Image contributions

INTERACTION FLOW

Add image to article without a lead image

Image contribution whilst reading

USER STORY: READER

When I'm reading an article which is missing a lead image and I have a suitable image of on my device, I want an easy way to add that image to the article.

CORE INTERACTION FLOW

1. Opening an article (which doesn't yet have a lead image) and tap on an add image icon
2. Accept permission for app to access camera and storage [first time only]
3. Select an image from the device photo album (note there is an option to search Commons if the user doesn't have an image on their device)
4. Preview of image which may be edited (align, crop, potentially other filters on the device).
5. Confirm image will be added (prompt to login/join Commons in order to add image)
6. Upload success message, pending confirmation via an image moderator.
7. Notification when the image has been accepted or rejected.

Assumption is that the lead image will be added to the the info box if there is one, else in the first paragraph.

ADD IMAGE

Niels Bohr Institute

Danish research institute for physics

[Placeholder text block containing multiple lines of gray and blue bars representing text content]

Open an article (without a lead image)
and tap on the add image icon
