REFRIGERATED CARGO INSTALLATIONS

KEY TO REFRIGERATED CARGO INSTALLATIONS

The only ships included in this list are those having refrigerated cargo installations classed with Lloyd's Register or the British Corporation

Column 1

L.R. Identity No. — As recorded in the Register of Ships

Column 2

Ship's Name — The name of the ship at the time of going to press. Changes of name are reported in the monthly Supplement.

Columns 3 & 4

Lloyd's RMC
✠Lloyd's RMC — Denotes that the refrigerated cargo installation of a ship has been classed with Lloyd's Register for the duty indicated by the class notation. The ✠ signifies that the installation was constructed under the supervision of the surveyors.

RMC
RMC✱ — Denotes that the refrigerated cargo installation of a ship has been classed with the British Corporation. The ✱ signifies that the installation was constructed under the supervision of the surveyors.

When the RMC class and class notation are shown in parentheses, this indicates that the class has been temporarily suspended.

I — Denotes that the installation was designed to reduce the temperature of non-precooled cargoes and has been considered by the Society for this purpose. A statement showing the cargo cooling capabilities of the installation, in respect of stated weights and descriptions of cargoes under stated conditions, will be issued on application by the owners to the Society's Head Office.

SRMC — Special Survey of the refrigerated cargo installation.

CSI — Continuous Survey of Insulation.

Columns 5 & 6

Machinery

C in C — Coils in casing
Comp — Compound
Cyl — Cylinder(s)
DA — Double acting
HP — High Pressure
Hor — Horizontal
LP — Low Pressure
LT — Low temperature
LTD — Lower 'Tween deck
rpm — Revolutions per minute
SA — Single acting
SS — Single stage
S & T — Shell and tube
UTD — Upper 'Tween deck
Vert — Vertical

Columns 7 & 9

Cargo Chambers — Total capacity in cubic feet. The capacity is measured from the face of overhead, 'tween deck and tank top insulation lining, or the surface of 'tween decks where uninsulated, or from the face of brine pipes or air ducts; from the face of permanent cargo battens or air screens or air coolers or casings. Deductions are made for floor gratings which are part of the air circulation system, for pillars, stanchions and other features which interfere with the cargo carrying capacity, but not for loose or portable floor dunnage, or for portable bins or stays and their supports.
