Immaculata Chapel St. Marys Kas. Transept Window

The Reverend Clergy when building churches are so beset by inquiries and flooded with correspondence that it is an impossibility to send replies to them. Hence they are obliged to consign all to the same repository—the waste basket. In this way the good and the bad are treated impartially.

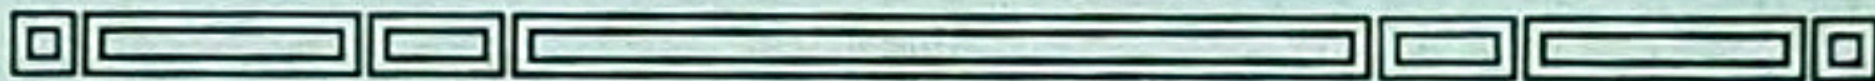

To avoid this fate we produce on the pages of this booklet cuts of windows made in our studios which we have put in several churches of various architectural styles, with the hope that you, dear Father, may look them over and perchance be interested enough to preserve it for future reference.

We indulge in no self-laudatory remarks but present a few short letters from those for whom we have made windows. With these and the silent appeal from the examples of our art contained herein we hope to interest you.

Dear Sirs:—We are not sorry that we spent thirty-three hundred dollars (\$3,300.00) for the art glass that you placed in our new church. It is the best investment we have made in the church. All the figure windows are works of genuine art and give evidence of the great ability of the manufacturers. Everyone is in love with them. They surpassed my expectations. Correspondence

The Reverend Clergy will find us always willing to answer all questions relative to Stained Glass Windows fully and promptly. That we may do so advisedly, we respectfully request that you send the approximate size of the window. That is, the glass size required, and also a simple sketch to give us an idea of the shape, so we can send designs suited to the architectural lines of the church.

We send designs, photos and samples free of cost and without obligation to purchase, but as in doing this we incur considerable expense, it is not asking too much when we request that you always give us as much information as to shape and size of windows required, figure subjects preferred, and any other preferences you have regarding windows as you possibly can.
