Announcing a Change in Policy

TAKING into consideration the increasing cost of printing and mailing, and the fact that the general subject matter of our Tropical Planting Book and Catalogue has changed very little in the last several years, we have concluded that it is a needless expense to reprint the whole book each season just to take care of the necessary price-changes, and have decided that in the future we will publish this only occasionally and solely as a descriptive and informative manual, showing no prices whatever, this function being cared for by price-lists, of which this is the first of the series.

For this season please retain your Tropical Planting Book for 1924 or 1925, for descriptive purposes, attaching this price-list as a guide to present prices.

Business Rules

See former catalogues for full information, but briefly:
