

How to edit Wikidata

a Wikidata workshop

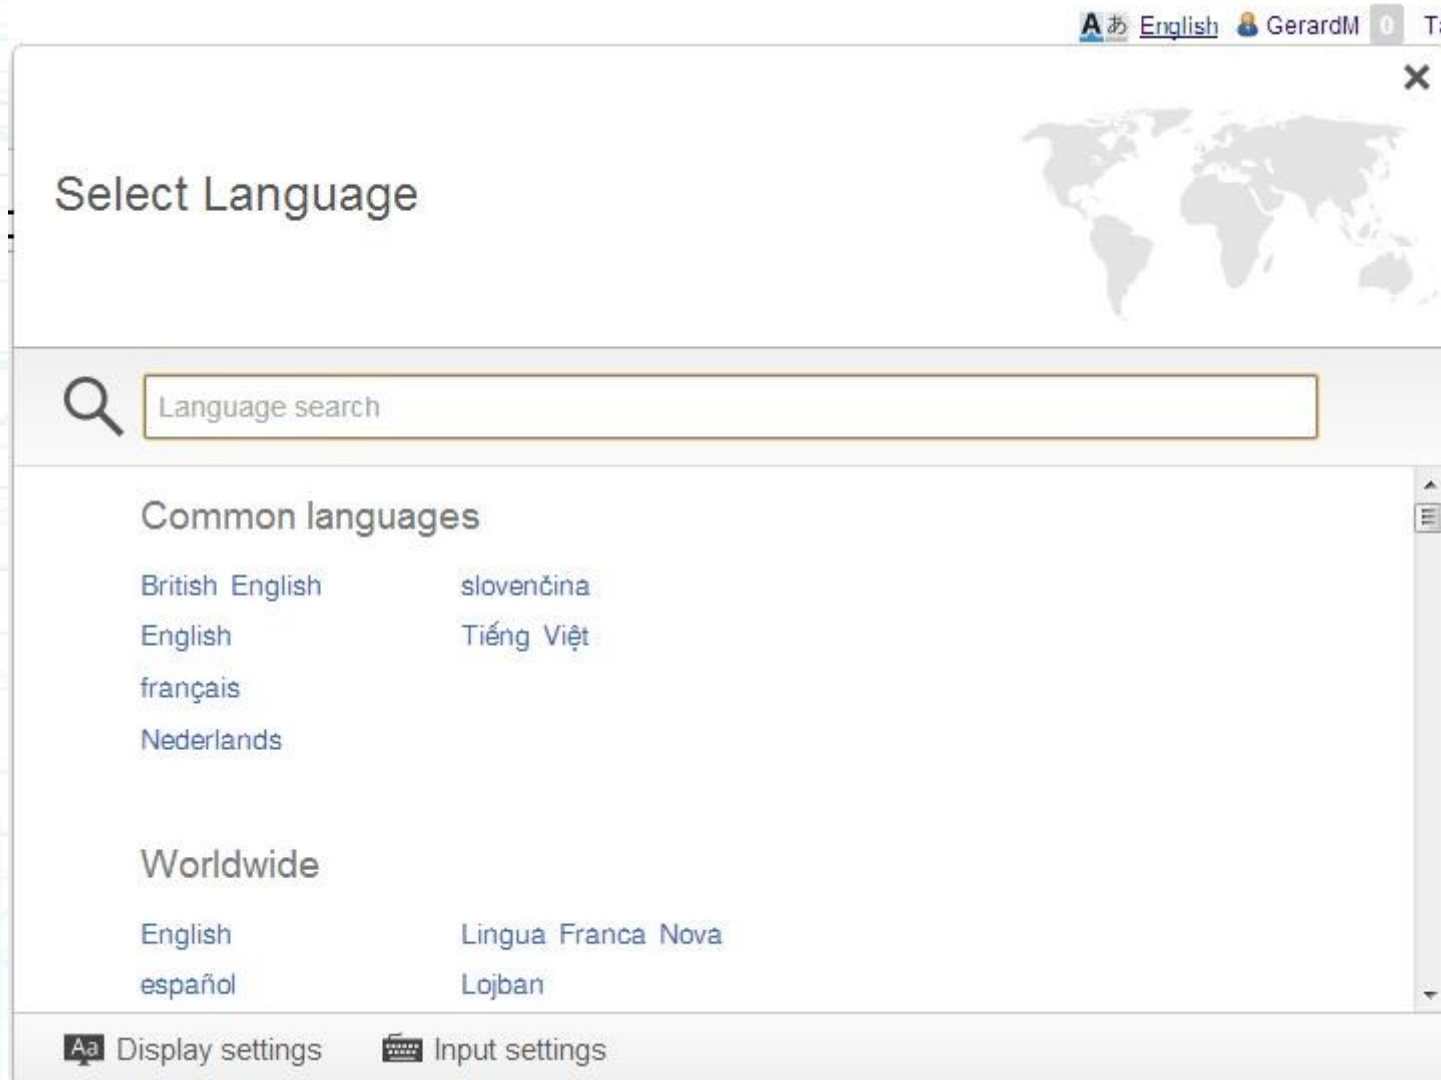

#Babel

- Babel template determines the languages you have labels in
- `{{#babel:nl|en-4|de-3|fr-1|ar-0|id-0|tr-0|ota-0|ase-0}}`

| Babel user information | |
|------------------------|--|
| nl-N | Deze gebruiker heeft het Nederlands als moedertaal. |
| en-4 | This user has near native speaker knowledge of English. |
| de-3 | Dieser Benutzer beherrscht Deutsch auf hohem Niveau. |
| fr-1 | Cet utilisateur dispose de connaissances de base en français. |
| ar-0 | هذا المستخدم ليس لديه معرفة بالعربية (أو يفهمها بصعوبة بالغة). |
| id-0 | Pengguna ini tidak mengerti bahasa Indonesia (atau hanya dengan sangat sulit). |
| tr-0 | Bu kullanıcı hiç Türkçe bilmiyor (ya da bir hayli zor anlıyor). |
| ota-0 | This user has no knowledge of Ottoman Turkish (or understands it with considerable difficulty). |
| ase-0 | This user has no knowledge of American Sign Language (or understands it with considerable difficulty). |

Universal language selector

- Decides language of user interface

Nelson Mandela (Q8023)

- Most languages know Mr Mandela
- Search for the item “Nelson Mandela”
- Most languages know him, if not look for Q8023
- Look at statements and notice missing labels in your language
- New tab ..
<http://tools.wmflabs.org/reasonator/?q=Q8023>

Visualise a person

- It shows a person in a “reasonable” way

Reasonator in your language

- Reasonator in Slovak and Chinese
- This is Mr Mandela in Slovak with missing labels in Chinese (it shows really well)
- Change sk for your language
- Click on P* or Q* and add labels in YOUR language

Take home message

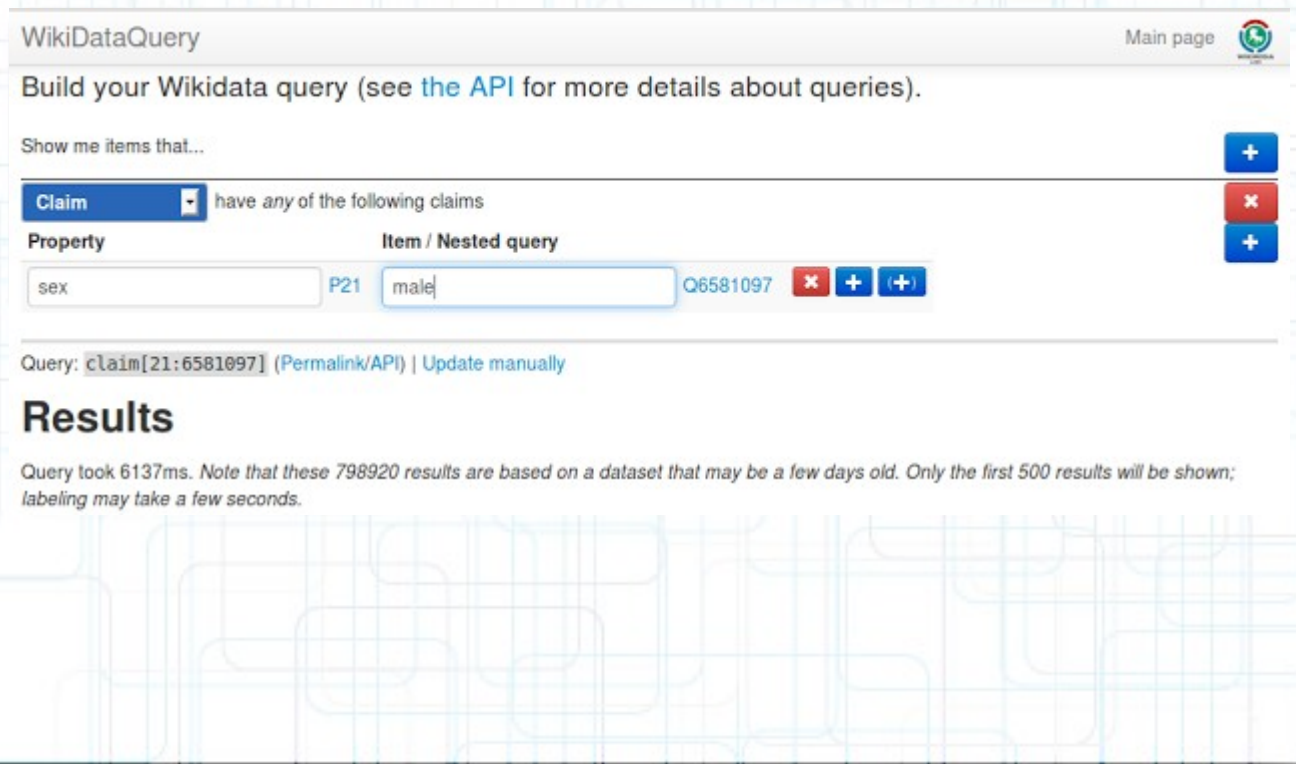

- When you add a label, it may affect millions of items.. eg Q6581097 is male
- It takes a moment to add a label..
 - Half an hour a day has a big effect
 - Not as much concentration needed as needed for Wikipedia article
 - Great tool to engage people
 - Adding labels in your language enables the tools we are building
 - e.g. search in Commons in your language

Two nice hacks

- `wikidata.org/wiki/User:YOU/common.js`
- `mw.loader.load('//tools.wmflabs.org/wikidata-todo/autodesc.js');`
 - Automated labels while searching Wikidata
- `wikipedia.org/wiki/User:YOU/common.js`
- `importScriptURI("//en.wikipedia.org/w/index.php?title=MediaWiki:Wdsearch.js&action=raw&ctype=text/javascript");`
 - Search Wikidata for results in your WP

Queries

- Female painters
- Item links by projects (~1 min)
- Item labels by language (~4 min)
- Recent deaths in Wikidata
- Males
- Females

WikiDataQuery Main page 

Build your Wikidata query (see [the API](#) for more details about queries).

Show me items that...

| Claim | Property | Item / Nested query |
|---|--------------------------------------|--|
| <input type="checkbox"/> have any of the following claims | <input type="text" value="sex"/> P21 | <input type="text" value="male"/> Q6581097 ✕ + ++ |

Query: `claim[21:6581097]` ([Permalink/API](#)) | [Update manually](#)

Results

Query took 6137ms. Note that these 798920 results are based on a dataset that may be a few days old. Only the first 500 results will be shown; labeling may take a few seconds.
