Practical Aids for the College Student
A welcome Christmas present for
boys and girls at school or at college
is a practical outfit for making hot
drinks which can be kept in their
rooms. Tea and coffee are not to be
recommended for growing people, but
soups, milk, milk soups and other
easily prepared and nourishing
drinks are very valuable for those doing
concentrated brain work.

Soap and Middy's Hands

No really capable woman objects to
doing her own housework, but there
are certain consequences which follow
the doing of it that are not always
either agreeable. One of the most
annoying is roughened hands. This
comes largely from using powerful
agents in cleaning. Many washing
powders and soaps are most efficient,
but hands suffer from their application
as well as dirt. Many utensils cannot
be kept clean without some such
powerful remedy, therefore it is better to
use only such material in kitchen uten-

The School Garden Association of America
At the request of the president of the
School Garden Association of America,
of which body Mr. W. O. Hart, of
this city, is one of the directors and
trustees, he begs to call attention to
the advantages of membership therein,
particularly to school children; there
is an associate membership whose
rate is but twenty-five cents a year
and every member receives the month-

Two-Bits for Health

The South is getting down to work
in earnest in the effort to stamp out
tuberculosis. Every State is pushing
the sale of Red Cross Seals and Louis-
iana, in particular, has perfected a
plan for a State-wide campaign
against the disease. Only a very small
sum — two-bits, will be asked from
persons. This will furnish revenue for
sanatoria, visiting nurses and other
necessary features of the anti-tuber-
culosis work. Don't you think two-bits
a small amount to protect you and
your family from the menace of those
afflicted with consumption? Do you
think you are safe so long as tubercu-
losis germs are freely scattered on our
streets and by workers in our homes?
Some consumptives need help; some
need advice, and we all, sick or well,
need information how to preserve, con-
trol and stamp out the Great White
Plague.
