Today's presentation:

1. Brief history of internet legislation
2. Community moderation of copyright
3. Copyright legislation – possibilities and flaws

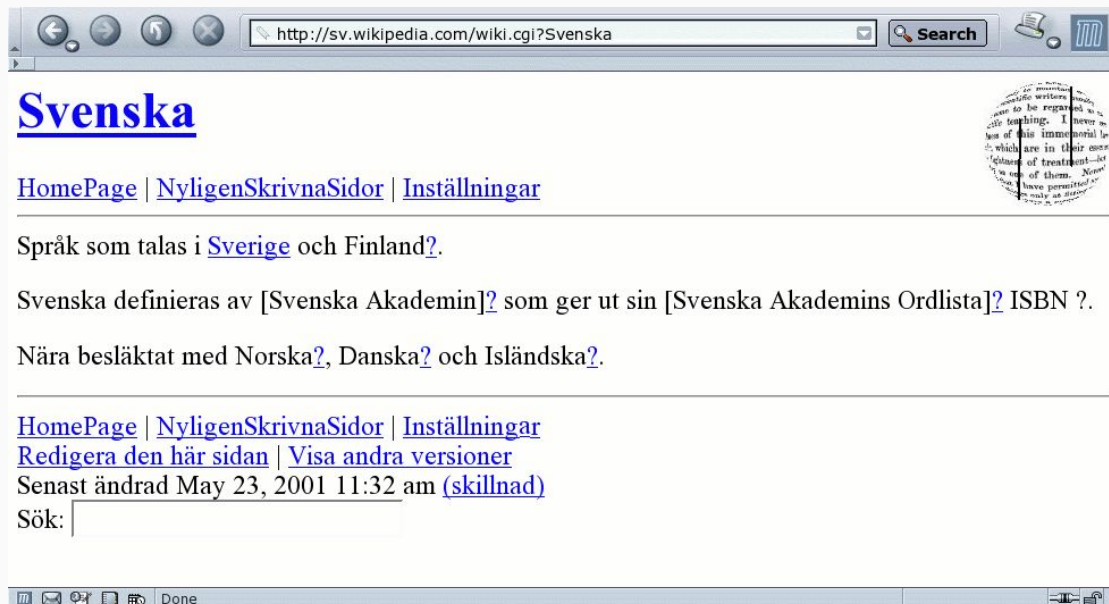

Wikipedia's mission

"Imagine a world in which every single person on the planet is given free access to the sum of all human knowledge. That's what we're doing."

Jimmy Wales, co founder of Wikipedia

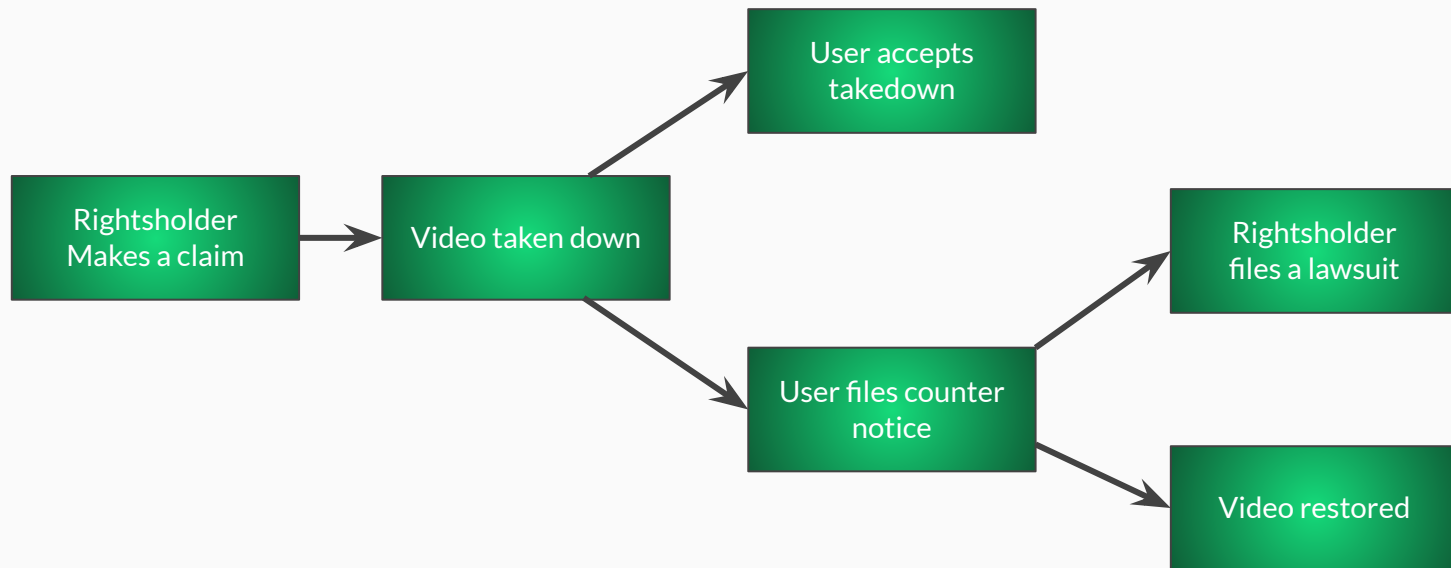

Young but old...

OCSSPs

- (6) ‘online content-sharing service provider’ means a provider of an information society service of which the main or one of the main purposes is to store and give the public access to a large amount of copyright-protected works or other protected subject matter uploaded by its users, which it organises and promotes for profit-making purposes.

Providers of services, such as not-for-profit online encyclopedias, not-for-profit educational and scientific repositories, open source software-developing and-sharing platforms, providers of electronic communications services as defined in Directive (EU) 2018/1972, online marketplaces, business-to-business cloud services and cloud services that allow users to upload content for their own use, are not ‘online content-sharing service providers’ within the meaning of this Directive.
