**Most of Ezra Meeker's works should be in the public domain, therefore it is likely that they have been scanned & are online.**

### **Duration of copyright** [\[ edit source | edit \]](#)

---

Copyright protection generally lasts for **70 years** after the death of the author. If the work was a "work for hire", then copyright persists for **120 years** after creation or 95 years after publication, whichever is shorter. For works created before 1978, the copyright duration rules are complicated. However, works created before 1923 have generally made their way into the public domain.

[Copyright law of the United States#Duration of copyright](#)

## Interlibrary loan [ edit source | edit ]

A *start-class* article from Wikipedia, the free encyclopedia

 240 Revisions (> 30 days), 130 Authors, – Page watchers, – Pageviews (30 days), Created by: [65.59.8.35 \(8\)](#) ·

[See full page statistics](#)

**Interlibrary loan** (abbreviated **ILL**, and sometimes called **interloan**, **interlending**, **document delivery**, or **document supply**) is a service whereby a user of one **library** can borrow books or receive photocopies of documents that are owned by another library. The user makes a request with their local library, which, acting as an intermediary, identifies owners of the desired item, places the request, receives the item, makes it available to the user, and arranges for its return. The lending library usually sets the due date and overdue fees of the material borrowed. Although books and journal articles are the most frequently requested items, some libraries will lend audio recordings, video recordings, maps, sheet music, and **microforms** of all kinds. In many cases, nominal fees accompany interlibrary loan services.

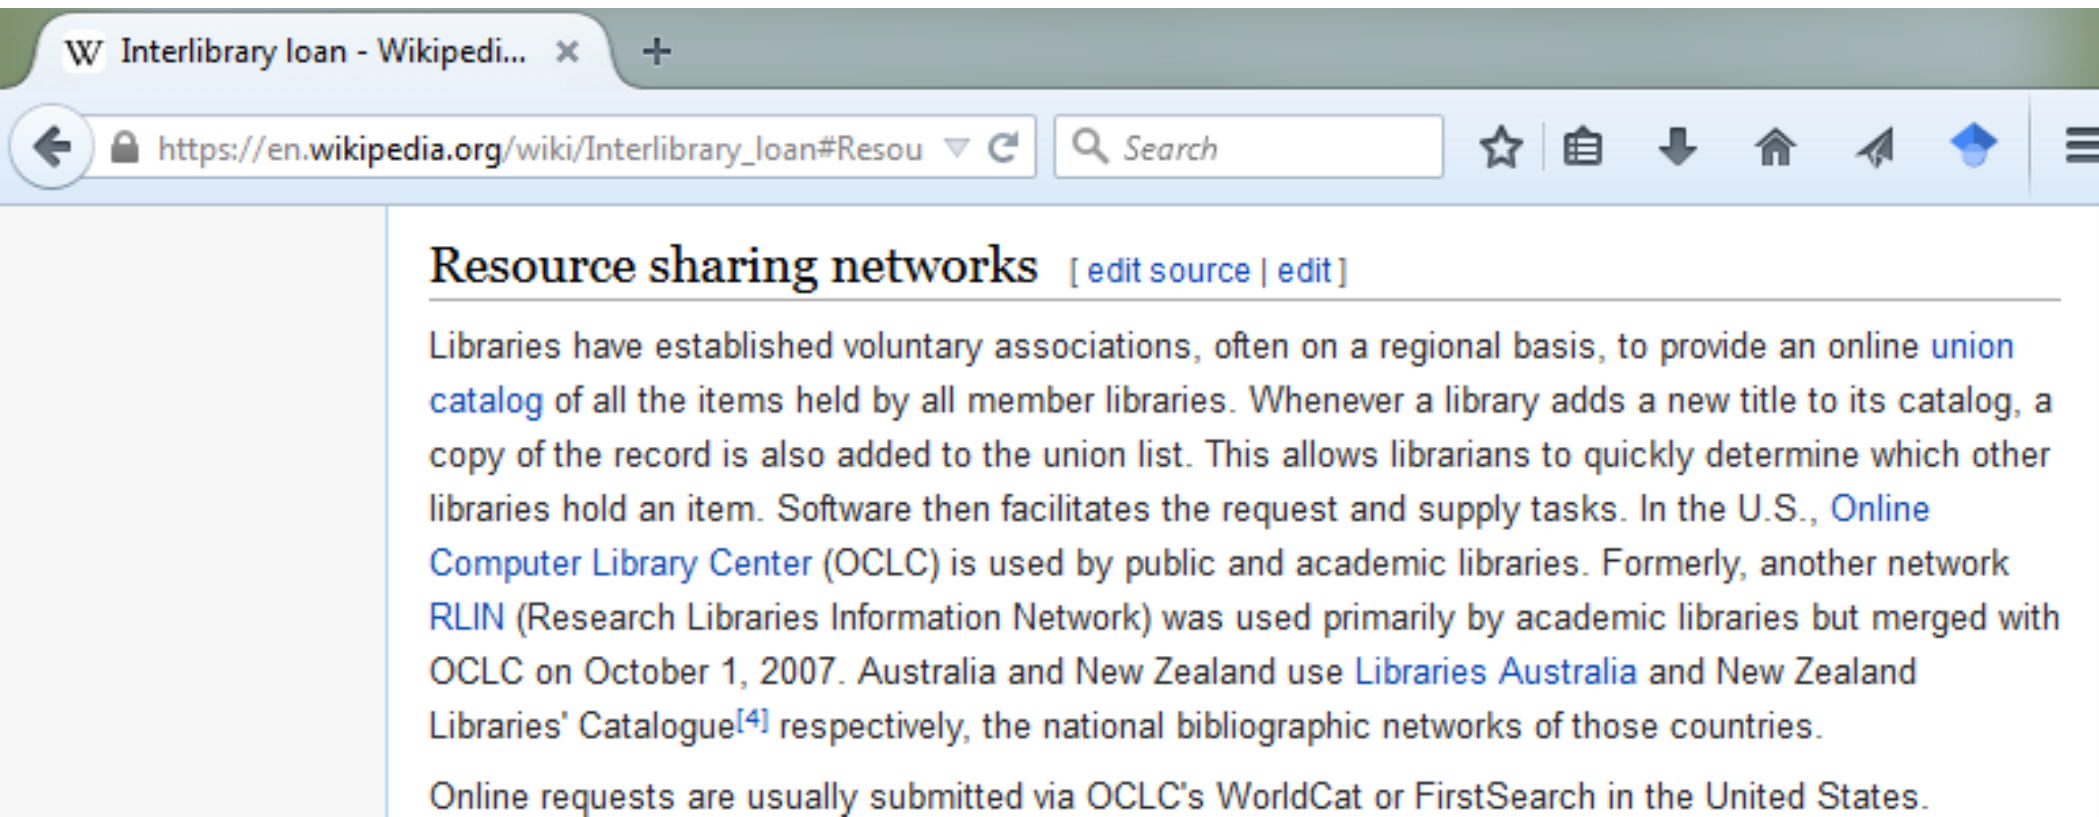

The term *document delivery* may also be used for a related service, namely the supply of journal articles and other copies on a personalized basis, whether these come from other libraries or direct from publishers. The end user is usually responsible for any fees, such as costs for postage or photocopying. Commercial document delivery services will borrow on behalf of any customer willing to pay their rates.

# More specifically ...

The image shows a browser window with a single tab titled "Interlibrary loan - Wikipedi...". The address bar contains the URL "https://en.wikipedia.org/wiki/Interlibrary\_loan#Resou". The page content features a section header "Resource sharing networks" with links for "[ edit source | edit ]". The text below the header describes how libraries establish voluntary associations to create online union catalogs, mentioning OCLC, RLIN, and national networks in Australia and New Zealand.

**Resource sharing networks** [ edit source | edit ]

Libraries have established voluntary associations, often on a regional basis, to provide an online [union catalog](#) of all the items held by all member libraries. Whenever a library adds a new title to its catalog, a copy of the record is also added to the union list. This allows librarians to quickly determine which other libraries hold an item. Software then facilitates the request and supply tasks. In the U.S., [Online Computer Library Center \(OCLC\)](#) is used by public and academic libraries. Formerly, another network [RLIN \(Research Libraries Information Network\)](#) was used primarily by academic libraries but merged with OCLC on October 1, 2007. Australia and New Zealand use [Libraries Australia](#) and [New Zealand Libraries' Catalogue](#)<sup>[4]</sup> respectively, the national bibliographic networks of those countries.

Online requests are usually submitted via OCLC's WorldCat or FirstSearch in the United States.

**History** [edit source | edit]

The OCLC was created in 1967,<sup>[3]</sup> the same year **Fred Kilgour** founded WorldCat,<sup>[4]</sup> though the first catalog records were added in 1971.<sup>[5]</sup> It contains more than 330 million records, representing over 2 billion physical and digital assets in 485 languages, as of November 2014.<sup>[1]</sup> It is the world's largest **bibliographic** database. OCLC makes WorldCat itself available free to libraries, but the catalog is the foundation for other fee-based OCLC services (such as **resource sharing** and collection management). In 2003, OCLC began the "Open WorldCat" pilot program, making abbreviated records from a subset of WorldCat available to partner web sites and booksellers, to increase the accessibility of its member libraries' collections. **In 2006, it became possible to search WorldCat directly at its website.** In 2007, WorldCat Identities began providing pages for 20 million "identities", predominantly authors and persons who are the subjects of published titles.<sup>[citation needed]</sup>

# But why use the OCLC when there is the ISBN?

## International Standard Book Number [ edit source | edit ]

A *C-class* article from Wikipedia, the free encyclopedia

 1,512 Revisions (> 30 days), 902 Authors, – Page watchers, – Pageviews (30 days), Created by: [Hornlo \(59\)](#) - [See full page statistics](#)

(Redirected from [ISBN Number](#))

*For reader help on ISBNs, see [Help:ISBN](#).*

The **International Standard Book Number** (**ISBN**) is a unique<sup>[a]</sup><sup>[b]</sup> numeric commercial [book identifier](#).

An ISBN is assigned to each edition and variation (except reprintings) of a book. For example, an [e-book](#), a [paperback](#) and a [hardcover](#) edition of the same book would each have a different ISBN. The ISBN is 13 digits long if assigned on or after 1 January 2007, and 10 digits long if assigned before 2007. The method of assigning an ISBN is nation-based and varies from country to country, often depending on how large the publishing industry is within a country.

The initial ISBN configuration of recognition was generated in 1967 based upon the 9-digit **Standard Book Numbering** (**SBN**) created in 1966. The 10-digit ISBN format was developed by the [International Organization for Standardization](#) (ISO) and was published in **1970** as international standard ISO 2108 (the SBN code can be converted to a ten digit ISBN by prefixing it with a zero).

Occasionally, a book may appear without a printed ISBN if it is printed privately or the author does not follow the usual ISBN procedure; however, this can be rectified later.<sup>[1]</sup>

Another identifier, the [International Standard Serial Number](#) (ISSN), identifies periodical publications such as [magazines](#); and the [International Standard Music Number](#) (ISMN) covers for musical scores.

### International Standard Book Number

ISBN 978-3-16-148410-0

A 13-digit ISBN, 978-3-16-148410-0, as represented by an [EAN-13 bar code](#)

<b>Acronym</b>	<a href="#">ISBN</a>
<b>Introduced</b>	1970
<b>Managing organisation</b>	International ISBN Agency
<b>Number of digits</b>	13 (formerly 10)
<b>Check digit</b>	Weighted sum
<b>Example</b>	978-3-16-148410-0
<b>Website</b>	<a href="http://www.isbn-international.org">www.isbn-international.org</a> 

Only books published after 1970 consistently received ISBNs.

## ISBN

## versus

## OCLC

- Tends to drive users to online book sellers, implying payment
- Covers only certain median like books, eBooks, CD's, ...
- Only for publications after 1970

- Tends to drive users to libraries and sometimes online sources. The latter may be free, subscription, or inaccessible
- Covers anything that can be cataloged: books, online, articles, periodicals, microfilm, microfiche, theses, monographs, archival material, one-off publications, audio records, etc. ...
- Any publication published at anytime

# The DOI versus the URL

In a citation template, a Document Object Identifier (DOI) may be used with or in place of a URL. Here are the advantages of using a DOI.

[https://en.wikipedia.org/wiki/Wikipedia:Digital\\_Object\\_Identifier#Why\\_use\\_DOI.3F](https://en.wikipedia.org/wiki/Wikipedia:Digital_Object_Identifier#Why_use_DOI.3F)

Why use DOI? [\[ edit source \]](#)

---

This approach avoids a number of common issues with citations in Wikipedia:

- **Broken links** as publishers or web server move or reorganise content ([error 404](#)).
- Copy-paste errors in citation text.
- **Copyright violation**, accidental or deliberate; the DOI citation goes to a source identified as appropriate by the rights owner.
- **Verifiability** enhancements; the DOI will always lead to the correct source, so modifications of abstracts or even content is avoided.
- Preferential treatment. DOI links, like our ISBN book sources, will offer the user a choice of sources where one exists.
- Academic users may receive a local full-text source

DOI links also have a more scholarly connotation.

# How to establish anchors for use with the template suite supporting shortened footnotes and Harvard referencing:

[https://en.wikipedia.org/wiki/Template:Cite\\_book#Anchor](https://en.wikipedia.org/wiki/Template:Cite_book#Anchor)

## Anchor

•**ref**: the citation's HTML anchor identifier. When set, `|ref=ID` generates an anchor with the given *ID* (the `id` attribute in the citation's `<cite id="ID">` HTML tag). Setting `|ref=ID` identifies the template as a target and allows [wikilinking to full references](#), especially useful with short-form citations like [shortened notes](#) and [parenthetical referencing](#). The special value `|ref=harv` generates an anchor identifier suitable for use with `{{sfn}}` and `{{harv}}` templates. When `|mode=cs2` defaults to `|ref=harv`. See [Template:Citation/doc § Anchors for Harvard referencing templates](#).

# Harvard referencing

## All you practically need to know:

- **Mandatory:** |ref=harv  
As in `{{cite book | ... |ref=harv}}` or any other Citation Style 1 or Citation Style 2 ( `{{Citation}}` ) template.
- The **shortened footnote template** `{{sfn}}`, which does not need to be with in `<ref></ref>` tags but are only suitable for singular use
  - [Parameters](#)
- The `{{Harvard citation no bracket}}` or `{{Harvnb}}`, which typically needs to be used within `<ref></ref>` tags & is thus suitable for reuse with the `<ref name="your label here" />` construct.
  - [Parameters](#)

# Harvard referencing examples

- Simple `{{sfn}}` with `|ref=harv`  
[Mary Polly Pa'a'āina](#)
- In progress, mixed use of `{{sfn}}` & `{{harvnb}}` with `|ref=harv`  
[Anton Chekhov](#)
- A start to finish implementation of `{{sfn}}` & `{{harvnb}}` with `|ref=harv`  
[Kit Bakke](#)

# The future: Citations in Wikidata What the French Wikipedia is doing
