[**Extract from the Annual Report of the Superintendent of State Prisons, for the year ending September 30th, 1888.**]

The Asylum for Insane Criminals.

Notwithstanding the over-crowded condition of the Asylum, the report of Dr. MacDonald, Medical Superintendent, shows most gratifying results. This report and the statistical tables which accompany it, give full details of the condition and operations, during the year, of this important institution.

* * * * *

Respectfully submitted,

AUSTIN LATHROP,
Superintendent of State Prisons.

HON. AUSTIN LATHROP,
Superintendent of State Prisons:

SIR:—I have the honor to present herewith the twenty-ninth annual report of the New York State Asylum for Insane Criminals, for the year ending September 30th, 1888.

The movements of the asylum population during the year were as follows:

	Men.	Women.	Total.
Number of patients October 1st, 1887	202	14	216
Admitted during the year	57	1	58

Whole number treated	259	15	274
Discharged during the year	55		55

Remaining September 30th, 1888	204	15	219
Average daily population, 269.22.			

CONDITION OF THOSE DISCHARGED.

	Men.	Women.	Total.
Recovered	22		22
Improved	7		7
Unimproved	21		21
Not insane	2		2
Died	3		3

Whole number discharged	55		55

Of those admitted, eighteen were from Auburn Prison; nine were from Clinton Prison; four were from Sing Sing Prison; six were from the State Reformatory; three were from the New York City Penitentiary; twelve, eleven men and one woman, were from the State Lunatic Asylum; three were from the Hudson River State Hospital; two were from the Warren County Jail, and one from the Ulster County Jail.

Of those discharged recovered, sixteen were transferred to Auburn Prison; two to the State Reformatory; three were released, their terms of sentence to penal servitude having expired, and one, an unconvicted case, was released on the order of the court.

The percentage of recoveries is 8.02 on the whole number treated, and 10.51 on the average daily population.

Of those discharged improved, one was transferred to the custody of the Superintendents of the Poor of each of the following named counties: Albany, Chemung, Genesee, New York, Oneida, Otsego; and one, a convict, eloped.

Of those discharged unimproved, eleven were transferred, after expiration of sentence, to New York County; two to Ulster County; two to Westchester County; and one to each of the following named counties: Niagara, Richmond, Onondaga, Chatauqua, Queens and Chemung.

Of the two patients discharged as not insane, both were transferred to Auburn Prison.

Of the three deaths that occurred, one was due to pulmonary consumption, one to general tuberculosis, and one to cerebral and pulmonary effusion.

The percentage of deaths is 1.09 on the whole number treated, and 1.43 on the daily average population.

It will be seen that the death rate is again extremely low; this, and the immunity we have had from diseases of a preventable nature index the sanitary condition of the institution, as well as the wholesomeness of the dietary, which we have aimed to vary sufficiently to meet the physiological requirements of the system and to avoid monotony.

It has seldom been necessary to resort to forcible measures in maintaining the customary order and discipline of the wards. There has been no instance of the use of mechanical restraint during the year, or of seclusion (*i. e.*, confinement in a room) on account of maniacal excitement since May last, at which time we determined to discontinue, experimentally, that method of controlling disturbed patients. Patients who, on admission, are suspected of feigning are usually temporarily isolated for observation; also, on one ward, viciously dangerous patients are occasionally confined to their rooms during the attendants' meal hours, when one-half of the force of attendants is temporarily absent from the ward. Complaints by patients of abuse or ill-treatment at the hands of attendants have been few and unimportant; these, on investigation, have generally been found to be groundless; and, usually, the off-spring of delusions of persecution or conspiracy entertained by the complainant.

Such delusions are extremely prevalent among the criminal insane, and render their victims morbidly sensitive, intensely suspicious, and prone to harbor mistaken ideas respecting their condition and surroundings, and to misinterpret the conduct and motives of those about them. Frequently, too, they are afflicted with hallucinatory disturbances, chiefly of hearing, in which they are greatly annoyed by the sound of imaginary voices calling them vile names and threatening them with injury or destruction. The distress of persons suffering from auditory hallucinations of the kind referred to is usually greater than it would be if the voices actually existed. In fact, they are a reality to the mind of the sufferer, in spite of all arguments to the contrary; hence it is not surprising that patients so afflicted are irritable, fault-finding and, frequently, homicidal.

As heretofore, a large proportion of our patients have manifested a willingness to engage in useful occupations, and many of such have rendered valuable service, respectively, in the shops, kitchens, dining rooms, laundry, stables, garden and grounds; also at painting, glazing, carpentry and mason work, and in the manufacture of all the clothing, bedding, shoes and slippers required by the institution.

The number of days' work done by patients during the year is 21,264, as against 15,067 for the preceding year.

The amusements and diversions provided for patients have consisted of a regular supply of daily and weekly news and illustrated papers, games of cards, checkers, chess and dominoes, walking and lounging in the airing courts, in suitable weather; and, during the winter season, weekly entertainments, consisting of concerts, theatricals, etc. The primary school for the younger male patients was successfully continued throughout the winter and spring months. Religious services were held in the chapel with a fair degree of regularity, except during the months of July and August, when they were suspended on account of the extremely warm weather, and to enable the Chaplain to obtain a needed respite from his labors.

Changes in the corps of attendants have been much less frequent than heretofore, and, as would naturally be expected, the quality of the service rendered by that class of help has been correspondingly improved.

The position of an asylum attendant is by no means an enticing one; and inasmuch as the degree of success to be attained in the treatment of the insane, in asylums, depends to a considerable

extent on the efficiency and fidelity of attendants, who necessarily have the immediate care of the patients, it would seem to be both wise and economical to make such reasonable provisions for their comfort, in the matter of privileges, compensation, food and quarters, as will induce those of approved adaptability to remain in the service after they shall have acquired that amount of experience and training which alone fits them for the delicate and important duties they are required to perform. It has been our aim in recent years to improve the status of attendants in these several respects, so far as structural arrangements of the institution and the necessities of the service would permit; and, from the apparent improvement in the quality of the services rendered by them, we are led to believe that the effort has yielded good results.

In order to avoid the liability of disagreeable misunderstandings between the medical superintendent and employees, respecting the terms and conditions on which the latter are admitted into the service of the Asylum, the following codification of the rules governing the employment of attendants has been adopted and printed in circular form, for presentation to persons applying for such employment :

STATE OF NEW YORK.

STATE ASYLUM FOR INSANE CRIMINALS.

RULES GOVERNING THE EMPLOYMENT OF ATTENDANTS.

Attendants are engaged for a probationary term of _____ months at the rate of \$18 per month, and board and washing ; at the end of which time, if they prove satisfactory and desire to remain in the service, they are required to sign the following agreement, after having carefully read it and given assurance of a perfect willingness to do so :

AGREEMENT.

In consideration of being employed by the Medical Superintendent of the State Asylum for Insane Criminals, for the said Asylum, we, the undersigned, do hereby, severally, and each for ourself, agree to work for the said State Asylum for Insane Criminals at any work or service assigned us by the said Medical Superintendent or other Resident Officer, upon the terms of compensation set opposite our respective names ; we further agree to faithfully perform our duties in accordance with the printed rules and regulations of the Asylum, to remain in the service of the Asylum at least one year, and after that period not to leave said service without giving one month's previous written notice to the Medical Superintendent of our intention to do so ; and in case of dismissal for misconduct, neglect of duty or other violation of the rules of the Asylum, or a departure on our part, from this agreement, we consent to a forfeiture of all wages due us at the time, not exceeding one month's wages. We recognize the right of the Medical Superintendent to terminate, at any time, our respective engagements, the terms of which we have carefully read and fully understood.

At the end of the *probationary term*, attendants are allowed board, washing and \$20 per month. Future increase of wages and promotion will depend upon faithfulness and efficiency. The Civil Service Rules of this State require that candidates for the position of attendant shall furnish satisfactory testimonials as to their character and habits, shall be in good health, able to read and write and do simple sums in arithmetic. They are also required to furnish and wear the uniform dress prescribed by the rules of the Asylum. As attendants are required to lodge at the Asylum, only unmarried persons are desired.

Applicants receiving this circular are requested to immediately inform the Medical Superintendent, in writing, if they desire to have their names entered on the list of candidates from which selections will be made when vacancies occur.

[Signed]

AUBURN, N. Y.

Medical Superintendent.

On entering the service employees are furnished with a book of rules and regulations, together with a printed notice, of which the following is a copy :

PRESERVE THIS CIRCULAR.

MEDICAL SUPERINTENDENT'S OFFICE.

N. Y. STATE ASYLUM FOR INSANE CRIMINALS.

18

To.....

Your services will be paid at the rate of \$18 monthly, for..... months, with the understanding that you are on trial. If it is found that you are adapted to the service for which you are employed, and if you are otherwise satisfactory, you will be paid at the rate of \$20 per month. Future increase of wages and promotion will depend upon the degree of your faithfulness and ability.

Under the direction of the Chief Examiner of the Civil Service in this State, and in accordance with the rules of the Civil Service Commission, it is required that "every State institution shall keep proper comparative records of the efficiency, punctuality, attention and general good conduct of all persons employed therein."

As this will be a permanent State Record, it should be the object of every employee to preserve such a standard of morals, at least, as will make his or her record clean. The advantages that may be associated with a superior record are not limited to the service of this Asylum alone, but may be of inestimable value during a life-time, wherever the individual may be situated and whatever may be the station occupied.

The ability to refer with confidence to an unblemished record of service here, will often prove of more worth than mere self-satisfaction.

There is no desire on the part of the Asylum management to record misdeeds of employees except as a protection of the Asylum's interests, but, as it is now a legal requirement, it behooves all to govern themselves with the knowledge that their conduct is a matter of record.

[Signed]

Medical Superintendent.

The laundry equipment has been increased by the purchase of an additional rotary washing machine; the boiler-house has been supplied with a Cameron steam pump, for the purpose of feeding the boilers with the hot water produced by the condensation of steam, and which heretofore has largely gone to waste; two lathes for turning iron and wood, respectively, have been purchased and set up in the steam-fitting shop; the roofs and chimneys of the main buildings have been repaired and partly repainted; the horse-barn and greenhouse have been repainted; the chapel and amusement hall has been greatly improved by enlarging the stage, wainscoting and coloring the walls, and illuminating the latter with scriptural texts, the coloring and illuminating having been done by a patient, who also painted three sets of scenery for the stage, thereby adding much to the effect of our theatrical entertainments; the wood-work and walls of all the rooms of wards one and three have been repainted, kalsomined and stenciled, and the ceilings of the rooms and corridors of said wards repaired and kalsomined, in neutral tints, the entire work having been done by two of our patients; stationary reading desks have been placed in all but two of the wards, and are regularly supplied with daily and weekly newspapers; a dumb waiter has been placed in the women's dining room, thereby making the service from the kitchen independent of the large or men's dining-room; three new rooms for employees, rendered necessary by our increasing numbers, have been constructed in the basement beneath the south transept of the first ward; a plank walk, eight feet wide, has been laid around the four sides of the men's airing-court, for the purpose of enabling patients to take out door exercise at all seasons of the year, when the weather is not stormy; a new green-house 23x14 feet, for the propagation of early vegetables and plants, has been erected in the south garden, on the former site of the flower green-house, which was taken down some years ago. The foregoing comprise the more important repairs and improvements made during the year, all of which, together with innumerable repairs of a minor character, were largely done by our patients and employees.

The usual statistical and financial tables, compiled by the assistant physicians and the steward, respectively, are hereto appended.

The following abstract from the steward's accounts shows the receipts and expenditures for the year:

RECEIVED FOR MAINTENANCE AND SPECIAL REPAIRS.

Balance on hand, October 1, 1887	-	-	-	-	\$ 1,291 21
Received from Comptroller on monthly estimates	-	-	-	-	25,326 50
Received for board and clothing of patients	-	-	-	-	13,943 53
Received proceeds of sundry sales	-	-	-	-	173 23
					<hr/>
					\$40,734 47

EXPENDED FOR MAINTENANCE AND SPECIAL REPAIRS.

Wages of subordinate employees	-	-	-	-	\$12,722 07
Commissary supplies	-	-	-	-	15,423 34
Printing and stationery	-	-	-	-	381 17
Furniture	-	-	-	-	978 23

Discharged patients	-	-	-	-	269 51
Miscellaneous purposes	-	-	-	-	1,529 02
					<hr/>
Total expended for maintenance	-	-	-	-	\$39,304 26
Construction and special repairs	-	-	-	-	1,183 44
Balance on hand, October 1, 1888	-	-	-	-	246 77
					<hr/>
					\$40,734 47

OFFICERS' SALARIES.

Received from Comptroller for officers' salaries	-	-	-	-	\$7,215 13
Expended for officers' salaries	-	-	-	-	7,215 13

RECAPITULATION.

Received for maintenance and special repairs	-	-	-	-	\$40,734 47
Rec'd for officers' salaries	-	-	-	-	7,215 13
					<hr/>
Total receipts	-	-	-	-	\$47,949 60
					<hr/>
Expended for maintenance	-	-	-	-	\$39,304 26
Expended for construction and special repairs	-	-	-	-	1,183 44
Expended for officers' salaries	-	-	-	-	7,215 13
					<hr/>
Total expenditures	-	-	-	-	\$47,702 83
Balance on hand, October 1, 1888	-	-	-	-	246 77
					<hr/>
					\$47,949 60

The per capita cost of maintenance for the year, inclusive of patients' clothing, and the transportation of discharged patients, items not usually included in determining the cost of support in asylums, is \$187.86, or \$3.61 per week; an increase of \$18.50 and \$0.36, respectively, in the yearly and weekly cost, over that of the preceding year.

In connection with the subject of cost of maintenance reference may properly be made to the fact that prices of nearly all staple commissary supplies, especially of sugars, flour, beef, butter, eggs and potatoes, have averaged much higher during the past year; also that the number of our employees has been increased; and that, unlike the other State Asylums, this institution still lacks the pecuniary advantages of a large farm and a large population. As it is, however, the per capita cost here will compare favorably with that of the other asylums of the State, excepting those for the chronic insane, in which the number of inmates is very great.

In addition to the visits made by yourself, the Asylum has been officially inspected three times during the year by the State Commissioner in Lunacy, twice by Dr. Stephen Smith, and once by his successor in office, Dr. S. W. Smith. The former, in his last annual report to the Legislature refers to the condition and management of the institution in the following terms:

“ This Asylum was thoroughly examined several times during the year and with the most satisfactory results. In every hall good order always prevailed, the patients were clean and suitably clothed, the dormitories were orderly and the beds were made and supplied with proper clothing. The food was always ample and of good quality. Patients have rarely complained of their treatment, and when complaints have been made, investigation has proved that they were usually trivial. Notwithstanding the almost constant occupation of the Medical Superintendent with the details of building the new Asylum, the thoroughness of management has been maintained.

“ The feature of the Asylum which detracts most from its high order of management, is the overcrowded state of all of its wards and dormitories. This defect can not be overcome until the new Asylum is completed.”

We would again take occasion to extend thanks to our worthy chaplain, the Rev. William Searls, also to the Rev. Dr. Brainard and the Rev. Fathers Seymour, Mulheron and Ruby, for timely attention to the spiritual needs of our inmates. Such ministrations, when judiciously bestowed, are, we believe, a source of comfort and consolation to the recipients; and, in some instances, are like “oil upon the troubled waters,” in their soothing, beneficial effect on “a mind diseased.”

Miss Belle White has discharged the duties of organist in a satisfactory manner, and also shown commendable interest in providing entertainments for the patients, in which work she has been ably assisted by Miss Jessie Wheeler. The weekly entertainments, referred to elsewhere in this report, which are given in the amusement hall during the winter months, are highly appreciated by the patients, many of whom are much benefited thereby. The contributors to these enjoyable occasions have placed our household under lasting obligations for the favors they have so generously bestowed. The memorandum of entertainments, kept by Dr. Semple, is as follows:

A vocal and instrumental concert, under the direction of Miss Ada Meyers; a concert, by Miss Belle White and friends; a theatrical entertainment, by the Knights of the Sacred Heart Society of St. John's Church; a literary and musical entertainment, by the Misses Harter, Galvin and C. A. Kusters, Mr. Wheeler, Master W. Stout and the Theological Seminary Quartette; an evening of fancy dancing, *en costume*, by Madame Marie Luce and pupils; an entertainment consisting of tableaux, and vocal and instrumental music, by the K. A. Society of the Auburn High School, under the direction of Miss Jessie Wheeler, assisted by Miss Charlotte Robinson and Miss White; a theatrical entertainment, consisting of two farces, with songs between the acts, by the patients themselves, assisted by some of the attendants; an athletic exhibition, by members of the Y. M. C. A. Gymnasium, under the direction of Prof. Willets; a farce entitled "The Virginia Mummy," by the Young Knights of the Sacred Heart Society; a concert, under direction of Miss White, by the Seymour Orchestra, assisted by Mrs. C. C. Button, Mrs. Frank Adams and Mr. Charles Wheeler; a vocal concert, given as a matinee, by the Centennial Jubilee Singers of Harper's Ferry; a farce, "Little Brown Jug," by the Young Knights of St. Bernard Society; a drama, "The Greatest Plague of Life," by the young ladies of the Auburn High School, under the direction of Miss Wheeler, with vocal and instrumental music by Miss Winters and Mr. Derby; a concert, under direction of Miss White, by the Colored Jubilee Singers of Auburn; a musical farce, "The Peak Sisters," by ladies of the Guild of St. Peter's Church, under the direction of Miss Helen Bartlett, Miss Jessie Cuykendall and Miss Emma Flagler; an evening of fancy dancing, *en costume*, by Madame Marie Luce, Mr. E. H. Gohl, Miss Agnes Walker and Mr. Walker, with music by

Bennett's Orchestra; a musical entertainment by pupils of the Auburn High School; an operetta entitled, "A Dress Rehearsal," by twelve High School undergraduates, directed by Miss White; a vocal and instrumental concert by the McGirr family; a concert under the direction of Miss Bertha Woodcock, Miss Gertrude Burlingame and Mrs. Frink.

The following acceptable donations have been received during the year: The North American Review for 1888, from Mr. Harry E. Cole; several parcels of German newspapers, from Mr. M. Stupp; a box of confectionery for each of the patients at Christmas, from the Women's Christian Temperance Union; several packs of playing cards, from the Auburn City Club; a parcel of papers and periodicals, from Mrs. D. M. Osborne, and two large parcels of newspapers and magazines, from the office of the State Charities Aid Association, New York City.

To the resident officers and the subordinate employees I would acknowledge my obligation for the aid they have rendered me in their respective capacities, in carrying on the work of the Asylum; and especially to Dr. Sefton, First Assistant Physician, upon whom have devolved the cares and responsibilities of acting medical superintendent, whenever I have been called away by matters relating to the new Asylum, also during my recent severe and somewhat prolonged illness and subsequent absence to regain my health.

Profoundly grateful to you, sir, for the unvarying confidence, co-operation and helpful support which you have extended to me, officially and personally; this my twelfth annual report is respectfully submitted.

CARLOS F. MAC DONALD,
Medical Superintendent.
