Dear Sir:

Your favor of the 28th at-hand and I will be very glad indeed to make that exchange with you.

I enclose my list and would ask you to return your list of wants at your earliest convenience so that I can pick them out from my duplicates and none of them be exhausted in other exchanges.

I will send you the package of plants in a few days after receiving your list of desiderata.

I am especially glad of the opportunity of obtaining western plants from you.

Trusting that you will
favor me with your list-
of wants at an early date-
I remain

Yours Truly

W. H. Lloyd

Walter Deane
Dear Sir:

Your package arrives this morning and I have not received a package this year that has given me more pleasure to look through it. The plants are carefully collected the labels are very neat indeed and it reflects great credit on the collector.

Your letter with interesting facts regarding the history of some of the plants gives them a double interest. Please accept my best thanks for the trouble ^{to which} you have been.

You are certainly much favored in having the acquaintance of so many eminent botanists. If you would appreciate your

Standard Publishing Co.

No. 180 Elm Street,

Cincinnati,

188

situation all the more had you ever been isolated as I am away from all who take any interest in such matters.

I send you by express (L. H.) your desiderata with- three exception which I regret have been exhausted.

The plants have none of them been poisoned

If it would not be too much trouble I would take it as a kindness if you would compare with authentic specimens the plants I send labeled, *Tilia heterophylla*, *Fraxinus quadrangulata*, *Scutellaria varicosa*, and the varieties of *learex boxiflora* and inform me of the result.

I have more or less

doubt- about- the determination
of all of them.

Trusting my plants- will
give you satisfaction I remain.

Yours Truly

W. S. Lloyd

The information desired is for the quarterly publication, "American Drugs and Medicines." We only solicit statistics from the best authorities, and we therefore hope that you will be willing to contribute towards the perfection of our undertaking, and will extend such information as may be in your possession. In return we shall see that your favors are recognized in the number of the book which treats of the subject under present consideration.

Cincinnati O. Jan 17 1887

Walter Deane

Dear Sir,

~~Will you kindly favor us with information on the following subject?~~

Your favor of Jan 14th at-hand.

I am pleased to learn you liked the specimens sent and regret that they were many of them deficient in roots and fruit.

I am well aware of the failing of my plants & in that regard but when I consider that last year I dried and labeled outside of business hours over 7000 specimens I do not believe I could have done it had I stopped to wash and dry the roots

~~and oblige,~~

Yours truly,

My kind Sir;

Your favor 16th at hand and I hasten to reply to thank you for your kindness in verifying my specimens. My *Scutellaria* was questioned by Mr. Vasey of Washington but I could not persuade myself that it was wrong and I am very glad indeed to have it decided right. The *Achenopodium* I was very doubtful about ~~and~~ but if my *C. urticum* is *C. murale* what is my *C. murale*? - I was completely surprised however in regard to the *Sanicula* and think there must have been some mistake in the specimens

Walter Deane
Esq. Sir

Will you kindly favor us with information on

the following subject?

The geographical distribution of the round and sharper lobed forms of *Heptatica* - I am considerably puzzled to reconcile the Manual acct. with my observations -

Gray gives the round lobed form as general distribution and cites only northern localities for the sharp form - We have here only the sharp form and one is evidently - the southern type.

The samples of the drug obtained from houses in all cities are all sharp form with one exception -

I have written to botanists in different sections and their answer with yours will I think settle

and oblige,

Yours truly,

J. U. & C. G. LLOYD,

Cincinnati, Feb. 11 1883

Dear Deane -

On looking over some old letters last night I ran across some that may be of interest to you. Enclose herewith the letter from Kwong Ki Chiu, we shall publish in the next "Addenda," as it is of much interest. You are doubtless aware that the root of ginseng is largely collected and shipped to China. It commands a high price here (about \$1.⁰⁰ a pound) and in China where everything is so much cheaper in comparison the price must be fabulous. There has been much speculation about its use - some saying that it is burned for incense to their gods, others that it is considered a panacea to

Cincinnati, 188.....

For we have written to most-
all the Southern botanists-
without avail. If a specimen
is in your herbarium at Havana
would you kindly advise
me from what locality it
was obtained.

We have just received
some specimens in flower
of *Illicium floridanum* and
are having a picture made.

Notice that the peduncles
in our specimens are none of
them an inch long and in
the picture in Gray's *Genera*
they are represented about two
to three inches long. I would
be glad if could obtain some
information regarding their
usual length.

I would be much obliged

No. 180 Elm Street,

Cincinnati, 188.....

indeed for a photo of
Dr Gray if you have a
duplicate I should not
wish to rob you of your
only one. Do you have
not doubt where there
was a splendid picture
of him in "New Remedies"
~~but~~ a few years ago, which
we have.

I have received from Prof
Bailey his notes on the proofs
of the botanical part of our
book. There were a great
many points of information in
them which we would have
been glad to had in time
to have incorporated in the
work. I was pleased however
to learn that I had made
no very serious blunders with

my part. There were a number
of errors in use of terms and
expressions which we will
correct in the plate.

I hope you will have
a very successful collecting
season this year.

Yours truly
H. S. Lyell

Dear Anne. - Some time at your
leisure will you look up the following
works and give the references to -
Hydrastis Canadensis in the same
manner as I have given the references
to *Arenaria Hepatica* in the July
number of our work.

I would be glad if you will write
the name as it appears in the work,
and give the page noting especially whether
Canadense is spelt with a small
or capital c and also if the author's
L. or Linn is given, if not please
indicate it with a dash.

I have tried to fix this work
so as to make you as
little work as possible and will
only ask you to write the name
and page under my title of the
book thus under my title

Gray's Manual of Botany 5th Ed.
you would write

Hydrastis Canadensis Linn - p 47.
(over)

I have given the page in
quotation whenever possible
and ask you to verify
them by crossing off the quotation
marks and writing the name
Hydrostis canadensis in
front of the reference in
the manner in which it
is printed in the work.

Dear Sir,

In our article on *Leptis*
we want to show enlarged
flowers of ^{the} three species in order
to contrast the ~~stem~~ sepals
and petals which are as
you know the distinctive
characters of the plants.
We can get *Leptis trifolia* without
trouble - *Leptis asplenifolia*
from Hooker. Fl. Borali-Am.
Next *Leptis occidentalis* we
have not secured as yet.
We have a fruiting specimen
but none in flower. Would
you secure the loan of a
flower pressed to show the
sepals and petals so
our artist can make
a drawing. We will

return is unharmed.

Antal's picture of the
plant is N. G. —

Dear Allene.

Will you kindly supply
the "missing links" of this
table and also any additions
~~that should~~ ~~be~~ be made to the
list - In regard to who
~~should~~ be considered the
"leading botanical systematists of
the world" I would be glad
if you would ask Prof.
Watson or Gray.

I think it very doubtful if
LeMaout & Decaisne are entitled
to be in the book. Please excuse
pencil and paper, ~~as~~ at the
Library and have no others,

Would you suggest a
better name for the table,
than what I have given?

No. 180 Elm Street,

Cincinnati, *May 12* 1884

Dear Sir

As I wrote you before we wish in future numbers to give botanical references as complete as possible to the plants we consider. Of course we can do but little more than elaborate the abbreviated references of Watson's Index and we shall so state in the work, but we think that by arranging the references in chronological order it will give at a glance the life history of the plants.

I have worked up as far as I am able in this city and will ask you to aid me with the balance.

You will see readily by examining those I have worked

Shadings did not show up as we expected that they would. If we had known what we do now we should have had two maps one for each species.

We will adopt this plan in future numbers.

It takes a pile of work and correspondence to get together the data for these maps.

Your criticism regarding *Rapumulus* is very true yet as *R. bulbosus* is the only species ever recognized by the Pharmacopoeia or by the Homoeopaths we did not think we should disregard their authority.

and have hence given
R. Bulbosus as the subject
of the article.

Wishing you a pleasant
vacation. I am.

Yours truly
C. L. S.

P.S. - When you get back
to Boston I will ask some
more assistance if you
find that you have time.

And judging their letters
which are perhaps good
indices to a mans character
they are gentlemen of
refinement and education
Spero Watson you know
Lest F. Ward the author
of the Flora of Washington
is a very careful and
studious man. His work
shows him to be a close
observer.
Chickering of Washington
I judge to be a man
who has done a great
deal of work in the subject.
Hoyssack - is a celebrated
botanist or rather a
celebrated exchanager. I have
a very vivid remembrance

of an exchange I made with him of about 200 specimens, I exchanged them for wild, that is wild is all I ever received from him.

I have since learned of three other who have had the same experience and have made no special inquiry in that direction. I feel quite sure if the matter were investigated it would prove his usual way of making exchanges. He writes a nice seductive letter don't he? - Put it in the curious corner of your museum.

Dear Deane,

A letter from you has been on my desk for some time which I had intended to answer before this. I will make a pencil sketch topic, and have it copied which will save my time and be more readable to you as I am such a miserable scribe. Our season is, the most backward here this spring we have had for many years. Generally near this time, wild flocks are in full bloom but now I hardly think there is one out. I have not been out but sent my boy out skinning him last Saturday. He returned however poorer than Noah's dove, - without even a single

Lloyd.

Standard Publishing Co.

No. 180 Elm Street,

Cincinnati, *Apr 29* 188*5*

My Dear Mr. Deane

Your photo you so
 so kindly sent me arrived
 today. I shall always feel
 a restraint in addressing you
 in future that I did not
 have. I was not prepared to
 see so dignified, manly a
 picture. It shows how erroneous,
 impressions formed from corre-
 spondence are apt to be.

I feel so childish my self
 that sometimes I think I
 every one else should be.

I was expecting a slender
 youthful face. I know how
 I came to be deceived;
 when we made our first-
 exchange I gathered from your
 allusions to school and the

Dear Deane,

No. 6 has at last appeared. I sent you an advance copy yesterday. (The edition will not be mailed until tomorrow.) You will find Coptis well worked up. The delay in issuing I can only attribute to neglect and other work. I am obliged for your note about my Cardamine, have not had time to give the matter attention and thought, yet. I am not busy at work on future numbers of the D. + M. hence you may look for a bombardment of questions. Here is the first. If you have access to a copy of Plukenet's *Almagestum Botanicum* (London 1696.) will you kindly see what he says.

(Over)

about Christophorianae facie
herba spicata (Vol. 1, p. 54.) also give
me a description of the cut (plate
383 figure 3.) This was the first
published description of our now
Cimicifuga racemosa.

Confidential - Have you a photo
of A. E. H. of Peoria, if so what
kind of a looking female is she?
I imagine about 40 and an
old maid. Am I right? She
writes me for an exchange of
photos and says she has
yours. What does "that wife
of yours" think of your send-
ing pictures to your botanical
lady friends?

As ever your friend.
Lloyd.

Standard Publishing Co.

No. 180 Elm Street,

Cincinnati, Aug 10, 1885-

My Dear Deane

Your letter of the 7th is
just at hand and I hasten
to reply. I feel that some
of your post-queries and
letters have not received the
prompt attention they otherwise
have had. It is not the
heart but the hand that
is to fault. I get a letter
from you containing some thought-
ful question on a subject I
want to look up; I lay it
aside till I can get time
to investigate; the letters come
in, plants for names, and miscella-
neous mail matters which is laid
away and finally the pile
becomes so large that I go
to work with a will
to clean up the debris and

Excuse your letter in the
 strata. In the meantime the
 query has become so stale
 that I am ashamed to
 open it.

I am glad you spoke
 of the missing number of
 the Journal. I trust at any
 time you want - My extra
 copies you will not hesitate
 to let me know. At the
 end of the present year
 I want you to send a
 set to me to be bound.

I have had binders stamps
 made and can bind your
 copy more attractive than
 an ordinary binding, besides
 I want the privilege of
 making you a present
 of the complete work.

DRUGS & MEDICINES OF NORTH AMERICA.

BY J. U. & C. G. LLOYD.

No. 180 Elm Street,

Cincinnati, *Aug 21* 188*4* -

A Quarterly publication devoted exclusively to the Medical, Pharmaceutical and Botanical History and Description of American Drugs and the Plants yielding them.

Containing Full Plate Engravings of all the principal American Medicinal Plants, and Full Illustrations in the text, including Original Pictures of the parts used in Medicine.

It begins with the first natural order, Ranunculaceae, and will consider each plant in its natural sequence.

Issued Quarterly Price: 0 a year. Back numbers from the beginning (1884) can be supplied.

Dear Sir,

Pedicles have arrived (contrary to law about sending liquids in mail) in good condition and have been forwarded to our microscopist. Many thanks.

I have in my herbarium three (3729, 3763, 3775) of the ferns you want - and shall send them to you shortly, tomorrow if I think to get them tonight - at my room. The first is common here; the other two will be of more value to you than to me as my collection is in a very incomplete one regarding ferns as I have given them no special attention. If you have succeeded in securing the

In a year yet - but - we
 we postpone it - by mutual
 consent - and from policy
 in regard to matters that
 would take much time to
 explain in full, I feel
 just the same as though
 I were a member here.
 This is to you in confidence
 though and is not known
 here outside of me three
 brothers. I will have charge
 of the Books and Finances.
 I have looked forward to
 this day some for many
 years and now it is in
 spirit - I feel correspondingly
 happy. I regret that my body
 must suffer but I resolve
 it shall not be for a

few months a year at -
most. You will agree with
me that - As I have always
studied it - as a recreation
I should not let it stand
in the way of my business
success especially when so
much is at stake.

I have just found a large
package of plants that
arrived from England for
me during my absence. I
have not had time to
open it - yet - . It is
from a splendid collector
and I anticipate much
pleasure in it.
Yours Friend

CINCINNATI, O., September 15, 1885.

DEAR SIR :

You are hereby notified that the firm of Thorp & Lloyd Brothers, Manufacturers and Wholesale Dealers in Drugs, Medicines, and other Druggists' Supplies, composed of the undersigned, has been this day dissolved.

The undersigned, John U. Lloyd and N. Ashley Lloyd, under the firm name of LLOYD BROTHERS, succeed to the property and business of the old firm and assume and agree to pay its liabilities.

Please address all communications to Messrs. Lloyd Brothers, N. W. Cor. Plum and Court Streets, Cincinnati, Ohio.

Respectfully

ABNER THORP,
JOHN U. LLOYD,
N. ASHLEY LLOYD.

CINCINNATI, O., September 15, 1885.

DEAR SIR :

We beg to call to your attention the notice of the dissolution of the partnership heretofore existing under the firm name of Thorp & Lloyd Brothers. The business will continue under the new firm name, Lloyd Brothers.

In succeeding to the business of said firm we hereby extend to you our thanks for past courtesies and we trust that our relations in the future may be as pleasant as they have been in the past.

We shall use every endeavor to conduct it upon strict business principles, and we hope that it may be mutually pleasant and profitable to all with whom we are associated. Hoping for a continuance of your favors, we are,

Sincerely Yours,

LLOYD BROTHERS.

not - be to our credit -
 and it - is a mountain
 of work to write up
 the articles as they
 are produced now.

Sept - issue ought - to
 be out - but - is delayed
 by Dr. Bartholomew of Phil
 who is making original
 investigations for it.

At present I do
 not - think the work
 will be stopped. My
 brother is in favor
 of postponing it - a
 year but - I know
 that - to suspend would
 give the idea of failure

And we could not - revive
it. When I figure up
the amount - it has
cost - so I am more
than thankful that
it has not been an
expense to you. Had I
known the number of
subscribers (nearly 2000)
we would get - I should
have expected a large
profit - but - it has been
a very expensive thing.
I go to the library
to miss - to finish up an
article on Actæon.
With kindest wishes
Your friend

Dear Sam -
 I spent yesterday
 (Sunday) in the country
 at my old home
 twenty-five miles
 south in Ky. It was
 a cold Autumn day, the
 leaves most all of
 the trees and the
 country has a dreary
 aspect to me. Wild
 fruit is in great
 abundance. I have never
 seen so many wild grapes
 (*Vitis cordifolia*) in my
 life and they are a
 favorite fruit with me.
 I send you today by
 express a box of persimmons.

Persimmon trees are not abundant - with us. They generally stand out - by themselves in a field and do not grow in woods.

Around our old home however there is what they call a persimmon orchard, as many as fifteen or twenty - trees in a cluster.

They are now loaded with fruit - and any quantity could be collected.

The fruit hangs on the trees until Christmas and is not ripe until after frost.

Dear Dear.

I send No 7 herewith - No 8
will be put right through.

We have just received from
Brazil some interesting seeds.

We know nothing about them
except that they are called

Arsaby seed and Baccaba seed.

They were sent to us for deter-
mination but we are entirely at
sea regarding them. Perhaps you
can find the names in Ruiz & Pavon's work
or some other on Brazilian Plants.
Maybe Dr. Gray will recognize it.

When I came to move my
duplicate - and numerous
plants - from the Standard
Rooms I found I had two
wagon loads of them. I tied
them all up in bundles
and they are all mixed
up. It fairly takes my
breath when I think of
the amount of the work
it will require to get
them straight - again.

Nov 18 1885

Dear Deane

I was at the Library
last evening studying Xanthoxylum
apiifolium. I found a reference for
the plant viz. Marssonia tinctoria
Bartram. - What work did Bartram
publish. John Bartram you know
was an old Quaker pioneer Botanist
who made numerous trips to the
South and it was he who
first collected the plant and
transferred it to his botanical
garden at Philadelphia. He published
an account of his trip to Florida and
his son Wm Bartram published his

travels in North- & South- Carolina.
we have looked through both
these works and can find no
reference to the plant- though
we may have overlooked. In
Marshall's *Arbustum* (spelling?) I
found a reference to "Bartram's
Catalogue": as John Bartram and
his sons afterwards, had a garden
in Philadelphia I presume one
of them issued a kind of trade
catalogue and it was in that,
that the reference was made
to the plant under the name
Marboria. Can you throw
light on the subject.
Your friend

Jan 2, 1856

My dear friend

Yesterday was Sunday and I intended to write you a long letter but the day passed and I did not get a chance

I am glad you are pleased with No 8. I have had several letters regarding it from botanists and I think it has been our banner name. Dr. Gray was kind enough to write a few words that made us feel quite proud. I am afraid now that in No 9 which is in plates contains a sentence that will not meet his approval. The more I study

Xanthorrhiza the more I become
convinced that the plant
belongs to the Berberidaceae.
and I so stated in a very
modest-way I think giving my
reasons. I did not take the
liberty to make the change
however and so I have only
introduced it - as an opinion
I am in hopes it - will escape
criticism. I enclose you an
old proof of the plant and
would be glad of your opinion
on it - although too late to
change the plate.

Did you have no use for
the specimens of palm seed, we
had a supply of them. They
were sent to us by ~~an~~ an importer
in Baltimore. We return them and
perhaps you will want it -
for your museum. I also
enclose a pod that may be

proposed the name *Xanthorrhiza tinctoria*,* but the article not appearing in a botanical work, writers on plants have mostly overlooked it and few have used the name, even as a synonym.

In most botanical and medical works L'Hertier is credited with naming the plant, and his name and spelling *Zanthorrhiza apiifolia* has been generally used:

ORTHOGRAPHY.—The generic name of the plant has been spelled in a variety of ways by botanical authors. *Zanthorrhiza* is the usual manner, but we find on search the following spellings: *Zanthorhiza*, *Zanthoriza*, *Zanthorrhiza*, *Zanthorrhiza*, *Xanthorrhiza* and *Xanthorhiza*. Marshall spelled it *Xanthorrhiza* and L'Hertier, *Zanthorrhiza*. The correct spelling, as now accepted by Watson, and to which attention was specially drawn by W. H. Leggett, in 1870, is *Xanthorrhiza*.

As far as we can find, Sprengel is the only botanist who has spelled it correctly; most writers follow L'Hertier, and make the two-fold error of beginning with an initial *z* and not doubling the *r*.

BOTANICAL AFFINITIES.—The genus *Xanthorrhiza* consists of only the one species described in this article and is confined to the Southern Allegheny range. In botanical affinities it stands between the two orders Ranunculaceae and Berberidaceae, and while by all systematists it has always been included in the former, our belief is that it belongs to the Berberidaceae and will finally be placed there. We would not, however, assume to make that change in this work contrary to all authorities, however strong our convictions may be.

In general aspect the plant resembles some evergreen species of *Berberis* so closely that it cannot help but be noticed at once, and the yellow color of the wood and chemical constituents are almost identical with those of *Berberis*. No other species of Ranunculaceae (excepting the abnormal genus *Clematis*, which agrees with the order in all other particulars) has a woody stem at all and none have the prominent constituent of the Berberidaceae (*Berberin*) in such quantity.

Xanthorrhiza agrees with Berberidaceae and differs from all other Ranunculaceae in having definite stamens. The principal reason why Bentham and Hooker refer it to the latter seems to be that these stamens (and other parts of the flower) are five, instead of three or a multiple of three; also because they are alternate with the petals. Baillon has shown that they are often ten and in this case alternate ones are opposite the petals, a position rare among plants generally, but common in the Berberidaceae.

The peculiar glandular petals of *Xanthorrhiza* are not found in other Ranunculaceae, but are found almost identical in size and appearance in several genera of the Berberidaceae.

Other points might be shown to prove, as we claim, that the genus *Xanthorrhiza* is wrongly classed.

* Dr. Woodhouse proposed the name because, as he states, "the stem is sometimes branched, hence the name simplicissima is not appropriate, and the leaves do not sufficiently resemble those of Parsley to be called *apiifolia*."

† On this subject Mr. Leggett says: "The English *Z* is never an equivalent for the Greek χ , and with the exception of *Zanthoxylum* all other botanical names beginning with χ in Greek are spelled with an *X*, quite a number commencing with this same syllable *Xantho*. Lindley and the English botanists generally seem to prefer the *X*, but on the continent *Z* prevails."

In this connection we are reminded of another point in which inaccuracy is frequent. The word is composed of two elements *xantho* and *rhiza*; now it is an invariable rule in Greek compounds that when the first part ends in a vowel and the second commences with an *r* that the *r* must be doubled. We therefore submit that the correct spelling should be *Xanthorrhiza*.—Wm. H. Leggett, in Bulletin of Torrey Botanical Club, 1870.

39
This page is short—
4

77

The woody root of *Xanthorrhiza* is so nearly like that of *Berberis repens* and *Berberis Aquifolium* that they could be substituted for each other in commerce, ^{without detection} and, ~~as is well known~~, ^{really} a large share of the so called drug *Berberis Aquifolium* is the product of *Berberis repens* and *Berberis nervosa*.

The woody root of *Xanthorrhiza* is so nearly like that of *Berberis repens* and *Berberis Aquifolium* that they could be substituted in commerce without detection.

of interest to you and
may be common enough.
I thought it in a fruit-
store was a curious one. It
was called "horn horn" and
said to come from South-
America. You can add them
to your collection if not
already in it.

I am sorry about our
name + condition Fischer but
working alone an overseas
is very apt to occur. There
was no one here man though
so I understand it only
I prefer to wait myself
of the latest information.

Asimina triloba and the
Persimmon when both-native
grown. The former is a
very common shrub in
Ohio and every Fall the
fruit- is quite-layers
sold in our markets the
same as bananas are with-
you. They do not- keep long
however and the taste- for
them is perhaps local. I do
not-think they are ever
shipped. These I sent- you
I bought- in Market. The
persimmons I gather from the
trees. They hang on till
Christmas and are not-
good until after Frost-
The green fruit- is very astringent-
I would write more for I
have lts- to say but- the
mail is in and I must- get-
ready for back- you will continue soon
as I see.

Nov 4 1886

Dear all:

It has been so long since I wrote you that I have forgotten half that I wanted to say. I sent you a book yesterday and have held it for more than a week expecting to write you when I sent the book.

You need not return the parts but keep them or present to some of your botanical friends. I enclose you a letter written to me which I think may be a good one but I am too busy to write any

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

1888

Would you accept it - please
explain matter to him.
I will not - wish you to know
that the English, as a
rule collect very poor
specimens. I have had
a box of three thousand
plants in from Germany
for over a month
and have not opened
it yet. It is found on
me & plainer every day that
I can never hope to
resume my botanical work
with the time I now
had as the time and attention
I give the business premises

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

188

inside matter and I can
not afford to let it
interfere with a business
of magnificent proportions and
I prefer I expect however
in a couple of years to
put some money in my
collection and hire the
work done that I formerly
did. At present I do not
feel able to do it as
we are straining every
nerve to pay of the
purchase debt of the
interest of the partner
whom we retained (I thought)
and at the rate of

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets;

Cincinnati, O.

188

have been saying we
will be kept in two
years. Did I write you
that David L. Day of Buffalo
wrote me and stated that
he thought I was right
in placing the Xanthoxigen
in the Berberidaceae.

I am anxious to know
what Dr. Gray & Watson
think of the matter.

Regarding the Gray memorial
I received the call and
intended to respond liberally
but it got buried under
a pile of letters that usually
accumulate on my desk.

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets;

Cincinnati, O.

188

and it went by default—
as I am afraid a great
many things by which are
left for me to attend to.

If I should get out
a search warrant and go
through that pile I would
find I am afraid numerous
inquiries of yours that I have
never answered, but I
know I have you have no
hard feelings as you understand
my position. It is concluded
by both my brothers that
a stenographer is badly needed
in the house as all three
are behind with you.

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

Dear Friend;- You see we have obtained matter about which I spoke in my last letter. We will now be able to give you more attention to your letters and queries. We are having our article on Magnolia copied, and shall send it to you for your perusal for such changes you may suggest. If you will make it out on a separate sheet of paper, the list of plants you wanted I can promise to supply them in a few days.

My Herbarium I have gotten in better shape. I recently changed my room and had to take the covers off the plants in order to move them. I shall have the young lady work on

June 7, 1886

Walter Deane,

Cambridge, Mass.

Dear Friend-; I suppose you think that I am getting more negligent than ever of my correspondents. Your letter containing information regarding Magnolia was duly received. Please accept thanks.

I am still striving to keep up my interest in Botanical matters, but I must confess that I have so much else on hand that I make very little progress. I have been trying this year to collect again, and as I can have my plants dried by the help in the store, it will be very little work to prepare a large number

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

The Standard, 2/11, No. Cincinnati

188

but I do not find time to get them. Our business is increasing all the time and the demands on me are very pressing. It seems as though I do not do half that I should do in the store, without regard to outside matters, as I must consider Botany.

I do not think a business man can ever hope to attain much as a Scientist.

I have had several letters from Prof Gray recently in regard to the "Hopaine" of Europe. It seems that some firm in London has been putting on the market an Alkaloid that they claim was made from the "American Wild Hop" and as it was widely sold in London Markets

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

188

it caused considerable inquiry to what the "American Wild Hop" is. I had not given any study to the subject and was not aware that the common Hop was an indigenous plant. Prof Gray informs me that there was no doubt about it being a native plant, yet there is no probability of its strobiles having any different properties from those of the common cultivated plant. I look upon the whole matter as a fraud and have not hesitated in so stating to Prof Gray and to the London parties who have written me on the subject.

I suppose that you are doing great works in the Botanical line and that your

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

The Standard, July 20, 1888

188

vacation season is now nearly at hand. Do you expect to spend it in the White mountains again this summer? There are some splendid Bot-

antists about the lower point of Lake Champlain with whom I exchanged several years ago

Namely

Prof. Brainard,

--- Pringle,

and a young man by the name of Horsford.

Should you visit in their locality I think it would pay you to hunt them up.

Our Drugs and medicines that is due in June has not even been started yet and will certainly be very much delayed in its appearance. It is a pity that having established

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

The Standard Ledy Co. Cincinnati.

188

a work on such a firm basis that we cannot give it the time that it should have. The fact is Deane, that the publication seemed a very small matter to us in comparison with other things we are interested in.

I recently sent your friend Prof Morong some specimens of *Ca. ex Careyana* which he seemed anxious to obtain. It is rather a common sedge with us but is in such demand for exchange that it must be very rare elsewhere.

We have running out of Cincinnati a Southern Rail-road that penetrates a very fine Botanical region. I often thought that I would like to make a study of the Flora

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

The Standard of the Profession

1881

through Kentucky and Tennessee that I could easily reach by this road, but have been deterred from it by the same old reason. I spent couple of weeks three years ago in Chattanooga and made an exceedingly rich find in those Southern swamps and on the mountain sides.

Let me hear from you often.

Your Friend,

Lloyd.

December 8th, 1886

Mr. Walter Deane,
 Cambridge, Mass.

Friend Deane;--

I send you by mail, to-day a package containing a few *Carexes* which I will ask you to kindly examine and advise me if any of them are incorrectly named. They are plants that I have never distributed before and they are named from descriptions in the *Manual*. I also send three specimens unnamed and will ask you to do me the favor to name them. They seem to differ from each other so slightly and I am not sure but what they are the same plant I distributed for a number of years under the name *Carex straminea* Var *festucacea*, but I am extremely doubt-

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists.

Court & Plum Streets;

Cincinnati, O.

2

188

ful about the naming from the fact that I do not think it is the straminea at all, and fruit always remains green as far as my observations have gone.

Please retain the specimens as I have a number of duplicates of all of them.

Trusting you will favor me, and thanking you for your past kindness, I remain,

Your friend,

C. G. Lloyd.

Dictated.

December 11, 1886

Mr. Walter Deane,
Cambridge, Mass.

Friend Deane:--

I enclose herein a list of the plants I am offering this season, and I would be glad to have you go over it and mark any that can be of use to you, as I have a large number of duplicates of most of them, and would be glad to send them. You have been very kind to me in looking up different subjects, and I will be most pleased to repay you in part when ever possible.

I believe last year you sent me a list of those you wanted and it was my intention to send them, but I changed the business and was forced to bundle

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
 Court & Plum Streets,
 Cincinnati, O.

2

188

up my specimens very hurriedly and they got all mixed up, and it has only been recently that I have had them straightened out. I lost a number of Western exchanges that would have been very desirable, and the arrangements had all been made.

Those crossed are not on hand at present. They are however, as you will find mostly common weeds that you will not want, and as I did not know last summer how my duplicates stood ~~unless~~ ^{I did not} gathering them. If I remember right, you marked a considerable number you would want in fruit, but I am afraid I will be able to supply these very readily, as I do not make a custom of collecting the fruit.

Your friend,

C. G. Lloyd.

January 24, 1882

Mr. Walter Deane,
Cambridge, Massachusetts.

Friend Deane:--

I am just in receipt of your postal card acknowledging the receipt of my package of plants, which reminds me that I have not written to you regarding them as I intended. I sent in the package a specimen of the Edelweiss, of which you have no doubt heard by reputation if you have not at present a specimen. It grows on the most inaccessible points of the Alps, often I am told next to a snow bank and is a great favorite with tourists who collect it as mementos of their trip. So extensive is this carried on that the Swiss Govern-

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
 Court & Plum Streets,
 Cincinnati, O.

The Standard Ledy Co. Cincinnati

2

188

ment, fearing the plant would be exterminated, passed very stringent laws preventing its collection.

You will notice that I enclosed a specimen of *Cardamine purpurea var rhomboidea*, as I have not been able to satisfy myself that it is any other plant, although it does seem it is out of its territory as given in Gray's Manual. The only other plant that it can possibly be, is *Cardamine rotundifolia* which differs according to the Manual in having runners. I have not seen any of the plant that grows around here but next Spring will observe very closely in order to satisfy myself as to its proper name.

In the package you will find a plant labeled

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

The Standard Lilly Co. Cincinnati

3

188

Cardamum hirsuta var *sylvatica*, about which I have always been doubtful whether it is ^{the} true type of the ~~former~~ ^{variety}.

You will notice also that we send both the *Anychia dichotoma* and the pubescent form of the same. They appear to be very different and it is the pubescent form that according to Gray's Manual is *Anychia dichotoma*, D.C.

The specimen of *Cancalis Anthriscus* is a thoroughly established plant covering large tracts around Cincinnati. I first noticed it about 10 miles up the river; the next season I found it along the river bank some three or four miles from the origi-

The Standard Safety Co. Cincinnati

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets;

Cincinnati, O.

4

188

nal station, and this last year I have seen it three or four miles directly back of the city and several miles from either station. There is no doubt that it has come to stay and is thoroughly established here. It is not merely found in the stations that I have mentioned in one or two plants but extends over acres. I would be glad if you would call Prof. Gray's attention to the plant as I think it is entitled to a position in the Manual.

I believe I sent you specimens of both species *Sanicula* which I cannot convince myself are both the *Canadensis* as per your former letter. There is certainly no two plants apparently more widely dis-

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets;

Cincinnati, O.

The Cincinnati City Co. Cincinnati

5

188

distinct than these, having entirely different fluorescence, leaves and one flowering almost three weeks before the other. In my exchanges I have obtained every possible species from all over the United States for the purpose of comparison.

I am doubtful about the specimen labeled *Aster* ~~*virginicus*~~ *virginicus* var *villosus* and will be glad if you would inform me. It is the most common Aster we have with us, growing most abundantly all over the hills in dry localities.

The *Artemisia annua* that ^{is sent} should without doubt be included in the Manual. It is most abundant and naturalized all about Cincinnati in every direc-

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists.

©-Manufactured by J. U. Lloyd & Co.

6

188

tion and on the banks of the Licking River directly opposite the city it forms the principal vegetation almost to the exclusion of every other plant.

I cannot bring myself to think that the plant sent as *Pilea tradescantia* is the *Tradescantia virginica*; indeed I do not see how any two plants of the same genus, or rather how any two species could be more differently characterized than those two. I do not know if the plant is ~~hairy~~ ^{*pilosa*} it not being hairy at all, but I think it is certainly distinct from the *T. virginica*.

In corresponding with a botanist in Wisconsin recently, he mentioned the *Carices* having been sub-

February 13, 1888

Mr. Walter Deans,
Cambridge, Mass.

Dear Deans:--

Your favor of February 13th at hand and I am obliged for calling attention to the plant labeled *Payson's* *Coronaria*. The shrub grows in the woods and my attention was not called to the difference between the leaves until recently when I received specimens from Minnesota with leaves similar to the typical shape which you enclose. I shall thoroughly investigate the tree that grows here, and will advise you further, and to the measure I will not contribute any more specimens.

During the year I studied botany, I collected

June 22nd, 1887

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane: --

Your welcome letter of the 19th inst. just at hand, and you have anticipated me a few days as I had been wondering for some time what had become of you, and intended to write. Having a few minutes to spare I will answer your letter immediately upon its receipt so as to insure speedy reply.

I have not collected a single plant this year, but it makes my heart bleed to see them bloom and pass away without a stalk being secured, especially as I have found many rarities this year a number of new plants that I have never before collected.

Manufacturing Pharmacists.

188

The artist for our work, who is an easy-going kind of fellow, talented but difficult to get to accomplish anything, has been pretty hard pushed this summer for money and being more than usually anxious to work, I have determined to make the most of it, and am hence devoting my Sundays and all spare time with him drawing pictures. We have so far drawn full page ^{and} dissections of all the medicinal plants as they have come into bloom in this neighborhood this summer, and if I keep him at work another year I shall have almost a full set of the pictures we are needing. The man is a wonderful genius and as you know, makes wonderfully accurate pictures, and although we are investing several

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

3

188

hundred dollars, still we think from business principles it is a splendid investment. My idea is to illustrate all the plants that come into bloom around here this year, and next year with the aid of friends at a distance obtain materials and pictures for the missing medicinal plants that do not grow here. I calculate that it will take a couple of thousand dollars to carry the subject through and you can see if I did not think the pictures good investments I would not put that amount of money in it.

The bulbs of Scilla which I sent you were collected on the dry hillside facing the Ohio river within the corporate limits of the city but about

Manufacturing Pharmacists.

Lloyd Brothers,

 Wholesale Druggists,
 Court & Plum Streets,
 Cincinnati, O.

4

188

five miles up the river from the business centre of the city. I think it was 1st May of 1885 that they were sent you.

I take pleasure in telling to-day an extra copy of No. 2 which through some error did not reach you. Regarding the publication, No. 4 has all been printed and will be mailed the latter part of this week and No. 5 is well under way. I think now I can see my way through a "catching up" in issuing the publication and getting it out on time; in fact, I have the botanical work considerably ahead. The delay is caused in my brother's department and in getting the medical articles.

What are you going to do during vacation this

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists.

Court & Plum Streets;

Cincinnati, O.

5

188

summer? If you were engaged in a business that would demand your entire time you would experience what a feeling of relief it would be for a man to say he had two or three months to devote as he wished.

There is lying before me on the table a proof of my botanical article on *Gaulophyllum* which will probably appear in No. 5. In studying up the botanical history of this plant there is a fascination to me in raking up the old records. I did not think that *Gaulophyllum* had such an interesting history until I had spent several evenings studying it out. The study is something like a detective's work, one clue leading to another until finally we have the whole history before us.

August 15th, 1887

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:—

Your welcome letter of the 15th at hand.

Please accept thanks for information regarding the old references to Blood Root. In your previous letter on this subject, you had a quotation from Morineus for the *Herbarius Ethelmensis*. As I wrote you before I have been unable to learn of any such author as Morineus and why the quotation was made as given. I will be very glad to have the subject traced up as it seems that Morineus was the first to suggest the name *Sanguinarius* for our plant.

I have just returned from a very pleasant va-

cation of a week, which I spent at Esculapia, a watering resort about 100 miles up the river and had a most enjoyable time indeed, there being good whist players, good waltzers, and pretty girls to talk to. I should not have returned so soon, but my brother is going to Boston Saturday and work is considerably piled up. I should be very glad indeed if you would see my brother while he is in your city. You will find him however, thoroughly business and and with very little ^{care} for scientific subjects, which he is inclined to think an unprofitable pursuit.

Your friend,

Lloyd.

December 1st, 1887

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

Your postal card of the 15th inst. just at hand. I was very glad to hear from you, but grieved at the sad news it bore. Dr. Gray's death will be an irretrievable loss to botanists in this country. Had he lived to complete the "Synoptical Flora" it would have been the crowning work of his life. Who will take his place? Is there any one capable of filling his shoes? I have heard it whispered that Coulter would probably be his successor and that his removal to your city probably had that in view. It has always seemed to me, however, from

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,
Cincinnati, O.

The Standard Lilly & Co. Cincinnati

this distance, Prof. Gray had Watson to training. Of course, I have nothing but scraps on the subject, but would be glad to confidentially of your views on the matter.

Both the Botanical Gazette and the Torrey Bulletin Club are received, but coming in with a lot of other journals they are all placed on a file upstairs without my seeing them, and I do not think I have read one for some months and so I am not aware of what is going on in the botanical world. I had not heard of Prof. Gray's illness nor of Suedorf's affliction. I understand that Suedorf is a very enterprising and bright young man and it is truly sad that he should lose his mind in this way.

3

188

Did you see the notice on the inside cover of our last issue. I presume that many of our subscribers think the work is discontinued but such is not the fact however, and numbers will be sent in order to complete the present volume as per the announcement, and if we are able to issue it hereafter it will be in book form, confidentially, though Deane, I do not think the work will be continued in its present detailed form. It would certainly take a lifetime to complete the subject on the plan on which we have started, and while I am assured that we would have good financial support to the end, I do not like to look forward to such an interminable

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

The Standard Safety Co. Cincinnati

4

188

task.

I am now at work writing a condensed medical flora, which I expect will be ready in the course of about three years. I have already gotten up to the Cruciferae. The work will be thoroughly illustrated with full plates of every medicinal plant together with the sections of the flowers as they have appeared in the Drugs & Medicines. A good illustrated medicinal botany is a desiderata now. Thousands of physicians and druggists who do not care to enter into the study of botany to the extent of learning technical terms would be glad of some means of recognizing the medicinal plants

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

by popular descriptions and pictures. I have in-
 vested a thousand dollars in artist's work during
 the last year and expect another thousand will
 complete the subject and we shall endeavor to have
 our pictures all made during the coming year. By
 the way, this is not an outlay on our part, as the
 on the drugs & medicines have paid all expenses so
 far and there is certainly enough surplus we think
 to finish it.

I enclose herein a list of plants and will be
 glad if you will favor me by marking such as you
 can furnish, although it is not probable that I
 shall have to call on you for any of them as I can

dictated.

FRESH PLANTS DESIRED.

The following list are plants which do not grow convenient to Cincinnati, and which we would be glad to obtain for the purpose of illustration for our work, the *Drugs and Medicines of North America*. This work has received the most flattering praise from Botanists, for the accuracy of its illustrations, which are made by a first-class artist, immediately under the supervision of the Authors and from living and fresh plants that grow around Cincinnati and nearly a thousand dollars were expended on the work. It is the wish of the authors to obtain during the coming season (1888), fresh specimens of the following fresh plants in fruit and flower from which to prepare illustrations. Hence we are obliged to call on our botanical Friends. Due credit will be given in all the work to all who assist us with specimens, and all expense of postage and expressage will be gladly paid by us.

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

February 8th, 1883

Mr. Walter Peane,
Cambridge, Mass.

Dear Peane:--

I am still in a quandary regarding the species of *Cornus* that I sent you under the name *Cornus paniculata*, and on comparing it with perhaps a half dozen specimens of the *Cornus paniculata* from different sections of the country, I readily see that the leaves are rounder than in any of the specimens but the entire genus of *Cornus* is confused and mixed up in my mind. My specimen differs more widely from the specimens of *Cornus sericea* than it does from the *paniculata*.

I have gotten my herbarium now in the best

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

2

188

shape it has ever been, having most of my plants being mounted and bound. One of the young ladies in our employ has been busy working on it, mounting specimens &c. for the last two or three months. I have been filling out the volumes that are not full and binding new volumes and I find now that I have 142 volumes, averaging I think, about 200 plants in the volume, which as you see will figure at 28,000 specimens. Besides, I have gotten my duplicates in good shape and know exactly what I have on hand and I propose next year to collect more lively than ever. In fact, I am fitting up a room especially for drying plants and I have a couple of boys that

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

3

188

I will set at the work of changing the papers.

I do not have the time and perhaps have not the inclination for a close study of the materials that I am accumulating, but I take a great deal of pleasure in increasing the collection and it will some day be invaluable to some such institution as Harvard College. It is my ambition to have the largest collection in this country if not in the world and with the means and facilities at my command and the start I have I think I will succeed in accomplishing this.

You speak in your last letter, asking if the plants desired are fresh plants. Will state that

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,
Cincinnati, O.

4

188

they are, but that we can perhaps secure most of them next year nearer home, but we will be glad if you will favor us by marking such as grow in your neighborhood and if we cannot obtain them elsewhere may call on you. We have had a number of botanical boxes made in which the specimens can be shipped by express fresh and in good condition until they reach us.

For fear that you have mislaid the list we enclose a couple of others.

A long time ago, perhaps a couple of years you sent me a list of plants, for which you desired dates. The matter was not forgotten but postponed from time to time and I enclose you list with the

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets;

Cincinnati, O.

5

188

dates as complete as I can furnish them. Of some of the plants collected a long time ago I did not preserve the dates.

I make a point to keep all your letters, Deane, and find pleasure in taking them out and reading them over occasionally.

With my best regards, I remain,

Your friend,

C. G. Lloyd.

P.S.:--I noticed on the list of plants, *Praxineus quadrangulata*. I have not been able to determine to my satisfaction whether it is the *Praxineus quadrangulata* or *Praxineus Sambucifolia*. It would seem that the indications in the manual would show

Manufacturing Pharmacists.

February 27th, 1883

Mr. Walter Deane,
Cambridge, Mass.

Friend Deane:--

I hand you herewith a label, which I will ask you to kindly substitute in your herbarium for the plant that was labeled *Oxalis corniculata* var. *striata*, form of large flowers and leaves. It has been decided by Mr. Trelease that this is a good species and I have always thought myself that it was entitled to this rank. This seems to be quite distinct to me. I trust that everything is getting along nicely with you.

Yours truly,
Lloyd.

THE MILK IN THE COCOANUT.

Some two and a half years ago we introduced a preparation under the name Lloyd's Hydrastis, which met with so much favor by the medical profession that it has displaced almost entirely other hydrastis preparations, and especially a certain glycerine and water solution has suffered, which formerly had an extensive sale. The manufacturers of this preparation have tried in vain to injure the sale of Lloyd's Hydrastis, and have through traveling men and otherwise circulated the story, first that "Lloyd's Hydrastis was simply a solution of the White Alkaloid," afterwards that "Lloyd's Hydrastis was merely a glycerine solution containing Alum." As long as these attacks were made in a vague way, we did not deign to reply, knowing that our patrons would consider the source and animus of the attacks.

In the March issue of the E. M. Journal of Cincinnati in the advertising pages appears an alleged analysis of Lloyd's Hydrastis, made by a reputable chemist, which we reproduce on the reverse. It is now time for us to act, and we propose to do so in a manner that will be both heard and felt. The challenge appearing on the reverse of this we have sent to the party publishing the alleged analysis. If it is not accepted, can we ask further vindication before the pharmacists of this country of the falsity of the charge?

WE ASSERT

That the published analysis is not correct.

That Lloyd's Hydrastis as found in original bottles is rich in the peculiar White Alkaloid of Hydrastis.

It only contains such constituents as are derived from Hydrastis root, and every pound sold has been manufactured from Hydrastis alone without the addition of any substance whatever, excepting the solvents.

We grant that it contains inorganic compounds, but they are derived from hydrastis root, and are necessary components of any preparation that represents the medicinal action of the drug.

When the process was discovered by us we submitted it in confidence to the Chairman of the United States Pharmacopoeial Committee,

DR. CHAS. RICE of New York

Than whom there is perhaps none more eminent in scholarship. On the publication of this recent alleged analysis, he writes: "In the very beginning when Lloyd's Hydrastis was first put on the market, I was then fully aware what the preparation contained, so that the announcement now that it contains inorganic compounds is nothing new to me. I have known the whole process for several years, and Mr. Lloyd in his first communication showed that the presence of these compounds were an absolute necessity. My judgement tells me that Mr. Lloyd has acted honorably and honestly during all this period, reserving only that which could legitimately be classed under the head of business secrets, but placing everything else at the disposal of the public."

PROF. L. E. SAYRE,

(Professor of Pharmacy and Materia Medica, Dean of department of Pharmacy, Kansas State University, writes under recent date: "Mr. Lloyd submitted to me the process by which it was produced about the time the preparation appeared. I desire to state that the process is entirely different from any known, and gives a product different from that made by any other method printed. The inorganic salts that it contains are the result of manipulation and not admixture. They are obtained from hydrastis root, and these components are not present in any other preparation of the plant that is known to me."

Physicians and pharmacists who have honored us with their patronage and confidence, need have no fears but that we can demonstrate in any way necessary, that no misrepresentations have been made by us regarding the merits, constituents, or source of Lloyd's Hydrastis.

SEE OTHER SIDE.

LLOYD BROTHERS, Cincinnati, O.

ANALYSIS OF LLOYD'S HYDRASTIS.

In the March issue of the E. M. Journal of Cincinnati among other advertisements appears the following :

"I have carefully examined the solution called "*Lloyd's Hydrastis*," supposed to contain Hydrastin, the white alkaloid of Hydrastia. The sample examined was purchased from B. O. & G. C. Wilson, of Boston. The solution is a glycerine preparation. It contains Alumina and Magnesia, and traces of an organic base, which may be Hydrastin;--the quantity is too small for determination. The white precipitate caused by the addition of Ammonia-water to "*Lloyd's Hydrastis*" is a mixture of hydrate of Alumina and hydrate of Magnesia, and is not an alkaloid. A pint bottle of "*Lloyd's Hydrastis*" contained 19½ grains of Alumina and 15½ grains of Magnesia."

With due respect to the talented professor, over whose signature the above appeared, we desire to say that the alleged analysis of Lloyd's Hydrastis (if it was made) produced results that are *far from facts* and we are prepared to defend the statement by a substantial forfeit.

We have sent by registered mail on March 7th, 1888 to the party publishing this analysis the following letter:

(COPY.)

We have placed a certified check for \$3,000 with the National La Fayette Bank of this city, and we propose to wager this amount, that we can substantiate the following propositions:

\$1,000 that the alleged analysis of Lloyd's Hydrastis published in the E. M. Journal for March, 1888, DOES NOT represent the constituents of Lloyd's Hydrastis, either organic or inorganic, as it is found in the market in original bottles.

\$1,000 that Aluminum and Magnesium compounds are contained in the roots of Hydrastis Canadensis of commerce, and that these substances are derived by our process from the hydrastis, and are only part of the components of the preparation.

\$1,000 that Lloyd's Hydrastis as manufactured by us, contains an ABUNDANCE of the white alkaloid of Hydrastis.

We do not propose to sell the process for making Lloyd's Hydrastis, and this wager is on condition that it be decided by three prominent pharmacists of national reputation, who will pledge themselves that the process as demonstrated to them will be held confidential.

Any of the following will be accepted, one of the number to be selected by us, one by you, and the third by these two:

John M. Maisch, Philadelphia, Pa., Editor of Journal of Pharmacy; Chas. Rice, New York, Editor of American Druggist; Chas. Mohr, Mobile, Ala.; S. A. D. Sheppard, Treasurer of A. P. A.; Prof. C. Lewis Diehl, College of Pharmacy, Louisville, Ky.; Prof. L. E. Sayre, University of Kan.; Prof. Henry Trimble, Philadelphia College of Pharmacy, Philadelphia, Pa.; Roberts Bartholow, M. D., Philadelphia, Pa.; Prof. Jos. R. Remington, Philadelphia, Pa.; E. A. Ebert, Chicago, Ill.; Prof. J. A. Jeancon, Cincinnati, Ohio; Geo. W. Sloan, Indianapolis, Ind.; Wm. Saunders, London, Ontario.

We defy you to assert that we have selected these gentlemen on the grounds that any of them would give an unfair decision.

Should you desire to accept this wager, you can place an equal amount with the National La Fayette Bank of this city, to be placed in the hands of the gentlemen selected to decide, the amount lost to be paid to the Children's Home of this city.

If we do not hear from you by the 12th of March, we shall conclude that you do not wish to accept, and we shall publish this fact to the world.

Yours truly,

THE WM. S. MERRELL CHEMICAL CO.
Cincinnati, O.

GENTLEMEN:—I have carefully examined the solution called "*Lloyd's Hydrastis*," supposed to contain Hydrastin, the white alkaloid of Hydrastia. The sample examined was purchased from B. O. & G. C. Wilson, of Boston. The solution is a glycerine preparation. It contains Alumina and Magnesia, and traces of an organic base, which may be Hydrastin;—the quantity is too small for determination. The white precipitate caused by the addition of Ammonia-water to "*Lloyd's Hydrastis*" is a mixture of hydrate of Alumina and hydrate of Magnesia, and is not an alkaloid. A pint bottle of "*Lloyd's Hydrastis*" contained $19\frac{1}{4}$ grains of Alumina and $15\frac{3}{4}$ grains of Magnesia.

Yours very truly,

LEWIS M. NORTON,

[Professor of Organic Chemistry,
Massachusetts Institute of Technology.]

THE WM. S. MERRELL CHEMICAL CO.'S

EXPLANATION TO THE MEDICAL PROFESSION.

[See preceding page.]

The analysis of the secret compound yclept "*Lloyd's Hydrastis*" has been in our possession for nearly a year past; hence the statements which have been made to physicians concerning the article. The time has come when *protection* should be afforded the medical profession by boldly exposing the alleged scientific work of pseudo chemistry.

The "*Jugglery of Chemistry*" (see Professor Howe's article on "*Asepsin*," page 241, May number of the *Eclectic Medical Journal*) has been carried too far:—the skill of the expert analyst unmasks fraud in medicine; lays bare the specious claims of the pretender; and protects the honest manufacturer, physician and general public alike against adulteration, sophistication and false allegations as to medicinal strength and composition; whether in food, drink or medicine.

CONCLUSIONS.

When you order a preparation of *Hydrastis*, be sure you get it. Alum and Magnesia may be valuable medicinal agents; but their substitution for the expensive White Alkaloid of the Golden Seal is a gross abuse of confidence and should receive the condemnation of every honest practitioner of medicine.

The analysis of other experts will follow, provided the privilege of this page is not denied us.

leaving this summer and to lay in a large number of
 duplicates. I have recently purchased a horse and
 buggy, which will enable me to reach his woods
 every day or two for an hour or so.

Your letter regarding the Hydrastis reached me
 yesterday. I enclose herein an advertisement that
 appeared in the F.M. Journal for March and which was
 the start of the whole controversy. The W.S.M. Co.
 are business rivals of ours and their preparation
 of Hydrastis has been displaced by ours, hence their
 animosity in the matter. Had the charge come from
 this house we would have paid no attention to it
 but you will see that it is endorsed by Prof. Norton
 of the Massachusetts School of Technology. It is

maliciously false as is easily perceived by any chemist who analyzes Lloyd's Hydrazin and we propose to prove it is so by authorities that cannot be disputed including the leading chemist of your own city.

When we have our testimony together we intend bringing charges against Prof. Norton before the Board of the Institute of Technology, of making a false analysis greatly to our injury. We will ask you to keep this however, confidential as we would not wish our programme anticipated. It is a shame that Prof. Norton is he is a man of any standing, would allow himself to be used as a tool by such an unprincipled firm as the W. S. M. Co. but as he

April 30th, 1883

Mr. Walter Deane, -
 Cambridge, Mass.

Dear Deane:--

We mail you under separate cover, printed copy of the charges we have just made before the Mass. Institute of Technology against Prof. Norton. We have also mailed these charges to all the professional men of this country and as we have a clear case we do not see how the "Tech." can avoid forcing an explanation from Norton.

You are on the grounds and will probably hear the subject discussed by the professors of the school and others who are acquainted with Norton. We would be glad if you would call attention to the subject to Prof. Miles and learn if possible what

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

188

is the general opinion of the friends of Prof. Norton on the subject. Of course, you need not pose as a friend of ours but merely as having heard of the charges and curious to know what will be the outcome.

We are sorry to be compelled to publish charges that reflect on anyone connected with the "Tech.," but the truth is that Prof. Norton has allowed himself to be made a tool by the most unprincipled manufacturing concern in this country whose animosity to us is merely the result of jealousy. We would be glad to hear from you in full on the subject or ~~the subject~~, please, as we are a little anxious to know what effect it has on Prof. Norton's health.

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

We are pursuing this matter so bitterly, not because we are hurt by the publication of the article as the facts are that the sale of it is constantly increasing and it has no effect whatever, unless it be to advertise the preparation, but when a party attacks our character with a totally false charge we propose to vindicate our selves at any cost and show up the baseness of the attack.

Your friend,

L. Lloyd.

AN OPEN CHARGE
—AGAINST—
PROF. L. M. NORTON,
PROFESSOR OF CHEMISTRY,
—OF THE—
Massachusetts Institute of Technology.

CINCINNATI, O., April 12, 1888.

To the Board of Directors of the Massachusetts }
Institute of Technology. }

GENTLEMEN:—We are compelled to prefer a charge as follows, against Prof. L. M. Norton, of your Institute, and we respectfully ask investigation and action in the matter.

In the March issue of The Eclectic Medical Journal of Cincinnati, (and elsewhere also) appeared the following "analysis" of a pharmaceutical preparation that we manufacture under the name of "Lloyd's Hydrastis."

(COPY.)

MASSACHUSETTS INSTITUTE OF TECHNOLOGY,

BOSTON, March 9th, 1887.

THE WM. S. MERRELL CHEMICAL Co.,
Cincinnati, O.

GENTLEMEN:—I have carefully examined the solution called "*Lloyd's Hydrastis*," supposed to contain Hydrastin, the white alkaloid of Hydrastia. The sample examined was purchased from B. O. & G. C. Wilson of Boston. The solution is a glycerine preparation. It contains Alumina and Magnesia, and traces of an organic base, which may be Hydrastin:—the quantity is too small for determination. The white precipitate caused by the addition of Ammonia-water to "*Lloyd's Hydrastis*" is a mixture of hydrate of Alumina and hydrate of Magnesia, and is not an alkaloid. A pint bottle of "*Lloyd's Hydrastis*" contains 19½ grains of Alumina and 15½ grains of Magnesia.

Yours very truly,

LEWIS M. NORTON,

[Professor of Organic Chemistry,
Massachusetts Institute of Technology.]

The above analysis issued under the name of your Institute, was made the basis of a charge against our integrity, in a public advertisement, by a rival manufacturing house, which advertisement we append. We charge:

1st. That the foregoing analysis is absolutely false, and does not represent the constituents of "*LLOYD'S HYDRASTIS*," either organic or inorganic, as it appears in commerce in original bottles.

2nd. That it misrepresents the preparation in organic constituents in the statement that "LLOYD'S HYDRASTIS" does not contain an appreciable amount of the White Alkaloid of Hydrastis, a principle to which the preparation is largely supposed to owe its medicinal properties and which, we assert, is invariably present therein in abundance.

3d. That the statement by Prof. Norton, that the precipitate thrown down from LLOYD'S HYDRASTIS, by Ammonia-water, is "a mixture of hydrate of Alumina and hydrate of Magnesia," is incorrect. Such a precipitate contains not only portions of the White Alkaloid of Hydrastis, but without exception is composed very largely of CALCIUM Compounds.

4th. That Prof. Norton furnished this false analysis to a business rival of our house for a consideration, and when his attention was called, by us, upon its first appearance, and in a generous manner (see our letter herewith), to the fact that it did not at all represent the preparation, he refused to reconsider or correct it, but referred all questions concerning his own responsibility as a chemist to the party who employed him to make the report.

In support of our charges against Prof. Norton, we beg to present the following evidence.

1st. Our letter to Prof. Norton (enclosed herewith), and his reply, which we append.

(COPY.)

MASSACHUSETTS INSTITUTE OF TECHNOLOGY.
Boston, March 12th, 1888.

LLOYD BROTHERS,
Cincinnati.

GENTLEMEN:—In regard to all questions relating to the analysis of the sample of hydrastis mentioned in your letter of March 8, 1888, I must refer you to the Wm. S. Merrell Chemical Co. of your city, by whom I was employed to make the analysis.*

Yours very truly,

LEWIS M. NORTON.

2nd. ANALYSIS BY EDWARD S. WOOD, M. D., PROF. OF CHEMISTRY, CHEMICAL LABORATORY, HARVARD MEDICAL COLLEGE.

"I bought of Messrs. T. Metcalf & Co., a bottle of LLOYD'S HYDRASTIS, on March 30th, and have analyzed the same for the purpose of ascertaining whether it contains any alkaloid or not, and, if so, what alkaloid was present." (Here follow the tests that were used and the results.) "From my results I have no hesitation in reporting that the preparation of LLOYD'S HYDRASTIS, procured by me in the open market, contained a very considerable proportion of the ALKALOID HYDRASTINE. All the

* We challenged the men he refers to as his employers, by a \$2,000 forfeit, to protect their analysis; they declined, and Prof. Norton has no right to refer us to persons who deserted him after maliciously using his name and that of your worthy institution, in a public attempt to injure our character.

reactions could be obtained with the alkaloidal residue from about fifteen cubic centimeters of LLOYD'S HYDRASTIS, showing that a *large amount of alkaloid is contained in the preparation.* I made no attempt to measure it quantitatively."

3d. ANALYSIS BY E. F. DAVENPORT, M. D., STATE ANALYST, BOSTON, MASS. (MEMBER OF THE AMERICAN CHEMICAL SOCIETY, ALSO OF LONDON, PARIS AND BERLIN, OF THE BRITISH SOCIETY OF PUBLIC ANALYSTS, ALSO GERMAN SOCIETY OF ANALYTICAL CHEMISTS, LATE PROF. OF ANALYTICAL CHEMISTRY, MASS. COLLEGE OF PHARMACY.)

"I have personally purchased, of B. O. & G. C. Wilson, of Boston, an original, unopened, sealed one-pint bottle of LLOYD'S HYDRASTIS and have opened and tested it, with the following results. It contains a white alkaloid which crystallizes out from alcohol and responds in its reaction to those characteristic of Hydrastine, the white alkaloid of Hydrastis Canadensis, as given in Dr. A. B. Prescott's work on 'Organic Analysis.'"

4th. ANALYSIS BY EDGAR L. PATCH, PROFESSOR OF THEORY AND PRACTICE OF PHARMACY, MASSACHUSETTS COLLEGE OF PHARMACY, AND DIRECTOR OF THE PHARMACEUTICAL LABORATORY, BOSTON, MASS.

"I have purchased an original bottle of LLOYD'S HYDRASTIS, and have personally examined the same for the presence of Hydrastine, the white alkaloid of Hydrastis Canadensis. The alkaloid I find to be present, and have satisfactorily determined and separated it."

5th. ANALYSIS BY EDWARD W. RYUNYON, PH. G., DEAN OF THE FACULTY OF THE CALIFORNIA COLLEGE OF PHARMACY, SAN FRANCISCO, CAL.

"I purchased in this market a bottle of LLOYD'S HYDRASTIS, I removed the metal cap, withdrew the cork, and carefully tested the contents for the alkaloid Hydrastine, and I found a *large quantity of this alkaloid.*"

6th. ANALYSIS BY CURTIS C. HOWARD, M. Sc., PROFESSOR OF CHEMISTRY AND TOXICOLOGY, STARBUCK MEDICAL COLLEGE, COLUMBUS, O.

"I have examined a bottle of LLOYD'S HYDRASTIS, that I obtained of a wholesale drug house in Columbus. I find it to contain the alkaloid Hydrastine in considerable quantity."

7th. ANALYSIS BY ROBERT B. WARDER, PROFESSOR OF CHEMISTRY, HOWARD UNIVERSITY, WASHINGTON, D. C.

"I have purchased a bottle of LLOYD'S HYDRASTIS, in the original wrapper, from the stock of a Washington druggist, and immediately after opening the bottle I tested the contents myself, as follows: In the examination for Hydrastine I added a few drops of Mayer's solution to 5 c. c. of LLOYD'S HYDRASTIS, which immediately gave an abundant white alkaloidal precipitate entirely soluble in an equal volume of alcohol. "This precipitate upon examination proved to be a hydrastine compound. The alkaloid was separated from other portions of Lloyd's Hydrastis, purified, and conclusively shown to conform to the recorded reactions of hydrastine" (detail tests were given).

8th. ANALYSIS BY W. SIMON, PH. G., PROFESSOR OF CHEMISTRY, MARYLAND COLLEGE OF PHARMACY, BALTIMORE, MD.

I have bought in the Baltimore market a bottle of LLOYD'S HYDRASTIS, and find upon examination that it gives with Mayer's solution an abundant quantity of a curdy precipitate, which when further examined unmistakably proves to be of AN ALKALOIDAL NATURE, and contains NEITHER COMPOUNDS OF ALUMINUM NOR MAGNESIUM. If the compounds of the latter elements are eliminated from the liquid by precipitation, the filtrate gives the same abundant quantity of an ALKALOIDAL PRECIPITATE with the above mentioned or with other suitable reagents." This alkaloid was shown to be Hydrastine by suitable tests.

9th. ANALYSIS BY WM L. DUDLEY, M. D., PROFESSOR OF CHEMISTRY, VANDERBILT UNIVERSITY, NASHVILLE, TENN.

"I have made an examination of LLOYD'S HYDRASTIS. I purchased a bottle in open market at Nashville. I broke the seal and tested it thoroughly, and isolated the alkaloid Hydrastine. I can certify that I found an ABUNDANCE OF THAT ALKALOID."

10th. ANALYSIS BY JAS. G. HYNDMAN, M. D., PROFESSOR OF MEDICAL CHEMISTRY, MEDICAL COLLEGE OF OHIO, CINCINNATI.

"In order to make an examination of LLOYD'S HYDRASTIS, I purchased a bottle in original package from Messrs. C. E. Potts & Co., of this city. I tested it carefully and found it to contain an abundance of the alkaloid Hydrastine."

11th. AFIDAVIT OF J. U. LLOYD.

The State of Ohio, }
Hamilton County, ss: }

J. U. Lloyd, being duly sworn, says:

That he is a Member of the firm of LLOYD BROTHERS, and has charge of the laboratory of said firm.

That LLOYD'S HYDRASTIS is, and has been from the first, manufactured under his personal supervision.

That it is made from the hydrastis root of commerce, and does not contain any chemical matters aside from those contained in the crude drug, and such solvents as are necessary to hold them in solution.

That it contains as much of the white alkaloid of Hydrastis in combinations, as can be safely employed, according to the experiments of Prof. Robert E Sattler, and others.

That this alkaloid is in sufficient quantity and such combinations as to be always indicated by the simplest true alkaloidal tests.

That every lot of the preparation has been manufactured by a method that renders it impossible for it to be free from the alkaloid Hydrastine, and that he has retained and has now in his possession a pint sample bottle of each lot that has been manufactured, and has recently tested each bottle, and found in each the characteristic and unmistakable evidence of the full proportion of white alkaloid Hydrastine.

That each sample, upon appropriate tests, yields calcium compounds freely, and that the precipitate thrown down from each sample by adding ammonia-water to it, invariably contains much calcium in combination.

J. U. LLOYD.

Sworn to, before me, and subscribed in my presence, the 17th day of April, 1888.

GEO. W. CORMANY,

Notary Public,

Hamilton County, Ohio.

[Seal]

(Copy of Charges as it appears in Advertisement based on Norton's Analysis.)

STARTLING!—Read the following letter, and see the following for explanation.

MASSACHUSETTS INSTITUTE OF TECHNOLOGY.

THE WM. S. MERRELL CHEMICAL CO.,
Sixth Street and Eggleston Ave.,
CINCINNATI, O.

(COPY OF LETTER WE WROTE PROF. NORTON.)

CINCINNATI, March 8th, 1888.

Prof. LEWIS M. NORTON,
Boston, Mass.

Dear Sir:—

We hand you herein an analysis of Lloyd's Hydrastis which appeared over your signature, and would call your attention to the uses made of the same by a competing manufacturing house in this city. We beg to state that we are amply prepared to defend ourselves in this matter, and propose to do so, but wish to avoid bringing you into trouble, hence, we deem it well to write a friendly letter and give you opportunity to explain. You will notice in the circular that we enclose herewith, that we have not mentioned your name, and aim to protect you, as we believe you have in some way been imposed upon. In what manner we are unable to say, but perhaps you can determine.

There is one statement made in the analysis of Lloyd's Hydrastis that we desire to have corrected over your signature, to the justice of which you will probably agree. It is as follows:

"It contains traces of an organic base which may be Hydrastine, but the quantity is too small to determine."

The facts are that the preparation contains, and has always contained, an abundance of the hydrastine alkaloid, and we suggest that you verify our statement by the well known Mayer's Solution, purchasing for yourself a bottle of Lloyd's Hydrastis from any house in Boston.

We hand you herein a list of dealers in Boston who carry the preparation in stock.

Do not think that we are bold in asking this reconsideration. Instead, we trust that you will agree that our aim toward you is in the most friendly spirit, and we believe that you will gladly, and at once accede to our request, thereby correcting the former injustice as far as possible.

We know that analyses are sometimes made by students and usually unimportant, may be signed by their instructors, and we question if this is not the case in this instance. Perhaps if so, the name of the student who made the details of this analysis would help the whole matter and relieve yourself.

We propose to vindicate ourselves in the next issue of the Journal in which this analysis has appeared, and ask that you take immediate steps in the premises.

Yours truly,

LLOYD BROTHERS.

THE MILK IN THE COCOANUT.

Some two and a half years ago we introduced a preparation under the name Lloyd's Hydrastis, which met with so much favor by the medical profession that it has displaced almost entirely other hydrastis preparations, and especially a certain glycerine and water solution has suffered, which formerly had an extensive sale. The manufacturers of this preparation have tried in vain to injure the sale of Lloyd's Hydrastis, and have through traveling men and otherwise circulated the story, first that "Lloyd's Hydrastis was simply a solution of the White Alkaloid," afterwards that "Lloyd's Hydrastis was merely a glycerine solution containing Alum." As long as these attacks were made in a vague way, we did not deign to reply, knowing that our patrons would consider the source and animus of the attacks.

In the March issue of the E. M. Journal of Cincinnati in the advertising pages appears an alleged analysis of Lloyd's Hydrastis, made by a reputable chemist, which we reproduce on the reverse. It is now time for us to act, and we propose to do so in a manner that will be both heard and felt. The challenge appearing on the reverse of this we have sent to the party publishing the alleged analysis. If it is not accepted, can we ask further vindication before the pharmacists of this country of the falsity of the charge?

WE ASSERT

That the published analysis is not correct.

That Lloyd's Hydrastis as found in original bottles is rich in the peculiar White Alkaloid of Hydrastis.

It only contains such constituents as are derived from Hydrastis root, and every pound sold has been manufactured from Hydrastis alone without the addition of any substance whatever, excepting the solvents.

We grant that it contains inorganic compounds, but they are derived from hydrastis root, and are necessary components of any preparation that represents the medicinal action of the drug.

When the process was discovered by us we submitted it in confidence to the Chairman of the United States Pharmacopoeial Committee,

DR. CHAS. RICE of New York

Than whom there is perhaps none more eminent in scholarship. On the publication of this recent alleged analysis, he writes: "In the very beginning when Lloyd's Hydrastis was first put on the market, I was then fully aware what the preparation contained, so that the announcement now that it contains inorganic compounds is nothing new to me. I have known the whole process for several years, and Mr. Lloyd in his first communication showed that the presence of these compounds were an absolute necessity. My judgement tells me that Mr. Lloyd has acted honorably and honestly during all this period, reserving only that which could legitimately be classed under the head of business secrets, but placing everything else at the disposal of the public."

PROF. L. E. SAYRE,

(Professor of Pharmacy and Materia Medica, Dean of department of Pharmacy, Kansas State University), writes under recent date: "Mr. Lloyd submitted to me the process by which it was produced about the time the preparation appeared. I desire to state that the process is entirely different from any known, and gives a product different from that made by any other method printed. The inorganic salts that it contains are the result of manipulation and not admixture. They are obtained from hydrastis root, and these components are not present in any other preparation of the plant that is known to me."

Physicians and pharmacists who have honored us with their patronage and confidence, need have no fears but that we can demonstrate in any way necessary, that no misrepresentations have been made by us regarding the merits, constituents, or source of Lloyd's Hydrastis.

SEE OTHER SIDE.

LLOYD BROTHERS, Cincinnati, O.

ANALYSIS OF LLOYD'S HYDRASTIS.

In the March issue of the E. M. Journal of Cincinnati among other advertisements appears the following :

"I have carefully examined the solution called 'Lloyd's Hydrastis,' supposed to contain Hydrastin, the white alkaloid of Hydrastia. The sample examined was purchased from B. O. & G. C. Wilson, of Boston. The solution is a glycerine preparation. It contains Alumina and Magnesia, and traces of an organic base, which may be Hydrastin;--the quantity is too small for determination. The white precipitate caused by the addition of Ammonia-water to 'Lloyd's Hydrastis' is a mixture of hydrate of Alumina and hydrate of Magnesia, and is not an alkaloid. A pint bottle of 'Lloyd's Hydrastis' contained 19½ grains of Alumina and 15½ grains of Magnesia."

With due respect to the talented professor, over whose signature the above appeared, we desire to say that the alleged analysis of Lloyd's Hydrastis (if it was made) produced results that are *far from facts* and we are prepared to defend the statement by a substantial forfeit.

We have sent by registered mail on March 7th, 1888 to the party publishing this analysis the following letter :

(COPY.)

We have placed a certified check for \$3,000 with the National La Fayette Bank of this city, and we propose to wager this amount, that we can substantiate the following propositions :

\$1,000 that the alleged analysis of Lloyd's Hydrastis published in the E. M. Journal for March, 1888, DOES NOT represent the constituents of Lloyd's Hydrastis, either organic or inorganic, as it is found in the market in original bottles.

\$1,000 that Aluminum and Magnesium compounds are contained in the roots of Hydrastis Canadensis of commerce, and that these substances are derived by our process from the hydrastis, and are only part of the components of the preparation.

\$1,000 that Lloyd's Hydrastis as manufactured by us, contains an ABUNDANCE of the white alkaloid of Hydrastis.

We do not propose to sell the process for making Lloyd's Hydrastis, and this wager is on condition that it be decided by three prominent pharmacists of national reputation, who will pledge themselves that the process as demonstrated to them will be held confidential.

Any of the following will be accepted, one of the number to be selected by us, one by you, and the third by these two :

John M. Maisch, Philadelphia, Pa., Editor of Journal of Pharmacy; Chas. Rice, New York, Editor of American Druggist; Chas. Mohr, Mobile, Ala.; S. A. D. Sheppard, Treasurer of A. P. A.; Prof. C. Lewis Diehl, College of Pharmacy, Louisville, Ky.; Prof. L. E. Sayre, University of Kan.; Prof. Henry Trimble, Philadelphia College of Pharmacy, Philadelphia, Pa.; Roberts Bartholow, M. D., Philadelphia, Pa.; Prof. Jos. R. Remington, Philadelphia, Pa.; E. A. Ebert, Chicago, Ill.; Prof. J. A. Jeancon, Cincinnati, Ohio; Geo. W. Sloan, Indianapolis, Ind.; Wm. Saunders, London, Ontario.

We defy you to assert that we have selected these gentlemen on the grounds that any of them would give an unfair decision.

Should you desire to accept this wager, you can place an equal amount with the National La Fayette Bank of this city, to be placed in the hands of the gentlemen selected to decide, the amount lost to be paid to the Children's Home of this city.

If we do not hear from you by the 12th of March, we shall conclude that you do not wish to accept, and we shall publish this fact to the world.

Yours truly,

SEE OTHER SIDE.

LLOYD BROTHERS.

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets;

Cincinnati, O.

May 16th, 1888

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

Confidentially, the seven page letter we mail you under separate enclosure herewith ~~us~~ should be glad if Prof. Norton could read it. As stated in the letter, either Norton did not make the analysis or it was made from a bottle that was not original and from which the Hydrastine had been precipitated before the preparation was given to him. If he is sharp enough to see now that he can get out of it by furnishing us with either of these statements, not only will we withdraw our charges before the school but we will see that the attacks

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets;

Cincinnati, O.

2

188

on Norton by the chemists, one or two we know are now in preparation, will now be suppressed.

We would not accept the excuse that Prof. Norton was too busy. No chemist can through carelessness afford to furnish an analysis reflecting on the integrity of a reputable manufacturing house and Prof. Norton knows well enough that this excuse will not wash with the pharmacists of the country. Neither will we accept the possibility that the bottle that was analyzed did not contain an abundance of Hydrastine unless coupled with the statement that the bottle was furnished him in an open condition and was not an original package.

We would like to have Prof. Norton know on

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets;

Cincinnati, O.

3

188

what condition we are willing to refrain from further steps against him and at the same time we do not propose to go to him in the matter as we feel that he is in such a position it will be to his interest to come to us. It might be brought about through Prof. Wood, who it seems is a mutual friend of yours and Norton's, and to this end you are at liberty to give him the information in this letter, not showing the letter however. Regarding the letter however, that we send herewith, it is designed so that Norton could read it and while appearing a mere friendly, gossiping letter to you, we think will give him some points that he ought to know. We would not take these steps, Deane, excepting

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

4

188

that if Norton is as you and prof. Wood think, an honest man and has been duped into this trouble, we do not wish to persecute him further. ~~if~~ he will shift the matter so that we can reach the parties who are responsible for all.

Also I am anxious that you should not think that the trouble and expense we have gone to refute this Merrell charge is ~~not~~ because we feel injured in any way in our business. The facts are, that it has no effect on our business and no effect on the article Lloyd's Hydrastis, that is involved unless it is perhaps to advertise it. Our sales of this article are now and have been for the last month ~~are~~ much larger than ever before.

Your friend,

Lloyd.

Dear Friend:--

I received the other day from you a biographical sketch of Prof. Gray. I have already read the article in the Torrey Bulletin and have had the engraving from the Bulletin framed.

Your specimen of the Myrica gale was received in good condition and a characteristic picture made of it. I am sorry it is not a little larger but still it does very well for an illustration.

I take the liberty of again enclosing my list of wants and at any time that you run across any of them if you will kindly enclose them to me by mail you will confer a great favor.

T. J. Ashby, Jr., Dr. Cincinnati

June 5th, 1888

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

Your box containing specimen of Uva Ursi and
Bird's foot violet was received last Friday in most
 excellent condition. The violet was as green as
 when first gathered, although it wilted badly inside
 of an hour after having taken it out of the box
 and placing in a glass of water, and the Uva ursi
 looked as though it were growing. I am very grate-
 ful indeed, for your kindness in the matter and
 take pleasure in handing you postage herein.

Sometime ago, you wrote about how it would be
 most convenient to send fresh specimens. I think

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

2

188

you have mastered this from the manner in which these were received. I trust you will continue to favor me from time to time with such fresh specimens of my desiderata as you meet in your rambles. I would be glad if you could furnish a ^{fruiting} ~~flowering~~ specimen of the Myrica Gale.

I am making up heavy collections this summer and expect to do some lively exchanging at the close of the season.

I presume you saw Trelease's 'Monograph of the Geraniaceae and noted what he said about the Oxalis recurva, which is found in our neighborhood. I felt all along that this plant was entitled to specific rank.

3

188

We are just in receipt of a letter from a prominent professor in Boston, who states that it is the current talk among the druggists in Boston that the Tech. will be forced to take some notice of the charge we have brought against Norton. In fact, prof. Wood's analysis settles the matter in the minds of anyone who knows his reputation. The paper about which I spoke to you, from an eastern chemist, was read at the meeting of the New Jersey Pharmaceutical Association. It is a scorcher, and the circulation that we propose to give it cannot fail to hurt Prof. Norton and his reputation as a chemist. If he has not enough method to come out and correct the wrong he has done us we shall make him regret it the last day he lives.

May 16th, 1888

Mr. Walter Deane,
Boston, Mass.

Friend Deane:--

Your favor of the 11th inst. at hand and contents noted. Please accept thanks.

If you will carefully read the charges against Norton and especially the affidavit made by my brother, who is the manufacturer of Lloyd's Hydrastis, the question you ask will be answered regarding the possibility of any former lot not containing the alkaloid. The facts are, that the preparation has been made by the same process from the first and that every bottle that left our store has contained large quantities of the alkaloid. It has

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

2

188

been our custom to place to one side a pound bottle from every batch of Lloyd's Hydrastis that has been made from the first, dating the same and since this controversy has arisen we have ourselves tested every bottle of each batch that has been made and found an abundance in every one without exception.

We do not know Prof. Norton personally, but from his treatment of the gentlemanly letter we wrote him we do not feel disposed to spare his name nor reputation in our attack, still, he is not the party whom we would like primarily to reach. It is of course, the Wm. S. Merrell Chem. Co. who are at the bottom of this rascality. As long as Prof. Norton refuses to correct the injustice he has done

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

3

188

us we propose to thoroughly break down his analysis before the scientific men of this country, and to this end will during next year, distribute over 200,000 circulars, embodying our charge. Not only that, please, but we have any number of friends that stand highest in both the medical and pharmaceutical professions and they will not hesitate to speak out their minds about the injustice of the wrong done us. Even the reputation of the Massachusetts Institute of Technology cannot support such a glaring wrong and if they do not correct this matter, they will find as prof. Norton has found too late, that they have made a mistake.

Let me give an instance of the way this matter

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets;

Cincinnati, O.

4

188

strikes the chemist of the country. A certain chemist in the East with whom we have no acquaintance whatever, was employed by some one, we do not know whom, to analyze Lloyd's Hydrastis and the statement was made to him at the time that there was probably some crookedness in its manufacture. This was before the Norton-Merrill controversy was made public. He procuring a bottle of the preparation, analyzed it, satisfying himself that it represented the drug it was claimed to represent and so reported to his employers. On the appearance of these charges based upon Norton's analysis, he wrote us the above facts. He has taken an unusual interest in the subject and has prepared to be read

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets;

Cincinnati, O.

5

188

at the meeting of one of the Eastern Pharmaceutical Associations, a paper literally flaying Norton alive for his ignorance if not his duplicity in the matter.

As far as we are concerned, Deans, you are at liberty to tell Norton so should you ever meet him or his friend, Prof. Wood should you see him again. We do not know what course prof. Norton takes, but as we wrote him before we are amply able to protect ourselves and we propose to do so. If he allow us to remain in the position that this protection must be at the expense of his reputation as a chemist he has no one but himself to blame. Before taking any steps whatever, we gave him an opportunity to

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets;

Cincinnati, O.

6

188

set himself right.

We feel morally certain that he did not make this analysis but that it was made by the son of G. S. Merrill, who is one of Norton's pupils, and that Norton signed it probably without paying much attention to the subject and the gravity of the position in which he was placing himself. It was either this or Norton analyzed a bottle from which the alkaloid had been precipitated before he was furnished the bottle, and in this case, surely he could have known it was not an original package. Prof. Norton nowhere states that he analyzed an original bottle of Lloyd's Hydrastis.

If he wishes to make either of these state-

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

7

188

ments to us now and will correct the matter by procuring an original bottle of Lloyd's Hydrastis from any source and analyze it, reporting if or if not, he found an abundance of the white alkaloid then we are willing to withdraw our charges before the Institute of Technology, and to direct our efforts against the firm whom we would like best of all to reach, but whom we cannot reach now because Norton stands between.

We do not ask you to keep this letter confidential, Deane, and you are at liberty to show it to your friend, Prof. Wood or to Prof. Norton himself should you deem it advisable.

Your friend,

Lloyd.

P.S. Let me hear from you soon. --Lloyd.

plants that ever before in one year for many summers. 10,000 collected and labelled at least represent the summer's work. I am making preparations for a large exchange this winter. Can you not favor me with the names of some collectors who collect good specimens. I would be especially pleased for the name of the young man whose picture you showed me with the ^{boyish} face. Is Prof. Bailey still in Ithaca, N.Y.? I would like to send him my Carices. I send you by mail to-day a few specimens about which I have some doubts. If you will itemize them on the separate sheet enclosed and then write your conclusions and return to me on this sheet. At the end of the collecting season I will have a printed list of duplicates which I have to offer which I will send you and I trust you will make a selection of such as you would desire.

over Yours truly,

C. G. Lloyd.

Dear Deane

Need not return
the spec sent. They
are not worth it.

Write me about
what you are
doing in the Botanical
line. With kindest
regards to your
good wife I remain
your friend
to S.

Cincinnati, O.

October 23rd,

189⁰

Mr. Walter Deane,
Cambridge, Mass.

Dear friend:--

I send you a package of plants herewith that winds up all about which I have any doubts. I have been intending to do this before but I have been very busy since receipt of your former letter and I have had very little time to work with the weeds. As I wrote you before I shall publish this year a list of the plants that I have found so far around Cincinnati and of course, will wait your decision regarding these plants before publishing the list. Prof. Bailey has kindly consented to go over my Carices and Prof/Scribner my grasses. I enclose a number of plants of the naming of which there is no

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

The Standard Livery Co. Cincinnati

2

189

doubt but are such as I thought would be of interest to you in your herbarium, being fruiting specimens mostly. I hand you herein separate list of the dubious plants also enclose labels for these previously sent. I examined the plants of Rudbeckia after I received your letter but could not find any three lobed plants among any of the plants. I have no doubt however, of your determination as I have seen the Rudbeckia triloba grown in the Miami bottoms near this city. I have made overtures to some French botanists for some exchanges this winter and have already received acceptances from four and I will probably send two or three thousand plants abroad.

With regards to yourself and wife, I remain,

Yours truly,

C. G. Lloyd.

Manufacturing Pharmacists.

November 25th, 1886.

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

Please do not think that because I neglect my correspondence that I do not appreciate your kindness. During the last few weeks our help has been very much demoralized owing to the villainy of one of our clerks in marrying and taking away our young lady bookkeeper, it necessitated breaking in new help I have been very busy in the store and my botany has been neglected. My list has been in the printer's hands now for very near three weeks and is about two-thirds set up but printers have a knack of being very slow and it will probably a couple of weeks before I can get it issued. I have as yet done no exchanging as I am waiting on this list.

With kindest regards, I remain,

Yours truly,

C. G. Lloyd.

December 8th, 1870,

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

I wrote you herewith to say that I cannot possible accept prof. Bailey's determination of *Physalis* as *Physalis Philadelphia*. The mature calyx is not filled by the berry but on the contrary is very much inflated and the berry is small and yellow; likewise, the calyx is not opened at the mouth but is closed. The specimen of *Quercus* I also would not like to agree to be *Quercus coccinea* I can see no resemblance at all in either leaves or the acorns with the undoubted specimen which we have here. On the contrary, it is very close to the *Quercus rubra* but with more dissected leaves. It may be a hybrid between the *Quercus rubra* and *coccinea* but if it is it

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
 Court & Plum Streets,
 Cincinnati, O.

2

189

is related very much closer to the for^mer than the latter, Both of them I shall put in the list as specimens "undetermined."

By the way, the list is all set up and as soon as I can get it corrected to my satisfaction I will have it printed but there are a great many typographical errors and I will have to read the proof two or three times before I will be satisfied to let it go to press. It seems as if I was fated to have but very little time for botany, with an immense stock of duplicates on hand I have not yet gotten my list printed and have made no exchanges. You shall have the first pick of the duplicates as soon as I am ready to send them out. In addition to the numerous details of my business that call on my time,

3

189

we had to have the misfortune of an explosion at our factory and replacing a good portion of the machinery, which has almost occupied me during the past week. I send you a Commercial with an account of the explosion, but will gladly state that the injuries to the men are very much exaggerated. While they were seriously injured none of them are fatally and none will lose their eyes.

Your friend,

C. G. Lloyd.

December 17th, 1890,

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

The flowers of both the species of *Physalis* as well as the fruits are very much alike. The size of the flowers can be readily determined from the specimen. They are light yellow color and slightly darker in the center. The filaments of the stamens are dark purple but the anthers are light yellow, sometimes very slightly streaked with purple. Next season I will send a fresh specimen and it is too late now to include it in the list where I would describe it as a "species undetermined." By the way, I enclose herein proof sheet of the first page of the list, giving you some idea of the style of it.

Yours truly, C. G. Lloyd.

Made by J. U. Lloyd

Oct 29 1891

Friend Deane

I am afraid the plants sent herewith by express will be of little value to you owing to my not having the specimens in fruit. That you desire, I have made it up the best I could. I can not see however how a specimen in fruit of such as *Rhus* could be prepared for the Herbarium.

I am still doing a little as you may surmise, on my needs. Of late years, so much

business has come on me I
have given up all hope of
ever knowing anything about
it, and at the most
can be merely a collector,
getting together a collection
that may be of service
to some college or garden,
when I die. It's my hobby,
and I get a good deal of
pleasure riding it; at my
odd hours.

I met Prof. Feltner in St. Louis
last month and he treated
me very nicely indeed.
Also met Prof. Hitchcock and
Sargent (I believe) of Cambridge.

I did not do much last-
year collecting, so I have a
big stock of duplicates on
hand. I have my list-

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

Manufactured by the Cincinnati

1879
 out now and shall exchange
 largely this week.

I got to Jamaica in Dec,
 and my son was in Boston
 to see you while on the
 way. I expect I will get
 some seeds in Jamaica.

I met at a party a
 few weeks ago a young lady
 from Boston who impressed
 me very favorably as she
 was a lovely waltzer, and I

Can not- decide whether
Walking or Wads give me
most- please. I told this
young lady I presume the
practice she got- at- home
on your crooked streets-
accounted for her following so
loosely the mezes of the walk.

I don't know whether you
can read this letter, because, I
usually talk when I write-
and don't know how to write-
except my name. A friend
said to me recently, if you are
going to write to me from
Jamaica please take some
writing lessons before you
leave. But- I can print
my letters to you if you prefer.

Your friend

W.S. Lloyd

Friend please. Jan 13 1893

I am on the way of a two months trip through Mexico and leave Sunday. I expect to make a tour every winter and escape as much as possible the cold. As I get older I get crankier I guess, my how I don't like cold weather, and no place suits me as well in winter as the tropics

My trip last winter
to Jamaica was most
pleasant, besides a good
collection of plants, tropical
fruits etc. and photographs.
On the Mexican trip I expect
to devote my time mostly
to photographs and the
study of Mexican economic
plants. I don't write often
now, you don't like our
fair typewriter, and I
am very lazy about writing
long hand. Botany I did
not do much last year
I have made additions to
my library. By the way
my collection of books

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,

Court & Plum Streets,

Cincinnati, O.

189

is getting to be quite
 respectable. I have been
 buying mostly old works
 of the earliest Antiquists
 with a view of some
 day writing up the
 pre Linnean history of botany.
 I expect on my return
 to purchase a three
 story house near the
 store and convert it
 into a ventilator old

bachelors den, botanical
museum and library.

Our business is prosperous
and profits more than
sufficient for me to indulge
in any hobby that comes
into my mind. Lately I
have been chasing around
after photographs. I am
getting to be more of a
bohemian than ever and
less disposed to the routine
of married life. Let me
hear from you when
I get back. Are there any
little angels in your family
yet? - With kind regards to
self and good wife - your friend W. D. L. G.

Manufacturing Pharmacists.

October 20th, 1894

Mr. Walter Deane,
Cambridge, Mass.

Dear Friend Deane:--

It has been a long time since I have heard from you. However, I occasionally see reports of what you are doing in the journals. I mail you a catalogue herewith that will give you an idea of the work in which I am now engaged. My latest fad is bibliomania on the subject of botanical works. I have also been paying some little attention to the local fungi but with little success. Have you ever studied them? We have recently enlarged our business by renting the five story building adjoining our business house and I have reserved a room in the new

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets.

Cincinnati, O.

2,

189

building which I am going to make into a museum of botanical and pharmaceutical objects. Let me hear from you some time especially if I can serve you. I have in my library a copy of Josselyn's New England Rarities which was printed in Boston in 1805 by Wm. Veazie, containing notes and comments by Edward Tuckerman. I understand that Josselyn's "Two Voyages to New England in 1638 and 1663" was published in the same style. I am very anxious to obtain the work and if you can find it on sale at any Boston book house I will be very thankful if you will advise me. I wrote to Wm. Veazie but as I do not find his name in the Mercantile Agency I presume the firm is out of existence by this time.

Yours truly,

C.G.Lloyd.

January 29th, 1895

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

I am in receipt of your pamphlet "Notes from my Herbarium," which I was very glad to get for my library. Please accept my thanks. My library is getting along nicely, but just at present I am paying attention to cryptogamic literature and especially the funga in which I am taking great interest. I was very much elated the other day to have my determination of a species of Pleurotus confirmed by Prof. Morgan. The literature on the subject is so scattering it is very difficult to ascertain the species but I am determined to conquer the subject and think I shall do so in time. I am going to try

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets,

Cincinnati, O.

2, _____ 189

however, to keep out of the department of microscopic funga as the field is too vast. I will devote my entire attention to mushrooms and the larger species such as can be determined without the microscope. I am going down Indian River, Florida this coming month and I will find a good many funga there.

I remain,

Your friend,

C. G. Lloyd.

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets.

Cincinnati, O.

Dear Sir
 Yes I returned paper
 from Florida a couple of
 weeks ago and have been
 very busy since straightening
 up accumulated work and
 sorting out the specimens
 collected. I got about 50
 species of fungi mostly mostly
 on old logs and have just
 gotten them sorted out and
 numbered for Prof. Morgan
 to whom I shall send

them for names. I have
made so little progress with
the study I could probably
decipher only a few of
them myself. I am more
intense than ever at the
prospect of work and knowledge
I shall be able to gain
of the fungi field. Last
Sunday I made a trip to
the woods and collected a
puff ball which I had
little trouble to determine
as *Lycoperdon pyriforme*.
So you see I am making
a little progress. The study
requires more or less microscopic
examination and I purchased
today a camera for making
microscopic photos

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets.

Cincinnati, O.

189

It is a very polite and
 nicely adjusted instrument and
 cost me only \$40 though I
 believe the original cost was
 over a hundred. I bought
 it of a gentleman who had
 it made to order, and who
 sold it because it had
 been replaced in his work
 by an electric light camera.
 This was lamp light light but
 does good work, and will
 answer every purpose for me.

I suppose you have read
the remarks on Nomenclature
in the preface to Rands
Flora of "Mount-Desert-Islands"
Perhaps I have not given
the subject enough reading,
or thought to express an
opinion on it - but - I admire
very much Mr Rands stand.
I cannot reconcile myself
to the "copy printing" changes
so much in vogue now.

In the "List of Pteridophyta and
Spermatophyta" just issued by
the Committee many of our
familiar plants appear under
names that would not be
recognized by their most
intimate friends. There may
be necessity for such wholesale
changes but - I can not feel
it. It seems to me it -

Manufacturing Pharmacists.

Lloyd Brothers,

 Wholesale Druggists,
 Court & Plum Streets.

Cincinnati, O.

189

only adds to confusion.
 And only think a writer in
 a recent journal proposes to
 change such old familiar names
 as Compositaceae, Leguminosae
 Umbelliferae &c. because they
 don't comply to a new
uniform law that he
 proposes. As Ramez says
 after a plant has been known
 for a hundred years by
 a name it acquires a

"property right" in that name
and should not be robbed
of it - to accrue to some
theory of nomenclature.

Our British friends seem
to feel likewise and I
note the Jan. Journal of Botany
reproduces Radde's remarks in
full expressing their approval
that - "they show in many respects
a reaction towards a single
principle of nomenclature"

It may not be policy
for me to thus express
myself without knowing how
you stand. Perhaps you
had your finger in the
Rochester code. If so I
humbly apologize, and

Mr. Walter Deane,
#2 Brewster Place,
Cambridge, Mass.

Dear Deane:--

I mail you herewith the first series of photographs of fungi which I expect to mail regularly every three months, three pkates in the issue. I think you will agree that from a photographic point of view they are very good and Prof. Morgan, who is authority for their nomenclature, says they are very excellent representations of the species. They are not for sale but I expect to distribute them to those who are interested in the working of the larger fungi. The issue will necessarily be limited owing to the expense of reproduction in this manner. If

Mr. Walter Deane,
Cambridge, Mass.

Dear Friend Deane:--

I trust the photogravures mailed you to-day will reach you in good condition. I have acted on your suggestion and enclose them in heavier pasteboards. I have become very much interested in fungi this summer, gradually learning the common species. It is a very difficult subject to master however owing to the scanty material in the way of literature that we have on the subject. I have completely remodelled my house, making the second and third stories into large library rooms, each room about seventy feet deep and seventeen feet wide. When I get the books back on the shelves I think the library

Dear Deane:--

I am in receipt of your biography of Mr. Bebb and am very much interested in reading it. I had some correspondence with him some years ago and sent him some plants that I collected around this city. I have been absent from the city most of the winter, on a trip to the Carribee Islands and Trinidad. I just returned a few days ago. It was a very pleasant trip although very little was done in the botanical line. I was able to collect only the many fungi I found and these I noticed in a few places only. Some of my notes on the trip will be pub-

June 3rd, 1896

Mr. Walter Deane,
Brewster Ave.,
Cambridge, Mass.

Dear Friend Deane:—

I am just in receipt of your catalogue of the park flora of your city and it is a most creditable publication! I think you are to be congratulated on your facilities for doing this work. It seems that the fungus, with which as you know, I am now mostly interested, is rather scarce or else had been overlooked. However, I am pleased to get the list for my card index, on which I am now at work.

With kind regards to yourself and Mrs. Deane, I remain,

Yours truly,

Cincinnati, O.

June 26th,

1896

Mr. Walter Deane,
Cambridge, Mass.

Dear Deane:--

I am working as I previously advised you, on a card index of the North American fungus reference. I have recently received from Prof. Ellis a copy of his index of "North American fungus distributions" with the exception of those as stated herewith. If you could borrow for me temporarily a copy of these numbers I could take off the index and return them to you in a few days. The numbers that I am missing are Century No. 16, 17, 19 and 24. They are as you probably know, simply separate sheets which can be readily mailed in a letter. I have been engaged on this index now for over a year, taking off fifty or

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets.

Cincinnati, O.

8,

189

sixty thousand cards. I think there is such an index already in the library of the Harvard University, but outside of this index, I do not think that any exists in the United States excepting the one on which I am at work. I expect to complete the index in about another year. I am getting along very nicely in my study of fungi, gradually enlarging my collection and my knowledge of the subject.

With kind regards, I remain,

Cambridge, Mass.

Dear Friend Deane:—

I am endeavoring to secure all the literature relating to American fungi and have succeeded in getting the most of it in my library. There are a few articles however, that I have been unable to get hold of. I am photographing the articles from journals that I have not gotten and Prof. Trelease of St. Louis, has kindly supplied me with several that I have been wanting. However, there is one that I have not yet gotten, namely, Bosc—"Memoire sur quelques especes champignons" published in Gesell. Natur. Frende Magazine, Vol.5, page 83-89, 1811. If you can get hold of this book for me and will send it to me by express I will at once photograph the article referring to American fungi and return the book to you with very little delay. I am in hopes you can succeed in getting the book as it is the only journal article that I have not got.

Your friend,

C. G. Lloyd.

SECOND FLOOR, LLOYD LIBRARY, BOTANICAL SECTION.

The
Lloyd Museum

Dear Deane:--

Replying to your favor of January 10th, Prof. Webster desiring me to send him some photographic books of fungi, I took the occasion to include in the shipment, my book of photographs of Egypt principally to give you an opportunity to look over it. Of course, the man travelling with a camera has not the opportunities for obtaining pictures the same as the resident professional photographer, but I am induced to think from an amateur standpoint I have done fairly well.

I was pleased to receive the other day, the first issue of your Eastern magazine, "Rhodora". I am in hopes to see many articles from your pen in future numbers and am somewhat disappointed in not finding any in the first issue. I still think friend Deane, that you are making a mistake in pegging along with flowering plants when there is such an inviting field open in the study of mycology and one that needs workers so badly.

Yours truly, C. G. Lloyd.

J. U. & C. G. LLOYD.

Cincinnati Dec 15/00

Dear Alvan

It- is a long time since I have written a script- letter but- I will so write you just to give it- the flavor of old times. I am getting older, and fatter, and lazier than I was in those days when we used to exchange flowers, plants- and notes, and our poor stenographer does most- of my work now. I mail herewith pamphlets- that- will complete your set: "Additions etc 1895" is No 1 of Rpts. In regard to "sets 1. 2. 3. 4. 45-" have last- paragraph in each pamphlet- "My Notes" and you will be fully informed. They are prints- that- I ^{am} offering from my fungus negatives to those who are interested enough in them to pay the cost- of printing. Yes I know Hollis Webster (by correspondence) and have just- received a long pleasant- letter from him this morning. I value his views

most- highly on the questions that- arise
in the study of Agave.

Your good wife I trust- is alive
and well. Are there any little Deans?

I often think of a remark your wife
made: She wondered "how I could sleep
at- all in car beds, stuffy and close,
and not knowing who had sleep- before
on the same sheets?" I thought- of it-
last- winter when I was living among
the natives of Samoa, taking off of
leaves with- my fingers, sleeping on the
ground with- out- removing my clothes, perhaps
with- a big huff naked natives lying
along ^{each} side of me. (I don't- know if "lying"
is spelled right- but- it- is correct- in
either sense). I have seen a great- deal
of the word since I saw you and if I
live and prosper will see more. I am
a ~~throughout~~ Bohemian and enjoy getting
away from civilization, in out- of the
way places and among strange people.
It- is a pity I have not- the faculty-
of "gab" for if I had I might- get-

up some interesting talks on the
strange things I have seen in the work.

What do you think of my idea of
omitting authorities after specific names (Vide
Mye Note - No 48 page 23) I look upon this
custom as the root of all evil, the
father of most of the synonyms.

I am ^{not} egotistical enough to think
that my views will prevail, that the
opinion of an obscure worker (who is
perhaps an interloper in the work, you
know my business is making pits, and
Botany is a side issue) will change the
custom of years. Still I am honest
in it, and am just crank enough to
follow my own convictions when I feel
I am right. Nomenclature you know has
got to be a fad, Priority - is an
idol before which sacrifices are made
every day. Botany is not the study

of plants, but - a kind of archeological
delving into the dim past - to unearth
old names (and incidentally of course to
add your name to the new binomial)

But - I am sorry I have inflicted my
views on you. Perhaps you think differently.
If so we won't quarrel.

your friend
W. H. Lloyd

Office of

Dear Deane:—

Some day when I have a lot of time I am going to sit down and write you a long letter about the Taupoo girls as there are lots I have to say about them.

I want to ask you about what you would do in a case such as figure 3 on enclosed pamphlet in reference to "a small plant". In figure 11, where I state "(natural size)" there can be no ambiguity, but in figure 3 I readily see where it might be inferred that *Collybia platyphylla* is a small plant rather than what I intended to express, that the figure is a photograph of a small specimen, ⁷/_λ *Collybia platyphylla*. How would you make this?

Your friend,

C. G. Lloyd.

Court & Plum Streets

Cincinnati, O.

Apr 30 1901

Dear Deane

"Natural size of a small specimen" does not appear strongly to me, for "natural size" in reference to a cut-
 of plant - has the usual meaning of "normal" "usual" and a "small (undersized) plant" can have no normal size. Since writing you I have thought - that "A small specimen"

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists,
Court & Plum Streets.

Cincinnati, O.

1911
 instead of "A small plant"
 would carry the meaning
 I have intended.

Regarding expressage, it
 is customary with us
 in shipping prepaid to mark
 the box "pre paid" and the
 express company sends the
 package former prepaid
 and bills the charges up
 to us. When you I shipped

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists.

Court & Plum Streets.

Cincinnati, O.

1911
 The book I instructed the
 shipping clerk to send
 "prepaid" and thought nothing
 further of it. When the
 book was returned (it came
 in prepaid) I noted that
 the word "prepaid" of our
 clerk has been scratched
 off. I then investigated
 and learned that it had
 never been billed to us

Manufacturing Pharmacists.

Lloyd Brothers,

Wholesale Druggists.

Court & Plum Streets.

Cincinnati, O.

1911

It was evident - that the package instead of going forward "pre paid" had gone forward "collect" through the carelessness of some clerk in the express co here. Well to make a long story short - I went down to the express office and raised the

Manufacturing Pharmacists.

Lloyd Brothers.

Wholesale Druggists.

Dear friend Dean:

Your little "puff balls" are not in a strict sense of the word true puff balls, but are the mature forms of a slime mold, *Lycoperdon epidendrum*, that simulates the puff ball in its mature form. There are only a few slime molds that take these forms when mature. If you had found these little plants when young you would have found them of a pink color, and had you broken one open you would have found it full of an amorphous slime. They are very curious in their young (plasmodial) states, for in this condition a microscopic examination shows no cells, simply slime.

Why don't you drop me a line occasionally and let me know how you are getting along? I did not come east this year but the previous summer I called at your little workshop, and found you were in New York attending a bird convention. It is a great pity for botany that you have

The Lloyd Library

This Library is devoted to botany, pharmacy, chemistry, and allied sciences. The building contains between fifteen and twenty thousand volumes and pamphlets on the aforementioned subjects. The herbarium of pressed plants is extensive, and the mycological department contains four or five thousand specimens, the fleshy fungi being preserved in alcohol in jars. This library is incorporated, is free to the public, and is pledged to be donated intact to science. The final resting place has not been decided upon, but the library will be placed in the University best calculated to serve science.

Mr. Walter Deane,
#29 Brewster Place,
Cambridge, Mass.

Friend
Dear ~~Mr.~~ Deane;

I am at a loss to explain the non arrival of Mycological Notes, as your name seems to be correct on our mailing list. I take pleasure, however, in sending you the missing numbers herewith.

I hope to spend the summer in the museums and woods of Europe, and will try to get up to Boston on my way over and hope I shall have the pleasure of seeing you.

You have expressed surprise that I should find so much time to spend away from my business. I made arrangements the first of the year so that I do not have to give the business any personal attention, and am free to spend all my time in future in traveling and working on my hobby - the fungi.

With best regards to yourself and good wife, I remain

Yours very truly,

C. G. Lloyd.

Mr. Walter Deane,
739 Brewster St.,
Cambridge, Mass.

Dear Deane:

I have been home from Samoa a couple of months and am making a start now for a summer in Sweden. I hope to go in a couple of days. Where I shall go from Sweden I do not know but I shall probably not come back to Cincinnati before next spring. I have been very busy since I have been at home, trying to publish as much as I could on the puff balls as on this trip to Europe I shall take up another line of study. I had hoped to go to Europe by way of Boston or rather go to Boston on my way to Europe but my time is so limited now that I shall have to go direct.

I did not know that Prof. Hollis Webster was a proud papa. Give him my congratulations on same.

That postal card I sent out from Samoa has caused some adverse criticism among my friends around here. I hope you took a more liberal view of it as you have seen pictures from Samoa and know the customs of the people. It makes me weary to have people whose lives

Cambridge, Mass.

Dear sir:

We beg to acknowledge receipt of your letter of the 15th to Mr. G. G. Lloyd, and to advise you that Mr. Lloyd has been in Europe for the past six months. He has written that he expects to return to Cincinnati this summer. We do not know just when he will be here but think probably within a month. We will hold your letter and bring it to his attention when he returns.

With regard to Mr. Lloyd's publications we have no extra copies of the bound volumes, but are sending you copies of the Indexes for Volume 1 and Volume 2 so that you may see what you lack. We shall be glad to supply any missing numbers that we have in stock. A few numbers of Mycological Notes are now out of print, but we hope that you have received them so that your set can be completed. Your name has been on the mailing list continuously and you should have received all that have been issued.

Very truly,

The Lloyd Library.

Mr. Walter Deane,
#29 Brewster St.
Cambridge, Mass.

Dear Deane:--

I have been at home now some three or four months and the prospects are that I will not be able to get away in future for such long trips. About five or six years ago, perhaps more, I made arrangements with my brothers to have my own time. I have spent the greater part of the time in Europe with occasional trips home. Last fall, the health of one of my brothers failed to an extent and I was called home and since have had to give some of my time to business although I am still as much interested as ever in the fungus subject. You do not know what you have missed by not taking up fungi instead of the flowering plants. I do not think we have any subject that has been so carelessly worked as the fungi and it is very fascinating to trace it down and study it out, although it requires considerable time and trips to the museums of Europe where historical specimens are preserved. I have had a great deal of pleasure in working the subject out, but I do not

Viburnum Opulus
ask about it -

Cincinnati, O. October 17th. 1913.

Mr. Walter Deane,
Brewster Place,
Cambridge, Mass.

3000 coll.

Dear Friend Deane:--

Do you know of any place in the New England States where *Viburnum Opulus* occurs in sufficient quantities so that we can make an endeavor to have the bark collected? We have been out of the drug for some time and as it is one of our steady sellers we are very much inconvenienced as we have been unable to obtain the crude drug. If you do not recall ever having seen it yourself, can you not ask some of your botanical friends there in the East who are posted on the New England flora? The plant does not grow with us in the West.

I suppose you are getting along all right. I have not heard anything from you for some time. I have just returned from a trip to Cuba, but spent most of the time however, in Florida collecting fungus. The fungus had keeps growing at a fearful rate and I do not have much time for anything else. I got a good many specimens from your Eastern people.

With kind regards, I remain,
Yours truly,

C. G. Lloyd.

Mr. Walter Deane,
#29 Brewster St.,
Cambridge, Mass.

Dear Friend Deane:--

Please accept my thanks for the trouble you have taken in regard to *Viburnum Opulus*. I am quite well convinced now that it is useless to try to obtain it in commercial quantities in the Eastern States. While I was in Philadelphia recently, Stewarton Brown told me that the only place it occurred any way common was the extreme north, British Columbia. We have opened up correspondence with parties in this region now and hope to locate it.

I spent about a week in the museum at New York recently and was in hopes to get through in time so that I could run up to Boston for a day or two and renew acquaintance with my old friends. However, I found when I got through with the work that I had to get back home to let my brother off, and therefore did not get a chance to come up and see you.

Yours truly,

C. G. Lloyd.

Dear Deane:--

Your letter reaches me at Kew where I am working at present. I have very vague remembrances of the troubles I used to have with *Physalis* years ago but they were trivial compared to the problems we have with fungus in later years. I will forward your letter to Prof. Aiken who has my old herbarium in charge. He can probably look up and answer your question. The specimen was from the vicinity of Cincinnati I am sure because I remember that species of *Physalis* there that I never got straightened out.

My writings are not distributed bound in volumes, but I issue indices and three are sent you herewith. You can check off the pamphlets you have and the Lloyd Library will probably supply any that are missing on request. Some of the recipients think they are worth binding and others I expect do not.

I presume you are in the clutches of a severe New England winter from what I read in the papers. I have seen

Cambridge, Mass.

Dear Friend Dean:-

Has it ever come to your notice where Cheledonium has become naturalized in enough quantities where it could be collected for commercial use? The drug is getting very rare in the markets, and the Botanics give it an escape in waste places around the Eastern Cities. If you know of any such locality, will you kindly advise me, and I will investigate.

I do not know how you feel, but I am getting along in years, and I would like to arrange to get out of active business. We are now selling out the Wholesale Department of our business, and I am in hopes of getting the Manufacturing Department to running as a system, so that it will not require my personal attention and expect to have most of my time for my studies. I am getting so deep into the fungus subject that I really ought to have all of my time for that work.

Dear Friend Deane:-

It was a shock to me to learn that you had lost your wife. I will always remember her kindness to me years ago when I drifted into Cambridge a green, gawky, young product of the West. The years have rolled rapidly by and there is no use setting our eyes to the fact that we are all now in our declining years. Your years will be more lonely now than mine, for I have never enjoyed the companionship and I have gotten into habits of work, where I do not feel the need.

My business will probably call me to often to Boston in the future, and the next visit I hope to find you at home.

With best regards, I am,

Yours very truly,

C. G. Lloyd.

Dictated.

THE LLOYD LIBRARY—Erected in 1908

The Lloyd Library and Museum

This institution was founded by John Uri Lloyd and Curtis G. Lloyd, and is devoted to Botany, Pharmacy, Materia Medica, Natural History and allied sciences, with a section of Eclectic medicine.

The number of volumes is about forty-six thousand, all on the above subjects.

The institution is incorporated, is free to the public, and has been placed in trust with the Central Trust and Safe Deposit Co. An endowment, by Curtis G. Lloyd, with the Union Savings Bank and Trust Co. insures that it will always be maintained and remain a free and public institution for the benefit of science.
