

REPORT  
OF THE  
MINISTER OF JUSTICE  
AS TO  
PENITENTIARIES OF CANADA  
FOR THE  
FISCAL YEAR ENDED MARCH 31  
1913

*PRINTED BY ORDER OF PARLIAMENT*

OTTAWA  
PRINTED BY C. H. PARMELEE, PRINTER TO THE KING'S MOST  
EXCELLENT MAJESTY

1914

[No. 34—1914]

*To His Royal Highness, Field Marshal, Prince Arthur William Patrick Albert,  
Duke of Connaught and Strathearn, K.G., K.T., K.P., &c., &c., &c.,  
Governor General and Commander in Chief of the Dominion of Canada.*

SIR,

I have the honour to lay before Your Royal Highness the Annual Report of the Inspectors of Penitentiaries for the fiscal year ended March 31, 1913.

I have the honour to be, Sir,

Your Royal Highness's most obedient servant,

CHAS. J. DOHERTY,  
*Minister of Justice.*

OTTAWA, September 30, 1913.

# ANNUAL REPORT

OF THE

# INSPECTORS OF PENITENTIARIES

FOR THE

FISCAL YEAR 1912-13

To the Honourable

CHARLES J. DOHERTY, K.C., D.C.L., LL.D.,

Minister of Justice.

SIR,—We have the honour to submit herewith reports and statistics with reference to the administration and operation of the penitentiaries of Canada for the fiscal year ended March 31, 1913.

## POPULATION.

The average daily population of the penitentiaries for the past five years has been:—

1908— 9.....	1,625
1909—10.....	1,824
1910—11.....	1,834
1911—12.....	1,853
1912—13.....	1,911

The increase in the past ten years has been fifty-six per cent. There were 1,970 convicts in custody at the end of the fiscal year, of whom 984 are Canadian born. The increase in the number of Canadian born convicts during the past decade has been about ten per cent or one per cent per annum.

## MOVEMENT OF POPULATION

	Kingston	St. V. de Paul	Dorchester	Manitoba	British Columbia	Alberta	Saskatchewan	Total
In custody, April 1, 1912.	494	442	220	183	331	167	58	1895

Returned to provincial authorities.....	1		2	1	1			5
Order of court.....	1	1						2
In custody, Mar. 31, 1913.	516	405	195	201	351	207	95	1970

The only unusual incidents in connection with custody that occurred during the year were the escape of an insane life prisoner from the insane ward at Kingston, followed shortly after by the escape of five convicts from the isolation ward.

These occurrences were, of course, due to the inefficiency, or neglect, of certain officers in charge, but the reputation of the staff was retrieved by the other officers who recaptured the escaped men. The activity, courage and good judgment displayed by the officers who effected the recapture are worthy of special commendation. Their success is due largely to the fact that they were already properly armed and able to take up the pursuit without delay. If they had been obliged to go to the armoury to be outfitted before starting in pursuit (as would have been the case at some of our institutions) the convicts would no doubt have out-distanced them and might be still at large. Readiness for emergency is essential in the management of penal institutions.

## COMPARATIVE STATEMENT OF PAROLES AND PARDONS

	Paroles.	Pardons.		Paroles.	Pardons.
1899-0.....	71	70	1905-6.....	179	36
1900-1.....	122	36	1906-7.....	157	29
1901-2.....	157	43	1907-8.....	215	29
1902-3.....	113	35	1908-9.....	244	14
1903-4.....	122	31	1909-10.....	286	17
1904-5.....	126	50	1910-11.....	334	15
			1911-12.....	380	17
			1912-13.....	445	3

SESSIONAL PAPER No. 34

The practical substitution of parole for pardon is undoubtedly in the public interest. The parole system provides a sympathetic supervision of the man after his release that is alike helpful to the unfortunate and a protection to the state.

## NATIONALITY—(PLACE OF BIRTH).

	Number of convicts.	Number to 10,000 of each nationality.
<i>British:</i>		
Canada.....	984	1.75
England.....	206	4.
Ireland.....	67	7.4
Scotland.....	56	3.3
Other British Countries.....	29	
<i>Foreign:</i>		
United States.....	260	8.7
Italy.....	117	33.3

The fact that each man sentenced to hard labour costs the country a dollar per day in excess of his earnings seems to require explanation.

We respectfully submit the opinion that the weakness which has produced such results is not due to the inefficiency of the officers by whom the institutions are primarily controlled, but to the policy by which those officers have been restricted.

It is a statutory duty imposed upon the inspectors to embody in their annual report such suggestions for the betterment of the institutions as they may deem necessary and expedient. An examination of past reports will show that they have not been remiss in performing that duty. From the several suggestions contained in those reports there are two that seem to us to be vital and which involve a reversal of the policies by which the penitentiaries have been governed during the past decade. They are in brief:—

1. That the penitentiaries shall be administered by the minister, through his responsible officers, and free from local or other external interference.
2. That the government shall utilize the obligatory labour of its wards in supplying, so far as possible, its own needs and requirements.

In connection with the first suggestion, we attach as an appendix to this report, an extract from the annual report of the inspector of penitentiaries for the fiscal year ended June 30, 1897. It will be observed that the recommendation of Commissioners Taché and Miall, who investigated penitentiary conditions in 1879, indicates that they anticipated the injurious results of local interference that have been since realized and intensified. (See Appendix No. 1 attached).

As regards the second suggestion, the difficulties of management and discipline that are caused by the insufficiency of suitable intra-mural labour, are not realized. We have farms and quarries upon which such convicts as can with safety be employed beyond the walls find employment during the summer season, but the large majority of the convicts are practically without work that is either instructive or remunerative. We attach as Appendix No. 2, herewith, a copy of a report by the inspectors of penitentiaries addressed to the Minister of Justice on October 22, 1909, which indicates that the inspectors have repeatedly recommended relief, and that existing conditions are not due to negligence or inefficiency on the part of penitentiary officials.

## SESSIONAL PAPER No. 34

We respectfully submit the opinion, based on twenty years' intimate acquaintance with penitentiary management, that the adoption of the policies indicated would result in advantage to the public, give the convicts labour of a kind that would be suitable and also advantageous to them after release; and, generally, put the administration of our penal institutions on a business basis that would reflect credit upon the government, while materially reducing the burden of cost to the tax-payers.

During the past year, the penitentiaries have been subjected to more than the usual quota of criticism. It is needless to state that fair constructive criticism is welcomed as helpful, and receives careful consideration by those engaged in the task of administering penal institutions. There is a class of criticism, however, which is merely the parrot-like reiteration of the mis-statements of officials who have violated their oath of office, or the equally unreliable vapourings of ex-convicts who seek notoriety. Such criticism is unfair and injurious. There is no close season to protect officials from such attacks. They can do so only in their annual reports.

If, in the presentation of our views, our language has been characterized by directness rather than by diplomacy, we can but paraphrase the reply of a celebrated statesman when asked to abolish capital punishment: 'Let our critics set the example.'

Respectfully submitted,

DOUGLAS STEWART,  
W. S. HUGHES,

*Inspectors.*

OTTAWA, July 25th, 1913.

## APPENDIX No. 1.

*(Extract from the annual report of the Inspector of Penitentiaries, 1897.)*

## GENERAL SYSTEM OF CONTROL

Previous to 1875, the management of penitentiaries was vested in a board of directors. At that date the board was abolished and the direct control was vested in the minister of justice.

The change has been the subject of a considerable amount of adverse criticism and although it involves a question of public policy yet in view of comments which recent investigations have evoked, it seems appropriate that the general system should be considered in connection with any defects in the details of administration which may have occurred. The trend of opinion among those most closely identified with the prisons has been adverse to direct departmental control, and the case from that point of view is forcibly set out by Messrs. Taché and Miall in their report in connection with the management of the penitentiaries, dated 23rd of December, 1879. In closing their report the commissioners state:—

‘In dealing with the difficulties which have given rise to the present inquiry, we doubt not the idea must have been suggested to your mind, as it has certainly most forcibly impressed itself on ours, that prison management is not a fit subject for departmental control, and we feel bound to refer, before closing this report, to the radical change inaugurated by the legislation now in force in relation thereto.

‘The study of the subject of prison management, if pursued free from the influence of preconceived ideas, must lead an unbiased mind to the conviction that such institutions should be governed and directed by an organization or body of men free from political or other extraneous influences.

‘Such organized bodies exist in every civilized country, whether under the name of inspectors, superintendents, directors or commissioners, and are generally constituted into boards, whose relation to the executive officers of each establishment are somewhat analogous to the relation subsisting between parliament and cabinet, under a constitutional form of government. Their duties are consultative, deliberative, and, in a measure, legislative. They decide upon what general principles the prisons shall be governed, and their decrees, when approved by the minister of state, are carried into effect by the local executive.

‘Such was the condition of the question in Canada before the passage of the Act in 1875, which we are bound to call an unfortunate deviation from the usual course pursued in almost every country aiming at the reform of its criminal population.

‘The reasons to be urged in favour of the appointment of a board of directors are obvious, and almost equally self-evident are the reasons why a department, having other and onerous duties, must be unfit to direct from a distance the detailed administration of institutions of such a special and complicated nature.

‘The government of penal institutions in christian countries has become a distinctive science—a science, too, demanding for its attainment a con-

## SESSIONAL PAPER No. 34

tinuity of practice and experience acting upon a diversity of minds. A combination of mental and moral qualities seldom centralized in one person (and of which some important elements are almost sure to be lacking in a department whose main duties are of an entirely different character) is essential to the judicious control of a mixed criminal population, especially if the object aimed at be reformatory as well as punitive.

“The avowed object with us is to reform the convicts, and to educate them to honest occupations, as well as to see that they are adequately punished without being crushed.

“A government department might almost as well undertake to treat, at a distance, the patients of our public hospitals, as direct, by correspondence, the life and conduct of a penitentiary. The officers and clerks of a department can hardly be considered as *ex-officio* authorities on prison matters, and if directors or inspectors are made under-officers of a department, they lose, by the very fact of occupying such a position, the freedom, the status, the immunities which are necessary to the proper discharge of their important and often delicate functions, at the same time the feeling or sense of responsibility on account of their trust is materially lessened.

“The board of inspectors, commissioners or directors—(by whatever name they may be called)—should (subject only to supreme authority) have sufficient liberty of action to permit each unit of their body to develop in his own chosen or assigned sphere of action, that individuality of mind and heart which could not be expected to govern any departmental action, while by frequent consultations at the board, the attrition of mind with mind would, through that breadth and diversity of thought, which, perhaps alone, makes consultative bodies useful, prevent that individuality losing its freshness and usefulness by growing with eccentricity. The warden should carry into execution the matured decisions of that board, he, too, being allowed that latitude which is essential to the proper exercise of executive power, whether vested in one man or a body of men. The history of prisons proclaim that every real reform, great or small, has been wrought by men so circumstanced, in strange and striking contrast with the result of departmental management historically recorded.

“There is, perhaps, no sphere of action in the administration of the duties of which officers of all grades require so much liberty of action, combined with docility and amenability, so much breadth of view and sympathy combined with decision of character and promptitude of action, and where such liberty of action is demanded by the exigencies of the service, it can only be yielded by those having the power to yield, suspend, or withhold it, and who can, from time to time, witness on the spot the use that is made of it.

“A further reason why a board, and not a single individual, should govern institutions of this nature is, that a continuity of practice and experience is required, and the death or removal of one of the body from time to time does not involve the loss of the collective knowledge and practical experience possessed by the board as a body.

“All these principles consecrated by the grand test of time, approved and endorsed by the entire civilized and christianized world, have been set aside by the Penitentiary Act of 1875. By its provisions all the benefits from diversity of thought, breadth of mental and moral culture, are swept away as useless. One single inspector is provided for, who is expected (it may be assumed) to combine in his person all the breadth and diversity of a Board, both breadth and diversity being neutralized, however, by the provisions that he shall be an officer of the department.

'These remarks must be understood to have no force against the department of justice, *per se*; if they have any force, they are intended to apply to the principle and spirit of bureaucracy, not to any special department or individual.

'The outflow of the legislation has been such as might have been anticipated—misunderstandings as to the jurisdiction of officers, unfortunate appointments, indefensible contracts, and worse than all, perhaps, a lurking feeling which, sooner or later, invades all such extraneous departmental trusts, that individuality and earnestness are not recognized servants of the state. It is, therefore, with full confidence in the rectitude of our view, that we recommend to your consideration the advisability, nay, we may say the necessity, of abrogating the Act of 1875 and its amendments, and the restoration of a board of directors of penitentiaries, constituted after the manner and possessing the powers of that which existed prior to the recent unfortunate innovation.'

The ability and successful administrative experience of the commissioners entitle their views to the greatest possible respect. It is necessary to remember, however, that they do not speak from knowledge gained in the practical management of penal institutions, but from the standpoint of general theoretical principles. The objections urged against direct departmental control of the penitentiaries will apply with equal force in the case of other branches of the public service. The minister of justice is held responsible to parliament for every item of expenditure in connection with the prisons, and his responsibility could not reasonably be continued if his control should be limited by the intermediary authority of a board of directors. I respectfully submit the opinion that the weakness does not lie in the system, but in the manner in which it has been administered. The system vests the control of all penitentiaries in the minister of justice, but, as a matter of fact, succeeding ministers have been harassed and embarrassed to such an extent by the persistent interference of local political organizations, that the control of the patronage, including the selection of officials, has been virtually delegated to local and irresponsible organizations, whose chief aim has been the potency of the institution as a political factor in the constituency in which it is situated.

It is quite apparent that so long as this *de jure* departmental control, but *de facto* local control, continues, the whitewash brush of departmental officials and the tar brush of special commissioners will be alike ineffectual in removing the stains which are occasionally exhibited to public gaze. What is required, is such action as will relieve the prisons from the grasp of the tentacles of the local political octopædæ. The burden of maintaining the institutions is imposed upon the whole of Canada, and it is but reasonable that the privileges which attach to the patronage should be equally extensive.

## APPENDIX No. 2

*(Report of the inspectors of penitentiaries on prison labour.)*

OTTAWA, October 22, 1909.

*Memorandum for the Minister of Justice.* The increase of population at the various penitentiaries, together with the closing of the twine factory at Kingston, has created what may be termed a crisis, and we respectfully bring the matter to your attention in the hope that some general policy may be adopted that will solve the difficulty and avoid the scandal that must inevitably ensue if present conditions continue.

The question of the employment of convicts has engaged the attention of the governments of nearly all civilized countries, and various policies have been promulgated with more or less success. Canadian penitentiaries are at a disadvantage from the fact that asylums, hospitals, schools and other institutions, where the products of prison labour can be advantageously utilized, are under the control of provincial and municipal authority, thereby practically closing to us an outlet for our products that is available in other countries. In the United States, for example, the penitentiaries (with two or three exceptions) are under local state control, and the labour is available in supplying all state and municipal requirements in so far as such needs can be supplied by the prisons. In nearly all American prisons the contract system prevails and affords the principal employment. In several states, however, (notably the State of New York), the system has been abolished and the employment of convicts has been confined to state and municipal work. From a purely economic standpoint, the contract system has many advantages. The institution enters into a contract with a firm for an output of a minimum quantity of boots, shoes, or cigars, annually—the employers supply the raw material, while the prison supplies the necessary plant and labour. The work is done under the supervision of expert foremen, who are paid by the firm, and in the shop, or factory, forty or fifty convicts are controlled by one guard. Each convict is allotted his 'stint' or number of pieces to make or prepare. If he fails to make his 'stint' he is punished by reduced rations, or otherwise. If, on the contrary, he is expert and is able to exceed his 'stint', he is credited with his surplus work and paid his extra earnings on release. It is in this way an incentive to industry. Usually, from one-half to two-thirds of the convicts are employed on contract work and, as a result, there are a number of American prisons that are financially self-sustaining. The penitentiary at Stillwater, Minnesota, returns annually a large surplus of revenue to the state. From a disciplinary point of view, however, the system is demoralizing. Through the foremen, who are absolutely irresponsible to the prison authorities, the convicts have a medium of free communication and traffic with their 'pals' outside the prison, and the abuses are obvious. About thirty or forty years ago the Kingston penitentiary had a similar contract for the manufacture of locks, and the termination of the contract was followed by a statutory prohibition of the system.

In Virginia penitentiary they have a pending contract for the manufacture of boots and shoes, giving employment to several hundreds of convicts, but we understand that at its termination the system will be discontinued. As a substitute, they are engaged in a system of road-making throughout the state. Upon this work

about 700 penitentiary convicts, and an equal number of common jail prisoners, are now employed. The state engineer negotiates with the counties or other municipalities and fixes the grades and specifications. The municipality supplies the stone for culverts, macadam, etc., and the prison supplies the plant, tools and labour. The work is carried out by prison officials under the supervision of the state engineer. The road under contract is absolutely closed to the public during construction. The convicts are housed at night in rough, portable shanties, each holding a gang of 40 or 50 men. Each cot is placed with the foot towards the centre of the structure and each convict is shackled, and the shackle is attached to a chain which extends the entire length of the shanty. So far no escapes have occurred at night. The successful escapes during working hours have been about six per cent. The most striking result of the roadwork is the improvement in health and weight of the convicts. This is reported to be remarkable. The number of guards employed is not greater than at our penitentiaries—about one to ten convicts. Virginia has two distinct advantages in operating this system. Its climatic conditions enable continuous work throughout the year, and the fact that about ninety per cent of the convicts are negroes, who are more amenable to control than are others. The difficulties in adopting the system in Canada are:

(1) In view of the class of convicts in our custody, and the class of men that we obtain as guards, we would require one officer to five convicts, where the facilities for escape are so great.

(2) We would have the provincial government, as well as the municipalities to deal with, and the absolute closing of highways, which would be obligatory, would involve complications.

(3) The work would be available for but a few months, at a season when we can employ a larger proportion of our men at farming and structural work. It would in that way interfere with existing employment during the summer and afford no relief during the seven months that the lack of work is most keenly felt.

From the report of the Commissioners of Prisons for England and Wales for last fiscal year, it would appear that nearly seventy per cent of the effective prison population was engaged in manufactures, and that the revenue from prison labour so employed during the year amounted to more than half a million dollars. The average number employed exclusively on manufactures was 12,942, of whom 2,534 were employed in making mail bags, which appears to be the most important of the many manufactures. In the report of the comptroller, he states:—

‘The greatest care is always taken to avoid rivalry with free labour. The various trades are so organized, and the manufactures are so diversified, that competition with the outside workers is practically non-existent. At the same time we are doing our utmost to carry out the wishes of the legislature by using industrial training as a leading factor in the reclamation of the criminal classes.

‘As a concrete instance, it may be mentioned that the average number of prisoners engaged in mat-making for sale to the public, only amounted to 114 during the past year, as against 2,823 when the county and borough prisons were taken over by the government from the local authorities in 1878.

‘Owing to short sentences, want of skill, and limited hours of labour, the output of mats per man is far below that of an expert tradesman, hence it will be seen at once that the employment of less than one per cent of the workers in the manufacturing department on this particular industry cannot possibly affect the trade at large. The same argument is equally applicable to other handicrafts.

## SESSIONAL PAPER No. 34

'It is, however, to the government itself that we rightly look for the great bulk of the work carried on in H. M. prisons. The large departments of the state continue to render most willing assistance, with the result that it is possible to curtail labour for outside firms to an extent unthought of a quarter of a century ago.'

The proportion assigned to each branch of prison work is given as follows:—

Manufacturing department.....	12,942
Farm.....	433
Prison Building department.....	1,806
Admiralty Building department.....	214
Service of the prison.....	3,238

The comparatively small number actually required for the internal service of the institutions gives one an idea of the labour available at our institutions for such work as may be decided on. Lest it should be supposed that we have been negligent in calling public attention to the lack of employment for our convicts, we may state that, a few months after his appointment, Mr. Stewart placed before the minister of justice a memorandum suggesting the adoption of the policy which we still recommend—namely, that, so far as possible, the labour of the convicts be employed in providing articles required for the several departments of the government. The minister expressed himself as strongly favourable to the policy suggested, and authorized Mr. Stewart to confer with the ministers of the several departments from whom work might be obtained. The inspector interviewed the Ministers of Railways and Canals, Public Works, Militia, and the Postmaster-General, all of whom approved of the policy and referred him to their officials in charge of the several branches, with the request that they should co-operate with the inspector in the matter. In following up the matter, Mr. Stewart found that the articles were almost wholly supplied by contract, and that nothing could be done until the expiry of existing agreements. The subordinate officials were generally reluctant to co-operate, through fear of antagonizing contractors. Before anything could be done, there was a change of government, and the whole question of the administration of the penitentiaries was referred to special commissioners. In the following year (1896) Mr. Stewart referred to the question in his annual report as follows:—

'The insufficiency of suitable work for the convicts is a serious detriment to the proper management of the prisons, and it seems extremely desirable for financial, disciplinary and reformatory reasons that some change should be made in the existing policy in this regard.

'It is somewhat of an anomaly that the prison authorities should be expected to enforce sentences of "hard labour" upon thirteen hundred convicts, and, at the same time, that they should be restricted in the means of enforcement to the routine requirements of a half dozen institutions. It is to be assumed that when a sentence of "hard labour" is pronounced, it is intended that it shall be enforced; the economical and disciplinary management of the prison, as well as the physical and moral well-being of the convicts, require that it be enforced; and yet the means available are so restricted as to render enforcement impossible.

'The products of our shops being restricted to the internal requirements of the prison, their operation frequently entails financial loss. This is especially the case at the smaller institutions where the value of prison requirements in particular lines, is not equal to the cost of maintaining the shops and providing instructors. The convicts receive benefit from the instruction given, but the institution suffers direct financial loss, and receives no value for the convict labor.

In connection with the question of convict labour, I may be permitted to quote from a memorandum, with reference to the employment of convicts, which I submitted to the department a few months after assuming my present duties:

“This question is the principal difficulty in connection with the administration of the penitentiaries. At present there are about forty convicts engaged in the manufacture of binder twine, and about half that number engaged in making pails and tubs, but the only employment available for the remaining twelve hundred convicts is that connected with the requirements of the various prisons. It is submitted that the work required for the prisons could be performed by about half that number, and that there are, therefore, about six hundred men whose services are available for any new work which may be found for them.

“The policy of engaging in the manufacture of articles which compete on the open market with the products of ordinary industry would seem to be defensible only on the ground of necessity; and the question which presents itself is whether or not such necessity exists. In this connection, the opinion is respectfully submitted, that if the government will but adopt the policy of patronizing its own workshops—thereby utilizing the labour of its own wards—there will no longer be any necessity for introducing, or continuing, industries which compete with the products of ordinary industry in the open market.

“There are many articles required for the use of the various departments of the public service, which could be supplied from the penitentiaries, but which are not so supplied because of the reluctance of departmental officials to accept prison-made goods.

“Among the articles required by the government which could be supplied by the prisons, are:—

“Mail bags, of all grades and descriptions.

“Boots, caps and uniforms for the militia, military schools, letter carriers and railway mail clerks.

“Uniforms for conductors on government railways, customs officials, fisheries protection service.

“Boots, stable suits and saddles for mounted police; clothing for the Indians and industrial schools.

“Pails, brooms and tinware for the lighthouse and coast service.

“Wire fencing for government railways, and for other railways which are subsidized by the government.

“Freight cars of all descriptions for government railways.

“Objection may be urged that prison-made goods are inferior and therefore unsuitable, but this objection can be met with the assurance that the prison authorities shall guarantee satisfaction as to quality and finish. If the system should be adopted, it must necessarily be introduced gradually. It would in some cases necessitate the employment of a different class of trade instructors, and additional appliances in the workshops; but with proper facilities for carrying on the work there is no reason why substantial work of the kind indicated should not be done in the prisons.

“An objection that may be anticipated is that, to supply goods which replace those made in ordinary industrial establishments would be as injurious indirectly to the trade as though the products of the prisons were placed on the open market. It must, however, be admitted that a government has the moral right to supply its requirements from its own resources. Further, it would seem difficult to justify the expenditure of public funds

## SESSIONAL PAPER No. 34

for labour which can be supplied without such expenditure. If the head of a department were to put the work of his department to tender, and award it to the lowest outside bidder—while leaving his staff in idleness and on salary—his position would seem quite as defensible as that of a government which pays for labour which could be performed by its own wards.

“The question of prices is one which it is not necessary to consider in connection with the adoption of the policy. Whether the prices at which the work shall be procured be high or low, the profit would accrue to the government, and the expenditure would be placed beyond criticism.

“It may be also noted that the operation of the present system of procuring government supplies gives profit and employment to but a limited number of tradesmen and operatives, while the practical effect of the proposed system would, by saving expenditure, distribute the profit among all Canadian taxpayers.”

The question of prison labour was considered by the departmental committee on prisons, whose report was presented to the Imperial Parliament in 1895. The recommendations of the committee may be summarized as follows:—

- (a) Unproductive labour to be abolished whenever possible.
- (b) Association for productive work and technical instruction to be extended gradually, and with due caution, throughout the prisons.
- (c) Productive prison industries to be increased as much as possible, especially as regards gardening, farming and land reclamation.
- (d) Every effort to be made to secure additional orders from government departments.
- (e) Prisoners to be enabled to earn something continuously during their sentence.

Referring to recommendation (d) the directors of convict prisons in their report for 1895-6, state:—

“Considerable success has already attended the efforts of the prison commissioners to secure additional orders from government departments. The Admiralty, War office, Post Office, office of works, and the office of the metropolitan police have all been approached, and we feel sure that we may rely on their cordial co-operation. Many additional orders have already been booked.”

“In my last annual report I referred to the advantages to be derived from agricultural labour, but as this employment is available during a comparatively short portion of the year, it need not necessarily interfere with the adoption of a system of government workshops for the manufacture of goods required for the various departments of the service.”

In 1905, in our annual report, we state:—

“In several of the penitentiaries there is not adequate labour available and the question of providing additional work is therefore urgent. The suggestion that prison labour must not come in competition with free labour is self-evident absurdity. So long as our laws require that hard labour shall be a portion of each penalty it must necessarily follow that the work performed in compliance with the sentence will displace that amount of free labour. The work involved in cooking, cleaning, repairing and in the construction of buildings within the prison walls could all be done by free labour, and, therefore, every day’s work performed by a convict displaces labour that would otherwise be available to ordinary labourers. The sentence of the court and the statute upon which it is based impose labour upon a convict, and it becomes the imperative duty of the government to furnish facilities

for carrying out the sentence. That convicts must labour is imperative and that such labour will displace that of free citizens is unavoidable. These are matters of obligation and not merely questions of policy. It may not be desirable to employ prison labour in the manufacture of articles that will compete with the production of free labour in the open markets of commerce, but in order to avoid doing so it is necessary that the government should, so far as possible, utilize the labour of its wards in supplying its own requirements. It is not unreasonable to expect that the government will utilize the labour of its own wards in supplying its own wants, especially when the labour is imposed by statutory obligation.

'In several of the neighbouring States, legislation on these lines has been enacted with satisfactory results.

'The principle has been embodied in the constitution of the State of New York, and after several years' experience there is no complaint of injustice to any citizen.

'The following excerpts show the character of the legislation referred to:—

"No person in any such prison, penitentiary, jail or reformatory, shall be required or allowed to work, while under sentence thereto, at any trade, industry or occupation, wherein or whereby his work, or the product or profit of his work, shall be farmed out, contracted, given or sold to any person, association or corporation. This section shall not be construed to prevent the legislature from providing that the convicts may work for, and that the products of their labour may be disposed of, or for or to any public institution owned or managed and controlled by the State, or any political division thereof; . . . in productive industries for the benefit of the State, or the political divisions thereof, which shall be under rules and regulations for the distribution and diversification thereof, to be established by the State Commission of Prisons.

"Articles so manufactured shall not be purchased from any other source, for the State or public institutions of the state, or the political divisions thereof, unless the State Commission of Prisons shall certify that the same cannot be furnished upon such requisition, and no claim thereafter shall be audited or paid without such certificate."

'The propriety of adopting similar legislation in Canada is respectfully submitted for your consideration.'

In our last annual report we have taken the liberty of again referring to the matter as follows:—

'The rapid increase in population has intensified the labour difficulty and makes it necessary to decide upon some solution without delay. The question of prison labour is not one of policy. Labour is imposed as a part of the sentence and is as obligatory as detention. The only question of policy involved is that of determining the kind of labour to be adopted. The work required to maintain the institutions provides employment for one-half the prison population. If the other half is to be employed, as the sentences require, what employment shall be adopted?

'So far as we can see, there are but three courses open for consideration:—

(1) To maintain the convicts in idleness or semi-idleness, in defiance of the sentence and at the expense of the tax payers.

(2) To establish industries and dispose of the products on the open market.

## SESSIONAL PAPER No. 34

(3) That the government shall utilize the labour of its wards in providing for its own requirements.

The objections to the first and second proposals are obvious, but we can see no valid or reasonable objection to the suggestion that articles required for the various departments of the government should be provided by the labour of those who are maintained at public expense. In a previous report (1905) we called attention to the policy adopted by the legislature of the State of New York and subsequently embodied in the constitution of that State.

We understand that the statute was drafted after consultation with, and with the concurrence of, representatives of the manufacturing and labour interests, and that its operation is entirely satisfactory to both.

The present condition of our penitentiaries makes the question an urgent one, and we respectfully submit it for your consideration.'

The reports just quoted are reiterations of the same difficulty, with the same recommendation. In our experience, with the limited operations of the twine factory at Kingston, we are convinced that it is not feasible to introduce industries that will necessitate sales on the open market. Manufacturers and jobbers usually sell on terms. In order to compete we would have to either sell on terms or give a heavy cash discount. If we gave the discount we would be accused of selling at 'slaughter prices.' If we gave terms, we would have to discriminate as to the financial standing of traders, thereby giving ground for complaint. It is also difficult to enforce payment by the government, as debtors who may be in sympathy with the party in power frequently use political influence to stay proceedings. This makes it difficult to conduct business on business principles.

In recommending an adaptation of the New York constitutional provision we are satisfied that no serious obstacles would arise. We could furnish, periodically, to each department a list of such articles as we can supply, and it would only be necessary that those in charge of such purchases be prohibited from purchasing otherwise, unless we notified them of our inability to supply the articles.

The articles which we are prepared to supply without adding to our existing facilities are:—

- (1) Brooms, mops, scrubbing brushes and door mats for all public buildings.
- (2) Letter carriers' uniform (including caps and boots).
- (3) Rural mail boxes.
- (4) Uniforms for employees of the government railways, fishery protection service and railway mail service.
- (5) Overcoats for the militia.
- (6) Boots and uniform for the Dominion police and undress uniform (stable suits) for the R.N.W.M. police.

Without any considerable expenditure for plant, the list could be extended to include desks, filing cabinets, etc., for offices, and also the entire uniform for the militia throughout Canada.

The question of the policy to be adopted is respectfully submitted for your consideration and instructions.

(Sgd.) G. W. DAWSON,

*Inspectors.*

## APPENDIX A.

## DOMINION PAROLE OFFICER'S REPORT.

To the Honourable

CHARLES J. DOHERTY, K.C., D.C.L., LL.D.,  
Minister of Justice,  
Ottawa.

SIR,—I have the honour to submit to you the annual report on the parole system for the fiscal year ending March 31, 1913.

## ITINERARY.

During the past fiscal year I have visited the seven penitentiaries and interviewed 483 prisoners; also, I made inquiries into a large number of cases submitted from the department for inquiry and investigation, and reported on the same. While visiting the various centres I found the men on parole in steady employment and doing well generally. I have also obtained employment for over 400 men before their release on parole and in some cases readjusted their environment and employment after their release.

## STATISTICS OF FISCAL YEAR.

During the past fiscal year, 445 prisoners have been released from the seven penitentiaries and 470 from the provincial prisons, jails and reformatories of the Dominion—in total, 916. The number of cancellations for non-compliance with conditions of license for the past fiscal year was 32, or 3 per cent, and the number of forfeitures for subsequent convictions was 45, or 4.9 per cent. In total, the number of delinquents for the past fiscal year is 77, or 8.4 per cent. The number of prisoners who completed their paroles during the fiscal year was 354, and the number who have not completed and who are still reporting is 485.

## STATISTICS SINCE THE INCEPTION OF THE ACT 14 YEARS AGO.

It is impossible to use the above figures from the past fiscal year, or any one previous year, as a criterion of the success or of the failure of the parole system, as a number of the forfeitures and cancellations published each year revert to the preceding years in cancellations and forfeitures. The only satisfactory or crucial test we can make is to take our deductions from the figures embracing the aggregate results up to the close of the past fiscal year. By so doing we can form a correct opinion of the working out of the system.

The total number released on parole during the past 14 years, ending March 31, 1913, is 5,495, divided as follows: From the penitentiaries, 2,967; from the provincial prisons, jails and reformatories, 2,058. The number of sentences com-

## SESSIONAL PAPER No. 34

pleted on parole during the 14 years was 4,513; that is, 82 per cent of the entire number released have finished their paroles and are now absolutely free from the oversight of the system, and, as far as we know, enjoying good citizenship. The total number of prisoners now on parole and reporting, is 668, revealing that another 12 per cent of the entire number have still the prospect of finishing their parole during the coming years.

On the other hand, during the 14 years' operation of the parole system, the total number of forfeitures for subsequent conviction was 145, or 2.6 per cent. The number of cancellations for non-compliance with conditions of license for the past 14 years was 169, or 3 per cent, bringing up the total number of failures in the system to date, 314, or 5.7 per cent on the entire system.

I am sure these results must be gratifying indeed to those who have taken an interest in this movement and who believe that there is a responsive chord in the hearts of men, which will vibrate to the appeal of integrity and honour.

## COMMENT.

The number of releases cannot be increased from year to year without there being a corresponding increase in the number of forfeitures and cancellations. Should the parole system ever develop so that all prisoners in our penitentiaries would have an opportunity of demonstrating their ability to keep a parole, in proportion to the number now released from our penitentiaries, the failures would not exceed 15 per cent on the whole, but the percentage might be much larger, as under our present system great discrimination is used and thoughtful consideration given on the merits of each case before the minister gives his decision on any individual case. I really think that an automatic system of parole from the prison viewpoint of conduct and industry, if ever inaugurated, would destroy the efficiency and the results as now obtained through much thought and careful study of each individual case. The parole system, in its economic value to the community, is seldom spoken of, yet when we consider that these prisoners average an earning capacity as wage earners of \$8 per week, supporting themselves and, in some cases, their wives and families, while under supervision, that were they still in custody in our prisons they would not be producers but wards of the state, costing the country more than \$300 per capita per annum.

It is also gratifying to know that so many of them have completed their paroles and are now enjoying good citizenship. Some of these men are receiving large salaries and are to-day holding positions of trust and honour in every province of the Dominion. Best of all, a large majority of them are changed men and are leading upright lives.

If in the final analysis of reformatory measures or methods, we find 75 or 80 per cent demonstrate their ability to reform and remodel their character, we must admit that a tremendous force is in operation in our communities for the uplift and general good of our anti-social fellow citizens.

The figures published in this report have been furnished by the Chief Commissioner of Police, and are exact with those given by the Secretary of State Department, except in the totals for delinquency for the past fiscal year, namely: cancellations and forfeitures.

The Secretary of State Department figures read:

Cancellations.....	31
Forfeitures.....	37

— 68

The Chief Commissioner of Police Department figures read:

Cancellations.....	32	
Forfeitures.....	45	
		77

Making the divergency 9. The percentages, as published from the police figures, increase the total delinquency 1 per cent.

The following is the complete report of the Chief Commissioner of Police for the past fiscal year, and totals on the entire system:

1912-1913 to March 31st :

Released on parole from penitentiaries.....	446	
Released on parole from other prisons.....	470	
		916
Licenses revoked.....	32	
Licenses cancelled.....	45	
Sentences completed on parole.....	354	
Sentences not completed.....	485	
		916

1899-1913 to March 31st :

Released on parole from penitentiaries.....	2,967	
Released on parole from other prisons.....	2,528	
		5,495
Licenses revoked.....	169	
Licenses cancelled.....	145	
Sentences completed on parole.....	4,513	
Sentences not completed.....	668	
		5,495

PENITENTIARIES.

Number of prisoners released on parole for the fiscal year ended March 31, 1913:

	Men.	Women.
Kingston.....	92	1
St. Vincent de Paul.....	93	
Dorchester.....	66	1
Manitoba.....	37	
British Columbia.....	88	
Alberta.....	50	2
Saskatchewan.....	15	
	441	4

Penitentiaries—total.....	445
Provincial prisons, jails and reformatories.....	470
	915
Grand total.....	915

NOTE.—There is a divergency of one in our figures from the tabulated statement of the penitentiaries, from that of the Dominion Police in regard to Alberta penitentiary; one license being refused by the prisoner: it could not be counted as a license on parole.

## SESSIONAL PAPER No. 34

There is no doubt but what the large majority of prisoners, convicted for their first offence, are not confirmed criminals, but victims of temptation, and if subjected to reformatory treatment will respond sympathetically and become good citizens. If a number of our best educated citizens, anywhere, were adrift in an open boat on the high seas without food or water, it would only be a question of time when these men would be casting lots as to which of them should be killed and eaten. If the same number of our ordinary citizens, anywhere, were in a like situation, it is probable, even if not certain, that they would neglect the formality of casting lots and the weaker would be sacrificed to the stronger. This illustration is only used to establish the fact that criminal instincts are latent in all humans. While some may represent a more orderly process as the outcome of a higher education or environment, the ordinary person represents the natural struggle for existence; and in both cases the result would be practically the same when tested. What I mean is this—the average citizen owes at least a large share of his good conduct to the inherited social advantages in which civilization and our social environment has placed him. Remove the advantages and increase the stress, and the good, or so-called good, man breaks. I firmly believe that the law-breaker is not born a criminal any more than that which the universal human family possesses from nature; but criminals are made by environment and so-called society. It is probable that 95 per cent of all crime is curable, and if this is so, at least 95 per cent of all criminals are curable also. It is a consolation that the criminal type, thus far, generally remains to be discovered in the prisons, and not outside of them, and if ever our criminal anthropologists should be let loose on society to pick out criminals with a full table of indications, such as are now published, and a complete set of measurements, there is no telling who would escape from criminal taints revealed by these wonderful professors of criminology. But the question is, from a reformatory viewpoint—what can be done for the ninety and nine who have gone astray, rather than spend our substance in helping one black sheep who never deserved a fold? From a study, based on observation and investigation, I firmly believe, not over 5 per cent of our population in the penitentiaries are born with abnormal criminal instincts.

The question of heredity is not for a layman or a student like myself to opinionize, but it is one rather for those who have made the medico-psychological study of prisoners a specialty. That there is a small percentage of criminals who inherit constitutional criminal tendencies, or traits of a criminous character, no one will dispute, but even among this small percentage you will find very few prisoners who will prove impervious to the gracious influences of a sane treatment, having for its object the ultimate cure of the criminal. The much discussed heredity and environment question may rightly be made to include all conditions of criminality. One of the most successful methods of combating the criminal in every man, is found in providing remunerative employment, which enthrones the will and the conscience of men, so that the needs of life may be reduced to the limits of possibility in relation to crime and economics.

Unfortunately, in recent years, there has been a prejudice against prison labour. Industry is the main factor in the reconstruction of men and the nature of employment furnished the prisoner while in custody has crystallized itself into legislation which makes it difficult to provide suitable or educational employment for prisoners, and, as a result, convicts in our penitentiaries are sometimes sent out on their discharge handicapped for want of a trade. These conditions are detrimental to the State as well as to the individual. We find more men in prison deteriorate, both physically and mentally, for want of proper employment than from overwork or other treatment in prison. Prison labour has never been in competition with outside labour, for I find in the United States Census Bureau of Statistics (we have no figures bearing on this question in Canada) that the amount of prison labour is only fifty-four one hundredths of 1 per cent of the entire output of labour in

the United States. I think if the Canadian figures could be carefully compiled, they would reveal no larger percentage than this, and probably smaller, as the prison output in this country is much less in percentage than the prison labour output in the United States. You can readily see at a glance that prison labour in Canada practically amounts to nothing, as far as an influence on wages or the wage-earner is concerned. Then why this annual outcry against prison labour by our politicians? Is it not an object of vote-catching rather than any vital principle involved? Suitable legislation could easily control the output of prison labour, and our institutions might produce a great many commodities for the government which would prove of lasting benefit to the inmates of the federal prisons in their instruction of skilled labour, and demonstrate not only its economical value, but its far-reaching influences on the future life of unfortunate and erring men. I have always held that the state has the absolute right to instruct prisoners in their institutions in every branch of high-class labour. Education of the hand as well as of the heart and head is essential in their treatment. The relation of occupation to crime is having, and has had, some consideration, and we are not ungrateful for small mercies, but yet there is but little effort to solve the problem of prison labour and provide better instruction for the inmates of our penitentiaries. From a penological viewpoint, the greatest need of the situation is the establishing of educational or technical industries in our penitentiaries, embracing all classes of industries, and until a technical plant is undertaken we cannot expect better results from those released on parole or on expiration of sentence. The penitentiary surely should be a place to qualify and fit men for usefulness in life, even if they have gone astray, and this cannot be accomplished, or our hopes realized in fruition, until this handicap is lifted and a more sane and humanitarian system inaugurated. It is impossible to expect the good results from a man held on a stone pile or kept at menial labour all through his sentence and everlastingly punished or made to feel that his punishment is so great that his manhood must be humiliated by the most debasing labour. All labour, we earnestly uphold, is honest, but there is a limit in the drudgery and debasing tasks imposed, sometimes, in our penitentiaries, oftentimes, for want of a properly equipped plant of industry. Surely our country is rich enough and our men in power strong enough, and the general public sympathetic enough to make such changes as advocated by the inspectors for so many years, a living reality in the near future.

Respectfully submitted,

W. P. ARCHIBALD,  
*Dominion Parole Officer.*

SESSIONAL PAPER No. 34

## APPENDIX B.

## WARDENS' REPORTS.

## KINGSTON.

(During the fiscal year ended March 31, 1913, this institution was in charge of one of the inspectors of penitentiaries.)

## ST. VINCENT DE PAUL.

April 1st, 1913.

To the Inspectors of Penitentiaries,  
Ottawa.

SIRS,—I have the honour to submit my annual report, together with crime statistics and other reports in connection with this penitentiary for the year ending the 31st March, 1913.

Remaining convicts at midnight, 31st March, 1912, was..	442	
Received during the year from common jails.....	156	
“ “ “ “ “ forfeiture of license.....	4	
“ “ “ “ “ licenses revoked.....	3	
		605
Discharged by expiration of sentence.....	91	
“ parole.....	93	
“ deportation.....	5	
“ death.....	2	
“ transfer to Kingston.....	8	
“ Court order.....	1	
		200
Remaining at midnight, 31st March, 1913.....	405	

The conduct of the convicts has been very good. No serious breach of discipline has occurred.

A large amount of building work was accomplished during the year, namely:

*North Wing.*—The reconstruction of the north wing, commenced in May, 1912, has been pushed forward rapidly. I venture to hope it will be completed and ready for occupation this summer. It will contain 181 large, well-lighted and thoroughly ventilated cells, each furnished with water-closet, wash basin, electric

light, bed, stool and table. All the work in the reconstruction of this wing is being done by convicts, under the direction of trade instructors. As few of the convicts are skilled workmen it is remarkable the progress that has been made; masons, plasterers, bricklayers, blacksmiths, stonecutters, carpenters, electricians, engineers and moulders have all been employed preparing and shaping the material required.

*Hot Water Heating.*—It having been decided to heat the new wing by this system, a 14-inch Presto Heater was installed in December, 1912. A 16-inch heater was installed in keepers' hall basement to heat the hospitals, protestant chapel, warden's and accountant's offices, deputy warden's residence, Roman catholic chapel, store and north lodge. This change throws out of commission the three old furnaces, and will effect a considerable saving in fuel.

*Quarry.*—During the summer a gang of 25 to 30 men were employed quarrying and carting stone for the reconstruction of the new wing.

*Tramway.*—The tramway trestle bridge was repaired temporarily early in the spring. It having been decided to build a concrete culvert this year, teams are engaged carting refuse stone and earth to extend the embankments.

*Warden's Residence.*—The laying of a concrete walk at front entrance and west side of the warden's residence was completed in the fall.

*Boundary Wall.*—Pointing and repairing the west side of boundary wall was started in July last. The coming summer will, I hope, see a large part of this work completed.

*New Hospital.*—Work will be resumed on this building in April, and pushed forward until completed.

*General Repairs.*—There has been the usual amount of repairs to buildings and machinery during the year. In addition to the foregoing, the shoemakers, tailors, tinsmiths and bookbindery departments have all been fully occupied.

I recommend that the building of a concrete pier to protect the main water supply pipe from the ice jamming in the river be commenced as soon as the culvert is completed.

In finishing my report, I beg to say that, as a rule, the officers have, during the past year, manifested zeal and faithfulness, which merit the thanks hereby tendered to them.

Respectfully submitted,

G. S. MALEPART,  
Warden.

SESSIONAL PAPER No. 34

DORCHESTER.

DORCHESTER, N.B., April 28, 1913.

Inspectors of Penitentiaries,  
Ottawa.

SIRS,—I have the honour to submit my annual report, together with crime statistics and other reports, in connection with this penitentiary, for the fiscal year ended March 31, 1913.

During the year there has been a decrease in the population at this penitentiary. On March 31, 1913, the total population was 195, as against 220 on March 31, 1912.

Farming operations were seriously handicapped owing to the very rainy season, and results were disappointing. Work on the new boundary wall was carried on during the summer and fall, and I trust the coming summer will see the wall completed.

The discipline has been good and the officers faithful in the discharge of their duties. In conclusion, I again desire to express my sincere thanks to yourselves for the courtesy and assistance extended to me, and also thanks to the general staff for the respect and good-will accorded me in the discharge of my duties.

Respectfully submitted,

A. B. PIPES,  
*Warden.*

SESSIONAL PAPER No. 34

BRITISH COLUMBIA.

NEW WESTMINSTER, B.C., May 7, 1913.

Inspectors of Penitentiaries,  
Ottawa.

SIRS,—I have the honour to present the statistical and other reports of the British Columbia penitentiary for the year ended March 31, 1913.

The net increase in prison population, as shown by the number of convicts in custody when the year began and when it ended, is 20. This contrasts very favourably with the net increase of 71 which I had to report last year; but it is, unfortunately, rather too favourable a showing. As it happened, the number of prisoners discharged just before the end of the year was large, and the number received small. The daily average statement shows an increase of 55. The statement of punishments, on the other hand, appears to show more difficulty in maintaining discipline than in the previous year, but, as a matter of fact, discipline on the whole was more satisfactory. A large number of the punishments inflicted were short terms of bread and water diet, or losses of a few days' remission, and the bulk of these were on reports arising out of greater strictness in searching the convicts and their cells. A more determined effort has been made throughout the year to suppress 'trafficing,' and this has resulted in weeding out the staff, and also, as indicated, in increasing the number of punishments inflicted on prisoners. The statement of recommitments is rather more favourable than in the previous year.

Early in October an outbreak of violent temper on the part of a convict led to the death of an officer and two convicts. Where a considerable number of convicts, some of whom are drawn from the most lawless classes on the coast, are working in gangs, using stone-hammers, axes, picks, shovels, and so forth, it is impossible to guard completely against the occurrence of such deplorable affairs as that above referred to, but measures have been adopted which, to some extent at least, will decrease the probability of serious results.

No escapes are reported. It is true that three men on one occasion, and one man on another, ran away from the gangs in which they were employed, but they were recaptured within a short time and with very little difficulty. None of these men had a year to serve. They were all good conduct men, who might fairly expect release on parole before their time was up, and the fact that they risked, in such circumstances, incurring the penalties attaching to attempt to escape, shows how difficult it is to carry on work outside the penitentiary wall without either employing an extravagantly large number of guards, or risking occasional escapes. I am speaking, of course, particularly of the situation here, where patches of bush are within a few minutes' run from almost any point of the reserve, and the whole surrounding neighbourhood, owing to the rapid development of this part of the country, is gridironed with roads and trails.

The returns of work done for the year will, to some extent, show what we have been able to accomplish. The principal work, and that to which our main attention has been given, is the building of the new east wing. There is a heavy cement basement which, rising some two feet above the ground level at the upper end, next to the prison, is some 16 feet above ground level at the lower, or east end. This was completed some time ago, and the close of the year found the brickwork of the walls well under way. Work was suspended for over a month on account of the unusually heavy snowfall in January, but since its resumption, very satisfactory progress has been made, and we now hope that this building will be ready for occupation in the summer of 1915.

The new entrance to the prison was opened January 1, and is more convenient for the public and much less objectionable in the matter of guarding against inter-

course between the public and convicts at work than the old entrance. The new entrance road is not completed as yet, but is quite usable during the summer weather, and will, I hope, be installed and rolled before next winter, sufficiently to remain in good condition during the wet weather. On the rearrangement of the grounds in front of the penitentiary, a large amount of work has been done, but we shall not be able to make much progress with this during the next few months, as farm work and brick making will furnish full employment for all the convicts whom we can venture to employ outside the walls, and for the officers available to guard them.

I am congratulating myself, I hope not without warrant, on the condition of the staff. The officers who have been for some time in the service continue to discharge their duties diligently and faithfully, and amongst those more recently employed, the greater number promise to develop into efficient officers.

I wish to put on record here my sense of obligation to the officers of the Salvation Army and to several employers of labour for their kindness in looking after and finding employment for discharged convicts, and also to the chiefs of police of New Westminster and Vancouver and the detective officers under them, for assistance in a good many matters in connection with my duties as warden.

Respectfully submitted,

JOHN C. BROWN,  
*Warden.*

---

ALBERTA.

EDMONTON, ALTA., April 30, 1913.

Inspectors of Penitentiaries,  
Ottawa.

SIRS,—I have the honour to submit my annual report, with detailed reports from the various departments of the Alberta penitentiary, for the twelve months ending March 31, 1913.

Our building operations have been successful, the warden's house and the east wing cell block are almost completed, and the foundation for the workshops are all in. Our brick-yard has supplied all the brick necessary for our buildings, and we have over half a million good brick piled in the yard ready for this summer. Our farm has been successful in supplying all our vegetables, and we have a good supply on hand until the new crop comes in; also plenty of hay for the horses.

The coal mine has been successful in supplying all our needs. On account of our convicts being scattered in three different buildings, it took a large amount of coal to keep these places warm.

The conduct of the prisoners has been very good, and the officers have maintained good discipline.

The matron deserves credit for her good management, and the large amount of work done in the female ward.

In conclusion, I wish to thank my officers for their hearty support.

Respectfully submitted,

M. McCAULEY,  
*Warden.*

## SESSIONAL PAPER No. 34

## SASKATCHEWAN.

PRINCE ALBERT, SASK., April 2, 1913.

The Inspectors of Penitentiaries,  
Ottawa.

SIRS,—I have the honour to submit my annual report for the year ended March 31, 1913, together with statistical and other statements.

At the close of the last fiscal year there were 58 convicts within the walls of the penitentiary; we have received 65 since then, making a total of 123. Of these, 6 have been discharged by expiration of sentence, 15 by parole, 4 by deportation, 1 transferred to Manitoba penitentiary, and 2 females transferred to Alberta penitentiary, leaving 95 on hand at the end of the fiscal year.

I am pleased to report that there were no deaths or escapes during the year.

Considerable work has been done during the year; the warden's residence is completed and occupied.

The deputy-warden's residence has been started, concrete footings and concrete walls of basement to ground floor have been completed. Ground floor joists are in, and first rough floor laid. All door and window frames, outside and inside sash are made, and we are working on the inside doors and frames. Outside work on the building will be resumed as soon as the weather permits.

A good baking oven has been built in the west wing, and is giving good satisfaction.

A complete brick-making plant has been put up, all the necessary drying racks, buildings covering machinery, and one of the large sheds covering the brick kilns.

We manufactured 178,000 first-class bricks; 75,000 are being used in the deputy-warden's residence.

We expect to run this plant to its full capacity during the coming summer.

Provision will have to be made in the near future for more cell accommodation; if our convict population increases next year as it has done this one, it will more than fill our present cell block.

*Farm.*—We had 80 acres under crop, and threshed out 2,332 bushels of grain, oats, barley, and wheat. The acreage will be increased this year to 100 acres. We had a fairly good crop of vegetables, enough to fully supply the prison.

The piggery is yet in its infancy; 2,114 pounds of pork was sold to the steward's department, and we have 31 live hogs on hand; 40 loads of good hay were cut and stacked; 175 cords of wood was cut from the prison bush lands, and put up for the brickyard.

The conduct of the prisoners has been good; there were only three serious breaches of discipline during the year.

The instructors of the various trades are all busily engaged and doing good work, considering the raw labour material they have to work with.

The discipline has been good and well maintained. I regret to say that a large number of the police staff left during the year; it is hard to get good men to replace them; the salary is small, and the work tedious. This necessitates the employment of men on the temporary staff that cannot possibly qualify for the permanent staff.

The brickmaker instructor was shot and killed while away on holidays deer shooting; he was a good officer, and it will be hard to replace him.

In conclusion, I wish to thank the officers for their hearty support during the year.

Respectfully submitted,

F. W. KERR,  
Warden.

## APPENDIX C.

## SURGEONS' REPORTS.

## KINGSTON.

To the Warden,—

SIR,—In accordance with the law in connection with the administration of the Dominion penitentiaries, I hereby submit my annual report of the medical department of the Kingston penitentiary for the year ending March 31, 1913.

In the formulating of a report year after year, it would be impossible to avoid a certain similarity in them, in view of the fact that the work, and the administration in connection with it, are of a kind which admit of very little variation in its performance so long as the duties are honestly, willingly and agreeably accomplished. It is that *esprit de corps* in every department, not alone in the penitentiary service, which makes every duty a pleasure, and every special effort the symbol of interest taken in the work. The year which has now passed has not been marked by any particular occurrence on which one could make a special observation. Indeed, the programme of former years may be justly taken as the ground-work on which to erect the superstructure which I have now undertaken to erect, and to weave briefly the material at hand into a legible form.

At the close of the fiscal year there were 516 prisoners in the penitentiary. There was the usual amount of sickness amongst them, but there was no infectious disease to be reported. Many of the prisoners come to prison with diseases contracted on the outside world, and for which no treatment has been sought on account of their having no funds for the payment of proper attention. Consequently, as soon as they enter prison, they are at once placed under a proper regime, and given such treatment as they may require, till cured. It is remarkable how soon a prisoner wants to be cured when he comes to prison, even though for years he has carried the most loathsome disease around with him, untreated. It is, I presume, on the principle that he can now get something for nothing, and he usually gets it. Though there have been a large number of prisoners suffering from glandular tuberculosis, the glands of the neck being generally involved, yet there is at the present writing, only one who manifests the symptoms of tuberculosis of the lungs. The reports of prisons generally, indicate that pulmonary tuberculosis is one of the commonest of the chronic diseases, and which is, as a rule, fatal in its termination. In prison, this is generally owing to the fact that prisoners, before incarceration, have given themselves up to riotous living and vicious habits, which have a tendency to weaken the system and lessen the resistance of parts prone to disease, in their hereditary make-up.

As an evidence of the degeneracy of the age, it may be noted that an unusually large number of youthful prisoners required to be adjusted with spectacles, having worn glasses previous to their admission. Again, there are others who suffer from defective sight temporarily, owing to their range of vision which had been for long

## SESSIONAL PAPER No. 34

distances previous to imprisonment, being now restricted to the abbreviated range within the prison enclosure. The eye, however, soon adjusts itself to conditions, and spectacles are soon dispensed with; the condition which was at the time thought to be a permanent defect, now appearing to be merely a matter of adjustment to the new surroundings.

The sanitary condition of the prison for the year has been up to the usual standard of efficiency. Every effort has been made to leave nothing undone which should be done to carry out the principles on which these important measures are established. The various workshops, dormitories, and other departments are carefully attended to as regards ventilation, heating, and cleanliness. The water used for drinking purposes was examined during the year, and found free from organic particles which would cause disease. To the pure water from the bored well, and to the care and attention exercised over the cleanliness of the vessels used for drinking purposes, may be attributed the comparative freedom from any form of fever, the germs of which are water-borne for some years. The food has been abundantly served, well cooked, and distributed in vessels to the prisoners in a palatable form.

There were 140 cases of officers on the sick list during the year, all of whom required my daily service. On one officer I performed a serious operation, and he is now in good health. Many of the officers suffered from pneumonia, and required repeated visitations from me during the day, and frequently during the night, till the crisis was over. To the sick officers I rendered 1,110 visits.

As usual, the hospital has been kept in a good condition and always ready for the reception of the sick, who receive every attention, day and night, the directions being carried out most carefully. The admissions to the hospital have been large, and approximate to the numbers of former years. Several minor operations were performed on the eye, ear, nose, and throat and on other parts of the body. These can now be performed with the great facilities offered by our new operating room, provided with all the requisite armamentaria for the work. One amputation of the thigh, owing to tuberculosis of the knee joint, was performed, and though the prisoner had at the time all the appearances of impending dissolution, he made an uneventful recovery, and returned to his home in Italy. Another prisoner who suffered from obstruction of the bowels, with gangrene of the parts, on whom I performed an operation to restore conditions, made a most satisfactory recovery, and is now acting as an orderly in the service of the hospital overseers, and is grateful for his restoration to health. A great many prisoners suffer from congenital mental deficiency, which, during trial, has been entirely ignored and absolutely unrecognized until the condition is diagnosed in prison. The establishment of special institutions whereby the mentally weak could be transferred and maintained until a proper certification could be furnished that they could be released with safety, would be a great auxiliary to the present prison system of dealing with this class. With the exception of an injury to the eye, producing a traumatic cataract which will later require an operation, there was no accident amongst the prisoners.

It is with regret that I have to record the death of the Rev. A. W. Cooke, the chaplain, whose daily ministrations to the sick and to those in distress, was a source of much comfort to them. Verily, a life is noble in proportion as it has before it a noble ideal, and strives manfully to live up to it. In no case has this been so well exemplified as in the subject of this brief sketch, and though he had reached a time of life when most people begin to feel to some extent the ravages of time, he gave daily, by his example, a demonstration of old age rendered venerable by all the gentler qualities of human kind. His character was absolutely pure and without stain.

In connection with the hospital management it may be stated that the number of dispensary patients who received treatment and advice was 6,205, the daily average being 17. The number treated in the hospital was 339, the number of days in the

hospital was 4,450, and the average number of patients daily in hospital was 13. Besides the work of administrative detail, which is always urgent, there was an enormous amount of medicine compounded wholesale daily on the surgeon's standard prescriptions for the dispensary patients, by the hospital overseer and his assistant, who, besides preparing all necessary prescriptions for the sick in hospital, also prepared 605 special and individual prescriptions for the officers, 90 for the inmates of the female prison, 319 for the asylum patients, 277 for the occupants of the prison of isolation, totalling in all, 1,291 special prescriptions.

*Female Ward.*—The females now occupy their new home on the grounds. As a rule they are very healthy, and, with the exception of affections of the nervous system, and indisposition occasioned by some bronchial affection, they cause very little trouble. There were 11 inmates in this department at the close of the year.

*Insane Ward.*—At the close of the fiscal year there were forty-one inmates in this department, which is, as usual, kept in a perfectly sanitary condition. The movements, transfers and admissions, may be seen in the statistical portion of the annual report of the penitentiaries. Many of the inmates recovered so far as to be returned to work in the general prison population, though on the borderland of recovery it is impossible to state positively when absolute mental health has taken place. There were two deaths amongst the insane.

*Prison of Isolation.*—This ward, which had been closed for some years, was reopened by the present management, who, always in advance in penological matters, saw the great necessity of its immediate occupation by a certain class of incorrigibles and degenerates which infest every prison, and act as a disturbing element. It is needless to say that the reopening of the ward has been a great advance in prison methods. The incorrigibles and degenerate class are isolated where they can find time to consider a line of conduct which will be in harmony with disciplinary regulations. Isolated as they are, they find relief in the quietude of their solitary apartments. Twelve inmates now occupy these quarters.

The usual statistical reports of the hospital overseer are appended.

DANIEL PHELAN, M.D.,

*Surgeon.*

## ST. VINCENT DE PAUL.

To the Warden,—

SIR,—I have the honour to submit to you my report for the nine months ended March 31, 1913. From the records of my predecessor it would appear that nothing of an extraordinary character occurred during the three previous months.

The health of the convicts generally is satisfactory. There were two deaths—one caused by gastro-intestinal trouble and the other as the result of an accident. We also had one light case of small-pox.

Eight convicts were transferred to the insane ward at Kingston penitentiary.

I have given eleven thousand two hundred and eighty-five consultations, and one hundred and fifty-seven convicts have been treated in hospital.

I have to thank the members of the staff for the courtesy extended to me.

The good will and competence of the hospital overseer has been of great assistance to me in the performance of my duties.

Respectfully submitted,

J. A. POMINVILLE, M.D.

*Surgeon.*

D. O'SHEA,  
*Hospital Overseer.*

---

DORCHESTER.

DORCHESTER, N.B., April 22, 1913.

To the Warden,—

SIR,—I have the honour to submit my annual report for the year ending March 31, 1913.

During the past year the health of the convicts has been fairly good. There were the usual number of colds, sore throats, and rheumatism, these being largely attributable to the many climatic changes during the past winter. There were no real epidemics. One death from pleuro-pneumonia occurred on March 17, 1913. The patient was fifteen days in the hospital. There were three cases of insanity, these were transferred to the insane department of Kingston penitentiary. I consider the sanitary conditions of the penitentiary good. The food served to the convicts is of good quality and both abundant and nourishing. The convicts seem satisfied in this respect.

I greatly appreciate the courtesy shown me during the year by the staff.

Respectfully submitted,

D. D. McDONALD, M.D.,  
*Surgeon.*

## MANITOBA.

STONY MOUNTAIN, April 14, 1913.

To the Warden,—

SIR,—I have the honour to submit report of the medical department of Manitoba penitentiary for the fiscal year ended March 31, 1913.

During the year the health of the convicts has been fairly good, only a very few of the cases treated being of a serious nature. There have been no deaths, no epidemics or infection, and no serious accidents, excepting a sprained ankle resulting from a fall from a scaffold. One insane patient was transferred to Selkirk asylum, and one was sent back to the provincial authorities.

The general health of the officers has been good.

Statements of cases treated at the dispensary and in hospitals are appended.

Respectfully submitted,

J. A. McGUIRE, M.D.,  
*Surgeon.*

J. H. DAIGNAULT,  
 Hospital Overseer.

## BRITISH COLUMBIA.

NEW WESTMINSTER, B.C., April 1, 1913.

To the Warden.—

SIR,—I have the honour to submit my annual report as surgeon of this penitentiary for the year ended March 31, 1913.

The health of the convicts has been good, not many serious cases occurring, and the number of cases treated in hospital being about the usual number in proportion to the increased prison population.

The principal feature of the year, perhaps, was an epidemic of la grippe among the guards, at one time as many as eight or nine being laid off with this complaint.

The usual tables are appended showing the work done during the year.

I have the honour to be, Sir,

Your obedient servant,

W. A. DeWOLF-SMITH,  
*Surgeon.*

## SESSIONAL PAPER No. 34

ALBERTA.

EDMONTON, May 28, 1913.

To the Warden,—

SIR,—During the year which ended March 31, we had perhaps more than the usual number of men complaining of colds, la grippe, and rheumatism, the work in the coal mine (which is a damp place to work) being the cause of much of it. The sanitary condition of the prison is as good as can be expected with the temporary cell accommodation for the great majority of the prisoners. With the completion of the east wing this will be much improved.

We did not have any very serious accidents, with the exception of one prisoner who injured his hip falling down the mine shaft.

We had four deaths, one from typhoid fever, with perforation during a relapse; one from pulmonary tuberculosis; one from fatal syncope. This man did not recover from a fainting spell occurring a few minutes after coming from his work in the mine; the climbing of the hill to get to the prison was very likely the direct cause, over-exertion. He was much troubled with rheumatism, which had a weakening effect on his heart. Also one death from septic meningitis, caused by absorption from an ulcerated tooth. One prisoner was operated on for appendicitis in the hospital corridor, with good results.

The health of the female convicts has been good, with the exception of one who is suffering from Hodgkins' disease.

My experience in attending the sick in the prison is, that when a prisoner gets down with typhoid fever or tuberculosis, the fact of being in prison seems to have a very depressing effect on the patient, and it is hard to get the patients' will-power to assist recovery, which is a big factor in sickness very often.

I remain, Sir,

Yours truly,

ALEX. FORIN,

*Surgeon.*

## SESSIONAL PAPER No. 34

## SASKATCHEWAN.

PRINCE ALBERT, SASK., April 2, 1913.

To the Warden,—

SIR,—I have the honour to submit the second annual report of the medical department of the prison, for the year ending March 31, 1913.

The health of the convicts generally has been about the same as last year, there being considerable sickness during the winter.

I regret to report the death of Wm. Porter, brickmaker instructor, due to shock of a badly comminuted gunshot fracture of the femur, together with pneumonia, due to exposure from a 60-mile drive in very cold weather.

We had one operation on an urgent case of appendicitis with serious complications, with good recovery, although life was despaired of for a time.

I would strongly urge that some method be adopted whereby convicts suffering from chronic ailments, such as anæmia, indigestion, constipation, syphilis, etc., could obtain the necessary amount of outside air. In this connection, I would recommend that all convicts be allowed, and required, to take daily outings.

I would also recommend that the necessary screens for doors and windows be provided for kitchen, dining-room, surgery, and hospital.

I understand that the isolation hospital and isolation cells are under consideration.

The usual statistical tables are appended.

Respectfully submitted,

F. W. FOURNEY, B.A., M.D.,  
*Surgeon.*

## APPENDIX D.

## CHAPLAINS' REPORTS.

---

KINGSTON.

KINGSTON, May 27, 1913.

To the Warden,—

SIR,—I beg leave herein to report, as catholic chaplain, for the past fiscal year, 1912.

During the past twelve months I have been in constant attendance in the penitentiary. From close observation of the men under my spiritual supervision, I feel quite convinced that some have awakened to a consciousness of their evil lives of the past through their coming to the penitentiary, and as the result of the opportunities afforded them of practising their religion, hearing religious discourses and receiving the sacraments of the church at regular intervals, the shock of the revelation to such is in the nature of an exasperating torture. To such individuals a too long detention in surroundings which are inevitable here must be demoralizing and hardening, hence if they could be soon removed to their homes, it would be the better for them, their families and the community. In general the men are quite eager to comply with their religious duties and fully alive to any interest taken to improve their conditions. The library is a great boon to those who can read, and through the medium of the school-room many more obtain what they have never had before, a fair knowledge of reading, writing, with a little practice in arithmetic.

During the past year, I registered eighty new names, struck off sixty-four who were either paroled or served out their sentences, and on the 31st of March had a total of two hundred and six men and six women.

The officers have uniformly treated me with kindness, all of which I highly appreciate.

Yours respectfully,

M. McDONALD,

*Roman Catholic Chaplain.*

SESSIONAL PAPER No. 34

ST. VINCENT DE PAUL.

March 31, 1913.

To the Warden,—

SIR,—On this date last year, the Reverend Father O. Harel was suffering from a very serious illness, which, within a few days, caused his death.

I feel that in writing this, my first annual report, I owe it to his memory to state what sincere sympathy and regret I have found among the prisoners who were under his charge. This was further shown by letters addressed to me by mothers, wives, sisters, or other relatives of prisoners, who asked me to continue the kindness to the unfortunates that they had been accustomed to at the hands of Father Harel.

Owing to the illness and death of my predecessor, and to the opening of a new register, the present report will not be so much given to figures and statistics as to the attention I have given during the past few months to the moral state of the prisoners under my charge.

I am happy to express my complete satisfaction with their general attitude in chapel and their respectful attention to the services, as well as the execution of the liturgical chants.

As to attendance at the sacraments, although of course, there are numerous abstentions, the fact that I have heard 1,500 confessions shows that a considerable number are endeavouring to amend their lives as well from the moral as from the spiritual side.

The present number on my register is 331. Two prisoners died in the hospital during the past few months—one from wounds received by accident. Both received the sacraments of the church and manifested sincere dispositions of faith and repentance.

I thank you, sir, as well as all those who, under your instructions, have contributed to the maintenance in our chapel of the excellent discipline by which it is characterized.

Yours respectfully,

A. MARTIN, Priest,  
*Roman Catholic Chaplain.*

---

ST. VINCENT DE PAUL, April 1, 1913.

To the Warden,—

SIR,—I have the honour of herewith submitting my eighteenth annual report as protestant chaplain of this institution.

It is pleasing to me to be able to report that the conduct of the men in the chapel has, with a few trifling exceptions, been good. I may mention here, however, that there are more absentees than the 'rules and regulations' would, if strictly enforced, permit. This is not the first time I have felt it necessary to mention this matter, as a reference to my report of 1905 will show. During the year the services on Sundays and holy days have been regularly held; the hospital visited three or four times a week, more frequently when necessary, and private interviews given to the men in the vestry of the chapel. In these interviews, it is sought to obtain the confidence of men and to get into closer touch with them. Such, however, is not always the result, it frequently happening that the attitude of the convict towards the chaplain is influenced by what he deems injustice; it may be:—

1. In the working of the parole system as at present administered; or,
2. In the disparity of sentences passed upon the convicted; as, for instance, where one man is given fifteen years for raising a pay check, and another thirty months for shooting with intent to commit murder; or,

3. The hopelessness of one who has been a convict ever getting a chance of making a living honestly, owing to the way they, the ex-convicts, are shadowed, and interfered with by the civic or provincial officials. They say: 'What is use of my trying to live a straight life, if, as soon as I find a job, and am getting on my feet again, the police come along and tell my employer that I have "done time," with the result that I lose my place? Can you blame me if I take a drink or two?'

But while some urge such arguments as an excuse, or justification, in turning a deaf ear to the exhortations addressed to them, others, and I am happy to say not a few, listen and appear grateful for the interest taken in their welfare, acknowledging and lamenting their own weakness in permitting themselves to be drawn into a course of life which has been so disastrous to them.

It will, of course, be understood that in what I have said of the excuses given by those who refuse to listen to advice or exhortation, I am merely stating the case from the convicts', not the chaplain's, point of view. But after nearly eighteen years' experience in dealing with men of this class, I cannot help feeling that there is much in what they say that might furnish food for reflection to those in whose hands lies the power of correcting any abuse or injustice, if such there be.

Some time ago, the chaplains were invited to report upon the desirability of segregation and classification of the prisoners in the several penitentiaries. I sincerely hope, for the sake of the younger prisoners, some of them mere boys, that this much-needed reform may be found practicable in the near future.

I beg to remain, Yours faithfully,

JOHN ROLLIT,

Protestant Chaplain.

## SESSIONAL PAPER No. 34

DORCHESTER.

DORCHESTER, March 31, 1913.

To the Warden,—

SIR,—The protestant chaplain has pleasure in placing in your hands the report of his office for the fiscal year ending March 31, 1913.

The outstanding feature of the report which calls for special pleasure, is that of a marked decrease in the year's registration.

The absence of death from the ranks of the protestants is gratefully noted.

We have pursued the path of duty throughout the year with diligence, ever keeping in mind the fact that crime is a calamity which overtakes the man or woman in the career of life, and that, in the hour of calamity, no remedy is so helpful as the consolations of the gospel of Jesus Christ. We affirm with confidence, that we have tried to faithfully preach that gospel to all who have come before us. We have also supplemented that work with personal interviews, with visits to the hospital and cells, and in some cases have been greatly encouraged.

There have been three observations of the Lord's Supper, and the ordinance of baptism has been once administered during the year included in this report.

The deportment of the prisoners in all chapel exercises makes it clear that a high standard of discipline is rigidly maintained.

The general health of the convicts under my spiritual direction is good.

We are especially pleased with the character of the singing rendered by our choir in recent months, and cannot refrain from recording our appreciation of the valuable assistance cheerfully given by our efficient organist.

Believing that wholesome reading is a valuable adjunct to christian work, we call attention to the fact that our general library is somewhat depleted.

My sincere appreciation of your hearty co-operation in the discharge of my duties is here recorded. In like manner, we make grateful mention of the very hearty sympathy accorded me by the deputy warden, the matrons, and the chief keeper, and, indeed, every member of the staff.

A brief summary of statistics taken from the protestant register is incorporated in this report.

The number of prisoners in custody at midnight, March 31, 1912: 118.

The number in custody at midnight, March 31, 1913: 102.

Respectfully submitted,

BYRON H. THOMAS,  
*Protestant Chaplain.*

DORCHESTER, N.B., April 30, 1913.

To the Warden,—

SIR,—I have the honour to submit to you my annual report for the year ended March 31, 1913, on which date I had ninety-two male convicts and one female inscribed on my register, as against one hundred and two convicts, no female, last year.

Catechism classes are attended with interest and good results.

As far as I can judge, both school and library are well looked after. When well directed, they are two potent agents to elevate and brighten the mind, and bring salubrity and serenity to the soul.

The divine service on Sundays or other holy days is attended with proper decorum.

In fact, whether in the chapel or at catechism classes, in whatever place or occasion I have to meet the convicts, I must say in justice, to a man, that their behaviour is most commendable. Their attention and general demeanour during Mass and public instructions are praiseworthy.

In the course of the past year, I have heard from few 'paroled' convicts who wrote to me in such cheerful tones as to bring joy to my heart; they had secured work, kept away from old associates in crime, adopted good steady habits; in short, were trying to carry into effect their good resolves taken whilst in prison, and, with God's grace, to continue their moral reform by leading a good christian life.

Largely can these excellent results in the right direction be assigned in almost every case to our present 'parole system,' which so far has been a marked success. It has, and will continue to accomplish an immense good amongst the criminal classes, if what so far has been the case, good judgment and proper discretion are exercised by the tribunal which administers it.

It was my sad duty to register one death in the course of this fiscal year.

In conclusion, I must express my sense of gratitude to the Hon. Minister of Justice and P. M. Cote, Esq., of that same department for their untiring zeal in devising ways and means to reform criminal classes; also for the many acts of kindness towards me and especially their co-operation to help my work of uplifting and moral reform amongst the convicts under my spiritual charge.

The uniform civility and gentlemanly demeanour of the officers with whom I came in contact in the discharge of my official duties, including yourself, I cannot ignore, and to mention it here is to show my high appreciation thereof.

I have the honour to be, sir,

Your humble servant,

A. D. CORMIER,

*Roman Catholic Chaplain.*

---

MANITOBA.

April 2, 1913.

To the Warden,—

SIR,—In presenting this, my sixth annual report, permit me to extend to you a hearty welcome as the head of this institution. I trust that our relationships will be of the most cordial character. I desire also to ask for your sympathetic co-operation in my department of this work. As you grasp the details of the workings of the institution, I trust that you will see that the reformation of the individual is by far the most important part of the work. While the punitive side towards the criminal and the protective side towards society have their proper places and bearings, yet surely, as a christian people, we must give first consideration to the reformation of the individual.

In looking back over the work of the past year, I am far from satisfied; I have abounded in opportunities but lacked in facilities. Under the most propitious circumstances, there must always be the waiting between the sowing and the reaping of the harvest. Under different conditions, often the most intensive forms of cultivation are necessary to secure any harvest. I therefore appeal to you for your most sympathetic co-operation in this most difficult, yet important part of the work.

I would like to draw your attention to the number of young men, or grown-up boys, in the institution. Some of these boys are only in the formative stages of their character, and it seems a pity that some method cannot be evolved which would protect these young men from the contaminating influence of the older criminals in the gang.

SESSIONAL PAPER No. 34

While I believe in the possibility of the reformation of all, if you can only touch the right chord in their lives, yet these young men especially appeal to us. I am desirous of making every effort of saving these young fellows and to start them aright in life again.

With new hopes and courage we give ourselves afresh to this great work and trust for greater results.

The following have been the movement and classification of the prisoners under my care during the past year:—

Your obedient servant,

S. W. L. STEWART,

*Protestant Chaplain.*

STONY MOUNTAIN, March 31, 1913.

To the Warden,—

SIR,—I have the honour to report that eighty convicts are under my care on March 31, A.D. 1913. As you are aware of the fact the immense majority of these are of foreign nationalities. In my opinion, two facts are responsible for this number, that seems out of proportion with the number of population of these people. The Immigration Department has been too much after the *number* of people to be brought, and not quite severe enough in the *choice* of them; and, second, our courts of justice have seemed in the past more severe for the foreign element than for the rest of the community. Of course, these people must be impressed with the law, but in the meantime it tells on the population of our institution.

Believe me, dear sir,

Yours very truly,

ARTHUR BELIVEAU,

*Roman Catholic Chaplain.*

## BRITISH COLUMBIA.

NEW WESTMINSTER, April 1, 1913.

To the Warden,—

SIR,—I beg herewith to present to you my report for the year ending March 31, 1913.

Convicts remaining April 1, 1912.....	218
Convicts received during fiscal year.....	122
	<hr/>
Total ministered to during the year.....	340
	<hr/>
Discharged by expiry of sentence.....	32
Death.....	2
Paroled.....	62
Deported.....	12
Transferred to provincial authorities.....	1
	<hr/>
	109
	<hr/>
Total under my charge, March 31, 1913.....	231
Creeds—	
Church of England.....	63
Presbyterian.....	53
Methodist.....	40
Buddhist.....	15

Carmelite.....	1
Christian Church.....	1
Congregational.....	4
Sikh.....	4
Methodist Episcopal.....	2
No creed.....	5
	<hr/>
Total.....	231

The foregoing figures show an increase of four in the number of men received during the year, and an increase of thirteen in the number of prisoners at present under my charge.

The large number of men either admitted to parole, or deported, is worthy of note.

I have to report two deaths during the fiscal year. Concerning the sad circumstances surrounding these deaths it is, perhaps, better to be silent.

Nothing further of an unusual character has occurred during the year.

The duties devolving on the chaplain have been faithfully attended to.

The conduct of the men in chapel has, as usual, been good.

I desire to thank you, and all the officials, for kindness and courtesy in the discharge of my duties.

Yours respectfully,

ALBERT EDWARD VERT,  
*Protestant Chaplain*

## SESSIONAL PAPER No. 34

To the Warden,—

SIR,—I beg herewith to present to you my report as Catholic chaplain for the year ending March 31, 1913.

Every Sunday, services have been conducted and visits have been made regularly during the week.

I thank you and the officers for courtesy and kindness in the discharge of my duties.

Yours respectfully,

ED. MAILLARD, O.M.I.,  
*Roman Catholic Chaplain.*

---

ALBERTA.

EDMONTON, April 1, 1913.

To the Warden,—

SIR,—I have the honour to submit to you my annual report for the fiscal year ending March 31, 1913.

The usual religious services have been conducted every Sunday morning, and have been very much appreciated by the great majority of the men.

The service of praise is led by a competent choir and organist selected from among the men, and practice is held regularly every Saturday afternoon. On Christmas morning, a song service was given by some of the leading male vocalists of the city, which was a considerable help to the men.

The Salvation Army and the W.C.T.U. still continue to render valuable assistance along religious and other practical lines, both before and after freedom is attained. It is here that the helping hand is most needed and appreciated.

In conclusion, I wish to thank you, as warden, and all the officials of the institution for your kindness and consideration to me in the discharge of my duties.

Yours respectfully

D. G. McQUEEN,  
*Protestant Chaplain.*

---

EDMONTON, April 1, 1913.

To the Warden,—

SIR,—I have the honour to present to you my report for the year ended March 31, 1913.

The actual number of catholic convicts stands as follows: men 74, women 4; of different nationalities, English, Irish, German, French, Half-breed, Ruthenian.

Mass and sermon are given on every Sunday and feast of obligation, and attended by all the catholic convicts, who assist at the divine services with respect and attention. About all the catholic convicts have this year fulfilled their Easter duties, at the end of a five days' retreat, preached during Lent by an experienced missionary preacher. At the request of a few catholics unfamiliar with the English or French languages, German or Ruthenian priests, at different times during the year, exercised their ministry with those people.

Allow me to tender my hearty thanks to the warden and to all his officers for the delicate attention that they have at all times extended to me.

Yours truly,

J. A. OUELLETTE,  
*Roman Catholic Chaplain.*

## SASKATCHEWAN.

PRINCE ALBERT, SASK., April 2, 1913.

To the Warden,—

SIR,—I beg herewith to present to you my report for the year ended March 31, 1913.

	Male.	Female.	Total.
Convicts remaining April 1, 1912.....	37	0	37

Mennonite.....			1
United Brethren.....			1
Salvation Army.....			3
Total.....			62

Divine service has been held regularly every Sunday during the year.

I am pleased to be able to say that these services are very much appreciated by the men, and that their behaviour in chapel has been all that could be desired.

The placing of an organ in the chapel has helped our services by making them hearty and cheerful. The men are fond of music, and join very heartily in the singing.

The sacrament of the Lord's Supper was administered four times during the year.

Our prison population has more than doubled during the past year, and if the present rate of increase continues our chapel accommodation will very soon be too small to allow for all the men to attend service at one time.

The prisoners do a great deal of reading, and several of them have more than average ability.

I have to thank yourself, the deputy warden, and all the other officers, for the help given to me in the discharge of my duties.

Yours truly,

JAMES TAYLOR,

*Protestant Chaplain.*

SESSIONAL PAPER No. 34

PRINCE ALBERT, SASK., April 2, 1913.

To the Warden,—

SIR,—I beg herewith to submit my annual report of my labour as Roman Catholic chaplain of the penitentiary for the year ended March 31, 1913.

	Male.	Female.	Total.
Convicts remaining on hand, April 1, 1912.....	21	0	21

	8	1	9
Remaining under my charge, March 31, 1913.....	33	0	33

Divine service has been regularly held in the prison chapel, and attended by the convicts, with proper attention and devotion. I am glad to say that most of them appreciate our work, trying to adorn their souls with christian virtues.

During the year our beloved bishop was glad to accept, with your permission, my invitation, and our convicts will remember his interesting address on the day of confirmation, and on Good Friday.

To bring these poor inmates nearer to God, by the observance of the divine commandments, and submission to the rules of our dear country, in a word, striving to alleviate the misery of man, and to lighten the burden of his infirmities, whether this misery and these infirmities are hereditary or whether they are the result of his own wrong doing; such is my ambition as a minister of the gospel.

In conclusion, allow me to tender you my best thanks, as well as to all the staff for your kindness in my work.

Respectfully submitted,

EMILE PASCAL, O.M.I.

*Roman Catholic Chaplain.*

## APPENDIX E.

## SCHOOL INSTRUCTORS' REPORTS.

## KINGSTON.

To the Warden,—

SIR,—I have the honour to submit the report of the school in this penitentiary for the year ending March 31, 1913.

The total number enrolled during the year was 85; of this number, 35 passed out capable of reading, writing, and arithmetic; 10 retired at expiration of sentence; present attendance, 40.

The studies of these are as follows:—

Reading in Part I.....	12
Reading in Part II.....	9
Reading in second book, and writing.....	9
Reading in third; writing, and arithmetic.....	10
	40

H. W. WILSON,  
*School Instructor.*

## LIBRARY RETURNS.

*Librarian.*

## SESSIONAL PAPER No. 34

ST. VINCENT DE PAUL.

March 31, 1913.

To the Warden,—

SIR,—I beg to hand you herewith a report of the English school and library of this penitentiary for the fiscal year ending March 31, 1913.

A total of thirty-three pupils enrolled during the year. They were given lessons in reading, spelling, writing and arithmetic.

Their behaviour in the school-room was irreproachable, and their desire to learn very satisfactory.

A total of 110 convicts were given slate, pencil and books for private study in their cells.

I take this opportunity to thank my superiors for their assistance in the discharge of my duties.

Yours respectfully,

D. O'SHEA,  
*English School Instructor.*

April 1, 1913.

To the Warden,—

SIR,—I have the honour to submit you my annual report for the fiscal year ended March 31, 1913.

During the year, twenty convicts were admitted to follow the French course. At the end of the year only eight were attending school. The pupils have been taught spelling, reading, writing and arithmetic.

The conduct of convicts when at school has always been exemplary; they were attentive to the lessons, and I am quite satisfied with the progress they made.

Mr. O'Shea and I have supplied one hundred and ten convicts with books, copy-books, slates, pencils, etc., for private study in their cells.

I take the opportunity to extend to my superiors my sincere thanks for their kind assistance in the discharge of my duties.

Yours respectfully,

G. J. RENEAULT,  
*French School Instructor.*

## LIBRARY RETURNS.

Number of books in library, April 1, 1912.....	4,750
Number of books added during the year.....	276
Number of books condemned during the year.....	429
Number of books in library, April 1, 1913.....	4,597
Number of convicts who have used books.....	417
Number of issues during the year.....	38,168

G. J. RENEAULT,  
D. O'SHEA,  
*Librarians.*

## DORCHESTER.

DORCHESTER, N.B., April 18, 1913.

To the Warden.—

SIR.—I have the honour to submit my annual report for the year ended March 31, 1913.

At the beginning of the year the school was attended by forty-seven pupils.

The present attendance is thirty-three, divided as follows:—

Reading, writing and arithmetic.....	16
Reading and writing.....	7
Reading only.....	10

Five are reading in the Fifth English Reader; four in the Fourth; twelve in the Third, two in the Second, and ten in the First.

I am pleased to state that most of the pupils have made good progress, and their conduct has been most satisfactory.

In conclusion, I beg to express my sincere thanks to yourself and other officers for the assistance given me in the discharge of my duties.

G. B. PAPINEAU,  
*School Instructor.*

## LIBRARY RETURNS.

	Total number of volumes in library.	Number added during the year.	Average number of convicts who used books.	Total number of issues during the year.

G. B. PAPINEAU,  
*Librarian.*

## SESSIONAL PAPER No. 34

## MANITOBA.

March 31, 1913.

To the Warden,—

SIR,—I have the honour to submit my annual report of the school of this institution for the fiscal year ended March 31, 1913.

Of the twenty-seven pupils on the register during the year, twelve were Austrians, two Russians, two Finlanders, four Italians, six Canadians, and one French. The attendance at the close of the year was classified as follows:—

First Reader, Part I. . . . .	4
First Reader, Part II. . . . .	4
Second Reader. . . . .	4
Third Reader. . . . .	3

All were given lessons in arithmetic and geography. A total of one hundred and seventy-two convicts are at present supplied with school books and slates for the purpose of studying in their cells. The conduct and industry during school hours have been very satisfactory, and I am pleased to say that the progress of the pupils has been good, and shows much diligence on their part.

I beg to express my sincerest thanks to those in authority for the assistance given me in the discharge of my duties.

I have the honour to be, Sir,

Your obedient servant,

J. H. DAIGNAULT,  
*School Instructor.*

## SESSIONAL PAPER No. 34

## ALBERTA.

To the Warden,—

SIR,—I have the honour to submit my report for the year ending March 31, 1913.

At the beginning of the year there were twenty pupils on the list; since that time, eleven have been discharged, and nineteen added to the list. Owing to my time being taken up with my various other duties, work is all done in the cells, with help given from time to time; very fair progress was made in reading, writing and arithmetic.

I beg to express my sincere thanks to yourself and the other officers for assistance given me in the discharge of my duties.

Your obedient servant,

PETER CONWAY,

*School Instructor.*

## LIBRARY RETURNS.

Volumes on hand at beginning of year.....	1,415
Volumes added during year.....	0
Volumes condemned during year.....	414
Total number on hand at end of year.....	1,101
Total issues during year.....	23,800
Number of monthly magazines.....	8

PETER CONWAY,

*Librarian.*

## SASKATCHEWAN.

PRINCE ALBERT, SASK., March 31, 1913.

To the Warden,—

SIR,—I have the honour to submit the report of the school in this penitentiary for the year ending March 31, 1913.

The total number enrolled during the year was twenty-two. Of this number, four retired by expiration of sentence and parole. Present attendance, eighteen.

The conduct of the pupils was good, and fair progress was made in reading, writing, and arithmetic.

The attendance at close of year was eighteen, classified as follows:—

Primer and writing.....	3
First book, writing and arithmetic.....	10
Arithmetic only.....	5

I beg to express my sincere thanks to yourself and the other officers for assistance given me in the discharge of my duties.

F. SERJEANT,

*School Instructor.*

## APPENDIX F.

## MATRONS' REPORTS.

KINGSTON.

KINGSTON, March 31, 1913.

To the Warden,—

SIR,—In submitting my annual report of the female prison for the year ending March 31, 1913, I beg to state that everything connected with the department is in a very satisfactory condition, and the conduct and industry of the inmates has been good.

The new building for female prisoners was completed, and we have been occupying it since February. It is very convenient and comfortable, and a decided improvement over the old quarters.

During the year, five prisoners were received, one discharged by expiration of sentence, and one paroled; leaving eleven women at present in the institution.

Yours respectfully,

R. A. FAHEY,  
Matron.

DORCHESTER.

DORCHESTER, April 1, 1913.

To the Warden,—

SIR,—I beg to submit my annual report of the female prison for the year ended March 31, 1913.

On March 31, 1912, there were four female prisoners; since then, four have been received, one released on parole, and one transferred to insane asylum, leaving five at present in this department.

The industry of the women has been good, and their conduct very satisfactory.

Yours respectfully,

E. McMAHON,

*Matron.*

## ST. VINCENT DE PAUL.

To the Warden:

SIR,—I beg to submit herewith my first annual report for year ending March 31, 1913.

The past year has not been very favourable owing to previous neglected condition of the farm; overgrown with weeds (dog-grass, saw-thistle, etc.), and with no drainage made for several years, according to appearance. Farm implements were also in a very bad condition, and had to be renewed.

The spring was cold and wet, consequently ploughing and seeding was greatly delayed.

Taking the crops in general, they were fair, according to above circumstances, but, owing to the excessive rain-falls, a quantity of our potatoes rotted in the ground and we also lost a large quantity of vegetables, viz., carrots, turnips, potatoes, cabbage, etc., owing to dampness and moisture in root cellar.

The returns of piggery have been satisfactory, having furnished 40,346 lb. of dressed pork to steward, which forms a total of \$3,733.29, which would have been greatly increased had we followed the Montreal market price. I wish to thank you personally for your kind aid upon all occasions during the year.

Yours respectfully,

JOS. LATOUR,

*Farm Instructor.*

## DORCHESTER.

DORCHESTER, N.B., April 28, 1913.

To the Warden:

SIR,—I herewith submit the annual farm report for year ended March 31, 1913. The season proved the reverse of the preceding one, spring opening dry and cold, with very little growth; seeding on marsh commenced May 6, and on upland May 16. The grain on the upland yielded well; mixed grain, oats, barley, and peas in a six-acre field averaged  $54\frac{1}{2}$  bushels per acre. Owing to the excessive rain-fall, commencing the latter part of June and continuing until September, the grain on the marsh was very light, and for the same reason the root crop was almost a total failure. This emphasizes the necessity of under-draining on the prison farm, for land that was well drained during the wet season did not suffer to any great extent, while in adjoining fields, undrained land could not be cultivated, and the crop suffered accordingly.

All the spare time of the farm gangs were utilized in putting in tiling, and the work will be continued this season, if the tile can be secured. The rough land broken in during the past two years was seeded down to timothy and clover, and has stood the winter well; another field of fifteen acres that was lately broken up will be seeded down this coming spring.

I wish to thank you for your continued support in all matters connected with the successful working of the farm, and to the officers in charge of the different gangs for the interest each has taken in the work.

ANDREW McPHERSON,

*Farm Instructor.*

MANITOBA.

April 9, 1913.

To the Warden:

SIR,—I have the pleasure of making my first annual report in connection with the farm of this penitentiary. I am, however, in the position of the man who was called in to finish the erection of the building after the foundation and part of the structure had been built, the most important work of the farm for the year having been completed before I took over my duties as instructor, in the middle of October.

The threshing for the year had been done when I took over, there having been threshed nearly 6,000 bushels of grain, consisting chiefly of oats and barley.

Five teams and the same number of wagons were purchased for the farm for work on the public road but, owing to the continued wet weather, not much work was accomplished; we are, however, ready for an early start this spring. The usual farm work is now in operation, and I trust that next year I shall be able to show a satisfactory balance to the credit of the farm. I enclose balance sheet for the past year.

I have the honour to be, Sir,

Your obedient servant,

J. P. ROBERTSON,  
*Farm Instructor.*

J. P. ROBERTSON,

*Farm Instructor.*

SESSIONAL PAPER No. 34

## BRITISH COLUMBIA.

NEW WESTMINSTER, April 26, 1913.

To the Warden:

SIR,—I have the honour to submit my annual report for the year ending March 31, 1913.

The crop this year, taking into consideration the very wet season we had, was a fair average. The potato crop suffered on account of the blight.

I still have to call attention to the desirability of placing more land under cultivation. If the two blocks at the back of the reserve, belonging to the penitentiary, were cleared and cultivated, it would materially increase our farm products for the use of the prison.

I am glad to report that the piggery has been fully able to supply the penitentiary with pork of the best quality, none having to be purchased on the outside.

R. DYNES,

*Farm Instructor.*

## SASKATCHEWAN.

PRINCE ALBERT, SASK., April 2, 1913.

To the Warden:

SIR,—I have the honour to submit my annual report for the fiscal year ended March 31, 1913.

The crops this year were not up to the average; the ground we are cultivating was used by the original home steadiers for a number of years, and is in a very dirty condition. We will have to summer-fallow portions of it each year until the weeds are cleared off.

We harvested 1,900 bushels of oats, 136 bushels of barley, 296 bushels of wheat, and enough vegetables to supply the prison.

We should have from 80 to 100 acres in crop this year.

The piggery is doing well, and we have 31 hogs on hand, and supplied 2,114 pounds of dressed pork to the steward's department.

We cut and stacked forty loads of good wild hay, 175 cords of wood was cut from the prison reserve lands and hauled for the use of the brickyard.

The fences around the prison farm are in a very bad state of repair. There is no herd law in this district, and cattle are allowed to run at large; they are continually breaking through the fence and destroying the crops.

I would ask that a good barbed wire fence be put up.

Respectfully submitted,

JOSEPH McKAY,

*Farm Instructor.*
