

Underwood's

U. S. TREASURY COUNTERFEIT DETECTOR.

EDITED BY

B. G. UNDERWOOD, late Receiving Teller,
National Bank Redemption Agency,

U. S. TREASURY.

MARCH, 1882.

Issued Monthly at \$3 per annum, in advance, including postage
to any part of the world.

A. S. PRATT & SON,

NATIONAL BANK AGENTS AT U. S. TREASURY,
PUBLISHERS,
401 Ninth Street. P. O. Box 52.
WASHINGTON, D. C.

Entered at Post Office at Washington, D. C., as Second-Class Matter.

IMPORTANT.—When you visit or leave New York City for business or pleasure, save Baggage Expressage and Carriage Hire, and stop at Grand Union Hotel, opposite Grand Central Depot. 450 elegant rooms, and fitted up at a cost of one million dollars. Rooms reduced to \$1 and upwards per day, on European plan. Elevator. Restaurant supplied with the best. Horse Cars, Stages, and Elevated Railroad to all Depots. Families can live better for less money at the Grand Union Hotel than at any other first-class Hotel in the city.

THIS DETECTOR is issued from the 1st to the 5th of each month, as early as certain Treasury reports can be obtained. All changes are made monthly in the body of the work. With each number is furnished a card, containing the names of all counterfeit and stolen bank-notes, and a new and very valuable classification of counterfeit United States notes, especially adapted for counter use. This feature gives this work the advantage of both single sheet and pamphlet form.

The plan of this DETECTOR in giving the names of Register and Treasurer on all counterfeit notes is of great value, as many of these banks have notes in circulation bearing the names of two or more Registers and Treasurers; and, as the counterfeits are all printed from the same plate, by using this list any one, without being a judge of money, can instantly decide as to the genuineness of a large number of notes on which counterfeits are in circulation. We give a copy of the counterfeit note. The date is not given unless it differs from the genuine. This simple plan furnishes an infallible test in a large number of cases.

The list of genuine numbers on all bank-notes that have been counterfeited, and which is given only in this work, is of the utmost importance to all who handle National Bank notes. It not only in most cases enables any one to detect a counterfeit instantly, but by its use to verify the genuineness of a note. This information is worth many times the price of this work, and will not be found in any other publication.

 In all cases where the single line explanation or the list of numbers will not enable any one to detect a counterfeit bank-note, a full explanation is given.

 In case a new counterfeit appears, we immediately send postal-card notices to all our subscribers, giving full description of the counterfeit, thus affording complete protection.

In addition to descriptions of all counterfeit U. S. and National Bank notes, we give Canadian Bank-note quotations, Values of Foreign Gold and Silver Coins, List of stolen Registered U. S. Bonds, Weight and Legal-Tender Quality of all U. S. Coins; besides various tables, Current Treasury Rulings and Information, and items of great value, from month to month. All Tables are corrected monthly to date of issue.

UNDERWOOD'S COUNTERFEIT DETECTOR.

VOL. V.]

MARCH, 1882.

[No. 3.

Entered according to Act of Congress in the year 1882, by B. G. UNDERWOOD, with the Librarian of Congress at Washington, D. C.

NEW SUBSCRIBERS, or those renewing Subscriptions with an agent, will please take from the agent one of our subscription postal cards, sign it, and send it to us by first mail.

IN remitting always state whether remittance is for a new subscription, or for renewal. If address is to be changed, please give both old and new address. Inquiries and complaints to be addressed to the publishers.

EDITORIAL.

We give this month fac-simile engravings of the counterfeit \$5 on Merchants' National Bank of New Bedford, Mass., showing how our number system will enable any one to detect this counterfeit. We also give fac-similes of this counterfeit, printed with the title left out, and reproduce the title plates of First National Bank of Northampton, and Hampden National Bank of Westfield, both of which counterfeits were printed from the Merchants' New Bedford plate.

A uniform note, with the exception of title and coat-of-arms of the State, as shown on the back of the note, as is the present national-bank note, has one advantage, namely, that a person has only to familiarize himself thoroughly with one genuine note to know the chief characteristics of all.

But in case a counterfeit is issued, this similarity of all the notes makes the substitution of one title for another a very easy matter for the counterfeiter. This fact was shown very clearly in the case of the counterfeit five on the Traders' National Bank of Chicago, Ill. From this plate alone twelve different counterfeits were printed without changing the back of the note at all. In the case we illustrate this month, two changes were made, and all three of the notes had a very large circulation, and more banks in Massachusetts would have been counterfeited if the plates had not been captured.

Now that Congress, in the bill to extend the charters of the national banks, proposes a new issue of national-bank currency, the design of Mr. George W. Casilear, superintendent of engraving in the Bureau of Engraving and Printing of the United States Treasury, which we illustrated in our April, 1881, issue, deserves careful, and we hope will have favorable, consideration.

The adoption of this design would prevent the counterfeiters from changing a plate, as they have done, from one bank to another by a mere substitution of a different title, and would oblige them to engrave nearly an entirely new plate for each note counterfeited.

Had some system of the kind proposed by Mr. Casilear been adopted when national-bank notes were first issued there would not have been one-fifth as many different banks counterfeited.

On other pages we reproduce Mr. Casilear's design, showing the face and back of the proposed new note, and reprint from our April number a full description of the proposed note.

We congratulate Treasurer Gilfillian, as well as the business community, on the change in the regulations regarding discount on mutilated United States currency, which was made public on the 6th inst.

We note also that this common-sense regulation has been applied to silver certificates. We could never understand how or by what authority the Treasurer discounted a certificate of deposit; but this, like some other departmental regulations, is too deep to be easily understood.

This is the change we have been advocating for the past three years, and we are glad we have at length induced the Treasurer to coincide with us.

We publish the regulations in full on another page, and in this connection would call particular attention to the correspondence regarding the case of the Pella National Bank of Iowa, which we print in this number.

We think the ground taken by the Treasurer, that no claim can be entertained for refunding the amounts unjustly exacted for a number of years, is untenable, and

we are satisfied that Secretary Folger will decide that parties outside of the Department have some rights.

The recent circular of Mr. Burchard, Director of the United States Mints, regarding the purchase of mutilated silver coins, shows the same desire to take advantage of the unfortunate holder of mutilated silver coin, as was shown the holder of mutilated United States notes. As the Treasurer of the United States will redeem all subsidiary silver coins that are not mutilated at par, it is not probable that a large amount will be sent to the United States mints, as under the terms of Director Burchard's circular of February 2, he allows only 80 cents on the dollar of their face value. As shown in his circular, this would make \$1 on mutilated silver worth from 70 to 76 cents.

We cannot understand why officers of the United States Treasury should rule against the interests of the business community in regard to the redemption of coin and currency. There has certainly been enough credited the silver profit-fund since 1873 to more than pay the entire expense of coining and recoining all the silver issued without this deduction. Our proposition to exchange an equal weight in mutilated silver for new coin, is so much fairer to all parties concerned, and meets with such general approval, that we should think it would be adopted.

We would also call attention to the bill reported favorably by the Committee on Coinage, Weights and Measures of the House of Representatives on the 1st instant, providing that trade dollars shall be exchanged at the Treasury, or any of the sub-Treasuries, for standard dollars at par, and that all the trade dollars received shall be recoinced into standard dollars.

We shall be glad to see the trade dollar disappear. It has seemed to us singular, to say the least, that Congress, after authorizing the coinage of this dollar, and making it a legal-tender to the amount of \$5, could destroy its legal-tender quality without making provision for its exchange or redemption.

We have no doubt the bill as reported by the committee will become a law, and we urge our friends to appeal to the same committee for just and equitable provisions for the redemption of mutilated silver and minor coin.

We shall in our next number begin the publication of a series of articles on counterfeit United States coin. In order that this series of articles may be made as complete as possible, we would ask any of our friends who may have counterfeit gold-pieces in their possession to forward them to us for examination, by express at our expense. They will be returned in the same condition as received. Please address all packages to B. G. Underwood, 261 Broadway, New York City.

Appeal Direct to Congress.

The regulations of the Department regarding discounts on United States currency and the redemption of mutilated silver and minor coin have been so unjust to the public that it is unwise to leave these matters a subject of departmental regulations. They should be explicitly provided for by law, and not left to be changed at will by the Treasury officials.

The recent order of the Director of the Mint, regarding the redemption of mutilated silver coin, is exceedingly unfair to the holder, as the Government has already made the very large percentage of profit there is between the actual and nominal value of a dollar in silver. This profit amounting in the last fiscal year, after paying all the expenses of coinage, to \$2,000,000.

In view of this latter fact the plan we have advocated for the past year, that mutilated silver coin should be exchanged for an equal weight of new coin by the Treasury and the sub-treasuries, is perfectly fair and meets with general approval.

Congress should be urged to provide for the redemption of national-bank notes that were stolen from the office of the Comptroller of the Currency in 1867 and 1868, and as an appropriation was made in 1878 for this purpose, (which was at the time deemed sufficient) there ought not to be any difficulty at the present session to obtain an appropriation sufficient to redeem the few notes outstanding.

We have prepared a petition to Congress embracing these questions, and will supply such of our friends as are interested in this matter with printed blanks. We would be pleased to have them obtain the signatures of such bankers and business men as favor these propositions, and forward the same to their representative in Congress.

We think a united effort on the part of those interested would make these provisions of law and not regulations of the Department, subject to change at will.

Discount on United States Currency.

We present herewith correspondence with the Treasury officials regarding a modification of the present regulations relating to the redemption of United States currency.

We do not know that we can add anything to letter of December 14, 1881 to the Secretary of the Treasury. Briefly stated, the rule is a Departmental regulation, not a law.

The Treasurer officially states with regard to the present rule that "it is unjust to the public and expensive to the Treasury."

Under section 3581 R. S., the Secretary of the Treasury has authority to make regulations for the redemption of U. S. notes.

In his letter we observe that the Treasurer says "if the regulations are modified in accordance with the recommendations of the writers of the letters mentioned no relief will be extended to the holder, for the reason that it would not be practicable for the Department to make such modification retroactive."

We do not see why, if the regulations are changed and if their deductions have been "*unjustly*" exacted for years, the amounts deducted should not be refunded, even if this course should cause the Treasury officials a little extra work. The system of discount was not inaugurated by the business community, but by the Department. For over seven years national-bank notes have been redeemed under the regulations that are desired for U. S. notes to the satisfaction of the holder and without loss to the Treasury.

As the Treasurer can easily ascertain the amount deducted on account of discount in each case, as shown in the return made to the Pella National bank of Pella, Iowa, there can be no question as to right of the parties to have the amount of discount refunded; and as to the amount in each case, there certainly cannot be any question, for all the amount asked for is the exact amount deducted by the Treasurer.

The Treasurer says in his last report: "The rule subjecting mutilated United States currency on its redemption to a discount proportioned to the part lacking is based on a false analogy to coined money." In other words, the rule is all wrong. We should think the Treasurer would desire to do all he could to right this wrong.

The rule has been even more unfair than the Treasurer states. If a person held one-half of a note, or over, the proportional value would be paid, but if less than one-half it was considered worthless.

The existence of this rule has caused more annoyance and disputes between the Treasury and the holders of the notes than any other departmental regulation, and it is exceedingly strange that it has not long since been modified.

THE PELLA NATIONAL BANK, PELLA, IOWA, *Dec. 7, 1881.*

Messrs. A. S. PRATT & SON, *Washington, D. C.:*

GENTLEMEN, SIRs: I am to-day in receipt of the enclosed report on a remittance, together with fragment, for which I am charged \$6, which amount I can never make out of it, out here. If the piece had not been with the bill it would probably have been fair to have charged that amount for it, although it seems to me, even then, it would have been rather exorbitant, but it is taken off, and returned to me, when I sent it on purpose to have it redeemed.

Take the other view of the case, that maybe it belonged to some other twenty dollar bill, which it did not, so far as I know, then the bill that it did belong to was docked, or will be docked when it comes in, \$6; and thus the Government speculates off the perishable nature of its currency, which appears to me contrary to the genius of our Government.

I take the trouble to throw aside, and assort all unserviceable Treasury notes, because the Government offers to pay charges both ways, thereby showing conclusively that it desires to encourage the sending in of torn and defaced currency, but this experience has placed a sad damper on my efforts to improve the quality of the circulating medium of this community.

In view of the premises, I take the liberty to enclose these papers to you, with the request that you, being better acquainted with the gentlemanly Treasury officials than I, try to get \$6 for the enclosed fragment for me.

I will take it in nickels; there is a good margin in them to the Government.

The Department ought not to be so very particular, in view of the fact that there is still outstanding \$15,000,000 fractional currency, which the President in his message considers clear gain.

Very respectfully yours,

H. L. BOUSQUET, *Assistant Cashier.*

WASHINGTON, D. C., Dec. 14, 1881.

SIR: We enclose herewith for your information a letter from the Pella National Bank, of Pella, Iowa, together with a circular letter from the Treasurer of U. S. and a fragment of a \$20 U. S. note.

The facts in the case are as follows: the Bank sent to the Treasurer U. S. for redemption \$1,000 in mutilated U. S. notes; among the notes was a \$20 pieced note, made up of two different \$20 notes, one piece being seven-tenths and the other three-tenths of a note. Under the regulations now in force for the redemption of United States notes, the Treasurer U. S. would only allow \$14, or seven-tenths of face, for the larger piece, and declined to redeem the other piece, by reason of its being less than half a note.

The note referred to has been redeemed for \$14 and when the note to which the rejected fragment belongs is redeemed at same figure, the Government will have made \$12 on these two notes, and the innocent holders incurred a loss of that sum. This appears to us particularly unjust.

We desire to call your attention to the following:

I. The rule now in force for the redemption of U. S. notes is a Department regulation, not a law.

II. The Treasurer of U. S., in his annual report just submitted, says the present rule is unjust to the public, and he strongly recommends that fragments equal to three-fifths of whole notes be redeemed in full, and half notes redeemed at half the face value, which is the rule governing the redemption of National Bank-notes, under which over \$1,000,000,000 has been redeemed to the satisfaction of the public.

III. Under section 3581 Revised Statutes, authority is conferred upon the Secretary of the Treasury to make regulations for the redemption of U. S. notes.

We respectfully ask that the rule be changed in accordance with the recommendation of the Treasurer and the within-mentioned fragment, being over three-fifths of a note, redeemed at its face value.

Very respectfully,

A. S. PRATT & SON.

Hon. CHAS. J. FOLGER,
Secretary of Treasury.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
WASHINGTON, D. C., December 29th, 1881.

Messrs. A. S. PRATT & SON,
401 9th Street N. W., Washington, D. C.:

GENTLEMEN: In reply to your letter of the 14th instant, relative to the redemption of a fragment of a mutilated note, I enclose herewith copy of report in the matter, dated 28th instant, from the Treasurer of the United States, to whom your letter had been referred.

The enclosures to your letter are herewith returned.

Very respectfully,

J. K. UPTON,
Assistant Secretary.

TREASURY OF THE UNITED STATES,
WASHINGTON, December 28th, 1881.

SIR: I have the honor to return herewith, in accordance with your request, Form No. 24 of this office, with fragment of a 20-dollar note rejected as not being redeemable under the rules; letter of the Pella National Bank, Pella, Iowa, and letter of the 14th instant from A. S. Pratt & Son requesting that the regulations of the Department in regard to the redemption of United States notes be so modified as to permit the redemption of the fragment to which the enclosed fragment was attached when presented for redemption.

In reply I beg to say that the fragment was properly redeemed in accordance with existing regulations, and that if the regulations are modified in accordance with the recommendation of the writers of the letters mentioned, no relief will be extended to the holder for the reason that it would not be practicable for the Department to make such modification retroactive.

At the proper time the subject of reconsidering the present regulations will be brought to the attention of the Secretary.

Very respectfully,

JAS. GILFILLAN,
Treasurer U. S.

Hon. CHAS. J. FOLGER,
Secretary of the Treasury, Treasury Department.

Exchanging the Trade Dollar.

March 1, 1882.—Mr. McClure, from the Committee on Coinage, Weights, and Measures, submitted the following report:

The Committee on Coinage, Weights, and Measures, to whom was referred the bill (H. R. 1202) to provide for the exchange of trade dollars for legal-tender dollars, and to stop the coinage of trade dollars, and for other purposes, have had under consideration, and report the same back to the House with the accompanying substitute, with the recommendation that it do pass:

That the Secretary of the Treasury shall cause to be exchanged, at the Treasury and at all subtreasuries of the United States, silver dollars for trade-dollars at par; and shall recoin the trade dollars now in the Treasury, or that may be hereafter received at the Treasury, into legal-tender silver dollars, as now provided by law, and shall stop the further coinage of trade dollars: *Provided*, That the trade dollars recoined under this act shall not be counted as a part of the silver bullion required to be purchased monthly for coinage into standard silver dollars by the act of February twenty-eighth, eighteen hundred and seventy-eight.

(From the U. S. Treasurer's Circular of March 6th.)

Redemption of United States Notes, Silver Certificates, and Fractional Currency.

United States notes, each equalling or exceeding three-fifths of its original proportions, in one piece, are redeemable at their full face value in other United States notes by the Treasurer and the several Assistant Treasurers of the United States, and are redeemable in coin, in sums not less than \$50, by the Assistant Treasurer in New York.

Fractional notes, each equalling or exceeding three-fifths of its original proportions, in one piece, are redeemable at their full face value in United States notes, in sums not less than \$3, by the Treasurer and the several Assistant Treasurers of the United States.

Silver certificates, each equalling or exceeding three-fifths of its original proportions, in one piece, are redeemable at their full face value in standard silver dollars by the Treasurer and the several Assistant Treasurers of the United States.

United States notes and fractional notes, of which less than three-fifths of each note remains, are redeemable only by the Treasurer of the United States.

Silver certificates, of each of which less than three-fifths remains, are redeemable only in standard silver dollars, and only by the Treasurer of the United States.

Fragments of United States notes, silver certificates, and fractional notes, each constituting clearly one-half, but less than three-fifths, are redeemable at one-half the full face value of whole notes or certificates.

Fragments less than half are redeemed only when accompanied by an affidavit executed in accordance with the requirements of the following paragraph.

Notes and certificates, of which less than three-fifths of each note or certificate remains, accompanied by an affidavit from the owner or from such other persons as have knowledge of the facts, that the missing portions have been totally destroyed, are, if the proof furnished is satisfactory, redeemed at their full face value. The affidavit must state the cause and manner of the mutilation, and must be sworn and subscribed before an officer qualified to administer oaths, who must affix his official seal thereto, and the character of the affiants must be certified to be good by such officer or some other having an official seal. The Treasurer will exercise such a discretion under this regulation as may seem to him needful to protect the United States from fraud.

Fragments not redeemable are rejected and returned; counterfeit notes are branded and returned.

Mutilated Silver Coins.

By circular of February 2 of Director of the Mint, persons sending full-weight United States subsidiary silver coins to the United States mints would receive eighty cents per dollar of their face value, but, for mutilated coins, a less amount, proportioned to their deficiency in legal weight.

At the rates paid mutilated silver coins will be worth at the Mints—

Per ounce, Troy.....	\$1 00
“ “ avoirdupois.....	(about) 91
“ dollar face value, (approximately).....	70 to 76

COUNTERFEIT FIVE—MERCHANT'S NATIONAL BANK, NEW BEDFORD, MASS.

This note is numbered in upper right corner 108,729. By glancing at list of numbers in genuine fives issued to this bank, as shown on page 146 of this issue, it will be seen that no notes with numbers from 46,108 to 266,378 were issued to this bank, and therefore the note is a counterfeit.

SKELETON PLATE—COUNTERFEIT \$5.

This skeleton plate was made by erasing the title "Merchants, New Bedford, Massachusetts," also the place and date "New Bedford, Feb. 14, 1865," and thousands of notes were printed as shown on this plate. By printing in the skeleton title plates shown on next page the counterfeit was complete.

COUNTERFEIT TITLE PLATES—\$5 NOTES.

Title Plate—Counterfeit \$5.

Title Plate—Counterfeit \$5.

Counterfeit Title Plates.

Counterfeiting reached its highest development when the fives on First National Bank of Northampton, and Hampden National Bank, of Westfield, Mass., were issued. The counterfeit five on Traders' National Bank of Chicago, Ill., the plate of which was changed to a dozen Illinois banks, the title of the different counterfeits was re-engraved on the plates, it being "hammered up" in each instance. This will explain the superior appearance of the Northampton and Westfield counterfeits over those on the Paxton and Peru, Ill., banks. A title plate, as shown above, could be engraved by one man in 48 hours, and so it is surprising that there were not more banks counterfeited before the Secret Service captured the plates.

The need for some system, such as Mr. Casilear has devised, is apparant and we hope some similar design, if not his, may be adopted. We illustrate his system on the following pages.

There is entirely too much engraving on the present bank-note. The figures are so small and the impressions often blurred that many of the genuine notes have a bad appearance. We trust, however, that one feature that is on the present bank-note will be retained and that is the State seal on the back of the note. When a note is badly mutilated this has been found of great assistance in determining the bank of issue and is, as has been shown by the counterfeits issued, a check to a considerable degree, against counterfeiting the issues of banks situated in different States.

We trust if a new design is adopted that it may be entirely different from the one now used. The folly of a slight change has been demonstrated in the last different issues of United States notes, a critical examination being necessary to determine the particular issue.

Mr. Casilear's New Design for National-Bank Notes.

In a former number of the DETECTOR we called attention to a new design for national-bank notes invented by Mr. Geo. W. Casilear, Superintendent of Engraving in the U. S. Bureau of Engraving and Printing, by the adoption of which counterfeiting would be made much more difficult and expensive, and therefore correspondingly lessened.

On next page we present the face and back of a national-bank note as outline illustrations of this new and improved device for the better prevention of counterfeiting such notes.

The notes of the national banks have afforded unusual inducements for counterfeiting, as each particular denomination of all the banks is the same in design with the exception of the title, and one counterfeit series of plates on any denomination can be used for any of the national banks of that denomination in the United States (numbering some twenty-five hundred) by the counterfeiters simply changing the title of the bank.

In attempting to make a fac-simile of the original work the counterfeiter engraves three plates, the face, back, and tint, and only omits the title of the bank on the face-plate. To accomplish this, with all his skill and ingenuity, requires from eighteen to twenty-four months, as the vignettes, lettering, and other engraving and geometrical lathe-work all necessarily have to be executed by hand.

He now having imitations of the original plates, it is only a matter of a few hours to multiply his plates by the electro-battery, and at his convenience he engraves the titles of the banks he wishes to counterfeit on the face electrotype plates, and so *ad infinitum* he can go through the whole list of banks of one denomination with the actual labor of engraving only one set of plates.

It is owing to this fact that the counterfeiting of the national currency has proved such a harvest to the counterfeiters.

No sooner is the bogus issue detected than the counterfeiter is warned, and, with increased confidence in his ability to deceive the public, while they are taken off their guard by the discovery of a new counterfeit, and not suspecting the immediate issuing of another, he simply changes the issue by substituting the name of another bank.

To meet and prevent these frauds made upon the currency, Mr. Casilear has invented a system that will effectually prevent the changing of counterfeit plates from one bank to another, and make it necessary for the counterfeiters to engrave in every instance a new series of plates for each counterfeit imposed upon the public. The invention consists in prominently placing in two places upon the face and one upon the back of the bill the charter number of the bank, making it a distinctive feature, having the figures elaborately engraved in the highest style of the art, to prevent successful imitation, inlaid upon a ground-work of elegant patterns of complicated lathe-work.

The charter numbers, whether composed of one figure or more, will occupy the same amount of space on each note—that is, the charter number **1** will appear as prominently and take up as much room as the number **1000** or more.

The legend of each note Mr. Casilear also proposes to have engraved in various styles of lettering, so that no two notes of the same denomination on different banks would be alike.

By certain new improved processes he has introduced into the profession of bank-note engraving the process of transferring beautiful and carefully-engraved alphabets or numerals, and, if preferable, on elegant designs of lathe-work or other ornamental devices. By the adoption of his method the public would be greatly protected against the unlawful acts of the counterfeiters, while the cost of engraving would not be increased over the price now paid for the uniform system of the national currency plates.

The cuts we print are merely to give an idea of the design, and suggest its advantages over the present system, and invite the attention of bankers thereto. Mr. Casilear's device includes elaborate engraving upon a ground of complicated lathe-work, with ornamentation in the highest style of the art, and of course cannot be shown in the pen tracings from which our cuts are made.

MR. CASILEAR'S DESIGN FOR NATIONAL BANK NOTES.

COUNTERFEIT NATIONAL BANK NOTES.

The following List embraces all the counterfeits that have been presented at the National Bank Redemption Agency from its organization to the present time, and it is believed all that are in actual circulation. The Treasury Department will not issue any more notes of the denominations and issues named below bearing the signature of the Register and Treasurer given in this Counterfeit List, except those of which photographic counterfeits have appeared. All such notes, whatever may be their condition, received by the Treasurer of the United States, will be destroyed.

All counterfeits in circulation bear the names of the Register and Treasurer given in this List. Where the plate has not yet been captured the names may be changed by the counterfeiters, such Banks being designated by a star. The check-letter (A) (B) (C) or (D) printed in bold-face capitals in the List, will be found in the upper and lower corners, diagonally opposite, on all National Bank Notes. *Any note of which counterfeits are in circulation may be taken as good if the signatures of the Register and Treasurer differ from those given in this List, and all notes may be taken where the signatures are the same, provided the check-letter is different.* In nearly every case, where a doubtful bank-note is presented, a certain test may be had by comparison with the list of genuine numbers given on following pages.

In all cases where the single line explanation or the list of numbers will not enable any one to detect a counterfeit, a complete description is given.

Recent photographic counterfeits make a general description of this class necessary. We think the following will enable any one to detect them:

As a genuine note is photographed, all is copied upon the plate, and when the counterfeit is printed, all the numbers on the note, as well as the seal, appear in black. It is then necessary to color them with a brush, and it is impossible to give them the same tint as found on the genuine. An examination of the seal on a counterfeit will show that the lines have all been black, and that the red color covers the whole surface of the seal. On genuine notes the white paper can be distinctly seen between the red lines. The words "Series 1875," which are printed across the notes to the right of the charter number, are so small that it is impossible to color them nicely, and they will be found to be badly blurred. On the genuine the lettering is very clear.

On the backs of these counterfeits the green tint is very badly imitated. These counterfeits are printed in black, and then painted green. On some places on the back of the fives, particularly in the centre of the upper border, where the words "National Currency" occur, no attempt has been made to give the green tint. On the "one" the tinting is much better done, but on close examination will prove to have been put on after the border had been printed in black. On genuine National Bank Notes the backs are made by two impressions—the border in green and the centre in black.

ONES.

† BOSTON, MASS.

A

National Eagle Bank.

JOHN ALLISON, Register.

A. U. WYMAN, Treasurer.

This note is signed Wm. G. Brooks, Cashier, and R. S. Covell, President. Numbered as follows: Treasury No. 211,944. Bank No. 3,640. Has a blurred appearance, and is made by a photographic process. The numbers are much darker than on the genuine.

TWOS.

KINDERHOOK, N. Y.

A

National Union Bank.

S. B. COLBY, Register.

F. E. SPINNER, Treasurer.

Check letter A in lower left-hand corner touches border of note; in genuine it is 1-16 in. from border. Counterfeit is dated July 1, 1865. The same points of detection will answer for this note as the West Chester county N. B.

LINDERPARK, N. Y.

A

National Union Bank.

ALL FRAUDULENT.

No such Bank in existence.

NEWPORT, R. I.

A

National Bank of R. I.

S. B. COLBY, Register.

F. E. SPINNER, Treasurer.

T W O S—Continued.

NEW YORK, N. Y. A Ninth National Bank.
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

In the genuine note the title reads: "The Ninth National Bank of the City of New York."

In the counterfeit note the title reads: "The Ninth National Bank of City of New York," omitting "the."

NEW YORK, N. Y. A Marine National Bank.
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

In the genuine note the title reads: The Marine National Bank of the city of New York. "City of New York" in black panel.

In the counterfeit note the title reads: The Marine National Bank of New York, "New York" only being in the black panel.

NEW YORK, N. Y. A Market National Bank
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

In the genuine note over the letter "r" in the title of "Market" are two strong flourishes. In the counterfeit only one.

NEW YORK, N. Y. A St. Nicholas National Bank.
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

In the genuine note over the date July 1st, 1865, appears "New York, N. Y.," engraved in upper and lower case, italic style.

In the counterfeit the "New York" is engraved in script and the N. Y. only in italic.

PEEKSKILL, N. Y. A Westchester Co. Nat'l Bank.
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

Check letter A, lower left corner, touches border of note; genuine it is $\frac{1}{4}$ inch from border.

On genuine the capital "W" of the script line "Will pay to bearer" commences with a double-curved flourish, running on an angle with the body strokes of the "W." In the counterfeit the letter "W" commences with a flourish, forming an oval.

All the above-named Counterfeits can be instantly detected by referring to list of numbers on genuine notes on page 145.

F I V E S.

* AMSTERDAM, N. Y. B Manufacturers' National Bank.
JOHN ALLISON, Register. F. E. SPINNER, Treasurer.

General appearance fair, while the engraving is coarsely done; particularly noticeable is the faces and shading of large letters on face of note. Engraving of the line "with the U. S. TREASURER at WASHINGTON," just over the signature of Register and Treasurer, very poorly done. On the counterfeit, below the letters TREA in TREASURER, and just above the printed signature of Allison, is a flourish. This flourish does not appear on the genuine. The work on back of note is much inferior to that on the face.

The genuine note described above bears the signatures of Allison and Spinner. This bank has fives of the series of 1875 in circulation signed G. W. Scofield, Register, and Jas. Gilfillan, Treasurer, and bearing the check letters E, F, G, and H.

AURORA, ILL A First National Bank.
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

All notes bearing signature of S. B. Colby as Register are counterfeit. Genuine are signed L. E. Chittenden.

† BOSTON, MASS. C Boylston National Bank.
JOHN ALLISON, Register. JNO. C. NEW, Treasurer.

This note is signed J. T. Bailey, President, and D. S. Waterman, Cashier. Numbered as follows: Bank 13,156. Treasury E 43,076. The face of this counterfeit is probably the best of the photographic counterfeits issued. It has a blurred appearance, and the reddish brown color familiar in photographs. The numbering and scolloped seal is surface work, having been printed on after the completion of the photograph. The green tint on the back is evidently printed from a plate and very poorly done. This counterfeit is easily detected by this inferior work.

† BOSTON, MASS. C Globe National Bank.
JOHN ALLISON, Register. JNO. C. NEW, Treasurer.

This note is signed C. J. Sprague, Cashier, and W. B. Stevens, President. Numbered as follows: Bank No. 2,694. Treasury No. D 333,764. Has a blurred appearance, and is made by a photographic process. The numbers are much darker than on the genuine. Green tint on the back is put on carelessly, having a smeared appearance, and is entirely omitted in the space at the top of the back where the words "National Currency" occur.

* Counterfeit plate not yet captured.

† Photographic counterfeit.

FIVES — Continued.

- † BOSTON, MASS. **B** Pacific National Bank.
 JOHN ALLISON, Register. JAS. GILFILLAN, Treasurer.
 This note is a photographic counterfeit, and presents the same appearance as the Globe National Bank counterfeit, just above. Is numbered as follows: Bank No. 5,033. Treasury No. E 171,783.
-
- CANTON, ILL. **A** First National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 All notes bearing signature of S. B. Colby as Register are counterfeit. Genuine are signed L. E. Chittenden.
-
- CECIL, ILL. **A** First National Bank.
 ALL FRAUDULENT. No such Bank in existence.
-
- CHICAGO, ILL. **A** First National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 All notes bearing signature of S. B. Colby as Register are counterfeit. Genuine are signed L. E. Chittenden.
-
- CHICAGO, ILL. **A** Central National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 All notes bearing signature of S. B. Colby as Register are counterfeit. Genuine are signed L. E. Chittenden.
-
- CHICAGO, ILL. **A** German National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 All notes bearing signature of S. B. Colby as Register are counterfeit. Genuine are signed L. E. Chittenden.
-
- CHICAGO, ILL. **A** Merchants' National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 146.
-
- CHICAGO, ILL. **A** Traders' National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 146.
-
- CHICAGO, ILL. **A** Union National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 All notes having the date May 10, 1865, are counterfeit. The genuine are dated Jan. 14, 1865.
-
- † DEDHAM, MASS. **B** Dedham National Bank.
 JOHN ALLISON, Register. JNO. C. NEW, Treasurer.
 This note is signed L. H. Kingsbury, Cashier, and Ezra W. Taft, President. Numbered as follows: Bank No. 224. Treasury No. B 864,806. Has a blurred appearance and is made by a photographic process. The numbers are much darker than on the genuine. Words "Series 1875," across face of note in red, very badly blurred. Green tint on back carelessly put on, and entirely omitted in the space at the top of the note where the words "National Currency" occur.
-
- † FALL RIVER, MASS. **C** Pocasset National Bank.
 JOHN ALLISON, Register. A. U. WYMAN, Treasurer.
 This counterfeit plate was evidently photographed from a genuine note. The lines are very faint and blurred; numbers very dark. Has the appearance of a washed note. Series of 1875. Treasury No. B 974,157. Bank No. 762. But two of these counterfeits have ever been at the Treasury, and it is not believed that any are in circulation.
-
- GALENA, ILL. **A** First National Bank.
 ALL FRAUDULENT. No such Bank in existence.
-
- HANOVER, PA. **D** First National Bank.
 L. E. CHITTENDEN, Register. F. E. SPINNER, Treasurer.
 All notes having the words "Act approved June 3, 1864," in the lower border of the note are counterfeit. On the genuine, the date is Feb. 25, 1863.
-
- JACKSON, MICH. **D** Peoples' National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 146.
-
- JEWETT CITY, CONN. **B** Jewett City Nat'l Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 146.
-
- † LEICESTER, MASS. **B** Leicester National Bank.
 JOHN ALLISON, Register. JNO. C. NEW, Treasurer.
 A poor photographic note similar in all respects to the counterfeit five on First National Bank, St. Johnsbury, Vt.

FIVES—Continued.

- + MONTPELIER, VT.** **A** **Montpelier National Bank.**
JOHN ALLISON, Register. **JNO. C. NEW, Treasurer.**
 Photographic note. Series of 1875; Bank No. 1166; Treasury No. B137701; Charter No. 857.
- NEW BEDFORD, MASS.** **C** **Merchants' Nat'l Bank.**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 To instantly detect this counterfeit see list of numbers of genuine notes on page 146.
 In the genuine note directly at the left of the dress of the figure Pocahontas and over the bit of mountain will be seen a vessel. In the counterfeit the vessel is entirely omitted. This note is printed from skeleton plates. Consequently no reliance can be placed upon the position of the legend forming title of bank, &c.
- NORTHAMPTON, MASS.** **C** **First National Bank.**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 All notes bearing signature of S. B. Colby as Register are counterfeit. Genuine are signed L. E. Chittenden.
- PAWLING, N. Y.** **A** **The National Bank of**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 The plate from which this counterfeit was printed was evidently altered from the Tamaqua plate. Both errors on the back of the Tamaqua note, "ownig" for owing and "thousaud" for thousand, have been corrected in this plate. The signatures of the bank officers are printed instead of written, as on the genuine. The counterfeits already seen bear check-letter A.
 This counterfeit, although some of the errors in the Tamaqua plate have been corrected, will not deceive any one who has seen one of the Tamaqua counterfeits. The work on right end of face of note is much inferior to that on the genuine, and the notes are poorly printed.
- PAXTON, ILL.** **A** **First National Bank.**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 All notes bearing the signature of S. B. Colby as Register are counterfeit. Genuine are signed John Allison.
- PERU, ILL.** **A** **First National Bank.**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 All notes bearing signature of S. B. Colby as Register are counterfeit. Genuine are signed L. E. Chittenden.
- *ROME, N. Y.** **B** **Fort Stanwix National Bank.**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 This note is printed from the same plate as the Manufacturers' National Bank, Amsterdam. The signatures of the bank officers are written. The engraving is coarsely done; particularly noticeable in the faces and shading of large letters on face of note. Engraving of the line "with the U. S. TREASURER at WASHINGTON," just over the signatures of Register and Treasurer, very poorly done. The work on the back of the note is much inferior to that on the face. This bank has 5's of the series of 1875 in circulation, bearing the signatures of Allison and Gilfillan; but as this issue has not been counterfeited, all such notes may be taken as genuine.
- †SOUTHBRIDGE, MASS.** **B** **Southbridge National Bank.**
JOHN ALLISON, Register. **JOHN C. NEW, Treasurer.**
 This is a photographic counterfeit and numbered: Bank No. 409. Treasury No. 532,804. Charter No. 934, Series of 1875. The same description applies to this counterfeit as to that of the "\$5" on Globe National Bank of Boston, which see.
- †ST. JOHNSBURY, VT.** **C** **First National Bank.**
JOHN ALLISON, Register. **JNO. C. NEW, Treasurer.**
 This is a photographic counterfeit and numbered: Bank No. 325. Treasury No. B 120,360. Charter No. 489, Series of 1875. The seal is evidently printed on after the note has been photographed, as the white on the paper shows through very plainly. The back is poorly done, especially the green tint on border. See description of this class of notes on page 134.
- TAMAQUA, PA.** **B** **First National Bank.**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 All notes bearing another charter number than 1,219 are counterfeit. On the back of the counterfeit, to the right of the words "National Currency," the word "owing" is printed "ownig."
- TROY, N. Y.** **A** **National State Bank.**
JOHN ALLISON, Register. **JNO. C. NEW, Treasurer.**
 All notes on this bank having the name of Jno. C. New as Treasurer and the old pointed seal are counterfeit.
- VIRGINIA, ILL.** **A** **Farmers' National Bank.**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 All notes having the date May 10, 1865, are counterfeit. The genuine are dated Sept. 1, 1865.
- WESTFIELD, MASS.** **C & D** **Hampden National Bank**
S. B. COLBY, Register. **F. E. SPINNER, Treasurer.**
 To instantly detect this counterfeit see list of numbers of genuine notes on page 147.

PHILADELPHIA, PA. A Fourth National Bank.
 L. E. CHITTENDEN, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 149.

PORTLAND, CONN. A First National Bank.
 S. B. COLBY, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 149.

UTICA, N. Y. B City National Bank.
 ALL FRAUDULENT. No such Bank in existence.

UTICA, N. Y. B Oneida National Bank.
 L. E. CHITTENDEN, Register. F. E. SPINNER, Treasurer.
 All notes bearing signature of L. E. Chittenden as Register are counterfeit. Genuine are signed S. B. Colby.

 No genuine \$20 notes were issued to the above-named banks having another check-letter than A, so all having B as the check-letter are counterfeit.

FIFTIES.

BUFFALO, N. Y.

A

Third National Bank.

L. E. CHITTENDEN, Register.

F. E. SPINNER, Treasurer.

All notes bearing signature of L. E. Chittenden as Register are counterfeit. Genuine are signed S. B. Colby.

NEW YORK, N. Y.

A

Central National Bank.

L. E. CHITTENDEN, Register.

F. E. SPINNER, Treasurer.

All notes having **BOTH** the signature of L. E. Chittenden as Register, and the words "Printed at the Bureau of Engraving and Printing, U. S. Treasury Dep't," in the upper left-hand corner of the note, are counterfeit, as Mr. Chittenden had ceased to be Register long before the notes were printed in the Treasury.

NEW YORK, N. Y.

A C

Mechanics' National Bank.

S. B. COLBY, Register.

F. E. SPINNER, Treasurer.

No plate has been made for this note, but it was altered from a counterfeit note on Tradesmen's National Bank, and bears the charter number of that bank, 905, while all genuine notes on this bank are numbered 1125. It is not believed that more than one or two of these counterfeits are in existence.

NEW YORK, N. Y.

A

Metropolitan National Bank.

S. B. COLBY, Register.

F. E. SPINNER, Treasurer.

There was no plate made for this note, but it was altered from a counterfeit note on Tradesmen's National Bank, and bears the charter number of that bank, 905, while all genuine notes on this bank are numbered 1121. It is not believed that more than one or two of these counterfeits are in existence.

NEW YORK, N. Y.

A & C

National Bank of Commerce.

S. B. COLBY, Register.

F. E. SPINNER, Treasurer.

This counterfeit is altered from a counterfeit note on National Broadway Bank, New York, and bears the signatures of the officers of that bank, J. L. Everett, Cashier, and F. L. Palmer, President. Its detection is a matter of certainty, as the date is January 10, 1865, while all the genuine notes bear another date. All notes bearing another charter number than 733 are counterfeit.

On the counterfeit, the left hand of the central figure of Victory in upper right end of note is without thumb or fingers. On the back of note, the bandage does not cover the eyes of the figure of Justice in the State coat of arms. All notes having check-letters B, C, or D are counterfeit.

NEW YORK, N. Y.

A & C

National Broadway Bank

S. B. COLBY, Register.

F. E. SPINNER, Treasurer.

On the genuine, the end of the oar in the hand of the soldier in the bow of the boat touches the circle surrounding "50" in border of note; on the counterfeit, it does not touch the border of the note, and is quite a distance below the circle. On the counterfeit, the left hand of the central figure of Victory in upper right end of note is without thumb or fingers. On the back of note the bandage does not cover the eyes of the figure of Justice in the State coat of arms. Signatures of bank officers are written. All notes having check-letters B, C, or D are counterfeit.

NEW YORK, N. Y.

A & D

Tradesmen's National Bank.

S. B. COLBY, Register.

F. E. SPINNER, Treasurer.

On the counterfeit, the left hand of the central figure of Victory in upper right end of note is without thumb or fingers. On the back of note, the bandage does not cover the eyes of the figure of Justice in the State coat of arms. All notes having check-letters B, C, or D are counterfeit. On all genuine notes the check-letter is A.

NEW YORK, N. Y.

A

Union National Bank.

L. E. CHITTENDEN, Register.

F. E. SPINNER, Treasurer.

All notes bearing the signature of L. E. Chittenden as Register are counterfeit. The genuine are signed S. B. Colby. The counterfeit is dated April 15, 1864. All genuine notes are dated July 20, 1865.

ONE HUNDREDS.

‡ BALTIMORE, MD. A National Exchange Bank.
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

In the genuine, the loop of the letter y in "July" is one-sixteenth of an inch above the letter k in "Bank;" in counterfeit the loop touches the k.

In genuine there is a clear space of one-thirty-second of an inch between the J in "July" and shading of letter l in "National." In counterfeit it touches. At the left end of the panel "Baltimore," enclosed in scroll work, is a small heart-shaped figure, containing in the genuine seven horizontal lines; in counterfeit there are eight. In the genuine the upper yard-arm of foremast of frigate *Niagara*, holding sail partly reefed, points to the space between the two flourishes below the word "The" attached to the title "United States." In counterfeit this yard-arm points to the base of the letter T in "The."

BOSTON, MASS. A First National Bank.
L. E. CHITTENDEN, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 150.

‡ BOSTON, MASS. A National Revere Bank.
S. B. COLBY, Register F. E. SPINNER, Treasurer.

The counterfeit bears signatures of H. Blasdale, Cash'r, and Sam'l H. Walley, Pres't. On the genuine the hair-line on which the President's name is written, if extended, is below the "r" in the word "Cash'r;" on counterfeit, this line strikes about the middle of the "r." On the genuine the flourish in upper border on face of note touches the "N" in "National currency;" on counterfeit it is one-sixteenth of an inch distant.

CINCINNATI, OHIO. A Ohio National Bank.
L. E. CHITTENDEN, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 150.

‡ NEW BEDFORD, MASS. A Merchants' National Bank.
S. B. COLBY, REGISTER. F. E. SPINNER, Treasurer.

The counterfeit bears the signatures of P. C. Howland, Cash'r; C. R. Tucker, Pres't. On the genuine the hair-line on which the President's name is written, if extended, is below the "r" in the word "Cash'r;" on the counterfeit this line strikes about the middle of the letter "r."

NEW YORK, N. Y. A Central National Bank.
L. E. CHITTENDEN, Register. F. E. SPINNER, Treasurer.
 To instantly detect this counterfeit see list of numbers of genuine notes on page 150.

‡ PITTSBURGH, PA. A Pittsburgh National Bank of Commerce.
JOHN ALLISON, Register. JNO. C. NEW, Treasurer.

This counterfeit is printed on fibre paper, which is a very close imitation of the genuine. Numbering well done; color of number and seal good.

The base of check-letter A in lower left corner on counterfeit is in line with hair-line for cashier's signature; on genuine, it is one-sixteenth of an inch above.

‡ PITTSFIELD, MASS. A Pittsfield National Bank.
S. B. COLBY, Register. F. E. SPINNER, Treasurer.

The signatures of the bank officers, E. S. Francis, Cashier, and John V. Barker, Vice-President, are printed in different colored ink, which gives them the appearance of being written. On the genuine, the flourish in upper border of face of note touches the "N" in the words "National Currency;" on the counterfeit, it is one-sixteenth of an inch distant. On the genuine, the end of the line on which the President's name is written comes below the "r" in the word "Cash'r." On the counterfeit, the end of this line comes in the middle of the "r."

‡ WILKESBARRE, PA. A Second National Bank.
L. E. CHITTENDEN, Register. F. E. SPINNER, Treasurer.
 The counterfeit bears signatures of E. A. Spalding, Cash'r, and Abram Nesbitt, V. Pres't.

All the above plates have been captured.

‡The following points of difference may be observed on all these notes: On counterfeit a line drawn from the top of the period after Washington to top of check-letter A, at right of figure of Liberty, strikes the chin of the Goddess of Liberty.

On the genuine this line strikes the end of the nose, except in Revere Bank the mouth.

On the counterfeit the distance between the outer edge of the wing of the figure of Liberty and the bottom of check-letter A is barely one-eighth of an inch. On the genuine the space is over three-sixteenths of an inch.

On counterfeit the upper yard-arm of foremast of frigate *Niagara*, holding sail partly reefed, points to bottom of the letter "T" in "The" attached to the title United States. On genuine this yard-arm points to the first flourish below the word "The."

On counterfeit the water seems to fall from one side only of the oar in bow of row-boat. On genuine the water can be distinctly seen to fall from both sides of the oar.

There are other and minor differences, but these will enable any one to decide at once whether one of these notes is genuine or counterfeit.

STOLEN NATIONAL BANK NOTES.

The National Bank notes described below were stolen when unsigned, the signatures of the bank officers forged, and the notes put in circulation. They are rejected when presented for redemption, for the reason that, in the opinion of the law officers of the Department, they are not obligatory promissory notes of the banks.

 The Bank number on all stolen National Bank Notes is in the lower left-hand corner, and the Treasury number in the upper right-hand corner.

*These notes are of the series of 1875.

NUMBERS OF GENUINE NATIONAL BANK NOTES THAT HAVE BEEN COUNTERFEITED

So arranged that any one can decide if a Note is genuine.

The following list embraces the numbers on genuine National Bank notes that have been counterfeited up to the series of 1875. *All National Bank notes bearing the signature of F. E. Spinner as Treasurer were issued prior to the series of 1875. All notes of series of 1875 bear ANOTHER name than that of F. E. Spinner as Treasurer.* On 2's, the Treasury number is in the lower left-hand corner of the note, and the bank number in the upper right-hand corner. On all other denominations that have been counterfeited, the Treasury number is in the upper right hand corner of the note, and the bank number in the lower left-hand corner. This list has been arranged for reference in the same way. In the 2's, the Treasury numbers have been placed on the left of the bank numbers, and in all other denominations on the right. For convenience in reference, the Treasury numbers have been arranged in numerical order, so that one can know at a glance if a certain number should appear on a note. In order to ascertain if a note is genuine, see if the Treasury number on the note comes between a series of numbers given in this list as issued to that bank; if not, the note is a counterfeit. Should the number of the note come between the series of Treasury numbers, deduct the first number of the series from the number on the note, add the difference to the first bank number given in the same series, and if the number obtained is the same as the bank number on the note, it may be taken as genuine. Example: A ten-dollar note on National Bank of Commerce, New York city, No. 102,175, is presented. It comes between the series of Treasury numbers 101,979—102,978. To decide if it is genuine, from 102,175 deduct the first number of the series, 101,979; add the difference (196) to the first bank number in the same series, (10,001,) and it makes 10,197. Should this be the bank number on the note, the chances are almost infinite that the note is genuine. Again: a five-dollar note on First National Bank of Tamaqua, Pa., is presented, No. 784,051. On glancing at the list, you discover that no such number has been issued to the bank, and reject the note as a counterfeit without further examination. The counterfeiters have so far been without a system in numbering notes, and there is not one chance in a thousand that the number on a counterfeit will come between any series of Treasury numbers. Should the Treasury number happen to come between a series of genuine numbers, the chances are almost infinite that the bank number on the note would not come between the bank numbers given in the same series. A calculation as given above would hardly ever be necessary, except in case a genuine note was presented about which a doubt existed.

The charter number (which is now printed across the face of all bank-notes in large red figures) is given in bold-face type in this list. All notes having different charter numbers from those given in this list are counterfeit.

☞ The numbers given in this list embrace only the numbers on these notes issued prior to 1875.

PITTSBURGH, PA., (668) PITTSBURGH N. B. OF COMMERCE.

The numbers given below are of the series of 1875, as this is the issue that has been counterfeited. All notes of the old series can be taken as genuine.

A few counterfeits on this bank have been seen, numbered correctly. A complete description of this note, enabling anyone to detect it, is given at bottom of page 34.

Numbers of series of 1875 not given, except Pittsburgh N. B. of Com. above.

COUNTERFEIT UNITED STATES NOTES.

On the reference card we divide United States notes designated by the Treasury Department as "new issue" (so called because they superseded the first issue, or demand notes) into four series: 1st. Those issued under act of February 25, 1862, and exchangeable at par for U. S. bonds. A second issue under the same act, called "new series," (the words "new series" being printed on all this issue just below the number,) were not exchangeable for U. S. bonds, (see back of both this and the first issue.) 3d. Those issued under the act of July 11, 1862, of which only the "ones" and "twos" bear the date of the act. 4th. Those issued under the act of March 3, 1863. All of these issues bear the signatures of L. E. Chittenden as Register, and F. E. Spinner as Treasurer. The act of March 3, 1863, limited the time U. S. notes of February 25, 1862, (first issue,) could be exchanged at par for U. S. bonds, to July 1, 1863. In consequence of the demand of some banks, subsequent to July, 1863, for U. S. bonds in exchange for these convertible notes, the Treasurer issued orders to the Assistant Treasurers to forward these notes for redemption; and they were retired as rapidly as they came into the Treasury. This policy has left very few of these convertible notes in circulation. Of these issues but two counterfeits have been put in circulation (out of the 15 issued) that would be likely to deceive an expert—50's and 1,000's.

The counterfeits of the "series of 1869" were considered so dangerous as to warrant the Treasury in preparing new plates for both the 50's and the 500's.

In the following list we have not been able to satisfy ourselves in regard to all the check-letters given, as the Treasury, while having a complete set of counterfeits of all issues and denominations, has not all the different check-letters of each denomination counterfeited. In order fully to protect our patrons, we give all the check-letters of each denomination which have been reported counterfeited upon fair authority. We print the check-letters in full-face type (A) (B) (C) (D) where we have examined the counterfeit; the letters given in plain Roman (A)(B)(C)(D) are those reported as in circulation which we have not seen. We will be much obliged if bankers or others will forward to us, at our expense, for examination, any counterfeit of which we do not give the check-letter in full-face type.

United States notes are printed in sheets of four notes of one denomination on each sheet. The notes are lettered, respectively, in the upper and lower corners, diagonally opposite, A, B, C, and D. Each United States note has a distinct number, and the notes are always numbered in their order on the sheets; thus, all notes of letter A will be 1, or a number which if divided by 4 would leave 1 remainder; B, 2 remainder; C, 3 remainder, and D, 4, or the number will be divided by 4 without a remainder. This test, while not by any means certain, will enable any one to detect one-third of the counterfeits in circulation. *Any United States note upon which the number cannot be divided by four without showing the above result is a counterfeit.* Bear in mind that all genuine notes with letters A and C will have odd numbers, and all with B and D even numbers.

We think the following list will be found to be one of the most complete published. The public can rest assured that it is perfectly trustworthy, that it embraces all the counterfeits known at the Treasury, and such counterfeits only as are, or have been, in actual circulation.

1's.

Act July 11, 1862. (A) **B** (C) **D** Dated August 1, 1862

A poor counterfeit. Engraving very coarse, particularly the head of Chase. Numbers irregular and of bad color. On the genuine the small "ones" in circles in border at top and bottom of note are very plain; in counterfeit they can hardly be distinguished. It is impossible to trace the lines in the lathe work.

1's.

Act March 3, 1863. **D** Series of 1875.

A very poor counterfeit, and not likely to deceive. Signed A. U. Wyman, Treasurer. The specimen seen here is one-eighth of an inch longer than the genuine. We do not think the note worthy a detailed description.

2's.

Act July 11, 1862. **B C D** Dated August 1, 1862.

A poor counterfeit. Engraving very coarse, especially the head of Hamilton. Shading of the words "United States" in large letters and engraving of "National Bank Note Company" in lower border of face of note poorly done. Impossible to trace the lines in the lathe work.

2's.

Act March 3, 1863. **D** Series of 1875

A photographic note, so poorly executed that a description is not needed. All we think necessary is that the public should be reminded of its existence.

5's.

Act February 25, 1862, **A** Dated March 10, 1862.

This note is one of the convertible series. Engraving of vignette of Hamilton and statue of Liberty much coarser than in genuine. Numbering very poor. Impossible to trace lines in lathe work surrounding large "5" on face or in green tint on back of note.

5's.

Act February 25, 1862. **A** Dated March 10, 1863.

A poor counterfeit. This note has what is known as a "convertible" back. All genuine notes of this issue are dated March 10, 1862. As this counterfeit is dated March 10, 1863, its detection is a matter of certainty, even to those unacquainted with the genuine.

5's.

Act March 3, 1863. **A (B) (C) D** Dated March 10 1863.

A poor counterfeit. Engraving of the vignette of Hamilton and statue of Liberty very coarse. Shading of "United States" in large letters on face of note poorly done. Impossible to trace the lines in the lathe work.

5's.

Act March 3, 1863. **C** Series of 1875.

This note is very well printed, and presents a good general appearance; lettering remarkably clear; lathe-work very good. An attempt has been made to imitate the fibre paper by printing the lines, but this can readily be detected. Engraving of head of Jackson and vignette in centre of note poorly done. On the genuine, below the words "Series of" and "1875," in upper left of note, there is a flourish; on the counterfeit there is none. On the counterfeit, in the line "Engraved & Printed at the Bureau of Engraving & Printing," there is no loop in the top of the "&'s." On the genuine this loop is very distinct. On the genuine, the lines on the shield in lower right of face of note are so fine as to be almost imperceptible. On the counterfeit they are quite a distance apart, and clearly visible.

As this plate is in the hands of the counterfeiters, all notes of this series must be carefully examined. All five dollar notes of the series of 1875 are signed John Allison, Register, and John C. New or A. U. Wyman, Treasurer.

5's.
D.

Act of March 3, 1863.

Series of 1875.

A poor photographic counterfeit, signed John Allison, Register, and A. U. Wyman, Treasurer, numbered B 8058120, and all notes printed from this negative will have the same number. *The pink cycloid work over and above the signature of A. U. Wyman, Treasurer, and the pink seal have been removed.* The only color on face of note is the Treasury number, which is poorly tinted, having been traced with a pen. Paper greasy and tender. This counterfeit note is $\frac{3}{8}$ of an inch shorter than the genuine. "Series 1875" on lower right of note is *black* on counterfeit and *pink* on genuine. This is a poor counterfeit, but, being printed by what is known as the "carbon process," and the first of its kind, it promises more dangerous work hereafter.

5's.
D.

Act of March 3, 1863.

Series of 1875.

This counterfeit, which recently appeared in Kentucky, is evidently made from the same plate as the one described above, as the numbers are the same—Plate 14, signed John Allison, Reg., A. U. Wyman, Treas. It is like the photo-lithographic or carbon process, and $\frac{7}{16}$ of an inch shorter than genuine, printed on localized fibre paper; color in numbers and seal a brick-red. The dotted lines in face of Jackson are wanting. Several ellipses in border containing the words "United, Five, States," are blurred and blackened in counterfeit, (in genuine all are sharp and clear.) The lathe-work and lettering somewhat blurred. The figures "1875," in genuine in red ink, in upper right corner, between "S" in States and the counter V, are wanting in counterfeit examined.

10's.
B C

Act February 25, 1862.

Dated March 10, 1862.

This note is one of the convertible series. Engraving coarse, numbering poorly done. On the genuine, the words "Printed by the National Bank Note Co." in the lower left corner on face of note touch the hair-line inside of border of note. On the counterfeit seen, they are one-sixteenth of an inch above the line.

The Government has in its possession seven distinct counterfeits on this denomination and issue. There is also a spurious issue of these notes which was printed from a plate surreptitiously gotten out of one of the bank-note companies. It bears a counterfeit seal, and is likely to deceive.

10's.

Act February 25, 1862. (A) B C (D) Dated March 10, 1862. New Series.

A good counterfeit. Engraving well done. Lathe work very good. On the genuine, the end of the line upon which the number is printed comes below the words "new series;" on the counterfeit, the end of this line comes about the centre of the words. On the genuine, the bottom of the oval line surrounding the vignette of Lincoln touches the line inclosing the words "Payable at the Treasury of the U. S. at New York." On the counterfeit, there is quite a space between these lines. Numbering very fair.

10's.

Act March 3, 1863.

A (B) (C) D Dated March 10, 1863. New Series.

A good counterfeit. Vignette of Lincoln remarkably well engraved. Engraving of Eagle in centre of note presents a scratchy appearance. Lathe-work in green tint is irregular. On the left of the large "10's" in green on face of note there are four distinct green dots on the genuine; on the counterfeit there are but three. The numbering on this counterfeit is unusually well done.

10's.
C

Act of March 3, 1863.

Series of 1875.

This note is signed John Allison, Register, and Jno. C. New, Treasurer. Is a poor counterfeit, and only likely to deceive because this issue has not been counterfeited before. An attempt has been made to imitate the fibre by printing lines on the paper, but they are so regular that they will not deceive. Vignette of Webster very poor.

20's.

Act February 25, 1862.

B C Dated March 10, 1862.

This note is one of the convertible series. A poor counterfeit. Engraving of vignette in centre of note poorly done. Impossible to trace lines in the lathe work. Engraving of words "American Bank Note Co., New York," in centre of lower border on face of counterfeit very coarse and irregular.

20's.

Act February 25, 1862.

Dated March 10, 1862.

A (B) (C) (D)

New Series.

A very poor counterfeit. Engraving very coarse, especially of vignette in centre of note. Lathe work on back of note so coarse as to be hardly an imitation of the genuine. The engraving of the words "Payable at the Treasury," &c., under the vignette, is so poorly done that almost any one could readily detect this note.

20's.

Act of March 3, 1863.

A Dated March 10, 1863.

A very poor counterfeit. Engraving coarse. A certain test may be had as this note has a convertible back. No genuine convertible notes issued under this act.

20's.

Act of March 3, 1863.

Dated March 10, 1863.

A (B) (C) (D)

New Series.

A poor counterfeit. Engraving especially of vignette in centre of note very coarse. Shading of "United States," in large letters on face of note, poorly done. Lathe work on back of note so coarse as to be hardly an imitation of genuine.

20's.

Act March 3, 1863.

A B C D Series of 1875.

This note presents a remarkably good appearance at first sight, but will not bear a close examination. It was the opinion at first that it was all pen-and-ink work, but as a number of these counterfeits have appeared, it is thought that the outlines are photographed in some manner, and the notes are finished with a pen. The notes are signed John Allison, Register, and John C. New, Treasurer. We do not think a detailed description of this counterfeit is necessary as an examination of the note will instantly reveal its character.

20's.

Act March 3, 1863.

A B C D Series of 1878.

This note closely resembles the counterfeit of the series of 1875, signed John Allison, Register, and Jas. Gilfillan, Treasurer. Is what is known as pen-and-ink work, and is not dangerous.

50's.

Act of February 25, 1862.

C Dated March 10, 1862

This note is one of the convertible series. A poor counterfeit. "Series 1" under number in upper right corner, and figure 2 under letter C on upper left of note. Engraving poor, especially of the vignette of Hamilton. Numbering very imperfect.

50's.

Act of March 3 1863.

Dated March 10, 1863.

A B C D

New Series, 1.

A poor counterfeit. Engraving of vignette of Hamilton poorly done. Shading of "United States," in large letters on face of note, coarse. Numbering imperfect. Lathe work irregular. On these counterfeits, the distance between the signatures of Chittenden and Spinner is $1\frac{1}{8}$ inches; on all genuine notes of this issue and series, "new series, 1," below the number, the distance is $1\frac{5}{8}$ inches.

50's.

Act March 3, 1863.

Dated March 10, 1863.

Patented April 28th, 1863,
on upper left of note.

A C D

New Series, 2.

One of the most dangerous counterfeits in existence. Engraving of vignette of Hamilton fully equal to the genuine. Numbering excellent. The buttons on the coat are not as distinct as on the genuine. On the genuine, the white lines that divide the nine small 50's surrounding the large 50, on both ends of the note, can be seen to cross the centre of the large 0. On the counterfeit, they do not. On left end of back of note the cipher in second 50 from the bottom is omitted. This omission renders the detection of this counterfeit a certainty.

50's.
B

Act of March 3, 1863.

Series of 1869.

A good counterfeit. Genuine notes of the issue were all printed on fibre paper; no attempt is made to imitate the fibre on this counterfeit. Lathe work well done; numbering good. On the genuine, between "Series of" and "1869," on upper left of face of note, is a small flourish. This is omitted on the counterfeit.

50's.
D

Act March 3, 1863.

Series of 1875.

This note is calculated at first sight to deceive any person not handling much money. It is a cleverly-done pen-and-ink counterfeit, the work being similar to the counterfeit \$20's of the same series, described on opposite page. We do not think our patrons need to fear this note if they will simply remember that it is in existence.

100's.
B C

Act February 25, 1862

Dated March 10, 1862.

A poor counterfeit. This note is one of the convertible series. There are probably very few genuine notes in circulation. "Series 1," just below the number. In the numbering, the figures used are much longer than on the genuine; are imperfect, and of bad color. The engraving of the feathers on the eagle's wing is coarsely done, and gives the work a scratchy appearance. Lathe work very poor.

500's
B C

Act of March 3, 1863.

Series of 1869.

A very dangerous counterfeit. Engraving and workmanship fully equal to the genuine. The points of difference are so few that, upon its appearance, the Treasury issued enlarged photographs of both genuine and counterfeit, in order to point out the trifling discrepancies. Bankers and others should refuse all these notes, as it is only by a comparison of the genuine and counterfeit that the defects can be discovered. Very few are now outstanding—but 883 notes—out of nearly \$45,000,000 issued, as the Treasury has endeavored to retire this issue.

1,000's.
A B D

Act March 3, 1863.

Dated March 10, 1862.

Dated March 10, 1863.

A very dangerous counterfeit. Engraving nearly equal to the genuine. The lathe work on this note is a little blurred and irregular, but all bankers should decline to receive these notes. The points of difference are so few that the Treasury issued enlarged photographs of both genuine and counterfeit, in order to point out the trifling discrepancies. A singular mistake was made in the genuine issue under this act, which the counterfeiters copied, that of dating the notes March 10, 1862, instead of 1863; this error was corrected in a subsequent issue of the genuine. Very few of those notes are now outstanding, but 624 notes out of nearly \$156,000,000 issued.

 See full description of this counterfeit in November number.

Counterfeit U. S. Bonds and Interest-Bearing Notes, &c.

- \$10.** Silver Certificate, payable at Washington, D. C. It is pen and ink work, poorly executed and easily detected. The paper is thinner than the genuine, and the work appears darker. An attempt is made to imitate the distinctive Government paper by two parallel lines drawn lengthwise through the certificate. The Treasury number can be rubbed off the counterfeit with a damp finger or sponge. Check-letter D, payable at Washington, D. C. No. 1650916; series of 1880. Signed G. W. Scofield, Register. Jas. Gilfillan, Treasurer.
- \$10.** Silver Certificate, payable at Washington, D. C. Signed G. W. Scofield, Register. Jas. Gilfillan, Treasurer. Numbered B 109,016. Check-letter D. Series of 1880. These photographic notes, printed on ordinary bank-note paper, are one-eighth of an inch shorter, and are narrower than the genuine note. The seal and X's, which in the genuine are of pink color, have been photographed black in the counterfeit, like the balance of the note. To imitate the genuine, the counterfeiter has colored those designs by hand in a very bungling manner, the black underneath being easily discernible, giving it the appearance of a dirty red, which color is readily disturbed by the application of moisture. This note is not at all dangerous, and will not deceive any one accustomed to handling money.
- \$20.** Silver Certificate, payable at Washington, D. C. Signed G. W. Schofield, Register. Jas. Gilfillan, Treasurer. Numbered B 675,114. Check-letter B. Series 1880. Photographic note, not at all dangerous, and the general description of the photographic counterfeit ten printed just above applies to this note.
- \$20.** Silver Certificate, payable at Washington, D. C. It is pen-work, poorly executed and easily detected. The paper is thinner than the genuine, and the work appears darker. An attempt is made to imitate the distinctive Government paper by two parallel lines drawn lengthwise through the certificate. The Treasury number can be rubbed off the counterfeit with a damp finger or sponge. The diamond figures between the letters of the word CERTIFICATE on the back are duplicates of each other in the genuine, while in the counterfeit they differ in shape and size. The words "ENGRAVED & PRINTED AT THE BUREAU ENGRAVING & PRINTING" appear on the genuine under the word "CERTIFICATE" on the back, also outside the border at right end on the face, and are wanting at both places on the counterfeit seen. They may be added, however, on the next. *This counterfeit is on the silver certificate payable at Washington, D. C.*
- \$50.†** Compound-Interest Note, series of 1864, dated July 15, '64. Issued under act June 30, '64, payable 3 years after date. Signatures, L. E. Chittenden, Register; F. E. Spinner, Treasurer. Check-letter C. "Compound-Interest Treasury Note" printed on face in gold letters.
- \$50.†** Compound-Interest Note, series of 1865, dated May 15, 1865. Check-letter D. Same description as above.
- \$50.†** 7.30 Note, dated July 15, 1865; issued under act of March 3, 1865. S. B. Colby, Register; F. E. Spinner, Treasurer; payable 3 years after date and convertible into 5.20 U. S. bonds.
- \$100.†** Compound-Interest Note, series of 1865; dated May 15, 1865; issued under act June 30, '64; payable 3 years after date. Vignette of Geo. Washington. A number of printed impressions of back of note from genuine plate were stolen from Treasury Department by an employé. Chas. H. Smith has confessed that he engraved the plate for face of note. The words "Compound-Interest Treasury Note" appear on face printed in gold letters.
- \$1000.†** 7.30 Note. S. B. Colby, Register; F. E. Spinner, Treasurer. Dated June 15, 1865. Check-letter B. A very dangerous counterfeit. Many of the notes were redeemed at the Treasury Department for Jay Cooke & Co before it was discovered that they were counterfeit. Chas. H. Smith states that the plates were engraved by him.
- \$1000.†** 5.20 U. S. Coupon Bond; consol '67; 4th series; act Feb. 25, '62. Date, May 1, 1862. It is believed that none of these counterfeit bonds were ever issued, as the plates were captured before they were quite completed. Engraved by Wm. Overton, Sr.

† Plate captured.

\$1000.† U. S. Coupon Bond, 6's of 1881. Acts of July 17 and August 5, 1861. Mature June 30, 1881. In the 1,000 counter composed of nine sections at each side of the portrait of Chase, it will be observed, in the section at the left of the lower half of the figure "1" in "1,000" the letter "S" in "Stat" is entire in the counterfeit; in the original only the upper half of the "S" is seen. Also, to the right of the letter S in the word "registers" will be found a break in the hair-line surrounding the portrait of Chase, about one-sixteenth of an inch in length, which does not appear in the original. The counterfeit differs from the original in the mitering of the four corners of the green border. Near the extreme corner inside of the lathe-work border a uniform white figure in the shape of a heart, with the apex pointing toward the corners, will be observed, and this figure is the same on all four corners; in the original these figures are irregular, having no symmetrical form. In the words "are indebted unto," below the portrait of Chase, the heavy black line in the centre of the face of the first letter "A" is omitted in the counterfeit. In the title, "United States of America," the ruled shade on the left-hand side of the spur of the letter "U" at the bottom, on the counterfeit, are seven short lines, forming but a slight shade under that part of the letter, while in the genuine there are 10 lines about one-sixteenth of an inch in length, forming a shade the same width as the shade at the bottom of the letter. On the right of the spur, at the bottom of the letter "U," in the counterfeit, the ruled shade where it touches the bottom of the letter "N," four lines only touch the "N;" on the genuine seven lines touch the "N." On the counterfeit the shade on the right spur at the bottom of the letter "T" in "United," three lines touch the bottom of the letter "E;" on the genuine the shade does not touch the "E." The shading in the top loop of the first "S" in "States" fills the loop on the counterfeit, while on the genuine there is a slight blank space in the lower right-hand part of the loop. There is a blank space in the shading of the bottom loop of the same letter on the counterfeit in the lower right-hand part; on the genuine the blank space is directly over the point in the bottom of the letter. On the lower loop of the second "S," in the counterfeit, the ruled shaded lines fill the whole loop, while in the genuine there is a blank space free from ruling.

No reliance can be placed on the relative sizes of the bonds, as the genuine vary in size, which is accounted for by the stretch and shrinkage of the paper on which they are printed; nor to differences in the relative positions of portions of the bond printed in different colors, the printing being done by separate impressions for each color. The title, as well as the engraving on the bond, varies in every particular from the genuine, but the points mentioned are some of the most prominent discrepancies.

Monthly Statement of National Bank Redemption Agency.

The following is a statement of the disposition made by the Treasurer of the United States of the national bank notes redeemed during the month of February as compared with the corresponding period of previous years:

Notes fit for circulation assorted and returned to the banks of issue....	\$608,200
Notes unfit for circulation assorted and delivered to the Comptroller of the Currency for destruction and replacement with new notes.....	5,227,700
Notes of failed, liquidating and reducing banks deposited in the Treasury.....	1,643,750
<hr/>	
Total for 1882.....	\$7,479,650
Total for 1881.....	5,437,450
Total for 1880.....	5,668,700
Total for 1879.....	12,089,600
Total for 1878.....	15,586,000
Total for 1877.....	18,976,200
Total for 1876.....	18,725,700
Total for 1875.....	12,265,690

☞ The above information has been obtained direct from the banks, and can be regarded as reliable.

Counterfeit Canadian Notes.

Denomination.	Place.	Province.	Name of Bank and description.
\$1.....			Dominion of Canada, Old Issue, Letter D. Dated Ottawa, July 1, 1870. The lathe work on this note is irregular and blurred.
\$1.....	Charlottetown.	Prince Edward's Island..	Union Bank of Prince Edward's Island. Photographic counterfeit. Poorly done. No. 30,252.
\$2.....	do.....	do.....	Union Bank of Prince Edward's Island. (Old Issue.) Photographic counterfeit. Not dangerous.
\$2.....	do.....	do.....	Union Bank of Prince Edward's Island. (New Issue.) Engraving coarse, and not at all likely to deceive.
\$4.....	Toronto	Ontario	The Dominion Bank. (Old Issue.) Letter B. Dated February 1, 1881. Lathe work irregular.
\$4.....	Montreal.....	Quebec	City Bank of Montreal.
\$4.....	St. John.....	New Brunswick.....	Bank of British North America. Photograph not dangerous. Numbered 74,981.
\$5.....	Montreal	Quebec	Bank of British North America. (Old issue.) Photograph poorly done. Numbered 44,490.
\$5.....	Toronto	Ontario	Canadian Bank of Commerce. This counterfeit bears the vignette of the "Queen," and is signed by Wm. McMaster and E. J. Smith. On either side of the vignette is a large "V" in green tint with the word "five" printed across each in large black letters; at each corner of the note is the figure "5" in large type with black shading, and over the vignette is printed "Bank of Commerce" in large black type, and around the edge is the word "five" printed in small characters. This counterfeit may be detected by the poor quality of the paper; the signature of the counter-signing officer, "E. J. Smith," seems to have been stamped with a rubber-stamp, and not written.
\$5.....	Charlottetown.	Prince Edward's Island..	Union Bank of Prince Edward's Island. Photographic counterfeit. Work poor. (Plate A.)
\$10.....	Montreal.....	Quebec.....	Bank of British North America.
\$10.....	do.....	do.....	City Bank of Montreal.
\$10.....	Toronto	Ontario	Ontario Bank. (New Issue.) Letter A. A dangerous counterfeit. Full description will appear in April DETECTOR.
\$10.....	Fredericton.....	New Brunswick.....	Peoples' Bank of New Brunswick. Letter A. Photographic note. Not at all dangerous.

Banks that have been Consolidated with Others.

Place.	Province.	Name of Bank.	March Quotations.

Mechanics' Bank of St. Johns.....	do.
Stoemda Bank of Quebec.....	99¼ cents.
Westmoreland Bank of New Brunswick.....	Worthless.
Zimmerman's Bank	do.

Differences in Genuine Bank-Notes.

A number of correspondents have called our attention to differences in \$100 notes, and have written to us to know if the notes are genuine. We would again remind our patrons that genuine bank-notes of one denomination are not all *exactly* alike, and our description of the genuine \$100 notes whose issues have been counterfeited will not necessarily apply to the notes of any other banks. In our DETECTOR for February, 1880, we gave the reason. It is necessary to make a new "bed-piece," as it is called, for every 50 to 100 banks, and it is impossible to make the "bed-pieces" exactly alike. In a majority of cases the principal differences will be found in the borders of the notes, though other slight differences exist.

Treasurer of the United States, dated March 1, 1880; March 1, 1881, and March 1, 1882.

Test for Determining Counterfeit Silver.

The following test for deciding whether silver is good or bad is generally known as the "Mint Test," although the tests employed at the Mint are weight and size:

24 grains nitrate of silver.

30 drops nitric acid.

1 ounce water.

A drop of this will have no effect upon genuine silver, but will blacken a counterfeit. In case the suspected coin is plated, scrape the coin a little before applying the test. We print the above formula in response to many requests. Persons handling large amounts of this coin will have to rely upon the eye.

STOLEN UNITED STATES BONDS.

REGISTERED Bonds of the following acts, numbers, and denominations are ca-
veated upon the books of the Treasury Department, March 13, 1882.

STANLEY S. STOUT,
Late Examiner U. S. Patent Office.

H. G. UNDERWOOD,
Late Examiner U. S. Patent Office.

STOUT & UNDERWOOD,

ATTORNEYS AT LAW

AND

SOLICITORS OF PATENTS,

66 WISCONSIN STREET, MILWAUKEE, WIS.

United States and Foreign Patents, Trade-Marks, Reissues, Caveats,
Designs, Labels, Copyrights.

Special attention given to all matters of Infringements, Interferences, &c.

Practice before the Patent Office and all U. S. Courts.

The above illustration represents the new **Automatic Shading Pen,**

For Plain, Fancy, and Ornamental Lettering.

Writes and Shades at the same time with one single stroke of the Pen.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, St. LOUIS, Mo., February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, &c.

JOHN R. BALLINGER.

CHICAGO, April 21, 1880.

Indispensable for the execution of neat, attractive lettering, &c.

RAND, McNALLY & CO.

PRICE 40 cents each, or \$1.00 a set of three sizes, enclosed in handsome case. An elegant Alphabet accompanies the Pen. Sent by mail on receipt of price. Specimens free.

AUTOMATIC SHADING PEN CO., Box 2148, New York Post Office.

HATCH'S

SELF-ADJUSTING, SELF-COUNTING

Coin Holders

CAN BE USED ANY NUMBER OF TIMES WITHOUT IMPAIRING THEIR UTILITY.

TO USE, simply press coin against the wire bars, which readily yield, allowing coin to rest on tin backplate.

SIZES.	PRICES.

AMERICAN GOLD AND SILVER

Counterfeit Coin-Detector,

Showing, by one motion, the three necessary tests, WEIGHT, DIAMETER, & THICKNESS, is in daily use by the United States Government, by leading Bankers, and others.

GOLD COINS,
 \$20. \$10, \$5, \$3,
 \$2.50, \$1.

SILVER
 LEGAL TENDER,
 \$1.50 cts., 25 cts.

TREASURY OF THE UNITED STATES, WASHINGTON, November 28, 1879.

A. S. PRATT & SON:

GENTLEMEN: I have examined and tested the "American Gold and Silver Coin-Detector" for sale by you, and find it correct.

This Coin-Detector, for accuracy and cheapness, is the best I have seen.

Respectfully,

J. W. WHELPLEY, Cash'r U. S. Treas.

The above represented instrument is entirely reliable, and affords complete protection against Counterfeit coin. Its convenience, accuracy, simplicity and cheapness recommend it to popular use.

It is nickel-plated, mounted on metal base, and will be sent to any address in the United States or Canada on receipt of \$5.00, by

A. S. PRATT & SON,

National Bank Agents, and Publishers of Underwood's Counterfeit Detector,

Lock-Box 52.

WASHINGTON, D. C.

ESTABLISHED IN 1866.

JOSEPH R. EDSON,
Attorney at Law and Solicitor of Patents,
917 F Street N. W. WASHINGTON, D. C.

Special attention given to Applications for Patents and Reissues, and the prosecution of Infringements, Interferences, Appeals, etc.

☞ Terms as low as reliable service will admit.

WOODRUFF'S
File-Holders

USED IN ALL THE
GOVERNMENT DEPARTMENTS,

And in many Public and Private Offices throughout the Country,
are particularly useful to Railroad, Insurance, and other Companies; to Bankers, Lawyers, Agents, and Business Men for filing Letters, Deeds, Vouchers, Bills, Bonds and Mortgages, Wills, Briefs, Receipts, Pamphlets, etc., etc., for PRESERVATION and INSTANT REFERENCE.

MANUFACTORY AND SALESROOM,
705 and 707 Ninth street N. W., Washington, D. C.

TREASURY OF THE UNITED STATES, WASHINGTON, D. C.

The file-holders invented and manufactured by Mr. E. W. Woodruff of this city are extensively used in this office, and have been found extremely convenient, useful, and satisfactory.

JAMES GILFILLAN, Treasurer, U. S.

COIN BAGS FOR BANKS AND BANKERS.
