Buy DIRECT BY MAIL from EMLONG Grower of NURSERY STOCK

SAVE MONEY

No middleman, jobber, or salesman to pay. Just a fair price we ask for growing the stock the way you want it grown. We save you the usual 35% paid to salesmen, besides the cash discount we offer as interest on your money when you order during January or February. Save at Emlong's without fear of skimping on quality. Oscar Shanefelt, New Lebanon, O., writes, "Your stock is nicer than what I bought in N. Y. at four times your price!"

TAKE NO RISK

of getting nursery stock which has been through several hands and shipped several times before reaching you! Many firms buy all their nursery stock, sell it through agents or catalogs, and it may be re-shipped three times before it reaches you. Avoid getting dried-out, low-vitality stock. We grow everything right here on our own farms and ship it **DIRECT TO YOU**. Rika Wallen, Fairbanks, Alaska, says, "Your plants arrived, looking as fresh as the day you packed them."

YOU BE THE JUDGE

Sit in your home, read the honest descriptions in our catalog, and **PICK OUT YOUR OWN STOCK**. You be the judge of *how much*, and *what to order*. Don't be influenced or hurried by high-pressure salesmen or sales talk. **PLAN** your order to get the *most quality* for your money. Mrs. Nagy, Royal Oak, Mich., speaks for our customers in saying, "I can't praise you enough for your honesty and fair dealing."

WRITTEN GUARANTEE

There's no guess-work when you buy under Emlong's written, money-back guarantee. We'll be right here to back it up in years to come! You are assured of honest grades, quality, and satisfactory service. *Free cultural directions on request* assure your success in transplanting and handling the stock. Theo. Postmann, Montpelier, Ia., states, "I have planted nursery stock for 50 years. I compliment your fair and square treatment."

NEW, MODERN PACKING PLANT enables us to handle unlimited orders efficiently. Stock is kept under ideal conditions until you are ready to have it shipped.

ORDER FROM YOUR OWN HOME — take your time to decide what you want. Don't be influenced by high-pressure salesmanship. Emlong's catalog contains honest facts.

OUR CENTRAL LOCATION Makes quick delivery possible to every city where our catalog is mailed. Hardy, Northern-Grown **PRIDE-O-MICH** stock thrives everywhere.

GUARANTEE

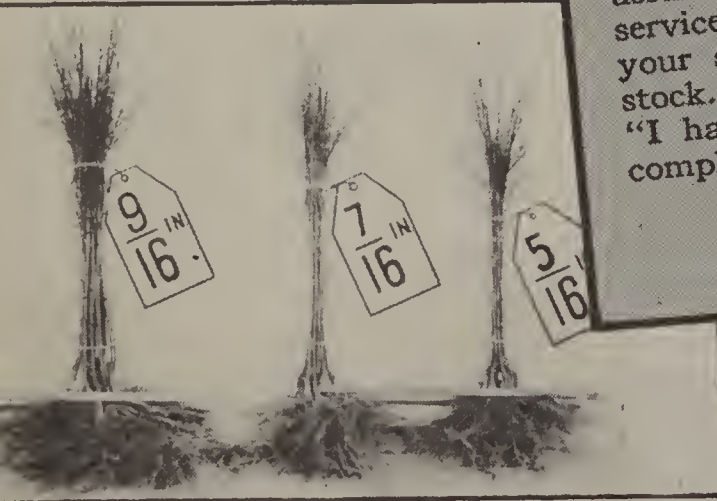

Every Item in this catalog is guaranteed to be just as represented, to reach you in perfect condition, and to be true to name. If found to be otherwise, notify us within three days after arrival. Damaged stock will be replaced promptly or purchase price refunded. Obtain a damage statement from your postmaster or express agent. Claims for stock which fails to grow should be filed before July first. It is mutually agreed that we are not to be liable for a sum greater than the purchase price of any article. **EMLONG'S NURSERY, Stevensville, Michigan.**

WE GROW OUR STOCK. Fertile, well-tilled soil, enriched yearly, produces clean, healthy, vigorous plants and trees. We put the *best* into them, you get the *most* out of them.

UP-TO-DATE EQUIPMENT, designed especially for us helps to cut production costs. We pass the saving along to you. Systematic growing methods produce quality products.

HONEST GRADES, which meet the standards established by the National Nurserymen's Association. Ten trees each of our three leading grades. Note the root spread.

"I see it pays to buy from a reliable firm. Quality stock is cheapest in the long run."
E. R. Hipkins,
Lambertville, Mich.

Copyright 1938, Emlong Nursery. Printed by Michigan Litho Co., Grand Rapids, Mich.

EMLONG'S QUANTITY PRICES FOR COMMERCIAL PLANTERS

Here is the stock we have specialized in for years. It's the BEST money can buy. Extra heavy yielding strains of finest quality fruit --- made possible only by diligent search and selection of outstanding strains for our own propagating stock. Make your plantings this spring with these expertly grown plants and trees --- thereby increasing your yields and profits. Get your neighbors and friends to order with you so that you can take advantage of the lower prices on larger quantities.

These wholesale prices apply only on quantities named below. For prices on smaller quantities see pages containing the variety descriptions. ORDER EARLY and PLANT EARLY. On orders paid in full during January we allow a cash discount of 10%; February orders 5%.

I want MY customers to have the MOST of the BEST nursery stock for the LEAST money!

HENRY EMLONG
founder

A Personal Note From

Henry Emlong President of Emlong's
to YOU:

FOR over half a century Emlong's have been growing and selling the finest Nursery Stock in the world. Our great business was built through the confidence and cooperation of our customers. Last year we counted 5436 orders in our files which came from customers who borrowed our catalog from a neighbor and ordered upon their recommendation! This fine cooperation has caused our nursery to grow until it now occupies over 750 acres of the finest soil in three townships of Berrien County, southwestern Michigan's famous fruit belt.

THOUSANDS have become financially independent growing fruit from our fine plants and trees. It is easy, pleasant work, which requires no previous experience. Customers tell us that every acre planted to fruit brings them as much profit as 40 acres of grain. Strawberries and Asparagus pay up to \$1500. per acre; Raspberries, Blackberries, and Grapes pay up to \$1000 per acre; Peaches, Apples, Cherries, etc. bring equally fine returns annually.

NOW is the time to plant every available acre to fruit. Prices on both nursery stock and fruit are due for a sharp advance. Buy now, at our low prices. Be ready to get your share of the fine profits to be made in the years just ahead.

EVERY plant and tree on our farms is a VIGOROUS, THRIVING, YOUNG specimen, grown expressly for transplanting, and not permitted to be weakened by bearing fruit. All the vitality and bearing power are reserved to work for you. State Horticulturist's inspect our stock twice each year, and every shipment bears our certificate of inspection.

TAKE advantage of the fine values offered in this book to improve and beautify your home grounds and farm lands. Compare our stock and prices with those of any other firm. Prove to your own satisfaction that Emlong does give the MOST of the BEST for the LEAST money!

Look for this label on your packages. It is the trademark of quality.

Bears This Year!

Get 50 PLANTS FREE with a \$2 Garden of Gems

● **BERRIES IN 90 DAYS** — Why wait longer? Gem plants set in April or May bear this year from July until Winter. Mr. Quackenbush, Epping, N. H., says he started picking in June, and Mr. Fimple, Paris, Ohio, was still picking November 15th. Nearly six months of Strawberry delight!

● **3 CROPS — ONE PLANTING** — Gem plants are thrifty growers — making well filled rows. Impartial to soil and climatic conditions. Do not stop with their first Fall crop, but bear again next year in June and again next Fall. Mr. Martin, Palatine, Ill., says, "Gem plants bought of you are **STRAWBERRY WONDERS**. Never before saw such a prolific yield of **LARGE BERRIES!**"

● **COST LESS THAN 1c QUART** — Many growers average a quart to a plant the first year. Why buy strawberries? Grow them in your garden, along walks, drives, shrub borders, etc., at practically no cost. Set plants 12-18 inches apart with rows $2\frac{1}{2}$ to $3\frac{1}{2}$ feet apart. Grow them either in matted rows or hills. Require no special care.

● **FRUIT FILLS TWO NEEDS** — Gem fruit is delicious for home desserts, and leads the Fall strawberry market. Growers ship berries 100 miles. Fine for roadside and store trade. Order now — plant in April or May.

Millions of strawberry plants in our vast acreage. They will bring fortunes to Emlong customers in years to come.

MILLIONS of DOLLARS In Satisfaction and Profits From EMLONG'S FRUIT PLANTS!

Our Exclusive

Pride-O-Mich

TRADE-MARK BRAND

PREFERRED BY SUCCESSFUL GROWERS EVERYWHERE

Follow their example. Grow your own berries for less than 1c per quart. Know the joy of having all the fruit you want, to EAT and CAN! If you have a spare lot or field, grow enough to sell. Every dollar invested in fruit plants should bring you up to thirty dollars worth of fruit annually.

BUT, START RIGHT!

Don't try to save a few cents by planting cheap stock. Plant the BEST: We are the *largest*, and one of the oldest growers of fruit plants in the country. Our plants are famous for VIGOR, LONGEVITY, bearing HIGH GRADE FRUIT, PRODUCTIVENESS, and PROFITS REALIZED. We offer only the popular and profitable varieties.

PLANTING INFORMATION
SENT FREE ON REQUEST

"The Raspberry plants purchased from you have borne the largest, finest fruit ever seen in this locality. Berries brought 35c per quart. Demand was greater than I could fill." L. G. Lumpp, Lincoln, Nebr.

"I picked strawberries measuring 3 inches across, 4 BERRIES WEIGHED 1/2 LB.! They are wonderful bearers. Glad I bought plants from you." F. A. Simunich, Johnstown, Pa.

"From 200 of your Everbearing Strawberry plants I made \$14.95 the first Fall." Kenneth Robertson, Winnebago, Ill.

"The Concord grapevines which you shipped to me last Fall are bearing 20 to 30 bunches per plant. They've almost caught up with my 10-year old vines." H. L. Williams, Henderson, N. Car.

"Your plants were well-rooted and stood the drought better than any others in our community." Fred Lippit, Findlay, Ill.

"The 10,000 Strawberry plants received from you were the finest I have seen in 40 years experience growing fruit." Geo. Patschke, Sr., Ohio.

"I never lost a Raspberry plant purchased from you. That's 100% average." S. Campbell, Kansas City, Mo.

"Your Latham Raspberry plants stood 52 below zero on high ground last Winter." Robert Meyers, Eveleth, Minn.

"My neighbor's strawberry bed, purchased from you, is a monument to your quality stock." Guy Kuns, Greenville, Ohio.

"Our county agent praised my plants very highly. I give a cheer for Emlong's fine stock." A. W. Plank, Ashland, Ohio.

"My 3-year old grapevines, bought of you, bore 3 tons per acre this Fall." Geo. Ettel, Leesport, Pa.

"No other Raspberry plants could stand the drought like yours! I picked 20 gallons fruit from them the first summer. Was still eating fresh berries in October. (This is not one of Ripley's!)" Julian Snapp, Jr., Brucetown, Va.

"I consider Strawberries the most interesting plants in my garden. Have counted 40 berries on one plant at one time. Am glad I started fruit-growing with your plants." Steve Miracle, Middlesboro, Ky.

THE NO-RISK VARIETY

Premier has succeeded for so many years, on such a wide range of soils, in every part of the country, that a lengthy description is unnecessary. Every Strawberry-lover admires Premier's brilliant, flame-red, pointed berries, which ripen so early in the season. Bears for many days. Equally desirable for home use and long-distance shipping. A self-pollenizing, standard variety.

EMLONG'S PREMIER EXCEL

From every part of the country have come letters telling us that our Premier plants produce **BIGGER, BETTER BERRIES**, and **MORE** of them, than plants purchased elsewhere. They acclimate themselves readily, and are very frost-resistant. Planted this Spring in April or May, they'll bear a bumper crop next year. Order early — get the discount.

Dorsett

"TOPS" in QUALITY and PROFITS
Favorite Market Berry of Today!

EMLONG'S **79c** PER 100
Bargain Prices
25 plants \$0.29
50 plants .49
250 plants 1.59
\$5.45 PER 1000

SEEK NO FARTHER for the perfect Strawberry — Dorsett is 'it'! Those bright, snappy red berries with their delightfully sweet, satisfying flavor are winning prizes and praises from gardeners, fruit buyers, canners, and everyone who knows strawberries. They remain bright and appetizing several days after picked, bringing top prices on every market.

Dorsett never fails to produce enormous crops. Starting early, it continues bearing extra-large, perfect shaped fruit of uniform firmness in flesh and skin, until late berries start. Plants are thrifty growers, making wide rows. Frost injury unknown. A self-pollinating, standard variety.

PLAY SAFE — PLANT EMLONG'S STRAIN. Plants grown on our ideal soil will thrive everywhere! A Carolina customer says, "Berries borne on your Dorsett were large as hens eggs!" A grower near Mansfield, Ohio, writes, "Your Dorsett are the sturdiest growers I ever planted." From Marshalltown, Iowa, comes word, "Emlong's Dorsett are the largest plants I ever handled." These superior plants cost no more than common kinds if you buy at Emlong's. Order early — get the big discount. Plant in April or May to have berries next year. Garden quantities priced above — commercial prices in front of book.

Sparkling with Beauty

The "Grand Champ"

GIANT 40-DAY STRAWBERRY

The new long-season giant berry which is surprising and pleasing fruit lovers. Sturdy, heavy-foliaged plants which protect the blossoms from frost injury. They commence loading up with berries early in the season and continue until late berries are gone. An Ohio grower says he made more from an acre of Grand Champion than from two acres of old varieties!

Grand Champion berries are bright-red, fresh-looking, of giant size and exceptional firmness. Enticingly rich and sweet. Truly FANCY table berries, and a great boon to market growers. Standard, self-pollenizing variety. (Has no connection with the old Champion Everbearer.) Supply is limited and demand keen — better play safe and order early!

250 PLANTS **\$1.95**

25 plants 29c; 50 plants 49c; 500 plants \$3.45; 1000 plants \$5.95.

Commercial quantities priced in front of catalog. **ORDER EARLY** — get the discount mentioned on page 3.

★ **MIGHTY GOOD EATING.** Yes, 4 berries fill the hand; 15 fill a quart; 800 crates were picked from an acre; \$1200 made from an acre. But that's not all: The best thing about Fairfax berries is their rich flavor. Beautiful looking dark-red morsels. You'll be proud to grow them in your garden or field!

★ **UNSURPASSED FOR CANNING.** Ripening medium-early, Fairfax berries are welcomed for home and commercial canning. Retain their color, shape, and flavor wonderfully well. Juicy, but firm in flesh and skin. Plants are husky growers and enormous yielders. **SELF-POLLENIZING, STANDARD VARIETY.**

★ **DEMANDED BY SHIPPERS.** Market reports show that buyers consistently offered more money for Fairfax than for other berries last summer. That puts them in top class for they have to be good to stand shipping several hundred miles. Profit by the experience of others —

grow Fairfax for pleasure and profit. *Emlong's Quality strain leads all.*

BIG BERRIES

June 22, 1937. Ed. Barfelz, Bridgman, Mich. reported to local news office: "15 to 18 of my Fairfax berries fill a quart box. Largest berry measured 8 inches around. Pickers averaged 11 crates per day. First picking day brought 100 crates per acre!"

BEST IN 30 YEARS

"Fairfax is the best Strawberry I have grown in my 30 years experience. **IT HAS EVERYTHING!** I thought your catalog reports were fakes, but **SEEING IS BELIEVING**, and now I know they're true." M. E. Bryan, Malta Bend, Mo. Mar. 11, 1937.

BOUNTIFUL YIELD

"We harvested 350 quarts Fairfax from 300 plants first season. Hundreds of folks came to see our plot." E. M. Miller, Lynchburg, Ohio.

WANTS MORE

"Fairfax Strawberries are just **SOMETHING WONDERFUL.** I want more plants this year." Jan. 7, 1937. Bernard Schag, Glencoe, Mo.

3 Great Berries — For
 3 Great Purposes —

Big Crops; Commercial Quality; Long Bearing:

CATSKILL 89c per 100

Mid-season, self-pollenizing, standard type: The most dazzling-red color and richly aromatic flavor of any mid-season strawberry. Berries extra large and plump, fine in texture, firm in quality. Ideal for fancy desserts. Plants are hardy and thrive on any good soil. Extra good yielders. Emlong's Pride-O-Mich strain is best.

PRICES: 25 — 35c, 50 — 59c, 100 — 89c, 250 — \$2.10, 1000 — \$6.65.

CATSKILL
 89c per 100

BLAKEMORE \$4.85 per 1000

Extra-early, self-pollenizing, standard type: Bright-red berries, produced in great abundance, retain their color for long distance shipping. Extra-firm flesh and skin makes them favorites with canners and shippers. Plants thrive on poorest soils and stand extreme weather conditions.

PRICES: 25 — 25c, 50 — 45c, 100 — 60c, 250 — \$1.65, 1000 — \$4.85.

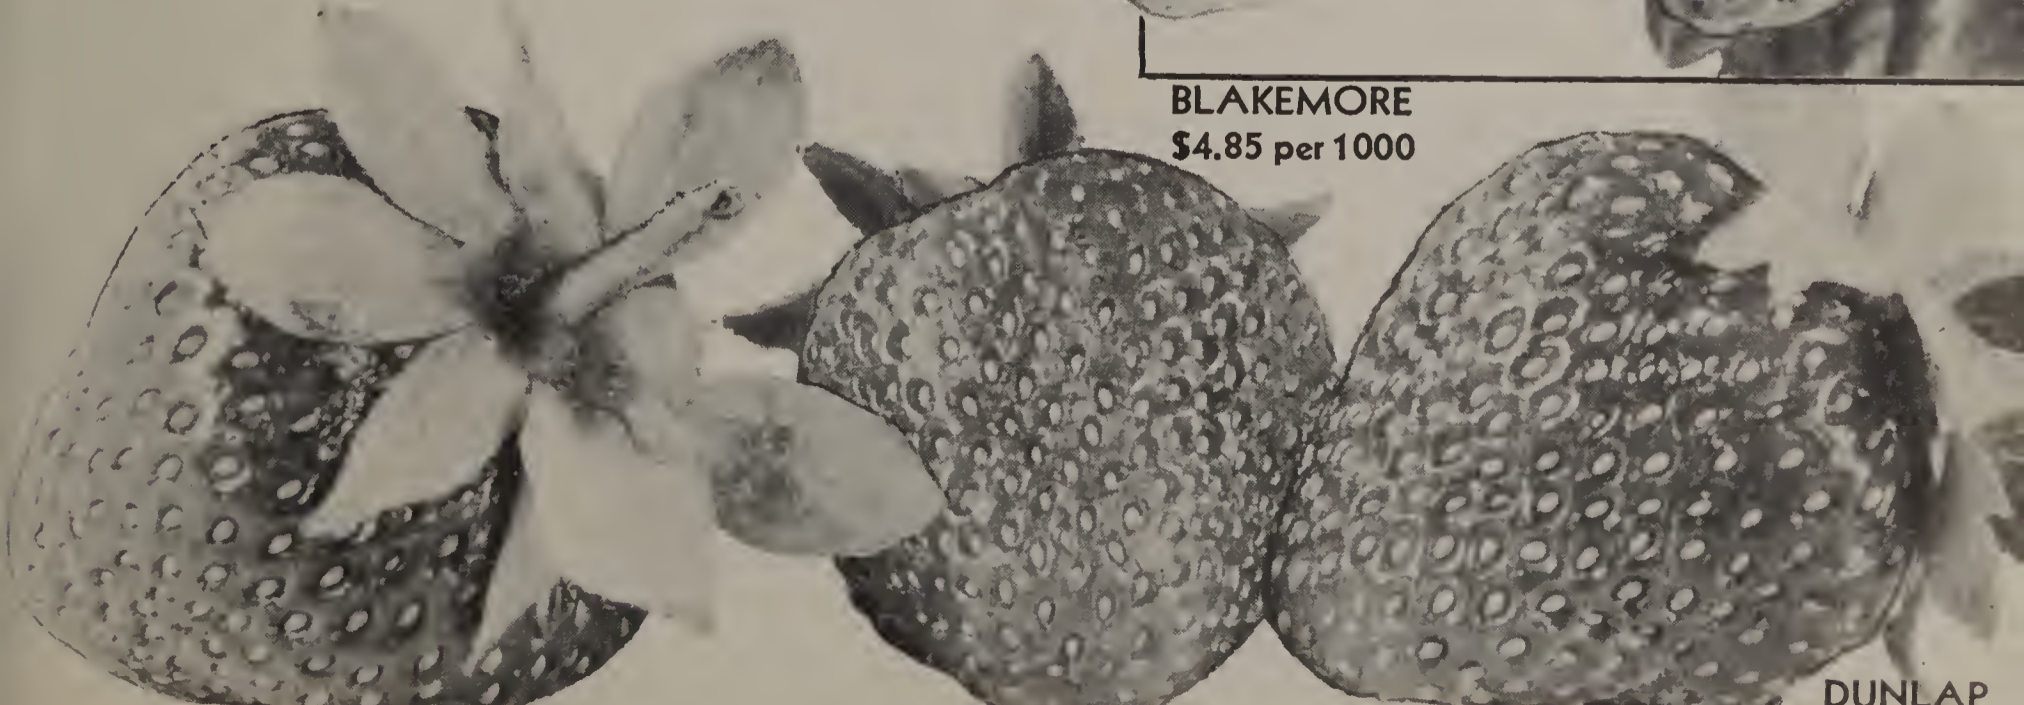

BLAKEMORE
 \$4.85 per 1000

DUNLAP 69c per 100

Medium-late, self-pollenizing, standard type: Medium sized, dark-red berries with the real wild strawberry flavor which cannot be duplicated. Thrives where all others fail. Stands coldest winters, latest frosts, and driest summers. Enormous cropper. Highly favored for canning and shipping. The oldest, but still one of the best strawberries!

PRICES: 25 — 25c, 50 — 45c, 100 — 69c, 250 — \$1.65, 1000 — \$4.85.

S-T-R-E-T-C-H OUT the Strawberry Season

Ambrosia Late

A Refreshing Morsel of Scarlet Honey

KEEPS BERRIES AND PROFITS COMING. Starts late and bears a long time after others have finished. Helps bridge the gap between regular varieties and Everbearing varieties. Mr. Turley of New Buffalo, Mich., is shown here displaying some Ambrosia berries which brought him \$1.00 per crate MORE than other varieties. He shipped them nearly 100 miles.

A TREAT TO EYES AND TASTER! Bright red, fresh-looking berries that will please you immensely. They're exquisitely flavored, have small seeds, do not discolor, are firm in flesh and skin. Ambrosia charms the home folks and suits fussy buyers.

LARGE, HARDY PLANTS. The plants are husky growers, often measuring 12 to 18 inches tall and have gigantic leaves. Average plant shown below about 1/5 actual size. Seemingly impartial to soil and weather, they produce wonderful crops. A perfectly hardy, self-pollenizing, late standard type which originated in Wisconsin (where plants must be 'tough' to endure).

MASTODON

Famous Giant Everbearer

Huge, pointed berries of dark varnished-red start ripening 60 to 90 days after plants are set, and continue until winter. Their rich, tart flavor adds zest to the Fall menu. Planted in April or May they bear a crop this Fall, another next June, and a third next Fall.

Over a decade of success has not dimmed Mastodon's popularity. The large size, firm quality, and heavy yield of berries have delighted and profited everyone who has grown them. Desirable for home gardens and market. Set plants 18 x 36 inches in the field; 12 to 18 inches apart in the garden, along walks and shrub borders.

PRICES: 25 plants — 59c, 50 — 79c, 100 — \$1.29, 250 — \$2.65, 1000 — \$9.95.

WAYZATA

New Sweet Everbearer

Glowing, cardinal-red color; sweetness and juiciness; surprising firmness; large size; and attractive shape combine to make Wayzata a favorite. A fancy Strawberry, you'll appreciate and admire.

Plants set in April or May start bearing in July. Seldom make runners but propagate from stools. Easy to grow; bear 3 crops in 18 months. Set plants 12 inches apart — a small plot yields many berries for they often average a quart to a plant the first year.

LATHAM

WORLD'S LEADING RASPBERRY

25 Large 1-YR. PLANTS 75c

Immense, deep-glowing red berries, all maturing to the same size and plump shape. Start ripening midseason and continue an unbelievably long time. Sometimes produces a "surprise" crop again in the Fall. Record-breaking crops every year for many years from one planting. Latham berries are ideally firm, and richly flavored. Set the standard of excellence for canning and shipping. Plants are vigorous growers, healthy, and hardy. **BIGGEST MONEY MAKING RASPBERRY IN THE WORLD. EMLONG'S STRAIN IS BEST!** Priced below.

LATHAM

CHIEF 12 PLANTS 1-YEAR 47c

POPULAR EARLY RASPBERRY

Large, snappy-red berries which are handsome and appetizing. Flavor a real treat. Large as Latham, and have excellent keeping and shipping quality. Ripen a week to 10 days ahead of Latham. Outclass all old early varieties. Chief plants are sturdy, rapid growers, very hardy, and thrive everywhere. Sure and heavy croppers every year. Emlong's Strain leads in quality. Attractive prices below.

NEWBURGH - 47c Per Dozen

FAVORITE EARLY—FLAVOR SENSATION

Start picking big, round, vivid-red Newburgh berries a week before Latham ripens. You'll enjoy the tangy, new flavor of these extra-large, very firm berries. Equally fine for home use or shipping. Plants are hardy, heavy-yielders. Very resistant to drought and disease. Rapidly gaining favor throughout the country. Priced at bottom of page 14.

CUTHBERT - \$1.85 Per 100

MIDSEASON CANNER AND SHIPPER

Long the leading canning and shipping variety for Northern states. Solid, thimble-shaped, dark-red berries. Excellent flavor. Very heavy producer. Fruit ripens mid-season. Plants hardy and healthy. Priced at bottom of page 14.

ST. REGIS - 12 Plants 59c

EVERBEARING RED RASPBERRY

Bears during the regular season and continues through Summer and Fall. Berries bright scarlet-red, medium size, richly flavored. Very appetizing and profitable.

NEW
LATE

"Taylor"

ELEPHANT-SIZE RED RASPBERRY

Fashionable new oblong shape distinguishes Taylor's unbelievably immense berries from old varieties. Rich, snappy flavor; dazzling no-fade red color; small cavity; freedom from crumbling; uniform size; very firm quality, make it a welcome newcomer.

Destined to replace old types because it's more beautiful, exceedingly fruitful, and perfectly dependable. Plants are hardy, disease-resistant, and attain gigantic size. Rigid, tree-like canes support heavy loads of fruit.

Tested 10 years by N. Y. Expt. Sta. before released. Be wise — plant the modern Taylor this Spring and increase your raspberry profits.

PRICES: Large 1-yr.: 12 for 87c, 25 for \$1.59, 50 for \$2.85, 100 for \$4.95, 250 for \$12.45, 1000 for \$44.50. (2-Yr. Transplants: 12 — \$1.49, 25 — \$2.65, 50 — \$4.75, 100 — \$8.95).

MARVELOUS N-E-W

Indian Summer

"RED THIMBLE" RASPBERRY

Why be satisfied with *one* crop a year when Indian Summer will give you *two* at no extra cost? *Big Crops*, too! The *earliest* raspberry to ripen, it yields as heavy as others at the regular season, and then surprises you with a bumper crop of giant berries on the new canes in late Autumn.

BRAND NEW TYPE OF BERRY. Every berry a perfect specimen which will delight you as much as the season whose name it bears! Richly colored, *long* and graceful in shape, very small seeds which make it smooth-looking and appetizing. In all, *the prettiest sight we ever saw on a Raspberry bush!*

OUTCLASSES ALL IN ITS FAMILY. Old types of everbearers and others are put in the shade by this glorious beauty. Sets an entirely new standard for judging Raspberries — in size, shape, color, quality, beauty, flavor. Originated at the N. Y. Agr. Expt. Sta. the plants have been tested for hardiness and thriftiness. Resist disease the best of any variety we have seen. The **MOST WORTHWHILE** Red Raspberry since the coming of Latham. Don't hesitate to plant heavily.

CUMBERLAND
BLACKCAP

New SODUS PURPLECAP
PICTURED ON PAGE 16 OF THIS CATALOG

You'll never believe that berries could be so large and beautiful until you see SODUS, the purple beauty! We found berries last summer measuring 1 x 1½ inches; 12 or more in a cluster; dozens of clusters on a branch; plants loaded down so heavy they could hardly stand. Plants set two years measured 4 x 5 feet in spread. SODUS berries do not crumble, but cling to the branch long after full ripe. Keep better than Red or Black Raspberries, and canners pay more for them. Flavor is a combination of Red and Black. Delicious fresh, canned, in jam, jelly, pie or juice. Juice is bright purplish-red. Plants are vigorous growers, very hardy, and **FREE FROM MOSAIC**. Propagate from tips and grow in hills.

1-YR. PLANTS: 12—87c, 25—\$1.55, 50—\$2.85, 100—\$4.95, 250—\$12.50, 1000—\$44.50. 2-YEAR TRANSPLANTS: 12—\$1.55, 25—\$2.65, 50—\$4.75, 100—\$8.95.

ALFRED

Luscious Early Blackberry

12 PLANTS
48c

Alfred berries are beautiful, glistening-black, and measure fully 1½ to 2 inches long. They are almost free from seeds and core. Flavor is enticingly wild and rich! The fanciest dessert Blackberry to serve fresh, canned or in pies. Makes snappy juices, jam and jelly. Plants are healthy, young-bearers, heavy-yielders, succeed on all soils, and withstand a winter temperature of 30 degrees below zero. Treat yourself to the BEST in Blackberries — GROW ALFRED!

PRICES: 1-YEAR: 12 — 48c; 25 — 78c; 50 — \$1.35; 100 — \$2.35; 250 — \$5.25; 1000 — \$17.50. 2-YEAR TRANSPLANTS: 12 — 95c; 25 — \$1.45; 50 — \$2.45; 100 — \$4.45; 250 — \$10.50; 1000 — \$35.00.

ELDORADO - 25 for 75c

HEAVY BEARING LATE BLACKBERRY

Berries medium to large, depending on soil and care. Extra-firm in quality, jet black, and do not fade. Free from seediness. Excellent for canning and shipping. Plants are hardy, thrifty, regular and heavy producers.

PRICES: 1-YEAR: 12 — 45c; 25 — 75c; 50 — \$1.25; 100 — \$2.15; 250 — \$4.85; 1000 — \$15.95. 2-YEAR TRANSPLANTS: 12 — 85c; 25 — \$1.35; 50 — \$2.25; 100 — \$3.95; 250 — \$9.85; 1000 — \$32.50.

New BOYSENBERRY

Mammoth Maroon Beauties. 12 Plants \$1.15

The new GIANT offspring of Youngberry. Berries an inch in diameter by 2 inches long. Rich, zestful flavor. Better than any Blackberry or Dewberry. Deep purplish-maroon color, very handsome and appetizing. Plants are trellised like grapes. Stand 19 below zero. Rapidly gaining favor as a profitable commercial crop.

PRICES: 1-YEAR PLANTS: 12 — \$1.15; 25 — \$1.95; 50 — \$3.75; 100 — \$6.95; 250 — \$15.50; 1000 — \$55.00.

Thornless YOUNGBERRY

New Hardy Type. 12 Plants \$1.75

Dark, maroon-purple berries of great size. Flavor combination of Blackberry, Dewberry, Loganberry and Raspberry. Very delicious! VINES ENTIRELY THORNLESS — EASY TO HANDLE. Trellis like Dewberries. Stand 15 below zero. Can be mulched in colder climates. PLANT PATENT No. 4.

Emlong's
MAMMOTH

Eureka

MARVELOUS NEW 3-IN-1 TREE FRUIT

Picture on Page 20

Mr. Nolan displaying a small branch of Eureka.

A FRUIT that's *Golden Yellow* in July and *Rich Maroon* a month later. Good to eat *fresh* or *canned* in either stage. Measures 2 to 3 inches in diameter, and if thinned it's so large you have to can it in halves! Commands a fancy price as it appeals to both sight and taste. Golden flesh that's juicy but firm. Skin that is smooth and holds up, without spotting, for long distance shipping. Flavor a superb blend of Plum, Apricot and Peach. Juice makes elegant jelly and nectar.

TREES that are hardy as plums and large as apricots. Nothing *ever* stops them from loading up with a *full crop* of immense fruit. Single branches hold 35 to 50 pieces of fruit. Trees start bearing the year after planted, and when mature produce 8 to 12 bushels annually *without fail*. Tested for eleven years. Discovered by R. Z. Nolan, tree breeder, Godfrey, Illinois. Now offered exclusively to EMLONG CUSTOMERS — THAT'S EUREKA!! Want a tree? Better order early, supply is limited.

Send \$1.00 each for 3-4 Ft. trees, or \$1.49 each for 4-5 Ft. trees.

New Peach

FERTILE HALE

PICTURED ON PAGE 20

At last, a Hale peach which is perfectly fertile and a heavy producer! It resembles both J. H. Hale and Elberta. Favors Elberta in shape, and Hale in color, size, flavor and quality. Ripens a week later than Elberta, when good peaches are scarce and bring fancy prices. Extra firm shipping quality combined with its sparkling beauty make it a sure money-making variety.

Fertile Hale trees have been tested several years in Michigan. Regardless of drought or extreme cold winters they mature extra large, perfect fruit. Plant Fertile-Hale this year — prolong your peach crops and profits! Offered by permission of the owner of Plant Patent No. 175.

Emlong's WASHINGTON Rust-Proof

ASPARAGUS

The Great Vitamin-Filled Food

FOR GARDEN PLANTING

No wonder the demand for this delicious vegetable increases every year! We now sell nearly a million roots compared with about one-fifth that number sold annually ten years ago. Asparagus comes with the first breath of spring, before other vegetables are even planted. Those big, tender, juicy, purplish-green tips are just packed full of health-giving vitamins. EVERYONE can eat Asparagus, regardless of age or health. Should be served every day in season, and a liberal supply canned for year-around use. 100 to 250 roots supply the average family. FREE PLANTING AND CANNING DIRECTIONS ON REQUEST.

FOR FIELD PLANTING

Before other crops are planted, you can be selling Asparagus, and find a ready market. Starts bearing in Michigan in May, and continues fully two months. A new fertilizer recommended by the Dept. of Agriculture keeps stalks tender long after the regular season. Fancy tips can be bunched and crated for market. Crooked tips used for home canning or sold in bulk to canning factories. WASHINGTON variety never rusts — every stalk is usable, and it's the heaviest-producing strain known today.

A SURE MONEY CROP

Annual returns of \$25 for each \$1 invested in roots is reported by growers. One planting produces paying crops for 10 to 20 years. Requires very little work — just cut off old tops in August and cover rows with manure mulch in Fall. No danger of losing your crop from late frosts. Tips are easy to market, as they are not highly perishable.

5000 roots plant an acre. We recommend good one-year roots for large-scale plantings. FREE INSTRUCTIONS ON REQUEST.

EMLONG'S ROOTS PAY BEST

We plant new, high-test pedigreed seed every year. Our light, well-drained, rich soil produces long, white, sturdy roots which bear the quickest and largest crops. You get extra-quality at no extra cost!

Direct-to-You PRICES

FRUIT TREES

They Please **BIG ORCHARDISTS** — They Will Please **YOU!**

A few of the 2,000,000 fruit tree seedlings budded by our experts last summer. Buds are selected from heavy-fruited trees, bearing largest and most perfect fruit.

Part of our 200,000 peach trees ready for your order. Giant roots; smooth, straight trunks; well-placed branches. The **BEST** in the **WORLD**

Spraying a field of 200,000 one-year apple trees. This Emlong-designed machine soaks them from all directions, even after six feet tall.

Growers who planted up to 5500 of our fruit trees on their farms last year came back last Fall to buy more, for planting this Spring. By November 15, 1937, we had sold 85,450 trees to our neighbors in Berrien County. Whether you want a few trees for the yard, or a big orchard, Emlong's trees are **BEST** and **SAVE YOU MONEY**.

GOOD ORCHARDS BRING FINE INCOMES

We travelled over many states last summer, and noticed that *where there was FRUIT there was PROSPERITY*. Small orchards brought as much profit as large acreages of ordinary crops. In 1937 about 40% of the Peach crop in this territory alone brought growers nearly \$1,000,000 on the Benton Harbor market. Other fruits brought equally fine returns.

We offer only leading varieties. Those which have been tested for (1) **QUALITY** (2) **YIELD** (3) **FLAVOR** (4) **SIZE** (5) **HARDINESS** (6) **POPULARITY** (7) **APPEARANCE** (8) **PROFITS**. Our catalog descriptions of each variety tell the truth about these important features.

Get started this year with Emlong trees. In almost no time you can be picking fine fruit like that shown on the 3-Yr. trees on opposite page. If you haven't room for an orchard, a few trees in the yard will afford great delight and cut a large slice from your grocery bill—!

Wm. Hudson, Clearfield, Pa. says, "Your plum trees bore so heavy, so quickly, I had to prop up the branches. Never saw anything like it before."

"Every tree you sent me has borne first-class, **TRUE TO NAME** fruit." John Lunkko, Westboro, Mass.

"J. B. Zirnheld, Georgetown, Ind. writes, "Your young trees have caught up with some purchased elsewhere 3 years ago."

"One of those trees bore 23 perfect pears the second year," says Frank Supansic, Springfield, Ill.

Lower Left. Section of our field of 50,000 one-year cherry trees. Budded on long-life understock. Note height and caliper. No better trees anywhere — at any price!

Lower Right: Our field of 2-Yr. apple trees photographed Aug. 1937. Worth twice what we're asking for them!

NOWHERE ELSE

Can trees be grown with

ROOTS LIKE THESE!

Says WM. ADAIR, Fruit Tree Expert

"I have devoted my entire life to Fruit Tree propagation, in my own nursery, and also for many of the largest nurseries in the country. I have produced millions of Fruit Trees, and supervised the storage, handling and selling of millions more, in many different states. Knowing that you are greatly interested in obtaining **QUALITY FRUIT TREES**, I wish to give you a few of the many reasons why I know positively that Emlong Fruit Trees will give you **MORE** and **BETTER FRUIT**, **MORE PROFIT**, and **MORE SATISFACTION** than any other trees you can buy:

FIRST: SYSTEMATIC BUD SELECTION. Buds and scions for Emlong trees are carefully selected from the most outstanding trees in famous Berrien County orchards, which are constantly under the supervision of trained Horticulturists. This careful selection of buds reacts as follows on the trees which we produce:

(1) YOUNG BEARING HABIT. No long period of waiting for fruit. Parent trees selected are all young-bearing specimens, and many of our young trees will commence bearing for you the second year after planted.

(2) GREATEST PRODUCTIVE ABILITY. Careful bud selection coupled with natural advantages give our trees the ability to produce **MORE** and **BETTER** fruit than any other brand.

(3) HARDINESS AND VIGOR. Hardy and thrifty trees, produced in this northern atmosphere, mature to the very tip of every branch. Air tempered by Lake Michigan breezes hardens them gradually over a long Fall season until they reach the most perfect stage of maturity I have ever seen. Thus there is no danger of winter injury.

SECOND: MARVELOUS ROOT DEVELOPMENT.

Never before in my life have I seen such roots! They are a revelation to everyone who sees them, and will amaze you also! Even sweet cherry trees, which practically always develop poor roots, form a perfect circle of light colored, fibrous roots here. Every tree is sure to grow. The straight stocky trunks and well developed heads add to their perfection.

These are only part of the advantages of Emlong Fruit Trees. Every day I am more firmly convinced that this spot in Southern Michigan is actually the fruit tree propagators 'PARADISE.' Regardless of our low prices, we offer you the **BEST TREES** that can be purchased, on a money-back guarantee."

Wm. Adair

Mr. Wm. Adair with five of the trees which he grew on Emlong's fertile Michigan soil.

Right. 3-Yr. Emlong Peach tree bearing a bushel of immense fruit. N. Garrison, Chillicothe, O. says his peaches weighed $\frac{1}{2}$ lb. each.

Left. Joe Tomasch, Cleveland, O. proudly displays his 3-Yr. apple tree bought of Emlong. Wm. C. Long, Rock Rapids, Ia. says one of his 2-Yr. trees bore 32 apples.

PEACH TREES

ALL THE POPULAR VARIETIES, INCLUDING THOSE SHOWN ON PAGES 28 and 29. ALL FANCY GRADES. Extra large, smooth trunks; well balanced branches, heavy root systems

COMPLETE PRICE LIST ON PAGE 29. DISCOUNTS—PAGE 3.

Due to an exceptionally favorable growing season, our peach trees "made-up" larger than usual this year. We have no light whips, but have priced our larger grades low enough to fit every budget. All varieties priced alike except Late Elberta, All-Red, Hardee, and Fertile Hale. WRITE US FOR PRICES ON LARGE LOTS OF TREES.

HALE HAVEN

Truly the Marvel peach of today! Second only to Elberta in demand last year. It's a great big handful of rich, snappy, tempting sweetness with a flavor you'll never forget. Every peach ripens to rich orange overspread with brilliant red, ON THE TREE, BEFORE RIPE. Combines large size and firmness of J. H. Hale with perfect fertility of South Haven. Ripens 15 to 20 days before Elberta. Excellent freestone for canning and shipping. Trees grow rapidly, bear young, produce heavily, and are SURE CROPPERS EVERY YEAR. Stood 26 below zero without bud injury. PRICED THE SAME AS COMMON VARIETIES AT EMLONG'S THIS YEAR — BETTER ORDER EARLY.

SOUTH HAVEN

Fancy golden-yellow fruit with dark red cheek and splash-marks. Very beautiful and very delicious, fresh or canned. Retains its color and richness when canned. Firmness and fine texture make it an excellent keeper and shipper. Ripens about 10 to 15 days ahead of Elberta. Freestone, self-fertile, very hardy, thrifty, young bearer. TREMENDOUS PRODUCER EVERY YEAR. You can't plant too many South Haven trees — they're sure money-makers.

BIG J. H. HALE

Emlong's special bud-selected strain is larger, and bears generously. Most beautiful peach! Extra large, nearly fuzzless, bright yellow with carmine blushes. Richly flavored. Orchardists plant South Haven or Rochester with them for pollenization. Fancy, high-priced eating and canning sort.

New ALL-RED JELL-PEACH

R-E-D skin, flesh, juice, jam and jell! The ONLY PEACH which jells by itself. Richly aromatic and highly flavored. Ripens LATE, bears TREMENDOUS LOADS OF FRUIT, starting young. Freestone, self-fertile, and HARDY WHEN ALL OTHERS FAIL. Valuable for home use and jelly canners. Originated by R. Z. Nolan, who discovered Eureka. GROWN AND SOLD ONLY BY EMLONG. Limited Supply. PRICES: 2-3 ft. at 35c each; 10 trees for \$2.75; 3-4 ft. at 45c each; 10 trees for \$3.75.

The GREAT ELBERTA

King of mid-season peaches. Grown from coast to coast with equal success for home use, canning, storage, shipping and drying. Freestone and self-fertile. Fruit is very large, bright orange-yellow with dark red mottling. Fine flavor. IDEALLY FIRM in flesh and skin. Greatest peach on record — kept up-to-date by our special BUD-SELECTION FROM THE CHOICEST TREES IN MICHIGAN. See our low prices — page 29.

GOLDEN JUBILEE

More popular every year as growers and buyers come to know it. Ripens extra early (with Rochester), is freestone, hardy, and perfectly fertile. Fruit is large; distinctly long in shape; blazing orange-apricot color inside and out; skin mottled bright red. Exquisite syrupy flavor, fresh or canned. In high demand by shippers.

New LATE ELBERTA

Praised so highly by those who grow it, that we want our customers to enjoy its goodness and profits. Rounder in shape than Elberta. Clear-yellow skin blushed with deep scarlet. Golden flesh that's firm, juicy, and richly flavored. Perfect freestone, self-fertile and hardy. 10 days later than Elberta. Very profitable. Sample fruit shipped 600 miles express without refrigeration arrived in 95% perfect shape. LIMITED SUPPLY. PRICES: 5/16-7/16 trees 45c ea.; 10 for \$3.95; 7/16-9/16 trees 59c ea.; 10 for \$4.95.

ORIOLE. A round ball of orange-apricot color inside and out. Valued for its SUPERBLY RICH FLAVOR and EXTREME HARDINESS. Extra-heavy producer. Ripens before Rochester.

EARLY ELBERTA. Prolific, annual bearer of large, freestone, fine-grained fruit. Yellow with red blush. Self-fertile.

ROCHESTER. Early, orange-yellow with blazing red cheek and markings. Delicious flavor. Excellent canner and shipper. Freestone, very hardy, enormous cropper. Excellent pollenizer.

GOLD DROP. Medium-size, golden-yellow skin and flesh. Mellow and good. EXTRA LATE freestone, self-fertile. Very hardy and a tremendous bearer.

NOTE: Trees available in all sizes unless otherwise specified. WRITE US FOR PRICES ON LARGE LOTS OF APPLE TREES.

ALL RED DELICIOUS. Dark, blackish-red all over, before ripe. Can be picked earlier than Delicious. Not quite as large as Delicious, but fully as profitable. Fancy eating apple, and excellent for shipping and storage. One-Year sizes only.

DELICIOUS RED. *Mammoth strain.* Buds selected from the best trees in Michigan. Bright-red color, long, tapering shape. Flesh is crisp, white, juicy, sweet, and richly aromatic. Fruit keeps all winter in storage. Highly profitable. Trees are prolific, annual bearers. Hardy, thrive everywhere. **MOST POPULAR APPLE!**

DELICIOUS YELLOW. Judged by critics the best-flavored apple in the world! Not as large as Delicious Red, but similar in shape. Crisp, white, juicy, flavorful flesh. Firm skin. Good shipper and storage sort. Hardy, good producer, regular bearer.

GRIME'S GOLDEN. Best *late-winter* Yellow apple. Very solid flesh and bruise-proof skin. Mild, sweet, spicy, aromatic flavor. Excellent for eating, cooking, drying, shipping, storage. Special, long-life strain. Very profitable commercial sort.

JONATHAN. Buds selected from darkest red and heaviest-bearing trees in Michigan. The **PERFECT LATE WINTER STORAGE APPLE.** Brings big profits to growers every year. Trees are very hardy, **BEAR YOUNG,** and abundantly. Fruit matures to large, uniform size, perfect shape, dark red color. Flesh is fine, very firm, white, juicy, crisp, and highly flavored. Equally desirable fresh or cooked.

McINTOSH. Our special large strain, much larger than illustration on page 24. Fancy Fall dessert apple of bright, snappy, glossy-red. Beautiful and fragrant. Spicy, juicy, white flesh. Hardy trees which start bearing heavily while young and thrive on poor soils. Excellent keeper and shipper.

TURLEY WINESAP. Gorgeous blackish-red apple which matures to large size and attractive shape. Flavor is richer, flesh and skin firmer than Winesap. Does not crack during unfavorable weather. Delicious fresh, cooked, or dried. Keeps in storage until Spring.

BALDWIN. A favorite *late winter* storage, drying, and pie apple. Large, bright-red. Flesh is white, juicy and firm. **HARDY.**

ASTRACHAN RED. Pretty Red *summer* apple. Good to eat and cook. Tart flavor. 2-Yr. sizes only.

DUCHESS. Highly colored, large strain. Red-striped *summer* eating and cooking apple. Well-known and liked. 1-Yr. sizes only.

HYSLOP CRAB. Bright, glowing red with purplish bloom. Large, highly flavored, hardy, big-producer.

GREENING, N. W. Very large, round, greenish-yellow. *Winter* storage, shipping, drying, cooking and eating sort. Very hardy and dependable. 2-Yr. sizes only.

NORTHERN SPY. Very popular *winter* pie apple. Excellent fresh or cooked. Large, greenish-yellow splashed red.

RED JUNE. Earliest Summer. See page 25 for description.

TOLMAN SWEET. Best yellow sweet apple. Popular dessert variety. 2-Yr. sizes.

YELLOW TRANSPARENT. *Midsummer* yellow with juicy, acid, white flesh. Very hardy, heavy producer. Large strain.

YORK IMPERIAL. Very large, fancy-looking *Winter* apple. Greenish-red heavily striped with red. Popular shipping and storage sort.

WOLF RIVER. Immense, flat, yellow splashed red. Tender flesh. Valued for baking purposes.

WEALTHY. Large, round, greenish-yellow with red stripes. Ripens early Fall. Tender, white, acid flesh. Valuable pollenizer for other sorts.

CORTLAND. An extra-large, late Fall type of McIntosh. Bright red, with purplish bloom. Wonderful flavor.

WINTER BANANA. Lovely lemon-yellow with scarlet cheek. Richly flavored, juicy, white flesh. *Early winter.*

STAYMAN'S WINESAP. Very large, bright, cherry-red, late-Fall apple. Sweet, enticing flavor. Juicy, but a good keeper. Trees are hardy, heavy bearers, and bear annually. Great improvement over the old Winesap. Profitable commercial variety.

ROME BEAUTY. Beautiful dark-red apple of large size and handsome shape. Retains its rich color and juciness in storage until Spring. Popular for dessert purposes, cooking and drying. One of the best.

ALL-RED ROME. Just a trifle smaller than its parent, but of deeper-red color which is becoming popular in dessert apples. Snappy flavor. Same quality as Rome Beauty. 1-Yr. sizes only.

CHERRY TREES

POPULAR SWEET AND SOUR VARIETIES. ILLUSTRATED IN COLOR ON PAGES 32 and 33. SWEET VARIETIES PRICED ON PAGES 32-33; SOUR VARIETIES PRICED BELOW:

BLACK TARTARIAN (Sweet)

Very large, glossy purplish-black, heart-shaped cherries. Crisp, tender, richly colored, mild, sweet flavored flesh. One of the most popular for eating fresh, shipping, and canning. *Ripens late June.* Trees are large, upright growers, and generous croppers. Regular bearer, and one of the hardiest sweet varieties.

SCHMIDT'S BIGARREAU (Sweet)

The height of excellence! Every piece of fruit of immense and uniform size. Dark, purplish-red color with high gloss and most attractive heart-shape. Luscious, dark, tender flesh which is good long before full ripe. Hardest, heaviest bearer, and most sure-cropper of the sweet varieties. Bears young. *Ripens in July* right after Tartarian. All-purpose profit-maker.

WINDSOR (Sweet)

Best late. Dark maroon-red skin and flesh. Exquisite flavor. Resists rot and clings to tree long after full ripe — maturing to extra large size. Brings fancy prices for dessert purposes and canning. Wonderful firmness of flesh and skin. Trees are thrifty growers, tremendous bearers, regular croppers.

NAPOLEON (Sweet)

Often called Royal Ann. Large golden-yellow fruit with glowing red cheek. Very popular and a fine money-maker. Delicious fresh or canned. Popular canned for fruit salads. Generous bearer and good keeper.

BING (Sweet)

Giant brownish-black-red mid-season variety which is popular for eating purposes. Exquisitely flavored. Grown extensively in eastern states.

LARGE MONTMORENCY (Sour)

The largest, darkest-red, best flavored Sour Cherry. Juice is sub-acid and in high demand for cider. Immense orchards are planted to this one variety to supply canners. Marvelous keeper, on the tree and after picked. Trees are very hardy, tremendous bearers, and **NEVER FAIL TO CROP ANNUALLY.** Bear soon after planted. Fruit ripens mid-season to late. Finest all-around sour cherry in the world.

EARLY RICHMOND (Sour)

Popular acid variety which ripens in May. Bright, cheerful red color — make fine pie. Dependable, hardy, big-yielder.

PRICES: MONTMORENCY AND RICHMOND ONLY

Never Before at Such Prices!

EMLONG'S GENUINE PRIDE-O-MICH NORTHERN GROWN

Bartlett PEAR TREES!

PICTURE ON PAGE 36

The Pear that Outsell All Others 7 to 1

New pear varieties come and go, and glowing descriptions are written about them, but figures tell facts! Our sales records show Bartlett demanded every year in seven times greater quantity than all other pears added together. There are never enough to fill the demand. WHY? It sets the standard for excellence in FLAVOR, BEAUTY and YIELD. Nothing more beautiful than Bartlett's waxy-golden coloring, bright flame cheek, and artistic shape. Fine texture, mellow, juicy, free from graininess, superbly flavored. Favorite for eating, canning and shipping. Fruit wrapped in green wax paper, packed in boxes and placed in cold storage sells at triple price after the regular season. Trees are thrifty growers, hardy, and regular heavy bearers. Plant a big orchard this year, before prices go up! Complete price list at bottom of page.

KIEFFER PEAR TREES 37c UP

The giant-size WINTER pear which is picked while green and stored in a cool, dark room until it ripens and mellows. Turns golden-yellow when ready to use. Favorite for baking, canning, storage and shipping. Very hardy and resistant to blight. Prices at bottom of page.

CLAPP'S FAVORITE PEAR. Immense greenish-yellow pear with dark carmine-red cheek. Very attractive, smooth shape. Flesh fine and sweet. Ripens after Bartlett. Fancy market type. Prices at bottom of page.

SECKLE — Sugar Pear. Small, very sweet, dark-red eating and pickling variety. Hardy, good producer. Priced below.

APRICOT TREES. Produce bright orange-apricot colored fruit with flesh of same color. Superbly mild flavor. Delicious fresh, canned or dried. Rich in iron — can be digested by those who are denied other fruits. Plant two trees to insure pollenization. Your choice of SUPERB or MOOREPARK varieties. Both hardy as plums, easy to grow.

5/16 size 45c, 5 for \$2.10, 10 for \$3.95. 7/16 size 55c, 5 for \$2.65, 10 for \$4.95.

HARDEE PEACH

Don Byers Pat. No. 120

Claimed by its originator to withstand 18 below zero without injury! Large fruit of Elberta type. Delicious flavor, excellent quality for every purpose. Golden yellow flesh and skin, with red blush. Ripens mid-season.

PRICE: 7/16 size \$1.00 each, 10 for \$9.00. Picture, page 36.

NECTARINES: Fruit as large as peaches, but entirely fuzzless. Golden-orange with blazing red blushes. Strikingly beautiful, and richly flavored. Combine peach and apricot flavor. Trees hardy as peaches, easy to grow.

5/16 grade 59c ea., 3 for \$1.49. 7/16 grade 69c each, 3 for \$1.95.

QUINCE TREES: Famous Orange variety. Large yellow, round. Excellent for baking, preserving and jelly making. Often combined with apples to add tartness.

7/16 to 9/16 grade 75c ea., 5 for \$3.65, 10 for \$6.95.

10 FOR \$3.25

They start bearing the year after planted and increase in yield and value each year. Plum trees are hardy throughout the United States and very easy to grow. We offer only leading, thoroughly-tested, popular varieties which are sure to give satisfaction. ALL VARIETIES PRICED ON PAGE 37. SEE PLUM ORCHARDS ON PAGE 37 ALSO.

GERMAN PRUNE

We have chosen German Prune as Plum King for 1938 because it leads all others in popular demand. We have never been able to fill all our orders for this variety! Called a medium-size plum, but we discovered by measuring they averaged better than 2 inches long and nearly that wide. Dark blue color, with beautiful powder-blue bloom. Attractive, long shape. Flesh is golden-orange, very fine in texture, juicy, richly flavored. A superb fruit to eat fresh, canned or dried. Not too acid. Trees are perfectly hardy, young bearers, and tremendous croppers. A five-acre orchard here in Berrien County bore nearly 2,000 bushels last summer, with average market price \$1.85. Ripens late.

BURBANK

Large, round, golden and maroon plum overspread with pretty bloom. Flesh is golden, sweetly and richly flavored, of fine texture and firm quality. One of the best for big crops, hardiness and dependability. Delicious fresh or canned or in jelly. Popular mid-season shipping sort.

WICKSON: A giant drop of honey-yellow, often measuring 3 inches across. Glossy skin, tender, exquisitely flavored pink flesh. Very little acid. Not a heavy bearer, but a fancy freestone, eating sort which sells at fancy figures.

LOMBARD: Big, roundish, cherry-red plum, with reddish flesh. Ripens mid-season, is hardy, and a good producer. Favorite for canning.

ITALIAN PRUNE: Giant Purple, oblong plum which ripens in September. Beautiful and very delicious. Regular cropper. Fine for drying, canning, storage.

REINE CLAUDE: Large, round, greenish-yellow plum with a marvelously sweet flavor. Almost lacking in acid. Tender yellow flesh. Improved Green Gage. Hardy, regular and heavy cropper.

GRAND DUKE: Looks like an over-sized prune-plum, with its dark purplish-blue skin and heavy bloom. Fancy eating sort.

YELLOW EGG: Large, egg-shaped, golden-yellow plum with delicious, mellow orange flesh. Fine keeping and shipping quality. Very firm, big producer, regular bearer. Pretty as a picture!

DUNKLEBERG: Medium-size oblong purplish-blue plum with yellow flesh. Favorite for long-distance shipping and storage purposes. A marvel for bearing and keeping. Highly flavored, excellent canner.

ABUNDANCE: Round, amber-colored with red blush. Thrives everywhere, and never fails to produce an enormous crop. Popular market type.

PRICES ON ALL PLUM TREES ON PAGE 37

"Your Plum trees stood 23 below zero. They bore young. I am well pleased with everything bought of you." Wm. Hudson, Clearfield, Pa.

"The early bearing and giant size fruit on my plum trees are the surprise of the neighborhood. I am recommending your stock to friends." H. Soboviak, Watseka, Ill.

"Your fruit trees are the best I ever saw. My neighbors think they are wonderful. I want some more next Spring." C. W. Brodie, Haverhill, Mass.

Nearly a bushel of Apples three years after this tree was planted.

"My apple tree was the wonder of the neighborhood. Planted in April, it bore 32 apples the first summer. Was bent to the ground before I discovered it! Pear tree ripened 5 the first year. Couldn't hardly believe my eyes." Clark Johnston, Canfield, Ohio.

WHOLESALE CLEARANCE

Big Lombardy Poplars

At last! The opportunity you've been awaiting to plant that poplar windbreak without spending much money! Never before have such big, stocky, well-branched, heavy-rooted shade trees been placed on the market at such prices. But we need the ground for other crops, so they must go — and Emlong customers are the gainers.

Lombardy Poplars are beautiful planted as specimens, corner groups, backgrounds, screens, windbreaks, along drives and country roads, and between farm fields to keep the soil from blowing. Grow rapidly on poorest soil, without any care. Natural columnar shape needs no trimming. Dark, glossy-green leaves show silver beneath when they rustle in the breeze. One of our most beautiful and useful deciduous trees — outsells all others. Plant them 5 to 10 feet apart. **BUY THIS SPRING — SUCH AN OPPORTUNITY MAY NEVER COME YOUR WAY AGAIN!**

5 POPULAR SIZES

2 to 3 Foot Light	10 for \$ 1.00 100 for \$ 7.95

10 for \$ 26.5

GIANT 8-10 FT. TREES 3 for only 98¢

SOFT MAPLES

Heavy 4-5 Ft. 3 For 89c

Lightning-speed growers! Succeed on poorest soils and are very hardy. Need no care. Dark-green, finely cut leaves. Tree forms a round, wide-spreading head. Very attractive for lawn, street, and roadside.

Emlong-grown, heavy rooted, big-caliper, well-branched, stocky 4-5 Ft.: 49c ea.; 3 for 89c; 10 for \$2.75. 5-6 Ft.: 59c ea.; 2 for 96c.

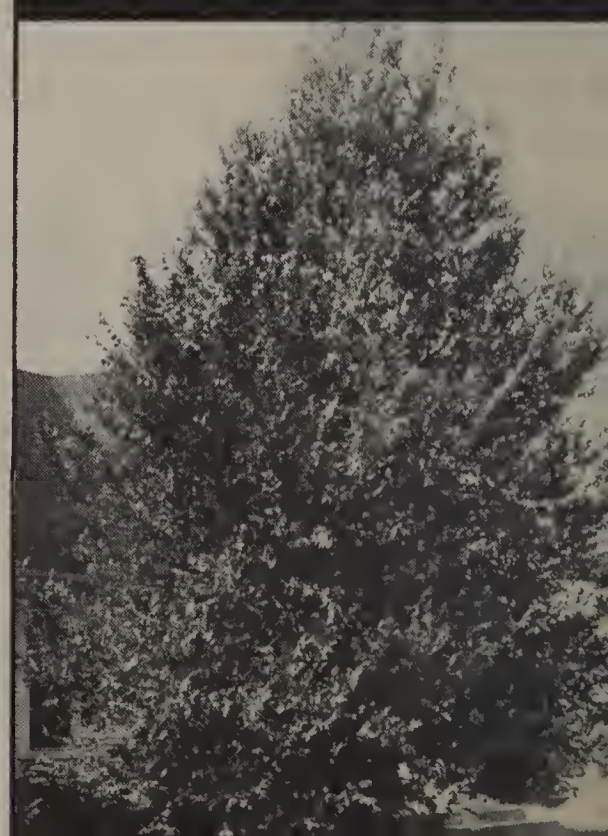

CHINESE ELMS

Heavy 4-5 Ft. 2 For 97c

Hardy Siberian strain. Most popular shade tree in America! Thrives on all soils and GROWS RAPIDLY everywhere. Well-shaped head, with many branches and abundant foliage. Fine, artistically cut leaves. Free from diseases. Roots do not clog drains. Ideal for lawn specimens, street planting and roadside planting. Very enduring.

Emlong's special heavy rooted, big-caliper, well-branched 4-5 Ft. specimen trees: 2 for 97c; 10 for \$4.35. 5-6 Ft.: 75c each; 3 for \$1.95.

7-Yr. Old Chinese Elm

Emlong Soft Maple 3 years after planted.

Note the well-balanced growth.

HARDY HEDGES

Last a Lifetime

MAKE BEAUTIFUL LIVING FENCES

CHINESE ELM — 25 Plants \$1.69

Delicately cut green leaves, charmingly arranged on short branchlets, appear early in Spring and remain late in Fall. Perfectly hardy even in the far North. Not subject to blight or insect pests. **GROWS RAPIDLY ON ALL SOILS.** Makes lovely clipped hedges, tall screens, windbreaks, etc. Easy to grow. Set 9 to 12 inches apart.

2-Yr. 1-1½ Ft.: 10 for 79c; 25 for \$1.69; 100 for \$4.95.

AMOOR PRIVET — 10 Plants 79c

Hardest Northern Privet. Foliage is dark, glossy-green, resistant to insect pests and not subject to blight. Leaves appear early and remain late in Fall. Small white flowers and berries. Thrives everywhere without any special care. May be clipped to desired height and shape any time during summer. Also useful unclipped for tall screens or foundation plantings. Set plants 9 to 12 inches apart.

2-Yr. 1-1½ Ft. Plants: 10 for 79c; 25 for \$1.69; 100 for \$4.95.

SPIREA Van Houttei — 10 Plants 98c

America's most popular shrub and scores the highest for beauty and utility! Masses of tiny white blooms appear in large clusters along graceful, slender branches which sweep to the ground in May and June. Leaves delicately cut and remain green and glossy through drought, and longer in the Fall than any other shrub. Can be pruned to any height or shape, any time of the year. Monthly pruning through the summer keeps it formal and shapely. Set plants 2½ feet apart for hedges, 3 feet apart for screens, groups, foundation plantings. Thrive on all soils. Perfectly hardy.

2-Yr. 1½-2 Ft. Plants: 15c each; 5 for 59c; 10 for 98c; 25 for \$1.97; 100 for \$6.95.

GREEN BARBERRY — 3 Plants 39c

A delightful plant the year around! Healthy, bright-green leaves come early in Spring and turn bright scarlet, orange and gold in Autumn. Remain late in Fall. Bright red berries remain all winter. Plant grows low and branches thickly. Good pruning annually keeps it in shape. Set plants 18 inches apart. Use them for specimen, hedges, corner groups and foundation plantings. (*Thunberg's Rust-proof strain. Not quarantined from any state.*)

2-Yr. 12-15 Inch Bushy: 3 for 39c; 10 for 79c; 25 for \$1.69; 100 for \$4.95.
3-Yr. 18-24 Inch Bushy: 19c ea.; 5 for 89c; 10 for \$1.49; 25 for \$2.95; 100 for \$10.85.

RED BARBERRY — 5 Plants 79c

Barberry *Thunbergi Atropurpurea*. Strikingly gorgeous from Spring until Winter with its thick, glistening maroon-purple leaves, closely clustered on erect branches. Luxurious addition to any lawn. Valued for specimen groups, foundation plantings, hedges, and color accent among evergreen plantings. Plant 18 inches apart. Picture on page 44.

2-Yr. 10-12 Inch Bushy: 5 for 79c; 10 for \$1.45; 25 for \$3.25.
2-Yr. 12-15 Inch Very Bushy: 35c ea.; 5 for \$1.35; 10 for \$2.49; 25 for \$5.45.

DOUBLE FLOWERING FRENCH LILACS 39c

5 Colors — Any 3 for 98c

Mammoth panicles measuring 8 to 12 inches, clustered full of ½-inch very double florets! We selected five of the finest double French varieties and grew them especially for our particular customers. Budded on hardy, non-suckering root stock. Bloom very young. Way ahead of old types of lilacs! These plants would cost you up to \$1.00 each elsewhere. **CHOICE:** Blue, White, Pink, Red or Purple. Labelled their original French names. 2-yr. budded stock. **COLORED PHOTO ON PAGE 44.**

HANSEN'S IMPROVED BUSH CHERRY 39c

3 Large 2-Year Plants for 98c

Long, pointed green leaves, with silvery underside, turn rich maroon-red in Autumn. Dainty white flowers in Spring. Bright maroon-purple fruit, large as tree-cherries, borne in enormous quantities. Delicious fresh, preserved or in jelly. Prof. Hansen spent 30 years perfecting this variety. He grows them in rows and markets the crop. **EXTREMELY HARDY.** Thrive on poorest soil. Lovely for foliage and fruit. Medium-height shrub. 2-Yr. 1½-2 Ft. size. **COLORED PHOTO ON PAGE 44.**

JAPANESE MOUNTAIN OF GOLD. Solid dome of 2-inch golden-yellow rose-like flowers in May and June. Grows 1 foot tall. Attractive green leaves. Flowers followed by pea-shaped pods, coloring bright red. Dazzling beauty all summer and fall. Field-grown plants 49c each; 3 for 98c.

DIANTHUS (Lat. Atr. Fl. Pl.) CRIMSON BEAUTY. Erect 18-inch stems carry giant clusters of dark crimson-red, double, carnation-like blooms. Sweet William scent. Carnation foliage. Hardy. **BLOOMS ALL SUMMER.** Very worthwhile. 3 plants 98c.

HARDY ASTERS. Inch-wide daisy-like blooms in giant clusters, Sept. and Oct. Improved strain. One each ROSE, ROYAL BLUE, PINK, LIGHT BLUE, the 4 plants 98c.

19¢ SHRUBS ANY 5 FOR 79¢

All 2-Yr. 1½-2 ft. well rooted, branched specimen shrubs. Hardy, easy to transplant, bring quick results, thrive on any soil. CODE: T-Tall; M-Medium; L-Low-growing. A-Thrive anywhere; S-Like full sunlight; SH-Succeed in shady locations. Plant about 3 feet apart.

The following 7 varieties 19c each; any 5 for 79c

ALTHEA — Rose of Sharon. Double frilly flowers 2 inches in diameter in AUTUMN. Fancy cut, dark green foliage. Lovely for specimen, shrub borders or hedges. (M-A). Special Price: 10 for \$1.00.

FORSYTHIA Spectabile. Larger flowers and more of them than any other Forsythia. Yellow bell-flowers in MAY before leaves appear. Gorgeous for specimen, groups, foundations, borders. (T-A).

TAMARIX Hispida. Graceful, feathery, bright green foliage, with rosy-lavender flowers of same texture. Bloom panicles 9 to 12 inches long in late SUMMER. Lends romance to pool plantings, shrub borders, foundations, etc. (T-A)

WEIGELA Rosea. Dainty trumpet shaped rose-colored flowers in June and July. Green leaves. Graceful pendulous branches. Beautiful anywhere! (M-A).

DEUTZIA Pride Rochester. Very double, tassel-like white flowers cluster thickly along branches in May and June. Showy for any purpose. Pointed green leaves. (M-A).

WHITE SNOWBERRY. Tiny pink flowers, followed by LARGE white berries in clusters. Remain all winter, as birds do not eat them. (M-SH or A).

RED SNOWBERRY. Small, waxy-maroon-red berries cluster thickly along branches. Tiny wing-like leaves turn red in fall. (M-SH or A).
