## INTRODUCTION

This annual publication brings together comprehensive data collected by county and State Agricultural Stabilization and Conservation Committees relative to conservation measures performed on farms participating in the 1962 Agricultural Conservation Program.

The tables and maps in this publication are designed to permit detailed analyses of the various conservation practices and program provisions, including information with respect to 1962 participation, assistance, pooling agreements, the Naval Stores Conservation Program, and other related data. Summary and comparison tables showing selected pertinent data from previous years are included for use in comparing and evaluating 1962 and earlier program results.

Information on the extent of conservation measures performed under the 1962 Agricultural Conservation Program and amounts of assistance for such measures was obtained from a complete tabulation of individual farm data. The amounts shown under "Assistance" are tabulations of the Federal cost-shares paid to farmers for performing practices. The "Assistance" shown for each practice does not include any of the funds for "Small Cost-share Increases" which are required by law.

This publication also contains information relative to the 1962 Emergency Conservation Measures (Supplemental).

Information for previous years has been published in earlier issues of this series, in "Agricultural Statistics", and in annual reports of the Chief of the Agricultural Adjustment Agency and the Administrator of the Production and Marketing Administration.

1/ Includes only cash assistance and properly used CMS. Does not include funds used for small cost-share increases, program and technical services, or funds for unused CMS.

2/ Includes Puerto Rico and Virgin Islands.

3/ Includes administrative divisions defined by the Agricultural Stabilization and Conservation Service.

4/ Does not include any acreage for which assistance for these materials was given under another practice.

5/ Includes only the acreage for which adequate drainage was obtained under the 1962 ACP.

6/ All data except the amount of assistance may duplicate.

7/ The extent represents all of the irrigated acreage on farms performing the practice.

8/ Applicable to trees previously worked, specially selected, or 10 inches or larger.

9/ Assistance for these practices supplemented the Regular ACP practices. Funds were authorized under Public Laws 85-58, 85-170, 85-766, and 87-332.

10/ Includes funds used for: practice cost-shares, small cost-share increases, program services, nondeductible CMS, and technical services furnished by other agencies. Excludes funds used for the purchase of unused CMS and funds advanced for small cost-share increases in connection with such CMS.

\* Includes components performed under the 1962 ACP which do not represent the complete practice.

▲ 0.005% or less. ▲▲ Number of farms exceeds number of units because of pooling agreements.

\* In addition to these measures which are primarily for wildlife, many other measures shown also provide important secondary benefits to wildlife.

● Will include duplication where more than one practice performed on the same acre. ●● Number of farms exceeds number of participants receiving cost-shares because of multiple farm ownership.

\* Number of farms exceeds number of participants receiving cost-shares because of pooling agreements.

## INTRODUCTION

This annual publication brings together comprehensive data collected by county and State Agricultural Stabilization and Conservation Committees relative to conservation measures performed on farms participating in the 1963 Agricultural Conservation Program.

The tables and maps in this publication are designed to permit detailed analyses of the various conservation practices and program provisions, including information with respect to 1963 participation, assistance, pooling agreements, the Naval Stores Conservation Program, and other related data. Summary and comparison tables showing selected pertinent data from previous years are included for use in comparing and evaluating 1963 and earlier program results.

Information on the extent of conservation measures performed under the 1963 Agricultural Conservation Program and amounts of assistance for such measures was obtained from a complete tabulation of individual farm data. The amounts shown under "Assistance" are tabulations of the Federal cost-shares paid to farmers for performing practices. The "Assistance" shown for each practice does not include any of the funds for "Small Cost-share Increases" which are required by law.

This publication also contains information relative to the 1963 Emergency Conservation Measures (Supplemental).

Information for previous years has been published in earlier issues of this series, in "Agricultural Statistics", and in annual reports of the Chief of the Agricultural Adjustment Agency and the Administrator of the Production and Marketing Administration.

- 1/ Includes only cash assistance and properly used conservation materials and services. Does not include funds for small cost-share increases, program services, technical services, or unused GMS.
- 2/ Includes Puerto Rico and the Virgin Islands.
- 3/ Includes administrative divisions defined by the Agricultural Stabilization and Conservation Service.
- 4/ Does not include any acreage for which assistance was given under another practice.
- 5/ Includes only the acreage for which adequate drainage was obtained under the 1963 ACP.
- 6/ The extent represents all of the irrigated acreage on farms performing the practice.
- 7/ All data except the amount of assistance may be duplicated in Practice 6-12.
- 8/ Applicable to areas previously worked, specially selected, or 10 inches or larger.
- 9/ Assistance for these practices supplemented the Regular ACP practices. Funds were authorized under Public Laws 85-58, 85-170, 85-766, and 87-332.
- 10/ All data except the amount of assistance may be duplicated in Practice P-4B(41).
- 11/ Includes funds used for the purchase of unused GMS and funds advanced for small cost-share increases in connection with such GMS.
- ▲ Number of farms exceeded number of units because of pooling agreements.
- \* In addition to these measures which are primarily for wildlife, many other measures shown also provide important secondary benefits to wildlife.
- Number of farms exceeded number of participants receiving cost-shares because of multiple farm ownerships.
- Number of farms exceeded number of participants receiving cost-shares because of pooling agreements.

<sup>3</sup> Includes individuals receiving cash assistance or CMS, and participants in the Supplemental (Emergency) Agricultural Conservation Program and the Naval Stores Conservation Program.

<sup>4</sup> Excludes funds: for administration; for unused CMS and small cost-share increases in connection with such CMS.

<sup>5</sup> Excludes funds: for unused CMS and small cost-share increases in connection with such CMS; for administration; and all data relative to the Naval Stores Conservation Program.

▲ Excludes data relating to the Insular Areas.

‡ Includes \$30,475,000 for potatoes and truck crops from funds under Section 32, Public Law 74-320.

\* Includes \$22,455,000 for flax authorized by Section 5, Public Law 78-551.

\* Includes \$5,067,326 used for the determination of most-needed practices on individual farms.

● Excludes data with respect to the 1956 Emergency Coffee Grove Restoration Program, except in the Total Assistance and Supplemental (Emergency) Assistance columns. The average total assistance does not include data relative to this program. The Emergency Coffee Grove Restoration Program, applicable only in Puerto Rico, was designed to restore coffee groves damaged by high winds resulting from Hurricane Betsy, and was administered by the Puerto Rican Government under agreement between the Secretary of Agriculture and the Commonwealth of Puerto Rico. Assistance in the amount of \$961,175 was given to the 27,438 individuals who participated in the program.
