P E T I T I O N

Foe exemption of The Hamada Precision Machine Mfg. Co., Ltd. (Osaka) from the Designated Plants for Potential Removal as Reparation Objects:

To Mr. H. Tanaka, Governor of Osaka Prefecture.

PETITIONERS:

S. Zentoku, Chief Director of The Osaka Shimbun
(Osaka Newspaper Publishing, Ltd.)
48, Kami 4-chome, Sonezaki, Kitaku,
Osaka City.

I. Matsunami, Chief Director of The Sangyo Keizai
Shimbun(Press The Industrial Economy
Ltd.)
Same address as mentioned above.

H. Maeda, Chief Director of The Osaka Jiji Shimpo,
(Press The Osaka Current News, Ltd.)
Same address as mentioned above.

GENERAL DESCRIPTION:

The Hamada Precision Machine Mfg. Co. was established in 1921 for the purpose of manufacturing all sorts of printing machines, at 153, Mitejima, Nishiyodogawa-ku, Osaka City.

We, three newspaper publishing companies, have had close connection with the company in making and repairing of printing machines. So, should the company be removed off as a reparation object, we would be unable to have the machines made - 3 sets of the Lightening Type High Speed Newspaper Press with a capacity of 180,000 copies

per hour, 2 sets of auto-plates and 2 sets of auto-shapers which are being under construction at the company. These machines are indispensable for our business going; therefore, if the company would be removed off, we have to almost stop our newspaper publishing business. We have daily circulations of 450,000 copies Osaka Shimbun, 350,000 copies Sangyo Keizai Shimbun, 270,000 copies Osaka Jiji Shimpo; total of I,070,000 copies. But now we have very poor printing capacity,(as detailed on our new and old plants' installation map) the two machines we have are already old and decrepit enough. Since the end of War, we have been using these two machines wear and tear; they are being reached at seriously bad conditions, and perhaps we would hardly be able to use them for six months more.

On the other hand the demands for our newspapers are increasing day by day; we, three newspapers which depend on the same capitalistic foundation are intending to publish I,000,000 daily copies respectively. Thus we had ordered 3 sets of the Lightening Type High Speed Newspaper Press and these are expected to be completed by November 20; at the same time we are constructing a new factory which is going to be completed. And we can't find out another company in Kansai district which can make and repair our necessary machines with so long experiences and advanced speciality as the Hamada Co. can.

By these reaons, we hope to get the petition approved and the Hamada Co. be exempted from the list of factories designated for potential removal as reparation.

We endorse the copies for certifying our orders of machines to the Company. (The details are written on other sheets.)

S. Zentoku

S.Zentoku, Chief Director of
The Osaka Shimbun.

MEMORANDUM FOR: Osaka Prefectural Government

THROUGH: Osaka Liaison Office

SUBJECT: Installation of Additional Machinery

1. Reference is made to memorandum, Osaka Prefectural Government, subject: "Application for Permission for Installing Additional Machine Tools, Hamada Seiki K.K., Osaka Plant (32-87)" dated 21 December 1948.

2. Permission is granted for installation of machinery as described in reference memorandum.

3. In order to distinguish these machines from reparations items, each machine will be marked "AA", and a tag conspicuously displayed, quoting authorization, i.e. "Installed under permit OMGT, 30 December 1948".

4. Approval of this installation does not in any way grant priority in use of transportation facilities.

5. This authorization expires on 15 January 1949 and a report will be submitted to this headquarters on that date.

THRU : Osaka Liaison & Coordination Office

1. Attached herewith is a petition submitted by K.K. Hamada Seiki Tekkosho, Osaka Plant (32-87), requesting your permission for installing additional Machine Tools, 5 sets, as stated in para (a).

2. The subject plant is the only one in west half part of Japan, that is engaging not only in making High-Speed Newspaper Printing Press and various kinds of Newspaper Printing machines, but also in repairing them. The most of the press compainies and the large scale printing plants located in the Kinki, Shikoku and Kyushu districts are depend on the subject plant, and consequently, the plant has always the rush of orders for various kind of newspaper printing machines and their repairing from them (reper to para. (b)). In order to comply with the said demands, the subject plant requests to be authorized to install following machine tools as soon as possible.

3. Judging from the above-stated reasons this office deems it necessary to entreat you will kindly grant a permit to the Hamada Seiki Tekkosho K.K., for installing machinerier so follows:

(a) Names and Units of the machines to be installed:

(1)	Gear shaper:	one (1) set
(2)	Vertical Milling Machine :	one (1) set
(3)	Tool Grinders :	three (3) sets

(b) Schedule of Production or Remodeling or Repairing of Newspaper Printing Machinery Already Contructed until Oct. 1949.

(1)	Remodeling of High Speed Hewspaper Press	40 sets
(2)	Production of Automatic Sterotype Casting Machine	8 "

Subject : Request for a permission on additional installation of machine tools.

Sirs,

In order to fulfil our contracts with our customers, it is absolutely essential for us to provide the additional installation as stated below, for which we hereby ask for your permission.

1, Name of plant.
Hamada Seiki Tekkosho Ltd., Osaka plant.

2, Location of plant.
153 Mitejimacho, Nishiyodogawaku, Osaka.

3, Products.
High-Speed Newspaper Printing Press.
Automatic Stereotype Casting Machine.
Automatic Stereotype Finishing Machine.
Matrix Rolling Press.
Other Newspaper Machinery.
Two-Revolution Press with Automatic Feeder.
Single and two color Offset Press with Automatic Sheet Feeder.
Intaglio Press.
High-class Printing Press and other Plate Preparatory machinery.

4, Principal customers.
The Mainichi Shimbun-sha, Osaka.
" " Tokyo.
" " Moji.
The Tokai-Mainichi Shimbun-sha.
The Osaka Shimbun-sha.
The Osaka Jiji-Shimpo-sha.
The Sangyo-Keizai Shimbun-sha.

The Shumpo-sha, Shashin Insatsu K. K.

5, Location
Indicated on the attached blue print.

6, Name and number of unit of machinery for which your permission asked.

A, One (I) Gear Shaper

1, Manufacturer.	Ebisuya
2, Model number.	Unknown.
3, Serial number	No. 183
4, Capacity.	Up to 12" in dia.
5, Dealer.	Shinko Kikai Seisakusho.

B, One (I) Vertical milling Machine.

1, Manufacturer.	Kamiteu Seisakusho.
2, Model number.	Unknown.
3, Serial number.	
4, Capacity	No. 3
5, Dealer.	Shinko Kikai Seisakusho.

C, Three (3) Tool grinders.

(a)

1. Manufacturer.	Matsushita Denki Seisakusho
2. Model number	B 300
3. Serial number	No. I7059
4. Description	Shaft dia. I" Motor driven with an induction motor, 3 ph., I H.P. Max. dia. of grinding wheel I2"
5. Dealer.	Gomiya.

(b)

1. Manufacturer	Matsushita Denki Seisakusho
2. Model number	B 300
3. Serial number	No. I706I
4. Description	Shaft dia. I" Motor driven with an induction Motor, 3ph., I H.P. Max. dia. of grinding wheel 12"
5. Dealer.	Gomiya

(c)
1. Manufacturer — Unknown
2. Model number —
3. Serial number —
4. Description — Shaft dia. 3/8"
Motor driven with an induction motor, 3ph.
Max. dia. of grinding wheel 8"
5. Dealer — Gemiya

7. Reasons for asking permission,

The increasing demands for precise machines with least delay to our customers, necessitates us to provide an additional installation of one more gear shaping machine, one vertical milling machine and three tool grinders as above described.

Truly Yours,

H. Hamada

Subject: Petition of increasing Plant Equipment Machineries

Sirs,

Asked permission to increase plant equipment machineries for rise of productivity depending upom the following reasons.

1. Name of company and plant
   Hamada Seiki Tekkosho Ltd., Osaka plant

2. Location of plant
   153 Mitejima-cho, Nishiyodogawa-ku, OSAKA

3. Products
   High-Speed Newspaper Printing Press
   Automatic Stereotype Casting Machine
   Automatic Stereotype Finishing Machine and Newspaper Press Machinery etc.
   Two-Revolution Press with Automatic Feeder
   Single and Two color Offset Press with Automatic Sheet Feeder etc.

4. Main Customers
   The Mainichi Newspaper Osaka Head-office
   The Mainichi Newspaper Tokyo Head-office
   The Mainichi Newspaper Western District Head-office
   The Tokai-Mainichi Newspaper office
   The Osaka Newspaper office
   The Osaka Jiji-Shinpo Newspaper Office
   The Tokyo Jiji-Shinpo Newspaper Office
   The Sangyo-Keizai Newspaper Office
   The Kyonichi Newspaper Office
   The Osaka Books Co.,Ltd.
   The Toppan Printing Co., Ltd.
   The Hamada Printing Co.,Ltd.

5. Establishment site
   Assembling shop (indicated on the attached sketch)

6. Name and number of unit of machinery ~~and~~ for which your permission asked.

Machine	No.	Size	Maker	Remarks
Lathes	1	630x1500x4800m/m	Unknown	
Milling machine	1	#2, 260x710 m/m	Kondo Seisakusho	
Shaper	1	24"	Unknown	

7. The Firm from whom the machines to be hired:

KUMONO IRON WORKS (Kozone-cho, Toyonaka City)

8. Reasons for asking permission

This plant plays the important roll in the press and publication circle in Japan through the manufacturing and repairing of newspaper printing machinery. The existing plant facilities are not sufficient to take care of the demands for new equipment and repair works which come from the presses and publishers above referred to. It is our sincere to accomplish the increase of production at this plant by adding the two machine tools in question which we are going to hire from Kumono Iron Works, who is one of our associated companies and is now unable to operate these machines efficiently due to insufficient supply of electric power.

Yours Sincerely,

H. Hamada

INVESTIGATOR'S REPORT HHH/ba

4 February 1947

DATE: 3 February 1947

TITLE: General Inspection

NAME OF COMPANY: Hamada Seiki (Hamada Precision Machine Works) Machine Tool Plant Code No. 32-87

LOCATION: 153 Mitajima-cho, Higashiyodogawa-ku Osaka

INTERVIEWED: President and Directors of the Firm

1. This factory was first operated in 1933 for the purpose of making printing presses and allied machinery.

2. Wartime manufacture of machine tools was commenced in 1942 when press manufacture was halted by government order. They made only one product, a simple surface grinder (see sketch attached), total output 300 machines during the three year period.

3. In January of 1945, a branch factory was set up in Abuno-mura and equipped with 35 machines, most of which were moved from the OSAKA Plant. The Osaka Factory has a total of 47 inventoriable items, of which 32 are machine tools. Although the main factory only is listed for reparations purposes, subject company has reported and place under custody the two plants, which are some 12 miles apart. The question now arises as to whether this branch plant should be treated as a dispersal area or as a separate plant not included under the reparations designation. Study of the machine tool facilities in the Osaka Plant reveal that it is capable of independent production of the company's product, and is a completely integrated unit. However, the production of these two plants was undoubedly interrelated and company admits that they collaborated in the making of both printing presses and machine tools.

4. Subject company's printing preses are of a high quality and reputation, and they are the only domestic producers of newspaper printing presses suitable for use by the large publishing companies. They are the only dom-

estic producers of stereotype casting and finishing machines for making stereotype plates automatically. Orders for these machines greatly exceed present production capacity. In addition, they have the only facilities for repairing and servicing printing machines in western Japan. If this plant is removed for reparations purposes, it will involve a tremendous transportation cost and great inconvenience in transporting heavy, bulky machinesto Tokyo for repair and return. Only one other factory in Japan is making newspaper presses at present; the Ikegai Iron Works in Tokyo, which is also on CD-5.

5. Machine tools (inspected Osaka Factory only) are in good condition and adequate as to size and versatility for practically any allied manufacture such as textile, printing, or farm machinery. The wartime product was not a precision machine tool.

6. Company has no need for release of land and buildings not necessary for the maintenance and preservation of reparations machinery.
