PREFACE

This Gazetteer presents an alphabetical list of names of geographic features of Borneo within the limits shown on the chart following this page.

All names listed are transcribed exactly as they appear on the source chart or map. Alternative names are printed in *italic*, but no preference in usage is indicated by distinction in type or arrangement.

The coordinates accompanying each name are obtained from the source chart or map and are given to the nearest full minute. All longitudes are from Greenwich. No attempt has been made to reconcile differences in the coordinates of the source material.

Hydrographic charts published by various countries were examined in the preparation of this Gazetteer. The code designation of the source from which each name was taken is shown opposite that name, and the identification of each of the 178 charts is given in the "List of Sources" at the end of the Gazetteer.

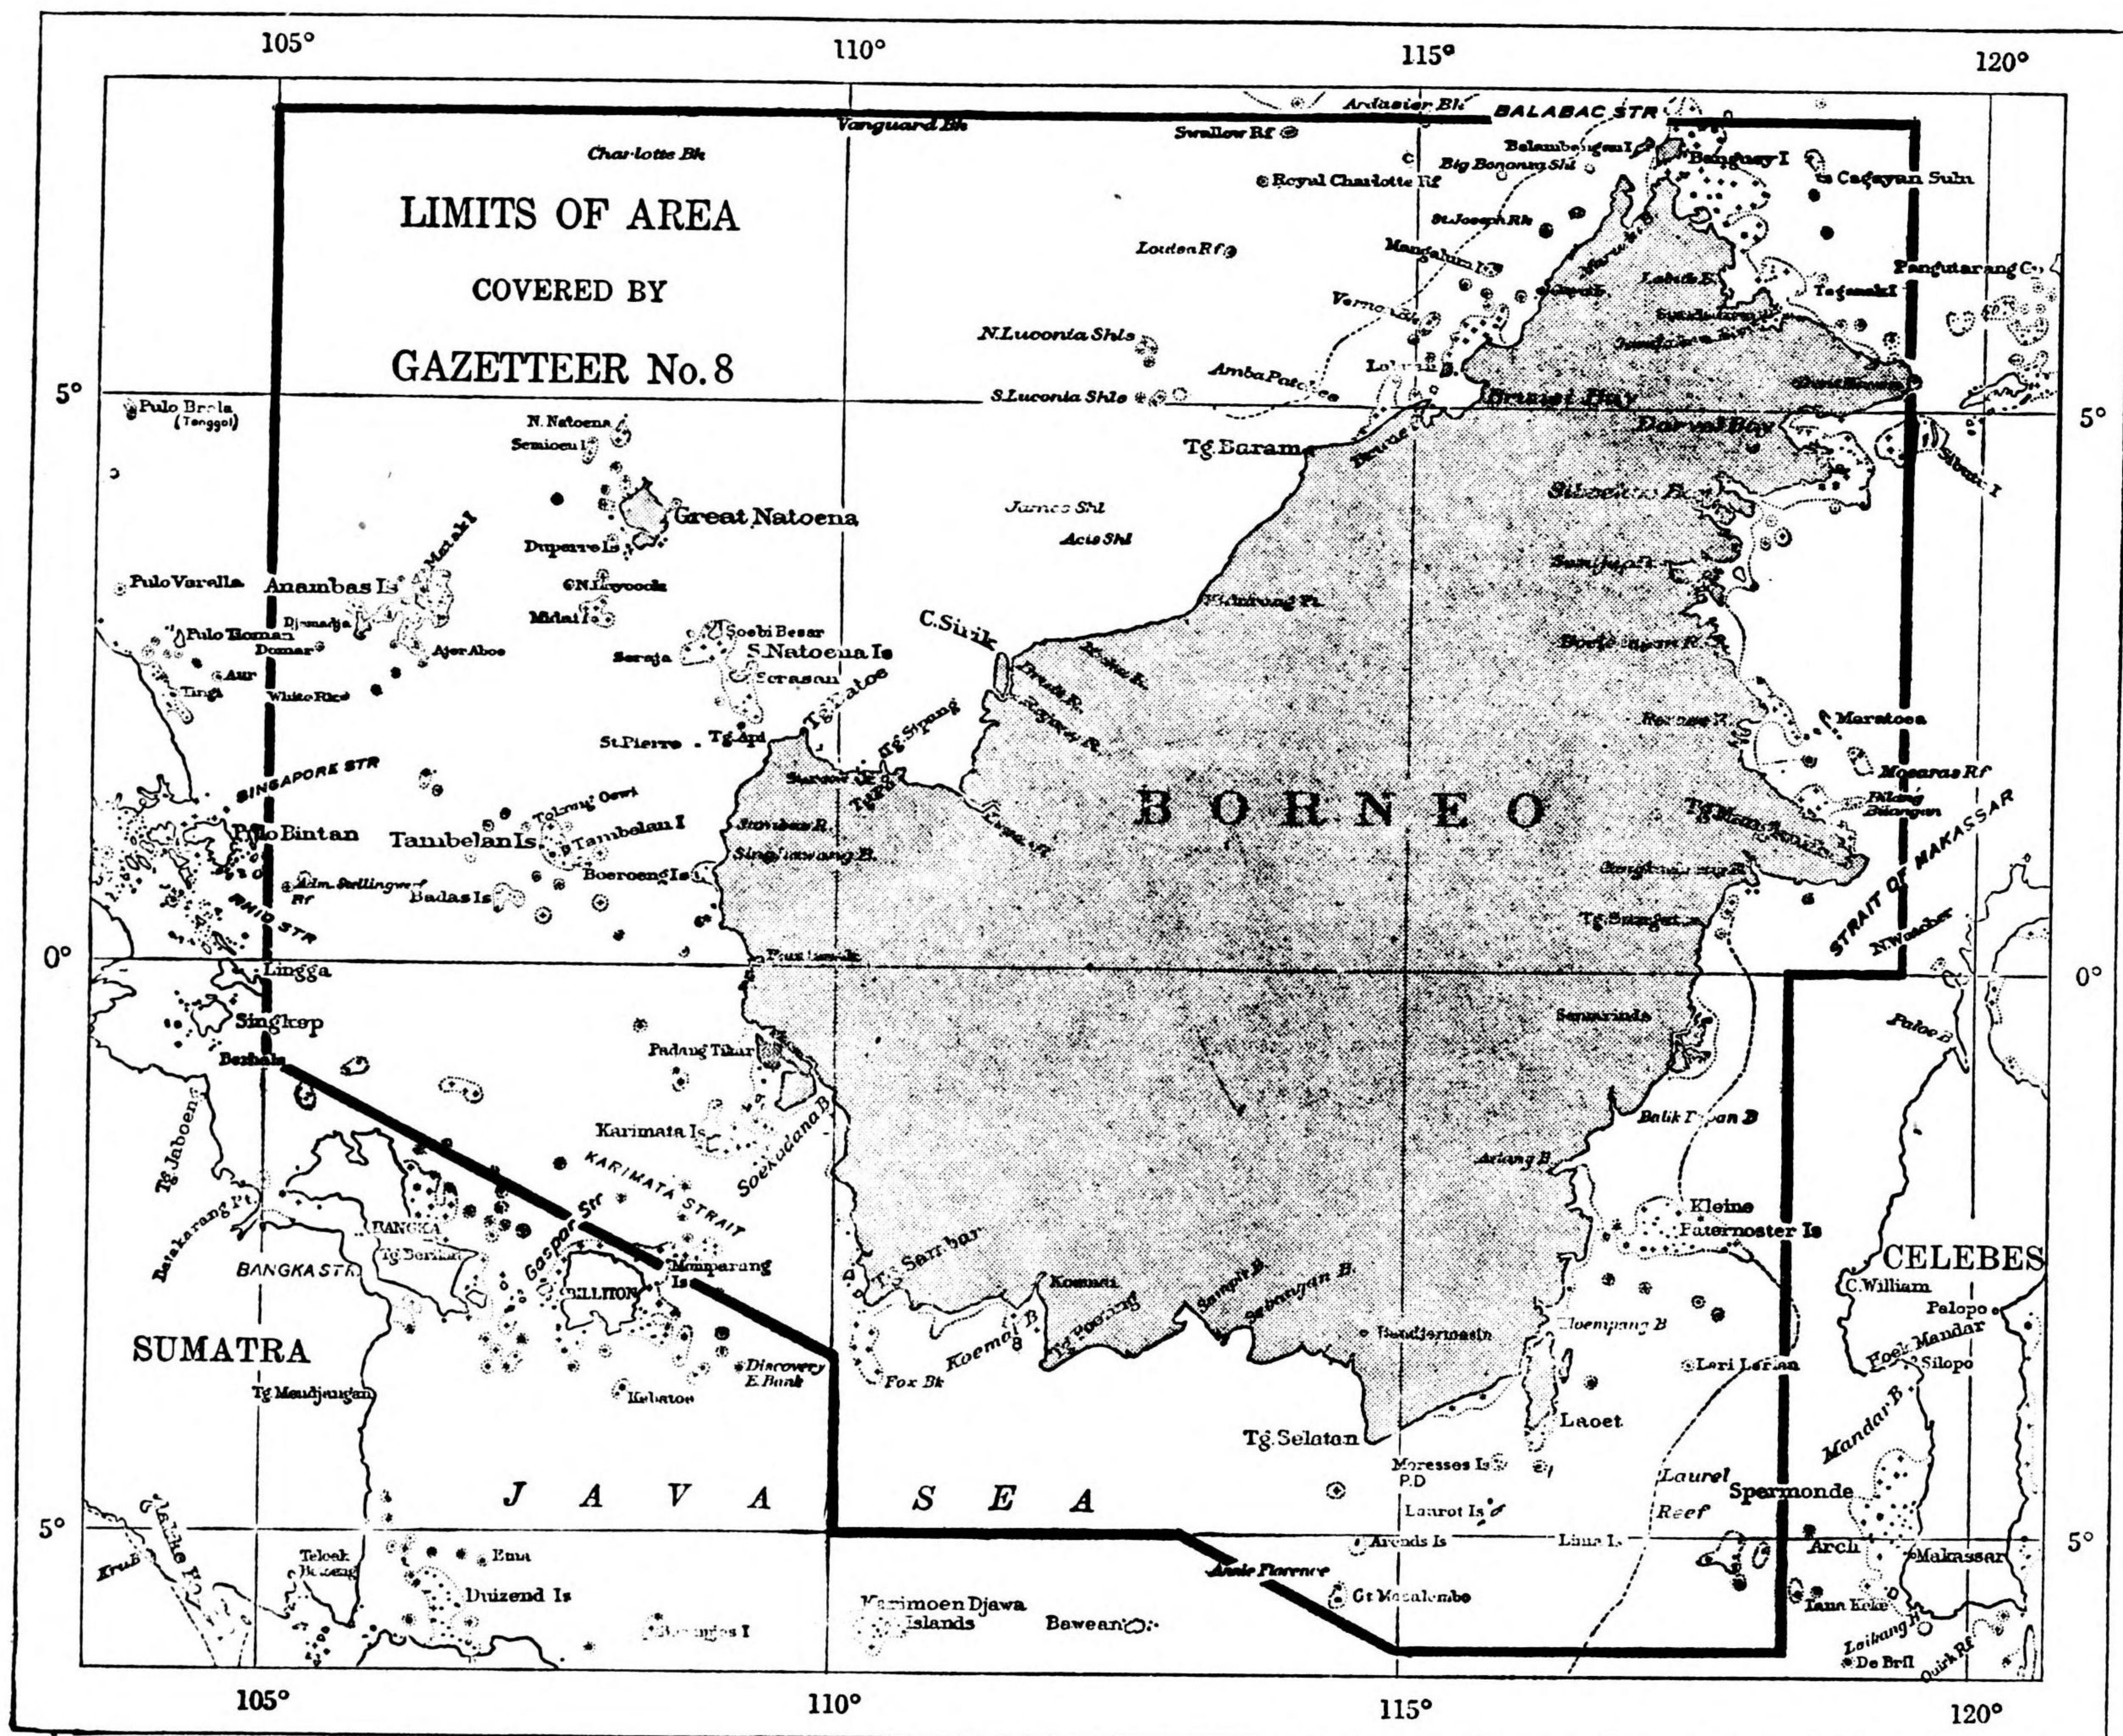

It is requested that errors or omissions noted in this publication be referred to the Hydrographic Office, Navy Department, Washington, D. C.
