Never Fails to Give Satisfaction

Remember! Fall, Not Spring Is the Best Time to Seed Your Lawn.
Seed from August 1 to October 10

BOLGIANO'S "CAPITOL PARK" LAWN GRASS SEED

Has Greatly Helped to Make Washington the City Beautiful. Used in Seeding Many of the Handsome Lawns Surrounding the Government Buildings. It Never Fails to Give Satisfaction.

BOLGIANO'S "CAPITOL PARK" LAWN GRASS SEED, from yearly comparative trials, has proven to be unsurpassed for first-class and permanent results. This is due to the fact that we use only the very finest varieties of the most suitable grasses, thoroughly re-cleaned, free from all chaff and weed seeds.

BOLGIANO'S "CAPITOL PARK" LAWN GRASS SEED contains a well-balanced blend of various American and foreign fine bladed and deeply rooting grasses which has proved to produce the very best results under the varied conditions as to soil and climate met with in America.

BOLGIANO'S "CAPITOL PARK" LAWN GRASS SEED will give a green, smooth, velvety sod with a thick bottom and free from such varieties of common grasses as produce clumps and knots on the lawn, which so frequently spoil the desired smooth and deep effect.

Pkt., 10c; lb., 40c; 10 lbs., \$3.50; 25 lbs., \$8.25.

BOLGIANO'S "SHADY NOOK" LAWN GRASS SEED

The Grass That Will Grow in Shady Places

It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted for growing in shade and as it blends well with our Capitol Park Lawn Grass Seed it may be used on those portions of the lawn which are shaded by trees, buildings, etc., thus covering the whole area with a beautiful carpet of green.

Perennial and Biennial Seeds and Plants for Fall Planting

Once planted they appear themselves each year and do away with the necessity of annual seeding. Sown in late Summer or early Fall, bloom next year. No garden is complete without a liberal space devoted to hardy Perennials.

PLANTS. We can supply large field grown plants ready to be transplanted, after August 15th. For those who cannot conveniently raise their own plants from seed, or who have put off sowing until too late, our strong field grown plants are most satisfactory.

FLOWER SEEDS FOR FALL SOWING

Few know that many varieties of annual flower seed may be sown in the fall just previous to the late heavy frosts. In this way, which is Nature's own, earlier blooms and sturdier plants are obtained. The seed lies dormant during the winter but early in the spring it germinates and begins a root system long before one can prepare the ground for spring sowing. The ground should be carefully prepared and the seed not planted too early in the fall, as that would cause it to germinate and die.
