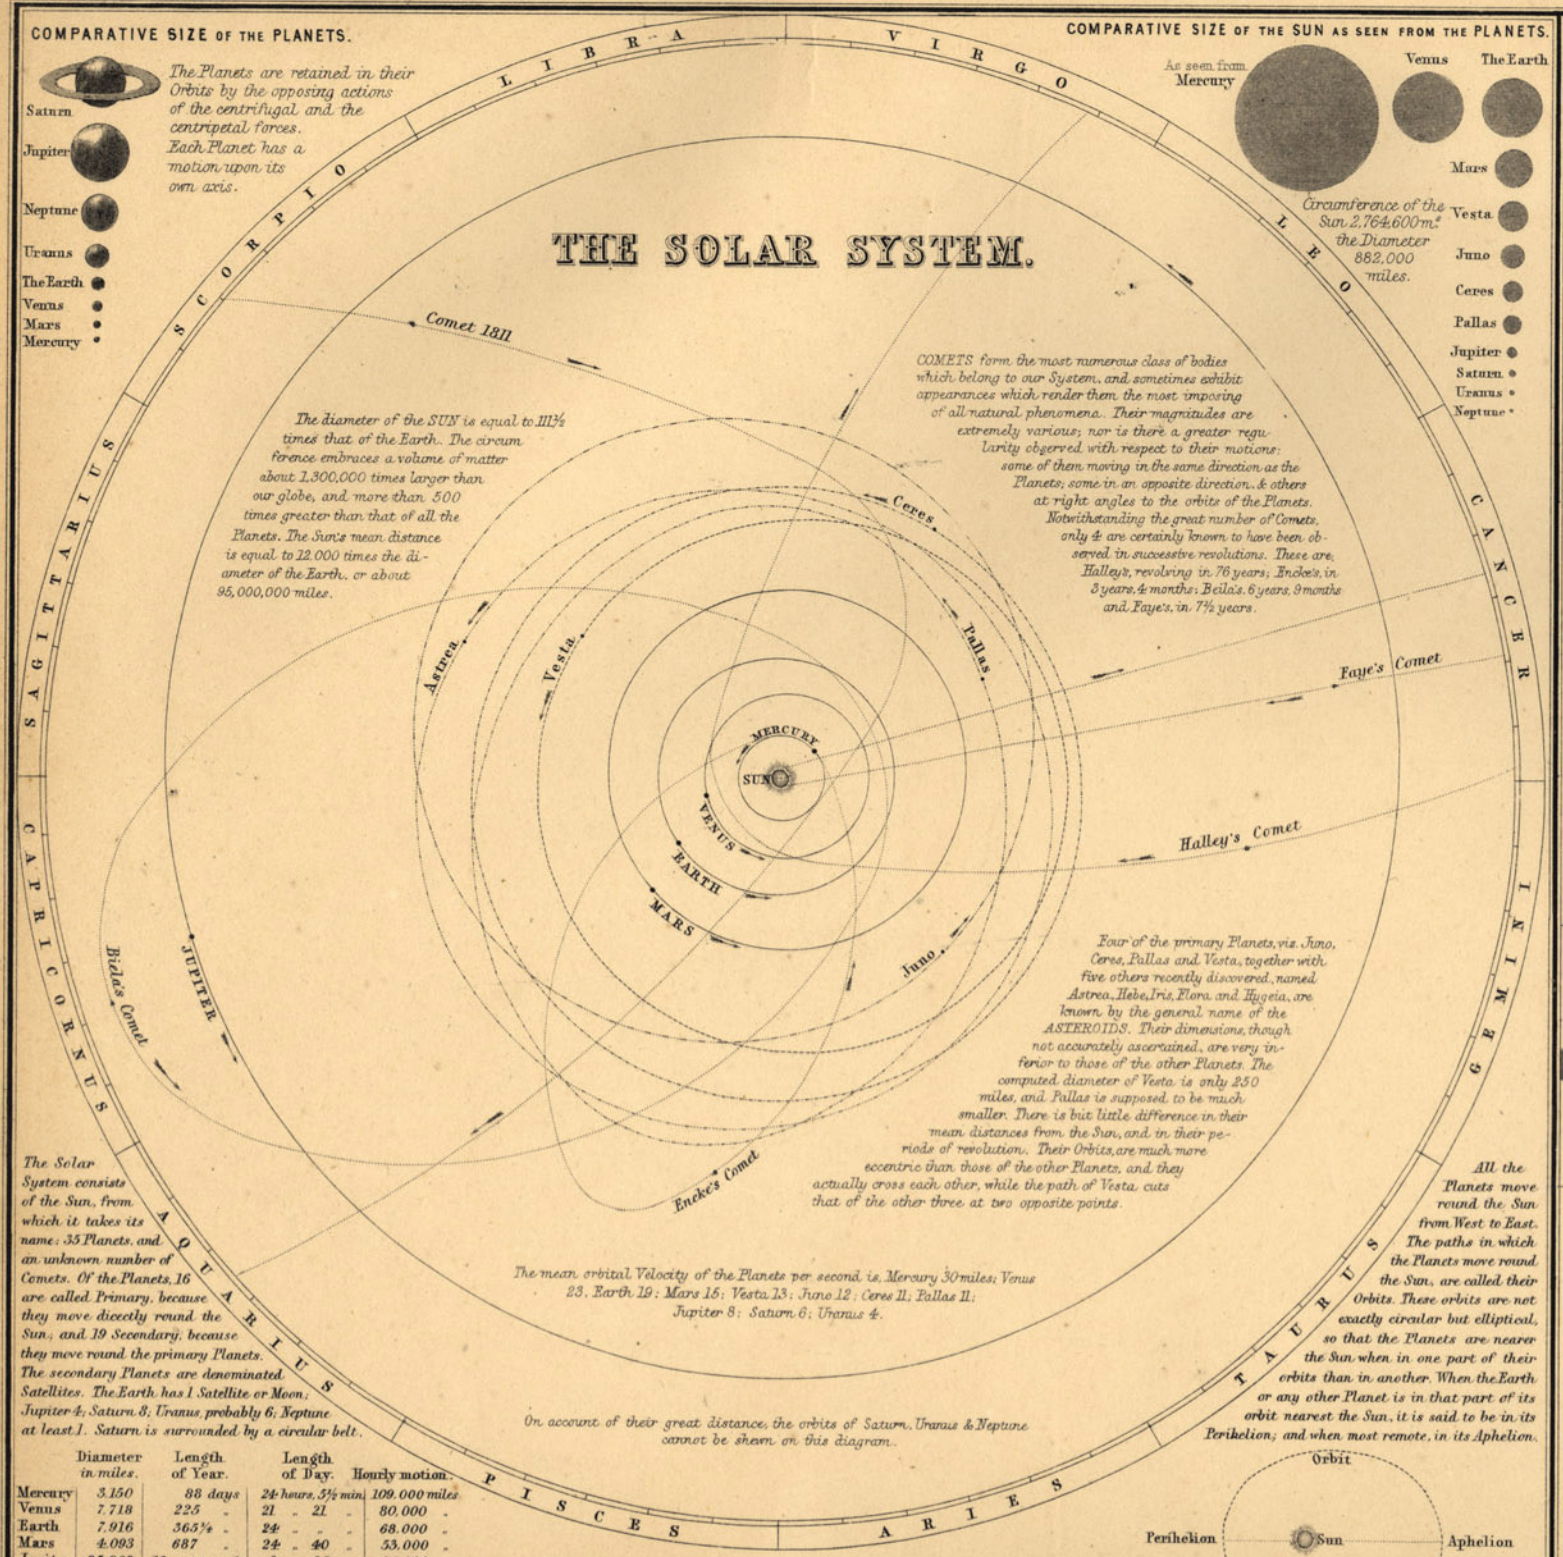
THE SOLAR SYSTEM.

COMPARATIVE SIZE OF THE PLANETS.

The Planets are retained in their Orbits by the opposing actions of the centrifugal and the centripetal forces. Each Planet has a motion upon its own axis.

COMPARATIVE SIZE OF THE SUN AS SEEN FROM THE PLANETS.

Circumference of the Sun 2,764,600m.s the Diameter 882,000 miles.



The diameter of the SUN is equal to 111¼ times that of the Earth. The circumference embraces a volume of matter about 1,300,000 times larger than our globe, and more than 500 times greater than that of all the Planets. The Sun's mean distance is equal to 12,000 times the diameter of the Earth, or about 95,000,000 miles.

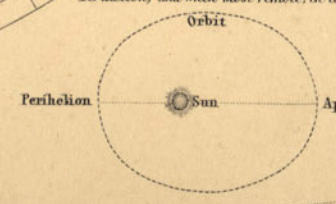
COMETS form the most numerous class of bodies which belong to our System, and sometimes exhibit appearances which render them the most imposing of all natural phenomena. Their magnitudes are extremely various; nor is there a greater regularity observed with respect to their motions: some of them moving in the same direction as the Planets; some in an opposite direction, & others at right angles to the orbits of the Planets. Notwithstanding the great number of Comets, only 4 are certainly known to have been observed in successive revolutions. These are, Halley's, revolving in 76 years; Encke's, in 3 years & months; Beilas, 6 years; 9 months and, Faye's, in 7½ years.

Four of the primary Planets, viz. Juno, Ceres, Pallas and Vesta, together with five others recently discovered, named Astrea, Hebe, Iris, Flora, and Metis, are known by the general name of the ASTEROIDS. Their dimensions, though not accurately ascertained, are very inferior to those of the other Planets. The computed diameter of Vesta is only 250 miles, and Pallas is supposed to be much smaller. There is but little difference in their mean distances from the Sun, and in their periods of revolution. Their Orbits are much more eccentric than those of the other Planets, and they actually cross each other, while the path of Vesta cuts that of the other three at two opposite points.

The mean orbital Velocity of the Planets per second, is, Mercury 30 miles; Venus 23, Earth 19; Mars 15; Vesta 13; Juno 12; Ceres 11; Pallas 11; Jupiter 8; Saturn 6; Uranus 4.

On account of their great distance, the orbits of Saturn, Uranus & Neptune cannot be shewn on this diagram.

All the Planets move round the Sun from West to East. The paths in which the Planets move round the Sun, are called their Orbits. These orbits are not exactly circular but elliptical, so that the Planets are nearer the Sun when in one part of their orbits than in another. When the Earth or any other Planet is in that part of its orbit nearest the Sun, it is said to be in its Perihelion; and when most remote, in its Aphelion.



The Solar System consists of the Sun, from which it takes its name; 35 Planets, and an unknown number of Comets. Of the Planets, 16 are called Primary, because they move directly round the Sun; and 19 Secondary, because they move round the primary Planets. The secondary Planets are denominated Satellites. The Earth has 1 Satellite or Moon; Jupiter 4, Saturn 8, Uranus probably 6, Neptune at least 1. Saturn is surrounded by a circular belt.

	Diameter in miles.	Length of Year.	Length of Day.	Hourly motion.
Mercury	3.150	88 days	24 hours, 5½ min.	109.000 miles
Venus	7.718	225 "	21 " 21 "	80.000 "

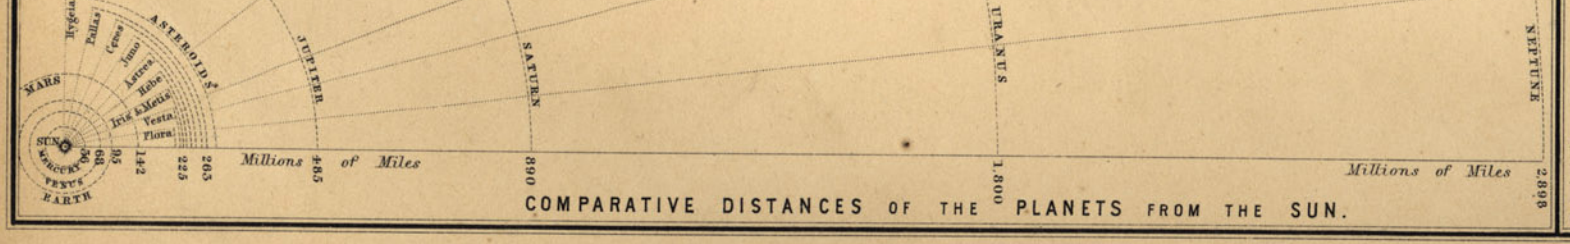
Neptune	42.000	217 " "		

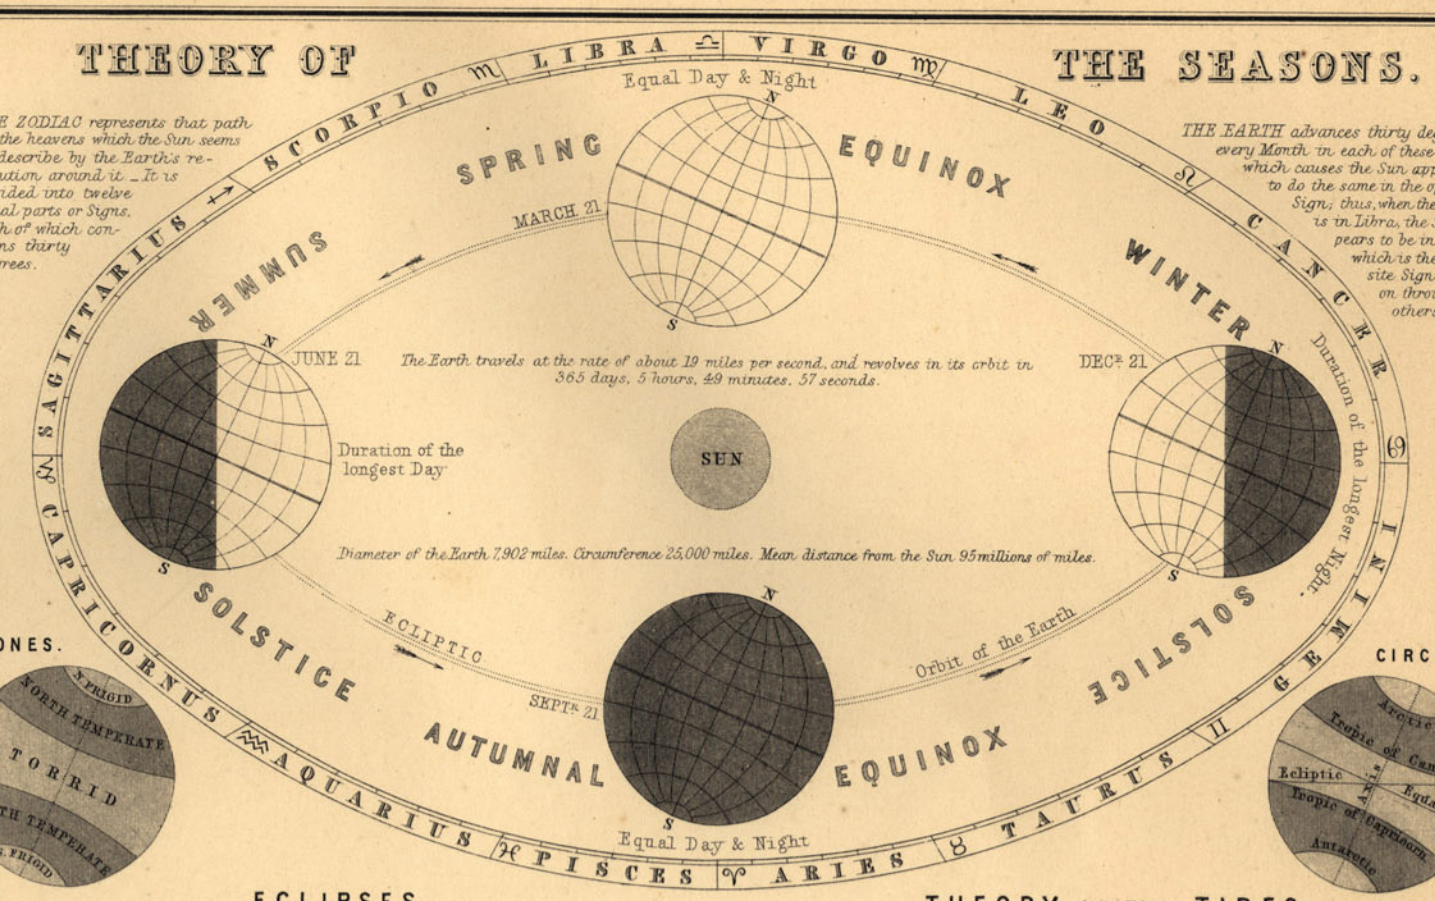


COMPARATIVE DISTANCES OF THE PLANETS FROM THE SUN.

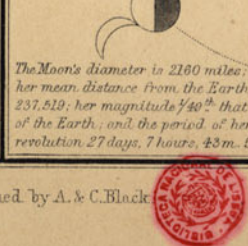
THEORY OF THE SEASONS.

THE ZODIAC represents that path in the heavens which the Sun seems to describe by the Earth's revolution around it. It is divided into twelve equal parts or Signs, each of which contains thirty Degrees.

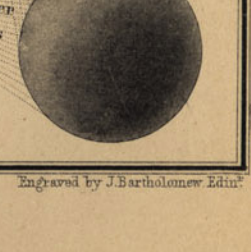
THE EARTH advances thirty degrees every Month in each of these Signs, which causes the Sun apparently to do the same in the opposite Sign; thus, when the Earth is in Libra, the Sun appears to be in Aries, which is the opposite Sign, and so on through the others.



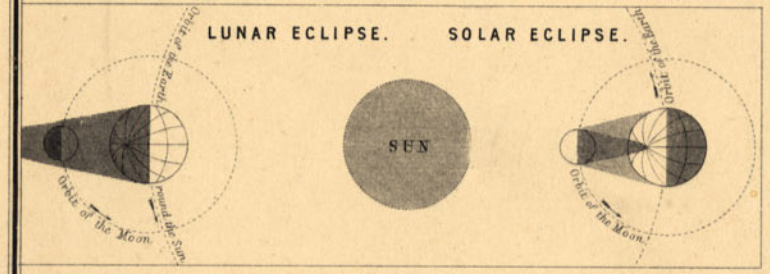
ZONES.



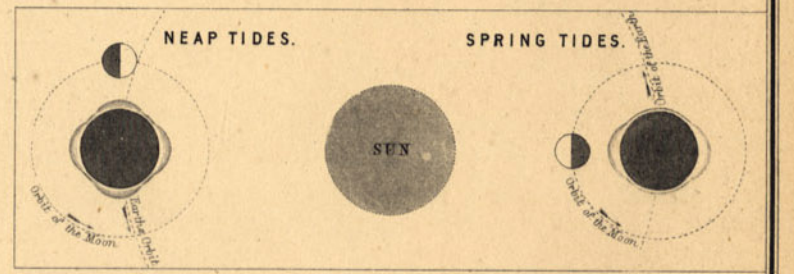
CIRCLES.



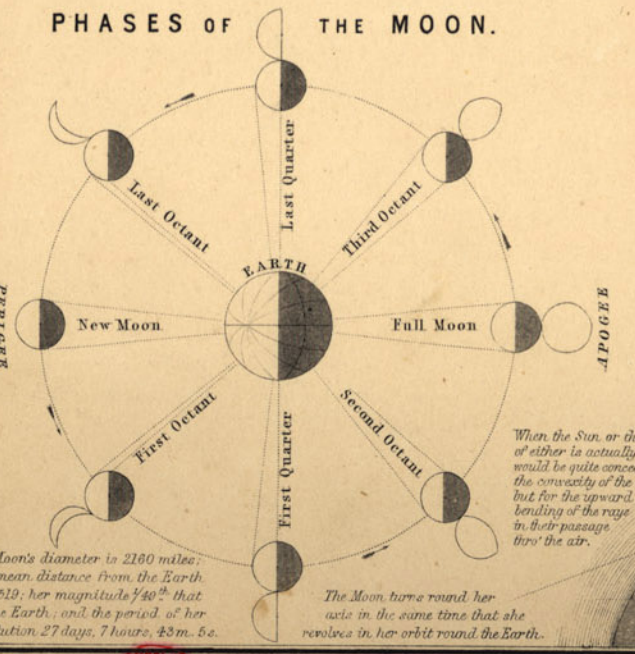
ECLIPSES.



THEORY OF THE TIDES.



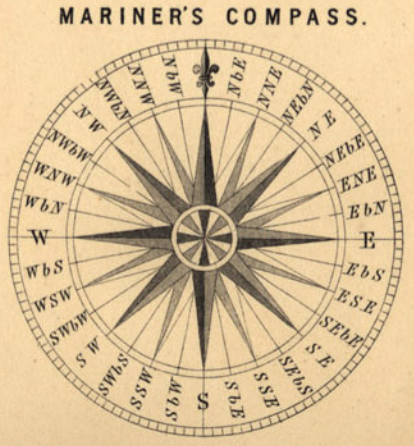
PHASES OF THE MOON.



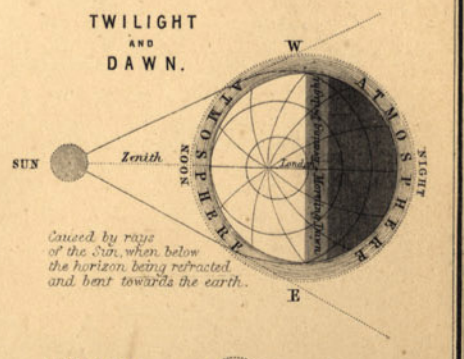
The Moon's diameter is 2160 miles; her mean distance from the Earth 237,519; her magnitude 1/40th that of the Earth; and the period of her revolution 27 days, 7 hours, 43m. 5s.

The Moon turns round her axis in the same time that she revolves in her orbit round the Earth.

MARINER'S COMPASS.



TWILIGHT AND DAWN.



Caused by rays of the Sun, when below the horizon, being refracted and bent towards the earth.

When the Sun, or the Moon's lower limb appears just resting on the horizon, the entire body of either is actually below it, and would be quite concealed by the convexity of the earth, but for the upward bending of the rays in their passage thro' the air.

In all cases where a scriptural site has been ascertained the modern name is added to the ancient one, from which it is distinguished by a lighter character; the classical names are enclosed in parentheses: thus Ashdod (Azotus) Esdúd. The word Jebel is the modern Arabic appellation for Mountain, Nahr for River, & Wady for a Valley or Water-course.

I Asher	VII Dan
II Naphtali	VIII Benjamin
III Zebulon	IX Judah
IV Issachar	X Simeon
V Manasseh	XI Gad
VI Ephraim	XII Reuben

The boundaries of the Tribes are indicated by a dotted line, thus..... The territories of Judah, Simeon, and the greater part of Benjamin and Dan, were afterwards comprised in the Kingdom of Judah: all the remainder were comprehended within the Kingdom of Israel.

Note. The pronunciation over & poor in this map are used instead of the more common spelling ore & pore. They are also sometimes spelled ir and pir. The sound intended to be represented by them is generally by the vowels oo and u, wherever they occur in the map is that of the French ou and the German ö or œ.

Overland route to India.

The distance between Cairo & Suez is 84 miles, which is divided into 16 stages: the carriages used in the transit have two wheels, with seats on each side, like a London omnibus: each carriage holds 6 persons, and is drawn by four horses. The stations are merely stables for relays of horses, excepting some which are provided with accommodations for rest & refreshment. The journey occupies about 22 hours.
