LILIUM LONGIFLORUM (Japan Grown)

(We are positively headquarters for these.)

THE STOCK WHICH WE SUPPLIED LAST SEASON
GAVE EXCELLENT RESULTS.
AS OUR MANY CUSTOMERS WHO GREW THEM
.. .. WILL TESTIFY.

JAPAN LILIUM LONGIFLORUM will be grown extensively the coming season as a substitute for Liliium Harrisii for late or Easter flowering, because they have usually proven much more free from disease than Harrisii, as well as unmixed with the latter variety. They are also much more reasonable in price, as shown below.

OWING to the increasing demand for this Lily the supply will likely be exhausted before planting time and it is DOUBTFUL if LATE ORDERS will be filled in full. Price subject to change. We supply 250 at thousand rate.

NAMED DUTCH ROMAN OR MINIATURE HYACINTHS.

These cannot be excelled for growing either for cut-flowers or pot plants, owing to cheapness of Bulbs, and earliness of flowering. The named varieties are particularly good for growing three or six in a pot as they produce strong spikes, almost equal to those of the second size named; flowers are stronger and larger than blooms of French Romans.

NAMED VARIETIES.

Gertrude , dark rose, medium early.	Grandeur a Merveille , rosy white.

FRENCH ROMAN HYACINTHS.

Our first deliveries of White Roman Hyacinths for several seasons past have been from two to three weeks in advance of most other jobbers because of using express trains through France and fast steamer lines to New York. Early buyers get the advantage of personal inspection of first early stock. We are glad to sell by sample at any time after the first bulbs arrive as there is a very large difference to be noticed in the stock supplied by the different French houses. We promise sound, healthy bulbs up to date in sizes and all carefully inspected by us. The buyer will meet many different prices in this stock this season; but vary as these may, they will not differ so much as the sizes and qualities which will be supplied.

WE DO NOT RECOMMEND THESE FOR Forcing.

We beg to call particular attention to our "Forcing" Grade of Mixed Hyacinths. These are equally as good Bulbs as those of the **SECOND SIZE NAMED**, and are made up of only best colors. Florists who do not wish to secure named sorts for pot growing will do well to plant these.

NARCISSUS.

The varieties offered below include the most popular and salable sorts of this favorite forcing flower which is advancing yearly in popularity. These flowers are especially adapted for florists, being showy, fragrant and lasting.

25 bulbs of one kind at the 100 rate, or 250 at the 1000 rate.

Chinese Narcissus are the most salable bulbs to retail buyers; they are cheap, well-known and give universal satisfaction.

LILIUM CANDIDUM "Thick Petaled."

It is known to most growers of this Lily that there are two strains. The flowers of each show in substance a marked difference. The better one shows a wider flower, with petals much more firm and of greater substance, and while seen occasionally, in the usual crop of *Lilium Candidum* they are generally scarce, and only a few lots of these lilies show the best types of flowers. Last season, however, we secured one importation of the true variety which we call "THICK PETALED," and they have given our customers excellent satisfaction. We are for this season again importing a good stock of this particular variety, and offer it is the best and most substantial type of *Lilium Candidum*.

Price, per hundred, \$3.00; per thousand, \$50.00.

CRIMSON RAMBLER.

ROSES.

THE CRIMSON RAMBLER.

THIS ROSE SOLD IN 6 AND 7 INCH POTS IN EASTERN CITIES THE PAST EASTER AT \$5.00 AND \$7.00 EACH.

As a pot plant for retail sales this rose is incomparable. Its hundreds of blossoms all open together and seem to improve for at least two and even three weeks. The bright crimson color holds without fading and contrasts finely with the glossy foliage. IT FORCES EASILY. We have fine dormant stock.

2 year old, 2 to 3 feet, well branched per doz., \$2.00; per 100, \$15.00
 3 year old, 4 to 5 feet, well branched, heavy per doz., 3.00; per 100, 20.00
 2½ inch pots, per doz., 75c.; per 100, \$4.00.

Yellow Rambler. (AGLAIA.) This rose is the hardest yellow climbing rose yet introduced, and quality of hardiness has been an extremely difficult one to combine with yellow color. It blooms like Crimsou Rambler in large trusses.

Pink Rambler, OR EUPHROSYNE. Color, a clear light red, with numerous golden anthers. Similar to Aglaia in nearly all respects, save color.

White Rambler, OR THALIA Pure white. In other characteristics very similar to Aglaia.

PRICE FOR YELLOW, WHITE AND PINK RAMBLERS:

2½ inch pots, per doz., 75c.; per 100, \$4.00; 1-year, dormant plants, per doz., \$1.50; per 100, \$10.00; 2-year dormant plants, per doz., \$2.00; per 100, \$15.00.

DORMANT 2-YEAR OLD ROSES.

HARDY PERPETUALS AND OTHERS.

VAUGHAN'S

The Best
...IN AMERICA..

Florists' Flower Seeds.

TO HAVE "THE BEST FLOWER SEEDS IN AMERICA"

is, and has been our aim and ambition for years, and judging by the great increase in our sales of Flower Seeds to the Trade and Florists, as well as the retail buyers, and knowing the quality we supply, we can safely say—there are none better. Our knowledge of the Flower Seed business has been gained by practical labor among the plants in the fields, by frequent trips of inspection through European and American seed farms and by the study of the demands of the trade.

Our list contains *all the best novelties* that we know to be worthy of cultivation and that are improvements on the older kinds or entirely new varieties, as well as *all the standard sorts*. The quality of our seeds is the very best, and our prices are reasonable.

PLEASE NOTE.—Trade packets contain considerable more seed than ordinary or retail packets, being based on Florist's needs for ordinary purposes. Florist's invariably get Trade Packets unless otherwise specified.

Vaughan's "ROSE GROWER" Bone Meal.

This is a special brand we have put up for our trade. It is ground fine, hence acts quickly. Free from acid, very white in appearance, and a superb article. It is made from bone accumulated in large slaughter houses, and should not be compared with the Bone Meal made from cattle heads and feet gathered up on the Western prairies. Such Bone Meal, which is dark in color, is flinty in character, slower to act and not nearly so desirable as our "Rose Grower" bone. Furthermore, the bones of many diseased animals are used in the manufacture of that dark Bone Meal and it is therefore a little dangerous. Our "Rose Grower" bone has been slightly steamed to soften it so it can be ground fine, and is thus quicker in its action. The finer bone is ground, the quicker the mild acid thrown out by the tiny roots of the plants can dissolve the bone and make use of it as food. A finely ground bone can also be more evenly distributed through the soil. ANALYSIS.—Ammonia, 4½ to 5½ per cent. Total phosphoric acid, 22 to 25 per cent. Total bone phosphate, 48 to 54 per cent.
