(B) -SUBJECT INDEX.

In this section of the Index an attempt is made to enter the notices in such a way as to enable all references in the "Journal" to similar goods and similar matters to be readily found. For this purpose most of the notices are grouped under comprehensive headings, and are not entered separately under the heading of the particular article, &c. In some of the more important cases, however, a cross-reference will be found there. The following is a list of some of the sections used, with a rough analysis of their contents:—

| Openings for railway construction, railway material | |
|--|----------------------------------|
| and rolling stock | Railway material. |
| Openings for tramway construction, tramway material | Tunamana manananini |

| | |

In the Subject Index, tender notices of purely passing interest (which are usually out of date by the time of the publication of the Index) are not entered at all; they may be found under the various countries in the Geographical Index.

Notices of tariff changes and customs regulations are not indexed according to subject, except in-the more important cases, owing to the impracticability of giving a list in any way complete of references to each article.
